# WELCOME TO UC SANTA CRUZ

---

## 2015-16 General Catalog

Welcome to UC Santa Cruz. For 50 years, UCSC has been known as an extraordinary place for students to pursue their interests and discover their passions.

That has never been more true than it is today, when UCSC is ranked first in the world for research influence. Faculty here are doing pioneering work that is recognized around the world; they are charting new directions and changing paradigms. For students—undergraduate and graduate—it means you will be learning from and working alongside people who are the best in their fields. You will be partnering with scholars, scientists, artists, and engineers whose own quest for knowledge is as alive today as when they were undergraduates.

And what a place to learn! This campus is one of the most beautiful in the country, with redwood forests, grassy meadows, and oak-studded hills affording unparalleled views of the Monterey Bay. The setting will inspire and renew you, while the facilities support your intellectual and physical development.

When UCSC first welcomed students to campus in 1965, they were greeted by the motto of Cowell College: The pursuit of truth in the company of friends. That motto resonates today on a campus where faculty and staff are dedicated to student success. Our 10 residential colleges provide small living and learning communities that offer leadership opportunities, extracurricular activities, and social engagement. Because these years are not solely about learning. Be sure to try new things, whether in student government or on the soccer field.

As we embark on our second half-century, I welcome you to UC Santa Cruz and look forward to having you become a part of our story.

Sincerely,

GEORGE BLUMENTHAL  
Chancellor

# ABOUT THE CATALOG

---

2015-16 General Catalog

---

## UCSC GENERAL CATALOG 2015-16

---

This catalog contains the basic information about UC Santa Cruz. A complete list of academic programs and concentrations, both graduate and undergraduate, appears in the [Fields of Study](#).

The next part of the catalog is divided into sections describing various aspects of the campus: [undergraduate admission and financial information](#), the [undergraduate academic program](#) (including advising and support services), [graduate education](#) (including information on graduate student admission, expenses, and financial support), [research programs and facilities](#), and the [10 residential colleges and student life](#).

The academic programs and courses offered at UCSC are described in detail in the [programs and courses](#) section. The listings are alphabetical, with appropriate cross-references.

The Santa Cruz teaching staff and their academic qualifications, the University of California administration, and the Santa Cruz campus administrative staff appear in the [teaching and administration](#) section.

The catalog constitutes the campus's document of record. While every effort is made to ensure the correctness and timeliness of information contained in

this catalog, changes are likely to occur after publication. On an ongoing basis, the university is examining ways to bring the greatest possible efficiency to the delivery of its programs and curricula. This process may result in changes in services, teaching and administrative staff, and curricula and courses that could not be reflected in this catalog, which was prepared well in advance of the 2014-15 academic year. Updates to course information are available in the quarterly [Schedule of Classes](#) and the [Class Search](#). (Additional web sites are referenced throughout this catalog. However, they are maintained by individual units and may not reflect approved general information, curricula, or course information.) In addition, several publications are available that include detailed information about specific subjects such as graduate programs, housing, and financial aid.

It is the responsibility of the individual student to become familiar with the announcements and regulations of the university that are printed in this catalog and other campus publications. The catalog is the document of record for major and program requirements. It is updated annually.

# INTRODUCING UC SANTA CRUZ

---

2015-16 General Catalog

---

## THE UNIVERSITY OF CALIFORNIA

---

The University of California was chartered as a land-grant college in 1868. From its rural beginning, the university has developed into one of the world's most distinguished universities, acclaimed for its research, scholarship, and dedication to undergraduate and graduate education. There are 10 University of California campuses located regionally throughout the state: Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco, Santa Barbara, and Santa Cruz. In addition, there are some 800 associated research institutes, laboratories, agricultural field stations, and extension centers serving California and the nation. The university is the primary state-funded academic agency for research. Its library collection, with 37 million volumes, is among the best in the country.

The University of California faculty, more than 16,000 in number, is distinctive in its 31 living Nobel Laureates and 419 members of the National Academy of Sciences—more than any other college or university system. Faculty membership in the American Academy of Arts and Sciences totals 489.

The University enrolls more than 183,000 undergraduates selected from the top 12.5 percent of the state's high school graduates and approximately 50,000 graduate students. The 1.7 million living alumni enrich the nation with public service and leadership.

---

## THE SANTA CRUZ CAMPUS

---

Since its inception in 1965, the University of California, Santa Cruz, has been dedicated to excellence in undergraduate education, graduate studies, and research. UC Santa Cruz students can take advantage of innovative academic planning combined with the research resources and scholarship strengths of the University of California system. At UC Santa Cruz, a program of general education is enhanced with opportunities for academic specialization.

**Planned enrollment of the campus** for the 2015-2016 academic year is approximately 17,350 students, of whom 1,565 will be graduate students. UCSC seeks and welcomes students, faculty, and staff of diverse ethnic and cultural experiences and the campus plans to increase both its enrollment and resources and to diversify its educational and research opportunities over the next few years.

**UC Santa Cruz faculty and emeriti** include 14 members of the National Academy of Sciences, 26 members of the American Academy of Arts and Sciences, and 34 members of the American Association for the Advancement of Science. Numerous faculty have been awarded Guggenheim Fellowships, and several have been awarded national awards for distinguished teaching. Three faculty members, three bachelor's degree recipients, and two Ph.D. recipients have been named MacArthur Fellows, and since 1972, when UC Santa Cruz began participating in the program, about 120 Fulbright scholarships have been awarded to UC Santa Cruz students and alumni.

**The residential colleges** are an important part of the UC Santa Cruz undergraduate experience. The 10 colleges divide the university into smaller communities, each serving as a social and intellectual gathering place for 1,400 to 1,700 students and 30 to 110 faculty fellows from a variety of academic disciplines. Every undergraduate student affiliates with a particular college while participating in a campuswide academic program. All of the colleges are interdisciplinary, and all academic majors are open to students from all colleges.

Each college has a distinctive quality derived from its core course and extracurricular programs and from its faculty fellows and their academic disciplines. Detailed descriptions of the 10 colleges can be found in [The Colleges](#) section of the catalog.

**Undergraduate education** at UC Santa Cruz is focused on the individual student. UCSC's college core courses give first-year students a small-seminar experience in their first year; intensive work in writing, discussion, and critical reasoning; as well as an orientation to academic life. To fulfill the campus's rigorous comprehensive requirement, every senior must pass a comprehensive examination or complete an equivalent body of work.

Individual research is encouraged, and hundreds of research papers coauthored by UC Santa Cruz undergraduates and their professors have been published in journals. For additional information, visit the [Undergraduate Research Opportunities web site](#).

Annually, more than 500 UC Santa Cruz students broaden their academic careers through the [UC Education Abroad Program \(EAP\)](#), which allows students to incorporate full-time study abroad as UC credit toward their degrees. The EAP provides a vital

## Introducing UC Santa Cruz

international connection for academic and personal growth in an increasingly interdependent world (see [International Education Office](#)).

The UC Santa Cruz campus strongly encourages undergraduate students to take advantage of the many opportunities for public service such as those provided through the campus's field programs, colleges, and Career Center. Individual studies, apprentice teaching, field studies, and internships can be important parts of the undergraduate experience (see [Field Programs](#)).

**Graduate education.** The UC Santa Cruz campus offers graduate programs in more than 30 fields. Within the graduate programs, there are a range of options for concentrated study in a specialized field. Graduate study at UC Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. Further graduate information is provided in the [Graduate Education](#) section of the catalog.

**Research.** The UC Santa Cruz campus hosts a number of major research units. UC Observatories, the Santa Cruz Institute for Particle Physics (SCIPP), and the Institute of Marine Sciences conduct state-of-the-art research on topics ranging from the discovery of planets outside our solar system, to the detection of new sub-atomic particles, to the ecology of marine mammals. UC Santa Cruz is also a primary partner in inter-UC campus initiatives—such as the Institute for Quantitative Biomedical Research (QB3) and the Center for Information Technology Research in the Interest of Society (CITRIS)—which focus on human health and the use of information technology to solve social, environmental, and health care problems. The Institute for Humanities Research (IHR) oversees a range of topical centers that promote interdisciplinary research, including the Center for Cultural Studies, the Center for Jewish Studies, the Center for Labor Studies, the Linguistics Research Center, and the Dickens Project. Research enterprises within the arts benefit from the Arts Research Institute and the Center for Documentary Arts and Research. The Center for Agroecology and Sustainable Food Systems, the Center for Integrated Spatial Research, the Chicano/Latino Research Center, and the Science & Justice Research Center provide pioneering directions for research in the social sciences. Engineering at UC Santa Cruz has focused on strategic initiatives that include the UC Santa Cruz Genomics

Institute, the Institute for the Biology of Stem Cells, the Center for Games and Playable Media, and the Center for Sustainable Energy and Power Systems. Beyond these organized research enterprises, UC Santa Cruz has a wide suite of investigator-driven research that spans the width and breadth of campus inquiry. For additional information see [Resources for Learning and Research](#).

**The central UC Santa Cruz campus** occupies 2,000 acres on the west side of the city of Santa Cruz, on Monterey Bay, about 75 miles south of San Francisco and 35 miles southwest of San José. Expansive meadows at the campus entrance gradually slope up to a redwood forest that covers most of the site. Each residential college is within easy access of the campus's central core, which includes an extensive library, science laboratories, lecture halls, art studios, theater arts and music centers, a student union, and athletic facilities. Although the campus is spread out over many acres of hilly terrain, its programs are accessible to people with mobility impairments (see [Disability Resource Center](#)).

**The city of Santa Cruz** is a well-known recreational area and center for the arts. Mild weather, miles of beaches, and many cultural opportunities combine to make Santa Cruz an enjoyable place to study and live.

**Accreditation.** The University of California, Santa Cruz, is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

Specific degree programs at UC Santa Cruz are also accredited: The Engineering Accreditation Commission of ABET, <http://www.abet.org> (Computer Engineering and Electrical Engineering); the American Chemical Society Committee on Professional Training (Chemistry); and the California State Commission on Teacher Credentialing (Education). To review accreditation documents, please contact the Office of the Vice Provost for Academic Affairs, Kerr Hall, (831) 459-1349, or [vpaa@ucsc.edu](mailto:vpaa@ucsc.edu).\*

\*This paragraph was revised 03/01/16 to reflect the correct title of the Engineering Accreditation Commission of ABET.

<b>Fall Quarter 2015</b>	
Quarter Begins	September 19 Saturday
Instruction Begins	September 24 Thursday
Holidays	November 11, 26, 27 Wednesday, Thursday, Friday
Instruction Ends	December 4 Friday
Final Exams	December 7 -10 Monday-Thursday
Quarter Ends	December 10 Thursday
Holidays (not falling within quarter)	September 7, December 24, 25, 31, January 1 Monday, Thursday, Friday, Thursday, Friday
Campus closure	Thursday, December 24, 2015-Friday, Jan. 1, 2016
Days of Instruction	49
<b>Winter Quarter 2016</b>	
Quarter Begins	January 4 Monday
Instruction Begins	January 4 Monday
Holidays	January 18, February 15 Monday, Monday
Instruction Ends	March 11 Friday
Final Exams	March 14-17 Monday-Thursday
Quarter Ends	March 17 Thursday
Holiday (not falling within the quarter)	March 25 Friday
Days of Instruction	48
<b>Spring Quarter 2016</b>	
Quarter Begins	March 28 Monday
Instruction Begins	March 28 Monday
Holiday	May 30 Monday

Key Dates for 2015-16

Instruction Ends	June 3 Friday
Final Exams	June 6-9 Monday-Thursday
Quarter Ends	June 9 Thursday
Days of Instruction	49
Commencements	June 10-12 Friday-Sunday
Total Days of Instruction	146

## UNDERGRADUATE ADMISSION

---

---

### 2015-16 General Catalog

Undergraduate admission to the University of California is based on academic achievement, as well as a wide range of personal accomplishments and educational contexts. Minimum admission qualifications are the same for each UC campus, but each campus uses faculty-approved selection criteria when the number of qualified applicants exceeds capacity.

If you are considering applying to UC Santa Cruz, the Office of Admissions wants to help you learn more about the campus and its distinctive educational programs. For more information, see [Undergraduate Admissions](#).

If you are able to visit the campus, you may wish to take a student-led tour. The Office of Admissions offers tours on weekdays, and reservations are required. See [Campus Tours](#) for information and tour reservations. You can also visit UC Santa Cruz through our [Virtual Tour](#) of the campus.

The Undergraduate Admissions Office also offers Transfer Information Sessions for junior-level transfer students. For session information and reservations, please see [Transfer Information Sessions](#).

The University of California, Santa Cruz, continues to take positive steps to increase the diversity of the student population, including applicants coming from low socioeconomic backgrounds, students with disabilities, current members of the military, military veterans, and non-traditionally aged students. In addition, the campus welcomes students from throughout the U.S. and the world. The university does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (pregnancy, childbirth, and medical conditions related to childbirth), disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a military veteran or special disabled veteran in admission to or participation in its programs, activities, or services.

**Educational Opportunity Programs** at UC Santa Cruz are designed to encourage students from educationally and/or economically disadvantaged backgrounds to prepare for and enter the university. For a description of these programs, see [Educational Opportunity Programs](#).

**Admission by Exception.** Admission by Exception is granted to a very small percentage of applicants who do not meet UC requirements. Such factors as academic accomplishments in light of a person's life experiences

and/or special circumstances, socioeconomic background, special talents and/or achievements, contributions to the community, and the quality of the applicant's personal statement are taken into consideration.

**Campus Safety.** UC Santa Cruz campus crime statistics can be viewed in the annual Clery Report, available at the UC Santa Cruz [Police Department web site](#).

**Graduation rates.** The following graduation-rate information is listed in compliance with the 1990 Title I: Federal Right-to-Know Act, Section 103. Fifty-two percent of the students who entered as first-year students in 2010 graduated in four years; 75 percent of those who entered in 2009 graduated in five years; and 77 percent of those who entered in 2008 graduated in six years. In recent years, those who entered as first-year students took an average of 4.4 years to graduate, and students transferring to UCSC as juniors averaged 2.5 years. These graduation rates are well above the national averages.

In accord with the Education Amendments of 1976, Section 493A, more detailed information regarding retention is available on the [Institutional Research Web site](#).

---

---

## ADMISSION PROCEDURES

---

---

The University of California Application for Undergraduate Admission and Scholarships may be accessed beginning August 1 through [admissions.ucsc.edu](#).

In addition to the application, the above site includes a wealth of information for prospective UC students about undergraduate education, admission, financial aid, and various topics of interest.

---

---

## APPLICATION FILING PERIODS

---

---

Applications for the fall quarter must be submitted during the month of November. Applications for winter quarter admission are accepted only as enrollment allows. Check the Office of Admissions in mid-June to see whether UCSC is accepting applications for winter quarter. UCSC does not accept applications for spring quarter admission.

Quarter of Attendance	Application Filing Period
Fall quarter 2016	November 1–30, 2015
Winter quarter 2017	July 1–31, 2016
Fall quarter 2017	November 1–30, 2016
Winter quarter 2018	July 1–31, 2017

---

## APPLICATION FEES

---

The application fee is \$70 (\$80 for international nonimmigrant applicants) to apply to one campus of the university. For each additional campus you select, you must pay an extra \$70 fee (\$80 for international nonimmigrant applicants). These fees are subject to change and are not refundable. The online application includes payment instructions.

---

## FEE WAIVERS

---

The University of California will waive application fees for up to four campuses for certain students who otherwise would be unable to apply for admission. To qualify for the fee waiver, you must meet specific requirements related to your family income and size. The fee waiver is for U.S. citizens and permanent residents only. We encourage students who qualify for a fee waiver to take full advantage of the fee waiver by applying to the maximum of four UC campuses.

Students who qualify for fee waivers and who select more than four campuses must pay \$70 for each additional choice. Methods of obtaining fee waivers are listed below.

An online fee waiver form is available to applicants when they apply. The application automatically determines if you are eligible for the fee waiver as soon as it is complete.

**High school students:** Use the College Board fee waiver. It is available from your school counselor.

**EOPS community college students:** If you are enrolled in Extended Opportunity Programs and Services (EOPS) at a California community college, obtain a fee waiver authorization from the EOPS Office.

---

## ADMISSION AS A FIRST-YEAR STUDENT (FRESHMAN)

---

The university considers you a freshman applicant if you have graduated from high school and have not enrolled in a regular session at any college or university. If you attend a summer session immediately

after graduating from high school, you are still a freshman applicant.

The admission and selection process to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a freshman. Students are encouraged to achieve well beyond the minimum qualifications to enhance their chances for selection.

UC Santa Cruz uses a holistic approach in selecting freshmen for admission. Applicants are thoroughly reviewed to determine the full spectrum of their academic and personal achievements, viewed in the context of their academic and personal opportunities. UCSC uses 14 faculty-approved criteria to determine an individualized, single score for each applicant.

Information regarding the admission and selection process for UC Santa Cruz can be accessed at [admissions.ucsc.edu](http://admissions.ucsc.edu). This site provides information on the minimum qualifications for the University of California for both residents and nonresidents of California, including international students (see also [Admission of Students from Outside California](#) and [Admission of International Students](#)).

---

## HIGH SCHOOL PREPARATION FOR UNIVERSITY WORK

---

Carefully planned high school coursework provides you with the best preparation for your undergraduate university studies, and allows for advanced preparation for your chosen field of study. Most important, students who master certain basic knowledge and skills in high school substantially increase their chances of success at the university. (Requirements for transfer students are explained in the [Admission as a Transfer Student](#) section.)

The basic foundation of UC qualifications is the completion of college preparatory courses required for admission (see [“a–g” Subject Requirement](#) below). However, you should take courses beyond the minimum levels in reading, writing, and mathematics in order to be adequately prepared for basic university courses that you may be expected to take freshman year.

A well-prepared student will have mastered the equivalent of four years of English composition and literature with a focus on expository writing; four years of mathematics, including a precalculus course in the senior year; two to three years of a language other than English; two to three years of laboratory science; two or

more years of history and social sciences; and one or more years of visual or performing arts.

You should also give careful thought to the general field of study, and perhaps the specific major, you want to pursue at the university. By making this decision in advance, you can plan to take additional courses in high school related to the field.

---

## SUBJECT REQUIREMENT

---

**a. History/social science—two years required.** Two years of history/social science, including one year of world history, cultures, and geography; and one year of U.S. history or one half year of U.S. history and one half year of civics or American government.

**b. English—four years required.** Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.

**c. Mathematics—three years required, four years recommended.** Three years of college preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades that your high school accepts as equivalent to its own math courses.

**d. Laboratory science—two years required, three years recommended.** Two years of laboratory science providing fundamental knowledge in at least two of these three foundational subjects: biology, chemistry, and physics. Advanced laboratory science courses that have biology, chemistry, or physics as prerequisites and offer substantial additional material may be used to fulfill this requirement. The last two years of an approved three-year integrated science program that provides rigorous coverage of at least two of the three foundational subjects may be used to fulfill this requirement.

**e. Language other than English—two years required, three years recommended.** Two years of the same language other than English. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses in languages other than English taken in the seventh and eighth grades may be used to fulfill part of this requirement if your high school accepts them as equivalent to its own courses.

**f. Visual and performing arts discipline (VPA)—one year required.** One year-long course of visual and performing arts chosen from the following: dance, drama/theater, music, or visual art.

**g. College preparatory electives—one year required.** One year (two semesters), in addition to those required in “a–f” above, chosen from the following areas: visual and performing arts (non-introductory level courses), history, social science, English, advanced mathematics, laboratory science, and a language other than English (a third year in the language used for the “e” requirement or two years of another language).

**Reading.** University students must be able to read and understand scholarly publications, analyze what they read, and question themselves about an author’s intentions, viewpoint, arguments, and conclusions. You should read commentaries and essays as well as textbooks, and a wide variety of other material—including literature, biography, nonfiction, and criticism—in addition to what you are required to read in class.

**Writing.** You must learn to write clearly and skillfully in English and to think critically and analyze what you learn in class and in your reading, so that you can present your ideas in a clear and persuasive manner.

University students proficient in composition must be able to understand the assigned topic, select and develop a theme by argument and example, use words and sentences that clearly and precisely express what they mean, demonstrate an understanding of the rules of standard English, and punctuate and spell correctly.

**Mathematics.** A number of fields of study require preparation in mathematics beyond the three years necessary for admission to UCSC. All majors in engineering and the physical, mathematical, and life sciences include courses in calculus, as do programs leading to professional degrees in medicine, dentistry, optometry, and pharmacy. Moreover, many majors in the social sciences, business, and economics require statistics and/or calculus.

The recommended four years of high school mathematics should include basic operations with numerical and algebraic functions; operations with exponents and radicals; linear equations and inequalities; polynomials and polynomial equations; functions and their graphs; trigonometry, logarithms, and exponential functions; and applications and word problems.

**Senior-Year (12th-Grade) Program.** The senior year should be used to prepare you for your first year at the university and should include honors and advanced

courses, as well as courses that will strengthen overall preparation. A challenging, successfully completed senior-year program is a natural bridge between high school and university coursework in the intended major. A strong senior program can enhance your chances for admission to UC Santa Cruz.

---

### HIGH SCHOOL PROFICIENCY EXAMINATION

---

While the University of California expects all freshman applicants to have graduated from high school/secondary school, in lieu of the regular high school diploma (or its equivalent), the university will accept the following:

- Certificate of Proficiency, awarded by the State Board of Education upon successful completion of the California High School Proficiency Examination
- General Educational Development (GED) Certificate
- Proficiency tests from other states and other countries

---

### TRANSFER CREDIT

---

Transfer credit may be granted to a freshman applicant for acceptable college courses taken while still in high school if an official transcript is received from the college where the coursework was completed.

Transfer credit is granted for specified College Board Advanced Placement Examinations completed with a score of 3, 4, or 5 and for specified International Baccalaureate Higher Level Exams completed with a score of 5, 6, or 7. A score of 30 or higher on the International Baccalaureate Diploma is also awarded transfer credit.

Transfer credit is granted for specified GCE and Hong Kong A-Level Examinations.

Students should be advised that college courses taken before or after attending UCSC may duplicate AP, IB, and/or A-Level Examinations. Additionally, exams may duplicate each other (for example, an AP or IB exam in the same subject area). If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, UCSC awards credit only once.

---

## ADMISSION AS A TRANSFER STUDENT

---

The University of California defines a transfer applicant as a student who has been a registered student in a college or university, or in college-level extension classes following high school graduation. Summer session attended immediately following high school graduation is excluded in this determination. If you are a transfer applicant, you cannot disregard your college record and apply for admission as a freshman.

The admission and selection process for transfers to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a transfer student. It is expected that students will have completed the lower-division courses required by their intended major prior to transfer. See [Major Preparation Selection Criteria](#) for an annual listing of all majors that require specific courses/grades **prior** to transfer to UCSC.

Transfer applicants are thoroughly reviewed to determine their full spectrum of academic and personal achievements, including transfer coursework completed for their intended major. UCSC uses faculty-approved criteria to determine which transfer students will be selected for admission. UC Santa Cruz gives the highest priority to junior-level transfer students coming from California community colleges.

Information regarding the admission and selection process for UC Santa Cruz can be accessed at [admissions.ucsc.edu](http://admissions.ucsc.edu). This site provides information on the minimum qualifications for the University of California for students in California, in other states, and outside the U.S.

---

## UC SANTA CRUZ TRANSFER ADMISSION GUARANTEE (TAG) PROGRAM

---

UC Santa Cruz's TAG (Transfer Admission Guarantee) Program is designed for California community college transfer students at the junior level. The benefits of participating in UCSC TAG include early review of academic records, notification that admission to UCSC is guaranteed (subject to the conditions of the program), opportunities for advising about major preparation and general education and/or Intersegmental General Education Transfer Curriculum (IGETC) requirements, informational mailings, and invitations to events. All

## Undergraduate Admission

California community colleges participate in the UC Santa Cruz TAG program.

The UC TAG application must be submitted online between September 1 and September 30, 2015, for fall 2016 consideration. UCSC accepts transfer admission agreements for fall quarter only.

Further information may be found at [Transfer Admission Guarantee \(TAG\) Program](#).

---

### UC TRANSFER ADMISSION PLANNER (TAP)

---

The UC Transfer Admissions Planner is an online tool designed to help prospective UC students transferring from California community colleges track and plan their coursework, including those students who are seeking a Transfer Admission Guarantee (TAG) with one of the seven participating UC campuses.

Further information may be found at [UC Transfer Admission Planner](#).

---

### CREDIT FOR COURSES TAKEN ELSEWHERE

---

The university gives unit credit to transfer students for courses they have completed at other accredited colleges and universities, including courses taken at recognized institutions outside of the U.S. To be accepted for credit, your courses must be comparable to those offered at the university, as determined by the UC Santa Cruz Admissions Office. The UC Santa Cruz department sponsoring your major decides which transfer courses may be used to satisfy major requirements.

A total of 70 semester units (105 quarter units) of lower-division credit toward a university degree may be earned at other colleges/universities. Only subject credit will be granted for courses taken in excess of that cap. Please note that credit from another University of California campus is exempt from this limitation.

Applicants will not be considered for admission if they have completed 90 semester units (135 quarter units) or more of UC-transferable upper-division and lower-division combined credit. If students have earned all of their credits as lower-division credits, they are not affected by this limit. All coursework completed at California community colleges is considered lower division. Advanced Placement (AP) or International Baccalaureate Higher Level (IBH) credit is permitted to exceed the 90 semester unit maximum by the number of AP or IBH units granted.

Opportunities to take courses at UC Santa Cruz as a nonmatriculated student are available through Summer Session, Open Campus/Concurrent Enrollment through UC Extension, and Intersegmental Cross-Enrollment.

---

### UC SANTA CRUZ TRANSFER SERVICES

---

The Office of Admissions provides information to all students who wish to transfer to UC Santa Cruz. For prospective transfer students and their families, the Office of Admissions offers Transfer Information Sessions. Transfer Information Sessions are small-group meetings in which an Admissions adviser presents information about transfer admissions matters and transfer-related student services. Please note that pre-evaluations of transcripts are not available as part of the sessions. These sessions are designed for students who have not yet applied to UCSC. Students and their families may make reservations at

[admissions.ucsc.edu/transferworkshops](http://admissions.ucsc.edu/transferworkshops).

Student-led guided tours take place year-round and also require advance reservations. Please see [admissions.ucsc.edu/campustours](http://admissions.ucsc.edu/campustours) to make a reservation.

In addition, UC Santa Cruz Admissions counselors visit many community colleges in California. Check with your counseling department or transfer center to determine whether a UCSC counselor will be visiting your community college.

---

### UC SANTACRUZ OFFICE OF ADMISSIONS TRANSFER PREPARATION PROGRAM (TPP)

---

The UC Santa Cruz Transfer Preparation Program (TPP) supports prospective transfer students from California community colleges and assists them in enrolling at UC Santa Cruz, as well as at other campuses. TPP Admissions representatives work most closely with students who are attending one of the [13 community colleges in the region](#) to plan a successful transfer program, but will assist any California community college student who has questions.

The Transfer Preparation Program also collaborates with programs and initiatives that strengthen the transfer process and support individual students in making a successful transition to a four-year institution.

Further information may be found at [Transfer Preparation Program](#).

---

## ADMISSION OF U.S. STUDENTS FROM OUTSIDE CALIFORNIA

---

UC Santa Cruz welcomes students from across the U.S. to enhance our vibrant campus community. Out-of-state applicants must meet the same admission qualifications as California students, but with a higher GPA. Detailed information for UC Santa Cruz is provided at [Out-of-State Students](#). Information for all 10e general campuses of the University of California can be viewed at [University of California Admissions](#).

Students who are not California residents are assessed nonresident tuition in addition to educational and registration fees. Residency for fee purposes is determined after admission based on documentation provided in a Statement of Legal Residency. See [California Residence for Tuition Purposes](#).

For more information about undergraduate out-of-state admissions, please see [Out-of State Students](#) or e-mail [outofstateadmissions@ucsc.edu](mailto:outofstateadmissions@ucsc.edu).

---

## ADMISSION OF INTERNATIONAL STUDENTS

---

The University of California welcomes students from countries throughout the world to enhance our vibrant campus community. The academic credentials of applicants from other countries are evaluated by Admissions specialists in accordance with UC faculty-approved regulations governing admission.

UC Santa Cruz accepts applications from international students for the fall quarter, and students should begin application inquiries a year before the quarter of desired admission. Openings for the winter quarter may be limited. If you are interested in applying for winter, check with the Office of Admissions. For information, write to [internationaladmissions@ucsc.edu](mailto:internationaladmissions@ucsc.edu) or the Office of Admissions, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064.

If your native language is not English, you must certify proficiency in English by one of the following methods: earning a score of 80 or higher on the Internet-based Test of English as a Foreign Language (a minimum score of 550 on the paper-based TOEFL), or earning a minimum score of 7.0 on the International English Language Testing System (IELTS) exam, earning a score of 560 or higher on the Writing section of the SAT Assessment test, or completing two transferable English composition courses with grades of B or higher in a U.S. college or university.

A financial certificate and official academic records will be required if you are admitted to the university.

Generally, nonimmigrant students must provide documentation that sufficient funds will be available to cover nonresident tuition, educational fees, and living expenses. The university does not offer need-based financial assistance to international students.

For more information about undergraduate international admissions, please see [International Students](#) or send e-mail to [internationaladmissions@ucsc.edu](mailto:internationaladmissions@ucsc.edu).

For information about services for international students, see the International Education Office at [International Education Office](#).

---

## READMISSION

---

If you are an undergraduate who wants to return to UC Santa Cruz after an absence of a portion of a quarter or more, you must file an Application for Readmission. The application form is available online at [advising.ucsc.edu/student/read](http://advising.ucsc.edu/student/read). The completed application should be filed, along with the nonrefundable \$70 application fee, with the Office of Admissions during the appropriate period:

Quarter of Attendance	Application Filing Period
Fall quarter	November 1–April 1
Winter quarter	July 1–October 1
Spring quarter	October 1–January 2

If during your absence you attended another UC campus, an official transcript must be submitted to the Office of Admissions before your application will be sent to your college for approval. If you attended another collegiate institution, your UC Santa Cruz college may require a transcript. If you left for health reasons, clearance from the Cowell Student Health Center is required. You must pay all outstanding bills owed to the university before you will be permitted to register.

---

## ADMISSION TO SPECIAL CATEGORIES

---

For information on applying for admission in the categories described below, please contact the Office of Admissions at [admissions@ucsc.edu](mailto:admissions@ucsc.edu).

---

### SECOND BACHELOR'S DEGREE

---

If your educational goals have changed substantially since receiving your bachelor's degree, you may be eligible to pursue a second undergraduate degree at UC Santa Cruz. Applications from students interested in pursuing a second baccalaureate program will be considered as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

You must meet regular university admission qualifications, and your experience or previous scholarship record must show potential for academic success in your proposed area of study. Additional selection criteria will be applied, and admission is subject to approval by the appropriate department.

For a second degree, you must fulfill major and residence requirements, as well as UC systemwide requirements in American History and Institutions and the [Entry Level Writing Requirement](#). You must enroll for at least three quarters and are usually restricted to six quarters total.

---

### LIMITED STATUS

---

If you have already completed an undergraduate degree and you have a particular reason to take specific undergraduate university classes, you may be eligible to enroll in a non-degree program as a limited-status student. Applications from students interested in limited-status enrollment are permitted as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

Your proposed program of study must either prepare you for graduate or professional school or satisfy some definite educational need or interest. Participants generally enroll full-time for a specified period that does not exceed three quarters. You must meet regular university admission qualifications, and your experience or previous academic record must show potential for success in your proposed program. Additional selection criteria will be applied, and admission is subject to approval by the appropriate department.

---

## NONDISCRIMINATION AND AFFIRMATIVE ACTION POLICIES

---

The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy<sup>1</sup>, physical or mental disability, medical condition (cancer related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services<sup>2</sup>. The university also prohibits sexual harassment.

This nondiscrimination policy covers admission, access, and treatment in University programs and activities. University policy also prohibits retaliation for bringing a complaint of discrimination or participating a complaint process or investigation pursuant to this policy.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to [Conduct and Community Standards](#), (831) 459-1738, or e-mail [sja@ucsc.edu](mailto:sja@ucsc.edu).

Inquiries regarding the University's affirmative action, equal employment opportunity, and nondiscrimination policies as they relate to student employment may be directed to the Office for Diversity, Equity, and Inclusion, (831) 459-3676 or e-mail [cbene@ucsc.edu](mailto:cbene@ucsc.edu).

Inquiries regarding UCSC's Policy on Sexual Assault, the UC Policy on Sexual Harassment and Procedures for Reports of Sexual Assault(s) and Sexual Harassment and/or violations of Title IX may be directed to Title IX Coordinator/Sexual Harassment Officer Tracey Tsugawa, (831) 459-2462, or e-mail [ttsugawa@ucsc.edu](mailto:ttsugawa@ucsc.edu).

Student inquiries regarding disability or disability accommodations may be addressed to the Director, Disability Resource Center, (831) 459-2089; or e-mail [drc@ucsc.edu](mailto:drc@ucsc.edu).

Students with disabilities who are unable to resolve accommodation or discrimination concerns may contact the campus ADA Compliance Officer by phone, (831) 459-4380, or e-mail [ashish@ucsc.edu](mailto:ashish@ucsc.edu).

For additional information about University policies related to nondiscrimination and affirmative action, see the [Nondiscrimination Policies](#) section of the catalog.

## Undergraduate Admission

**1. Pregnancy** includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

**2. Service in the uniformed services** includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

Revised 09/01/15

---

## EXPENSES AND FINANCIAL RESOURCES

---

2015-16 General Catalog

---

### EXPENSES

---

In determining the cost of attending UC Santa Cruz each quarter, students should consider both required fees and personal expenses. The figures below are provided to help you draw up a realistic personal budget. If you then conclude you will need financial assistance in order to attend UCSC, you should read the Financial Aid section below. Fees and additional financial information for graduate students appear in the [Graduate Studies](#) section. Tuition, fees, and other charges are subject to change without notice by the UC Regents. For the most current fee information, check [Undergraduate Student Fees](#).

#### REQUIRED FEES

---

Required fees are due and payable before the start of each quarter. At the beginning of each quarter, you will need sufficient funds to cover tuition and fees, housing, books and supplies, and UC student health insurance (waivable). For many financial aid recipients who are enrolled at least half time, tuition and fees on the student account are paid automatically with approved student aid funds. If you are a financial aid recipient, please note that checks and direct deposits for scholarships, grants, and loans in excess of university charges are not available to you until after enrollment each quarter.

**The Student Services Fee** funds student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well-being of students; social and cultural activities and programs; services related to campus life; and educational and career support.

**Tuition** helps support student financial aid and related programs; administration; libraries; operation and maintenance of facilities; the university's operating budget; and all costs related to instruction, including faculty salaries.

**Santa Cruz Campus Fees** help support a wide range of student services, including college and campuswide student government, extracurricular programs and recreation facilities, campus child care, community and public service projects, Educational Opportunity Programs and scholarships, and free-fare use of the local transit systems. Campus fees paid by graduate students are provided at [Student Fees](#).

In addition, all students, including international students, are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides the primary care services for the plan while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is available at the [Health Center web site](#) or at the Student Health Insurance Office, (831) 459-2389.

Waivers from the mandatory health insurance premium are available if you can show that your private insurance provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver are listed in the [Schedule of Classes](#).

Some courses charge an additional **Course Materials Fee**. These fees recover the cost of materials, supplies, equipment, and support services not covered by the normal instructional budget. The fees are reviewed and approved annually by the Miscellaneous and Course Materials Fee Advisory Committee. The list of specific courses charging fees in 2015–16 is available in the quarterly Schedule of Classes and on the web at [Course Fees](#).

#### NONRESIDENT TUITION

---

If you are a resident of a state other than California or of another country, you must also pay nonresident tuition, the nonresident educational fee, and other required fees (university registration and Santa Cruz campus fees). The criteria for residency appear in [Appendix A](#).

Non-U.S. citizens note: Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

## Undergraduate Expenses and Financial Resources

UNDERGRADUATE BUDGET, 2015-16				
Students Living <b>On Campus</b>	California Residents		Nonresidents	
	One Quarter	F-W-S Quarters	One Quarter	F-W-S Quarters
<b>Required Tuition and Fees</b>				
Student Services Fee (formerly University Registration Fee)	\$340.00	\$1020.00	\$340.00	\$1020.00
Tuition (formerly Educational Fee)(a)	3,740.00	11,220.00	11,976.00	35,928.00
Campus Based Fees	406.98	1,220.84	406.98	1,220.94
USHIP Health Insurance (waivable)(see above)	878.00	2,634.00	878.00	2,634.00
Subtotal	\$5,364.98	\$16,094.94	\$13,600.98	\$40,802.94
<b>Estimated Personal Expenses (b)</b>				
Room and board	\$5,041.00	\$15,123.00	\$5,041.00	\$15,123.00
Books and supplies	483.00	1,449.00	483.00	1,449.00
Personal Expenses	613.00	1,839.00	613.00	1,839.00
Transportation	192.00	576.00	192.00	576.00
Subtotal	6,329.00	18,987.00	6,329.00	18,987.00
<b>Total Budget</b>	<b>\$11,693.98</b>	<b>\$35,081.94</b>	<b>\$19,929.98</b>	<b>\$59,789.94</b>
a) Undergraduates who are unable to maintain a full-time program of study because of employment responsibilities, family obligations, or health problems may be eligible for a 50 percent reduction in tuition. One quarter at \$1,870; two quarters at \$3,740.				
b) Estimated personal expenses for students living off campus total \$4,844 per quarter or \$14,532 for three quarters. Estimated personal expenses for students living with family total \$3,328 per quarter or \$9,984 for three quarters.				

### LATE FEES

You may be assessed late fees if you fail to make university payments or enroll by the specified deadlines. For example, late fees are assessed on a graduated basis for each month there is an unpaid balance on your university account. Late fee amounts of \$50 each are assessed for a late registration payment and/or late enrollment, \$25 for a late housing payment, and \$12.50 for miscellaneous fees. Deadlines are published in the [Schedule of Classes](#), and they appear on the Statement of Account.

### ESTIMATED PERSONAL EXPENSES

The figures given for estimated personal expenses are for a single undergraduate living on campus. Expenses will be higher for married students, students with children, and graduate students. The information is as current and as realistic as possible; however, expenses for students vary in accordance with lifestyles, priorities, and obligations.

**Room and board (in college residences).** Rates for room and board in the college residence halls depend on the type of accommodation and meal plan. The current rates may be found on the campus [Housing Office web site](#). The room and board amount of \$15,123 in the Undergraduate Budget table above is the average cost for an on-campus student with the average meal plan and additional flexi dollars.

**Personal Expenses.** This budget item covers a broad range of expenses including clothing, laundry, personal grooming, recreation, and health maintenance. It also covers minimum expenses for modest travel to visit family.

**Rates are paid quarterly.** The rate ranges listed above do not cover periods of academic recess, nor does the budget above. Housing charges are normally payable at the beginning of each quarter. However, students may arrange with the Campus Housing Office to pay monthly.

**More detailed information** on room and board expenses for the individual colleges is available in the

## Undergraduate Expenses and Financial Resources

Undergraduate Housing Rates brochure distributed as part of the admission process or available from the Campus Housing Office, 104 Hahn Student Services Building, (831) 459-2394.

### FEE REFUNDS

Students who cancel their registration before the first day of instruction in a given quarter are refunded all required fees minus a \$10 service charge. New undergraduate students who cancel their registration before the first day of instruction are entitled to a refund of all required fees except the nonrefundable \$100 undergraduate Statement of Intent to Register (SIR) Fee (applied toward the Student Services Fee).

Once the quarter has begun, students must petition for withdrawal. The percentage of fees refunded is determined by the effective date of the withdrawal, according to the schedule below. A student is not eligible for university services after the effective date of withdrawal.

A student entering the armed forces before the sixth week of the quarter is entitled to a full refund of the Student Services Fee—provided no course credit is received.

More detailed information on withdrawal and refund procedures is included in the quarterly [Schedule of Classes](#) and [The Navigator](#), both online at the Registrar's web site, and in the [Graduate Student Handbook](#). Information on refunds of room and board charges is contained in the campus housing contract, provided to all applicants for on-campus housing. For more information on how withdrawing affects your financial aid, refer to the Financial Aid and Scholarship Office web site at [Financial Aid web site](#).

SCHEDULES OF REFUNDS	
<b>All Continuing and Readmitted Students and New Students Not Receiving Federal Financial Aid</b>	
Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-18	50
19-35	25
36 and over	0
<b>New Students Who Receive Federal Financial Aid and Withdraw during Their First Academic Term</b>	
Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-14	80
15-21	70
22-28	60
29-35	50
36-42	40
43 and over	0
* For new students, the nonrefundable \$100 Undergraduate Statement of Intent to Register Fee is withheld from the University Registration Fee; the schedule of refunds applies to the balance of fees. Percentages listed (days 1–35 or days 1–42) should be applied individually to Nonresident Tuition, the Educational Fee, the University Registration Fee, and Santa Cruz campus fees. The Health Insurance Fee is nonrefundable.	

### DEFERRED PAYMENT PLAN

The Deferred Payment Plan (DPP) provides an alternative method of budgeting and paying registration fees. Fees not covered by scholarships, loans, or other financial aid, can be paid in monthly installments. Students have a choice of applying for a three-month plan for individual quarterly fees, or, at the beginning of the fall quarter only, for a nine-month plan to be used for the fall, winter, and spring quarters. A nonrefundable application fee of \$25 for the three-month plan, or \$60 for the nine-month plan, is billed to the student account upon receipt of the DPP application. Any student in good financial and academic standing may apply for DPP. Students receiving financial aid sufficient to cover registration fees in full

## Undergraduate Expenses and Financial Resources

are not eligible for this plan. For more information about how to apply for DPP, application deadlines, and campus policies regarding the program, contact the Office of Student Business Services, 203 Hahn Student Services Building, (831) 459-2107, e-mail [oarinfo@ucsc.edu](mailto:oarinfo@ucsc.edu), or visit the [Student Business Services web site](#).

---

### FINANCIAL AID

---

The university maintains a robust financial aid program of grants, scholarships, loans, and part-time employment for undergraduate students who require financial assistance. The [Financial Aid and Scholarship Office](#) administers these resources to help bridge the gap between the cost of education and what parents and students can reasonably contribute.

If you are a dependent student, the contribution expected from you and your parents is determined through an analysis of your family's financial strength, considering such variables as income, number of dependents, living expenses, and savings and investments (excluding your primary residence). Federal, state, and university policies and procedures are applied. The same analysis is used for married and independent students with the exception of parent information. The federal definition of an "independent student" is used to determine your dependency when you complete the Free Application for Federal Student Aid (FAFSA).

The UC Blue and Gold Opportunity Plan is a Financial Aid Initiative that ensures that undergraduate California residents whose families earn a total income less than \$80,000, meet application deadlines, and who demonstrate enough financial need are guaranteed to receive gift aid from all sources to cover UC systemwide tuition and fees. Qualified students must be in their first four years of attendance (first two for transfer students).

No student will receive more scholarship and grant support than the calculated financial need. All sources of scholarship and grant awards (federal, state, institutional, and private sources, including outside agency scholarships) will count toward covering fees and meeting the Blue and Gold Opportunity Plan commitment. The majority of students who meet the income eligibility standard receive much more grant and scholarship funding than the plan covers.

In addition to the minimum funding under the Blue and Gold Opportunity Plan, undergraduates with sufficient financial need will receive additional grant support to help defray other educational expenses (e.g., books, living expenses, and transportation).

---

### APPLICATION DEADLINES

---

The Free Application for Federal Student Aid (FAFSA) may be submitted online at the [Federal Student Aid web site](#) on or after January 1 preceding the academic year you wish to receive aid. Submit the FAFSA each year before the priority deadline of March 2 to be eligible for all types of aid. A "FAFSA on the Web Worksheet" is available at the same web site to help you prepare for completing the FAFSA.

Students admitted for fall quarter will receive an estimated financial aid award in April.

The Financial Aid and Scholarship Office may require additional documentation from applicants. These applicants will be sent an e-mail instructing them to login to [MyUCSC](#) and view their "To Do List," where required documents are requested (e.g., copies of student and parent tax returns or other forms). These documents must be received by the deadline on the "To Do List" for a student to be considered for all sources of aid administered by UC Santa Cruz. The deadline is June 2.

Conditional awards for admitted students may change as a result of our review of documentation.

Applicants who submit verification documents after our deadlines will be considered for aid based on availability.

Students admitted for winter quarter must have submitted a FAFSA by their admission notification date. Items requested on your [MyUCSC](#) "To Do List" must be submitted by December 2. Award notifications will be made as soon as possible after you are admitted/readmitted and all requested financial aid documents are received.

---

### TYPES OF AID

---

If you apply for financial aid and meet the application deadlines, you are considered for all types of aid described below. Based on your financial need, your financial aid package may include a combination of grants, scholarships, loans, and work opportunities.

#### Grants

- UC Santa Cruz Grants are awarded to students based on financial need.
- Cal Grant A & B (eligible California residents) are awarded by the California Student Aid Commission to California residents who meet eligibility requirements and who demonstrate financial need and academic achievement. In addition to submitting a FAFSA or Dream Application\*, first time applicants must also complete and submit the Cal Grant GPA Verification Form no later than

## Undergraduate Expenses and Financial Resources

March 2. Cal Grant A and B awards pay Tuition and Student Services Fees at UC and are \$12,240 for 2015-16. Cal Grant B Access awards are \$1,648.

**\*Note:** The passage of California Dream Acts—AB130 and AB131—extended eligibility for certain types of institutional and state aid to students, including undocumented students, who qualify for benefits under another California law—AB540—which exempts students from paying nonresident supplemental tuition. We refer to our students as “Dreamers” and encourage applying for financial aid using the [CA Dream Application](#).

- Federal Pell Grants are offered to eligible undergraduate students who demonstrate significant financial need based on the expected family contribution (EFC). Awards are variable depending upon the EFC; the maximum Pell Grant for 2015-16 is \$5,775.
- Federal Supplemental Educational Opportunity Grants are awarded to undergraduate students who demonstrate significant financial need. These grants supplement the UC Santa Cruz Grant program. Students must meet application deadlines to be considered. The maximum award is \$3,000.

### Scholarships

- UC Santa Cruz Scholarships range from \$250 to \$10,000 per year. (The average award is about \$1,500.) Funding comes from private donors, alumni, and the university. Entering UCSC students are considered for scholarships based on responses to scholarship questions on the UC Application for Undergraduate Admission. Your application essay will serve as your scholarship essay. Selected students are notified throughout the academic year. All continuing students are automatically considered for scholarships based on various factors including cumulative GPA.
- Regents Scholarships are the most prestigious merit scholarships awarded to undergraduates. Freshman Regent Scholars receive a total of \$20,000 paid over four years. New junior transfers and continuing students selected in the junior year receive the Regents Scholarship for a total of \$10,000 paid over two years. The scholarship amount varies for continuing students based on the year in college and year appointed.
- Other Scholarships: Some campus scholarships are restricted to students from particular geographic areas or family backgrounds, or are limited to students in particular majors, classes, or colleges. The donors have different reasons for giving, and their varied interests are reflected in the wide range

of scholarships available. Merit and restricted scholarship awards range up to \$5,000.

### Need-Based Loans

- Federal Perkins Loans are offered to first-year students. Repayment begins nine months after a student falls below half time enrollment or graduates from the university. During repayment, the interest rate accrues at 5 percent annually.
- Federal Direct Subsidized Student Loans are funded by the federal government and can be borrowed up to the federal limits based on student status (please see Direct Loan Limit Chart below). Students pay an origination fee of up to 1.068 percent after September 30 in 2015-16, which is deducted from the total accepted amount of the loan. Repayment begins six months after a student falls below half time enrollment. Interest rates for 2015-16 are fixed at 4.29 percent for undergraduate subsidized loans.

### Non-Need-Based Loans

The following loans are available to both undergraduate and graduate students:

- **Federal Direct Unsubsidized Student Loans** are funded by the federal government and can be borrowed up to the federal limits based on student status (please see Direct Loan Limit Chart below). Unsubsidized loans are offered to students who do not demonstrate financial need or who have exhausted all need based aid. Interest accrues on unsubsidized loans from the date the loan is disbursed. The 2015-16 interest rate is fixed at 4.29 percent for undergraduate students. The student pays an origination fee of up to 1.068 percent which is deducted from the total accepted amount of the loan. Students may begin repaying principal and interest on Federal Direct Unsubsidized Student Loans immediately, pay only interest immediately, or defer both principal and interest until they are no longer enrolled in school at least half time.
- **Federal Direct Parent Loans for Undergraduate Students (PLUS)**. Parents of dependent students can apply for a PLUS loan and may borrow up to the full cost of attendance as defined by the UCSC Financial Aid and Scholarships Office. Applicants must pass a modest credit check through the Department of Education for the loan to be approved. The 2015-16 interest rate after September 30 is fixed at 6.84 percent. Borrowers pay an origination fee of 4.272 percent that is deducted from the loan amount. Loan repayments begin 60 days after the last disbursement for the academic year (the last disbursement is typically

## Undergraduate Expenses and Financial Resources

the first day of spring quarter). Parents do have the option to defer payment, similar to the student's

ability to defer on their Federal Direct loan above. See your loan servicer for more information.

ANNUAL AND LIFETIME FEDERAL DIRECT STUDENT LOAN LIMITS			
	Subsidized Loans	Unsubsidized Loans	Combined Subsidized and Unsubsidized Loans
<b>Dependent Students</b>			
Freshman	\$3,500	\$2,000	\$5,500
Sophomores	\$4,500	\$2,000	\$6,500
Juniors and Seniors	\$5,500	\$2,000	\$7,500
Lifetime Loan Limits	\$23,000	\$31,000	
<b>Independent Students<sup>1</sup></b>			
Freshman	\$3,500	\$6,000	\$9,500
Sophomores	\$4,500	\$6,000	\$10,500
Juniors and Seniors	\$5,500	\$7,000	\$12,500
Lifetime Loan Limits	\$23,000	\$57,000	
<b>Graduate Students</b>	N/A	\$20,500	\$20,500
Lifetime Loan Limits		\$138,500	
Refers to students who answered "yes" to any dependency status question on the FAFSA. These loan limits also apply to dependent undergraduate students whose parents were denied a PLUS loan due to adverse credit history.			

### Other Loans

The University of California develops and publishes lists of private lenders who offer the most favorable terms for UC borrowers. Lender lists may be found on UCSC's [Financial Aid and Scholarships](#) web site under [Private Loans](#) and are also available at [www.elmselect.com](http://www.elmselect.com).

### Federal Work-Study

Federal Work-Study gives students the opportunity to work part-time to earn money to help cover expenses while enrolled at UC Santa Cruz. Students who demonstrate financial need may be offered Work-Study. Some on-campus and community jobs are posted online at the Career Center web site [Career Center web site](#). Not all campus jobs are posted with the Career Center. Another way to locate on-campus jobs is through networking. Examples include talking to students, staff, and faculty at your college, in your dorm and dining hall, and in the academic departments. The Career Center can help you with résumé writing and job-search strategies. Jobs are competitive, and this award does not guarantee a position.

### Loan Forgiveness Programs

The federal government will forgive all or part of a student loan under certain circumstances. Examples of these include performing volunteer work or military

service and practicing medicine in certain communities. For a summary of such exemptions, visit the [Federal Student Aid web site](#).

### MORE INFORMATION

For more information about applying for financial aid, rights and responsibilities, and document deadlines contact the [Financial Aid and Scholarship Office](#) at (831) 459-2963 or visit us at 205 Hahn Student Services Building.

### VETERAN SERVICES

The Veteran Services staff in the Office of the Registrar acts as a liaison between the Department of Veterans Affairs and students who as veterans, veterans' dependents, or reservists receive education benefits. The staff also assists with the California Department of Veterans Affairs' college fee-waiver program for children of veterans who have service-connected disabilities or who have died from service-related causes. Students who are California residents apply for the college fee-waiver program through their home county Veterans Services Office.

Students who are veterans or veterans' dependents should contact the Veteran Services office at UCSC as soon as they receive notification of admission to UCSC to ensure timely processing of their benefit claims.

## Undergraduate Expenses and Financial Resources

Veteran Services staff members are located at 190 Hahn Student Services Building. For more information, visit the [Veteran Services web site](#), call (831) 459-2709 or (831) 459-2910, or e-mail [vets\\_benefits@ucsc.edu](mailto:vets_benefits@ucsc.edu).

During their transition to the university and while they are enrolled as UCSC students, military veteran students are provided a broad range of academic and support services by the Veterans Education Team Support (VETS) through Services for Transfer and Re-Entry Students (STARS). The Veterans Center is located at Kresge College right inside the entrance, off the main parking lot. Contact the VETS staff at (831) 459-1520, or send an e-mail to [vets@ucsc.edu](mailto:vets@ucsc.edu), or visit the [STARS web site](#).

# UNDERGRADUATE ACADEMIC PROGRAM

---

2015-16 General Catalog

---

## PLANNING YOUR ACADEMIC PROGRAM

---

### Planning Your Academic Program

At UC Santa Cruz, the academic year is organized on the quarter system. Three quarters—fall, winter, and spring—constitute the regular academic year. Most UCSC courses are equivalent to 5 quarter credits and require approximately equal amounts of work: about 15 hours per week per course. You are normally expected to enroll in 15 credits each quarter; enrolling in a reduced or expanded course load requires special approval. If you maintain a B average at UCSC, you may enroll in more courses without special approval. For specific information on how courses are organized, see [programs and courses](#).

You are normally expected to graduate in four years. To do so, you must pass an average of 45 credits per year, for a total of 180 credits. In order to complete certain majors with extensive course requirements, junior transfer students may need to spend more than two years at UC Santa Cruz.

The requirements for a bachelor's degree are explained in the following section. Your adviser can help you plan a program that fulfills these requirements efficiently while meeting your own educational goals (see Advising: From Course Selection to Careers).

Here is what you can expect during four years at Santa Cruz:

During your freshman year, you complete your college core course and satisfy the Entry Level Writing Requirement. You also begin to take foundation courses for potential majors, along with courses that satisfy general education requirements.

If you are uncertain about your choice of major, you may intentionally explore different fields of study during your first two years at Santa Cruz by taking foundation courses that will help you both identify whether a major is a good fit for you and will satisfy prerequisites for declaring the major. You are expected to be declared in a major by the end of your second (sophomore) year; transfer students are expected to be declared in a major by the deadline in their second quarter at UCSC. Students interested in majors requiring heavy course prerequisites, such as music and most majors in the physical and biological sciences and engineering, should be certain they start the

appropriate sequences in the first year; information is available through your major advising office.

During your junior and senior years at Santa Cruz, you concentrate on the upper-division requirements for your major and complete your comprehensive requirement, as well as complete your general education requirements. If you entered UCSC without having fulfilled the requirement in American history and institutions, you will need to do so before you graduate.

Transfer students should complete any lower-division requirements for their intended major that are offered at their current campus and may also find it helpful to complete courses that fulfill campus general education requirements. The Office of Admissions can help you select appropriate courses, and you should also consult with your community college adviser.

---

## GRADUATION REQUIREMENTS

---

To qualify for a bachelor's degree, you must meet the following conditions, which are explained in more detail in the following sections:

- Earn a minimum of 180 credits, each with a grade of D or better (or Pass)
- Satisfy the university requirements in American history and institutions and in Entry Level Writing (English composition)
- Meet the UCSC residence requirement
- Satisfy each of the campus general education requirements with a course grade of C or better (or Pass)
- Satisfy requirements of your UCSC college
- Complete an approved major program, including its comprehensive requirement, with grades of Pass, C (2.0 grade point average), or better in all courses satisfying major requirements. Some majors require grades higher than C to qualify to declare the major. In some majors, courses graded Pass may not be used to satisfy major requirements.
- Have an overall grade point average (GPA) of at least 2.0 in all letter-graded courses taken at UCSC and other University of California campuses
- Have no more than 25 percent of your UCSC credits graded on a Pass/No Pass basis. This includes any credits completed in the Education

## Undergraduate Academic Program

Abroad Program or on another UC campus in an intercampus exchange program. Departments may require that some or all courses used to satisfy the major must be taken for a letter grade.

As a UC Santa Cruz student, you are responsible for selecting the courses necessary to fulfill graduation requirements and prepare for advanced study or a career. It is essential that you consult regularly with academic advisers about course selection.

Keep your own records, including not only records of your UCSC courses, grades, and progress, but also your transcripts from other institutions, admission test scores, transfer credit information, and performance evaluations.

Transfer students may be able to use some of the courses they completed at other schools to help meet the 180-credit requirement. (Semester-system credits can be multiplied by 1.5 to derive equivalent quarter-system credit.) The UCSC Office of Admissions determines which courses are transferable.

### UNIVERSITY REQUIREMENTS

---

The UC Santa Cruz campus administers three requirements for graduation from the University of California: (1) American history and institutions, (2) Entry level writing requirement, and (3) UCSC residence. These requirements are described in detail below.

#### American History and Institutions

Every candidate for a bachelor's degree must demonstrate knowledge of American history and institutions. You may fulfill this requirement in one of the following ways:\*

- By achieving a score of 550 or higher on the SAT Subject Examination in U.S. History
- By achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in U.S. History, or by achieving a score of 5, 6, or 7 on the IBH History of the Americas Examination
- By satisfactorily completing a college-level course in U.S. history and institutions
- By certification of completion of the requirement on a transcript from an accredited California institution of higher education
- By completing an acceptable history or government course in high school that satisfies the subject requirement for admission to the university, described in [Subject Requirements](#).

\*Note: Alternatives for satisfying this requirement vary among the campuses of the University of California. If

you plan to transfer to another UC campus, consult its general catalog for information on this point.

#### Entry Level Writing Requirement

Every candidate for a bachelor's degree must demonstrate an acceptable level of ability in English composition. Before your fourth quarter of enrollment, you must fulfill this requirement in one of the following ways:

1. Score 680 or higher on the Writing section of the SAT Reasoning test.
2. Score 30 or higher on the ACT Combined English/Writing test .
3. Score 3 or higher on the College Board Advanced Placement Examination in English (Language or Literature).
4. Score 5 or higher on the International Baccalaureate Higher Level Examination in English: Literature (formerly IB HL English A1).
5. Score 6 or higher on the International Baccalaureate Standard Level Examination in English (Language A).
6. Complete with a grade of C or better an acceptable college course in English composition worth 4 quarter or 3 semester units.
7. Achieve a passing score on the UC Analytical Writing Placement Examination, given in the spring every year (freshmen who are admitted to UC will receive detailed information in April about the exam; nonresidents may take the exam in the fall after enrolling).
8. Complete an appropriate English course at UC with a grade of C or better.

California high school seniors who have been admitted to UCSC must take the systemwide UC Analytical Writing Placement Examination, given in May, unless they have already satisfied the requirement.

#### Residence

Every candidate for a bachelor's degree must be registered at UCSC for a minimum of three terms. In addition, of the final 45 quarter credits, 35 must be in regular courses of instruction that you have taken as a registered student at UCSC (including during the summer session). Courses taken through University Extension or the Intercampus Visitor Program do not constitute regular courses and therefore do not satisfy residence requirements.

The credit requirement for residence is applied differently to students participating in the Education Abroad Program (EAP) and the University of California

## Undergraduate Academic Program

in Washington, D.C. (UCDC), program. Students may satisfy the requirement in either of two ways. The first way is for students to complete 35 of their final 45 credits before leaving the Santa Cruz campus to participate in EAP or UCDC. In this scenario, students do not have to return to Santa Cruz for any additional coursework after they have finished EAP or UCDC. The second way to fulfill the residence requirement is for students to complete 35 of their last 90 credits at the Santa Cruz campus, with a minimum of 12 credits completed at UCSC after their return from EAP or UCDC.

---

## GENERAL EDUCATION REQUIREMENTS

---

The general education requirements are designed to introduce you to various kinds of information, reasons for learning, and approaches to acquiring knowledge, as well as to promote responsible use of what is learned. Obviously, general education requirements alone cannot achieve these ends. You are urged to look for as many opportunities as possible to gain a richer understanding of your own cultural heritage and social situation; insight into countries, societies, and eras besides your own; proficiency in another language; understanding of the nature of ethical and moral choice; and expanded knowledge of science and technology. The formal requirements described here should be considered foundations for exploration.

---

### GENERAL EDUCATION REQUIREMENTS FOR STUDENTS ENTERING BEGINNING FALL 2010

---

Beginning in fall 2010, all new students are required to fulfill a new set of guidelines for general education requirements that were approved by the UCSC Academic Senate in 2009. Students who began prior to fall 2010 and transfer students who entered another collegiate institution prior to that time may opt to change to the new requirements or fulfill the previous general education requirements, if catalog rights allow. See [Catalog Rights](#) for more information. Contact your college adviser if you have questions.

The general education requirements are meant to accomplish several goals:

- Provide students with a base of knowledge and skills that future learning can build on.
- Expose students to a broad range of disciplines and methodologies, to better prepare them for a world of complex problems and rapid changes.
- Enhance the abilities of students to approach problems in appropriately analytical ways.

- Prepare students to function as responsible and informed participants in civic life, considering pressing societal issues (such as the environment, the economy) productively and from a variety of perspectives.

Each area has a general education code associated with it, and only those courses carrying that code satisfy the requirement. The codes appear in the course descriptions in this catalog and in the “General Education” field on the MyUCSC Class Search page. See a list of courses that fulfill General Education requirements. The list is subject to change. Students should check the [Schedule of Classes](#) each quarter for the most up-to-date information. Students following the new general education requirements should review the requirements for their proposed or declared major(s) to ascertain whether some of their general education requirements will be fulfilled by completing their major. As a general rule, each course satisfies only one of the new general education requirements.

---

## COURSES THAT FULFILL GENERAL EDUCATION REQUIREMENTS FOR STUDENTS ENTERING FALL 2010

---

### CROSS-CULTURAL ANALYSIS (CC CODE)—ONE COURSE REQUIRED (5 CREDITS)

---

One five-credit course or equivalent is required that emphasizes understanding of one or more cultures and societies outside the United States.

**Anthropology** 2, 110G, 110H, 110K, 1100, 110P, 130A, 130B, 130C, 130E, 130F, 130H, 130I, 130J, 130L, 130M, 130T

**French** 108

**History** 104C, 122A, 122B

**History of Art and Visual Culture** 7, 27, 30, 31, 40, 41, 43, 45, 50, 51, 117, 122D, 127C, 127E, 133A, 135B, 135D, 135E, 135H, 135P, 137B, 137C, 137D, 137E, 140A, 140P, 141A, 141B, 141C, 141E, 141F, 141H, 141I, 141J, 141K, 143A, 143B, 143D, 151, 154, 155, 160B, 190C, 191P, 191S

**Latin American and Latino Studies** 70, 124, 128, 129, 176

**Literature** 61H

**German Literature** 161

**Modern Literary Studies** 125J, 125N, 168E

**Pre- and Early Modern Literature** 137

**Spanish/Latin American/Latino Literatures** 135F

**Music** 7, 11A, 80G, 80M, 80N, 80O, 80V, 80Y, 150C, 150P, 150T, 150X

**Oakes College** 128

**Theater Arts** 10, 20, 31P, 40, 80D, 80L, 80N, 80P, 80Q, 108, 113, 116A, 117, 130, 131P, 165

MATHEMATICAL AND FORMAL REASONING (MF CODE)—ONE COURSE REQUIRED (5 CREDITS)

One five-credit course or equivalent is required that emphasizes university-level mathematics, computer programming, formal logic, or other material that stresses formal reasoning, formal model building, or application of formal systems.

**Applied Mathematics and Statistics** 3, 6, 10, 11A, 11B, 15A, 15B, 20, 114, 147

## Undergraduate Academic Program

### Art 101

**Astronomy and Astrophysics** 2, 3, 4, 5, 12, 13, 15, 16

**Biomolecular Engineering** 160

**College Eight** 81B

**Computer Engineering** 8, 16

**Computer Science** 5C, 5J, 5P, 10, 11, 12B

**Earth and Planetary Sciences** 11, 81B

**Economics** 11A, 11B

**Mathematics** 3, 11A, 11B, 19A, 19B, 20A, 20B, 21, 22, 23A, 23B, 100

**Music** 80L, 130

**Philosophy** 9

**Physics** 5A, 6A

SCIENTIFIC INQUIRY (SI CODE)—ONE COURSE  
REQUIRED (5 CREDITS)

One five-credit course or equivalent is required that focuses on the essential roles of observation, hypothesis, experimentation and measurement in the sciences.

**Anthropology** 1, 3

**Astronomy and Astrophysics** 1, 6

**Biology: Molecular, Cell, and Developmental** 80A, 80E, 80J

**Chemistry and Biochemistry** 1A

**College Eight** 81C

**Crown College** 84H

**Earth and Planetary Sciences** 2, 3, 5, 7, 8, 10, 20, 65

**Electrical Engineering** 80T, 81C

**Environmental Studies** 24

**History** 101D

**Linguistics** 50

**Microbiology and Environmental Toxicology** 80E

**Ocean Sciences** 1, 80A

**Physics** 1, 5B, 5C, 6B, 6C

**Psychology** 150

STATISTICAL REASONING (SR CODE)—ONE  
COURSE REQUIRED (5 CREDITS)

One five-credit course or equivalent is required that focuses on developing skills in approaching quantitative data and statistical reasoning.

**Applied Mathematics and Statistics** 5, 7, 80A, 80B, 131, 132

**Biology: Ecology and Evolutionary** 80S

**Computer Engineering** 7, 107, 145

**Computer Science** 17, 80L

**Earth and Planetary Sciences** 12, 125

**Economics** 113

**Electrical Engineering** 80S

**Linguistics** 147, 157

**Mathematics** 4

**Ocean Sciences** 90

**Philosophy** 8

**Physics** 133

**Psychology** 2

**Sociology** 103A

TEXTUAL ANALYSIS AND INTERPRETATION (TA  
CODE)—ONE COURSE REQUIRED (5 CREDITS)

One five-credit course or equivalent is required that has as its primary methodology the interpretation or analysis of texts.

**Biology: Molecular, Cell, and Developmental** 114, 126, 127

**Chinese** 103, 104, 105, 107, 108

**College Eight** 80A, 80B, 80C

**Crown College** 80F

**History** 13, 100

**History of Consciousness** 12, 112, 115

**Japanese** 105

**Kresge College** 16

**Latin American and Latino Studies** 131, 144, 180

**Linguistics** 108

**Literature** 1, 61F, 61K, 61M, 61P, 80E, 80V, 80Z, 102

**English-Language Literatures** 102A, 103E, 110A, 110F, 120A, 120B, 120H, 120L, 170A, 170C, 170F, 180B, 180H, 180K, 180M, 180V

**Latin Literature** 100

**Italian Literature** 161

**Modern Literary Studies** 145A, 145B, 167K

**Pre- and Early Modern Literature** 134, 144B, 183

**Spanish/Latin American/Latino Literatures** 60

**World Literature and Cultural Studies** 109, 115A

**Mathematics** 181

**Philosophy** 11

**Politics** 4, 10, 20

**Sociology** 164

**Spanish** 156F

**Stevenson College** 23, 81A, 81B

**Theater Arts** 61A, 61B, 61C, 80K, 80X, 163H, 163K

PERSPECTIVES (5 CREDITS)

Choose one five-credit course or equivalent from any of the three following categories: PE-E, PE-H, PE-T.

ENVIRONMENTAL AWARENESS (PE-E CODE)

Courses focus on humankind's interactions with nature.

**Anthropology** 110E, 110W, 146

**Art** 80B

**Biology: Ecology and Evolutionary** 85

**Biomolecular Engineering** 123B

**College Ten** 105

**Community Studies** 149

**Crown College** 80L

**Earth and Planetary Sciences** 1, 9, 110A

**Electrical Engineering** 80J, 180J

## Undergraduate Academic Program

**Environmental Studies** 25, 65, 80A, 80B, 125, 146  
**History** 177  
**History of Art and Visual Culture** 44, 116, 142, 143G  
**Latin American and Latino Studies** 80P, 164  
**Music** 80K  
**Ocean Sciences** 80B  
**Physics** 2  
**Sociology** 125, 173

### HUMAN BEHAVIOR (PE-H CODE)

---

Courses focus on aspects of individual human behavior or the operation of human groups.

**Applied Linguistics** 80  
**Art and Design: Games and Playable Media** 80I  
**Community Studies** 156  
**Cowell College** 138A  
**Economics** 1, 2  
**Latin American and Latino Studies** 149, 159, 174, 194F  
**Politics** 1, 70  
**Psychology** 1  
**Sociology** 136, 137, 159, 172  
**Technology and Information Management** 115  
**Theater Arts** 80C

### TECHNOLOGY AND SOCIETY (PE-T CODE)

---

Courses emphasize issues raised by the prevalence of technology in society.

**Art and Design: Games and Playable Media** 80H  
**Biomolecular Engineering** 5, 80G, 80H  
**Computer Engineering** 80A, 80E, 80N  
**Computer Science** 2, 80J, 80S, 119  
**Crown College** 80J  
**Environmental Studies** 176  
**Feminist Studies** 30, 124, 133  
**Film and Digital Media** 80T, 80V, 136C  
**History of Art and Visual Culture** 140E, 143E  
**World Literature and Cultural Studies** 105  
**Music** 80C  
**Philosophy** 80G  
**Sociology** 115  
**Stevenson College** 90  
**Theater Arts** 80T

### PRACTICE (MINIMUM 2 CREDITS)

---

Choose one minimum two-credit course from any of the three following categories: PR-E, PR-C, PR-S

### COLLABORATIVE ENDEAVOR (PR-E CODE)

---

Courses provide significant experience with collaboration on a project.

**Anthropology** 179, 189  
**Art and Design: Games and Playable Media** 120  
**Biology: Molecular, Cell, and Developmental** 188

**Biomolecular Engineering** 88A, 123A, 180  
**College Nine** 120  
**College Ten** 120  
**Computational Media** 120  
**Computer Engineering** 123A, 129B  
**Computer Science** 116, 183  
**Earth and Planetary Sciences** 109L, 110L, 188A  
**Electrical Engineering** 123A, 129B  
**Environmental Studies** 100L  
**Film and Digital Media** 151, 185X  
**History** 158C  
**Kresge College** 72, 73, 74, 172, 173, 174  
**Linguistics** 144  
**Mathematics** 101  
**Music** 1C, 2  
**Physics** 180  
**Porter College** 22A, 100  
**Psychology** 182  
**Technology and Information Management** 20, 21  
**Theater Arts** 139

### CREATIVE PROCESS (PR-C CODE)

---

Courses teach creative process and techniques in the arts (including creative writing), at an individual or a collaborative level.

**Anthropology** 81A, 81B, 81C, 82, 154  
**Art** 20G, 20H, 20I, 20J, 20K, 121  
**Art and Design: Games and Playable Media** 179  
**Computational Media** 25, 26, 178, 179  
**Computer Science** 80V  
**Film and Digital Media** 20P, 150, 170A, 170B, 171C  
**Kresge College** 90A  
**Latin American and Latino Studies** 81A, 81B, 81C  
**Literature** 61L  
**Creative Writing** 10, 52, 53, 170, 180  
**Music** 9, 10, 80Z, 127, 163, 166  
**Porter College** 20F, 21C, 22C, 22H, 23B, 34B, 39, 80F, 80I, 90A  
**Theater Arts** 14, 15, 17, 19, 30, 36, 37, 114, 115A, 115B, 119, 128, 136, 153

### SERVICE LEARNING (PR-S CODE)

---

Courses provide the opportunity for supervised campus or community service that contributes to a student's overall education.

**Biology: Ecology and Evolutionary** 95  
**Biology: Molecular, Cell, and Developmental** 191  
**Chemistry and Biochemistry** 182  
**College Eight** 55, 155, 162  
**College Ten** 98, 110, 110B  
**Community Studies** 191, 198  
**Cowell College** 168, 184A, 184B, 184C  
**Crown College** 70

Undergraduate Academic Program

**Education** 50A, 50B, 50C, 180  
**Environmental Studies** 83, 184  
**History of Art and Visual Culture** 193F  
**Kresge College** 12A, 12B, 12C, 62  
**Literature** 191  
**Mathematics** 188, 189  
**Merrill College** 85B, 85C, 90, 90F  
**Oakes College** 73B, 151B, 152, 153  
**Porter College** 13C, 83  
**Psychology** 155, 193, 193A, 193B, 193C, 193D  
**Writing** 169

COMPOSITION (C1 AND C2 CODE) (10 CREDITS)  
TWO FIVE-CREDIT COURSES.

C1

College Eight 80A, 80D  
College Nine 80A, 80D  
College Ten 80A, 80D  
Cowell College 80A  
Crown College 80A  
Kresge College 80A, 80D  
Merrill College 80A  
Oakes College 80A, 80D  
Porter College 80A  
Stevenson College 80A

C2

College Eight 80B  
College Nine 80B  
College Ten 80B  
Cowell College 80B  
Crown College 80B  
Kresge College 80B  
Merrill College 80B  
Oakes College 80B  
Porter College 80B  
Stevenson College 80B, 81B  
Writing 2

DISCIPLINARY COMMUNICATION (DC CODE)

Students satisfy the DC Requirement by completing 1-3 upper-division courses required for their major totaling a minimum of five credits.

---

COURSES THAT FULFILL GENERAL  
EDUCATION REQUIREMENTS FOR  
STUDENTS ENTERING PRIOR TO FALL  
2010

---

Refer to the course listings in the Class Search in MyUCSC to identify general education courses offered.

INTRODUCTIONS TO DISCIPLINES, HUMANITIES,  
AND ARTS (IH CODE)—TWO COURSES FROM  
DIFFERENT DEPARTMENTS REQUIRED (10  
CREDITS)

Only one IH requirement may be satisfied with a course (equivalent to 5 credits) from the Arts Division (art, film and digital media, history of art and visual culture, music, theater arts); only one language course may be used to satisfy an IH requirement; and only one literature course may be used to satisfy an IH requirement. Note: Transfer courses designated IH from English departments are considered to be literature courses for general education purposes.

**Chinese** 4, 5, 6, 107, 108  
**Cowell College** 118B  
**Crown College** 60  
**Feminist Studies** 1  
**French** 4, 5, 6  
**German** 4, 5, 6  
**Hebrew** 4, 5, 6  
**History** 2A, 2B, 10A, 10B, 11A, 11B, 13, 14, 30, 40A, 40B, 41, 62A, 62B, 65A, 70A, 70B  
**History of Art and Visual Culture** 20, 24, 30, 31, 43, 80  
**History of Consciousness** 12  
**Italian** 4, 5, 6  
**Japanese** 4, 5, 6  
**Linguistics** 50, 53, 111, 112  
**Literature** 1, 61F, 61H, 61J, 61M, 61P, 61R, 61W  
**Greek Literature** 100  
**Latin Literature** 100  
**Spanish/Latin American/Latino Literatures** 60  
**Music** 11A, 11B, 11C, 11D  
**Philosophy** 9, 11, 22  
**Portuguese** 60B, 65A, 65B  
**Russian** 4, 5, 6  
**Spanish** 4, 5, 5M, 6  
**Spanish for Heritage Speakers** 4, 5, 6  
**Theater Arts** 10, 19, 20, 30, 33C, 36, 40, 61A, 61B, 61C, 122

INTRODUCTIONS TO DISCIPLINES, NATURAL  
SCIENCES AND ENGINEERING (IN CODE)—TWO  
COURSES FROM DIFFERENT DEPARTMENTS  
REQUIRED (10 CREDITS)

---

## Undergraduate Academic Program

Transfer courses designated IN from anatomy, botany, physiology, and zoology departments are considered to be biology courses.

### **Anthropology 1**

**Applied Mathematics and Statistics** 5, 7, 11A, 11B, 15A, 15B

**Astronomy and Astrophysics** 1, 2, 3, 4, 5, 12, 13, 15, 16, 18, 119

**Biology: Molecular, Cell, and Developmental** 20A  
**Biomolecular Engineering** 5

**Chemistry and Biochemistry** 1A, 1B, 1C

**College Eight** 81B

**Computer Engineering** 3, 8, 12

**Computational Media** 120

**Computer Science** 2, 5C, 5J, 5P, 10, 12A, 12B, 13H

**Earth and Planetary Sciences** 1, 3, 5, 7, 10, 20, 65, 81B, 119

**Economics** 11A, 11B

**Environmental Studies** 23, 24

**Mathematics** 11A, 11B, 19A, 19B, 20A, 20B

**Ocean Sciences** 1

**Physics** 1, 5A, 5B, 5C, 6A, 6B, 6C

INTRODUCTION TO DISCIPLINES, SOCIAL SCIENCES (IS CODE)—TWO COURSES FROM DIFFERENT DEPARTMENTS REQUIRED (10 CREDITS)

---

**Anthropology** 2, 3

**Community Studies** 10

**Economics** 1, 2

**Education** 60

**Environmental Studies** 25

**Latin American and Latino Studies** 1

**Legal Studies** 10

**Politics** 1, 3, 4, 17, 20, 60, 70

**Psychology** 1, 65

**Sociology** 1, 10, 15

TOPICAL COURSES (T CODE)—THREE COURSES REQUIRED (15 CREDITS)

Students entering UCSC with fewer than 45 transferable credits must take three topical courses in residence at UCSC. UCSC Summer Session courses can be used to satisfy topical requirements.

Choose one course from each academic area: natural sciences (2), social sciences (3), and humanities and arts (4). Courses labeled 5, 6, and 7 satisfy topical requirements in two different academic areas; students can apply this kind of topical course to either academic area indicated. The three topical course requirements must be satisfied with three different courses. In the Schedule of Classes, courses that carry a T general education code are listed as follows:

**2-Natural Sciences Area**

**3-Social Sciences Area**

**4-Humanities and Arts Area**

**5-Humanities and Arts or Social Sciences Area**

**6-Natural Sciences or Humanities and Arts Area**

**7-Natural Sciences or Social Sciences Area**

---

T2-NATURAL SCIENCES

**Astronomy and Astrophysics** 6

**Biology: Molecular, Cell, and Developmental** 80A, 80E, 80J

**Biomolecular Engineering** 80H

**College Eight** 81C

**Computational Media** 80K

**Computer Engineering** 80H, 80N, 80U

**Computer Science** 80B, 80G, 80V

**Crown College** 80S

**Earth and Planetary Sciences** 2, 8, 9, 11, 12

**Electrical Engineering** 80J, 81C

**Microbiology and Environmental Toxicology** 80E

**Ocean Sciences** 80A, 80B

---

T3-SOCIAL SCIENCES

**College Eight** 80A, 80B

**College Nine** 80A, 80B

**College Ten** 80A, 80B

**Economics** 80A, 80G, 80H

**History** 80X

**Latin American and Latino Studies** 30, 40, 45, 80D, 80F, 80H, 80I, 80J, 80P, 80Q, 80R, 80S

**Merrill College** 80A, 80B

**Psychology** 80A

---

T4-HUMANITIES AND ARTS

**Art** 80D, 80E

**Cowell College** 80A, 80B

**Feminist Studies** 80S

**Hebrew** 80

**History** 80H, 80N, 80Y

**History of Consciousness** 80U

**Languages** 80D

**Latin American and Latino Studies** 80E

**Linguistics** 80V

**Literature** 80I, 80L, 80N, 80V, 80Z

**Music** 80A, 80F, 80G, 80H, 80I, 80J, 80M, 80N, 80O, 80P, 80Q, 80S, 80T, 80V, 80W, 80X

**Oakes College** 80H

**Philosophy** 80E

**Porter College** 80A, 80B, 80E, 80I, 80W

**Stevenson College** 80H

**Theater Arts** 80A, 80B, 80D, 80H, 80K, 80L, 80M, 80N, 80P, 80Q, 80S, 80V, 80X, 80Y, 80Z

---

T5-HUMANITIES AND ARTS OR SOCIAL SCIENCES

Undergraduate Academic Program

**Crown College** 80J  
**Feminist Studies** 10, 20, 30, 40  
**Film and Digital Media** 80S, 80T, 80X  
**Kresge College** 80A, 80B, 80H, 80T  
**Latin American and Latino Studies** 80X  
**Linguistics** 80C, 80D  
**Merrill College** 80C  
**Oakes College** 80A, 80B  
**Philosophy** 80M  
**Porter College** 80L  
**Stevenson College** 80A, 80B, 80T

T6–NATURAL SCIENCES OR HUMANITIES AND ARTS

**Art** 80F  
**Biomolecular Engineering** 80G  
**Computer Engineering** 80E  
**Crown College** 80A, 80B  
**Music** 80C, 80L, 80R  
**Philosophy** 80G, 80S  
**Porter College** 80K

T7–NATURAL SCIENCES OR SOCIAL SCIENCES

**Applied Mathematics and Statistics** 80A  
**Computer Engineering** 80A  
**Computer Science** 80J, 80S  
**Crown College** 80F, 80L  
**Electrical Engineering** 80S, 80T  
**Environmental Studies** 80A, 80B  
**Technology and Information Management** 80C

COMPOSITION COURSES (C1 AND C2 CODE)—ONE COURSE EACH REQUIRED FOR STUDENTS ENTERING FALL 2005 (5 CREDITS)

C1

**College Eight** 80A, 80D  
**College Nine** 80A, 80D  
**College Ten** 80A, 80D  
**Cowell College** 80A  
**Crown College** 80A  
**Kresge College** 80A, 80D  
**Merrill College** 80A  
**Oakes College** 80A, 80D  
**Porter College** 80A  
**Stevenson College** 80A

C2

**College Eight** 80B  
**College Nine** 80B  
**College Ten** 80B  
**Cowell College** 80B  
**Crown College** 80B  
**Kresge College** 80B  
**Merrill College** 80B

**Oakes College** 80B  
**Porter College** 80B  
**Stevenson College** 80B, 81B  
**Writing 2**

WRITING-INTENSIVE COURSES (W CODE)—ONE COURSE REQUIRED (5 CREDITS)

**Anthropology** 150, 152, 170, 172, 194A, 194B, 194C, 194D, 194E, 194F, 194G, 194H, 194I, 194K, 194L, 194M, 194N, 194O, 194P, 194Q, 194R, 194S, 194T, 194U, 194V, 194W, 194X, 194Y, 194Z, 196C, 196D, 196E, 196F, 196G, 196H, 196I  
**Applied Mathematics and Statistics** 156  
**Art** 149A, 149B, 150C, 190A  
**Biochemistry and Molecular Biology** 110L  
**Biology: Ecology and Evolutionary** 141L, 145L, 150L, 151B, 158L, 159A, 161L, 188  
**Biology: Molecular, Cell, and Developmental** 100L, 105L, 105M, 109L, 110L, 115L, 186L  
**Chemistry and Biochemistry** 122  
**Community Studies** 194  
**Computer Engineering** 185  
**Computer Science** 166B  
**Earth and Planetary Sciences** 195  
**Economics** 142, 165, 166B, 184, 195  
**Environmental Studies** 104A, 109B, 156, 157, 172  
**Feminist Studies** 194I, 194N, 195  
**Film and Digital Media** 150, 196B

## Undergraduate Academic Program

**Writing** 64, 101, 102, 103, 104, 110A, 161, 163, 165, 166A, 166B, 166D, 167

**QUANTITATIVE COURSES (Q CODE)—ONE COURSE REQUIRED (5 CREDITS)**

---

**Applied Mathematics and Statistics** 3, 5, 6, 7, 10, 11A, 11B, 15A, 15B, 80A, 131

**Astronomy and Astrophysics** 2, 3, 4, 5, 12, 13, 15, 16, 18

**Chemistry and Biochemistry** 1A, 1B, 1C

**College Eight** 81B

**Computer Engineering** 8, 12, 16

**Computer Science** 80B

**Earth and Planetary Sciences** 11, 12, 81B, 111

**Economics** 11A, 11B, 113

**Electrical Engineering** 80T

**Mathematics** 3, 4, 11A, 11B, 19A, 19B, 20A, 20B, 21, 110

**Ocean Sciences** 1

**Philosophy** 8, 9

**Physics** 1, 5A, 6A

**Psychology** 2, 181

**Sociology** 103A, 103B

**ARTS COURSES (A CODE)—ONE COURSE OR EQUIVALENT REQUIRED (5 CREDITS)**

---

Courses carrying fewer than five credits may be combined for credit toward satisfaction of the A requirement if they total at least five credits. Some two-credit music courses must be taken in sequence to fulfill the A requirement.

**Anthropology** 81A, 81B, 81C

**Art** 80D, 80E, 80F, 121, 146T, 147T, 194

**Cowell College** 70A, 70B, 70C, 161Y

**Feminist Studies** 80S, 123

**Film and Digital Media** 80S, 80T, 80X, 132A, 132B, 136A, 136B, 151, 160, 165A, 170A, 170B, 176, 185D

**History of Art and Visual Culture** 20, 22, 24, 27, 30, 31, 40, 41, 43, 50, 51, 58, 60, 70, 100A, 110, 111, 115, 117, 118, 122A, 122B, 122C, 122D, 123A, 123B, 124C, 127A, 127B, 127C, 127D, 133A, 135B, 135D, 135E, 137A, 137B, 137C, 137D, 137E, 140A, 140B, 140C, 140D, 141A, 141B, 141E, 141F, 141H, 141I, 141K, 143A, 143C, 143F, 151, 154, 160A, 160B, 162A, 170, 172, 190A, 190B, 190C, 190D, 190E, 190F, 190G, 190J, 190M, 190O, 190P, 190Q, 190U, 190V, 190W, 190X, 191A, 191B, 191C, 191D, 191E, 191F

**Kresge College** 80H

**Latin American and Latino Studies** 81A, 81B, 81C, 161P, 171

**Literature/Creative Writing** 10, 52, 53, 170, 180, 183

**Music** 1A, 5A, 5B, 5C, 6, 10, 11A, 11B, 11C, 11D, 51, 54,

75, 80A, 80C, 80F, 80G, 80H, 80I, 80J, 80L, 80M, 80N, 80O, 80P, 80Q, 80R, 80S, 80V, 80W, 80X, 102, 103, 159A, 160, 180A, 180B

**Music Sequence Courses** 1C-1C-1C, 2-2-2, 3-3-3, 4A-4A-4A, 4B-4B-4B, 4A-4A-4B, 4A-4B-4B, 8-8-8, 9-9-9, 166-166-166

**Philosophy** 152

**Porter College** 14, 20A, 20C, 20D, 21A, 21C, 22, 22A, 22C, 22F, 22G, 23A, 23B, 23C, 28, 32A, 33, 33A, 34B, 35, 38B, 39, 80E, 80G, 80I, 80L, 83, 120, 121, 121C

**Theater Arts** 10, 12, 14, 15, 17, 18, 18C, 19, 20, 21A, 21B, 22, 23, 30, 31P, 33C, 36, 37, 40, 52, 61A, 61B, 61C, 80A, 80B, 80D, 80H, 80K, 80L, 80M, 80N, 80P, 80Q, 80S, 80V, 80X, 80Y, 80Z, 100A, 100B, 100C, 100W, 104, 106, 113, 114, 115A, 115B, 116A, 117, 117A, 118, 119, 121, 122, 124, 126, 128, 130, 131, 131C, 131P, 135, 136, 137, 139, 142, 151, 152, 155, 157, 159, 160, 161A, 161C, 161D, 161M, 161P, 161Q, 161R, 161S, 161T, 161U, 161Y, 163A, 163E, 163G, 164, 165, 166, 193, 193F

**U.S. ETHNIC MINORITIES/NON-WESTERN SOCIETY COURSES (E CODE)—ONE COURSE REQUIRED (5 CREDITS)**

---

**Anthropology** 110G, 110O, 110P, 130A, 130B, 130C, 130E, 130F, 130G, 130H, 130I, 130L, 130M, 130N, 130T

**Community Studies** 141, 151

**Computer Science** 80S

**Economics** 120, 128

**Education** 60, 128, 140, 141, 164, 181

**Environmental Studies** 154

**Feminist Studies** 10, 102, 115, 120, 123, 124, 132, 139, 145, 150, 175, 194F

**Film and Digital Media** 165B, 165D, 165E, 165G

**History** 11A, 11B, 14, 30, 40A, 40B, 41, 75, 80H, 80X, 80Y, 101A, 101B, 104C, 104D, 106A, 106B, 109A, 111, 121A, 121B, 126, 128, 130, 134A, 134B, 137A, 137B, 137C, 140C, 140D, 141A, 141B, 145, 147A, 147B, 150C, 155, 181A, 185D, 190A, 190B, 190E, 190L, 190N, 190O, 190R, 194G, 194H, 194N, 194U, 194Y, 196N

**History of Art and Visual Culture** 22, 24, 27, 58, 60, 70, 80, 110, 111, 115, 117, 122B, 123A, 123B, 127C, 127D, 135E, 140C, 140D, 141K, 143C, 170, 172, 190A, 190B, 190J, 190M, 190W, 190X, 191A, 191B, 191C

**History of Consciousness** 118

**Latin American and Latino Studies** 1, 30, 40, 45, 80D, 80E, 80F, 80H, 80I, 80J, 80P, 80Q, 80R, 80S, 80X, 100, 100A, 100B, 101, 111, 122, 128, 129, 140, 143, 144, 145, 152, 159, 161P, 164, 166, 168, 169, 170, 175, 176, 178, 180, 194F, 194G, 194H, 194M, 194R

**Legal Studies** 121, 128, 135, 136

**Literature** 61J, 61R, 80L, 80N

**English-Language Literatures** 150A, 150C, 150E, 150F

Undergraduate Academic Program

**French Literature** 134  
**Modern Literary Studies** 125D, 144A, 144D, 144G, 146, 180A  
**Spanish/Latin American/Latino Literatures** 60, 102B, 130A, 130D, 130E, 131H, 134B, 134L, 134M, 134N, 135C, 135E

Service Learning		
Composition	<b>C1 &amp; C2</b>	10
<a href="#">Disciplinary Communication</a>	<b>DC</b>	5*
*Students satisfy the Disciplinary Communication (DC) requirement by completing one to three upper-division courses required for their major, totaling a minimum of five credits and must be taken at UCSC. The DC requirement must be completed at UCSC—transfer courses do not apply to this requirement.		

**Cross-Cultural Analysis (CC code: one 5-credit course or equivalent).** Courses in cross-cultural analysis prepare students for a world with increased interaction and integration among peoples, companies, and governments. These courses encourage a broader and deeper understanding of cultures and societies outside the United States. Such courses might focus on an in-depth examination of one culture, or one aspect of such culture (for example, art, music, history, language). Alternatively, these courses help students develop skills of cross-cultural comparison and analysis. A third option comprises courses that explore topics that are inherently cross-cultural such as international relations or the processes of economic globalization. Whatever the approach, these courses all aim to help students develop the openness and sensitivity necessary for cross-cultural understanding.

**Ethnicity and Race (ER code: one 5-credit course or equivalent).** Courses in Ethnicity and race prepare students for a state and a world that are increasingly multiethnic and multiracial. Beyond familiarizing students with the culture and/or history of one or more ethnic or racial groups, these courses also aim to develop theoretical and practical understanding of questions such as (but not limited to): how categories of ethnicity and race are constructed; the role they can play in identity formation; how ethnicity and race have historically been used to justify forms of enforced inequality; and the contributions of people of various ethnicities to society and to political change. These courses are particularly concerned with how ethnicity and race may intersect with other categories, such as gender, class, or sexual orientation, to shape self-understanding and patterns of human interaction.

**Interpreting Arts and Media (IM code: one 5-credit course or equivalent).** Interpreting Arts and Media courses explore the complex ways in which

## Undergraduate Academic Program

information of all kinds is represented by visual, auditory, or kinesthetic means, or through performance. These courses build in-depth understanding of one or more forms of artistic media: that is, media in which nontextual materials play primary roles. They offer skills in the practice, analysis, interpretation and/or history of one or more of these media, as well as the ability to analyze the means by which they encode and convey information.

**Mathematical and Formal Reasoning (MF code: one 5-credit course or equivalent).** In a world in which much thinking and discourse is directed by emotion and association, formal or mathematical models teach the value of dispassionate analysis. Mathematical and formal-reasoning courses emphasize the development of mathematical, logical, and/or formal reasoning skills. Mathematics-based courses that satisfy this requirement are focused on teaching significant problem-solving skills, and are often oriented toward particular application areas. Other courses that satisfy this requirement train students in formal reasoning skills and/or in the construction and use of formal models. Formal reasoning domains include mathematical proof, logic, and applied logic. Some examples of formal models are: computer programming languages, generative grammars (from linguistics), supply and demand models, and formal music theory.

**Scientific Inquiry (SI code: one 5-credit course or equivalent).** Courses in Scientific Inquiry teach students about the essential role of observation, hypothesis, experimentation and measurement in the physical, social, life, or technological sciences. In these courses, students acquire key concepts, facts, and theories relevant to the scientific method. By the end of the course students should be able to articulate an understanding of the value of scientific thinking in relation to issues of societal importance.

**Statistical Reasoning (SR code: one 5-credit course or equivalent).** In today's globalized, media-saturated information society, we are continually presented with—or asked to present—numerical data. Statistical-reasoning courses prepare students to interpret quantitative claims and make judgments in situations of statistical uncertainty. The goal of statistical-reasoning courses is to teach skills for effective reasoning about probability and the use of quantitative information. Students acquire an understanding of making informed decisions in the presence of uncertainty. Topics addressed in statistical-reasoning courses include ways of (mis)representing data; correlation vs. causation; statistical inferences;

experimental design and data analysis; understanding orders of magnitude.

**Textual Analysis and Interpretation (TA code: one 5-credit course or equivalent).** Even in our current multimedia world, the written word remains a major vehicle of communication. Many fields, from literature and history to law, government, science and religion, depend heavily on the understanding and interpretation of written documents. Textual analysis and interpretation courses have as their primary methodology the interpretation or analysis of texts. The aim of these courses is to develop higher-order reading skills and to train students how to read attentively, to think critically and analytically, to produce and evaluate interpretations, to assess evidence, and to deploy it effectively in their own work. These abilities are not only necessary for academic success, but also for full participation in civic life at every level.

**Perspectives (one 5-credit course or equivalent from any of the three following categories):**

**Perspectives: Environmental Awareness (PE-E code).** The interactions between people and the earth's environments are subtle, complex, and influenced by a variety of natural, scientific, economic, cultural, and political factors. Courses satisfying the environmental-awareness requirement teach students about the complexity of particular ecosystems and/or people's interactions with nature so that they will better understand the environmental issues and trade-offs that are likely to arise in their lifetimes.

**Perspectives: Human Behavior (PE-H code).** Courses in human behavior help students to prepare for a world in which many of the most pressing challenges (such as genocide, environmental degradation, poverty) are impacted by human thoughts, decisions, or practices. As well, they provide a kind of "owner's manual" for students to assist them in understanding themselves, their roles (for example, parent, partner, leader), and their social groups (family, workplace, neighborhood, nation).

**Perspectives: Technology and Society (PE-T code).** The study of technology helps satisfy the need of society for knowledgeable people able to understand, participate, and guide the rapid technological advances that play such a vital role in our world. Technology and society courses focus on understanding technological advances, how they are developed, and their impacts on society.

**Practice (one minimum 2-credit course from any of the three following categories):**

## Undergraduate Academic Program

### Practice: Collaborative Endeavor (PR-E code).

Students learn and practice strategies and techniques for working effectively in pairs or larger groups to produce a finished product. For example, students might learn specialized practical information such as how to use change-management software to monitor and manage changes initiated by multiple group members. Alternatively, they might learn basic information about leadership, teamwork, and group functioning, which they can incorporate into their own group process. What is common to all courses is that some instruction regarding the process of collaboration is provided, in addition to instruction specific to the academic discipline and the products being produced.

**Practice: Creative Process (PR-C code).** Creative-process courses teach creative process and techniques in a context of individual or collaborative participation in the arts, including creative writing. Courses may combine theory and experiment in the creation of a new artwork, or new interpretation(s) of an existing artwork. Creative-process courses include studies in individual or group creativity or improvisation, and/or ensemble rehearsal and performance.

**Practice: Service Learning (PR-S code).** Service-learning courses provide students with an opportunity to integrate their academic coursework with community involvement. Such courses provide supervised learning experiences in which students reflect on, communicate, and integrate principles and theories from the classroom in real-world settings. Students gain valuable practical skills, while giving back to the community.

**Composition (C1 and C2 codes) (Two 5-credit courses or equivalent):** C1 and C2 typically are fulfilled by your college core course and Writing 2, Rhetoric and Inquiry. Students must complete the Entry Level Writing Requirement to satisfy the composition requirements.

**Disciplinary Communication (DC) requirement.** The goal of this requirement is to ensure that students acquire the skills in writing and other forms of communication appropriate for their discipline. Students satisfy the DC requirement by completing 1 to 3 upper-division courses required for their major, totaling a minimum of 5 credits. The DC requirement must be taken at UCSC and is automatically fulfilled by the completion of major requirements.

### Pre-2010 General Education Requirements

Category	General	Number of
----------	---------	-----------

	Education Code	Required Credits
<b>Introductions to disciplines-humanities and arts area*</b> (from two different disciplines)	IH	10
<b>Introductions to disciplines-natural sciences and engineering area*</b> (from two different disciplines)	IN	10
<b>Introductions to disciplines-social sciences area</b> (from two different disciplines)	IS	10
<b>Topical courses</b> (one course from each of the three academic areas;appropriately designated college courses fulfill this requirement)	T	15
Quantitative course	Q	5
Composition course	C or C1/C2	5-10
Writing-intensive course**	W	5
Arts course	A	5
U.S. Ethnic minorities/non-Western society course	E	5
*For purposes of the general education requirements, humanities and arts are combined in one academic area, as are natural sciences and engineering.		
**The W requirement must be completed at UCSC—transfer courses do not apply to this requirement.		

### GENERAL EDUCATION REQUIREMENTS FOR STUDENTS ENTERING PRIOR TO FALL 2010

Designed to expose students to diverse subject areas, the general education requirements also stress a variety of approaches to acquiring knowledge. A description of the general education requirements and a complete list of current courses that satisfy general education requirements under the pre-2010 general education reform are included.

There are nine categories of general education requirements (see table above, Types of General Education Requirements). Each category has a general education code associated with it, and only those courses carrying that code satisfy the requirement. The codes appear in the course descriptions in this catalog

## Undergraduate Academic Program

and in the [Schedule of Classes](#). A list of [Courses That Fulfill General Education Requirements](#) is included in the catalog. The list is subject to change and is updated quarterly. Students should check the [Schedule of Classes](#) each quarter for the most up-to-date listing of courses that fulfill general education requirements.

Some courses satisfy more than one general education requirement, so the total number of required courses may be 10 to 15.

### **Introductions to disciplines (IH, IN, and IS codes).**

These courses introduce a discipline's content, scope, and methodology. Introductory courses from two different departments are required in each of three academic areas: humanities and arts (IH code), natural sciences and engineering (IN code), and social sciences (IS code). Only one language course may be used to satisfy an IH requirement, as all languages are considered to be part of the same discipline. Similarly, only one literature course may be used, and English (transfer) courses are considered to be literature. Only one of the two IH courses may be from the arts (art, film and digital media, history of art and visual culture, music, and theater arts). Transfer courses designated IN from Anatomy, Botany, Physiology, and Zoology Departments are considered to be "biology" courses for general education purposes.

**Topical courses (T code).** These courses expose students to introductory-level themes of broad social or intellectual relevance. Three courses are required, no more than one from each academic area. For information on which disciplines are in each area, see Arts; Engineering; Humanities; Physical and Biological Sciences; and Social Sciences. College core courses are labeled topical and carry the designation of the appropriate academic area.

**Quantitative course (Q code).** These courses provide methods for acquiring quantitative reasoning that involve use of advanced algebra, statistics, or calculus. One course is required.

**Writing courses (C1, C2, and W codes).** These courses stress explicit attention to the craft of writing. Having satisfied the [Entry Level Writing Requirement](#) by the end of your first year of enrollment at UCSC, you must complete two to three courses in writing. One of these must be a writing-intensive course (W code) that provides instruction and extensive practice in writing applied to a particular subject. For some courses, only certain sections are writing intensive (look for the "W" in the Schedule of Classes when enrolling). You must take this course at UCSC.

Students satisfy the other part of the writing requirement by passing two composition courses (C1

and C2 codes). You must fulfill the composition requirement prior to the seventh quarter of enrollment and before you can enroll in a writing-intensive course.

**Arts course (A code).** These courses provide the exposure to creative or artistic expression necessary for a liberal arts education. One designated arts course is required; most are offered through art, film and digital media, history of art and visual culture, music, and theater arts.

**Ethnic minorities/non-Western society course (E code).** These courses are intended to increase knowledge of ethnic minorities in the United States and non-Western cultures, improve cross-cultural awareness, and explore relationships between ethnicity and other aspects of a liberal arts curriculum. One course is required.

**Courses of fewer than 5 credits.** Students usually meet the general education requirements with 5-credit courses. Several related arts courses of fewer than 5 credits with the same code may be used to satisfy the arts (A) general education requirement if they total at least 5 credits.

## ADVANCED PLACEMENT AND INTERNATIONAL BACCALAUREATE EXAMINATIONS

---

The university grants credit for College Board Advanced Placement (AP) Examinations on which a student scores 3, 4, or 5 and for International Baccalaureate Higher Level (IBH) Examinations on which a student scores 5, 6, or 7. The university does not grant credit for IB standard or subsidiary level exams. Students completing the International Baccalaureate Diploma with a score of 30 or higher receive 30 quarter credits. The credit is applied toward the total credits required for graduation and toward the UCSC campuswide general education requirements, as indicated in the table on pages 29–30, Advanced Placement (AP)/International Baccalaureate Higher Level (IBH) Examinations. Students should be aware that AP, IB, and college-level courses will not be granted duplicate credit. In these cases, the university will award credit for only one.

## AP AND IBH EXAMINATION CREDIT TOWARD DEGREE REQUIREMENTS

---

Certain departments also allow prospective majors to obtain waivers for prerequisite courses. In all cases, a student should contact the particular department to discuss his or her plans with an adviser. Please note that approval is not automatic; a petition must be filed with most departments.

**CREDIT FOR TRANSFER STUDENTS**

**General Education Requirements**

Transfer students may apply courses taken at other institutions toward the lower-division general education requirements. The disciplinary communication course(s) (DC code) must be taken at UCSC.

If you are currently attending one of the California community colleges, see the [ASSIST web site](#), or consult with the UCSC Office of Admissions or your current counselor to determine which college courses satisfy UCSC general education requirements.

Transfer students who have satisfied the general education or breadth requirements of another UC campus prior to transfer will be considered to have completed the UCSC general education requirements, with the exception of the DC requirement. Completion of the Intersegmental General Education Transfer Curriculum (IGETC) prior to enrollment at UCSC will also be accepted in lieu of the campus general education requirements, with the exception of the DC requirement.

**Intersegmental General Education Transfer Curriculum (IGETC)**

The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses that prospective California community college transfer students may complete to satisfy the lower-division breadth/general education requirements at any University of California or California State University (CSU) campus (see the IGETC table below). This curriculum is the result of an agreement by the University of California, the California State University, and the California community colleges, aimed at simplifying the transfer process for community college students. The IGETC is intended exclusively for California community college transfers and is not an option for continuing UCSC students or for students transferring from four-year colleges or universities.

Students who complete the IGETC prior to transfer are not required to satisfy the UCSC lower-division general education requirements. For students who are partially certified, meaning that they are only missing one or two courses for complete certification, please contact the Office of Admissions as soon as possible, but only once the official certification has been received by UC Santa Cruz. Courses used to satisfy IGETC must be completed with a grade of C (2.0) or better. A grade of Credit or Pass may be used if the community college's policy states that it is equivalent to a grade of C (2.0) or better.

IGETC is not recommended for majors that require extensive course preparation, such as any major in the Jack Baskin School of Engineering or the Division of Physical and Biological Sciences.

<b>IGETC Subject and Unit/Credit Requirements</b>		
<b>Subject Area</b>	<b>Courses Required</b>	<b>Units/Credits Required</b>
<b>1. English Communication</b> One course in English composition and one course in critical thinking/English composition. (Students transferring to CSU must take an additional course in oral communication.)	2 courses	6 semester units or 8-10 quarter credits
<b>2. Mathematical Concepts and Quantitative Reasoning</b>	1 course	3 semester units or 4-5 quarter credits
<b>3. Arts and Humanities</b> Three courses with at least one from the arts and one from the humanities.	3 courses	9 semester units or 12-15 quarter credits
<b>4. Social and Behavioral Sciences</b> Three courses from at least two disciplines or an interdisciplinary sequence.	3 courses	9 semester units or 12-15 quarter credits
<b>5. Physical and Biological Sciences</b> One physical science course and one biological science course, at least one of which includes a laboratory.	2 courses	7-9 semester units or 9-12 quarter credits
<b>6. Language Other Than English</b> Proficiency equivalent to two years of high school in the same language. (Not required of students transferring to CSU.)	Proficiency	Proficiency
<b>Total</b>	<b>11 courses</b>	<b>34 semester units or 45-57 quarter credits</b>

**Major Requirements and Course Prerequisites**

## Undergraduate Academic Program

Students who believe they have taken courses at other institutions that satisfy major requirements or UCSC course prerequisites should contact their major adviser for review.

### COLLEGE REQUIREMENTS

---

You must fulfill the requirements of your college in addition to those of your major and of the university. Each college has established a core course, which all first-year students are required to complete. Students admitted as transfer students are exempt from the core course requirement but may take the course at their option on a space-available basis. College requirements are outlined below. The core courses are described more fully in the individual [college descriptions](#).

#### College Eight

- College Eight 80A, Introduction to University Discourse: Environment and Society, fall quarter, or College Eight 80B, Rhetoric and Inquiry: Environment and Society, fall quarter or College Eight 80C and 80D, Introduction to University Discourse: Writing for Environment and Society, fall and winter quarters; and College Eight 81A, The Environment and Us, fall quarter.
- College Eight 81A, The Environment and Us, fall quarter.
- College Eight 81B, Fundamentals of Environmental Science, winter quarter.
- College Eight 81C, Designing a Sustainable Future, spring quarter

**Note:** College Eight 81A, and 80A, or 80B, or 80C and 80D are mandatory for all incoming freshmen. College Eight 81B and 81C also satisfy many of UCSC's general education requirements.

#### College Nine

- College Nine 80A, Introduction to University Discourse: International and Global Issues, fall quarter, or College Nine 80B, Rhetoric and Inquiry: International and Global Issues, fall quarter; or College Nine 80C and 80D, Introduction to University Discourse: International and Global Issues Writing Intensive, fall and winter quarters; or 80F, International Global Issues, fall quarter

#### College Ten

- College Ten 80A, Introduction to University Discourse: Social Justice and Community, fall quarter, or College Ten 80B, Rhetoric and Inquiry: Social Justice and Community, fall quarter, or College Ten 80C and 80D, Introduction to University Discourse: Social Justice and Community, Writing Intensive, fall and winter quarters; or 80F, Social Justice and Community, fall quarter

#### Cowell

- Cowell 80A, Introduction to University Discourse: Imagining Justice Past and Present, fall quarter, or Cowell 80B, Rhetoric and Inquiry: Imagining Justice Past and Present, fall quarter

#### Crown

- Crown 80A, Introduction to University Discourse: Ethical Issues in Emerging Technologies, or Crown 80B, Rhetoric and Inquiry: Ethical Issues in Emerging Technologies

#### Kresge

- Kresge 80A, Introduction to University Discourse: Power and Representation, fall quarter, or Kresge 80B, Rhetoric and Inquiry: Power and Representation, fall quarter, or Kresge 80C and 80D, Introduction to University Discourse: Power and Representation Writing Intensive, fall and winter quarters; or 80F, Power and Representation: Collaborative Understandings, fall quarter

#### Merrill

- Merrill 80A, Introduction to University Discourse: Cultural Identities and Global Consciousness, fall quarter, or Merrill 80B, Rhetoric and Inquiry: Cultural Identities and Global Consciousness, fall quarter; or 80F, Communicating Cultural Consciousness, fall quarter

#### Oakes

- Oakes 80A, Introduction to University Discourse: Communicating Diversity for a Just Society, fall quarter, or Oakes 80B, Communicating Diversity for a Just Society, fall quarter, or Oakes 80C and 80D, Introduction to University Discourse: Communicating Diversity for a Just Society Writing Intensive, fall and winter quarters

#### Porter

- Porter 80A, Introduction to University Discourse: Writing Across the Arts, fall quarter, or Porter 80B, Rhetoric and Inquiry: Writing Across the Arts, fall quarter; or 80F, Composition, Creative Inquiry, and the Arts, fall quarter

#### Stevenson

- Stevenson 80A, Introduction to University Discourse: Self and Society, fall quarter, or Stevenson 80B, Rhetoric and Inquiry: Self and Society, fall quarter

Stevenson 81A, Self and Society 2, winter quarter, or Stevenson 81B, Rhetoric and Inquiry: Self and Society 2, winter quarter

## Undergraduate Academic Program

To qualify for a bachelor's degree at UCSC, you must complete the minimum requirements for a major program, as well as satisfy university, campus, and college requirements.

At UCSC, you have the option of pursuing a single major, a double major, or a combined major. The minimum requirements for an established major program are set by the sponsoring department. (If you are a transfer student, the department will determine which of your transferable courses may be used to satisfy major requirements.) The major involves substantial work in the discipline and requires no fewer than 40 upper-division or graduate credits. Only courses in which you earn a grade of Pass, C (2.0 GPA), or better satisfy major or minor requirements.

### Declaring a Major

The field of interest you indicate on your application to UCSC does not automatically place you in a major. You are advised to declare your major as soon as possible. You are required to declare a major before enrolling in the equivalent of your third year.\* You will not be allowed to enroll in classes for the equivalent of your third year until you have declared a major. Certain majors have a limit on the number of students they can serve. Be sure you are aware of all the necessary criteria for qualifying for the major. It is wise to apply for major status as soon as you feel sure of the field you wish to enter and have met qualification requirements (if any) for the major you wish to pursue. Junior transfer students must declare a major during their second quarter at UCSC by the deadline printed in the [Academic and Administrative Calendar](#) in the [Schedule of Classes](#).

You should determine the requirements for possible major choices as soon as possible because certain majors require substantial preparation, with many interlocking course sequences and qualifying GPAs in certain major foundation courses. If you intend to pursue such a major, you should start work toward it early in your undergraduate career, and review your progress toward qualification regularly. (Review majors that interest you in the [Programs and Courses](#) section.) Academic advisers can offer assistance in selecting courses appropriate to your individual needs.

**\*Note:** This is the year you would become a junior given normal progress to degree. For example, if you transfer to UCSC as a beginning sophomore, it is your second year here.

### Comprehensive Requirement

Every major at UCSC includes a senior exit requirement designed to integrate the knowledge and skills learned throughout the curriculum. This capstone requirement

may be a senior thesis, senior seminar, comprehensive examination, or some other integrative experience designed for the major. Choices for satisfying this requirement are specified with the requirements for each major.

### Minor Programs

See [Fields of Study](#) for undergraduate minors currently offered at UC Santa Cruz. Completion of a minor is optional. If you wish, you may complete more than one minor.

The sponsoring department establishes the course requirements for a minor. The minor involves substantial work in the discipline and requires no fewer than 25 upper-division or graduate credits. The minor appears on your official transcript but not on your diploma.

### Additional Majors or Minors

To complete multiple majors and minors, you must fulfill all of the requirements for all majors and minors declared, including the comprehensive requirement for each major. In general, a single thesis may not be used for more than one major. You may count courses for more than one major or minor, as long as each major includes 40 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor, and each minor includes at least 25 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor.

The diploma of a student who has completed a double major in history and music, for example, would read "Bachelor of Arts with Majors in History and Music."

### Combined Major

A combined major allows you to complete a course of study involving two disciplines offered as regular programs at UC Santa Cruz.

Examples of combined majors include environmental studies/economics and Latin American and Latino studies/politics. A combined major is designed by faculty representatives from both disciplines. In general, fewer courses are required than for a double major, and students complete the comprehensive requirements as specified for each combined major. Combined majors currently available are listed in the footnotes in the [Fields of Study](#).

The diploma of a student who has completed a combined major in environmental studies and economics, for example, would read "Bachelor of Arts with a Major in Environmental Studies/Economics."

### Individual Major

## Undergraduate Academic Program

Students may also work with three faculty members to define an individual major specific to his or her academic goals. Proposals for individual majors require considerable effort to develop, and students are advised to consider double major, combined major, and major/minor alternatives. College advising offices can provide information on the individual major proposal and approval process.

### Catalog Rights

Effective for all undergraduates who entered in fall quarter 1993 or after, students may follow the degree requirements from either the UCSC General Catalog published at the time of entering UCSC or subsequent catalog(s). Students need not follow a catalog in its entirety but may elect to follow different catalog years for their college requirements, university and general education requirements, requirements of their major(s), and requirements of any minor(s).

Catalog year will initially be set for the first year of enrollment at UCSC. Students may elect to follow requirements from other catalog year(s) when filing the Petition for Major/Minor Declaration. All requirements for graduation outlined in the catalog(s) selected must be met before graduation. Changing catalog year(s) for majors/minors is done by contacting your major adviser (for major requirements) or your college adviser (for college, university, and general education requirements).

Students transferring from other collegiate institutions may elect to meet as graduation requirements one of the following:

- those in effect at the time of transfer to UCSC;
- those subsequently established; or
- those in effect when the student entered a previous collegiate institution, provided that entry was not more than three years prior to the time of transfer to UCSC.

Students who seek readmission to UCSC after a break in attendance greater than two years (six regular quarters) must adhere to the graduation requirements in effect at the time of readmission or those subsequently established.

Students who entered prior to 1993 should see an adviser. Their catalog year(s) for graduation, whether the year they entered UCSC or subsequent year(s), will be decided at the discretion of their major department and/or their college.

### Institutional Responsibility

Undergraduate students who have made significant progress toward a degree in a specific major can assume that a degree will be granted if they meet all

catalog degree requirements and maintain continuous enrollment and progress.

Should UCSC find it necessary to discontinue a specific major, every effort will be made to allow currently enrolled majors to complete their degrees within a reasonable period of time. This may include (1) movement to a similar or related degree track; (2) substitution of requirements; (3) development of an individual major proposal; or (4) completion of courses at another University of California campus through the Intercampus Visitor Program. Students with questions concerning this policy should contact their major and college advising offices.

In all cases, any financial obligations are the responsibility of the individual student involved.

---

## EVALUATING ACADEMIC PERFORMANCE

---

UC Santa Cruz has one of the more comprehensive systems for evaluating students' academic performance of any research university in the United States. The evaluation system consists of two major components: the assignment of a final grade in the course and an accompanying evaluation of your performance.

### EVALUATIONS

---

Beginning fall 2010, undergraduate evaluations are at the option of the faculty. In each course for which you receive a grade of D or better (or P) an evaluation of your academic performance may be submitted. An evaluation may:

- Describe the strengths and weaknesses of your performance in the various areas of class activity (discussion, laboratory work, term papers, examinations)
- Assess your general understanding of the course content
- Recognize additional or particularly outstanding work

Evaluations are used at UCSC in academic advising, reviewing scholarship applications, and awarding College Honors and Honors in the major. Evaluations are a permanent part of your academic record. All students may request transcripts either with or without evaluations.

### GRADES

---

At the end of each course, you will receive one of the following grade notations:

- A excellent
- B good
- C fair

## Undergraduate Academic Program

D poor

F fail

P passing

NP not passing

I incomplete

IP in progress

W withdrawal

The grades of A, B, C, and D may be modified by a plus (+) or a minus (-). You will not receive credit for graduation in any course in which you receive a final grade of F or NP. The grades I and IP are temporary grades used in special circumstances. The final notation W indicates that you officially withdrew from the course before completing it.

### GRADE POINTS

---

Grade points are assigned to a letter grade as follows:

4.0 = A+

4.0 = A

3.7 = A-

3.3 = B+

3.0 = B

2.7 = B-

2.3 = C+

2.0 = C

1.7 = C-

1.3 = D+

1.0 = D

0.7 = D-

0.0 = F

The grades P and NP are not included in calculating your GPA and so are not assigned grade points. Courses in which the interim grades I and IP are assigned earn no grade points or credit until the interim grade is replaced by a final letter grade.

### GRADE POINT AVERAGE (GPA)

---

Undergraduates entering UCSC in fall 2001 and thereafter have a UCSC cumulative grade point average calculated from UCSC courses, courses taken through the Education Abroad Program, and courses taken at another UC campus as part of the Intercampus Visitor Program.

A grade point average is determined by dividing the number of grade points earned by the number of units attempted for a letter grade. In calculating your UCSC GPA, the interim grades IP and I are not included in the computation because you do not earn those credits until they are replaced with a final grade. (However,

when checking for whether you have satisfied the 2.0 UC GPA requirement for graduation, these interim grades are included and counted as courses with grade F [or NP]).

If you repeat a course in which you have received a C-, D+, D, D-, or F, only the last grade recorded shall be computed in your GPA for the first 15 credits of repeated work. After the 15 credit maximum is reached, the GPA will be based on all grades assigned and total credits attempted.

Undergraduates who entered UCSC for the first time in or after fall 1997 and before fall 2001 have a UCSC cumulative grade point average only if they have elected letter grades in at least two-thirds of the cumulative credits attempted. Undergraduates who entered UCSC prior to fall 1997 cannot have an official UCSC grade point average calculated.

### PASS/NO PASS OPTION

---

Students in good academic standing may request to take specific courses on a Pass/No Pass basis. Students receive a P (Pass) for work that is performed at C level or better. Work performed at below a C level receives a notation of NP on the student's transcript, and no academic credit is awarded for the course. Requests for Pass/No Pass grading must be submitted and confirmed by the Grade Option deadline printed in the [Academic and Administrative Calendar](#). If you request P/NP grading in a course and you are later placed on academic probation, your P/NP grading request will be canceled.

No more than 25 percent of the UCSC credits applied toward graduation may be graded on a Pass/No Pass basis. This includes any credits completed in the Education Abroad Program or on another UC campus in an intercampus exchange program. Students must be careful about the use of the Pass/No Pass option. Some courses may only be taken Pass/No Pass, and therefore count against the 25 percent Pass/No Pass limit. Several majors require all or most major requirements to be taken for a letter grade; read the major requirements section carefully before using the Pass/No Pass option for any course in a major you are considering.

### INCOMPLETE

---

The notation I may be assigned when your work for a course is of passing quality but for which some specific required work has not been completed. You must make arrangements with the instructor before the end of the course in order to receive an Incomplete. To remove the Incomplete, you must submit the remaining coursework and file a petition by the deadline printed

## Undergraduate Academic Program

in the Academic and Administrative Calendar (generally the end of the following quarter). If you do not meet the deadline, the Incomplete lapses to a No Pass or an F, depending on the grading option selected at the beginning of the quarter.

The notation IP (In Progress) is reserved for a single course extending over two or three terms of an academic year. The grade for such a course may be awarded at the end of the course and shall then be recorded as applying to each of the terms of the course. A student satisfactorily completing only one or two terms of a course extending over two or three terms of an academic year will be given grades for those terms. The grade option selected in the first quarter of the multiple-term sequence applies to all quarters of the sequence.

Grade changes (except for I and IP, as above) are allowed only to correct clerical or calculation errors by the instructor and must be submitted to the Office of the Registrar by the instructor in charge of the course within one year of the close of the quarter for which the original grade was submitted.

### STUDENT RESPONSIBILITY

---

Students are responsible for using the Academic Information Systems (AIS) to set and confirm choices for grading options and for ensuring timely completion of all requirements. Students view their schedule at [MyUCSC](#).

### COURSE LOADS

---

The usual course load for UCSC undergraduates is 15 to 19 credits, most often as three 5-credit courses and associated laboratories and sections. After instruction begins, students with a UCSC GPA of 3.0 may enroll in up to 22 credits without special approval and may seek approval for higher loads from their college advising office. Students in their first quarter or with a lower GPA must seek approval from their college advising office for enrollment in more than 19 credits.

College approval is required to carry fewer than 15 credits.

### ACADEMIC PROGRESS

---

Academic progress is a measure of the completion of courses with a D or better, or Pass. Colleges monitor academic progress to ensure you are progressing toward your degree, which must be earned within 15 quarters of enrollment (five years).

Minimum progress is based on length of time at UCSC. The minimum acceptable progress is completion of 36 credits for each academic year, 12 credits for each additional full-time term, and four-fifths of credits

attempted for each part-time term. Progress is measured cumulatively, not term by term. For example, a full-time student must complete 48 credits by the end of the first quarter of the second year.

If you do not maintain minimum progress, your college may require you to take higher course loads, complete Summer Session courses, or make other adjustments to your study plan.

A separate financial aid satisfactory academic progress policy (FASAP) defines the GPA and progress requirements for remaining eligible to receive financial aid. Information can be found [here](#).

### ACADEMIC STANDING

---

Academic standing is a measure of performance in completed courses. You must maintain a 2.0 UCSC GPA in order to remain in good academic standing.

If your UCSC term or cumulative GPA falls below 2.0 at the end of any term, you will be placed on academic probation for the next term. You will need to work with your college and major advisers to determine the best way to return to good academic standing. Be sure to take full advantage of the many learning support services available at UCSC.

If your UCSC GPA for any term falls below 1.5, or if you are on academic probation and your cumulative GPA at the end of a term is below 2.0, you are also subject to disqualification. This means that your enrollment at UCSC may be barred for a specific period of time, or you may be disqualified indefinitely from attending the University of California. In many cases, a specific study plan can be developed with your college that will enable you to remain enrolled at UCSC.

For students who entered UCSC prior to fall 2001, academic standing and progress are calculated differently. Contact your college office or see [The Navigator](#) for more information.

A separate financial aid satisfactory academic progress policy (FASAP) defines the GPA and progress requirements for remaining eligible to receive financial aid. Information can be found [here](#).

### MAXIMUM CREDITS AND YEARS

---

Students are expected to complete their degree objective(s) within four years, with maximum enrollment limits of at most 225 credits and five academic years (Advanced Placement and International Baccalaureate units are not counted). Upper-division transfer students are expected to complete their degree objective(s) within at most 135 UCSC credits and three academic years.

## Undergraduate Academic Program

Colleges may make exceptions to the credit maximum for students in certain cases. Such exceptions are conditional on maintaining academic standing, minimal progress, and progress toward the degree objective(s). Students in danger of exceeding the credit limit or the five-year or three-year limit may be required to modify their degree objective, such as by completing a major without a minor or double major, or completing a related major with fewer course requirements.

### REPEATING COURSES

---

Undergraduates may repeat courses in which they earn a C-, D+, D, D-, F, No Pass, or W. For an undergraduate to repeat a course more than once requires approval of the student's college. A grade of W counts as an attempt. Courses in which a C-, D+, D, D-, or F is earned may not be repeated on a Pass/No Pass basis. Courses in which a grade of No Pass is earned may be repeated on the same basis or for a letter grade. For the first 15 credits of repeated courses, the original grade is excluded from the GPA, and only the grade from the repetition is used. After the 15-credit maximum is reached, all grades are included in the GPA. However, credit is not awarded more than once for the same course. The grade assigned each time the course is taken will be permanently recorded on the official transcript.

### ACADEMIC INTEGRITY

---

The university is dedicated to the unhindered pursuit of knowledge and its free expression. It is essential that faculty and students pursue their academic work with the utmost integrity. This means that all academic work produced by an individual is the result of the sole effort of that individual and acknowledges the contributions of others explicitly. It is the responsibility of students and faculty to be absolutely clear about what constitutes plagiarism, cheating, or other violations of academic integrity. Violations of academic integrity by students result in both academic sanctions (e.g., failing the course) and disciplinary sanctions (e.g., suspension or dismissal). Consult the campus's [Student Policies and Regulations Handbook](#) for more information.

### UNDERGRADUATE HONORS PROGRAM

---

UC Santa Cruz awards several honors for outstanding academic achievement.

#### Dean's Honors

Students will be eligible for quarterly Dean's Honors if they have earned a minimum of 15 units that quarter, of which at least 10 are graded, with a term grade point average (GPA) equal or higher than that required for University Honors at graduation in their group\* for the

current academic year. The notation "Dean's Honors" will appear on the transcript.

**\*Note:** GPA thresholds for Baskin School of Engineering majors are calculated separately from those of majors in all other divisions.

#### Honors at Graduation

Honors at graduation are awarded by the university and by the separate majors and colleges based on a review of their graduates' academic records. In general, honors are limited to 15 percent of the graduating class. University Honors are based solely on the cumulative UC GPA. Faculty review for major and college honors may involve additional criteria.

#### University Honors

To be considered for University Honors at graduation, students must have completed 70 or more units at the University of California and have attained in their group\* a UC GPA that places them in the rankings as follows: Summa Cum Laude, top 2 percent; Magna Cum Laude, next 3 percent; Cum Laude, next 10 percent. Each year and for each group, the registrar will calculate the GPA thresholds required for these levels of University Honors, based on the GPAs of recent graduates. The notation "University Honors" will appear on the diploma and transcript.

**\* Note:** GPA thresholds for Baskin School of Engineering majors are calculated separately from those of majors in all other divisions.

#### Honors in the Major

At graduation, the department sponsoring a student's major program may confer Honors or Highest Honors in the major. This notation appears on the transcript as well as on the diploma. In general, no more than 15 percent of the graduation class in a major will be awarded Honors at graduation.

#### Deadlines

To be considered for honors in the major or college honors, students must apply to graduate by the Registrar's deadline.

**Any student who has a reportable disciplinary sanction for a violation of academic integrity policies may be ineligible for any honors designation, at the discretion of the agency that awards the designation.**

### UNDERGRADUATE HONORS OPPORTUNITIES

---

#### First-Year Honors Program

The UCSC First-Year Honors Program offers a congenial and challenging academic home for a select group of well-prepared students at UC Santa Cruz. This enriched program of study includes special courses, seminars,

## Undergraduate Academic Program

colloquia, and other events during each quarter of the academic year. Qualified UCSC applicants who are offered admission to the university will be invited to apply to participate in the program.

### Honor Societies

Many UC Santa Cruz students are members of departmental, professional, local, and national honor societies whose goals are to recognize and improve scholastic standing in an area of interest. Among these are Phi Beta Kappa, the oldest national society that advances scholarship and recognizes excellence in the liberal arts and sciences; Tau Beta Pi, the engineering honor society that recognizes students of distinguished scholarship, exemplary character, and dedication to service; the Golden Key International Honour Society, which provides recognition and leadership opportunities to top-performing students; and Psi Chi, which encourages, stimulates, and maintains excellence in scholarship, and advances the science of psychology.

### Awards and Scholarships

UC Santa Cruz has a variety of scholarship and award opportunities that are designed to reward, encourage, and assist students in pursuing academic excellence and leadership roles. Students can find such opportunities through their colleges, departments, divisions, and various external agencies.

USCS provides support for students for a variety of prestigious scholarships and awards such as the Karl S. Pister Leadership Opportunity Award, Deans' and Chancellor's Awards, Steck Foundation Award, Boren Scholarship, Donald A. Strauss Scholarship, Fulbright U.S. Student Program, Scholarship, Marshall Scholarship, and Rhodes Scholarship.

### TRANSCRIPTS

Academic records are maintained by the Office of the Registrar, which will issue an official transcript only on your authorized request.

For information on ordering transcripts, please refer to the following URL:

[registrar.ucsc.edu/records/transcripts/index.html](http://registrar.ucsc.edu/records/transcripts/index.html).

If you have outstanding financial obligations to the university, a hold may be placed on your transcript. Students may access their unofficial transcript on MyUCSC.

Transcripts for UCSC Extension courses should be requested from UCSC Extension Records, 2505 Augustine Drive, Suite 100, Santa Clara, CA 95054-3003, (408) 861-3700.

### PRIVACY OF RECORDS

UCSC students are informed annually of the federal Family Educational Rights and Privacy Act (FERPA) and its provisions. This act, which the institution follows, was designed to protect the privacy of education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Educational Rights and Privacy Act Office concerning alleged failures by the institution to comply with the act.

UCSC policy explains in detail the procedures to be used by the institution for compliance with the provisions of the act. FERPA guidelines are available at [Privacy of Student Records](#). The full text of the University of California policies applying to the Disclosure of Information from Student Records is online: [registrar.ucsc.edu/records/disclosure/index.html](http://registrar.ucsc.edu/records/disclosure/index.html).

Questions concerning the Family Educational Rights and Privacy Act may be referred to the Office of the Registrar, 190 Hahn Student Services Building.

---

## ADVISING: FROM COURSE SELECTION TO CAREERS

---

### ACADEMIC ADVISING

---

Academic advising at UC Santa Cruz aims to assist students in clarifying their educational goals and in developing academic plans to achieve them. The core of UCSC's advising system is housed in the colleges and academic programs and is supplemented by advising and support services throughout the campus.

**College academic advisers** (some of whom are called "academic preceptors") are generalist advisers who focus on orientation to the university, pre-major advising, academic success, and campuswide requirements such as general education and university requirements. Each college has an advising team that can provide you with individual and group advising and can refer you to resources and educational opportunities. You remain affiliated with your college advisers throughout your undergraduate career.

**Staff advisers in UCSC's academic programs** (sometimes called "major advisers") focus on areas related to a student's major or minor. Major advisers can help you understand declaration and major requirements, and can assist you in planning a program of study. They can help you identify enrichment opportunities within the major and refer you to appropriate faculty advisers. Faculty advisers may serve as mentors in your field, recommending courses and helping you refine your educational goals. For transfer students and for students in many majors (such as those in the physical and biological sciences,

## Undergraduate Academic Program

engineering, and the arts), it is important to review information provided by major advisers prior to your first quarter on campus.

For help in assessing career interests and exploring and choosing career options, contact the [Career Center](#). The staff also can assist you with choosing a major, résumé preparation, interviewing skills, applying for an internship, and job-search strategies.

If you plan to go on to graduate school, consult with faculty in your major. Faculty advisers are the best people to ask about the quality of graduate programs in your field of interest. In addition, the Career Center offers advising and workshops on applying to graduate school.

If you intend to pursue graduate study in a field not offered as a major at UCSC, you can often prepare for your intended program through one of the campus's regular majors. You must plan your studies carefully, however, and advising will be especially important. The Career Center has information that will help prepare you for graduate and professional programs. The following are some fields in which UCSC alumni have pursued graduate study and successful careers:

- Business
- Conservation
- Film
- Finance
- Guidance and counseling
- Health fields
- High-tech industry
- Human resources
- Industrial and labor relations
- International relations
- Law
- Marketing
- Museum administration
- Public administration
- Urban planning

The Career Center includes advisers with specialized expertise in preparing for careers in medicine or another health-related field (including dentistry, nursing, nutrition, occupational therapy, optometry, osteopathic medicine, pharmacology, physical therapy, public health, and veterinary medicine), and in preparing for careers in law.

A number of programs provide additional academic and comprehensive support services to students with specific needs. Educational Opportunity Programs (EOP), Services for Transfer and Re-Entry Students (STARS), and the Disability Resource Center are described below. Counseling on personal and family

issues is available through [Counseling and Psychological Services](#). If you need assistance that is not listed in this section, consult [The Navigator](#) or check with your college advisers.

Your first step in accessing advising at UCSC is to attend Orientation.

### ORIENTATION

---

All new UC Santa Cruz students are expected to attend an on-campus orientation. Students who attend Orientation feel better prepared, encounter fewer problems, and receive priority fall class enrollment. Attending Orientation is one of the most important steps a new student takes in preparing for the transition to university life, providing the academic advising needed to make informed decisions about classes and majors, and the opportunity to get questions answered, and learn more about the university.

Orientation begins the process of academic advising and provides a comprehensive introduction to all aspects of UCSC. While at Orientation, students enroll in classes, learn to access campus resources, meet with college and department advisers, meet new and continuing students, learn about the many student organizations on campus, attend a resource fair, take a student ID picture, attend breakout sessions, and gain valuable student life information. Orientation is an indispensable resource that helps facilitate academic and personal success at the university.

**Summer Orientation** is held several times over the course of the summer and includes separate programs for first-year and transfer students, as well as a concurrent program for family members.

**Fall Welcome Week**, scheduled approximately five days prior to the beginning of fall quarter, is the next step in the orientation and advising process for new students entering fall quarter. It provides students with an opportunity to settle into life at UCSC, take advantage of important services, and continue their academic advising.

**International Orientation** is required for all international students regardless of residency status. The 10-day mandatory International Orientation program eases students' transition to university life and introduces students to a research university's academic expectations, UC level writing norms, campus resources, and the UCSC and Santa Cruz communities. International Orientation is scheduled prior to Welcome Week and the beginning of fall quarter.

## Undergraduate Academic Program

Students make their reservations for Summer Orientation online through the UC Santa Cruz portal at [MyUCSC](#).

Questions can be directed to the Office of Campus Orientation Programs at (831) 459-5468, or via e-mail to [orientation@ucsc.edu](mailto:orientation@ucsc.edu). Web: [orientation.ucsc.edu](http://orientation.ucsc.edu).

### CAREER CENTER

---

UC Santa Cruz graduates find success in many different career fields. Their superior education is the foundation for this success. The staff at the Career Center will help you link your educational experience to the world of work. The center provides a variety of employment and career-development services to help students obtain rewarding and successful careers.

Both undergraduate and graduate students are encouraged to visit the Career Center often throughout their time on campus. The first step is to meet with a career adviser to begin developing a focused career plan. Simply sign up online for an advising appointment through SlugQuest on the Career Center web site.

Advisers assist students in selecting majors, finding internships and part-time jobs, applying to graduate school, conducting a job search, and much more.

Workshops offered by the Career Center include: Finding and Applying to Internships; Résumé and Cover Letter Writing; Applying to Graduate and Professional School; and special workshops on specific majors or career fields. Check out the Career Planning Guide for additional career development activities suggested for students from first year through senior year.

Your college experience is likely to include a part-time job or internship in your area of interest. An internship is one of the best ways to gain practical work experience in your area of interest. The Career Center has hundreds of opportunities available. Off-campus and on-campus employment opportunities (both work-study and non-work-study) are posted on the [Career Center's web site](#).

The Career Center's web site contains a wealth of material on career exploration, graduate and professional schools, job search, career fields, internships, and employers. However, the most exciting online resource is eVisor, scheduled to launch in Fall of 2015. The new online resource helps students connect with alumni in their field of interest who have a desire to assist other Slugs.

UC Santa Cruz students and alumni looking for full-time career opportunities need look no further than SlugQuest—an online site that lists job openings targeted to UCSC graduates. You may connect to SlugQuest on the Career Center web site. Another way

to obtain a career position is to participate in the On-Campus Interview Program. Recruiters visit campus every fall, winter, and spring to interview and hire students. The Career Center web site has a list of participating companies.

The Career Center sponsors several major events every academic year. The Graduate and Professional School Fair brings representatives from the nation's top universities to campus to share information about their advanced-degree programs. Job and internship fairs, which bring hiring companies to campus, take place several times a year. Students looking for a job or internship will want to arrive prepared with a great résumé. Other events include the Multicultural Career Conference, which brings students and alumni together to develop mentor relationships and explore careers.

The Career Center—located at the Bay Tree Building, Room 305, in Quarry Plaza—can be reached at (831) 459-4420. Office hours are 8 a.m. to 5 p.m.

### EDUCATIONAL OPPORTUNITY PROGRAMS (EOP)

---

The Educational Opportunity Programs (EOP) provide a variety of academic and personal support programs designed to improve the retention and academic success of first-generation college students from low-income and educationally disadvantaged backgrounds. EOP helps to ensure these students successfully complete their undergraduate education and acquire the skills to prepare for graduate and professional school, as well as for future leadership roles. Below are the programs and services offered through EOP.

#### Advising Programs and Services

EOP Advising programs and services are designed to facilitate personal growth and development for the purpose of achieving academic and social integration, academic achievement, and exposure to opportunities beyond the baccalaureate degree. These programs and services include:

- Advising and personal counseling
- Time-management and study-skills development
- Referrals to resources, programs, and opportunities
- Peer advising
- Community events

#### Bridge Program

The main goal of the Bridge program is to deepen and personalize the UCSC experience. The program offers a select group of EOP students special academic and personal support to facilitate a smooth transition from high school to the university. This support fosters academic achievement and social integration into

## Undergraduate Academic Program

campus life, helping to ensure a successful first-year experience.

### Support Services for AB540 Students

AB540 Student Services provides a broad range of support services designed to address the needs of AB540 students. These services are designed to address the gaps that AB540 students face within the university and enhance student achievement. Services provided to students include mentoring, community-building events and programs, personal advising, and student-based support.

### Textbook Lending Program

This program is designed to assist students in obtaining required textbooks that they would not be able to purchase on their own due to cost. To receive textbook assistance, students must demonstrate financial hardship and must have exhausted all other forms of financial aid available to them. This includes all forms of loans (subsidized and unsubsidized).

### Pre-Graduate Programs

EOP also sponsors two pre-graduate programs designed to increase the placement of EOP students in professional and doctoral programs and to encourage the pursuit of academic careers.

**The Graduate Information Program (GIP)** supports students seeking to pursue graduate and professional school education. Services include:

- Graduate and professional school advising
- Graduate school application and internship-related workshops
- Graduate school resource library and web site
- Trips to conferences and forums

**Pathways to Research (P2R)** exposes undergraduate students to research opportunities and research based graduate programs. Along with their graduate mentor, participating students will determine their short-term goals for the quarter and long-term goals for the school year related to exploration of and involvement in research. They will engage in bi-weekly meetings to report on progress and plan next steps to reach those goals. Because this is a self-paced program, discipline and student follow-up are key ingredients for success in the program. Anticipate a 10hr/week commitment that includes outside reading and research.

For information about any of these programs, please call the EOP office at (831) 459-2296 or visit [eop.ucsc.edu](http://eop.ucsc.edu).

### MARC AND IMSD PROGRAMS

The Division of Physical and Biological Sciences sponsors two National Institutes of Health grant

programs: the Maximizing Access to Research Careers (MARC) Program and the Initiative for Maximizing Student Development (IMSD) Program. Though separately funded, the projects share a similar mandate: to increase the number of well-prepared under-represented ethnic-minority students who are admitted to graduate or professional schools in biomedical sciences. The program seeks students from groups that have traditionally been denied equal access to educational opportunities in the science professions.

Continuing students who have successfully completed specific introductory courses in biology, chemistry, and mathematics are invited to apply for the MARC and IMSD programs, which begin in the summer and introduce students to program faculty, their research, and research techniques. After students successfully complete the summer program, they have the opportunity to work in a faculty lab for the following academic year. Financial compensation is available for laboratory research and participation in the summer program.

MARC and IMSD are run in conjunction with UC LEADS and CAMP, and we also work with other offices to help make the most of campus resources and provide practical assistance with the graduate school admission process. In addition, the staff maintains an information file on summer enrichment programs (which can provide you with vital research experience), conferences, professional development workshops, journal clubs, and seminar courses.

The program's well-equipped student office provides additional academic support and a convenient place for students to meet. The staff encourages students to make use of this study space and assists them in learning to use the office's personal computers.

For further information, contact the STEM Diversity office to learn more about eligibility requirements and visit the STEM Diversity Programs web site, or e-mail STEM Diversity Acting Director Yulianna Ortega at [yuli@ucsc.edu](mailto:yuli@ucsc.edu).

### ACADEMIC EXCELLENCE PROGRAM (ACE)

ACE is a nationally recognized academic support program that is designed to increase the diversity of students who earn bachelor's degrees in science, technology, engineering, and mathematics (STEM). ACE offers active-learning problem solving sessions for selected mathematics and science courses.

The sessions provide a structured setting where students teach and learn from each other. An ACE instructor, who has an academic background in the subject, facilitates the problem solving sessions.

## Undergraduate Academic Program

Undergraduate co-leaders/peer mentors assist, bringing the student-to-teacher ratio to approximately 12:1. In addition to attending their ACE problem-solving sessions, students meet weekly with their peer mentor, who shares study strategies as well as opportunities for undergraduate teaching and research internships. ACE instructors offer weekly office hours, as well as examination review sessions and academic and career planning. ACE students join a community of STEM scholars who are dedicated to academic excellence and success.

Applications are accepted quarterly for the upcoming term. Enrollment in ACE is limited and priority is given to non-traditional STEM students. For more information, visit the web site: [ace.ucsc.edu](http://ace.ucsc.edu).

### MULTICULTURAL ENGINEERING PROGRAM (MEP)

Also known as the MESA Engineering Program, MEP is the university-level component of [Mathematics, Engineering, Science Achievement \(MESA\)](#), a statewide program of the University of California Office of the President. At UC Santa Cruz, MEP is supported by the Baskin School of Engineering. Its goal is to promote the retention and graduation of a diverse population of students, especially those from groups that remain the most underrepresented in engineering studies.

MEP provides academic and personal support for engineering students who are first-generation college students, are the first in the family to pursue engineering or computer science studies, or are from a low-income (limited financial resources) or educationally disadvantaged background. MEP's academic learning community supplements students' undergraduate experience and encourages them to continue their education by attending graduate school. MEP has a strong support system and engages students' full participation in a variety of services and activities. These include academic advising, personal counseling, tutorial services, drop-in assistance, individual and small-group study, study-skills workshops, peer-support networks, community-building activities, scholarships, and an engineering Summer Bridge program for a select group of entering first-year students.

MEP's well-equipped study center and computer lab provides 24-hour access to computer workstations and printer, textbooks, individual lockers, and a place for students to gather and study. Students who have participated in pre-university service programs (e.g., Early Academic Outreach, Upward Bound, MESA, Talent Search, Puente, DEEP, Smith Scholastic Society) are encouraged to apply to MEP.

For further information, call (831) 459-2868, visit the web site [mep.soe.ucsc.edu](http://mep.soe.ucsc.edu), or drop by the School of Engineering Undergraduate Affairs Office, 231 Baskin Engineering Building.

### SERVICES FOR TRANSFER AND RE-ENTRY STUDENTS (STARS)

Services for Transfer and Re-entry Students (STARS) offers a broad range of personal and academic support services for all transfer and re-entry students (undergraduates 25 years and older, graduate students 29 years and older), students who are parents regardless of age, and military veterans. These services include admissions information; orientations for new students; academic seminar courses; study skills workshops; tutorial services; informal academic advising; drop-in assistance; social, recreational, and cultural programs; scholarships; newsletters; and study centers with computer workstations. STARS also acts as a clearinghouse for information about campus and community resources for UCSC's large transfer and re-entry student populations.

STARS is located at Kresge College, on the floor above the College Office. All current and prospective transfer and re-entry students are invited to visit. Hours are 9:00 a.m.-7:00 p.m., Monday through Thursday, and to 5:00 p.m. on Friday.

**Veterans Education Team Support (VETS)** is a STARS program for veterans returning to school. In this peer mentor program, veterans meet each other and receive assistance as they navigate admission and transition into university life. Ongoing personal and academic support and outreach to prospective students are also offered.

**The Smith Renaissance Scholars Program**, which helps current and former foster youths pursue their educational goals, is affiliated with STARS.

**The Osher Lifelong Learning Institute at UCSC**, a UC/community organization dedicated to continuing education, is also under the STARS umbrella. The organization hosts monthly meetings with university faculty, offers courses taught primarily by emeriti faculty, and coordinates a wide variety of peer-led interest groups.

For further information regarding all the STARS programs, call (831) 459-2552. For current programs and activities, visit the [STARS web site](#).

### DISABILITY RESOURCE CENTER (DRC)

The campus accommodates students with disabilities and welcomes their attendance at UCSC. The Disability Resource Center (DRC) provides services such as disability-related advising, authorization for testing

## Undergraduate Academic Program

accommodations, conversion of print materials into alternative formats (audio, electronic, Braille), adaptive equipment loans, notetakers, sign language interpreters, real-time captioning services and referrals to appropriate campus or community resources.

The Disability Resource Center is located at 125 Hahn Student Services Building and can be reached by phone at (831) 459-2089, or via e-mail at [drc@ucsc.edu](mailto:drc@ucsc.edu). Web: [drc.ucsc.edu/](http://drc.ucsc.edu/)

**Campus access for people with mobility impairments.** Visit the [campus Americans with Disabilities Act web site](#) for more information about accessibility maps, vehicles equipped with wheelchair lifts that can transport students throughout campus, and permits for accessible or medical parking spaces that are adjacent to all campus buildings. Most buildings on campus have wheelchair-accessible ramps, modified rest rooms, and other facilities. If necessary, classes are rescheduled to meet accessibility needs.

Questions and concerns can be directed as follows:

- Education/program accessibility should be addressed to the director of the Disability Resource Center, at (831) 459-2089 (voice).
- Facility or transportation access should be directed to Facilities Access Coordinator (831) 459-3759 (voice).
- Computing access to the campus should be directed to IT Accessibility Coordinator (831) 459-2410.
- Accommodating job applicants or current employees with disabilities should be directed to (Disability Management Coordinator, Benefits Office (831) 459-4602 or Assistant Director for EEO, Office for Diversity, Equity, and Inclusion (831) 459-3676.

## ROTC AND MILITARY AFFAIRS

---

### UC Santa Cruz Air Force ROTC

Students interested in participating in Air Force Reserve Officer Training Corps (AFROTC) have the option of attending AFROTC classes at San José State University while taking other academic classes at UC Santa Cruz.

San José State University supports a wing of AFROTC with cadets from San José State University, Santa Clara University, Stanford University, UC Santa Cruz, and many local community colleges. The Air Force ROTC program is designed to provide instruction in leadership, management, and national security studies along with military education and training. This prepares the cadet for assignment to positions of responsibility and importance in the modern Air Force.

Instruction is conducted on and off campus. This program offers all eligible students the opportunity to obtain an officer's commission in the United States Air Force while earning their college degrees.

### Program Overview

Our faculty brings a wealth of experience and diversity to the program. Instructors are Active Duty Air Force officers from various career areas and provide students with a first-rate academic education and military training experience. Each faculty member also acts as a student adviser to guide students through the program and help them reach the goal of an officer's commission in the United States Air Force.

College students wishing to commission as an Air Force officer through ROTC may enroll in a three-, or four-year program. Students attend Air Force ROTC classes along with other college courses and receive elective academic credit. AFROTC courses are sequenced by subject area for specific and logical reasons. Please see <http://www.sjsu.edu/afrotc/> for course information. After successfully completing all requirements, the cadets are commissioned as Air Force officers with a four-year active duty service commitment.

For information on the Air Force ROTC program, contact the Department of Aerospace Studies, AFROTC Det 045, One Washington Square, Industrial Studies Building, Room 214, San Jose State University, San Jose, CA, 95192-0051. Phone: (408) 924-2960. E-mail [afrotc@sjsu.edu](mailto:afrotc@sjsu.edu) or visit the web site:

<http://www.sjsu.edu/afrotc/>. Students may call or inquire about program prerequisites, scholarship availability, and class schedules at the Department of Aerospace Studies.

### UC Santa Cruz Army ROTC

The Army ROTC (Reserve Officers' Training Corps) is one of the best leadership courses in the country and can be part of your college curriculum. UC Santa Cruz students have the opportunity to take ROTC courses with cadets from other local campuses including Santa Clara University, Stanford, and San Jose State University. Cadets from UC Santa Cruz have flexible options to meet ROTC class requirements such as local classes on campus, shuttles to Santa Clara University, or by virtual attendance of classes at Santa Clara University through the Army's online meeting application. During classes, leadership labs, physical training, and field training exercises, Army ROTC students will learn firsthand what it takes to lead others, motivate groups and conduct missions as an officer in the Army. Upon graduation from Army ROTC, students will earn the bar of a second lieutenant and be

## Undergraduate Academic Program

commissioned into the Active Army, Army Reserve or Army National Guard.

Army ROTC at Santa Clara University is a program that fosters the development of cadets' academic, athletic, professional, and mental strengths. Students attend class and physical training for three hours each week, along with a Wednesday lab session that features hands-on instruction regarding Army operations and leadership situations. This program is ideally designed as a four-year process. Cadets spend their first two years familiarizing themselves with the Army, and in their third year be expected to perform and improve as leaders in preparation for a summer leadership development camp at Ft. Knox, Kentucky. The fourth and final year of Army ROTC introduces cadets to the responsibilities of military staff, teaching them to plan, train, lead, and develop their junior cadets in preparation for their commission. A typical four-year education with Santa Clara University ROTC comes with a service obligation of four years in the Army.

Army ROTC also gives cadets the opportunity to gain further Army experience by earning appointments to Army training schools where they will parachute from airplanes or rappel from helicopters. In addition, cadets are allowed a single quarter of study abroad, as well as the opportunity to participate in Army-funded immersion trips to dozens of countries across the globe in the summer months.

ROTC offers the opportunity to compete for scholarships that can pay for your education. These scholarships consist of tuition, money for books, and a monthly stipend. Cadets who graduate from the program will compete for active duty and reserve positions across the Army. Active officers have a full-time position and serve for a minimum of four years. Reserve officers serve for eight years part-time in either the National Guard or Army Reserve.

For more information about ROTC opportunities and scholarships contact Mario Morales by e-mail at [mcmorales@scu.edu](mailto:mcmorales@scu.edu) or by phone at 408-554-6840, or visit the Army ROTC web site at <http://www.scu.edu/rotc/>.

For more information regarding Army ROTC please visit the Army ROTC web site at <http://www.goarmy.com/rotc.html>.

---

## UNDERGRADUATE RESEARCH

---

At the best research universities, professors bring knowledge and creativity from their cutting-edge research into the classroom, integrating the canon of the discipline with its future directions. UC Santa Cruz takes this further with a special tradition of

undergraduate research outside the classroom. UC Santa Cruz, its departments, and faculty offer undergraduates many ways to get involved in research and creative activities. These opportunities develop advanced skills and insights and an early introduction to the nature of graduate studies. Research projects can help students launch careers, secure admissions to top graduate schools, and truly impact society.

Many majors incorporate research in their senior comprehensive requirement, with options or requirements of a senior thesis, capstone project, or other creative endeavor based on students' individual research. Other opportunities for undergraduates exist through structured internships or research programs, by joining ongoing faculty research or creative projects, or by developing their own projects under faculty supervision. The next sections discuss a sampling of UCSC's international education, field-study, and exchange programs, which enable students to deeply enrich their undergraduate experience and education as they learn by doing. For additional information, see [Undergraduate Research Opportunities](#).

## UC LEADS

---

After being selected as UC LEADS scholars, students begin a two-year program of scientific research and graduate school preparation guided by individual faculty mentors and program staff. Scholars are provided with an excellent opportunity to explore their discipline, experience a research environment, and improve their opportunities for future study in their chosen field. Each scholar is mentored by a member of the UC faculty who assists the student in designing a plan of research and enrichment activities tailored to his or her individual interests and academic goals. Scholars attend the annual statewide symposium and receive funding to participate in another STEM conference of their choice each year.

The UC LEADS program is headquartered in the STEM Diversity office, along with MARC, IMSD and CAMP. To learn more about eligibility requirements and the UC LEADS program, visit the [STEM Diversity Programs web site](#) or e-mail STEM Acting Director Yulianna Ortega at [yuli@ucsc.edu](mailto:yuli@ucsc.edu).

## CALIFORNIA ALLIANCE FOR MINORITY PARTICIPATION (CAMP)

---

CAMP is a statewide initiative that aims to support and retain underrepresented undergraduates to achieve their degrees in the biological sciences, physical sciences, mathematics, and engineering.

By integrating research and undergraduate education, CAMP creates a cohesive set of experiences that fully

## Undergraduate Academic Program

prepares undergraduates for graduate education and influences career choices. CAMP programs motivate participants through cooperative learning, internships, faculty mentored research, and travel to professional conferences.

The CAMP program is headquartered in the STEM Diversity office along with MARC, IMSD and UC LEADS. To learn more about eligibility requirements and the CAMP program, visit visit the [STEM Diversity Programs web site](#) or e-mail STEM Acting Director Yulianna Ortega at [yuli@ucsc.edu](mailto:yuli@ucsc.edu).

### NATIONAL SCIENCE FOUNDATION RESEARCH EXPERIENCE

---

The National Science Foundation (NSF) funds a large number of summer research opportunities through the Research Experience for Undergraduates (REU) Site Program. Each site, typically at a university, has a group of six to 10 undergraduates who work on specific research projects under the mentorship of faculty and other researchers. Students are granted stipends and, in many cases, assistance with housing and travel. Additional activities, including professional development workshops, tours, and social activities, provide students with opportunities to network and to learn about the culture of science. An REU Site may be at either a U.S. or foreign location.

UCSC hosts the following three REU programs:

- Undergraduate Research in the Biological Effects of Climate Change (Ecology and Evolution)
- Summer Undergraduate Research Fellowship in Information Technology (SURF-IT) (Engineering)
- Lamat Summer Research Program (Computational Astrophysics)

UCSC students are not given preference for these programs, so there is no disadvantage to applying to an REU site at another location. For more information, see [UCSC's REU web site](#).

---

## INTERNATIONAL EDUCATION

---

The International Education Office (IEO) actively supports UCSC's teaching research, and service missions. IEO encompasses two functional units, UCSC Programs Abroad and International Scholar and Student Services (ISSS).

For further information, contact the International Education Office, 101 Classroom Unit Building, (831) 459-2858, e-mail: [oe@ucsc.edu](mailto:oe@ucsc.edu).

### PROGRAMS ABROAD

---

UCSC Programs Abroad offers undergraduate and graduate students the opportunity to study through the University of California, Education Abroad Program (UCEAP) on more than 350 programs in more than 40 countries as part of their regular UCSC academic program. The program serves students at all UC campuses and is administered by the University Office of the Education Abroad Program in Santa Barbara: [eap.ucop.edu](http://eap.ucop.edu).

Additionally, UCSC Programs Abroad assists students participating in study-abroad opportunities through UCSC directly, through other UC campuses, and through privately sponsored organizations. UCSC Programs Abroad seeks to bring these programs within reach of all students.

### INTERNATIONAL SCHOLARS AND STUDENTS

---

The International Scholar and Student Services (ISSS) office provides immigration advising and advocacy as well as cultural and academic programming for UCSC's growing global community. ISSS assists students, scholars, researchers, and faculty members in maintaining their legal status while in the United States, serving as UCSC's official liaison to U.S. government agencies related to immigration matters. ISSS serves more than 1,000 international clients and their accompanying family members who come to the campus each year.

### FULBRIGHT GRANTS FOR GRADUATE STUDY AND RESEARCH ABROAD

---

The International Education Office facilitates the Fulbright annual awards competition for the Graduate Study and Research Abroad Program for currently enrolled UCSC students.

---

## FIELD AND EXCHANGE PROGRAMS

---

### UCDC PROGRAM AT THE UC WASHINGTON CENTER

---

The UCDC Program supervises and supports students who pursue a quarter of academic study and internship work in the nation's capital. Internship placements are geared toward student interests, including but not limited to government and public policy, science and the environment, education and the arts, advocacy and nonprofit organizations, law, and business and finance. Students live in the UC Washington Center with students from other UC campuses, which provides an intellectual and social community throughout the quarter.

The program is open through a competitive application process to students in all majors who are in good standing and will be juniors or seniors by the quarter in

## Undergraduate Academic Program

which they participate. Students enroll for fall, winter, or spring quarter, earn 12 to 17 course credits, and continue to be registered as full-time students.

Applicant selection is based on academic record, a written statement, letters of recommendation, and in some cases a personal interview. Financial-aid eligibility is maintained.

Interested students with strong academic records are encouraged to apply. For further information, visit the [UCDC web site](#) or e-mail the UCDC Coordinator at [ucdc@ucsc.edu](mailto:ucdc@ucsc.edu).

### INTERCAMPUS VISITOR PROGRAM

---

UCSC students may take advantage of educational opportunities at other campuses of the University of California through the Intercampus Visitor Program. This program enables you to take courses not available at Santa Cruz, to participate in special programs, or to study with distinguished faculty at other campuses.

To qualify for participation in this program, you must be in good standing after completing at least three quarters in residence at Santa Cruz. Each host campus establishes its own criteria for accepting students from other campuses as visitors. You must also have the approval of your college. Consult with your department about how courses taken at the host campus may apply to your major requirements.

Applications are available online [here](#). Additional information is available from the special programs coordinator in the Office of the Registrar, (831) 459-4412. The application form contains a great deal of useful information about the program and how and when to file; please read it carefully. A nonrefundable application fee of \$70 is due when the application is filed.

### CROSS-CAMPUS OR SIMULTANEOUS ENROLLMENT WITH OTHER UNIVERSITY OF CALIFORNIA CAMPUSES

---

Undergraduate students enrolled at UCSC may enroll, without formal admission and without payment of additional university fees, in courses at another UC campus on a space-available basis at the discretion of the appropriate campus authorities on both campuses. Simultaneous enrollment refers to UC courses not offered through UC Online. Additional information about online UC courses is available through [UC Online](#).

Currently registered students must meet all of the following requirements to be eligible to enroll in one class through the Cross-Campus and Simultaneous Enrollment Programs: completion of a minimum of 12 credits at UCSC as a matriculated student, be in good academic standing, and demonstrate appropriate

academic preparation as determined by the host campus. Full-time students must be enrolled in at least ten credits at UCSC. University Part-Time students must be enrolled in at least five credits at UCSC and may enroll in up to ten credits total.

Information about Cross-Campus Enrollment is available through [UC Online](#). Applications for Simultaneous Enrollment are available at the Office of the Registrar, 190 Hahn Student Services Building or online. For more information, call (831) 459-4412 or e-mail [registrar@ucsc.edu](mailto:registrar@ucsc.edu), or visit the Web at [Simultaneous Enrollment](#).

### PART-TIME PROGRAM

---

If you are unable to attend the university full-time because of family obligations, employment responsibilities, or a medical condition, or you are in your final quarter before graduation, you may qualify for the Part-Time Program. This program enables students to pursue a bachelor's degree part-time in any major offered at UC Santa Cruz. To participate, undergraduate students must file a Part-Time Program application by the appropriate deadline. Full-time students normally take three 5-credit courses per quarter; part-time students may enroll in a maximum of 10 credits.

Students approved for enrollment on a part-time basis pay the same fee as full-time students but pay only one-half of the tuition. Part-time nonresidents pay one-half of nonresident tuition. Financial aid awards may be affected by enrolling part-time. Students who use the part-time fee reduction may not also use the UC employee reduction. Applications for undergraduates are available from the Office of the Registrar, 190 Hahn Student Services Building. For more information, call (831) 459-4412, or e-mail [registrar@ucsc.edu](mailto:registrar@ucsc.edu). More information is available on the Web:

[registrar.ucsc.edu/enrollment/part-time-program/index.html](http://registrar.ucsc.edu/enrollment/part-time-program/index.html).

### DOMESTIC EXCHANGE PROGRAMS

---

UCSC has exchange programs with the University of New Hampshire (UNH) and the University of New Mexico (UNM). UNH is located near the New Hampshire seacoast in the picturesque colonial town of Durham, a little more than an hour from Boston, Massachusetts. UNM is located in Albuquerque, a city of approximately half a million population, situated on the banks of the Rio Grande. Both schools give students the opportunity for an educational experience in an entirely different environment.

While enrolled in the exchange program, students maintain their status at UCSC, and they are expected to

## Undergraduate Academic Program

return to complete their studies following enrollment at UNH or UNM. Both universities are on the semester system and students may participate in one semester or the entire academic year.

Participants are selected from among students who are in good academic standing. Successful applicants will be expected to confirm their participation at the beginning of spring quarter. Each department of study determines the applicability of UNH and UNM courses toward requirements for the major. Letter grades earned while at UNH and UNM will not be calculated into the UCSC GPA or the UC GPA. Further information is available from the exchange program coordinator in the Office of the Registrar, by phone at (831) 459-4412, and [on the Web](#).

### INTERSEGMENTAL CROSS-ENROLLMENT

---

This program permits a student who is currently enrolled in a California community college or a California State University campus and who meets certain eligibility criteria to enroll in one undergraduate course at UCSC each term, on a space-available basis. A student is qualified to participate in this program if he or she meets the following requirements:

- has completed at least one term at the home campus as a matriculated student and is enrolled in at least 6 credits at the home campus during the term in which he or she seeks to cross-enroll;
- has a grade point average of 2.0 for work completed;
- has paid tuition or fees required by the home campus for the academic term in which he or she seeks to cross-enroll;
- has appropriate academic preparation as determined by the host campus, consistent with the standard applied to currently enrolled students;
- is a California resident for tuition purposes at the home campus; and
- has not previously been admitted to and registered at UCSC.

Applications are available online at [registrar.ucsc.edu/forms/students/crossenrollment.pdf](http://registrar.ucsc.edu/forms/students/crossenrollment.pdf). The application form contains a great deal of useful information about the program and how and when to file. Please read it carefully.

### FIELD PROGRAMS

---

Many UCSC students complement their major programs with field experience or off-campus internships, which also provide opportunities for students to become

involved in public service activities in the local community and throughout the world. Most of the field programs described below are open to students in a range of majors, although some are restricted to students pursuing a designated area of study. Students in all majors may apply for internships sponsored by the [Career Center](#).

In addition to the off-campus placements provided by the programs described below, independent field study opportunities are available through some UCSC colleges and departments.

## Community Studies Field-Study Program

Community Studies is the oldest interdisciplinary undergraduate program at UCSC. Its hallmarks are a focus on social justice and a distinctive pedagogy that integrates classroom learning with an extended six-month field study. Not only is the full-time field study a requirement of the major, it is the centerpiece of a core curriculum through which students prepare for, then immerse themselves in a setting where they participate in and analyze the social justice work of an organization. Upon return from field study, students integrate topical and experiential learning in a capstone project (usually a senior essay) that uses their field notes as a key source for analysis.

With the guidance of faculty and program staff advisers, Community Studies students choose field placements related to the program's areas of focus in economic justice and health justice. Most placements are in California, although students have completed field studies throughout the U.S. and around the world. Field placements have included community health clinics, women's and feminist organizations, immigrant-rights centers, media and policy advocacy organizations, homeless resource and support groups, sustainable development projects, queer and transgender organizations, neighborhood or workers' collectives, civil rights groups, community food security programs, legal clinics, community-based cultural organizations, programs for seniors, tenant or labor unions, HIV/AIDS advocacy groups, harm reduction programs, government agencies and the offices of elected officials, and still other organizations with a social justice mission. As political, economic, cultural and technological landscapes shift, so do the needs and venues for social justice organizing. Throughout its history Community Studies has been noteworthy for being attuned and responsive to the dynamics of social justice work and related innovations in field-study opportunities.

## Undergraduate Academic Program

The practical experience gained from the six-month field study, combined with their topical learning, provides graduates with many choices. About half go on to graduate or professional study in education, urban studies, public health, public administration, social work, planning, law, policy studies, medicine, nursing, or academic disciplines like sociology, anthropology, and politics. Others enter the work world directly, in many cases continuing with non-profit agencies like those in which they did their field study. Community Studies graduates are social entrepreneurs, community organizers, program directors, public officials, teachers, therapists, librarians, social workers, news directors, union officials, labor organizers, forest management consultants, reporters, youth workers, and artists. According to a recent alumni survey, almost 100 alumni have founded nonprofit social justice organizations, and many more have served on nonprofit boards and/or in executive director positions.

The field study program is open to Community Studies majors only. The entire major usually takes two years to complete. More information about Community Studies can be found at [communitystudies.ucsc.edu](http://communitystudies.ucsc.edu).

### **Economics Field-Study Program**

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work. The field-study program places students in internships under the supervision of a faculty sponsor and a professional in the workplace. Students can select from a wide variety of field placements such as accounting firms, community nonprofits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply and prepare for field study a quarter in advance. Acceptance into the field-study program is determined by academic standing, class level, and successful completion of Economics 100A, 100B, and 113 (see [Economics courses](#)). Students may earn a maximum of 10 credits and complete up to two quarters in a field placement.

Along with the training and supervision by a professional in the workplace, students receive guidance from a faculty sponsor who directs their academic project. Completion of this project and the job supervisor's evaluation of performance earn the student credit. Economics Field Study (Economics 193 or 198, see [Economics courses](#)) does not satisfy an upper-division requirement for the major and is available on a passing/not passing (P/NP) basis only. Interested students should make an appointment or stop by the Economics Field-Study Office: 401

Engineering 2 Bldg.; call (831) 459-5028; or e-mail [econintern@ucsc.edu](mailto:econintern@ucsc.edu). Web: [economics.ucsc.edu](http://economics.ucsc.edu)

### **Environmental Studies Field and Internship Program**

Open to all UCSC students, the Environmental Studies Field and Internship Program is an integral academic component of the environmental studies major, and it augments the research and professional development of undergraduate students (see [Environmental Studies](#)). Interns are placed, individually and in groups, in both on-campus and off-campus agencies, where their work often results in publications and resource documents, and in many cases serves as the primary basis for policy formation within a particular agency or organization. Placements have included research for small businesses; learning all aspects of running an organic farm; writing policy documents for state agencies, nongovernmental organizations, and planning departments; assignments as natural history interpretive guides for state and national parks; and apprentice positions with consultants, architects, solar-energy designers, agroecologists, and teachers. Student intern placements are also obtainable working with coffee growers, teachers, and agricultural specialists in Costa Rica, Nicaragua, El Salvador, and Mexico.

Part- and full-time placements are available, and students may receive two to 15 course credits for their work. Each student's placement is supervised by a team of supporters: a faculty adviser, field sponsor, and the internship coordinator. Students spend 12 to 15 hours each week on their assignments for every 5 credits they receive.

Internships and fieldwork are designed to complement a student's coursework and are available for both lower- and upper-division credit. Often, the internship leads to a summer job or employment after graduation. Qualified environmental studies majors may undertake a senior internship to fulfill the department's comprehensive requirement. In addition, internships provide a fieldwork component for some environmental studies courses. Undergraduates are also afforded ample opportunities to intern on faculty and graduate-student research projects.

Further information is available from the Environmental Studies Field and Internship Program Office, 491 Interdisciplinary Sciences Building, (831) 459-2104, e-mail: [ckrohn@ucsc.edu](mailto:ckrohn@ucsc.edu). Web: [envs.ucsc.edu/internships](http://envs.ucsc.edu/internships)

### **The Everett Internship Program (formerly the Global Information Internship Program)**

The [Everett Program](#) is a highly innovative, student-managed program that deploys the tools of

## Undergraduate Academic Program

information-communication technology (ICT) and social entrepreneurship to advance social justice, sustainable practices, and progressive institutional change at the global and local levels. Everett is sponsored by the Center for Global, International, and Regional Studies (CGIRS) and the Division of Social Sciences. Since 1998, the Everett Fellows have mentored and funded hundreds of info-savvy social entrepreneurs from UC Santa Cruz to design, implement, and manage collaborative projects with civil society, community, and non-profit groups. The Everett Program empowers students to focus their passion for social change by teaching them how to research, plan, design, fund, and implement ICT-driven projects in partnership with excluded communities. Everett-sponsored students have worked with Muslim feminists in Malaysia, coffee farmer co-ops in Central America, democracy-advocating NGOs in Ghana, and aspiring high school students in Watsonville. Everett Fellows teach sections and mentor students enrolled in the intensive major and minor in Global Information and Social Enterprise Studies (GISES), which is sponsored by the Department of Sociology. For more information on the GISES major and minor, please consult the [Sociology](#) page.

For more information, visit:

[sociology.ucsc.edu/undergraduate/programs-internships/](http://sociology.ucsc.edu/undergraduate/programs-internships/) or call (831) 459-1572.

### **Health Sciences Internship Program**

A requirement of the Human Biology major, the Health Sciences Internship Program offers students a unique opportunity for personal growth and professional development. Paired with a professional mentor, students spend one quarter interning in a health-related setting. Placement opportunities cover a broad range, from individual physicians to community clinics and hospitals, hospices, non-profits, and public health agencies. The Health Sciences Internship Coordinator works with students to prepare them for their internship and maintains a list of appropriate placements. Junior and senior Human Biology majors only are eligible to apply. Applications are due two quarters in advance. For further information, contact the Health Sciences Internship Coordinator, Caroline Berger, at (831) 459-5647 or [cberger@ucsc.edu](mailto:cberger@ucsc.edu).

### **Latin American and Latino Studies Field-Study and Internship Opportunities**

All Latin American and Latino Studies majors are strongly encouraged to undertake either (1) a field study in Latin America, the Caribbean, or a Latino/a community in the U.S.; or (2) formal academic study abroad through the Education Abroad Program (EAP).

These paths are the best ways to improve language skills, explore the nature and direction of specific academic and career interests in relation to Latin American and Latino studies, and deepen cross-cultural understanding and relationships based on personal experience.

Field studies comprise independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. Students can do full-time field study for one quarter for full academic credit, part-time field study scheduled in conjunction with formal coursework at UCSC, or field study as an extension of the Education Abroad Program (EAP). Projects vary widely, but students who want to develop a field-study proposal are expected to prepare for it by acquiring fluency in the appropriate language, prior cross-cultural experience, and upper-division coursework on the region and/or topic that is to be the focus of the study.

Students who wish to pursue a full-time field study are advised to speak with their faculty advisor to assess their eligibility and preparation, as well as to receive needed guidance, ideally a quarter or two in advance.

Many of the students who have done full-time field study have developed a senior thesis based on that work. Students who pursue a part-time field study are highly encouraged to discuss their plan with their faculty advisor as well.

Local opportunities for internships and field study in Latino/a communities on California's Central Coast are numerous. Credit for up to three upper-division courses may be applied toward the major from field study; however, course credit from field study and study abroad combined may not exceed three upper-division courses. Students should check the Latin American and Latino Studies Department web site for further information regarding the field-study process and course credit. A listing of local field-study programs and petition forms are available at the LALS Department office, 32 Merrill Academic Building.

For more information, contact the LALS office at (831) 459-2119 ([aalvares@ucsc.edu](mailto:aalvares@ucsc.edu)). Web: [lals.ucsc.edu](http://lals.ucsc.edu).

### **Psychology Field-Study Program**

The Psychology Field-Study Program provides qualified students an opportunity to integrate what they have learned in the classroom with direct service to a community agency. Each year, more than 200 students develop new skills and clarify personal and professional goals by working as interns in schools, criminal justice programs, and mental health and other social service agencies, where they are supervised by a professional within that organization. Psychology faculty members

## Undergraduate Academic Program

sponsor field-study students, helping them to synthesize their intern experience with psychology coursework and guiding them through an academic project.

Junior and senior psychology majors in good academic standing are eligible to apply for this competitive program. **There is a minimum commitment of two quarters. Information can be viewed on the web at [psychology.ucsc.edu/undergraduate/field-study/index.html](http://psychology.ucsc.edu/undergraduate/field-study/index.html).** Interested students should attend an information meeting, held every quarter, for a general overview and application. The schedule for each quarter is posted at the start of instruction. For more information, visit the [Psychology Field Study Program](#).

### Education Field Programs

The M.A. in Education/California SB 2042 Preliminary Teacher Credential program provides students with necessary credential preparation for K–12 teaching in the California public schools. Preparation is offered for the Multiple Subject Preliminary credential (grades K–6), and the Single Subject Preliminary credential (grades 7–12), in the following subject areas: English, math, social science, and science. Students may also pursue a Bilingual Authorization in Spanish.

Students pursuing the Education M.A./California Preliminary Credential must complete an extensive student teaching course sequence. Student teaching placements are restricted to enrolled students.

The student-teaching sequence consists of five courses: Education 200, 201, 201A (single subject only), 202A, B, and C. The first and second quarters of the sequence involve part-time placements in public schools in Santa Cruz County, as well as a few schools in North Monterey County. The third quarter of student teaching is a full-time experience in which students gradually take over full responsibility for the daily instructional program of the classroom in which they are placed. Substantial fieldwork is also incorporated in other courses required for the teaching credential.

The minor in education is an undergraduate program in which students explore the history of educational thought and philosophy, the politics and economics of education, learning theory and pedagogy, and issues of cultural and linguistic diversity. As a part of the six-course minor sequence, students engage in field study in schools through Education 180, Introduction to Teaching.

For more information, see [Education](#), or contact the Education Department, 2140B McHenry Library Building, (831) 459-3249. E-mail address: [education@ucsc.edu](mailto:education@ucsc.edu); Web: [education.ucsc.edu](http://education.ucsc.edu).

---

## SUMMER SESSION COURSES AND PROGRAMS

---

UCSC Summer Session offers UCSC students an opportunity to accelerate progress on their degrees and welcomes visitors from other colleges and universities as well as members of the community (including high school juniors and seniors). A broadly ranging 250 courses are taught by UCSC faculty, lecturers, and graduate students. Often smaller in size than during the academic year, summer session classes include major requirements and qualifying courses, lower- and upper-division courses, general education courses, and online courses. Most courses are five weeks long and offered over two sessions. Students may enroll in multiple classes in either or both sessions, with a maximum of 15 credits per session.

Tutoring and other academic support is available for summer session courses, as are on-campus housing and dining, OPERS fitness center and outdoor recreation, campus employment, and more. Special summer-only programs include Summer Start for International Freshmen, Shakespeare this Summer, and the one-week Dickens Universe. Please visit [summer.ucsc.edu](http://summer.ucsc.edu) for courses and details or e-mail [summers@ucsc.edu](mailto:summers@ucsc.edu) with any questions.

---

## UCSC SILICON VALLEY EXTENSION

---

Undergraduates and graduate students can find credit fulfillment options and career-oriented courses at UCSC Silicon Valley Extension, the continuing education arm of the university.

UCSC Extension is located in Santa Clara at UCSC Silicon Valley Extension, a facility that is also home to UC Scout and programs of UCSC's Baskin School of Engineering. Classroom courses are held at the Santa Clara location, and UCSC Extension serves adults who live and work in the South Bay, Peninsula, and East Bay communities, as well as on the Central Coast. A large number of popular courses are also available online.

Programs are open enrollment and courses range in length from a single day to multiple weeks. Most class meetings are scheduled on weekday evenings and weekends. Certificate programs focus on advanced professional education and are oriented toward immediate application in the workplace. While most certificates can be completed within one year, coursework is graded and substantial, typically involving lectures, readings, presentations, and final projects or examinations. The key program areas at UCSC Extension are:

- Business and Management

## Undergraduate Academic Program

- Engineering and Technology
- Applied and Natural Sciences
- Education

Extension programs are open to any adult but cater to those who hold undergraduate or graduate degrees and who would benefit from university-level professional study. The instructors are degreed working professionals with practical expertise in the subject areas they teach. In some cases, they are faculty from UC and other educational institutions.

Regularly enrolled UCSC students may obtain degree credit for Extension courses numbered 1–199. Upon submission of the Extension transcript to the Office of Admissions, the course credit may be applied toward a bachelor's degree at UCSC. Extension courses numbered other than 1–199 are not applicable to a UCSC degree. However, many Extension courses are recognized for graduate degree credit by other universities. Check the Extension catalog for details.

UCSC Extension also provides professional education on a contract basis to local corporations and agencies through its academic departments. Upon request, the departments offer management, engineering, bioscience, and education courses and certificates on site at the companies' locations.

Comprehensive program descriptions and course offerings are available online at [ucsc-extension.edu](http://ucsc-extension.edu). To be placed on the mailing list for a print catalog, call (408) 861-3700. The mailing address for UCSC Silicon Valley Extension is 2505 Augustine Drive, Santa Clara, California 95054-3303.

### OPEN CAMPUS/CONCURRENT ENROLLMENT

Concurrent Enrollment through Extension is a cooperative arrangement between UC Santa Cruz and UCSC Extension Silicon Valley that enables members of the public to enroll in one or two regular UCSC undergraduate or graduate courses per quarter for credit. The program is administered by UCSC Extension Silicon Valley, and course credit granted appears on a UCSC Extension Silicon Valley transcript. Participants must meet certain criteria outlined in the Concurrent Enrollment application. An application fee is charged for each quarter of enrollment in addition to course fees. A first-time application filed at least one week prior to the first day of instruction for the quarter has a \$65 fee; subsequent applications filed at least one week prior to the first day of instruction for the quarter have a \$20 fee. Applications filed later than one week prior to the first day of instruction for the quarter have a \$110 fee.

Concurrent Enrollment through Extension may be used as a path toward a part-time or full-time degree program or as a way of studying subjects of personal or occupational interest. Credit earned through this program may be used toward degree requirements, when applicable, if participants subsequently seek admission to the university and are accepted.

Financial aid is not available to participants in the Concurrent Enrollment program.

For further information and to obtain the application packet, contact UCSC Extension Silicon Valley, 2505 Augustine Drive, Suite 100, Santa Clara, CA 95054-3003, (831) 861-3700. Web: [www.ucsc-extension.edu](http://www.ucsc-extension.edu).

<b>Spanish Studies B.A.</b>	Spanish 114 or Spanish and Spanish for Heritage Speakers 115
<b>Theater Arts B.A.</b>	Theater Arts 160 and 185

---

## GRADUATE STUDIES

---

### 2015-16 General Catalog

UC Santa Cruz offers graduate study in more than 30 academic fields. About 1,500 graduate students are enrolled at the certificate, master's, and doctoral levels. The small size of the UCSC graduate programs encourages close working relations between students and faculty in an informal atmosphere conducive to rapid learning and professional growth. Many graduate programs have interdisciplinary components, and students are encouraged to explore the conceptual

connections between related fields as they acquire mastery in their areas of specialization.

Research facilities at UCSC are excellent, and there are extensive opportunities for graduate students to engage in significant independent study and research (see [Resources for Learning and Research](#)). Graduate students are also encouraged to obtain teaching experience, primarily as supervised teaching assistants. They are highly valued members of the UCSC community, contributing substantially to the research and teaching conducted on the campus.

---

## DEGREES AND PROGRAMS

---

The University of California, Santa Cruz, offers graduate programs leading to advanced degrees or certificates in the following areas:

<b>Department</b>	<b>Degree or Certificate</b>
Anthropology	Ph.D.
Applied Economics and Finance	M.S.
Astronomy and Astrophysics	Ph.D.
Biomolecular Engineering and Bioinformatics	M.S./Ph.D.
Chemistry and Biochemistry	M.S./Ph.D.
Computer Engineering	M.S./Ph.D.
Computer Science	M.S./Ph.D.
Digital Arts and New Media	M.F.A.
Earth Sciences	M.S./Ph.D.
Ecology and Evolutionary Biology	M.A./Ph.D.
Economics	Ph.D.
Education	Ph.D.
Education: Teaching (credential program)	M.A.
Electrical Engineering	M.S./Ph.D.
Environmental Studies	Ph.D.
Feminist Studies	Ph.D.
Film and Digital Media	Ph.D.
Games and Playable Media	M.S.
History	M.A./Ph.D.
History of Consciousness	Ph.D.
Latin American and Latino Studies	Ph.D.
Linguistics	M.A./Ph.D.
Literature	M.A./Ph.D.
Mathematics	Ph.D.

## Graduate Studies

Department	Degree or Certificate
Microbiology and Environmental Toxicology	M.S./Ph.D.
Molecular, Cell, and Developmental Biology	M.A.
Music	M.A./D.M.A./Ph.D.
Ocean Sciences	M.S./Ph.D.
Philosophy	M.A./Ph.D.
Physics	M.S./Ph.D.
Politics	Ph.D.
Program in Biomedical Sciences and Engineering	Ph.D.
*Bioinformatics and Computational Biology	
*Mechanistic, Structural, and Chemical Biology	
*Molecular, Cell, and Developmental Biology	
*Microbial Biology and Pathogenesis	
Psychology (social, developmental, or cognitive)	Ph.D.
Science Communication: Science Writing	Certificate
Social Documentation	M.A.
Sociology	Ph.D.
Statistics and Applied Mathematics	M.S./Ph.D.
Technology and Information Management	M.S./Ph.D.
Theater Arts	M.A.
Visual Studies	Ph.D.

---

### PROGRAM DESCRIPTIONS

---

Descriptions of individual programs appear under the specific disciplines in the [Programs and Courses](#) section. Application materials for all programs are available online at the [Division of Graduate Studies](#); applications for the upcoming academic year are available starting October 1 of the prior year.

All UCSC graduate programs have information on the web at [www.ucsc.edu/academics](http://www.ucsc.edu/academics). Inquiries about part-time study should be directed to the individual departments. If there are any problems with the online application process, please e-mail [gradadm@ucsc.edu](mailto:gradadm@ucsc.edu).

---

### ADMINISTRATION

---

At UCSC, individual graduate programs are directed by the academic departments. Overall policy is determined by the Graduate Council, and coordination and record keeping for matters common to all graduate students—such as admission applications, fellowships, and advancement to candidacy—are the responsibility of the Division of Graduate Studies. The dean of graduate studies is the chief administrative officer. Graduate

policies and other information can be found online in the [Graduate Student Handbook](#).

---

### CATALOG RIGHTS

---

Students matriculating in a given graduate program will select the UCSC General Catalog they will follow to meet their requirements. This can be either the one published the year they enter the program, or any subsequent catalog published prior to the year they are awarded the degree sought. Students who seek readmission after a break in attendance of more than two years (six regular quarters) must adhere to the graduation requirements in effect at the time of readmission or to those subsequently established for all portions of the degree requirements not already fulfilled. The readmitting program will determine which degree requirements remain to be fulfilled, and will communicate this information in the letter offering readmission. This determination constitutes a formal requirement for readmission to the program, and the student's acceptance of readmission implies acceptance of the program's written stipulation of remaining degree requirements. Should any student choose to follow

catalog requirements for a year in which the catalog is not printed in hard copy, the requirements will include any online catalog update for that year. A student must follow the chosen catalog in its entirety, including both the individual degree program and general university requirements. General university requirements may be found in the [Graduate Student Handbook](#).

---

### EVALUATION OF PERFORMANCE

---

Graduate students are graded Satisfactory/Unsatisfactory (S/U) or, at student option, A, B, C, D, F. The grade A, B, or S is awarded for satisfactory work. A graduate student receiving a grade of C, D, or U will not be able to use the credit for that course to satisfy any course requirement for a graduate degree. Courses in which a graduate student receives a grade of C, D, F, or U may be repeated. Credits will be counted once, and the most recently earned grade will determine whether a degree requirement has been met. Repeating a course more than once requires the prior written approval of the dean of graduate studies.

Graduate student performance in all courses taken for credit at UC Santa Cruz may also be evaluated according to the Narrative Evaluation System. A narrative evaluation typically describes the nature and requirements of the course, the student's strengths and weaknesses in the various aspects of the course (e.g., discussion, laboratory work, term papers, and examinations), and the student's general understanding of the course content. Evaluations may be used by academic advisers and become part of the student's official academic record.

Please also refer to the statement on Academic Integrity; Appendix F, Graduate Student-Faculty Adviser Relationship Guidelines; and Appendix O, Official University Policy on Academic Integrity for Graduate Students, published in the [Student Policies and Regulations Handbook](#).

---

### DIVERSITY-ENHANCEMENT PROGRAMS

---

The Eugene Cota-Robles Fellowship and the Dissertation-Year Fellowship are part of the University of California's Academic Career Development Program.

The Eugene Cota-Robles Fellowship is a merit-based diversity-enhancement program that provides financial support for students from diverse backgrounds to pursue and successfully complete a graduate degree. This fellowship is awarded to entering doctoral students who have overcome significant obstacles to achieve a baccalaureate-level degree, and whose economic, educational, or social background contributes to intellectual diversity of the graduate student population. Departments identify applicants from among their pool of admissions applications. Applicants should refer to the information under Financial Support in the application to gain a better understanding of this fellowship. Fellowship recipients must be U.S. citizens or permanent residents.

The Dissertation-Year Fellowship is available to continuing students who are advanced to candidacy. Enrolled students are assisted through formal and informal group orientations, individual advice about academic matters, financial aid, postdoctoral opportunities, and the provision of information about career planning, health care, and housing.

Departments nominate applicants for this fellowship from among their qualified students. For information, see the [Division of Graduate Studies web site](#).

---

### EXCHANGE PROGRAM

---

A graduate student in good standing at UC Santa Cruz who wishes to take advantage of educational opportunities available only at another campus of the University of California may become an intercampus exchange graduate student for a quarter or more. This program also permits students to take courses at more than one UC campus during the same quarter.

To participate in the program, a student must have the approval of his or her faculty adviser, the dean of the Division of Graduate Studies at UC Santa Cruz, and the graduate dean on the campus to be visited. Application forms may be obtained from the Division of Graduate Studies and should be submitted three weeks before the quarter in which the exchange begins.

---

## STUDENT LIFE

---

The campus offers a variety of programs to enhance the quality of student life, all of which are available to graduate students. These include childcare, sports and recreation, health services, cultural events, transportation services, and the UCSC Women's Center. See [Campus Life](#) for information on these services and a description of the local community. See [Disability Resource Center](#) for services available to students with disabilities.

### COLLEGE AFFILIATION

---

Graduate students at Santa Cruz have the opportunity to affiliate with one of the 10 colleges on campus ([college descriptions](#)). Participation in the activities of a college may include taking an occasional meal there, living at the college, or participating in the college's educational and preceptorial programs or in its extracurricular activities.

### GRADUATE STUDENT ASSOCIATION

---

The Graduate Student Association (GSA) is an organization of all graduate students at UCSC. It seeks to advance the general welfare of the graduate student body and is responsible for promoting extracurricular activities on campus.

Graduate students elect a GSA steering committee, which coordinates activities and their funding. In past years, the steering committee has sponsored student social gatherings, musical events, poetry readings, lectures by visiting scholars, and other activities of special interest to graduate students. A portion of the college student government fee, paid by all students, is available to the association for this purpose. The steering committee also recommends graduate students for appointment to university committees.

### GRADUATE STUDENT COMMONS (GRAD COMMONS)

---

Located in the Quarry Plaza, the Graduate Student Commons (Grad Commons) exists solely to serve the needs and interests of graduate students at UCSC. The Grad Commons is the only building on campus that is owned and operated entirely by graduate students. It provides a comfortable and welcoming space, fostering graduate student interaction and a sense of community. The Grad Commons is open 24 hours a day for all graduate students and graduate student groups to use the various study and meeting rooms. In addition, the Grad Commons holds numerous events each quarter to enrich graduate student life and cultivate professional development.

Social events such as monthly 1st Friday Socials, quarterly parties, and art shows are sponsored by the Grad Commons to promote a sense of community and cohesion among graduate students across the various departments. Health and wellness activities are available to help graduate students relax from the stresses of TAing and research. The Grad Commons also offers a wide range of professional development workshops each quarter to support graduate student success in academia and beyond. Past professional development workshop topics include: grant writing, conflict management, résumé and CV writing, web site design, time management, teaching and diversity statements, communication skills, preparing for your Qualifying Exam, and more. Visit the [Graduate Student Commons web site](#) to learn about upcoming programming and ways to get involved with the Grad Commons.

### HOUSING

---

As at all UC campuses, finding housing may be a challenge. Students who wish to reside on campus should submit their application as soon as possible. Likewise, students who wish to live off campus will want to start looking at available rentals and costs as soon as possible.

On-campus Graduate Student Housing for 82 individual students is located adjacent to "Science Hill," home to many of UCSC's academic facilities. Four students share a furnished apartment with four single bedrooms, living room, kitchen, dining room, and bathroom. Visit the [Grad Housing web site](#), or email [gradhsg@ucsc.edu](mailto:gradhsg@ucsc.edu).

Students with families may apply to live in Family Student Housing, a complex of two-bedroom unfurnished apartments. Located on the west side of campus, the 22-acre site is adjacent to a nature reserve and overlooks the Monterey Bay. Refer to the [Family Student Housing web site](#), or email [fsh@ucsc.edu](mailto:fsh@ucsc.edu).

To assist students in locating living accommodations in the surrounding communities, the Community Rentals Office maintains [a list of available rentals](#).

---

## APPLICATION AND ADMISSION

---

### APPLICATION DEADLINES

---

Students may apply for only one UCSC graduate program at a time. A list on the [Graduate Studies web site](#) shows the date set by each program as the final deadline for submission of all documents. Please visit the Graduate Studies web site for the most current information on applying to UCSC graduate programs. Application deadlines may be updated on or before applications open. The dates listed are the official

## Graduate Studies

deadlines, but students are strongly advised to submit applications well in advance of the deadline. If an application deadline falls on a weekend or holiday, there will not be staff available for assistance.

To be considered for fellowship support for fall quarter, the application for admission and all supporting materials must arrive at the Division of Graduate Studies by the program's deadline or by Feb. 1, 2015, whichever is earlier.

### ADMISSION REQUIREMENTS

---

To be admitted with graduate status at UCSC, a student must have completed a bachelor's degree or its equivalent from an accredited undergraduate institution of acceptable standing and demonstrate ability to pursue a program of study leading toward an advanced degree. Preparation must provide an adequate foundation for advanced study, as determined by the department for the program in which the student intends to enroll. If the bachelor's degree is not in the same discipline as the graduate program, the student must have sufficient preparation in the intended area of study to undertake graduate-level work.

To apply for admission, application materials (including test scores, written materials, and any required supplemental materials) must be submitted before the deadline date to the Division of Graduate Studies. UC Santa Cruz requires that applicants complete an online application to be considered for admission to a graduate program. The application and the accompanying materials should be complete and accurate.

**Admission application.** Applications for all programs are available online at the [Graduate Studies web site](#). The completed application is paid for online with either a credit card or e-check. This application fee is not refundable. [Application fee waivers](#) are available for cases of hardship and fee exemptions are available for students who participated in approved grad-prep programs. International applicants are not eligible for fee waivers.

**Graduate Record Examination (GRE) scores.** If the applicant is applying for admission to a program that requires the GRE, the scores must be received by UC Santa Cruz Graduate Application Processing before the application deadline. It is strongly recommended that all applicants complete testing by November, since December test scores will not reach the division prior to most application deadlines.

The Educational Testing Service should be asked to forward the test scores directly to the division. UC Santa Cruz's school code is 4860. Test results are electronically submitted to UC Santa Cruz Division of

Graduate Studies four to six weeks after the exam has been taken. Please consult the [Graduate Studies web site](#) to see which exams are required for each program.

**Supplemental material.** Many graduate programs have special application requirements, such as writing samples, portfolios, auditions, or personal interviews. The [Graduate Studies or program web site](#) (or the web site for the program to which the student is applying) should be consulted and all of the requirements specified should be fulfilled.

### DUPLICATION OF HIGHER DEGREES

---

It is the policy of the UC Santa Cruz campus to prohibit the pursuit of duplicate advanced degrees. However, applicants may petition the graduate dean for an exception to this policy if the degree sought is in a field of study distinctly different from the field in which the original advanced degree was attained.

In order for a student who already holds the doctorate to be admitted or readmitted to work toward a second Ph.D.—or toward an academic master's degree—each of the following conditions must be met:

- The applicant must petition the graduate dean in writing prior to the application deadline for the program in question.
- The department sponsoring the program to which admission is sought must support the applicant's petition.
- The department must present the graduate dean with a clear and complete outline of the program required for the degree sought, and must explain the intellectual separateness of the proposed program from that completed by the applicant in attaining the earlier degree.
- The graduate dean will review all materials submitted and decide whether or not to admit the applicant, consulting with the Graduate Council when appropriate.

Admission to a professional master's program after a Ph.D.—or to an academic master's program after a professional doctorate—is not subject to these restrictions.

### TRANSFER OF CREDIT

---

UC Santa Cruz does not automatically grant credit for graduate-level work undertaken at other universities. Each department determines credit transferability on an individual basis.

## INTERNATIONAL APPLICANTS

---

Applicants from other countries must meet standard admission requirements and, upon admission, provide satisfactory evidence of financial support before they may obtain the necessary visa documents. Because it normally takes much longer to process international applications, such students are urged to apply as early as possible. Once the student has been formally admitted, a Certificate of Eligibility (I-20) will only be issued by the UC Santa Cruz Office of International Education when all requirements are satisfied. Please note that international students are eligible for neither need-based financial aid nor application fee waivers.

For those choosing to take the TOEFL, a minimum score on the paper-based TOEFL of 550, or 220 on the computer-based test, or 83 on the Internet-based test is required for admission. Chemistry and Biochemistry, Computer Engineering, Computer Science, and Electrical Engineering require 570 on the paper-based test, 230 on the computer-based test, and 89 on the Internet-based test. Any international students who wish to be considered for Teaching Assistant opportunities must score a 26 or higher on the Spoken Word portion of the Internet-based test.

For those choosing to take the IELTS, our institution requires an overall band score of 7 or higher on the IELTS. An overall score of 8 from the IELTS test is required for all new international students who may serve as a Teaching Assistant at any time during their graduate career. UC Santa Cruz only accepts scores submitted electronically by the IELTS test center. No paper Test Report Forms will be accepted. An institutional code is NOT required. Please contact the test center where you took the test directly and request that your test scores be sent electronically using the IELTS system. All IELTS test centers worldwide are able to send scores electronically to our institution. For inquiries on test dates, fees, and preparation, please contact your nearest test center (see the [IELTS web site](#)).

All official academic records must be issued in the original language and accompanied by English translations prepared by the issuing institution. If

translations are not available from the institution itself, translations may be prepared by government or official translators. In order for translations to be acceptable, they must bear the stamp or seal of the issuing institution or government agency and the original signature of the translator. They must be complete and exact word-for-word translations of the original documents, not interpretations. Grades must not be converted to the American scale. Specially prepared English versions are not acceptable in place of documents issued in the original language. Once submitted, documents may not be borrowed, returned to you or sent elsewhere.

International applicants are not required to submit evidence of financial support until they have received formal admission to a graduate program. A Certificate of Eligibility (I-20) will not be issued by the UC Santa Cruz International Programs office until all standard admissions requirements have been met and the UCSC Financial Certificate and supporting financial documents have been received and approved.

## APPLICATION PROCESSING

---

The Division of Graduate Studies receives most application materials and creates a file for each applicant. Once the application is submitted online, it will be available to the appropriate department for review and recommendation. Applicants are admitted by the graduate dean following recommendations by the departments. Applicants will be notified by e-mail whether or not they have been admitted for graduate study at UCSC after all reviews are complete. Under no circumstances will UCSC give out this information over the phone, in person, or by proxy. By a general agreement to which UC Santa Cruz and most graduate schools in the U.S. are signatories, applicants admitted to graduate schools have until April 15 to reply with their acceptance of fellowship offers. Any information about the completeness of the file can be found on the [MyUCSC](#) student portal once an application has been submitted. Specific questions about the evaluation of the application should be directed to the department to which you are applying.

NOTE: Expense figures below to be verified in July.

---

**FEES AND EXPENSES**

---

Fees and expenses for graduate students are shown below. Tuition, fees, and other charges are subject to change without notice by the Regents of the University of California. For current fee information, check [registration fees](#).

<b>Graduate Student Fees, 2015-16</b>		
	<b>One Quarter</b>	<b>F-W-S Quarters</b>
Student Services Fee (formerly University Registration Fee)	\$340.00	\$1020.00
Tuition (formerly Educational Fee)	\$3,740.00	\$11,220.00
Campus-Based Fees	\$355.86	\$1,067.58
GSHIP Health Insurance (waivable)	\$1,314.00	\$3,942.00
<b>Total for California Residents</b>	\$5,749.86	\$17,249.58
Nonresident Supplemental Tuition (a)	\$5,034.00	\$15,102.00
<b>Total for Nonresidents of California</b>	10,783.86	32,351.58

(a) A limited number of Nonresident Tuition Fellowships are available. Please refer to the [Financial Support](#) section.

For information on fee refunds, see [Finances](#).

Minimum annual expenses, including registration fees, for a single graduate student living on campus are estimated to be \$40,013.58 per academic year. Students should not plan to undertake graduate study without assured funding, since outside employment in the Santa

Cruz community can be difficult to obtain. An estimated sample student budget for the 2015-16 academic year is provided below. Non-California residents should add \$15,102 in nonresident tuition and fees to the total.

<b>Graduate Student Budget, 2015-16</b>	
Fees	\$17,249.58
Books and supplies	\$1,524.00
Room and board (on or off campus) (a)	\$16,695.00
Transportation (b)	\$1,668.00
Personal	\$2,877.00
<b>Total</b>	<b>\$40,013.58</b>

a) Estimated room and board for graduate students living with family is \$4,368.

b) Expenses of owning a car and parking on campus are not included here. For parking fees, see [Transportation and Parking Services](#).

c) Some graduate programs are also assessed a [professional fee](#).

## REQUIRED FEES

---

Required fees are due and payable before the start of each quarter. These typically include tuition and fees, on-campus housing and meals if applicable, and campus health insurance if you do not secure a waiver. You will need sufficient funds to cover required fees and other personal expenses at the start of each term. For many financial aid recipients who are enrolled at least half time, tuition and fees on the student account are paid automatically with approved student aid funds.

Financial aid recipients should note that fellowship, grant, and loan checks or bank deposits in excess of university charges are refunded to students via direct deposit or check, but are not available to you until the first week of instruction each quarter.

**The Student Services Fee** supports student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well-being of students, social and cultural activities and programs, services related to campus life, and educational and career support.

**Tuition** helps support student financial aid and related programs; administration; libraries; operation and maintenance of plant; the university's operating budget; and all costs related to instruction, including faculty salaries.

**Campus-Based Fees** help support a wide range of student services, including extracurricular programs, campus childcare, community and public service projects, and free-fare use of the local transit systems.

In addition, all students are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides primary care services for the plan, while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is on the [UCSC Student Health Insurance web site](#), or contact (831) 459-2389.

Waivers from the mandatory insurance fee are available for students who can show that their outside plan provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver are listed in the [Schedule of Classes](#) and the [Graduate Student Handbook](#).

## NONRESIDENT TUITION

---

A resident of a state other than California or of another country must also pay nonresident tuition. General criteria for residency are in [Appendix A](#).

**Non-U.S. citizens note:** Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

## LATE FEES

---

Late fees may be assessed if a student fails to make university payments or enroll by the specified deadlines. Late fees are assessed on a graduated basis for each month there is an unpaid balance on your university account. Late fee amounts of \$50 for each late registration payment and/or late enrollment and \$25 for a late housing payment. Deadlines are published online in the [Graduate Student Handbook](#) and the [Schedule of Classes](#), and they appear on the Statement of Account.

## DEFERRED PAYMENT PLAN

---

See the information under [undergraduate expenses](#).

## FINANCIAL SUPPORT

---

The University of California, Santa Cruz, makes a strong effort to provide financial support to all graduate students who make normal progress in their program of studies. Certain kinds of support are awarded on the basis of academic merit, and others are granted on the basis of need. Students are encouraged to apply for both kinds of assistance by submitting the Free Application for Federal Student Aid (FAFSA). This form must be submitted after January 1 prior to the academic year for which you are requesting aid. The FAFSA may be filled out online and filed electronically at [www.fafsa.gov](http://www.fafsa.gov). To receive need-based support for the fall quarter, the FAFSA should be submitted no later than three weeks prior to the end of spring quarter of the year you are enrolled. Applications for student loans for each academic year will be accepted until April of that academic year. More detailed information about the application process and loans can be found at [financialaid.ucsc.edu](http://financialaid.ucsc.edu). Students may also visit the Financial Aid and Scholarships Office, 205 Hahn Student Services Building, or call (831) 459-2963.

---

## FELLOWSHIPS, ASSISTANTSHIPS, GRANTS

---

Students who received **Cal Grant A or B** as undergraduates within the last 15 months may request a one-year extension from the California Student Aid Commission to attend a teacher credential program. The Cal Grant A and Cal Grant B programs paid a maximum of \$12,192 for 2014–15 for study at the University of California. Renewal of these awards requires the student to submit the FAFSA by March 2nd. In addition, the student must submit a Request for Teaching Program Benefits Form ([Form G-44](#)) to the California Student Aid Commission.

The federal **Teacher Education Assistance for College and Higher Education (TEACH) Grant Program** provides grants to students who intend to teach in a high-need field in a public/private elementary or secondary school that serves students from low-income families. The program at UCSC is for M.A. Education students. In exchange for receiving this grant, you must sign an Agreement to Serve and complete online counseling. This grant converts to a loan with retroactive interest if the Service Agreement is not fulfilled. More information and a Fact Sheet can be found at the [Federal Student Aid TEACH Grants web site](#).

**Teaching Assistantships.** For the 2015-16 academic year, half-time teaching assistantships provide a salary of \$6,427 per quarter.

**Graduate Student Researcher Internships.** For the 2015-16 academic year, salaries for graduate student research positions range from \$4,386 to \$7,370 per quarter (depending on department) with state and federal taxes withheld from these amounts. The division and the [UCSC Career Center](#) can provide information about external graduate fellowships and grants.

---

## STUDENT LOANS

---

Graduate students can qualify for federal student loans by completing the FAFSA. Graduate students are eligible for Unsubsidized and Graduate PLUS loan programs. For additional information, see the UCSC [Financial Aid and Scholarships web site](#).

---

## LOAN FORGIVENESS PROGRAMS

---

The federal government will forgive all or part of a student loan under certain circumstances. This can include performing volunteer work or military service, or practicing medicine in certain communities. For a summary of such exemptions, visit the [Federal Student Aid web site](#).

Revised: 09/01/15

---

## RESOURCES FOR LEARNING AND RESEARCH

---

2015-16 General Catalog

---

### UNIVERSITY LIBRARY

---

The Science & Engineering and recently renovated McHenry libraries house the impressive holdings of UCSC's [University Library](#)—the largest library collection between Santa Barbara and San José. In nearly five decades, the collection has grown from a few shelves of books and a substantial dependence on the libraries of UC Berkeley to more than 2.3 million volumes, over 56,000 periodical titles (including online journals), nearly 39,000 microforms, and more than 411,000 non-print items including films, slides, and audio and video recordings.

As part of the statewide University of California library system, the University Library also serves as a gateway to millions of other books and periodicals. The library's efficient Interlibrary Loan service is heavily used, facilitated by the online request service of the systemwide Melvyl® Catalog.

The University Library collection is divided into two parts. Resources in the humanities, arts, and social sciences are contained in McHenry Library at the heart of the campus, while the engineering, mathematics, and physical and biological sciences collections are housed in the award-winning Science & Engineering Library, conveniently located on "Science Hill."

Collections librarians manage the growth and development of UCSC's collection and provide in-depth research assistance and instruction.

Most of the holdings of the University Library are shelved in open stacks. Students and faculty are encouraged to help themselves, using information found via the local Cruzcat online library catalog, the Melvyl Catalog, and the library web site. The library home page provides a convenient gateway to the Cruzcat and Melvyl catalogs, the California Digital Library, and a host of other electronic information resources, such as article databases and online journals. The library staff is also eager to offer its assistance at any of its service desks.

At the McHenry Library reference desk, as well as by e-mail and appointment, librarians and reference specialists give individual guidance: general orientation for the newcomer and specialized help for the researcher. They assist in the use of a wide range of resources—in print and online—including more than

200 online article databases to which the library subscribes.

The Reserves service, located at the respective circulation desks, lends copies of assigned class readings on a short-term basis and provides protection for vulnerable circulating materials and heavily used periodicals.

[Special Collections](#) at McHenry Library contains rare, valuable, and often fragile materials that do not circulate. Holdings focus on local and campus history, and 20th-century literature and book arts. Special Collections also houses the official campus archive, as well as the archives of George Barati, Gregory Bateson, Thomas Carlyle, the Grateful Dead, Lou Harrison, Robert Heinlein, Kenneth Patchen, Brett Weston, and the Shameless Hussy, Trianon, and Turtle Island presses.

Other important collections and services include:

- [The Digital Collections web site](#), containing a growing treasury of digitized photographs, maps, artwork, oral history transcripts, and sound recordings, as well as "born digital" materials, focusing on the most rare and unique.
- Government Publications, a selective depository for documents published by U.S., California, and Santa Cruz government agencies
- The Media Center, which provides access to audio and video in all formats; CD-ROMs; support for music study, including music scores and music course reserves via iTunes; and language-related audio and video recordings
- The Mary Lea Shane Archives of the Lick Observatory, a national resource for the history of astronomy
- The Regional History Project's documentation of Central California history

For more information, see the [University Library web site](#).

---

### COMPUTING FACILITIES AND TECHNOLOGY SERVICES

---

#### INFORMATION TECHNOLOGY SERVICES (ITS)

---

[Information Technology Services \(ITS\)](#) at UCSC provides a broad spectrum of IT-related resources, services, and support to students, faculty, and staff in the areas of computing, network, telephones, media

services, information systems security, web, e-mail, and instructional technology.

ITS operates [the campus network](#), which interconnects computers, workstations, instructional computing labs, and computer-equipped classrooms with each other and the Internet. In addition, wireless access is available across campus. ITS also provides the campus with technical services and computer support through [the ITS Support Center](#).

### **Purchasing a Computer?**

If you are planning on buying a new computer, UCSC recommends purchasing a laptop with both wired and wireless network capability. The campus supports both PC and Mac computers. An excellent source for purchasing computers and computer products is the campus [Bay Tree Bookstore](#), (831) 459-2082. Through university-negotiated contracts, pricing is almost always below outside market prices.

### **UCSC Account (CruzID) and E-mail**

All students, faculty, and staff have a UCSC account called CruzID and a UCSC e-mail account, for example [cruzid@ucsc.edu](mailto:cruzid@ucsc.edu). All official UC and UCSC communication is e-mailed to the [@ucsc.edu](mailto:@ucsc.edu) address. In addition to e-mail, CruzID gives individuals access to many campus systems and applications. More information is available at [UCSC E-mail Services](#).

### **Residential Network**

ITS provides in-room Internet access (called ResNet) to students living on campus. Network services are available to undergraduate and graduate students living in university housing (except for the Camper Park). For assistance with network connections, contact ResNet at [resnet@ucsc.edu](mailto:resnet@ucsc.edu) or call (831) 459-HELP (4357).

### **Computing Labs for Drop-in Use and Academic Classes**

ITS manages 12 computer labs throughout the campus. These labs have more than 300 computers available for students to use that include PC, Mac, and Sun workstations. Wireless access is available in all labs. More extensive lab information, including hardware and software specifications and hours of operation, is available at [the Computer Labs page](#).

### **Academic Course Materials on the Web**

[eCommons](#) is the campus online course-management system used to create sophisticated web-based course materials to supplement, but not replace, classroom instruction. eCommons uses a web browser as the interface for the course.

Faculty using eCommons can incorporate a wide variety of tools in their course site, such as a course calendar,

student conferencing system, electronic mail, group projects with student-created web pages, and quizzes. Outside of class time, students can use eCommons to view course materials, participate in web-based class discussions, collaborate on student group projects, and take quizzes.

### **Disability Accommodations for Instruction**

UCSC computing labs have common adaptive technologies—such as enlarged type for students with low vision and Dvorak keyboards for students with repetitive strain injuries. If you have a disability and require adaptive or assistive technology to use lab computers, library facilities, or other campus services, please contact the [Disability Resource Center \(DRC\)](#) so that they can coordinate services for you. You can also reach the DRC at (831) 459-2089 (voice), or (831) 459-4806 (TTY)..

### **ITS Support Center for Technical and Computer Help**

The ITS Support Center is open to all students, staff, and faculty and provides general computer help, assistance with CruzID accounts and e-mail, and other technical-support needs. The Support Center is located at 54 Kerr Hall and is open Monday through Friday from 8 a.m. to 5 p.m.

### **Computing Policies**

Individuals using UCSC computing services must comply with the [University of California, state, and federal policies and laws](#). These policies define how ITS will approach security, how faculty, staff, and students are to approach security, and how certain situations will be handled.

---

## **NATURAL RESERVE SYSTEM (NRS)**

---

The purpose of the NRS is to establish and maintain, for teaching and research, a system of natural areas that encompass diverse and undisturbed examples of California's terrain, both aquatic and terrestrial. The reserves are open to all qualified individuals and institutions for scholarly work concerned with the natural environment. Such work usually deals with ecological topics or experimental studies in a natural setting. At UCSC, the reserves play an important role in supporting experiential learning (course support, internships, and research support) for undergraduate students interested in ecology and environmental sciences in general.

The University of California administers 38 natural reserves throughout the state. Santa Cruz has responsibility for four—the Landels-Hill Big Creek Reserve, Fort Ord Natural Reserve, Año Nuevo Island, and Younger Lagoon Natural Reserve—in addition to

the campus's own Natural Reserve. Information about these reserves is available at the [UC Santa Cruz Natural Reserves web site](#). Information about the UC system's holdings and management is available at the [University of California Natural Reserve System web site](#). You may also contact the UCSC Natural Reserve director, c/o Environmental Studies Department, 467 Natural Sciences 2 Building, at (831) 459-4971, or by e-mail at [ghdayton@ucsc.edu](mailto:ghdayton@ucsc.edu).

---

## RESEARCH PROGRAMS AND FACILITIES

---

Research at UC Santa Cruz is thriving, facilities are excellent, and the amount of external funding received for research continues to grow. In addition to their individual research projects, faculty are involved in organized research on various scales, from small focused activities within academic divisions, to large research units, some with campuswide scope and others with wider connections to the whole 10-campus University of California system.

Research programs and facilities are described below by academic division: [Arts Division](#); [Baskin School of Engineering](#); [Humanities Division](#); [Physical and Biological Sciences Division](#); and [Social Sciences Division](#). [Interdisciplinary and Systemwide](#) research programs are also listed.

Specialized research facilities in addition to those listed below are described in the [Programs and Courses](#) section.

---

## ARTS DIVISION RESEARCH CENTERS AND INSTITUTES

---

[The Arts Research Institute \(ARI\)](#)  
[The Center for Documentary Arts and Research \(CDAR\)](#)  
[Center for Force Majeure Studies](#)  
[The Innovation and Design Lab \(IDL\)](#)  
[The OpenLab Network](#)  
[The Social Practice Arts Research Center \(SPARC\)](#)

---

## TEACHING, RESEARCH, AND PERFORMANCE FACILITIES

---

Arts Information Technology Services (ITS) Labs ([Porter Arts Mac Lab](#) and the [Music Lab](#))

### HUMANITIES DIVISION

---

#### RESEARCH PROGRAMS

---

**[The Institute for Humanities Research \(IHR\)](#)** at UC Santa Cruz is a laboratory for theorizing and implementing new visions of the humanities.

UC Santa Cruz's Humanities Division plays crucial role in the university's mission to inspire and educate students for both personal and professional success. Our students question what it means to be human and investigate the impact that language, culture, and gender have on the human experience.

The IHR cultivates faculty and student research, supports multi-campus research projects, and fosters community engagement through internships and public programming. In addition to the research centers listed below, the IHR houses a multitude of research clusters whose projects tackle topics relevant to an international, multicultural audience.

Institute for Humanities Research centers and projects include:

[Center for Cultural Studies](#)

[Center for Jewish Studies](#)

[Center for Labor Studies](#)

[Center for Mediterranean Studies](#)

[Center for the Study of Pacific War Memories](#)

[Center for World History](#)

[Dickens Project](#)

[Linguistics Research Center](#)

[Ray Film and Study Center](#)

---

### PHYSICAL AND BIOLOGICAL SCIENCES DIVISION

---

#### RESEARCH PROGRAMS AND CENTERS

---

[Center for Adaptive Optics \(CfAO\)](#) (also see [lao.ucolick.org](http://lao.ucolick.org))

[Center for Molecular Biology of RNA](#)

[Center for Origin, Dynamics, and Evolution of Planets \(CODEP\)](#)

[Center for the Study of Imaging and Dynamics of the Earth \(CSIDE\)](#)

[Center for Remote Sensing \(CRS\)](#)

[Institute of Marine Sciences \(IMS\)](#)

Revised 09/01/15

---

## STUDENT LIFE

---

### 2015-16 General Catalog

Campus life is all about learning, discussion, and debate; meeting people from diverse backgrounds; making new and lasting friendships; attending cultural celebrations and artistic and musical performances; and getting involved with student organizations and clubs. UCSC provides a wealth of opportunity for personal growth within the context of a rich and meaningful academic experience. Students live, study, and socialize with others from their college as well as with students from the other colleges. UCSC's colleges (see [The Colleges](#)) and various campus units provide a wide range of student services to respond to individual needs, interests, and levels of personal development. In addition, students can take advantage of the campus's stunning natural setting, the friendly and engaging local community, and easy access to the Monterey and San Francisco Bay areas.

---

### SANTA CRUZ COMMUNITY

---

Located on the northern tip of Monterey Bay, Santa Cruz is famous for its Mediterranean climate, forested state parks, and miles of scenic beaches. Recreational opportunities abound—hiking through redwood forests, bicycling along mountain roads, and surfing, sailing, and scuba diving. The Santa Cruz Mountains are minutes away; the majestic Sierra Nevada is a four-hour drive to the east.

The metropolitan centers of the San Francisco Bay Area are easily accessible. By car, Berkeley and San Francisco are less than two hours from campus. San José, Monterey, and Carmel are one hour away.

The city of Santa Cruz, with a population of about 60,000, was originally founded as a Spanish mission. Santa Cruz is a small community with cosmopolitan appeal and a strong awareness of environmental and political issues.

---

### HOUSING

---

At UC Santa Cruz, all students are housed in small-scale residential communities, which provide close-knit living environments within the larger university. Each community provides an academically and socially supportive environment and offers special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience. A space in university housing is guaranteed to all new undergraduate students entering in the fall quarter who submit all

forms and required fees by stated deadlines.

After accepting the UC Santa Cruz offer of admission, all undergraduate students become affiliated with one of our 10 colleges. Once affiliated with a college, all students are sent information about the housing options available, and instructions for completing the online housing application/contract process. The housing options available to you will differ depending on whether you are a freshman or a transfer student—though all students have access to campus dining facilities. Housing application periods open in mid-May for new freshmen and mid-June for new transfers entering in the fall.

---

### COLLEGE RESIDENCES

---

The colleges differ in academic focus, environment, location, architecture, and programs offered. However, all 10 colleges are dynamic, engaging learning communities that offer opportunities for students to help build and shape their experiences.

Freshmen are generally assigned to live in residence halls at their college, except at Kresge College, which has all apartments. Residence hall floors are typically shared by 15 to 50 students and have common bathrooms and lounge areas. Students can request to live in a mixed-gender (students of any gender live on the same floor or apartment, though bedrooms are single-gender) or single-gender (students of a single gender live on the same floor or apartment) area. All-gender room assignments (allows transgender students and allies to live together in the same room, regardless of gender/biological sex) are also available by request. Apartments, typically shared by four to seven students, have common living/dining rooms, kitchens, and bathrooms, and a combination of shared and private bedrooms. Each community provides accessible housing for students with disabilities. Incoming transfer students reside at the Transfer Community, The Village, or the University Town Center, regardless of college affiliation.

A variety of theme-housing options are available for those who are interested. Based on academic pursuits, hobbies, individual backgrounds, and lifestyle preferences, these options serve to complement a student's experience in residence.

Each college's residential program is a team effort. Live-in student and professional staff members provide orientation and support services, organize activities and events, provide referral information about

## Student Life

academic or personal concerns, and assist with roommate problems.

All housing contracts for residence halls and apartments at the colleges (including the Transfer Community) include meal plans. Students with meal plans may use their student ID cards to access any of the dining halls on campus. Meal plans include Flexi Dollars (a dollar-for-dollar exchange for “food dollars” that can be used at college coffee shops, campus restaurants, and all dining halls). Additional Flexi Dollars may be added to any meal plan.

For more information on the colleges, refer to the brochure titled [UC Santa Cruz, The Colleges: Communities of Learning](#), or contact the [campus housing office](#).

---

### REDWOOD GROVE

Located on the west side of campus between Kresge College and Graduate Student Housing, Redwood Grove is a quiet and studious apartment community for students from all colleges. Each apartment has private and shared bedrooms, a living room, kitchen, dining room, and bathroom. Information is available on the Web at [housing.ucsc.edu](#), and by e-mail at [redwoodgrove@ucsc.edu](#).

---

### THE VILLAGE

Located in the Lower Quarry, The Village houses continuing and transfer students. Each of the 17 houses features nine single bedrooms, three bathrooms, and a kitchenette. A meal plan is optional. A manager’s apartment, office, laundry facility, community kitchen, and community lounge are located on site. Information is available on the Web at [housing.ucsc.edu/village](#), and by e-mail at [village@ucsc.edu](#).

---

### UNIVERSITY TOWN CENTER

The University Town Center, located at the corner of Pacific and Cathcart in downtown Santa Cruz, houses continuing and transfer students in two- and three-person studio apartments. A meal plan is optional. Information is available on the Web at [housing.ucsc.edu/utc](#), and by e-mail at [utc@ucsc.edu](#).

---

### FAMILY STUDENT HOUSING

Family Student Housing, located on the west side of campus, has apartments for students and their families. Students must reside with at least one eligible family member on a permanent, full-time basis. Eligible family members include children, a spouse or adult partner, a parent, or a sibling. The apartments are unfurnished, and each has two bedrooms, a bathroom, a small study, a combined living/dining area, and a kitchen. Several apartments are accessible to people with mobility

impairments. Also, see information on childcare and youth programs, [below](#). Information is available on the Web at [housing.ucsc.edu/family](#), and by e-mail at [fsh@ucsc.edu](#).

---

### CAMPER PARK

The 42-space Camper Park on the north side of campus is available to students who own recreational vehicles. All have water and electrical hookups; eight also have sewer hookups. The community includes a small central facility with rest rooms, showers, a meeting room, and a laundry room. Information is available on the Web at [housing.ucsc.edu/camperpark](#), and by e-mail at [camperpark@ucsc.edu](#).

---

### GRADUATE STUDENT HOUSING

Conveniently located adjacent to “Science Hill”, home to many of UCSC’s main academic facilities, each apartment offers four single bedrooms, a living room, kitchen, dining room, and bathroom. Ground floor apartments have decks, while upper apartments have private balconies. Information is available on the Web at [housing.ucsc.edu/gradhousing](#), and by e-mail at [gradhsg@ucsc.edu](#).

Web: [housing.ucsc.edu/gradhousing](#)

E-mail: [gradhsg@ucsc.edu](#)

---

### CAMPUS HOUSING OFFICE

The Campus Housing Office is responsible for the application and contract records for all single students living in campus residence halls and apartments, The Village, University Town Center, and Graduate Student Housing. Advisers are available on a drop-in basis to assist students with any questions regarding housing contract policies and procedures, housing and dining charges, payment plan options, meal plans, and more.

Location: 104 Hahn Student Services Building (8 a.m. to 5 p.m., Monday through Friday) Information is available on the Web at [housing.ucsc.edu](#), and by e-mail at [housing@ucsc.edu](#).

---

### COMMUNITY RENTALS OFFICE

Students interested in finding their own accommodations in the off-campus community are encouraged to use the resources available through the UCSC Community Rentals Office. Community Rentals maintains online rental listings to assist students in locating rental housing and serves as an information and advising resource.

Locating suitable housing in the Santa Cruz area can take from one to four weeks, depending on specific requirements and restrictions. Average rental rates are available at [housing.ucsc.edu/cro/costs.html](#).

Location: 104 Hahn Student Services (8 a.m. to 5 p.m., Monday through Friday) Information is available on the Web at [communityrentals.ucsc.edu](http://communityrentals.ucsc.edu), and by e-mail at [communityrentals@ucsc.edu](mailto:communityrentals@ucsc.edu).

---

## THE OFFICE OF PHYSICAL EDUCATION, RECREATION AND SPORTS (OPERS)

---

Physical education classes, recreation, sports, and fitness programs at OPERS provide a variety of interesting and challenging activities intended to attract you to becoming an active participant. The emphasis is on giving you an opportunity to develop knowledge, skills, and habits related to wellness that last through a lifetime of enjoyable physical and recreational activity.

Obtain further information about the programs described below from the Office of Physical Education, Recreation, and Sports, located at the East Field House, (831) 459-2531. Web: <http://opers.ucsc.edu>

---

### PHYSICAL EDUCATION COURSES

---

Regularly scheduled courses, which carry no academic credit but are recorded on your transcript, are available in a broad range of physical activities (see [Physical Education](#)). Many classes are small, and all offer expert instruction and carefully designed practice periods so that you can accomplish much in sessions of two to three hours per week. Most activities have intermediate and advanced sections as well as courses for beginners. Subjects offered include swimming, scuba, sailing, rowing, kayak, basketball, racquetball, tennis, volleyball, ballet, folk dance, jazz dance, modern dance, fencing, soccer, tai chi chuan, strength training, fitness and conditioning, yoga, aikido, and tae kwon do. Web: <http://opers.ucsc.edu/>

---

### INTRAMURAL SPORTS

---

The intramural sports program includes competitive leagues, tournaments, and special one-day events. Many of the activities are coeducational. The leagues feature basketball, flag football, dodgeball, indoor and outdoor soccer, softball, indoor and outdoor volleyball, ultimate Frisbee and innertube water polo. Some of the leagues are divided into different skill levels. Special events include a 5-mile run. Prospective participants are encouraged to form their own teams. Individuals looking to be placed on a team are also welcome (but there is no guarantee of team placement). Web: <http://opers.ucsc.edu/intramurals/index.html>

---

### SPORTS CLUBS

---

The sports club program offers a variety of activities depending on student interest. Currently, active clubs

include men's and women's rugby, men's and women's water polo, men's and women's ultimate frisbee; men's soccer, baseball, and lacrosse; coed cross-country and track and field; coed Special Olympics; and coed cheerleading, dance, equestrian, triathlon, disc golf, cycling, sailing, badminton, and fencing. Web: <http://opers.ucsc.edu/sports-clubs/index.html>

---

### INTERCOLLEGIATE ATHLETICS

---

UC Santa Cruz offers the only National Collegiate Athletic Association (NCAA) Division III program in the UC system. As a Division III member, the program offers no scholarships or grants in aid that are based on athletic ability. UCSC sponsors the following intercollegiate sports: men's and women's basketball, soccer, swimming and diving, tennis, volleyball, and cross country, and women's track and golf. For information on teams, rosters, schedules, and the Slug Booster Club, go to [www.goslugs.com](http://www.goslugs.com).

---

### RECREATION PROGRAM

---

The Recreation Program is designed to fulfill the diverse needs and interests of all members of the UCSC community. More than 100 activities, workshops, classes, adventure outings, custom trips, and special events are scheduled quarterly. Other programs include the Experiential Leadership Program, a fun, well-supported training ground to explore new interests, meet new people, build skills, and gain confidence; the Holistic Health Program, which provides integrated training in the healing arts; and the Wilderness Orientation Program, which offers a 10-day Wilderness Orientation (WO) prior to the start of school. WO is an invaluable experience for incoming college students, serving as an introduction to mountain travel and the "journey" of college education. The beautiful settings of the Sierra Nevada provide students an opportunity to form new friendships and discuss their hopes and fears about entering college while learning outdoor skills. No previous backpacking experience is necessary.

The Outdoor Equipment Rental Center offers recreational equipment including surfboards, wetsuits, and high-quality backpacking and camping gear. If you are interested in planning your own outing, contact the Recreation Program Office for assistance. The office has extensive files, and staff members act as consultants, planning with people as well as for them. The office also provides bicycle licensing and offers a free weekly drop-in bicycle maintenance program. Open recreation hours are scheduled quarterly; you are strongly encouraged to use the facilities. Sports equipment may be borrowed without charge. There are also recreation clubs if you are primarily interested in organized recreation and individual performance. Clubs are coed

## Student Life

and feature some combination of recreational participation, advanced instruction, and individual competition. Web:

<http://recreation.ucsc.edu/index.html>

### BANANA SLUG MASCOT

---

The Banana Slug, a bright yellow indigenous gastropod found in the campus's redwood forest, was the unofficial mascot for UCSC's coed teams beginning in the university's early years. In 1981, when some campus teams wanted more organized participation in extramural competition, UCSC joined Division III of the NCAA. Since the application required an official team name, UCSC's then-chancellor polled the student players, and out of this small group emerged a consensus for a new moniker—the sea lions. It was a choice that the chancellor considered more dignified and suitable to serious play than the Banana Slugs. But the new name did not find favor with the majority of students, who continued to root for the Slugs even after a sea lion was painted in the middle of the basketball floor. After five years of dealing with the two-mascot problem, an overwhelming pro-Slug straw vote by students in 1986 convinced the chancellor to make the lowly but beloved Banana Slug UCSC's official mascot.

### FACILITIES

---

To make it convenient for you to utilize campus physical education, recreation, and sports facilities, field houses are located on the east and west sides of the campus. At both the East Field House and the West Field House, you will find the following: gymnasium, tennis courts, outdoor basketball and volleyball courts, and locker rooms. The East Field House also has the Wellness Center, which offers two floors of state-of-the-art cardiovascular and strength-training equipment, a dance studio, the martial arts room, handball/racquetball courts, equipment center, 50-meter swimming pool, half-mile jogging track, and sports fields. An outdoor strength-training and cardiovascular-fitness court is located near the east jogging track. In addition, personal training and drop-in fitness classes are offered through FitLife. More information is available on the [FitLife web site](#).

The UCSC Boating Center is located on FF Dock at the Santa Cruz Small Craft Harbor. The boating program offers PE instruction as well as a boating club with boat usage for students and community members alike. Boating courses are offered for dinghies, 24'–32' keel boats, sea kayaks, and rowing shells. Web: <http://boating.ucsc.edu/>.

### SUSTAINABLE LIVING CENTER PROGRAMS

---

**[Program in Community and Agroecology \(PICA\)](#)**, Program in Community and Agroecology (PICA), an academic program of the Environmental Studies Department, is an experiential living/learning program at UCSC. Students use agroecology principles in the maintenance of a half-acre organic garden, work together to develop community projects, and share in the many aspects of sustainable living—by harvesting, cooking, and eating healthy food grown organically right next to their rooms. Through a unique collaboration that integrates classroom instruction and community-based experience, PICA has become a model experiential learning program that allows students to practice sustainability at a hands-on level. All UCSC students are invited to come and participate in PICA activities such as sustainability workshops and garden workdays. For further information, please visit the [PICA web site](#).

**On-campus living at PICA.** The PICA residential program offers students an alternative to traditional on-campus living. At the Village in the Lower Quarry, students from across academic disciplines come together to create a sustainable living environment on campus. PICA residents grow organic food at the nearby Foundational Roots Garden, come together to share in weekly community meals, and manage a Village-wide composting program. This living/learning experience allows students a way to link healthy communities with healthy food systems.

**Friends of CAN (FoCAN)** is a UCSC student organization affiliated with the Community Agroecology Network (CAN), a nonprofit organization that works with partner communities in rural Mexico and Central America to develop self-sufficiency and sustainable farming practices. CAN promotes integrated approaches to sustainable community development as a means to sustain rural livelihoods and environments through three programs: Action Education, Trade Innovations, and Action Research Initiatives. CAN's Field Study opportunities, intercultural exchanges, research, and the annual Agroecology Shortcourse inspire action for environmental sustainability and social justice.

**Field Studies.** The CAN Field Study program provides college students and recent graduates the opportunity to live and learn in rural Mexico and Central America. It offers students a realistic first step in doing international work that focuses on environmental sustainability and social justice. In developing close relationships with a rural community and working with them on a project, students come to understand the complexity and satisfaction of engaging meaningfully in international community development. CAN also offers

## Student Life

local internship and volunteer opportunities to students interested in engaging with community projects connected to CAN's international partners in Mexico and Central America.

Together PICA and FoCAN facilitate hands-on learning activities that engage students with all aspects of a sustainable food system—from growing organic food that supports local communities to conscious consumerism on a global level.

---

### STUDENT-RUN COOPERATIVES

---

#### KRESGE FOOD CO-OP

---

**Mission statement:** “We are a group of students whose goal is to run a natural food store through consensus decision-making and group responsibility. We embrace cooperation as our tool for social change. We are not for profit; we are for collective power. As a cooperative business we seek to educate all members of the community, including ourselves. We use our buying power to reflect our ideals regarding ecological, social, and political issues. For this reason we carry healthful, locally based, cruelty-free, organic products. We focus on products that are good for the earth, the people who produce them, and the people who consume them. Open to all, we provide a space where good food and revolutionary action meet at the checkout line.” Call (831) 426-1506 for more information.

#### BIKE CO-OP

---

The Bike Co-op is student owned and operated, run cooperatively, and nonprofit. Whether you need to purchase a bike, repair a bike, or want to learn, the co-op can accommodate your needs. People are encouraged to attend meetings, learn more about cooperatives, and get involved. The Bike Co-op is located at the Student Union. Note: this building may be under construction during the 2015–16 year. Please call for updates and possible temporary location. **Note:** this building may be under construction during the 2015–16 year. Please call for updates and possible temporary location. For information, come by or call (831) 457-8281.

---

### TRANSPORTATION AND PARKING SERVICES (TAPS)

---

The UC Santa Cruz campus is designed to preserve the natural beauty of our magnificent setting and strives to minimize automobile traffic and congestion. Because parking is such a limited resource, the majority of campus parking spaces are available only to commuting students, faculty, staff, and visitors. **UCSC has a parking prohibition for first and second year residential students;** students with fewer than 90

units who live in university housing facilities are not eligible to purchase a campus parking permit. Parking regulations are strictly enforced; all students who bring a car to campus must purchase a permit in advance. UCSC requests that students not bring vehicles to campus if they are not eligible to purchase an on-campus parking permit. For additional information, visit [the TAPS web site](#).

#### TRANSPORTATION OPTIONS

---

**Airports and Long-Distance Bus Service:** The nearest commercial airport is in San José, approximately 35 miles from Santa Cruz. The San Francisco Airport is about 70 miles from campus. Both airports are accessible by commercial van and limousine services. Santa Cruz is also served by commercial bus lines on a regularly scheduled basis.

**Campus Transit:** On-campus buses and paratransit services are provided on a no-fare basis; these services are supported by the mandatory Student Transit Fee. TAPS buses operate on campus from approx. 7:30 a.m. to 11:30 p.m. Monday through Friday, and from 6:00 p.m. to 11:30 p.m. on weekends. TAPS also operates a Night Owl service to transport UCSC affiliates between the campus and downtown Santa Cruz. The Night Owl operates until 1:15 a.m. Sunday through Thursday, and until 2:50 a.m. on Friday and Saturday.

**Metro Buses:** Santa Cruz Metro Transit District is the bus service provider for Santa Cruz County. Metro operates over 35 bus routes throughout the county, including six routes to and from UC Santa Cruz. UCSC students can ride Metro buses throughout the county by showing a student ID card with a current quarter validation sticker; no additional fare is required to ride.

**Bike Program:** TAPS offers a variety of programs to support those who choose bicycles as their main mode of travel, including over 3,500 bike-rack spaces, bike "fix-it" stations, free weekly bike repair and maintenance clinics, free (required) bike licensing, and morning bike shuttles that run from two off-campus locations up to campus. Popular student-run bike services include the Bike Library (where you can borrow a bike on a quarterly basis for free) and the Bike Co-op (a not-for-profit, full-service bike shop located near the Bay Tree Bookstore).

**Car Sharing:** Zipcar is a membership-based car share program that allows students 18 and over to rent cars on campus on an hourly or daily basis. Use fees start at \$7.50 per hour and include all vehicle fees, gas, insurance, mileage, and reserved parking on campus. Members have access 24 hours per day to 21 vehicles—11 on campus and 10 at other nearby Santa Cruz

locations. For detailed information, visit <http://www.zipcar.com/ucsc>.

**Ridematching:** Zimride is a social networking ridematching program exclusive to the UCSC community. You can find someone to share your regular commute or one-time trip through Zimride, even if you don't have a car—just post the ride you need. If you have a car, you can share your Zipcar trip with others and save on costs. For more information, go to <http://zimride.ucsc.edu>.

**Walking:** UC Santa Cruz is one of the most beautiful campuses in the world, and the best way to experience it is on foot! Walking is the single most sustainable means of getting around (and often the most direct way, as well) so be sure to bring a pair of sturdy walking shoes. A walking map of the campus is provided to all new students.

---

## STUDENT HEALTH SERVICES

---

Located on McLaughlin Drive across from Colleges Nine and Ten, the Student Health Center provides quality health care focused on the particular needs of students. All registered students have access to the Student Health Center regardless of their insurance plan, as services are partially supported by their Student Services fee. Care is provided by board-certified physicians, nurse practitioners, and physician assistants. Students can be seen by appointment or, in cases of acute illness or injury, on the same day at the Same Day Clinic. In case of emergencies, either during the day or after normal operating hours, please call 911. In addition, the Student Health Center offers counseling and psychiatry services, nutritional counseling, health promotion, x-ray, laboratory, optometry and pharmacy services on site. The center is open weekdays during the regular academic year. For summer services and hours, visit the Student Health Center's web site. For more information, visit the [Student Health Center web site](#), or e-mail [healthcenter@ucsc.edu](mailto:healthcenter@ucsc.edu).

---

## STUDENT HEALTH INSURANCE

---

To ensure that emergencies and other health care costs do not interfere with a student's education, all University of California students are required to carry medical insurance. A comprehensive and affordable program specifically designed for students is available through the university via the University of California Student Health Insurance Plan (UC SHIP). All students are automatically enrolled in UC SHIP and billed quarterly through their student account, unless they choose to waive this coverage by providing proof of suitable insurance by the specified deadline. For detailed information regarding insurance coverage and

the waiver process, visit <http://healthcenter.ucsc.edu/billing-insurance/index.html>. You may also contact the insurance office at [insure@ucsc.edu](mailto:insure@ucsc.edu) or (831) 459-2389.

Fees will be assessed for most visits for students without UC SHIP.

---

## MANDATORY HEPATITIS B IMMUNIZATION

---

California state law mandates that all entering students under 19 years old must be immunized against Hepatitis B. These students are required to provide the Student Health Center with documentation proving their compliance with this law. Those not in compliance at the beginning of the quarter may be dropped from their classes. For more information, visit [healthcenter.ucsc.edu](http://healthcenter.ucsc.edu) or call (831) 459-2211.

---

## STUDENT HEALTH OUTREACH AND PROMOTION (SHOP)

---

SHOP is UC SantaCruz's destination for health-related information, conversation, and self-exploration. It's the place for students to learn about health and wellness in a safe, non-judgmental environment. SHOP does not tell people what we think they should or shouldn't do. We help students do what they choose to do in the safest way that they can.

SHOP offers information, education, resources, and support on issues related to alcohol and other drug use; sexuality and sexual health (including HIV and other sexually transmitted infections); safer sex; unplanned pregnancy and contraception; and sexual assault and violence prevention. Students can get involved with SHOP by becoming peer educators, HIV test counselors, volunteers for the Condom Co-op, and/or CUIP interns.

---

## Alcohol and Other Drug (AOD) Education

---

SHOP empowers students to reduce risks related to substance use/abuse. Students can meet with staff confidentially to discuss their personal AOD involvement, discuss concerns about friends or family members, obtain educational materials, participate in workshops, and access resources for students in recovery. Educators provide formal and informal sessions and workshops for students, college residential staff, and other campus groups. Staff also serve on the campuswide AOD Advisory Committee, which develops, implements, and assesses policies. For information call (831) 459-1417 or visit the [SHOP web site](#). **NOTE:** In January 2014, UC Santa Cruz implemented a campuswide smoke and tobacco-free policy.

---

## HIV and Other Sexually Transmitted Infection (STI) Prevention

---

## Student Life

SHOP offers many resources for promoting sexual health, including:

- Free, anonymous HIV testing with Orasure (no needles) provided by student peer test counselors. Results in 20 minutes.
- The Condom Co-op, selling safer sex supplies at reduced cost.
- Workshops, activities, and events.
- Sexual health questions? SHOP has many resources.

### **Sexual-Assault Facts and Education (S.A.F.E.)**

The Sexual Assault Facts and Education program at the Student Health Center provides confidential support, information, and resource referrals to survivors of sexual violence, dating violence, and stalking. An experienced sexual violence prevention educator and advocate is available for individual appointments and provides nonjudgmental support for those who have experienced sexual assault, dating violence, or stalking. These resources are also available for their friends and loved ones. The sexual violence prevention educator and advocate is certified as a crisis counselor by the state of California and can be reached at (831) 459-1053. Police officers are available 24 hours a day, as are emergency phones, guards at campus entrances from 8 p.m. until 3 a.m., and frequent shuttles and buses.

Since 1979, UCSC has actively addressed issues related to sexual violence on campus. Students are required to take an online education course and to attend educational presentations that encourage respect, responsibility, and bystander intervention among students. Workshops are organized in the residence halls, and a variety of educational resources are available for all students.

SHOP is located at the Student Health Center. For more information, visit the [SHOP web site](#), call (831) 459-3772 or e-mail [shop@ucsc.edu](mailto:shop@ucsc.edu).

### **COUNSELING AND PSYCHOLOGICAL SERVICES**

Counseling and Psychological Services (CAPS) offers a range of professional services to undergraduate and graduate students seeking help with personal concerns. We provide assistance for students with academic and personal stress, relationship and family issues, drug and alcohol problems, psychological problems, and crisis situations. Psychiatry services include diagnostic evaluations or prescribing of medication in certain situations. Depending on a student's needs, a student may be provided with brief individual or couples counseling, group counseling, psychiatric services, crisis intervention, or a referral for open-ended or long-term therapy off campus. Information provided to any

CAPS professional staff member is confidential within the student health center and cannot be released without a student's permission except in specific circumstances involving risk and safety. All services are aimed at helping a student gain greater personal effectiveness and academic success. Professional staff members are available at various locations on campus, including the Student Health Services building, the colleges, the Academic Resource Center, and Family Student Housing. Emergency on-site crisis services and after hours crisis services are also available.

Staff members are available to provide consultation to staff, faculty, individuals, or family members for assistance in helping students in distress. Counseling psychologists can also provide trainings and programs on a variety of mental health topics, stress and coping skills, multicultural issues, and organizational development.

For more information visit the [Counseling and Psychological Services web site](#) or call (831) 459-2628.

---

## RESOURCE CENTERS

---

### **AFRICAN AMERICAN RESOURCE AND CULTURAL CENTER (AARCC)**

---

The African American Resource and Cultural Center (AARCC) develops and fosters co-curricular initiatives that promote academic success, leadership training, student development, and social engagement. Since the center's inception in 1991, the program's primary mission has been to serve as a key resource to acclimate students to general campus life and academic culture. In addition, the program provides advocacy and support in helping to monitor students' academic progress and subsequent achievement of their educational goals. AARCC works closely with overall campus outreach efforts to enhance the recruitment and retention of students who self-identify within the African diaspora.

AARCC hosts a number of topical groups to allow for engagement and interaction, such as Sisters' Corner and Black Men's Initiative. Other student organizations that AARCC works closely with include (but are not limited to) National Society of Black Engineers (NSBE), African/Black Student Alliance (A/BSA), African American Theater Arts Troupe (AATAT), African Student Union (ASU), Black Sistas United, (BSU) Black Men's Alliance (BMA), Destination Higher Education (DHE), Rainbow Theatre, Rosa Parks African American Theme House (R.PAATH), Delta Sigma Theta Sorority (DST), Black And Queer Questioning (BLAQQ), Black Campus Ministries (BCM), and UMOJA.

## Student Life

AARCC works collaboratively with various campus units/departments and in the surrounding community to enhance cultural and ethnic diversity initiatives on the UCSC campus. The center is located on the third floor of the Bay Tree Building in Quarry Plaza, and is open Monday through Friday from 8 a.m. to 5 p.m. For more information, call (831) 459-2427, fax (831) 459-2469, e-mail [aarcc@ucsc.edu](mailto:aarcc@ucsc.edu) or visit [the AARCC web site](#).

### AMERICAN INDIAN RESOURCE CENTER (AIRC)

The American Indian Resource Center (AIRC) works in collaboration with other resource centers, faculty, staff, students, and organizations such as the Student Alliance of North American Indians (SANAI), the University of California American Indian Counselors/Recruiters Association, the Amah Mutsun Tribal Band of California Indians, as well as the indigenous tribal community leaders of the region to develop co-curricular programming, cultural activities, and events that assist public understanding of native peoples. Invested in creating a campus climate that supports all students, the center provides leadership development, internship opportunities, mentoring, and personal and academic advising. The AIRC is located on the third floor of the Bay Tree Building in Quarry Plaza. For more information, call (831) 459-2881, e-mail [airc@ucsc.edu](mailto:airc@ucsc.edu), or visit [the AIRC web site](#).

### ASIAN AMERICAN/PACIFIC ISLANDER RESOURCE CENTER (AA/PIRC)

The Asian American/Pacific Islander Resource Center (AA/PIRC) provides and enhances opportunities for education and dialogue on issues affecting Asian Americans and Pacific Islanders, as well as opportunities for leadership development and community building. AA/PIRC aims to address students' multiple and diverse academic, social, cultural, and other co-curricular needs through programs and services. Programs include Asian American/Pacific Islander Heritage Month, Year-End Ceremony for graduating seniors, topical workshops, performances, and presentations by community leaders. Students also gain professional experience through AA/PIRC-sponsored academic and paid internships.

AA/PIRC is located on the third floor of the Bay Tree Building at the Ethnic Resource Centers. Add your e-mail address to AA/PIRC's listserv to receive campus and community announcements. For more information, call (831) 459-5349; e-mail [aapirc@ucsc.edu](mailto:aapirc@ucsc.edu); or visit them on [Facebook](#), or see the [AA/PIRC web site](#).

### CHICANO LATINO RESOURCE CENTER (EL CENTRO)

The Chicano Latino Resource Center (El Centro) is a hub of organized activities and resources that support Chicano and Latino student transition, retention, and academic advancement at the university. Through collaborative efforts with campus partners, students can participate in a host of activities that encourage intellectual growth, leadership development, preparation for graduate or professional school, and career options. El Centro encourages and supports student and community development through cultural and educational programming. Annual programs include the following: New Student Welcome Program; Día De Los Muertos; Pachanga; César Chavez Convocation; dialogue on academic, social, cultural, and personal issues that affect the Chicano and Latino community; and a weekly online newsletter, CHISME E-news. El Centro offers student internships that support leadership-skills development while students help to organize events and activities. For more information or to schedule an appointment, call (831) 459-5806 or e-mail [elcentro@ucsc.edu](mailto:elcentro@ucsc.edu). Web: [the El Centro web site](#).

### GAY, LESBIAN, BISEXUAL, TRANS\*, INTERSEX (GLBTI) RESOURCE CENTER

The Lionel Cantú Gay, Lesbian, Bi, Trans\*, Intersex (GLBTI) Resource Center (aka the Cantú Queer Center), housed in a beautiful cabin in a redwood glen near Crown and Merrill Colleges, is a friendly, welcoming space for the entire community. The center's mission is to provide educational, psychosocial, advocacy, and supportive services to students, staff, faculty, and alumni on GLBTI issues. The Cantú Queer Center is home to several student organizations that meet weekly; a host of exciting programs; the GALA art gallery; and a library offering 3,000 books, magazines, and films. Information and referral to campus and community resources is available by phone or in person. Throughout the year, the Cantú Queer Center coordinates student programming with a queer focus—beginning with National Coming Out Day in the fall and culminating in the Rainbow Graduation Ceremony in the spring. Education of the entire campus population is another function of the resource center; the Cantú Queer Center's professional staff members offer workshops/trainings for groups, classes, and dorms on a range of GLBTI topics. Everyone is welcome to use the center's cozy lounge, full kitchen, and computer corner to study, relax, socialize, and become involved in the campus's queer community. The center is open Monday through Friday; usual hours are 9 a.m. to 5 p.m. Stop by and meet the center's friendly, knowledgeable staff.

## Student Life

Come discover why UCSC has been consistently rated one of the best-of-the-best universities for queer students! You can reach the center at (831) 459-2468 or via e-mail at [queer@ucsc.edu](mailto:queer@ucsc.edu). The [center's web site](#), provides an overview. Self-subscribe to QConnect, the center's e-newsletter and calendar, on the site's home page.

### WOMEN'S CENTER

---

**Note:** The Women's Center's temporary location (until January 2016) is at the Granary, near the main UCSC entrance, across from the Barn Theater. The center's permanent location is at Cardiff House, an historic farmhouse between the Carriage House and UCSC Police Department

The Women's Center is devoted to helping students maximize their academic and personal success at UCSC. The center is a student-run community-service resource center that creates and sponsors student-oriented programs, workshops, writing collectives, support groups, and discussions throughout the academic year on topics ranging from women's leadership and empowerment, gender and sexuality, race and culture, sexual assault, domestic violence, healthy sexuality and relationships, positive body image, health and wellness, and much more. Resource referrals and informal advising are also available.

Students can get involved in Women's Center annual programs, such as Domestic Violence Awareness Month, Sister Solidarity (Women's Heritage Month), Take Back The Night, Sexual Assault Awareness Month, and can also collaborate on programs and projects with the support and mentorship of staff.

Other opportunities for involvement include internships, work-study jobs, volunteering, and independent study. The Center is the ideal space to study, relax, and connect with students, staff, faculty, and community members.

For more information call (831) 459-2072, e-mail [women@ucsc.edu](mailto:women@ucsc.edu), or visit the [Women's Center web site](#). Women's Center hours are Monday through Friday, 9:00 a.m. to 5:00 p.m.

---

### THE STUDENT UNION

---

**NOTE:** The Student Union may be under construction during the 2015–16 year. Please call for updates and possible temporary locations.

The Student Union is a student-governed facility where students can take a break and lounge, play pool or ping-pong, use computers, meet, or watch television. Located in the Quarry Plaza across from the Bay Tree Bookstore, the Student Union complements college facilities by

providing a centrally located place for social, recreational, and educational gatherings for all students and members of the campus community.

The Student Union is also home to the campuswide student government (Student Union Assembly) and student organizations, the Bike Co-op, Engaging Education, and Student Organization Advising and Resources (SOAR).

The Union is open Monday through Thursday 9 a.m. to 9 p.m., Friday 9 a.m. to 6 p.m. The Union is closed holidays and quarter breaks. For more information, call (831) 459-3167.

---

### STUDENT ACTIVITIES

---

#### CAMPUSWIDE STUDENT ACTIVITIES: SOMECA

---

SOMeCA brings together three dynamic areas of campuswide student engagement: Student Organization Advising and Resources (SOAR), Student Media, and Cultural Arts and Diversity. The organizations and programs of SOMeCA offer students a place of self-discovery. SOMeCA's professional and experienced staff offers instruction, mentorship, leadership training, organizational development advising, and project management to all students. Visit: <http://someca.ucsc.edu>.

#### STUDENT ORGANIZATION ADVISING AND RESOURCES (SOAR)

---

UCSC offers the student body over 150 student-initiated organizations, including cultural, social, political, religious, academic, ethnic, and environmental organizations, as well as fraternities and sororities. Participating in a UCSC student organization provides valuable experience in leadership and teamwork and develops a network of rewarding and lifelong friendships.

UCSC student organizations govern large-scale and established programs. For example, student leaders host high school students to encourage and support their entrance into college. Others produce major campuswide events to raise funds for cancer research and local community nonprofits. Performing arts organizations perform at conferences and competitions across the country. These are just a few examples of organization experiences that contribute to UCSC students becoming more self-directed, connected, and successful in pursuing their studies and careers.

Student organization membership is open to all UCSC students. Learn more at the Student Organization Advising and Resources (SOAR) office. Contact SOAR at (831) 459-2934, e-mail [soar@ucsc.edu](mailto:soar@ucsc.edu), or visit [the](#)

## Student Life

[SOAR web site](#). SOAR is located on the second floor of the Student Union.

### STUDENT MEDIA

---

Student Media at UC Santa Cruz include 20 print publications and campus Student Cable Television (SCTV). Every year, hundreds of students enrich their educational experience through internships, academic credit, fellowships, and employment opportunities with media organizations.

The award-winning student newspaper of record, CITY ON A HILL PRESS, covers campus and local news, sports, music, and offers art reviews and commentary. FISH RAP LIVE! provides an alternative forum for free expression of ideas, humorous coverage of local and campus events, and personal journalism. TWANAS, the Third World and Native American Students Press Collective, publishes a newsmagazine that seeks to broaden awareness of perspectives of color in the campus community. Other campus magazines include the critical film journal, EYECANDY; LEVIATHAN JEWISH JOURNAL; and GAIA, which focuses on environmental issues; and the DISORIENTATION GUIDE. Annual literary journals include Chinquapin, Red Wheelbarrow, ALAY, and Matchbox.

Artistic, narrative, experimental, documentary, news, and public-service film and video are produced by broadcast organizations, including Banana Slug News, Rainbow TV, Film Production Coalition, On the Spot, and others. Many of the participating students are affiliated with UCSC's Film and Digital Media major; however, students from all disciplines are encouraged to participate.

To contact student media organizations, call the Student Media Center at (831) 459-2840 or SCTV at (831) 459-5360. Visit the [Student Media web site](#) for links to print, radio and broadcast organizations.

### CULTURAL ARTS AND DIVERSITY (CAD)

---

Cultural Arts and Diversity (CAD) strives to enhance the cultural climate of UCSC and its surrounding community by celebrating diversity. CAD fosters the spirit of unity between cultures by providing students with outlets for the creative talents of various cultures through theater, lectures, presentations, and productions. By promoting access to resources and services that support these endeavors, CAD strives to provide cultural awareness and diversity, build collaborative partnerships and community outreach, enhance retention and recruitment efforts, and provide opportunities for leadership and educational development. The Cultural Arts and Diversity Center promotes the following programs:

- African American Theater Arts Troupe
- Rainbow Theater
- Rainbow/African American Theater Arts Troupe Outreach
- Classes offered through Theater Arts and Stevenson College

Contact the CAD Office at (831) 459-1861 or visit the web site at: [CAD web site](#).

## UC SANTA CRUZ AND SYSTEMWIDE STUDENT GOVERNANCE

---

UC Santa Cruz offers a wide variety of opportunities to participate in university governance at the college, campus, systemwide, and national levels. Regardless of what level you choose, participating in student government provides a wonderful opportunity to practice leadership skills, meet others who share your interests, and learn a great deal about yourself and the university.

### STUDENT UNION ASSEMBLY

---

The Student Union Assembly (SUA) is the undergraduate advocacy organization and the official student voice of UC Santa Cruz. It comprises three representatives from each college government; six elected officers (chair, internal vice chair, external vice chair, organizing director, commissioner of academic affairs, and commissioner of diversity); and one appointed representative from each of the following student organizations that represent historically underrepresented people within the UC system: African/Black Student Alliance; Asian Pacific Islander Student Alliance; The Queer Student Union; Movimiento Estudiantil Chicano de Aztlan; Student Alliance of North American Indians; and Ethnic Student Organization Council. The SUA also provides paid part-time internship opportunities for students each year. These internships include, but are not limited to, field organizers, treasurers, outreach and publicity, and strategy and planning.

The SUA conducts open meetings every Tuesday at 6 p.m. throughout the academic year. Students interested in advocacy, activism, and politics, as well as those concerned with their own and their friends' lives, are invited to get involved. The assembly operates via issue-specific campaigns and around general campus concerns. In the past, the SUA has formed campaigns around fighting fee hikes, defending affirmative action, saving financial aid on a national and state level, striving for reasonable campus growth, and reforming UC Regents' procedures. Current issues have been fighting to make a UC education affordable, fighting to stop balancing budgets on the backs of students,

## Student Life

fighting for the rights of UC workers, and working with community groups because UCSC students are also Santa Cruz residents. The SUA also works with the UC Student Association and the United States Student Association on system, state, and national issues. For more information, visit the [SUA web site](#).

### SYSTEMWIDE STUDENT GOVERNMENT: UCSA

---

The UC Student Association (UCSA) is the statewide association of graduate and undergraduate student governments from the 10 UC campuses. UCSA is the officially recognized voice of the students to the UC Board of Regents, various UC administrative offices, and the UC Office of the President. Issues covered by UCSA include UC fees and financial aid, comprehensive admissions policies, and academic policies, as well as broader issues of social responsibility such as environmental concerns and civil rights. UCSA coordinates the yearly selection of the UC Student Regent.

The SUA external office provides grassroots membership and support for the two main UCSA offices in Oakland and Sacramento. The campus office organizes students to run the grassroots campaigns that are adopted each summer during the UCSA Congress. At this session, delegates from the 10 UC campuses come together and choose the critical issues to be worked on for the next year. Issues in the past have included voter registration drives, letter-writing campaigns on particular UC issues, and increases in financial aid. UCSA provides a thorough introduction to UC politics and student representation. Students may also serve on systemwide committees through UCSA and gain a wide knowledge of the entire UC system through their service.

Two officers help to coordinate UCSA activities on our campus. The external vice-chair (EVC) is the official representative to the UCSA Board of Directors. This position has voting rights for UCSC, is the primary contact regarding all UCSA issues, and coordinates all lobbying of UCSA and local, state, and federal governments on behalf of UCSC students. The organizing director (OD) coordinates with the EVC to effectively run the grassroots campaigns that are sponsored by UCSA every year. These positions are elected for one-year terms during spring quarter every year.

The Student Union Assembly's executive vice chair may be contacted at [suaevc@ucsc.edu](mailto:suaevc@ucsc.edu).

### COLLEGE STUDENT GOVERNMENTS

---

Each college has its own form of student government, enabling students to gain experience in planning,

budgeting, implementing, and evaluating a wide range of college programs and policies. Like the colleges themselves, each college governing body has its own character, structure, and meeting times and dates. For information, inquire in your college office or talk to our college programs coordinator.

### THE GRADUATE STUDENT ASSOCIATION (GSA)

---

The Graduate Student Association (GSA) provides governance and representation for graduate student interests with regard to tuition and fees, health insurance, parking, on-campus housing, and other important issues. The current key goals of the GSA is to work with administration to close the stipend gap, obtain guaranteed funding for normative time, establish affordable and dignified housing, and to shift the current campus climate in order to provide more support for underrepresented and marginalized graduate students. The GSA makes available quarterly travel grants for graduate students attending conferences or traveling on thesis-related research. The GSA also organizes and co-sponsors events campuswide, in addition to offering annual graduate student and solidarity orientations. The GSA is strongly committed to working toward intellectual and social diversity, including advocating for and working with underrepresented groups at the university. The GSA meets bi-weekly to strategize around and discuss issues impacting graduate students. For more information, contact the GSA ([GSA web site](#)), or visit our office at the Graduate Student Commons.

### STUDENT REPRESENTATION ON CAMPUSWIDE COMMITTEES

---

Serving on a campus advisory committee is a recognized channel for student involvement in the university's decision-making processes. Advisory committees, composed of faculty, staff, and student representatives, are established to develop and recommend policies on a wide range of topics. Each year the Student Committee on Committees (composed of one student appointed by each college and chaired by the Internal Vice-Chair of the Student Union Assembly) nominates more than 100 students to serve on over 50 administrative and Academic Senate committees. For information about the selection process, see the [Student Union Assembly web site](#).

---

## COMMUNITY SERVICE OPPORTUNITIES

---

Community service is a vital part of the university's mission. It is possible for individual students, as well as campuswide student organizations, to develop service projects that link the university with the broader Santa

Cruz community. With the financial support of the campus' Community Service Project funding, students have aided local groups such as Students Toward Achievement in Writing Success, the Strange Queer Youth Conference, and the Walnut Avenue Women's Center.

The Student Volunteer Center, located in the Dean of Students Office at Hahn Student Services, connects students with local volunteer opportunities based on skills and interest. Volunteer opportunities range from aiding youth and elderly to addressing homelessness and environmental issues. The Student Volunteer Center also sponsors events for the campus community where students can volunteer their time.

For more information about service opportunities, see the web site [volunteer.ucsc.edu](http://volunteer.ucsc.edu) or contact the Student Volunteer Center at (831) 459-3364 or e-mail [volunteer@ucsc.edu](mailto:volunteer@ucsc.edu).

---

## CAMPUS CULTURAL PROGRAMS

---

Throughout the year, UCSC offers frequent and varied cultural opportunities. Students, faculty, and staff may participate as audience members, performers, or behind-the-scenes support crew. The considerable range of offerings includes art exhibits, lectures, films, concerts, recitals, and dance and drama presentations; programs vary from single performances to weeklong cultural celebrations. The colleges host a number of events, and the departments frequently engage speakers of particular academic interest to address the campus community or present lecture-demonstrations.

The Arts Division serves as a gateway to the entire university, presenting high-quality research and work by faculty, students, and guest artists. Art exhibitions, film screenings, digital arts presentations, music recitals, as well as several theater, dance, and music presentations, are offered in conjunction with the academic programs. In addition, the Arts Division offers regular public lectures and colloquia to introduce audiences to professional practitioners and scholars in the traditional and digital arts.

In addition to attending Arts Division activities, UCSC students are invited to participate in a wide variety of activities open to all UCSC students. Join an Indonesian gamelan ensemble, sing in the UCSC Concert Choir, play in the UCSC Orchestra, or audition for a theater or dance production.

For up-to-date information about cultural offerings from the Arts Division, contact the Arts Division Events Office at (831) 459-2787 and visit online at [arts.ucsc.edu](http://arts.ucsc.edu) and on [Facebook](https://www.facebook.com/ucscarts).

---

## BAY TREE BOOKSTORE

---

UCSC's Bay Tree Bookstore is located in the Quarry Plaza complex in the center of campus, at the intersection of Hagar Drive and Steinhart Way. The bookstore serves as the campus resource for UCSC course materials, including new and used course books and customized faculty publications; general reading and reference books; a wide variety of school and personal supplies (including computers and computer supplies); and many other items such as residence hall living needs, small appliances, backpacks, emblematic apparel, art supplies, posters, gifts, greeting cards, testing supplies, and academic regalia. Services include online reservations for course materials, textbook rentals, student debit accounts, special ordering of books, book buyback services, fax services, and limited check cashing. The bookstore also houses the campus's convenience store (the Express Store) and Student ID Card Services. For more information, call (831) 459-4544, or see the [Bay Tree Bookstore web site](http://baytreebookstore.ucsc.edu).

---

## CHILD CARE AND EARLY EDUCATION SERVICES

---

Child Care and Early Education Services offers programs for children of students currently enrolled in classes at UCSC. All of our centers are conveniently located on campus near the West Entrance. Free or low-cost tuition rates are available for students who meet the eligibility requirements for subsidized care (please see Eligibility for State Funding Chart at [childcare.ucsc.edu](http://childcare.ucsc.edu). All meals are included in the program (breakfast, lunch, and afternoon snack).

Our programs are dedicated to providing the highest quality developmental care possible in a secure, homelike environment characterized by warmth, affection, and support. The classrooms stress the importance of meeting children's needs in all areas of development: social, emotional, physical, cognitive and creative. The curriculum emphasizes play as a learning process and provides environments that are rich and challenging.

Programs are open to all children without regard to religion, color, ethnicity, gender, and physical or mental ability. All of our centers are located in the Family Student Housing Complex. Each of our centers are open most days during the academic year from September through June, and closed during the summer months, administrative and university holidays, and staff development days. In addition, Early Education Services will run a modified program during the summer months. All of the child care spaces are provided for children of student families only. The majority of the

## Student Life

spaces are reserved for students who meet the qualifications for subsidized care. Fee-for-service spaces at a below market rate may be available for student families whose income exceeds state-subsidy requirements.

Information about programs, fees, and applications is available at [childcare.ucsc.edu](http://childcare.ucsc.edu) and at the Early Education Services Office in the Community Building at Family Student Housing; at (831) 459-2967, or by e-mail at [earlyeducation@ucsc.edu](mailto:earlyeducation@ucsc.edu).

---

### INFANT CENTER

The Infant Center serves 12 children ages 11 to 24 months. Small groups, low child-to-adult ratios, and primary caregivers ensure consistent and nurturing care. The hours of operation are 7:30 a.m. to 6:15 p.m.

---

### PRESCHOOL CENTER

There are three preschool classrooms that serve a total of 36 children from 24 months until they enter kindergarten. Each classroom provides small groups with low child-to-adult ratios, and an environment that provides a stimulating and rich curriculum, which helps prepare children for kindergarten. The hours of operation are 7:30 a.m. to 6:15 p.m.

---

### SCHOOL AGE CENTER

The School Age Program serves 16 children. It operates as an after-school recreation program during the academic year. The program provides developmentally appropriate arts and crafts, life skills and sports activities, occasional community outings and quiet time for homework. The hours of operation are 12 noon to 6:15 p.m. for kindergarteners; and 2:30 p.m. to 6:15 p.m. on Mondays, Tuesdays, Thursdays, and Fridays for 2nd through 5th graders. On Wednesdays (public school minimum days), care is available from 12 noon to 6:15 p.m. for all school-age children. Extended care is available on a sign-up basis on some Santa Cruz City Schools closure days (university closure days excluded).

---

## UCSC ALUMNI ASSOCIATION

---

UCSC's graduates—more than 96,000 of them—can maintain a lifelong connection to the campus through the UCSC Alumni Association. Through the dues they pay, Association members contribute to the living-learning environments at each college and the enrichment of the entire campus. Membership dues directly support student programs, special activities, and other projects at the colleges and campuswide.

The association sponsors programs that engage and reconnect alumni with each other and the campus, fostering the banana slug network. Hundreds of alumni

return to campus during the annual Alumni Weekend to enjoy receptions, tours, panel discussions, and other programs through which they reconnect with old friends, faculty, and students. Thousands more reconnect through the Online Alumni Directory. Many alumni also reconnect at regional events across the country and through association-sponsored affinity groups.

The Alumni Association also connects alumni and students through career programs. Alumni act as career mentors online and in person at the annual Multicultural Career Conference and similar events. The association promotes excellence at UCSC by making annual awards. It supports students by offering two types of scholarships (college service and financial need), and enriches campus and college intellectual life through its Distinguished Visiting Professor program and endowment.

The Alumni Association, in partnership with other UC Alumni Associations, brings politically minded graduates to Sacramento for an annual legislative conference aimed at increasing support for UC.

Information about the Alumni Association is available by contacting us at 1156 High Street, Santa Cruz, CA 95064, locally at (831) 459-2530, toll-free at (800) 933-SLUG, via e-mail at [alumni@ucsc.edu](mailto:alumni@ucsc.edu), and on the web: [Alumni Association web site](http://Alumni Association web site).

---

## UNIVERSITY INTERFAITH COUNCIL

---

The University Interfaith Council (UIC) seeks to integrate spirituality with academic life and to promote tolerance, peace, and understanding of all faiths and spiritual traditions. The UIC is open to all religious groups. Programs include celebrations and interfaith gatherings; educational events, including religious study courses; community service; worship/meditation; and spiritual care and counseling for students, faculty, and staff. The UIC strengthens a campuswide sense of spirituality and increases awareness of options for spiritual life on campus. For more information on University Interfaith Council events and discussion boards, visit the [UIC web site](http://UIC web site).

Revised: 09/01/15

---

## THE COLLEGES

---

### 2015-16 General Catalog

UC Santa Cruz combines the resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. Each college is a vibrant living/learning community supported by faculty and staff who provide academic support, organize student activities, and sponsor events that enhance the intellectual and social life of the campus. The colleges are committed to fostering a nurturing and academically thriving environment for students of all backgrounds. Each college strives to promote the attributes of a diverse and multicultural community in its own unique way.

In order of founding, the colleges are [Cowell](#), [Stevenson](#), [Crown](#), [Merrill](#), [Porter](#), [Kresge](#), [Oakes](#), [College Eight](#), [College Nine](#), and [College Ten](#). Self-contained and architecturally distinct, each college is a relatively small community of 30 to 110 faculty members and between 1,400 and 1,700 students, about half of whom live on campus. Each college has its own housing, as well as academic and recreational programming, and each is an integral part of the larger campus. The colleges have their own academic emphases and cultural traditions, although each seeks faculty and students from a variety of disciplines to foster broad intellectual interests. The colleges play a primary role in academic advising and are the center of student life. Students graduate from their college. At the same time, all university academic programs, resources, and student services are open to students of every college.

All undergraduate students are affiliated with one of our 10 colleges, their home within the larger university. During the process of accepting the offer of admission, entering students are asked to list several colleges in order of preference; whenever possible, students are assigned to one of their preferred colleges. The information students need to rank their college preferences can come from a variety of sources—personal acquaintance, a campus visit, literature available from the colleges, campus web sites, and the descriptions in this section of the catalog. Students also have the option to indicate “no preference,” meaning they will be fine with any of our 10 colleges, and the Admissions Office will assign those students to one of the colleges.

### SIMILARITIES AND DIFFERENCES

---

The colleges are small-scale residential communities, each providing an academically and socially supportive environment and offering special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience.

Each college provides academic advising as well as academic and general campus orientations to help you plan your academic program. College academic preceptors and advisers provide advice on general academic matters outside a student’s major, including general education, choosing a major, and strategies for academic success. Psychological and personal counseling is also available in each college. The faculty, or fellows, of each college come from a variety of academic disciplines; many faculty have their offices in the colleges.

Each college offers a distinctive academic core course for entering frosh. The required course provides a significant bridge between academic and residential life, since all frosh, regardless of major, will be in the course, and most will be in residence as well. The colleges also offer selected courses in their area of interdisciplinary emphasis and host events and speakers that enhance this focus.

Architecturally distinct, each college was planned by a different architect who was encouraged to convey the distinct personality of that college through the design of its buildings and their placement in the natural environment. The particular style of housing varies among the colleges, ranging from residence halls, with a mix of single, double, and triple rooms, to apartment-style housing, where students live together in small groups and may do some of their own cooking. Each college’s residential program is a team effort. Professional staff (coordinators of residential education) work with students trained as resident assistants and help organize activities and events, provide referral information about academic or personal concerns, and assist with roommate problems.

### CHANGING COLLEGES

---

Most students develop friendships and intellectual attachments within their affiliated college, and remain members of that college throughout their undergraduate years. Some students find that changing academic interests draw them to a different college. During specified filing periods, students may request a

change of college with the approval of both college

administrations.

---

## COWELL COLLEGE

---

Cowell College inaugurated the Santa Cruz campus when it opened with a pioneer class of 600 students in 1965. The founding faculty shaped an educational program that challenged and enriched students through wide-ranging inquiry and disciplined study. Today, Cowell has more than 1,500 affiliated students and over 90 faculty fellows. Its motto—The Pursuit of Truth in the Company of Friends—expresses a continuing commitment to create a serious academic environment within a humane and broadly inclusive community. The college is named for the S. H. Cowell Foundation, which endowed the college at its founding.

### ACADEMIC EMPHASES

---

The academic theme of the college encourages students to pursue their general and disciplinary study with attention to the values of liberal arts education: understanding one's individual perspectives by exploration of its historical background and world context. Students affiliated with the college pursue majors from all departments on campus.

In satisfying their general education requirements, first-year Cowell students are required to take the Cowell Core Course in the fall term. The core course, Cowell 80, is taught in small seminar sections and seeks to develop critical reading, analytical writing, and seminar discussion skills by reading a selection of classic and contemporary texts focused on the theme of justice.

Enrichment courses are offered every term at the college, and priority is given to Cowell students. Some courses emphasize the development of skills such as public speaking or researching in library collections. Some courses take a broader perspective, examining the role of education in democracy or the epistemological bases of our judicial system.

The college also enriches the intellectual and cultural life of the campus by sponsoring events of various kinds: lectures and presentations by local faculty and visiting scholars, theatrical and musical performances, and forums and debates on topics of current interest.

Students who develop ideas for research, creative projects, community service, or internship experiences may apply to the college provost for financial support. The college also awards several annual scholarships and sponsors prizes for outstanding academic work.

The faculty fellows affiliated with the college represent all academic divisions (arts, engineering, humanities,

physical and biological sciences, and social sciences). The faculty fellows guide the college academic programs and often contribute to the college-based advising system.

The college academic buildings house humanities faculty, with notable concentrations in philosophy, classics (study of ancient Greek and Latin language and civilization), and modern foreign languages, especially Chinese, French, Italian, Russian, German, and Japanese. Interdisciplinary faculty groups in visual and performance studies and in pre- and early-modern studies are centered at Cowell College.

### HONORS PROGRAM

---

Cowell participates in the UCSC First-Year Honors Program. Each year a small set of students who demonstrated high academic achievement in high school is invited to join the university-wide program. Cowell hosts one cohort group, with members housed together in one of the residence halls. In the fall of their first year, the students take a special advanced section of the core course. During the winter, they chose one of the honors program seminars, which are offered by the colleges participating in the program. During the spring, all students in the program take a special two-credit class together, which includes special lectures and dinners.

### COLLEGE COMMUNITY AND FACILITIES

---

Cowell's seven residence halls and three apartment buildings are arranged in three quadrangles on a hillside overlooking the city of Santa Cruz and Monterey Bay. About 700 students are housed in the college. Most floors are mixed gender with all students sharing common lounges and other facilities, but single-gender floors are provided for those who prefer this arrangement. Apartments house continuing students, mostly juniors and seniors. The residential staff members facilitate diverse educational, social, and recreational programming to enhance the living and learning environment.

Arranged around the college's central courtyard are the dining hall, the Page Smith Study Library, the fireside lounge, the coffee shop, and conference rooms and classrooms. The Cowell Press, where students can learn the fine technique of hand-operated letterpress printing, is a stone's throw away from the plaza. Also nearby are the Cowell Galleries, including the Eloise Pickard Smith Gallery and the Annex Gallery.

## The Colleges

Since the college's founding, regularly scheduled College Nights in the dining hall have offered students, staff, and faculty a special meal and a rich mix of programs. Community life is enlivened by many other scheduled and impromptu intellectual, cultural, and social events.

The Student Senate meets weekly to discuss campus issues and student government. The Senate advises the college on the allocation of funds for student activities and programs. Members of the Senate are selected each year by lot, but any student may become a voting member by steady attendance at meetings. The

college's student groups, staff, and faculty work together to create a supportive community for students from all ethnic groups, all religious traditions, and all sexual orientations and to increase awareness of the many dimensions of diversity in the community.

For more information on the college, see the [Cowell College web site](#) or call (831) 459-2253.

---

### COWELL FELLOWS AND STAFF

---

Cowell College faculty fellows are listed [here](#).  
College staff are listed [here](#).

---

## STEVENSON COLLEGE

---

**“We are Stevensonians; we are free agents of history and masters of our own destinies. Every one of us is important, and we cherish our differences as much as we cherish our shared values of love, chivalry, honesty, hard work, and responsibility.”**

—Seung Kyun Joseph Mok, Stevenson  
Alumnus/Regents Scholar

Stevenson College is named after former statesman and U.S. Ambassador to the United Nations Adlai E. Stevenson. Our faculty, students, and staff take pride in intellectual critical inquiry, academic and civic leadership, and respect for students' concerns about shared student governance, human rights, and social justice.

Stevenson College has a long-standing reputation for excellence in liberal education. The college strives to provide an academically, culturally, and socially supportive environment for all its members, fostering social responsibility and academic achievement. Stevenson has brought to the campus distinguished individuals such as Senator George McGovern, Congresswoman Bella Abzug, Nobel Laureate Elie Wiesel, Chief of the Miwok Tribe Greg Sarris, Producer Lourdes Portillo, and Associate Director-Counsel Theodore M. Shaw of the NAACP Legal Defense and Educational Fund.

The college's faculty and staff offer professional and personal service for the diverse needs of students. Faculty and staff assist students in all areas of their academic and social experience at Stevenson College, and are committed to instilling respect for the diverse backgrounds of Stevenson students.

---

### ACADEMIC EMPHASES

---

- Faculty drawn from social sciences, humanities, and natural sciences

- Two-quarter frosh core course
- Writing Assistants
- Junior Fellows Program

The faculty at Stevenson, drawn from a variety of disciplines in the social sciences, humanities, and physical and biological sciences, share a common concern for the study of social processes that shape modern society and determine the quality of our individual lives throughout various global regions and periods of world history. Linguistics, history, sociology, politics, psychology, biology, chemistry, and computer science are strongly represented in the college.

Stevenson distinguishes itself as the only college with a two-quarter core course intended to provide all first-year students with a common academic experience. The core course allows for more rigorous development of students' critical, writing, and analytical skills. It provides a unique learning environment and a supportive intellectual community for all Stevenson first-year students. Those admitted as transfer students are exempt from the core course requirement but may take the core course at their option pending available space; lower-division transfer students who, prior to enrolling, have not completed at least one UC-transferable college English composition course with a minimum grade of C (2.0) are able to take the core course to satisfy the C1 requirement. Stevenson alumni can be found in legal, political, educational, engineering, medical, computer and information sciences, business, and public administration careers, among others.

The Stevenson core course, *Self and Society*, enables students to examine the nature of the self and the relationship of the individual to society. In addition, the course fosters an intellectual commitment to the general philosophy that has helped to define Stevenson College since its inception: preservation of human dignity, the social cultivation of individual creativity

## The Colleges

and citizenship, and a belief in ethical responsibility. The core course reflects the college's long-standing commitment to interdisciplinary and culturally diverse readings, while at the same time affording students an opportunity to develop research interests, to acquire greater understanding of the role of research universities in contemporary societies, and to acquire the requisite skills to engage in increasingly more sophisticated intellectual work while at UCSC.

Students have the opportunity to apply for funding for special research projects each quarter. Stevenson also provides several annual scholarships and service awards, including the Michele Guard Memorial Scholarship, the Matthew Graviano Memorial Scholarship, the John Halverson Scholarship, the Sandor Callahan Scholarship Award, and the Robert Dodge Service Award.

The Stevenson College Junior Fellows Program offers juniors and seniors an opportunity to serve as instructors in Self and Society. Junior fellows, who must have completed outstanding work in Self and Society during their first year, undergo a rigorous application and selection process. Junior fellows (enrolled in Stevenson 120, Teaching Practicum) earn five course credits.

Stevenson provides writing assistance for all of its students. Stevenson Writing Assistantships are paid student positions open to juniors and seniors with excellent academic records.

### COLLEGE COMMUNITY PROGRAMS

---

- College Nights
- Stevenson Student Council
- Stevenson Ethics Bowl Team
- Multicultural Advisory Committee (MAC)
- Path to a Greener Stevenson (PTAGS)
- Social and Multicultural Programs/Activities
- Stevenson Housing Association (SHA)
- Rainbow Theater

Stevenson holds regular College Nights, where joining together for a special dinner presents an opportunity for Stevenson faculty, staff, and students to get together in a social context. College Nights—such as Cinco de Mayo, Chinese New Year, and Vietnamese College Night—provide the opportunity to celebrate many different cultures. Dinner is followed by entertainment.

The Stevenson Student Council meets on Thursday evenings. This group is responsible for allocating college membership fees to student activities. The council also serves as a forum for the discussion of college and campuswide issues and appoints student representatives to college and campuswide committees.

## FACILITIES

---

- Eight small residence halls, four of which are themed houses:
  - Outdoor Adventure House
  - Sustainability House
  - Diversity and Social Justice House
  - The Rosa Parks African American Theme House
- Three apartment buildings
- Coffee house
- Wagstaff Fireside Lounge
- Writers' Center
- Stevenson Library
- Stevenson Event Center
- Silverman Conference Room
- Recreation room

Stevenson has a wide variety of facilities and activities to appeal to many tastes. The college, designed by San Francisco architect Joseph Esherick, has won many architectural awards. The buildings are situated amid redwood trees and sprawling lawns, and the main quad overlooks Monterey Bay. Stevenson is situated close to the campus bookstore, restaurants, McHenry Library, gym, and pool. There are eight small residence houses at the college providing a choice of single-gender or mixed gender floors; each house accommodates about 90 undergraduates. The apartments provide space for 156 continuing students. Nearby are a picnic area, playing fields, and a garden.

The Stevenson Coffee House, which has become the gathering place in the college, is a friendly and inviting spot to enjoy lunch or an espresso and pastry— indoors or out on the patio. It is the scene of lively conversation, occasional musical entertainment, and chess matches. Adjoining the coffee house is the recreation room, with Ping-Pong, foosball, pool tables, and television. This area is also the site of much socializing and spontaneous group activity.

In contrast, the Stevenson Library is a striking building designed for quiet reading and study. The Wagstaff Fireside Lounge, a retreat for relaxed discussion, is also used for recitals, special lectures, meetings, and residence house activities. Art exhibits (both student and professional) are on display throughout the year in the lounge, library, and coffee house.

For more information on the college, see the [Stevenson College web site](#) or call (831) 459-4930.

### STEVENSON COLLEGE FELLOWS AND STAFF

---

Stevenson College faculty fellows are listed [here](#).

College staff are listed [here](#).

---

## CROWN COLLEGE

---

Crown College faculty and students represent a wide variety of academic disciplines. The majority of the faculty teaches in the physical, biological and social sciences. Although Crown has more science and engineering students than any of the other colleges, most of Crown's students major in the social sciences, humanities, and arts. This diversity of interests and academic training enriches our intellectual environment. An important goal of the college is to foster an appreciation for the contributions of diverse cultural groups and to provide an atmosphere in which issues of both diversity and common social purpose are integrated into a wide range of programs and discussions.

Crown is located on a hilltop surrounded by a redwood forest. The core buildings consist of an administration office, dining commons, lounge spaces, study spaces, faculty offices, and classrooms built around a large patio and central fountain. The award-winning architecture with its white walls and high-pitched tiled roofs suggests a hillside Mediterranean village. The college's residential facilities house approximately 800 students. The facilities at Crown College were built through a partnership of public funds and a gift from the Crown Zellerbach Foundation.

### ACADEMIC EMPHASES

---

From the time of its founding in 1967, issues pertaining to the role of science and technology in society have been a focus of special interest at Crown College. We approach these issues from an interdisciplinary perspective that recognizes the influence of social and cultural factors on the scientific enterprise, as well as the ways in which science and technology influence our society.

In the 2014–15 academic year, the Crown College core course became a two-quarter sequence. Our students take the two-unit Crown 79, Engaging the University, in the fall. This class alternates guest speakers with discussion sections in small groups under the direction of an instructor. The goal is to create a cohort experience and provide personalized mentorship for our entering students, to introduce students to the university, and to prepare students to take winter quarter sections of Crown 80A/B. Crown 80A/B, Ethical Issues in Emerging Technologies, is an interdisciplinary seminar concerning the effects of world-changing technologies. The course examines these technologies' impacts on society using a variety of disciplinary

approaches that engage the perspectives of both humanists and scientists. This class encourages students to examine the impact of new technologies through a critical lens and to present their conclusions at a capstone conference, the Social Fiction Conference. With a focus on the intersection of social justice topics in science fiction, fantasy, and gaming, this conference features keynote speakers, movies, debates, and presentations in a variety of formats. Both the fall and winter core courses are required of all non-transfer students during their first quarters at UCSC. As with the core courses from our sister colleges, the development of critical reading and writing skills is a major thrust of Crown 79, 80A, and 80B.

Crown emphasizes experiential learning through the college's Leadership Certificate Program, which combines leadership theory with a variety of internship opportunities and through support for research. Crown facilitates the establishment of internships with faculty fellows through advertising of individual projects and by providing funding to support them.

In addition, Crown College offers the First-Year Honors Program and the Science/Engineering Learning Communities. The First-Year Honors Program is an innovative program that offers a congenial and challenging academic home for a select group of well-prepared students at UC Santa Cruz. The enriched program of study includes special courses, seminars, colloquia, and other events during each quarter of the academic year. Admission to the First-Year Honors Program is by invitation during the admissions process based on high school academic performance.

The Crown Science Learning Community (SLC) is an innovative program that provides extra support to first-year students who are interested in pursuing a major in engineering and the sciences. Students enrolled in this program live together, forming a supportive community that promotes collaborative learning and group problem solving. To facilitate this process, SLC students are placed in a special section of Chemistry 1A or Math 3 and participate in a residentially based study group. The program is designed especially for students who have a strong interest in the sciences but feel slightly under-prepared for university-level coursework. It often acts as a bridge to the ACE Program in the physical and biological sciences and engineering. Participation—limited to first-year students at Crown

## The Colleges

College—requires a commitment to succeed, a willingness to work hard, and a positive attitude.

Similar to the Science Learning Community, Crown's Baskin Scholars Community focuses on underrepresented student success in engineering. Participants are housed together and receive tutoring, mentoring, and other assistance.

---

### COLLEGE COMMUNITY AND FACILITIES

---

Crown sponsors a wide variety of co-curricular events spanning cultural, educational, and social areas of interest. One popular series is the Science/Public Affairs Tables, informal dinners at the Provost House offering students an opportunity to socialize with a faculty member outside the classroom and learn about his or her research.

Students become involved in Crown life by both initiating and participating in a wide range of activities. Social activities vary each year according to the interests of students. At the monthly College Night in the dining commons, a special dinner is followed by entertainment, both often sharing a common cultural theme. Some major events have become a tradition: for example, Epic Game Tournaments, the Crown Semi-Formal, and quarterly Regression Nights. Crown activities and dances draw students from all over campus. Outdoor activities organized by the student government, the College Programs Office, or residential staff range from whale watching on the Monterey Bay to ultimate Frisbee, and from backpacking to stargazing.

The Crown Student Senate (CSS), the elected student government at Crown, holds open weekly meetings to recommend fund allocations for student activities and to discuss issues of concern to students and the college. CSS also sponsors events to enhance the college experience, including the very popular Casino Night.

Crown offers two types of residential facilities: residence halls and apartments. Eight traditional residence halls each house approximately 60 students in single, double, and triple rooms in a coed environment (single-gender bedrooms with unisex bathrooms) or on a few all-female floors. For students particularly interested in living with and learning about a special-interest environment, Crown provides the Gaming House, Outdoor Pursuits and Academic Success Houses, Arts & Humanities House, the Science and Engineering Learning Communities, and continuing student houses.

The college also has apartments for approximately 230 third- and fourth-year students. Like the residence halls, the apartments are built on a small scale. Each three-story building has two or three apartments per floor that house four to six students in a combination of single, double, and triple rooms and include a kitchen, living room, dining room, bathroom, and outside deck.

Other facilities in the college include the Crown Library study space; a modern computer laboratory housing Mac workstations, which provides students with access to several kinds of systems and an array of applications and instructional software selected to support academic coursework; the Fireside Lounge with a piano and a flatscreen television; and the Music Practice Room. The Crown-Merrill Community Room, with a television, pool table, foosball, and ping-pong table, provides an informal place to study, hold meetings, or just visit with friends. Dining facilities boast continuous dining and Banana Joe's take-out and quick mart.

For general information, call the College Office at (831) 459-2665 or visit the [Crown College web site](#). For residential information, call the Housing and Residential Education Office at (831) 459-5689.

---

## MERRILL COLLEGE

---

Merrill College seeks to expand its students' awareness of their own heritage and of the diversity of cultures around the world, past and present. Merrill faculty specialize in a number of different areas of study, concentrating especially on social theory, international affairs, and social change, and from a variety of disciplinary perspectives including history, the social sciences, literature, and foreign language study. The college makes a special effort to be a home for students from different cultural backgrounds and for

international students; it presents unique opportunities to those who value multicultural perspectives.

Merrill houses the departments of Politics and Legal Studies, and Latin American and Latino Studies. Merrill also hosts a Peace Corps satellite officer who helps UCSC students interested in working overseas to apply to the Peace Corps after graduation; and KZSC, the campus radio station. It also hosts the Chicano/Latino Research Center; UCSC's Cantú Queer Center; the student-run Pottery Co-op (the only one of its kind at UCSC); and the Ming Ong Computer Center, a modern

## The Colleges

computer facility with more than 40 state-of-the-art personal computers.

### COLLEGE THEME AND CORE COURSE

Cultural Identities and Global Consciousness is the ethos of Merrill College and is reflected in the theme of the college core course. Readings include diverse first-person narratives or works of fiction that focus on historical or political flashpoints, particularly those illuminating relationships between the developed and the developing world. Recent readings have included texts examining Chicano/Latino, Asian, African, Indian, and Islamic experiences. These works bear witness not only to conflicts and crises, but also to individual strengths and communal hopes. Students also read secondary sources related to the texts. Linked lectures, events, and films illuminate the case studies. The works studied expand international awareness by showing individuals and groups dealing with critical issues of nationalism, globalization, war, economic underdevelopment, and social and gender differentials. They frequently identify forms of social activism that respond to and seek to overcome violence and other problems. Students formulate their own analyses in relation to these examples and share their ideas in writing and seminar discussions. The course emphasizes skills central to intellectual life at the university. Critical reading, analytical writing, and formulation of ideas for presentation and debate in seminars with peers and teachers are emphasized as students expand their global horizons.

Those admitted as transfer students are exempt from the core course requirement but may take it at their discretion.

### OTHER COURSES AND ACADEMIC INITIATIVES

Merrill sponsors a variety of two- and five-credit courses on topics that change from year to year. Recently these have included a series of small classes drawing on ideas introduced in the Merrill Core, such as a course on human rights and another on foreign policy, and experiential learning classes on sustainable building practices and field study. Merrill also offers an upper division class in personal empowerment, and another on the research university for recent transfer students. Additionally, students can enroll in CLASSROOM CONNECTION, a service-learning course in which students volunteer in local and regional K–12 schools while also engaging in classroom discussions of readings on current issues in educational theory. Participants make final presentations.

Recognizing the increasingly rigorous requirements for science majors, Merrill—in collaboration with the

Academic Excellence Program—coordinates the Science Learning Community to support students majoring in the sciences. Students participating in the program enroll in small discussion sections that encourage a collaborative learning approach.

The Merrill Research Mentorship Program aims to prepare undergraduate students to pursue graduate studies and provides research experience and personal and professional development for Merrill students. An interested Merrill faculty member nominates a Merrill student whose interests dovetail with his or her own areas of research and expertise. Students who participate in the program (juniors and seniors) are employed as research assistants by their faculty mentors and receive up to \$800 for the school year.

The Merrill Peer Mentoring Program (MP<sup>2</sup>) matches newer Merrill students with more established students to help them acclimate to a new setting and the new demands of university life. MP<sup>2</sup> also provides a modest employment opportunity to peer mentors.

The Merrill College Distinguished Visiting Scholars Program hosts public and class presentations by national and international academics, artists, writers, and activists representing a wide variety of perspectives.

### COLLEGE COMMUNITY AND FACILITIES

Located on a hilltop, Merrill's newly renovated, award-winning buildings thread upward through the edge of a redwood forest. Glass curtain walls provide views from the A & B Buildings of the reconstructed college center and new restaurant building. The brick patios, gardens, outdoor café, and mission bell tower suggest California's Latino heritage. Merrill offers residence hall and apartment-style options for students. Four residence halls house approximately 550 students in two high-rise structures and two smaller buildings.

The apartments, which are located a short distance from the central area of the college, house 180 continuing Merrill students. Grouped amid winding pathways and redwood trees, these three-story buildings have two or three apartments per floor. Each apartment houses four to six students in a combination of single, double, and triple rooms, and comes fully equipped with a kitchen and a bathroom, a large living area, and an outside deck. Residents of the apartment complex share a large community room, two laundry rooms, and plenty of outdoor space.

With the help of the Merrill's Student Life Staff, staff and students work together to plan a diverse array of educational, social, recreational, and cultural events that include film series, art exhibits, intramural sports

## The Colleges

competitions, dances, musical events, and a yearly outdoor Moat mural painting party. Many of these social and educational activities focus on building a multicultural community. Other facilities at Merrill include the Cultural Center, where large events (including Merrill the Musical and the Glitterball) take place; the Baobab Lounge, which provides study space, a piano, and a television; and Merrill Academic Success (MAS), which provides Merrill students with a quiet place to study as well as close evening access to computers and a printer. Finally, Merrill is the only college that has a student-run pottery co-op. Students can throw, fire, and glaze their pieces in the workshop space; membership is open to Merrill students on a first-come, first-served basis. Merrill's two-year

renewal project to renovate the residence halls, update community space, and improve pathways and way-finding at the college will conclude in spring 2015.

The physical facilities of Merrill College were provided through a partnership of public funds and gifts from the Charles E. Merrill Trust and the family of Ming Ong, a student in the 1980s.

For more information, visit the [Merrill College web site](#) or call (831) 459-2144.

---

## PORTER COLLEGE

---

Porter College was founded in 1969 as the fifth of UC Santa Cruz's residential colleges and was later renamed in honor of a generous grant from the Porter-Sesnon family. Its mission is to foster achievement in all areas of study. Porter is especially dedicated to achievement in the arts, believing that creative inquiry is an essential part of a rigorous and broad-minded education, a flourishing society, and a happy life.

---

### ACADEMIC EMPHASES

The Porter campus is the administrative home of the Arts Division and the History of Art and Visual Culture Department, but Porter College faculty fellows hail from every academic division on campus and from many non-academic professions. All of them share the philosophy of education that the college's curriculum embodies: first, discover how to learn; then, learn by doing; and finally, let your learning make a difference in the world.

The Porter College curriculum encourages students to explore unusual topics and provocative ideas, to test and revise hypotheses about the meaning of their experiences, to learn from the failures that are an inevitable part of new learning and discovery, and to assume responsibility for the decisions they make in their studies.

Porter 80A and 80B, known as "Porter Core," provide rigorous training in critical reading and writing and study skills. Students meet with instructors in seminars and in small writing groups. Those who are admitted as transfer students are exempt from the core course requirement but may opt to enroll in Porter Core if resources permit it. Lower-division transfer students who have not completed at least one UC-transferable college English composition course with a minimum

grade of C (2.0) or better, prior to enrollment, are permitted to take the core course to satisfy the C1 requirement.

In addition to the core course, Porter offers a variety of smaller interdisciplinary seminars that combine historical and theoretical approaches to the arts, humanities, and sciences with practical experience conducting scholarly research and making creative work.

The college provides fellowship funds each year to talented students pursuing original research and creative projects.

---

### COLLEGE COMMUNITY AND FACILITIES

The traditional residence halls and apartments play an important role in bringing the college community together. Students are encouraged to spend their beginning years in residence in the college, where housing is available for 1,300 students. The residence halls are divided into smaller units, with from 30 to 35 students sharing common lounges and other facilities. Theme halls include Film and Digital Media, Science, Technology, Engineering and Math (STEM), Social Justice, and LGBTIQ. Students also have a choice of quiet, same gender, or substance-free halls. The six-person apartments are reserved for upper-division students.

Porter College is also home to the Transfer Community at Porter, a transfer student living/learning community. All on-campus incoming transfer students reside at Porter regardless of their college affiliation. Special programs are designed to help new transfer students adapt to life at UCSC.

In addition to traditional classrooms, Porter has many specialized facilities, such as student art galleries, a

## The Colleges

study center, and a dining hall that converts to a theater space. The Arts Instructional Computing Laboratories, located at Porter College, consist of two high-end labs oriented toward the arts.

Porter provides constructive opportunities for relaxation and recreation to balance the intellectual demands of a university education. The Porter Activities Office organizes formal and informal events, including open-mic nights, dances, recreational activities, and the mural painting program.

Many students and faculty perform or exhibit their work at Porter. The Sesnon Gallery, the Porter/Kresge Dining Hall, the Quad, and the faculty gallery host a

wide range of artistic, cultural, and academic events each year.

Porter College facilities were constructed through a partnership of public funds and a gift from the Porter-Sesnon family of Santa Cruz. Part of the gift was used to establish an endowment for the college. For more information, call (831) 459-2273 or visit the [Porter College web site](#).

### PORTER COLLEGE FELLOWS AND STAFF

Porter College faculty fellows are listed [here](#).

Porter College staff are listed [here](#).

---

## KRESGE COLLEGE

---

Kresge has a strong academic community that emphasizes creativity, leadership, sustainability, and community. Our motto is **Independence, Creativity, Community**.

---

### ACADEMIC EMPHASES

---

Kresge's core course 80, Power and Representation, is a writing class that explores the relationships between individuals and their communities. Our goal is to empower individuals to think beyond easy answers, to express themselves clearly, to feel at home in writing, and to feel powerful in representing themselves on the page. In Power and Representation, we examine the many ways we constitute ourselves (and are constituted) as individuals in relation to communities. First, we study ideas about representation as a theoretical grounding, and then focus on representations of nationality, ethnicity, sexual orientation, gender, and race in critical theory, film, fiction, theater, and nonfiction. Our purpose is to create a dialogue about ourselves and our relationship to our communities as it is, as it might be, and as we might help make it.

In addition to section meetings, on Tuesday nights all students come together to watch core-related films or performers or listen to lectures. All students complete a final creative project that engages with the theme of the course.

Lower-division transfer students who, prior to enrolling, have not completed at least one UC-transferable college English composition course with a minimum grade of C (2.0) or better are permitted to take the core course to satisfy the C1 (composition) requirement. Students who, in the Analytical Writing Placement Exam (AWPE), received a score of five or lower take a two-quarter version of the core class,

designed to increase competency in college-level writing

In addition to the core course, Kresge offers a series of courses that offer students the opportunity to study in small groups. Kresge has offered courses in journalism, comic writing, documentary film, gardening, and service learning.

Kresge is home to the Writing Center, including the Creative Writing archives, and also offers the following opportunities:

- The new Common Ground Center promotes social and environmental change through undergraduate-focused action-education, research, advocacy, and civic engagement.
- Transformative Action and Service Learning classes prepare students to become innovators in real-life community projects.
- The Kresge Garden is the site of our organic gardening and food systems classes, where students empower themselves by learning how to grow their own food and work together cooperatively.

---

### RESIDENTIAL LIFE

---

Kresge was the sixth college to be built on the UCSC campus. The college was founded on the principle of participatory democracy as a means of encouraging a strong sense of community. Architecturally renowned, Kresge offers apartments rather than residence halls.

The Kresge apartments attract students with a sense of independence and community participation.

Distinctively designed, the apartments at Kresge proper are configured for five to nine people. Kitchen and living areas look out onto the street, with other rooms facing the surrounding redwood forest. J and K Building's three-person apartments are reserved for continuing upper-division students. These two-

## The Colleges

bedroom apartments have an efficiency-style kitchen and living area.

Kresge is home to the Writer's House, a living/learning community for students interested in creative writing and journalism (regardless of major), and the Ecovillage, a community for students who want to actively create a new world based on cooperation and sustainable living.

The Residential Life and College Programs staff at Kresge work to bring students of similar interests together academically and socially by designing fun and unique programs based on student interest. Programs that focus on celebrating the diversity of the residential community, on multicultural community building, and on enhancing academic success through music events, mural painting, and food-centered events are highlighted.

---

### COMMUNITY LIFE

A wide variety of events and activities shape community life at Kresge: lectures, workshops, dances, and concerts are a regular part of student life at the college. The nature and tenor of these events are a reflection of the diverse interests of students and staff, who are committed to providing voice and opportunity for all community members.

Students actively shape the college community through participation in Kresge Parliament, an openly structured student organization responsible for voting the allocation of all college membership fees in support of activities and events. Parliament and Town Meetings also serve as a forum for the discussion of college and campuswide issues with college staff and faculty. Additionally, students can get involved in the Kresge Multicultural Education Committee (KMEC), Music Co-op, Food Co-op, Photo Co-op, or the Kresge Garden.

---

### TRANSFER STUDENTS

In recognition of the wealth of diversity that transfer students bring to the community—in terms of culture

and experience—Kresge is the home of the STARS program (Services for Transfer and Re-entry Students). This is a staffed facility where students can gather to relax, socialize, hold meetings, and obtain campus information and resource support in a central location regardless of college affiliation. The resource center offers workshops, social evenings, and special events tailored to meet the needs of transfer students.

STARS also offers special advising workshops and two- and three-credit courses designed to help transfers in the process of entering the university and moving forward in their careers.

---

### FACILITIES

At the entrance to the college is the restful Piazzetta, with a beautiful, architecturally designed fountain, and the Kresge Garden, the largest student-run garden on campus. Leading off from the Piazzetta are STARS, the Commuter Lounge, and a student lounge equipped with television and DVD player. In addition to STARS, as a unique facility on the campus, the Commuter Lounge is a place for off-campus students who want to use a kitchen, shower, or lockers while on campus. Kresge's Photo Lab Co-op is above the Piazzetta and offers 24-hour accessibility to darkroom equipment. Adjacent to the nearby meadow is an outdoor basketball court. The college includes a study center with soaring ceilings and walls of glass overlooking the forest, which also houses a writing center, a computer lab equipped with PCs for student use, and a student-run Food Co-op, where organic produce is sold and working memberships are available. At the top of the college are the Town Hall, the Music Co-op, and the Owl's Nest Cafe.

For more information, call (831) 459-2071 or visit the [Kresge College web site](#).

---

### KRESGE COLLEGE FELLOWS AND FACULTY

Kresge College faculty fellows are listed [here](#).

Kresge College staff are listed [here](#).

---

## OAKES COLLEGE

---

Oakes was founded in 1972 to provide high-quality education to students from diverse cultural and social backgrounds. Students, staff, and faculty associated with the college believe that learning takes place not only in the classroom, but also in residential settings. For that reason, they work hard to create a multicultural community whose members strive to achieve ambitious goals—including equal access to educational opportunity and freedom from oppression—while simultaneously affirming and celebrating their distinctive cultural backgrounds.

### ACADEMIC EMPHASES

---

The Oakes College faculty represents a wealth of expertise from the natural sciences to the humanities, and we are proud to have some of the top scholars in the world among our faculty fellows. Our students major in nearly every discipline at UCSC—from economics and computer science, to theater arts and Latin American and Latino studies—and they are well supported by the depth and breadth of the Oakes College faculty and the extensive knowledge of our advising team. Oakes graduates have gone on to successful careers in fields such as medicine, law, education, medical research, and community service.

The Oakes core course, *Communicating Diversity for a Just Society*, is required of all first-year students. The course is writing intensive and examines individual and collective responses to issues of culture, gender, sexuality, race, and class. Those who are admitted as transfer students are exempt from the core course requirement but may take the core course at their option pending available space; lower-division transfer students who, prior to enrolling, have not completed at least one UC-transferable college English composition course with a minimum grade of C (2.0) or better are permitted to take the core course to satisfy the C1 requirement.

At Oakes College, we are committed to fostering student engagement and leadership within and beyond the classroom. To this end, we encourage students to develop the knowledge, skills, and cross-cultural understanding necessary to become active citizens and future leaders in their own communities, workplaces, and academic disciplines as well as in the larger U.S. society and the world as a whole. We also provide a range of resources and programs that will enable all students to succeed in their academic endeavors. Such resources include:

- The Learning Center and the Westside Writing Center at Oakes College provide space for study

groups as well as tutoring and advising programs. Special assistance in writing and tutoring in a variety of subjects is offered to Oakes students and EOP students.

- The Oakes Computer Lab provides access to 20 PCs for Oakes students.
- Co-curricular programs like Oakes 4.0, Oakes Core Café, and the residential Science Community at Oakes College all offer living-learning opportunities to enhance student success and to provide students with unique opportunities for interacting with faculty in small group contexts.
- Community-based Advocacy and Research for Action (CARA), the Oakes Service Learning and Community Justice Program, brings together rigorous academic work with significant and meaningful service learning. CARA engages students in collaborative problem-solving on some of the most pressing problems of our time, focusing on issues of language, literacy, and education as fields of power, and therefore potentially organization and social transformation. The core of the program is the 150 series. Oakes 151A and 151B (Community Literacies seminar and Field Study in Curriculum Design, Observation, and Team Teaching) are offered each quarter, by application only; Oakes 152 (Transformative Literacies) is offered in winter, and Oakes 153 (Community Mapping) in spring.
- Student services at Oakes include academic advising and psychological counseling.

### COLLEGE COMMUNITY AND FACILITIES

---

Oakes College, located on the west side of the UCSC campus, commands a sweeping view of Monterey Bay. Students may choose between apartment and residence hall living. The residence halls have a lounge, attractive courtyards, and views of the ocean and the city of Santa Cruz. Students can also share an apartment-style living space, which includes a common living area and small kitchen. All students participate in a University Meal Plan. Full-time coordinators for residential education and neighborhood assistants help residents develop cooperative ways of living together. As one student put it, “Oakes is a community where people of many different backgrounds, interests, and goals form a friendly neighborhood. We share our cultures and adapt to the different lifestyles of our neighbors.” The residential program is designed to assist all students

## The Colleges

in integrating their academic and social needs. The residential staff host activities sponsored through its wellness, academic success, leadership, and social justice and diversity committees.

The college staff seek to nurture and sustain a community in which mutual respect, understanding, and concern for others are the norm. Within that atmosphere of community expectations, students are also supported and encouraged to find room for their own creative personal expression.

The other facilities at Oakes further support the special programs of the college and provide recreational opportunities for the students. College facilities include the Learning Center, a multipurpose room for lectures, movies, and small theater productions; a college library; a quiet space for individual study, a dining facility shared with College

Eight; and TV lounges in the residences. Adjacent to the Oakes Café is the Guzman Room, a social and group study space. Oakes is also home to the Underdome, a small outdoor basketball court great for friendly three-on-three competition. Additional recreational facilities located close to the college include tennis courts, a large recreational field, and an indoor basketball court.

Oakes is named after Roscoe and Margaret Oakes in recognition of their generous philanthropy through the San Francisco Foundation.

For further information, call (831) 459-2558 or visit the [Oakes College web site](#).

Oakes College Fellows and Staff

Oakes College faculty fellows are listed [here](#).

Oakes College staff are listed [here](#).

---

## COLLEGE EIGHT

---

College Eight is dedicated to Environment and Society, and the college has organized a vigorous intellectual life around this theme. The college examines environmental issues from multiple perspectives, through the social and natural sciences, engineering, public policy, and science and technology studies. College Eight offers students a sense of community and opportunities to augment academic work with a wide range of extracurricular activities. These include events such as Earth Week, sustainability internships, and a minor in Sustainability Studies.

College Eight students major in nearly every discipline offered at UCSC, while sharing a strong commitment to environmental stewardship. We teach our students and graduates to become environmentally aware green citizens, with the capacity to evaluate sustainability policies and strategies and with the skills needed for hands-on engagement in the many projects and activities that will be required to ensure the future of the planet and human civilization.

### ACADEMIC EMPHASES

---

College Eight sponsors a number of educational initiatives aimed at furthering its theme and mission. A three-quarter core course, Nurturing Environmental Citizenship, is taught by senior faculty from the departments of Politics, Ecology and Evolutionary Biology, Earth and Planetary Sciences, and Electrical Engineering. The fall-quarter course is mandatory for all incoming freshmen, with the goal of introducing students to environmental issues—past, present, and future—as they manifest in California. The winter-quarter course addresses the principles of

environmental science, while the spring quarter course examines how technological innovation and engineering can address environmental challenges. In addition, practicum internships, a three-quarter course on the tools of sustainability work, and the sustainability studies minor all enable students to acquire skills that they can apply to the coming green economy and to take on service-learning work with campus and community-based agencies and organizations. Additional college courses include garden internships, filmmaking for Santa Cruz TV (SCTV) and the student journal Gaia, student-led classes in sustainability, a class on peregrine falcons, and a seminar on environment in film.

### COLLEGE COMMUNITY AND FACILITIES

---

College Eight is located on a sunny, terraced hillside on the west side of the UCSC campus, offering a spectacular view of Monterey Bay and the coastline as well as the redwood-covered hills. The college is designed to encourage interaction among resident and commuter students, with outdoor spaces for relaxing and informal opportunities to socialize. These include small residence hall patios, grass quadrangles, and a large plaza—the heart of the college—where pedestrian traffic converges. Adjacent to the college are recreational facilities that include the West Field House, tennis courts, basketball and sand volleyball courts, and playing fields. The Theater Arts and Music Centers, McHenry Library, and Porter and Oakes Colleges are a short walk from the college. Other parts of the university are easily accessible by foot, bicycle or frequent shuttle buses.

## The Colleges

College Eight's facilities include an academic building that accommodates the college and faculty offices, the Sociology Department, associated research centers, classrooms, and a computer lab with printers. Approximately 500 students live in the college's community of two- and three-story residence halls, which provide single, double, and triple rooms as well as suites. The residence halls include designated study lounges, laundry facilities, and lobbies that serve as living rooms—favorite places where residents gather to relax, watch television, and catch up on the news of the day. A number of these are themed residences, and the occupants are invited to small focused dinners with faculty and staff. Another 300 students are housed in College Eight's two-, three-, and four-bedroom apartments.

The college's residential staff includes both coordinators for residential education, who are full-time live-in professionals, and undergraduate resident assistants. The residential staff plans a variety of educational and recreational events, including community barbecues, outdoor movies, and student-initiated events celebrating the diversity of our community. More intimate gatherings include study breaks, coffee talks, and potlucks. The residential staff is available to ease the transition to college life, making the college a comfortable new home for our residents.

The Student Commons building contains the office of College Eight's college programs coordinator, the office of the Student Environmental Center, and a large meeting room for student use. A study center is located

across the plaza. The College Eight Café offers a quiet, comfortable space and is a favorite haven and gathering place for students, faculty, staff, and other members of the campus community.

In conjunction with the student government and student organizations, the College Eight Student Programs Office plans social, multicultural, and educational events for the college community. Weekly Café Nights—featuring open mics, music, art shows, and guest speakers—accommodate the diverse spectra of cultural and artistic interests of the students. College Night, a quarterly cultural event, provides an opportunity for students to learn about a variety of cultures through entertainment, education, and delicious cuisine. In addition, the Student Programs Office works closely with the Student Environmental Center to bring programs that educate and build long-lasting networks, which aim to address the environmental issues affecting our world today.

Above all, College Eight seeks to create a community of inclusion, in which each person is encouraged to share and explore beliefs, worldviews, values, and ideas in an atmosphere of mutual support and trust.

For more information, contact the college at (831) 459-2361, e-mail [8housing@ucsc.edu](mailto:8housing@ucsc.edu) or [bshelley@ucsc.edu](mailto:bshelley@ucsc.edu), or visit the [College Eight web site](#).

College Eight staff are listed [here](#).

---

## COLLEGE NINE

---

**“From climate change to inequality, the commonality of problems facing all of the planet’s inhabitants requires an understanding of our growing interconnections and interdependencies. In College Nine, we challenge students to grapple with complex, controversial and multi-scalar issues, for which there exist vastly differing opinions about the nature of problems and how to solve them. Becoming a global citizen requires critical thinking, cultural awareness, and effective communication, all skills our training provides to our students.”**

—Flora Lu, College Nine Provost

---

### ACADEMIC EMPHASES

College Nine's theme of International and Global Perspectives emphasizes the causes and consequences of our increasingly interconnected world. Our academic and co-curricular programs analyze economic and cultural globalization, immigration, ethnic conflicts, genocide, and human rights, among other issues. Students interested in these issues either as their major focus or as part of their general education are invited to join the College Nine community.

---

### WRITING SEMINAR

In the first-quarter frosh course, Introduction to University Discourse: International and Global Issues, students examine current issues pertinent to the college's intellectual theme. Topics address issues such as globalization, inequities in wealth and poverty across the world, human rights, and regional conflicts.

## The Colleges

The seminar emphasizes the development of students' reading comprehension and oral and written communication skills. Students write several reflective and analytical papers during the quarter. Each paper undergoes at least one revision after the student receives constructive feedback from the instructor and peers. Thus, the instructors work closely with each student throughout the quarter.

All students who enter as frosh are required to pass the college writing seminar with a grade of C or better. Those who are admitted as transfer students are exempt from the core course requirement but may take the core course at their option pending available space; lower-division transfer students who, prior to enrolling, have not completed at least one UC-transferable college English composition course with a minimum grade of C (2.0) or better are permitted to take the core course to satisfy the C1 requirement.

### **SPECIAL ACADEMIC AND CO-CURRICULAR PROGRAMS**

---

Optional programs are available to involve College Nine students in academic and co-curricular activities beyond the first-quarter course. They are designed to promote students' academic achievement and success by connecting them with faculty mentors and helping them pursue leadership experiences in particular contexts.

#### **Global Action**

In this workshop facilitated by peer instructors, students learn about current international and global issues through interactive exercises, small group discussions, and faculty presentations. Students will develop an "action plan" to raise awareness about one or more of these concerns and take practical steps to create positive change in the world.

#### **Service Learning: Esprit de Corps (110 and 110B), Praxis, and Alternative Spring Break**

Students extend their learning beyond the classroom by gaining practical experience volunteering for a school or a nonprofit organization in the Santa Cruz community. Examples include assisting in a classroom or at a homeless shelter. College Nine has its own service-learning class, Esprit de Corps (110 and 110B), taught by our service-learning coordinator. Students meet weekly to reflect on their experiences, discuss readings, and listen to speakers from the community. To complete the service experience, students develop a final paper or project related to civic engagement. The class is available all three quarters and is facilitated by students during the winter and spring. Praxis, College Nine's community-service organization, provides

another way to serve the Santa Cruz community. Praxis students meet weekly and volunteer on the weekends at a variety of locations. Over the spring break students can participate in an Alternative Spring Break Project and earn credit at the same time. Students join forces with local community activists by immersing themselves in the issues and solutions of this multifaceted region of Santa Cruz County.

#### **Students as Teachers and Mentors**

College Nine students have special opportunities to become course assistants, tutors, and student mentors for course credit. Students gain independent experience as teachers leading their own discussion sections of a College Nine course. They receive close supervision that emphasizes a collaborative approach to developing and enhancing teaching, communication, and leadership skills. The College Nine academic advisers can also direct students to other opportunities for student teaching and peer-mentoring programs on campus. These are excellent opportunities to work closely with a faculty member and to develop one's own skills as a teacher and a leader.

#### **Practical Activism: Tools for Local and Global Change**

The annual Practical Activism Conference is a daylong, student-led event featuring keynote speakers, ten workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit [activism.ucsc.edu](http://activism.ucsc.edu) for more information.

#### **Education Abroad**

The UC Education Abroad Program places students at a university in another country for one or more quarters. Studying abroad can be a valuable way to expand one's understanding of the world. Given the international focus at College Nine, students are encouraged (but not required) to develop a second language or to study abroad.

#### **Research Opportunities**

The faculty at UC Santa Cruz are highly ranked for the quality of their research. College Nine students are encouraged to take advantage of the many excellent opportunities available to work closely with faculty as research apprentices. Students will find many internship, independent study, or senior thesis programs in the departments of most majors. The College Nine academic advisers will help link students with these programs.

### **College Nine Pathways to Distinction**

Another feature of College Nine is that qualified students may graduate with College Nine Distinction. This recognition is intended to serve as an incentive for students to pursue activities that are especially apt to help them succeed in college and beyond. Two pathways are possible:

- Research and scholarship. In this pathway, students pursue research with faculty by completing three quarters (15 credits) of work on a senior thesis or a research internship. Students may be recognized with College Nine Distinction if they do a thesis or a research internship in their major on a topic related to international or global issues.
- Language and culture. Students who enroll in at least three quarters (15 credits) in either Education Abroad or a foreign language (or a combination) may qualify for College Nine Distinction.

### **COLLEGE COMMUNITY**

---

Founded in Fall 2000, College Nine is one of the newest colleges at UCSC. College Nine creates an integrated living and learning environment through engaging academic and extracurricular programs focusing on the theme of International and Global Perspectives. Students and staff collaborate to develop an array of programs exploring the many aspects of the college's theme. Some of the programs include faculty presentations, guest speakers, debates, films, arts events, and interactive workshops. These programs unite community members in an atmosphere of mutual respect, in which they discuss important contemporary issues.

#### **College Nights**

College Nights are community programs that feature a special dinner menu, entertainment, and activities that relate to the college theme of International and Global Perspectives. College Nights provide an opportunity to gather as a community several times a quarter to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability, music and dance from around the world, and the global influence of American popular culture. College Nights are held in the Dining Commons and are open to all College Nine students, staff, and faculty.

#### **Student Government**

The College Nine Student Senate serves as the student government for College Nine and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campuswide student governance board. The Senate appoints

students to campus and college committees, consults with college administration on policy development, and provides monetary support to student organizations.

#### **International Living Center**

The International Living Center (ILC) at College Nine offers a unique living environment fostering understanding, cooperation, and friendship among upper-division students from different nations, cultures, and backgrounds. Half of the residents are students from the United States, and the other half are students from various countries around the world. Students reside in the Colleges Nine and Ten Apartments. Based out of the International Living Center, the International Affairs Group (IAG) offers all Colleges Nine and Ten community members the opportunity to engage in lively discussions about important current international issues with one another through guest speakers, film, literature, media, and personal experience.

#### **iFloor**

The iFloor is a residence hall floor made up of a mix of international first-year students and U.S. first-year students who apply to live in this intentional intercultural community housed within the College Nine. This unique community offers residents opportunities to make meaningful, lifelong friendships and connections that extend beyond borders.

#### **Think Global; Act Local**

Think Global; Act Local is College Nine's living-learning community for students who wish to practice the components of service learning. Students living on this floor will have the opportunity to gain knowledge and understanding of important social justice issues occurring in Santa Cruz and in the world at large. Students participate in local service projects several times per quarter and take the time to reflect individually and as a group upon their actions.

#### **Co-curricular Programs and Opportunities**

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group cooperation skills. There are many opportunities at College Nine for student involvement. These include the following groups as well as many other programs, activities, and clubs.

#### **Global Leadership Development (GLAD)**

GLAD meets weekly throughout the fall quarter and provides a wide range of exercises, guest speakers, and programs designed to foster and develop participants' efficacy as world citizens and leaders of College Nine.

#### **CREATE**

## The Colleges

CREATE (Cultural Resources to Educate and to Empower) offers a community at College Nine for students of color to find support and empowerment through mentorship and friendship.

### **Praxis (Student Volunteer Community)**

Praxis is an organization geared toward community building and social justice. By participating in Praxis, students gain exposure to a variety of Santa Cruz community agencies and explore what it means to be agents of social change.

### **Intercultural Community Weekend**

This two-day retreat provides international and U.S. students from diverse backgrounds the opportunity to explore various components of intercultural communication. Through a series of structured exercises and small-group discussions, students share perspectives on intercultural issues, values orientation, and cross-cultural communication. The goal of the workshop is to build community and friendship between international and U.S. students as well as to increase students' understanding of the complexity of communicating across cultures.

### **PHYSICAL SURROUNDINGS**

---

College Nine is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of campus. One of the campus's Instructional Computing

Labs is conveniently located in the Social Sciences 1 Building. A nature preserve serves as College Nine's "backyard." College Nine students have immediate access to hiking, running, and mountain bike trails in the adjacent forest.

Residence halls offer approximately 575 single, double, and triple bedrooms. These fully furnished residence halls include student lounges, recreational spaces, and Internet connections. In addition, there is a state-of-the-art dining hall with an adjoining multipurpose room and recreation lounge for both College Nine and College Ten.

College Nine and College Ten also house approximately 357 upper-division students in apartments, with 170 students in single bedrooms and the balance in double and triple rooms. All apartments have full kitchens, living rooms, bathrooms, and Internet connections. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, e-mail [jhartman@ucsc.edu](mailto:jhartman@ucsc.edu) or visit the [College Nine web site](#).

### **COLLEGE NINE FELLOWS AND STAFF**

---

College Nine faculty fellows are listed [here](#).

College Nine staff are listed [here](#).

---

## COLLEGE TEN

---

**“At College Ten, we strive toward the goals of analyzing, embodying, and implementing ideas that move individuals and society toward a practice of the principle that all people possess equal intrinsic worth.”**

—Flora Lu, College Ten Provost

### **ACADEMIC EMPHASES**

---

College Ten's theme of Social Justice and Community addresses a range of social problems and their impact on society. In particular, the academic and co-curricular programs consider the injustices that many people confront in their lives and possible policies for addressing social, political, and economic inequalities. In addition, the college provides students with opportunities to make their own positive contributions to social change through community involvement or scholarly research.

The college curriculum explores the causes and consequences of social injustice in several ways. Students examine the roots of prejudice, discrimination, and violence directed toward groups based on their

ethnicity, skin color, gender, sexual orientation, religious beliefs, or political views. They also consider the causes and consequences of economic inequality both within the United States and around the world.

### **WRITING SEMINAR**

---

In the first-quarter frosh course, Introduction to University Discourse: Social Justice and Community, students examine current issues pertinent to the college's intellectual theme. Students explore issues such as poverty, discrimination, and economic injustice and the role of communities, governments, and corporations in addressing such societal inequities.

The seminar emphasizes the development of students' reading comprehension and oral and written communication skills. Students write several reflective and analytical papers during the quarter. Each paper undergoes at least one revision after the student receives constructive feedback from the instructor and peers. Thus, the instructors work closely with each student throughout the quarter.

## The Colleges

All students who enter as frosh are required to pass the college writing seminar with a grade of C or better. Those who are admitted as transfer students are exempt from the core course requirement but may choose to take the core course pending available space; lower-division transfer students who, prior to enrolling, have not completed at least one UC-transferable college English composition course with a minimum grade of C (2.0) or better are permitted to take the core course to satisfy the C1 requirement.

### SPECIAL ACADEMIC AND CO-CURRICULAR PROGRAMS

---

Optional programs are available to involve College Ten students in academic and co-curricular activities beyond the first-quarter core course. They are designed to promote students' academic achievement and success by connecting them with faculty mentors and helping them pursue leadership experiences in particular contexts.

#### **Social Justice Issues Workshop**

College Ten students have the option of enrolling in the Social Justice Issues Workshop in winter quarter. This two-credit course meets once per week and can be taken in addition to a regular 15-credit academic load. The workshop offers a small, dynamic learning community in which members explore important issues of personal and cultural identity; social, political, and environmental concerns; and community-mindedness. The class emphasizes small-group experiential learning through structured exercises and group activities, and also includes discussions, film presentations, and guest speakers.

#### **Service Learning: Esprit de Corps (110 and 110B), Praxis, and Alternative Spring Break**

Students can extend their learning beyond the classroom by gaining practical experience volunteering for a school or nonprofit in the Santa Cruz community for credit. Examples include assisting in a classroom or at a homeless shelter. College Ten has its own service-learning class, Esprit de Corps (110 and 110B), taught by our service-learning coordinator. Students meet weekly to reflect on their experiences, discuss readings, and listen to speakers from the community. To complete the service experience, students develop a final project related to civic engagement. The class is available all three quarters and is facilitated by students during the winter and spring. Praxis, College Ten's community-service organization, provides another way to serve the Santa Cruz community. Praxis students meet weekly and volunteer on the weekends at a variety of locations. Over the spring break students can participate in an Alternative Spring Break Project and

earn credit at the same time. Students join forces with local community activists by immersing themselves in the issues and solutions of this multifaceted region of Santa Cruz County.

#### **Practical Activism: Tools for Local and Global Change**

The annual Practical Activism Conference is a daylong, student-led event featuring keynote speakers, 10 workshops, various on-and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit [practicalactivism.org](http://practicalactivism.org) for more information.

#### **Students as Teachers and Mentors**

College Ten students have special opportunities to become course assistants, tutors, and student mentors for course credit. Students gain independent experience as teachers leading their own discussion sections of a College Ten course. They receive close supervision that emphasizes a collaborative approach to developing and enhancing teaching, communication, and leadership skills. The College Ten academic advisers can also direct students to other opportunities for student teaching and peer-mentoring programs on campus. These are excellent opportunities to work closely with a faculty member and to develop one's own skills as a teacher and a leader.

#### **Research Opportunities**

The faculty at UC Santa Cruz are highly ranked for the quality of their research. College Ten students are encouraged to take advantage of the many excellent opportunities available to work closely with faculty as research apprentices. Students will find many internship, independent study, or senior thesis programs in the departments of most majors. The College Ten academic advising teams (including preceptor and provost) will help link students with these programs.

#### **College Ten Pathways to Distinction**

Students are recognized with College Ten Distinction upon successful completion of three quarters (15 credits) of experiential coursework in Service and Leadership and/or Research and Scholarship focused on social justice and diversity issues. Applicable courses in service-learning and research opportunities with faculty can fulfill the criteria for distinction. This recognition is intended to serve as an incentive for students to pursue activities that are apt to help them succeed in college and beyond.

## COLLEGE COMMUNITY

---

Founded in Fall 2002, College Ten is the newest college at UCSC. College Ten creates an integrated living-and-learning environment through engaging academic and extracurricular programs focusing on the theme of Social Justice and Community. Students and staff collaborate to develop an array of programs exploring the many aspects of social justice. Some of the programs include faculty presentations, guest speakers, debates, films, arts events, and interactive workshops. These programs unite community members in an atmosphere of mutual respect, in which they discuss important contemporary issues.

### **College Nights**

College Nights are community programs that feature a special dinner menu, entertainment, and activities that relate to the college theme of Social Justice and Community. College Nights provide an opportunity to gather as a community several times a quarter to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability, music and dance from around the world, and the global influence of American popular culture. College Nights are held in the Dining Commons and open to all College Ten students, staff, and faculty.

### **Student Government**

The College Ten Student Senate serves as the student government for College Ten and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campus wide governance board. The Senate appoints students to campus and college committees, consults with college administration on policy development, and provides monetary support to student organizations.

### **Rumi's Field**

Named after a renowned peace-seeking Sufi poet, Rumi's Field offers a space for students who wish to learn, live and interact, using the skills of Nonviolent Communication and exploring social justice through the lens of nonviolence. Nonviolent Communication (NVC) strengthens one's ability to inspire empathy from others and respond compassionately even under difficult circumstances. This mixed community of College Ten first-year and continuing students will offer the opportunity to engage in dialog and resolve conflict using NVC consciousness as a tool for personal and societal transformation.

### **Co-curricular Programs and Opportunities**

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group

cooperation skills. There are many opportunities at College Ten for student involvement. These include the following groups as well as many other programs, activities, and clubs.

### **CREATE**

The purpose of CREATE (Cultural Resources to Educate and to Empower) is to facilitate the ongoing discussion of diversity issues at College Ten and in our living communities, learn about and promote multiculturalism, plan activities, and help students and staff have a resource for inclusiveness and training.

### **ENGAGE**

ENGAGE (Explore New Growth and Gain Experience) offers students the opportunity to explore and develop their own beliefs, values, and feelings about current issues and social concerns. Students gain leadership skills through collaborating on a community action project, and develop relationships and experience to become leaders in the College Ten community. ENGAGE meets weekly throughout fall quarter.

### **Multicultural Community Weekend**

This two-day retreat provides students from diverse backgrounds the opportunity to explore aspects of social justice, diversity, and community through a series of exercises and discussions (both structured and informal). Participants explore issues impacting our individual identities (e.g., race, class, gender, sexual orientation, ability, religion), increase their understanding of the complexities of communicating across diverse experiences and backgrounds, build communication skills, and share in celebrating and deconstructing the diversity of our community. The Multicultural Community Weekend is optional; students apply for this opportunity in the fall.

## The Colleges

### **Terry Freitas Café**

Located at College Ten, the Terry Freitas Café is a student-run lounge with a long legacy as a favorite gathering place among students. It is open nightly for social justice performances, music, and social interaction. Café student baristas serve coffee and various snacks for a small donation. The café is named after former UCSC student Terry Freitas, who dedicated his life to making the world a more socially just place.

### **PHYSICAL SURROUNDINGS**

---

College Ten is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of campus. One of the campus's Instructional Computing Labs is conveniently located in Social Sciences 1. A nature preserve serves as College Ten's "backyard." College Ten students have immediate access to hiking, running, and mountain bike trails in the adjacent forest. Residence halls offer approximately 600 single, double, and triple bedrooms. These fully furnished residence halls include student lounges, recreational spaces, and Internet connections. In addition, there is a state-of-the-art dining hall with an adjoining game room and Freitas Café, a coffee lounge for both Colleges Nine and Ten. Colleges Ten and Nine also house approximately 350 upper-division students in apartments, with 170 students in single bedrooms and the balance in double and triple rooms. All apartments have full kitchens, living rooms, bathrooms, and Internet connections. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, e-mail [jhartman@ucsc.edu](mailto:jhartman@ucsc.edu) or visit the [College Ten web site](#).

### **COLLEGE TEN FELLOWS AND STAFF**

---

College Ten faculty fellows are listed [here](#).

College Ten staff are listed [here](#).

Revised 09/01/15

---

## PROGRAMS AND COURSES

---

The academic programs offered at UC Santa Cruz are described in detail in this section. Curricula, courses, and degrees listed in this catalog are subject to change through normal academic channels. New proposals and changes are initiated by the relevant departments, divisions, or colleges and approved by the appropriate academic dean and by the Committee on Educational Policy or the Graduate Council. The designations F (fall), W (winter), S (spring), or Summer that appear at the end of each course indicate the intentions of the academic units; however, on occasion, the actual scheduling of classes may change.

For changes and additions to courses listed in this catalog, consult the [Schedule of Classes](#) and [the Class Search](#) published each quarter and available on the web. The Office of the Registrar also provides detailed information on its [web site](#).

---

### COURSE CREDIT

---

Unless otherwise specified in the course description, each course earns 5 quarter credits. Therefore, regardless of course format or scheduling, each course makes approximately equal demands on enrolled students.

All physical education courses are noncredit. Other noncredit courses include certain graduate seminars. Laboratory courses, music courses involving individual lessons or ensemble participation, as well as some special-interest seminars and individual studies courses carry less than 5 credits and are designated accordingly.

The normal UCSC undergraduate program of study is three 5-credit courses per quarter or equivalent. In 12 quarters at UCSC, most students complete 180 credits. With a college's approval, a student may be allowed to vary the course load. See also [Part-Time Program](#).

---

### COURSE NUMBERING

---

Undergraduate courses are classified as lower division or upper division. Lower-division courses (numbered 1–99) are designed for first-year and sophomore students but may be taken by more advanced students. Upper-division courses (numbered 100–199) are designed for junior and senior students but are open to first-year and sophomore students who have sufficient background and the consent of the instructor in charge. Graduate courses (numbered 200–299) are either restricted to graduate students or open only to students

who can show the instructor that they have completed sufficient upper-division coursework basic to the subject matter of the course.

---

### FOOTNOTES

---

Courses marked with an asterisk (\*) will not be offered in the 2015-16 academic year. Courses marked with a dagger (†) will be offered, with the quarter as yet to be determined.

---

### GENERAL EDUCATION CODES

---

The general education codes that appear in some course descriptions are explained in the section on [general education requirements](#).

---

### COURSE FORMAT

---

Most courses at UCSC are taught as lectures or, when the class is small enough for considerable discussion, as seminars. A large number of courses require enrollment in a secondary discussion section scheduled at a different time from the primary course. Sometimes there is laboratory or fieldwork associated with a course.

Occasionally, a student may wish to do an individual project as part of the work for a course. UCSC instructors are usually quite willing to consider and evaluate such work, time permitting.

---

### PREREQUISITE POLICY

---

When applicable, prerequisites are listed in this catalog within the course description for each course. There are many courses that meet general education requirements and do not require a prerequisite.

Prerequisites come in many forms—for example, specific courses, placement examinations, or “satisfaction of the Entry Level Writing and Composition requirement” for writing courses. Some course descriptions also specify that students must be declared majors or seniors in order to enroll. Other course descriptions recommend the appropriate background for a course—for example, “ability to use algebra and solve problems.”

Questions concerning prerequisites should be directed to the instructor of the course or the respective department office. Students who have not met all prerequisites may be excluded from a course. Alternatively, the instructor or a department adviser

## Programs and Courses

may waive the prerequisite based on demonstrated competence or equivalent academic experience.

---

### CLASS SIZE

---

A student's class level plays a large part in how many small classes are available. Introductory classes tend to be large, although they are usually accompanied by required small sections or laboratories. Many small classes have prerequisite courses that enroll large numbers of students. Also, certain large classes fulfill campuswide general education requirements. First-year students experience at least one small seminar in conjunction with the college core course, and they are likely to experience an increasing proportion of small classes as they progress to senior status.

---

### INDIVIDUAL STUDY

---

Especially in the upper division, students are encouraged to devise special courses to pursue independently, under the guidance of faculty members. A study plan should be discussed with a faculty member in the general subject area of interest. This faculty member will ultimately be responsible for evaluating the work done. The study plan must also be approved by the course sponsoring agency; it should be noted that not all proposed plans are accepted.

---

### FIELD STUDY

---

Independent, off-campus field study is available through many departments. It is handled in much the same way as individual study. In addition, there are several established field programs that offer a variety of full- or part-time, off-campus, field placements as part of the regular program of academic study. For more information on these programs, see [Field and Exchange Programs](#) in the Undergraduate Academics section.

---

### APPRENTICE TEACHING

---

An upper-division or graduate student may apply for approval to teach an undergraduate seminar of his or her own design. The seminar is supervised by a faculty member and carries normal academic credit for the students and the apprentice teacher. Interested students should initiate a proposal with a faculty member in the appropriate subject area.

---

### CREDIT BY PETITION

---

Regularly enrolled students may obtain full academic credit for a course by challenging the course. Challenging the course entails passing an examination or completing an appropriate body of work supervised by a regular instructor for the course. The petition for such credit must be approved by the instructor of the course, the chair of the department offering the course (or provost, if it is a course offered by a college), and the provost of the student's college. Some courses are not considered appropriate for credit by petition.

For foreign language students, credit by petition may not be used by students whose language ability greatly exceeds the course level proposed for challenge. Petitions for credit for levels 4 and 5 cannot be filed in the same quarter. Contact the Language Program, 239 Cowell, 459-2054, for more information.

---

### AUDITING OF CLASSES

---

Instructors may permit nonenrolled students to attend their classes when space is available after all students who wish to enroll officially have done so. An instructor is not obligated to devote time to the work of students who are not officially enrolled in the class.

---

# ACADEMIC ENGLISH

---

2015-16 General Catalog

Department of Languages and Applied Linguistics

218 Cowell College

(831) 459-2054

<http://language.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The Department of Languages and Applied Linguistics offers a series of courses in Academic English (ACEN) designed specifically for students whose native language is not English, and who would benefit academically by improving their English language skills. The main objective of these courses is to raise the linguistic, academic, and cultural competence of international students who are currently pursuing

various majors at UCSC. The ACEN courses help students develop and refine their knowledge of English usage, advanced grammar, vocabulary and idiomatic expressions, while at the same time developing their listening, oral communication, and academic reading and writing skills. The specific content of each course varies per quarter, and thus, none of the courses are prerequisites to the others.

---

## ACADEMIC ENGLISH COURSES

---

### UPPER-DIVISION COURSES

---

#### **110A. Advanced Academic English 1.**

Students develop an academic vocabulary and successful reading strategies in English in order to understand high-level academic texts. Students also practice pronunciation and apply the rules of grammar to written and spoken academic language through weekly oral presentations and written assignments. Enrollment by instructor consent only. Enrollment restricted to international students. The Staff

#### **110B. Advanced Academic English 2.**

Students continue to develop an academic vocabulary (e.g.,

collocations, idiomatic expressions), which is a significant contributor to successful academic reading and writing. Students also practice complex sentence structures in written and spoken language through weekly oral presentations and written assignments.

Enrollment by instructor consent only. Enrollment restricted to international students. The Staff

#### **110C. Advanced Academic English 3.**

Students continue to develop an academic vocabulary, and practice reading and writing complex sentences in English with a high level of grammatical and stylistic accuracy. Students also increase their oral fluency and pragmatic

skills and their awareness of second-language learning. Enrollment by instructor consent only. Enrollment restricted to international students. The Staff

#### **110D. Advanced Academic English 4.**

Students continue to develop an academic vocabulary, and practice reading and writing complex essays in English with a high level of grammatical and stylistic accuracy. Students also continue to increase their oral fluency, pragmatic skills, and awareness of second-language learning. Enrollment by instructor consent only. Enrollment restricted to international students. The Staff

# ANTHROPOLOGY

---

2015-16 General Catalog  
361 Social Sciences 1 Building  
(831) 459- 3320  
<http://anthro.ucsc.edu/>

---

## PROGRAM DESCRIPTION

---

Anthropology studies people throughout the world and through time. Because it covers a wide range of topics— physical evolution, material remains of the past, and the world that humans create through their ideas and practices in present-day societies— anthropology is an especially integrative discipline. The anthropology program at UCSC offers courses that reflect the diversity of the field.

Cultural anthropology explores the movements of people, objects, and ideas in diverse societies, including our own. Cultural anthropology courses examine such topics as race and ethnicity, medicine, science, gender, sexuality, the environment, religion, law, popular culture, and politics.

Archaeology uses the material evidence of human activities to understand past human lives. Archaeology at UCSC focuses on past people's interactions with one another at the local level and within their wider social and ecological contexts. Faculty research areas include the pre-colonial and early post-colonial history of East Africa and the American Southwest.

Physical/biological anthropology traces the human journey from its beginnings in Africa over five million years ago. Physical anthropology courses look at fossil evidence, evolutionary theory, human variation, and the behavior of primate relatives in order to analyze biological, social, and cultural changes over time.

UCSC students have the opportunity to do independent library and field research in cultural anthropology, archaeology, and physical anthropology. Laboratory courses in archaeology and physical anthropology offer practical experience in the analysis of biological and cultural materials. In cultural anthropology courses, students learn to carry out anthropological research through interviews, participant observation, surveys, the collection of oral histories, and the interpretation of archives.

Because anthropology is concerned with understanding human interaction, it is a useful major for anyone planning a career that involves working with people, especially those from diverse cultures. Some UCSC anthropology graduates are in social work, many are in

teaching, and others pursue careers in law, city planning, politics, medicine, public health, cultural resource management, and journalism. Students intending to specialize in anthropology usually go on to graduate school because professional employment in the field almost always demands an advanced degree.

Most anthropology faculty have their offices in Social Sciences 1 Building. Social Sciences 1 also houses the Visual Culture Research Laboratory and laboratories for archaeology and physical anthropology where space is provided for laboratory and individual studies courses and for collections of mammalian skeletal material, casts of fossil hominids, ceramics, stone tools, and other archaeological artifacts.

The Anthropology Society, a campus club, is open to all students interested in anthropology. The Anthropology Colloquium showcases guest speakers and gives faculty and students an opportunity to discuss new approaches to anthropological questions. Students and faculty interested in archaeology also gather informally at the Archaeology/Physical Anthropology Lunch forum to share information on fieldwork and employment opportunities.

---

## PROGRAM LEARNING OUTCOMES

---

A student who graduates with a B.A. in Anthropology has the following knowledge and skills:

### CORE CONCEPTS IN ANTHROPOLOGY

---

The student demonstrates understanding of the core concepts in three primary subfields of anthropology: cultural anthropology, archaeology, and physical anthropology.

### KNOWLEDGE OF CULTURAL DIFFERENCES

---

The student demonstrates knowledge of cultural variation and the diversity of perspectives, practices, and beliefs found within each culture and across cultures.

### INTEGRATION OF SUBFIELDS

---

The student integrates cultural, biological, and archaeological perspectives on human bodies, behavior, and institutions.

## Anthropology

### WRITTEN COMMUNICATION

---

The student demonstrates the ability to write clearly and to formulate well-organized arguments that are grounded in supporting evidence while countering evidence that contradicts the student's claims.

### ORAL COMMUNICATION

---

The student is able to organize ideas and information and articulate them effectively.

### RESEARCH AND ANALYTICAL SKILLS

---

The student demonstrates knowledge of the basic steps involved in scholarly research, including locating and critically evaluating scholarly and other information sources relevant to the chosen topic. The student can recognize and demonstrate a basic understanding of research methods used in the various subfields of anthropology, including—but not limited to—participant observation, thick description, laboratory and field analysis, and interviewing.

### UNDERSTANDING OF LONG-TERM CHANGES IN HUMAN BEHAVIOR AND CONDITIONS IN DEEP TIME

---

The student has a grasp of long-term changes in the conditions that have shaped humans and the environments they inhabit.

## UNDERGRADUATE HANDBOOK

---

All undergraduate majors should obtain a copy of the Anthropology Department undergraduate handbook from the department web site. It outlines information on department procedures and requirements, program planning, independent study, faculty interests, and campus resources for anthropology majors.

## ADMISSION INTO THE MAJOR

---

In order to qualify for the major, students must have received a "C" or better in at least one lower-division anthropology course (ANTH 1, 2, or 3) and have either received a "C" or better in a second lower-division anthropology course or be enrolled in a second lower-division anthropology course at the time of declaration.

## REQUIREMENTS OF THE MAJOR

---

The Anthropology Department urges students to seek faculty advice early in planning for the major. Faculty hold regular office hours weekly and encourage students to come in to talk about their program or coursework. Peer advisers are also available.

The anthropology major incorporates the three anthropological subfields of archaeological archaeology, cultural anthropology, and

physical/biological anthropology, while providing undergraduates with a solid grounding in theory and methods.

Students do **not** declare an emphasis or concentration within the anthropology major. All students therefore are general anthropology majors and complete the same requirements. However, students can choose to take additional courses in a specific area of anthropology while completing the upper-division anthropology electives required for the major, or by choosing to take courses above and beyond what is required for the major.

To graduate with an anthropology major, students must successfully complete the following courses:

### THREE LOWER-DIVISION COURSES

---

ANTH 1: Introduction to Biological Anthropology

ANTH 2: Introduction to Cultural Anthropology

ANTH 3: Introduction to Archaeology

### TEN UPPER-DIVISION COURSES

---

one course in physical/biological anthropology **or** archaeology

one course in ethnographic area studies

one course in sociocultural anthropology

one course in anthropological theory

five anthropology electives (any additional upper-division anthropology courses)

One senior comprehensive requirement, which can be satisfied in **one** of three ways:

Senior Seminar (usually courses numbered ANTH 194)

Graduate Seminar (200-level course), enrollment by petition only

Senior Thesis, plus one additional elective; enrollment by petition only

Students must also complete the Disciplinary Communication (DC) Requirement.

### Anthropological Theory Courses

100 History and Theory of Physical Anthropology

150 Communicating Anthropology

152 Survey of Cultural Anthropological Theory

170/270 History of Archaeological Theory

### Sociocultural Anthropology Courses

**Note: Not all of these courses are offered each year**

119 Indigenous Visual Culture

120 Culture in Film

121 Socialism

122 Postsocialism

## Anthropology

- 123 Psychological Anthropology
- 124 Anthropology of Religion
- 126 Sexuality and Society in Cross-Cultural Perspective
- 127 Ethnographies of Capitalism
- 128 Contemporary American Evangelical Culture
- 129 Other Globalizations: Cultures and Histories of Interconnection
- 131 Women in Cross-Cultural Perspective
- 132 Photography and Anthropology
- 133 Narratives of the Popular
- 134 Medical Anthropology
- 135A Cities
- 136 The Biology of Everyday Life
- 137 Consuming Culture
- 138 Political Anthropology
- 139 Language and Culture
- 140 Art, Artist, Artifact
- 141 Developing Countries
- 142 Anthropology of Law
- 143 Performance and Power
- 144 Anthropology of Poverty and Welfare
- 145X Special Topics in Socio-Cultural Anthropology
- 146 Anthropology and the Environment
- 148 Gender and Global Development
- 151 Workshop in Ethnography
- 153 Medicine/Colonialism
- 154 Multimedia Ethnography
- 157 Modernity and Its Others
- 158 Feminist Ethnographies
- 159 Race and Anthropology
- 160 Reproduction and Population Politics
- 161 The Anthropology of Food
- 162 Anthropology of Displaced Persons
- 163 Kinship
- 164 Anthropology of Dance
- 165 Anthropological Folklore
- 166 States, Bureaucracies, and Other Cosmological Propositions

### **Ethnographic Area Studies Courses**

**Note: Not all of these courses are offered each year**

- 130A Peoples and Cultures of Africa
- 130B Brazil
- 130C Politics and Culture in China

- 130E Culture and Politics of Island Southeast Asia
- 130F African Diasporas in the Americas
- 130G Asian Americans in Ethnography and Film
- 130H Ethnography of Russia and Eastern Europe
- 130I Cultures of India
- 130J Politics and Statemaking in Latin America
- 130L Ethnographies of Latin America
- 130M Inside Mexico
- 130N Native Peoples of North America
- 130T Anthropological Approaches to Islam
- 130U Central America
- 130V Ethnography of Russia
- 130W Ethnography of Eastern Europe
- 130X Special Topics in Ethnography

### **Physical/Biological Anthropology and Archaeology Courses**

**Note: Not all of these courses are offered each year**

- 101 Human Evolution
- 102A Human Skeletal Biology
- 103 Forensic Anthropology
- 103B Forensic Anthropology and Bioarchaeology
- 104 Human Variation and Adaptation
- 105 Human Paleopathology
- 106 Primate Behavior and Ecology
- 107 Methods and Research in Molecular Anthropology
- 111 Human Ecology
- 112 Life Cycles
- 171 Materials and Methods in Historical Archaeology
- 172 Archaeological Research Design
- 173 Origins of Farming
- 174 Origins of Complex Societies
- 175A African Archaeology
- 175B African Archaeology: Development
- 175C African Diaspora Archaeology
- 176A North American Archeology
- 176B Meso-American Archaeology
- 176C Archaeology and the American Southwest
- 176D Colonial Encounters in the Americas
- 176E Archaeology of the Pacific Northwest
- 177 European Conquest of the Americas
- 178 Historical Archaeology: A Global Perspective
- 180 Ceramic Analysis in Archaeology
- 182A Lithic Technology

## Anthropology

- 184 Zooarchaeology
- 185 Osteology of Mammals, Birds, and Fish
- 187 Cultural Heritage in Colonial Contexts
- 189 Archaeology Field Course
- 190X Special Topics in Archaeology/Physical Anthropology

### **Anthropology At-Large Courses**

**Note: Not all of these courses are offered each year**

Anthropology At-Large courses may be used as electives for completing upper-division course requirements. These courses do not count as anthropological theory, sociocultural anthropology, ethnographic area studies, or physical/biological anthropology and archaeology courses.

- 110A Contemporary Issues
- 110B Archaeology as Pop Culture
- 110E Global Environmental Change
- 110F Biocultural Approaches to Food
- 110G Barrio Popular Culture
- 110H Acoustic Culture
- 110K Culture through Food
- 110L Anthropology of Life
- 110O Postcolonial Britain and France
- 110Q Race and the Performing Arts
- 110P India and Indian Diaspora Through Film
- 110R Discourses in American Religions and Their Role in Public Life
- 110T Motherhood in American Culture
- 110V Anthropology of Violence and Conflict
- 110W Land and Waterscapes Entropology
- 110X Toxic Environments

---

### EXIT REQUIREMENT

---

Students can fulfill the senior comprehensive requirement in anthropology either by passing an advanced senior seminar (194-series course, 190ABC, or 196AB), by writing an acceptable independent senior thesis, or by passing an approved graduate-level topical seminar in anthropology.

Senior seminars are small, writing-intensive classes focusing on advanced topics in anthropology. The prerequisite for admission to a senior seminar is successful completion of courses 1, 2, and 3; senior seminars are restricted to senior anthropology majors.

Students considering an independent thesis must arrange for the sponsorship and support of a faculty member before beginning research. An independent senior thesis (not written within a senior seminar)

should be based on original research and reflect the student's understanding of fundamental theories and issues in anthropology. The thesis should be comparable in content, style, and length (generally 25–30 pages) to a professional journal article in its subfield.

Students who intend to satisfy the exit requirement by taking a graduate seminar must first get permission from the department. Not all graduate seminars are appropriate for fulfilling this requirement. Students who take a graduate-level course to fulfill the theory requirement may not use this course to satisfy the exit requirement.

All majors, including double majors, must prepare a program of study in consultation with a member of the Anthropology Department. A combined major in anthropology and Earth and planetary sciences, leading to a bachelor of arts (B.A.) degree, is also offered; for that program description, see Earth and Planetary Sciences. Students going on to graduate school should plan course schedules in close consultation with faculty advisers.

Many anthropology majors whose studies emphasize archaeology have benefited from concurrent study in the Cabrillo College Archaeological Technology Certificate Program. This vocational certification program is sponsored entirely by Cabrillo College, but credit for its summer field survey and excavation component may be transferred for credit at UCSC. Although courses in the Archaeological Technology Certificate Program do not count toward the UCSC anthropology major, students who have obtained the certificate in tandem with their bachelor's degree in anthropology have expanded their employment and advanced degree program opportunities. Students interested in exploring this possibility are encouraged to consult with UCSC archaeology faculty and to visit the program's web site at <http://www.cabrillo.edu/academics/anthropology/>.

### **Senior Seminars**

**Note: Not all of these courses are offered each year.**

- 194A Anthropology of Dead Persons
- 194B Chimpanzees: Biology, Behavior and Evolution
- 194C Feminist Anthropology
- 194D Tribes/Castes/Women
- 194E Belief
- 194F Memory
- 194G Politics and Secularism
- 194H Paleoanthropology
- 194I Consumption and Consumerism
- 194K Reading Ethnographies

## Anthropology

- 194L Archaeology of the African Diaspora
- 194M Medical Anthropology
- 194N Comparison of Cultures
- 194O Masculinities
- 194P Space, Place, and Culture
- 194Q Race, Ethnicity, Nation
- 194R Religion, Gender, Sexuality
- 194S The Anthropology of Sound
- 194T Poverty and Inequality
- 194U Environmental Anthropology: Nature, Culture, Politics
- 194V Picturing Cultures
- 194W The Anthropology of Social Movements
- 194X Women in Politics: A Third World Perspective
- 194Y Archeology of Space and Landscape
- 194Z Emerging Worlds
- 196C Traveling Cultures
- 196D Food and Medicine
- 196E Pastoralists Past and Present
- 196F The Anthropology of Things: Gift, Sign, Commodity, Tool
- 196G Advanced Topics in Folkloristics
- 196H Global History and the Longue Durée
- 196I Hard Problems
- 196J Imagining America
- 196K Settler Colonialism
- 196L Archaeology of the American Southwest
- 196M Modernity and Its Others
- 196T Archaeology of Technology

Two-credit courses do not count toward the 10 upper-division courses required for the major. Only one 5-credit individual studies course (197, 198, or 199) may be counted toward the 10 required upper-division courses. Course 107L does not count toward the 10 upper-division courses required for the major. Theory courses can only be counted toward the theory requirement or an upper-division elective.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Anthropology's DC requirement aims especially at cultivating high-level skills in critical and ethnographic writing. To satisfy the DC requirement students must: a) complete an Anthropological Theory Course (chosen from ANTH 100, 150, 152, 170, 270)

and; b) complete a Senior Seminar or complete an Independent Senior Thesis, following the guidelines of the senior exit requirement. Students who take 270 to fulfill the theory/DC requirement may not use the course to satisfy the senior exit requirement. Please refer to the Undergraduate Handbook for details.

---

### TRANSFER STUDENTS

---

If possible, transfer students should complete lower-division requirements for the major before coming to UCSC by taking classes equivalent to courses 1, 2, and 3. Department policy also allows students to petition up to 10 quarter credits (equivalent to two UCSC courses) of upper-division transfer credit toward the major requirements. Any courses completed at the community college level are not considered to be upper-division courses. Transfer students should bring an unofficial copy of all pertinent transcripts to the undergraduate adviser in the department office (361 Social Sciences 1 Building) as soon as possible after reaching campus so that prerequisites can be verified and course enrollment can proceed smoothly.

---

### PEER ADVISERS

---

The Anthropology Department has instituted a peer adviser program as a supplement to academic advising offered by faculty members. The peer advisers are juniors and seniors who have been trained to help students with questions and general guidance through the anthropology major. Peer advisers hold regularly scheduled office hours in the department office.

---

### HONORS

---

The Anthropology Department awards honors in the major and highest honors in the major based on a ranked departmental grade-point average (GPA) that is calculated using all upper-division courses taken in the major with the exception that only one independent-study course can be used in this calculation. For students who have taken multiple independent-study courses in the department, the independent-study course that has the highest grade is used for the calculation. Approximately 15 percent of the graduating class is considered for honors based on their cumulative (GPA) through the quarter before graduation. The criteria for awarding highest honors in the major are overall superlative performance in the major and general breadth of excellence across the subfields of anthropology. Receiving honors on the senior exit requirement is also considered as a factor in awarding highest honors, but is not always

## Anthropology

determinative. When applicable, narrative evaluations can be taken into consideration for highest honors.

---

### MINOR REQUIREMENTS

---

The UCSC minor in anthropology has a total of 10 courses required: **three lower-division and seven upper-division courses**. There is no theory course or senior comprehensive requirement for the minor in anthropology.

#### Three Lower-Division Courses

ANTH 1: Introduction to Biological Anthropology

ANTH 2: Introduction to Cultural Anthropology

ANTH 3: Introduction to Archaeology

#### Seven Upper-Division Courses

one course in physical anthropology **or** archaeology

one course in ethnographic area studies

one course in sociocultural anthropology

four anthropology electives (any additional upper-division anthropology courses, no independent study courses)

Independent study courses cannot be used toward completion of the minor.

For more information regarding department policies, please consult the undergraduate adviser at the Anthropology Department office, 361 Social Sciences 1 Building. A handbook on the anthropology program is available on the anthropology web site <http://anthro.ucsc.edu/>.

---

### ANTHROPOLOGY/EARTH SCIENCES COMBINED MAJOR REQUIREMENTS

---

The Anthropology Department also collaborates with the Earth and Planetary Sciences Department to offer a combined major, which leads to a B.A. in anthropology/Earth sciences.

The anthropology/Earth sciences combined major is designed for students with strong interests in Earth sciences and in the laboratory-based subfields of anthropology. This includes anthropology students who are interested in archaeology or paleoanthropology and desire more intensive training in the natural sciences, and Earth sciences students who are interested in paleobiology or archaeology. The combined major allows students to receive a strong grounding in both disciplines without pursuing a double major or major/minor in the two departments. This program will permit anthropology/Earth sciences majors to enter graduate programs in Earth sciences, archaeology

or paleoanthropology with extraordinarily well-developed geological knowledge and skills.

Anthropology-based students in the combined major are encouraged to augment the science-rich required curriculum with upper-division courses in cultural anthropology.

#### Eleven Lower-Division Courses

Anthropology 1 – Introduction to Biological Anthropology

Anthropology 2 – Introduction to Cultural Anthropology

Anthropology 3 – Introduction to Archaeology

Earth Sciences 5/5L **or** Earth Sciences 10/10L **or** Earth Sciences 20/20L

Mathematics 11A **or** 19A

Mathematics 11B **or** 19B

**Five** lower-division cognate science courses from the following: Chemistry 1A, Chemistry 1B/M, Chemistry 1C/N, Physics 6A/L, Physics 6B/M, Biology 20A, Biology 20B, Biology 20C

#### Eight Upper-Division Courses

Earth Sciences 110A/L – Evolution of the Earth

Any **three** Earth Sciences upper-division electives (must be 5-credit courses)

Any **four** Anthropology upper-division electives from the physical anthropology or archaeology concentrations (must be 5-credit courses)

**One Senior Comprehensive Requirement** (choose one of the following)

Anthropology 194 – Any Senior Seminar in Physical Anthropology or Archaeology (by petition)

Earth Sciences 188A-B - Summer Field Internship

Senior Thesis (by petition only)

Any approved Earth science field program (by petition only)

Students must coordinate with both the Earth and Planetary Sciences Department **and** the Anthropology Department to complete the combined major.

Faculty Adviser in Anthropology: Judith Habicht-Mauche, [judith@ucsc.edu](mailto:judith@ucsc.edu)

Faculty Adviser in Earth Sciences: Paul Koch, [plkoch@ucsc.edu](mailto:plkoch@ucsc.edu)

Anthropology Undergraduate Adviser: Christina Domitrovic, [cdomitro@ucsc.edu](mailto:cdomitro@ucsc.edu)

Earth Sciences Undergraduate Advising: [epsadvising@ucsc.edu](mailto:epsadvising@ucsc.edu)

---

## GRADUATE PROGRAM

---

The anthropology doctoral program at UCSC consists of two tracks: cultural anthropology and anthropological archaeology. The majority of students are admitted to the cultural anthropology program. Smaller numbers of students are admitted to the anthropological archaeology program. Admission to the physical anthropology program described below has been suspended indefinitely.

Although applicants are accepted only for the doctor of philosophy (Ph.D.) program, students may obtain a master of arts (M.A.) degree after fulfilling specific requirements during the first two years.

The theme of emerging worlds—culture and power after progress—unites the research interests of many faculty in the cultural anthropology graduate program at UCSC. In recent years, anthropology's central concept of culture has been subjected to extraordinary ethnographic and theoretical pressures. Across the social sciences, scholars are responding to emergent scientific and social dilemmas by turning to the concept of culture and the ethnographic method. Such disciplinary turns grow from a challenging new set of social configurations, which affect both scholarly and lay understandings of the present, past, and future: the demise of certainties about progress and modernization and the need to understand newly emergent worlds. Nineteenth- and 20th-century ideas of progress and programs of modernization both created the concept of culture and relegated it to a nostalgic role as backward-looking sentiment. Anthropologists studied “vanishing worlds.” In the past 30 years, however, such certainties have been challenged. Grand theories of human behavior that depended on the idea of a universal man have begun to fray around the edges. Heterogeneity and disjuncture have caught the attention of a wide range of social scientists, calling out for ethnographic investigation. In this context, scholarly discussions have turned toward culture, the world-making networks, geographies, innovations, meanings, and assemblages that are carrying us into the future.

Our concentration on “emerging worlds” and on the construction of anthropological knowledge is especially well suited for drawing together diverse scholars and specialists in challenging and enriching conversations. Rather than reproduce the boundaries among the traditional subfields of anthropology, we explore how recombination of these approaches can elucidate specific anthropological problems.

The Ph.D. program in anthropological archaeology focuses on the archaeology of late pre-colonial societies

in East and West Africa, Latin America, and western North America, especially the Southwest, California, and Pacific Northwest. The program also features an emerging concentration on the archaeology of colonial encounters among peoples of Europe, Africa, the Caribbean, and the Americas. It is distinctive in insisting that theories of power, production and exchange, human ecology, gender, ethnicity, and technological practice be explored through rigorous laboratory and field research methods.

---

## ANTHROPOLOGY PH.D. REQUIREMENTS

---

Both the department and the university define the major requirements for each stage of study. The first year of the program is geared toward giving students a theoretical foundation so that they may begin to formulate ideas for a research project. All graduate students are expected to be in residence (on campus) during their first year in the program. At the end of the first year, students will submit a portfolio of substantive work to their Preliminary Committee.

---

### RESIDENCY REQUIREMENT

---

The minimum residency requirement for a Ph.D. degree at UCSC is six quarters. To receive a degree from UCSC, students must be registered at the Santa Cruz campus for at least three of the six quarters. A minimum of one quarter in residence is required between Advancement to Candidacy and the awarding of the degree.

---

### GOOD ACADEMIC STANDING AND PROBATION

---

A duly registered graduate student is considered to be in good standing so long as the student's department determines that he or she is making satisfactory progress toward a terminal degree. The department and the graduate dean review the academic progress of each continuing graduate student annually.

If the Anthropology Department deems a student's work unsatisfactory, he or she may be placed on probation. A student whose academic progress has been found unsatisfactory in two successive annual reviews will be subject to dismissal from the University.

Recommended probation for a student states:

Reason why (failed X class, etc.)

Steps that must be taken to restore satisfactory academic standing

The timeline for completion of the required work

The letter to the student will state that the failure to meet any one of the requirements may result in dismissal. No action for dismissal is taken until and unless the department recommends dismissal.

## Anthropology

A student who has completed 12 or more quarters of full-time work in the same graduate program without advancing to candidacy for the Ph.D. is not considered to be making satisfactory progress. In such cases, the student will be recommended for dismissal or placed on probation until advancement is achieved. A student advanced to candidacy for more than nine quarters who has yet to complete his or her Ph.D. is not considered to be making satisfactory academic progress. Consult the Graduate Student Handbook for more information about academic progress, probation, dismissal, and the appeal process.

### CULTURAL TRACK REQUIREMENTS

---

Students are expected to pass a first-year review and have advanced to Ph.D. candidacy by the end of their third year. In order to advance to candidacy in cultural anthropology, students must complete:

#### Core Courses

---

Must be completed in Fall/Winter of first year in program.\*

200A Core Course

200B Core Course

\* ANTH 252, Survey of Cultural Anthropology, is recommended if student comes from a non-anthropological background.

#### Ethnographic Writing Requirement

---

This requirement may be completed by passing Ethnographic Practice, (ANTH 208A) or, upon approval from the department, through an independent research project in which the student engages in research based on participant observation or other ethnographic methodology and in which the student adequately translates that research experience into a written text.

#### Three Additional Graduate Seminars

---

Grant Writing (ANTH 228), Colloquia (ANTH 292), Independent Study (ANTH 297/299), and tutorials do not count toward this requirement. Tutorials that are taught in conjunction with undergraduate courses do not count toward this requirement.

214 Culture and Power

219 Religion, State, Secularities

220 Cartography of Culture

224 Anthropology of Secularism

225 The Anthropology Of Things: Sign, Gift, Commodity, Tool

229 Constructing Regions

230 Bodies/Images/Screens

231 Intimacy and Affective Labor

232 Body/Knowledge/Practice

234 Feminist Anthropology

235 Language and Culture

236 On Insults

238 Advanced Topics in Cultural Anthropology

241 Social Justice

243 Cultures of Capitalism

247 Critical Perspectives On Nutrition

248 Shadowy Dealings: Anthropology Of Finance, Money, And Law

249 Ecological Discourses

253 Advanced Cultural Anthropological Theory

254 Medicine and Culture

255 Regulating Religion/Sex

258 Experimental Cultures

259 Race in Theory and Ethnography

260 Anthropology of Freedom

261 Replication, Mimesis, and Fakery

262 Documenting Cultures

267A Science and Justice: Experiments in Collaboration

267B Science and Justice Research Seminar

268A Rethinking Capitalism

268B Rethinking Capitalism

269 Global History and the Longue Durée

### Complete Language Requirement

### Pass the Qualifying Examination

### ARCHAEOLOGY TRACK REQUIREMENTS

---

Students are expected to pass a first-year review and have advanced to Ph.D. candidacy by the end of their third year. In order to advance to candidacy in archaeology, students must complete:

#### Two Core Theory Courses

Must be completed during first year in the program.

270 History Of Archaeological Theory

270B Current Directions in Archaeological Theory

#### Two Research Methods/Laboratory Courses

Student may substitute courses in another department with adviser approval.

202A Skeletal Biology

280 Ceramic Analysis

280L Ceramic Analysis Laboratory

285 Osteology of Mammals, Birds, Fish

## Anthropology

### **Two Courses on the Archaeology of a Geographical, Temporal, or Topical Area:**

Student may substitute courses in another department with advisor approval.

275A Seminar on Early African Archaeology

275B Tutorial in Archaeology of African American Complex Societies

276A Advanced Topics in North American Archaeology

276B Mesoamerican Archaeology

287 Advanced Topics in Archaeology

273 Advanced Topics in Origins of Farming

274 Advanced Topics in Archaeology of Complex Societies

### **Two Additional Graduate Seminars**

Students may substitute a graduate seminar in cultural or physical anthropology or in another department with advisor approval. Tutorials that are taught in conjunction with undergraduate courses do not count toward this requirement.

225 The Anthropology Of Things: Sign, Gift, Commodity, Tool

279 Feminism and Gender in Archaeology

282 Household Archaeology

### **One Course in Grant Writing or Research Design**

228 Grant Writing (Cultural Anthropology)

272 Advanced Archaeological Research Design

### **One General Course in Quantitative Methods in the Social, Environmental, or Biological Sciences**

This course is usually completed in another department. Students should consult with an adviser about the appropriate course. Possible options include Psychology 2, Applied Mathematics and Statistics 7, or a course in spatial statistics.

### **Two Laboratory Apprenticeships**

298 Advanced Lab Apprenticeship

### **Complete Language Requirement**

#### **Pass the Qualifying Examination**

REQUIRED FOR ALL ANTHROPOLOGY PH.D. STUDENTS

#### **Language Requirement**

---

The foreign language requirement must be fulfilled before taking the qualifying examination. A qualifying examination cannot be scheduled until the requirement has been met.

It is the responsibility of each graduate student to work with the Preliminary Committee to identify the

language competencies necessary for fieldwork and scholarship and to initiate study toward meeting these needs. To meet the language requirement, competence in one language must be formally demonstrated. Each student's adviser will recommend how this requirement should be met, as well as what additional skills should be sought. Generally accepted ways of meeting the language requirement include:

Passing a standardized test at a predetermined level

Taking and passing a translation examination administered by an appropriate member of the UCSC faculty or an outside assessor approved by the adviser

Taking and passing a series of language courses at a specified advanced level at UCSC or elsewhere, again, to be determined in consultation with the adviser

In some cases, the language in which a relevant scholarly literature exists will be the logical language of examination. In other cases, the language in which fieldwork will be conducted will be the most logical language for examination.

In the case of non-native English speakers who plan to undertake research in their own native language, English can meet the foreign language requirement. In the case of English native speakers who plan to do research in their native language, the requirement should be met by another language relevant to the field research or scholarly resources.

---

## QUALIFYING EXAMINATION

---

The qualifying examination consists of two parts: a written file and a three-hour oral examination with the Qualifying Examination (QE) Committee during which the student presents and discusses the file.

For cultural track students, the file includes:

A theoretically focused dissertation research prospectus (approximately 18-25 pages, double-spaced, actual length to be determined by QE committee).

Two field statements on two anthropological topics selected and developed in consultation with the QE committee. Field statements typically review fields of literature that have (a) an area/regional focus and (b) a thematic/theoretical focus (approximately 10-15 pages, double-spaced, each; actual length to be determined by QE committee).

For archaeology track students, the file includes:

A theoretically-focused dissertation research prospectus (approximately 18-25 pages, double-spaced, actual length to be determined by the QE Committee).

Three field statements reviewing literature on (a) a geographic cultural area, (b) a set of research methods, and (c) a theoretical tradition or theme.

## Anthropology

---

### DISSERTATION

---

Ph.D. candidates must prepare and submit a dissertation that is based on original research and meets the requirements of their dissertation reading committee.

---

### DESIGNATED EMPHASIS

---

#### COMMITTEE COMPOSITION

---

One member of the student's qualifying examination committee must be a faculty member of the anthropology department. In addition, one member of the anthropology department must serve on the student's doctoral thesis committee.

---

#### COURSE REQUIREMENTS

---

The student must take four graduate courses in anthropology, one of which must be a graduate seminar. An independent study with a faculty member of the Anthropology Department may count as only one of the four courses. Grant Writing (ANTH 228) may not be counted toward these requirements. Tutorials that

are taught in conjunction with undergraduate courses do not count toward these requirements.

---

### WRITING REQUIREMENTS

---

At the time of the qualifying examination, the student must submit to the Anthropology Department a full statement, up to five pages, summarizing the pre-qualifying examination work done in anthropology (courses, papers, research projects, independent studies) and characterizing how that work and the dissertation to follow draw from and contribute to anthropological and ethnographic inquiry. The dissertation research will normally include a fieldwork component.

In the quarter in which the student announces candidacy for graduation, the faculty member from the anthropology department serving on the student's doctoral thesis committee will evaluate the depth of engagement with anthropology displayed in the doctoral thesis and decide whether the thesis fulfills the requirement to contribute to anthropological and ethnographic inquiry

---

## ANTHROPOLOGY FACULTY AND PROFESSIONAL INTERESTS

---

---

### PROFESSOR

---

**Donald Brenneis**

Linguistic anthropology, folklore, legal anthropology, ethnomusicology, overseas Indians, South Asia, disputing and dispute management, legal language, bureaucratic institutions, knowledge production, improvisation

**Melissa L. Caldwell**

Poverty and public health; welfare, charity, and assistance; food and consumption; gardens, nature, and landscapes; religion; socialism and postsocialism; Russia, the former Soviet Union, and Eastern Europe

**Nancy N. Chen**

Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

**May N. Diaz, Emerita****Shelly Errington, Emerita****Alison Galloway**

Skeletal biology, forensic anthropology, human variation, history and ethics of physical anthropology, reproductive energetics and aging

**Diane Gifford-Gonzalez, Emerita****Judith A. Habicht-Mauche**

Precontact and early contact North America; Southwest and Southern Plains; social networks and cross-cultural

interaction; migration; community and identity formation; ceramic production and exchange; technology as cultural practice; archaeometry and materials analysis

**Susan Harding, Emerita****Diane K. Lewis, Emerita****Daniel T. Linger, Emeritus****Carolyn Martin Shaw, Emerita****Olga Nájera-Ramírez**

Folklore theory, ritual, festival, dance, greater Mexican culture, history and folklore, transnationalism, identity; expressive culture, ethnomusicology, bilingual communication, gender, history, and culture of Latin America, the U.S., and Mexico

**Triloki Nath Pandey**

Native peoples of North America, cultures of India, political anthropology, anthropological theories and comparisons; native North America; tribal India; Nepal

**Richard R. Randolph, Emeritus****Lisa Rofel**

Critical theory, anthropology of modernity, popular/public culture, gender and sexuality, queer theory, transnational capitalism, postcolonial and transnational feminism, China

## Anthropology

### **Danilyn Rutherford**

Borders and frontiers, colonialism, nationalism, ethnicity, kinship, performance, Christianity, secularism, sovereignty, publics, affect, technology, governancy, theory and method in anthropology, West Papua, Indonesia, the U.S.

**Stuart A. Schlegel**, Emeritus

### **Anna Tsing**

Culture and politics; feminist theory; globalization; multi-species anthropology; social landscapes and forest ethnologies; multi-sited ethnography; Indonesia, Southeast Asia, and the U.S.

**Adrienne L. Zihlman**, Emerita

---

## ASSOCIATE PROFESSOR

---

### **Mark Anderson**

Racial formation, diaspora, nationalism, transnationalism, culture and power; Latin America, African diaspora

### **Mayanthi Fernando**

Religion and secularism; anthropology of Islam; gender and sexuality; multiculturalism/pluralism; modernity and its "Others"; ethnography and ethics; colonial and post-colonial France/Europe; theory and methods in the study of religion

### **Andrew Salvador Mathews**

Environmental anthropology, science and technology studies, conservation and development, climate change, environmental history, Mexico, Latin America, Italy

### **J. Cameron Monroe**

Historical archaeology, complex societies, political economy, architecture and landscape, Africa and the African diaspora

### **Megan Moodie**

Feminist theory, reproductive politics, development, legal identities, affirmative action, ethnographic methods, narrative, literature, utopias and other postsocialist/postcolonial imaginaries, connected histories and the *longue durée*, South Asia, Eastern Europe

### **Renya Ramirez**

Native American studies, Indian identity, Native Americans and anthropology, urban Indians, Native American women, cultural citizenship, expressive culture, and anti-racist education

### **Matthew Wolf-Meyer**

Anthropology and history of medicine and public health, science studies, American studies, popular culture, the United States and the United Kingdom

---

## ASSISTANT PROFESSOR

---

### **Chelsea Blackmore**

Pre-Columbian archaeology (Mesoamerican focus), identity formation, complex societies, class and state formation, gender, feminist/queer theory

### **Jon Daehnke**

Archaeology of the North American Pacific Coast, cultural heritage politics and law, contemporary Native American politics, human-environment interaction, landscape and place, collaborative methodologies, NAGPRA implementation and compliance, public representations of heritage and memory

### **Lars Fehren-Schmitz**

Palaeogenetics / anthropological genetics, human evolutionary ecology, evolutionary demography, gene-culture coevolution, migration theories, population history of the Americas, archaeology of South America

### **Tsim Schneider**

Anthropological archaeology, culture contact and colonialism, Spanish missions, borderlands, landscape and place, social memory, lithics, indigenous archaeology, California and North America

---

## LECTURER

---

**Guillermo Delgado-P.**, Emeritus

Latin American cultures; comparative indigeneity; indigenous property rights; cultures of the sacred; ecologies and peasantries; Quechua/Andean linguistics, mining, labor history; alternative/electronic journalism; anthropology in the developing world; interethnicity; urbanization; social movements; culture theory

### **Annapurna Pandey**

Women's issues; women's political and religious lives and their representation in film; media and literature dealing with India and Indian Diaspora; film-making on the experiences of the diasporic Odias in the greater bay area

**Jude Todd**, Emerita

Indigenous American world views; permaculture; culturally prescribed attitudes toward water and soil; chemical-industry influences on government, university research, and popular belief systems; transgenerational epigenetic inheritance

---

## ADJUNCT ASSISTANT PROFESSOR

---

### **Susan Kuzminsky**

Skeletal biology, bioarchaeology, forensic anthropology, virtual 3D anthropology, skeletal correlates of human behavior (paleodiet, health, nutrition, social identity, activities), human evolutionary biology, ancient human dispersals, NAGPRA compliance, human rights, non-

## Anthropology

destructive research methods, peopling of the Americas, Pacific Rim, prehistory of California, Chile, and Peru

---

### PROFESSOR

**Raoul Birnbaum** (History of Art and Visual Culture)  
Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

**John Brown Childs**, Emeritus (Sociology)  
Ethnic conflict and transcommunal cooperation; sociology of knowledge; African American, Native American, Latino interactions

**James T. Clifford**, Emeritus (History of Consciousness)  
History of anthropology, travel, and exoticism; transnational cultural studies, museum studies, indigenous studies

**Carolyn Dean** (History of Art and Visual Culture)  
Cultural histories of the native Americas and colonial Latin America

**A. Russell Flegal** (Microbiology and Environmental Toxicology)  
Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

**Stephen R. Gliessman**, Emeritus (Environmental Studies)  
Agroecology, sustainable agriculture, tropical land use and development, alternative trade networks, sustainable livelihoods and conservation, community and agroecology

Donna Haraway (History of Consciousness), Emerita

**Paul Koch** (Earth Sciences)  
Isotope biogeochemistry, vertebrate paleontology

**Marc Mangel** (Applied Mathematics and Statistics), Emeritus

**Patricia Zavella**, (Latin American and Latino Studies)  
Transnational migration of Mexicans, women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and Chicana/Latino studies

---

### ASSOCIATE PROFESSOR

**Jeffrey Bury** (Environmental Studies)  
Political ecology; sustainable development; Latin American studies; international relations; institutional dimensions of natural resource conservation in the global south; extractive industries; climate change; new models of conservation

**Flora Lu** (Environmental Studies)  
Ecological anthropology, human behavioral ecology, Amazon rainforest, indigenous peoples, conservation, Ecuador, culture change, market integration, indigenous resource management, political ecology, environmental justice

**Irene E Lusztig** (Film and Digital Media)  
Film and video production, experimental ethnography and essayistic nonfiction; representations of historical memory; archives, propaganda and training films; feminist film practices; medical film; autobiographical filmmaking; interactive documentary; editing

**Marcia Ochoa** (Feminist Studies)  
Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, geography, multimedia production, graphic design, colonialism and modernity, Latin American studies—Colombia and Venezuela

**S. Ravi Rajan** (Environmental Studies)  
Environmental history and political ecology, risk and disaster studies, science and technology studies, North-South environmental conflicts, environmental social theory, environmental ethics

---

### ASSISTANT PROFESSOR

**Richard "Ed" Green** (Biomolecular Engineering)  
Genomics, computational molecular biology, genome assembly, human evolutionary genetics, ancient DNA, high-throughput sequencing, mRNA-processing and alternative splicing

**Cecilia Rivas** (Latin American and Latino Studies)  
Transnationalism; media and communication (Internet, newspapers); migration; globalization; race, ethnicity, and gender; bilingualism; consumption; El Salvador, Central America, Southern Mexico

**Elaine A. Sullivan (History)**  
Pharaonic Period Egypt; Greek and Roman Egypt; women and gender; material culture; ritual landscape; 3D modeling; Digital Humanities and the use of emerging technologies in studying the ancient world

---

## ANTHROPOLOGY COURSES

---

### LOWER-DIVISION COURSES

#### **1. Introduction to Biological Anthropology. F**

Study of evolution illustrated by Pleistocene hominid fossils and variation in living human groups. Behavior and evolution of primates examined as they contribute to the understanding of human evolution. Required for all anthropology majors. (Formerly Introduction to Human Evolution.) (General Education Code(s): SI, IN.) The Staff

#### **2. Introduction to Cultural Anthropology. S**

A number of different peoples are studied and a variety of approaches to the nature of the culture and to the study of specific cultures presented. Required for all anthropology majors. (General Education Code(s): CC, IS.) The Staff

#### **3. Introduction to Archaeology. W**

Overview of ways of learning about the human past beyond the scope of written history. Reviews development of archaeology, fundamental methods and theories, and archaeology's contribution to understanding human origins, the emergence of farming, and the origins of complex societies. (General Education Code(s): SI, IS.) J. Monroe

#### **42. Student-Directed Seminar.**

Seminars taught by upper-division students under faculty supervision. (See course 192.) The Staff

#### **81A. Mexican Folklorico Dance (2 credits).\***

Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. Students taught choreographed dances from various regions of Mexico and also learn dance techniques (tecnic) and

stage make-up application. Additional workshops and lectures offered to supplement class. Open to all students; no previous experience required. (Also offered as Latin American&Latino Studies 81A. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): PR-C, A.) O. Najera Ramirez

#### **81B. Mexican Folklorico Dance (2 credits).\***

Second course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. (Also offered as Latin American&Latino Studies 81B. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): PR-C, A.) O. Najera Ramirez

#### **81C. Mexican Folklorico Dance (2 credits).\***

Third course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. (Also offered as Latin American&Latino Studies 81C. Students cannot receive credit for both courses.) Prerequisite(s): course 81A or 81B. May be repeated for credit. (General Education Code(s): PR-C, A.) O. Najera Ramirez

#### **81J. Introduction to Visual Culture Lab (2 credits).\***

Optional digital photography lab. Students learn to compose shots, download photos, resize them, and put them into a meaningful sequence. Concurrent enrollment in Anthropology 80J required. Enrollment limited to 36. The Staff

#### **82. Culture and Dance of Bollywood (2 credits).\***

Course is devoted to the culture and dance of Bollywood, a popular genre of film representation of cultures and peoples of India. The course combines both theory and practice by showing films on selected themes and having students learn this dance style and music. (Formerly Crown 40.) (General Education Code(s): PR-C.) A. Pandey

#### **93. Field Study. F,W,S**

Supervised research or organized projects on anthropological topics for lower-division students. Conducted either on or off campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

#### **99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

---

### UPPER-DIVISION COURSES

#### **100. History and Theory of Physical Anthropology. F,S**

Provides an historical overview from the 18th century to the present of race, ape-human relationships, and human nature. Emergence of an evolutionary framework and of fossil, genetic, and primate information becomes the basis for reformulating ideas about human biology within anthropology. Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. The Staff

#### **101. Human Evolution.\***

Study of human evolution covering the last five million years. Examines the fossil evidence and emphasizes the reconstruction of behavior from

## Anthropology

the paleontological and anatomical evidence. Prerequisite(s): course 1. Offered in alternate academic years. The Staff

### **102A. Human Skeletal Biology.**

#### **F,S**

Presents basic human osteology allowing students to identify skeletal material by element. Emphasizes the dynamic nature of bone by integrating anatomy with a discussion of bone physiology within the context of the human life cycle. Prerequisite(s): course 1. Enrollment limited to 16. The Staff

### **103. Forensic Anthropology. \***

Covers the basic analysis of human skeletal remains for the medicolegal profession. Assessment of age, sex, ancestry, and general physical characteristics, trauma, and disease are discussed. Addresses the legal responsibilities of the anthropologist. Online lectures with in-class discussion sections, quizzes, and exams. Prerequisite(s): course 102A. Enrollment restricted to juniors and seniors. A. Galloway

### **103B. Forensic Anthropology and Bioarchaeology. S**

Introduces the analysis of human remains from forensic or archaeological contexts. Covers the whole range of morphological, morphometric, histological, genetic, and biochemical methods applied in bone-based anthropological analyses. Prerequisite(s): course 102A. Enrollment by permission of instructor. Enrollment limited to 25. The Staff

### **104. Human Variation and Adaptation. F**

Explores the major environmental factors (temperature, altitude, diet, and disease); how they are perceived by the human body; the physiological, micro- and macroanatomical responses; and

how behavior and culture can modify the impact of these stresses. Course 1 is highly recommended as preparation. (Formerly Human Adaptability.) L. Fehren-Schmitz

### **105. Human Paleopathology. \***

Examines paleopathology beginning with ancient hominid populations and proceeding to modern populations. Uses both the skeletal evidence and historical documentation when available. Considers evolutionary, cultural, and biological factors. Topics include: osteological diagnosis of infectious disease; trauma; nutritional deficiencies; dental disease; and developmental defects. Prerequisite(s): course 1; course 102A recommended. The Staff

### **106. Primate Behavior and Ecology. \***

The nature of primate social systems and social bonds is examined in the light of evolutionary and ecological concepts. Students cannot receive credit for this course and course 206. Prerequisite(s): course 1. The Staff

### **107. Methods and Research in Molecular Anthropology. W**

Introduces the molecular analyses of anthropological questions and explores the intersection of genetics and anthropology. Covers the basic principles of molecular and population genetics as they relate to the study of humans. Prerequisite(s): courses 1 and 104. Course 102A is recommended. Enrollment by permission of instructor. Enrollment limited to 15. L. Fehren-Schmitz

### **109. Evolution of Sex. \***

Provides a physical anthropology understanding of the evolution of sex. Focuses on genetics and the alterations in allele associations

that take place as a result of sexual processes. Prerequisite(s): course 1. The Staff

### **110A. Public Life and Contemporary Issues. W**

How can cultural anthropology help us to understand current events unfolding locally, nationally, and globally? Students learn how to "read" newspapers differently--that is, through the lens of cultural analysis. The world of everyday politics and society, as it unfolds in debates happening right now, forms the topical substance of the course. (Formerly course 4.) (General Education Code(s): IM.) The Staff

### **110B. From Indiana Jones to Stonehenge: Archaeology as Popular Culture. S**

Addresses the "meaning" of archaeology as generated in television, movies, literature, newspapers, and even National Geographic. Students engage with several case-studies illustrating how archaeology is portrayed in popular culture. (General Education Code(s): IM.) C. Blackmore

### **110E. Anthropology of Global Environmental Change. \***

Introduces anthropological and historical approaches to environmental change and globalization. Key themes include: capitalism and industrialization, environmental politics, global culture, and relations between humans and other species. (General Education Code(s): PE-E.) The Staff

### **110F. Biocultural Approaches to Food. S**

Examines the complex and multifaceted intersections of biology, culture, and food from an anthropological perspective. Addresses issues including the biological basis of human nutrition, the agricultural revolution, taboos,

## Anthropology

and social identity, as well as current problems. The Staff

### **110G. Barrio Popular Culture. F**

Introduces students to a broad sampling of verbal and nonverbal forms of Mexican folklore. Concentrates on experiencing these forms through texts, film, and if possible, performances. Attention to how these forms have been used by scholars to comment on Mexican culture is an underlying theme. Knowledge of Spanish is useful but not required. (Formerly course 80G.) (General Education Code(s): CC, E.) O. Najera Ramirez

### **110H. Acoustic Culture. \***

Explores relationships between culture and the acoustic worlds, including environmental, verbal, and musical, which humans inhabit. How can paying attention to cultures of listening and sound-making help us think about cultural life and experience in new ways? (Formerly course 80H.) (General Education Code(s): CC.) D. Brenneis

### **110K. Culture through Food. \***

Examines anthropology of food and politics of eating. Cultural and social uses of food in rituals of solidarity or fasting, identities and meanings of food for individuals, and consumption in the global context are key components of study. (Formerly course 80K.) (General Education Code(s): CC.) N. Chen

### **110O. Postcolonial Britain and France. \***

Transdisciplinary examination of the politics and culture of postcolonial Britain and France. Topics include: immigration from South Asia, Africa, and the Caribbean; racism and antiracism; minority difference and citizenship practices; and the emergence of Islam as a major category of identity and difference. (Also offered as

History 181A. Students cannot receive credit for both courses.) (General Education Code(s): CC, E.) M. Fernando

### **110P. India and Indian Diaspora through Film. F**

Explores several themes of relevance in contemporary India and Indian diaspora, concentrating on anthropological research and various documentary and popular Bollywood films. Through films and ethnographies, students analyze the nature of anthropological contributions to the study of Indian societies. (Formerly course 80P.) (General Education Code(s): CC, E.) A. Pandey

### **110R. Discourses in American Religions and Their Role in Public Life. \***

Introduces dominant discourses about major American religions and their role in public life, with particular attention to intersecting differences, such as race, sex/gender, and disability, and to shifting religious/political boundaries. Visual and textual media, political commentary, and popular ethnographies are analyzed. (General Education Code(s): IM.) D. Rutherford, S. Harding

### **110T. Motherhood in American Culture. \***

Examines the "culture wars" around motherhood in the United States with a focus on the political mobilization of normative ideas about the correct way to mother, from the moment of conception on. Special attention is given to the historical construction of deviant motherhood among marginalized groups. (Formerly course 80T.) (General Education Code(s): ER.) M. Moodie

### **110W. Land and Waterscapes Entropology. W**

Establishes anthropological interconnections of emergent worlds where environmental matters, social justice, and human survival interrelate. Focuses on anti-essential nature and waterscape ethnographies in which different pluricultures revalidate local understandings as ways of contesting increasing forms of land and water privatization. (General Education Code(s): PE-E.) G. Delgado-P

### **111. Human Ecology. \***

Reviews the environmental, physiological, behavioral, and cultural ways that humans interact with their physical surroundings. The effects of human culture on the environment and of the environment on the shape of human culture is emphasized. L. Fehren-Schmitz

### **112. Life Cycles. \***

Examines the human life cycle using an evolutionary framework. Examines key aspects of the human life stages using findings and concepts from developmental biology, physiology, nutrition, evolutionary ecology, and life-history theory. Prerequisite(s): course 1. The Staff

### **113. Tutoring Writing in Anthropology (2 credits). F**

Trains students to tutor writing in undergraduate anthropology courses; supports and guides them during the quarter they are tutoring. Enrollment by interview only. Prerequisite(s): satisfaction of the Composition requirement. The Staff

### **119. Indigenous Visual Culture. \***

Examines the relationship between visual cultures and indigenous peoples. First, class discusses what

## Anthropology

is visual anthropology. Second, class examines the relationship between museums and indigenous peoples. Third, class examines ethnographic photography and indigenous uses of photography. Fourth, class examines the uses of ethnographic film, and then its relationship to indigenous peoples. Finally, class examines indigenous uses of film. R. Ramirez

### **120. Culture in Film. F**

Introduces current and historical issues in visual anthropology, using film as a medium with which to represent culture. Raises questions about visual representation and advocacy in the context of global inequalities. Prerequisite(s): course 2 or 80J or Film 20A or 20B, or History of Art and Visual Culture 10D, 10E, 10F or 10G. (General Education Code(s): IM.) The Staff

### **120L. Culture in Film Laboratory (2 credits). \***

This lab in video production is to train students in Culture in Film. The video lab, through lectures, demonstrations, hands-on instruction, and review of students' work will enable students enrolled in Culture in Film to learn the fundamentals of film/video pre-production, production, and post-production skills. Portfolio review prior to enrollment and concurrent enrollment in course 120 required. Enrollment limited to 15. The Staff

### **121. Socialism. \***

Ethnography-based course that examines the social worlds of socialism, with particular focus on state socialism. Topics include: social problems that inspired socialist movements; implementation and experience of socialism in daily life; and significance of class, race, nation, science, technology, rationality. M. Caldwell

### **122. Postsocialism. \***

Examines the demise of socialist systems. Addresses the political, social, cultural, and economic experiences of everyday life that led to that demise, what new social inequalities have arisen since, and how citizens use the socialist past to critique the present. L. Rofel

### **123. Psychological Anthropology. \***

An introduction to some of the central theoretical issues in psychological anthropology. Psychoanalytic, cognitive, and relativist perspectives on the link between person and society are discussed and compared. Prerequisite(s): course 2. D. Linger

### **124. Anthropology of Religion. \***

Study of the phenomenon of religion as manifested in ethnographic literature, with special attention to traditional and recent modes of analysis of religious behavior. Special topics include myth, religious healing, witchcraft and sorcery, ritual, and millenarian movements. The Staff

### **126. Sexuality and Society in Cross-Cultural Perspective. \***

The meaning and social processes associated with sexuality in selected societies. Examination of variations in sexual expressions and control of sexuality, and in economic and political organizations, highlights the interrelationship of sex and society. Prerequisite(s): course 2. The Staff

### **127. Ethnographies of Capitalism. \***

Challenges approaches to capitalism that treat it as socioeconomic relations separable from "culture." Readings include ethnographies demonstrating the inextricability of cultural meanings from capitalist

practices. Topics include capitalism's relationship to colonialism, nationalism, socialism, gender, and the commodification of aesthetics. L. Rofel

### **128. Contemporary American Evangelical Cultures. \***

Study of contemporary, American, born-again Protestant discourse using ethnographic materials and interpretive theories. Topics include biblical literalism, Christian conversion and self-fabulation, charismatic gifts, preaching, sacrificial giving, prosperity theology, apocalypticism, creationism, pro-family and pro-life rhetoric, and televangelism. (Formerly Born-Again Religion and Culture.) S. Harding

### **129. Other Globalizations: Cultures and Histories of Interconnection. \***

The history of social and cultural interconnections at a global scale. Anthropological approaches to the study of cultural encounter are used to investigate topics such as trade, religion, and citizenship and to evaluate shifting concepts of civilization and barbarism.

Prerequisite(s): course 2. A. Tsing

### **130. Ethnographic Area Studies.**

#### **130A. Peoples and Cultures of Africa. \***

Survey of sub-Saharan societies. Analysis of principles of social organization and factors of cultural unity of selected western, eastern, central, and southern African peoples. (General Education Code(s): CC, E.) The Staff

#### **130B. Brazil. \***

Examines Brazilian culture and its link to interpersonal relationships, religion, politics, and psychological experience. Prerequisite(s): course 2. (General Education Code(s): CC, E.) The Staff

## Anthropology

### **130C. Politics and Culture in China.** \*

Joins substantive information "about" Chinese society and culture with debates in social theory and rethinks conventional wisdom about colonialism and modernity. Topics include representations of "Chineseness," class revolution, Chinese diaspora, popular culture, family and kinship, nationalism, history/memory, race and gender. (General Education Code(s): CC, E.) L. Rofel

### **130E. Culture and Politics of Island Southeast Asia.** \*

Southeast Asia includes a variety of societies exhibiting many ecological adaptations, religions, marriage systems, and experiences with colonial powers. Case studies of particular societies, chosen to reveal variety, are examined comparatively. Emphasis on religion and social organization. Prerequisite(s): course 2. (General Education Code(s): CC, E.) The Staff

### **130F. African Diasporas in the Americas.** \*

Focuses on African diasporas of the Caribbean, United States, and Latin America. Themes include: theorizing diaspora, historical formations, slavery, analytical approaches to cultures of the African diaspora, religion, music, comparative identity formation and racism, gender dynamics, social movements, and transnationalism. (General Education Code(s): CC, E.) M. Anderson

### **130G. Asian Americans in Ethnography and Film.** \*

Critically examines category of Asian Americans. Addresses historic representations of Asians and Asian Americans in ethnographic research and film. Explores contemporary issues of race, culture, and politics through ethnographic practice and

cultural production. (General Education Code(s): E.) N. Chen

### **130H. Ethnography of Russia and Eastern Europe.** \*

Introduces students to the ethnography of Eurasia, with special attention to the lived experience and legacy of state socialism in this region. Topics include new ideas of personhood, changing economic practices, public health, and international development. (General Education Code(s): CC, E.) M. Caldwell

### **130I. Cultures of India. S**

An examination of anthropological studies of tribal, rural, and urban cultures of India and a look at changes taking place in India. Prerequisite(s): course 2. Offered in alternate academic years. (General Education Code(s): CC, E.) A. Pandey

### **130J. Politics and Statemaking in Latin America.** \*

Introduction to ethnohistory and political anthropology of one or more Latin American countries: Typically Mexico and one other country. Students explore how contested concepts such as indigeneity, nation or state come to gain credibility and are deployed in contemporary politics. (General Education Code(s): CC.) A. Mathews

### **130L. Ethnographies of Latin America. F**

A broad introduction to issues and areas of cultural production and transformation in the Caribbean, Mexico, and Central and South America. Colonial, neocolonial, class, ethnic, gender, religious, ecological, and political relations intersect as represented in ethnographies and film. Prerequisite(s): course 2. (General Education Code(s): CC, E.) G. Delgado-P

### **130M. Inside Mexico. W**

Examines various communities within the Republic of Mexico as represented in ethnographic texts and other forms of cultural production, particularly music and dance. Emphasis on the interplay between the concept of regionalism and national identity. Previous course work in Mexican culture and/or history strongly recommended. Some reading in Spanish is required. (General Education Code(s): CC, E.) The Staff

### **130N. Native Peoples of North America.** \*

A survey of Native American cultures and experience during the past century, with emphasis on Pueblo cultures of the American Southwest. (General Education Code(s): ER, E.) The Staff

### **130T. Religion and Politics in the Muslim World.** \*

Analyzes post-colonial forms of Islam, with particular attention to Muslim societies and cultures in the Middle East, North Africa, and Europe. Emphasizes the relationship between power, knowledge, and representation in anthropological approaches to Islam and Muslims. (Formerly Anthropological Approaches to Islam.) (General Education Code(s): CC, E.) M. Fernando

### **130U. Central America.** \*

Draws on political, economic, and anthropological perspectives to analyze the key role of transnationalism and neoliberalism in contemporary Central America. Key topics include: the aftermath of revolutions; labor and gender; indigenous movements and multiculturalism; and transnational migration and governance. M. Anderson

## Anthropology

### **130V. Ethnography of Russia. \***

Examines daily life in Russia and affiliated formerly Soviet Republics through historical and cultural comparison. Topics include: socialist and postsocialist daily life; 20th- and 21st-century Russian empire building; cultural politics; economic systems; state-citizen relations; citizenship regimes; labor and leisure; and religion. M. Caldwell

### **130W. Ethnography of Eastern Europe. \***

Examines daily life in Eastern Europe, especially how residents in this region have navigated the transition from state socialism to accession to the European Union. Topics include: the legacies of state socialism; cultural politics; new economies; consumption; the European Union; new forms of governance; and political activism. M. Caldwell

### **130X. Special Topics in Ethnography. F,W,S**

This course on special topics in ethnography will be taught on a rotating basis by various faculty members. Precise focus of each year's courses will vary according to the instructor and will be announced by the department. May be repeated for credit. The Staff

### **131. Women in Cross-Cultural Perspective. W**

Examines the diversity of women's as well as men's roles, experiences, and self-conceptions in a number of societies to explore how women and men shape, and are shaped by, particular forms of social life. Prerequisite(s): course 2. R. Ramirez

### **131H. Russian-Language Readings Course: Readings in Anthropology of Russia (2 credits). \***

Contemporary topics and readings in anthropology of Russia and the

former Soviet Union. All readings, films, and other materials are in Russian. Discussions are in English. Accompanies course 130H, Ethnography of Russia and Eastern Europe. Prerequisite(s): course 130H and proof of Russian proficiency in reading and writing. Enrollment by permission of instructor. Enrollment limited to 10. M. Caldwell

### **132. Photography and Anthropology. \***

Moving historically from woodcuts and paintings to the World Wide Web, but emphasizing the invention and development of documentary photography, this course explores the world of images depicting society and culture. Major theoretical approaches to "reading" pictures will be emphasized, and students must produce a final project incorporating visual images. Prerequisite(s): course 2 or History of Art and Visual Culture 10D or 10E or 10F or 10G or Art 30. (General Education Code(s): IM.) The Staff

### **132L. Photography and Anthropology Laboratory (2 credits). \***

This still photography lab trains students in the basic operations and techniques of the camera and the creation of a set of still photographs to use for social documentation. It includes lectures, demonstrations, hands-on instruction, and a continuous review of the students' work in progress. It does not include darkroom work. Concurrent enrollment in course 132 required. Enrollment restricted to anthropology majors. Enrollment limited to 30. The Staff

**133. Narratives of the Popular. \***  
Addresses the increasing importance of popular culture as the terrain upon which to address

issues of culture and power. Emphasizes an ethnographic approach to popular culture as sociocultural phenomena. Students learn about a variety of activities including television and film viewing, music, fashion, photography, postcards, comic books, and urban spatial relations and architecture. S. Harding

### **134. Medical Anthropology: An Introduction. \***

Cross-cultural study of health, disease, and illness behavior from ecological and ethnomedical perspectives. Implications for biomedical health care policy. Students cannot receive credit for this course and course 254. Prerequisite(s): course 2. N. Chen

### **135A. Cities. \***

Examines cities from an anthropological perspective. Reviews pertinent social scientific literature of the 19th and early 20th centuries. Surveys the concepts and methods used by contemporary anthropologists to investigate urban phenomena. N. Chen

### **136. The Biology of Everyday Life. \***

Addresses cross-cultural attitudes to the human body and its everyday biological concerns: sleeping, eating, breathing, sex, and defecation. Prerequisite(s): course 2. The Staff

### **137. Consuming Culture. \***

Explores consumption as a cultural form. Beginning with theories of capitalism and exchange, it then focuses on sites and modes of consumption and display such as department stores, museums and zoos, advertisements and photography, cultural tourism. M. Caldwell

## Anthropology

### **138. Political Anthropology. \***

The ideas, in selected non-Western societies, about the nature of power, order, social cohesion, and the political organization of these societies. (Also offered as Legal Studies 138. Students cannot receive credit for both courses.) Offered in alternate academic years. The Staff

### **139. Language and Culture. W**

Examination of language system and language use in relationship to cultural contexts of communication in Western and non-Western societies. Topics include the Sapir-Whorf linguistic relativity hypothesis; linguistic constructions of gender; speech variation in relation to class, ethnicity, and national identity; and the emergence of self in communicative acts. Prerequisite(s): course 2. D. Brenneis

### **140. Art, Artists, Artifacts. \***

Studies the ways of interpreting non-Western art, both in the context of the Western art world and in the context of the societies that produced the art forms. The Staff

### **141. Anthropology of Developing Countries: Environment, Water, Entropy. \***

Focuses on developing countries, those countries experiencing fast deruralization and ecological crises. Students learn the reach of entropic interconnectiveness given the fact that forms of inequality organize the system. Readings illustrate the theories and methods anthropologists use to approximate cultural realities to readers, scholars, and activists. Prerequisite(s): course 2. G. Delgado-P

### **142. Anthropology of Law. \***

An ethnographically informed consideration of law, dispute management, and social control in a range of societies including the contemporary U.S. Topics include conflict management processes, theories of justice, legal discourse, and relations among local, national, and transnational legal systems. (Also offered as Legal Studies 142. Students cannot receive credit for both courses.) Enrollment restricted to anthropology and legal studies majors. D. Brenneis

### **143. Performance and Power. \***

Explores relationships between power and performance forms and media, both "traditional" and emergent. Links aesthetics with politics, and recent transcultural exchanges with local circumstances and consequences. Prerequisite(s): course 2 or any other Anthropology course. D. Brenneis

### **144. Anthropology of Poverty and Welfare. F**

Examines phenomena of poverty and welfare in cross-cultural perspective with an emphasis on critical ethnographies and social analyses of social pathologies, economic systems, and community. Topics include informal economies, labor, household systems, social-support networks, and public policies. M. Caldwell

### **145X. Special Topics in Socio-Cultural Anthropology. F,W,S**

Taught annually on a rotating basis by faculty members. Each year's topic varies by instructor and is announced by the department. May be repeated for credit. The Staff

### **146. Anthropology and the Environment. W**

Examines recent approaches to study of nature and the environment. Considers historical

relationship between nature, science, and colonial expansion as well as key issues of contemporary environmental concern: conservation, environmental justice, and social movements. Prerequisite(s): course 2. (General Education Code(s): PE-E.) A. Mathews

### **148. Gender and Global Development. \***

Uses the critical tools of feminist theory and cultural anthropology to look at how global development discourses and institutions mobilize, reinforce, and challenge systems of gender-based inequality. Topics include non-governmental organizations (NGOs), development practice, microcredit, and technocrat cultures. (Formerly Gender and Development.) (Also offered as Feminist Studies 148. Students cannot receive credit for both courses.) M. Moodie

### **150. Communicating Anthropology. F**

Encourages anthropology majors to explore different means of communicating anthropology with much attention to individual writing and presentation skills. Intensive work on library research; recognizing, comparing, and making arguments; and analyzing ethnographies, articles, reviews, and films. Prerequisite(s): two of the following courses: 1, 2, or 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore and junior anthropology majors. (General Education Code(s): W.) M. Fernando

### **151. Workshop in Ethnography. \***

Through demonstration, practice, and participation, acquire skills in collecting and analyzing cultural data. Work with members of other cultures and with each other to

## Anthropology

learn to identify significant cultural patterns. Lectures and readings provide added perspective and a theoretical base. Prerequisite(s): course 2. Enrollment limited to 20. The Staff

### **152. Survey of Cultural Anthropological Theory. W**

Major figures, ideas, and writings in 19th- and 20th-century cultural anthropology surveyed. Students cannot receive credit for this course and course 252. Prerequisite(s): course 2 and satisfaction of the Entry Level Writing and Composition requirements; enrollment restricted to anthropology majors. (General Education Code(s): W.) D. Rutherford

### **153. Medicine and Colonialism. \***

Addresses the overlapping relationship between medicine and colonialism in the 19th century, with attention to post-colonial theory and contemporary studies of post-colonial medical pluralism in the 20th century. Prerequisite(s): courses 2 and 134. The Staff

### **154. Multimedia Ethnography. \***

Students learn the fundamentals of photography or video production and audio recording in order to create mini-ethnographies. Prerequisite(s): courses 1, 2, and 3. Concurrent enrollment in course 154L is required. Enrollment restricted to anthropology majors. (General Education Code(s): PR-C.) The Staff

### **154L. Multimedia Laboratory (2 credits). \***

Designed to instruct in aesthetics and technical production of a short digital slideshow. Using iMovie3 editing program, produce a digital slideshow incorporating sound (narration, music, and sound effects) and still images. Concurrent

enrollment in course 154 required. The Staff

### **157. Modernity and Its Others. \***

Beginning with the conquest of the Americas, considers how Western thinkers have explained seemingly "irrational" ways of being and thinking (like witchcraft, human sacrifice, and bodily mutilation), and asks how we interpret beliefs and practices radically different from our own. M. Fernando

### **158. Feminist Ethnographies. \***

Considers the relationship between anthropology and feminism. Provides historical perspective on gender inequalities in the discipline as well as the emergence of feminist anthropology. Students read and engage with examples of feminist ethnography from a variety of regions and subfields. M. Moodie

### **159. Race and Anthropology. \***

Examines concept of race in anthropology. Begins with histories of race in anthropology; turns to contemporary analysis of racism, identity formation, and diaspora; and concludes with current debates on the validity of "race" as an object of analysis. (General Education Code(s): ER.) M. Anderson

### **160. Reproductive and Population Politics. \***

Examines reproductive and population politics across the globe, with a focus on feminist and ethnographic analyses of the stakes of various actors, from states to religious bodies to non-governmental organizations, in questions of who reproduces and in what circumstances. M. Moodie

### **161. The Anthropology of Food. \***

Critically examines food as a fundamental aspect of social and cultural life and key concept in the development of anthropological

theory and methods. Topics include: power relationships; community building; exchange and reciprocity; symbolism; cultural rules and rituals; globalization; and memory. M. Caldwell

### **162. Anthropology of Displaced Persons. \***

Examines the causes, consequences, forms, and experiences of human movement, displacement, and abandonment. Topics include: migration, refugees, forced displacement, environmental displacement, tourism, transnational communities, and other displaced populations. M. Caldwell

### **163. Kinship. \***

Provides a critical survey of debates, old and new, in the study of kinship. Readings range from classical treatments to recent reformulations that use kinship as a lens for exploring intimacy, memory, futurity, embodiment, commodification, and power. Students cannot receive credit for this course and course 263. D. Rutherford

### **164. The Anthropology of Dance. \***

An intense reading seminar which critically reviews anthropological works in dance ethnography and dance theory. Recommended for anthropology majors. Prerequisite(s): course 2. Enrollment limited to 25. O. Najera Ramirez

### **166. States, Bureaucracies, and Other Cosmological Propositions. \***

Investigates the cosmologies of states and bureaucracies and the practices through which officials or rulers seek to produce order, knowledge, or stability. Looks at paperwork, nationalist and court

## Anthropology

rituals, practices of mapping and classification, forms of citizenship.  
A. Mathews

### **170. History of Archaeological Theory. F**

Historical review of prehistoric archaeology from antiquarianism to the present. Emphasis on development of archaeological theory and its relation to evolutionary and anthropological theory. Students cannot receive credit for this course and course 270. Prerequisite(s): course 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to anthropology and Earth sciences/anthropology combined majors. Recommended for juniors. (General Education Code(s): W.) J. Habicht Mauche

### **171. Materials and Methods in Historical Archaeology. \***

In this intensive, hands-on course, students learn the step-by-step processes involved in conducting laboratory research on historic artifacts. Students study the ins and outs of analyzing, cataloging, and dating historic artifacts. Enrollment limited to 20. C. Blackmore

### **172. Archaeological Research Design. \***

Introduces theories and methods for recovering and analyzing archaeological data. Critically explores the nature of archaeological evidence and how archaeologists know what they know. Strongly recommended for those contemplating further studies in archaeology. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 3, and one upper-division archaeology course. Strongly recommended for those contemplating further studies in archaeology. Enrollment limited to

25. Offered in alternate academic years. (General Education Code(s): W.) C. Blackmore

### **173. Origins of Farming. \***

Survey of the ecological and archaeological evidence for the origins of plant and animal domestication in Africa, Eurasia, and the Americas. Discussion will center on the preconditions of this drastic alteration in human ecology and its consequences in transforming human societies. Open to nonmajors. Students cannot receive credit for this course and course 273. Enrollment restricted to juniors and seniors. Offered in alternate academic years. The Staff

### **174. Origins of Complex Societies. \***

Deals with evidence and theories concerning the origins of complex society; the transition from egalitarian, foraging societies to the hierarchical, economically specialized societies often referred to as "civilizations." Focuses on both Old World and New World cultures. Students cannot receive credit for this course and course 174. Prerequisite(s): course 3. C. Blackmore

### **175A. Early African Archaeology. \***

Archaeological history of Africa from the first 2.5 million-year-old artifacts to the emergence of African pastoralism and farming. Disciplinary models and assumptions critically examined in their historic and political contexts. Students cannot receive credit for this course and course 275A. (Formerly African Archaeology: 2.5 Million BP to Farming.) Prerequisite(s): course 3 or by permission of instructor. Enrollment restricted to junior and senior anthropology and Earth sciences/anthropology combined

majors. Enrollment limited to 45. The Staff

### **175B. African Complex Societies. \***

Introduces the evolution of African kingdoms and states from the emergence of farming communities to initial contact with Europe. Particular attention paid to the origins of social inequality and the evolution of centralized polities. Students cannot receive credit for this course and Anthropology 275B. Prerequisite(s): course 3; course 175A strong recommended. J. Monroe

### **176A. North American Archaeology. W**

Development of Native cultures in North America. Topics include peopling of the New World, early foragers, spread of agriculture and complex societies in the Southwest and Eastern Woodlands, and review of cultural developments in the West and Far North. Prerequisite(s): course 3 or consent of instructor. J. Habicht Mauche

### **176B. Meso-American Archaeology. \***

Review of the archaeological and ethnohistorical evidence for the origins and development of pre-Columbian civilizations in Meso-America including the Olmec, Maya, Zapotec, Mixtec Teotihuacan, Toltec, Tarascan, and Aztec. Prerequisite(s): course 3. C. Blackmore

### **176C. Archaeology of the American Southwest. \***

Outlines the development of native cultures in the American Southwest from Paleo-Indian times (Ca. 11,500 B.C.) through early European contact (ca. A.D. 1600). Topics include the greater environment; early foraging culture; the development of

## Anthropology

agriculture and village life; the emergence and decline of regional alliances; abandonment and reorganization; and changes in social organization, external relations, and trade. Prerequisite(s): courses 3 and 176A. J. Habicht Mauche

### **176D. Colonial Encounters in the Americas. \***

Uses archaeological case studies to explore processes of cultural confrontation, resistance, and transformation among Native American groups in the wake of European colonial expansion in the Western Hemisphere during the late 15th through mid-19th centuries. Prerequisite(s): courses 2 and 3. (General Education Code(s): ER.) J. Habicht Mauche

### **176E. Archaeology of the Pacific Northwest. F**

Explores some of the important issues surrounding the anthropological and archaeological study of the Pacific Northwest Coast--a roughly 1,800-kilometer-long shoreline that stretches from Yakutat Bay in Alaska to Cape Mendocino in California. Prerequisite(s): course 3. J. Daehnke

### **177. European Conquest of the Americas. \***

Uses ethnographic, archaeological, and historical sources to examine the clash of cultures between Native Americans and Europeans during the 15th through 19th centuries. Focuses on the social, political, and demographic impacts of contact on Native American societies. Prerequisite(s): courses 2 and 3. Enrollment limited to 34. J. Habicht Mauche

### **178. Historical Archaeology: A Global Perspective. W**

Introduces archaeology of European colonialism and the early-modern world. Topics include historical archaeological methods; the nature of European colonial expansion in New and Old Worlds; culture contact and change; and power and resistance in colonial societies. Students cannot receive credit for this course and Anthropology 278. Prerequisite(s): course 3 or consent of instructor. J. Monroe

### **179. Slavery in the Atlantic World: Historical and Archaeological Perspectives. \***

Explores the African diaspora resulting from the transatlantic slave trade, drawing on methodologies from two academic disciplines--history and archaeology. Examines key questions about the slave system, using an array of source materials, both written documents and artifacts. (Also offered as History 158C. Students cannot receive credit for both courses.) (General Education Code(s): PR-E.) J. Monroe

### **180. Ceramic Analysis in Archaeology. S**

Focuses on theories and techniques used by archaeologists to bridge the gap between the recovery of ceramic materials and their interpretation within cultural contexts. Topics include the origins of pottery, production methods, classification and typology, seriation, functional analysis, materials analysis and description, organization of production, trade, and the analysis of style. Students are billed a course materials fee. Students cannot receive credit for

this course and course 280.

Prerequisite(s): course 3.

Concurrent enrollment in course 180L required. Enrollment restricted to anthropology majors. J. Habicht Mauche

### **180L. Ceramic Analysis Laboratory (2 credits). S**

Practicum in ceramic materials analysis and description. Students perform material experiments in materials selection and processing, hand-building techniques, and open-pit firing. Demonstrations of standard techniques of attribute analysis and the mineralogical and chemical characterization of ceramic materials are presented. Students cannot receive credit for this course and course 280L. Prerequisite(s): course 3. Concurrent enrollment in course 180 required. Enrollment restricted to anthropology majors. Enrollment limited to 16. J. Habicht Mauche

### **182A. Lithic Technology. W**

Introduction to lithic and ceramic analysis in archaeology. Includes lab analysis, discussions of classification and typology, and exploration of the concept of style as it relates to ceramics and lithics in archaeology. Prerequisite(s): course 3. Enrollment limited to 20. The Staff

### **184. Zooarchaeology. F**

Lectures and seminar on archaeological faunal analysis. Topics include mammalian evolution and osteology, vertebrate taphonomy, reconstruction of human diet from faunal remains, foraging strategy theory, data collection and management, and methods of quantitative analysis. Students cannot receive credit for this course and course 284. Prerequisite(s): course 3; concurrent enrollment in course 184L is required. The Staff

**184L. Zooarchaeology Laboratory (2 credits). F**

Practical laboratory in archaeological analysis, with demonstrations and exercises on human-caused modifications to animal bones and non-human modifications to animal bones. Prerequisite(s): course 3 and concurrent enrollment in course 184. Enrollment restricted to anthropology majors and combined Earth sciences/anthropology majors. Enrollment limited to 45. The Staff

**185. Osteology of Mammals, Birds, and Fish. \***

Practicum in archaeological faunal analysis. Students learn to identify bones of all larger mammal species of central California plus selected bird and fish species. Students cannot receive credit for this course and course 285. Prerequisite(s): courses 184 or 102 or Biology 138/L or Earth Sciences 100 or Environmental Studies 105/L, and permission of instructor. Enrollment limited to 16. Offered in alternate academic years. The Staff

**187. Cultural Heritage in Colonial Contexts. S**

Critical examination of the definitions of "cultural heritage," its development as a concept, and the various laws, charters, and conventions that shape our management of the past in the present. The focus is on heritage in comparative colonial contexts. J. Daehnke

**188. Practicum in Archaeology (2 credits). \***

Introduces practical skills in archaeological materials identification of stone, shell, bone, and other materials; curation; and database management. Students receive entry-level training with

once-weekly class meetings and 5 hours per week of hands-on instruction. Prerequisite(s): courses 1, 2, and 3. Enrollment limited to 10. May be repeated for credit. The Staff

**189. Archaeology Field Methods. S**

Lecture, laboratory, and fieldwork sessions on archaeological field methods including survey, mapping, excavation, record and database maintenance, artifact accessioning, curation, and analysis on the UCSC campus. Students attend lectures/laboratories two evenings each week and do fieldwork all day on Saturdays. Enrollment by instructor consent. Prerequisite(s): course 3 and application letter. Students who have done no previous fieldwork in archaeology have priority. (Formerly Field Methods in Archaeology. Enrollment limited to 15. (General Education Code(s): PR-E.) The Staff

**190X. Special topics in Archaeology-Physical Anthropology. \***

Special topics in archaeology-physical anthropology are taught annually on a rotation basis by various faculty members. The precise focus of each year's course varies according to the instructor and is announced by the department. Prerequisite(s): courses 1 and 3. May be repeated for credit. The Staff

**192. Directed Student Teaching. F,W,S**

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. The Staff

**193. Field Study. F,W,S**

Students submit petition to sponsoring agency. The Staff

**194. Senior Seminar**

**194A. Anthropology of Dead Persons. \***

Explores the cultural meanings of dead bodies and dead persons, including memorialization; the body in the United States legal system; cadavers in education and research; dead persons in mass disasters and human-rights cases; and repatriation of the dead. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment by permission of instructor. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 16. (General Education Code(s): W.) A. Galloway

**194B. Chimpanzees: Biology, Behavior, and Evolution. \***

Explores studies on wild and captive chimpanzees with reference to other apes and humans. Topics include sociality, tool using, locomotion, traditions, and life history; social and physical dimensions of growth and development; language studies, genetics, and applications to human evolution. Prerequisite(s): courses 1, 2, and 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) The Staff

**194C. Feminist Anthropology. \***

Considers feminist perspectives on the human past, archaeologists' perspectives on feminist theory, and the impact of gender, feminist, and critical social theory on archaeology as a profession. Students cannot receive credit for

## Anthropology

this course and course 279. (Formerly Feminism and Gender in Archaeology.) Prerequisite(s): courses 1, 2, and 3, and satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to seniors. Enrollment limited to 20. (General Education Code(s): W.) C. Blackmore

### **194D. Tribes/Castes/Women. \***

Examines historical constructions and contemporary deployments of the categories that have structured popular and anthropological understandings of social life in South Asia, particularly those of "tribe," caste," and "women." Students gain familiarity with the mobilization of these categories in contemporary political movements across India. Prerequisite(s): courses 1, 2, and 3. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Moodie

### **194E. Belief. \***

Focuses on problems and opportunities raised by the concept of belief. Students work to develop an anthropological understanding of belief as practiced, then put it to use in analyzing episodes from the NPR series "This I Believe." Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) D. Rutherford

### **194F. Memory. S**

Intensive and fast-paced seminar focusing on theoretical and ethnographic studies of memory as a means for dealing with the past.

Examines how ordinary people and societies have coped with the past through acts of selective remembering and forgetting. Prerequisite(s): courses 1, 2, and 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Caldwell

### **194G. Politics and Secularism. \***

Examines secularism as political doctrine and practice of government. Topics include: transformation of religion by secularization; forms of inclusion/exclusion enacted by secularism; relationship between secularism and colonial rule. Case studies drawn from Europe, South Asia, United States, and the Middle East. Prerequisite(s): courses 1, 2, and 3, and satisfaction of the Entry Level Writing and Composition requirements; enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Fernando

### **194H. Paleoanthropology. F**

Detailed overview of the evidence for the origin and evolution of humans with emphasis on reconstructing the paleobiology of extinct hominids. Discussion of individual groups of ancient hominids from the Miocene apes to anatomically modern humans. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **194I. Consumption and Consumerism. \***

Investigates cultural analysis of consumer society, commodities, and consumer practices. Students

develop their own research projects. Themes include: critiques of consumer society; symbolic analysis of goods, consumption as resistance, anthropologies of marketing, culture jamming; consumption and (post) colonialism. Prerequisite(s): courses 1, 2, and 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Anderson

### **194K. Reading Ethnographies. \***

Explores issues in the representation of culture through reading and discussing ethnographies. Recent experimental ethnographies open topics including the relation between fieldwork and writing, textual strategies, and the politics of ethnographic writing and research. Prerequisite(s): courses 1, 2, and 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Fernando

### **194L. Archaeology of the African Diaspora. \***

Senior seminar on African diaspora archaeology. Draws on archaeological, historical, and anthropological perspectives to examine the cultural, social, economic, and political lives of Africans and their descendants in the New World and West Africa from the 15th through 19th centuries. Prerequisite(s): courses 1, 2, 3 and an upper division course in archaeology; satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to senior

## Anthropology

anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) J. Monroe

### **194M. Medical Anthropology. S**

Focuses on critical issues in the social sciences of health and healing. Designed for students pursuing graduate work in medical anthropology and/or public health. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, 3, and 134. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) N. Chen

### **194N. Comparison of Cultures. F**

Seminar for upper-division students interested in theories and methodology of social and cultural anthropology. Devoted to critical discussion of different methods of comparison practiced in anthropology. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) T. Pandey

### **194O. Masculinities. \***

Considers the social construction of men and masculinities in a variety of ethnohistorical contexts as well as the unique contribution enabled by anthropological methods, particularly ethnographic fieldwork, to the study of gender and power. Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Moodie

### **194P. Space, Place, and Culture. \***

Examines ways anthropologists have studied relationship between space, place, and culture. Covers early formulations acknowledging people in different cultural contexts ascribe particular meanings to places and to the concept of space and then traces the ways these questions have come to the fore in more recent scholarship. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **194Q. Race, Ethnicity, Nation. \***

Provides students with theoretical and methodological approaches to studying the relationships between race, ethnicity, and nation, with a comparative focus on the United States, Latin America, and Europe. Students use ethnographic methods and/or discourse analysis to develop individual research projects. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and courses 1 and 2 and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Anderson

### **194R. Religion, Gender, Sexuality. \***

Examines religion in relation to gender and sexuality. Examines how gender, sexuality, and religion intersect in notions of civilization, progress, and modernity in the contemporary and colonial periods. Particular attention paid to Islam, Christianity, and Hinduism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and courses 1 and 2 and 3. Enrollment restricted to senior anthropology

majors. Enrollment limited to 20. (General Education Code(s): W.) M. Fernando

### **194S. Hearing Culture: The Anthropology of Sound. F**

Explores relationships between culture and acoustic worlds-- environmental, verbal, and musical-- within which we live. How sound is shaped by human belief and practice and the role sound plays in cultural and social life, both past and present. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) D. Brenneis

### **194T. Poverty and Inequality. \***

Through ethnographies about homelessness, food deprivation, and unemployment, examines the institutions through which poverty is recognized, the systems of morality shaping debates about need and appropriate behavior, and the effects of community responses to poverty. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Caldwell

### **194U. Environmental Anthropology: Nature, Culture, Politics. W**

Presents key readings in environmental anthropology focusing on environmental conflicts. Students guided in developing research paper on a society environment topic of their choice. Class is writing intensive with in-class discussion and final presentations. Prerequisite(s): satisfaction of the Entry Level

## Anthropology

Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) A. Tsing

### **194V. Picturing Cultures. \***

A historical, analytical, and practical exploration of the uses of still and moving pictures in ethnographic representations, research, and production. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3; and course 80J, 120, 132, or 154. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **194W. The Anthropology of Social Movements. \***

Focuses on the anthropology of social movements, especially the impact that global capital provokes on peripheral Latin American societies and the ways these respond through the organizing of social movements validating alternative worldviews that coalesce around issues pertaining to indigeneity, the environment, gender, and concepts of human dignity. Prerequisite(s): courses 1, 2, and 3, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) G. Delgado-P

### **194X. Women in Politics: A Third World Perspective. S**

Focuses cross-culturally on the status of women in the Third World and their formal and informal participation in politics. Also discussed are organized efforts, through participation in both national and autonomous movements, for women's rights.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) A. Pandey

### **194Y. Archaeologies of Space and Landscape. \***

Examines contemporary archaeological perspectives on space and landscape. Focuses on how archaeology can contribute to an appreciation of the economic, cultural, and political factors that shape human perception, use, and construction of the physical world. Prerequisite(s): courses 1, 2, 3, and an upper-division archaeology course; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) J. Monroe

### **194Z. Emerging Worlds. W**

Addresses encounters and contact zones between cultures that give rise to "emerging worlds." "Emerging worlds" refers to the cultural heterogeneity and diversity created within world-making networks, geographies, innovations, and meanings, moving us beyond ideas about vanishing, autonomous cultures. Prerequisite(s): courses 1, 2, and 3, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) L. Rofel

### **195A. Senior Thesis Seminar. F**

Covers the basics like the planning and organization of research; writing research proposals; the publication and presentation of scientific research results; the recapitulation of laboratory methods; and intensification of specific recent research discussions

in anthropology. Prerequisite(s): courses 1 and 107, and either course 101, or course 104, or course 105. Enrollment is restricted to senior anthropology majors and by permission of the instructor. Enrollment limited to 10. L. Fehren-Schmitz

### **195B. Senior Thesis Research (3 credits). W**

Students conduct the research projects they proposed in course 195A. Students have weekly group meetings with the research supervisor. Prerequisite(s): course 195A. Enrollment restricted to senior anthropology majors. Enrollment limited to 10. L. Fehren-Schmitz

### **195C. Senior Thesis Capstone (3 credits). S**

Students finalize their research projects and write their thesis in the form of a research paper that is in publishable form so it can be submitted to a relevant journal or conference. Prerequisite(s): course 195B. Enrollment restricted to senior anthropology majors. Enrollment limited to 10. L. Fehren-Schmitz

### **196C. Traveling Cultures. \***

Considers why traveling cultures have posed a threat, often met with violence, to regimes of rule, particularly modern nation-states. Also explores the unique problems that conducting research with mobile communities poses for the ethnographer. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Moodie

### **196D. Food and Medicine. \***

Examines the intersections of food, medicine, and culture with special

## Anthropology

focus on nutrition, cultural knowledge, industrial foodways, genetically modified organisms (GMOs), ethnopharmacology, food safety, and biosecurity.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and courses 1, 2, and 3. Enrollment limited to 20. (General Education Code(s): W.) N. Chen

### **196E. Pastoralists Past and Present. \***

Senior seminar treating the history and modern situation of the world's herding peoples. Readings draw on ethnographic, historical, archaeological, and ecological literatures. Students are coached in writing a 25-page research paper on a topic related to this theme. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **196F. The Anthropology of Things: Gift, Sign, Commodity, Tool. \***

Examines some approaches used by anthropologists and other thinkers to bring things into focus: as gifts, signs, commodities, and tools. Explores whether, by taking things seriously, anthropologists might learn to be empirical in new ways. Students cannot receive credit for this course and course 225. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) D. Rutherford

### **196G. Advanced Topics in Folkloristics. \***

Examines selected topics and issues in the field of folklore: specific topics vary each quarter. For students with a demonstrated interest in folklore and/or popular culture. Prerequisite(s): courses 1, 2, and 3; and satisfaction of the Entry Level Writing and Composition requirements; and a course in folklore and/or popular culture is strongly recommended. Enrollment limited to 20. (General Education Code(s): W.) O. Najera Ramirez

### **196H. Global History and the Longue Duree. \***

Emerging anthropological approaches to global history, with an eye to historical frameworks of 500 years or more. Course requires engagement with advanced theoretical concepts and challenging historical texts. Intensive seminar format. Students cannot receive credit for this course and course 269. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and courses 1, 2, and 3. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. (General Education Code(s): W.) M. Moodie

### **196I. Hard Problems. \***

Explores interrelated, long-standing, difficult problems in human theory. Considers why these problems are so forbidding; what makes them significant; why they are "hard"; and whether hard problems come in different varieties or strengths. Prerequisite(s): courses 1, 2, and 3; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **196J. Imagining America. S**

Explores sites of heritage and the politics of cultural memory in the American context. Focuses on public representation and interpretation at places where multiple views of history come into conflict. Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. J. Daehnke

### **196K. Settler Colonialism. S**

Provides seniors in anthropology a capstone experience. Settler colonialism is an all-encompassing, land-centered project that revolves around the elimination of the Native. This course revolves around a series of ethnographies and histories about settler colonialism. Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors. Enrollment limited to 16. R. Ramirez

### **196L. Archaeology of the American Southwest. \***

Outlines the development of native cultures in the American Southwest from Paleo-Indian times (ca. 11,500 B.C.) through early European Contact (ca. A.D. 1600). Prerequisite(s): courses 1, 2, and 3 and satisfaction of the Entry Level Writing and Composition requirements. Course 178 strongly recommended. Enrollment restricted to senior anthropology majors. Enrollment limited to 20. J. Habicht Mauche

### **196M. Modernity and its Others. \***

Examines how Western modernity has interpreted various forms of radical difference, beginning with the 15th-century conquest of the

## Anthropology

New World. Considers historical and contemporary examples of how Western thinkers have explained "irrational" beliefs and practices (e.g., witchcraft, human sacrifice, devil-worship). Prerequisite(s): courses 1, 2, and 3; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to seniors. Enrollment limited to 20. M. Fernando

### **196T. Archaeology of Technology. \***

Examines approaches mobilized by archaeologists to reconstruct ancient technologies and to explore how technological practices are implicated in processes of social formation and change. Approaches that engage technology as embodied technique and situated cultural practice are emphasized. Prerequisite(s): courses 1 and 2 and 3, and satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology majors. Enrollment limited to 20. J. Habicht Mauche

**197. Laboratory Tutorial. F,W,S**  
Independent laboratory research on selected topics in archeology and physical anthropology. Interview with appropriate instructor required. May be repeated for credit. The Staff

**197F. Laboratory Tutorial (2 credits). F,W,S**  
Independent laboratory research on selected topics in archaeology and physical anthropology. Interview with appropriate instructor required. Enrollment restricted to anthropology majors. May be repeated for credit. The Staff

**198. Independent Field Study. F,W,S**  
Off-campus field study. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**198G. Independent Field Study (3 credits). F,W,S**  
Off-campus field study. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199. Tutorial. F,W,S**  
Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## Graduate Courses

**200. Theoretical Foundations of Physical Anthropological Research. \***  
Provides historical and theoretical foundation of physical anthropology. Grounds students in the changing frameworks and perspectives during the last 150 years regarding questions in human biology, evolution, nature, and culture, by examining texts and scientific journals. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

**200A. Core Graduate Course (10 credits). F**  
Introduces history, ethnography, and theory of cultural anthropology with emphasis on awareness of construction of anthropological canon and areas of conflict within it, leading up to contemporary debates on a variety of issues. Two-term course: students must enroll in both quarters. Enrollment restricted to anthropology graduate students. Enrollment limited to 12. A. Mathews

**200B. Core Graduate Course. W**  
Introduces history, ethnography, and theory of cultural anthropology

with emphasis on awareness of construction of anthropological canon and areas of conflict within it, leading up to contemporary debates on a variety of issues. Multiple-term course; students must enroll in both quarters to receive academic credit. Enrollment restricted to anthropology graduate students. Enrollment limited to 12. M. Fernando

**201. Human Evolution. \***  
Provides an overview of the first five million years of human evolution and a framework for studying evolution and reconstructing the human past. Emphasizes that all lines of evidence must be included: hominid fossils, archaeology, paleoecology, and molecular data. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

**202A. Skeletal Biology. \***  
Focuses on human skeletal biology, the identification of elements, physiology of hard tissue formation, growth, and maintenance. Students are required to show competence in skeletal identification to pass this class. Prerequisite(s): course 102A or permission of instructor. Enrollment restricted to graduate students. Enrollment limited to 5. The Staff

**206. Primate Behavior. \***  
An overview of primate evolution and review of the major groups of primates in terms of their ecological, locomotor, dietary, and social adaptations. Theoretical frameworks, such as behavioral ecology, sexual selection, and life history, are evaluated from long-term studies of primate behavior. Students cannot receive credit for this course and course 106. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

## Anthropology

### **208A. Ethnographic Practice. S**

Introduces graduate students to the practice of fieldwork. Students design and carry out a quarter-long research project exploring a range of methods and producing an analytical case study. Readings and discussion emphasize both methodological critique and successful implementation. Enrollment restricted to anthropology graduate students. Enrollment limited to 15. M. Caldwell

### **208L. Video Laboratory (2 credits). \***

Provides students with hands-on training with a variety of audiovisual equipment. Through lectures, demonstrations, hands-on field exercises, and review of students' media exercises, students learn the fundamentals of photography, video production, and audio recording in the field. Concurrent enrollment in course 208A required; enrollment restricted to anthropology graduate students. Enrollment limited to 15. N. Chen

### **210R. Religion in American Politics and Culture. \***

Introduces dominant discourses about major American religions and their role in public life with particular attention to intersecting differences, such as race, sex/gender, and disability and to shifting religious/political boundaries. Visual and textual media, political commentary, and popular ethnographies are analyzed. Enrollment restricted to graduate students. Enrollment limited to 15. D. Rutherford, S. Harding

### **211. Human Ecology. \***

Reviews environmental, physiological, behavioral, and cultural ways that humans interact

with their physical surroundings. Effects of human culture on the environment, and of the environment on the shape of human culture will be emphasized. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **212. The Human Life Cycle. \***

Examines the human life cycle using an evolutionary framework. Examines key aspects of the human life stages using findings and concepts from developmental biology, physiology, nutrition, evolutionary ecology, and life history theory. These stages include: gestation, infancy, childhood, juvenile and adolescent periods, and senescence. Each stage of the life cycle is compared and contrasted with the developmental life of nonhuman primates and mammals. Other related topics include developmental plasticity and epigenetics. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **214. Culture and Power. \***

Takes the many strands of scholarship on power relations between individuals within the context of institutions and conceptualizes how individuals come to exist through power relations, and how power is fundamental to social being. Enrollment is restricted to graduate students. Enrollment limited to 15. The Staff

### **219. Religions, States, Secularities. \***

Examines theories and case studies at the intersection of religion, states, and secularity. Topics include: secularism as a political doctrine; state and social regulation of religion and religious normativity; secular cultural practices; and lines of

secular/religious entanglement and conflict. Enrollment restricted to graduate students. Enrollment limited to 15. S. Harding

### **220. Cartographies of Culture. \***

Examines, theoretically and ethnographically, how societies and their cultures are created and reified through spatializing practices, including border-making, mapping, landscape aesthetics, globalization, time/history/memory, movement, and other locating activities. Enrollment restricted to graduate students. Enrollment limited to 15. M. Caldwell

### **225. The Anthropology of Things: Sign, Gift, Commodity, Tool. \***

Examines some approaches used by anthropologists and other thinkers to bring things into focus: as gifts, signs, commodities, and tools. Explores whether, by taking things seriously, anthropologists might learn to be empirical in new ways. Students cannot receive credit for this course and course 196F. Enrollment restricted to graduate students. Enrollment limited to 15. J. Habicht Mauche

### **228. Grant Writing. F**

Devoted entirely to writing grant proposals. Students either work on their graduate education fellowships or their doctoral dissertation grants or both. Reading materials consist of granting agency documents plus examples of successful applications. Enrollment restricted to anthropology graduate students. Enrollment limited to 15. May be repeated for credit. M. Caldwell

### **229. Constructing Regions. \***

Discusses centrality of the idea of "regions" in studies of culture, the history of "locating" social theory, and debates about area studies.

## Anthropology

Students develop area of transregional bibliographies. Primarily for second- or third-year anthropology graduate students reading "area" literatures. Enrollment restricted to graduate students. Enrollment limited to 15. M. Anderson

**230. Bodies, Images, Screens. \***  
Visuality as epistemology, image-consumption, and the political and representational possibilities stemming from digitization and the World Wide Web are increasingly important issues in the humane sciences. Offers historical and critical background and the possibility of hands-on practice using visual material in current research. (Formerly Photography and Image Culture.) Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

**231. Intimacy and Affective Labor. \***  
Examines recent work on the role of intimacy and affective labor in value production, political mobilization, and transnational capital linkages. Special attention given to how these terms are invoked to answer methodological and narrative concerns in ethnographic writing. Enrollment restricted to graduate students. Enrollment limited to 15. M. Moodie

**232. Bodies, Knowledge, Practice. \***  
Contemporary social theory and science both focus on bodies as critical sites of inquiry and the production of knowledge. Explores these theoretical intersections and constructions of the body with new ethnographic works. Questions how race, gender, and culture are inscribed through bodily practice,

imagery, and phenomenology. Enrollment restricted to graduate students. Enrollment limited to 15. N. Chen

**234. Feminist Anthropology. \***  
Examines how feminist anthropology creates its objects of knowledge by focusing on questions of method and representation. The class reads across these traditional objects--women and gender, for example--to highlight the epistemological and political stakes of feminist work in anthropology. Enrollment restricted to graduate students. Enrollment limited to 15. M. Moodie

**235. Language and Culture. \***  
An examination of language system and language use in relationship to cultural contexts of communication in Western and non-Western societies. Also examines the complex role which linguistic inquiry and models have played in broader theories of culture. Enrollment restricted to graduate students. Enrollment limited to 15. D. Brenneis

**236. On Insults. \***  
What is the role of insult in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Emphasizes philosophical, anthropological, psychoanalytic, and legal approaches to the issues. Enrollment restricted to graduate students and by permission of instructor. (Formerly Philosophy 290Y.) (Also offered as History of Consciousness 236. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. J. Neu

**238. Advanced Topics in Cultural Anthropology. \***  
Advanced topics in cultural anthropology. Current topics in

anthropological theory and ethnography taught on a rotating basis by various faculty members. Precise focus of each seminar varies and will be announced by the department. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

**241. Social Justice. \***  
Explores theoretical and methodological issues in the field of social justice with an emphasis on ethnographic analysis. Topics include: rights, obligations, justice, equality, compensation, and ethics. Enrollment restricted to graduate students. Enrollment limited to 15. M. Caldwell

**243. Cultures of Capitalism. \***  
Introduction to selected themes in political economy, stressing the work of Marx. Topics include the development of capitalism, colonialism, dependency, world systems, state formation, class consciousness, commodity fetishism, the nature of late capitalism, post-modernism, and the aesthetics of mass culture. Through political economy's interlocutors, raises questions about gender, race and ethnicity, and post-structuralist critiques. Enrollment restricted to graduate students. Enrollment limited to 15. L. Rofel

**246. Advanced Readings in Environmental Anthropology. W**  
Survey of history and topics of contemporary interest in environmental anthropology, including political ecology, environmental history, ethnoecology, and multi-species anthropology. Additional advanced readings on contemporary environmental anthropology research. Enrollment is restricted to graduate students. Enrollment limited to 15. A. Mathews

## Anthropology

### **247. Critical Perspectives on Nutrition. \***

Examines emerging critiques on the science, communication, and practice of nutrition using multidisciplinary approaches. Special attention is given to the effects of modern nutrition. Enrollment restricted to graduate students. Enrollment limited to 15. J. Guthman

### **248. Shadowy Dealings: Anthropology of Finance, Money, and Law. \***

Moves from a brief introduction to classic economic anthropology to recent work on histories of money and capitalism and cultures of financial markets, of accounting, and of legal and illegal trading practices. Enrollment restricted to graduate students. Enrollment limited to 15. A. Mathews

### **249. Ecological Discourses. \***

Explores narratives of nature and their practical consequences in contests over "wild places" and their resources. Readings focus on the histories of forests and on analytic frameworks—ecology, social history, interpretation, cultural studies—with which to investigate competing constructions of the environment. Enrollment restricted to graduate students. Enrollment limited to 15. A. Tsing

### **252. Survey of Cultural Anthropological Theory. W**

Major figures, ideas, and writing in 19th- and 20th-century cultural anthropology surveyed. Students cannot receive credit for this course and course 152. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **253. Advanced Cultural Theory. \***

Examines cultural anthropology's interdisciplinary practices of knowledge formation at an

advanced level. Drawing on various types of theoretical texts, the course elaborates on the relationship between culture and power, taking up different themes each time it is taught. Enrollment restricted to graduate students. Enrollment limited to 15. L. Rofel

### **254. Medicine and Culture. \***

Surveys medicine cross-culturally, with particular focus on power, tradition, and theories of embodiment. Students cannot receive credit for this course and course 134. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **255. Regulating Religion/Sex. \***

First examines the regulation of religion and the normalization of sex/sexuality as parallel modalities of secular rule in the production of modern citizens and subjects. Ultimately inquires into the relationship between "proper" religion and "proper" sexuality in secular state formations. (Formerly course 259.) Enrollment is restricted to graduate students. Enrollment limited to 15. M. Fernando

### **258. Experimental Cultures. \***

Addresses the use of experiments in anthropological research, theory, and writing. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **259. Race in Theory and Ethnography. \***

Explores theoretical and methodological approaches to the cross-cultural study of "race," with an emphasis on historical and ethnographic analysis. Main approaches considered include Foucauldian, Gramscian, diaspora theory, and the everyday poetics and politics of race. (Formerly course 246.) Enrollment is

restricted to graduate students. Enrollment limited to 15. M. Anderson

### **260. Anthropology of Freedom. \***

Examines conceptualizations and practices of freedom across geographical space and historical time. Readings drawn from Greek philosophy, Islamic, Christian, and Buddhist religious traditions. Enlightenment philosophy, liberal and neo-thought, and contemporary ethnographies. Enrollment restricted to graduate students. M. Fernando

### **261. Replication, Mimesis, and Fakery. \***

Replicas, copies, and fakes anchored conceptually by the authentic/original enable the marketing of cultural commodities like arts and crafts, especially since the advent of photography. Course explores these commercial and signifying processes in the global art and culture market. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **262. Documenting Cultures. \***

Follows the history of film and ethnography, media and methodology into the birth of cinema and anthropology in the early 20th century. Students learn theories of representation and media, conduct ethnographic research, and prepare a short film. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **263. Kinship. \***

Provides a critical survey of debates, old and new, in the study of kinship. Readings range from classical treatments to recent reformulations that use kinship as a lens for exploring intimacy, memory, futurity, embodiment, commodification, and power.

## Anthropology

Students cannot receive credit for this course and course 163. Enrollment restricted to graduate students. Enrollment limited to 15. D. Rutherford

### **267A. Science and Justice: Experiments in Collaboration. \***

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Feminist Studies 268A. Students cannot receive credit for both courses.) Enrollment limited to 15. J. Reardon

### **267B. Science and Justice Research Seminar. \***

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): Sociology 268A, Biomolecular Engineering 268A, Feminist Studies 268A, or Anthropology 267A. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Biomolecular Engineering 268B. Students cannot receive credit for both courses.) Enrollment limited to 15. The Staff

### **268A. Rethinking Capitalism. \***

Readings include works by speakers at UCSC's "Rethinking Capitalism Initiative." Topics are: (1) financialization versus commodification (how options-theory has changed capitalism); (2) material markets (how this theory performs); and (3) valuation and

contingency (how economies make worlds). (Also offered as History of Consciousness 268A. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. R. Meister

### **268B. Rethinking Capitalism. \***

Course 268A addressed changes in the theory and practice of capitalism as derivatives markets have become increasingly central to it. This course, which can be regarded as either background or sequel, concerns questions that surround recent debates about derivatives from the standpoint of broader developments in law, culture, politics, ethics, ontology, and theology. What would it mean to see questions of contingency and value as a challenge to late-modern understandings of these modes of thought? (Also offered as History of Consciousness 268B. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. R. Meister

### **269. Global History and the Longue Duree. \***

Emerging anthropological approaches to global history. Considers both 500-year and much longer historical frameworks. For the former, the evidence of documents, both European and non-European, is particularly important. For the latter, archaeological and evolutionary approaches are essential. Students cannot receive credit for this course and course 196H. Enrollment restricted to graduate students. Enrollment limited to 15. A. Tsing

### **270. History of Archaeology. \***

Historical review of prehistoric archaeology from antiquarianism to the present. Emphasis on the development of archaeological

theory, its relation to evolutionary and anthropological theory, and themes ongoing over time. Students cannot receive credit for this course and course 170. Enrollment restricted to graduate students. Enrollment limited to 15. J. Habicht Mauche

### **270A. Archaeology Graduate Core Course: History of Archaeological Theory. F**

Historical overview of archaeology, concentrating on archaeological practice in the English-speaking world from the late 19th through the 21st Centuries. Emphasis is on development of archaeological theory in its social context; its relation to evolutionary and anthropological theory; and themes ongoing over time. Students cannot receive credit for this course and course 270. Enrollment is restricted to graduate students. Enrollment limited to 15. J. Habicht Mauche

### **270B. Current Directions in Archaeological Theory. W**

Provides an in-depth understanding of current trends in archaeological thought, and enables students to place issues of archaeological interpretation into broader historical and theoretical frameworks. This course is a follow-up to course 270, but not a substitute. Prerequisite(s): course 270. Enrollment is restricted to graduate students. Enrollment limited to 15. J. Daehnke

### **272. Advanced Archaeological Research. S**

Introduces graduate students to archaeological research design. Topics include: middle range theory; multistage research strategies; sampling strategies and appropriate field methodology; and issues specific to particular scales of archaeological analysis (artifact, household, site, region). Enrollment

## Anthropology

restricted to graduate students. Enrollment limited to 15. C. Blackmore

### **273. Origins of Farming. \***

Survey of the ecological and archaeological evidence for the origins of plant and animal domestication in Africa, Eurasia, and the Americas. Discussion will center on the preconditions of this drastic alteration in human ecology and its consequences in transforming human societies. Students cannot receive credit for this course and course 173. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **274. Origins of Complex Societies. \***

The origins of complex society: the transition from egalitarian foraging societies to the hierarchical, economically specialized societies often referred to as "states" or "civilizations." Focuses on both Old World and New World cultures. Students may not receive credit for this course and course 174. Enrollment restricted to graduate students. Enrollment limited to 15. C. Blackmore

### **275A. Seminar on Early African Archaeology. \***

Tutorial on archaeology of Africa, from 2.5 million years ago to emergence of African pastoralism and farming. Weekly examination of disciplinary models and assumptions in historic context, emphasizing overarching themes in prehistoric archaeology. Students cannot receive credit for this course and course 175A. (Formerly Tutorial on African Archaeology.) Enrollment restricted to graduate students or by consent of instructor. Enrollment limited to 15. The Staff

### **275B. Tutorial in Archaeology of African Complex Societies. \***

Graduate tutorial on the archaeology of precolonial African kingdoms and states. Particular attention paid toward the origins of social inequality and the evolution of centralized politics. Students cannot receive credit for this course and course 175B. Prerequisite(s): Enrollment restricted to graduate students. Enrollment limited to 15. J. Monroe

### **276A. Advanced Topics in North American Archaeology. W**

In-depth examination of development of Native cultures in North America from end of last ice age to time of European contact. Focuses on specific regional trajectories and problems of social change. Enrollment restricted to graduate students. Enrollment limited to 15. J. Habicht Mauche

### **276B. Mesoamerican Archaeology. \***

Examines the pre-Columbian cultures of Mesoamerica and reviews the archaeological and ethnohistorical evidence related to the origins and development of cultures including the Olmec, Maya, Zapotec, Mixtec, and Aztec. Students cannot receive credit for this course and course 176B. Enrollment restricted to graduate students. Enrollment limited to 15. C. Blackmore

### **278. Tutorial on Historical Archaeology. \***

Tutorial on archaeology of European colonialism and the early-modern world. Focuses on the nature of European colonial expansion in New and Old Worlds; culture contact and change; and power and resistance in colonial societies. Students cannot receive credit for this course and course 178. Enrollment restricted to

graduate students. Enrollment limited to 15. The Staff

### **279. Feminism and Gender in Archaeology. \***

Considers feminist perspectives on the human past; archaeologists' perspectives on feminist theory; and the impact of gender, feminist, and critical social theory on the archaeological profession. Students cannot receive credit for this course and course 194C. Enrollment restricted to graduate students. Enrollment limited to 15. C. Blackmore

### **280. Advanced Ceramic Analysis. S**

Advanced graduate seminar that focuses on techniques and theories used to bridge the gap between the recovery of ceramic remains from archaeological contexts and their interpretation with respect to various anthropological issues and problems. Students cannot receive credit for this course and course 180. Enrollment restricted to graduate students. Concurrent enrollment in Anthropology 280L required. Enrollment limited to 5. J. Habicht Mauche

### **280L. Advanced Ceramic Analysis Laboratory (2 credits). S**

Emphasizes advanced techniques of ceramic analysis, including materials selection and processing, hand-building, and open-pit firings. Standard techniques for describing and measuring formal and technological attributes of pottery also presented. Students cannot receive credit for this course and course 180L. Enrollment restricted to graduate students. Concurrent enrollment in Anthropology 280 required. Enrollment limited to 5. J. Habicht Mauche

## Anthropology

### **282. Household Archaeology. \***

Explores the theoretical and methodological challenges faced by archaeologists excavating ancient households. Students examine the social, economic, and political characteristics of households and investigate how they intersect and support the social and physical aspects of communities. Enrollment restricted to graduate students. Enrollment limited to 15. C. Blackmore

### **284. Tutorial in Zooarchaeology. \***

Lectures and seminar on archaeological faunal analysis. Topics include: mammalian evolution and osteology; vertebrate taphonomy; reconstruction of human diet from faunal remains; foraging strategy theory; data collection and management; and methods of quantitative analysis. Students cannot receive credit for this course and course 184. (Formerly Zooarchaeological Research Design.) Enrollment restricted to graduate students. The Staff

### **285. Osteology of Mammals, Birds, and Fish. \***

Practicum in vertebrate osteology, covering all larger mammal species of central California, plus selected bird and fish species, and topics in evolution and ecology of selected taxa. Students cannot receive credit for this course and course 185. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **287. Advanced Topics in Archaeology. S**

A graduate seminar on advanced theoretical or methodological topics pertinent to advanced graduate student and faculty interests. Enrollment restricted to graduate students or by consent of instructor. Enrollment limited to 12. J. Monroe

### **292. Graduate Colloquium (2 credits). F,W,S**

Designed to offer an institutionalized mechanism for the presentation of research papers and teaching efforts by faculty and advanced graduate students. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **294N. Comparison of Cultures. \***

Seminar for students interested in theories and methodology of social and cultural anthropology devoted to critical discussion of different methods of comparison practiced in anthropology. Enrollment restricted to graduate students. Enrollment limited to 15. T. Pandey

### **297. Independent Study. F,W,S**

Students submit petition to sponsoring agency. The Staff

### **298. Advanced Laboratory Apprenticeship. F,W,S**

Supervised tutorial in specialized analytic methods in archaeology or physical anthropology. Students collaborate on laboratory research with a departmental mentor or, with advisor's consent, with researchers on or off campus, preparing a manuscript for publication or an extensive literature review. Permission of instructor required. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **299. Thesis Research. F,W,S**

Prerequisite(s): petition on file with sponsoring agency. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

# ART

---

2015-16 General Catalog

Elena Baskin Visual Arts Studios

Room E-104

(831) 459-2272

visart@ucsc.edu

<http://art.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The Art Department offers an integrated program of study in theory and practice exploring the power of visual communication for personal expression and public interaction. The department provides students with the means to pursue this exploration through courses that provide the practical skills for art production in a variety of media within the contexts of critical thinking and broad-based social perspectives.

The art program at UCSC is composed of courses in drawing, painting, photography, sculpture, print media, intermedia, critical theory, electronic art, public art, and interactive technologies. Baskin visual arts studios provide world-class facilities for art production in these areas. The Art Department is committed to pursuing a continuing dialogue about what constitutes basic preparation in the arts while offering students experience in established practices, new genres, and new technologies.

Students graduating with a major in art may become professional artists or pursue careers in such diverse areas as arts management, museum and gallery practices, communication technologies, public school teaching, media arts, and publishing. Many students who want to teach at the college level continue their education in graduate school.

---

### ART UNDERGRADUATE PROGRAM LEARNING OUTCOMES

---

Students who earn a B.A. in art will gain the skills, knowledge, and understanding that will enable them to:  
demonstrate proficiency in a range of techniques and media;

demonstrate the ability to imagine, create, and resolve a work of art;

demonstrate communication through familiarity with and ability to analyze, both verbally and in writing, issues and forms of contemporary art with a clear understanding of historical precedents; and

demonstrate critical thinking through the ability to articulate an insightful response and analysis of a work of art in order to participate in discussions and studio critiques.

---

### DECLARATION OF THE ART MAJOR— FROSH

---

Students may apply for admission to the art major after completing two of the following: Art 10D, Art 10E, or Art 10F. While completing this lower-division coursework, it is critical that each student meet with a faculty adviser regarding the student's potential to proceed to the major level.

---

### DECLARATION OF THE ART MAJOR— JUNIOR TRANSFER STUDENTS

---

Junior transfer students are accepted into the art major for fall quarter after passing a portfolio review in early April. Their acceptance is contingent upon their acceptance to UCSC. Acceptance to UCSC does not guarantee admittance to the art program, nor does passing the portfolio review guarantee that UCSC will accept the student to the university. Transfer students must identify themselves as potential art majors when applying to the university in order to receive information on the portfolio review deadlines and the materials required for the review. All junior transfers will be required to take Art 194, Forms and Ideas in their junior year at UCSC in lieu of the first-year foundation program requirements. Junior transfer students must pass the portfolio review and be admitted to UCSC to become art majors. If a student is admitted to UCSC and does not pass the Art Department portfolio review, it is imperative that this student pursue another major upon admittance. Students will be notified of the results of the review before they need to submit their Statement of Intent to Register for UCSC.

## REQUIREMENTS OF THE ART MAJOR

The minimum requirements for art majors who were admitted to UCSC in their frosh year are completion of eight lower-division and eight upper-division courses and satisfaction of the senior comprehensive requirement. Junior transfer students complete five lower-division and eight upper-division courses and their senior comprehensive requirement. A maximum of three courses total from outside the Art Department (including UC Education Abroad Program (EAP) courses) may be substituted for regular art courses with the approval of a major adviser. In courses taken outside the UCSC Art Department, students must have received a grade of B or higher. Students should plan carefully when using this option.

Students plan their course of study in consultation with a faculty adviser.

### LOWER-DIVISION REQUIREMENTS

Students complete eight courses as follows:

**The Foundation** (15 credits required, 10 credits must be from the 10 series)

- 10D, 2D Foundation
- 10E, 3D Foundation
- 10F, 4D Foundation
- and one course from the Art 80 series.

Introduction to Contemporary Art Practice (15 credits required)

Student complete three courses from the following:

- 20G, Introduction to Print Media and Drawing
- 20H, Introduction to Sculpture and Public Art
- 20I, Introduction to Photography
- 20J, Introduction to Drawing and Painting
- 20K, Introduction to Digital Media

### Critical Theory and Historical Context (10 credits required)

Students complete two courses from History of Art and Visual Culture (HAVC): one in Western art and culture and one in non-Western art and culture.

Note: Students may use Advanced Placement (AP) in Art History in lieu of the Western-emphasis history of art and visual culture requirement.

### UPPER-DIVISION REQUIREMENTS

Students complete eight courses as follows:

Studio Work (35 credits required)

- Seven upper-division (100+ numbered) studio courses (of which Art 190B may be one);

### Senior Capstone/Comprehensive Requirement

- 190A, Writing for Artists (meets the Disciplinary Communication requirement for the Art B.A.); and
- One of the following options:
  1. Completing Art 190B: Senior Project; or
  2. Presenting an exhibition and, by appointment, meeting with a faculty member for review and critique of the exhibition; or
  3. Submitting a portfolio and, by appointment, meeting with a faculty member for review and critique of the portfolio.

Senior majors should meet with their faculty adviser about this requirement.

A total of 80 credits are required for the Art B.A.; students are advised to plan in advance if they are interested in the program. Some requisite courses may be offered during Summer Session.

The last three quarters of coursework for the major must be completed in residence at UCSC.

## ART MAJOR PLANNER (INCOMING FROSH)

The following is a recommended academic plan for students to complete during their first two years as preparation for the art major.

Year	Fall	Winter	Spring
1st (frsh)	ART 80 Series†	ART 10 series**	ART 10 series**
	ART 10 series**		
2nd (soph)	ART 20 Series	ART 20 Series	ART 20 Series
	HAVC*	HAVC*	

†ART 80 courses may be taken in Fall, Winter, or Spring (one required)

\*Courses from history of art and visual culture (one with a Western emphasis, one with a non-Western emphasis)

\*\*Art 10 courses may be taken in fall, winter, and/or spring (two required)

## LOWER-DIVISION REQUIREMENTS (JUNIOR TRANSFERS)

- Three lower-division studios (equivalent to those found in the above list) should be taken at the community college, college, or university in preparation for the mandatory portfolio review prior to acceptance to the art major. Please remember that three studios is a minimum

## Art

requirement and may not be enough studio work undertaken to pass the highly competitive nature of the portfolio review.

- Two courses from history of art and visual culture may be taken at the community college, college, or university, if available, or at UCSC (one with a Western emphasis, one with a non-Western emphasis).

---

### UPPER-DIVISION REQUIREMENTS (JUNIOR TRANSFERS)

---

Students complete eight courses as follows (40 credits required):

- Art 194, Forms and Ideas;
- Six upper-division (100+ numbered) studio courses (one of which may be Art 190B, Senior Project)
- Art 190A, Writing for Artists

The last three quarters of coursework for the major must be completed in residence at UCSC.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

- Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in art is satisfied by completing Art 190A, Writing for Artists

---

### COMPREHENSIVE REQUIREMENT

---

- All art majors satisfy the capstone/comprehensive requirement with 190A, Writing for Artists; and

- One of the following options:

1. Completing Art 190B: Senior Project; or
2. Presenting an exhibition and, by appointment, meeting with a faculty member for review and critique of the exhibition; or
3. Submitting a portfolio and, by appointment, meeting with a faculty member for review and critique of the portfolio.

Senior majors should meet with their faculty adviser about this requirement.

---

### STUDY ABROAD

---

The UC Education Abroad Program (EAP) offers students the opportunity for study abroad. Art majors may participate in EAP in their junior year. Art students may not go abroad in their senior year because the last three quarters of coursework must be in residence at UCSC. When considering attending EAP, the student should be mindful that only three courses may be substituted in the art major and each must receive a grade of B or better.

---

### MATERIALS FEE

---

Art students should be aware of the materials fee required for some studio courses. The fee is billed to the student's account for specific course materials purchased by the Art Department through the university. Fees generally range from \$5 to \$150 per course. Students may incur additional expense purchasing individual supplies.

---

## ART FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**Patrick Aherne, Emeritus**

**Joyce Brodsky, Emerita**

**Doyle Foreman, Emeritus**

**Frank Galuszka, Emeritus**

**Fred A. Hunnicutt, Emeritus**

**Jimin Lee**

Etching, lithography, monoprinting, book arts, ukiyo-e

**Norman Locks**

Photography

**Douglas E. McClellan, Emeritus**

**Jennie Lind McDade, Emerita**

**Kathryn E. Metz, Emerita**

**A. Laurie Palmer**

Sculpture, installation, public projects, writing

**Jasper A. Rose, Emeritus**

**Elizabeth Stephens**

Intermedia, electronic art, sculpture, and performance art

**Lewis Watts, Emeritus**

**Donald L. Weygandt, Emeritus**

**David Yager**

Photography, design, print media

**Jack Zajac, Emeritus**

---

### ASSOCIATE PROFESSOR

---

**Elliot Anderson**

Electronic art, digital arts/new media

**Melissa Gwyn**

Painting, drawing

**Dee Hibbert-Jones**

Public art, sculpture

**Robin Hunicke**

Game design

**Kate O’Riordan**

Theory, digital media technologies.

**Jennifer Parker**

Sculpture, digital art and new media, art | science

ASSISTANT PROFESSOR

**Enrique Leal**

Silkscreen, photogravure, intaglio, digital printmaking

LECTURER

**Peter Loftus**

Painting

**Kathleen Perry**

Intermedia, photography, sculpture

ART COURSES

LOWER-DIVISION COURSES

**10. Foundation Series in Art.**

Introduces general education students and prospective majors to theory and practice of art and contemporary discourse surrounding it. Courses expose students to both art discourse and art making through large lecture sections that meet twice a week and smaller studio sections that meet twice a week. Students must register for both lecture and studio sections. The Staff

**10D. 2D Foundation. W**

Introduces students to the fundamental principles of two-dimensional art and design and focuses on analyzing the concepts of line, color shape, value, space, form, unity, balance, scale, proportion, texture, and emphasis to be used to express complex ideas. This course is a hybrid studio/lecture. Students are billed for a materials fee. (General Education Code(s): IM.) E. Martinez Leal

**10E. 3D Foundation. F**

Introduces students to the fundamental principles of three-dimensional art and design through basic concepts, techniques, and technical practice. Focuses on three-dimensional art and the design fundamentals of sculpture, public art, architecture, and the industrial-design process and production. This course is a hybrid studio/lecture. Students are billed

for a materials fee. (General Education Code(s): IM.) K. Perry, W. Hibbert-Jones

**10F. 4D Foundation. S**

Introduces students to the fundamental principles of four-dimensional/time-based art and design through basic concepts, techniques, and technical practices. Computers and video, photo, sound, and lighting equipment are used to create short-form, time-based work. This course is a hybrid studio/lecture. (General Education Code(s): IM.) T. Bouscaren

**20. Introduction to Contemporary Art.**

Introduces basic conceptual and practical tools for specific art practices. Instruction consists of studio sections that meet twice a week incorporating theory, practice, technique, and critiques. The Staff

**20G. Introduction to Print Media and Drawing. F,S**

Introduces the methods, materials, and history of printmaking and drawing as a tool for creative exploration. Understanding and development of concepts and skills are achieved through a series of lectures, studio demonstrations and practice, assignments, and critiques. Students are billed for a materials fee. Prerequisite(s): Pre-art, proposed art, or art major, and completion of two courses from 10A, 10B, 10D, 10E, or 10F.

(General Education Code(s): PR-C.) E. Martinez Leal, J. Lee

**20H. Introduction to Sculpture and Public Art. W,S**

Introduces sculpture and art in public space. The course is composed of lectures, readings, discussions, studio assignments, and demonstrations. Students are billed for a materials fee. Prerequisite(s): Pre-art, proposed art, or art major, and completion of two courses from 10A, 10B, 10D, 10E, or 10F. (General Education Code(s): PR-C.) W. Hibbert-Jones, A. Palmer

**20I. Introduction to Photography. F,W,S**

Introduces basic skills and conceptual development in photography and related digital media through image-making in the field, on the web, and in laboratories, through readings, discussions, and critiques. Students are billed for a materials fee. (Formerly Introduction to Photography and Digital Media.) Prerequisite(s): Pre-art, proposed art, or art major, and completion of two courses from 10A, 10B, 10D, 10E, or 10F. (General Education Code(s): PR-C.) N. Locks, K. Perry

**20J. Introduction to Drawing and Painting. F,W,S**

Introduces the material practices of painting in combination with the formal vocabulary of the visual arts. A discussion of values, form, color, and figure/ground relationships enters into each class. Students are billed for a materials fee.

Prerequisite(s): Pre-art, proposed art, or art major, and completion of two courses from 10A, 10B, 10D, 10E, or 10F. (General Education Code(s): PR-C.) J. Hemming, M. Gwyn

**20K. Introduction to New Media and Digital Artmaking. F**

Introduces digital and new media art practice. Explores the use of the computer as tool and medium. Provides a hands-on introduction to the fundamentals of graphics; digital-image acquisition and manipulation; video; web design; and computer programming. Lectures, readings, and discussions examine the history of technology artwork and technology's

relationship to contemporary culture. Students are billed for a material fee. Prerequisite(s): Pre-art, proposed art, or art major, and completion of two courses from 10A, 10B, 10D, 10E, or 10F. (General Education Code(s): PR-C.) E. Anderson

**42. Student-Directed Seminar. \*** Seminars taught by upper-division students under faculty supervision. Does not fulfill major requirement. (See course 192.) The Staff

**80. Artists and Ideas.**

Introduces general education students, prospective majors, and art majors to art forms and critical ideas that have shaped artistic practice focusing on the work of contemporary artists, including current faculty in the Art Department. The Staff

**80B. Environmental Art. W**

Examines ways artists engage, interact, and comment upon ecology and nature in their artworks by examining environmental art from the 1960s through the present. (General Education Code(s): PE-E.) E. Stephens

**80D. Introduction to Photography. S**

Introductory course for beginners. Various techniques examined and assigned in specific exercises. Work on projects using color film; this is a non-darkroom course. Examples given of photography from 1826 to the present. Balances historical study and practice through assigned homework exercises. Students must provide their own camera, preferably one with a manual setting. No phone cameras allowed. Students are billed a materials fee. (General Education Code(s): IM, T4-Humanities and Arts, A.) K. Perry

**80E. Tangible Memory: Artists in the Archive. S**

Students learn about how artists and museums keep historical memory alive. Instructor E.G. Crichton introduces her project--LINEAGE: Matchmaking in the Archive--in relation to other artworks that engage with archives. (General Education Code(s): IM, T4-Humanities and Arts, A.) E. Crichton

**80F. Introduction to Issues in Digital Media. F**

Digital media was positioned as a radical new social and creative medium in the 1980s and 1990s. The ensuing decades have seen this area become ubiquitous mass media with structural inequalities, centralized ownership, environmental damage, and precarious labor conditions. At the same time, it has become the

language of our time and remains a site of creativity and intervention and offers opportunities for social changes. This course provides an introduction to key issues in this area through the lens of race and ethnicity. (General Education Code(s): ER, T6-Natural Sciences or Humanities and Arts, A.) K. McKinley

**99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**Upper-Division Courses**

**101. Introduction to Computer Programming for the Arts. S**

Combines an introduction to computer programming for beginners with special topics that are essential for the digital arts. Basic concepts of programming are developed in the JavaScript language and applied to digital arts media, such as algorithmically generated still images and animations in two and three dimensions, sound art, and music composition. Presentation of digital artwork in the theater and via the web are covered in detail. (General Education Code(s): MF.) The Staff

**102. Interactive Arts. S**

Physical computing examines bodily sound, movement, and other physical phenomena as an interface to a computer or microcomputer. Students investigate electronics and devices for use in interactive art-making to create sculptural or installation-based projects. Students receive hands-on experience working with sensors, motors, switches, gears, lights, circuits, and hardware store devices to create kinetic and interactive works of art, programming and interface design. Students are billed a materials fee. Prerequisite(s): Art 20B, 20I, 20K, 21, 103, 104, 107, or 108 or CMPS 25 or CMPM 25; and

## Art

two courses from any non-computer/digital media lower-division art studios (Art 15-40) or by permission of instructor. Restricted to art majors. May be repeated for credit. E. Anderson, The Staff

### **103. Interactive Art: Object, Interface, Robotics. \***

Examines computer interactivity and interface in art making through theory and practice. Students develop interactive installation and sculptural works of art. Assignments may include the acquisition and creation of digital images, two-dimensional animation, programming with MAX/MSP/Jitter, basic electronics and sensors, and digital video and audio. Discussions, readings, and critiques address content, aesthetics, concepts, and expression as well as a practical grasp of relevant software. Students are encouraged to develop research projects and explore experimental practices. Students are billed a materials fee. Prerequisite(s): Art 20B, 20I, 21, 22, 102, 104, 107, or 108 or CMPS 25 or CMPM 25; and two courses from any non-computer/digital media lower-division art studios (Art 15-40) or by permission of instructor. Restricted to art majors. May be repeated for credit. E. Anderson

### **104. Digital Video. W**

An exploration of the video medium including production using the digital video format. Digital video cameras will be used to produce digital source material to be manipulated in a non-linear digital editing system. Image manipulation, effects, and editing will be explored. A variety of video structures, theories, concepts, and forms will be examined through production, discussions, and viewing students' and artists' work. Prerequisites: Art

20B, 20I, 20K, 21, 22, 102, 103, 107, or 108 or CMPS 25, or CMPM 25; and two courses from any non-computer/digital media lower-division art studios (Art 15-40) or by permission of instructor. Restricted to art majors. May be repeated for credit. T. Bouscaren, E. Anderson

### **106. Introduction to Animation. F**

Introduces animation techniques, practices, history, and theories. Students learn techniques and process in 2D, stop-motion, and digital animation. Projects teach students the workflow of animating including script development, storyboarding, frame-by-frame animation, animatic, digital, and post-production. Students are required to research artists, both historical and contemporary, working in the field of animation and to be able to discuss the work. The course teaches theoretical and historical perspectives on animation and requires students to develop a critical analysis and vocabulary. Prerequisite(s): Three courses from the following: Art 15-40 or CMPS 25 or CMPM 25. Enrollment restricted to art majors. May be repeated for credit. S. Ruiz, The Staff

### **107. Introduction to 3D Graphics and Modeling. W**

Independent and collaborative creative projects using advanced computer methods. May include networking projects, virtual representations, interactive multimedia, installation, performance, 3D modeling and animation, or robotics. Emphasis on advanced critical and experimental approaches to computers as a unique art medium, and contemporary research issues. Students are required to enroll in scheduled lab section. Students are billed for a materials fee.

Prerequisite(s): Art 20B, 20I, 20K, 21, 22, 102, 103, 104, or 108 or CMPS 25 or CMPM 25; and any two of any non-computer/digital media lower-division art studios (Art 15-40) or by permission of instructor. Restricted to art majors. May be repeated for credit. E. Anderson

### **108. New Media and Social Practice Artmaking. F**

Provides students with firsthand experience developing new media artworks in relationship to the needs of specific communities and social struggles. Students develop content using new media practices, tools, systems, and strategies. The final artwork can utilize video, film, digital media, social networks, and app development, among other new media art forms. Students are billed for a materials fee. Prerequisite(s): Art 20B, 20I, 20K, 21, 22, 102, 103, 104, or 107 or CMPS 25 or CMPM 25; and two courses from lower-division art studios courses (Art 15-40) or by permission of instructor. Enrollment restricted to art majors. May be repeated for credit. E. Anderson

### **110. Intermediate/Advanced Drawing. \***

Work moves toward individual directions in drawing. A variety of media are explored. Each student is expected to do 150 hours of drawing over the quarter. Students are billed a materials fee. Prerequisite(s): Art 15, 20, 20A, 20G, 20J, 111, 112, 119; and two non-drawing lower-division art studios (Art 20H, 20I, 20K, 21-40, or CMPS 25, or CMPM 25) or by permission of instructor. Enrollment restricted to art majors. May be repeated for credit. M. Gwyn

### **111. Figure Drawing. F**

Focuses on drawing from the human figure and exploring the figure for the purpose of personal expression and social

## Art

communication. Intended for the intermediate/advanced drawing student. Students are billed a materials fee. Prerequisite(s): Art 15, 20, 20A, 20G, 20J, 110, 112, 119; and two non-drawing lower-division art studios (Art 20H, 20I, 20K, 21-40, or CMPS 25, or CPM 25) or by permission of instructor. Enrollment restricted to art majors. May be repeated for credit. N. Buchanan, The Staff

### **112. Mixed Media Works on Paper. \***

This course stresses alternative drawing processes, techniques, and materials. Intended for the intermediate or advanced student. Students are billed a materials fee. Prerequisite(s): Art 15, 20, 20A, 20G, 20J, 110, 111, or 119; and two of any non-drawing lower-division art studios (Art 20H, 20I, 20K, 21-40, or CMPS 25, or CPM 25) or by permission of instructor. Enrollment restricted to art majors. May be repeated for credit. M. Gwyn

### **118. Digital Drawing/Painting for Game Design. W,S**

Supports students working as artists in an interdisciplinary collaboration with project teams led by senior students in computer game design (the yearlong Computer Science 170 series). Instruction includes techniques, tools, and concepts of drawing and painting in a digital environment oriented toward the context of computer games. Coursework is composed of projects to develop individual ideas and skills, as well as offering productively engaged participation in a collaborative game-design team. Students are billed a materials fee. Enrollment restricted to art majors; admission by permission of the instructor. May be repeated for credit. The Staff

### **119. Special Topics in Drawing.**

### **F,W**

Special topics in drawing as announced. Students are billed a materials fee. Prerequisite(s): Art 15, 20, 20A, 20G, 20J, 110, 111, or 112; and two non-drawing lower-division art studios (Art 20H, 20I, 20K, 21-40, and CMPS 25 or CPM 25) or by permission of instructor. Enrollment restricted to art majors. May be repeated for credit. The Staff, T. Bouscaren, M. Gwyn

### **120. Introduction to Intermedia. F**

Explorations of the role of an artist as someone who integrates a variety of media to explore conscious subject matter. Emphasis on contemporary art forms that incorporate scores, mapping, found objects, time-based elements, and interactivity. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 121, 122, 124, 125, 129, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CPM 25). Restricted to art majors. E. Stephens

### **121. Intermedia II. \***

Investigation in combining media, materials, and forms to explore a variety of contemporary art practices. Students develop their projects thematically throughout the quarter. Assignments encourage experimentation with time and motion, text and images, collaboration, installation, performance, and interactivity. Discussions, reading handouts, and critiques further the development of perceptual and conceptual skills. Skill workshops introduce new techniques. Students are billed a materials fee. Prerequisite(s): Art 120. Enrollment restricted to art majors. May be repeated for credit. (General Education Code(s): PR-C, A.) K. Perry

### **122. Intermedia: Conceptual and Process-Oriented Approaches. F**

Special subjects to be offered by regular staff or visiting artists as announced. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 124, 125, 129, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CPM 25). Restricted to art majors. May be repeated for credit. R. Hunicke, The Staff

### **124. Material Metaphor: Creating Meaning in Form. S**

Workshops introduce further investigation of materials and techniques. Students explore diverse methods of visual communication through a series of projects that require individual research and collaborative efforts. Students are encouraged to develop projects according to their motivation, expertise, and self-assessment. Emphasis placed on contemporary studio practices of installation, students will integrate a variety of materials and metaphor within the architectural and environmental space. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 125, 129, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CPM 25). Restricted to art majors. May be repeated for credit. E. Stephens

**125. Environmental Art Studio. W**

Introduces students to environmental art and design through basic concepts, techniques, and studio practice. Students are billed for a materials fee.

Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 121, 122, 124, 129, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25).

Restricted to art majors. May be repeated for credit. E. Stephens

**127. Architectural Design. \***

Introduction to the fundamentals of architectural design. To convey their concepts clearly, students are introduced to visual representation techniques, including orthographic projections and paraline drawing.

Students are also introduced to representation techniques of abstraction and perception, including diagramming and mapping. Students are billed a materials fee. Prerequisite(s): Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPM 25 or CMPS 25).

Enrollment restricted to art majors. Enrollment limited to 25. May be repeated for credit. The Staff

**128. Picturing Identity: Document and Culture. \***

Studio addresses issues of race, gender, culture, personal identity, and visual representation. Examines ways ideas of identity are given visual form and communicated in fine arts and mass media. Students research ways traditionally underrepresented groups in society have been and are being represented in mass media; they then visually interpret that information in forms of visual artifacts. This process and

interpretation serve as springboard to examination of expanded ideas of identity, including personal and/or family culture and history, gender, and ethnicity. Encourages use of broad range of mediums available to construct visual representations of identity. Students are billed a materials fee. Prerequisite(s): Three courses from the following: Art 15-40 or CMPS 25 or CMPM 25.

Enrollment restricted to art majors. The Staff

**129. Special Topics in Intermedia. S**

Exploring interactive strategies for making art. Projects experiment with combining forms and mediums to engage an audience. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 172, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. May be repeated for credit. E. Stephens

**130. Intermediate/Advanced Painting. F**

Continuation of the development of a basic foundation in painting with emphasis on the development of individual, experimental procedures. A foundation in drawing is recommended. Students are billed a materials fee.

Prerequisite(s): Art 20E, 20J, 24, 24A, 24B, 133, 137, 138, or 139; and two of any non-painting lower-division studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. M. Gwyn

**133. Abstract Painting. W**

Exploration of abstract painting through studio work, lectures, and critiques with emphasis on progressive abstraction, minimalism, op art, and abstract

expressionism as well as other 20th-century and 21st-century forms. A foundation in drawing is recommended. Students are billed a materials fee. Prerequisite(s): Art 20E, 20J, 24, 24A, 24B, 130, 137, 138, or 139; and two of any non-painting lower-division studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. F. Galuszka

**137. Outdoor Painter's Project. S**

Explores contemporary landscape through the practice of plein air painting. Observational plein air painting will provides the foundation for the class. Instruction includes technical instruction in materials and technique as well as conceptual material. Student may work with oils, alkyds, or acrylic on panels, paper, or canvas.

Prerequisite(s): Art 20E, 20J, 24, 24A, 24B, 130, 133, 138, or 139; and two of any non-painting lower-division studios (Art 15-40 or CMPS 25, or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. P. Loftus, The Staff

**138. Facture and Meaning. S**

Explores the materials and history of painting through lectures, demonstrations, and practice in oils, egg tempera, distemper, and Flashe paint. Students participate in group practices and also work independently on projects designed by them in consultation with the instructor. A foundation in drawing is recommended. Students are billed for a materials fee.

Prerequisite(s): Art 20E, 20J, 24, 24A, 24B, 130, 133, 137, or 139; and two of any non-painting lower-division art studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. M. Gwyn

## Art

**139. Special Topics in Painting. \***  
Special studies in painting as announced. A foundation in drawing is recommended. Students are billed a materials fee.  
Prerequisite(s): Art 20E, 20J, 24, 24A, 24B, 133, 137, or 138; and two of any non-painting lower-division studios (Art 15-40 or CMPS 25 or CPM 25). Enrollment restricted to art majors. May be repeated for credit. M. Gwyn, The Staff

**143T. Design Concept Development. W**  
Students develop an advanced design project related to theatrical production, apparel or housewares, marketing collateral, packaging or product development, or any related fields. Students address research and development, materials sourcing, budgeting, fabrication, and portfolio-quality presentation materials.  
Prerequisite(s): Theater Arts 10; or two courses from ART 10D, 10E, and 10F. Enrollment is by permission of the instructor. Theater Arts 106 is recommended as preparation. (Also offered as Theater Arts 103. Students cannot receive credit for both courses.) B. Baron, The Staff

**146T. Digital Illustration. \***  
Introduces digital rendering techniques using the Adobe Creative Suite. Using Adobe Creative Suite, students solve design problems. Enrollment by permission of the instructor. Application form available from baron@ucsc.edu. (Also offered as Theater Arts 106. Students cannot receive credit for both courses.) Enrollment limited to 30. (General Education Code(s): A.) The Staff

**147T. Design Studio: Costume. \***  
Students learn advanced principles and theory of costume design, and apply these towards a large project

for theatrical/film production or for character design for animation and gaming. Students are billed a materials fee. (Also offered as Theater Arts 117. Students cannot receive credit for both courses.) Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IM, A.) B. Baron

**149A. Contemporary Visual Media: Issues of Theory and Practice. \***  
Examines selected issues in critical theory relevant to contemporary visual practices through writing assignments and class discussions of core readings. Specifically, thematically explores the relationship between visual art and film aesthetics. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. (General Education Code(s): W.) The Staff

**149B. Contemporary Visual Media: Issues of Theory and Practice. \***  
Examines selected issues in critical theory relevant to contemporary visual practices through writing assignments and class discussions of core readings. Specifically, focuses on the creative process: How do artists work and what informs their production?  
Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. (General Education Code(s): W.) The Staff

**150. Darkroom Practices. F**  
Students concentrate on darkroom practices and explore visual ideas, directing their work toward individualized goals. Required work includes making photographic prints, reading historical and theoretical works, and examination

of photographs. Students are billed a materials fee. Prerequisite(s): Art 20C, 20I, 30, 32, 151, 156, 157, 158, or 159; and two of any non-photo lower-division studios (Art 15-40 or CMPS 25 or CPM 25). Enrollment restricted to art majors. May be repeated for credit. N. Locks

**150C. Critical Issues in Contemporary Art. \***  
This writing-specific course is concerned with the role of the artist in society and offers a comprehensive overview of contemporary thought within the visual arts from an international perspective. Special emphasis placed on current trends and shifts in artistic production, theory, and criticism, and on art works that are artistically and intellectually inventive, as well as those that produce controversial and often challenging results. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior art majors. (General Education Code(s): W.) The Staff

**151. Digital Photography. F,W**  
Introduction to basic theories behind the digital production, manipulation, and output of photographic images. Through readings and production, students address major issues specific to working with images in an increasingly digital environment. Students are billed a materials fee. Prerequisite(s): Art 20C, 20I, 30, 32, 150, 156, 157, 158, or 159; and two of any non-photo lower-division studios (Art 15-40, or CMPS 25 or CPM 25). Enrollment restricted to art majors. May be repeated for credit. N. Locks, K. Perry

**156. Project Development in Photography. W**  
Concentrates on photographic

project development, developing analytical skills designed to help direct students' own photographic ideas. Helps students create a conceptual theoretical framework through image-making in the field and studio, through critique and discussion, through readings, and by studying the work of artists. Students are billed a materials fee. Prerequisite(s): Art 150 or 151. Enrollment restricted to art majors. May be repeated for credit. N. Locks, The Staff

### **157. Advanced Digital Photography. \***

Further study the practice, theories, and criticisms of the digital production, manipulation, and output of photographic images. Major issues specific to the production of digital images will be addressed through readings and discussion, including techniques and theories drawn from a course reader and a textbook on advanced Photoshop skills. A final project is required. Students are billed a materials fee. Prerequisite(s): Art 151. Enrollment restricted to art majors. May be repeated for credit. N. Locks

### **158. Advanced Photography. S**

Students produce a portfolio of photographs, read historical and theoretical works, and study photographs and other art works. Students are billed a materials fee. Prerequisite(s): two courses from Art 150, 151, 156, 157, or 159. Enrollment restricted to art majors. May be repeated for credit. N. Locks

### **159. Special Topics in Photography. S**

Special studies in photography, concentrating on specific subject matter or media. Topics may include documentary photography, landscape, alternative processes, or mixed media. Students are billed a materials fee. Prerequisite(s): Art 150 or 151. Enrollment restricted to art majors. May be repeated for credit. N. Locks, L. Watts

### **160B. Mono/Mixed Media Printmaking. \***

Introduces the contemporary monotype, monoprint, and mixed media print processes facilitating a crossover between painting, drawing, and printmaking. Through lectures, demonstrations, and discussions on topics and class assignments, students will expand their creative possibilities in this exciting medium. Students are billed a materials fee. Prerequisites: Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 161B, 162A, 162B, 163A, 163B, 164A, 165, 168, or 169; and two non-print lower-division media studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. J. Lee

### **161B. Relief/Mixed Media Printmaking. W**

Explores traditional, contemporary, and experimental processes, issues, and concepts of relief and mono/mixed media printmaking. Students gain in-depth information and working knowledge to specialize individual ideas and build artistic development through varieties of class activities. Prerequisites: Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 160B, 162A, 162B, 163A, 163B, 164A, 165, or 168; and two non-print lower-division media studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for

credit. J. Lee, The Staff

### **162A. Intaglio I. F**

Introduces students to various methods used in making intaglio prints. Encourages individual artistic growth of imagery and technique through assignments designed to explore the medium. Includes discussion and critique of work with equal emphasis on technique and concept. Students are billed a materials fee. Prerequisite(s): Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 160B, 161B, 162B, 163A, 163B, 164A, 165, 168, or 169; and two non-print media lower-division studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. J. Lee

### **162B. Intaglio II. \***

This presentation of advanced intaglio techniques emphasizes a variety of multi-plate color printing and photo etching processes. The course concentrates on individual development in style and concept through the intaglio process. Students are billed a materials fee. Prerequisite(s): Art 162A. Enrollment restricted to art majors. May be repeated for credit. J. Lee

### **163A. Lithography I. F**

Introduction to drawing, processing, and printing of lithographs from stone. Emphasis on discovery of tonal, textural, and expressive potential from the surface of the stone, while establishing individual directions in imagery. Condensed history of the medium, technical theory, and critique in lecture and demonstrations. Students are billed a materials fee. Prerequisites: Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 160B, 161B, 162A, 162B, 163B, 164A, 165, 168, or 169; and two non-print lower-division media studios (Art 15-40 or CMPS 25 or

## Art

CMPM 25). Enrollment restricted to art majors. May be repeated for credit. E. Martinez Leal

### **163B. Lithography II. \***

Continuation of course 163A.

Introduction of tusche wash, aluminum plates, transfers, photolithography (computer interface), and multiple color techniques. Emphasis on experimentation, refinement of craft and approach, defining individual imagery, and expanding scale. Further investigation of the history of the medium and contemporary practice. Students are billed a materials fee. Prerequisite(s): Art 163A. Enrollment restricted to art majors. May be repeated for credit. E. Martinez Leal

### **165. Print Media in Visual Communication. S**

Explores a unique approach reviewing the printed images in visual communications. A wide blend of traditional and cutting-edge print media processes with an interdisciplinary focus will be taught for conceptualizing, producing, and presenting the printed image. Students are billed a materials fee. Prerequisite(s): one of Art 160B, 161B, 162A, 162B, 163A, 163B, 164A, 168, or 169. Enrollment restricted to art majors. May be repeated for credit. J. Lee

### **166. Art of Bookmaking. \***

Introduction to production of small edition books and multiples utilizing sequential visual imaging, narrative content, and mixed media in bookmaking. Provides instruction in conceptualizing, producing, and distributing printed artists' multiples. Ideas encouraged within a broad range of possibilities via the format of artists' books. Students are billed a materials fee. Prerequisite(s): Three courses from the following: Art 15-40 or CMPS 25

or CMPM 25. Enrollment restricted to art majors. May be repeated for credit. The Staff

### **168. Photo-Based Printmaking. W**

Intermediate/advanced studio course exploring the processes, history, and the recent developments in contemporary photomechanical printmaking. Through experimentation and research students learn how to utilize photographic imagery, blending them in multiple layers and colors, thereby facilitating articulation of their conceptual foundations. Students are billed a materials fee. Prerequisites: Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 160B, 161B, 162A, 162B, 163A, 163B, 164A, 165, or 169; and two non-print lower-division media studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. J. Lee

### **169. Special Topics in Printmaking. S**

Special studies in printmaking, as announced. Students are billed for a materials fee. Prerequisites: Art 20C, 20F, 20G, 25, 26, 27, 33, 36, 38, 160B, 161B, 162A, 162B, 163A, 163B, 164A, 165, or 168; and two non-print lower-division media studios (Art 15-40 or CMPS 25 or CMPM 25). Enrollment restricted to art majors. May be repeated for credit. E. Martinez Leal

### **172. Public Art: Memory, Landscape, and Artist as Activist. W**

In-depth exploration of art in the public sphere. Students build an understanding of public art sparked by practical experience designing and developing projects. Theoretical aspects of contemporary public art, and an introduction to the range of current

public art practices will be introduced through readings, lectures, and artist's talks. The combination of practical hands-on technique and theoretical ideology will enable students to fully develop their own project within the class. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 129, 180B, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. May be repeated for credit. W. Hibbert-Jones

### **180B. Sculpture II. S**

More advanced fabrication techniques in sculpture using wood, metal, industrial, and other materials. Techniques include carpentry and woodshop skills, and an introduction to sculptural forms, processes, and ideas. Demonstrations, slide lectures, and critical discussion of work help develop technical and conceptual skills. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 129, 172, 183, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. May be repeated for credit. A. Palmer

### **183. Metal Fabrication. W**

Focus on teaching intermediate to advanced students the processes and techniques of direct metal fabrication for contemporary sculpture and design. Explores a range of welding, cutting, and forming techniques and processes through demonstrations, slide lectures, field trips, and studio time. Demonstrations, slide lectures, and critical discussion of work help develop technical and conceptual

## Art

skills. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 129, 172, 180B, 188, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. May be repeated for credit. K. McKinley, The Staff

### **188. Intermediate to Advanced Sculpture (Foundry). F,S**

This intermediate/advanced course provides the information and facilities necessary to express ideas through the indirect process of metal casting. The "lost wax" method is used to manifest ideas in sculpture. Lectures and demonstrations are combined with work time in class. Students generate sculpture forms in wax then gate, invest, weld, chase, patina, and present at least one finished piece. Students are billed a materials fee. May be repeated for credit. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 129, 172, 180B, 183, or 189; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. May be repeated for credit. S. Monaghan, The Staff

### **189. Special Topics in Sculpture. W**

Special topics in sculpture as announced, concentrating on specific aspects of subject matter and media. Students are billed a materials fee. Prerequisites: Art 20D, 20H, 23, 28, 29, 37, 40, 120, 121, 122, 124, 125, 129, 172, 180B, 183, or 188; and two non-sculpture/intermedia public art lower-division studios (Art 15-38 or CMPS 25, or CMPM 25). Restricted to art majors. Offered in alternate academic years. May be repeated for credit. A. Palmer

### **190A. Writing for Artists. W**

Provides practice and discussion for art majors as they face a variety of situations requiring clear and critical writing skills: writing scholarly statements about their creative process; developing a concise artist biographical statement; drafting a short grant proposal for their projects; and preparing works of art for critique and exhibition. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior art majors. (General Education Code(s): W.) T. Bouscaren

### **190B. Senior Project. S**

Advanced senior art majors create and complete a senior project to fulfill their comprehensive graduation requirement. Focuses on a weekly lecture, studio work, peer critique, and professional practices such as the documentation and exhibition of work. Students are billed for a materials fee. Enrollment restricted to senior art majors. W. Hibbert-Jones

### **191. Teaching Apprenticeship. F,W,S**

Designed for art majors at the upper-division level. Each student assists in a lower-division art course under the direct supervision of a faculty member. Students assist in technical instruction, critiques, and class discussions. May not be repeated for credit. Does not count toward upper-division major requirements. Enrollment restricted to art majors. The Staff

### **192. Directed Student Teaching. F,W,S**

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students should have upper-division standing with a

proposal supported by a faculty member willing to supervise. Students submit petition to sponsoring agency. Enrollment limited to 5. The Staff

### **193. Field Study. F,W,S**

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Students submit petition to sponsoring agency. Petitions may be obtained in the Art Department Office. May be repeated for credit. The Staff

### **194. Forms and Ideas. F**

Required for all junior transfer student art majors. Introduction to the art program, emphasizing awareness of contemporary visual practices and theory. Combines studio practice and theory. Students are billed a materials fee. Enrollment restricted to junior transfer art majors. (General Education Code(s): A.) K. Perry, The Staff

### **196. Independent Senior Project. F,W,S**

Student will concentrate on completing work for comprehensive exhibition under the direction of his or her art adviser, with help from other faculty as needed. Students submit petition to sponsoring agency. (Formerly Senior Project.) May be repeated for credit. The Staff

Art

**197. Individual Study. F,W,S**

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**198. Independent Field Study. F,W,S**

Provides for department-sponsored independent study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199. Tutorial. F,W,S**

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. Students are billed a materials fee. May be repeated for credit. The Staff

\* Not offered in 2015-16

# ART AND DESIGN: GAMES AND PLAYABLE MEDIA

---

2015-16 General Catalog

Elena Baskin Visual Arts Studios

Room E-104

(831) 459-2272

visart@ucsc.edu

<http://art.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The art and design: games and playable media (GPM) bachelor of arts (B.A.) degree at UCSC focuses on the creation of novel game systems, spaces, and configurations that can produce broad ranges of player experiences, for a wide variety of purposes. It does this through:

courses in related theory, history, and critical interpretation;

courses that take a practice-based approach to experimental game creation;

courses that provide a foundation in working with game media forms;

courses that provide a foundation in working with game technical materials.

This degree complements the existing computer science: computer game design (CGD) bachelor of science (B.S.), which focuses particularly on the technical materials. The new B.A. focuses more on experience design (in particular) as well as on history, theory, and media creation—while still taking advantage of courses developed for the B.S. and creating a shared community with those students.

Students in the GPM major will learn to understand game design as an art in and of itself, positioned within the context of a number of more disciplinary approaches. Furthermore, students understand game design as a practice of creation, within a much larger and deeper social and historical context.

The GPM B.A. in the Arts Division ensures that students have needed programming skills, but equally importantly, that they meld such technical skills with critical and historical understanding, which is essential for the production of socially conscious, inclusive, and emotionally engaging games.

Upper-division studio courses require coursework to be completed on computers. All students in the B.A. program are strongly encouraged to own a laptop computer. This expense is separate from the cost of tuition and other fees.

While pursuing coursework in the major, all students are encouraged to build portfolios that showcase their growing body of work, with an emphasis on material from courses such as ARTG 80I, CMPM 80K, and ARTG 120, and CMPM 120.

---

### QUALIFICATION POLICY FOR THE ART AND DESIGN: GAMES AND PLAYABLE MEDIA MAJOR—FROSH

---

Prior to declaring the games and playable media major, students must complete ARTG 80H (History of Digital Games), ARTG 80I (Foundations of Play), CMPM 80K (Foundations of Video Game Design), and CMPS 12B/M (Introduction to Data Structures/Laboratory). Students need to complete the lower-division courses early in their studies so that the petition to major status is accomplished by the end of their sophomore year.

Students receiving an NP, D, or F in one of the courses required for admission to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive more than one grade of NP, D, or F among the four courses listed above can only declare the major through the portfolio appeal process.

---

### MAJOR QUALIFICATION BY PORTFOLIO APPEAL

---

The program faculty will conduct a quarterly review of portfolios for students who have passed the classes required for declaration, and wish to enter the major, but have not met the requirement with a grade of C or better across all classes.\* Within 15 days of this review, the faculty will notify the students, the Arts Division, college and Office of the Registrar of the decision.

---

### PROGRAM LEARNING OUTCOMES

---

Students who earn a B.A. in arts design: games and playable media will gain the skills, knowledge, and understanding that will enable them to:

**Program Learning Outcome (PLO) 1:** Demonstrate understanding of the connections between technical commitments and game system design, on one hand, and player experience and cultural communication goals, on the other.

Examples: Choosing very responsive hardware (e.g., mouse, not Kinect) for an experience meant to give players a feeling of detailed control. Choosing a simulation game system (not an action game system) for a game meant to address issues of deforestation.

**PLO 2:** Demonstrate ability to define, develop, and communicate artistically innovative game ideas—situated historically and employing the methods of multiple art practices.

Examples: Using storyboards or prototypes to describe a new type of in-game communication between players, intended to model and provide opportunities to reflect upon types of physical communication used under circumstances of surveillance, and compared with previous innovative uses of communication between players (e.g., Journey). Describing how the final game would use visual, musical, and voice-over narrative approaches to situate and reinforce the experience created through the communication and game systems.

**PLO 3:** Demonstrate ability to design and build a technical system, in response to an artistic goal for audience experience, that employs a fundamental understanding of algorithms and data structures.

Examples: Considering appropriate algorithmic approaches to achieving a behavior for a game. Understanding the abstractions involved in representing information about a game so that it can be effectively manipulated by the system during play.

**PLO 4:** Demonstrate understanding of game history and interpretation sufficient to do independent research on a topic, identify relevant games and secondary literature, think critically about a particular games-related topic, and make a convincing, research-based argument about games.

Examples: Making a strong argument about how Braid does and doesn't break with the mechanics and gender representation conventions of previous generations of platforming games. Making a strong argument about how Twine games and the Twine authoring community both recapitulate and break from earlier hypertext authoring arguments and movements.

**PLO 5:** Demonstrate ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.

Examples: Realistic goal and task breakdown in post-greenlight planning process in Art and Design: Games 170. Effectively using Scrum and other communication techniques in Art and Design: Games 171.

**PLO 6:** Demonstrate ability to effectively use techniques for understanding how players experience a game system, and to compare this with project's artistic goals—then successfully iterate and revise project shape, scope, and function based on external feedback and personal/team constraints.

Examples: Using techniques from playtesting, human-computer interaction, and studio critique to understand what is and isn't working about an in-process game, then finding realistic ways to guide next steps that will be more likely to achieve project's artistic goals or discover compelling new directions.

---

## REQUIREMENTS OF THE MAJOR

---

The GPM major requires eight lower-division and 13 upper-division courses in residence and satisfaction of the senior comprehensive requirement.

Course requirements are divided into six conceptual areas and may not be credited in more than one area.

### 1. Games and Playable Media Foundations

Complete all of the following courses:

ARTG 80I, Foundations of Play (PE-H—Perspectives: Environmental Awareness)

ARTG 80H, History of Digital Games (PE-T—Perspectives: Technology and Society)

FILM 80V, Video Games as Visual Culture (PE-T)

### 2. Computational Foundations

Complete all of the following courses:

CMPS 5J, Introduction to Programming in Java (MF—Mathematical and Formal Reasoning)

CMPS 11, Intermediate Programming (MF)

CMPS 12B/M, Introduction to Data Structures/Laboratory (MF)

### 3. Game Design

Complete all of the following courses:

CMPM 80K, Foundations of Video Game Design (IM—Interpreting Arts and Media)

CMPM 120, Game Development Experience (PR-E—Practice: Collaborative Endeavor)

ARTG 120, Game Design Experience (PR-E)

ARTG 170, Game Design Studio I (DC)

ARTG 171, Game Design Studio II (7 credits)

ARTG 172, Game Design Studio III (7 credits)

## Art and Design: Games and Playable Media

### 4. Media Creation

Complete three courses from the following:

#### Art

ART 101, Introduction to Computer Programming for the Arts

ART 102, Interactive Arts

ART 103, Physical Computing: Installation and Sculpture

ART 104, Digital Video

ART 106, Introduction to Animation

ART 107, Introduction to 3D Graphics and Modeling

ART 108, New Media and Social Practice Artmaking

ART 118, Digital Drawing and Painting for Game Design (may be repeated for credit)

#### Digital Arts and New Media

DANM 100A, Animation I (PR-C—Practice: Creative Process)

DANM 100B, Animation II (PR-C)

DANM 132, Literary Games: The Intersection of Writing and Play (PR-C)

DANM 133, Introduction to Electronics and Physical Computing (PR-C)

DANM 134, Hacking for Artists: Experimenting with Digital Media (PR-C)

DANM 135, Kinematics: Motion and Machine Art (PE-T)

DANM 140, Introduction to 3D Printing, Laser-cutting and More (PR-C, also offered as Art 105)

DANM 143, Projects in Ecological Art (PE-H)

#### Film and Digital Media

FILM 150, Screenwriting (PR-C)

FILM 170A, Introduction to Digital Media Production (PR-C)

FILM 170B, Fundamentals of Film and Video Production (PR-C)

FILM 171A, Sound

FILM 171C, Found Footage (PR-C)

FILM 171D, Social Information Spaces

FILM 171G, Documentary Animation Workshop

FILM 172, Narrative Video Workshop

FILM 173, Narrative Digital Media Workshop

FILM 175, Documentary Video Workshop

FILM 176, Experimental Video Workshop

FILM 177, Digital Media Workshop, Computer as Medium

FILM 189, Advanced Topics in Digital and Electronic Media Spaces

#### Music

MUSC 123, Electronic Sound Synthesis

MUSC 124, Intermediate Electronic Sound Synthesis

MUSC 125, Advanced Electronic Sound Synthesis

MUSC 167, Workshop in Electronic Music

#### Theater Arts

THEA 104, Multimedia Authoring

THEA 106, Digital Illustration

THEA 114, Design Studio: Sound (PR-C)

THEA 157, Playwriting

THEA 159, Advanced Playwriting

### 5. Game Design/Human-Computer Interaction

Complete four of the following:

#### Computer Engineering

CMPE 131, Human-Computer Interaction

#### Computational Media

CMPM 146, Game AI

CMPM 148, Interactive Storytelling

CMPM 177, Creative Strategies for Designing Interactive Media

CMPM 178, Human-Centered Design Research (PR-C)

CMPM 179, Game Design Practicum (PR-C, also offered as ART 179)

#### Computer Science

CMPS 121, Mobile Applications

CMPS 183, Hypermedia and the Web

#### Psychology

PSYC 128, Human Factors

### 6. Arts Electives

Complete one History of Art and Visual Culture course from the following:

HAVC 141A, Modern Art: Realism to Cubism (IM)

HAVC 141B, Modern Art: Cubism to Pop (IM)

HAVC 141C, Modern Art: Pop to Present (IM)

Complete one lower-division studio course from the following:

#### Art

ART 10D, 2D Foundation (IM)

ART 10E, 3D Foundation (IM)

ART 10F, 4D Foundation (IM)

ART 20G, Introduction to Print Media and Drawing (PR-C)

ART 20H, Introduction to Sculpture and Public Art (PR-C)

## Art and Design: Games and Playable Media

ART 20I, Introduction to Photography (PR-C)  
ART 20J, Introduction to Drawing and Painting (PR-C)  
ART 20K, Introduction to Digital Media (PR-C)  
ART 80G, Visual Communication and Interaction Design (IM)

### Digital Arts and New Media

DANM 30, Workshop in Computer Music  
DANM 32, Internet Authorship for the Non-Programmer (PR-C)

### Music

MUSC 1C, University Concert Choir (PR-E)  
MUSC 2, University Orchestra (PR-E)  
MUSC 3, Large Jazz Ensemble  
MUSC 5A, West Javanese Gamelan Ensemble: Beginning  
MUSC 5B, West Javanese Gamelan Ensemble: Intermediate  
MUSC 5C, West Javanese Gamelan Ensemble: Advanced  
MUSC 8, Balinese Gamelan Ensemble  
MUSC 9, Wind Ensemble (PR-C)  
MUSC 10, Eurasian Ensemble (PR-C)

### Theater Arts

THEA 14, Drawing (PR-C)  
THEA 15, Special Topics in Textiles (PR-C)  
THEA 17, Costume Construction (PR-C)  
THEA 18, Drafting for Theatrical Production  
THEA 19, Design Studio: Lighting Studio A (PR-C)  
THEA 20, Introductory Studies in Acting (IM)  
THEA 21A, Acting Studio IA: Psychological Realism  
THEA 21B, Acting Studio IB: Actors' Physicality  
THEA 22, Indonesian Dance and Drama (CC—Cross Cultural)  
THEA 30, Introduction to Dance Theory and Technique (PR-C)  
THEA 31C, The Dance Experience (PR-C)  
THEA 33C, Dance Studio I

THEA 36, Introduction to Dance CompositionThe art and design: games and playable media (GPM) bachelor of arts (B.A.) degree at UCSC focuses on the creation of novel game systems, spaces, and configurations that can produce broad ranges of player experiences, for a wide variety of purposes. It does this through:

courses in related theory, history, and critical interpretation;  
courses that take a practice-based approach to experimental game creation;

courses that provide a foundation in working with game media forms;

courses that provide a foundation in working with game technical materials.

This degree complements the existing computer science: computer game design (CGD) bachelor of science (B.S.), which focuses particularly on the technical materials. The new B.A. focuses more on experience design (in particular) as well as on history, theory, and media creation—while still taking advantage of courses developed for the B.S. and creating a shared community with those students.

Students in the GPM major will learn to understand game design as an art in and of itself, positioned within the context of a number of more disciplinary approaches. Furthermore, students understand game design as a practice of creation, within a much larger and deeper social and historical context.

The GPM B.A. in the Arts Division ensures that students have needed programming skills, but equally importantly, that they meld such technical skills with critical and historical understanding, which is essential for the production of socially conscious, inclusive, and emotionally engaging games.

Upper-division studio courses require coursework to be completed on computers. All students in the B.A. program are strongly encouraged to own a laptop computer. This expense is separate from the cost of tuition and other fees.

While pursuing coursework in the major, all students are to encouraged to build portfolios that showcase their growing body of work, with an emphasis on material from courses such as ARTG 80I, CPM 80K, and ARTG 120, and CPM 120.

---

## DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in art and design: games and playable media is satisfied by completing ARTG 170.

---

## COMPREHENSIVE REQUIREMENT

---

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence (ARTG 170, 171, and 172). This sequence will meet in collaboration with CPM 170, 171, and 172.

---

**ART AND DESIGN: GAMES AND PLAYABLE MEDIA MAJOR PLANNER**

---

The following is a recommended academic plan for students to complete during their first two years as preparation for the GPM major.

**Art and Design: Games and Playable Media B.A.**

	<b>Fall</b>	<b>Winter</b>	<b>Spring</b>	<b>Summer</b>
<b>Year One Frosh</b>	<b>ARTG 80I</b> , Foundations of Play (PE-H)	<b>CMPS 5J</b> , Introduction to Programming: Java (MF)	<b>CMPS 11</b> , Intermediate Programming (MF)	
	College Core (C1)	<b>CMPM 80K</b> , Foundations of Video Game Design (IM)		
	<b>^MATH 3</b> , Precalculus (MF); or Elective	College Core (C1)	General Ed (SI—Scientific Inquiry)	
<b>Year Two Sophomore</b>	<b>CMPS 12B/M</b> , Data Structures/Lab (MF)	<b>FILM 80V</b> , Video Games as Visual Culture (PE-T)	<b>*CMPM 120</b> , Game Development Experience (PR-E)	<b>*CMPM 120</b> , Game Development Experience (PR-E)
	<b>** ARTG 80G</b> , Visual Communication & Interaction Design (IM)	General Ed (C2)	<b>*ARTG 120</b> , Game Design Experience (PR-E)	<b>*ARTG 120</b> , Game Design Experience (PR-E)
	<b>ART 80H</b> , History of Digital Games (PE-T)	Elective	General Ed (TA—Textual Analysis)	

^ The prerequisite for CMPS 11 can be satisfied in any of the following ways: successfully passing Math 3, Math 11A, Math 19A, Applied Math and Statistics 3, Applied Math and Statistics 11A, Economics 11A, or 400 or higher on the math placement exam.

\* ARTG 120 and CMPM 120 May be taken in spring or summer quarter (if offered in summer).

\*\*ARTG 80G, while not a requirement for the GPM BA, is recommended for providing useful knowledge for the major.

---

## TRANSFER STUDENTS

---

Junior transfer students are encouraged to complete all general education courses before coming to UCSC and are required to take programming courses outlined in articulation agreements and four introductory courses in the arts before coming to UCSC: 1) in contemporary art history or visual culture; 2) in visual communications; 3) in digital media creation; and 4) in visual, written or performing arts: drawing, photography, digital media, sculpture, painting, fiction, poetry, dramatic writing, theater, dance or music. Students must apply to the program in April of the year before coming to UCSC. The mechanism for acceptance to the degree program is to develop a comprehensive proposal packet including an application form, a portfolio, unofficial transcript(s), and an artist's statement, with optional letters of recommendation. We do not admit junior transfers mid-year; students must enter in fall of their junior year.

Because of the number of credits required in the B.A., it may take junior transfers longer to complete all major requirements; however, summer session courses and/or additional courses over the academic year may

allow a student who does not have recommended courses upon transfer to still graduate within two years. There are no foreign language requirements.

Transfer students are strongly advised to attend a UCSC Summer Orientation session for transfer students. Transfer students must consult with an art department academic adviser prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in art and design: games and playable media is satisfied by completing ARTG 170.

---

### COMPREHENSIVE REQUIREMENT

---

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence (ARTG 170, 171, and 172). This sequence will meet in collaboration with CPM 170, 171, and 172.

---

## ART AND DESIGN: GAMES AND PLAYABLE MEDIA COURSES

---

---

### LOWER-DIVISION COURSES

---

#### **80G. Visual Communication and Interaction Design. S**

Survey of the basics of visual communication and interaction design, focusing on communicating designs of interactive systems. Covers techniques from a breadth of visual communication traditions; how to choose, use, and innovate; and how to structure dialogue around them. (General Education Code(s): IM.) R. Hunicke, The Staff

#### **80H. History of Digital Games. W**

Surveys the history of digital games from open "university games" through the home console, PC, and contemporary platforms, and on to "indie" and art games. Throughout, the course locates connections between technology, marketing, and play culture. (Formerly Art 80H.) (General Education Code(s): PE-T.) H. Lowood, The Staff

#### **80I. Foundations of Play. F**

Understanding the foundations of play through reading influential texts; in-class lectures and activities; designing and "playtesting" games; and the ethnographies of players in the physical world. (Formerly Art 80I.) (General Education Code(s): PE-H.) R. Hunicke

---

### UPPER-DIVISION COURSES

---

#### **120. Game Design Experience. S**

Teaches the concrete skills associated with making a digital game, from start to finish. Activities include establishing a team, concepting, storyboarding, prototyping, producing, and testing a game for release. Students are organized into groups and work together to create and produce a playable game. Prerequisite(s): courses 80H or 80I; and Computer Science 12B and 12M and

Computational Media 80K and Film and Digital Media 80V. Concurrent enrollment in Computational Media 120 is required. (General Education Code(s): PR-E.) R. Hunicke

#### **145. Non-Digital Game Design. \***

Looks specifically at the design of non-digital games. Surveys a variety of game types and designs. Students prototype card or board game, culminating in a final project that engages players on a socially relevant topic. R. Hunicke

#### **170. Game Design Studio I. \***

Students create novel, interesting game concepts and outline and polish a game pitch for their yearlong project, starting with concept ideation and storyboarding to prototyping and presenting the game idea. This course is part one of the art and design: games and playable media capstone requirement. Prerequisite(s):

## Art and Design: Games and Playable Media

satisfaction of the Entry Level Writing and Composition requirements; course 120; and one course from the game design/human-computer interaction electives. Enrollment restricted to senior art and design: games and playable media majors. R. Hunicke

### **171. Game Design Studio II. \***

Students craft the core loop of their yearlong game project. Students build the game, examine player feedback, and repeat the process to make the game better. This course places particular emphasis on advanced production techniques for working in teams, as well as software engineering practices for software design, software testing, and build management. This course is part two of the art and design, games and playable media capstone

requirement. Prerequisite(s): course 170, and two courses from the game design/human-computer interaction electives, and one course from the media creation electives. Enrollment restricted to senior art and design: games and playable media majors. R. Hunicke

### **172. Game Design Studio III. \***

Students scope and polish their final game designs. Students work towards releasing one specific game platform while coordinating across disciplinary boundaries to create and integrate all the necessary code, art, animation, and sound assets for their game. This course is part III of the art and design, games and playable media capstone requirement. Prerequisite(s): course 171, and three courses from the game design/human-computer interaction electives, and two

courses from the media creation electives. Enrollment restricted to senior art and design: games and playable media majors. R. Hunicke

### **179. Game Design Practicum. \***

Provides the opportunity to practice the creation of novel computer games. Students learn a new game-making technology, then create three games using this technology. (Also offered as Computational Media 179. Students cannot receive credit for both courses.) Prerequisite(s): Three courses from the following: Art 15-40 or Computational Media 25 or Computer Science 25. May be repeated for credit. (General Education Code(s): PR-C.) The Staff

\* Not offered in 2015-16

Revised: 09/01/15

# ARTS DIVISION

---

2015-16 General Catalog

Porter College, D Building,

(831) 459-4940

<http://arts.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The Arts Division offers both creative and critical studies of art and culture at the undergraduate and graduate level. The division is committed to building our students' capacity for creative and critical thinking. Instruction in the arts inspires and develops the skills needed for individual and collaborative creative thought, analysis, and action within and beyond the university. Our faculty consists of artists, performers, historians, critics, and theorists working across the arts in a global context.

Undergraduate education in the arts includes bachelor of arts (B.A.) programs in art, art and design: games and playable media, film and digital media, history of art and visual culture, music, and theater arts, and a bachelor of music (B.M.) in music. There are also several minors offered in film and digital media, history of art and visual culture, electronic music, jazz, theater arts, and dance.

Established graduate programs include the interdisciplinary digital arts and new media master of fine arts (M.F.A.) program, the social documentation master of arts (M.A.), the music master of arts (M.A.), and the theater arts master of arts (M.A.). Doctoral programs include the music composition doctor of musical arts (D.M.A.), and Ph.D. programs in music, visual studies, and film and digital media. A master of fine arts (M.F.A.) program in art (environmental art and social practice) is currently in review.

The Arts Division provides students with access to quality work spaces, including a new digital-arts research facility with two experimental media labs, along with a state-of-the-art music recital hall, practice rooms, electronic music studios, and recording facilities, four theaters for dramatic productions, filmmaking studios and editing suites, surround-sound screening theaters, drama and dance studios, painting and printmaking studios, a foundry, photography and computer laboratories, and specialized lecture and seminar classrooms. McHenry Library houses an extensive collection of books and periodicals on the arts, as well as an analog and digital slide collection, music scores and recordings, and one of the largest

collections of films and DVDs in the University of California system. Exhibition space in the arts includes galleries for students and faculty shows. Celebrating its 45<sup>th</sup> anniversary in 2016-17, the Sesnon Gallery presents curated exhibitions to the university community and the general public. The Institute for the Arts and Sciences, a focus for interdisciplinary creative work, exhibitions, conferences, symposia, and seminars, is currently in development.

The Theater Arts Department offers a wide variety of performances in four venues, ranging from faculty-directed productions of classics and musicals on our Mainstage to intimate student-created productions in our century-old converted barn. An annual Dean's Lecture Series invites innovative leaders to present on selected topics of interest to the campus community. Student work is regularly broadcast on SCTV, and *Eyecandy*, a student-run magazine and blog, publishes student writing on film, television, and digital media. The Music Department hosts an annual festival of contemporary music, April in Santa Cruz, and an opera in the spring quarter of each year, and presents a variety of solo and ensemble concert programs throughout the year. The History of Art and Visual Culture Department hosts a series of speakers and seminars each year on rotating topics that are supported by the Patricia and Rowland Rebele Endowed Chair. The Art Department sponsors regularly scheduled public presentations as well as quarterly open studios and a print and photo sale in the spring. The Digital Arts and New Media M.F.A. program regularly sponsors digital arts events, such as festivals, symposia, visiting speakers, and exhibitions of student work, both on- and off-campus, culminating in an annual exhibition of graduate thesis research each spring.

For more information about specific programs in the arts, please visit catalog listings and web sites for Art, Digital Arts and New Media, Film and Digital Media, History of Art and Visual Culture, Music, and Theater Arts.

# ASTRONOMY AND ASTROPHYSICS

---

2015-16 General Catalog

Porter College, D Building,

(831) 459-4940

<http://arts.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The science of astronomy has the universe as its domain. Galaxies, stars, planets, and an ever-increasing variety of phenomena observed from ground- and space-based observatories are among the objects of study. Areas of special interest at UCSC include cosmology, the formation and evolution of planets, stars, and galaxies, high-energy astrophysics, active galaxies, supernovae and nucleosynthesis, extrasolar planets, interstellar medium, intergalactic medium, solar system dynamics, and all aspects of observational optical and infrared astronomy. Astronomers use concepts from and contribute to the development of many other scientific disciplines, including optics, mechanics, relativity, atomic and nuclear physics, applied mathematics, chemistry, geology, and meteorology. The interdisciplinary nature of astronomy, including its historical and philosophical elements, makes its study valuable to those planning careers in a variety of fields.

The Astronomy and Astrophysics Department offers a broad undergraduate curriculum that fulfills the needs of students seeking a general education but also enables students wishing to obtain a minor or major in astrophysics to study the subject in greater depth.

The graduate program is intended for those with a professional interest in the subject. The interests of the faculty embrace a wide range of both theoretical and observational aspects of astronomy. Current research and course offerings include our solar system and other planetary systems, stellar structure and evolution, stellar spectroscopy, the interstellar medium, galactic structure, active galaxies and quasars, cosmology, general relativity and gravitational radiation, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation.

Graduate students have access to state-of-the-art instrument development and data reduction technology, the UCO/Lick Observatory computer network, and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research using selected telescopic

facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter Keck Telescope in Hawaii, the world's largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

The Center for Adaptive Optics (CfAO) is also headquartered at UCSC. Education is central to the CfAO's mission, and a key element of this is the support provided by the center to graduate students. In addition to research, the center provides interdisciplinary access to a nationwide network of scientists in astronomy and vision science.

---

## UNDERGRADUATE COURSES

---

Instruction in astronomy for undergraduates at UCSC is designed to meet the needs of several groups of students.

Courses 1, 2, 3, 4, 5, and 6, providing a general survey of the universe as now understood from historical and modern observations, are offered for those not specializing in a scientific discipline. Course 1 is a non-mathematical introduction to the Universe, while courses 2 through 6 provide an introduction, with the use of basic mathematics, to a diverse array of modern astronomy, from planets to the formation and evolution of the Universe.

Courses 12, 13, 15, 16, and 18, emphasizing basic physical laws and theories as applied to astronomy, taken together provide a survey of modern astronomy for students with some facility in mathematics. Taken separately, these courses provide an in-depth introduction to particular fields within astronomy. These courses are designed for students intending to major in a scientific subject, although qualified nonscience majors may enroll. A good high school background in mathematics and physics is required.

Prior or concurrent enrollment in a basic calculus course (Mathematics 11A or 19A) and a basic physics course (Physics 5A/L or 6A/L) is helpful but not required.

Finally, a more thorough quantitative treatment of selected topics in astronomy and astrophysics at the

## Astronomy and Astrophysics

upper-division level is provided by courses 111, 112, 113, 117, and 118. Completion of coursework in calculus of several variables (Mathematics 22 or 23A-B) and Physics 5B/M or 6B/M and 5D is required for these advanced courses. Course 119 is an introduction to modern scientific computing with a focus on astrophysics problems.

---

### ASTROPHYSICS MINOR

---

For undergraduate students having a particular interest in the subject, a minor in astronomy and astrophysics is offered. Most students who minor in astronomy and astrophysics are majors in another science, though majors in other fields are also possible. The minor in astronomy and astrophysics requires that students take the Physics 5 or 6 series (with associated laboratories), Physics 5D or Physics 102, a minimum of two courses from the Astronomy 12–18 series, and a minimum of three courses from the following, Astronomy 111–118, PHYS 129, PHYS 171, ASTR 257. A senior thesis on an astronomy-related topic is also encouraged. Interested students should contact the Physical & Biological Sciences Undergraduate Affairs office for further information.

---

### ASTROPHYSICS MAJOR

---

The UCSC major in astrophysics is administered by the Physics Department and combines a core physics major with advanced electives in astrophysics, an astrophysics laboratory course, and senior thesis work on a topic in astrophysics. It is a rigorous program designed to prepare students for a broad range of technical careers or for entry into graduate or professional programs. A full description of the major can be found in the physics section of this catalog.

---

### PREPARATION FOR GRADUATE WORK IN ASTROPHYSICS

---

The UCSC graduate program in astronomy and astrophysics is designed for Ph.D. students seeking a professional career in teaching and research. In view of the thorough preparation in mathematics and physics required for graduate study, most entering astronomy graduate students major in physics or astrophysics as undergraduates.

The suggested minimum requirements for admission to graduate standing at UCSC include the following undergraduate courses:

**Basic physics.** Mechanics, wave motion, sound, light, electricity and magnetism, thermodynamics, atomic physics, and quantum mechanics (Physics 5A, 5B, and 5C).

**Basic mathematics.** Calculus (Mathematics 19A-B and 23A-B or equivalent) and statistics (Applied Mathematics and Statistics 5).

**Intermediate-level physics.** Mechanics (Physics 105); electricity, magnetism, and optics (Physics 110A-B); mathematical methods in physics (Physics 116A-B-C); nuclear and particle physics (Physics 129); and quantum mechanics (Physics 139A-B).

Intermediate-level mathematics. Linear algebra (Mathematics 21), complex analysis (Mathematics 103), and ordinary and partial differential equations (Mathematics 106 and 107).

---

### GRADUATE PROGRAM

---

Graduate instruction is built upon a two-year cycle of 11 one-quarter courses in astronomy and physics that are required of all students.

Seven courses are specifically required:

Astronomy 202, Radiative Processes

Astronomy 204, Astrophysical Flows

Astronomy 205, Introduction to Astronomical Research and Teaching

Astronomy 212, Dynamical Astronomy

Astronomy 220A, Stellar Structure and Evolution

Astronomy 230, Diffuse Matter in Space

Astronomy 233, Physical Cosmology

Four additional courses are chosen from the list of electives given below. In addition, students must fulfill the following requirements:

Students must meet at least quarterly with an assigned adviser.

Each student must also be a teaching assistant for at least two quarters.

By the time of the annual Board Review, which occurs in July at the end of their second academic year, students must:

- Complete one quarter of independent study with a faculty member and give a department talk on that work.
- Pass a preliminary examination based on course material, relevant physics, and general astronomical knowledge.
- Submit one lead-author paper to a refereed journal that is based on research conducted at UCSC. By the time of the Board Review, second-year students are expected to either (1) have submitted a paper for publication to a refereed journal; or (2) submit to the Board Review a complete first draft of such a paper and a detailed plan for completion. If the student

## Astronomy and Astrophysics

pursues option (2), he or she is expected to submit the paper for publication by the first day of the fall quarter, and provide the electronic submission acknowledgement for the paper to the chair of the graduate advising committee. If the student does not complete this requirement, he or she will meet with his or her adviser, the graduate advising committee chair, and the department chair before the first faculty meeting of the fall quarter, in order to discuss the status of the paper. The faculty at that meeting will then make a recommendation whether the student should be granted an extension to the next Board Review, and the full faculty will then vote on whether to grant an extension.

By the end of the third year, students must complete a qualifying examination that presents and defends a proposed thesis topic.

After passing the board review based on the above-mentioned requirements and the qualifying examination, students pursue independent research leading to the doctoral dissertation. Upon completion of the Ph.D. dissertation, students must pass an oral dissertation defense. A completed draft of the thesis must be submitted to the dissertation committee at least two weeks before the date of the defense, and the defense itself must occur at least two weeks before the campus deadline for thesis submissions in that quarter. Exceptions to this policy will be granted only under exceptional circumstances and must be approved by the department chair, associate chair, and the department graduate advising committee.

The department has established five years as the normative time to degree. Normative times is the elapsed calendar time, in years, that, under normal circumstances, will be needed to complete all requirements for the Ph.D. A one-year extension may be granted if funding is available. Funding support will not, in general, be provided beyond six years. Exceptions for extension beyond six years will be granted only for exceptional extenuating circumstances, and will be decided upon by the department chair, associate chair, and the department graduate advising committee.

Electives (four required) may be drawn from this list:

Astronomy 207, Future Directions/Future Missions  
Astronomy 214, Special Topics in Cosmology  
Astronomy 220B, Star Formation

Astronomy 220C, Advanced Stages of Stellar Evolution and Nucleosynthesis  
Astronomy 222, Planetary Formation and Evolution  
Astronomy 223, Planetary Physics  
Astronomy 225, High-Energy Astrophysics  
Astronomy 231, Diffuse Gas In and Between Galaxies  
Astronomy 235, Numerical Techniques  
Astronomy 237, Accretion Processes  
Astronomy 240A, Galactic and Extragalactic Stellar Systems  
Astronomy 240B, High Redshift Galaxies  
Astronomy 257, Modern Astronomical Techniques  
Astronomy 260, Instrumentation for Astronomy  
Astronomy 289, Adaptive Optics and Its Applications  
Physics/Astronomy 224, Particle Astrophysics and Cosmology  
Physics/Astronomy 226, General Relativity  
Earth and Planetary Sciences 262, Planetary Interiors  
Earth and Planetary Sciences 263, Planetary Surfaces  
Earth and Planetary Sciences 264, Planetary Atmospheres  
Earth and Planetary Sciences 265, Order of Magnitude Estimation  
Earth and Planetary Sciences 275, Magnetohydrodynamics  
Applied Mathematics and Statistics 206, Bayesian Statistics  
Applied Mathematics and Statistics 212A, Applied Mathematical Methods I  
Applied Mathematics and Statistics 213, Numerical Solution of Differential Equations  
Applied Mathematics and Statistics 214, Applied Dynamical Systems  
Applied Mathematics and Statistics 217, Introduction to Fluid Dynamics  
Physics 210, Classical Mechanics  
Physics 215, Introduction to Non-Relativistic Quantum Mechanics  
Physics 216, Advanced Topics in Non-Relativistic Quantum Mechanics  
Physics 217, Quantum Field Theory I  
Physics 218, Quantum Field Theory II  
Physics 227, Advanced Fluid Dynamics

---

## ASTRONOMY AND ASTROPHYSICS FACULTY AND PROFESSIONAL INTERESTS

---

---

### PROFESSOR/ASTRONOMER

---

**Peter H. Bodenheimer, Emeritus**

**Michael J. Bolte**

Dynamics of star clusters, ages of star clusters, chemical enrichment history of the galaxy, observations of interacting galaxies

**Jean P. Brodie**

Extragalactic globular clusters, galaxy formation, near-field cosmology

**Harland W. Epps, Emeritus**

**Sandra M. Faber, Emeritus**

Galaxies, stellar populations, cosmology, instrumentation

**Puragra (Raja) GuhaThakurta**

Galaxy formation and evolution: resolved stellar populations in the Local Group and distant galaxies. Globular clusters. Interstellar dust.

**Garth D. Illingworth**

High redshift galaxies, galaxy formation/evolution, science policy

**Burton F. Jones, Emeritus**

**David C. Koo, Emeritus**

**Robert P. Kraft, Emeritus**

**Claire Max**

Adaptive optics and high spatial resolution imaging, colliding galaxies, active galactic nuclei and their supermassive black holes

**Joseph S. Miller, Emeritus**

**Jerry E. Nelson, Emeritus**

**Jason Prochaska**

Damped Ly $\alpha$  systems in quasars, Lyman limit systems, stellar abundances, thick disk imaging of our galaxy

**David M. Rank, Emeritus**

**Constance Rockosi**

Galactic structure, stellar populations, CCD detectors, astronomical instrumentation

**Graeme H. Smith**

Stellar populations, chromospheric activity among late-type stars

**Steven S. Vogt**

Extrasolar planets, stellar, spectroscopy, instrumentation

**Merle F. Walker, Emeritus**

---

### ASTRONOMER

---

**Lloyd B. Robinson, Emeritus**

---

### PROFESSOR

---

**George R. Blumenthal**

Cosmology, galaxy formation, high-energy astrophysics

**Frank D. Drake, Emeritus**

**John Faulkner, Emeritus**

**Jonathan Fortney**

Planetary atmospheres and interiors, extrasolar planets

**Gregory Laughlin**

Extra-solar planets, numerical astrophysics

**Douglas N. C. Lin**

Fluid dynamics, star formation, galactic structure, planetary systems, accretion disks, extra-solar planets

**Piero Madau**

Cosmology, high-energy astrophysics

**Bruce H. Margon, Emeritus**

William G. Mathews, Emeritus Research Professor

**Enrico Ramirez-Ruiz**

Stellar explosions, gamma-ray bursts accretion physics, near compact stars

**Stanford E. Woosley**

Supernovae, stellar evolution, nucleosynthesis

---

### ASSOCIATE PROFESSOR

---

**Mark Krumholz**

Star formation, interstellar medium, numerical methods

---

### LECTURER

---

**Adriane Steinacker**

Planet formation, MHD simulations

---

### PROFESSOR

---

**Anthony N. Aguirre (Physics)**

Cosmology of the early and late universe: inflation and the global structure of cosmological models; the intergalactic medium and its enrichment with heavy elements; galaxy formation, evolution, and feedback processes; dark matter; theories of modified gravity

**Nic Brummel (Applied Mathematics and Statistics)**

Fluid dynamics; magnetohydrodynamics; numerical simulations of geophysical and astrophysical dynamics, especially solar interior physics; supercomputing

**Pascale Garaud (Applied Mathematics and Statistics)**

Astrophysics, geophysics, fluid dynamics, numerical resolutions of differential equations, and mathematical modeling of natural flows

**Gary Glatzmaier, Emeritus (Earth and Planetary Sciences)**

**Francis Nimmo (Earth and Planetary Sciences)**  
Icy satellites, accretion, Mars, planetary geophysics

**Joel R. Primack (Physics)**

Cosmology, galaxy, formation and evolution, particle astrophysics, nature of dark matter, gamma ray astronomy

**Steven Ritz (Physics)**

Particle physics and astrophysics

**David M. Smith (Physics)**

High-energy astrophysics; X-ray and gamma-ray detectors and instrumentation; solar, terrestrial, and planetary sources of gamma radiation

ASSOCIATE PROFESSOR

**Stefano Profumo (Physics)**

Theory of particle physics and particle astrophysics

ASSISTANT PROFESSOR

**Ian Garrick-Bethell, (Earth and Planetary Sciences)**

Planetary interiors, paleomagnetism

**Tesla Jeltema**

High-energy astrophysics and cosmology

RESEARCH ASTRONOMER

**Donald Gavel**

Development of next generation adaptive optics for large telescopes, Director of Laboratory for Adaptive Optics

**Brad Holden**

Design, development, and oversight of UC Astronomy Data Center (all data obtained by UC astronomers at the Lick and Keck Observatories), early evolution of elliptical galaxies

**Robert Kibrick**

Development of computer software and wide-area networks in support of remote control and data-acquisition systems for telescopes and complex astronomical instrumentation systems

**Terry Mast**

Development of large telescopes and their instrumentation

**Drew Phillips**

Extragalactic star-formation, gas-phase abundances, galaxy kinematics, and galaxy formation and evolutions; development of astronomical optics and instrumentation

**Richard Stover**

Development and construction of state-of-the-art detector systems for instruments at Lick Observatory and the Keck Observatory

ASTRONOMY AND ASTROPHYSICS COURSES

LOWER-DIVISION COURSES

**1. Introduction to the Cosmos. F,S**

Overview of the main ideas in our current view of the universe and how these ideas originated. Galaxies, quasars, stars, black holes, and planets. Students cannot receive credit for this course and course 2. (General Education Code(s): SI, IN.) P. Guha Thakurta

**2. Overview of the Universe. F,W,S**

An overview of the main ideas in our current view of the universe, and how they originated. Galaxies, quasars, stars, pulsars, and planets. Intended primarily for nonscience majors interested in a one-quarter

survey of classical and modern astronomy. (General Education Code(s): MF, IN, Q.) C. Rockosi, S. Vogt

**3. Introductory Astronomy: Planetary Systems. F,W**

Properties of the solar system and other planetary systems. Topics include the Sun, solar system exploration, the physical nature of the Earth and the other planets, comets and asteroids, the origin of the solar system, the possibility of life on other worlds, planet formation, and the discovery and characterization of planets beyond the solar system. Intended for nonscience majors. Courses 3, 4, and 5 are independent and may be

taken separately or sequentially. (Formerly Introductory Astronomy: The Solar System.) (General Education Code(s): MF, IN, Q.) D. Lin

**4. Introductory Astronomy: The Stars. \***

Stellar evolution: observed properties of stars, internal structure of stars, stages of a star's life including stellar births, white dwarfs, supernovae, pulsars, neutron stars, and black holes. Planet and constellation identification. Intended for nonscience majors. Courses 3, 4, and 5 are independent and may be taken separately or sequentially. (General Education Code(s): MF, IN, Q.) A. Steinacker

**5. Introductory Astronomy: The Formation and Evolution of the Universe. W,S**

The universe explained. Fundamental concepts of modern cosmology (Big Bang, dark matter, curved space, black holes, star and galaxy formation), the basic physics underlying them, and their scientific development. Intended for non-science majors. Courses 3, 4, and 5 are independent and may be taken separately. (General Education Code(s): MF, IN, Q.) J. Brodie, M. Bolte

**6. The Space-Age Solar System. W**

Scientific study of the Moon, Earth, Mercury, Venus, and Mars by the space program; history of rocket development; the Apollo program and exploration of the Moon; unmanned spacecraft studies of the terrestrial planets; scientific theories of planetary surfaces and atmospheres. Intended for nonscience majors. (Formerly course 80A.) (General Education Code(s): SI, T-2 Natural Sciences.) G. Smith

**12. Stars and Stellar Evolution. F**

An introduction to the observational facts and physical theory pertaining to stars. Topics include the observed properties of stars and the physics underlying those properties; stellar atmospheres; stellar structure and evolution. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Mathematics 2 level required. (General Education Code(s): MF, IN, Q.) The Staff

**13. Galaxies, Cosmology, and High Energy Astrophysics. F**

Introduction to modern cosmology and extragalactic astronomy. Topics include the origin of the universe, Big Bang cosmology, expansion of

the universe, dark matter and dark energy, properties of galaxies and active galactic nuclei, and very energetic phenomena in our own and other galaxies. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Math 2 level required. (General Education Code(s): MF, IN, Q.) The Staff

**15. Dead Stars and Black Holes. \***

Course is primarily concerned with the structure, formation, and astrophysical manifestations of compact objects, such as white dwarfs, neutron stars, and black holes, and the astronomical evidence for their existence. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Math 2 level required. (General Education Code(s): MF, IN, Q.) E. Ramirez-Ruiz

**16. Astrobiology: Life in the Universe. \***

Topics include the detection of extrasolar planets, planet formation, stellar evolution and properties of Mars, the exploration of our solar system and the search for life within it, and the evolution of life on Earth. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Math 2 level required. Enrollment limited to 50. (General Education Code(s): MF, IN, Q.) A. Steinacker

**18. Planets and Planetary Systems. W**

Our solar system and newly discovered planetary systems. Formation and structure of planets, moons, rings, asteroids, comets. Intended for science majors and

qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Mathematics 2 level required. Offered in alternate academic years. (General Education Code(s): IN, Q.) D. Lin

---

**UPPER-DIVISION COURSES**

**111. Order-of-Magnitude Astrophysics. S**

Examines the most basic and direct connection between physics and astrophysics in order to derive a better understanding of astrophysical phenomena from first principles to the extent possible. Prerequisite(s): Mathematics 22 or 23A; Physics 5B or 6B; and Physics 101A or Physics 102. Enrollment limited to 25. G. Laughlin

**112. Physics of Stars. W**

The leading observational facts about stars as interpreted by current theories of stellar structure and evolution. Spectroscopy, abundances of the elements, nucleosynthesis, stellar atmospheres, stellar populations. Final stages of evolution, including white dwarfs, neutron stars, supernovae. Prerequisite(s): Mathematics 22 or 23A, Physics 5B or 6B, and Physics 101A or Physics 102 J. Fortney

**113. Introduction to Cosmology. W**

Physical examination of our evolving universe: the Big Bang model; simple aspects of general relativity; particle physics in the early universe; production of various background radiations; production of elements; tests of geometry of the universe; dark energy and dark matter; and formation and evolution of galaxies and large-scale structure. (Formerly "Physical Cosmology.") Prerequisite(s): Mathematics 22 or 23A, Physics 5B or 6B, and Physics 101A or 102. P. Madau

**117. High Energy Astrophysics. \***

Theory and practice of space and ground-based x-ray and gamma-ray astronomical detectors. High-energy emission processes, neutron stars, black holes. Observations of x-ray binaries, pulsars, magnetars, clusters, gamma-ray bursts, the x-ray background. High-energy cosmic rays. Neutrino and gravitational-wave astronomy. Prerequisite(s): Mathematics 22 or 23A, Physics 5B or 6B, and Physics 101A or Physics 102. E. Ramirez-Ruiz

**118. Physics of Planetary Systems. S**

Determination of the physical properties of the solar system, its individual planets, and extrasolar planetary systems through ground-based and space-based observations, laboratory measurements, and theory. Theories of the origin and evolution of planets and planetary systems. Prerequisite(s): Mathematics 22 or 23A, and Physics 5B or 6B. Offered in alternate academic years. J. Fortney

**119. Introduction to Scientific Computing. W**

Introduction to solving scientific problems using computers. A series of simple problems from Earth sciences, physics, and astronomy are solved using a user-friendly scientific programming language (Python/SciPy). (Also offered as Earth Sciences 119. Students cannot receive credit for both courses.) Prerequisite(s): Mathematics 11A or 19A or 20A or Applied Mathematics or Statistics 15A. (General Education Code(s): IN.) G. Laughlin

**135. Astrophysics Advanced Laboratory. \***

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: 135A in fall and 135B in winter, depending on astronomical conditions. (Also offered as Physics 135. Students cannot receive credit for both courses.) Prerequisite(s): Physics 133 and at least one astronomy course. Intended primarily for juniors and seniors majoring or minoring in astrophysics. G. Brown

**135A. Astrophysics Advanced Laboratory (3 credits). F**

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Physics 135A. Students cannot receive credit for both courses.) Prerequisite(s): Physics 133 and at least one astronomy course. G. Brown

**135B. Astrophysics Advanced Laboratory (2 credits). W**

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Physics 135B. Students cannot receive credit for both courses.) Prerequisite(s): Physics 133 and at least one astronomy course. G. Brown

**171. General Relativity, Black Holes, and Cosmology. F**

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments. (Also offered as Physics 171. Students cannot receive credit for both courses.) Prerequisite(s): courses 105, 110A, 110B, and 116A-B. H. Haber

**199. Tutorial. F,W,S**

May be repeated for credit. The Staff

---

**GRADUATE COURSES**

**202. Radiative Processes. F**

Survey of radiative processes of astrophysical importance from radio waves to gamma rays. The interaction of radiation with matter: radiative transfer, emission, and absorption. Thermal and non-thermal processes, including bremsstrahlung, synchrotron radiation, and Compton scattering. Radiation in plasmas. (Formerly Electromagnetism and Plasma Physics.) Offered in alternate academic years. E. Ramirez-Ruiz

**204. Astrophysical Flows. W**

Explores how physical conditions in astrophysical objects can be diagnosed from their spectra. Discussion topics include how energy flows determine the thermal state of radiating objects and how the physics of radiative transfer can explain the emergent spectral characteristics of stars, accretion disks, Lyman-alpha clouds, and microwave background. (Formerly 204A Physics of Astrophysics I and 204B Physics of Astrophysics II.) Enrollment restricted to graduate students. Offered in alternate academic years. G. Laughlin

**205. Introduction to Astronomical Research and Teaching. F**

Lectures and seminar-style course intended to integrate new graduate students into the department; to introduce students to the research and interests of department faculty; and to expose graduate students to teaching skills and classroom techniques. (Formerly Introduction to Astronomical Research.) Enrollment restricted to graduate students. G. Smith

**207. Future Directions/Future Missions. S**

Examines possible key science goals for the next decade, such as planet detection, galaxy formation, and "dark energy" cosmology; the means for addressing these goals, such as new space missions and/or ground-based facilities; and the political, technical, and scientific constraints on such research. Looks at the role of the Decadel Survey. Examines a few existing programs (DEEP, ALMA, SNAP, NGST) as examples. Enrollment restricted to graduate students. Offered in alternate academic years. G. Illingworth

**212. Dynamical Astronomy. \***

Surveys dynamical processes in astrophysical systems on scales ranging from the planetary to the cosmological, stability and evolution of planetary orbits, scattering processes and the few-body problem, processes in stellar clusters, spiral structure and galactic dynamics, galactic collisions, and evolution of large-scale structure. Enrollment restricted to graduate students. G. Laughlin

**214. Special Topics in Galactic and Extragalactic Astronomy. \***

Survey of some principal areas of research on the origin and growth

of cosmic structures and galaxies: the "dark ages;" 21cm tomography; first galaxies; first stars and seed black holes; reionization and chemical enrichment of the intergalactic medium; the assembly of massive galaxies; quasi-stellar sources; interactions of massive black holes with their environment; extragalactic background radiation; numerical simulations and the nature of the dark matter; the dark halo of the Milky Way. (Formerly Special Topics in Cosmology) Enrollment restricted to graduate students. P. Madau

**220A. Stellar Structure and Evolution. F**

Survey of stellar structure and evolution. Physical properties of stellar material. Convective and radiative energy transport. Stellar models and evolutionary tracks through all phases. Brown dwarfs and giant planets. Comparison with observations. Enrollment restricted to graduate students. J. Fortney

**220B. Star Formation. F**

Theory and observations of star formation. Observational techniques used to study star formation, particularly millimeter line and continuum observations, and infrared, visible, and UV star-formation tracers. Physics of giant molecular clouds and galaxy-scale star formation. Gravitational instability, collapse, and fragmentation. Pre-main sequence stellar evolution. Protostellar accretion disks and jets. Radiative feedback and HII regions. (Formerly Star and Planet Formation) Prerequisite(s): course 220A. M. Krumholz

**220C. Advanced Stages of Stellar Evolution and Nucleosynthesis. S**

The evolution of massive stars beyond helium burning; properties of white dwarf stars; physics and

observations of novae, supernovae, and other high energy stellar phenomena; nuclear systematics and reaction rates; the origin and production of all the chemical elements. Prerequisite(s): course 220A. Enrollment restricted to graduate students. S. Woosley

**222. Planetary Formation and Evolution. \***

Theory and observations of protoplanetary disks. Origin and evolution of the solar nebula. Formation and evolution of the terrestrial planets and the giant planets. (Formerly Planetary Science) Enrollment restricted to graduate students. Offered in alternate academic years. D. Lin

**223. Planetary Physics. \***

Survey of interiors, atmospheres, thermal evolution, and magnetospheres of planets, with focus on the astronomical perspective. Course covers exoplanets and solar system planets, both giant and terrestrial, with attention to current and future observations. Enrollment restricted to graduate students. J. Fortney

**224. Particle Astrophysics and Cosmology. S**

Particle physics and cosmology of the very early universe: thermodynamics and thermal history; out-of-equilibrium phenomena (e.g., WIMPs freeze-out, neutrino cosmology, Big Bang nucleosynthesis, recombination); baryogenesis; inflation; topological defects. High-energy astrophysical processes: overview of cosmic ray and gamma ray astrophysics; radiative and inelastic processes; astroparticle acceleration mechanisms; magnetic fields and cosmic ray transport; radiation-energy density of the universe; ultrahigh-energy cosmic rays; dark-matter models; and detection

## Astronomy and Astrophysics

techniques. (Formerly Origin and Evolution of the Universe.) (Also offered as Physics 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Offered in alternate academic years. A. Aguirre

**225. High-Energy Astrophysics. \*** High-energy astrophysics and the final stages of stellar evolution: supernovae, binary stars, accretion disks, pulsars; extragalactic radio sources; active galactic nuclei; black holes. (Formerly Physics of Compact Objects) Offered in alternate academic years. E. Ramirez-Ruiz

**226. General Relativity. W** Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes. (Also offered as Physics 226. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. S. Profumo

**230. Diffuse Matter in Space. S** Fundamental physical theory of gaseous nebulae and the interstellar medium. Ionization, thermal balance, theory and observation of emission spectra. Interstellar absorption lines, extinction by interstellar dust. Ultraviolet, optical, infrared, and radio spectra of gaseous nebulae. (Formerly Low-Density Astrophysics) Offered in alternate academic years. The Staff

**231. Diffuse Gas In and In Between Galaxies. \*** Examines the observational data and theoretical concepts related to the interstellar medium (gas inside galaxies); intracluster medium (gas in between galaxies in clusters); and intergalactic medium (gas in between field galaxies). Emphases on the inferred physical conditions

of this gas and its implications for cosmology and processes of galaxy formation. Enrollment restricted to graduate students. J. Prochaska

**233. Physical Cosmology. \*** Survey of modern physical cosmology, including Newtonian cosmology, curved space-times, observational tests of cosmology, the early universe, inflation, nucleosynthesis, dark matter, and the formation of structure in the universe. Offered in alternate academic years. The Staff

**235. Numerical Techniques. \*** Gives students a theoretical and practical grounding in the use of numerical methods and simulations for solving astrophysical problems. Topics include N-body, SPH and grid-based hydro methods as well as stellar evolution and radiation transport techniques. Enrollment restricted to graduate students. Offered in alternate academic years. The Staff

**237. Accretion Processes. \*** Theories of spherical accretion, structure and stability of steady-state accretion disks, and the evolution of time-dependent accretion disks. Applications of these theories to the formation of the solar system as well as the structure and evolution of dwarf novae and X-ray sources are emphasized. (Formerly Accretion in Early and Late Stages of Stellar Evolution) Offered in alternate academic years. D. Lin

**240A. Galactic and Extragalactic Stellar Systems. \*** Structure and evolutionary histories of nearby galaxies. Stellar populations, galactic dynamics, dark matter, galactic structure and mass distributions. Peculiar galaxies and starbursting galaxies. Structure and content of the Milky Way. Evolution

of density perturbations in the early universe. Hierarchical clustering model for galaxy formation and evolution. Offered in alternate academic years. The Staff

**240B. High Redshift Galaxies. \*** Galaxy formation and evolution from observations of intermediate-to-high redshift galaxies ( $z$  0.5-5). Complements and builds on 240A. Cluster galaxies and field galaxies. Foundation from classic papers on distant galaxies. Recent discoveries from IR and sub-mm measurements. Impact of AGNs and QSOs. Overview of modeling approaches. Identify theoretical and observational issues. (Formerly Galactic and Extragalactic Stellar Systems) Enrollment restricted to graduate students. Offered in alternate academic years. G. Illingworth

**257. Modern Astronomical Techniques. F** Covers physical, mathematical, and practical methods of modern astronomical observations at all wavelengths at a level that prepares students to comprehend published data and to plan their own observations. Topics include: noise sources and astrophysical backgrounds; coordinate systems; filter systems; the physical basis of coherent and incoherent photon detectors; astronomical optics and aberrations; design and use of imaging and spectroscopic instruments; antenna theory; aperture synthesis and image reconstruction techniques; and further topics at the discretion of the instructor. Familiarity with UNIX, computer programming, and completion of Physics 116C is strongly recommended as well as at least one upper-division course in astronomy. Designed for graduate students; available to qualified undergraduate astrophysics majors

## Astronomy and Astrophysics

by instructor permission. Offered in alternate academic years. T. Jeltama

### **260. Instrumentation for Astronomy. \***

An introduction to astronomical instrumentation for infrared and visible wavelengths. Topics include instrument requirements imposed by dust, atmosphere, and telescope; optical, mechanical, and structural design principles and components; electronic and software instrument control. Imaging cameras and spectrographs are described. Offered in alternate academic years. Enrollment restricted to graduate students. C. Rockosi

### **289. Adaptive Optics and Its Application. W**

Introduction to adaptive optics and its astronomical applications. Topics include effects of atmospheric turbulence on astronomical images, basic principles of feedback control, wavefront sensors and correctors, laser guide stars, how to analyze and optimize performance of adaptive optics systems, and techniques for utilizing current and future systems for astronomical observations. (Formerly course 289C.) Enrollment restricted to graduate students. Offered in alternate academic years. C. Max

### **292. Seminar (no credit). F,W,S**

Seminar attended by faculty, graduate students, and upper-division undergraduate students. The Staff

### **297. Independent Study. F,W,S**

Independent study or research for graduate students who have not yet begun work on their theses. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. The Staff

### **299. Thesis Research. F,W,S**

Students submit petition to sponsoring agency. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

## PROGRAM DESCRIPTION

---

Research at the macromolecular, molecular, and atomic levels is revolutionizing our understanding of the fundamental processes of life. Students interested in joining this search are best prepared by undertaking coursework in biology, chemistry, physics, mathematics, and computer science. The undergraduate major in Biochemistry and Molecular Biology (BMB) is offered by faculty who are actively engaged in research on biological systems.

Students who declare the BMB major earn a bachelor of science (B.S.) degree. The BMB major constitutes an integrated curriculum of basic instruction in biology, chemistry, mathematics, and physics, followed by the opportunity to pursue advanced study in specialized areas of interest. In modern, well-equipped laboratories, distinguished faculty are engaged in frontline research at UCSC. The Department of Chemistry and Biochemistry and the Department of Molecular, Cell, and Developmental Biology each host a very active seminar series in which internationally recognized scientists present their current research findings. Advanced BMB undergraduates are encouraged to attend.

The BMB program features close faculty-student interaction, stimulating learning environments, and opportunities for independent research and study. Students majoring in BMB are encouraged to become involved in research under the guidance of a faculty sponsor. Many students participating in this aspect of the program have made important contributions to the scientific literature.

Given the wide scope and interdisciplinary nature of this program, a considerable degree of flexibility has been incorporated into the major. All prospective majors should see the BMB academic adviser in the Undergraduate Affairs Office as early as possible. Junior transfer students or others with questions should consult the Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>. A double major of BMB with the biological sciences majors or chemistry is not permitted. No minor is offered.

---

## PROGRAM LEARNING OUTCOMES

---

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. in biochemistry and molecular biology should be able to:

1. demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
2. solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, test the correctness of the solution, and interpret their results;
3. use modern library search tools to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry, going beyond textbooks, common handbooks, and general online resources, such as Wikipedia;
4. know and follow the proper procedures and regulations for safe handling and use of chemicals;
5. understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;
6. use computers in data acquisition and processing, and use available software as a tool in data analysis;
7. use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;
8. communicate the concepts and results of their laboratory experiments through effective writing

## Biochemistry and Molecular Biology

and/or oral communication using the discipline standards for reporting and citation; and

9. collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

---

### DECLARATION OF THE BIOCHEMISTRY AND MOLECULAR BIOLOGY MAJOR

---

#### BIOCHEMISTRY AND MOLECULAR BIOLOGY QUALIFICATION POLICY

---

To qualify to declare the Biochemistry and Molecular Biology major, students must achieve a cumulative GPA of 2.50 or greater in the following courses, or their equivalents:

Chemistry 1B, General Chemistry  
Chemistry 1C, General Chemistry  
Chemistry 108A, Organic Chemistry  
Biology (BIOL) 20A, Cell and Molecular Biology

and in one of the following calculus courses:

Mathematics 11A, Calculus with Applications  
Mathematics 19A, Calculus for Science, Engineering, and Mathematics

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When calculating GPA to determine qualification:

- All courses must be taken for a letter grade, see [Letter Grade Policy](#).

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Biochemistry and Molecular Biology program chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the Biochemistry and Molecular Biology program chair will notify the student, the Office of the Registrar and the student's affiliated college of the decision. For more information about the appeal process, see the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>.

#### TRANSFER STUDENTS

---

Applications from transfer students are encouraged. Prior to transfer, students must satisfy major qualification requirements: CHEM 1B, General Chemistry; CHEM 1C, General Chemistry; BIOL 20A, Cell and Molecular Biology; CHEM 108A, Organic Chemistry, and calculus equivalent to MATH 11A or 19A. Transfer applicants must also achieve a cumulative GPA of 2.50 across these qualification courses.

Junior-level transfer students are also strongly encouraged to complete courses equivalent to CHEM

108B, MATH 11B/19B and a physics series equivalent to PHYS 6ABC prior to transfer. Students who transfer to UCSC prior to completing the introductory requirements for the major may have difficulty completing the program within the allotted time. Prospective transfer students should review the transfer information at

<http://undergrad.pbsci.ucsc.edu/biochemistry/transfer-students/index.html>.

#### LETTER GRADE POLICY

---

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the major requirements must be taken for a letter grade.

#### PROGRAM PLANNING NOTES

---

Students who do not begin the lower-division requirements during their first year and who do not complete the organic chemistry requirements by the end of their second year will have difficulty completing the program within four years. The BMB academic adviser works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward completion.

It is strongly recommended that students avail themselves of the opportunities to obtain firsthand research experience through either independent study or senior thesis research. A tutorial course or a senior thesis research course may not be substituted for the required laboratory elective.

A number of graduate courses in Biochemistry and Molecular Biology are offered by the molecular, cell, and developmental biology (MCDB), and chemistry and biochemistry departments. Advanced undergraduates possessing the necessary prerequisites may take one or more of these courses with the consent of the instructor; however, graduate courses may not be substituted for any of the elective courses required for the degree.

---

### REQUIREMENTS FOR THE B.S. DEGREE

---

#### LOWER-DIVISION REQUIREMENTS

---

**General Chemistry:** Chemistry 1A, 1B/M, and 1C/N

**Calculus:** Mathematics 11A-B and 22; or Mathematics 19A-B and 22

**Statistics:** Applied Mathematics and Statistics 5 or 7/L

**Introductory Biology:** Biology (BIOL) 20A and Biology (BIOE) 20B

**Physics:** Physics 5A/L, 5B/M, and 5C/N; or 6A/L, 6B/M, and 6C/N

---

### UPPER-DIVISION REQUIREMENTS

---

Organic Chemistry: Chemistry 108A/L, 108B/M

**Biochemistry and Molecular Biology:** Biochemistry and Molecular Biology (BIOC) 100A, 100B, and 100C and BIOL 101L (formerly 100K)

**Genetics:** Biology (BIOL) 105

**Cell Biology:** Biology (BIOL) 110

**Molecular Biology:** Biology (BIOL) 115

**Physical Chemistry:** Chemistry 163A and 163B

One of the following laboratory courses:

Biochemistry and Molecular Biology (BIOC) 110L, Advanced Biochemistry Laboratory

Biology (BIOL) 100L, Biochemistry Laboratory

Biology (BIOL) 105L, Eukaryotic Genetics Laboratory

Biology (BIOL) 105M, Microbial Genetics Laboratory

Biology (BIOL) 109L, Yeast Molecular Genetics Laboratory

Biology (BIOL) 110L, Cell Biology Laboratory

Biology (BIOL) 115L, Eukaryotic Molecular Biology Laboratory

Biology (BIOL) 121L, Environmental Phage Biology Laboratory

Biology (BIOL) 186L, Undergraduate Research in MCD Biology

Biology (BIOL) 187L, Molecular Biotechnology Laboratory

Microbiology and Environmental Toxicology (METX) 119L, Microbiology Laboratory

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in Biochemistry and Molecular Biology is satisfied by completing one of the following courses: BIOC 110L, BIOL 100L, 105L, 105M, 109L, 110L, 115L, 121L, 186L, 187L, or METX 119L. The DC requirement must be satisfied at UCSC and may not be transferred from another institution.

---

### BIOCHEMISTRY AND MOLECULAR BIOLOGY PLANNER

---

<http://undergrad.pbsci.ucsc.edu/programs/bioc/biochs.html>

---

### COMPREHENSIVE REQUIREMENT

---

Students must satisfy the comprehensive requirement by receiving a passing letter grade in any of the independent research laboratory listed in the previous section. In addition, students are encouraged to complete a senior thesis or a senior essay (see Chemistry and Biochemistry for more information).

---

### MATERIALS FEE

---

Biochemistry and Molecular Biology students should be aware of the materials fee required for some laboratory courses. The fee is billed to the student's account for specific laboratory materials purchased through the university. Fees generally range from \$15 to \$75 per course. Students may incur additional expenses purchasing individual supplies.

---

### Honors in the Major

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

---

## BIOCHEMISTRY AND MOLECULAR BIOLOGY FACULTY AND PROFESSIONAL INTERESTS

---

**James Ackman, Assistant Professor, Molecular, Cell, and Developmental Biology**

Brain circuit structure and function

**Roger W. Anderson, Emeritus, Chemistry and Biochemistry**

**Manuel Ares Jr., Professor, Molecular, Cell, and Developmental Biology**

Regulation of RNA processing, structure, function, and evolution of RNA-based systems

**Alexander Ayzner, Assistant Professor, Chemistry and Biochemistry**

Experimental physical chemistry; organic semiconductors; molecular spectroscopy; electron transfer dynamics; X-ray scattering and spectroscopy

**Ilan Benjamin, Professor, Chemistry and Biochemistry**

Theoretical chemistry, molecular dynamics of chemical reactions in liquids and at interfaces

**Claude F. Bernasconi, Emeritus, Chemistry and Biochemistry**

**Needhi Bhalla, Assistant Professor, Molecular, Cell, and Developmental Biology**

Meiotic chromosome dynamics

**Hinrich Boeger, Associate Professor, Molecular, Cell, and Developmental Biology**

Chromatin dynamics and transcriptional regulation

**Roberto A. Bogomolni, Professor, Chemistry and Biochemistry**

Biophysical chemistry, photobiology, light energy conversion and signal transduction in biological systems

**Barry Bowman, Professor, Molecular, Cell, and Developmental Biology**

Membrane biochemistry and genetics, biochemistry and molecular biology of membrane proteins

**Rebecca Braslau, Professor, Chemistry and Biochemistry**

Synthetic organic chemistry: new synthetic methodologies using free radicals; nitroxides, nitroxide mediated "living" polymerizations: design and functionalization of tailored polymers for biomedical applications and nanotechnology, profluorescent nitroxides as sensors, synthetically modified polymers, development of non-migratory plasticizers

**Bin Chen, Associate Professor, Molecular, Cell, and Developmental Biology**

Mammalian brain development

**Shaowei Chen, Professor, Chemistry and Biochemistry**

Synthesis, characterization, and manipulation of novel functional nanomaterials (metals and semiconductors); surface engineering of nanoparticles; nanoscale electron transfer; applications in fuel cells, photocatalysis, photovoltaics, and nano optoelectronics.

**Philip O. Crews, Research Professor, Chemistry and Biochemistry**

**Ólöf Einarsdóttir, Professor, Chemistry and Biochemistry**

Time-resolved spectroscopy; biophysics and bioenergetics; heme-copper oxidases; electron transfer and ligand binding; application of photolabile NO and O<sub>2</sub> donors; molecular dynamics simulations of ligand access channels in heme-copper oxidases

**David Feldheim, Professor, Molecular, Cell, and Developmental Biology**

Developmental neuroscience

**Grant Hartzog, Professor, Molecular, Cell, and Developmental Biology**

Biochemistry, genetics, chromatin and transcriptional regulation

**Lindsay Hinck, Professor, Molecular, Cell, and Developmental Biology**

Breast development and cancer, cell biology, development

**Theodore R. Holman, Professor, Chemistry and Biochemistry**

Biochemistry and bioinorganic chemistry; lipoxygenase enzymology, protein engineering, inhibitor discovery, computer inhibitor design, mass spectroscopy, electron paramagnetic resonance

**Melissa Jurica, Professor, Molecular, Cell, and Developmental Biology**

Structure and function of human splicing machinery

**Rohinton T. Kamakaka, Professor, Molecular, Cell, and Developmental Biology**

Nuclear organization, Chromatin domains, Epigenetic gene regulation and Insulators

**Douglas R. Kellogg, Professor, Molecular, Cell, and Developmental Biology**

Control of cell growth and size

**David S. Kliger, Research Professor, Chemistry and Biochemistry**

Time-resolved laser spectroscopy, biophysics, studies of visual transduction, protein function, and protein folding

**Joseph P. Konopelski, Professor, Chemistry and Biochemistry**

Synthetic organic chemistry; heterocyclic chemistry, bioorganic chemistry

**Yat Li, Associate Professor, Chemistry and Biochemistry**

Experimental physical chemistry, materials chemistry, nanomaterials, nanoscale photonics and electronics, energy conversion

**R.Scott Lokey, Professor, Chemistry and Biochemistry**

Organic chemistry; combinatorial synthesis, biotechnology, molecular cell biology

**Robert A. Ludwig, Professor, Molecular, Cell, and Developmental Biology**

Plant microbe interactions, photorespiration, genetic recombination in plants

**Pradip Mascharak, Professor, Chemistry and Biochemistry**

Bioinorganic chemistry, design of antitumor drugs, modeling of active sites of metalloenzymes, design of catalysts for hydrocarbon oxidation, studies on intermediates in non-heme oxygenase chemistry, design of NO-donors for photodynamic therapy

**Glenn L. Millhauser, Professor, Chemistry and Biochemistry**

Electron paramagnetic resonance; nuclear magnetic resonance, protein structure and function, peptide synthesis, prions, melanocortin signaling

**Harry F. Noller, Professor, Molecular, Cell, and Developmental Biology**

Ribosome structure and function; mechanisms of protein synthesis

**Scott R. Oliver, Professor, Chemistry and Biochemistry**

Materials chemistry: nanoporous inorganic and metal-organic materials for environmental cleanup of water, desulfurization of fuel and biomaterials

**Carrie Partch, Assistant Professor, Chemistry and Biochemistry**

Biochemistry and biophysics, nuclear magnetic resonance spectroscopy; molecular mechanism of circadian rhythmicity

**Amy Ralston, Assistant Professor, Molecular, Cell, and Developmental Biology**

Origins and regulation of mammalian stem cells

**Jevgenij Raskatov, Assistant Professor, Chemistry and Biochemistry**

Chemical biology, organic chemistry, molecular modeling, chemotherapy, inflammation

**Michael Rexach, Professor, Molecular, Cell, and Developmental Biology**

Structure and function of nuclear pore complex, nuclear transport

**Seth M. Rubin, Associate Professor, Chemistry and Biochemistry**

Biomolecular mechanisms of cell-cycle regulation and cancer; structural biology and biochemistry; macromolecular x-ray crystallography; nuclear magnetic resonance

**Jeremy Sanford, Associate Professor, Molecular, Cell, and Developmental Biology**

Genomic analysis of protein-RNA interactions

**William M. Saxton, Professor, Molecular, Cell, and Developmental Biology**

Cytoskeletal motors and active transport processes

**Thomas W. Schleich, Emeritus, Chemistry and Biochemistry**

**William G. Scott, Professor, Chemistry and Biochemistry**

Structure and function of RNA, proteins, and their complexes, origin of life

**Bakthan Singaram, Professor, Chemistry and Biochemistry**

Organic synthesis, organoborane chemistry, heterocyclic chemistry, organometallic chemistry, asymmetric synthesis, biosensors, and natural products chemistry

**Michael Stone, Associate Professor, Chemistry and Biochemistry**

Molecular basis of telomere length and telomerase-related diseases; biophysical characterization of nucleic acid-associated molecular motors; development of novel approaches for imaging enzymes in cells

**Susan Strome, Professor, Molecular, Cell, and Developmental Biology**

Chromatin and RNA regulation in *C. elegans*

**William T. Sullivan, Professor, Molecular, Cell, and Developmental Biology**

Cell cycle, cytoskeleton, and host-pathogen interactions

**Eugene Switkes, Emeritus, Chemistry and Biochemistry**

**John W. Tamkun, Professor, Molecular, Cell, and Developmental Biology**

Transcriptional regulation, molecular genetics of *Drosophila* development, regulation of gene expression

**Zhu Wang, Assistant Professor, Molecular, Cell, and Developmental Biology**

Prostate development and cancer, tissue stem cell

**W. Todd Wipke, Emeritus, Chemistry and Biochemistry**

**Alan M. Zahler, Professor, Molecular, Cell, and Developmental Biology**

Alternative pre-mRNA splicing and small RNA function

**Jin Z. Zhang, Professor, Chemistry and Biochemistry**

Design, synthesis, characterization, and application of nanomaterials, including semiconductors, metals, and metal oxides; ultrafast dynamics and laser spectroscopy; cancer diagnosis and therapy; solar energy conversion; surface-enhanced Raman spectroscopy (SERS).

**Martha C. Zúñiga, Professor, Molecular, Cell, and Developmental Biology**

Negative selection of autoreactive T cells in the thymus and in peripheral lymphoid organs, immunological tolerance to epithelial antigens, MHC transfer between keratinocytes and dendritic cells

**Yi Zuo, Associate Professor, Molecular, Cell, and Developmental Biology**

Synaptic plasticity in learning and memory

---

## BIOCHEMISTRY AND MOLECULAR BIOLOGY COURSES

---

### UPPER-DIVISION COURSES

---

#### **100A. Biochemistry and Molecular Biology. F**

Fundamentals of molecular biology, structure and function of nucleic acids, and protein structure.

Designed for students preparing for research careers in biochemistry and molecular biology. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. (Formerly Biochemistry.)

Prerequisite(s): Chemistry 108B or 112C; and Biology 20A M. Stone

#### **100B. Biochemistry and Molecular Biology. W**

Covers principles of protein function from ligand binding and enzyme mechanism, kinetics and

regulation to membrane composition and membrane protein function. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. (Formerly Biochemistry.) Prerequisite(s): course 100A C. Partch

#### **100C. Biochemistry and Molecular Biology. S**

Biochemistry: intermediary metabolism and bioenergetics. How enzymatically catalyzed reactions are organized and regulated; how energy from molecules is extracted for chemical work. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. (Formerly Biochemistry.)

Prerequisite(s): course 100B C. Saltikov

#### **110L. Advanced Biochemistry Laboratory. F**

An introduction to the major techniques used in the isolation and characterization of biological components. Laboratory: 8 hours; lecture: 1-3/4 hours. Students are billed a materials fee. (Formerly course 110, Biochemistry Laboratory) Prerequisite(s): course 100B and satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) O. Einarsdottir

## PROGRAM DESCRIPTION

---

Biology has entered into an exciting new era in which phenomena that once seemed insoluble mysteries—such as embryonic development, the functions of the brain, and the dynamics of ecosystems—are now yielding their secrets as the technology to study them becomes more and more sophisticated. From molecular biology, with its potential to revolutionize medicine and agriculture, to ecology, with its lessons for the sustainable management of the environment, biologists are fully engaged in meeting the challenges of the future, helping to improve the quality of human life and to preserve habitats and biodiversity. Thus, it is no surprise that biology is at the heart of many of today's most pressing intellectual and social concerns.

The Departments of Ecology and Evolutionary Biology (EEB) and Molecular, Cell, and Developmental Biology (MCDB) offer a broad spectrum of courses that reflect the exciting new developments and directions in the field of biology. An outstanding group of faculty, each with a vigorous, internationally recognized research program, is available to teach courses in their specialties as well as core courses for the major. Areas of research strength within the departments include RNA molecular biology, molecular and cellular aspects of genetics and development, neurobiology, microbial biochemistry, plant biology, animal behavior, physiology, evolution, ecology, and marine biology. Many students take advantage of the numerous opportunities for undergraduate research, allowing students to interact one on one with faculty and other researchers in a laboratory or field setting.

Students may plan a program that leads to a bachelor of arts (B.A.), including a bioeducation concentration, or bachelor of science (B.S.) degree. Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratory facilities for independent research. Fieldwork draws on a remarkable variety of terrestrial habitats, as well as ready access to Monterey Bay and the open Pacific. Hospitals, convalescent and physical therapy centers, veterinary clinics, and other enterprises in the vicinity

of the campus provide the opportunity to pursue field projects and internships comparable to on-the-job training. This array of opportunities for directed independent study enables biology majors to enhance their upper-division programs to reflect and strengthen their own interests and goals in the sciences.

---

## PREREQUISITES

---

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A has a prerequisite of Chemistry 1A and 1B. Therefore, it is essential for students considering a major in biology to start chemistry as soon as possible. Students who have not taken Chemistry 1A or 1B but are prepared to begin biology may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence.

An online Mathematics Placement Examination is offered at various periods prior to enrollment for each quarter. Biological science majors are expected to take this examination. For more information see the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu>.

---

## LETTER GRADE POLICY

---

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the biological sciences majors must be taken for a letter grade.

---

## BIOLOGY B.S. QUALIFICATION POLICY

---

To qualify for the Biology B.S. majors, students must pass (with a grade of C or better) the following courses or their equivalents:

Chemistry and Biochemistry 1A, General Chemistry;  
Chemistry and Biochemistry 1B, General Chemistry;  
Chemistry and Biochemistry 1C, General Chemistry;  
Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A, Cell and Molecular Biology;

## Biology Bachelor of Science and Biology Minor

Biology: Ecology and Evolutionary Biology (BIOE) 20B, Development and Physiology.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see [Letter Grade Policy](#).
- Students with AP credit for Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A and Biology: Ecology and Evolutionary Biology (BIOE) 20B, and AP credit for Chemistry and Biochemistry 1A, need only pass Chemistry and Biochemistry 1B and 1C to qualify.
- Students with non-grades (I, IP, DG, etc.) in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e., before enrolling in their third year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.
- Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the MCD Biology Faculty Advisor within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.”

For more information about the appeal process see the Physical and Biological Sciences Undergraduate Affairs web site at

<http://undergrad.pbsci.ucsc.edu/mcdb/qualifying/appeal-process.html>.

---

## TRANSFER STUDENTS

---

Applications from transfer students in the biological sciences are encouraged. Prior to transfer, students must satisfy major qualification requirements: CHEM 1A, General Chemistry; CHEM 1B, General Chemistry; CHEM 1C, General Chemistry; BIOL 20A, Cell and Molecular Biology; BIOE 20B, Development and Physiology. Junior-level transfer students are also strongly encouraged to complete courses equivalent to

MATH 11A, MATH 11B, and AMS 5 prior to transfer. Prospective transfer students should review the transfer information at <http://assist.org> and our web site at <http://undergrad.pbsci.ucsc.edu/biology/transfer-students/index.html>.

---

## DECLARING A BIOLOGY B.S. MAJOR

---

Students may submit a petition to declare after completing the qualification policy courses noted above. Students enrolled in their final policy course may submit the petition to declare, but will not be declared until grades have been posted. For instructions on petitioning to declare go the Physical and Biological Sciences Undergraduate Affairs web site: [undergrad.pbsci.ucsc.edu/](http://undergrad.pbsci.ucsc.edu/).

Students may not pursue multiple majors combining a Biology major (B.A., B.S., bioeducation concentration, or minor) with any other biological sciences major (Ecology and Evolution; Marine Biology; Plant Sciences; Environmental Studies/Biology combined major; Molecular, Cell and Developmental Biology; Neuroscience; Human Biology; and Biochemistry and Molecular Biology).

### BIOLOGY B.S. MAJOR REQUIREMENTS

#### Introductory Requirements

---

Introductory Biology: BIOL 20A, BIOE 20B and 20C

General Chemistry: Chemistry 1A, 1B and 1C/N

Organic Chemistry: Chemistry 108A/L and 108B

Calculus: Mathematics 11A-B or 19A-B

Statistics: Applied Mathematics and Statistics 5 or 7/L

Physics: Physics 6A/L, and 6B or 6C

#### Advanced Requirements

---

Students must complete one upper-division biology course that includes regular laboratory or fieldwork. (In addition to BIOL 101L, a lab or field course must be completed).

Six core courses and one lab course:

Biochemistry: BIOL 100/K

Molecular Biology BIOL 101\*

Molecular Biology Laboratory: BIOL 101L

Genetics: BIOL 105

Cell Biology: BIOL 110

Ecology: BIOE 107

Evolution: BIOE 109

\*Instead of Biochemistry (BIOL 100) and Molecular Biology (BIOL 101), students may complete the series in Biochemistry and Molecular Biology 100A, 100B, 100C. (Upon completion of the series, Biochemistry and Molecular Biology 100C may be used to satisfy one lecture elective.)

## Biology Bachelor of Science and Biology Minor

Students must complete three additional upper-division (5-7 credits) biology electives chosen from Biological Sciences-EEB courses (BIOE) or Biological Sciences-MCDB courses (BIOL) below.

BIOL 111A, Immunology I  
BIOL 113, Mammalian Endocrinology  
BIOL 114, Cancer Cell Biology  
BIOL 115, Eukaryotic Molecular Biology  
BIOL 120, Developmental Biology  
BIOL 125, Introduction to Neuroscience  
BIOL 178, Stem Cell Biology  
BIOL 182, Genomes  
BIOL 130, Human Physiology  
BIOE 108, Marine Ecology  
BIOE 112/L, Ornithology  
BIOE 114/L, Herpetology  
BIOE 117/L, Systematic Botany  
BIOE 120/L, Marine Botany  
BIOE 122/L, Invertebrates  
BIOE 124/L, Mammology  
BIOE 127/L, Ichthyology  
BIOE 129/L, Marine Mammals  
BIOE 131, Animal Physiology  
BIOE 133/L, Exercise Physiology  
BIOE 134/L, Comparative Vertebrate Anatomy  
BIOE 135 /L, Plant Physiology  
BIOE 137/L, Molecular Ecology  
BIOE 140, Behavioral Ecology  
BIOE 145, Plant Ecology  
BIOE 147, Community Ecology  
BIOE 148, Quantitative Ecology  
BIOE 149, Disease Ecology  
BIOE 155, Freshwater Ecology  
BIOE 161, Kelp Forest Ecology  
BIOE 163/L, Ecology of Reefs, Mangroves, and Seagrasses  
BIOE 165, Marine Conservation Biology  
BIOE 172, Population Genetics  
Microbiology and Environmental Toxicology (METX)  
119, Microbiology

### Disciplinary Communication (DC) Requirement

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement for the biology bachelor of science degree is satisfied by completing courses BIOE 107, Ecology, or BIOE 108, Marine Ecology, and BIOE 109, Evolution, or BIOE 159A, Marine Ecology Field Quarter.

## Biology B.S. Sample Planners

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/biology/biolbs/biolbs-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/mcdb/mcdbbs/mcdbbs-transfer-plans.html>

## Comprehensive Requirement

---

All majors in the biological sciences require a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- by receiving a passing grade in an internship, independent research laboratory, or field course:

BIOE 114L, Field Methods in Herpetological Research  
BIOE 112L Ornithology Laboratory  
BIOE 117L, Systematic Botany Laboratory  
BIOE 120L, Marine Botany Laboratory  
BIOE 122L, Invertebrates Laboratory  
BIOE 124L, Mammology Laboratory  
BIOE 127L, Ichthyology Laboratory  
BIOE 128L, Large Marine Vertebrates Field  
BIOE 131L, Animal Physiology Laboratory  
BIOE 133L, Exercise Physiology Laboratory  
BIOE 134L, Comparative Vertebrate Anatomy Laboratory  
BIOE 135L, Plant Physiology Laboratory  
BIOE 137L, Molecular Ecology  
BIOE 141L, Behavioral Ecology Field Course  
BIOE 145L, Field Methods in Plant Ecology  
BIOE 150L, Ecological Field Methods  
BIOE 151, Ecology and Conservation in Practice  
BIOE 158L, Marine Ecology Laboratory  
BIOE 159, Marine Ecology Field Quarter  
BIOE 161L, Kelp Forest Ecology Laboratory  
BIOE 163L, Ecology of Reefs, Mangroves, and Seagrasses Laboratory  
BIOE 172L, Population Genetics Laboratory  
BIOE 183, Undergraduate Research in EEB  
BIOL 100L, Biochemistry Laboratory  
BIOL 105L, Eukaryotic Genetics Laboratory  
BIOL 105M, Microbial Genetics Laboratory  
BIOL 109L, Yeast Molecular Genetics Laboratory  
BIOL 110L, Cell Biology Laboratory  
BIOL 111L, Immunology Laboratory  
BIOL 115L, Eukaryotic Molecular Biology Laboratory  
BIOL 120L, Developmental Biology Laboratory  
BIOL 121L, Environmental Phage Biology Laboratory  
BIOL 130L, Human Physiology Laboratory  
BIOL 178L, Protocols in Stem Cell Biology  
BIOL 186L, Undergraduate Research in MCD Biology  
BIOL 186R, Undergraduate Research in MCD Biology  
BIOL 187L, Molecular Biotechnology Laboratory

## Biology Bachelor of Science and Biology Minor

BIOL 189, Health Sciences Internship  
Biochemistry and Molecular Biology (BIOC) 110L,  
Advanced Biochemistry Laboratory  
METX 119L, Microbiology Laboratory

- by completing a senior thesis;
- by achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the biological sciences advising office before the last day of the graduating quarter;
- by obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the biological sciences advising office before the last day of the graduating quarter.

---

### BIOLOGY MINOR REQUIREMENTS

---

The biology minor is designed to incorporate elements of both EEB and MCD disciplines.

#### Lower-division requirements:

- Introductory biology: BIOL 20A, BIOE 20B, BIOE 20C
- Introductory chemistry: CHEM 1A, CHEM 1B, CHEM 1C

#### Upper-division requirements:

- CHEM 108A Organic Chemistry
- BIOL 100 Biochemistry
- BIOL 105 Genetics
- BIOE 107 Ecology
- BIOE 109 Evolution

There is no senior comprehensive for the biology minor. Please contact Physical and Biological Sciences Undergraduate Affairs Office for further information.

---

### HONORS

---

Honors in biology majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

---

### COURSE SUBSTITUTION/TRANSFER CREDIT POLICY

---

At least half of the upper-division courses (numbered 100–190) required for each major must be taken through the biological sciences program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact the Physical

and Biological Sciences Undergraduate Affairs Office before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the undergraduate web site at <http://undergrad.pbsci.ucsc.edu>.

A maximum of one upper-division course requirement may be met with a research-based independent study or graduate-level UCSC biology course or a course offered by another UCSC department.

---

### EDUCATION ABROAD OPPORTUNITIES

---

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. Both the Ecology and Evolutionary Biology and the Molecular, Cell and Developmental Biology departments encourage interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UCSC from the biological sciences undergraduate adviser and/or faculty adviser and receive their approval for your plans.

---

### MEDICAL AND PROFESSIONAL SCHOOL ADMISSION

---

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

---

### ACADEMIC ADVISING

---

Academic advising is available at the Physical and Biological Sciences Undergraduate Affairs Office. Students should take full advantage of this opportunity and should keep in frequent touch with the office to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study.

The undergraduate web site (<http://undergrad.pbsci.ucsc.edu>) serves as the program handbook containing advice and information pertinent to students' most frequently voiced questions. Each student in the major should review the

Biology Bachelor of Science and Biology Minor

information posted on the web site; for further assistance, contact an academic adviser.

## PROGRAM DESCRIPTION

---

### UNDERGRADUATE PROGRAM DESCRIPTION

---

The Department of Ecology and Evolutionary Biology (EEB) is devoted to the study of ecological and evolutionary processes across marine, terrestrial, and freshwater environments. The past 30 years have seen several revolutions in our understanding of how the biological world works. Advances in both analytical and genetic methods have given us a far more sophisticated understanding of the complexities of ecological and evolutionary processes in the natural world. Biologists at UCSC have played and will continue to play an important part in these advances, and the campus programs offer unique educational opportunities in biology that feature small class sizes, field studies, and extensive faculty-student interactions.

Class offerings and student research opportunities leverage the varied natural environments in the Monterey Bay region, throughout the western US, and in more distant locations such as Africa, Europe, Mexico, Tahiti, Australia, and the Far East. This emphasis on field and laboratory studies is the hallmark of undergraduate majors. Within this context they address not only basic ecological and evolutionary processes, but also the application of this knowledge to advance environmental, conservation and sustainability science.

An outstanding group of faculty, each with a vigorous, internationally recognized research program, is available to teach courses in their specialties as well as core courses for the major. Areas of research strength within the department include plant biology, animal behavior, physiology, evolution, ecology, and marine biology. UCSC is unique in the UC system in providing exceptional opportunities for undergraduate research,

allowing students to interact one-on-one with faculty and other researchers in a laboratory or field setting.

Students may plan a program that leads to one of several bachelor of arts (B.A.) and bachelor of science (B.S.) degrees. Students may choose from the following major options:

Biology B.A.  
Biology B.A. (Bioeducation concentration)  
Ecology and Evolution B.S.  
Marine Biology B.S.  
Plant Sciences B.S.  
Environmental Studies/Biology combined major B.A. (administered by the Environmental Studies Department).

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratories, including state-of-the-art genetics, physiology, and marine science facilities, for independent research. Fieldwork draws on a remarkable variety of terrestrial habitats, as well as ready access to Monterey Bay and the open Pacific. Terrestrial studies are supported by the UCSC reserve on campus, an arboretum, greenhouse facility, and vehicles to transport students to field sites off campus. Freshwater studies have access to a number of coastal tributaries and laboratory facilities at Long Marine Laboratory. Marine studies are supported by the Long Marine Laboratory with running seawater facilities, a boating program, and an AAUS accredited SCUBA diving program for underwater classes and research. Año Nuevo Island, north of Santa Cruz, is the site of extensive behavioral studies of marine mammals. In addition to coursework, there is an array of opportunities for directed independent study that enables biological science majors to enhance their

## Biology: Ecology and Evolutionary Biology

upper-division programs to reflect and strengthen their own interests and goals in the sciences.

### PREREQUISITES

---

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A has a prerequisite of Chemistry 1A and 1B. Therefore, it is essential for students considering a major in the biological sciences to start chemistry as soon as possible. Students who have not taken Chemistry 1A or 1B but are prepared to begin biology may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence.

An online Mathematics Placement Examination is offered at various periods prior to enrollment for each quarter. Biological science majors are expected to take this examination. For more information see the Mathematics Placement Exam web site at <http://undergrad.pbsci.ucsc.edu/enrollment/math/math-placement/index.html>.

### LETTER GRADE POLICY

---

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the majors must be taken for a letter grade.

#### **Qualification Policy for all Majors in the Department of Ecology and Evolutionary Biology**

To qualify for any of the majors sponsored by the department of Ecology and Evolutionary Biology, except the combined major with Environmental Studies, students must complete the following courses, or their equivalents, with a grade of C or better:

CHEM 1A, General Chemistry (offered by the Chemistry Department)

CHEM 1B, General Chemistry (offered by the Chemistry Department)

BIOL 20A, Cell and Molecular Biology (offered by the Molecular, Cell, and Developmental Biology Department)

- BIOE 20B, Development and Physiology
- BIOE 20C, Ecology and Evolution,

One of the following calculus courses offered by the Mathematics Department

MATH 11A, Calculus with Applications

MATH 19A, Calculus for Science, Engineering, and Mathematics

Neither of these mathematics courses will be included in the calculation in the maximum number of C-, D+, D, D-, or F grades for admission to the major.

#### Determining qualification:

Students who complete all the qualification courses with a grade of C or better are allowed to declare a major.

Students who have received one grade of NP, C-, D+, D, D-, or F in one of the qualification courses will only be allowed to declare after successfully completing the same or an equivalent course with a grade of C or better.

Students with two or more grades of NP, C-, D+, D, D-, or F in the qualification courses are not allowed to declare.

Students with AP credit for any of the qualification course(s) are allowed to declare after successfully completing the remaining qualification courses.

Students with non-grades in any of the qualification courses will not be allowed to declare until a grade of C or better has been assigned.

Students who are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days of the denial of the declaration. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision. For more information about the appeal process see the Physical and Biological Sciences Undergraduate Affairs website at: <http://undergrad.pbsci.ucsc.edu/eeb/qualifying/appeal-process.html>.

### TRANSFER STUDENTS

---

EEB encourages applications from transfer students in the biological sciences. In fall 2012 the department established a [Qualification Policy](#) that limits access to the program to those students who have completed a subset of foundational coursework. Transfer students are held to similar criteria for accessing the major.

To be considered for admission to UCSC as one of the EEB majors, transfer students must pass equivalents of the following courses with a C (2.0) or better in these preparatory courses:

- BIOL 20A, Cell and Molecular Biology
- One of the following courses offered by the Ecology and Evolutionary Biology Department:
  - BIOE 20C, Ecology and Evolution
  - BIOE 20B, Development and Physiology
- CHEM 1A, General Chemistry
- CHEM 1B, General Chemistry
- One of the following calculus courses
  - MATH 11A, Calculus with Applications
  - MATH 19A, Calculus for Science, Engineering, and Mathematics

## Biology: Ecology and Evolutionary Biology

For more information on qualifying for the major as a transfer applicant, visit: <http://undergrad.pbsci.ucsc.edu/eeb/transfer-students/transfer-admissions.html>.

In addition to the required coursework for admission, students should complete courses equivalent to the calculus, general chemistry, and introductory biology requirements for the major they wish to pursue. Students who transfer without having completed the prerequisite coursework may have difficulty enrolling in courses and may require more than two years to complete their EEB-sponsored degree.

Prospective transfer students should review the transfer information at: <http://undergrad.pbsci.ucsc.edu/eeb/transfer-students/index.html>.

### DECLARING A MAJOR

Students may submit a petition to declare after completing the qualification policy courses. Students who are enrolled in their final qualification policy course may submit the petition, but will not be declared until grades have been posted. For instructions on petitioning to declare go to the Physical and Biological Sciences Undergraduate Affairs web site at: <http://undergrad.pbsci.ucsc.edu/eeb/qualifying/petition-to-declare.html>.

### DOUBLE MAJOR IN THE BIOLOGICAL SCIENCES

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., bioeducation concentration, or minor), Ecology and Evolution, Marine Biology, Plant Sciences, or Environmental Studies/Biology combined major.

### GENERAL BIOLOGY BACHELOR OF ARTS MAJOR

The general biology bachelor of arts major permits flexibility, but demands careful attention to a student's own interests and plans. Each student should select courses on the basis of up-to-date information in consultation with a biology faculty adviser whose interests reflect the student's interests.

### GENERAL BIOLOGY B.A. MAJOR REQUIREMENTS

#### **Introductory Requirements**

Introductory Biology: BIOL 20A, BIOE 20B and 20C

General Chemistry: Chemistry 1A and 1B

Calculus: Mathematics 11A

Statistics: Applied Mathematics and Statistics 5 or 7/L

Physics: Physics 6A/L

#### **Advanced Requirements**

A total of eight upper-division biology courses, as follows:

Three core courses:

Genetics: BIOL 105

Evolution: BIOE 109

Ecology: BIOE 107

One of the following anatomy or physiology courses:

BIOE 131/L, Animal Physiology/Laboratory

BIOE 133/L, Exercise Physiology/Laboratory

BIOE 134/L, Comparative Vertebrate

Physiology/Laboratory

BIOE 135/L, Plant Physiology/Laboratory

BIOL 130/L, Human Physiology/Laboratory

METX 135/L, Human Anatomy/Laboratory

#### **Electives**

Four additional electives chosen from the following:

BIOE 108, Marine Ecology

BIOE 112/L, Ornithology/Laboratory

BIOE 114/L, Herpetology/Laboratory

BIOE 117/L, Systematic Botany/Laboratory

BIOE 118, Plants and Society: The Biology of Food, Shelter, and Medicine

BIOE 120/L, Marine Botany/Laboratory

BIOE 122/L, Invertebrate Zoology/Laboratory

BIOE 124/L, Mammology/Laboratory

BIOE 127/L, Ichthyology/Laboratory

BIOE 128L, Large Marine Vertebrates Field Course

BIOE 129/L, Biology of Marine Mammals/Laboratory

BIOE 131/L, Animal Physiology/Laboratory

BIOE 133/L, Exercise Physiology/Laboratory

BIOE 134/L, Comparative Vertebrate

Physiology/Laboratory

BIOE 135/L, Plant Physiology/Laboratory

BIOE 137/L, Molecular Ecology/Laboratory

BIOE 140, Behavioral Ecology

BIOE 141L, Behavioral Ecology Field Course

BIOE 145, Plant Ecology

BIOE 145L, Field Methods in Plant Ecology

BIOE 147, Community Ecology

BIOE 148, Quantitative Ecology

BIOE 149, Disease Ecology

BIOE 150, Ecological Field Methods

BIOE 150L, Ecological Field Methods Laboratory

BIOE 151ABCD, Ecology and Conservation in Practice

BIOE 155, Freshwater Ecology

BIOE 155L, Freshwater Ecology Laboratory

BIOE 158L, Marine Ecology Laboratory

BIOE 159ABCD, Marine Ecology Field Quarter

BIOE 161, Kelp Forest Ecology

BIOE 161L, Kelp Forest Ecology Laboratory

## Biology: Ecology and Evolutionary Biology

BIOE 163/L, Ecology of Reefs, Mangroves, and Seagrasses/Laboratory  
BIOE 165, Marine Conservation Biology  
BIOE 172/L, Population Genetics/Laboratory  
BIOL 100, Biochemistry  
BIOL 101/L, Molecular Biology/Laboratory  
BIOL 110, Cell Biology  
BIOL 111, Immunology  
BIOL 113, Endocrinology  
BIOL 115, Eukaryotic Molecular Biology  
BIOL 120, Development  
BIOL 125, Introduction to Neuroscience  
Chemistry 108A, Organic Chemistry  
Chemistry 108B, Organic Chemistry  
Microbiology and Environmental Toxicology 119, Microbiology  
Microbiology and Environmental Toxicology 119L, Microbiology Laboratory

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the biology bachelor of arts degree is satisfied by completing courses BIOE 107, Ecology, and BIOE 109, Evolution.

### GENERAL BIOLOGY B.A. SAMPLE PLANNERS

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/biology/biolba/biolba-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/biology/biolba/biolba-transfer-plans.html>

### GENERAL BIOLOGY, BIOEDUCATION CONCENTRATION, B.A.

---

The General Biology, Bioeducation Concentration, B.A. major is designed to meet the needs of students who plan careers as K-12 science teachers. It provides students with a rigorous education in biology through science breadth courses to prepare them for the state credentialing examinations (CSET) in biology/life sciences, and courses covering education theory and practical teaching experience through internships in local schools.

General Biology, Bioeducation Concentration, B.A. Requirements

### INTRODUCTORY REQUIREMENTS

---

Introductory Biology: BIOL 20A, BIOE 20B and 20C  
General Chemistry: Chemistry 1A, 1B and 1C/N  
Organic Chemistry: Chemistry 108A/L and 108B  
Calculus: Mathematics 11A-B or 19A-B

Statistics: Applied Mathematics and Statistics 5 or 7/L  
Physics: Physics 6A/L, and 6B or 6C  
Education: Education 50C  
Earth Sciences: Earth Sciences 20/L (optional\*)  
Astronomy: Astronomy 2 (optional\*)

\*These courses are recommended for students interested in pursuing a credential to teach general science.

### ADVANCED REQUIREMENTS

---

A total of 10 upper-division biology and education courses, and associated laboratories, as follows:

BIOL 100, Biochemistry  
BIOL 105, Genetics  
BIOE 107, Ecology  
BIOE 109, Evolution  
Education 185C, Introduction to Teaching Science  
Education 185L, Introduction to Teaching: CalTeach 3  
Education 100C and one of the Issues of Diversity in Education course from the following:

EDUC 128, Immigrants and Education  
EDUC 141, Bilingualism and Schooling  
EDUC 164, Urban Education  
EDUC 181, Race, Class, and Culture in Education

Students must fulfill the major distribution requirement, which includes one course from each of the following groups:

#### Cell/developmental biology:

BIOL 110, Cell Biology  
BIOL 115, Eukaryotic Molecular Biology  
BIOL 120, Developmental Biology  
Microbiology and Environmental Toxicology 119, Microbiology

#### Physiology:

BIOE 131, Animal Physiology  
BIOE 135, Plant Physiology  
BIOL 113, Endocrinology  
BIOL 130, Human Physiology

#### Biology Laboratory:

One 5-credit, upper-division biology laboratory course, or

BIOE 131L, Animal Physiology Laboratory  
BIOE 135L, Plant Physiology Laboratory  
BIOL 130L, Human Physiology Laboratory

(BIOL/METX 135L cannot be used to satisfy the laboratory requirement in the bioeducation concentration.)

**For information on the general biology minor, see [Biology B.S. and Minor](#)**

## ECOLOGY AND EVOLUTION MAJOR

The ecology and evolution major provides students with interdisciplinary skills necessary for understanding and solving complex problems in ecology, evolution, behavior, and physiology. While some of these disciplines focus on molecular or chemical mechanisms, they all address questions on larger spatial and temporal scales that can be applied to important environmental problems, including genetic and ecological aspects of conservation biology and biodiversity.

Students majoring in ecology and evolution will receive a B.S. degree based on an integrated series of courses providing breadth in fundamental areas of biology and allied sciences that enhance understanding of evolutionary and ecological processes. The capstone of this curriculum is a suite of field courses providing students unique opportunities to learn and conduct research in a host of ecological systems. Students are encouraged to take field courses in their areas of specialization. Other opportunities include participation in research projects with faculty sponsors and the intensive Education Abroad Programs (EAP) in Costa Rica (tropical biology) and Australia (marine sciences).

## ECOLOGY AND EVOLUTION B.S. MAJOR REQUIREMENTS

### Introductory Requirements

Introductory Biology: BIOL 20A, BIOE 20B and 20C  
General Chemistry: Chemistry 1A, 1B and 1C/N  
Calculus: Mathematics 11A-B or 19A-B  
Biostatistics: Applied Mathematics and Statistics 7/L  
Physics: Physics 6A/L, and 6B or 6C

### Advanced Requirements

A total of eleven upper-division courses; two must include laboratory or fieldwork.

Three upper-division core courses:

Genetics: BIOL 105  
Ecology: BIOE 107  
Evolution: BIOE 109

One of the following physiology courses:

BIOE 131/L, Animal Physiology/Laboratory  
BIOE 135/L, Plant Physiology/Laboratory

One of the following organism courses:

BIOE 112/L, Ornithology/Ornithology Field Studies  
BIOE 114/L, Herpetology/Field Methods in Herpetological Research  
BIOE 117/L, Systematic Botany of Flowering Plants/Laboratory

BIOE 120/L, Marine Botany/Laboratory  
BIOE 122/L, Invertebrate Zoology/Laboratory  
BIOE 124/L, Mammology/Laboratory  
BIOE 127/L, Ichthyology/Laboratory  
BIOE 129/L, Biology of Marine Mammals/Laboratory  
Microbiology and Environmental Toxicology 119/L,  
Microbiology/Laboratory

### **Elective list for Ecology and Evolution Major**

Three topical electives chosen from the following:

BIOE 108, Marine Ecology  
BIOE 112/L, Ornithology/Laboratory  
BIOE 114/L, Herpetology/Laboratory  
BIOE 117/L, Systematic Botany/Laboratory  
BIOE 118, Plant and Society: The Biology of Food, Shelter, and Medicine  
BIOE 120/L, Marine Botany/Laboratory  
BIOE 122/L, Invertebrate Zoology/Laboratory  
BIOE 124/L, Mammology/Laboratory  
BIOE 127/L, Ichthyology/Laboratory  
BIOE 128L, Large Marine Vertebrates Field Course  
BIOE 129/L, Biology of Marine Mammals/Laboratory  
BIOE 131/L, Animal Physiology/Laboratory  
BIOE 133/L, Exercise Physiology/Laboratory  
BIOE 134/L, Comparative Vertebrate Physiology/Laboratory  
BIOE 135/L, Plant Physiology/Laboratory  
BIOE 137/L, Molecular Ecology/Laboratory  
BIOE 140, Behavioral Ecology  
BIOE 141L, Behavioral Ecology Field Course  
BIOE 145, Plant Ecology  
BIOE 145L, Field Methods in Plant Ecology  
BIOE 147, Community Ecology  
BIOE 148, Quantitative Ecology  
BIOE 149, Disease Ecology  
BIOE 150, Ecological Field Methods  
BIOE 150L, Ecological Field Methods Laboratory  
BIOE 151ABCD, Ecology and Conservation in Practice  
BIOE 155, Freshwater Ecology  
BIOE 155L, Freshwater Ecology Laboratory  
BIOE 158L, Marine Ecology Laboratory  
BIOE 159ABCD, Marine Ecology Field Quarter  
BIOE 161, Kelp Forest Ecology  
BIOE 161L, Kelp Forest Ecology Laboratory  
BIOE 163/L, Ecology of Reefs, Mangroves, and Seagrasses/Laboratory  
BIOE 165, Marine Conservation Biology  
BIOE 172/L, Population Genetics/Laboratory  
BIOE 188, Introduction to Science Writing  
BIOL 100, Biochemistry  
BIOL 101/L, Molecular Biology/Laboratory  
BIOL 110, Cell Biology  
BIOL 115, Eukaryotic Molecular Biology  
BIOL 120, Development

## Biology: Ecology and Evolutionary Biology

Microbiology and Environmental Toxicology 119,  
Microbiology  
Microbiology and Environmental Toxicology 119L,  
Microbiology Laboratory

Ocean Sciences 118, Marine Microbial Ecology

Three general electives chosen from the following:

### **Biological Sciences-EEB**

any upper-division BIOE course

### **Biological Sciences-MCDB**

BIOL 100, Biochemistry

BIOL 101/L, Molecular Biology/Laboratory

BIOL 110, Cell Biology

BIOL 115, Eukaryotic Molecular Biology

BIOL 120, Development

### **Chemistry**

Chemistry 108A, Organic Chemistry

Chemistry 108B, Organic Chemistry

### **Earth Sciences**

Earth Sciences 100/L, Vertebrate Paleontology

Earth Sciences 101/L, Invertebrate

Paleobiology/Laboratory

Earth Sciences 102, Marine Geology

Earth Sciences 105, Coastal Geology

### **Economics**

Economics 166A, Game Theory and Applications I

Economics 166B, Game Theory and Applications II

### **Environmental Studies (enrollment by permission of instructor)**

Environmental Studies 104A, Introduction to  
Environmental Field Methods

Environmental Studies 107ABC, Natural History Field  
Quarter

Environmental Studies 108/L, General  
Entomology/Laboratory

Environmental Studies 115A/L, GIS and Environmental  
Applications/Exercises in GIS

Environmental Studies 120, Conservation Biology

Environmental Studies 122, Tropical Ecology and  
Conservation

Environmental Studies 123, Animal Ecology and  
Conservation

Environmental Studies 129, Integrated Pest  
Management

Environmental Studies 130A/L, Agroecology and  
Sustainable Agriculture/Laboratory

Environmental Studies 130B, Principles of Sustainable  
Agriculture

Environmental Studies 131/L, Insect  
Ecology/Laboratory

Environmental Studies 160, Restoration Ecology

Environmental Studies 161A/L, Soils and Plant  
Nutrition/Laboratory

Environmental Studies 162, Plant Physiological Ecology

Environmental Studies 163/L, Plant Disease

Ecology/Laboratory

Environmental Studies 167, Freshwater and Wetland  
Ecology

Environmental Studies 168, Biochemistry and the  
Global Environment

### **Microbiology and Environmental Toxicology**

Microbiology and Environmental Toxicology 119,  
Microbiology

Microbiology and Environmental Toxicology 119L,  
Microbiology Laboratory

### **Ocean Sciences**

Ocean Sciences 118, Marine Microbial Ecology

Ocean Sciences 130, Biological Oceanography

### **Psychology**

Psychology 123, Behavioral Neuroscience

One of the following may also be used as an upper-  
division general elective:

### **Biological Sciences-EEB**

Any 5 credits of undergraduate research (BIOE 183W,  
183L, 193, 193F, or 195, or 198)

### **Environmental Studies**

Environmental Studies 183, Environmental Studies  
Internship

### **Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's  
upper-division Disciplinary Communication (DC)  
requirement. The DC requirement in ecology and  
evolution is satisfied by completing courses BIOE 107,  
Ecology, and BIOE 109, Evolution.

### **Ecology and Evolution B.S. Sample Planners**

For freshmen:

<http://undergrad.pbsci.ucsc.edu/eeb/ecevbs/ecev-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/eeb/ecevbs/ecev-transfer-plans.html>

### **Marine Biology Major**

UCSC is situated within five miles of Monterey Bay and its great diversity of coastal marine ecosystems; nature reserves; and state, federal, and private marine research institutions and resource management agencies. These resources, combined with on-campus computing and analytical facilities and the Long Marine Laboratory, make UCSC an exceptional campus for the study of marine biology and its application to coastal

## Biology: Ecology and Evolutionary Biology

conservation and management. Descriptions of nearby environments, institutions, and facilities are available through the Ecology and Evolutionary Biology Department web site at <http://www.eeb.ucsc.edu/>.

The marine biology major is designed to introduce students to marine organisms and the biological and physical processes that affect these organisms, their populations, and their coastal and oceanic ecosystems. The emphasis is on basic principles that help in understanding the processes that shape life in marine environments. The marine biology major is a demanding program that offers a B.S. degree and requires several more courses than the general biology B.A. major.

### MARINE BIOLOGY B.S. MAJOR REQUIREMENTS

#### Introductory Requirements

---

Introductory Biology: BIOL 20A, BIOE 20B and 20C

General Chemistry: Chemistry 1A, 1B and 1C/N

Calculus: Mathematics 11A-B or 19A-B

Biostatistics: Applied Mathematics and Statistics 7/L

Physics: Physics 6A/L, and 6B or 6C

#### Advanced Requirements

---

A total of 11 upper-division courses; two must include laboratory or fieldwork.

Two core courses:

Genetics: BIOL 105

Evolution: BIOE 109

One ecology course:

BIOE 107, Ecology

BIOE 108, Marine Ecology

One marine-environment course:

Ocean Sciences 101, Marine Environment

Ocean Sciences 130, Biological Oceanography

One marine course:

BIOE 120/L, Marine Botany/Laboratory

BIOE 122/L, Invertebrate Zoology/Laboratory

BIOE 127/L, Ichthyology/Laboratory

BIOE 129/L, Biology of Marine Mammals/Laboratory

Elective list for Marine Biology Major

Three topical electives chosen from the following:

BIOE 108, Marine Ecology

BIOE 120/L, Marine Botany/Laboratory

BIOE 122/L, Invertebrate Zoology/Laboratory

BIOE 127/L, Ichthyology/Laboratory

BIOE 128L, Large Marine Vertebrates Field Course

BIOE 129/L, Biology of Marine Mammals/Laboratory

BIOE 155, Freshwater Ecology

BIOE 155L, Freshwater Ecology Laboratory

BIOE 158L, Marine Ecology Laboratory

BIOE 159ABCD, Marine Ecology Field Quarter

BIOE 161, Kelp Forest Ecology

BIOE 161L, Kelp Forest Ecology Laboratory

BIOE 163/L, Ecology of Reefs, Mangroves, and Seagrasses/Laboratory

BIOE 165, Marine Conservation Biology

BIOE 188, Introduction to Science Writing

EART 102, Marine Geology

EART 105, Coastal Geology

EART 122, Paleoceanography

Ocean Sciences 118, Marine Microbial Ecology

Ocean Sciences 130, Biological Oceanography

Three general electives chosen from the following:

#### **Biological Sciences-EEB**

Any upper-division BIOE course

#### **Biological Sciences-MCDB**

BIOL 100, Biochemistry

BIOL 101/L, Molecular Biology/Laboratory

BIOL 110, Cell Biology

BIOL 115, Eukaryotic Molecular Biology

BIOL 120, Development

#### **Chemistry**

Chemistry 108A, Organic Chemistry

Chemistry 108B, Organic Chemistry

#### **Earth Sciences**

Earth Sciences 100/L, Vertebrate Paleontology

Earth Sciences 101/L, Invertebrate

Paleobiology/Laboratory

Earth Sciences 102, Marine Geology

Earth Sciences 105, Coastal Geology

#### **Economics**

Economics 166A, Game Theory and Applications I

Economics 166B, Game Theory and Applications II

#### **Environmental Studies (enrollment by permission of instructor)**

Environmental Studies 104A, Introduction to

Environmental Field Methods

Environmental Studies 107ABC, Natural History Field Quarter

Environmental Studies 108/L, General

Entomology/Laboratory

Environmental Studies 115A/L, GIS and Environmental Applications/Exercises in GIS

Environmental Studies 120, Conservation Biology

Environmental Studies 122, Tropical Ecology and Conservation

Environmental Studies 123, Animal Ecology and Conservation

Environmental Studies 129, Integrated Pest Management

## Biology: Ecology and Evolutionary Biology

Environmental Studies 130A/L, Agroecology and Sustainable Agriculture/Laboratory  
Environmental Studies 130B, Principles of Sustainable Agriculture  
Environmental Studies 131/L, Insect Ecology/Laboratory  
Environmental Studies 160, Restoration Ecology  
Environmental Studies 161A/L, Soils and Plant Nutrition/Laboratory  
Environmental Studies 162, Plant Physiological Ecology  
Environmental Studies 163/L, Plant Disease Ecology/Laboratory  
Environmental Studies 167, Freshwater and Wetland Ecology  
Environmental Studies 168, Biochemistry and the Global Environment

### **Microbiology and Environmental Toxicology**

Microbiology and Environmental Toxicology 119, Microbiology  
Microbiology and Environmental Toxicology 119L, Microbiology Laboratory

### **Ocean Sciences**

Ocean Sciences 118, Marine Microbial Ecology  
Ocean Sciences 130, Biological Oceanography

### **Psychology**

Psychology 123, Behavioral Neuroscience  
One of the following may also be used as an upper-division general elective:

### **Biological Sciences-EEB**

Any 5 credits of undergraduate research (BIOE 183W, 183L, 193, 193F, or 195, or 198)

### **Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in marine biology is satisfied by completing courses BIOE 107 Ecology, or BIOE 108 Marine Ecology, or BIOE 159A Marine Ecology Field Quarter: Marine Ecology with Laboratory, and BIOE 109 Evolution.

### **Marine Biology B.S. Sample Planners**

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/eeb/mabibs/mabibs-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/eeb/mabibs/mabibs-transfer-plans.html>

### **PLANT SCIENCES MAJOR**

---

UCSC has a strong program in the plant sciences (sometimes called botany). A fine natural environment,

the campus Arboretum, the facilities under the Center for Agroecology and Sustainable Food Systems (especially the Farm and Garden), and an excellent greenhouse collection all enhance the resources that support UCSC's botanical programs.

The plant sciences major is designed for students with an interest in plant biology and its associated curricular fields such as plant ecology, plant physiology, plant pathology, plant molecular biology, soils, and applied plant sciences. After completion of the core courses, students can proceed in one of several directions depending on their interest. For example, a more in-depth study of physiology and molecular biology courses can serve as preparation for work in the biotechnology field or for graduate school; further studies in plant ecology, tropical ecology, or restoration ecology can lead to careers such as resource ecologist or naturalist or to the pursuit of related fields in graduate school; upper-division training in agroecology can lead to careers in agriculture or food systems. There are many opportunities for internships both on the UCSC campus and in the community at large.

### **PLANT SCIENCES B.S. MAJOR REQUIREMENTS**

#### **Introductory Requirements**

---

Introductory Biology: BIOL 20A, BIOE 20B and 20C  
General Chemistry: Chemistry 1A, 1B and 1C/N  
Calculus: Mathematics 11A-B or 19A-B  
Biostatistics: Applied Mathematics and Statistics 7/L  
Physics: Physics 6A/L, and 6B or 6C

#### **Advanced Requirements**

---

A total of 11 upper-division courses; two of which must include laboratory or fieldwork.

Three core courses:

Genetics: BIOL 105  
Ecology: BIOE 107  
Evolution: BIOE 109

One plant physiology course from the following:

BIOE 135/L, Plant Physiology/Laboratory  
Environmental Studies 162, Plant Physiological Ecology

One botany course from the following:

BIOE 117/L, Systematic Botany/Laboratory  
BIOE 120/L, Marine Botany/Laboratory

Elective list for Plant Sciences Major

Three topical electives chosen from the following:

#### **Biological Sciences-EEB**

BIOE 117/L, Systematic Botany/Laboratory  
BIOE 118, Plant and Society: The Biology of Food, Shelter, and Medicine  
BIOE 120/L, Marine Botany/Laboratory

## Biology: Ecology and Evolutionary Biology

BIOE 135/L, Plant Physiology/Laboratory  
BIOE 137/L, Molecular Ecology/Laboratory  
BIOE 145, Plant Ecology  
BIOE 145L, Field Methods in Plant Ecology  
BIOE 148, Quantitative Ecology  
BIOE 149, Disease Ecology  
BIOE 151ABCD, Ecology and Conservation in Practice  
BIOE 188, Introduction to Science Writing

### **Biological Sciences-MCDB**

BIOL 100, Biochemistry  
BIOL 101/L, Molecular Biology/Laboratory  
BIOL 110, Cell Biology  
BIOL 115, Eukaryotic Molecular Biology

### **Environmental Studies (enrollment by permission of instructor)**

Environmental Studies 104A, Introduction to Environmental Field Methods  
Environmental Studies 129, Integrated Pest Management  
Environmental Studies 130A/L, Agroecology and Sustainable Agriculture/Laboratory  
Environmental Studies 130B, Principles of Sustainable Agriculture  
Environmental Studies 131/L, Insect Ecology/Laboratory  
Environmental Studies 160, Restoration Ecology  
Environmental Studies 161A/L, Soils and Plant Nutrition/Laboratory  
Environmental Studies 162, Plant Physiological Ecology  
Environmental Studies 163/L, Plant Disease Ecology/Laboratory

Three general electives chosen from the following:

### **Biological Sciences-EEB**

Any upper-division BIOE course

### **Biological Sciences-MCDB**

BIOL 100, Biochemistry  
BIOL 101/L, Molecular Biology/Laboratory  
BIOL 110, Cell Biology  
BIOL 115, Eukaryotic Molecular Biology  
BIOL 120, Development

### **Chemistry**

Chemistry 108A, Organic Chemistry  
Chemistry 108B, Organic Chemistry

### **Earth Sciences**

Earth Sciences 100/L, Vertebrate Paleontology  
Earth Sciences 101/L, Invertebrate Paleobiology/Laboratory  
Earth Sciences 102, Marine Geology  
Earth Sciences 105, Coastal Geology

### **Economics**

Economics 166A, Game Theory and Applications I  
Economics 166B, Game Theory and Applications II

### **Environmental Studies (enrollment by permission of instructor)**

Environmental Studies 104A, Introduction to Environmental Field Methods  
Environmental Studies 107ABC, Natural History Field Quarter  
Environmental Studies 108/L, General Entomology/Laboratory  
Environmental Studies 115A/L, GIS and Environmental Applications/Exercises in GIS  
Environmental Studies 120, Conservation Biology  
Environmental Studies 122, Tropical Ecology and Conservation  
Environmental Studies 123, Animal Ecology and Conservation  
Environmental Studies 129, Integrated Pest Management  
Environmental Studies 130A/L, Agroecology and Sustainable Agriculture/Laboratory  
Environmental Studies 130B, Principles of Sustainable Agriculture  
Environmental Studies 131/L, Insect Ecology/Laboratory  
Environmental Studies 160, Restoration Ecology  
Environmental Studies 161A/L, Soils and Plant Nutrition/Laboratory  
Environmental Studies 162, Plant Physiological Ecology  
Environmental Studies 163/L, Plant Disease Ecology/Laboratory  
Environmental Studies 167, Freshwater and Wetland Ecology  
Environmental Studies 168, Biochemistry and the Global Environment

### **Microbiology and Environmental Toxicology**

Microbiology and Environmental Toxicology 119, Microbiology  
Microbiology and Environmental Toxicology 119L, Microbiology Laboratory

### **Ocean Sciences**

Ocean Sciences 118, Marine Microbial Ecology  
Ocean Sciences 130, Biological Oceanography

### **Psychology**

Psychology 123, Behavioral Neuroscience

One of the following may also be used as an upper-division general elective:

## Biology: Ecology and Evolutionary Biology

### Biological Sciences-EEB

Any 5 credits of undergraduate research (BIOE 183W, 183L, 193, 193F, or 195, or 198)

### Environmental Studies

Environmental Studies 183, Environmental Studies Internship

### Disciplinary Communication (DC) Requirement

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in plant sciences is satisfied by completing courses BIOE 107, Ecology, and BIOE 109, Evolution.

### Plant Sciences B.S. Sample Planners

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/eeb/plntbs/plntbs-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/eeb/plntbs/plntbs-transfer-plans.html>

### Comprehensive Requirement

---

All majors in the biological sciences require a comprehensive requirement. This requirement can be satisfied in one of the following ways:

by passing course 190, Senior Seminar;

by receiving a passing grade in an internship, independent research laboratory, or field course:

BIOE 114L, Field Methods in Herpetological Research

BIOE 128L, Large Marine Vertebrates Field Course

BIOE 141L, Behavioral Ecology Field Course

BIOE 145L, Field Methods in Plant Ecology

BIOE 150L, Ecological Field Methods

BIOE 151, Ecology and Conservation in Practice

BIOE 155L, Freshwater Ecology Laboratory

BIOE 158L, Marine Ecology Laboratory

BIOE 159, Marine Ecology Field Quarter

BIOE 161L, Kelp Forest Ecology Laboratory

BIOE 183, Undergraduate Research in EEB

BIOE 188, Introduction to Science Writing

BIOL 100L, Biochemistry Laboratory

BIOL 105L, Eukaryotic Genetics Laboratory

BIOL 105M, Microbial Genetics Laboratory

BIOL 109L, Yeast Molecular Genetics Laboratory

BIOL 110L, Cell Biology Laboratory

BIOL 111L, Immunology Laboratory

BIOL 115L, Eukaryotic Molecular Biology Laboratory

BIOL 120L, Developmental Biology Laboratory

BIOL 121L, Environmental Phage Biology Laboratory

BIOL 178L, Protocols in Stem Cell Biology

BIOL 186L, Undergraduate Research in MCD Biology

BIOL 186R, Undergraduate Research in MCD Biology

BIOL 187L, Molecular Biotechnology Laboratory

BIOL 189, Health Sciences Internship

Biochemistry and Molecular Biology 110L, Advanced

Biochemistry Laboratory

Microbiology and Environmental Toxicology 119L,

Microbiology Laboratory

by completing a senior thesis;

by achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the biological sciences advising office before the last day of the graduating quarter;

by obtaining an medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the biological sciences advising office before the last day of the graduating quarter.

### HONORS

---

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

### COURSE SUBSTITUTION/TRANSFER CREDIT POLICY

---

At least half of the upper-division courses (numbered 100–190) required for each major must be taken through the biological sciences program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact the Physical and Biological Sciences Undergraduate Affairs office before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the undergraduate web site at:

<http://undergrad.pbsci.ucsc.edu/biology/transfer-students/index.html>.

A maximum of one upper-division course requirement may be met with a research-based independent study or graduate-level UCSC biology course or a course offered by another UCSC department.

### ACADEMIC ADVISING

---

Academic advising is available at the Physical and Biological Sciences Undergraduate Affairs office. Students should take full advantage of this opportunity and should keep in frequent touch with the office to stay informed about late announcements of courses,

## Biology: Ecology and Evolutionary Biology

changes in scheduling, and opportunities for special study.

The undergraduate web site

(<http://undergrad.pbsci.ucsc.edu/eeb/index.html>) serves as the program handbook containing advice and information pertinent to students' most frequently voiced questions. Each student in the major should review the information posted on the web site; for further assistance, contact an academic adviser.

### EDUCATION ABROAD OPPORTUNITIES

---

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research, offers a homestay program, and carries credit for two upper-division biology courses. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UCSC from the biological sciences undergraduate adviser and/or faculty advisor and receive their approval for your plans.

### Graduate Program Description

The Ecology and Evolutionary Biology (EEB, courses BIOE) Graduate Program at UCSC reflects the remarkable local and global diversity of species and environments studied by the EEB faculty and students. The vision of the EEB graduate program is to provide a nurturing, creative, and intellectual environment conducive to the development of world-class scientists. The small size of the EEB graduate program encourages close working relations between students and faculty in

an informal atmosphere advantageous to rapid learning and professional growth. Interdisciplinary collaborations with oceanographers, geologists, mathematicians, environmental and conservation biologists, toxicologists, and others enable students to explore the conceptual connections between related fields as they acquire mastery in their areas of specialization.

The graduate program in Ecology and Evolutionary Biology (EEB) at UC Santa Cruz is one of the premier EEB programs in the country. EEB-UCSC graduate students regularly win prestigious awards for their presentations at international meetings and publish their work in the best journals of their fields. In addition to taking advantage of local field sites and state-of-the-art departmental laboratories, more than two-thirds of the EEB faculty also participate in field studies throughout the world, especially in Africa, Latin America, Antarctica, and around the Pacific Rim.

Research in EEB comprises four core tracks

Ecology

Evolutionary biology

Physiology

Behavior

### DEGREE REQUIREMENTS

#### Core Courses:

---

BIOE 200A, Scientific Skills

BIOE 200B, Advanced Organismal Biology

BIOE 279, Evolutionary Ecology

BIOE 293, Readings in Ecology and Evolution (orequivalent)

BIOE 294, Ecology, Evolutionary Biology Seminar (taken each quarter when in residence)

BIOE 295, Advanced Ecology and Evolutionary Biology Seminar (may substitute for BIOE 293)

#### Ph.D. Requirements

---

Ph.D. students must take BIOE 200A and 200B in the fall of the first year, and BIOE 279 in the winter of the first year. Two quarters of BIOE 293 are taken in the winter and spring of the first year. In addition, two quarters of BIOE 295 or two additional quarters of BIOE 293 should be completed by the end of the year two. Biology 281, 294, and 297/299 (Independent Study) must be taken every quarter the student is in residence. All students must be enrolled in at least 15 credits per quarter, unless on approved part-time, absentia or leave of absence status.

Each Ph.D. student should expect to complete at least two quarters as a teaching assistant during their graduate career.

## Biology: Ecology and Evolutionary Biology

During fall of the second year, students take a comprehensive examination. This is a two-part examination, written and oral, the goal of which is to examine the student's breadth and depth of knowledge of evolution, ecology, physiology, behavior, organismal, and general biology.

Later in the second or third year, the student submits a dissertation research proposal to the proposal committee and must defend it in an oral examination, followed by a seminar on his/her proposed research. The student advances to candidacy only after having completed all coursework, the comprehensive examination, the proposal defense, and the proposal seminar.

No sooner than 30 days after submitting the dissertation to a dissertation reading committee, the student defends the dissertation to the committee, followed by a public seminar. At least one chapter of the dissertation must be submitted to a refereed journal for publication before receipt of the Ph.D.

### Master of Arts (M.A.) Requirements

---

M.A. students must take BIOE 200A, BIOE 200B, BIOE 279, and two quarters of BIOE 293 (or one quarter of 293 and one quarter of 295) within their first two years. Biology 281, 294, and 297/299 (Independent Study) must be taken every quarter the student is in residence. All students must be enrolled in at least 15 credits per quarter, unless on approved part-time, absentia or leave of absence status. The minimum number of credits for the master's degree is 35 of which no more than 15 credits from upper-division undergraduate courses may be used as part the student's coursework.

Thirty days after submitting the master's thesis to a thesis reading committee, the student defends the thesis to the committee, followed by a public seminar.

### REQUIREMENTS FOR THE ECOLOGY AND EVOLUTIONARY BIOLOGY DESIGNATED EMPHASIS

---

To receive a parenthetical notation in Ecology and Evolutionary Biology (hereafter EEB), graduate

students must complete the following requirements, in addition to the degree requirements for the doctorate in their home department:

1. Take the following EEB core courses (required for all EEB graduate students):
2. BIOE 279 Evolutionary Ecology (5 credits), BIOE 200A Scientific Skills (5 credits), BIOE 200B Advanced Organismal Biology (5 credits)
3. 2. Attend EEB department seminars (enroll in BIOE 294, 2 credits) for one quarter
4. 3. Attend a lab group seminar course (enroll in BIOE 281, 2/5 credits) for one quarter
5. 4. Take at least two courses from any other graduate or appropriate upper-division courses in biology, for example:
6. BIOE 293 Readings in Ecology and Evolution (2 credits) BIOE 295 Special Advanced Topics in Ecology and Evolution (2 credits) BIOE 272 Exercise Physiology (5 credits) BIOE 233 Exercise Physiology (5 credits) BIOE 148 Quantitative Ecology for Conservation (5 credits) BIOE 252 Community Ecology (5 credits) BIOE 208 Marine Ecology (5 credits) BIOE 245 Plant Ecology (5 credits) BIOE 274 Evolutionary Game Theory (5 credits) BIOE 286 Experimental Design and Data Analysis (5 credits)
7. 5. In all, students will be expected to complete at least 20 credits of EEB coursework. Courses taken to fulfill graduate requirements within the home department will not count toward the Designated Emphasis requirements.
8. 6. Have a designated graduate adviser from among the faculty of the EEB department, who commits to serve on the qualifying exam committee and on the Ph.D. dissertation reading committee.

---

## ECOLOGY AND EVOLUTIONARY BIOLOGY FACULTY AND PROFESSIONAL INTERESTS

---

### **Suzanne Alonzo**

Sexual selection, social behavior and the evolution and ecology of reproduction

### **Giacomo Bernardi**

Fish biology, phylogenetics, evolution

### **Mark H. Carr**

Marine ecology, applied marine ecology

### **Daniel P. Costa**

Physiological ecology of marine mammals and birds

### **Donald Croll**

Ecology and conservation of islands and seabirds

**Jim Estes**

Marine sciences, community ecology, species interactions

**Laurel R. Fox**

Terrestrial population and community ecology, plant-animal interactions

**Kathleen M. Kay**

Plant evolutionary ecology

**A. Marm Kilpatrick**

Disease ecology, population biology

**Kristy Kroeker**

Global change biology, community ecology, applied marine ecology, climate change, ocean acidification, multiple stressors

**Bruce E. Lyon**

Behavioral ecology, evolutionary ecology, avian ecology

**Rita Mehta**

Comparative marine physiology

**Eric P. Palkovacs**

Freshwater ecology, eco-evolutionary dynamics, fisheries and fish ecology

**Ingrid M. Parker**

Plant ecology, plant-pathogen interactions, biological invasions

**Jarmila Pittermann**

Plant physiology

**Grant H. Pogson**

Molecular population genetics, ecological genetics, marine invertebrates and fishes

**Donald C. Potts**

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

**Peter T. Raimondi**

Marine ecology, evolutionary ecology, experimental design, applied ecology

**Beth Shapiro**

Evolutionary and molecular ecology, ancient DNA, genomics, pathogen evolution

**Barry Sinervo**

Animal behavior, evolution, physiological ecology

**John N. Thompson**

Coevolution, evolutionary ecology and genetics of species interactions, organization of biodiversity

**Terrie M. Williams**

Large mammal physiology, bioenergetics, exercise and environmental physiology

ECOLOGY AND EVOLUTIONARY BIOLOGY  
EMERITUS FACULTY

---

**William Jackson Davis**

**William Doyle**

**Lynda J. Goff**

**Ralph Hinegardner**

**Jean Langenheim**

**Burney LeBoeuf**

**Charles (Leo) Ortiz**

**A. Todd Newberry**

**John Pearse**

**Ecology and Evolutionary Biology Lecturers**

**Robin Dunkin**

**Baldo Marinovic**

ADJUNCTS

---

**Catherine Burns** (Environmental Studies)

Conservation biology, mammals, birds, population and community ecology

**Claudio Campagna** (Ecology and Evolutionary Biology)

Marine conservation; species conservation, philosophical aspects of nature conservation

**James Estes** (Ecology and Evolutionary Biology)

Marine sciences, community ecology, species interactions

**Samantha Forde** (Ecology and Evolutionary Biology;

Gordon and Betty Moore Foundation)

Experimental evolutionary ecology

**Winifred Frick** (Ecology and Evolutionary Biology)

Population ecology, conservation biology, ecology and behavior of bats

**Steven Haddock** (Ecology and Evolutionary Biology; MBARI)

Bioluminescence, biodiversity and molecular phylogenetics of deep-sea and open ocean gelatinous zooplankton

**Elliott Hazen** (NOAA/NMFS/SWFSC; Adjunct Faculty, Duke University Marine Lab)

Marine ecology, birds and mammals, conservation biology: focusing on predator-prey dynamics and their response to environmental variability and global change

**Joseph Merz** (Ecology and Evolutionary Biology; Cramer Fish Sciences)

Relationships between aquatic species and their environments and the effects of anthropogenic influences on those relationships.

## Biology: Ecology and Evolutionary Biology

**Stephan B. Munch** (NOAA Southwest Fisheries Science Center, Stony Brook University)

Population and ecosystem dynamics, contemporary evolution of life histories, transgenerational thermal plasticity

**Devon Pearse** (Ecology and Evolutionary Biology; NOAA Fisheries Service's; Southwest Fisheries Science Center)

Evolutionary and ecological genetics, conservation biology

**Luiz Rocha** (California Academy of Sciences)

Fish ecology, systematics and evolution

**Bernie Tershy** (Ecology and Evolutionary Biology)

Ecology and conservation of seabirds and island ecosystems

**M. Tim Tinker** (Ecology and Evolutionary Biology;

Western Ecological Research Center, USGS)

Foraging ecology and demography of the southern sea otter

**Kerstin Wasson** (Ecology and Evolutionary Biology;

Elkhorn Slough National Estuarine Research Reserve)

Evolutionary ecology, invasion biology, conservation science

### AFFILIATES

---

**Greg Gilbert** (Environmental Studies)

Disease ecology, conservation biology, tropical forest ecology, microbial ecology

---

**Karen D. Holl** (Environmental Studies)

Restoration ecology, conservation biology, landscape ecology

**Paul L. Koch** (Earth Sciences)

Isotope biogeochemistry, vertebrate paleontology

**Raphael Kudela** (Ocean Sciences)

Ecological modeling and remote sensing, satellite oceanography, phytoplankton ecology and harmful algal blooms

**Marc Mangel** (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

**Christopher Wilmers** (Environmental Studies)

Population and community ecology; wildlife conservation; predator-prey dynamics; climate change impacts on biodiversity.

**Jonathan Zehr** (Ocean Sciences)

Aquatic microbial ecology, biological oceanography

### DEPARTMENTAL AFFILIATED RESEARCHERS

---

**Kristen Ruegg**

Evolutionary biology and conservation genetics

---

## ECOLOGY AND EVOLUTIONARY BIOLOGY COURSES

---

### LOWER-DIVISION COURSES

---

#### **20B. Development and Physiology. F,W,S**

Topics in morphology, physiology, development, genetics, and endocrinology selected to exemplify current issues and perspectives in organismic biology. Prerequisite(s): BIOL 20A. R. Dunkin

#### **20C. Ecology and Evolution. F,W,S**

Introduction to ecology and evolution covering principles of evolution at the molecular, organismal, and population levels. Evolutionary topics include genetic and phenotypic variation, natural selection, adaptation, speciation, and macroevolution. Also covers behavioral, population, and community ecology including

applied ecological issues. B. Marinovic

#### **75. Scientific Diving Certification (2 credits). F,S**

Prerequisite for course 161/L, Kelp Forest Ecology, and all research diving performed under the auspices of UCSC or other academic institutions. Course work includes lectures and scuba diving. Topics include subtidal sampling techniques, navigation, low visibility diving, search and recovery, rescues, small boat use, oxygen administration for divers, technical blue water deep diving, physics, and physiology. Apply online at <http://www2.ucsc.edu/sci-diving>. Students are billed a course materials fee that covers costs for

equipment use, materials, and transportation. Prerequisite(s): skill level equal to Advanced Scuba Diver Certification, pass scuba physical, provide own scuba gear, be certified in CPR and First Aid; and interview: pass swim test and scuba skills test. Enrollment limited to 16. S. Clabuesch

#### **80S. Lies, Damn Lies, and Statistics. \***

Probability and statistics underlie much of our everyday experience and, as such, there is a fundamental need for an understanding of the use, and misuse, of statistics. This course is taught through case studies based in biology, politics, economics, crime, education, disease, conservation, and other fields of interest. For example, does

## Biology: Ecology and Evolutionary Biology

a change in crime rate really affect your probability of being a victim of a crime? The goal is to provide all students with sufficient understanding probability and statistics to determine if everyday and often sensationalistic reporting of "statistical" results is meaningful. (General Education Code(s): SR.) P. Raimondi

### **82. Introduction to Field Research and Conservation (2 credits). F**

A field-based course with overnight and day trips to regionally diverse areas throughout Central California. Field trips and lectures familiarize students with a wide variety of topics in the ecological, conservation, and environmental science as well as natural-resource management. Enrollment is by instructor permission. Students are billed a materials fee. Enrollment limited to 28. G. Dayton, D. Croll

### **85. Natural History of the UCSC Natural Reserves. S**

Lectures and field trips familiarize students with the flora and fauna of the UCSC Natural Reserves. Field trips focus on surveying and identifying vertebrates and plants at each UCSC Natural Reserve (Fort Ord, Campus Reserve, Big Creek, Younger Lagoon, and Ano Nuevo). (General Education Code(s): PE-E.) The Staff

### **95. Seymour Center Docent Training (2 credits). W**

Taught as a series of seminars, course provides a survey of marine sciences and the role of scientific research in understanding and conserving the world's oceans. Topics include: marine biology, ecology, conservation, coastal geology, and climate change. This series is intended to prepare students to interpret research and inform the public by leading tours

at the Seymour Marine Discovery Center at the Long Marine Lab. Enrollment by application and interview. (General Education Code(s): PR-S.) P. Raimondi

### **99. Tutorial. F,W,S**

Individual, directed study for undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## UPPER-DIVISION COURSES

### **107. Ecology. W,S**

Focuses on physiological, behavioral, and population ecology, and on linking ecological processes to evolution. It includes basic principles, experimental approaches, concepts of modeling, and applications to ecological problems. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, and BIOE 20C. (W) B. Lyon, (S) J. Estes

### **108. Marine Ecology. W**

Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology; analysis and discussion of experiments with these paradigms. Students cannot receive credit for this course and course 208. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, and BIOE 20C; BIOE 107 or 140 recommended. Enrollment restricted to juniors and seniors. P. Raimondi, K. Kroeker

### **109. Evolution. F,W,S**

An examination of the history and mechanisms of evolutionary change. Topics include molecular evolution, natural and sexual selection, adaptation, speciation, biogeography, and macroevolution. Prerequisite(s): satisfaction of the

Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105. (F) G. Bernardi, (W) S. Alonzo, (S) G. Pogson

### **112. Ornithology. F**

Introduction to the evolution, ecology, behavior, and natural history of birds, using exemplary case histories to illustrate key concepts in evolution, ecology, and behavior. Prerequisite(s): BIOE 107, BIOE 109, or BIOE 140. Concurrent enrollment in BIOE 112L is required. B. Lyon

### **112L. Ornithology Field Studies (2 credits). F**

Field trips introduce students to field identification skills and field investigation of census, foraging behavior, migration, social behavior, and communication. Examination of specimens in the laboratory will be used to highlight the diversity and taxonomy of birds. Students are billed a materials fee. Some field trips may require students to provide their own transportation. Prerequisite(s): BIOE 107, BIOE 109, or BIOE 140. Concurrent enrollment in BIOE 112 is required. Offered in alternate academic years. B. Lyon

### **114. Herpetology. S**

Lectures introduce students to evolution, development, physiology, behavior, ecology, and life history of reptiles and amphibians. The materials integrate with conceptual and theoretical issues of ecology, evolution, physiology, and behavior. Prerequisite(s): BIOE 107, BIOE 109, BIOE 110, or BIOE 140. Concurrent enrollment in BIOE 114L required. Offered in alternate academic years. B. Sinervo

**114L. Field Methods in Herpetological Research (2 credits). S**

Field trips introduce students to natural history, censusing techniques, physiological ecology, and behavioral analysis of reptiles and amphibians. Laboratories introduce students to techniques for analyzing behavior and physiology. Field studies culminate with a group project in a natural setting. Some field trips may be held on weekends due to weather considerations. Some field trips may require students to provide their own transportation, some transportation will be provided by UCSC. Students are billed a materials fee. Prerequisite(s): BIOE 107, 109, 110, or 140. Concurrent enrollment in BIOE 114 is required. Offered in alternate academic years. B. Sinervo

**117. Systematic Botany of Flowering Plants. W**

An examination of the taxonomy and evolution of flowering plants. Special topics include phylogenetics and cladistics, plant species concepts, and modern methods of systematic research. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 117L. K. Kay

**117L. Systematic Botany of Flowering Plants Laboratory (2 credits). W**

Weekly laboratory concerned primarily with California flora and plant families. Several field trips. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 117. K. Kay

**118. Plants and Society: the Biology of Food, Shelter, and Medicine. S**

Introduces plant biology as it affects

human society. Topics include the origins of agriculture, the morphology and chemistry of food plants, the material uses of plant products, the biology of medicinal plants, and plant diversity and bioprospecting. Prerequisite(s): BIOL 20A and BIOE 20B; and BIOE 20C or ENVS 23 and ENVS 24 J. Pittermann

**120. Marine Botany. S**

An introduction to the biology of marine algae, fungi, and angiosperms with regard to form and function. Major boreal, temperate, and tropical marine plant communities. Lecture format. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 120L. The Staff

**120L. Marine Botany Laboratory (2 credits). S**

One laboratory weekly and several field trips. Focuses on marine algae, fungi, and angiosperms. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 120. The Staff

**122. Invertebrate Zoology. W**

An examination of invertebrates and their habitats. Lecture format. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. BIOE 122L must be taken concurrently. B. Marinovic

**122L. Invertebrate Zoology Laboratory (2 credits). W**

An examination of invertebrates and their habitats. Weekly laboratories or field trips. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. BIOE 122 must be taken concurrently. B. Marinovic

**124. Mammalogy. F**

Introduces the biology of mammals, including their classification, evolution, behavior, reproductive strategies, and general ecology. Examines the diagnostic traits of mammals; provides a survey of the living orders along with their diagnostic features, physiological and behavioral specializations, and adaptations. Prerequisite(s): BIOL 20A; and BIOE 20B and 20C. Concurrent enrollment in course 124L is required. The Staff

**124L. Mammalogy Laboratory (2 credits). F**

Focuses on the identification of mammals and their specific traits. Exercises provide hands-on experience at identifying mammal orders, families, and species. Field trip provides students with field techniques in mammalogy. Prerequisite(s): BIOL 20A; and BIOE 20B and 20C. Concurrent enrollment in course 124 is required. The Staff

**127. Ichthyology. F**

An introduction to the biology of jawless, cartilaginous, and bony fishes—their classification, evolution, form, physiology, and ecology. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. BIOE 127L must be taken concurrently. Offered in alternate academic years. G. Bernardi

**127L. Ichthyology Laboratory (2 credits). F**

One laboratory session a week and several field trips to study the biology of fish. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. BIOE 127 must be taken concurrently. Offered in alternate academic years. G. Bernardi

**128L. Large Marine Vertebrates Field Course. S**

Lectures combined on fieldwork with large marine vertebrates in the laboratory and lectures with large marine vertebrates in the field (Monterey Bay, Ano Nuevo). Fieldwork familiarizes students with research methods, study design, and statistical approaches for research on large marine vertebrates (seals, birds, fish, and sharks). Research includes: animal tracking; physiology; behavior; foraging ecology; and energetics. Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Students are billed a materials fee. Enrollment limited to 24. P. Robinson

**129. Biology of Marine Mammals. S**

A survey of cetaceans, pinnipeds, sirenians, and sea otters, including natural history, systematics, physiology, behavior, anatomy, and conservation. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; BIOL 110 is recommended. D. Costa

**129L. Biology of Marine Mammals Laboratory (2 credits). S**

Covers the basics of marine mammal taxonomy, anatomy, and field methods with an emphasis on local field identification and understanding of local species. Will include field trips to Long Marine Lab, Ano Nuevo, and Monterey Bay. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 129. D. Costa

**131. Animal Physiology. W**

Principles and concepts underlying the function of tissues and organ systems in animals with emphasis on vertebrate systems. Students cannot receive credit for this course and BIOL 130. Prerequisite(s): BIOL

20A, BIOE 20B, and BIOE 20C. R. Mehta, T. Williams

**131L. Animal Physiology Laboratory (2 credits). W**

Experiments conducted with primary focus on quantitative physiological principles of organ systems and intact organisms. Students cannot receive credit for this course and course 130L. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 131 is required. R. Mehta, T. Williams

**133. Exercise Physiology. S**

An advanced-level course concerning physiological and biochemical processes associated with human performance. Emphasis is on the integration of organ systems for exercise. Topics include metabolism and fuel utilization, cardiovascular and respiratory dynamics during activity, and the effects of training. Requires a good understanding of basic physiological function and anatomy. Prerequisite(s): BIOL 20A, BIOE 20B and 20C. BIOE 131 recommended. Concurrent enrollment in BIOE 133L required. Offered in alternate academic years. T. Williams

**133L. Exercise Physiology Laboratory (2 credits). S**

An introduction to basic measurement techniques used in assessing the physiological response of humans to exercise. Sessions cover oxygen consumption, respiratory rate, and heart rate monitoring during aerobic and anaerobic activity. Students are billed a materials fee. Prerequisite(s): BIOL 20A, and BIOE 20B and 20C. BIOE 131 recommended. Concurrent enrollment in BIOE 133 is required. Offered in alternate academic years.

T. Williams

**134. Comparative Vertebrate Anatomy. F**

Course focuses on vertebrate form and function: an integration of physiology and biomechanics. Topics include: the physiology and biomechanics underlying vertebrate locomotion; vertebrate feeding; and the morphological changes associated with different locomotion and feeding strategies through evolutionary time. Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 134L is required. R. Mehta

**134L. Comparative Vertebrate Anatomy Laboratory (2 credits). F**

Course focuses on the gross dissections all major clades of vertebrates: development, form, and diversity of organ systems and basic principles of evolution; vertebrate classification; and functional morphology, with emphasis on feeding and locomotion. Anatomical dissections integrated with the associated lecture material focusing on biomechanics, form, and function. Students are billed for a materials fee. Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 134 is required. R. Mehta

**135. Plant Physiology. W**

Cellular and organismal functions important in the life of green plants. Prerequisite(s): BIOL 20A and BIOE 20B and 20C; concurrent enrollment in course 135L is required. J. Pittermann

**135L. Plant Physiology Laboratory (2 credits). W**

Weekly laboratory concerning the cellular and organismal functions of green plants. Students are billed a

## Biology: Ecology and Evolutionary Biology

materials fee. Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C; concurrent enrollment in course 135. J. Pittermann

### **137. Molecular Ecology. W**

This combination lecture/laboratory course explores the use of molecular (DNA and/or protein) data in ecological and conservation research. Topics covered include data collection; marker choice; estimating genetic diversity and population structure; the inference of mating systems; and environmental genomics. Prerequisite(s): courses 20B and 20C and BIOL 20A and BIOL105 Concurrent enrollment in course 137L is required. Enrollment limited to 24. B. Shapiro

### **137L. Molecular Ecology Laboratory (2 credits). W**

This combination lecture/laboratory course explores the use of molecular (DNA and/or protein) data in ecological and conservation research. Topics covered include data collection; marker choice; estimating genetic diversity and population structure; the inference of mating systems; and environmental genomics. Prerequisite(s): courses 20B and 20C and BIOL 20A and BIOL105. Concurrent enrollment in course 137 is required. Enrollment limited to 24. B. Shapiro

### **140. Behavioral Ecology. F**

An introduction to social and reproductive behavior. Emphasis on studies of vertebrates in their natural habitat. Ideas concerning the evolution of social behavior, mating systems, and individual reproductive strategies. Case histories of well-studied animals that illustrate key principles in courtship and mating, parental behavior, and food-getting behavior. Prerequisite(s): BIOL 20A,

BIOE 20B, and BIOE 20C. B. Sinervo

### **141L. Behavioral Ecology Field Course. \***

A field-based course introducing students to concepts and methods for studying behavioral ecology in nature. Students will conduct observations and field experiments on various local model organisms including elephant seals, hummingbirds, sparrows, lizards, ants, bees, frogs, and salamanders. Students are billed a materials fee. Prerequisite(s): BIOE 107 or BIOE 140 or BIOE 110; satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. Offered in alternate academic years. (General Education Code(s): W.) B. Sinervo, B. Lyon

### **145. Plant Ecology. F**

An exploration of the ecology of plant form, function, distribution, abundance, and diversity. Topics include plant adaptations to environmental conditions, life history variation, competition, reproductive ecology, herbivory, and patterns of diversity. Lecture with discussions of original papers and independent field project. Students cannot receive credit for this course and course 245. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. BIOE 107 is recommended. The Staff

### **145L. Field Methods in Plant Ecology. \***

Hands-on exploration of the concepts and techniques of plant ecology. A combination of lab, greenhouse, and field-based exercises (irrespective of weather conditions). Statistical analysis and scientific writing. One required weekend field trip. Students cannot receive credit for this course and course 245L. Students are billed a materials fee. Prerequisite(s):

satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 145 is required. BIOE 107 is recommended. (General Education Code(s): W.) I. Parker

### **147. Community Ecology. S**

Develops the major themes of community biology: structure, trophic dynamics, succession, complex interactions among species, herbivory, evolution and coevolution. Uses case histories of well-studied marine and terrestrial systems. Students cannot receive credit for this course and course 247. Prerequisite(s): BIOE 107, 108, 145, 155 or 159A; or Environmental Studies 24 by permission of instructor. The Staff

### **148. Quantitative Ecology. F**

Quantitative treatment of the central concepts and applications of theoretical ecology. Emphasis on the mathematical modeling of single populations and species interactions, and the integration of models with data. Topics include stochastic and deterministic processes of extinction; discrete- and continuous-time models of growth and population viability analysis relevant to small and harvested populations; numeric and analytical investigations of dynamics and stability; introduction to model-fitting in information theoretic framework using R and/or MATLAB. Prerequisite(s): BIOE 107. A. Kilpatrick, M. Tinker

### **149. Disease Ecology. \***

Focuses on the ecological and evolutionary processes that drive the transmission of pathogens between hosts; the impact of disease on host populations; and what causes the emergence of an infectious disease. Includes

## Biology: Ecology and Evolutionary Biology

theoretical framework, description of field techniques, and discussion of wildlife and human diseases including malaria, West Nile virus, Lyme disease, HIV, avian influenza (bird flu), Chikungunya, tuberculosis, chytridiomycosis, and Ebola. Prerequisite(s): BIOL 20A, and BIOE 20B and 20C and 107. A. Kilpatrick

**150. Ecological Field Methods. \*** Lectures and laboratory computer exercises designed to familiarize students with research methods, study design, statistical approaches, and analysis tools for ecological research. Students cannot receive credit for this course and Environmental Studies 104A. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; concurrent enrollment in BIOE 150L is required. BIOE 107, 108, 140, or 147 recommended. Enrollment limited to 25. D. Croll

**150L. Ecological Field Methods Laboratory. \*** Field-oriented course in the study of animal ecology and behavior. Combines overview of methodologies and approaches to field research with practical field studies. Students are billed a materials fee. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; concurrent enrollment in BIOE 150 is required. BIOE 107, 108, 140, or 147 recommended. Enrollment limited to 25. (General Education Code(s): W.) D. Croll

**151A. Ecology and Conservation in Practice Supercourse: Ecological Field Methods. S** An intensive, on-site learning experience in terrestrial field ecology and conservation, using the University of California Natural Reserves. Students study advance concepts in ecology, conservation, and field methods for four weeks,

then experience total immersion in field research at the UC Natural Reserves. Lectures, field experiments, and computer exercises familiarize students with research methods, study design, statistical approaches, and analytical tools for ecological research. Enrollment by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151B-C-D or ENVS 109B-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A. (Also offered as Environmental Studies 109A. Students cannot receive credit for both courses.) D. Croll, G. Dayton

**151B. Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory. S** Field-oriented course in ecological research. Combines overview of methodologies and approaches to field research with practical field studies. Students complete field projects in ecology and also learn the natural history of the flora and fauna of California. Students are billed a materials fee. Enrollment by application. Prerequisite(s): Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-C-D or ENVS 109A-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or

196A. (Also offered as Environmental Studies 109B. Students cannot receive credit for both courses.) (General Education Code(s): W.) D. Croll, G. Dayton

**151C. Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems. S** From lectures and discussion of terrestrial community and ecosystem ecology, students work individually or in small groups to present an idea for a project, review relevant literature, develop a research question/hypothesis, design and perform an experiment, collect and analyze data, and write a report. The instructor evaluates the feasibility of each student's project before it begins. Enrollment by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-D or ENVS 109A-B-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A. (Also offered as Environmental Studies 109C. Students cannot receive credit for both courses.) D. Croll, G. Dayton

**151D. Ecology and Conservation in Practice Supercourse: Conservation in Practice. S** Focuses on current issues in environmental and conservation biology and the emerging field methods used to address them. From field-oriented lectures about current issues in environmental and conservation biology, students pursue research project as individuals and small groups to develop hands-on experience with field skills in conservation research

## Biology: Ecology and Evolutionary Biology

and resource management.

Enrollment by application.

Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-C or ENVS 109A-B-C is required.

Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A. (Also offered as Environmental Studies 109D. Students cannot receive credit for both courses.) D. Croll, G. Dayton

### **155. Freshwater Ecology. F**

Provides an overview of the physical, chemical, and biological processes that characterize inland waters such as lakes, streams, rivers, and wetlands. Also addresses relationships between humans and freshwater, and discusses these challenges in conservation.

Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. E. Palkovacs

### **155L. Freshwater Ecology Laboratory. S**

Field and laboratory study of the ecology of freshwater systems including lakes, streams, and estuaries. Students gain experience sampling and identifying freshwater organisms, designing and analyzing ecological experiments, and writing scientific reports. Students are billed a materials fee.

Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C and BIOE 155.

Enrollment limited to 24. E. Palkovacs

### **158L. Marine Ecology Laboratory. S**

Supervised individual research projects in experimental marine biology. Students carry out a complete research project,

including (1) the formation of hypotheses; (2) the design and implementation of experiments; (3) collection, analysis, and interpretation of data; and (4) write-up of an oral presentation. Students are billed a materials fee.

Prerequisite(s): BIOE 108; satisfaction of the Entry Level Writing and Composition requirements. Offered in alternate academic years. (General Education Code(s): W.) P. Raimondi, K. Kroeker

### **159A. Marine Ecology Field Quarter: Marine Ecology with Laboratory. \***

Total immersion in marine ecology for very motivated students. Students develop a research project during first five weeks on campus and then spend five weeks of immersion in directed research without distraction in isolated locations off campus (past locations include the Gulf of California in Mexico and Moorea in French Polynesia). Not available through University Extension. No other courses may be taken during this quarter. Students must sign a contract agreeing to standards of behavior outlined in the UCSC Rule Book and by the instructors. Students are billed a materials, transportation (not airfare), and room and board fee. Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology and analysis and discussion of experiments with these paradigms. Students carry out a complete research project, including the formation of hypotheses; the design and implementation of experiments; the collection, analysis, and interpretation of data; and the write-up and oral presentation of results. Admission by interview during previous winter quarter.

Students are billed a materials, transportation (not airfare), and room and board fee. Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology and analysis and discussion of experiments with these paradigms. Students carry out a complete research project, including the formation of hypotheses; the design and implementation of experiments; the collection, analysis, and interpretation of data; and the write-up and oral presentation of results. Admission by interview during previous winter quarter.

BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOE 159A, 159B, 159C, and 159D must be taken concurrently. Enrollment limited to 26. Offered in alternate academic years. (General Education Code(s): W.) P. Raimondi, G. Bernardi

### **159B. Marine Ecology Field Quarter: Ichthyology with Laboratory. \***

An introduction to the biology of jawless, cartilaginous, and bony fishes—their classification, evolution, form, physiology, and ecology. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken concurrently. Enrollment limited to 26. Offered in alternate academic years. P. Raimondi, G. Bernardi

### **159C. Marine Ecology Field Quarter: Methods in Field Ecology. \***

Students learn quantitative methods for field experiments and surveys. Emphasis will be on marine environments, but there will also be exposure to terrestrial systems. This is the lecture component to course 159D. No text is required for this course; instead, readings from the current literature will be assigned. Students are evaluated on written independent field project proposals and class participation. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken

concurrently. Enrollment limited to 26. Offered in alternate academic years. P. Raimondi, G. Bernardi

**159D. Marine Ecology Field Quarter: Methods in Field Ecology Laboratory. \***

This is laboratory portion of course 159C. Students carry out independent field projects under the supervision of course instructors. All work is done during the 5–6 week off-campus portion of course 159. Students are evaluated on field techniques, the final write-up of their independent field projects, and class participation. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken concurrently. Enrollment limited to 26. Offered in alternate academic years. P. Raimondi, G. Bernardi

**161. Kelp Forest Ecology. F**

Study of organization of kelp forests as models for examining biological communities. The physical and biotic factors responsible for community organization of kelp forests are explored using original literature and data collected in BIOE 161L. Class meets one full morning each week. Prerequisite(s): by interview only; BIOL 20A, BIOE 20B, and BIOE 20C are required. Students must pass the University Research Diving Certification (contact the diving safety officer, Institute of Marine Sciences, for further information). Enrollment restricted to seniors. BIOE 161L must be taken concurrently; BIOE 107, 120/L, 122/L are recommended. Enrollment limited to 24. Offered in alternate academic years. M. Carr, P. Raimondi

**161L. Kelp Forest Ecology Laboratory. F**

Fieldwork using SCUBA to quantitatively and qualitatively examine the abundance and distribution of organisms in kelp forests, with additional laboratory work. Culminates with a directed individual research project. Class meets one full morning each week. Students are billed a materials fee. Admission by interview. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; satisfaction of the Entry Level Writing and Composition requirements; BIOE 161 must be taken concurrently; BIOE 107, 120/L, 122/L are recommended. Students must pass the University Research Diving Certification (contact the Diving Safety Officer, Institute of Marine Sciences, for further information). Enrollment limited to 24. Offered in alternate academic years. (General Education Code(s): W.) M. Carr, P. Raimondi

**163. Ecology of Reefs, Mangroves, and Seagrasses. \***

Integrated treatment of coral reefs, sea grasses, and mangroves emphasizing interactions and processes through time. Major topics: biological and geological history, biogeography, evolution and ecology of dominant organisms, biodiversity, community and ecosystem ecology, geology, biogeochemistry, global change, human impacts. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 163L is required. D. Potts

**163L. Ecology of Reefs, Mangroves, and Seagrasses Laboratory (2 credits). \***

An interdisciplinary laboratory exploration of the anatomy, morphology, adaptations, diversity, evolution, and ecology of corals, mangroves, and seagrasses and of

their physical, chemical, and geological environments. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 163 is required. D. Potts

**165. Marine Conservation Biology. F**

Initially undertakes an in-depth comparison of the biology and conservation of marine versus terrestrial ecosystems. With this foundation, course examines marine biodiversity loss resulting from overexploitation, habitat loss, species introduction, and pollution, with particular emphasis on the resulting trophic cascades, biodiversity losses, and climate change. Students cannot receive credit for this course and Environmental Studies 120. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; OCEA 101 recommended. The Staff

**172. Population Genetics. \***

Basic population genetics and selected topics will be covered, including genetics of speciation, tempo and mode of evolution, genetics of social behavior, natural selection in human populations, and the impact of molecular studies on evolutionary theory. Students cannot receive credit for this course and BIOE 272. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105. Concurrent enrollment in BIOE 172L is required. Offered in alternate academic years. G. Pogson

**172L. Population Genetics Laboratory (2 credits). \***

A companion course to 172, Population Genetics, that applies the theory developed in that course to related disciplines including conservation biology, ecology, agriculture, and population biology. Original scientific literature relating to the theory developed in BIOE 172

## Biology: Ecology and Evolutionary Biology

is read, and applied problem sets are solved by the students. Students cannot receive credit for this course and BIOE 272L. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105. Concurrent enrollment in BIOE 172 is required. Offered in alternate academic years. G. Pogson

### **182F. Exploring Research in EEB (2 credits). F,W,S**

Provides undergraduate students with exposure to research in the laboratory of an Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are not expected to do independent research but rather to assist in laboratory or field research projects under the supervision of the faculty mentor or appointed researcher. Prerequisite(s): Undergraduate research contract on file with the department. The Staff

### **183L. Undergraduate Research in EEB (3 credits). F,W,S**

Designed to ensure that students are intellectually engaged in the planning or implementation of a supervised or independent research project, achieve a fundamental understanding of implementing the scientific method, and develop their scientific writing and and presentation skills. Prerequisite(s): concurrent enrollment in course 183W and an Undergraduate Research Contract on file with the department. The Staff

### **183W. Undergraduate Research in EEB--Writing (2 credits). F,W,S**

Working in coordination with an Ecology and Evolutionary Biology (EEB) faculty member, affiliate or adjunct, students develop and write a formal research proposal or report and give a presentation on their research project. Includes weekly class meetings focused on the philosophy of science, basic

statistics, library searches, inputting data, creating graphs, and preparing results for publication, posters, and talks. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and course 107, 108, or 109; and an undergraduate research contract on file with the department. The Staff

### **188. Introduction to Science Writing. S**

A rigorous examination and practice of the skills involved in writing articles about science, health, technology, and the environment for the general public. Covers the essential elements of news writing and explanatory journalism, including developing a story idea, interviewing scientists, fact checking, composition, and editing of multiple drafts about scientific research. (Also offered as Science Communication 160. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and C1, C2 requirements. Enrollment restricted to junior and senior biological sciences majors. Enrollment limited to 18. (General Education Code(s): W.) R. Irion

### **193. Independent Research in EEB. F,W,S**

Continued undergraduate research on a project sponsored by an Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are graded on the quality of their research and meeting the terms of their undergraduate research contract. Prerequisites: course 183W and an undergraduate research contract on file with the department. May be repeated for credit. The Staff

### **193F. Independent Research in EEB (2 credits). F,W,S**

Continued undergraduate research on a project sponsored by an

Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are graded on the quality of their research and meeting the terms of their undergraduate research contract. Prerequisites: course 183W and an undergraduate research contract on file with the department. May be repeated for credit. The Staff

### **195. Senior Thesis. F,W,S**

An individually supervised course, with emphasis on independent research. Students required to submit a senior thesis. Enrollment restricted to majors in biology, ecology and evolution, marine biology, plant sciences, and the combined major with environmental studies. Students submit petition to sponsoring agency. The Staff

### **198. Independent Field Study. F,W,S**

Provides for individual programs of study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. With permission of the department, may be repeated for credit, or two or three courses taken concurrently. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Independent Field Study (2 credits). F,W,S**

Provides for two units of independent field study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199. Tutorial. F,W,S**

Reading, discussion, written reports, and laboratory research on

## Biology: Ecology and Evolutionary Biology

selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Two-unit Tutorial. Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## GRADUATE COURSES

---

### **200A. Scientific Skills. F**

Exposes graduate students to teaching skills, understanding the scientific method, searching and organizing literature, grant proposal and scientific writing, data management and presentation, and scientific speaking. Students are evaluated on their participation and the quality of a written research proposal. Enrollment restricted to graduate students. M. Carr

### **200B. Advanced Organismal Biology. F**

Consists of lectures focusing on pivotal topics in ecology and evolution. Relevant background material is developed followed by a critical analysis of readings from the primary literature. Designed to give graduate (and advanced undergraduate) students direct contact with the major areas of research that are currently at the forefront of organismal biology. Enrollment restricted to graduate students. B. Lyon, J. Estes, D. Costa

### **208. Marine Ecology. W**

Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology; analysis and discussion of experiments with these paradigms. Students cannot

receive credit for this course and course 108. Enrollment restricted to graduate students. P. Raimondi, K. Kroeker

### **245. Plant Ecology. F**

An exploration of the ecology of plant form, function, distribution, abundance, and diversity. Topics include plant adaptations to environmental conditions, life history variation, competition, reproductive ecology, herbivory, and patterns of diversity. Lecture with discussions of original papers and independent field project. Students cannot receive credit for this course and course 145. Prerequisite(s): BIOE 107 or ENVS 24 or permission of instructor. Concurrent enrollment in BIOE 245L is required except by permission of instructor. Enrollment restricted to graduate students. The Staff

### **245L. Field Methods in Plant Ecology Laboratory. F**

Hands-on exploration of the concepts and techniques of plant ecology. A combination of lab, greenhouse, and field-based exercises (irrespective of weather conditions), statistical analysis, and scientific writing. One required weekend field trip. Students cannot receive credit for this course and course 145L. Concurrent enrollment in BIOE 245 is required. Enrollment restricted to graduate students. Enrollment limited to 2. The Staff

### **247. Community Ecology. S**

Develops the major themes of community ecology: structure, trophic dynamics, succession, complex interactions among species, herbivory, evolution, and coevolution. Uses case histories of well-studied marine and terrestrial systems. Students cannot receive credit for this course and course

147. Enrollment restricted to graduate students. The Staff

### **258L. Experimental Marine Ecology. \***

Supervised individual research projects in experimental marine biology. Students carry out a complete research project, including (1) the formation of hypotheses, (2) the design and implementation of experiments, (3) collection, analysis, and interpretation of data, and (4) the write-up of an oral presentation. Prerequisite(s): BIOE 208; and interview to assess ability to carry out field project. Enrollment limited to 20. Offered in alternate academic years. P. Raimondi, K. Kroeker

### **272. Population Genetics. F**

Basic population genetics and selected topics are covered including genetics of speciation, tempo and mode of evolution, genetics of social behavior, natural selection in human populations, and the impact of molecular studies on evolutionary theory. Students cannot receive credit for this course and Biology 172. Concurrent enrollment in BIOE 272L is required. Enrollment restricted to graduate students. Offered in alternate academic years. G. Pogson

### **272L. Population Genetics Laboratory (2 credits). F**

A companion course to 272, Population Genetics, that applies the theory developed in that course to related disciplines including conservation biology, ecology, agriculture, and population biology. Original scientific literature relating to the theory developed in course 272 is read, and applied problem sets are solved by the students. Students cannot receive credit for this course and course 172L. Must be taken concurrently with BIOE 272. Enrollment restricted to

graduate students. Offered in alternate academic years. G. Pogson

**274. Evolutionary Game Theory.**

**W**

Reviews static equilibrium concepts, games of incomplete information, and the traditional theory of dynamic games in discrete time. Develops recent evolutionary game models, including replicator and best reply dynamics, and applications to economics, computer science, and biology. Prerequisite(s): upper-division math courses in probability theory are strongly recommended. Cannot receive credit for this course and Economics 166B or Computer Science 166B. (Also offered as Computer Science 272. Students cannot receive credit for both courses.) B. Sinervo, The Staff

**279. Evolutionary Ecology. W**

Analysis of the ways in which ongoing evolution and coevolution shape the ecological structure and dynamics of populations, species, and species interactions across geographic landscapes. Enrollment restricted to graduate students. The Staff

**281A. Topics in Basic and Applied Marine Ecology. F,W,S**

Seminar focusing on concepts in basic and applied ecology. Structure rotates quarterly between graduate student research and readings of journal articles and textbooks. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. M. Carr

**281B. Topics in Molecular Evolution (2 credits). F,W,S**

A discussion of current research and literature review on the subject of molecular evolution. Primary focus on recent results on molecular phylogenetics and molecular

population genetics. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. G. Bernardi

**281C. Topics in Physiological Ecology. F,W,S**

An intensive seminar focusing on the interaction between physiological constraint and life history options and solutions employed by animals. Topics vary from comparative physiology to ecological theory. Participants are required to present results of their own research or review papers of interest. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. D. Costa

**281E. Topics in Freshwater Ecology. F,W,S**

Current topics in freshwater ecology, eco-evolutionary dynamics, fisheries, and fish ecology. Enrollment restricted to graduate students. Qualified undergraduates may enroll with permission from instructor. Enrollment limited to 18. May be repeated for credit. E. Palkovacs

**281F. Ecological Research Topics. F,W,S**

Intensive research and discussions on plant-animal interactions. All students undertake a research project and meet weekly with the faculty sponsor to monitor progress. The group meets weekly to discuss experimental design and analysis, specific problems related to the students' research, relevant research papers, or manuscripts that the group members are writing. Each student gives a formal presentation of research plans or progress each quarter. Enrollment restricted to graduate students;

qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. L. Fox

**281H. Topics in Comparative Marine Physiology. F,W,S**

Intensive seminar on selected topics in marine physiology. Students present results from their own research and discuss recent advances from the literature. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. R. Mehta

**281I. Topics in Disease Ecology, Population Biology, and Conservation. F,W,S**

Selected topics in population biology and disease ecology. Students present results from their own research and discuss recent advances from the literature. (Formerly "Topics in Plant Population and Disease Ecology") Enrollment restricted to graduate students; qualified undergraduates may enroll by permission of instructor. Enrollment limited to 18. May be repeated for credit. A. Kilpatrick

**281J. Topics in Research on Biochemical Ecology. \***

Seminar in which students give critically evaluated presentations regarding current research on selected topics in plant ecology with an emphasis on biochemical ecology. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 12. May be repeated for credit. J. Langenheim

**281K. Topics in Plant Evolution. F,W,S**

Intensive seminar on selected topics in plant evolution. Students

present results from their own research and discuss recent advances from the literature. Enrollment restricted to graduate students; qualified undergraduates may enroll by permission of instructor. Enrollment limited to 18. May be repeated for credit. K. Kay

**281L. Topics in Behavioral and Evolutionary Ecology. F,W,S**

An intensive seminar on selected topics in behavioral and evolutionary ecology. Students are expected to discuss the current literature and present literature reviews, research proposals, and preliminary results from their ongoing research. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. B. Lyon

**281N. Topics in Marine Vertebrate Ecology. F,W,S**

Seminar on the ecology of marine vertebrates. Topics vary from the factors that explain the distribution of marine predators to island biogeography and the ecosystem effects of introduced vertebrates on islands. Enrollment restricted to graduate students. Enrollment limited to 12. May be repeated for credit. D. Croll

**281O. Topics in Plant-Water Relations. F,W,S**

Intensive seminar focusing on fundamental and evolutionary concepts in plant-water relations. Students present results from their own research and discuss recent advances from the literature. Enrollment restricted to graduate students; qualified undergraduates may enroll by permission of instructor. Enrollment limited to 18. May be repeated for credit. J. Pittermann

**281P. Topics in Plant Population Ecology. F,W,S**

An intensive seminar on selected topics in plant ecology and population biology. Students present results from their own research and discuss recent advances from the literature. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission from instructor. Enrollment limited to 12. May be repeated for credit. I. Parker

**281Q. Topics in Molecular Evolutionary Genetics. F,W,S**

An intensive seminar on selected topics in molecular evolutionary genetics. Students are required to present results from their own research projects, present a critical review paper at least once during the quarter, and submit a written research proposal. Enrollment restricted to graduate students; qualified undergraduate students may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. G. Pogson

**281R. Topics in Marine Ecology and Evolutionary Biology. F,W,S**

An intensive seminar series focusing on fundamental concepts in marine ecology. Emphasis changes quarter to quarter. At least one quarter per year is devoted to discussion of graduate student research. Other quarters involve reading and evaluating current and classic literature on marine ecology and evolutionary biology. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. P. Raimondi

**281S. Topics in Ancient DNA and Paleogenomics. F,W,S**

Topics in population genetics and genomics, focusing on work

involving paleontological and archaeological material. Students present weekly written and oral reports of their research projects. Once each term, students critique a recent publication. Enrollment restricted to graduate students. Qualified undergraduates may enroll with permission from instructor. May be repeated for credit. B. Shapiro

**281T. Species Interactions and Coevolution. F,W,S**

The genetics and ecological structure of species interactions, and the role of coevolution between species in shaping biodiversity. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. J. Thompson

**281U. Topics in Invertebrate Biology. F,W,S**

An intensive study about concepts, theory, and techniques for graduate students conducting research on the ecology, genetics, evolution, systematics, or biodiversity of marine invertebrates. Enrollment restricted to graduate students; advanced undergraduates may enroll with permission of instructor. Enrollment limited to 15. May be repeated for credit. D. Potts

**281V. Topics in Behavioral Ecology. F,W,S**

A discussion of current topics and methods in behavioral ecology and life history evolution. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. B. Sinervo

**281W. Topics in Exercise and Environmental Physiology. F,W,S**

A weekly seminar discussion on current research and techniques in mammalian exercise and

## Biology: Ecology and Evolutionary Biology

environmental physiology. Areas covered include locomotor physiology, exercise testing and cardiovascular monitoring, and biomechanics. Oral presentation of ongoing research or current literature required from each student. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. T. Williams

### **286. Experimental Design and Data Analysis. W**

Focuses on problems and designs in ecology and population biology. Topics include basic experimental design; exploratory data analysis—from a graphical perspective; hands-on statistics; and graphical theory. Structured around a statistical analysis and graphics computer program to teach students to design their own surveys and experiments and analyze their data correctly. Students cannot receive credit for this course and course 186. Prerequisite(s): one course in statistics or by permission of instructor. Enrollment restricted to

graduate students. P. Raimondi

### **286L. Experimental Design and Data Analysis Lab (2 credits). W**

Required lab that accompanies Biology 286. Lab will focus on hands-on statistical problem solving, graphical presentations and experimental design issues. Concurrent enrollment in course 286 is required. Enrollment restricted to graduate students. P. Raimondi

### **293. Readings in Ecology and Evolution (2 credits). W,S**

Weekly readings and discussions of recent research papers in ecology, evolution, and related topics from organismal biology. Enrollment restricted to graduate students. May be repeated for credit. A. Kilpatrick, L. Fox

### **294. Ecology, Evolutionary Biology Seminar (no credit). F,W,S**

Selected topics of current interest to ecologists and evolutionary biologists presented by weekly guest speakers. Enrollment restricted to graduate students. T.

Williams, B. Shapiro, D. Croll

### **295. Advanced Ecology and Evolutionary Biology Seminar (no credit). F,W,S**

Course consists of extended weekly meetings organized around an advanced theme in theoretical or applied evolutionary biology, ecology, physiology, behavior, or other aspect of organismal biology. Course is targeted at students who already have reached a professional level of expertise in their field and advanced master students. Enrollment restricted to graduate students. Enrollment limited to 24. The Staff

### **297. Independent Study. F,W,S**

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency. The Staff

### **299. Thesis Research. F,W,S**

Students submit petition to sponsoring agency. The Staff

## PROGRAM DESCRIPTION

---

### UNDERGRADUATE PROGRAM DESCRIPTION

---

This is an extraordinary time to be involved in biomedical research. New technologies are rapidly changing our understanding of the molecular and cellular basis of life, with dramatic implications for how we treat human disease. Members of the Department of Molecular, Cell and Developmental Biology, along with affiliated faculty in the departments of Biomolecular Engineering, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, and Physics, are participating in an extraordinary revolution in biomedical science. A broad spectrum of cutting-edge research tools are being employed to tackle problems in key areas that include: the structural and functional role of RNA in regulation of gene expression; chromatin biology and epigenetic control of genes; the cell biology of the cytoskeleton and the cell cycle; decisions controlling embryogenesis and organ development; and developmental neurobiology. The insights generated by this basic research enable new strategies for treatments of aging disorders, birth defects, neurological diseases, cancer and other human ailments. The department offers a spectrum of courses that reflect the exciting new developments and directions in these fields, and trains students to participate in these exciting fields.

Students may plan a program that leads to one of several bachelor of science (B.S.) degrees. Students may choose from the following major options:

Human biology B.S.

Molecular, cell, and developmental biology B.S.

Neuroscience B.S.

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental

laboratory facilities for independent research. Many students take advantage of the numerous opportunities with local physicians, health care providers and biotech companies to gain experience in a real world setting. This array of opportunities for directed independent study enables biological science majors to enhance their upper-division programs to reflect and strengthen their own interests and goals.

### PREREQUISITES

---

Due to the demanding nature of the majors, students must begin their science coursework as early as possible. CHEM 1A, 1B and 1C, and BIOL 20A and BIOE 20B must be taken during the first and second years in order for students to qualify for admission to MCD biology-sponsored majors (see below). Students are strongly encouraged to take AMS 5 or AMS 7/L and begin, if not complete, other requirements including math, calculus, and statistics.

An online Mathematics Placement Examination is offered at various periods prior to enrollment for each quarter. Biological science majors are expected to take this examination. For more information see the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu>.

Students intending to major in human biology should take the Spanish placement examination, offered by the language program, to determine with which course they should begin the Spanish sequence. They should also complete the laboratory course 20L.

### MAJOR REQUIREMENTS QUALIFICATIONS POLICY

---

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the molecular, cell and developmental biology B.S. and neuroscience B.S. majors.

## Biology: Molecular, Cell, and Developmental Biology

To qualify for any of the majors, students must pass (with a grade of C or better) the following courses or their equivalents:

- Chemistry and Biochemistry 1A, General Chemistry;
- Chemistry and Biochemistry 1B, General Chemistry;
- Chemistry and Biochemistry 1C, General Chemistry;
- Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A, Cell and Molecular Biology;
- Biology: Ecology and Evolutionary Biology (BIOE) 20B, Development and Physiology.

Students who want to declare the human biology B.S. are strongly encouraged to complete BIOL 20L prior to declaring.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see [Letter Grade Policy](#).
- Students with AP credit for Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A and Biology: Ecology and Evolutionary Biology (BIOE) 20B, need only pass Chemistry and Biochemistry 1B and 1C.
- Students with non-grades (I, IP, etc.) in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e., before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the human biology B.S. major. To qualify for the human biology major, students must pass the following courses or their equivalents (with a grade of C+ or better):

- Chemistry and Biochemistry 1A, General Chemistry
- Chemistry and Biochemistry 1B, General Chemistry
- Chemistry and Biochemistry 1C, General Chemistry
- Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A, Cell and Molecular Biology

- Biology: Ecology and Evolutionary Biology (BIOE) 20B, Development and Physiology

All qualification courses must be completed by the campus major declaration deadline.

Students who want to declare the human biology B.S. are strongly encouraged to complete BIOL 20L prior to declaring.

Students with two or more grades of NP, D, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.
- Students with AP credit for Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A and Biology: Ecology and Evolutionary Biology (BIOE) 20B, need only pass Chemistry and Biochemistry 1B and 1C.
- Students with non-grades (I, IP, DG, etc.) in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e. before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Molecular Cell and Developmental Biology Faculty Adviser within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision. For more information about the appeal process see the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/mcdb/qualifying/appeal-process.html>.

## TRANSFER STUDENTS

---

Applications from transfer students in the biological sciences are encouraged. Prior to transfer, students must satisfy major qualification requirements: CHEM 1A, General Chemistry; CHEM 1B, General Chemistry;

## Biology: Molecular, Cell, and Developmental Biology

CHEM 1C, General Chemistry; BIOL 20A, Cell and Molecular Biology; BIOE 20B, Development and Physiology. Junior-level transfer students are also strongly encouraged to complete courses equivalent to MATH 11A, MATH 11B, and AMS 5 or AMS 7L prior to transfer. Intended human biology majors are strongly encouraged to learn Spanish to proficiency prior to transfer. Prospective transfer students should review the transfer information at <http://undergrad.pbsci.ucsc.edu/mcdb/transfer-students/index.html>.

### DOUBLE MAJOR IN THE BIOLOGICAL SCIENCES

---

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of biology (B.A., B.S., bioeducation concentration, or minor), molecular, cell and developmental biology, neuroscience, and biochemistry and molecular biology.

### HUMAN BIOLOGY MAJOR

---

The B.S. major in human biology is designed for students interested in careers in medicine or biomedical research. Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply. Students are required to take introductory biology and laboratory (BIOL 20L), genetics, biochemistry, cell biology, human physiology with laboratory and one additional course directly relevant to human health. Students in this program must also fulfill Spanish-language and health-care internship requirements.

### PROGRAM LEARNING OUTCOMES

---

Students who successfully complete the human biology major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues;
- Recognize that biology has a basis in chemistry, physics, and mathematics;
- Describe how scientific method is used to explain natural phenomena;
- Use effective oral and written language skills to communicate scientific data and ideas;
- Understand safe laboratory practices, perform basic molecular biology techniques, generate hypotheses and evaluate data;
- Achieve fluency in Spanish and an understanding of how cultural differences can affect health care delivery;

- Refine a career-related and/or postgraduate goal through internship experience; and
- Present advanced knowledge in the specialized field of human physiology.

### HUMAN BIOLOGY B.S. MAJOR REQUIREMENTS\*

#### Introductory Requirements

---

Introductory Biology: BIOL 20A, BIOE 20B, and BIOL 20L

General Chemistry: Chemistry 1A, 1B/M and 1C/N

Organic Chemistry: Chemistry 108A/L and 108B/M

(**Note:** 109 is also recommended for pre-med students)

Calculus: Mathematics 11A-B or 19A-B

Statistics: Applied Mathematics and Statistics 5 or 7/L

Physics: Physics 6A/L, and 6C/N (**Note:** some medical schools require one full year of Physics/Labpratory)

#### Advanced Requirements

---

Five core courses:

Biochemistry: BIOL 100 or BIOC 100A, 100B, 100C

Molecular Biology: BIOL 101

Genetics: BIOL 105

Cell Biology: BIOL 110

Human Physiology with Laboratory: BIOL 130/L

One of the following electives:

BIOL 111A, Immunology I

BIOL 111B, Immunology II

BIOL 113, Mammalian Endocrinology

BIOL 114, Cancer Cell Biology

BIOL 115, Eukaryotic Molecular Biology

BIOL 117, Neglected Tropical Diseases (3 credits)

BIOL 120, Development

BIOL 125, Neuroscience

BIOL 126, Advanced Neural Development

BIOL 127, Neurodegenerative Disease

BIOL 140, Biophysics

BIOL 178, Stem Cell Biology

Biomolecular Engineering 155, Biotechnology and Drug Development

Biomolecular Engineering 130, Genomes

Microbiology and Environmental Toxicology 119,

Microbiology

Microbiology and Environmental Toxicology, 135/L,

Anatomy of the Human Body/Laboratory

Internship Requirement: BIOL 189 and 189W, Health Sciences Internship. The student must participate in a community health-care service activity approved by the health sciences internship coordinator. Credit may be earned over multiple quarters.

Language Requirement: Spanish 1–4 or the equivalent and one quarter of Spanish for health-care workers (Spanish 5M).

## Biology: Molecular, Cell, and Developmental Biology

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in human biology is satisfied by completing courses BIOL 130L, Human Physiology Laboratory, and BIOL 189, Health Sciences Internship and BIOL 189W, Disciplinary Communication: Human Biology.

### HUMAN BIOLOGY B.S. SAMPLE PLANNERS

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/mcdb/hbiobs/hbiobs-frosh-plans.html>

For transfer students:

[\[Return to top\]](#)

### MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY MAJOR

---

The molecular, cell, and developmental (MCD) biology major is designed for students interested in medical or other professional graduate programs and those preparing for careers in biotechnology industries. This major is more structured than the general biology major and requires that students pay careful attention to the prerequisites required for upper-division biology courses.

### PROGRAM LEARNING OUTCOMES

---

Students who successfully complete the MCD major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues;
- Recognize that biology has a basis in chemistry, physics, and mathematics;
- Describe how scientific method is used to explain natural phenomena;
- Use effective oral and written language skills to communicate scientific data and ideas;
- Understand safe laboratory practices and perform basic molecular biology techniques;
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem; and
- Present advanced knowledge in the specialized fields of molecular and cell biology.

### MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY B.S. MAJOR REQUIREMENTS

---

#### Introductory Requirements

---

Introductory Biology: BIOL 20A, BIOE 20B, and 20C

General Chemistry: Chemistry 1A, 1B and 1C/N

Organic Chemistry: Chemistry 108A/L and 108B

Calculus: Mathematics 11A-B or 19A-B

Biostatistics: Applied Mathematics and Statistics 5 or 7/L

Physics: Physics 6A/L and 6B or 6C

#### Advanced Requirements

---

Five core courses:

Biochemistry\*: BIOL 100; or the series Advanced Biochemistry and Molecular Biology 100A, 100B, 100C. (Upon completion of the series, Biochemistry and Molecular Biology 100C may be used to satisfy one lecture elective.)

Molecular Biology\*: BIOL 101

\*Instead of Biochemistry (BIOL 100) and Molecular Biology (BIOL 101), students may complete the series in Biochemistry and Molecular Biology 100A, 100B, 100C. (Upon completion of the series, Biochemistry and Molecular Biology 100C may be used to satisfy one lecture elective.)

Molecular Biology Laboratory: BIOL 101L

Genetics: BIOL 105

Cell Biology: BIOL 110

Three of the following electives:

(Only one of which may be a 3-credit course: BIOL 116 or BIOL 117)

Biochemistry and Molecular Biology 100C, Advanced Biochemistry

BIOL 111A, Immunology

BIOL 111B, Immunology II

BIOL 113, Mammalian Endocrinology

BIOL 114, Cancer Cell Biology

BIOL 115, Eukaryotic Molecular Biology

BIOL 116, Advanced Topics in Cell Biology (3 credits)

BIOL 117, Neglected Tropical Diseases (3 credits)

BIOL 118, Biology of Disease

BIOL 120, Development

BIOL 125, Neuroscience

BIOL 126, Advanced Neural Development

BIOL 127, Neurodegenerative Disease

BIOL 130/L, Human Physiology/Laboratory

BIOL 178L, Protocols in Stem Cell Biology

BIOE 109, Evolution

BIOE 135/L, Plant Physiology/Laboratory

Biomolecular Engineering 110, Computational Biology Tools

Biomolecular Engineering 130, Genomes

## Biology: Molecular, Cell, and Developmental Biology

Biomolecular Engineering 155, Biotechnology and Drug Development

Biomolecular Engineering 160/L, Research Programming for Biologists and Biochemists/Laboratory

Biomolecular Engineering 178, Stem Cell Biology Microbiology and Environmental Toxicology 119, Microbiology

Physics 180, Biophysics

One of the following laboratory courses:

BIOL 100L, Biochemistry Laboratory

BIOL 105L, Eukaryotic Genetics Laboratory

BIOL 105M, Microbial Genetics Laboratory

BIOL 109L Yeast Genetics Laboratory

BIOL 110L, Cell Biology Laboratory

BIOL 115L, Eukaryotic Molecular Biology Laboratory

BIOL 120L, Development Laboratory

BIOL 121L, Environmental Phage Biology Laboratory

BIOL 186L, Undergraduate Research in MCD

Biochemistry and Molecular Biology 110L, Advanced Biochemistry Laboratory

Microbiology and Environmental Toxicology 119L, Microbiology Laboratory

### Disciplinary Communication (DC) Requirement

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in molecular, cell, and developmental biology is satisfied by completing one of the following courses: Biochemistry and Molecular Biology 110L; BIOL 100L, 105L, 105M, 109L, 110L, 115L, 120L, 121L, 186L, 187L; or Microbiology and Environmental Toxicology 119L.

### Molecular, Cell, and Developmental Biology B.S. Sample Planners

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/mcdb/mcdbbs/mcdbbs-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/mcdb/mcdbbs/mcdbbs-transfer-plans.html>

### NEUROSCIENCE MAJOR

---

Neuroscience, the study of the nervous system and behavior of animals, is a frontier area in biology, touching psychology on the one hand and computer science on the other. The neuroscience major provides students with rigorous preparation for graduate studies and research in the field of neuroscience. Rigorous course work is supplemented by opportunities for hands-on research.

### Program Learning Outcomes

---

Students who successfully complete the Neuroscience major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues.
- Recognize that biology has a basis in chemistry, physics, and mathematics.
- Describe how scientific method is used to explain natural phenomena.
- Use effective oral and written language skills to communicate scientific data and ideas.
- Understand safe laboratory practices and perform basic molecular biology techniques.
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.
- Present advanced knowledge in the specialized field of neuroscience.

### NEUROSCIENCE B.S. MAJOR REQUIREMENTS

#### Introductory Requirements

---

Introductory Biology: BIOL 20A, BIOE 20B and 20C

General Chemistry: Chemistry 1A, 1B and 1C/N

Organic Chemistry: Chemistry 108A/L and 108B

Calculus: Mathematics 11A-B

Biostatistics: Applied Mathematics and Statistics 5 or 7/L

Physics: Physics 6A/L and 6C

#### Advanced Requirements

---

Seven core courses:

Biochemistry: BIOL 100

Molecular Biology: BIOL 101

Molecular Biology Laboratory: BIOL 101L

Genetics: BIOL 105

Cell Biology: BIOL 110

Neuroscience: BIOL 125

Advanced Neuroscience: BIOL 126

Two of the following electives (only one of which may be a 3-credit course: BIOL 116 or BIOL 117):

BIOE 131/L, Animal Physiology/Laboratory

BIOE 140, Behavioral Ecology

BIOL 111A, Immunology I

BIOL 111B, Immunology II

BIOL 113, Mammalian Endocrinology

BIOL 114, Cancer Cell Biology

BIOL 115, Eukaryotic Molecular Biology

BIOL 116, Advanced Topics in Cell Biology (3 credits)

BIOL 117, Neglected Tropical Diseases (3 credits)

BIOL 118, Biology of Disease

## Biology: Molecular, Cell, and Developmental Biology

BIOL 120, Development  
BIOL 127, Neurodegenerative Disease  
BIOL 130/L, Human Physiology/Laboratory  
BIOL 178L, Protocols in Stem Cell Laboratory  
Biomolecular Engineering 110, Computational Biology Tools  
Biomolecular Engineering 130, Genomes  
Biomolecular Engineering 155, Biotechnology and Drug Development  
Biomolecular Engineering 160/L, Research Programming for Biologists and Biochemists/Laboratory  
Biomolecular Engineering 178, Stem Cell Biology  
Physics 180, Biophysics  
Psychology 121, Perception  
Psychology 123, Behavioral Neuroscience

One of the following laboratory electives:

BIOE 141L, Behavioral Ecology Field Course  
BIOL 100L, Biochemistry Laboratory  
BIOL 105L, Eukaryotic Genetics Laboratory  
BIOL 109L Yeast Genetics Laboratory  
BIOL 110L, Cell Biology Laboratory  
BIOL 115L, Eukaryotic Molecular Genetics Laboratory  
BIOL 120L, Development Laboratory  
BIOL 121L, Environmental Phage Biology Laboratory  
BIOL 186L, Undergraduate Research in MCD  
BIOL 187L, Molecular Biotechnology Laboratory

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in neuroscience is satisfied by completing one of the following: BIOE 141L, BIOL 100L, 105L, 109L, 110L, 115L, 120L, 121L, 186L, 187L.

### NEUROSCIENCE B.S. SAMPLE PLANNERS

---

For freshmen:

<http://undergrad.pbsci.ucsc.edu/mcdb/nbiobs/nbiobs-frosh-plans.html>

For transfer students:

<http://undergrad.pbsci.ucsc.edu/mcdb/nbiobs/nbiobs-transfer-plans.html>

[\[Return to top\]](#)

### COMPREHENSIVE REQUIREMENT

---

All majors require a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- by passing course 190, Senior Seminar;
- by receiving a passing grade in an internship, independent research laboratory, or field course:

BIOE 114L, Field Methods in Herpetological Research  
BIOE 141L, Behavioral Ecology Field Course  
BIOE 145L, Field Methods in Plant Ecology  
BIOE 150L, Ecological Field Methods  
BIOE 151, Ecology and Conservation in Practice  
BIOE 155L, Freshwater Ecology Laboratory  
BIOE 158L, Marine Ecology Laboratory  
BIOE 159, Marine Ecology Field Quarter  
BIOE 161L, Kelp Forest Ecology Laboratory  
BIOE 183, Undergraduate Research in EEB  
BIOL 100L, Biochemistry Laboratory  
BIOL 105L, Eukaryotic Genetics Laboratory  
BIOL 105M, Microbial Genetics Laboratory  
BIOL 109L Yeast Genetics Laboratory  
BIOL 110L, Cell Biology Laboratory  
BIOL 111L, Immunology Laboratory  
BIOL 115L, Eukaryotic Molecular Biology Laboratory  
BIOL 120L, Developmental Biology Laboratory  
BIOL 121L, Environmental Phage Biology Laboratory  
BIOL 178L, Protocols in Stem Cell Biology  
BIOL 186L, Undergraduate Research in MCD Biology  
BIOL 186R, Undergraduate Research in MCD Biology  
BIOL 187L, Molecular Biotechnology Laboratory  
BIOL 189, Health Sciences Internship  
Biochemistry and Molecular Biology 110L, Advanced Biochemistry Laboratory  
Microbiology and Environmental Toxicology 119L, Microbiology Laboratory

- by completing a senior thesis;
- by achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the biological sciences adviser before the last day of the graduating quarter;
- by obtaining an medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the biological sciences adviser before the last day of the graduating quarter.

### Honors

---

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

### Letter Grade Policy

---

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the majors must be taken for a letter grade.

---

## MEDICAL AND PROFESSIONAL SCHOOL ADMISSION

---

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

## COURSE SUBSTITUTION/TRANSFER CREDIT POLICY

---

At least half of the upper-division courses (numbered 100–190) required for each major must be taken through the biological sciences program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact the Physical and Biological Sciences Undergraduate Affairs office before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the [undergraduate web site](#).

Students who wish to receive credit toward the major for different courses taken either at UCSC or at another institution should contact the Physical and Biological Sciences Undergraduate Affairs office.

---

## EDUCATION ABROAD OPPORTUNITIES

---

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCDB Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UCSC from the biological sciences undergraduate adviser and/or faculty adviser and receive their approval for your plans.

---

## ACADEMIC ADVISING

---

Academic advising is available at the Physical and Biological Sciences Undergraduate Affairs office. Students should take full advantage of this opportunity and should keep in frequent touch with the office to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. For additional advice and information please see the [undergraduate web site](#).

---

## GRADUATE PROGRAM DESCRIPTION

---

The program in molecular, cell, and developmental (MCD) biology (courses BIOL) leads to either the doctor of philosophy (Ph.D.) or the master of arts (M.A.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, signaling, cell division, development, nerve cell function, and stem cell biology.

---

### PH.D. PROGRAM

---

Ph.D. students complete the graduate core courses, BIOL 200A, 200B, and 200C, and 200D in the first year. Students are required to participate in laboratory research meetings and departmental seminar series (BIOL 291/292) every quarter. First-year Ph.D. students complete three six-week laboratory rotations. Students choose their rotation laboratories in consultation with the Graduate Advisory Committee. The laboratory rotations give students a chance to learn about the diverse fields and methods of inquiry and to interact with members of the department. At the end of each rotation, students present a short talk or present a poster to the department on their rotation project. At the end of winter quarter, students consult with rotation faculty to identify a permanent thesis laboratory.

Second-year Ph.D. students are required to submit two proposals—one on their proposed thesis work and a second on an unrelated MCDB research topic. The Ph.D. qualifying examination, taken in spring quarter of the second year, is an oral examination on the two proposals. The examining committee is comprised of three internal reviewers and one external reviewer.

Once the qualifying examination is passed and prior to her/his department seminar, a student, with her/his faculty adviser, selects a thesis committee to help guide the student's thesis research. This committee monitors the student's progress and ultimately approves the final draft of the student's dissertation. The student must meet with the thesis committee at least once a year after passing the qualifying examination.

A student is advanced to candidacy following presentation of her/his research to the department in a seminar. A passing evaluation requires demonstration of a good understanding of their project and background knowledge, and a clear presentation of their questions or hypotheses, tests of those, and progress to date.

This presentation takes place no later than spring of the third year. Ph.D. students must take two approved

## Biology: Molecular, Cell, and Developmental Biology

advanced graduate electives, in addition to the core courses.

### PH.D. REQUIREMENTS

---

Complete the graduate core courses:

- BIOL 200A, Critical Analysis of Scientific Literature
- BIOL 200B, Advanced Molecular Biology
- BIOL 200C, Advanced Cell Biology
- BIOL 200D, Advanced Developmental Biology

Complete BIOL 289, Practice of Science

Enroll in the seminar series each quarter, Biology 291 and 292

Complete an oral qualifying examination

Present an advancement to candidacy seminar

Complete two advanced, graduate elective courses (see list below)

Meet yearly with a thesis committee after the qualifying examination

Complete two quarters of service as a teaching assistant

Complete thesis research resulting in peer-reviewed publications and a dissertation on original and significant work

Present the thesis defense in a departmental seminar

### M.A. PROGRAM

---

Students apply to the master's degree program through the same portal as for the Ph.D. degree program. While the M.A. is research intensive, master's students do not do research rotations; they must identify a research adviser at the outset of the training period. Students are required to participate in laboratory research meetings and departmental seminar series every quarter.

#### M.A. Requirements

---

Complete the graduate core course:

BIOL 200A, Critical Analysis of Scientific Literature (to be completed in the first year)

Complete BIOL 289, Practice of Science

Enroll in the seminar series each quarter, Biology 291 and 292

Complete two (2) approved advanced electives (list below). The two electives may be completed in either the first or second year

Write a master's thesis based on original research. (A scholarly dissertation of the literature and progress on research project. A peer-reviewed publication is not required for graduation.)

Present a thesis defense in a departmental seminar. The student will present their research project in a public venue such as a departmental seminar or one of the

research clubs (RNA club, chromatin club, neuro club etc.).

Approved Graduate Electives (Ph.D. and M.A. students complete two)

---

BIOL 200B, Advanced Molecular Biology or,

BIOL 200C, Advanced Cell Biology or,

BIOL 200D, Advanced Developmental

BIOL 201, RNA Processing

BIOL 203, Ribosomes and Translation

BIOL 204, Chromatin and Transcription

BIOL 205, Epigenetics

BIOL 206, Introduction to Stem Cell Biology

BIOL 206L, Current Protocols in Stem Cell Biology

BIOL 207, Population Genetics

BIOL 208, Cellular Signaling Mechanisms

BIOL 214, Advances in Cancer Biology

BIOL 226, Advanced Neuroscience

BIOL 228, Developmental Neurobiology (new class)

AMS156, Linear Regression\*

AMS202, Linear Models\*

AMS205B, Intermediate Classical Interference\*

AMS256, Linear Statistical Models\*

BME110, Computational Biology Tools

BME130, Genomes

BME210, Applications and Analysis of Microarrays

BME220, Bioinformatics

BME230, Computational Genomics

BME237, Applied RNA Bioinformatics

Chem200A, Advanced Biochem: Biophysical Methods

Chem200B, Advanced Biochem: Protein Structure and Function

Chem200C, Advanced Biochem: Structure and Function of Nucleic Acids

Chem238, Topics in Biophysical Chemistry/Grant Writing

EE215, Micro-Electro-Mechanical Systems (MEMS) Design

METX202, Cellular and Molecular Toxicology

METX206A, Advanced Microbiology

METX210, Bacterial Pathogenesis

\*Students who have had no or very little statistics should audit or take AMS 7 (5 credits) and perhaps also AMS 7L (2 credits) to learn the basics, before taking one of the graduate-level courses.

---

## BIOLOGY: MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY FACULTY AND PROFESSIONAL INTERESTS

---

**James Ackman**

Brain circuit structure and function

**Manuel Ares Jr.**

Regulation of RNA processing; structure, function and evolution of RNA-based systems

**Needhi Bhalla**

Meiotic chromosome dynamics

**Hinrich Boeger**

Chromatin dynamics and transcriptional regulation

**Barry Bowman**

Membrane biochemistry and genetics, biochemistry and molecular biology of membrane proteins

**Susan Carpenter**

Long noncoding RNA and innate immunity

**Bin Chen**

Mammalian brain development

**David Feldheim**

Developmental neuroscience

**Grant Hartzog**

Biochemistry, genetics, chromatin and transcriptional regulation

**Lindsay Hinck**

Breast development and cancer, cell biology, development

**Melissa Jurica**

Structure and function of human splicing machinery

**Rohinton T. Kamakaka**

Nuclear organization, chromatin domains, epigenetic gene regulation and insulators

**Douglas R. Kellogg**

Control of cell growth and size

**Jeremy Lee**

Molecular biology education and curriculum development; *Drosophila* models of neurodegeneration

**Robert A. Ludwig**

Plant microbe interactions, photorespiration, genetic recombination in plants

**Amy Ralston**

Origins and regulation of mammalian stem cells

**Michael Rexach**

Structure and function of nuclear pore complex, nuclear transport

**Jeremy Sanford**

Genomic analysis of protein-RNA interactions

**William M. Saxton**

Cytoskeletal motors and active transport processes

**Susan Strome**

Chromatin and RNA regulation in *C. elegans*

**William T. Sullivan**

Cell cycle, cytoskeleton, and host-pathogen interactions

**John W. Tamkun**

Transcriptional regulation, molecular genetics of *Drosophila* development, regulation of gene expression

**Zhu Wang**

Prostate development and cancer, tissue stem cells

**Alan M. Zahler**

Alternative pre-mRNA splicing and small RNA function

**Martha C. Zúñiga**

Negative selection of autoreactive T cells in the thymus and in peripheral lymphoid organs, immunological tolerance to epithelial antigens, MHC transfer between keratinocytes and dendritic cells

**Yi Zuo**

Synaptic plasticity in learning and memory

RESEARCH FACULTY

---

**Harry Noller**

Ribosome structure and function; mechanisms of protein synthesis

MOLECULAR, CELL, AND DEVELOPMENTAL  
BIOLOGY EMERITUS FACULTY

---

**Charles Daniel**

**Robert Edgar**

**Jerry F. Feldman**

**Kivie Moldave**

**Clifton A. Poodry**

**Lincoln Taiz**

**Frank J. Talamantes**

**Howard H. Wang**

MOLECULAR, CELL, AND DEVELOPMENTAL  
BIOLOGY LECTURERS

---

**Linda Ogren**

**Giulia Ruben**

**Mary Zavanelli**

**Victoria Auerbach-Stone (Microbiology and  
Environmental Toxicology)**

The interaction between the gut pathogen *Yersinia* pseudotuberculosis and the mammalian immune system

**Rebecca Dubois (Biomolecular Engineering)**

Protein engineering; structural virology and biomedical applications

**Camilla Forsberg (Biomolecular Engineering)**

Hematopoietic stem cells; transcriptional regulation; chromatin; blood cell development; cell surface receptors; genomics

**Richard "Ed" Green (Biomolecular Engineering)**

Genomics, computational molecular biology, genome assembly, human evolutionary genetics, ancient DNA, high-throughput sequencing, mRNA-processing and alternative splicing

**David Haussler (Biomolecular Engineering)**

Bioinformatics, genomics, computational genomic data analysis, molecular evolution and comparative genomics, genomic and clinical data sharing and standards, cancer genomics, neurodevelopment, stem cell research, immunogenomics, information theory, pattern recognition, machine learning, artificial intelligence, information theory, theoretical computer science

**Scott Lokey (Chemistry and Biochemistry)**

Organic chemistry; combinatorial synthesis, biotechnology, molecular cell biology

**Todd M. Lowe (Biomolecular Engineering)**

Experimental and computation genomics, ncRNA gene finders, DNA microarrays to study the biology of Archaea

**Karen Ottemann (Microbiology and Environmental Toxicology)**

Environmental responses of pathogenic bacteria

**Carrie Partch (Chemistry and Biochemistry)**

Biochemistry and biophysics, nuclear magnetic resonance spectroscopy; molecular mechanism of circadian rhythmicity

**Seth Rubin (Chemistry and Biochemistry)**

Biomolecular mechanisms of cell-cycle regulation and cancer; structural biology and biochemistry; macromolecular x-ray crystallography; nuclear magnetic resonance

**William G. Scott (Chemistry and Biochemistry)**

Structure and function of RNA, proteins, and their complexes

**Beth Shapiro (Ecology and Evolutionary Biology)**

Evolutionary and molecular ecology, ancient DNA, genomics, pathogen evolution

**Alexander Sher (Physics)**

Development of experimental techniques for the study of neural function

**Michael Stone (Chemistry and Biochemistry)**

Single-molecule Biophysics and Enzymology; Structure, function, and assembly of the telomerase ribonucleoprotein, Fluorescence Resonance Energy Transfer (FRET), optical/magnetic trapping, sub-diffraction optical imaging of telomeres and the nucleus

**Fitnat Yildiz (Microbiology and Environmental Toxicology)**

Microbiology, molecular genetics, genomics; the mechanism of persistence of survival of *Vibrio cholerae*

---

## BIOLOGY: MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY COURSES

---

### LOWER-DIVISION COURSES

**15. Undergraduate Research Reports (1 credit). F,W**

Undergraduate students who work in faculty research laboratories present the results of their projects. Organized by the Minority Undergraduate Research Program and the Minority Access to Research Careers Program. Designed for students with membership in the above-mentioned programs. Prerequisite(s): qualifications as determined by instructor at first class meeting. May be repeated for credit. M. Jurica, A. Zahler

**20A. Cell and Molecular Biology. F,W,S**

Introduction to molecular biology, cell physiology, and genetics. Prerequisite(s): Chemistry 1A and 1B; students with a chemistry AP score of 4 or higher who wish to start their biology coursework prior to completing the Chemistry 1A and 1B prerequisites, may enroll by permission of the instructor. (General Education Code(s): IN.) J. Tamkun, M. Rexach, B. Bowman

**20L. Experimental Biology Laboratory (2 credits). F,W,S**

Provides biology majors with the theory and practice of experimental biology. A wide range of concepts and techniques used in the modern laboratory are included in the exercises. Designed to satisfy the introductory biology lab requirement of many medical and professional schools. Students are billed a materials fee. Prerequisite(s): BIOL 20A and previous or concurrent enrollment in BIOE 20B. Enrollment restricted to human biology and health sciences majors; other majors by

## Biology: Molecular, Cell, and Developmental Biology

permission. Enrollment limited to 20. The Staff

### **80A. Female Physiology and Gynecology. S**

Biochemical, medical, social, and clinical aspects of the female body. Emphasis will be on biological-chemical interactions in the female organs. Topics include female anatomy, cell physiology, endocrine functions, sexuality and intimacy, sexually transmitted diseases, puberty, pregnancy, menopause, birth control, abortion, immunity, cancer. (General Education Code(s): SI, T-2 Natural Sciences.) M. Zavanelli

### **80E. Evolution. \***

Introduction to Darwinian evolution including how the theory was devised and a discussion of other theories proposed at the time. Explores the facts and evidence of evolutionary processes and the insights they provide in biological diversity, consequences of extinction, and emergence of new diseases. Includes a discussion of evolution and spirituality. (General Education Code(s): SI, T-2 Natural Sciences.) M. Zavanelli

### **80J. Biology of AIDS. W**

An overview of the biology of the acquired immunodeficiency syndrome (AIDS) and the social and legal issues that surround it are explored in a series of lectures by biology faculty and experts in the field. (General Education Code(s): SI, T-2 Natural Sciences.) M. Zavanelli

## UPPER-DIVISION COURSES

### **100. Biochemistry. F,W**

An introduction to biochemistry including biochemical molecules, protein structure and function, membranes, bioenergetics, and regulation of biosynthesis. Provides students with basic essentials of modern biochemistry and the

background needed for upper-division biology courses. Students who plan to do advanced work in biochemistry and molecular biology should take the Biochemistry and Molecular Biology 100 series directly. Students cannot receive credit for this course after they have completed any two courses from the BIOC 100A, 100B, and 100C sequence. Prerequisite(s): BIOL 20A and BIOE 20B; and CHEM 108A or 112A. J. Sanford, D. Kellogg

### **100L. Biochemistry Laboratory. F,W,S**

Basic techniques and principles of laboratory biochemistry including isolation and characterization of a natural product, manipulation of proteins and nucleic acids to demonstrate basic physical and chemical properties; and characterization of enzyme substrate interactions. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors; non-majors by instructor permission. (Formerly Advanced Biochemistry Laboratory.) Prerequisite(s): BIOL 100 or BIOC 100A, and BIOL 100K or BIOL 20L or BIOL 101L; satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **101. Molecular Biology (3 credits). W,S**

Covers the basic molecular mechanism of DNA replication and transcription, protein synthesis, and gene regulation in bacterial and eukaryotic organisms. The experimental techniques used to determine these mechanisms are emphasized. Unless students have already passed course 20L, they are strongly encouraged to enroll in course 101L. Prerequisite(s):

course 100 or Biochemistry and molecular biology 100A. C. Vollmers, M. Jurica

### **101L. Molecular Biology Laboratory (2 credits). F,W,S**

Laboratory course providing hands-on experience with, and covering conceptual background in, fundamental techniques in molecular biology and biochemistry, including DNA cloning, PCR, restriction digest, gel electrophoresis, protein isolation, protein quantification, protein immunoblot (Western) analysis, and use of online bioinformatics tools. Students are billed a materials fee. (Formerly Biochemistry Laboratory.) Previous or concurrent enrollment in BIOL 100, 101, or BIOC 100A is required. Students cannot receive credit for this course and BIOL 20L. J. Lee

### **105. Genetics. F,W,S**

Mendelian and molecular genetics; mechanisms of heredity, mutation, recombination, and gene action. Prerequisite(s): BIOL 20A and BIOE 20B. S. Strome, N. Bhalla, J. Lee

### **105L. Eukaryotic Genetics Laboratory. F,W,S**

Classical and newly developed molecular-genetic techniques used to explore genetic variation in wild populations of the fruit fly *Drosophila melanogaster*. Topics include Mendelian fundamentals, mapping, design of genetic screens, bio-informatic and database analysis, genetic enhancers, and population genetics. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors; non-majors by instructor permission. Prerequisite(s): BIOL 100 or BIOC 100A; BIOL 100K or BIOL 20L or BIOL 101L; BIOL 105; satisfaction of Entry Level Writing and Composition Requirements.

(General Education Code(s): W.)  
The Staff

### **105M. Microbial Genetics**

#### **Laboratory. \***

Exploration of basic genetics processes such as replication, mutation, DNA repair, recombination, gene exchange, population genetics, and evolution using microbial model organisms; classic techniques in microbial genetics and contemporary molecular techniques presented. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors. Non-majors enroll by instructor permission. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K or BIOL 20L or BIOL 101L, and BIOL 105. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 16. (General Education Code(s): W.)  
The Staff

### **109L. Yeast Molecular Genetics**

#### **Laboratory. F,W,S**

The powerful genetic and molecular techniques available for yeast combined with the complete genomic DNA sequence offers opportunity for discovery of fundamental aspects of eukaryotic life. Lab providing practical experience in using yeast as an experimental system. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors. Non-majors enroll by instructor permission. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K or BIOL 20L or BIOL 101L, and BIOL 105. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 15. (General Education Code(s): W.)  
G. Ruben

### **110. Cell Biology. F,S**

Covers the structure, organization, and function of eukaryotic cells. Topics include biological membranes, organelles, protein and vesicular trafficking, cellular interactions, the cytoskeleton, and signal transduction. Requires a good understanding of basic biochemistry and molecular biology. Prerequisite(s): BIOL 100 or CHEM 103 or BIOC 100A, and BIOL 105. M. Rexach, L. Hinch

#### **110L. Cell Biology Laboratory. \***

Fundamental aspects of cell biology explored through experimentation in a modern laboratory setting. Research topics include the structure and function of biological membranes; intracellular transport and organelle biogenesis; the cell cycle; and the cytoskeleton. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors. Non-majors enroll by instructor permission. Prerequisite(s): BIOL 100 or BIOC 100A, and BIOL 100K or BIOL 20L or BIOL 101L, and previous or concurrent enrollment in BIOL 110. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 16. (General Education Code(s): W.)  
The Staff

#### **111. Immunology. \***

Immune systems--their manifestations and mechanisms of action. Prerequisite(s): BIOL 20A, BIOE 20B, BIOL 105, and BIOL 110.  
G. Ruben

#### **111A. Immunology I. W**

Principles and concepts of the innate and adaptive immune systems, with emphasis on mechanisms of action and molecular and cellular networks. The development, differentiation, and maturation of cells of the

immune system are also discussed. Prerequisite(s): courses BIOE 20B, and BIOL 20A, 105, and 110. M. Zuniga

#### **111B. Immunology II. S**

The immune system in health and disease, including failures of host immune-defense mechanisms, allergy and hypersensitivity, autoimmunity, transplantation biology, the immune response to tumors, immune-system interactions with pathogens, and manipulation of the immune response. Prerequisite(s): course 111A. M. Zuniga

#### **113. Mammalian Endocrinology. \***

Introduction to the major endocrine organs, their hormones, and their receptors. Emphasis is on the following topics: structural analysis of the hormones and receptors at the protein and molecular level, regulation of expression of hormones and their receptors, and the biological functions of hormones. Prerequisite(s): BIOL 20A, and BIOE 20B; and BIOL 100 or CHEM 103 or BIOC 100A; and BIOL 101L or BIOL 20L or BIOL 100K. The Staff

#### **114. Cancer Cell Biology. W**

Focuses on the molecular and cellular mechanisms behind cancer. Topics covered include oncogenes, tumor suppressor genes, cell growth genes, checkpoint genes, telomeres, and apoptosis. Students will gain experience in reading the primary scientific literature. Prerequisite(s): BIOL 110 or 115. (General Education Code(s): TA.) A. Zahler

#### **115. Eukaryotic Molecular Biology. W**

Covers eukaryotic gene and genome organization; DNA, RNA, and protein synthesis; regulation of

## Biology: Molecular, Cell, and Developmental Biology

gene expression; chromosome structure and organization; and the application of recombinant DNA technology to the study of these topics. Prerequisite(s): BIOL 101 or BIOC 100A; and BIOL 105; and BIOL 101L or 100K. Enrollment restricted to biological sciences and affiliated majors, non-majors by permission of instructor. H. Boeger

### **115L. Eukaryotic Molecular Biology Laboratory. F,W,S**

A laboratory designed to provide students with direct training in basic molecular techniques. Each laboratory is a separate module which together builds to allow cloning, isolation, and identification of a nucleic acid sequence from scratch. Students cannot receive credit for this course and course 187L or 287L. Students are billed a materials fee. Restricted to biological sciences/affiliated majors; biology minors; other majors by permission. Prerequisite(s): BIOL 100 or BIOC 100A or CHEM 103, and BIOL 100K or BIOL 20L or BIOL 101L, and previous or concurrent enrollment in BIOL 101 or 115. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) The Staff

### **116. Advanced Topics in Cell Biology (3 credits). S**

Advanced course in cell biology featuring small-classroom discussion of topics related to the structure and function of cells and their organelles. Emphasis is given to experimental strategies used in cell biology research. Requires discussion of scientific literature and student-led presentations. Prerequisite(s): course 110. Enrollment restricted to senior human biology, molecular, cell, and developmental biology, and neuroscience majors. Other majors

by permission of instructor. Enrollment limited to 30. M. Rexach

### **117. Global Health and Neglected Diseases (3 credits). F**

Neglected tropical diseases afflict more than 1 billion of the poorest individuals on the planet. This course covers the molecular basis and pathology of the most prevalent neglected diseases and emerging strategies to combat these diseases. (Formerly Neglected Tropical Diseases.) Prerequisite(s): course 110. Enrollment restricted to senior human biology, molecular, cell, and developmental biology, and neuroscience majors. Other majors by permission of instructor. Enrollment limited to 30. W. Sullivan

### **118. Pathogenesis: Molecular Mechanisms of Disease. \***

Overview of the pathogenic mechanisms underlying human disease at the physiological and molecular levels, with their implications for epidemiology, diagnosis, and treatment. Includes discussion of clinical cases and of emerging areas of research. Geared toward students interested in future research or clinical careers in the area of human or animal health. Students cannot receive credit for this course and Microbiology and Environmental Toxicology 238. (Also offered as Microbiol & Environ Toxicology 138. Students cannot receive credit for both courses.) Prerequisite(s): Biology 130. Enrollment restricted to students majoring in biology; human biology; molecular, cell and developmental biology; biochemistry and molecular biology; or neuroscience. Offered in alternate academic years. M. Camps

### **120. Developmental Biology. W**

A description and analysis of selected developmental events in

the life cycle of animals. Experimental approaches to understanding mechanisms are emphasized. (Formerly Development.) Prerequisite(s): course 110. Z. Wang

### **120L. Development Laboratory. W**

Experimental studies of animal development using a variety of locally obtainable organisms. Approximately eight hours weekly, but it will often be necessary to monitor continuing experiments throughout the week. Students are billed a materials fee. Enrollment restricted to biological sciences and affiliated majors; biology minors; other majors by permission. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K or BIOL 20L or BIOL 101L; satisfaction of the Entry Level Writing and Composition requirements. Previous or concurrent enrollment in BIOL 120 is required. J. Lee

### **121L. Environmental Phage Biology Laboratory. \***

Introduction to hypothesis-driven laboratory research. Students isolate a unique bacteriophage and characterize its structure and genome. An understanding of molecular biology and basic genetics required. Students are billed a materials fee. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to biological sciences and affiliated majors with sophomore standing or higher. Enrollment by application and permission of instructor. Enrollment limited to 20. G. Hartzog

### **125. Introduction to Neuroscience. W**

The structure and function of the nervous system. Topics include

## Biology: Molecular, Cell, and Developmental Biology

elementary electrical principles, biophysics and physiology of single nerve and muscle cells, signal transduction at synapses, development of the nervous system, and neural basis of behavior.

Requires a good understanding of basic biochemistry, cell biology, and molecular biology. Prerequisite(s): BIOL 20A, BIOE 20B; and BIOL 100 or BIOE 100A or CHEM 103; BIOL 110 is highly recommended. J. Ackman, D. Feldheim

### **126. Advanced Molecular Neuroscience. S**

Explores in detail cellular and molecular events that underlay the function of the nervous system. Topics include neural development, axon guidance and regeneration, advanced electrical principles (synaptic transmission through a variety of receptors), synaptic plasticity, learning and memory, as well as several neural disorders. Prerequisite(s): BIOL 125. (General Education Code(s): TA.) Y. Zuo

### **127. Mechanisms of Neurodegenerative Disease. \***

Focuses on cellular and molecular processes that underlie neurodegenerative diseases. Includes lectures, student oral presentations, discussions, a term paper, and exams. Prerequisite(s): course 110. (General Education Code(s): TA.) W. Saxton

### **130. Human Physiology. F,W**

Function, organization, and regulation of the major organ systems of humans, with emphasis on integration among systems. Students cannot receive credit for this course and course 131. Prerequisite(s): BIOL 110. G. Ruben

### **130L. Human Physiology Laboratory (2 credits). F,W**

Examines fundamental principles of

systemic physiology focusing on the human. Students cannot receive credit for this course and BIOE 131L. Students are billed a materials fee. Enrollment is restricted to biological sciences and affiliated majors; biology minors; other majors by permission. Prerequisite(s): Satisfaction of Entry Level Writing and Composition requirements; BIOL 110; previous or concurrent enrollment in BIOL130 is required. G. Ruben

### **178L. Protocols in Stem Cell Biology. \***

Provides hands-on experience in embryonic stem cell culture methods and techniques. Students grow and passage mouse embryonic stem (mES) cells and perform established protocols that differentiate mES cells into cardiac muscle cells and neurons. Enrollment restricted to biological sciences and affiliated majors; biology minors; non-majors by permission. Prerequisite(s): BIOL 100 or BIOE 100A; and BIOL 100K; satisfaction of the Entry Level Writing and Composition requirements; previous or concurrent enrollment in course 178. Enrollment limited to 16. The Staff

### **186F. Undergraduate Research in MCD Biology (2 credits). F,W,S**

Supervised undergraduate research in laboratory of an MCD biology faculty member accompanied by weekly lectures on ethical and practical scientific issues. Topics include: laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and professional schools, is also

discussed. Prerequisite(s): BIOL 100 or BIOE 100A; and BIOL 100K or BIOL 20L or BIOL 101L. Each enrolled student must have a committed MCD faculty sponsor by the first class meeting. Enrollment restricted to biology and affiliated majors. May be repeated for credit. M. Rexach, Y. Zuo, H. Boeger

### **186L. Undergraduate Research in MCD Biology. F,W,S**

Supervised undergraduate research in laboratory of an MCD biology faculty member accompanied by weekly lectures on ethical and practical scientific issues. Topics include: laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and professional schools, are also discussed. Prerequisite(s): Entry Level Writing and Composition requirements; BIOL 100 or BIOE 100A; and BIOL 100K or BIOL 20L or BIOL 101L. Each enrolled student must have a committed MCD faculty sponsor by the first class meeting. Enrollment restricted to biology and affiliated majors. (General Education Code(s): W.) M. Rexach, Y. Zuo, H. Boeger

### **186R. Undergraduate Research in MCD Biology. F,W,S**

Supervised undergraduate research in the laboratory of an MCD biology faculty member accompanied by weekly lectures on practical scientific issues. Topics include: laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; ethics and scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and

## Biology: Molecular, Cell, and Developmental Biology

professional schools, are discussed. Students cannot receive credit for this course and course 186L.

Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K or BIOL 20L or BIOL 101L; previous completion of the Disciplinary Communication requirement. Each enrolled student must have a committed MCD faculty sponsor by the first class.

Enrollment restricted to majors.

May be repeated for credit. M.

Rexach, Y. Zuo, H. Boeger

### **187L. Molecular Biotechnology Laboratory. \***

An intensive molecular biology laboratory that presents procedures used in molecular and biotechnology research. Topics and procedures include DNA/RNA isolation, cloning and library construction, southern and northern hybridization, DNA fingerprinting, PCR, manual and automated sequencing, and computer methods for analyzing molecular data. New procedures currently being developed in biotechnology industries are presented by industry representatives. Students cannot receive credit for this course and BIOL 115L or BIOL 287L. Students are billed a materials fee.

Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 100K and BIOL 110; satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. The Staff

### **188. Life in Healthcare (3 credits). S**

Students explore healthcare from the perspectives of both clinicians and patients. The class focuses on medicine's cognitive, emotional, and spiritual elements, with the goal of understanding the rewards and costs of healthcare practice.

Enrollment restricted to junior and senior human biology majors, and

others by permission of instructor. Enrollment limited to 30. (General Education Code(s): PR-E.) The Staff

### **189. Health Sciences Internship (3 credits). F,W,S**

Structured off-campus learning experience providing experience and pre-professional mentoring in a variety of health-related settings. Interns are trained and supervised by a professional at their placement and receive academic guidance from their faculty sponsor. Students spend 8 hours per week at their placement, participate in required class meetings on campus, and keep a reflective journal. Enrollment by application. Students interview with health sciences internship coordinator; applications are due one quarter in advance to the Health Sciences Internship Office. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; concurrent enrollment in course 189W is required. Enrollment restricted to human biology majors. L. Hinck, M. Rexach, M. Zuniga

### **189W. Disciplinary Communication: Human Biology (2 credits). F,W,S**

Writing-intensive course offered in conjunction with the health sciences internship. Weekly class meetings include academic guidance and mentoring as well as discussion of the mechanisms and conventions of academic writing about health and health care. Students complete multiple writing assignments, culminating in a term paper in the format of a scholarly article. Enrollment by application. Students interview with the health-sciences internship coordinator; applications are due one quarter in advance to the Health Care Sciences Internship Office. Prerequisite(s): satisfaction of the Entry Level Writing and Composition

requirements. Previous or concurrent enrollment in course 189 is required. Enrollment restricted to human biology majors. L. Hinck, M. Rexach, M. Zuniga

### **191. ACE Program Service Learning (2 credits). F**

Students participate in training and development to co-facilitate collaborative learning in ACE chemistry discussion sections and midterm/exam review sessions. Students are role models for students pursuing science- and math-intensive majors. Prerequisite(s): Prior participation in ACE; good academic standing; no non-passing grades in prior quarter. Enrollment restricted to sophomores, juniors, and seniors. (Formerly course 182.) Enrollment limited to 10. (General Education Code(s): PR-S.) The Staff

### **195. Senior Thesis Research. F,W,S**

An individually supervised course, with emphasis on independent research, to culminate in a senior thesis. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198. Independent Field Study. F,W,S**

Provides for individual programs of study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. With permission of the department, may be repeated for credit, or two or three courses taken concurrently. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Independent Field Study (2 credits). F,W,S**

Provides for two units of independent field study (a) by means other than the usual

## Biology: Molecular, Cell, and Developmental Biology

supervision in person, or (b) when the student is doing all or most of the coursework off campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199. Tutorial. F,W,S**

Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Two-unit Tutorial. Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## GRADUATE COURSES

### **200A. Critical Analysis of Scientific Literature. F**

Development of critical thinking skills via discussion of research articles on a broad range of topics. Prepares students to critically evaluate research publications, and improves their ability to organize effective oral presentations and to evaluate the oral presentations of other scientists. Enrollment restricted to graduate students in MCD biology, or by permission of instructor. Enrollment limited to 20. J. Sanford, J. Tamkun

### **200B. Advanced Molecular Biology. F**

An in-depth coverage of the structure, function, and synthesis of DNA, RNA, and proteins. Discussion of the roles of macromolecules in the regulation of information in the cell. Prerequisite(s): Enrollment restricted to graduate students. A. Zahler, H. Boeger, M. Jurica

### **200C. Advanced Cell Biology. W**

An in-depth coverage of topics in cellular and subcellular organization, structure, and function in plants and animals. Emphasis on current research problems. Prerequisite(s): BIOL 200B. Enrollment restricted to graduate students. D. Kellogg, N. Bhalla, W. Saxton

### **200D. Developmental Biology. S**

Key topics in developmental biology, including developmental genetics, epigenetics, stem cell biology, and developmental neurobiology. Lectures are accompanied by critical analysis and discussion of recent publications. Enrollment restricted to graduate students in MCD biology, or by permission of instructor. Enrollment limited to 20. S. Strome, Z. Wang, B. Chen

### **201. RNA Processing.**

An advanced graduate-level course on biological aspects of RNA function and processing in eukaryotes. Lectures and discussions will be developed using the current literature. Prerequisite(s): BIOL 200B or permission of instructor. Enrollment restricted to graduate students. Enrollment limited to 15. M. Jurica, M. Ares

### **203. Ribosomes and Translation.**

\* Covers the field of ribosome research in depth, including the structure and function of ribosomes and the molecular mechanisms of protein synthesis. Begins with historical review of the ribosome field and proceeds to the most recent findings. Focus is on central questions: (1) How is the accuracy of the aminoacyl-tRNA selection determined? (2) What is "accommodation"? (3) What is the mechanism of peptide bond

formation (peptidyl transferase)? (4) What is the mechanism of translocation? (5) What are the mechanistic roles of the ribosome and translation factor EF-G in translocation? (6) To what extent is the mechanism of translation determined by RNA? (7) Why is RNA so well suited for the ribosome? (8) How did translation evolve from an RNA world? Prerequisite(s): BIOC 100A, BIOL 200B or permission of instructor. Enrollment restricted to graduate students. The Staff

### **204. Chromatin. \***

Eukaryotic DNA is complexed with histones to form chromatin. This course focuses on the ways in which chromatin influences and is manipulated to regulate gene expression. Prerequisite(s): BIOL 105 and BIOL 115; undergrads by permission of instructor. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. J. Tamkun, G. Hartzog

### **205. Epigenetics. \***

In-depth coverage of epigenetics focusing on how alterations in chromatin structure and DNA methylation establish and maintain heritable states of gene expression. Lectures are supplemented with critical discussion of recent publications. Prerequisite(s): BIOL 105 and BIOL 115, or permission of instructor. Enrollment restricted to graduate students. Enrollment limited to 20. S. Strome, J. Tamkun

### **206. Introduction to Stem Cell Biology. F**

Fundamental concepts, experimental approaches, and current advances in stem cell biology, with consideration of key ethical issues. Topics include: self-renewal and differentiation; the microenvironment; epigenetics;

## Biology: Molecular, Cell, and Developmental Biology

cell-cycle regulation; and how basic research translates to medical therapeutics. Ethical, moral, and political issues surrounding stem cell research are discussed with lectures from philosophy and other relevant disciplines. Enrollment restricted to graduate students. Enrollment limited to 15. W. Sullivan

### **206L. Current Protocols in Stem Cell Biology. \***

Provides students with hands-on experience in embryonic stem cell culture methods. Enrollment restricted to graduate students; qualified undergraduates may enroll by permission of instructor. Enrollment limited to 10. Y. Zuo, D. Feldheim

### **208. Cellular Signaling Mechanisms. \***

All eukaryotic cells utilize intricate signaling pathways to control such diverse events as cell-cell communication, cell division, and changes in cell morphology. This course covers the molecular basis of these cellular signaling pathways, focusing on the most current research. Prerequisite(s): BIOL 105, BIOL 110, and BIOL 115. Enrollment restricted to seniors and graduate students. Enrollment limited to 15. Offered in alternate academic years. D. Kellogg

### **214. Advances in Cancer Biology. \***

Provides students with knowledge of the latest concepts in cancer biology and cancer therapeutics, and a general appreciation of the rapid advances being made in this area of biomedicine. Prerequisite(s): course 200B or by permission of instructor. Enrollment restricted to graduate students. Enrollment limited to 15. L. Hinck

### **215. Applied Statistics for Molecular, Cell, and Developmental Biology. \***

For experimental biologists: focuses on resolving practical statistical issues typically encountered in molecular, cellular, and developmental biology lab research. No prior experience in statistics or programming is necessary. Enrollment restricted to graduate students in molecular, cellular, and developmental biology. Enrollment limited to 20. The Staff

### **226. Advanced Molecular Neuroscience. S**

Basis of neural behavior at the cellular, molecular and system levels. First half of course focuses on cellular, molecular, and developmental aspects of the nervous system and covers two sensory systems: olfaction and auditory. Last half of course concerns higher-level functions of the nervous system, such as processing and integrating information. Discusses human diseases and disorders. Enrollment restricted to graduate students. Y. Zuo

### **280A. Topics in Research on Molecular Genetics of Yeast (2 credits). F,W,S**

Intensive research seminar on the structure and function of the gene expression machinery in the simple eukaryote *Saccharomyces cerevisiae* and its relationship to the human gene expression machinery. Enrollment restricted to graduate students; qualified undergraduates may enroll with approval of instructor. May be repeated for credit. M. Ares

### **280B. Chromatin Structure and Transcriptional Regulation (2 credits). F,W,S**

Weekly seminar on structure and gene regulatory function of

chromatin. Discusses research of participants and relevant scientific literature. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. H. Boeger

### **280C. Mammalian Brain Development (2 credits). F,W,S**

Seminar covers research into the development of the mammalian brain. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. B. Chen

### **280D. RNA Processing (2 credits). F,W,S**

A discussion of current research and literature concerning the regulation of precursor messenger RNA processing. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. A. Zahler

### **280E. Meiotic Chromosome Dynamics (2 credits). F,W,S**

Intensive course on the molecular mechanisms underlying homolog pairing, synapses, and recombination; and how they are regulated, coordinated, and monitored to ensure accurate meiotic chromosome segregation. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. May be repeated for credit. N. Bhalla

### **280F. Development of Vertebrate Neural Connections (2 credits). F,W,S**

Intensive research seminar on molecular mechanisms by which neural connections are established during mouse development. Special

## Biology: Molecular, Cell, and Developmental Biology

focus on topographic maps and role of Eph receptors and ephrins in this process. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. D. Feldheim

### **280H. Topics on Research into Chromatin and Transcription (2 credits). F,W,S**

Seminar covering research into the effects of chromatin on transcription in yeast. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. G. Hartzog

### **280I. Epigenetic Gene Silencing and Insulators (2 credits). F,W,S**

Intensive course on molecular mechanisms by which insulator elements regulate epigenetic gene silencing. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. R. Kamakaka

### **280J. Structures of Macromolecular Complexes (2 credits). F,W,S**

Focuses on structure and function of the spliceosome using electron microscopy and x-ray crystallography. Participants present results from their own research and relevant journal articles. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. M. Jurica

### **280K. Topics in Cell Cycle Research (2 credits). F,W,S**

An intensive seminar focusing on current research on the molecular mechanisms that control cell division. Participants are required

to present results of their own research or to review journal articles of interest. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. D. Kellogg

### **280L. Development (2 credits). F,W,S**

Seminar covering research into breast development and cancer. (Formerly Topics on Neural Development.) Enrollment restricted to graduate students. Enrollment limited to 12. May be repeated for credit. L. Hinck

### **280M. Post-Transcriptional Control of Mammalian Gene Expression (2 credits). F,W,S**

Intensive course on the molecular mechanisms by which RNA binding proteins regulate gene expression. Enrollment restricted to graduate students; qualified undergraduates may enroll with the permission of the instructor. Enrollment limited to 8. May be repeated for credit. J. Sanford

### **280N. Structure and Function of Ribosomes (2 credits). F,W,S**

An intensive and advanced course focusing on the structure and function of ribosomes. Participants present research findings in an organized, critical fashion, in the context of current research literature in the ribosome field. Enrollment restricted to graduate students; qualified undergraduate students may enroll with permission of the instructor. Enrollment limited to 20. May be repeated for credit. H. Noller

### **280O. Topics in Bacterial Pathogenesis (2 credits). F,W,S**

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcer-causing bacterium *Helicobacter pylori*.

Participants are required to present results from their own research and relevant journal articles. (Also offered as Microbiol & Environ Toxicology 2810. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. K. Ottemann

### **280Q. Cell Biology of Oocytes, Embryos, and Neurons (2 credits). F,W,S**

Weekly seminar and round-table discussion about research problems and recent advances in molecular motor proteins, cytoskeletons, and the control of force-producing processes. Each participant reports recent advances in their field from current literature, their own primary research questions, current approaches to answering those questions, and their research progress. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. W. Saxton

### **280R. Structure and Function of the Nuclear Pore Complex (2 credits). F,W,S**

Intensive and advanced course focusing on structure and function of the nuclear pore complex. Participants present research findings in an organized critical fashion in the context of current research literature in the nucleocytoplasmic transport field. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. M. Rexach

**280S. Chromatin and RNA Regulation in *C. elegans* (2 credits). F,W,S**

Intensive research seminar about regulators of chromatin organization; the composition and function of germ granules; and the roles of both levels of regulation in germline development in *C. elegans*. Participants present their research results and report on related journal articles. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. S. Strome

**280T. Molecular Biology of *Drosophila* Development (2 credits). F,W,S**

An intensive seminar concerning the molecular genetics of *Drosophila*. Recent research is discussed weekly, with an emphasis on gene regulation and development. Students present their own research or critical reviews of recent articles at least once during the quarter. Enrollment restricted to graduate students. Qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. J. Tamkun

**280U. Discussions on the Development of the *Drosophila* Embryo (2 credits). F,W,S**

Involves a two-hour weekly meeting in which the students discuss topics concerning the cell cycle, early embryonic development, and the cytoskeleton. These discussions critically evaluate ongoing research in this area. Material is drawn from student research and recently published journal articles. Students are also expected to meet individually with the instructor two hours weekly. In addition to a three–five page research proposal, each student

gives two one-hour oral presentations. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. W. Sullivan

**280W. Membrane Proteins (2 credits). F**

Seminar on recent research on membrane proteins, with an emphasis on ion-pumping ATPase. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. B. Bowman

**280Y. Activity-Dependent Synaptic Plasticity (2 credits). F,W,S**

Research seminar covering the regulation of synaptic plasticity in the mammalian nervous system, focusing on how the activity regulates the structural and functional dynamics of synapses. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. Y. Zuo

**280Z. Prostate Development and Cancer Biology (2 credits). F,W,S**

Weekly research seminar covering gene regulation, cellular interactions, and stem cell behaviors in mammalian prostate development and prostate cancer progression. Enrollment is restricted to graduate students; undergraduates may enroll by the permission of the instructor. Enrollment limited to 10. May be repeated for credit. Z. Wang

**289. Practice of Science. W**

Examination of ethical and practical scientific issues, including the collection and treatment of data,

attribution of credit, plagiarism, fraud, and peer review. Career issues, including how to apply for grants and positions in industry or academia, will be discussed. Prerequisite(s): BIOL 200A, BIOL 200B, and BIOL 200C or permission of instructor. Enrollment restricted to graduate students; undergraduates may enroll with permission of the instructor. Enrollment limited to 20. D. Feldheim

**291. Molecular, Cellular, and Developmental Biology Seminar (2 credits). F,W,S**

Topics of current interest in molecular, cellular, and developmental biology are presented weekly by graduate students, faculty, and guest speakers. Enrollment restricted to graduate students. Enrollment limited to 60. May be repeated for credit. A. Zahler

**292. MCD Seminar (no credit). F,W,S**

Various topics by weekly guest speakers. Enrollment restricted to graduate students. A. Zahler

**296. Laboratory Research in Molecular, Cell, and Developmental Biology. F,W,S**

Independent laboratory research in molecular, cellular, and developmental biology. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**297. Independent Study. F,W,S**

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency. The Staff

**299. Thesis Research. F,W,S**

Students submit petition to sponsoring agency. The Staff

\* Not offered in 2015-16

Revised 09/01/15

## CHEMISTRY AND BIOCHEMISTRY PROGRAM

---

Chemistry and Biochemistry Department

230 Physical Sciences Building

(831) 459-4125

<http://chemistry.ucsc.edu>

Physical and Biological Sciences Undergraduate Affairs

142 Jack Baskin Engineering Building

(831) 459-4143

<http://undergrad/pbsci.ucsc.edu/index.html>

---

### PROGRAM DESCRIPTION

---

Chemistry is central to modern science and, ultimately, most phenomena in biology, medicine, geology, and the environmental sciences can be described in terms of the chemical and physical behavior of atoms and molecules. Because of the wide appeal and utility of chemistry, UCSC offers many lower-division courses, differing in emphasis and style, to meet diverse needs. Students should also note the numerous upper-division course offerings and select those most suitable to their academic interests. The curriculum in chemistry exposes the student to the principal areas of modern chemistry, including organic, inorganic, physical, analytical, and biochemistry. The curriculum is designed to meet the needs of students who plan to end their formal education with a bachelor of arts (B.A.) or bachelor of science (B.S.) degree, as well as those who wish to go on for an advanced degree. The UCSC chemistry B.A. or B.S. graduate is well prepared to pursue a career in chemistry or an allied field.

Research in chemistry at UCSC is closely interwoven with graduate and undergraduate education. The chemistry and biochemistry research program is active at the graduate level, and faculty also encourage undergraduates to become involved in research. Research is done for academic credit in Chemistry 195A-B-C, Senior Research; or in Chemistry 199, Tutorial. There are also opportunities for interdisciplinary research combining chemistry with a wide range of sciences, for example, physics, geology, oceanography, biology, computer science, microbiology and environmental toxicology. At UCSC, it is not uncommon for students to see their own original work published in research journals.

Chemistry and biochemistry faculty and approximately 90 graduate students and 30 postdoctoral fellows are housed in the Physical Sciences Building near the Science Library. Standard and specialized

spectrophotometric equipment, a number of instruments devoted to structural studies, instrumentation for specialized analytical purposes, and computer facilities used in studies of structure and reactivity are all available. The Science Library has an excellent collection of current journals, in print and electronic form, and reference works, as well as earlier volumes of all the major journals. Additional source material can be readily and rapidly obtained on interlibrary loan.

A degree in chemistry opens the door to a wide variety of academic careers. Some UCSC graduates are working as researchers in industry in areas such as electronic materials, biotechnology, medicinal chemistry, or laser technology. Others have entered government service as research chemists in the Food and Drug Administration, the Environmental Protection Agency, or law enforcement crime laboratories. Fields such as patent law, commercial development, and scientific writing are open to graduates. Many chemistry majors go on to university graduate programs across the nation to prepare for careers in research, teaching, or a combination of the two. The degree in chemistry also provides a strong disciplinary background in preparation for a career in the important and much needed area of science teaching in high school. A major in chemistry is also an excellent beginning for one of the many opportunities in the health sciences.

The UCSC Chemistry and Biochemistry Department offers both B.S. and B.A. degree programs. The B.S. degree should be the choice if a student is interested in getting a job in industry immediately after receiving his or her college degree. The B.S. program also provides a good background for graduate work in chemistry. The B.A. program has fewer requirements and should be considered by students who wish to take more science courses outside of chemistry to enter an

## Chemistry and Biochemistry Program

interdisciplinary area. Examples might be chemical oceanography, geochemistry, chemical physics, environmental chemistry, and health sciences. The B.A. might also be a good choice for students who wish to become high school teachers. However, for either degree, the courses stress the fundamentals of chemistry and allow students to pursue independent research.

A minor in chemistry is also offered for those who wish to have a strong complementary program in chemistry while majoring in another course of study.

---

### PROGRAM LEARNING OUTCOMES

---

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. or B.A. in chemistry or a B.S. in biochemistry and molecular biology should be able to:

1. demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
2. solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, test the correctness of the solution, and interpret their results;
3. use modern library search tools to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry, going beyond textbooks, common handbooks and general online resources, such as Wikipedia;
4. know and follow the proper procedures and regulations for safe handling and use of chemicals;
5. understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;
6. use computers in data acquisition and processing, and use available software as a tool in data analysis;

7. use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;
8. communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and
9. collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

---

### HIGH SCHOOL PREPARATION

---

Prospective chemistry majors are encouraged to get a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly recommended. Students who take chemistry at UCSC begin with Chemistry 1A or 1B, both of which require a strong background in high school chemistry. To assess your level of preparation in chemistry, please see the Chemistry Self-Assessment examination on the Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>. Students with a weak chemistry background should check this web site for recommended preparatory programs.

---

### PREREQUISITES

---

Prior to enrollment in the general chemistry sequence, CHEM 1ABC, students are encouraged to take the Chemistry Assessment Examination. For information about the assessment, visit the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>.

---

### LETTER GRADE POLICY

---

For all students entering UCSC in fall 2014 and later, all courses used to satisfy any of the majors requirements must be taken for a letter grade

Independent Study Course CHEM 199 may not be taken more than once per quarter and may be repeated no more than three times during an undergraduate career.

---

### MAJOR QUALIFICATION POLICY

---

The Department of Chemistry & Biochemistry has a qualification policy that applies to the following majors:

Chemistry BS

Chemistry BS with Biochemistry concentration

Chemistry BS with Environmental Chemistry concentration

Chemistry BA

## Chemistry and Biochemistry Program

To qualify to declare any of the above majors, students must achieve a cumulative grade point average (GPA) of 2.50 or greater in the following courses, or their equivalents:

CHEM 1A, General Chemistry

CHEM 1B, General Chemistry

CHEM 1C, General Chemistry

MATH 22, Introduction to Calculus of Several Variables

And one of the following calculus sequences:

MATH 11A and 11B, Calculus with Applications

MATH 19A and 19B, Calculus for Science, Engineering, and Mathematics

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- For policy courses that have been satisfied with AP credit based on an AP examination score of 5 (for Chemistry 1A), and an AP Calculus BC examination score of 4 or 5 (for Mathematics 11A or 19A), students may substitute a grade of A for each course when calculating their cumulative GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not eligible to declare.

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the students, the college, and the Office of the Registrar of the decision. For more information about the appeal process see the Physical & Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>.

### Transfer Students

The Chemistry and Biochemistry Department welcomes applications from community college students who are prepared to enter as junior-level chemistry majors. Prior to transfer, students must complete equivalents to the major qualification policy courses; a full year of both general chemistry and calculus. Transfer students are also strongly encouraged to complete a year of organic chemistry and a year of calculus-based physics. Transfer students are held to similar criteria for accessing the major and must complete the equivalents of the following courses to declare the major:

- CHEM 1A, General Chemistry
- CHEM 1B, General Chemistry
- CHEM 1C, General Chemistry
- MATH 11A, Calculus with Applications

- MATH 11B, Calculus with Applications
- MATH 22, Introduction to Calculus of Several Variables

Students planning to transfer to UCSC as a chemistry major from a California community college should reference [assist.org](http://assist.org) to determine which courses are equivalent to these required courses.

In addition to the required [transfer admissions](#) courses, we recommend that all transfer students complete equivalents of the following preparatory courses prior to transfer:

- CHEM 108A/L, Organic Chemistry with Lab
- CHEM 108B/M, Organic Chemistry with Lab
- PHYS 6A/L, Introductory Physics I
- PHYS 6B/ML, Introductory Physics II
- PHYS 6C/N, Introductory Physics III

---

## REQUIREMENTS FOR THE CHEMISTRY B.A. DEGREE

---

The requirements for the bachelor of arts in chemistry have been kept to a minimum so that students may tailor their program to their own purposes, for example, to pursue a double major, to study areas of the humanities or social sciences, to complete major requirements late in their college career, or to concentrate on a study in a specific branch of chemistry. The minimum requirements (including prerequisites) constitute 54 percent of a student's total undergraduate program; consequently, there is ample time to explore and discover other interests within the university. To plan wisely, students are advised to refer to each course description for a detailed listing of prerequisites. Students who decide they want a professional career in chemistry are advised to meet with the chemistry undergraduate faculty adviser.

### LOWER-DIVISION REQUIREMENTS

---

General Chemistry: Chemistry 1A, 1B/M, and 1C/N

Calculus: Mathematics 11A, 11B, and 22; or Mathematics 19A, 19B, and 22

Physics: Physics 5A/L, 5B/M, and 5C/N; or Physics 6A/L, 6B/M, and 6C/N

### UPPER-DIVISION REQUIREMENTS

---

Organic Chemistry: Chemistry 108A/L, 108B/M

Inorganic Chemistry: Chemistry 151A/L

Physical Chemistry: Chemistry 163A, 163B, and 164

One of the following laboratory courses:

Chemistry 146A, Advanced Laboratory in Organic Chemistry

## Chemistry and Biochemistry Program

Chemistry 146B, Advanced Laboratory in Inorganic Chemistry

Chemistry 146C, Advanced Laboratory in Physical Chemistry

Students currently conducting senior thesis research are required to choose an advanced laboratory in the Chemistry 146-series that is outside their research area.

### Elective(s)

At least two from the following:

Chemistry 103, Biochemistry

Chemistry 109, Organic Intermediate Chemistry

Chemistry 110/L, Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods/Intermediate Organic Chemistry Laboratory

Chemistry 143, Organic Chemical Structure and Reactions

Chemistry 151B, Chemistry of Main Element Groups

Chemistry 156C, Advanced Topics in Inorganic Chemistry

Chemistry 163C, Kinetic Theory and Reaction Kinetics, Statistical Mechanics, Spectroscopic Applications

Chemistry 167, Modern Chemical Biology

Chemistry 169, Chemistry and Biology of Drug Design and Discovery

Biochemistry and Molecular Biology 100A, Biochemistry and Molecular Biology

Biochemistry and Molecular Biology 100B, Biochemistry and Molecular Biology

Biochemistry and Molecular Biology 100C, Biochemistry and Molecular Biology

Microbiology and Environmental Toxicology 101, Sources and Fates of Pollutants

Microbiology and Environmental Toxicology 102, Cellular and Organismal Toxicology

Ocean Sciences 120, Aquatic Chemistry: Principles and Applications

Ocean Sciences 220, Chemical Oceanography

Physics 116A, Mathematical Methods in Physics

Physics 116B, Mathematical Methods in Physics

Physics 180, Biophysics

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of arts degree in chemistry is satisfied by completing

Chemistry 151L, Inorganic Chemistry Laboratory, and either Chemistry 146A, 146B, or 146C.

## CHEMISTRY MAJOR B.A. PLANNER

This is the ideal academic plan for chemistry B.A. majors. If needed, the plan can be arranged differently.

	Fall	Winter	Spring
<b>1st Year</b>	MATH 19A or 11A CHEM 1A	MATH 19B or 11B CHEM 1B/M	MATH 22 CHEM 1C/N
<b>2nd Year</b>	CHEM 108A/L PHYS 6A/L	CHEM 108B/M PHYS 6B/M	PHYS 6C/N
<b>3rd Year</b>	CHEM 163A	CHEM 163B CHEM 164	CHEM 146
<b>4th Year</b>	CHEM Elective	CHEM 103 CHEM 151A/L	CHEM Elective

## REQUIREMENTS FOR THE CHEMISTRY B.S. DEGREE

The bachelor of science major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly based, appropriate for that purpose. The course requirements for the B.S. major are as follows; please refer to each course description for a detailed listing of prerequisites.

### LOWER-DIVISION REQUIREMENTS

General Chemistry: Chemistry 1A, 1B/M, and 1C/N

Calculus: Mathematics 11A, 11B, and 22; or Mathematics 19A, 19B, and 22

Advanced Mathematics: Applied Mathematics and Statistics 10, or Mathematics 21, or Mathematics 24

Physics: Physics 5A/L, 5B/M, and 5C/N; or Physics 6A/L, 6B/M, and 6C/N

### UPPER-DIVISION REQUIREMENTS

Organic Chemistry: Chemistry 108A/L, 108B/M, and 110/L

Inorganic Chemistry: Chemistry 151A/L

Biochemistry: Chemistry 103

Physical Chemistry: Chemistry 163A, 163B, 163C, and 164

One of the following laboratory courses:

## Chemistry and Biochemistry Program

Chemistry 146A, Advanced Laboratory in Organic Chemistry

Chemistry 146B, Advanced Laboratory in Inorganic Chemistry

Chemistry 146C, Advanced Laboratory in Physical Chemistry

Students currently conducting senior thesis research are required to choose an advanced laboratory in the Chemistry 146-series that is outside their research area.

### ELECTIVE(S)

At least two from the following list:

Chemistry 122, Principles of Instrument Analysis\*

Chemistry 143, Organic Chemical Structure and Reactions

Chemistry 151B, Chemistry of the Main Element Groups

Chemistry 156C, Advanced Topics in Inorganic Chemistry

Chemistry 167, Modern Chemical Biology

Chemistry 169, Chemistry and Biology of Drug Design and Discovery

Biochemistry and Molecular Biology 100A, Biochemistry and Molecular Biology

Biochemistry and Molecular Biology 100B, Biochemistry and Molecular Biology

Biochemistry and Molecular Biology 100C, Biochemistry and Molecular Biology

Microbiology and Environmental Toxicology 101, Sources and Fates of Pollutants

Microbiology and Environmental Toxicology 102, Cellular and Organismal Toxicology

Ocean Sciences 120, Aquatic Chemistry: Principles and Applications

Ocean Sciences 220, Chemical Oceanography

Physics 116A, Mathematical Methods in Physics

Physics 116B, Mathematical Methods in Physics

Physics 180, Biophysics

\*To receive certification from the American Chemical Society, you must complete Chemistry 122; see additional information below.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of science degree in chemistry is satisfied by completing

Chemistry 151L, Inorganic Chemistry Laboratory, and either Chemistry 146A, 146B, or 146C.

### CHEMISTRY MAJOR B.S. PLANNER

This is the ideal academic plan for those pursuing the chemistry B.S. major. If needed, this plan can be arranged differently.

	Fall	Winter	Spring
1st Year	MATH 11 or 19A CHEM 1A	MATH 11B or 19B CHEM 1B/M	MATH 22 CHEM 1C/N
2nd Year	CHEM 108A/L PHYS 6A/L	CHEM 108B/M PHYS 6B/M	CHEM 110/L PHYS 6C/N
3rd Year	CHEM 163A	CHEM 163B CHEM 164	CHEM 163C
4th Year	CHEM Elective	CHEM 103 CHEM 151A/L	CHEM Elective CHEM 146

### CHEMISTRY B.S. DEGREE WITH BIOCHEMISTRY CONCENTRATION

The biochemistry concentration is designed for students who intend to pursue a career in biochemistry or in a related field such as biotechnology, and it provides an exceptionally rigorous chemistry emphasis.

#### LOWER-DIVISION REQUIREMENTS

General Chemistry: Chemistry 1A, 1B/M, 1C/N

Calculus: Mathematics 11A, 11B, and 22; or Mathematics 19A, 19B, and 22

Advanced Mathematics: Applied Mathematics and Statistics 10, or Mathematics 21, or Mathematics 24

Introductory Biology: Molecular, Cellular and Developmental Biology (BIOL) 20A, and Ecology and Evolutionary Biology (BIOE) 20B

Physics: Physics 5A/L, 5B/M, and 5C/N; or Physics 6A/L, 6B/M, and 6C/N

#### UPPER-DIVISION REQUIREMENTS

Organic Chemistry: Chemistry 108A/L, 108B/M, and 110/L

Inorganic Chemistry: Chemistry 151A/L

Biochemistry: Biochemistry and Molecular Biology 100A-B-C and 110L

Physical Chemistry: Chemistry 163A, 163B, and 163C

## Chemistry and Biochemistry Program

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in chemistry with a biochemistry concentration is satisfied by completing Chemistry 151L, Inorganic Chemistry Laboratory, and Biochemistry and Molecular Biology 110L, Advanced Biochemistry Laboratory.

### CHEMISTRY MAJOR B.S. WITH BIOCHEMISTRY CONCENTRATION PLANNER

---

This is the most general academic plan for this major. If needed, the plan can be rearranged.

	Fall	Winter	Spring
<b>1st Year</b>	MATH 11 or 19A CHEM 1A	MATH 11B or 19B CHEM 1B/M	BIOE 20A MATH 22 CHEM 1C/N
<b>2nd Year</b>	CHEM 108A/L PHYS 6A/L BIOE 20B	CHEM 108B/M PHYS 6B/M	CHEM 110/L PHYS 6C/N
<b>3rd Year</b>	BIOC 100A	BIOC 100B	BIOC 100C BIOC 110L

### BIOCHEMISTRY AND MOLECULAR BIOLOGY B.S.

---

See the biochemistry and molecular biology program description and major requirements.

### CHEMISTRY B.S. DEGREE WITH ENVIRONMENTAL CHEMISTRY CONCENTRATION

---

A concentration within the biology, chemistry and biochemistry, and Earth sciences disciplines, collectively identified as the environmental sciences program, is offered. Students will develop a core competence suitable for pursuing graduate work in the environmental chemistry area or in graduate environmental sciences programs.

#### Lower-Division Requirements

---

General Chemistry: Chemistry 1A, 1B/M, and 1C/N  
Introductory Biology: Molecular, Cell, and Developmental Biology (BIOL) 20A, and Ecology and Evolutionary Biology (BIOE) 20B

Geology: Earth Sciences 20/L, 10/L, or 5/L

Environmental Policy and Economics: Environmental Studies 25

Calculus: Mathematics 11A, 11B and 22; or 19A, 19B and 22

Physics: Physics 5A/L, 5B/M, and 5C/N; or Physics 6A/L, 6B/M, and 6C/N

#### Upper-Division Requirements

---

Environmental Toxicology: Microbiology and Environmental Toxicology 101 or 102

Biochemistry: Chemistry 103

Organic Chemistry: Chemistry 108A/L, 108B/M and 110

Instrumental Analysis: Chemistry 122

Inorganic Chemistry: Chemistry 151A/L

Physical Chemistry: Chemistry 163A, 163B, and 164

Earth Sciences: Earth Sciences 110B/M

Ocean Sciences: Ocean Sciences 120 or 220 (Ocean Sciences 220 must be taken for a letter grade)

One of the following laboratory courses:

Chemistry 146A, Advanced Laboratory in Organic Chemistry

Chemistry 146B, Advanced Laboratory in Inorganic Chemistry

Chemistry 146C, Advanced Laboratory in Physical Chemistry

Students currently conducting senior thesis research are required to choose an advanced laboratory in the Chemistry 146-series that is outside their research area.

#### Disciplinary Communication (DC) Requirement

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in chemistry with an environmental chemistry concentration is satisfied by completing Chemistry 151L, Inorganic Chemistry Laboratory, and either Chemistry 146A, 146B, or 146C.

## Chemistry and Biochemistry Program

### Chemistry Major B.S. with Environmental Chemistry Planner

This is the most general academic plan for this major. If needed, this plan can be rearranged.

	Fall	Winter	Spring
1st Year	MATH 11 or 19A CHEM 1A	MATH 11B or 19B CHEM 1B/M	MATH 22 CHEM 1C/N BIOL 20A
2nd Year	CHEM 108A/L PHYS 6A/L BIOE 20B	CHEM 108B/M PHYS 6B/M ENVS 25	EART 10/L CHEM 110/L PHYS 6C/N
3rd Year	BIOC 163A CHEM 122	CHEM 163B EART 110B/M CHEM 151A/L	
4th Year	METX 101	CHEM 164 OCEA 220	CHEM 103 CHEM 146B or 146C

#### REQUIREMENTS FOR THE MINOR

The course requirements for the minor, including electives, are the same as for the B.A. degree, with the exclusion of Chemistry 146A, 146B, 146C, 151A/151L, and 164. The minor has no senior comprehensive requirement.

#### COMPREHENSIVE REQUIREMENT

The comprehensive requirement is a part of all UCSC degrees. In the Department of Chemistry and Biochemistry, there are two options for satisfying this requirement:

**Senior thesis:** A senior research project based on original experimental or theoretical research (Chemistry 195A-B-C, Senior Research). At the conclusion of the project, the student submits a satisfactory formal research paper to the faculty sponsor. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry or the biochemistry and molecular biology major programs. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry or the biochemistry and

molecular biology major programs should have the title and description of the proposed thesis reviewed by the Chemistry and Biochemistry Department undergraduate faculty adviser. Students, usually working in the laboratory of the faculty sponsor, acquire experimental and/or theoretical research experience and skills in the laboratory as well as instruction in the writing of a research paper. Students are expected to make satisfactory academic progress and be in good academic standing while they take Chemistry 195 courses. Students who achieve excellence in both research and thesis may be awarded honors in the thesis upon graduation.

**Senior essay:** An essay based on literature research (Chemistry 194, Senior Essay). After agreeing in advance on an appropriate topic of interest and a format, the student submits a satisfactory essay on the topic. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry major program. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry and biochemistry major program should have the title and description of the proposed essay reviewed by the Chemistry and Biochemistry Department undergraduate faculty adviser. Students acquire experience and skills in scientific literature research as well as in the writing of a research paper.

#### ADVISING

The chemistry and biochemistry adviser provides counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic career to ensure completion of their major in a timely manner. For assistance with advising, please refer to the Physical and Biological Sciences Undergraduate Affairs web site at <http://undergrad.pbsci.ucsc.edu/>.

#### MATERIALS FEE

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student's account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Fees generally range from \$15 to \$50 per course. Students may incur additional expense purchasing individual supplies.

#### PROGRAM FOR STUDENTS OF THE HEALTH SCIENCES

Students intending to enter medical, dental, or another health science professional school can satisfy entrance

## Chemistry and Biochemistry Program

requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are urged to contact the Career Center for assistance with the application process.

### AMERICAN CHEMICAL SOCIETY CERTIFICATION

---

The American Chemical Society (ACS) recognizes certain undergraduate programs, including those of UCSC, to be of such quality as to entitle graduates to become ACS members immediately upon graduation. Graduates must be individually certified to the ACS by the Chemistry and Biochemistry Department chair if they have satisfactorily completed an approved program of study. ACS certification standards are rigorous; a graduate who has met them carries a distinction that is well recognized in the profession. Broadly speaking, ACS certification requirements are satisfied by completing a B.S. major in chemistry (not including the biochemistry concentration) at UCSC, including Chemistry 122 as an elective. A year of study in a major modern foreign language (preferably German) is recommended. More information is available from the Chemistry and Biochemistry undergraduate adviser.

### HONORS IN THE MAJOR

---

Honors in the Chemistry major requires a 3.5 or higher GPA in all chemistry courses; highest honors requires a 3.8 or higher GPA in all chemistry courses for the major. Students may also receive honors for a senior research thesis.

### GRADUATE PROGRAMS

---

The Chemistry and Biochemistry Department offers three graduate degrees: the doctor of philosophy (Ph.D.), a thesis master of science (M.S.), and a coursework M.S. The Ph.D. and thesis M.S. programs are designed to help students develop into independent scholars while pursuing the excitement of scientific research in a personal, supportive environment. Both the Ph.D. and the research M.S. programs prepare students for careers in academia, industry, government laboratories, and other settings requiring an advanced education in chemistry and related disciplines. The coursework M.S. does not require research and is suited to teachers and others wishing to update or broaden their chemical expertise. Approximately 90 graduate students are currently enrolled in the graduate program.

Within the Ph.D. program students have the flexibility to design a course of study focused on personal research interests, and at the same time are expected to

maintain the high intellectual standards associated with the doctoral degree. Research options include biochemistry, physical chemistry, biophysical chemistry, inorganic chemistry, bioinorganic chemistry, materials chemistry, organic chemistry, and bio-organic chemistry. Collaborative research efforts are encouraged, both intra- and inter-departmentally. The interdisciplinary Center for Biomolecular Science and Engineering emphasizes bioinformatics, nanotechnology, and computational approaches to chemistry. Biochemists join geneticists, computer scientists, and biologists in the Center for the Molecular Biology of RNA. Productive interactions have developed between the Chemistry and Biochemistry Department, the Department of Microbiology and Environmental Toxicology, the Department of Molecular, Cell and Developmental Biology, and the School of Engineering. Several Chemistry and Biochemistry faculty members also participate in the new graduate Program in Biomedical Sciences and Engineering.

Before beginning coursework, Ph.D. students take attainment examinations to confirm their level of preparation in four areas: organic, inorganic, physical, and biochemistry. First-year students take Chemistry 292 and 296 and enroll in core courses and electives related to their specialization. Core courses are Chemistry 200A, B, and C for biochemistry and biophysical chemistry; Chemistry 151B, 234 and either one of the 256 series or 268 for inorganic and bioinorganic chemistry; Chemistry 242A, 242B, 242C for organic chemistry; and Chemistry 261, 262, and 263 for physical chemistry. Organic studies students must pass four cumulative examinations based on assigned reading in current research journals within the first two years. Students select a research adviser and research committee by May 1 of the first year. The Ph.D. candidate's research committee meets formally with the student to evaluate research progress at least once a year. Students are expected to finish all Ph.D. requirements in five to six years.

M.S. students and Ph.D. students who have not advanced to candidacy enroll in a weekly seminar (Chemistry 291). Speakers from UCSC, other universities, and research labs expose students to advances at the frontiers of chemical research, offering the opportunity for personal contact with leading scientists.

Teaching assistantships provide both financial support and the opportunity to put into practice the required pedagogical training offered in Chemistry 296 (presentation techniques, discussion strategies, laboratory teaching skills, laboratory safety procedures,

## Chemistry and Biochemistry Program

and time management). Doctoral students are also supported as graduate-student researchers.

### Ph.D. Requirements

---

- Pass three out of four attainment examinations and meet any deficiencies as directed by spring of the first year.
- Take Chemistry 292 and 296 in fall of the first year.
- Take Chemistry 291, Research Seminar, every quarter until advanced to candidacy.
- Organic studies students must pass four out of 12 "cumulative examinations" based on reading lists of current published organic research.
- Select an adviser and nominate members of the research committee by May 1 of the first year.
- Present a second-year seminar on a topic of current interest in published research outside the candidate's own research area.
- Serve as a teaching assistant (TA) during at least three quarters in the first two years, before attempting the Ph.D. oral qualifying examination.
- Pass five lecture courses (25 credits): at least four at the graduate (200) level, and at least four in chemistry and biochemistry (with departmental approval, up to two courses may be at upper-division undergraduate level).
- In fall of the third year, pass the Ph.D. oral qualifying examination before an examining committee consisting of three research committee members plus one outside member approved by the graduate dean. The Ph.D. candidate presents (a) a summary of current research results and possible future direction, and (b) an original research proposal on a chemistry or biochemistry topic either related or unrelated to the candidate's current thesis research.
- Nominate members of the Dissertation Reading Committee (DRC).
- After advancing to candidacy, submit a research prospectus (outline of dissertation chapters) and meet with the DRC to review research progress annually.

- Submit an updated research prospectus (outline of dissertation chapters) to the DRC in the winter of the fifth year.
- Submit written dissertation based on original research.
- Present dissertation seminar.

The average time to degree is five and one-quarter years. Ph.D. candidates are expected to complete research and write the dissertation within nine quarters after advancing to candidacy following a successful Ph.D. oral qualifying examination. Financial support is not available after 18 quarters in the graduate program.

For both Ph.D. and M.S. students, the standard course load is three courses per quarter, or a total of 15 credits per quarter.

### M.S. REQUIREMENTS: RESEARCH THESIS PATH

---

- Pass three out of four attainment examinations in the first year.
- Take Chemistry 292.
- Take Chemistry 296 if working as teaching assistant (TA) at any time.
- Take Chemistry 291 each quarter.
- Select an adviser and nominate members of the research committee in the first year.
- Pass at least five Chemistry and Biochemistry lecture courses, of which at least three must be graduate (200) level.
- Conduct original laboratory research.
- Capstone requirement: write a thesis based on original research.

### M.S. REQUIREMENTS: COURSEWORK PATH

---

- Pass three out of four attainment examinations in the first year.
- Take Chemistry 296 if enrolled as teaching assistant (TA) at any time.
- Take Chemistry 291 each quarter.
- Pass seven chemistry lecture courses (at least four at the graduate (200) level) from three of the four sub-disciplines: organic, inorganic, physical chemistry, and biochemistry.
- Capstone requirement: present a seminar on a topic of current interest in published research.

---

## CHEMISTRY AND BIOCHEMISTRY FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**Ilan Benjamin**

Theoretical chemistry, molecular dynamics of chemical reactions in liquids and at interfaces

**Roberto A. Bogomolni**

Biophysical chemistry, photobiology, light energy conversion and signal transduction in biological systems

**Rebecca Braslau**

Synthetic organic chemistry: new synthetic methodologies using free radicals; nitroxides, nitroxide mediated "living" polymerizations: design and functionalization of tailored polymers for biomedical applications and nanotechnology, profluorescent nitroxides as sensors, synthetically modified polymers, development of non-migratory plasticizers

**Shaowei Chen**

Synthesis, characterization, and manipulation of novel functional nanomaterials (metals and semiconductors); surface engineering of nanoparticles; nanoscale electron transfer; applications in fuel cells, photocatalysis, photovoltaics, and nano optoelectronics

**Ólöf Einarsdóttir**

Time-resolved spectroscopy; biophysics and bioenergetics; heme-copper oxidases; electron transfer and ligand binding; application of photolabile NO and O<sub>2</sub> donors; molecular dynamics simulations of ligand access channels in heme-copper oxidases

**Theodore R. Holman**

Biochemistry and bioinorganic chemistry; lipoxygenase enzymology, protein engineering, inhibitor discovery, computer inhibitor design, mass spectroscopy, electron paramagnetic resonance

**Joseph P. Konopelski**

Synthetic organic chemistry; heterocyclic chemistry, bioorganic chemistry

**R.Scott Lokey**

Organic chemistry; combinatorial synthesis, biotechnology, molecular cell biology

**Pradip Mascharak**

Bioinorganic chemistry, design of antitumor drugs, modeling of active sites of metalloenzymes, design of catalysts for hydrocarbon oxidation, studies on intermediates in non-heme oxygenase chemistry, design of NO-donors for photodynamic therapy

**Glenn L. Millhauser**

Electron paramagnetic resonance; nuclear magnetic

resonance, protein structure and function, peptide synthesis, prions, melanocortin signaling

**Scott R. Oliver**

Materials chemistry: nanoporous inorganic and metal-organic materials for environmental cleanup of water, desulfurization of fuel and biomaterials

**William G. Scott**

Structure and function of RNA, proteins, and their complexes, origin of life

**Bakthan Singaram**

Organic synthesis, organoborane chemistry, heterocyclic chemistry, organometallic chemistry, asymmetric synthesis, biosensors, and natural products chemistry

**Jin Z. Zhang**

Design, synthesis, characterization, and application of nanomaterials, including semiconductors, metals, and metal oxides; ultrafast dynamics and laser spectroscopy; cancer diagnosis and therapy; solar energy conversion; surface-enhanced Raman spectroscopy (SERS)

### ASSOCIATE PROFESSOR

---

**Yat Li**

Experimental physical chemistry, nanomaterials, energy conversion and storage, microbial fuel cell technology

**Roger G. Linington**

Marine natural products; drugs for neglected diseases; chemical biology; chemical probes

**Seth M. Rubin**

Biomolecular mechanisms of cell-cycle regulation and cancer; structural biology and biochemistry; macromolecular x-ray crystallography; nuclear magnetic resonance

**Michael Stone**

Molecular basis of telomere length and telomerase-related diseases; biophysical characterization of nucleic acid-associated molecular motors; development of novel approaches for imaging enzymes in cells

### ASSISTANT PROFESSOR

---

**Alexander Ayzner**

Experimental physical chemistry; organic semiconductors; molecular spectroscopy; electron transfer dynamics; X-ray scattering and spectroscopy

**Carrie Partch**

Biochemistry and biophysics, nuclear magnetic

## Chemistry and Biochemistry Program

resonance spectroscopy; molecular mechanism of circadian rhythmicity

### **Jevgenij Raskatov**

Chemical biology, organic chemistry, molecular modeling, chemotherapy, inflammation

### **Nikolaos Sgourakis**

Modeling protein complexes from sparse NMR data; hybrid methods in structural biology; antigen processing and presentation; viral immune regulation mechanisms

## CHEMISTRY AND BIOCHEMISTRY RESEARCH PROFESSORS

---

### **Philip O. Crews**

Marine natural products chemistry, bioorganic chemistry, organic structural analysis by NMR, natural products of marine macro- and microorganisms

### **David S. Kliger**

Time-resolved laser spectroscopy, biophysics, studies of visual transduction, protein function, and protein folding

## CHEMISTRY AND BIOCHEMISTRY EMERITUS FACULTY

---

### **Roger W. Anderson**

Design of anti-reflection graded refractive index coatings for solar energy collection, achromatic focusing of molecules with external electric fields, discrete orthogonal polynomials in molecular collision theory, and semiclassical asymptotic analysis of Racah and Hahn polynomials

### **Frank C. Andrews**

### **Claude F. Bernasconi**

Kinetic studies of fast reactions, organic reaction mechanisms, acid-base catalysis, proton transfers, nucleophilic reactions, organometallic reactions, ab initio molecular orbital calculations

### **Joseph F. Bunnett**

Physical organic chemistry, with special attention to mechanisms of aromatic nucleophilic substitution

### **Thomas W. Schleich**

Biomedical magnetic resonance spectroscopy, magnetic resonance imaging, nuclear magnetic resonance spectroscopy, biophysical chemistry

### **Eugene Switkes**

Quantum theory applied to problems in chemistry and biochemistry; visual information processing, spatial vision, color vision

### **Stanley M. Williamson**

### **W. Todd Wipke**

Molecular engineering for drug discovery;

computational chemistry in improving cancer chemotherapy, solar energy conversion, and continuous glucose monitoring

## Chemistry and Biochemistry Lecturers

### **Caitlin Binder**

### **Randa Roland**

## ADJUNCTS

---

### **Christopher H. Becker (Protein Metrics Inc.)**

Biological mass spectrometry, therapeutic protein development, biomarker development, chemical physics

### **William L. Fitch (Stanford, Roche Palo Alto)**

Organic mass spectrometry, drug metabolism, metabolomics, bioanalytical chemistry

### **Jinghua Guo (Lawrence Berkeley National Laboratory)**

Nanostructured materials, interfacial structure and chemistry in energy conversion, energy storage, and catalysis; electronic structure and synchrotron radiation based soft X-ray spectroscopy

### **Greg L. Hura (Lawrence Berkeley National Laboratory)**

Mechanisms of biological macromolecules inspire nanoscale engineering strategies and provide insights into disease; biochemistry and biophysics

## AFFILIATES

---

### **Phillip Berman (Biomolecular Engineering)**

Drug development vaccines, AIDS, monoclonal antibody therapeutics, immunology, molecular cell/biology, recombinant protein production (commercial scale)

### **Manel Camps (Microbiology and Environmental Toxicology)**

Molecular mechanisms of reactive DNA methylation toxicity

### **A. Russell Flegal (Microbiology and Environmental Toxicology)**

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

### **Donald R. Smith (Microbiology and Environmental Toxicology)**

Neurotoxicity, cellular and organismal responses to environmental toxins

### **Phillip Berman (Biomolecular Engineering)**

Drug development vaccines, AIDS, monoclonal antibody therapeutics, immunology, molecular cell/biology, recombinant protein production (commercial scale)

**Holger Schmidt (Electrical Engineering)**

Optofluidics, atom photonics, hollow-core photonics for biomedicine and quantum optics, nanomagnetism,

nanomagneto-optics, single-particle spectroscopy, ultrafast optics

---

## CHEMISTRY AND BIOCHEMISTRY PROGRAM COURSES

---

### LOWER-DIVISION COURSES

---

**1A. General Chemistry. F,W,S**

First quarter of an integrated study of general chemistry. Covers a range of topics including the atomic structure of matter; molecules; chemical reactions; acids and bases; gases; and equilibria in the gas and liquid phase. Students expected to use algebra to solve problems. Prerequisite(s): Previous or concurrent enrollment in MATH 3 (or equivalent), or a mathematics placement score of 300 or higher; taking the online chemistry self-assessment exam is strongly recommended. (General Education Code(s): SI, IN, Q.) R. Roland, S. Rubin, G. Millhauser

**1B. General Chemistry. F,W,S**

Second quarter of an integrated study of general chemistry. Coverage includes quantum mechanics; the hydrogen atom; many-electron atoms and chemical periodicity; elementary covalent bonding; transition metals; and chemical kinetics. Prerequisite(s): Strong high school level chemistry is strongly recommended; taking the online chemistry self-assessment examination is strongly recommended. Concurrent enrollment in course 1M is recommended. (General Education Code(s): IN, Q.) J. Zhang, G. Millhauser, R. Bogomolni

**1C. General Chemistry. F,W,S**

Third quarter of an integrated study of general chemistry. Coverage includes thermodynamics; oxidation-reduction and electrochemistry; liquids and solids; intermolecular forces and solutions, including colligative properties; and

nuclear chemistry. Prerequisite(s): course 1A. Concurrent enrollment in course 1N is required. (General Education Code(s): IN, Q.) P. Weiss

**1M. General Chemistry Laboratory (2 credits). F,W,S**

Laboratory sequence illustrating topics covered in courses 1B and 1C and important experimental techniques. Students are billed a materials fee. Prerequisite(s): Previous or concurrent enrollment in course 1B is required. R. Roland, P. Weiss

**1N. General Chemistry Laboratory (2 credits). F,W,S**

Laboratory sequence illustrating topics covered in courses 1B-1C, respectively, and important experimental techniques. Students are billed a materials fee. Prerequisite(s): Concurrent enrollment in course 1C is required. R. Roland

**99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

---

### UPPER-DIVISION COURSES

---

**103. Biochemistry. W**

Introduction to biochemistry including biochemical molecules, protein structure and function, membranes, bioenergetics, and regulation of biosynthesis. Provides students with basic essentials of modern biochemistry. Students who plan to do advanced work in biochemistry and molecular biology

should take the Biochemistry and Molecular Biology (BIOC) 100 series. Students cannot receive credit for this course after they have completed any two courses from the BIOC 100A, 100B, and 100C sequence. Prerequisite(s): course 108B. M. Stone

**108A. Organic Chemistry. F,W**

Introduction to organic chemistry, with an emphasis on bonding and reactivity or organic compounds. Prerequisite(s): courses 1B and 1C. R. Lokey, J. Konopelski

**108B. Organic Chemistry. W,S**

Introduction to organic chemistry, with an emphasis on reactivity and synthesis of organic compounds. Prerequisite(s): course 108A. C. Binder, B. Singaram

**108L. Organic Chemistry Laboratory (2 credits). F,W**

Laboratory experience in organic chemistry associated with course 108A. Designed to introduce the student to the many techniques associated with organic chemistry while affording an opportunity to explore the concepts discussed in the lecture material. Laboratory: 4 hours, lecture: 1-1/4 hours. Students are billed a materials fee. Prerequisite(s): courses 1C and 1N and previous or concurrent enrollment in 108A is required. C. Binder

**108M. Organic Chemistry Laboratory (2 credits). W,S**

Laboratory experience in organic chemistry associated with course 108B. Designed to introduce the student to the many techniques associated with organic chemistry

## Chemistry and Biochemistry Program

while affording an opportunity to explore the concepts discussed in the lecture material. Laboratory: 4 hours, lecture: 1-1/4 hours. Students are billed a materials fee. Prerequisite(s): courses 108A and 108L and previous or concurrent enrollment in 108B is required. C. Binder

### **109. Intermediate Organic Chemistry and Applications to Biology (3 credits). S**

Integrated study of fundamental organic chemistry, with emphasis on materials especially relevant to biological sciences. Prerequisite(s): course 108B or equivalent. C. Binder

### **110. Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods. S**

An intermediate study of organic chemistry, including synthetic methods, reaction mechanisms, and application of synthetic chemistry techniques. Prerequisite(s): course 108B. Enrollment restricted to chemistry majors, minors and proposed majors. J. Raskatov

### **110L. Intermediate Organic Chemistry Laboratory (2 credits). S**

Laboratory experience in organic chemistry and associated principles. Experiments involve the preparation, purification, characterization, and identification of organic compounds, and make use of modern as well as classical techniques. Students are billed a materials fee. Prerequisite(s): course 108M and previous or concurrent enrollment in course 110. Enrollment restricted to chemistry majors and minors. C. Binder

### **122. Principles of Instrumental Analysis. F**

A laboratory course designed to develop familiarity with techniques and instrumentation used in analytical chemistry, emphasizing determination of trace inorganic species. Primary emphasis on applications utilizing the absorption or emission of electromagnetic radiation and on voltammetry. Topics include molecular UV-visible absorption and fluorescence spectrometry; atomic absorption, emission and fluorescence spectrometry; and various forms of voltammetry. Lecture: 2 hours; laboratory: 8 hours. Students are billed a materials fee. Prerequisite(s): course 110 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior chemistry (B.S.) majors. (General Education Code(s): W.) P. Mascharak

### **143. Organic Chemical Structure and Reactions. F**

Advanced topics such as the chemistry of terpenes, steroids, synthetic polymers, alkaloids, reactive intermediates, and reaction mechanisms are treated. Lecture: 4 hours. Prerequisite(s): course 110. B. Singaram

### **146A. Advanced Laboratory in Organic Chemistry (3 credits). F**

Exposes students to advanced laboratory techniques in organic chemistry. Designed for students without previous research background in organic chemistry. Experiments carry a research-like format and cover the areas of natural products and reaction chemistry. Modern methods of organic analysis are emphasized including chromatographic methods and organic structure determination by spectroscopy. Laboratory: 8 hours. Students billed

a materials fee. Prerequisite(s): courses 110/L; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to chemistry majors. Minors by permission of instructor. Enrollment limited to 16. C. Binder

### **146B. Advanced Laboratory in Inorganic Chemistry (3 credits). S**

Designed to expose students to advanced synthetic and spectroscopic techniques in inorganic chemistry. Examples include anaerobic manipulations, characterization of inorganic materials through spectral assignments and synthesis of coordination and organometallic complexes. Lecture: 1-1/4 hours; laboratory: 8 hours. Students billed a materials fee. Prerequisite(s): courses 151A/L; 163A; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to chemistry majors. Minors by permission of instructor. T. Holman

### **146C. Advanced Laboratory in Physical Chemistry (3 credits). S**

Provides advanced laboratory experience in the areas of nanomaterial synthesis and characterization; spectroscopy; fabrication and measurements energy-conversion devices; and soft lithography techniques and instrumentation. Lecture: 1-1/4 hours; laboratory: 4 hours. Students are billed a materials fee. Prerequisite(s): courses 163B and 164; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to chemistry majors. Minors by permission of instructor. Enrollment limited to 20. Y. Li

### **151A. Chemistry of Metals.**

Fundamental topics of inorganic chemistry are presented at the level of the standard texts of field. Special

## Chemistry and Biochemistry Program

emphasis is given to maintain breadth in the areas of metallic, nonmetallic, and biological aspects of inorganic chemistry. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. Prerequisite(s): courses 108B/M and 163A. Concurrent enrollment in course 151L required. Enrollment restricted to chemistry majors and minors; other majors by permission of instructor. T. Holman

### **151B. Chemistry of the Main Group Elements. S**

Fundamental aspects of inorganic chemistry of main group elements are discussed. The emphasis is placed on the chemistry of nontransition elements including noble gases and halogens. In addition, students are exposed to the concepts of extended structures, new materials, and solid-state chemistry. Lecture: 3-3/4 hours. Prerequisite(s): courses 110, 110L, and 163A. Recommended for chemistry majors. P. Mascharak

### **151L. Inorganic Chemistry Laboratory (2 credits). W**

Laboratory experience in inorganic chemistry. Experiments involve the preparation, purification, and characterization of inorganic compounds. In addition, experiments are designed to illustrate fundamental principles in inorganic chemistry and are coordinated with lectures in course 151A. Laboratory: 4 hours per week. Laboratory lecture: 1 1/4 hours per week. Students are billed a materials fee. Prerequisite(s): courses 108B/M and 163A. Concurrent enrollment in course 151A required. Enrollment restricted to chemistry majors and minors; other majors by permission of instructor. T. Holman

### **156C. Advanced Topics in Inorganic Chemistry. \***

Advanced topics in inorganic

chemistry and an introduction to solid state chemistry. Synthesis and structure of materials discussed as well as their influence on properties for modern devices and applications. Recent developments in area of material science also explored. Taught in conjunction with course 256C. Prerequisite(s): course 151A. Enrollment restricted to seniors. S. Oliver

### **163A. Quantum Mechanics and Basic Spectroscopy. F**

A detailed introduction to quantum theory and the application of wave mechanics to problems of atomic structure, bonding in molecules, and fundamentals of spectroscopy. Prerequisite(s): courses 1B and 1C, Physics 5A-B-C or 6A-B-C and Mathematics 22 or 23B. Physics 6C can be taken concurrently. Y. Li

### **163B. Chemical Thermodynamics. W**

Fundamentals of thermodynamics and applications to chemical and biochemical equilibria. (Formerly Thermodynamics and Kinetic Theory.) Prerequisite(s): courses 1B and 1C, Physics 6A or 5A, and Math 22 or 23B. S. Chen

### **163C. Kinetic Theory and Reaction Kinetics, Statistical Mechanics, Spectroscopic Applications. S**

Introduction to statistical mechanics, kinetic theory, and reaction kinetics and topics in spectroscopy. Prerequisite(s): courses 163A and 163B. A. Ayzner

### **164. Physical Chemistry Laboratory. W**

Provides laboratory experience and data analysis in the areas of thermodynamics, kinetics, and spectroscopy. Lecture: 1.75 hours; experimental laboratory: 4 hours; computer laboratory: 2 hours. Students are billed a materials fee.

Prerequisite(s): courses 1B and 1C; and Physics 5A and Physics 5B and Physics 5C, or Physics 6A and Physics 6B and Physics 6C; and Mathematics 22 or Mathematics 23B. Course 163A is recommended. A. Ayzner

### **169. Chemistry and Biology of Drug Design and Discovery. S**

An overview of the central elements of drug discovery, including target selection and validation; computational or virtual screening; high-throughput screening; fragment-based methods; and pharmacokinetics. Prerequisite(s): course 103 or Biochemistry 100A. R. Lokey

### **170. Drug Action and Development. \***

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 270. (Formerly Frontiers in Drug Action and Discovery.) (Also offered as Biomolecular Engineering 170. Students cannot receive credit for both courses.) Prerequisite(s): Biology 100 or Chemistry 103 or Biochemistry 100A. Biology 110 and 130/L or 131/L are recommended. Enrollment restricted to juniors and seniors. D. Smith, T. Holman, M. Camps, R. Linington, P. Berman

### **182. ACE Program Service Learning (2 credits). F**

Students participate in training and development to co-facilitate collaborative learning in ACE chemistry discussion sections and midterm/exam review sessions.

## Chemistry and Biochemistry Program

Students are role models for students pursuing science- and math-intensive majors.

Prerequisite(s): Prior participation in ACE; good academic standing; no non-passing grades in prior quarter. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 10. (General Education Code(s): PR-S.) N. Cox-Konopelski

### **194. Senior Essay. F,W,S**

An individually supervised course with emphasis on reviewing the current scientific literature. Students are required to submit a summary and a critique of a scientific paper in the form of a senior essay. Students submit a petition to the sponsoring agency. This course may not be repeated for credit. The Staff

### **195A. Senior Research. F,W,S**

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit. The Staff

### **195B. Senior Research. F,W,S**

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit. The Staff

### **195C. Senior Thesis. F,W,S**

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three

quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit. (Formerly Senior Research.) The Staff

### **199. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## **GRADUATE COURSES**

### **200A. Advanced Biochemistry: Biophysical Methods. F**

An introduction to the theory, principles, and practical application of biophysical methods to the study of biomolecules, especially proteins and nucleic acids. Emphasis on spectroscopic techniques. Topics include magnetic resonance, optical spectroscopy, fast reaction techniques, crystallography, and mass spectrometry. S. Rubin

### **200B. Advanced Biochemistry: Macromolecular Structure and Function. W**

A detailed discussion of nucleic acid and protein chemistry, ranging from the structure, thermodynamics, and folding to the relationship between structure and function, and encompassing the methods used to determine such information. (Formerly Advanced Biochemistry: Protein Structure and Function.) N. Sgourakis

### **200C. Advanced Biochemistry: Enzyme Mechanisms and Kinetics. \***

A study of enzyme kinetics, mechanisms, and factors involved in enzymic catalysis. Lecture: 3-1/2 hours. (Formerly course 231, Enzyme Mechanisms and Kinetics.)

W. Scott

### **230. Grant Writing in Biomedical Research. S**

Introduces the fundamentals of grant writing in biomedical research, including best practices for presentation of data and communication of research findings. Students write and peer-edit most components of the NIH Ruth L. Kirschstein F31 predoctoral fellowship. Enrollment is restricted to graduate students. Enrollment limited to 16. C. Partch

### **234. Bioinorganic Chemistry. \***

The role played by transition metals in biological systems is discussed through application of the principles of coordination chemistry and inorganic spectroscopy. Topics include metalloproteins involved in oxygen binding, iron storage, biological redox reactions, and nitrogen fixation, as well as metal complexes of nucleic acids. Lecture: 4 hours. Prerequisite(s): courses 151A/L, 163A; and Biochemistry and Molecular Biology 100A. P. Mascharak

### **238. Topics in Biophysical Chemistry. \***

A discussion of the application of selected topics in biophysical chemistry to contemporary problems in biochemistry and molecular biology. Lecture: 3-1/2 hours. Offered in alternate academic years. C. Partch

### **242A. Modern Physical Organic Chemistry. W**

Covers molecular structure and bonding, strain, and non-covalent binding forces. Other topics include acid-base chemistry, kinetics, thermodynamics, catalysis, organic reactions and mechanism, and quantum mechanical approaches to the analysis of organic molecules.

## Chemistry and Biochemistry Program

Enrollment restricted to seniors who have taken course 143, and graduate students. J. Raskatov

### **242B. Modern Synthetic Methods in Organic Chemistry. F**

Presents concepts in bond formation, conformation, selectivity, and stereocontrol in modern organic synthesis. Focuses on understanding reaction mechanisms. Culminates with strategy in designing multi-step synthesis of complex targets. Enrollment restricted to seniors who have taken course 143, and graduate students. R. Braslau

### **242C. Spectroscopy and Applied Analytical Methods. \***

Presents strategies in organic structure elucidation, including nuclear magnetic resonance (NMR) and mass spectrometry. Provides theory and practical elements of structure elucidation and modern analytical methods for organic molecules. Enrollment restricted to seniors who have taken course 143, and graduate students. The Staff

### **246. Advanced Topics in Organic Chemistry. \***

A graduate course covering advanced topics in organic chemistry. Topics vary from year to year. The Staff

### **255. Biotechnology and Drug Development. W**

Recommended for students interested in careers in the biopharmaceutical industry. Focuses on recombinant DNA technology and the drug-development process, including discovery research; preclinical testing; clinical trials; and regulatory review, as well as manufacturing and production considerations. Students may not receive credit for this course and Biomolecular Engineering 155 and

Biology 179. (Also offered as Biomolecular Engineering 255. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. P. Berman

### **256A. Advanced Topics in Inorganic Chemistry. \***

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry. Prerequisite(s): courses 151A/L and 146B or graduate standing. The Staff

### **256B. Advanced Topics in Inorganic Chemistry. \***

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry. Prerequisite(s): courses 151A/L and 146B or graduate standing. T. Holman

### **256C. Advanced Topics in Inorganic Chemistry. \***

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry. Prerequisite(s): courses 151A/L and 146B or graduate standing. S. Oliver

### **256D. X-ray Crystallography. \***

Course in chemical crystallography focuses on the needs of small-molecule, single-crystal diffraction studies. Includes diffraction theory, space-group analysis, data collection, structure solution, and

refinement. Practical component: use of diffraction equipment and solution/refinement software. Enrollment restricted to graduate students and seniors who have taken courses 151A, 151L, and 163A. The Staff

### **261. Foundations of Spectroscopy. \***

The basic theory of time dependent processes is covered at an advanced level. The interaction of electromagnetic radiation and matter is described using both semiclassical and quantum field formulations. A variety of modern spectroscopic techniques are discussed both in terms of the basic processes and their use in the elucidation of chemical structure and dynamics. Prerequisite(s): course 163A. Offered in alternate academic years. J. Zhang

### **262. Statistical Mechanics. S**

Theory and concepts of statistical mechanics with applications to ideal gases, condensed systems, phase transition, and non-equilibrium thermodynamics. Lecture: 3-1/2 hours. Prerequisite(s): course 160B or 163A. Offered in alternate academic years. I. Benjamin

### **263. Quantum Mechanics. \***

A rigorous introductory course: the Schrödinger equation, operator formalism, matrix mechanics, angular momentum, and spin. Perturbation and other approximate methods. Applications to atomic and molecular problems. Lecture: 3-1/2 hours. Prerequisite(s): courses 163A and Physics 114A-B. Offered in alternate academic years. The Staff

### **265. Computer Simulation in Statistical Mechanics. \***

A detailed introduction of the use of computer simulation methods in

## Chemistry and Biochemistry Program

physical and biophysical chemistry. Includes review of thermodynamics and statistical mechanics, molecular mechanics, molecular dynamics, and Monte-Carlo methods.

Applications to liquid structure, reaction dynamics, and protein dynamics. Offered in alternate academic years. I. Benjamin

### **266. Advanced Topics in Physical Chemistry. \***

A graduate course covering advanced topics in physical chemistry. Topics vary from year to year. The Staff

### **266A. Lasers and Their Chemical Applications. \***

Introduces the basic theoretical principles of lasers and laser light. Various types of lasers and selected applications to chemistry are discussed. The use of lasers in photochemistry, spectroscopy, chemical kinetics, and chemical analysis is considered. Lecture: 3-1/2 hours. Prerequisite(s): course 163A and Physics 114A-B. Offered in alternate academic years. May be repeated for credit. The Staff

### **268. Solid State and Materials Chemistry. \***

Topics include synthesis of solid-state materials and their characterization using experimental techniques: XRD, TEM spectroscopy, NMR, and their applications in technologies. Emphasis on new materials, e.g., polymer, biopolymers, nanomaterials, organic/inorganic composites, ceramics, superconductors, electronic, magnetic, and opto-electronic materials. Prerequisite(s): courses 163A and 163B. Enrollment restricted to senior and graduate chemistry majors. Y. Li

### **269. Electrochemistry. S**

Designed to introduce basic

principles and applications of electrochemistry to students at upper undergraduate and lower graduate levels in various fields including analytical, physical, and materials chemistry. Enrollment restricted to seniors and graduate students. R. Lokey

### **270. Drug Action and Development. \***

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 170. (Formerly Frontiers in Drug Action and Discovery.) (Also offered as Biomolecular Engineering 270. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. D. Smith, T. Holman, M. Camps, R. Linington, P. Berman

### **274. Proseminar in Synthetic and Polymer Chemistry. F,W,S**

Weekly meetings devoted to study of synthetic organic chemistry and controlled polymer design for applications in nanotechnology. Topics drawn from current literature and research interests of participants. May be repeated for credit. R. Braslau

### **275. Proseminar in Biological Inorganic Chemistry. F,W,S**

Weekly meetings devoted to biological inorganic chemistry and biochemistry. Topics are drawn from current literature. Papers and reviews are discussed, and participants give short seminars on their research interests. May be repeated for credit. T. Holman

### **280. Proseminar in Materials Chemistry. F,W,S**

Weekly meetings devoted to materials and inorganic research. Topics are drawn from current literature. Papers and reviews are discussed. Participants also give short seminars on topics of their research interests. May be repeated for credit. S. Oliver

### **282. Proseminar: Synthetic Methods. F,W,S**

Weekly meetings devoted to the study of asymmetric and/or enantio-selective synthesis of optically active organic compounds of biological and medicinal significance. Topics drawn from the current literature and the research interests of the participants. May be repeated for credit. B. Singaram

### **284. Proseminar in Synthetic Organic Chemistry. F,W,S**

Weekly meetings devoted to the study of synthetic organic chemistry. Topics drawn from the current literature and the research interests of the participants. May be repeated for credit. J. Konopelski

### **285. Proseminar: Photobiochemistry and Photobiology. F,W,S**

A detailed study of molecular mechanisms of light energy conversion and light-signal transduction processes in biological systems. Student participation in critical discussion of current literature examples are emphasized. Two-hour lecture and two-hour seminar weekly. Enrollment limited to 8. May be repeated for credit. R. Bogomolni

### **286. Proseminar in Natural Products Chemistry. F,W,S**

Weekly meetings devoted to the study of natural products. Topics drawn from the current literature and research interests of the

## Chemistry and Biochemistry Program

participants. May be repeated for credit. P. Crews

### **288. Proseminar in Bioinorganic Chemistry. F,W,S**

Weekly meetings devoted to inorganic and bioinorganic research. Topics are drawn from current literature. Papers and reviews are discussed. Participants also give short seminars on topics of their research interests. May be repeated for credit. P. Mascharak

### **291. Chemistry and Biochemistry Research Seminar. F,W,S**

A weekly chemistry and biochemistry seminar series covering recent developments and current research, led by experts from other institutions, as well as

local speakers. Open to chemistry and biochemistry graduate students. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **292. Seminar (2 credits). F**

Enrollment restrictions: graduate standing or approval of the graduate adviser. J. Raskatov

### **296. Teaching Chemistry (2 credits). F**

University-level pedagogy in chemistry; examines the role of preparation, assessment, and feedback in teaching chemistry discussion and laboratory sections. Effective classroom techniques and organizational strategies discussed; oral presentations analyzed

critically. Required of entering chemistry graduate students. R. Roland

### **297. Independent Study. F,W,S**

A topic will be studied with faculty tutorial assistance to satisfy a need for the student when a regular course is not available. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **299. Thesis Research. F,W,S**

Students submit petition to sponsoring agency. The Staff

\* Not offered in 2015-16

# CHINESE

---

2015-16 General Catalog

Department of Languages and Applied Linguistics

218 Cowell College

(831) 459-2054

<http://language.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

Students interested in learning Chinese may enroll in language courses from beginning to advanced levels and should do so early in their careers at UCSC. Only those with **no** prior experience with the language may enroll in Chinese 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. The Chinese 4H-5H sequence is designed to accommodate most heritage learners of Chinese. Students interested in combining their language study with their major focus may choose from a major or minor in language studies or linguistics, a minor in East Asian studies through the History Department, an individual major in East Asian studies through their college, or a global economics major.

The sequence of lower-division courses 1-6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing skills. Instruction takes place mostly in Chinese from the second half of the first quarter. Upper-level courses include Chinese 103, Language and Society in Taiwan

and the PRC; Chinese 104, Readings in Chinese Literature; Chinese 105, Readings in Chinese History; Chinese 107, Introduction to Classical Chinese Prose; and Chinese 108, Introduction to Classical Poetry.

### CAMPUS LANGUAGE LABORATORIES AND PLACEMENT EXAMS

---

Information about these topics can be found under [Department of Languages and Applied Linguistics](#).

### STUDY ABROAD

---

Students may apply to study intensive Chinese language at universities—in Taipei, Hong Kong, or Beijing—for periods ranging from a summer up to a full year through the Office of International Education (OIE). Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit their web site, <http://oie.ucsc.edu>. For information on credit applied to a major, please contact the appropriate department.

## CHINESE FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**Christopher L. Connery (Chinese Literature)**

World literature and cultural studies, globalism and geographical thought, the 1960s, Marxism, pre-modern and modern Chinese cultural studies, cultural revolution

### LECTURER

---

**David L. Keenan**

Chinese language, fiction, and history

**Ting-Ting Wu**

Sociolinguistics, Chinese novels, learning styles and teaching methodology for non-heritage speakers

## CHINESE COURSES

---

### LOWER-DIVISION COURSES

---

**1. First-Year Chinese. F**

Instruction in elementary spoken and written Chinese (Mandarin), beginning with the sounds of Chinese and their representation in the pinyin romanization system. Conversation, structural analysis, and an introduction to character

texts. The first-year sequence (1-2-3) begins only in the fall quarter. Students interested in learning Chinese who are uncertain about where they should enter the sequence should meet with the instructor prior to the first class meeting. (Formerly Instruction in the Chinese (Mandarin) Language.)

The Staff

**2. First-Year Chinese. W**

Continuation of Chinese 1, which assumes that students are familiar both with the pinyin romanization system and approximately 150 basic characters. (Formerly Instruction in the Chinese

## Chinese

(Mandarin) Language.)

Prerequisite(s): course 1 or by consent of instructor. The Staff

### **3. First-Year Chinese. S**

Continuation of Chinese 2, which assumes that students are familiar both with the pinyin romanization system and approximately 300 basic characters. (Formerly Instruction in the Chinese (Mandarin) Language.)

Prerequisite(s): course 2 or by consent of instructor. The Staff

### **4. Second-Year Chinese. F**

Instruction in intermediate spoken and written Chinese (Mandarin). Conversation, composition, and the reading of modern texts. The second-year sequence (4-5-6) begins only in the fall quarter. (Formerly Intermediate Chinese (Mandarin).) Prerequisite(s): course 3 or by consent of instructor. (General Education Code(s): IH.) The Staff

### **4H. Accelerated Chinese for Heritage Speakers. F**

Intensive instruction in spoken and written Chinese for heritage students whose limited proficiency in Mandarin or limited familiarity with characters requires an accelerated review of the sounds, sentence patterns, and basic vocabulary before joining the Chinese sequence above the elementary level. Students who successfully complete Chinese 4H proceed to Chinese 5. Enrollment by instructor consent. The Staff

### **5. Second-Year Chinese. W**

Continuation of Chinese 4. Conversation, composition, and the reading of modern texts. (Formerly Intermediate Chinese (Mandarin).) Prerequisite(s): course 4 or 4H or by consent of instructor. (General Education Code(s): IH.) The Staff

### **5H. Accelerated Chinese for Heritage Speakers. W**

Intensive instruction in spoken and written Chinese for heritage students whose limited proficiency in Mandarin or limited familiarity with characters requires an accelerated review of the sounds, sentence patterns, and basic vocabulary before joining the Chinese sequence above the elementary level. Students who successfully complete Chinese 5H proceed to Chinese 6.

Prerequisite(s): Course 4H or by consent of instructor. The Staff

### **6. Second-Year Chinese. S**

Continuation of Chinese 5. Conversation, composition, and the reading of modern texts. (Formerly Intermediate Chinese (Mandarin).) Prerequisite(s): course 5 of 5H or by consent of instructor. (General Education Code(s): CC, IH.) The Staff

### **94. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **99F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## **UPPER-DIVISION COURSES**

### **103. Advanced Chinese. F**

Designed to enhance the students' ability to understand, analyze, and discuss authentic Chinese reading materials. Chinese linguistic and cultural aspects are introduced. (Formerly Advanced Chinese: Readings in Economics and Trade.)

Prerequisite(s): course 6 or by consent of instructor. (General Education Code(s): TA.) The Staff

### **104. Advanced Chinese: Readings in Literature. W**

Close readings in Chinese vernacular literature of recognized merit from contemporary and modern writers as well as from models from the traditional period. Student are introduced to the basic critical issues, in Chinese, relating to narrative and drama, revealed by the works under discussion. Prerequisite(s): course 103 or 105 or 107 or 108; or by consent of instructor. (General Education Code(s): TA.) The Staff

### **105. Advanced Chinese: Readings in History. S**

Offers an appreciation of some of the central issues in Chinese history as defined by Chinese historians of the 20th century. Through readings of graduated difficulty, the vocabulary, style, and form of modern Chinese historical writing are introduced. Prerequisite(s): course 103 or 104 or 107 or 108; or by consent of instructor. (General Education Code(s): TA.) The Staff

### **107. Introduction to Classical Chinese Prose. \***

Introduces the grammar and lexicon of classical Chinese and the language of China's pre-modern canonical writings in philosophy, religion, history, music, visual art, and literature. Reading from the Han and pre-Han era is featured. (Formerly Introduction to Classical Chinese.) Prerequisite(s): course 103 or 104 or 105 or 108; or by consent of instructor. Enrollment limited to 25. (General Education Code(s): TA, IH.) The Staff

### **108. Introduction to Classical Chinese Poetry. \***

Introduces the grammar and

## Chinese

lexicon of classical Chinese and the language of China's pre-modern canonical writings in philosophy, religion, history, music, visual art, and literature. Classical poetry and lyrics are featured. Prerequisite(s): course 103 or 104 or 105 or 107; or by consent of instructor. (General Education Code(s): TA, IH.) The Staff

**194. Group Tutorial. F,W,S**  
Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199. Tutorial. F,W,S**  
Students submit petition to sponsoring agency. May be

repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S**  
Students submit petition to sponsoring agency. May be repeated for credit. The Staff

# CLASSICAL STUDIES

---

2015-16 General Catalog

Department of History

201 Humanities

(831) 459-2982

<http://classicalstudies.ucsc.edu/>

---

## PROGRAM DESCRIPTION

---

“Classics” is a traditional designation for the study of the literature, history, and culture of ancient Greece and Rome. Classical studies at UCSC combines features of traditional programs, such as solid grounding in ancient Greek and/or Latin, with innovative, interdisciplinary approaches (literary theory, gender studies, performance, and film).

Classical studies is an interdisciplinary field. While the core of the program is focused on courses in the ancient Greek and Latin languages it also includes courses in history, history of art and visual culture, linguistics, literature, philosophy, politics, religious studies, and theater arts. Students are encouraged to study the literary and material artifacts of Greece and Rome within the larger context of ancient Mediterranean and Near Eastern cultures.

The classical studies program offers an opportunity to work in small classes with a dedicated teaching faculty and excellent fellow students. Classical studies is an excellent preparation for further study in a wide variety of graduate and professional programs including comparative literature, English, philosophy, law, and publishing.

The basic requirements for the classical studies major allow a variety of emphases and concentrations. For example, students with an interest in contemporary philosophy and political theory might want to concentrate in Greek, taking upper-division courses in Greek, history, philosophy, and politics. Students with an interest in European literature might want to concentrate in Latin, taking upper-division courses in Latin, history, and literature in translation. Students planning on pursuing a classics degree at the Ph.D. level should concentrate most of their coursework in the Greek and Latin languages themselves.

Classical studies is administered by the Department of History. For additional information on curriculum and advising, go to <http://classicalstudies.ucsc.edu>.

---

## PROGRAM LEARNING OUTCOMES

---

Students who complete the classics major should graduate with the following knowledge and skills:

### LANGUAGE

---

Competence in one or more ancient languages. At present offerings include Greek and Latin (full curriculum offered yearly). Majors have also taken Biblical Hebrew and Hieroglyphics (offered less often)

### INTERDISCIPLINARY EXPOSURE

---

Familiarity with one or more of the disciplinary approaches represented by the faculty in the program, as well as other relevant approaches in the division and the university. Courses at present credited for the major include (but are not limited to) offerings in: history, literature, philosophy, archaeology, art history, and theater arts. For the skills and outcomes fostered by these disciplines see the reports of the relevant departments.

### COLLABORATION

---

Provide constructive and effective critiques of each other's work.

Complete a shared research project.

### RESEARCH, CRITICAL READING, WRITING

---

Gather and engage critically with primary sources.

Evaluate competing interpretations and multiple narratives.

Compile a bibliography.

Present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

---

## SCOPE AND THEMATICS

---

Through completion of a combination of courses, become familiar with the ancient cultures of:

- the western Mediterranean.
- the eastern Mediterranean.
- the Near East.

Comparative study: whether of diverse ancient cultures or of ancient and later cultures

Reception: ancient culture as understood by later traditions

---

## REQUIREMENTS FOR THE MAJOR

---

A prerequisite for the classical studies major is the lower-division sequence in elementary Greek or Latin language (Greek 1 and 2 or Latin 1 and 2). A minimum of 40 upper-division units must be completed within the classical studies major course requirements. The major requires a total of 10 courses plus a senior comprehensive examination and must include the following:

- one lower-division survey of ancient history or literature in translation;
- three upper-division courses in Greek or Latin literature;
- six additional approved upper-division courses (which may include additional courses in Greek or Latin literature);
- enrollment in a 2-credit comprehensive examination preparatory course, Classical Studies (CLST) 197F or 199F, is required in the same quarter that the senior comprehensive examination will be given. The preparatory course will be taken with the chair of the student's examination committee.

**Comprehensive Requirement.** Classical studies majors are required to pass a senior comprehensive

examination. Each student shall identify a minimum of two classical studies faculty members to serve on the examination committee, one of which shall be designated as the committee chair. Please consult the classical studies web site for a more detailed description of this requirement at <http://classicalstudies.ucsc.edu>

### **Disciplinary Communication (DC) Requirement.**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in classical studies is satisfied by completing two upper-division courses in Greek literature or Latin literature from the following list: Greek Literature 102, 103, 104, and 105; or Latin Literature 102, 103, and 104.

**Honors in the Classical Studies Major.** All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The classical studies faculty advisers determine honors based upon courses applied toward the classical studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

---

## REQUIREMENTS FOR THE MINOR

---

A minor in classical studies requires the lower-division sequence in elementary Greek or Latin language (Greek 1 and 2 or Latin 1 and 2) and Greek or Latin Literature 100 plus any four of the upper-division courses listed as satisfying the classical studies major requirements.

---

---

## CLASSICAL STUDIES FACULTY AND PROFESSIONAL INTERESTS

---

---

### **Karen Bassi, Professor of Literature**

Greek and Latin literatures; gender; literary and cultural theory; pre- and early modern studies; historiography; visual and performance studies

### **John Bowin, Associate Professor of Philosophy**

Ancient philosophy, especially ancient science and metaphysics, and contemporary analytic metaphysics

### **Martin Devecka, Assistant Professor of Literature**

Greek and Latin languages and literatures; cultural history; Arabic language and literature; animal studies; history of technology; Renaissance studies

### **Maria Evangelatou, Associate Professor, History of Art and Visual Culture**

Medieval visual culture, with emphasis on Byzantium and its periphery; manuscript illumination, Marian cult and iconography; ancient Greek and Roman visual culture; Islamic visual culture; gender studies

### **Mary-Kay Gamel, Professor of Literature, Emerita**

### **Gildas Hamel, Security of Employment Lecturer of History, Emeritus**

**Charles W. Hedrick Jr., Professor of History**  
Greek and Roman history

**Jennifer K. Lynn, Continuing Lecturer in History and Literature**

Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; the lives of women in the ancient world

**John P. Lynch, Professor of Literature, Emeritus**

**Dean Mathiowetz, Associate Professor of Politics**  
Ancient political thought, philosophies of language and affect, early-modern and late-modern political economy

**Gary B. Miles, Professor of History, Emeritus**

**Daniel L. Selden, Professor of Literature**  
Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

**Elaine Sullivan, Assistant Professor of History**  
Pharaonic Period Egypt; Greek and Roman Egypt; women and gender; material culture; ritual landscape; 3D modeling; Digital Humanities and the use of emerging technologies in studying the ancient world

---

PROGRAM FACULTY ADVISERS

# COGNITIVE SCIENCE

---

2015-16 General Catalog

273 Social Sciences 2

(831) 459-2002

<http://psychology.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

Cognitive science has emerged in the last few decades as a major discipline that promises to be increasingly important in the 21st century. Focused on achieving a scientific understanding of how human cognition works and how cognition is possible, its subject matter encompasses cognitive functions (such as memory and perception), the structure and use of human language, the evolution of the mind, animal cognition, artificial intelligence, and more.

The cognitive science degree provides a strong grounding in the principles of cognition through courses in cognitive psychology, and, in addition, provides breadth in the interdisciplinary aspects of cognitive science such as anthropology, linguistics, biology, philosophy, and computer science. Graduates will be well prepared for advanced training in research fields of cognitive psychology and cognitive neuroscience, technology industries such as human-computer interaction, and health fields in the treatment of brain disorders.

The cognitive science major is intended for students wishing to enter doctor of philosophy (Ph.D.) programs in cognitive psychology, cognitive science, or cognitive neuroscience to pursue careers in research; enter the field of public health to work with individuals with neurological disorders and learning disabilities; or to enter the field of human-computer interaction design; or pursue other related careers.

The Department of Psychology administers the program and student major advising.

---

### PREPARATION FOR THE MAJOR

---

Students who are not prepared to begin the calculus requirement should take preparatory courses offered by the mathematics and applied mathematics departments, including pre-calculus.

---

### REQUIREMENTS FOR THE COGNITIVE SCIENCE MAJOR

---

The undergraduate degree program in cognitive science is a program offering a course of study leading to the bachelor of science (B.S.) degree. Fifteen courses (77

credits) are required. Because some courses have additional prerequisites, students should read the descriptions of courses carefully, noting the prerequisites for courses of interest to them.

#### LOWER-DIVISION REQUIREMENTS:

---

Introduction to Cognition (one of PSYC 20A or 20B)

Statistics (one of PSYC 2, AMS 5 or AMS 7/L)

Calculus (one of AMS 11A, MATH 11A, 19A or 20A)

Computer Programming (one of CMPE 13/L, CMPS 5C, 5J, 5P, 12A)

#### UPPER-DIVISION REQUIREMENTS:

---

Students must complete 11 courses toward the major after completing the lower-division requirements. At least eight of these must be upper-division courses (a minimum of 42 credits). These must include Psychology 100, three upper-division core courses and three upper-division cognitive psychology electives, as described below. Students must also complete four interdisciplinary electives in other departments, which may or may not be upper-division. Students must ensure that one of the interdisciplinary electives is an upper-division course.

Psychology 100, Research Methods in Psychology (7 credits)

#### CORE COURSES

---

Students must complete a course from three of the following areas:

Perception (Psychology 120 or 121)

Neuroscience (Psychology 123)

Language (Psychology 125)

Memory (Psychology 129)

#### COGNITIVE PSYCHOLOGY ELECTIVES

---

Students must complete three additional upper-division Psychology courses from the following list. One of the core courses that is not used to satisfy the core courses requirement may be used to satisfy this requirement. One of these cognitive electives must be a Cognitive Senior Seminar as designated by the asterisks below.

## Cognitive Science

Any of Psychology 120-138 (i.e., the Cognitive Series)

Psychology 104, Development in Infancy

Psychology 105, Children's Thinking

Psychology 119E, The World of Babies \*

Psychology 119F, Language Development \*

Psychology 119P, Children and Technology \*

Psychology 139B, Consciousness \*

Psychology 139C, The Psychology of Lying and Deception \*

Psychology 139D, Modeling Human Performance \*

Psychology 139F, Psychology and Evolutionary Theory \*

Psychology 139G, Conversations \*

Psychology 139H, Weird Science \*

Psychology 139J, Forgetting\*

Psychology 139K, Face Recognition\*

Psychology 181, Psychological Data Analysis

Psychology 194B, Advanced Cognitive Research

Psychology 195A, Senior Thesis

Psychology 204-252, graduate cognitive courses, by petition

\*denotes Senior Seminar

### INTERDISCIPLINARY ELECTIVES

---

Students must complete four interdisciplinary electives from lists of courses pre-approved by the Psychology Department, one of which must be upper-division. The electives fall into four groups: Evolution; Artificial Intelligence and Human-Computer Interaction; Linguistics; Philosophy. Three of the four electives must be selected from the same group. Students are responsible for planning their course of study to complete any necessary prerequisites for electives they wish to take. Possible sequences of interdisciplinary courses, including prerequisites, are given below.

#### Group 1: Evolution

Anthropology 1, 100, 101, 104, 105, 106, 109, 112, 139 (also listed in Group 3), 173, 174, 175A, 184/L, 194B, 194H, Biology: Ecology and Evolutionary Biology 20C, 109, 124/L, 129/L, 140, 141L, 147, 172/L, Biology: Molecular, Cell, and Developmental Biology 80E, 105, 120, 125, Philosophy 127 (also listed in Group 4), 190F (also listed in Group 4)

#### Group 2: Artificial Intelligence and Human-Computer Interaction

Computer Engineering 8, 9, 80A, 80U, 131, 161, 167/L; Computer Science 17, 80B, 80J, 80V, 132, 140; Computational Media 20, 80K, 146, 148; Music 80L

#### Group 3: Linguistics

Anthropology 139 (also listed in Group 1), Linguistics 50, 53, 80C, 80D, 101, 102, 105, 111 (formerly Linguistics 55), 112 (formerly Linguistics 52), 113, 116, 117, 124, 125, 140, 151, 152, 155, 157, 158

#### Group 4: Philosophy

Philosophy 9, 11, 80S, 100B (formerly Philosophy 93), 100C (formerly Philosophy 94), 121, 123, 125, 127, (also listed in Group 1), 133, 135, 137, 138, 141, 190F (also listed in Group 1), 190G, 190O, 190S

---

## MAJOR QUALIFICATION REQUIREMENTS

---

Students may petition to declare the cognitive science major once they have completed the lower-division requirements. For students to be admitted to the major, they must have a 2.80 or higher cumulative grade-point average (GPA) in the lower-division requirements and receive a C or better in each of the courses. Transfer students may substitute equivalent courses from other institutions. Students not meeting the grade requirements in the lower-division courses may take any of the listed alternatives as substitutions; the department will use the highest grade to compute GPA. Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

### COMPREHENSIVE REQUIREMENT

---

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Cognitive Science students will satisfy this requirement by receiving a passing grade in either a senior seminar (PSYC 139A-K, or 119E, or 119F, or 119P), or research experience (PSYC 194B, Advanced Cognitive Research, or PSYC 195, Senior Thesis).

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that majors upper-division Disciplinary Communication (DC) requirement. The DC requirement in cognitive science is satisfied by completing Psychology 100, Research Methods in Psychology, and the Senior Seminar requirement.

---

## HONORS

---

Honors in the cognitive science major are awarded to graduating seniors whose UCSC GPA is a 3.6 or higher in psychology courses (1-189).

Cognitive Science

Highest honors in the major are reserved for students who meet the honors criteria as well as successful

completion of a senior thesis, or whose UCSC GPA is a 3.9 or higher in psychology courses (1-189).

**COGNITIVE SCIENCE COURSE PLANNERS**

Following are two recommended academic plans for students to complete the Cognitive Science major.

Plan 1 assumes typical curriculum selections. Plan 2 assumes the maximum number of prerequisites.

<b>Plan One</b>			
<b>Year</b>	<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
1st (frsh)	MATH 2	MATH 3	Calculus
	PSYC 20	Programming	
	college core		
2nd (soph)	Interdisciplinary prerequisite	PSYC 2	PSYC 100
		Interdisciplinary prerequisite	
3rd (jr)	Cognitive core	Cognitive core	Cognitive core
	Interdisciplinary elective	Interdisciplinary elective	Interdisciplinary elective
	Cognitive elective	Cognitive elective	Cognitive elective
4th (sr)	Interdisciplinary elective	Cognitive upper-division	Cognitive upper-division

<b>Plan Two</b>			
<b>Year</b>	<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
1st (frsh)	MATH 2	MATH 3	Calculus
	PSYC 20	Programming

## COLLEGE EIGHT

---

2015-16 General Catalog

College Office  
(831) 459-2361

<http://eight.ucsc.edu/>

For college description and list of faculty, see [Colleges](#).

---

### COLLEGE EIGHT COURSES

---

#### LOWER-DIVISION COURSES

##### **10. Academic Success (2 credits). F,W,S**

An interactive course providing students with the opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources are all explored. Enrollment restricted to College Eight students and by permission of college adviser. Enrollment limited to 30. The Staff

##### **20C. The Water Environment: Literature of the Sea (2 credits). \***

Students consider the representation of the sea in selected texts, noting how it becomes the focal point for the fears, hopes, and prejudices of Western civilization. Students write critical papers and their own narratives. Enrollment restricted to first-year and sophomore College Eight members. Enrollment limited to 25. C. Calsoyas

##### **20D. College Students' Lives (2 credits). \***

Students understand their peers and themselves better through an exploration of issues that affect the daily life of college students. Topics include campus/student cultures, the academic system, and other critical issues. Overview of campus resources also provided. Enrollment

restricted to first-year and sophomore College Eight members. The Staff

##### **20F. Justice on Earth (3 credits). \***

Examines issues of oppression, privilege, and social justice within a global and environmental context through self-reflective and group work. May include an optional service-learning component requiring travel during spring break. Enrollment limited to 20. The Staff

##### **20G. Peregrine Falcons Return (2 credits). W**

Required training laboratory for students who wish to pursue a hands-on, two-credit service project (laboratory or field) that is focused on peregrine falcon conservation. Enrollment limited to 26. G. Stewart

##### **28. Peer Leadership in Higher Education (3 credits). \***

Overview of theories of student development, critical student issues, and skills needed for appropriate peer leadership interventions. Utilizes a variety of learning modes including readings, discussions, case studies, lectures, and group projects. Interview only: approval of instructor; Resident Assistant (RA) pre-employment training course. Enrollment limited to 25. May be repeated for credit. The Staff

##### **55. College Eight: Service Learning Practicum (2 credits). F**

Introduction to service learning

theory and practice for students engaging in service-learning work in College Eight, College Eight-related projects, community service organization, or public agencies. Enrollment restricted to College Eight members. Enrollment limited to 50. (General Education Code(s): PR-S.) R. Lipschutz, S. Watrous

##### **56. Media Internships for Sustainability (2 credits). F,W,S**

Students develop and work on media projects related to the college theme of "Environment and Society" in film, on television, in print, and on the Internet. Students work in groups with specific instructors and project leaders. Enrollment by application and instructor consent. May be repeated for credit. S. Watrous

##### **61. Education for Sustainable Living Program (2 credits). S**

Analyzes sustainability and its application in daily life and on campus, involving collaboration between students, faculty, staff, administration, and the community. Guest lecturers, discussions, an optional UC-wide retreat, and essays allow engagement with aspects of ecological and social sustainability. The Staff

##### **80A. Introduction to University Discourse: Environment and Society. F**

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Introduces students

## College Eight

to environmental history, ethics, and policy options, and teaches them to analyze and interpret key literary texts. Students cannot receive credit for this course and course 80B. Concurrent enrollment in course 81A is required.

Enrollment restricted to first-year college members who have not satisfied the C1 requirement.

(General Education Code(s): TA, T3-Social Sciences, C1.) The Staff

### **80B. Rhetoric and Inquiry: Environment and Society. F**

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Introduces students to environmental history, ethics, and policy options, and teaches them to analyze and interpret key literary texts.

Students cannot receive credit for this course and course 80A.

Prerequisite(s): satisfaction of the C1 requirement; concurrent enrollment in course 81A is required. Enrollment restricted to first-year college members.

(General Education Code(s): TA, T3-Social Sciences, C2.) The Staff

### **80C. Introduction to University Discourse: Writing for Environment and Society (I). F**

Two-quarter seminar explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Introduces students to environmental history, ethics, and policy options, and teaches them to analyze and interpret key literary texts. Students cannot receive credit for this course and course 80A or 80B. Enrollment restricted to first-year college members who have not satisfied the entry level writing requirement.

Concurrent enrollment in course 81A is required. Enrollment limited to 20. (General Education Code(s): TA.) The Staff

### **80D. Introduction to University Discourse: Writing for Environment and Society (II). W**

Two-quarter seminar explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Introduces students to environmental history, ethics, and policy options, and teaches them to analyze and interpret key literary texts. Prerequisite(s): course 80C. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 20. (General Education Code(s): C1.) R. Lipschutz

### **81A. The Environment and Us (3 credits). F**

Takes students through a wide range of approaches to environmental citizenship and provides conceptual and practical tools to explore alternatives. Students also participate in a hands-on sustainability project designed to connect academic learning with practical applications. Concurrent enrollment in course 80A or 80B or 80C is required. Enrollment restricted to first-year college members. R. Lipschutz

### **81B. Fundamentals of Environmental Science. W**

Addresses major issues in physical and biological environmental sciences and provides tools to critically evaluate, debate, and make informed choices regarding one's own impact on the environment. Topics include: climate change, water resources, air pollution, evolution, ecology (from populations to ecosystems), and conservation. Quantitative problem solving is an integral part of this course. (Also offered as Earth Sciences 81B. Students cannot receive credit for both courses.) Prerequisite(s): courses 80A or 80B. Enrollment restricted to first-

year and sophomore college members. (General Education Code(s): MF, IN, Q.) L. Fox, P. Chuang

### **81C. Designing a Sustainable Future. S**

Introduces key technological solutions to environmental problems; discusses their underlying principles; and examines their societal dimensions. Topics include: conventional and renewable energy; emerging technologies for transportation, energy efficiency clean water; planetary engineering; and lean manufacturing. (Formerly Technological Innovation and Environmental Challenges.) (Also offered as Electrical Engineering 81C. Students cannot receive credit for both courses.) Prerequisite(s): courses 80A or 80B. Enrollment restricted to first-year and sophomore college members. (General Education Code(s): SI, T-2 Natural Sciences.) The Staff

### **82. Environment and Society in Film (2 credits). S**

Students write about and discuss a variety of films and articles about environment and society. Topics may include water, food systems, wilderness, wildlife, pollution, global warming, nuclear energy, conservation, and environmental activism. Enrollment limited to 25. N. Schaefer

### **90. College Eight Garden Internship (1 credit). F,W,S**

One-credit internship in the College Eight Garden. Offers students of College Eight an opportunity to become involved in an experimental learning project focusing on application of concepts of sustainable agriculture. Enrollment restricted to members of College Eight. Enrollment limited to 10. May be repeated for credit. The Staff

### **93. Field Study. F,W,S** The Staff

**99. Tutorial. F,W,S**

May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Individual study for lower-division students directed by a faculty member affiliated with College Eight. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

UPPER-DIVISION COURSES

**128. Advanced Peer Leadership Practicum (3 credits). \***

Advanced practicum for the application of skills and theoretical knowledge studied in course 28.

Uses many learning modes including readings, discussions, case studies, lectures, and group projects. Prerequisite(s): course 28. Enrollment by permission of instructor. Enrollment limited to 25. May be repeated for credit. The Staff

**150A. Sustainability Praxis in the Built Environment (2 credits). F**

Introduces the concepts, methods, and practices of research on sustainable energy, water, and food production and consumption. Resources surveying and assessment; building energy auditing; renewable energy systems; water supply, demand, and distribution. Intensive agroecology is conducted at campus sites. Enrollment limited to 25. K. Monsen, K. Bell, R. Lipschutz

**150B. Tools of the Trade for Sustainability Analysis (2 credits). W**

Problem-solving in sustainability through basic STEM concepts, statistical tools, and analytical methods for engaging in advanced sustainability studies drawn from physics, chemistry, biology, ecology, engineering, electronics, sociology, economics, and public policy. Prerequisite(s): course 150A. Enrollment restricted to

sophomores, juniors, and seniors. Enrollment limited to 25. K. Bell, R. Lipschutz

**150C. Green Enterprise and Social Entrepreneurship (2 credits). S**

Teaches students how to become green entrepreneurs, develop green enterprises, and incubate green projects, especially in connection with students' research and interests. Students develop business plans; solicit participation from mentors; and prepare and submit funding proposals. Prerequisite(s): courses 150A and 150B. K. Bell, R. Lipschutz

**155. College Eight Sustainability Internship (2 credits). W,S**

For students undertaking sustainability-oriented service-learning work in the college (college-related projects, community service organizations, or public agencies). Students are supervised by the college provost and project supervisor, and determine the content of their internship with the provost and supervisor. Enrollment restricted to College Eight members or by permission of instructor. May be repeated for credit. (General Education Code(s): PR-S.) R. Lipschutz, S. Watrous

**160. Developing Leadership to Facilitate Environmental Education. W**

Prepares students to facilitate an action research team for "Sustainable Living" (courses 61/161) during spring quarter. Workshops and training selected to build the skills and preparation to become successful facilitators. Topics include: facilitation skills; syllabus planning and curriculum building; experiential learning techniques; leadership skills; and non-violent communication training. Enrollment by interview only. Enrollment restricted to

sophomores, juniors, and seniors. Enrollment limited to 30. The Staff

**161. Education for Sustainable Living Program. S**

Analyzes sustainability and its application in daily life and on campus, involving collaboration between students, faculty, staff, administration, and the community. Guest lecturers, discussions, an optional UC-wide retreat, and essays allow engagement with aspects of ecological and social sustainability. Enrollment limited to 25. The Staff

**162. Sustainability Internship Practicum. W,S**

Introduces students to sustainable practices and state, local, and UC-wide policies through projects. Matches students with UCSC staff partners to work collaboratively on projects that integrate sustainability into aspects of campus operations. Supports students to develop the competencies necessary to become effective environmental professionals through learning models including hands-on work experience; professional skills training; guest lectures; reading, and discussion; and peer-to-peer advising. In addition to project deliverables, students complete and present a portfolio of their work upon completion of their project. Enrollment limited to Sustainability Office Interns and by instructor permission; an interview, resume, and cover letter are required. Enrollment limited to 20. (General Education Code(s): PR-S.) The Staff

Enrollment limited to Sustainability Office Interns and by instructor permission; an interview, resume, and cover letter are required.

**193. Field Study. F,W,S**

**193F. Field Study (2 credits). F,W,S**

Provides for individual programs of study sponsored by the college and performed off campus. Must be sponsored by College Eight faculty. Approval of the student's adviser

## College Eight

and the academic preceptor is needed to enroll. May be repeated three times for credit. Students submit petition to sponsoring agency. The Staff

### **195. Senior Thesis. F,W,S**

May be repeated for credit. The Staff

### **198. Independent Field Study.**

**F,W,S**

The Staff

### **199. Tutorial. F,W,S**

May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Individual study for upper-division students directed by a faculty member affiliated with College Eight. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

## COLLEGE NINE

---

2015-16 General Catalog

College Office  
(831) 459-5034

<http://collegenine.ucsc.edu/>

For college description and list of faculty, see [Colleges](#).

---

### COLLEGE NINE COURSES

---

#### LOWER-DIVISION COURSES

---

##### **70. Colleges Nine and Ten Community Garden (2 credits). F,W,S**

Students in this course design and build a new community garden at Colleges Nine and Ten. Students engage in a collaborative design process with campus stakeholders; learn hands-on skills and community gardening best practices; and build regenerative social and ecological systems. Enrollment restricted to College Nine and College Ten students. May be repeated for credit. The Staff

##### **80A. Introduction to University Discourse: International and Global Issues. F**

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Topics address contemporary global issues including economic globalization, human rights, international and inter-ethnic conflicts, poverty, and immigration. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T3-Social Sciences, C1.) The Staff

##### **80B. Rhetoric and Inquiry: International and Global Issues. F**

Explores the intersection of investigation, interpretation, and persuasion and refines strategies for writing, research, and speaking. Topics address contemporary global issues including economic globalization, human rights, international and inter-ethnic conflicts, poverty, and immigration. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T3-Social Sciences, C2.) The Staff

##### **80C. Introduction to University Discourse: International and Global Issues Writing Intensive 1. F**

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Topics address contemporary global issues including economic globalization, human rights, international and inter-ethnic conflicts, poverty, and immigration. More writing intensive

than course 80A; prerequisite to 80D. Enrollment restricted to first-year college members who have not satisfied the C1 requirement and who scored a 5 or lower on the Analytical Writing and Placement Exam. Enrollment limited to 22. The Staff

##### **80D. Introduction to University Discourse: International and Global Issues Writing Intensive 2. W**

Continues to provide practice in analytical writing, critical reading, and speaking, and to examine global issues. Prerequisite(s): course 80C. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): C1.) The Staff

##### **80F. International and Global Issues (2 credits). F**

Develops each student's ability to explore their own creative output in order to convey their background, experiences, and perspectives, as well as to inspire community dialog around cultural competency and international/global issues. Enrollment is restricted to first-year College Nine students who have been placed in the Multilingual Curriculum. Enrollment limited to 25. The Staff

## College Nine

### **80L. College Nine Core Film Course (2 credits). F**

Complements the College Nine core course. The films and readings explore the theme of International and Global Perspectives and follow the core course syllabus.

Prerequisite(s): Concurrent enrollment in course 80A, 80B, or 80C. Enrollment restricted to first-year college members. The Staff

### **85. Global Action (2 credits). W**

Workshop facilitated by peer instructors. Students learn about current international and global issues through interactive exercises, small-group discussions, and faculty presentations. Students develop an "action plan" to raise awareness about one or more of these concerns and take practical steps to create positive change in the world. Enrollment restricted to College Nine members during priority enrollment only. Enrollment limited to 20. E. Ramsden

### **86. College Leadership Development (2 credits). S**

Students newly appointed into leadership positions at College Nine explore the concept of leadership relating to the college's theme of International and Global Perspectives. Prerequisite(s): current College Nine student leader; permission of instructor. The Staff

### **90. Intercultural Understanding (2 credits). F**

Provides an opportunity to enhance the intercultural experience, increase cultural competency, promote further understanding, and examine the various trends facing a uniquely diverse community. Geared toward U.S. and international students affiliated with the International Living Center. Enrollment by instructor permission. Enrollment limited to 50. The Staff

### **91. Global Issues Colloquium (1 credit). F,W,S**

Weekly colloquium on global issues with different topical focus each quarter. Presentations by UCSC faculty and invited speakers.

Students must attend class, read an assigned article, and write a one-page synopsis. Enrollment restricted to College Nine members. Enrollment limited to 50. May be repeated for credit. The Staff

## UPPER-DIVISION COURSES

### **105. Researching Food Sovereignty. \***

Students engage in individual and collective research projects on transformational food systems in the United States and abroad. Readings look at the current global food system and grassroots responses to food and environmental crises. Enrollment restricted to junior and senior College Nine and College Ten members during priority enrollment only. Enrollment limited to 20. The Staff

### **106. Israel and Palestine: Pathways to a Deeper Understanding (2 credits). \***

Explores, and seeks to provide a deeper understanding of, the Israeli-Palestinian conflict through materials and guest speakers that offer varying perspectives. Self-reflection and structured communication facilitate the positive exchange of ideas and views. Enrollment by permission of instructor. The Staff

### **112A. Model United Nations Part A: A Group Seminar (2 credits). W**

Introduces the Model United Nations. Students learn parliamentary procedure and U.N. protocols, as well as how to research and present position papers to the general assembly. Students learn resolution writing,

alliance building, and persuasive speech. (Formerly course 112, Model United Nations: A Group Seminar) Enrollment limited to 35. May be repeated for credit. The Staff

### **112B. Model United Nations Part B: International Crises (2 credits). S**

Students are assigned a country to represent in the U.N. Three international crises allow students to present position papers, make speeches, and debate the issues. Prerequisite(s): course 112A. May be repeated for credit. The Staff

### **120. Practical Activism Conference Planning and Development (2 credits). F**

Offers an applied experience of collaborative planning, production, and leadership. Students plan workshops and other event components; conduct outreach and publicity; and address all aspects of educational event planning. Enrollment restricted to members of the spring volunteer Practical Activism planning group. Enrollment by permission of the instructor. May be repeated for credit. (General Education Code(s): PR-E.) W. Baxter

**191. Teaching Global Action. W**  
Undergraduates at upper-division level participate in teaching discussion groups for College Nine 85 (W). Prerequisite(s): permission of instructor: essay describing interest in becoming course assistant, copies of evaluations, and letter of recommendation from faculty member and/or college staff member. Enrollment restricted to College Nine juniors and seniors. E. Ramsden

College Nine

**199. Tutorial. F,W,S**

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment restricted to upper-division College Nine

members. May be repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S**

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty

adviser. Approval of provost required. Enrollment restricted to upper-division College Nine members. May be repeated for credit. The Staff

\* Not offered in 2015-16

## COLLEGE TEN COURSES

---

### LOWER-DIVISION COURSES

---

**80A. Introduction to University Discourse: Social Justice and Community. F**

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Examines social justice issues; topics include racism, sexism, and other forms of prejudice and discrimination; poverty and welfare; civil liberties; and community involvement and citizenship. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T3-Social Sciences, C1.) The Staff

**80B. Rhetoric and Inquiry: Social Justice and Community. F**

Explores the intersection of investigation, interpretation, and persuasion and refines strategies for writing, research, and speaking. Examines social justice issues; topics include racism, sexism, and other forms of prejudice and discrimination; poverty and welfare; civil liberties; and community involvement and citizenship. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General

Education Code(s): T3-Social Sciences, C2.) The Staff

**80C. Introduction to University Discourse: Social Justice and Community Writing Intensive 1. F**

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Examines social justice issues. Topics include: racism, sexism, and other forms of prejudice and discrimination; poverty and welfare; civil liberties; and community involvement and citizenship. More writing-intensive than 80A; prerequisite to 80D. Enrollment restricted to first-year college members who have not satisfied the Entry Level Writing and C1 requirement and who scored a 5 or lower on the AWPE (Analytical Writing and Placement Exam). Enrollment limited to 22. The Staff

**80D. Introduction to University Discourse: Social Justice and Community Writing Intensive 2. W**

Continues to provide practice in analytical writing, critical reading, and speaking, and to examine social justice issues. Prerequisite(s): course 80C. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): C1.) The Staff

**80F. Social Justice and Community (2 credits). F**

Develops each student's ability to explore their own creative output in order to convey their background, experiences, and perspectives, as well as to inspire community dialogue around social justice. Enrollment is restricted to first-year College Ten students who have been placed in the Multilingual Curriculum. Enrollment limited to 25. The Staff

**80L. College Ten Core Film Course (2 credits). F**

Complements the College Ten core course. The films and readings explore the theme of Social Justice and Community, and follow the core course syllabus. Prerequisite(s): Concurrent enrollment in course 80A, 80B, or 80C. Enrollment restricted to first-year college members. The Staff

**85. Social Justice Issues Workshop (2 credits). W**

Series of presentations, films, and workshops that address personal and cultural identity and examine social, cultural, political, environmental, and other justice concerns. Enrollment restricted to College Ten members during priority enrollment only. Enrollment limited to 20. W. Baxter

**86. College Leadership Development (2 credits). S**

Students newly appointed into leadership positions at College Ten

## College Ten

explore the concept of leadership relating to the college's theme of Social Justice and Community. Prerequisite(s): current College Ten student leader; permission of instructor. The Staff

### **91. Introduction to Nuclear Policy (2 credits). F**

Introduces the key aspects of nuclear policy. Examines issues associated with nuclear weapons and civil nuclear power and the interplay between the two with regards to proliferation. Presentations will be given by guest speakers. Enrollment limited to 50. May be repeated for credit. D. Hirsch

### **92. Social Justice Issues Colloquium (1 credit). F,W,S**

Weekly colloquium on social justice issues with a different topical focus each quarter. Presentations by UCSC faculty and invited speakers. Students must attend class, read an assigned article or book chapter(s) on the week's topic, and write a one-page synopsis. May be repeated for credit. The Staff

### **95. Nonviolent Communication (Living-Learning Community) (1 credit). F,W,S**

The Nonviolent Living-Learning Community operates in a spirit of cooperation, compassion, and good will without competition or hierarchy. Students living in the Nonviolent Living-Learning Community enroll in this course each quarter of the academic year. Restricted to residents of the Nonviolent Living-Learning Community. Enrollment limited to 25. May be repeated for credit. The Staff

### **98. Alternative Spring Break (2 credits). S**

Provides students with the opportunity to conduct service-

learning work in a local Santa Cruz community over spring break. There are four preliminary class meetings in the winter quarter. Winter meeting attendance is required. Enrollment by interview only. Enrollment restricted to College Nine and College Ten members. (General Education Code(s): PR-S.) A. Asher

## UPPER-DIVISION COURSES

### **105. The Making and Influencing of Environmental Policy. W**

Explores how environmental policy is made and influenced. Students learn about key contemporary environmental issues and the forces at play in determining environmental policy outcomes. Focuses on skills that enable citizens to impact environmental policy. (Formerly The Making and Influencing of Nuclear Policy.) Enrollment restricted to sophomore, junior, and senior College Nine and College Ten members during priority enrollment only. Enrollment limited to 35. (General Education Code(s): PE-E.) D. Hirsch

### **110. Service Learning Field Study (Esprit de Corps). F,W,S**

Provides college members the opportunity to apply their academic learning in a practical setting in the community. Students earn academic credit by volunteering in a non-profit agency or school for approximately 12 hours per week. Students supervised by a professional on site. Students attend a weekly class, complete readings, listen to local leaders from the community, reflect upon their experiences with fellow students, and submit a final project related to their service learning placement. Taught concurrently with course 110B. Enrollment by instructor consent. Enrollment restricted to sophomore, junior, and senior

College Nine and College Ten members. Students must attend an informational session to enroll. Contact: aasher@ucsc.edu for more information. Enrollment limited to 22. May be repeated for credit. (General Education Code(s): PR-S.) A. Asher

### **110B. Service Learning Field Study (Esprit de Corps) (2 credits). F,W,S**

Provides college members the opportunity to apply their academic learning in a practical setting in the community. Students earn academic credit by volunteering in a non-profit agency or school for approximately three hours per week. Students supervised by a professional on site. Students attend a weekly class, complete readings, listen to local leaders from the community, reflect upon their experiences with fellow students, and submit a final project related to their service learning placement. Taught concurrently with course 110. Enrollment by instructor consent. Enrollment restricted to sophomore, junior, and senior College Nine and College Ten members. Students must attend an informational session to enroll. Contact: aasher@ucsc.edu for more information. Enrollment limited to 22. May be repeated for credit. (General Education Code(s): PR-S.) A. Asher

### **120. Practical Activism Conference Planning and Development (2 credits). F**

Offers an applied experience of collaborative planning, production, and leadership. Students plan workshops and other event components; conduct outreach and publicity; and address all aspects of educational event planning. Enrollment restricted to members of the spring volunteer Practical Activism planning group.

## College Ten

Enrollment by permission of the instructor. May be repeated for credit. (General Education Code(s): PR-E.) W. Baxter

### **191. Teaching Social Justice. W**

Undergraduates at upper-division level participate in teaching discussion groups for College Ten 85 (W). Prerequisite(s): permission of instructor: essay describing interest in becoming course assistant, copies of evaluations, and letter of recommendation from faculty member and/or college staff member. Enrollment restricted to College Ten juniors and seniors. W. Baxter

### **194. Group Tutorial. F,W,S**

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s):

Course 91 or 105 recommended. Students submit petition to sponsoring agency. Enrollment limited to 15. May be repeated for credit. D. Hirsch, The Staff

### **194F. Group Tutorial (2 credits). F,W,S**

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s): Course 91 or 105 recommended. Students submit petition to sponsoring agency. Enrollment limited to 15. May be repeated for credit. D. Hirsch, The Staff

### **199. Tutorial. F,W,S**

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with

accompanying letter from faculty adviser. Approval of provost required. Enrollment restricted to upper-division College Ten members. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment restricted to upper-division College Ten members. May be repeated for credit. The Staff

# COMMUNITY STUDIES

---

2015-16 General Catalog

213 Oakes Academic Building

(831) 459-2371

<http://communitystudies.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

Founded in 1969, community studies is the oldest interdisciplinary program at UCSC. The longstanding hallmarks of community studies are its focus on social justice and its distinctive pedagogy integrating classroom learning and extended field study.

Community studies was a national pioneer in the field of experiential education and its civic engagement model has been emulated widely. Community studies was also a pioneer in addressing principles of social justice, specifically inequities arising from race, class and gender dynamics in society at large, and in critically assessing strategies for achieving social change.

The undergraduate major offers highly motivated and focused students the opportunity to pursue a rigorous course of study combining on- and off-campus learning. On campus, students complete a core curriculum enabling them to identify, analyze, and help construct strategies for social justice movements, nonprofit sector advocacy, public policy making, and social enterprise. The core curriculum works in tandem with topical coursework that develops expertise in specific domains of social science scholarship related to their field study. Off campus, students commit to spending six months immersed in a setting where they participate in and analyze the social justice work of an organization, with a goal of making a meaningful contribution to the organization's mission. Students work independently but with active guidance from both campus faculty and an on-site supervisor from the field study organization.

The undergraduate core curriculum begins with the development of skills in social analysis and field observation/participation while deepening students' knowledge of specific histories and theoretical perspectives essential to the study of communities and social transformation. Next, through the six-month full-time field study, students engage with specific communities through residence and participation in an organization with a social justice mission. This intensive and extended immersion is a distinguishing feature of the community studies major. Finally, students return to campus to analyze their field study

experience and its relation to their ongoing classroom-based learning. The major culminates with a senior capstone integrating academic coursework, field study analysis, and original writing.

With the guidance of faculty and staff advisers, community studies students choose field placements related to one of the program's areas of focus in health justice and economic justice. In the past, placements have been arranged with community health clinics, women's and feminist organizations, immigrant-rights centers, media advocacy organizations, homeless resource and support groups, sustainable development projects, queer and transgender organizations, neighborhood or workers' collectives, civil rights groups, community food security programs, legal clinics, community-based cultural organizations, programs for seniors, tenant or labor unions, HIV/AIDS advocacy groups, harm reduction programs, government agencies and the offices of elected officials, and still other organizations committed to and working for social justice. As political, economic, cultural and technological landscapes shift, so do the needs and opportunities for social justice organizing. It is a dynamic world and throughout its history Community Studies has been noteworthy for being attuned and responsive to innovative field study opportunities.

Community studies alumni have pursued a wide variety of professional careers in health care, K-12 education, public policy, social work, urban planning, higher education, and law. According to a 2005 alumni survey, almost 100 alumni have founded non-profit social justice organizations and many more have served on non-profit boards and/or in executive director positions.

---

## PROGRAM OVERVIEW

---

Community studies is a major with a sequential core curriculum. This means that core curriculum courses must be completed in a specific order:

Fall Quarter	CMMU 10, Introduction to Community Activism
Winter (pre-field study)	CMMU 101, Communities, Social Movements, and the Third Sector
Spring	CMMU 102, Preparation for Field Study
Summer/Fall	CMMU 198, Independent Field Study (15 units per quarter)
Winter (post-field study)	CMMU 194, Analysis of Field Study

In addition to the core curriculum, students must successfully complete at least three topical courses to develop expertise in their designated emphasis (health justice and/or economic justice). Students are encouraged to take as many topical courses as possible prior to their field study. Two directed electives complete the requirements for the major, one each in the areas of race/class/privilege and regional/historical contexts. These electives are designed to ensure that all students develop knowledge of the history, culture, and political economy of the place where they will be carrying out their field study—whether that place is a neighborhood in Santa Cruz, New York City, or a small village in Guatemala—and develop a critical consciousness about their own social locations. Students must complete both directed electives **before** beginning field study.

A list of approved topical and elective courses will be posted in the program office and updated regularly on the program web site.

In sum, the program includes courses that develop a substantive focus for field study immersion, courses that contextualize the field study in wider social and geographical processes, and courses offering instruction about methods relevant to conducting and analyzing the field study experience.

---

## TRANSFER STUDENTS

---

The Community Studies program can easily accommodate students who transfer to UCSC for the fall quarter. To ensure a smooth transition, all transfer students should contact the Community Studies undergraduate adviser as early as possible to discuss course enrollment and declaring the major.

---

## DECLARING THE MAJOR

---

In order to declare the community studies major, a student must satisfactorily complete CMMU 10, Introduction to Community Activism, and at least one upper division topical course from the approved list of courses. Students may then declare the community studies major at any time, but must declare prior to enrolling in CMMU 102, Preparation for Field Study. As part of the declaration process, students meet with the program director to review their academic plan for the major, including discussion of field study possibilities, directed electives, and appropriate courses to meet the topical requirements. Students must submit their approved academic plan and declaration petition to the Community Studies staff adviser. Any change to the student's academic plan must be approved by the program director.

---

## MAJOR COURSE REQUIREMENTS

---

### **10, Introduction to Community Activism**

This course introduces students to different approaches to community activism including charity, volunteering, labor and community organizing, non-violent resistance, non-profit sector involvement, and media advocacy.

### **101, Communities, Social Movements, and the Third Sector**

This course critically engages with concepts central to the major including constructions of community in social-change efforts and the institutionalization of social movements in third-sector organizations. It is designed to deepen students' understanding of the opportunities and obstacles embedded in various avenues of social action.

### **102, Preparation for Field Study**

This course examines participatory and other social-research methods including participant observation, conducting interviews, writing ethnographic field notes, and collecting descriptive data. Students receive practical experience with developing research questions, methods, and writing field notes. The course also addresses ethical and logistical issues of community-based research. The final project is a literature review completed in partial satisfaction of the disciplinary communication (DC) general education requirement.

---

## TOPICAL REQUIREMENTS

---

Students must complete three upper-division courses in the topical area of health justice and/or economic justice from available approved courses listed below. The program director also may approve other courses,

## Community Studies

as appropriate. These courses are an essential component of the community studies major because they define the focus of students' overall academic plan and their work on full-time study. The topical requirements also permit students to work across academic disciplines by enrolling in the many fascinating topical courses offered by community studies affiliate faculty. Note that not all topical courses are offered every academic year. Check the program website for current year offerings.

### RACE, CLASS, AND PRIVILEGE ELECTIVES

These upper-division courses should examine race, class, and other hierarchies of difference as they intersect with structural inequality, self-identification, and identity politics. Students complete this requirement through a course selected from an approved list of directed electives posted on the [Community Studies program web site](#) and at the program office.

### REGIONAL/HISTORICAL ELECTIVES

Students have a choice of upper-division courses that provide historical/geographic knowledge of particular peoples, places, or regions relevant to their full-time field study. Students complete this requirement through a course selected from an approved list of directed electives posted on the [Community Studies program web site](#) and at the program office.

### **Topical Courses**

#### **Community Studies**

- CMMU 132, American Cities and Social Change
- CMMU 134, No Place Like Home
- CMMU 141, Economic Justice
- CMMU 143, Walmart Nation
- CMMU 145, Globalization and its Discontents
- CMMU 149, Political Economy of Food and Agriculture
- CMMU 156, Politics of Obesity
- CMMU 157, Ageism and Activism
- CMMU 160, Women's Health Activism
- CMMU 161, Introduction to Public Health
- CMMU 162, Community Gardens and Social Change
- CMMU 163, Health Care Inequalities
- CMMU 186, Agriculture, Food and Social Justice

#### **Anthropology**

- ANTH 134, Medical Anthropology: An Introduction
- ANTH 136, Biology of Everyday Life
- ANTH 153, Medicine and Colonialism
- ANTH 194P, Space, Place, and Culture

#### **Economics**

- ECON 180, Labor Economics
- ECON 189, Political Economy of Capitalism

#### **History**

- HIS 115A, U.S. Labor History to 1919
- HIS 115B, U.S. Labor History 1919-present
- HIS 115C, Learning from the U.S. Great Depression
- HIS 123, Immigrants/Immigration in U.S. History
- HIS 190S, Women and Social Movements in the U.S.

#### **Latin American and Latino Studies**

- LALS 166, Latino Families in Transition
- LALS 175, Migration, Gender, and Health

#### **Politics**

- POLI 120C, State and Capitalism in American Political Development
- POLI 122, Politics, Labor, and Markets in the U.S.
- POLI 124, Politics, Poverty, and Inequality in America
- POLI 190L, Poverty Politics

#### **Psychology**

- PSYC 147A, Psychology and Law
- PSYC 147B, Psychology and Law
- PSYC 149, Community Psychology: Transforming Communities
- PSYC 153, Psychology of Poverty and Social Class
- PSYC 155, Social-Community Psychology in Practice
- PSYC 159H, Community-based Interventions

#### **Sociology**

- SOCY 122, Sociology of Law
- SOCY 127, Drugs in Society
- SOCY 131, Media, Marketing, and Culture
- SOCY 176A, Work and Society
- SOCY 177, Urban Sociology
- SOCY 177E, Eco-Metropolis: Research Seminar in Urban and Environmental Studies
- SOCY 177G, Global Cities

#### **198, Full-Time Independent Field Study**

During the full-time, six-month field study, students are enrolled at UCSC and receive full-time university credit. Students are required to submit field notes and several analytical essays during the field study. Students are guided by a campus faculty adviser and on-site organization supervisor.

#### **194, Analysis of Field Materials**

This course is designed for students returning from their full-time field study and has two related goals: (1)

## Community Studies

to help students, both individually and collectively, analyze and gain perspective on their field experiences; and (2) to facilitate completion of the senior capstone requirement. Students work with their field material to develop findings and arguments and connect those to relevant theoretical literature(s). Then, in a series of discussion forums, they use their analyses to confront those issues that most forcefully challenge social justice work in the contemporary moment. The written work of 194 completes the DC requirement.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division DC requirement. The community studies program's model of experiential pedagogy relies heavily on writing instruction to develop students' analytical, reflexive, and communication skills. As stated, although students in the major develop disciplinary writing skills throughout the core curriculum, they fulfill the DC requirement with course 102 and course 194.

---

### SENIOR CAPSTONE REQUIREMENT

---

In addition to the full-time field study, another distinctive feature of the major is the emphasis placed on the capstone. Each student must fulfill this requirement, either through a senior essay, a senior thesis or a student-directed seminar. For a thesis or student-directed seminar, the student must work directly with a faculty adviser, usually for two quarters.

**Senior Essay:** All students complete a senior essay that incorporates field study observations and contextualizes their findings historically and theoretically. Most students pursue this capstone option. The minimum length is 25 pages, plus bibliography. The senior essay is completed entirely in course 194, Analysis of Field Materials.

**Senior Thesis:** Outstanding students may choose to complete a senior thesis, which is comprised of field-study observations, historical and theoretical contextualizations of the field study, and deeper analysis of the social justice issues at the heart of the field study. The thesis also involves post-field-study research; typical length is 40–50 pages, including bibliography. The senior essay completed during course 194 will become the foundation for the thesis, whether as a template to be elaborated or as one or more chapters of the completed thesis.

**Student-Directed Seminar (SDS):** The SDS capstone option is reserved for exceptional students. Under the

direction of a faculty adviser, the student develops and teaches a Community Studies 42 course related to the student's field study and academic coursework and submits a seminar completion report. Student-directed seminars need advance planning; a proposal for the SDS must be completed before beginning the field study.

---

### HONORS IN THE MAJOR

---

Honors in the community studies major are awarded to graduating seniors whose performance, including coursework, field study, and the senior capstone, is judged by a faculty committee to have achieved excellence. Highest honors in the major are reserved for students with consistently outstanding academic performance.

---

### PROGRAM LEARNING OUTCOMES

---

Community studies identifies eight Program Learning Outcomes (PLOs) that together capture exciting cross currents within the major. The PLOs combine classroom and experiential learning related to the social justice domains of health and economic inequality. They also enumerate expectations for student achievement in social science research and writing and communication skills within a diverse society.

---

### CRITICAL THINKING

---

Students earning a B.A. in Community Studies will be able to:

1. demonstrate deep knowledge of the history, causes, and contemporary manifestations of specific social justice issues related to health and economic inequality;
2. deconstruct institutional power residing in private enterprise, government, the media, and/or the non-profit sector;
3. analyze how communities attempt to overcome problems associated with inequality, cultural stigma, prejudice, and discrimination;
4. articulate research questions, methods, and findings appropriate to social science inquiry; and
5. demonstrate analytical writing ability that effectively integrates theoretical and experiential knowledge about social justice.

---

### COMMUNITY ENGAGEMENT

---

Students earning a B.A. in Community studies will be able to:

1. identify, analyze, and help to construct strategies for social change through participation in the social justice work of an organization;

2. exhibit ethnographic observation skills by maintaining a regular record of detailed field notes;
3. demonstrate effective communication with the diverse constituencies involved in social justice work.

---

## COMMUNITY STUDIES FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**William H. Friedland, Emeritus**

**Nancy Stoller, Emerita**

**David T. Wellman, Emeritus**

**Carter Wilson, Emeritus**

**Deborah A. Woo, Emerita**

### LECTURER

---

**Leslie Lopez**

Political economy of education and cultural production, social movements in Latin America/U.S., journalism and oral history, literacy and language, immigration, youth

**Andrea Steiner**

Health policy, critical public health, social gerontology, ageism, women's health activism, numeracy education in social justice

### PROFESSOR

---

**David Brundage (History)**

American immigration history, with particular focus on the Irish in America and on transnational immigrant politics; U.S. labor and social history; modern Irish history

**Heather E. Bullock (Psychology)**

Poverty and economic inequality, welfare policy, feminist psychology, intersections of classism, racism, and sexism

**Nancy N. Chen (Anthropology)**

Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

**Dana Frank (History)**

Late 19th- and 20th-century U.S. social history, including women's, labor, and working-class history, race and ethnicity; modern Honduras; U.S. history in transnational perspective

**Julie Guthman (Social Sciences)**

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

**Craig W. Haney (Psychology)**

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

**David E. Kaun, Emeritus**

**Regina D. Langhout (Psychology)**

School-community-university collaboration; how schooling and neighborhood experiences are informed by social class, race, and gender; young people and empowerment; participatory action research

**Craig Reinerman (Sociology)**

Political sociology; law, crime, and social justice; drugs and society

**Patricia Zavella, (Latin American and Latino Studies)**

Transnational migration by Mexicans, poverty, family, sexuality, labor, social networks, feminist studies, Chicana/o-Latina/o studies, ethnographic research methods

### ASSOCIATE PROFESSOR

---

**Eva Bertram, (Politics)**

American politics, public policy, political economy, and political history, including social policy and the welfare state, and the changing character of work and labor markets in the United States.

**Miriam Greenberg (Sociology)**

Urban sociology, media studies, cultural studies, political economy, globalization, and urban political ecology

**Steven McKay (Sociology)**

Work and labor markets; globalization and social change; political sociology; race; masculinity; migration; ethnography/qualitative methods

**Mary Beth Pudup (Social Sciences)**

Urban and regional political economy, historical geography of the U.S., public policy, community gardening and urban agriculture, non-profit sector

### ASSISTANT PROFESSOR

---

**Matthew Wolf-Meyer (Anthropology)**

Anthropology and history of medicine and public health, science studies, American studies, popular culture, the United States and the United Kingdom

---

## COMMUNITY STUDIES COURSES

---

### LOWER-DIVISION COURSES

**10. Introduction to Community Activism. F**

Surveys different strategies of community activism including charity, volunteering, labor and community organizing, and recently emerging global activism with goal of demonstrating how certain strategies challenge existing social relations and arrangements while others typically (and often by design) reproduce them. (General Education Code(s): IS.) L. Lopez

**42. Student-Directed Seminar. F,W,S**

Seminars taught by upper-division or graduate students under faculty supervision. (See course 192.) The Staff

**93. Field Study. F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**93F. Field Study (2 credits). F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**93G. Field Study (3 credits). F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99. Tutorial. F,W,S**

Individual directed study for lower-division undergraduates. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Individual directed study for lower-division undergraduates. May be repeated for credit. The Staff

### UPPER-DIVISION COURSES

**101. Communities, Social Movements, and the Third Sector. W**

Engages with crosscutting ideas and concepts central to the major including constructions of community in social-change efforts and the institutionalization of social movements in third-sector organizations. Deepens students' understanding of the opportunities and obstacles embedded in various avenues of social action. The Staff

**102. Preparation for Field Studies. S**

A practicum to prepare students for field study. Course must be successfully completed prior to the six-month field study.

Prerequisite(s): course 10; course 101; satisfaction of the Entry Level Writing and Composition requirements; submission of the signed Goals and Objectives form; and completion of the declaration of major process. Enrollment restricted to community studies majors. A. Steiner

**103. Field Study Practicum (2 credits). S**

A practicum in social change work in which the students works for a social change organization on a part-time basis. Concurrent enrollment in course 102 required. A. Steiner

**132. American Cities and Social Change. S**

Examines the historical development of and contemporary conditions within U.S. cities by focusing on social and economic restructurings of cities, cultural and political transformations, and spatial reorganizations of the urban landscape. Goal is understanding the changing nature of urban experience. M. Pudup

**133. Making California: Landscapes, People, Politics, Economy. \***

Examines key moments in the development of California to provide understanding of the challenges and opportunities facing California today. Particular focus is given to abiding tensions around wealth and poverty, opportunity and exclusion, and progressive and conservative politics. J. Guthman

**134. No Place Like Home. \***

Examines the class and race dynamics of the housing market and public policy, asking what kinds of housing get built, where it gets built, and for whom it is (or is not) built--and, crucially, why. Questions how homelessness became normalized in contemporary society. Enrollment limited to 30. M. Pudup

**141. Economic Justice. F**

Examines how markets operate within the political economy of contemporary capitalism to generate myriad and often chronic forms of economic and social inequality in the United States. Explores different approaches to addressing inequality within the multi-faceted economic justice movement. (General Education Code(s): E.) M. Pudup

**143. Wal-Mart Nation. \***

Examines origins and growth of Wal-Mart stores as powerful guides to understanding dynamics of contemporary global political economy and, relatedly, the changing fortunes of global social classes. M. Pudup

**145. Globalization and Its Discontents. \***

Provides an overview of the origins and existing character of major institutions, structures, and dynamics of the global political economy. Examines some social consequences of neoliberalism as well as political responses to it. J. Guthman

**149. Political Economy of Food and Agriculture. \***

Examines key concepts in agrarian political economy; the historical development of the world food system; and a selection of contemporary issues related to food production, consumption, distribution, and regulation. (General Education Code(s): PE-E.) J. Guthman

**151. Sex, Race, and Globalization. \***

Examines globalization by attending to shaping forces of sexuality, gender, and race. Foregrounds Third World feminist theories, social movements. Topics include sexual and racial dynamics of "free trade" and labor fragmentation; global sex trades; HIV/AIDS politics in the South and North; transnational LGBT/queer politics. (General Education Code(s): E.) The Staff

**156. Politics of Obesity. \***

Critically examines the construction and representation of the so-called epidemic of obesity, the major explanations for the rise in obesity

and the interventions they beget, and the implications of naming obesity as a problem. (Formerly course 145.) (General Education Code(s): PE-H.) J. Guthman

**157. Ageism and Activism. \***

Introduces students to gerontology, the study of aging. Taking a multidisciplinary approach, critically examines the theories, stereotypes, and realities of worldwide demographic transition and considers the many interesting implications for organizing social and personal life. A. Steiner

**160. Public Health. F**

Examination of community activism to address health issues: examples are drawn from a range of concerns, e.g., environmental racism, prison conditions, feminist health matters, the AIDS epidemic, violence, and alcoholism. Special attention is given to the social frameworks of health and to the utilization of social and political strategies for improving community well-being. A. Steiner

**161. Women's Health Activism. \***

Examines concrete aspects of women's health in social and political contexts, including such factors as environmental and occupational health, the role of race and nationality, diverse sexualities and health, American medical care systems, and international comparisons and organizing approaches. A. Steiner

**162. Community Gardens and Social Change. \***

Examines history, theory, and practice of community gardening, emphasizing contemporary garden projects using the transformative power of direct contact with nature to effect social change. Aims include understanding the nonprofit sector's response to social problems

with novel programs and practices. M. Pudup

**163. Health Care Inequalities. \***

Examines system and non-system that is American health care with special attention to inequalities in access, financing, and quality of care. Covers concepts such as equality, fairness, and need as well as community organizing and community building for health. A. Steiner

**164. Health Justice in Conflict. W**

Explores three case studies to address critical themes of healthcare inequalities in the context of conflict: the legal battle of Ecuadorians against Texaco/Chevron; the struggle of "comfort women" during World War II; and chemical saturation in Iraq. J. Rubaii

**186. Agriculture, Food, and Social Justice. \***

Examines the primary ways in which activists are attempting to resist, provide alternatives to, and/or transform aspects of the food system using social and environmental justice frameworks to evaluate such activism. Topics explored include organic farming, food charity, fair trade, relocalization, and farmworker organizing. Enrollment by permission of instructor. J. Guthman

**189. Methods of Teaching Community Studies. F,W,S**

Each student serves as a facilitator for small discussion groups in connection with core community studies courses. Facilitators complete course readings and meet with instructor as a group to discuss the teaching process. May not be counted toward upper-division major requirements. Prerequisite(s): prior course work in the major. The Staff

## Community Studies

### **191. Student Volunteer Internship (3 credits). F,W,S**

Course bridges Santa Cruz and university communities through students organizing volunteer opportunities and charitable events. Students contribute 10 hours per week on and off campus, including outreach, event-planning, and database maintenance; supplemented by reading and biweekly discussions. Enrollment by permission of instructor after application and interview. Enrollment limited to 15. (General Education Code(s): PR-S.) A. Steiner

### **192. Directed Student Teaching. F,W,S**

Teaching of a lower-division seminar, course 42, under faculty supervision. Students submit petition to sponsoring agency. Approval by the Committee on Educational Policy the prior quarter. The Staff

### **193. Field Study. F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **193F. Field Study (2 credits). F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **193G. Field Study (3 credits). F,W,S**

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194. Analysis of Field Materials. W**

A seminar for students who have completed a full-time field study. Devoted to the systematic analysis of field materials, integrating appropriate concepts and relevant literature, as well as utilizing the experience of other students. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 198. Enrollment restricted to community studies majors. (General Education Code(s): W.) The Staff

### **195A. Senior Thesis. F,W,S**

Individual study with a faculty member to complete the senior thesis. The Staff

### **195B. Senior Thesis. F,W,S**

Individual study with a faculty member to complete the senior thesis. The Staff

### **195C. Senior Thesis. F,W,S**

Individual study with a faculty

member to complete the senior thesis. The Staff

### **198. Independent Field Study. F**

Full-time independent field study in an approved off-campus setting with onsite supervision by the sponsoring organization and regular distanced supervision by campus faculty. Enrollment is restricted to community studies majors upon completion of the required preparatory coursework. Prerequisite(s): course 102. May be repeated for credit. (General Education Code(s): PR-S.) M. Pudup

### **199. Tutorial. F,W,S**

Advanced directed reading and research for the serious student. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Advanced directed reading and research for the serious student. May be repeated for credit. The Staff

## GRADUATE COURSES

### **297. Independent Study. F,W,S**

Either study related to a course being taken or a totally independent study. Designed for graduate students. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

For college description and list of faculty, see [Colleges](#).

---

## COWELL COLLEGE COURSES

---

### LOWER-DIVISION COURSES

#### **10. Becoming a Successful Student (2 credits). \***

An interactive approach to effective studying, note-taking, critical thinking, and exams. Also explored: time management; good communication with staff and faculty; major and career exploration; and use of campus resources. Enrollment priority given to first-year students and sophomores. Enrollment restricted to college members, or by permission of instructor. Enrollment limited to 15. The Staff

#### **12. Public Speaking (2 credits). W**

Introduces students to the theory and practice of formal and informal public speaking through composition, presentation, and evaluation of informative reports, persuasive speech, introductory remarks, panels, and extemporaneous speech. Enrollment restricted to college members during priority enrollment. Enrollment limited to 20. C. Carlstroem

#### **39. Brain, Mind, and Consciousness. W**

An interdisciplinary introduction to the study of the brain, mind, and consciousness. Topics include the philosophy of mind, neuroscience, cognition, and social psychology, and their applications in fields such as health science, technology, and social development. The Staff

#### **40. Near-Death Experiences: Evidence and Inference in the Post-Modern World. F**

Explores evidence and inferences from existing literature surrounding near-death experiences. Uses a multidisciplinary approach to investigate concepts, such as consciousness, aging, life, and death. Enrollment limited to 30. The Staff

#### **42. Student-Directed Seminar. \***

Seminars taught by upper-division students under faculty supervision. (See course 192.) The Staff

#### **50. Library Skills for the Digital Age (2 credits). \***

Intended to enhance students' skills in using the most powerful learning tool in any university: the library. Topics: organization of the library; how to begin researching; search engine and database use; judging the quality of sources; using sources responsibly. Disciplinary focus changes from quarter to quarter. Enrollment restricted to first-year and sophomore college members, or by permission of instructor. Enrollment limited to 22. The Staff

#### **52. Personal Finance and Investing (2 credits). S**

Overview of the financial responsibilities that young adults take on after college. Topics include: taxes, budgeting, student loans, credit, and investing in the stock market. Ubiquitous terms, such as

401(k), are defined, and financial principles are used to develop a framework for personal financial decision-making. Enrollment limited to 30. The Staff

#### **61. Critical Journeys (2 credits). \***

For publication in a Cowell literary journal, students substantively revise one of their fall quarter essays by studying a major work that influences, acknowledges, or further clarifies a required reading of the Cowell core course. Prerequisite(s): course 80A or 80B; enrollment restricted to college members. Enrollment limited to 20. J. Wilson, C. Carlstroem

#### **64. Social Justice: Issues and Debates (2 credits). \***

Focused followup on social justice topics and readings introduced in the Cowell core course. Allows first-year students to pursue social justice themes in greater depth. Students must have previously taken a Cowell core course (or equivalent). Enrollment restricted to first-year students. Enrollment limited to 20. J. Christianson

#### **65. Love and Wisdom. S**

Mary Holmes--legendary founding faculty member of UCSC, keen observer, painter of mythic images, and profound thinker--had a visionary's insight into the mysteries of love, paradox, and meaning. This course explores her art, teaching, and wisdom.

Enrollment limited to 25. (General Education Code(s): IM.) The Staff

**70A. Introduction to Book Arts.**

**F**

Students learn techniques of bookbinding, construction, and design, and fundamentals of letterpress printing. Enrollment by permission of instructor. Students are billed a materials fee. (Formerly Bookbinding.) Enrollment limited to 10. (General Education Code(s): A.) G. Young

**70B. Intermediate Book Arts. W**

Learn fundamental skills in fine letterpress printing, including hand typesetting and instruction in the operation of printing presses. Basic typography explored as students design and print a small edition of a selected text. Students are billed a materials fee. (Formerly Printing I: Elements of Printing.)

Prerequisite(s): course 70A or by permission of instructor. Enrollment limited to 12. (General Education Code(s): A.) G. Young

**70C. Advanced Book Arts. S**

Students learn fundamental skills in fine letterpress printing, including hand typesetting and instruction in the operation of printing presses. Basic typography explored as students design and print a small edition of a selected text. Students are billed a materials fee. (Formerly Printing II: Typography and Book Design.) Prerequisite(s): course 70B or by instructor permission. Enrollment limited to 12. May be repeated for credit. (General Education Code(s): A.) G. Young

**80A. Introduction to University Discourse: Imagining Justice Past and Present. F**

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading,

and speaking. Focuses on conceptions of justice, historic and contemporary, and considers how literary and artistic media may transmit, question, or revise notions of the just. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T4-Humanities and Arts, C1.) The Staff

**80B. Rhetoric and Inquiry: Imagining Justice Past and Present. F**

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Focuses on conceptions of justice, historic and contemporary, and considers how literary and artistic media may transmit, question, or revise notions of the just. Incorporates independent research. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T4-Humanities and Arts, C2.) The Staff

**83. The Modern Metropolis: Paris, London, New York 1770-1860. \***

A comparison of three great modern cities, with emphasis on their roles as incubators of new forms of art, spectacle, and entertainment; the specters of alienation, poverty, and crime during periods of explosive growth; and immigration and diversity as sources of cultural dynamism. Enrollment is restricted to Cowell and Crown Honors students. Enrollment limited to 30. (General Education Code(s): CC.) B.

Thompson

**84. Chinese Approaches to Human Values. \***

Through study of primary sources in translation, considers a range of classic Chinese approaches to basic reflective questions about human experience, with special focus on issues of justice, social engagement, and meaning and authenticity in everyday life. Enrollment restricted to Cowell and Crown Honors students. Enrollment limited to 28. (General Education Code(s): CC.) R. Birnbaum

**85. Introduction to Chinese Writing Systems. \***

Gateway course illuminating the operation of the writing systems of greater China. Intended for students who are curious about the world's longest continually used symbol set as well as for those who may be considering a serious commitment to learning the language. D. Keenan

**86. College Leadership Development (2 credits). S**

Students newly appointed as residential life assistants in the college prepare for taking up their positions by studying identity and diversity issues; student development; community building; conflict resolution; intercultural competency; and leadership skills. Restricted to students selected for Cowell College Resident Assistantship, and by permission of instructor. May be repeated for credit. The Staff

**87. The History of Time. W**

Examines the history of temporality or the human experience of time. Theoretical readings and primary sources are used to explore the ways that humans have related to the past, present, and future. Course focuses on research and writing methods. Enrollment restricted to

Cowell and Crown Honors students. Enrollment limited to 22. (General Education Code(s): CC.) M. O'Hara

**89. Faculty Research Colloquium (2 credits). S**

Introduction of UCSC as a research university, our notable researchers, and their work. Weekly discussions with UCSC faculty from a variety of disciplines. Enrollment restricted to participants in the first-year honors program. M. O'Hara

**93. Field Study. F,W,S**

Various topics to be arranged. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**93F. Field Study (2 credits). F,W,S**

Various topics to be arranged. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**94. Group Tutorial. F,W,S**

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. The Staff

**94F. Group Tutorial (2 credits). F,W,S**

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99. Tutorial. F,W,S**

Various topics to be arranged. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Various topics to be arranged.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**UPPER-DIVISION COURSES**

**107. Trust Rules: How to Tell the Good People from the Bad (2 credits). F**

Students learn practical tools and techniques for assessing trustworthiness, including your own, and applying these tools in a variety of situations. Integrating insights from practical experience, philosophy, and psychology, this course teaches us how to pay attention to red flags in relationships and ultimately develop a network of trustworthy people that will help us succeed in work and in our personal lives. (Formerly Trust Rules: How to Tell Good People from Bad People in Work and Life.) Enrollment restricted to college members or by permission of instructor. Enrollment limited to 20. The Staff

**110. Introduction to Mock Trial (2 credits). S**

Introduces Mock Trial, which is open to all students. Covers the basics of argumentation, cross and direct examinations, permissible evidence, witness testimony, and courtroom protocol. Special emphasis is on public speaking. Students write speeches for opening and closing arguments and create questions for witnesses. Students must read the Mock Trial handbook for examples and strategies. Each student has an opportunity for public speaking and creating a coherent legal argument. Enrollment restricted to college members. D. Robertson

**111. Mock Trial Workshop (2 credits). W**

Reserved for the Mock Trial team to practice arguments and refine techniques for the competition nationwide. Students drilled on the

case from both the perspective of the defense and of the offense. Direct examination and cross examination strategies explored, and practice given in witness testimony. Enrollment limited to 20. May be repeated for credit. D. Robertson

**118B. Words & Music: Poetry, Musical Theater, Opera. \***

Study of significant texts enhanced by music for performance. Topics vary annually. Course compares original texts in English translation with their adaptation to musical theater ( My Fair Lady, Oklahoma, etc.) and opera (Carmen, etc.) May be repeated for credit. (General Education Code(s): IH.) The Staff

**126. The Trajectory of Justice in America: Eight Cases that Changed the U.S.. \***

Reviews changing concepts of justice in constitutional law cases that changed the United States politically and socially. These cases include the Pentagon Papers, the Watergate burglary, Karen Silkwood, the American Sanctuary Movement, and Iran-Contra. (Also offered as Philosophy 155. Students cannot receive credit for both courses.) D. Sheehan

**138A. The Place of Higher Education in a Democratic Society. S**

Centers around interviews of alumni and involves a reflective term paper on a specific topic having to do with the role of higher education in a democratic society. Teaches students how to conduct interviews. Prerequisite(s): course 80A or 80B. Enrollment limited to 20. (General Education Code(s): PE-H.) F. Crosby

**138B. Life Development (2 credits). \***

Visits from alumni form the centerpiece of this course. In teams, students study the lives and the issues of the visitors. The aim is to reflect on the meaning of education in adult development.

Prerequisite(s): course 80A or 80B. Enrollment limited to sophomore, junior, and senior Cowell College members. Enrollment limited to 40. F. Crosby

**156M. Medical Ethics and Justice in Literature and Film. \***

Course approaches literature and literary devices in their capacity to address the patient's experience of illness, medical education and practice, and medical ethics and to understand and assess how considerations of justice impact these themes in medicine.

Particular issues raised by a variety of topics are examined and discussed in the context of case examples as presented in literature and film, e.g., informed consent, the doctor-patient relation, withdrawing vs. withholding life-sustaining treatment, organ transplantation, health care reform, rationing/social justice, etc. (Formerly Arts and Sciences.) Enrollment limited to 15. May be repeated for credit. D. Schultz

**158A. Special Topics: Oral History. \***

Introduction to the art and science of conducting and oral history. Readings include books that offer both theoretical and practical insights. Students conduct interviews and construct oral histories, focusing on the alumni of Cowell College. Enrollment restricted to sophomore, junior, and senior college members. Enrollment limited to 25. The Staff

**161Y. Modern Ancient Drama. \***

Studies 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, O'Neill, Graham, Pasolini, and Breuer, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. (Also offered as Theater Arts 161Y. Students cannot receive credit for both courses.) Enrollment limited to 30. (General Education Code(s): A.) The Staff

**168. Social Change (2 credits). F,W,S**

How do you change the world, working alone and in concert with others? To find out, students work in groups with specific community partners who, in turn, help place students in social-change organizations in Santa Cruz County. Enrollment restricted to college members. May be repeated for credit. (General Education Code(s): PR-S.) D. Baldini

**184A. Leadership and Institution Building (2 credits). F**

Through lectures by senior administrators and student consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Enrollment limited to 40. (General Education Code(s): PR-S.) R. Hughey

**184B. Leadership and Institution Building (2 credits). W**

Through lectures by senior administrators and student

consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Enrollment limited to 40. (General Education Code(s): PR-S.) R. Hughey

**184C. Leadership and Institution Building (2 credits). S**

Through lectures by senior administrators and student consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Enrollment limited to 40. (General Education Code(s): PR-S.) R. Hughey

**192. Directed Student Teaching. \***

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing required and a proposal supported by a faculty member willing to supervise. The Staff

**193. Field Study. F,W,S**

Program of study arranged between a group of students and an instructor, which may involve work with an off-campus or non-departmental agency (e.g., internship or field work). Interview only; prior arrangement with instructor. Enrollment restricted to juniors and seniors. May be repeated for credit. The Staff

**193F. Field Study (2 credits).  
F,W,S**

Program of study arranged between a group of students and an instructor, which may involve work with an off-campus or non-departmental agency (e.g., internship or field work). Interview only; prior arrangement with instructor. Enrollment restricted to juniors and seniors. May be repeated for credit. The Staff

**194. Group Tutorial. F,W,S**

A program of independent study arranged between a group of students and an instructor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**194F. Group Tutorial (2 credits). F,W,S**

A program of independent study arranged between a group of students and an instructor. Students submit petition to sponsoring agency. Enrollment restricted to juniors and seniors. May be repeated for credit. The Staff

**195. Senior Thesis. F,W,S**

Students submit petition to sponsoring agency. The Staff

**198. Independent Field Study.  
F,W,S**

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence.)

Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser, certification of adequate preparation, and approval by provost required. May be repeated for credit. The Staff

**199. Tutorial. F,W,S**

Various topics to be arranged. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S**

Various topics to be arranged. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

# CRITICAL RACE AND ETHNIC STUDIES

---

2015-16 General Catalog

416 Humanities I

(831) 459-2757

<http://cres.ucsc.edu/>

---

## PROGRAM DESCRIPTION

---

Critical Race and Ethnic Studies (CRES) majors develop a deep understanding of how race and other modalities of power have structured human life in the past and the present. Students acquire an understanding of the historical production of race and ethnicity in the United States and across the globe. They learn how the contours of race and racism have changed over time and, concomitantly, how individuals and groups have experienced these phenomena in constantly morphing ways. Students examine present-day racial/ethnic ideologies such as multiculturalism, colorblindness, and postracialism as well as contemporary social phenomena such as changing working conditions, new migration patterns, and emergent cultural expressions. Students also explore the ways that race and ethnicity have developed in concert with gender, sexuality, class, indigeneity, citizenship, and other modalities of power and lived identity.

CRES majors make critical use of methods and concepts from different academic disciplines as a means of better understanding historical and contemporary social phenomena and problems. In the process, they learn to recognize both the limits and the value of established knowledge production practices. The configuration of the major allows students flexibility at the upper division to design a course of study that enables a general understanding of a range of issues of intellectual and professional interest and/or a deeper understanding of a key area of focus.

Through their immersion in a program of study that is multidisciplinary, comparative, and transnational in scope, CRES majors develop a critical, situated perspective on the rights, responsibilities, and privileges of being a citizen of the United States or residing in its borders in the 21st century. CRES also helps students develop skills in critical thinking, comparative analysis, the application of social theory, research, communication, and writing so that they can act effectively in an ever-changing, complicated, and culturally diverse world.

---

## PROGRAM LEARNING OUTCOMES

---

Students who complete the CRES major should emerge with the following skills competencies, and knowledge:

### **Outcome 1**

Critical Frameworks: Historical and contemporary perspectives on race and ethnicity; intersectional understanding of race and ethnicity; familiarity with different disciplinary methods applied to race and ethnicity; facility with theoretical approaches to studying race and ethnicity.

### **Outcome 2**

Community Collaboration, Engagement, and Activism: Understanding of the university as one of many sites of the production of knowledge and power; familiarity with social and cultural movements; understanding of the ethical and intellectual issues surrounding activist, collaborative and community-based research projects; ability to design and implement a collaborative research project.

### **Outcome 3**

Research and Writing Proficiency: Ability to account for other people's arguments; capacity to create an argument around one's own research; ability to formulate and defend one's own arguments in the context of the relevant state of the field of Program Learning Outcomes.

---

## REQUIREMENTS FOR THE MAJOR

---

To apply for the major, students must have completed CRES 10, with a C or better, in order to declare the major. Junior transfer students and students in exceptional circumstances may substitute an equivalent course with the director's approval. Students must submit a proposed study plan to the program adviser that meets the major requirements in a coherent manner. Students are urged to submit their study plan no later than the third quarter of their sophomore year or, in the case of transfer students, no later than the first quarter of their junior year. The study plan should reflect a commitment to take CRES 100 and 101 at the next possible opportunity.

## DISCIPLINARY COMMUNICATIONS (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper division Disciplinary Communication (DC) requirement. The DC requirement in CRES is satisfied by completing CRES 190.

## COURSE REQUIREMENTS

---

To graduate with a major in CRES, a student is required to complete 10 courses with the approval of the program.

- One lower-division foundation course: CRES 10
- Two upper-division foundation courses: CRES 100 and CRES 101
  - Students may petition to substitute a department-based community engagement course for CRES 101.
- At least six upper-division electives offered by other departments, from the list of CRES-approved courses.
  - At least two electives must be from the list of designated courses focusing on phenomena outside of the US or on transnational or hemispheric subjects.
  - At least two academic divisions must be represented in the elective coursework.
  - Students are encouraged to take more than the minimum number of elective courses. They may elect to craft an elective distribution from several areas of specific research and career interests. Or, they may wish to take a number of elective courses in a particular area to develop expertise in it. For example, they may wish to focus on a social group (e.g., members of the African Diaspora), on a discipline (e.g., history), on a social phenomenon (e.g., social movements), or on a methodological or theoretical orientation e.g., theories of race, gender and sexuality.)
- Capstone research seminar: CRES 190

Students are encouraged to supplement their upper-division coursework with language study, internships, and individual or group independent studies. Students may petition to have up to 10 credits of such activities substituted for upper-division elective requirements, so long as these activities serve, or do not interfere with, the breadth requirements.

---

## GRADUATE PROGRAM

---

### DESIGNATED EMPHASIS

#### Requirements for the Designated Emphasis

---

Graduate students from other departments may obtain a designated emphasis in CRES by completing the following requirements in addition to the requirements for the doctorate in their home department:

- The student must have a designated graduate adviser from the CRES program principal or affiliated faculty. The student must meet with this CRES adviser to develop a coherent plan for meeting the requirements for the designated emphasis, preferably before the end of the student's first year. This plan must be approved by the CRES graduate director.
- A member of the CRES principal or affiliate faculty (usually the CRES graduate adviser) must serve on the student's qualifying examination committee and/or on the student's dissertation committee.
- The student must prepare a significant piece of scholarly writing in the area of CRES. This writing may take the form of a substantial seminar paper, a master's essay, or a portion of the doctoral dissertation. The student's CRES adviser will determine whether a particular piece of writing meets this requirement.
- The student must take four relevant graduate seminars taught by CRES program faculty. One relevant graduate seminar taught by non-program faculty may be counted with the approval of the CRES adviser. The adviser may also approve the substitution of an individual or group independent study addressing a set of readings or focused on research and writing for one of the four required graduate courses. The specific courses used must reflect a coherent plan of study that embodies both breadth and focus.

Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES core or elective course. CRES faculty are encouraged to appoint CRES designated emphasis students as teaching assistants when possible and appropriate.

#### Proposing and Obtaining the Designated Emphasis

---

Once a plan for meeting the requirements is agreed upon, the student should complete the application, obtain the CRES adviser's and graduate director's

## Critical Race and Ethnic Studies

signatures, and submit the application to the CRES program office. The request for the designated emphasis must originate in the degree-granting department.

Once the requirements have been met, the student submits relevant documentation to the CRES Program office for final approval by the CRES graduate director. At a minimum, the student should submit copies of the

qualifying examination and/or Dissertation Committee Nomination forms and a note from the adviser confirming that the writing sample and proposed courses have been completed. If the proposed courses have changed, an explanation of the changes should be included.

The CRES program will notify the student and the home department of approval for the designated emphasis.

---

## CRITICAL RACE AND ETHNIC STUDIES FACULTY AND PROFESSIONAL INTERESTS

---

### PRINCIPAL FACULTY

---

#### **Felicity Amaya Schaeffer, Feminist Studies**

Transnational feminisms; sexuality and migration, technology, and race; intimacy and globalization; Latin American/Latino studies; border studies; Chicana/o studies; biometrics and security studies

#### **Neda Atanasoski, Feminist Studies**

New media and film; critical race and ethnic studies; feminist theory; human rights and humanitarianism; war and nationalism; religion and secularism; post-socialist politics and culture in Central and Eastern Europe

#### **Vilashini Cooppan, Literature**

Postcolonial studies; comparative and world literature; literatures of slavery and diaspora; globalization studies; cultural theory of race and ethnicity

#### **Christine Hong, Literature**

Asian American literature and cultural criticism; African American literature and black freedom studies; Korean diasporic cultural production; Pacific Rim studies; postcolonial theory; critical race theory; human rights discourse; law and literature; narrative theory; film and visual studies

#### **Steve McKay, Sociology**

Work and labor markets; globalization and social change; political sociology; race; masculinity; migration; ethnography/qualitative methods

#### **Nick Mitchell, Feminist Studies**

Black feminist thought and praxis; critical theory; critical university studies; epistemology and discipline formation; feminist theory; intellectual history

#### **Marcia Ochoa, Feminist Studies**

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, geography, multimedia production, graphic design, colonialism and modernity, Latin American studies—Colombia and Venezuela, social documentation

#### **Juan Poblete, Literature**

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

#### **Eric Porter, History/History of Consciousness**

Black cultural and intellectual history; U.S. cultural history and cultural studies; critical race and ethnic studies; jazz and popular music studies; urban studies

#### **Karen Yamashita, Literature**

History and anthropology of Japanese immigration to Brazil; Asian American literature; modern fiction; playwriting

#### **Alice Yang, History**

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

#### **Mark Anderson, Anthropology**

Racial formation, diaspora, nationalism, transnationalism, culture and power; Latin America, African diaspora

#### **David Anthony, History**

African and African American history, art, music, literature, and cinema; eastern and southern Africa; African languages; Indian Ocean world; African and African American linkages; Islamic civilization; African diaspora studies; world history

#### **Bettina Aptheker, Feminist Studies**

Feminist oral history and memoir; feminist pedagogy; African American feminist history; queer studies; feminist Jewish studies; feminist critical race studies

#### **Anjali Arondekar, Feminist Studies**

South Asian studies, colonial historiography; feminist theories; queer theory; critical race studies; 19th-century interdisciplinary studies

**Gabriela Arredondo, Latin American and Latina/o Studies**

Latina/o studies; Chicana/o history; U.S. immigration histories; U.S. social and cultural history; critical race and ethnicity theories; Chicana and Mexicana feminisms; "borderlands" studies; history of modern Mexico

**Noriko Aso, History**

Japanese social, intellectual, and cultural history, material culture, colonialism, nationalism, gender, race and ethnicity

**Karen Bassi, Literature**

Greek and Latin literatures; gender; literary and cultural theory; pre- and early modern studies; historiography; visual and performance studies

**Dorian Bell, Literature**

Nineteenth- and 20th-century French literature and intellectual history; histories of empire and anti-Semitism; literature and science; film studies; digital humanities

**Martin Berger, History of Art and Visual Culture**

Gender, race, and representation in U.S. culture

**David Brundage, History**

American immigration history, with particular focus on the Irish in America and on transnational immigrant politics; U.S. labor and social history; modern Irish history

**Christopher Chen, Literature**

Twentieth- and 21st-century African American literature; Asian American literature; 20th and 21st-century US multiethnic poetry and poetics; comparative ethnic literary studies; literary formalisms and comparative racialization; contemporary experimental poetics and political theory

**Nancy Chen, Anthropology**

Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

**Alan Christy, History**

Early modern and modern Japan; history of social sciences, colonialism, nationalism

**Chris Connery, Literature**

World literature and cultural studies; globalism and geographical thought; the 1960s; Marxism; pre-modern and modern Chinese cultural studies; cultural revolution

**Cynthia Cruz, Education**

Feminist ethnography; community-based learning; decolonial pedagogies; LGBTQ street youth; women of color thought; cultural studies and education

**Jon Daehnke, Anthropology**

Archaeology of the North American Pacific Coast, cultural heritage politics and law, contemporary Native American politics, human-environment interaction, landscape and place, collaborative methodologies, NAGPRA implementation and compliance, public representations of heritage and memory

**Grace Peña Delgado, History**

Chicano/a History; Mexico-US-Canadian Borderlands; Latino/a Studies; Asian and Asian American Studies; Immigration; Gender and Sexuality; Modern Mexico and Latin America

**Gina Dent, Feminist Studies**

Africana literary and cultural studies, legal theory, popular culture

**Jennifer Derr, History**

Colonial and Post-colonial Middle Eastern history; Egypt; agricultural and environmental history; Ottoman history; spatial politics; African history; Islamic history

**Nathaniel Deutsch, History**

Modern Jewish history; Eastern European Jewish culture; ethnography, Hasidism; history of religions

**Maria Elena Diaz, History**

Atlantic world, Colonial Latin America and the Caribbean, Cuba; social and cultural, global and local histories; colonialism, slavery and freedom, race/ethnicity, gender and class; legal, political, popular, and religious culture

**Sylvana Falcón, Latin American and Latina/o Studies**

Human rights activism, racism/antiracism, globalization, gender, transnational feminism, contemporary Peru

**Adrián Félix, Latin American and Latina/o Studies**

International migration; Mexico-U.S. migration; migrant transnationalism; racial/ethnic politics and identity; politics of citizenship; Latino politics

**Dana Frank, History**

Late 19th- and 20th-century U.S. social history; women's, labor, and working-class history; race and ethnicity/modern Honduras; U.S. history in transnational perspective

**Carla Freccero, Literature**

Renaissance studies; French and Italian language and literature; early modern studies; postcolonial theories and literature; contemporary feminist theories and politics; queer theory; U.S. popular culture; posthumanism; animal studies

**Rosa-Linda Fregoso, Latin American and Latina/o Studies**

Human rights, femicide, and violence studies; critical and cultural theories; decolonial and intercultural feminist studies; media and visual studies

**Hiroshi Fukurai, Sociology**

Citizen participation in law, race and the law, indigenous approach to international law, decolonialism, Japan and East Asia, advanced quantitative methods, survey research

**K.C. Fung, Economics**

International trade and finance, WTO, foreign direct investment, global environmental economics, and Asia/Pacific economies

**Susan Gillman, Literature**

Nineteenth-century American literature and culture; theories of culture, race, and gender; world literature and cultural studies

**Jennifer González, History of Art and Visual Culture**

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

**Herman Gray, Sociology**

Cultural studies, media and television studies, black cultural politics, social theory

**Kirsten Silva Gruesz, Literature**

Transnational Americas studies; Chicano/Latino literatures and cultures; 19th-century U.S. and Latin American literature; poetry; history of the book; reading and literacy; bilingualism

**Lisbeth Haas, History**

U.S.-Mexico borderlands and border studies, Chicano and Native American history; visual culture in the colonial Americas; California; historical memory, theory, and historical methodology

**Karlton Hester, Music**

Premeditated, electroacoustic, and spontaneous composition; flutes, saxophones, and interdisciplinary performance; improvisational and Afrocentric music theory, analysis and history. Artistic Director, Global African Music and Arts Festival/Symposium; UCSC/ISIM International Improvisation Festival/Conference

**Catherine Jones, History**

U.S. civil war and Reconstruction; slavery and emancipation; the American South; history of children; history of education; women and gender

**L.S. Kim, Film and Digital Media**

Television history and theory, racial discourse, feminist criticism, Asian-American cultural theory and

production, industrial practices and social change in both mainstream Hollywood and alternative media

**Regina Langhout, Psychology**

School-community-university collaboration; how schooling and neighborhood experiences are informed by social class, race, and gender; young people and empowerment; participatory action research

**Kimberly Lau, Literature**

Feminist theory; fairy tale studies; virtual worlds; social fictions; discourse analysis and ethnographic methods

**Amy Lonetree, History**

Indigenous history; museum studies; memory and history; Native American cultural production; public history; and Ho-Chunk tribal history

**Boreth Ly, History of Art and Visual Culture**

Visual cultures of Southeast Asia and its diaspora: religions and materiality, theory of visual narrative, the politics of cultural translation; (post) colonial and cultural studies; issues of gender, sexuality, race, and trauma

**David Marriott, History of Consciousness**

Poetics, black cultural studies, literary and psychoanalytic theory, visual culture studies, black cultural theory and philosophies of race, caribbean modernism, Fanon studies

**Marc Matera, History**

Britain and the British Empire; Modern Europe; world history; Atlantic World; western Africa; African diaspora studies; colonialism; race/ethnicity, gender, and sexuality

**Lourdes Martinez-Echazabal, Latin American and Latina/o Studies**

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

**Derek Murray, History of Art and Visual Culture**

Theory and criticism of contemporary art, cultural theory, identity and representation, art of the African diaspora, popular visual culture, contemporary photography, and the ethics of art history and visual studies

**Matthew O'Hara, History**

Colonial and modern Latin America; Mexico; religion; race, ethnicity, and identity; political culture; history of time

**Greg O'Malley, History**

Slavery and the slave trade; the colonial Americas; the Atlantic World; race, ethnicity, and encounters; Native American history; revolutionary America

**Hector Perla, Latin American and Latina/o Studies**

International relations; Latin American studies; Latino politics; 21st-century left in Central America; U.S. foreign policy; social and revolutionary movements; asymmetric conflicts; political psychology; transnational political mobilization

**Catherine Ramírez, Latin American and Latina/o Studies**

United States cultural history, with a focus on immigration and assimilation; theories of citizenship; Latino literature; comparative ethnic studies; feminist and gender studies; cultural studies

**Jennifer Reardon, Sociology**

Science studies; sociology of science, technology, and medicine; feminist theory; race/ethnicity/gender/sexuality/class; biology and society

**Cecilia Rivas, Latin American and Latina/o Studies**

Transnationalism; media and communication (Internet, newspapers); migration; globalization; race, ethnicity, and gender; bilingualism; consumption; El Salvador, Central America, Southern Mexico

**Vanita Seth, Politics**

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

**Nirvikar Singh, Economics**

Industrial organization, political economy, economic

development, technology and innovation, South Asian immigrants in the U.S., Indian economy, Sikhs and the Punjab

**Yiman Wang, Film and Digital Media**

Theory of difference; film history and theory; colonial/semi-colonial/postcolonial/postsocialist modes of media production and exchange; border-crossing film remakes; silent cinema; translation theory and cinema; acting theory/practice and ethnic star studies with focus on Anna May Wong; transnational connections and ramifications of Chinese cinema and documentary; fan culture; East Asian cinemas

**Lewis Watts, Professor Emeritus, Art**

**Marilyn Westerkamp, History**

Colonial and revolutionary America; the Atlantic World; early modern cultural and religious history; U.S. religious history; gender studies; history of the body

**Ronaldo Wilson, Literature**

20th-century and contemporary African American literature; poetry; contemporary American poetry and poetics; Black visual culture; recent experimental writers and artists

**Pat Zavella, Latin American and Latina/o Studies**

Transnational migration by Mexicans, poverty, family, sexuality, labor, social networks, feminist studies, Chicana/o-Latina/o studies, ethnographic research methods

---

## CRITICAL RACE AND ETHNIC STUDIES COURSES

---

### LOWER-DIVISION COURSES

**10. Critical Race and Ethnic Studies: An Introduction. F**

Examines the concept of race, followed by an investigation of colorblindness, multiculturalism, and post-racialism. Race and ethnicity are examined as historically formulated in relationship to the concepts of gender, sexuality, class, nationalism, indigeneity, citizenship, immigration, and inequality. Prerequisite(s): Satisfaction of the Entry Level Writing and C1 requirements. (General Education Code(s): ER.) N. Mitchell

**70S. Introduction to the Sikhs (2 credits). W**

Introduces the Sikh community, including origins, history, belief system, and contemporary issues. Other topics include: Sikh music, art, literature, and aspects of Sikh society. Attention paid to the Sikh diaspora in the United States and in California in particular, including comparative perspectives with other minority communities. (Formerly Humanities 70S.) N. Singh

### UPPER-DIVISION COURSES

**100. Comparative Theories of Race and Ethnicity. W**

Examines race and ethnicity as categories of lived identity intersecting with gender, sexuality, class, and culture; historical discourses of difference underwriting social inequalities and movements to redress those inequalities; and concepts critical to the understanding and reshaping of power and privilege. Prerequisite(s): course 10 and satisfaction of the Entry Level and C1 requirements. (General Education Code(s): ER.) V. Cooppan

## Critical Race and Ethnic Studies

### **101. Research Methods and Writing in Critical Race and Ethnic Studies. S**

Examines how scholars and activists produce knowledge in critical race and ethnic studies. Interrogates key terms to build a foundation and literacy in research methods. The course is project-based; and requires work on a team. Prerequisite(s): course 10 and

satisfaction of the Entry Level Writing and Composition requirements. R. Langhout

### **190. Senior Seminar. S**

Required research seminar for Critical Race and Ethnic Studies majors in which students write a substantial research paper or a series of short papers. May be organized around a specific theme

at the instructor's discretion. Prerequisite(s): courses 10 and 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior CRES majors. Enrollment limited to 25. E. Porter

Revised 09/01/2015

---

# CROWN COLLEGE

---

2015-16 General Catalog

College Office  
(831) 459-2665

<http://crown.ucsc.edu/>

For college description and list of faculty, see [Colleges](#).

---

## CROWN COLLEGE COURSES

---

### LOWER-DIVISION COURSES

#### **28. Crown Student Leadership Development Seminar (2 credits). W**

Explore leadership as it relates to student development at Crown College. Examine how values, ethics, involvement, identity, and theory affect leadership in a variety of content areas. Evaluate student's leadership strengths to determine objectives for improvement. The Staff

#### **31. Crown College Student Leadership in Action Seminar (2 credits). S**

Focuses on developing and establishing leadership skills and styles for new leaders at Crown College. Explores communication styles, group dynamics, community development, programming, moral development and conflict resolution concepts and strategies. Applies theory to action. Enrollment limited to college members and by permission of instructor. The Staff

#### **60. The Environment on Film: Rhetoric of Ecocriticism. \***

Examines the overt as well as the subtle cinematic elements that depict, ponder, and persuade concerning issues of the environment and the role of humans regarding nature, animals, and the human-made landscape. Enrollment restricted to college members during priority enrollment. Enrollment limited to 24. (General Education Code(s): IM, IH.) The Staff

#### **70. Introduction to Broadcast Media: Radio. F,W,S**

Comprehensive history of noncommercial radio as a mass-communication medium. Course also serves as an introduction to UCSC's radio station KZSC-FM and broadcasting. Through lectures, hands-on instruction, and written assignments, students learn the fundamentals of program presentation and audio production. Enrollment by permission of instructor. Enrollment limited to 14. (General Education Code(s): PR-S.) K. Rozendal

#### **79. Engaging the University: Core Exploration (2 credits). F**

First, introduces Crown students to university-level discourse through a series of four selected plenary sessions, each followed by collaborative discussion and writing in small groups. Second, prepares students for the winter offering of Core through practice of textual analysis and by early introduction of the themes of Core. Third, encourages exploration of the campus so students can make full use of the recreational and support resources available. (Formerly Introduction to Ethical Foundations.) Prerequisite(s): Satisfaction of the the Entry Level Writing Requirement. Enrollment is restricted to first-year Crown College members. The Staff

#### **80A. University Discourse: Ethical and Political Issues in Emerging Technologies. F,W**

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Examines ethical challenges brought about by rapidly changing science and technology. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, C1.) The Staff

#### **80B. Rhetoric/Inquiry: Ethical and Political Issues in Emerging Technologies. F,W**

Explores intersection, interpretation, and persuasion and hones strategies for writing and research. Examines ethical challenges brought about by rapidly changing science and technology. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year Crown College members. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, C2.) The Staff

#### **80F. Science Fictions. \***

Examines how science fictions have imagined better and worse worlds, social relations, and identities by

using science and technology. Students read novels and short stories from the 19th Century to the present and discuss and debate questions of justice, freedom, difference, and identity. (Formerly "Seminar in Science Fiction.") Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment limited to 22. (General Education Code(s): TA, T7-Natural Sciences or Social Sciences.) The Staff

**80J. Cyborg Society: Myths, Realities, Choices. \***

Examines content and methodologies of the emerging field of cyborgology. Includes social studies of science, anthropology, sociology, philosophy, politics, art, biology, and informatics. Enrollment limited to 25. (General Education Code(s): PE-T, T5-Humanities and Arts or Social Sciences.) C. Gray

**80L. Food Safety and Environmental Quality: The Complexities of a Safe Salad. \***

In recent years, outbreaks of food-borne illness have alarmed farmers and consumers alike. This course examines the complexities of ensuring food safety in the complex natural, economic, and social settings that characterize U.S. food-production systems. Enrollment limited to 24. (General Education Code(s): PE-E, T7-Natural Sciences or Social Sciences.) The Staff

**80S. Undergraduate Seminar in Science, Technology, and Society. \***

An honors seminar for first year students on selected topics that examine the relationship between science, technology, and society. Precise focus of each seminar varies and is announced by the college. Preference given to Crown College students. Enrollment restricted to

first-year and sophomore students. Enrollment limited to 20. (General Education Code(s): T2-Natural Sciences.) The Staff

**84H. Extreme Environment Virology. W**

Students sample viruses from an extreme environment during a field trip, and sequence DNA from that sample and other viruses and assemble their genomes. This is an integrated course in molecular genetics and bioinformatics focusing on extreme environments. Enrollment restricted to Crown and Cowell Honors students. Enrollment limited to 24. (General Education Code(s): SI.) D. Bernick

**85. Visual Perception: A Window to Brain and Behavior.**

Investigates visual perception as an example of the correlation of brain and behavior. Uses a multidisciplinary analysis of the optical, biochemical, and neural components of the visual pathway leading to the perception of form, color, etc. Discusses the applications of neuroscience in the social sciences, the humanities, engineering, and the arts. Enrollment is restricted to students in the Crown College or Cowell College first-year honors program. Enrollment limited to 25. E. Switkes

**93. Field Study. F,W,S**

Provides for individual programs of study sponsored by the college and performed off campus. Students should review plans with an appropriate fellow of the college. A proposal should be presented to the college academic preceptor no later than the seventh week of the preceding quarter. Credit is granted by the sponsor upon approval of the work performed. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**93F. Field Study (2 credits). F,W,S**

Provides for individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**UPPER-DIVISION COURSES**

**123. Examining Our Life Through Writing. S**

Writing-intensive seminar. Based on course readings and discussions, students write reflective response papers at the end of each class and weekly papers on their own lives and what they care most about. Intense class discussions, often started by students sharing their essays. Prerequisite(s): satisfaction of the Composition 1 requirement. Admission by permission of instructor after student reads lengthy syllabus, writes application, and interviews with instructor during faculty office hours. (Formerly Science and Human Values) F. Andrews

**185. Career and Internship Preparation (1 credit). F,W,S**

For juniors and seniors preparing for an internship experience or career position. Subjects include: self-assessment of career objectives and/or internship goals; exploration of resources and techniques for finding and evaluating potential positions; resume writing; interview techniques; techniques to maximize learning in an internship and advancement in a job; communication; conflict resolution and problem solving in the organizational setting. Students are

Crown College

billed a materials fee. Enrollment limited to 40. The Staff

**191. Student Practicum. F,W,S**

The student learns teaching skills by working with a faculty member in a Crown College course. Activities include facilitating discussions, helping students improve skills, and modeling leadership. The student must have demonstrated excellent performance in the course in which he/she will be assisting to be considered. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment by interview only. Enrollment limited to 1. The Staff

**198. Independent Field Study. F,W,S**

Provides for college-sponsored individual study programs off campus. Approval of student's faculty sponsor and college academic provost required. The Staff

**199. Tutorial. F,W,S**

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S**

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

---

# DIGITAL ARTS AND NEW MEDIA

---

2015-16 General Catalog

DARC 204

(831) 459-1919

<http://danm.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

New technologies have profoundly changed contemporary culture and inevitably altered the role of the arts in society. The Digital Arts and New Media (DANM) Master of Fine Arts (M.F.A.) Program serves as a center for the development and study of digital media and the cultures that they have helped create. Faculty and students are drawn from a variety of backgrounds, such as the arts, computer engineering, humanities, the sciences, and social sciences, to pursue interdisciplinary artistic and scholarly research and production in the context of a broad examination of digital arts and cultures.

---

### PROGRAM LEARNING OBJECTIVES

---

1. Develop necessary digital art and new media knowledge to understand the state of the field. Examples: Technical, aesthetic, historical, and theoretical knowledge.
2. Demonstrate ability to define, plan, and execute individual and collaborative digital art and new media research projects. Examples: Developing project concepts, prototyping, timeline development, creative problem solving.
3. Understand multiple forms of digital art and new media critique, be able to respond to and give critiques productively. Examples: Forms such as studio critique, performance critique, system design critique, and writing critique. Ability to understand critique, evaluate feedback, produce iteration of work.
4. Demonstrate ability to participate in planning, coordinating, and executing collaborative digital art and new media research projects. Examples: Brainstorming, collaborative idea formalization and project planning, iterative development and refinement, team coordination and communication.
5. Employ professional communication practices in digital art and new media to make public contributions to the field. Examples: Research papers, artist talks and statements, exhibitions, performances.

The Digital Arts and New Media M.F.A. Program is a two-year program organized into four interdependent and equally important pursuits:

**New Praxis**—The term “praxis” has many meanings, which include “translating ideas into action” and “action and reflection upon the world in order to change it.” New Praxis in DANM is comprised of “critique” and “practicum” which provide students with both the practical training and critical dialogue necessary to pursue their own individual goals as artists and cultural practitioners.

**Studies**—DANM “studies” include required core seminars that allow students first to explore an array of recent methods and approaches in digital arts and culture, and then to pursue the construction of specific genealogies and theories with a sustained focus on a particular topic, by engaging in various dialogues at the intersection of theory and practice while developing their thesis project and paper.

**Collaborative Research**—Students and faculty engage in research collaborations resulting in publications and exhibitions in one of four possible focused research areas: mechatronics, participatory culture, performative technologies, and playable media described below.

---

### MECHATRONICS

---

Mechatronics is the functional integration of mechanical, electronic, and information technologies. In DANM this framework may be employed for the development and production of physical, systems-based artwork that incorporates elements of robotics, motion control, software engineering, and hardware design. DANM mechatronics research involves the use of a variety of media including video, performance, and sculpture for the creation of complex, kinetic, audio-visual systems for the exploration of temporality, materiality, experience, and perception.

---

### PARTICIPATORY CULTURE

---

Participatory culture studies and research efforts explore the role of information and communication technologies in the current shift from “top-down”

## Digital Arts and New Media

culture to a culture of participation and social engagement. Within the social register, the human/computer interface acts as both a boundary and a bridge. Participatory culture research in DANM encompasses a range of projects in social computing and community-media activism which involve the design of new technologies to address social problems and facilitate broader participation in culture and politics.

---

### PERFORMATIVE TECHNOLOGIES

---

Research in performative technologies explores new methods for combining media and technology to create the visual, aural, and connective material of performance. DANM performance research generates new public and performative spaces where digital media, communication networks, and interactive systems may be fused with lighting, movement, and stage and sound design to create real-time shared multimedia experiences for audiences and performers at both local and remote locations. Ongoing projects in this area may include work in telematics; performance-driven, real-time graphics; algorithmic composition of sound and image; computer vision and motion capture; and studies of ritual, performativity, embodiment, interactivity, and subjectivity.

---

### PLAYABLE MEDIA

---

Playable media research explores the potential of computational systems for the creation of new media forms that invite and structure play. This group works to understand and create new ways for computer games and related forms to engage audiences, make arguments, tell stories, and shape social space. Ongoing playable-media work combines game-design and artificial-intelligence research with writing, art, and media authoring.

Prospective students are asked to identify their choice of research group in their application and statement of purpose. Admissions are tied to DANM project group foci. New students are admitted into a specific project group based on the quality and relevance of the student's prior work and expertise to the group project in their chosen area of focus. Students collaborate on faculty-initiated and -directed research projects. This work is intended to provide the student with the opportunity to learn collaborative and practical research methodologies, and to participate in a professional-level research project. The collaborative-project group experience is intended to inform, but not necessarily contribute to, the student's thesis project.

**Pedagogy**—DANM trains future arts academics through practical experience. Students are awarded teaching

assistantships as part of their overall support package as well as opportunities to assist faculty in workshops.

---

## REQUIREMENTS

---

The DANM M.F.A. Program requires 72 credits of academic course work. In the first year, students generally take three courses each term—one course in each of the program areas, New Praxis, Studies, and Collaborative Research. In the second year, students primarily take elective courses, work with their thesis committees, and pursue independent and directed research leading to the completion of the thesis project and paper.

---

### NEW PRAXIS

---

New Praxis in DANM is comprised of “critique” and “practicum.” Students are required to take seven new praxis courses over two years and have the option to take two new praxis electives.

---

#### New Praxis–Year One

---

**Practicum**—This area of praxis is designed to allow students to develop the conceptual, technical, and practical skills they need to successfully complete projects that realize their own individual goals as digital media artists.

**DANM 210**—First-year students are required to take a Project Design Studio in the first quarter. This course guides the development of students' individual studio practice, particularly in relation to the transition to digital media.

**Electronic and programming requirements**—First-year students also take basic courses in electronics and programming. Students with prior experience in programming and/or electronics should discuss their background with the instructor and their adviser to determine if the course is needed or if an alternative course should be taken to fulfill this credit requirement. Students seeking an alternative means to fulfill this requirement may choose to:

- serve as assistants in workshops for beginning students;
- take electronics or programming electives offered in computer engineering; or
- enroll in independent studies, as approved by their adviser.

**Critique**—This area of praxis is designed to allow students to present their own work and review the work of their fellow students as a means of engaging in the critical dialogue necessary to pursue their own individual goals as digital media artists. First-year students are required to present work-in-progress based on the projects developed in the project-design

## Digital Arts and New Media

course in both individual studio and group critiques, and participate in group critique discussion.

During the spring quarter, first-year students identify and engage a thesis committee under the supervision of the program director.

### New Praxis–Year Two

---

**Practicum**—During the fall quarter, second-year students work on the development of their thesis project proposal and abstract under the supervision of their thesis committee. Second-year students are encouraged to take practice-based electives and independent studies that facilitate the development of their thesis projects.

**DANM 299**—In the winter and spring quarters, second-year students enroll in a minimum of 10 credits of independent thesis research which is supervised by one or more members of their thesis committee.

**DANM 215**—Students work with faculty curator/coordinator on development of thesis projects specifically for the group exhibition context. Students contribute to development of exhibition design and collateral materials, while studying the unique presentation and curatorial challenges of new media.

---

## STUDIES

---

Students are required to take three core seminars over two years and have the option to take two studies electives.

### STUDIES–YEAR ONE

---

**DANM 201 Recent Methods and Approaches to Digital Arts and Culture**—In this seminar students examine an array of methods and approaches to research and writing in digital media art and culture and explore key theories concerning digital media and cultures.

**DANM 202 Dialogues and Questions in Digital Arts and Culture**—A pre-thesis course in which students engage in dialogues at the intersection of theory and practice with the goal of producing a pre-thesis proposal and preparatory essay. Readings and seminar discussions will inform the development of pre-thesis project proposals and essays.

### STUDIES–YEAR TWO

---

**DANM 203 Professional Development in the Arts**—Designed as a professional art practices practicum, this course is focused on researching opportunities and developing practical strategies and skills to ensure success outside of an academic environment.

**Elective**—Students may choose to take an elective offered by the program or choose an elective from a

broad array of graduate courses offered on campus with the approval of their adviser.

### COLLABORATIVE RESEARCH

---

Students participate in a three-quarter-long, collaborative-research project group in one of four possible DANM research focus areas, which takes place in the winter and spring quarters of the first year. In the second year, students continue with the final quarter of their project group (fall). This work is intended to provide the student with the opportunity to learn collaborative and practical research methodologies, and to participate in a professional-level research project.

---

## THESIS REQUIREMENT

---

Students are required to complete a thesis project and written paper under the supervision of their thesis committee. The thesis will be an arts project with digital documentation accompanied by a written paper. Thesis projects may be individual or collaborative and are expected to grow out of the research pursued in the project groups during the three quarters prior as well as work developed in new praxis courses. Each student will be expected to complete a 20- to 30-page paper discussing the student's preparatory research as well as the theoretical significance of the project. In the case of collaborative projects, each student will be required to submit his or her own paper. During the thesis year, students will make at least two progress presentations to their thesis committee. The chair of the three-person committee will be a full associate professor and DANM faculty member. A completed thesis project and paper must be submitted to and approved by the thesis committee before the degree can be awarded.

---

## APPLICATIONS

---

Prospective students in the Digital Arts and New Media program will have a foundation in the arts with some demonstrated interest in technology or a foundation in technology with demonstrated background in the arts. Many, but not all, entering students will have completed a Bachelor of Arts (B.A.) program in one or more of the arts disciplines (art or art history, film, multimedia, music, theater, video, etc.) or a Bachelor of Science (B.S.) program in computer science or computer or electrical engineering. Other successful applicants will have a B.A. or B.S. in another field but will be able to show substantial achievement in the arts, in technology, or in digital arts.

In certain cases, students who demonstrate excellent potential for the program but lack proficiency in a "cross discipline" will be admitted to the program with the understanding that they will take courses during

## Digital Arts and New Media

their first two quarters of study to make up that deficiency. An arts student lacking sufficient programming experience, for example, will be expected to take one or two programming courses in their first two quarters in addition to the DANM program requirements.

Students will apply online through the Division of Graduate Studies web site between October and January for the following fall quarter. In addition to submitting an online application, students will be expected to submit an online portfolio. Further information can be found at: <http://graddiv.ucsc.edu>.

---

## DIGITAL ARTS AND NEW MEDIA PRINCIPAL FACULTY AND PROFESSIONAL INTERESTS

---

### **Elliot W. Anderson, Associate Professor, Art**

Electronic art, digital arts/new media

### **Michael Chemers, Associate Professor, Theater Arts**

Theater history and theory, playwriting, dramaturgy, acting

### **Sharon A. Daniel, Professor, Film and Digital Media**

New media documentary and database documentary; social, economic, environmental and criminal justice; Participatory culture, Community-based public art in information and communications environments; social and political aspects of information design; net art, social-practice art

### **David Dunn, Assistant Professor, Music**

Sound art and design, music and the environment, acoustic ecology, compositional linguistics, live electro-acoustic performance, composition, bio-acoustic research, history of electronic music practice, art and science, audio engineering and location recording

### **Jennifer A. González, Professor, History of Art and Visual Culture**

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

### **Soraya Murray, Assistant Professor, Film and Digital Media**

Contemporary visual culture and representation including: new media art; projected arts; photography; electronic games; theories of art and globalization; representations of migration and otherness

### **Jennifer Parker, Associate Professor, Art**

Sculpture, digital art and new media, art | science

### **Warren Sack, Professor, Film and Digital Media**

Software design and media theory

### **Noah Wardrip-Fruin, Professor, Computational Media**

Digital media, computer games, electronic literature, software studies

### **Affiliate Faculty and Professional Interests**

**Ralph H. Abraham, Professor Emeritus, Mathematics**

### **Lawrence Andrews, Associate Professor, Film and Digital Media**

Film and video production, documentary, installation and media art, sound, animation

### **Neda Atanasoski, Associate Professor, Feminist Studies**

New media and film; critical race and ethnic studies; feminist theory; human rights and humanitarianism; war and nationalism; religion and secularism; post-socialist politics and culture in Central and Eastern Europe

### **Brandin Baron-Nusbaum, Associate Professor, Theater Arts**

Costume design, history of design

### **Amy C. Beal, Professor, Music**

American music, 20th-century music, experimental and improvisatory performance practices, postwar and Cold War culture, German new music festivals and radio stations, piano performance, contemporary music ensemble

### **James H. Bierman, Professor, Theater Arts (Drama)**

Playwriting, theater history and literature, classical and Renaissance drama, Chicano theater, digital media

### **Benjamin L. Carson, Associate Professor, Music**

Theories of consciousness and cognition, rhythm perception, Schoenberg, history of compositional method, subjectivity and identity

### **E.G. Crichton, Professor Emerita, Art**

### **Christopher Connery, Professor, Literature**

World literature and cultural studies, globalism and geographical thought, the 1960s, Marxism, pre-modern and modern Chinese cultural studies, cultural revolution

### **James E. Davis, Professor, Computer Science**

Information and Communication Technologies for Development (ICTD), technology for global social issues, human computation, computational photography, computer vision, computer graphics

### **Kate Edmunds, Professor, Theater Arts**

Set design for theater and film

## Digital Arts and New Media

### **Shelly E. Errington, Professor, Anthropology**

Globalization of folk art, visual and social semiotics, photography, film, the Internet and digital media, Southeast Asia, and Latin America

### **Irene Gustafson, Associate Professor, Film and Digital Media**

Producing across the boundaries between "theory" and "practice," non-fiction media, experimental film/video, production design, gender and queer studies

### **Helen Mayer Harrison, Visiting Eminent Professor, Arts Division and Art Department**

### **Newton Harrison, Visiting Eminent Professor, Arts Division and Art Department**

### **Dee Hibbert-Jones, Associate Professor, Art**

Public art, sculpture

### **Robin Hunicke, Associate Professor, Art**

Game design

### **Kimberly Jannarone, Professor, Theater Arts (Drama)**

Directing, dramaturgy, dramatic theory and criticism, theater history, acting

### **Sri Kurniawan, Associate Professor, Computer Engineering**

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; user-centered design

### **John Jota Leanos, Associate Professor, Social Documentation**

Documentary animation, social documentation, social art practice, community arts, Chicana/o art and culture, new media, critical media studies, cultural studies, documentary photography, installation art, public art and interventionist art practice

### **Irene Lusztig, Associate Professor, Film and Digital Media**

Film and video production, experimental ethnography

and essayistic nonfiction; representations of historical memory; archives, propaganda and training films; feminist film practices; medical film; autobiographical filmmaking; interactive documentary; editing

### **Michael J. Mateas, Professor, Computational Media**

Artificial Intelligence (AI) for art and entertainment, game AI, AI and creativity, AI-based interactive storytelling, autonomous characters

### **Margaret E. Morse, Professor Emerita, Film and Digital Media**

### **Larry Polansky, Professor, Music**

Composition, post-tonal theory, algorithmic music, American music, tuning theory, contemporary music, ensemble performance and performance practice, acoustic and electric guitar music, music editing and publishing, interdisciplinary collaboration, music and scientific research

### **B. Ruby Rich, Professor, Social Documentation and Film and Digital Media**

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

### **Kate O'Riordan, Associate Professor, Art**

Theory, digital media technologies.

### **Elizabeth Stephens, Professor, Art**

Intermedia, electronic art, sculpture, and performance art

### **Gustavo Vazquez, Professor, Film and Digital Media**

Film and video production, documentary and experimental cross-cultural experiences in film

### **Emmet J. Whitehead, Professor, Computational Media**

Software engineering, software configuration management, web, hypertext, collaborative authoring, hypertext versioning, Internet information systems

---

## DIGITAL ARTS AND NEW MEDIA COURSES

---

### UPPER-DIVISION COURSES

#### **199. Tutorial. F,W,S**

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty. Students submit petition to sponsoring agency. Enrollment restricted to juniors and seniors. May be repeated for credit. The Staff

#### **199F. Tutorial (2 credits). F,W,S**

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### GRADUATE COURSES

#### **201. Recent Methods and Approaches to Digital Arts and Culture. F**

Students examine methods and approaches to research and writing in digital art and new media, while exploring key theories concerning technology, art, and culture. Focus is on the interaction between digital

## Digital Arts and New Media

technologies and socio/cultural formations. Enrollment restricted to graduate students. S. Murray

### **202. Dialogues and Questions in Digital Arts and Culture. S**

Students engage in dialogues at the intersection of theory and practice with the goal of producing a pre-thesis proposal and essay. Readings and seminar discussions inform the development of project proposals and essays, which theoretically contextualize students' work. (Formerly Digital Arts and New Media 203.) (Also offered as Music 254Q. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. W. Sack

### **203. Professional Development for the Arts. S**

A professional art practices practicum that focuses on researching opportunities and developing practical strategies and skills to ensure success outside an academic environment. (Formerly Frameworks and Arguments in Digital Arts and Culture.) Enrollment restricted to graduate students. The Staff

### **210. Project Design Studio. F**

Students work on the design of individual projects by developing project proposals, budgets, "proof of concept" design documents and/or prototypes and exploring tools, technologies, programming languages, hardware, software, and electronics techniques relevant to their projects. Enrollment restricted to graduate students. J. Parker

### **211. Critique. S**

First-year digital arts and new media graduate students are required to present work-in-progress based on the projects developed in earlier courses and during the current quarter in

individual studio critiques with the instructor as well as in group critiques. Enrollment restricted to graduate students. Enrollment limited to 18. J. Gonzalez

### **212. Thesis Proposal (no credit). S**

First-year digital art and new media graduate students work on the development and completion of their thesis-project proposal and abstract under the supervision of the program chair and their thesis committees. Enrollment restricted to DANM students. M. Chemers

### **215. MFA Exhibition Production. W**

Second-year digital arts and new media graduate students work with faculty curator/coordinator to develop thesis projects specifically for the group exhibition context. Students contribute to exhibition design and collateral materials while studying the unique presentation and curatorial challenges of new media. Enrollment restricted to graduate students. The Staff

### **216. Digital Bodies. \***

Explores the appearance, form, and theoretical status of the human body/political subject in online art. Focuses on representations of race and gender, family resemblances, and local communities, as well as the political and colonial metaphors of spatial interaction operating on the World Wide Web. Visual representations of bodies that take the form of avatars, advertising, robots, and anime studied in their contextual usage. Enrollment restricted to graduate students. Upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 17. J. Gonzalez

### **217. Computer-Assisted Composition. W**

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies. (Also offered as Music 206B. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. L. Polansky

### **219. Introduction to Electronics for Artmaking. F**

Intensive introduction to electronic devices used in artmaking, providing hands-on experience with sensors, motors, switches, gears, lights, simple circuits, microprocessors, and hardware storage devices to create kinetic and interactive works of art. Students are billed a materials fee. Enrollment restricted to graduate students. The Staff

### **220. Introduction to Programming for the Arts. W**

Covers aspects of computer programming necessary for digital art projects. Students learn to manipulate digital media using program control for installations, presentations, and the Internet. No prior programming experience required. Enrollment restricted to graduate students. W. Sack

### **221. Mathematics and the Arts. \***

Examines the role of mathematics in the arts since the computer revolution with an emphasis on chaos, fractals, and symmetry. Covers abstract animation and algorithmic music, including the

## Digital Arts and New Media

history of leading innovators and techniques from 1950 to the present. Student projects explore the creative process today using cutting-edge technologies. Enrollment restricted to graduate students. Upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 30. May be repeated for credit. R. Abraham

### **227. Projected Light in Performance. \***

Exploration of projected light in performance and art. The history of lighting as art is covered in a hands-on demystifying format from the shadow of a bare light bulb to the latest in automated and projection equipment and techniques. Enrollment restricted to graduate students. Juniors and seniors may enroll with permission of instructor. Enrollment limited to 20. D. Cuthbert

### **231. Human-Computer Interaction. \***

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Individual research project. Interdisciplinary course for art, social science and engineering graduate students. Students cannot receive credit for this course and course 131. (Also offered as Computer Engineering 231. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. S. Kurniawan

**233. The Object as Interface. \***  
Combination theory and studio-based exploration into the role of

the object in real and virtual space. Provides a broad conceptual and theoretical examination of issues relating to object-making on a physical and dematerialized plane. Enrollment restricted to graduate students. Enrollment limited to 15. W. Hibbert-Jones

### **241B. Modern Art: Cubism to Pop. W**

A history of the visual arts from the 1910s to the 1960s beginning in Europe and moving to the United States. Follows key movements of modern art while emphasizing the social, political, and philosophical events that inform it. Students cannot receive credit for this course and History of Arts and Visual Culture 141B. Enrollment restricted to graduate students in digital arts new media, film, music, social documentation, theater, or visual studies. J. Gonzalez

### **250A. Collaborative Research Project Group: Mechatronics. F,W,S**

Three-quarter collaborative research project group involves faculty-initiated research in the use of a variety of media including video, performance, and sculpture, for the creation of complex, kinetic, audio-visual systems exploring temporality, materiality, experience, and perception. Enrollment restricted to graduate students. Enrollment limited to 8. May be repeated for credit. D. Dunn, J. Parker

### **250B. Collaborative Research Project Group: Participatory Culture. F,W,S**

Three-quarter collaborative research project group encompasses a range of faculty-initiated projects in social computing and community-media activism, which involve the design of new technologies to address

social problems and facilitate broader participation in culture and politics. Enrollment restricted to graduate students. Enrollment limited to 8. May be repeated for credit. S. Daniel

### **250C. Collaborative Research Project Group: Performative Technologies. W,S**

Three-quarter collaborative research project group generates faculty-initiated new public and performative spaces where digital media, communication networks, and interactive systems may be fused with lighting, movement, stage, and sound design to create shared multimedia experiences for audiences and performers. Enrollment restricted to graduate students. Enrollment limited to 8. May be repeated for credit. B. Baron, K. Jannarone

### **250D. Playable Media. W,S**

Focuses on media, such as computer games, that invite and structure play. Work includes building and critiquing a series of prototypes; studying major examples in the field; and discussing both theoretical and practice-oriented texts. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Formerly Computer Science 290J.) (Also offered as Computational Media 290J. Students cannot receive credit for both courses.) May be repeated for credit. N. Wardrip-Fruin

### **254I. Empirical Approaches to Art Information. \***

Reading and practice in empirical methods, as applied to the study of music, visual art, multimedia production, and performance arts. Topics include semiotics, critiques of empiricism, cultural determinants and contingents of perception, the psychophysics of information, sensory perception

## Digital Arts and New Media

(visual and auditory), memory, pattern recognition, and awareness. Students apply existing knowledge in the cognitive sciences to a developing creative project, or develop and conduct new experiments. (Also offered as Music 254I. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 17. May be repeated for credit. B. Carson

### **254L. John Cage: Innovation, Collaboration, and Performance Technologies. \***

In-depth examination of John Cage's interdisciplinary work, his pioneering activity in live electronic technology, and his influence in current multimedia creativity. Approximately one-half of the seminary is devoted to student research and creative projects and reflect Cage's legacy. (Also offered as Music 254L. Students cannot receive credit for both courses.) Enrollment restricted to juniors, seniors, and graduate students. Upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 12. The Staff

### **267. Workshop in Computer Music and Visualization (2 credits). F,W,S**

Graduate-level techniques and procedures of computer music composition and visualization. Practical experience in the UCSC electronic music studio with

computer composition systems and software, including visualization and interactive performance systems. Extensive exploration of music and interactive graphic programs such as Max/MSP/Jitter. Enrollment by permission of instructor; appropriate graduate experience required. Enrollment restricted to graduate students. (Also offered as Music 267. Students cannot receive credit for both courses.) Enrollment limited to 12. May be repeated for credit. The Staff

### **290P. Topics in Computational Cinematography. \***

Focuses on discussion of recent advances in visual storytelling in graphical environments. Major topics covered are: intelligent camera control, shot-compositions, lighting design, interactive storytelling, and computational techniques associated with these applications. Class consists of in-class discussions and student presentations of research papers and a final student project. (Formerly Computer Science 290P.) (Also offered as Computational Media 290P. Students cannot receive credit for both courses.) The Staff

### **297. Independent Study. F,W,S**

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other

faculty with approval of adviser. Project includes readings, research, and a written report. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. Maximum 10 credits. May be repeated for credit. The Staff

### **297G. Independent Study (3 credits). F,W,S**

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty with approval of adviser. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for a maximum 6 credits. May be repeated for credit. The Staff

### **299. Thesis Research. F,W,S**

Students carry out a master's of fine arts thesis in digital arts and new media research, under the guidance of a thesis committee. The thesis will be an arts project with digital documentation accompanied by a written paper discussing the student's preparatory research as well as the theoretical significance of the project. Enrollment restricted to graduate students. Maximum 10 credits. May be repeated for credit. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

# EARTH AND PLANETARY SCIENCES

---

2015-16 Catalog

A232 Earth and Marine Sciences Building

(831) 459-4089

<http://eps.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

The Earth and Planetary Sciences Department teaches and conducts research in a wide array of topics. We seek to answer questions such as:

How did the Earth form? How has it evolved since then? What makes up the interior of the Earth?

What is the history of life on Earth? What are the causes and effects of past mass extinctions?

How do mountain ranges form? What causes earthquakes? What causes island chains to form? What controls the evolution of glaciers? How do we prevent coastal erosion? How well can we predict tsunamis?

What has Earth's climate been like in the past? How will climate change in the future?

What controls the supply and quality of our freshwater resources?

How are other planets in our solar system different from Earth? How did they evolve to their present state? How have the impacts of asteroids on Earth and other planets affected their evolution?

A variety of methods and tools are used to help us address these questions. Geologists examine rocks and geologic formations in order to understand the processes that control their formation and evolution. Geochemists and mineralogists examine the chemical and mineral composition of rocks, sediments, and fossils using a variety of sophisticated analytical instruments. Geophysicists use seismometers to not only record earthquakes, but also to learn about the deeper parts of the Earth. Environmental scientists collect samples of the atmosphere, rivers, lakes, and the oceans, sometimes requiring the use of aircraft and ships. Spacecraft have visited and explored all of the planets in our solar system. Space-based satellites have provided a massive amount of data about Earth over the past few decades. Scientists from all disciplines use computer models to help them understand these complex systems.

The Department of Earth and Planetary Sciences offers a number of degrees that teach undergraduate and graduate students the knowledge and skills necessary to address these and many other questions. Along with

the standard Earth sciences major, we offer degrees with concentrations in environmental geology, ocean sciences, planetary sciences, and science education. We also offer combined majors with environmental studies and anthropology. A minor in Earth sciences is also available. We offer courses across a wide range of topics, allowing students to tailor the curriculum to their interests. Courses are comprised of not only classroom lectures, but frequently field trips, laboratories, and computer exercises are involved. Many related courses are offered by other departments such as Ocean Sciences, Microbiology and Environmental Toxicology, Environmental Studies, Biological Sciences, Chemistry and Biochemistry, and Astronomy and Astrophysics. The university capstone requirement is often fulfilled by attending the departmental field camp, or by completing a senior research thesis, but other choices are also possible.

Graduates of our department continue on to a variety of careers, such as:

- Business and industry
- Geological and environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the people in the department, their areas of interest, departmental facilities, contact e-mails and phone numbers, and how to apply to join our department as an undergraduate or graduate student, please see our web site:

<http://eps.ucsc.edu/>.

---

## ACADEMIC ADVISING

---

A student who wants to become an Earth sciences major should contact the [Earth and Planetary Sciences Department undergraduate staff adviser](#) as soon as possible. After developing a formal study plan and

## Earth and Planetary Sciences

submitting a declaration of major petition, students are required to meet with staff and faculty advisers who can help the student plan his or her program in detail and provide information about independent study, thesis research, advanced study, career options, and other educational opportunities. Relevant courses taken at UCSC or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

---

### BACHELOR OF SCIENCE DEGREE

---

The bachelor of science (B.S.) program is designed for students who intend to pursue professional careers in Earth and planetary sciences, engineering, policy, law, teaching, or business or who otherwise desire the broad, quantitative training available at UCSC. In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in Earth and planetary sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace.

The core of the major includes calculus, physics, chemistry, and a group of comprehensive Earth and planetary sciences courses. For the standard B.S., students then select at least six additional courses from a diverse list of upper-division electives, with at least two that involve significant laboratory or field data acquisition and analysis. These electives, often in combination with additional upper-division courses from this and related departments, provide the student with expertise in one or more subdisciplines within Earth sciences.

Elective distributions can be designed to emphasize earthquake and faulting studies, Earth surface processes, Earth system sciences, geologic hazards, geology, crustal and deep-Earth geophysics, marine geophysics, and water resources. Four formal concentrations, all with specific course requirements and leading to an Earth and planetary sciences B.S., are available: environmental geology, ocean sciences, science education, and planetary sciences. A senior comprehensive experience (senior thesis, or geologic field camp, intensive internship experience, or exemplary performance in a graduate course) is required of all majors.

---

### QUALIFYING FOR THE MAJOR

---

We recommend that you consult with the department's undergraduate staff adviser to discuss options for degree concentrations and coursework priorities before you start the process of officially declaring your major. To declare the Earth sciences majors (including

all concentrations within the major), a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology:

Earth Sciences 5, California Geology

Earth Sciences 10, Geologic Principles

Earth Sciences 20, Environmental Geology

Transfer students may take an approved substitution for one of the above courses.

Students who qualify start the declaration process by submitting a petition to the department staff adviser: <http://undergrad.pbsci.ucsc.edu/earth/qualifying/petition-to-declare.html>.

---

### TRANSFER STUDENTS

---

Transfer students planning to major in Earth sciences are strongly recommended (but not required) to complete all lower-division mathematics and science pre-requisites appropriate to their concentration of interest. For example, students planning to major in Earth sciences with a Planetary Science Concentration should complete the equivalents to the following courses (including the associated laboratory components): Mathematics 11A and 11B; Chemistry 1A/L, 1B/M and 1C/N; Physics 6A/L and 6B/M; and Earth Sciences 5/L, 10/L or 20/L. One of the latter Earth sciences courses is required for declaring the major (see above).

Having this coursework completed elsewhere allows students greater flexibility in scheduling and completing their UCSC Earth and planetary sciences courses. Transfer students planning on attending UCSC to pursue an Earth sciences major should review the transfer preparation information at: <http://undergrad.pbsci.ucsc.edu/earth/transfer-students/index.html>.

---

### LETTER GRADE POLICY

---

For all students entering UCSC in fall 2015 and later, all but two (2) courses used to satisfy requirements for any of the Earth and planetary science majors must be taken for a letter grade. Combined majors (Earth sciences/anthropology and Earth sciences/environmental studies) are currently exempt from this policy.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) general education requirement. All majors described below, with exception of the science education concentration, require students to complete a minimum

## Earth and Planetary Sciences

of two (2) courses from the list of courses that in combination satisfies the Disciplinary Communication general education requirement. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

Earth Sciences 100, Vertebrate Paleontology

Earth Sciences 101, Invertebrate Paleobiology

Earth Sciences 102, Marine Geology

Earth Sciences 104, Geologic Hazards

Earth Sciences 109, Field Geology

Earth Sciences 120, Sedimentology and Stratigraphy

Earth Sciences 140, Geomorphology

Earth Sciences 146, Ground Water

Earth Sciences 148, Glaciology

Earth Sciences 150, Structural Geology

Earth Sciences 152, Tectonics

Earth Sciences 160, Planetary Science

Earth Sciences 188A, Summer Field Internship

Earth Sciences 191A, Climate Change Science and Policy

Earth Sciences 195, Senior Thesis

Students in the combined Earth Sciences/Anthropology major may, in addition choose their courses to satisfy the DC requirement from the following Anthropology offerings: 100, 170, 194B, 194L, and 194Y.

Students in the Science Education Concentration must complete the DC requirement by taking Education 185L in addition to either Earth Sciences 109 or both Earth Sciences 120 and 150.

---

### COMPREHENSIVE REQUIREMENT (B.S.)

---

All students must satisfy the senior comprehensive requirement. To do so, each student must complete one of the following options:

1) Satisfactory completion of Earth Sciences 188A, Summer Field Internship; and Earth Sciences 188B, GIS with Applications in the Earth Sciences.

2) Satisfactory completion of a senior thesis, which must include a significant element of independent research or original work and can only be undertaken after agreement is obtained from a faculty member to supervise it (at least three quarters in advance of completion). Students may take Earth Sciences 199, Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass Earth Sciences 195, Senior Thesis, in the academic quarter during which they complete their thesis.

3) Exemplary performance (grade of B or better), including a major written report, in a 5-credit graduate course or seminar (which requires permission from the instructor in order to enroll).

4) Satisfactory completion of course offerings are: Earth Sciences 191A, Climate Change and Policy (was Earth Sciences 191); Earth Sciences 191B, Planetary Science Capstone (was Earth Sciences 193); and Earth Sciences 112, Practical Geophysics. Other capstone courses in the 191 series may also be added in the future.

5) Satisfactory completion of a 5-credit internship (Earth Sciences 198) under the guidance of an on-site supervisor, with coordination and prior approval of the department's internship director. The project must include a comprehensive final written report.

Various external field/research experiences may also satisfy this requirement. See the faculty adviser for more details.

**Please note:** Courses that are used to satisfy the capstone may not also count toward fulfilling the upper-division elective requirement.

---

### REQUIREMENTS FOR THE STANDARD EARTH SCIENCES MAJOR (B.S.)

---

#### REQUIRED LOWER-DIVISION COURSES

---

Chemistry 1A, 1B/M and 1C/N

Mathematics 11A-B or 19A-B, or Applied Mathematics and Statistics 15A-B; and Mathematics 22 or 23A, or Earth Sciences 111

Physics 6A/L and 6B/M (preferred), or 5A/L and 5B/M  
Earth Sciences 5/L, or 10/L, or 20/L

#### REQUIRED UPPER-DIVISION COURSES

---

Earth Sciences 110A/L, 110B/M, and 110C/N, 190 (optional but recommended 1-credit mentorship class)

At least six elective courses (5+ credits each) from upper-division Earth sciences or ocean sciences offerings must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement.

Two or more of the upper-division electives must be selected from courses with an intensive field/laboratory/data analysis component. The following courses that satisfy this requirement:

Earth Sciences 107, 109, 112, 116, 117, 119, 120, 125, 130, 140, 142, 146, 148, 150, 188A, 188B.

**Note:** Courses used to satisfy the senior comprehensive requirement **cannot** also be used to satisfy the field/laboratory/analysis requirement.

## Earth and Planetary Sciences

Two or more courses must also be completed in from the list of courses that satisfy the Disciplinary Communications (DC) requirement, as described above.

Students also complete the senior comprehensive requirement as described above.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests. The following are examples of suggested elective distributions that develop expertise in important areas (an asterisk (\*) indicates that the course satisfies the laboratory or field data acquisition/analysis requirement).

**Earth system sciences.** Focuses on terrestrial, marine, and atmospheric processes and their relations through time; may include paleoclimatic and paleoenvironmental dynamics, global change issues, and surface geological processes such as weathering, erosion, and hydrology: 100/L, 101/L, 102, 107, 109/L\*, 116\*, 119\*, 120/L\*, 121, 125, 128, 148\*, 191, 208, Ocean Sciences 102, 120

**Earthquake and faulting studies.** Focuses on crustal deformation and faulting processes and related phenomena such as plate motions, earthquakes, and stress in the lithosphere: 109/L\*, 117/L\*, 119\*, 150/L\*, 162, 168\*, 172

**Geologic hazards.** Focuses on Earth processes that impact society, including earthquakes, volcanoes, coastal erosion, and landslides: 104, 105, 107, 109/L\*, 116\*, 140/L\*, 142\*, 146\*

**Geology.** Emphasizes a traditional broad background with field skills, rock genesis and interpretation, and structural relations: 109/L\*, 117/L\*, 120/L\*, 130/L\*, 140/L\*, 150/L\*

**Geophysics.** Develops breadth in geophysical techniques, composition and structure of Earth's deep interior, and gravitational and magnetic fields: 117/L\*, 119\*, 150/L\*, 160, 162, 168\*, 172

**Marine geophysics.** Emphasizes a breadth of geological and geophysical background for continuing study of the processes involved in the growth, evolution, and destruction of the ocean floor and margins: 107, 117/L\*, 146\*, 150/L\*, 152, 168\*

**Surface processes.** Emphasizes understanding the fluxes of energy, water, mass, and chemicals within and across Earth's surface and the relations to climatic and tectonic forcing processes: 107, 109/L\*, 116\*, 119\*, 120/L\*, 140/L\*, 128, 142\*, 146\*, 148\*, 163, Microbiology and Environmental Toxicology 144

**Water resources.** Focuses on water resources quality and quantity and relations between climate and water

in and on the crust: 105, 109/L\*, 116\*, 119\*, 121, 140/L\*, 142\*, 146\*, 148\*, Microbiology and Environmental Toxicology 144, Ocean Sciences 120

## STANDARD EARTH SCIENCES B.S. MAJOR PLANNER

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

**Note:** Chemistry 1A, 1B/M and 1C/N and Mathematics 11A-B and 19A-B and 22 and 23A are offered every quarter. Physics 6A/L is offered every quarter but Physics 6B/M is not offered in fall.

Year	Fall	Winter	Spring
1st (frsh)	CHEM 1A	MATH 11A or 19A or AMS 15A	EART 10/L MATH 11B or 19B or AMS 15B
	College core	CHEM 1B/M	CHEM 1C/N
2nd (soph)	EART 110A/L*	EART 110B/M*	EART 109/L*
	MATH 23A or EART 111	PHYS 6A/L	PHYS 6B/M
3rd (jr)		EART elective	EART 110C/N
	EART elective		EART elective
4th (sr)	EART elective	EART elective	EART 188A-B or senior thesis (EART 195)†
	senior thesis (EART 199) †	senior thesis (EART 199) †	
	EART 190 (1-credit, optional)		

\*EART 109/L, 110A/L, and 110B/M are required for participation in EART 188A-B

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior

## Earth and Planetary Sciences

theses usually require at least two or three quarters for completion.

### EARTH SCIENCES MAJOR WITH CONCENTRATION IN ENVIRONMENTAL GEOLOGY (B.S.)

The environmental geology concentration is designed to provide quantitative preparation for career pathways involving interdisciplinary study of the environment with a geological emphasis. Additional biology and environmental studies courses are required for this concentration along with other distributions of upper-division requirements and electives.

#### REQUIRED LOWER-DIVISION COURSES

Earth Sciences 20/L (recommended) or 10/L or 5/L  
Environmental Studies 25

Biology: Ecology and Evolutionary Biology (EEB) BIOE 20C

Chemistry 1A, 1B/M, and 1C/N

Mathematics 11A-B or 19A-B, or Applied Mathematics and Statistics 15A-B

Physics 6A/L and 6B/M (preferred), or 5A/L and 5B/M

#### REQUIRED UPPER-DIVISION COURSES

Earth Sciences 110A/L and 110B/M, 190 (optional, 1-credit mentorship class)

At least four elective courses (5+ credits each) from upper-division Earth sciences or ocean sciences courses must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement.

At least two courses must be completed from the list of courses that satisfy the DC requirement. See above for the full list.

Two additional upper-division electives, preferably with environmental topics from biology, chemistry, Earth and planetary sciences, environmental studies, environmental toxicology, or ocean sciences. Courses may simultaneously satisfy both the upper-division elective and DC requirements. Earth Sciences 198 and 199 may not be used to satisfy this requirement.

Students also complete a senior comprehensive requirement from the list described above.

### EARTH SCIENCES (ENVIRONMENTAL GEOLOGY) B.S. MAJOR PLANNER

Year	Fall	Winter	Spring
1st (frsh)	CHEM 1A	EART 20/L	
	College core	MATH 11A or 19A or AMS 15A	MATH 11B

3rd (jr)	BIOE 20C	EART elective	
	EART elective	ENVS 25	EART elective
4th (sr)	EART elective	EART elective	EART elective
	senior thesis (EART 199)†	senior thesis (EART 199)†	senior thesis (EART 195)† or EART 188A-B
	EART 190 (1-credit, optional)		

\* EART 109/L, 110A/L, and 110B/M are required for participation in EART 188A-B.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

### EARTH SCIENCES MAJOR WITH CONCENTRATION IN OCEAN SCIENCES (B.S.)

The ocean sciences concentration is intended to provide quantitative preparation for career pathways that include oceanography and biogeochemistry. Additional biology and chemistry courses are required for this concentration along with other distributions of upper-division requirements and electives.

#### REQUIRED LOWER-DIVISION COURSES

Earth Sciences 5/L or 10/L, or 20/L

BIOE 20C

Chemistry 1A, 1B/M and 1C/N

## Earth and Planetary Sciences

Mathematics 11A-B or 19A-B, or Applied Mathematics and Statistics 15A-B

Mathematics 22 or 23A or Earth Sciences 111

Physics 6A/L and 6B/M (preferred), or 5A/L and 5B/M

### REQUIRED UPPER-DIVISION COURSES

Earth Sciences 110A/L, 110B/M, 110C/N, 190 (optional, 1-credit mentorship class); Ocean Sciences 101 or 102

At least four elective courses (5+ credits each) chosen from upper-division Earth Sciences or Ocean Sciences courses must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement. Choosing from the following list is recommended, but not mandatory: Earth Sciences 101/L, 102, 105, 107, 109/L, 111, 116, 119, 120/L, 121, 128, 130/L, 148, 172; Ocean Sciences 101, 102, 118, 120, 130, 200, 220, 260.

At least two courses must be completed from the list of courses that satisfy the DC requirement. See above for the full list

Students also complete a comprehensive requirement from the list described above. For those choosing a thesis, a topic emphasizing ocean sciences is recommended.

### EARTH SCIENCES (OCEAN SCIENCES) B.S. MAJOR PLANNER

Year	Fall	Winter	Spring
1st (frsh)	CHEM 1A	CHEM 1B/M	EART 10/L
	College core	MATH 11A or 19A or AMS 15A	CHEM 1C/N

	BIOE 20C	CHEM 108B/M	
4th (sr)		EART elective	EART elective
	senior thesis (EART 199)†	senior thesis (EART 199)†	senior thesis (EART 195)† or EART 188A-B
	EART 190 (1-credit, optional)		

\* EART 109/L, 110A/L, and 110B/M are required for participation in EART 188A-B.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

### EARTH SCIENCES MAJOR WITH CONCENTRATION IN PLANETARY SCIENCES (B.S.)

The planetary sciences concentration is designed to provide students with a quantitative background appropriate for career pathways in the interdisciplinary study of planets and their satellites. The upper-division elective courses can be tailored for students interested in planetary interiors, atmospheres, and/or surfaces.

### REQUIRED LOWER-DIVISION COURSES

Earth Sciences 10/L (preferred); or 5/L; or 20/L

Astronomy 12 or 16 or 18

Chemistry 1A, 1B/M, and 1C/N

Mathematics 19A-B (preferred) or 11A-B, or AMS 15A-B

Mathematics 22; or 23A; or Earth Sciences 111

Physics 5A/L, 5B/M (preferred); or 6A/L, 6B/M

### REQUIRED UPPER-DIVISION COURSES

Earth Sciences 110A/L, 110B/M, 110C/N, 119, 160, 190 (optional, 1-credit mentorship class)

One elective from the following Earth Sciences courses: 162, 163, 164

At least three electives (5+ credits each) from upper-division Earth Sciences, Ocean Sciences, Astronomy 112 or 118, or Mathematics 130 must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement. Choosing from the following list is recommended but not mandatory: Earth Sciences 107, 109/L, 116, 117/L, 121, 128, 130/L, 140/L, 148, 150/L, 152, 162, 163, 164, 172, 209, 210; Astronomy 112, 118; Mathematics 130.

At least two courses must be completed from the list of courses that satisfy the DC requirement. See above for the full list

Students also complete the comprehensive requirement from the list described above. For those choosing a thesis, a topic emphasizing planetary sciences is recommended.

## Earth and Planetary Sciences

### EARTH SCIENCES (PLANETARY SCIENCES) B.S. MAJOR PLANNER

Year	Fall	Winter	Spring

	EART 190 (1- credit, optional)	EART elective	EART elective

\* EART 109/L, 110A/L, and 110B/M are required for participation in EART 188A-B.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

### EARTH SCIENCES MAJOR WITH CONCENTRATION IN SCIENCE EDUCATION (B.S.)

The science education concentration provides future K-12 science teachers with coursework aligned with the California K-12 Earth and planetary science standards; a broad background across the sciences; and a thorough introduction to educational theory and practice including a sequence of three classroom-based internships. Additional biology, astronomy, and ocean science courses required for this concentration ensure that students are very well prepared to enter a rigorous teaching-credential program and, ultimately, a career in education. The senior comprehensive requirement involves a curriculum-development project jointly overseen by faculty in Earth and planetary sciences and UCSC's California Teach (Cal Teach) program.

Students may start with either the Cal Teach or Earth and Planetary Sciences Department for degree and course information, but must stay in contact with both for dual advising and development of study plans as well as approval for formally declaring the major.

#### REQUIRED LOWER-DIVISION COURSES

Earth Sciences 5/L (strongly recommended) or 10/L or 20/L

Astronomy 2 (recommended) or another lower-division course in astronomy

Molecular, Cell, and Developmental Biology (BIOL) 20A  
Ecology and Evolutionary Biology (BIOE) 20B and 20C  
Education 50C

Mathematics 11A-B, or 19A-B, or Applied Mathematics and Statistics 15A-B

Chemistry 1A, 1B/M, and 1C/N

Physics 6A/L and 6B/M

#### REQUIRED UPPER-DIVISION COURSES

Ocean Sciences 102

Earth Sciences 110A/L and 110B/M

Earth Sciences 109/L, or both 120/L and 150/L

Earth Sciences 111, or Mathematics 21 or 22, or Applied Mathematics and Statistics 5

At least two elective courses (5+ credits each) from upper-division Earth Sciences or Ocean Sciences offerings must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement. One elective must involve significant laboratory or field data acquisition/analysis. The following courses currently satisfy this requirement:

Earth Sciences 107, 109, 112, 116, 117, 119, 120, 125, 130, 140, 142, 146, 148, 150, 188A, 188B.

Education 100C, 185C, 185L

One upper-division Education course from the following list: Education 128, 141, 164, or 181

Students complete a comprehensive requirement by doing an independent project through the Earth and Planetary Sciences Department, which applies knowledge of Earth and planetary sciences to K-12 curriculum development (Earth Sciences 194F).

## Earth and Planetary Sciences

### COMBINED MAJOR IN ENVIRONMENTAL STUDIES/EARTH SCIENCES (B.A.)

The combined major in environmental studies and Earth sciences is designed to provide enhanced exposure to geological concepts and processes for students emphasizing environmental policy and social science topics. Students are advised to plan carefully and to contact academic advisers in both the Environmental Studies and Earth and Planetary Sciences Departments early if they have questions. For the requirements of the combined environmental studies/Earth sciences bachelor of arts (B.A.) degree, see the environmental studies program description: <http://registrar.ucsc.edu/catalog/programs-courses/program-statements/envs.html>.

### COMBINED MAJOR IN EARTH SCIENCES/ANTHROPOLOGY (B.A.)

The Earth sciences/anthropology combined major is intended for students with interests in Earth sciences and the laboratory-based aspect of anthropology. These include anthropology students interested in archaeology or paleoanthropology who desire more intensive training in natural sciences and Earth sciences students interested in paleobiology or archaeology. The combined major provides a rigorous training in both anthropology and Earth sciences and will permit

students to enter graduate programs in Earth sciences, archaeology, or paleoanthropology. The combined major has a significantly different set of cognate science and required lower- and upper-division courses than the standard major; therefore, students are advised to plan carefully and to contact academic advisers in the Earth and Planetary Sciences and Anthropology Departments early if they have questions.

#### REQUIRED LOWER-DIVISION COURSES

Anthropology 1, 2, and 3  
Earth Sciences 5/L, or 10/L, or 20/L  
Mathematics 11A-B, 19A-B, or Applied Mathematics and Statistics 15A-B  
Five lower-division science cognate courses (plus laboratories) chosen from the following:  
BIOL 20A, BIOE 20B, BIOE 20C  
Chemistry 1A, 1B/M, 1C/N  
Physics 6A/L, 6B/M

#### REQUIRED UPPER-DIVISION COURSES

Earth Sciences 110A/L  
At least three elective courses (5+ credits) from upper-division Earth Sciences offerings must be completed. Earth Sciences 198 and 199 may not be used to satisfy this requirement.  
Any four five- to seven-credit upper-division electives listed under the Anthropology Department's Physical Anthropology and Archaeology Courses subdivision.  
At least two courses that are part of the DC requirement must be completed as part of the required upper-division courses. Earth Sciences courses that are part of the DC curriculum are: 100, 101, 102, 104, 109, 116, 120, 125, 140, 146, 148, 150, 152, 160, 188A, 191A, 195; Anthropology courses are: 100, 170, 194B, 194L, and 194Y). Courses may simultaneously satisfy both the DC requirement and the upper-division Earth Sciences or Anthropology elective requirement.

#### COMPREHENSIVE REQUIREMENT

One of the following:  
Satisfactory completion of Anthropology 194-series (any senior seminar in physical anthropology or archaeology)  
Satisfactory completion of Earth Sciences 188A-B\*, Summer Field Internship and Geographic Information Systems with Applications to the Earth Sciences  
Satisfactory completion of a senior thesis (Earth Sciences 195) with faculty readers from both departments, which must include a significant element of independent research or original work and can only

## Earth and Planetary Sciences

be undertaken after agreement is obtained from faculty members to supervise it (at least three quarters in advance of completion)

Satisfactory completion of a 5-credit internship (Earth Sciences 198) under the guidance of an on-site supervisor, with coordination and prior approval of the Earth and Planetary Science department's internship director. The project must include a comprehensive final written report.

\* Earth Sciences 188A-B has as prerequisites courses 109/L, 110A/L, and 110B/M.

### EARTH SCIENCES/ANTHROPOLOGY COMBINED MAJOR PLANNER

	Sr comp	Sr comp	Sr comp

### HONORS

Honors in the major are determined by a review of grades (typically 3.50 or above) and narrative evaluations at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Honors in the combined majors with environmental studies and anthropology will be granted only when the committees in both departments are in agreement. Highest honors may also be awarded in exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

### KEYS TO SUCCESS IN THE MAJOR

Achieving success in the Earth Sciences major is strongly correlated with successfully taking the required Foundation Classes and their associated 2-credit laboratories,

Earth Science 110A/L, Evolution of the Earth;

Earth Science 110B/M, Earth as a Chemical System.

If you are unsuccessful in passing your first attempt at these classes, past experience suggests that you might have difficulty successfully completing this major. We strongly recommend that you seek advising from the department or your college advisor. Two failures of one of these required gateway classes (or associated lab) is likely to preclude completion of the major.

### EPS PROGRAM LEARNING OUTCOMES

Students graduating with a B.S. in Earth and planetary sciences (all concentrations) should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

See the table below for a summary of the courses involved in the introduction, development, and assessment of each Program Learning Outcome (PLO). The table summarizes program learning outcomes and the courses where they are introduced/developed (D) and assessed (A).

EART Course Number	Program Learning Outcome Number			
	1	2	3	4
5 or 10 or 20	D	D		
5L or 10L or 20L			D	D
110A (problem sets)			D	
110A (midterm, short essay questions)	D			
110A (midterm, quantitative questions)			D	
110A (final, short essay questions)	A			
110A (final, quantitative questions)			A	
110L (lab reports)	D			D
110B (lectures)		D		
110M (weekly quizzes)		D		
110M (final practical assessment)		A		
110B (final examination, rock identification)		A		
First to penultimate DC course (final paper)				D
Last DC course taken (final paper)				A

### MINOR REQUIREMENTS

Students can earn a minor in Earth sciences by taking Earth Sciences 5/L or 10/L or 20/L and five upper-division Earth sciences courses. Courses offering fewer than 5 credits (such as Earth Sciences 190 or 2-credit laboratories and independent studies) may not be counted toward the minor requirements, although additional coursework is always encouraged.

### GRADUATE PROGRAM

The graduate program in Earth and planetary sciences is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in

the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UCSC is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework. Prospective students should take the Graduate Record Examination (GRE) General Test and have the scores sent electronically to the UCSC Division of Graduate Studies. UCSC awards both the master of science (M.S.) and the doctor of philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for some seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project.

**Thesis Track (Ph.D., M.S.).** In their first year, all thesis-track graduate students register for courses 203, Introductory Teaching Seminar; 204, Fundamentals of Earth and Planetary Sciences; 205, Introductory Graduate Seminar; 206, Great Papers in the Earth Sciences; and, in consultation with the graduate advising committee, choose at least one subject course focusing on specific Earth and planetary sciences content and one course focusing on quantitative analysis (from a list in the EPS Graduate Handbook). In subsequent years, all students participate in course 293, Graduate Research Seminar. Other course requirements are tailored to the individual student's academic background, professional experience, and plans for research. Master's degree students must take a minimum of 35 quarter credits of graduate and upper-division undergraduate courses (at least 20 of which are graduate-level and not including Earth Science 297, Independent Research) including the courses mentioned above. No specific number of course credits is required for the Ph.D., but ordinarily students put more of their effort into coursework during the first year of graduate study. It is recommended that all thesis-track graduate students attain some teaching experience while at UCSC.

Before the start of fall quarter, each first-year thesis track student must meet with his/her faculty adviser to determine a customized course list designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the graduate program director to finalize and approve this initial discussion with a written study plan. Yearly academic review meetings will then reassess the student's

progress in completing these courses and independent research, initially with the primary adviser but eventually with a reading committee.

To qualify for candidacy in the Ph.D. program, each student must pass an oral examination in his or her area of specialization by the end of their third year of graduate study, although students are strongly encouraged to take the examination earlier. The examination is based on a research proposal presenting one or more specific questions to be researched by the student in the course of completing their Ph.D. thesis. Students are expected to have in-depth knowledge of fields relevant to the proposal, including familiarity with the professional literature.

The Ph.D. dissertation is a scholarly contribution to knowledge that embodies the results of original and creative effort by the student. Students are urged to prepare their dissertations for publication in peer-reviewed professional journals. A public oral defense of the thesis is required prior to completion of the Ph.D.

The M.S. thesis is a scholarly contribution consisting of results of an original research project by the student. Students are strongly encouraged to prepare their results for publication in the peer-reviewed literature. The M.S. thesis must be completed by the end of the third year after entering the program, and students are strongly encouraged to complete their thesis earlier and to present the results of this work publicly.

**Coursework M.S. Track.** The coursework M.S. track is a professional program designed to allow students to increase their breadth, quantitative depth, or emphasis on a particular specialty; to provide the student with a

stronger background toward competition for jobs or an enhancement of skills for current employment (e.g., K-14 teaching); and to allow students from other disciplines (e.g., biology, physics, chemistry, mathematics, environmental studies) to acquire advanced training in Earth and planetary sciences. Prior to the first quarter of study, students have a meeting with their faculty adviser in which they develop a study plan of at least nine courses, no more than one of which may be 297 or 298, and a statement of objectives. The plan must be approved by the graduate representative. Students are also limited to one Earth Sciences 290 pro-seminar course. It is expected that the course plan will comprise mainly graduate-level and quantitative, upper-level, undergraduate elective courses.

Coursework master's students are required to fulfill one of the following capstone options: a substantial review/research manuscript or a comprehensive oral examination based on their coursework.

There is no foreign-language requirement for either the M.S. or Ph.D. degree. However, many students in the Earth and planetary sciences find knowledge of one or more foreign languages necessary in their particular research and therefore study the appropriate language.

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies. For more information, see Graduate Studies at <http://eps.ucsc.edu/academics/grad-studies/index.html>.

## EARTH AND PLANETARY SCIENCES FACULTY, RESEARCHERS, AND PROFESSIONAL INTERESTS

---

**Erik Asphaug, Professor Emeritus**

**Terrance Blackburn, Assistant Professor**  
Geochemistry, thermochronology, tectonics

**Emily E. Brodsky, Professor**  
Earthquakes, volcanoes, fluid flow in fractured media

**Kenneth L. Cameron, Professor Emeritus**

**Patrick Y. Chuang, Professor**  
Clouds, aerosols and climate

**Matthew E. Clapham, Associate Professor**  
Paleobiology, geobiology

**Robert S. Coe, Professor Emeritus**

**Noah J. Finnegan, Associate Professor**  
Geomorphology, active tectonics

**Andrew T. Fisher, Professor**  
Hydrogeology, crustal studies, coupled flows, modeling

**Ian Garrick-Bethell, Assistant Professor**  
Planetary interiors, paleomagnetism

**Robert E. Garrison, Professor Emeritus**

**James B. Gill, Professor Emeritus**

**Gary A. Glatzmaier, Professor Emeritus**

**Gary B. Griggs, Distinguished Professor, Earth Sciences; Director, Institute of Marine Sciences**  
Coastal processes, hazards and engineering

**Jeremy K. Hourigan, Associate Professor**  
Thermochronology, structural geology, tectonics

**Elise Knittle, Professor**  
Mineral physics, experimental geophysics

**Paul L. Koch, Professor**  
Isotope geochemistry, paleobiology and ecology

## Earth and Planetary Sciences

**Don G. Korycansky, CODEP Research Planetary Scientist**

Planetary impacts, asteroid dynamics

**Mikhail Kreslavsky, CODEP Assistant Research Planetary Scientist**

Mars surface evolution and planetary data analysis

**Leo F. Laporte, Professor Emeritus**

**Thorne Lay, Distinguished Professor**

Seismology, geophysics

**J. Casey Moore, Professor Emeritus**

**Francis Nimmo, Professor**

Icy satellites, accretion, Mars, planetary geophysics

**Adina Paytan, Lecturer, IMS Research Scientist**

Biogeochemistry, paleoceanography, environmental and aquatic chemistry

**Dave Rubin, EPS, Researcher**

Geomorphology

**Hilde L. Schwartz, Senior Lecturer**

Vertebrate paleontology, environmental geology, paleoecology, chemosynthetic ecosystems

**Susan Y. Schwartz, Professor**

Seismology, geophysics, active tectonics

**Eli A. Silver, Professor**

Marine geology and geophysics, active tectonics, remote sensing

**Lisa Sloan, Professor Emerita**

**Othmar T. Tobisch, Professor Emeritus**

**Slawek M. Tulaczyk, Professor**

Glaciology and glacial geology, soil mechanics

**Steven N. Ward, IGPP Researcher Emeritus**

**Gerald E. Weber, Lecturer Emeritus**

**Quentin Williams, Professor**

Mineral physics, tectonophysics, experimental geochemistry

**Ru-Shan Wu, CSIDE Research Geophysicist**

Seismology, geophysics; wave propagation and subsurface imaging

**Xiao-Bi Xie, CSIDE Research Geophysicist**

Theoretical and applied seismology

**James C. Zachos, Professor**

Paleoceanography, marine stratigraphy

**Xi Zhang, Assistant Professor**

Planetary atmospheres, atmospheric chemistry

**Xixi Zhao, Lecturer, Earth Sciences; CSIDE Research Geophysicist**

Paleomagnetism and rock magnetism and their application to the history of Earth's magnetic field

**Kenneth W. Bruland, Professor Emeritus, Ocean Sciences**

**Weixin Cheng, Professor, Environmental Studies**

Soil ecology, agroecology, biogeochemistry, global change ecology

**Margaret (Peggy) L. Delaney, Professor, Ocean Sciences**

Paleoceanography, marine geochemistry

**A. Russell Flegal, Professor, Microbiology and Environmental Toxicology**

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

**Jonathan Fortney, Professor, Astronomy and Astrophysics**

Planetary atmospheres and interiors, extrasolar planets

**Michael Loik, Associate Professor, Environmental Studies**

Plant physiological ecology, climate change ecology, biometeorology, ecohydrology

**A. Christina Ravelo, Professor, Ocean Sciences**

Stable isotope geochemistry and chemical oceanography, paleoclimatology

## EARTH AND PLANETARY SCIENCES COURSES

---

### LOWER-DIVISION COURSES

#### **1. Oceanography. S**

An introduction to the physical environment of the ocean. Origin and evolution of ocean basins; sea-floor morphology; origin, distribution, historical record, and economic significance of marine sediments; ocean currents, waves, tides, and changing sea level; beaches, shorelines, and coastal processes; marine resources, pollution, and human impacts on the oceans. Students may also enroll in and receive credit for Ocean Sciences 1. (General Education Code(s): PE-E, IN.) G. Griggs

#### **2. Earth Catastrophes. F**

The role of catastrophic processes in shaping Earth and the environment in which we live. The physical processes causing earthquakes, volcanic eruptions, tsunamis, floods, windstorms, landslides, and meteorite impacts will be described, along with the role played by these rapid processes in the geological and biological evolution of the planet. Interdisciplinary approaches to understanding these phenomena will be discussed. The entire time scale from formation of the universe to the present Earth system will be considered. (Formerly course 80A.) (General Education Code(s): SI, T-2 Natural Sciences.) T. Lay

#### **3. Geology of National Parks. S**

Geologic concepts and processes responsible for shaping our national parks including mountain building, volcanic and earthquake activity, sedimentation, weathering, erosion, and glaciation. An understanding of how geology impacts our lives is emphasized. Appropriate for both science and non-science majors who wish to enhance their

knowledge, enjoyment, and appreciation of our national parks. (General Education Code(s): SI, IN.) S. Schwartz

#### **5. California Geology. F**

An introduction to physical geology emphasizing the minerals, rocks, volcanoes, mountains, faults, and earthquakes of California. In-class field trips to study the caves, rocks, and landforms of the campus and the Monterey Bay area. Discussion-1 hour. Concurrent enrollment in 5L required for majors and minors. (General Education Code(s): SI, IN.) E. Knittle

#### **5L. California Geology Laboratory (1 credit). F**

Laboratory sequence illustrating topics covered in course 5 with particular emphasis on rock and mineral identification and map interpretation. Field trip. Laboratory three hours. Students are billed a materials fee. E. Knittle

#### **7. The History of Life. W**

An examination of the major events in the history of life, from the origin of life approximately four billion years ago, to the wave of extinctions that has decimated plants and animals around the globe over the past 30,000 years. (General Education Code(s): SI, IN.) P. Koch

#### **8. Planetary Discovery. S**

A sweeping tour of planets, satellites, and small bodies in and out of the solar system. Focuses on major scientific results from telescopes and spacecraft missions. Topics include planetary system architecture, planetary atmosphere, surface and interior, planetary formation and evolution, astrobiology, extra-solar planets. Open to all students. (General Education Code(s): SI, T-2 Natural

Sciences.) X. Zhang

#### **9. Earth History and Global Change. S**

Over the past 4.5 billion years, planet Earth has evolved in exciting ways. Environments, climates, and life forms have come and gone in fascinating combinations. Course examines changing physical, biological, and climatological conditions through geologic time, beginning with the evolution of the Earth through changes leading to the current state of the planet, and considers prospects for Earth's future. (Formerly course 80F). (General Education Code(s): PE-E, T2-Natural Sciences.) The Staff

#### **10. Geologic Principles. W**

Introduction to the scientific study of Earth, the materials composing it, and the processes shaping it. Topics include minerals and rocks, Earth's internal structure, plate tectonics, earthquakes and volcanoes, oceans and the atmosphere, the formation of landscapes and global change. A one-day, optional field trip is included. Concurrent enrollment in 10L required for majors and minors. (General Education Code(s): SI, IN.) T. Blackburn

#### **10L. Geologic Principles Laboratory (1 credit). W**

Laboratory sequence illustrating topics covered in course 10, with particular emphasis on rock and mineral identification and map interpretation. Laboratory 3 hours. In-lab field trips. Students are billed a materials fee. T. Blackburn

#### **11. Earthquakes. F**

Causes and effects of earthquakes. How do we measure, mitigate, and try to predict earthquakes? Plate motion, frictional faulting, earthquake triggering, wave

## Earth and Planetary Sciences

propagation, earthquake damage, related hazards, and other social effects. Hazard reduction through earthquake forecasting and earthquake-resistant design. Class includes one full day weekend field trip to local faults. Advanced algebra and high school geometry recommended. Students are billed a materials fee. (Formerly course 80B.) (General Education Code(s): MF, T-2 Natural Sciences, Q.) The Staff

### **12. Introduction to Weather and Climate. \***

Many meteorological phenomena are familiar to us: clouds, fog, rain, snow, wind, lightning, and severe storms. Climate is the sum of weather over long periods and is changing (e.g., greenhouse warming, ozone depletion, urban smog) due to mankind's activities. Conceptual understanding of how and why the present-day atmosphere behaves as it does and how this may change in the future is the primary goal of this course. Offered in alternate academic years. (General Education Code(s): SR, T2-Natural Sciences, Q.) P. Chuang

### **20. Environmental Geology. S**

Introduction to aspects of geology which affect and are affected by humans. Addresses a broad range of topics including resource management, geologic hazards, air and water issues, population and land use, energy costs and effectiveness, and global change, all from a unique geological/environmental perspective. Lectures include strategies for mitigating these issues. Includes a one-day field trip. Concurrent enrollment in 20L required for majors and minors. (General Education Code(s): SI, IN.) S. Tulaczyk

### **20L. Environmental Geology Laboratory (1 credit). S**

Laboratory sequence illustrating topics covered in course 20, with emphasis on rock and mineral identification, geologic hazard assessment, geologic resource management, and land use planning. In-lab field trip. Laboratory 3 hours. Students are billed a materials fee. S. Tulaczyk

### **65. Natural History of Dinosaurs. \***

Explores the origin, evolution, and extinction of dinosaurs with emphasis on paleobiology and paleoecology. Covers fundamental paleontological and evolutionary principles, dinosaur anatomy and behavior, the hot-blooded/cold-blooded debate, dinosaur-bird relationships, diversity, and exploits of the great dinosaur hunters. One and a half hour of discussion each week. (General Education Code(s): SI, IN.) H. Schwartz

### **81B. Fundamentals of Environmental Science. \***

Addresses major issues in physical and biological environmental sciences and provides tools to critically evaluate, debate, and make informed choices regarding one's own impact on the environment. Topics include: climate change, water resources, air pollution, evolution, ecology (from populations to ecosystems), and conservation. Quantitative problem solving is an integral part of this course. (Also offered as College Eight 81B. Students cannot receive credit for both courses.) (General Education Code(s): MF, IN, Q.) L. Fox, P. Chuang

### **98. Earth Sciences Internship. F,W,S**

A supervised learning experience involving practical application of lower division Earth sciences

knowledge while working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work, to be evaluated both by the sponsoring agency and the faculty supervisor. Consult sponsoring agency for enrollment criteria; after instruction on resume preparation and interview skills, student must interview and be selected for internship by approved sponsoring organizations. May be repeated for credit. E. Silver

### **99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff  
**UPPER-DIVISION COURSES**

### **100. Vertebrate Paleontology. W**

Introduction to vertebrate history, with an emphasis on vertebrate relationships and the co-evolution of organisms and environments. Specific topics include vertebrate origins, systematics and classification, adaptive revolutions, mass extinctions, and the rise and fall of dinosaurs. Students are billed a materials fee. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 5 or 10 or 20 or Biology 20C, or Anthropology 1. Concurrent enrollment in course 100L is required. H. Schwartz

### **100L. Vertebrate Paleontology Laboratory (2 credits). W**

Comparative anatomy and functional morphology of vertebrates, and preservation of vertebrate hard parts, using modern and fossil specimens. Laboratory three hours and one 1-day field trip. Concurrent enrollment in course 100 is required. H. Schwartz

## Earth and Planetary Sciences

### **101. Invertebrate Paleobiology. F**

An introduction to paleobiology; the use of fossil evidence to pose and solve evolutionary and geologic questions. Students are billed a materials fee. (Formerly The Fossil Record.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 5 or 10 or 20 or Biology 20C or Anthropology 1. Concurrent enrollment in course 101L is required. M. Clapham

### **101L. Invertebrate Paleobiology Laboratory (1 credit). F**

Systematics, ecology, and evolutionary history of the major groups of fossil-forming animals. Laboratory 3 hours and one 1-day field trip. (Formerly The Fossil Record Laboratory.) Concurrent enrollment in course 101 is required. M. Clapham

### **102. Marine Geology. \***

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; introduction to paleoceanography. Discussion: 1 hour. Students cannot receive credit for this course and Ocean Sciences 280. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 5 or 10 or 20 or Biology 20C. A. Ravelo

### **104. Geologic Hazards. F**

The recognition, evaluation, and mitigation of geologic hazards: earthquakes and faulting, tsunamis, volcanism, landslides and mass movements, and flooding. Students are billed a materials fee. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 10/L or 5/L or 20/L. S. Schwartz

### **105. Coastal Geology. W**

An investigation of the evolution, morphology, and processes in the coastal zone including the terrestrial (marine terraces, dunes, estuaries, sea cliffs) and marine (beaches, continental shelves, sea level changes, shoreline erosion and protection, waves, tides) components and their interaction. Laboratory: 3 hours. Students are billed a materials fee. Prerequisite(s): course 5 or 10 or 20. G. Griggs

### **107. Remote Sensing of the Environment. W**

Introduction to geographic information systems (GIS) and remote sensing (RS) as valuable tools in the study of geology. Covers application of GIS/RS to study of surface processes, including landslides, hydrologic basins, coastal erosion, modern floods, volcanic activity and surface deformation. Prerequisite(s): course 5 or 10 or 20. Enrollment limited to 36. E. Silver

### **109. Elements of Field Geology. F,S**

Basic tools and techniques used in geologic fieldwork. Preparation, analysis, and interpretation of geologic maps. Nine to 10 days of weekend field trips required, including a six-day geologic mapping exercise. Laboratory: 3 hours. Recommended for courses 120, 130, 150, and required for 188A-B. May not be taken concurrently with course 120, 150, or 188. Students are billed a materials fee. (General Education Code(s): W satisfied by taking this course and courses 188A and 188B.) Enrollment restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies. Prerequisite(s): Satisfaction

of the Entry Level Writing and Composition requirements, course 5 or 10 or 20, and 5L or 10L or 20L, or by permission of instructor. Concurrent enrollment in 109L is required. Enrollment limited to 25. (F) H. Schwartz, (S) J. Hourigan

### **109L. Field Geology Laboratory (2 credits). F,S**

Laboratory exercises essential to the successful completion of fieldwork required in course 109. Topics include topographic maps, Brunton compass, rock identification and description, geologic map analysis, structure section "construction," and landslide recognition. Concurrent enrollment in course 109 required. Enrollment restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies or by permission of instructor. Enrollment limited to 25. (General Education Code(s): PR-E.) (F) H. Schwartz, (S) J. Hourigan

### **110A. Evolution of the Earth. F**

Investigation of the processes and mechanisms that have produced the present Earth system, with an emphasis on the temporal evolution of the earth from the Archean to the present. Specific topics covered include cyclicity in Earth processes and the evolution of, and interplay between the planet's crust, atmosphere, hydrosphere, and biosphere. Prerequisite(s): courses 5 or 10 or 20, and 5L or 10L or 20L, and Mathematics 11A or Mathematics 19A or Applied Mathematics and Statistics 15A. (General Education Code(s): PE-E.) Q. Williams, J. Zachos

### **110B. Earth as a Chemical System. W**

The chemical properties of Earth materials and the chemical

## Earth and Planetary Sciences

processes by which the planet has evolved to its present state. Specific topics covered include properties of minerals; the genesis of igneous, metamorphic, and sedimentary rocks; and the linkage between the solid Earth and the hydrosphere. Enrollment is permitted by permission code with equivalent or exceptional background, or if enrolled concurrently in Chemistry 1B. Prerequisite(s): courses 5, or 10, or 20, and 5L, or 10L, or 20L, and Chemistry 1B. E. Knittle

### **110C. The Dynamic Earth. S**

Physical processes occurring in the interior of the earth, at its surface and in the oceans and atmospheres including plate tectonics, structural deformation of rocks, and material and heat transport. Students are billed a materials fee.

Prerequisite(s): course 5 or 10 or 20; and 5L or 10L or 20L; and course 111 or Mathematics 22 or 23A; and Physics 6A or 5A. E. Brodsky

### **110L. Evolution of the Earth Laboratory (2 credits). F**

Laboratory sequence illustrating topics covered in course 110A.

Emphasis is on quantifying and evaluating different phenomena related to thermal, tectonic, climatic, and evolutionary processes. Prerequisite(s): concurrent enrollment in course 110A. (General Education Code(s): PR-E.) Q. Williams, J. Zachos

### **110M. Earth as a Chemical System Laboratory (2 credits). W**

Laboratory sequence illustrating topics covered in course 110B.

Emphasizes identification of the major rock-forming minerals and common rock types; principles of basic crystallography. Prerequisite(s): concurrent enrollment in course 110B. E. Knittle

### **110N. The Dynamic Earth Laboratory (2 credits). S**

Laboratory sequence illustrating topics covered in course 110C.

Prerequisite(s): concurrent enrollment in course 110C. E. Brodsky

### **111. Mathematics in the Earth Sciences. F**

Series and sequences, vectors, 3D analytic geometry, partial differentiation, matrix algebra, and differential equations with applications in the Earth sciences. Topics include matrix manipulation, systems of linear equations, least-squares, Taylor series, gradients, optimization, analytic and numerical solutions to differential equations. Prerequisite(s): courses 5 or 10 or 20, and Mathematics 11B or Mathematics 19B or Applied Mathematics and Statistics 15B. (General Education Code(s): Q.) W. Nimmo

### **112. Practical Geophysics. F**

Hands-on practice analyzing real-life observational data including earthquake catalogs, seismograms, gravity, and GPS data. Emphasis on data collection, and access and manipulation skills. Introduction to MATLAB programming included. Prerequisite(s): course 110C. E. Brodsky

### **116. Hydrology. \***

Introduces processes involving water on and near Earth's surface, including meteorology, water properties, surface flows in streams and runoff, flood analysis, ground water, water budgets, sediment transport, erosion, and water quality. Problem set and laboratory each week. Laboratory/field: 3 hours. Students are billed a materials fee. Alternates annually with course 146. Enrollment restricted to majors and minors in Earth and planetary sciences and

the combined majors with anthropology and environmental studies. Prerequisite(s): course 5 or 10 or 20, Mathematics 11A or 19A or Applied Mathematics or Statistics 15A; and Physics 6A/L or 5A/L, or by permission of the instructor. Course 5L or 10L or 20L and Physics 6B/M are recommended. A. Fisher

### **118. Seismotectonics. W**

Earthquakes and their relationship to plate tectonics. Topics include seismological analysis of earthquake faulting, types of seismic waves, seismicity distributions, thermal and rheological structure of plates, and seismic investigation of plate dynamics. Prerequisite(s): course 5 or 10 or 20; Mathematics 11B or 19B; and Physics 5A or 6A. Offered in alternate academic years. T. Lay

### **119. Introduction to Scientific Computing. W**

Introduction to solving scientific problems using computers. A series of simple problems from Earth sciences, physics, and astronomy are solved using a user-friendly scientific programming language (Python/SciPy). (Also offered as Astronomy and Astrophysics 119. Students cannot receive credit for both courses.) Prerequisite(s): Mathematics 11A or 19A or 20A or Applied Mathematics or Statistics 15A. (General Education Code(s): IN.) M. Krumholz

### **120. Sedimentology and Stratigraphy. S**

Stratigraphic principles used in classifying sedimentary rocks. Fundamentals of sedimentary mechanics. Analysis and interpretation of facies and depositional systems. Introduction to seismic facies and basin analysis. Course includes four Saturday field exercises. Students are billed a

## Earth and Planetary Sciences

materials fee. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 110A. Course 110B is recommended as preparation. May not be taken concurrently with course 109. M. Clapham

### **120L. Sedimentology and Stratigraphy Laboratory (2 credits). \***

Laboratory sequence illustrating topics in course 120, including sedimentary petrology, sedimentary structures, sequence stratigraphy, and geohistory analysis. Prerequisite(s): concurrent enrollment in course 120. M. Clapham

### **121. The Atmosphere. \***

Course focuses on understanding basic atmospheric weather and climate phenomena starting from the fundamentals of physics and chemistry. Using this approach, covers topics such as atmospheric circulation, precipitation, clouds, storms, urban and regional air quality, atmospheric aerosols, and climate and global change. Prerequisite(s): Mathematics 11B or Mathematics 19B or Applied Mathematics and Statistics 15B, and Chemistry 1A, and Physics 5B or 6B. Offered in alternate academic years. P. Chuang

### **125. Statistics and Data Analysis in the Geosciences. W**

Project-based introduction to analytical methods, such as univariate and multivariate statistics, cluster analysis and ordination, and maximum likelihood estimation, using a conceptual approach. Introduction to analysis and programming using the R software package. Offered in alternate academic years. (General Education Code(s): SR.) M. Clapham

### **127. Radiogenic Isotopes. \***

Introduces the systematics and applications of radiogenic isotopes. Topics include geochronology, isotopic tracers of crust, mantle and core differentiation, short-lived isotopic systems, and inorganic mass spectrometry. Practical exercises focus on reduction of isotopic data and interpretation. Prerequisite(s): course 110B. T. Blackburn

### **128. Isotopes: Fundamentals and Applications in Earth and Marine Sciences. \***

Explores the fundamentals and concepts of stable, radiogenic, and cosmogenic isotope chemistry with applications relevant to Earth, marine, and biological sciences. Prerequisite(s): course 110B or permission of instructor. J. Zachos

### **130. Igneous and Metamorphic Petrology. S**

Introduction to the relationship between tectonic environments and the genesis of rock assemblages, primarily igneous and metamorphic. Examples from California and elsewhere are used to illustrate petrogenetic processes and characteristic petrologic features of rocks from all major tectonic settings. Prerequisite(s): course 110B. Concurrent enrollment in course 130L is required. E. Knittle

### **130L. Igneous and Metamorphic Petrology Laboratory (2 credits). S**

An introduction to optical mineralogy and the petrography of igneous rocks. (Formerly Magmas and Volcanos Laboratory.) Prerequisite(s): course 110B. Concurrent enrollment in 130 is required. E. Knittle

### **134. Thermochemistry of Geologic Systems. \***

Introduction to the thermodynamic and kinetic principles with a strong emphasis on applications to Earth materials. Implications for phase equilibria, geothermometry/geobarometry, element partitioning, and physical properties of minerals, magmas, and solutions. Prerequisite(s): course 110B. Offered in alternate academic years. Q. Williams

### **140. Geomorphology. W**

An introduction to the evolution of the Earth's landscape, with emphasis on the processes responsible. Review of climatic and tectonic forcing followed by detailed discussion of weathering, glaciers, hillslopes, wind, rivers, and coastal processes with emphasis on their geographic distribution. One single day and one three-day field trip. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 110A. Concurrent enrollment in 140L is required. N. Finnegan

### **140L. Geomorphology Laboratory (2 credits). W**

Laboratory sequence illustrating topics covered in course 140. These extensive laboratory exercises emphasize the quantification of the geomorphic processes and forms, and on the writing of concise summaries of the science in the form of abstracts. Students are billed a materials fee. Prerequisite(s): Concurrent enrollment in course 140 is required. N. Finnegan

### **142. Engineering Geology for Environmental Scientists. \***

Introduction to the formation, composition, and classification of soils; the chemical interaction of soil and groundwater; and basic soil

## Earth and Planetary Sciences

mechanics: stress-strain behavior, effective stress concept, consolidation, soil testing methods. Applications to problems including slope stability, landslides, liquefaction, subsidence, soil creep, debris flows. Laboratory: 3 hours. Students are billed a materials fee. Prerequisite(s): course 5 or 10 or 20; Mathematics 11A or Mathematics 19A or Applied Mathematics or Statistics 15A. Offered in alternate academic years. S. Tulaczyk

### **146. Groundwater. S**

Explores saturated and unsaturated fluid flow below Earth's surface, well hydraulics, and resource evaluation and development. Introduces modeling, field techniques, geochemistry, and contaminant transport and remediation. Problem set and laboratory each week; final paper. Laboratory: 3 hours. Students are billed a materials fee. Alternates annually with course 116. Enrollment restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies. Course 5L or 10L or 20L and Physics 6B/M are recommended as preparation. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and course 5 or 10 or 20; and Mathematics 11A or 19A or AMS 15A; and Physics 6A/L (Physics 6B/M recommended); and Chemistry 1A/L, or by permission of the instructor. A. Fisher

### **148. Glaciology. W**

Introduction to the role of snow and ice in the dynamics of the earth surface system. Snow deposition and metamorphosis. Heat and mass balance at snow and ice surfaces. Flow of glaciers, ice sheets, and sea ice. Methods of climate

reconstruction. Ice age theories. Students are billed a materials fee. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and courses 5 or 10 or 20; and Mathematics 11A or Mathematics 19A or Applied Mathematics or Statistics 15A. Offered in alternate academic years. S. Tulaczyk

### **150. Structural Geology. F**

Principles and methods of analysis of brittle and ductily deformed rocks. Includes descriptions of structures, field analysis of structures, and mechanics of deformation. Three day-long field trips on weekends. Students are billed a materials fee. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 110A or 110B; course 109 recommended; concurrent enrollment in course 150L is required. J. Hourigan

### **150L. Structural Geology Laboratory (2 credits). F**

Structural analysis of faults, folds, and maps. Use of stereographic projections. Cross section construction and balancing from field data. Concurrent enrollment in course 150 is required. J. Hourigan

### **152. Tectonics. W**

The processes, techniques, and interpretations involved in the study of active crustal movements; constraints from plate tectonics; horizontal and vertical motions and rates; geodesy, including GPS; stress measurement; image interpretation; fault system analysis; paleoseismicity; fluid effects. Examples from the circum-Pacific. Laboratory-3 hours. Students cannot receive credit for this course and course 207. Students are billed a materials fee. (Formerly Active Tectonics.)

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 10 or 5 or 20 and 10L or 5L or 20L, and Physics 5A or 6A or equivalent per instructor permission. J. Hourigan

### **160. Planetary Science. F**

Broad introduction to planetary science. Topics include the fundamental characteristics of solar system bodies; space exploration of these bodies; formation and evolution of surfaces, atmospheres and interiors of planets, satellites and small bodies. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and Mathematics 11B or Mathematics 19B or Applied Mathematics and Statistics 15B; and Physics 5A or 6A. I. Garrick-Bethell

### **162. Planetary Interiors. W**

The chemical and thermal structure and evolution of silicate planet interiors. Topics include equation of state of mantle and core materials, thermal history of the mantle and core, dynamics of mantle convection, geophysical determination of interior structure. Students cannot receive credit for this course and course 262. Prerequisite(s): course 160; and course 111 or Mathematics 22 or 23A; and Physics 5C or 6C. Offered in alternate academic years. I. Garrick-Bethell

### **163. Planetary Surfaces. S**

Comparative study of surfaces and atmospheres of planetary bodies in solar system, focusing on comparative planetology and geophysical processes at work, including differentiation, impact cratering, tectonics, volcanism, and geomorphic evolution. Explores terrestrial planets, giant planets and their moons. Students cannot receive credit for this course and

## Earth and Planetary Sciences

course 263. Prerequisite(s): course 160. Enrollment limited to 20. Offered in alternate academic years. W. Nimmo

### **164. Planetary Atmospheres. S**

A quantitative study of the origin, chemistry, dynamics, and observations of the atmospheres of terrestrial and gas-giant planets. Students cannot receive credit for this course and course 264.

Prerequisite(s): course 160.

Enrollment limited to 18. X. Zhang

### **172. Geophysical Fluid Dynamics. S**

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Taught in conjunction with course 272.

Students cannot receive credit for this course and course 272. (Also offered as Ocean Sciences 172.

Students cannot receive credit for both courses.) Prerequisite(s):

Physics 107 or Applied

Mathematics and Statistics 107;

Mathematics 22 or 23B

recommended. Offered in alternate academic years. C. Edwards

### **188A. Summer Field Internship. S**

Three weeks of summer field study in geologically complex regions in the White-Inyo Mountains of eastern California. Activities include geologic field mapping on topographic and photographic base maps, stratigraphy, petrology, and structure analysis. A fee is required for participation. Contact sponsoring agency for details.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses

109/L, 110A/L, and 110B/M.

Enrollment restricted to Earth sciences majors. Concurrent enrollment in course 188B is required. (General Education Code(s): W satisfied by taking this course and courses 109 and 188B.) Interview only via application filed with department. (General Education Code(s): PR-E.) H. Schwartz

### **188B. Geographic Information Systems with Applications to the Earth Sciences. S**

Introduction to basic principles of geographic information systems (GIS). Visualization of earthscapes with applications to problem-solving in the Earth sciences. Laboratory exercises in loading, manipulation, and interpretation of data sets. Field investigations of phenomena visualized in laboratory, including geological description, interpretation, and written report preparation. Lecture and laboratory portions of course occur during spring quarter. Field investigations and report-writing occur in the summer following spring quarter. A fee is required for participation. Contact sponsoring agency for details. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 109/L, 110A/L, and 110B/M. Enrollment restricted to Earth sciences majors.

Concurrent enrollment in course 188A is required. (General Education Code(s): W satisfied by taking this course and courses 188A and 109.) Interview only via application filed with department. Enrollment limited to 25. N. Finnegan

### **190. Earth Sciences Mentorship (1 credit). F**

Faculty research activity, analytic facilities, and career counseling in three separate Earth sciences

laboratories are offered with varied formats including field trips, discussions, and equipment demonstrations. Three different faculty participate in each offering. Enrollment restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors. Enrollment limited to 24. May be repeated for credit. E. Silver

### **191A. Climate Change Science and Policy. S**

Explores the scientific basis of current and pending climate change, and the state of climate policy issues in California, the nation, and the world. Work includes foundational lectures on both public policy and climate science; additional guest lectures from policy makers, politicians, and scientists. Students are introduced to and become familiar with addressing climate-change issues from both policy and scientific perspectives; research papers and public presentations are required activities. (Formerly course 191.) Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior majors in Earth sciences and the combined major with anthropology. P. Chuang

### **191B. Planetary Capstone. \***

Examines a crosscutting topic in planetary sciences (e.g., volcanism) to satisfy the senior capstone requirement. Students are assessed on the basis of an oral presentation and a written report in which a synthetic review is present. (Formerly course 193.)

Prerequisite(s): course 160, and course 111 or Mathematics 22. Enrollment restricted to seniors and graduate students. W. Nimmo

## Earth and Planetary Sciences

### **194F. Education Capstone (2 credits). F,W,S**

Students write a paper on a lesson plan developed after their CalTeach internship courses. This independent study is supervised by Earth and planetary sciences faculty or ocean sciences faculty, as well as a member of the CalTeach staff or Education Department.

Prerequisite(s): Education 185C and 185L. Enrollment restricted to Earth and planetary sciences majors with a concentration in science education. The Staff

### **195. Senior Thesis. F,W,S**

Students submit petition to sponsoring agency. Enrollment restricted to seniors.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. May be repeated for credit. (General Education Code(s): W.) The Staff

### **196B. Tutoring Earth Sciences in the University. F,W,S**

Students facilitate laboratory and field exercises in conjunction with faculty and teaching assistants in various Earth sciences courses. May not count toward upper-division major requirements. Approval of sponsoring agency; interview, and selection by primary instructor of specific courses required. (Formerly Teaching Earth Sciences in the University.) The Staff

### **196C. Tutoring Earth Sciences in the University (2 credits). F,W,S**

Students facilitate laboratory and field exercises in conjunction with faculty and teaching assistants in various Earth sciences courses. May not count toward upper-division major requirements. Approval of sponsoring agency; interview, and selection by primary instructor of specific courses required. Enrollment restricted to Earth sciences, Earth

sciences/anthropology, and environmental studies/Earth sciences majors. (Formerly Teaching Earth Sciences in the University.) May be repeated for credit. The Staff

### **198. Earth Sciences Internship. F,W,S**

A supervised learning experience involving practical application of Earth sciences through working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work. Consult sponsoring agency for enrollment criteria. After instruction on resume preparation and interview skills, students must interview and be selected for internship by approved sponsoring organizations. Enrollment restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors. May be repeated for credit. E. Silver

### **198F. Earth Sciences Internship (2 credits). F,W,S**

A supervised learning experience involving practical application of Earth sciences through working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work. May not be counted toward upper-division major requirements. Consult sponsoring agency for enrollment criteria. After instruction on resume preparation and interview skills, student must interview and be selected for internship by approved sponsoring organizations. Enrollment restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors. May be repeated

for credit. The Staff

### **199. Tutorial. F,W,S**

Introduction to research in laboratory, field, or theoretical subjects as an independent study. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Introduction to research in laboratory, field, or theoretical subjects as an independent study. May not be counted toward upper-division major requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## GRADUATE COURSES

---

### **203. Introductory Teaching Seminar (1 credit). F**

Intended for new Earth sciences graduate students. Focus on preparation, assessment, and feedback. Classroom techniques, organizational and time management strategies, practice teaching sessions specific to laboratory and/or science instruction. Required follow-up meetings to discuss practical teaching experience. Enrollment restricted to graduate students. The Staff

### **204. Earth and Planetary Sciences Foundations. F**

Provides a comprehensive overview of key concepts, dominant paradigms, and research frontiers in Earth and planetary sciences in plenary talks by multiple faculty. Provides a required foundation course for all incoming students pursuing graduate degrees in Earth and planetary sciences. Enrollment is restricted to Earth sciences graduate students. Enrollment limited to 20. S. Schwartz

**206. Great Papers in the Earth Sciences. W**

Exposure to the most important ideas in the Earth sciences through exploration of the primary literature. Seminal papers in different subdisciplines of the Earth sciences are read and analyzed to provide breadth and improve students' ability to think critically. Enrollment restricted to Earth sciences graduate students. T. Blackburn, Q. Williams

**207. Tectonics. \***

An overview of tectonic theory and processes for application to the Earth sciences. The course explores the primary tools of tectonic interpretation including plate kinematics, rheology, plate boundary dynamics, and the behavior of active fault systems. Taught in conjunction with course 152. Students cannot receive credit for this course and course 152. Prerequisite(s): graduate standing or permission of instructor. J. Hourigan

**208. Methods in Paleoclimatology. \***

Addresses methods used to reconstruct aspects of paleoclimates and paleoenvironments from the geologic record, focusing primarily on terrestrial records. Topics to be covered include dendrochronology and dendroclimatology, paleopalynology, paleobotany, ice cores, and paleosol studies. Lectures, discussions, and laboratory work. Enrollment restricted to graduate students. Offered in alternate academic years. The Staff

**210. Overview of Stellar and Planetary Formation and Evolution. \***

Overview of current understanding of star and planet formation and

evolution. Examines our solar system in the context of the galactic planetary census. Provides a uniform introduction to astronomy and Earth science planetary students. Enrollment restricted to graduate students. G. Laughlin

**213. Biogeochemical Cycles. F**

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time. (Also offered as Ocean Sciences 213. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant discipline are recommended. M. Delaney

**220. Ground Water Modeling. \***

Introduction to building and using models to solve hydrogeologic problems. Modeling methods include mainly analytical and finite-difference. Emphasis on using models rather than the details of their functioning, although some coding is required. Comfort with mathematical methods and computers expected. Course designed for graduate students, but available to qualified Earth science majors. Prerequisite(s): graduate standing or permission of instructor required. One year of calculus and courses in differential equations and basic hydrologic principles are recommended as preparation. Offered in alternate academic years. A. Fisher

**225. Statistics and Data Analysis in the Geosciences. W**

Using a conceptual approach, this course is a project-based introduction to analytical methods, such as univariate and multivariate statistics, cluster analysis and ordination, and maximum likelihood estimation. Introduces analysis and programming using the R software package. Students cannot receive credit for this course and course 125. Enrollment is restricted to graduate students. M. Clapham

**229. Isotopic Methods in Environmental Science. \***

Explores how natural variations in stable isotope ratios answer questions in ecology, paleobiology, and other environmental sciences. Format includes lectures by the instructor and student presentations on applications following literature-based research on each topic. Enrollment restricted to graduate students. Enrollment limited to 25. P. Koch

**240. Communicating Science (3 credits). \***

Introduces inquiry-based instructional strategies for communicating a passion for science. These strategies, combined with content knowledge and enthusiasm for sharing it, equips college students to introduce science to K-8 students and teachers in local schools. Enrollment restricted to graduate students. Enrollment limited to 20. A. Paytan

**254. The Climate System. \***

Focuses on atmospheric and oceanic processes that are important within the Earth's climate system, especially those that operate on annual to centennial time scales. Format includes lectures by the instructors, paper

## Earth and Planetary Sciences

readings, and discussion.

Enrollment restricted to graduate students. Offered in alternate academic years. P. Chuang

### **258. Deep Time Paleoclimates. S**

Weekly

lectures/readings/presentations focused on the key events in the long-term evolution of Earth's climate (i.e., before the Pliocene), including early Archean, faint, young-sun period; Proterozoic snowballs; Paleozoic glaciations and greenhouse events; the mid-Cretaceous oceanic anoxic events (OAEs); and Paleogene thermal maxima and glacial intervals. Considerable emphasis on evaluating the proxies of climate and mechanisms of climate change (e.g., greenhouse gasses, paleogeography). Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. J. Zachos

### **260. Introductory Data Analysis in the Ocean and Earth Sciences. W**

Introduces data analysis methods regularly encountered within the ocean and earth sciences. Topics include: error propagation, least squares analysis, data interpolation methods, empirical orthogonal functions, and Monte Carlo methods applied to problems drawn from oceanographic and earth sciences datasets. Introduces and uses a high-level computing and visualization package, MATLAB. Student project consists of analysis of the student's own dataset. (Also offered as Ocean Sciences 260. Students cannot receive credit for both courses.) Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment restricted to graduate students; undergraduates with permission of instructor. C. Edwards

### **262. Planetary Interiors. W**

The chemical and thermal structure and evolution of silicate planet interiors. Topics include equation of state of mantle and core materials, thermal history of the mantle and core, dynamics of mantle convection, geophysical determination of interior structure. Students cannot receive credit for this course and course 162. Enrollment restricted to graduate students. Enrollment limited to 20. Offered in alternate academic years. I. Garrick-Bethell

### **263. Planetary Surfaces. \***

Comparative study of surfaces of planetary bodies in our solar system, focusing on comparative planetology and geophysical processes at work, including differentiation; on-impact cratering; tectonics; volcanism and geomorphic evolution; and exobiology. Explores terrestrial planets, giant planets and their moons, and trans-Neptunian objects, focusing on modern exploration. Students cannot receive credit for this course and course 163. Enrollment restricted to graduate students. Offered in alternate academic years. W. Nimmo

### **264. Planetary Atmospheres. W**

Quantitative study of the origin, chemistry, dynamics, and observations of the atmospheres of terrestrial and gas giant planets. Students cannot receive credit for this course and course 164. Enrollment restricted to graduate students. X. Zhang

### **265. Order of Magnitude Estimation. W**

Practice in making rough estimates and leading-order approximations in physical and chemical processes. Enrollment restricted to graduate students. Offered in alternate

academic years. W. Nimmo, P. Chuang

### **266. Geologic Signal Processing and Inverse Theory. F**

Theoretical and practical aspects of digital signal analysis including data sampling, spectral estimation, digital filtering, statistical estimation, correlation tools, and principle-component analysis. Emphasis on practical examples of geophysical time series. Multivariable calculus and linear algebra are required and used extensively in the course. (Formerly Geological Signal Processing.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. E. Brodsky

### **270. Global Seismology. F**

Introduction to quantitative earthquake and global Earth structure seismology. Topics include basic elasticity, wave characteristics, seismic ray theory, wave reflection, surface waves, normal modes, seismic instrumentation, application of seismic waves to reveal Earth structure and resulting models, representation of earthquake sources such as explosions and faulting, earthquake rupture scaling, modern methods of modeling seismic recordings to study source complexity, and an introduction to seismotectonics. Laboratory: 3 hours. Enrollment restricted to graduate students. Offered in alternate academic years. T. Lay

### **271. Current Research Topics in Deep Earth Processes. \*\***

Students and instructor lead discussions of recent and significant publications in geophysics and chemistry of deep Earth. Articles structured around current theme of interest are selected by participants

## Earth and Planetary Sciences

and approved by instructor. Emphasis on defining multidisciplinary significance of each article and its relationship to fundamental processes in deep Earth, including core and mantle. Designed for graduate students but available to qualified Earth sciences majors. May be repeated for credit. T. Lay

### **272. Geophysical Fluid Dynamics. S**

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Students cannot receive credit for this course and course 172. (Also offered as Ocean Sciences 272. Students cannot receive credit for both courses.) Physics 227 is recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. C. Edwards

### **275. Magnetohydrodynamics. \***

Study of fluid dynamics and magnetic fields with a focus on convection and magnetic field generation in planets and stars. Students develop a computer program for modeling magneto-convection. Computer programming experience required. Enrollment restricted to graduate students. Offered in alternate academic years. The Staff

### **278A. Advanced Seismology. \***

Elastic wave propagation. Advanced topics in ray theory, WKB solutions in seismology, singularities and nonlinearities, surface wave theory, propagating matrices, normal modes, and inversion theory. Selected topics in time series

analysis and seismic signal processing, seismic wave dispersion. Course designed for graduate students but available to qualified Earth sciences majors. Physics 110B and 114B are recommended as preparation. Enrollment restricted to graduate students. May be repeated for credit. T. Lay

### **280D. Short Course in Atmospheric/Climate Science (3 credits). \*\***

Addresses specialized topics in atmospheric and/or climate science that are too narrow for a full (5-credit) format. Examples include: cloud physics; atmospheric boundary layer; aerosol physics and chemistry; atmospheric radiation; atmospheric thermodynamics. Enrollment restricted to graduate students. May be repeated for credit. P. Chuang

### **290. Proseminar.**

Special topics offered from time to time by visiting professors or staff members. May be repeated for credit. The Staff

### **290B. Topics in Glaciology. F**

Advanced review of the physics and chemistry of ice and snow. Mass and heat balance of ice masses. Motion of glaciers and ice sheets. Subglacial and englacial hydrology. Thermodynamics of ice masses and the linkage to climate. Enrollment restricted to graduate students. May be repeated for credit. S. Tulaczyk

### **290C. Topics in Geophysics. F**

Different problems and approaches will be stressed from year to year such as geotectonics, paleomagnetism, or properties and processes in the mantle and core. Enrollment restricted to graduate students; qualified Earth sciences majors by permission of instructor. I. Garrick-Bethell

### **290D. Petrology and Plate Tectonics. \***

Selected topics illustrating relationships between igneous and metamorphic rocks and plate tectonics are explored in detail. Designed for graduate students but available to qualified Earth sciences majors. May be repeated for credit. The Staff

### **290E. Topics in Planetary Science. \***

We examine one well-defined topic in planetary science, beginning with a summary of current knowledge and concluding with the latest research literature. Topics will vary from year to year and may include planetary collisions, terrestrial planets, origin of planetary systems, small bodies, the New Mars, and satellites of Jupiter. Achievement will be evaluated based on class participation, exams, and a research project. Open to undergraduate majors with permission of instructor. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **290F. Topics in Coastal Processes (2 credits). W,S**

Instructor and students lead discussions and make presentations on current research, problems, and publications in coastal processes. These topics include littoral drift, sediment transport and storage on the inner shelf, shoreline erosion/change and its documentation, and related issues. Enrollment restricted to graduate students. May be repeated for credit. G. Griggs

### **290G. Topics in Global Tectonics. \***

Explores different problems of special interest in global tectonics with the approach of integrating marine and terrestrial geologic and geophysical information. Course

## Earth and Planetary Sciences

designed for graduate students but available to qualified Earth sciences majors. May be repeated for credit. E. Silver

### **290H. Topics in Hydrogeology. F**

Selected topics in groundwater, hydrothermal systems, and related subjects. Discussion of theoretical models, field and laboratory approaches, and recent research. Topics vary from year to year. Course designed for graduate students but available to qualified Earth sciences majors. Offered in alternate academic years. May be repeated for credit. A. Fisher

### **290I. Topics in Geomorphology. S**

Discussion of journal articles focused on a theme in contemporary geomorphology. Topics include: coupling of climate; tectonics and landscape evolution; mechanics of bedrock river channels; fundamentals of fluvial gravel transport; and inference of tectonic rates and processes from analysis of topography. Enrollment restricted to graduate students; qualified undergraduates may enroll by permission of instructor. May be repeated for credit. N. Finnegan

### **290J. Topics in Earthquake Physics. W**

Why do earthquakes happen? Topics include friction, fracture, earthquake triggering, stress in the crust, observed source scalings, and seismicity statistics. Emphasis on observations and current research topics. Enrollment restricted to graduate students and advanced undergraduates. E. Brodsky

### **290K. Paleontology Seminar (3 credits). \***

Seminar discussion based on current readings in the literature around some topic in the history and evolution of life. Course designed for graduate students but

available to qualified upper-division science students. Offered in alternate academic years. May be repeated for credit. M. Clapham, P. Koch

### **290L. Topics in Climate Change. \***

Explores current issues and recent developments in the field of past, present, and future climate change. Topic is different each year, but focuses on the interaction between different components of Earth's environment and the effect of that interaction on climate change. Designed for graduate students but open to qualified undergraduates. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. L. Sloan

### **290M. Topics in Atmospheric Science. \***

Selected topics encompassing atmospheric physics and chemistry. Topics vary from year to year. Sample topics include: atmospheric physics, atmospheric chemistry, boundary layer meteorology, aerosol science, and atmospheric thermodynamics. (Formerly Topics in Atmospheric Chemistry.) Designed for graduate students, but qualified undergraduates may enroll with permission of instructor. May be repeated for credit. P. Chuang

### **290N. Topics in Mineral Physics. \***

Selected topics encompassing the physics and chemistry of Earth's interior, planetary physics, high-pressure experimental geophysics and material properties at high pressure and temperature. Topics vary from year to year. Enrollment restricted to graduate students and qualified Earth sciences majors by permission of instructor. May be repeated for credit. E. Knittle

### **290P. Interdisciplinary Topics in the Earth Sciences. \***

An understanding of the chemical and physical properties and processes in the earth is sought by integrating information from several subdisciplines in the Earth sciences. Topics vary from year to year, focusing on areas of active research. Course designed for graduate student but available to qualified Earth sciences majors. Prerequisite(s): graduate standing or permission of instructor. Course designed for graduate student but available to qualified Earth sciences majors. May be repeated for credit. S. Schwartz

### **290Q. Topics in Outer Solar System. \***

Exploration of the planets and satellites beyond the asteroid belt, with an emphasis on the underlying physical processes at work. Course includes lectures, computer practicals, and student presentations. Enrollment restricted to graduate students. May be repeated for credit. W. Nimmo

### **290R. Topics in the Chemistry and Physics of the Earth. \***

Explores problems and current research developments in the application of physics and chemistry to planetary interiors. Topics differ from year to year and include, but are not limited to, research related to the accretion, differentiation, evolution, and structure of the terrestrial planets. Course designed for graduate students but available to qualified Earth sciences majors. May be repeated for credit. Q. Williams

### **290T. Current Research Topics in Paleoceanography and Paleoclimatology. \***

Students and instructor lead discussions of recent and significant problems in paleoceanography and paleoclimatology. Articles

## Earth and Planetary Sciences

structured around current themes of interest are selected by the instructor. Emphasis on major climatic transitions or events which noticeably influenced evolution of biota. Course designed for graduate students but available to qualified Earth sciences majors. J. Zachos

### **290U. Topics in Thermochronology. \***

Surveys the use of thermochronometry to quantify the rates of tectonic processes. Topics include heat conduction and diffusion; radioactive decay; analytical methods; and modeling of thermochronologic data. Seminars review seminal papers from the

literature. Enrollment restricted to graduate students. Enrollment limited to 20. J. Hourigan

### **290X. Topics in Modeling Planetary Interiors. \***

Introduces computer modeling of thermal convection in planetary interiors. Students learn to write and run a basic computer code using spectral and finite-difference methods, then are shown how to improve the numerical method and physics. Basic computer programming experience is required (for example, in Fortran, C, IDL, or MATLAB). Course designed for and enrollment restricted to

graduate students, but available to qualified science majors. May be repeated for credit. G. Glatzmaier

### **292. Seminar (no credit). F,W,S**

Weekly seminar attended by faculty, graduate students, and upper-division undergraduate students. The Staff

### **293. Graduate Research Seminar (1 credit). S**

Weekly seminar series covering a broad spectrum of topics in the Earth sciences. Graduate students give 15- to 20-minute oral presentations on current or anticipated research. Enrollment restricted to graduate students. May be repeated for credit. Q. Williams

\* Not offered in 2015-16

\*\* Quarter offered not yet determined

# EAST ASIAN STUDIES

---

2015-16 General Catalog

Department of History

201 Humanities

(831) 459-2982

<http://eastasianstudies.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

East Asian studies addresses the three societies of China, Japan, and Korea in northeast Asia. We recognize that they compose a meaningful regional designation that contains a diverse range of peoples, languages, and cultures. Linked by centuries of common use of the Chinese writing system, a shared textual canon, general principles of statecraft, and the continual circulation of people and goods, the three societies nevertheless also possess distinctive languages, histories, and social identities, making it necessary to explore each society in its own right.

In recognition of this diversity within the common bonds, East Asian studies at UCSC encourages students to explore East Asia in both depth and breadth. Building first upon developing language skills in Chinese or Japanese, students also begin their studies in one of two historical surveys—History 40A, Early Modern East Asia, or History 40B, The Making of Modern East Asia—which explore the broad regional forces that contextualize each society’s particular trajectory. From these foundations, students are encouraged to investigate a broad range of questions pertinent to each society in classes across the university, including anthropology, economics, education, feminist studies, film and digital media, history, history of art and visual culture, languages, linguistics, literature, music, politics, sociology, and theater arts.

The East Asian studies minor is administered by the Department of History. For additional information on curriculum and advising, go to

<http://eastasianstudies.ucsc.edu>.

---

### REQUIREMENTS FOR THE MINOR

---

**Language.** All East Asian studies minors are expected to gain proficiency in Chinese or Japanese language. Students with prior knowledge of Chinese or Japanese are required to complete a language placement exam. Instructions for the placement exam can be found on the Languages and Applied Linguistics web site: <http://language.ucsc.edu>. Students without prior

knowledge of Chinese or Japanese should enroll in beginning Chinese (CHIN 1) or Japanese (JAPN 1) no later than fall quarter of the sophomore year. Students may also pursue study abroad opportunities as a way of acquiring Chinese or Japanese language instruction (see below).

All East Asian studies minors are required to complete at least two upper-division courses in Chinese or Japanese language instruction. Additional upper-division offerings in Chinese or Japanese language instruction may be applied to the upper-division electives requirements (see below).

**Core Courses.** One required core course: History 40A, Early Modern East Asia, or History 40B, The Making of Modern East Asia.

**Upper-Division Electives.** Three additional upper-division courses from the East Asian studies curriculum, one of which may be an individual study (course 199).

A minimum of 25 upper-division units must be completed within the East Asian studies minor course requirements.

---

### STUDY ABROAD

---

Because the minor is designed to support the integration of language training with exploration of East Asian societies, we strongly endorse participation in one of the many education abroad programs available for UC students in East Asia where language skills acquired at the university are put to practical use in daily life and research. At present, there are UC education abroad programs in China, Japan, Hong Kong, Korea, and Taiwan. All students interested in studying abroad should meet with the East Asian Studies director prior to their departure. Students who participate in study abroad are required to complete a language placement exam upon their return. Instructions for the placement exam can be found on the Languages and Applied Linguistics web site: <http://language.ucsc.edu>. For more information on the

program, see the UC Education Abroad Program (EAP) web sites: UCSC—<http://ieo.ucsc.edu/programs->

[abroad/index.html](http://ieo.ucsc.edu/programs-), and UC system-wide—<http://eap.ucop.edu/>.

---

## EAST ASIAN STUDIES ASSOCIATED FACULTY

---

**Noriko Aso, Associate Professor of History**

Japanese social, intellectual, and cultural history, material culture, colonialism, nationalism, gender, race and ethnicity

**Dilip Basu, Professor Emeritus of History**

**Raoul Birnbaum, Professor of History of Art and Visual Culture**

Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

**Nancy Chen, Professor of Anthropology**

Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

**Alan Christy, Associate Professor of History**

Early modern and modern Japan; history of social sciences, colonialism, nationalism; Okinawa

**Christopher Connery, Professor of Literature**

World literature and cultural studies; globalism and geographical thought; the 1960s; Marxism; pre-modern and modern Chinese cultural studies; cultural revolution

**Sakae Fujita, Continuing Lecturer of Languages**

Foreign language education, drama in education

**Hiroshi Fukurai, Professor of Sociology**

Citizen participation in law, race and the law, indigenous approach to international law, decolonialism, Japan and East Asia, advanced quantitative methods, survey research

**K.C. Fung, Professor of Economics**

International trade and finance, WTO, foreign direct investment, global environmental economics, and Asia/Pacific economies

**Per Gjerde, Professor Emeritus of Psychology**

**June Gordon, Professor of Education**

Urban education; international comparative education; the impact of economics, culture and politics on educational attitudes and expectations of immigrants; marginalized youth; schooling and society in Japan, China, India, the U.K., and the U.S.A.; sociology of education

**Gail B. Hershatter, Professor of History**

Modern Chinese social and cultural history; labor history; gender history; history of sexuality; feminist theory; history, memory, and nostalgia

**Christine Hong, Assistant Professor of Literature**

Asian American literature and cultural criticism; African American literature and black freedom studies; Korean diasporic cultural production; Pacific Rim studies; postcolonial theory; critical race theory; human rights discourse; law and literature; narrative theory; film and visual studies

**Emily Honig, Professor of History**

Gender, sexuality and ethnicity in modern China; comparative labor and urban history

**Minghui Hu, Associate Professor of History**

Early Modern China (1600–1900)

**Junko Ito, Professor of Linguistics**

Phonology, morphology, Germanic languages, Japanese

**Stacy Kamehiro, Associate Professor of History of Art and Visual Culture**

Visual cultures of Oceania; colonial cultures; visual culture and identity; gender studies; museums and collecting; material culture

**Hi Kyung Kim, Associate Professor of Music**

Composition, theory, contemporary music, analysis, orchestration, Korean music, world music composition, Founder and Artistic Director, Pacific Rim Music Festival

**L.S. Kim, Associate Professor of Film and Digital Media**

Television history and theory, racial discourse, feminist criticism, Asian-American cultural theory and production, industrial practices and social change in both mainstream Hollywood and alternative media

**Paul Lubek, Professor Emeritus of Sociology**

**Boreth Ly, Assistant Professor of History of Art and Visual Culture**

Visual cultures of Southeast Asia and its diaspora: religions and materiality, theory of visual narrative, the politics of cultural translation; (post) colonial and cultural studies; issues of gender, sexuality, race, and trauma

**David Keenan, Continuing Lecturer of Languages**

Chinese language, fiction, and history

**Shigeko Okamoto, Professor of Languages**

Sociolinguistics, discourse analysis, pragmatics, language and gender, foreign language pedagogy, Japanese linguistics

**Benjamin Read, Associate Professor of Politics**

Comparative politics with special interest in the politics of China; theories of associations and social networks; communist and post-communist states; political participation and collective action

**Lisa Rofel, Professor of Anthropology**

Critical theory, anthropology of modernity, popular/public culture, gender and sexuality, queer theory, transnational capitalism, postcolonial and transnational feminism, China

**Dana Y. Takagi, Professor of Sociology**

Social inequality, affect, religion, race, quantitative analysis

**Yiman Wang, Associate Professor of Film and Digital Media**

Theory of difference; film history and theory; colonial/semi-colonial/postcolonial/postsocialist modes of media production and exchange; border-crossing film remakes; silent cinema; translation theory and cinema; acting theory/practice and ethnic star studies with focus on Anna May Wong; transnational connections and ramifications of Chinese cinema and documentary; fan culture; East Asian cinemas

**Rob Wilson, Professor of Literature**

Transnational and postcolonial literatures, especially as located and transformed in Asia/Pacific; cultural-political emergences as posited against empires of globalization; cultural poetics of America in the Pacific and Oceania; the sublime, Longinus to Hiroshima; poetics of experimental writing, especially poetry; the poetry and cultural poetics of Bob Dylan; Beat beatitude, social and literary, from Jesus to Juliana Spahr et al; San Francisco as Global City, with its literature read as archive of vision and critique; Pacific Rim cities from Hong Kong and Seoul to Taipei, Kaohsiung, Shanghai, Honolulu, San Francisco, and Los Angeles

**Karen Yamashita, Professor of Literature**

History and anthropology of Japanese immigration to Brazil; Asian American literature; modern fiction; playwriting

**Alice Yang, Associate Professor of History**

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

# ECONOMICS

---

2015-16 General Catalog

401 Engineering 2

(831) 459-2743

<http://economics.ucsc.edu>

---

## PROGRAM DESCRIPTION

---

An understanding of economics is a vital component of a liberal arts education and a necessity for anyone interested in such areas as business, environmental policy, economic development, immigration, educational reform, international competitiveness and trade, or transformations in the global economy.

The programs offered by the UCSC Economics Department are designed to acquaint students with a broad range of economic issues and with the tools economists use. The department offers the following majors:

- Economics B.A.
- Business management economics B.A.
- Global economics B.A.
- The department also offers the following combined majors:
  - Economics/Mathematics B.A.
  - Environmental studies/Economics B.A.
  - Latin American and Latino studies/Global economics B.A.
- A minor in economics is also available.

The economics curriculum begins at the introductory level; no specific high school preparation is required. All economics majors study a substantial core of economic theory and mathematical and statistical methods, and then choose among a wide variety of upper-division electives.

Economics majors may combine their upper-division elective choices in a variety of ways to achieve specialization in a number of possible areas, including environmental economics, public policy, political economy, international economics, economic development, and quantitative methods.

---

### GENERAL REQUIREMENTS

---

#### QUALIFICATION FOR AN ECONOMICS MAJOR

---

The Economics Department administers four undergraduate majors: economics, business management economics, global economics, and economics/mathematics. The qualification

requirements for major declaration are the same for all four.

Students must take three courses prior to petitioning for entry to an economics major: Economics 1 (Introductory Microeconomics) and Economics 2 (Introductory Macroeconomics) and one of the following calculus courses: Economics/Applied Mathematics and Statistics 11A, Mathematical Methods for Economists; or Mathematics 11A, Calculus with Applications; or Mathematics 19A, Calculus for Science, Engineering, and Mathematics. Students who have a combined grade-point average (GPA) of 2.8 or better in Economics 1, 2, and the first calculus course qualify for the economics major upon applying. Students receiving a grade of NP, C-, D+, D, D-, or F in one of the courses required for admission to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the required courses are not eligible to declare the major. Students are encouraged to apply to the major as soon as they have satisfactorily completed these three courses. Equivalent courses may be taken at other universities or community colleges. Students should check on [assist.org](http://assist.org) to determine whether a transfer course is designated as equivalent to Economics 1, 2 or the first required calculus course. Transfer students are strongly encouraged to ask the department to review such courses prior to matriculation at UCSC, since an offer of admission to UCSC does not automatically imply admission to the economics major.

Students may petition for admission to the major by filling the Petition for Major/Minor Declaration and the UCSC Academic Planning form and by supplying evidence of their grades in the three pre-major courses.

Students who have a GPA lower than 2.8 in Economics 1, 2, and the calculus course are not eligible to declare an economics major. Students who are not eligible to declare the major may appeal this decision by submitting a letter of appeal to the department within 15 days of the denial of the declaration. Within 15 days of the receipt of the appeal, the department will notify

## Economics

the student, college and Office of the Registrar of the decision. Please check the department web site (<http://economics.ucsc.edu>) for further information on declaring a major or appealing ineligibility.

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

### CORE REQUIREMENTS FOR ALL ECONOMICS MAJORS

---

Economics 1 and 2, 11A, 11B, 100A (or 100M), 100B (or 100N), 113, and Applied Mathematics and Statistics 5 or equivalent courses are required for all economics majors and are prerequisites for most upper-division courses. Students are urged to complete these courses as soon as possible. Students who are committed to the major early in their academic career, should plan to complete at least Economics 1, 2, 11A, 11B, and preferably 100A, 100B, and 113 by the end of their sophomore year. Students are also encouraged to choose the letter grade option when taking these courses.

### MATHEMATICS AND STATISTICS CONTENT REQUIREMENT

---

Mathematics: Successful completion of Economics 11A and 11B, also offered as Applied Mathematics and Statistics 11A and 11B, (or equivalent) is required of all economics majors and is prerequisite to Economics 100A (or 100M), 100B (or 100N), and 113. Therefore, students are advised to take Economics 11A and 11B or their equivalent as early as possible in their undergraduate career. Mathematics 11A-B and 22 or 23A, or 19A-B and 22 or 23A, are acceptable equivalents to Economics 11A and 11B. Students may also complete the mathematics requirement by taking Mathematics 11A or Mathematics 19A, and then Economics 11B or Applied Mathematics and Statistics 11B. Students planning to pursue graduate work in economics or business should seriously consider more intensive mathematical training; consult an adviser.

Transfer students interested in the combined Economics/Mathematics major are encouraged to complete as many lower-division (mathematics and statistics) courses as they can prior to transferring. The courses need to be equivalent to Math 19A, 19B, 23A and 23B.

Statistics: Applied Mathematics and Statistics 5, Statistics or

Applied Mathematics and Statistics 7, Statistical Methods for Biological, Environmental and Health Sciences, or

Computer Engineering 7, Statistical Reasoning in the Age of the Internet

### COMPREHENSIVE REQUIREMENT

---

The comprehensive requirement for the economics major and the combined economics/mathematics major is satisfied by passing the following intermediate core courses with grades of C or better here at UCSC: Economics 100A or 100M, and 100B or 100N, and 113. Students may elect to complete a senior thesis with consent of an instructor in addition to completing the intermediate core courses.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

All undergraduate majors must satisfy the campus' Disciplinary Communication (DC) requirement. The DC requirement in economics is satisfied by completing Economics 104, Is There Truth in Numbers: The Role of Statistics in Economics; or Economics 197, Economic Rhetoric. Students in the combined economics/mathematics major may also satisfy the requirement by completing Mathematics 100, Mathematical Proof, and either Mathematics 194, Senior Seminar, or Mathematics 195, Senior Thesis.

### INDEPENDENT STUDY

---

Students are encouraged to petition for independent study on topics of special interest to them. Economics 199, Tutorial, may be used as only one of the upper-division courses required for the major or minor.

### FIELD-STUDY PROGRAM

---

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work. The field-study program places students in internships under the supervision of a faculty sponsor and a professional at the workplace. Students can select from a wide variety of field placements such as accounting firms, community non-profits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply for field study a quarter in advance. Participation in the field-study program requires at least junior standing, completion of courses 100A (or 100M), 100B (or 100N), and 113 as well as good academic standing. Students may earn a maximum of 10 academic credits and complete up to two quarters in a field placement. A field study requires 12 hours per week spent working on internship duties and completion of an academic project supervised by a faculty sponsor. Time spent toward the academic requirements set by the faculty sponsor is not included in the 12 hours spent at the field placement.

## Economics

Along with the training and supervision by a professional at the workplace, students receive guidance from a faculty sponsor who directs their academic project. Students earn credit through the completion of this project and the job supervisor's evaluation of performance. Economics field-study courses (193 and 198) do not satisfy any upper-division requirements for the major and are available as Pass/No Pass only.

Interested students should make an appointment or stop by the Economics Department at 401 Engineering 2; or e-mail [econintern@ucsc.edu](mailto:econintern@ucsc.edu). Web address: <http://economics.ucsc.edu>

---

### TRANSFER STUDENTS

---

A student transferring to UCSC may fulfill some of the requirements for the major by completing equivalent courses, with a grade of C or better, at another recognized institution. Please refer to the section on Admission to the Major and Minor for specific admission requirements for the Economics majors.

Students should check on [assist.org](http://assist.org) for already established equivalency agreements between UC and the California community colleges. For courses not already articulated through [assist.org](http://assist.org), transfer students must present their Transfer Credit Summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements.

All transfer students must complete the three-course senior comprehensive requirement (and the DC requirement as stated previously) at UCSC. Economics and global economics majors must take at least two of their upper-division economics electives at UCSC. Business management economics majors must take at least three of their upper-division economics electives at UCSC, one of which must be 101, 133, or 135. Courses taken for credit elsewhere may not be repeated for credit here.

---

### COMBINED MAJORS

---

The Economics Department offers the following combined majors: [economics/mathematics](#) and [environmental studies/economics](#). Requirements for these majors may be reviewed under their separate entries in this catalog.

---

### PROGRAM LEARNING OUTCOMES

---

Program learning outcomes for economics, economics and mathematics, business management economics, and global economics majors:

1. **Critical Thinking Skills:** Students are expected to be able to apply economic analysis to everyday problems in real world situations, to understand current events and evaluate specific policy proposals, and to evaluate the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.
2. **Quantitative Reasoning Skills:** Students are expected to understand how to use empirical evidence to evaluate the validity of an economic argument, use statistical methodology, interpret statistical results, and conduct appropriate statistical analysis of data.
3. **Problem-Solving Skills:** Students are expected to be able to solve problems that have clear solutions and to address problems that do not have clear answers and explain conditions under which these solutions may be correct.
4. **Specialized Knowledge and Application of Skills:** Students are expected to develop critical and quantitative thinking skills specific to business and accounting.
5. **Communication Skills:** Students are expected to be able to communicate effectively in written, oral, and graphical form about specific issues, and to formulate well-organized written arguments that state assumptions and hypotheses supported by evidence.

---

### ECONOMICS PROGRAM DESCRIPTION

---

Economics studies how individuals, firms, governments, and other organizations within our society make choices, and how these choices affect the society's use of its available resources. Economists study a wide range of questions such as: How do individuals make decisions in the face of uncertainty? What are the causes of the Great Recession of 2009? Why do Europeans work fewer hours than Americans? Why have health care and education costs risen so much? What are the consequences of government deficits? Why has the gap between rich and poor in many countries risen? Why have some poor countries grown faster than many rich countries in recent years? Economics majors study a substantive core of theory and mathematical and statistical methods that aid in addressing these questions. This required core can be combined with electives that emphasize specialized areas such as international economics, finance, public policy, applied microeconomics, law and economics, economic development, quantitative methods, macroeconomics, game theory and behavioral

## Economics

economics. A focus on core theory as well as mathematical and quantitative tools provides a foundation for graduate studies in economics. Selecting a range of electives to sample the broad domain of economics offers an excellent background for students who plan to enter careers in the private sector, in public service, the non-profit sector or to attend law school or other professional schools.

### ECONOMICS MAJOR REQUIREMENTS

Students who major in economics are required to take the following courses:

1, Introductory Microeconomics: Resource Allocation and Market Structure

2, Introductory Macroeconomics: Aggregate Economic Activity

11A, Mathematical Methods for Economists I (or equivalent)

11B, Mathematical Methods for Economists II (or equivalent)

100A, or 100M Intermediate Microeconomics

100B, or 100N Intermediate Macroeconomics

113, Introduction to Econometrics

197, Economic Rhetoric or Economics 104, Is There Truth in Numbers: The Role of Statistics in Economics

Applied Mathematics and Statistics 5 Statistics or Applied Mathematics and Statistics 7/L Statistical Methods for the Biological, Environmental, and Health Sciences;

and four additional upper-division economics courses, at least three of which must be selected from the following:

105, Macroeconomic Theory

114, Advanced Quantitative Methods

120, Economic Development

121, Economic Growth

125, Economic History of the U.S.

126, Why Economies Succeed or Fail

128, Poverty and Public Policy

130, Money and Banking

\*131, International Financial Markets

\*133, Security Markets and Financial Institutions

\*135, Corporate Finance

137, Performing Arts in the Public and Private Economy

140, International Trade

141, International Finance

142, Advanced Topics in International Finance

143, Policy Issues in the International Economy

148, Latin American Economies

149, The Economies of East and Southeast Asia

150, Public Finance

156, Health Care and Medical Economics

159, The Economics of Organizations

160A, Industrial Organization

160B, Government and Industry

165, Economics as an Experimental Science

166A, Game Theory and Applications I

166B, Game Theory and Applications II

169, Economic Analysis of the Law

170, Environmental Economics

171, Natural Resource Economics

175, Energy Economics

180, Labor Economics

183, Women in the Economy

184, Labor Wars in Theory and Film

185, The Value and Support of the Arts: Challenges and Opportunities in American Society

189, Political Economy of Capitalism

190, Senior Proseminar

\* Students can count **one** of these three courses toward the minimum of four economics electives.

Courses 191, 192, 193, 193F, 198, and 198F may not be used to meet major requirements. Either course 195 or 199 may be used to fill one of the four upper-division elective major requirements. Other electives are listed under the Business Management Economics program description.

### MINOR REQUIREMENTS

Students earn a minor in economics by completing the following requirements:

ECON 1, Introductory Microeconomics: Resource Allocation and Market Structure

ECON 2 Introductory Macroeconomics: Aggregate Economic Activity

ECON/AMS 11A, Mathematical Methods for Economists I

ECON/AMS 11B, Mathematical Methods for Economists II

Applied Mathematics and Statistics 5, Statistics; or Applied Mathematics and Statistics 7/L, Statistical Methods for the Biological, Environmental, and Health Sciences; or Computer Engineering 7, Statistical Reasoning in the Age of the Internet

## Economics

ECON 100A/ 100M Intermediate Microeconomics

ECON 100B/100N Intermediate Macroeconomics

ECON 113 Introduction to Econometrics

Three additional upper-division economics electives.

Economics 191, 192, 193, 193F, 198, and 198F may not be used to meet minor requirements.

---

### BUSINESS MANAGEMENT ECONOMICS PROGRAM DESCRIPTION

---

The business management economics major provides students who are interested in careers in business or management with a foundation in economics and a selection of applied fields related to business management. Particular areas of strength of the program are accounting, finance, and technology management. This course of study prepares students for entrance into the business world or admission to graduate programs—either the master’s program in applied economics and finance at UCSC or graduate programs in business and management at other universities.

The program provides a business and management education embedded within a broader economics and liberal arts context and is closely related to the economics and global economics majors and the technology and information management major.

This major has several important elements. First, it combines the strong analytic approach of economics with the technical aspects of management. Second, it recognizes that computing is intrinsic to business and is an essential skill for those who wish to enter this field. Students in this major gain knowledge about using computing as a tool of analysis for economic, statistical, and financial data. Third, the major offers field placements (arranged with the economics advisers) which provide an excellent way to apply students’ academic knowledge of economics, business, and management to issues and problems in the real world; they provide marketable skills as well as important job contacts.

In cooperation with the UC Education Abroad Program (EAP), opportunities are available for students to take some business courses (taught in English) in Europe, Mexico, and Hong Kong. Students should ask the Economics Department for additional information about these programs.

Students who are committed to the major early in their academic career should plan to complete Economics 1, 2, 10A, 10B, 11A, 11B and preferably 100A, 100B, and 113 no later than the end of their sophomore year.

## BUSINESS MANAGEMENT ECONOMICS MAJOR REQUIREMENTS

---

**Introductory and core requirements.** Students who major in business management economics are required to take the following courses:

1, Introductory Microeconomics: Resource Allocation and Market Structure

2, Introductory Macroeconomics: Aggregate Economic Activity

10A, Economics of Accounting (or equivalent, see under General Requirements)

10B, Economics of Accounting (or equivalent, see under General Requirements)

11A, Mathematical Methods for Economists I (or equivalent)

11B, Mathematical Methods for Economists II (or equivalent)

100A or 100M, Intermediate Microeconomics

100B or 100N, Intermediate Macroeconomics

113, Introduction to Econometrics

197, Economic Rhetoric; or ECON 104, Is There Truth in Numbers: The Role of Statistics in Economics

Applied Mathematics and Statistics 5, Statistics; or Applied Mathematics and Statistics 7/L, Statistical Methods for the Biological, Environmental, and Health Sciences; or Computer Engineering 7, Statistical Reasoning in the Age of the Internet

**Computer literacy requirement.** Students must complete a minimum of two courses from the following list (with department approval, a student may substitute other computing courses):

#### Computer Engineering

12/L, Computer Systems and Assembly Language

80N, Introduction to Networking and the Internet

#### Computer Science

10, Introduction to Computer Science

12A/L, Introduction to Programming

5C, Introduction to Programming in C++ (formerly CMPS 60 N)

5J, Introduction to Programming in Java (formerly CMPS 60 G)

5P, Introduction to Programming in Python

80B, Systems and Simulation

#### Technology and Information Management

50, Business Information Systems

58, Systems Analysis and Design

## Economics

### Economics

216, Applied Econometric Analysis I (with permission of instructor)

**Note:** Students with no prior programming experience are encouraged to take Computer Science 5J and Computer Science 10 rather than Computer Science 12A/L.

**Upper-division electives.** Students are required to take five additional courses: four in business management and one other economics elective. Students must choose four courses from the following list; at least one of the four must be a course designated with an asterisk (\*).

\*101, Managerial Economics

110, Managerial Cost Accounting and Control

111A, Intermediate Accounting I

111B, Intermediate Accounting II

112, Auditing and Attestation

115, Introduction to Management Sciences

117A, Tax Factors for Individuals

117B, Tax Factors for Business and Investment

119, Advanced Accounting

131, International Financial Markets

\*133, Security Markets and Financial Institutions

\*135, Corporate Finance

136, Business Strategy

138, The Economics and Management of Technology and Innovation

139A, Economics of Electronic Commerce

139B, E-Commerce Strategy

#159, The Economics of Organizations

#160A, Industrial Organization

#160B, Government and Industry

161A, Marketing

161B, Marketing Research

164, Economics and the Telecommunications Industry

188, Management in the Global Economy

194, Advanced Topics in Management

# Students can use **one** of these courses as either a business management elective or an economics elective, but the course cannot be counted twice.

Students must choose the remaining one course from the upper-division economics electives listed for the economics major (see preceding page).

Courses 191, 192, 193, 193F, 198, and 198F may not be used to meet major requirements. Either course 195 or

199 may be used to fill one of the five elective upper-division major requirements.

**Field study.** One quarter of field study is strongly recommended. Placements and credit for course 193 or 198 are arranged through the economics field-study coordinator. See above under Field-Study Program description.

---

## GLOBAL ECONOMICS PROGRAM DESCRIPTION

---

Global economics is an interdisciplinary major designed to prepare students to participate in the global economy; the program aims to deepen the student's knowledge of economics within a culturally and linguistically diverse world. The major is particularly useful to students contemplating careers at home or overseas in international relations, in international business, or with international organizations. Hence the major requires overseas study, regional area study, and second-language proficiency in addition to the basic economics requirements.

---

## GLOBAL ECONOMICS MAJOR REQUIREMENTS

---

**Introductory and core requirements.** Students who major in global economics are required to take the following courses:

1, Introductory Microeconomics: Resource Allocation and Market Structure

2, Introductory Macroeconomics: Aggregate Economic Activity

11A, Mathematical Methods for Economists (or equivalent)

11B, Mathematical Methods for Economists (or equivalent)

100A or 100M, Intermediate Microeconomics

100B or 100N, Intermediate Macroeconomics

113, Introduction to Econometrics

197, Economic Rhetoric or Economics 104, Is There Truth in Numbers: The Role of Statistics in Economics Applied Mathematics and Statistics 5, Statistics; or Applied Mathematics and Statistics 7/L, Statistical Methods for the Biological, Environmental, and Health Sciences; or Computer Engineering 7, Statistical Reasoning in the Age of the Internet

Students are strongly recommended to complete courses 100A (or 100M), 100B (or 100N), and 113 prior to study abroad. In addition, majors must have language study, area study, and overseas study, as described below.

Courses 191, 192, 193, 193F, 198 and 198F may not be used to meet major requirements. Either course 195 or

## Economics

199 may be used to fill one of the four elective upper-division major requirements.

**Upper-division requirements.** Four additional upper-division courses are required. Please see the entire economics course list. These may include approved courses offered by other departments.

At least one of the four courses must be selected from the following three:

120, Economic Development

140, International Trade

141, International Finance

In addition, at least one course must be chosen from the following departmental listings:

### Economics

120, Economic Development

121, Economic Growth

126, Why Economies Succeed or Fail: Lessons from Western and Japanese History

131, International Financial Markets

140, International Trade

141, International Finance

142, Advanced Topics in International Economics

143, Policy Issues in the International Economy

148, Latin American Economies

149, The Economies of East and Southeast Asia

188, Management in the Global Economy

The other two required electives may be chosen from any upper-division economics courses.

The global economics major has three additional elements:

1. **Foreign Language Study:** The global economics major requires a foreign language since students who plan to work in the larger world must have fluency in a language other than English. This language should be relevant to their regional area of interest. Students can meet this requirement by completing two years of university-level language courses or by demonstrating an equivalent level of competence through a recognized language test.
2. **Area Study:** The major requires students to take two additional courses selected from the offerings of departments other than economics in order to learn about the history, political economy, or culture of some other part of the world. These can be lower- or upper-division courses; the courses should focus on the area of the student's language study and overseas study. The Economics Department provides a list of approved courses;

substitute courses are welcomed when they are part of the student's overseas program or from other UCSC departments, but must be approved by the adviser for the global economics major.

3. **Study Abroad:** All students are required to spend at least one term abroad in an approved course of study in their regional area of concentration; students may also choose a year-long program. Typically, a student will do this through the UC Education Abroad Program (EAP). Numerous overseas study sites are available through EAP. Students desiring to fulfill their required study abroad through EAP must apply directly to the EAP office for the selected program and are subject to the admission requirements determined by UC EAP. In countries and at universities where EAP programs are not available, students may make their own arrangements for study with the permission of the director of the program. Students may use the time abroad to further their language study, to meet the area study course requirements, to meet some of the upper-division economics course requirements, or to take courses unrelated to the major. Students who are not accepted to an overseas program or who cannot meet the language or area course requirements are advised to complete the general economics major as an alternative.

---

## COMBINED ECONOMICS/MATHEMATICS PROGRAM DESCRIPTION

---

The major in Economics and Mathematics is designed to meet the needs of undergraduate students who plan to pursue doctoral study in economics or business, or who wish to pursue a career as an actuary or other professional requiring a sophisticated understanding of economics and mathematics. The major combines the main undergraduate content of both Economics and Mathematics within a programmatic structure that joins the two disciplines. It provides a coursework combination required to prepare for an economics doctoral (Ph.D.) program, or for a group of technically demanding professional careers.

## Economics

### ECONOMICS/MATHEMATICS MAJOR REQUIREMENTS

---

#### **Economics Required Courses**

- 1, Introductory Microeconomics: Resource Allocation and Market Structure
- 2, Introductory Macroeconomics: Aggregate Economic Activity
- 100A or 100M, Intermediate Microeconomics
- 100B or 100N, Intermediate Macroeconomics
- 113, Introduction to Econometrics

**DC requirement** (see statement under [General Requirements](#))

Applied Mathematics and Statistics 5, Statistics; or Applied Mathematics and Statistics 7/L, Statistical Methods for the Biological, Environmental, and Health Sciences; or Computer Engineering 7, Statistical Reasoning in the Age of the Internet

#### **Economics elective courses**

(choose three from the following list)

- 101, Managerial Economics
- 114, Advanced Quantitative Methods
- 115, Introduction to Management Sciences
- 120, Economic Development
- 121, Economic Growth
- 125, Economic History of the U.S.
- 126, Why Economies Succeed or Fail
- 128, Poverty and Public Policy
- 130, Money and Banking
- 131, International Financial Markets
- 133, Security Markets and Financial Institutions
- 135, Corporate Finance
- 136, Business Strategy
- 137, Performing Arts in the Public and Private Economy
- 138, Economics and Management of Technology and Innovation
- 139A, Economics of Electronic Commerce
- 139B, E-Commerce Strategy
- 140, International Trade
- 141, International Finance
- 142, Advanced Topics in International Finance
- 148, Latin American Economies
- 149, The Economies of East and Southeast Asia
- 150, Public Finance
- 156, Health Care and Medical Economics
- 159, The Economics of Organizations

- 160A, Industrial Organization
- 161A, Marketing
- 164, Economics and the Telecommunications Industry
- 165, Economics as an Experimental Science
- 166A, Game Theory and Applications I
- 166B, Game Theory and Applications II
- 169, Economic Analysis of the Law
- 170, Environmental Economics
- 171, Natural Resource Economics
- 175, Energy Economics
- 180, Labor Economics
- 183, Women in the Economy
- 184, Labor Wars in Theory and Film
- 188, Management in the Global Economy
- 189, Political Economy of Capitalism

#### **Mathematics Required Courses**

- Mathematics 19A, Calculus for Science, Engineering, and Mathematics
- Mathematics 19B, Calculus for Science, Engineering, and Mathematics
- Mathematics 21, Linear Algebra
- Mathematics 22, Calculus of Several Variables or 23A and 23B, Multivariable Calculus
- Mathematics 100, Mathematical Proof
- Mathematics 105A, Real Analysis

#### **Mathematics electives**

(choose two from the following list)

- Mathematics 105B, Real Analysis
- Mathematics 106, Systems of Ordinary Differential Equations
- Mathematics 107, Partial Differential Equations
- Mathematics 114, Introduction to Financial Mathematics
- Mathematics 117, Advanced Linear Algebra
- Mathematics 142, Introduction to Topology
- Mathematics 145/L, Chaos Theory
- Mathematics 194, Senior Seminar
- Mathematics 195, Senior Thesis
- Applied Mathematics and Statistics 114, Introduction to Dynamical Systems
- Applied Mathematics and Statistics 131, Introduction to Probability Theory
- Applied Mathematics and Statistics 132, Statistical Inference

## Economics

Applied Mathematics and Statistics 147, Computational Methods and Applications

\*Students in the combined economics/mathematics major may also satisfy the DC requirement by completing Mathematics 100, Mathematical Proof, and either Mathematics 194, Senior Seminar; or Mathematics 195, Senior Thesis

---

### ADDITIONAL PREPARATION FOR THE MAJOR

---

Students interested in the combined major must meet a minimum GPA requirement in Economics 1 and 2 (and the first calculus course). Transfer students should check [assist.org](http://assist.org) for agreements with California community colleges about economics and mathematics courses. Students who have met all articulations before transferring will need at least six economics and four to five mathematics classes at UCSC to complete the major.

---

### HONORS IN THE MAJOR

---

The Economics Department considers for honors and highest honors students who have completed a major program with superior or exceptional work. Honors decisions are made by the department's Honors and Scholarship Committee.

At the end of each quarter, faculty teaching the upper-division core courses submit to the department a list of students in their respective classes whose performance is at the honors level. At the time of graduation, all students who received an honors designation in one or more of these courses are reviewed by the department's honor committee. The faculty committee looks for a record of excellence in courses offered towards the major, with a strong performance in the upper-division core (theory and econometrics—courses 100A/M, 100B/N, and 113) being a necessary condition for honors. Although a GPA is not computed for the economics courses, in general highest honors are awarded to students who have received a grade of at least an "A" throughout their economics program. Honors are awarded to students who have no more than two courses with grades of less than an "A-." Students who have completed a portion of the major at another institution may be asked to submit a transcript for evaluation.

Students interested in being reviewed for honors may request that the department conduct a review, and such requests are always granted.

In general, honors have been awarded to between 10 and 15 percent of each year's graduating class.

---

## GRADUATE PROGRAMS

---

### MASTER'S PROGRAM IN APPLIED ECONOMICS AND FINANCE

---

The master of science (M.S.) program in applied economics and finance is designed for students who want analytical graduate training that prepares them for careers in business, government, international and domestic banking, consulting firms, and nonprofit organizations. The program is unique in its focus on graduate-level economics training for practical applications and its emphasis on communication skills. The curriculum stresses the application of microeconomic and macroeconomic concepts, statistical techniques, finding and using data sources, working out substantial practical applications, developing writing and reporting skills, and presenting material orally before an audience. The program differs from typical master of business administration (M.B.A.) programs by preparing students to meet the increasing technical demands of private- and public-sector employers through comprehensive coursework in economic analysis.

Past graduates of this program have gone on to successful careers in the private and public sectors with placements at a diverse range of companies and institutions, including Cisco Systems, Seagate Technology, Google, Sony Computer Entertainment, Plantronics, Wells Fargo, all of the big four accounting firms, McKesson Corp., Pepsi Corp., Visa, Square Trade, the California Franchise Tax Board, Guardian News (U.K.), Blue Cross, the World Bank, Stanford University, and the Bank of Japan. Other graduates have gone on to earn Ph.D.s in economics.

## Economics

### Courses and Program Requirements

M.S. students are required to take the following classes starting in the fall quarter of the academic year they enroll in the program. Students may also take additional classes if they desire.

<b>Courses and Program Requirements</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
200 Microeconomic Analysis	217 Applied Econometric Analysis II	201 Applications Microeconomics
202 Macroeconomic Analysis	233 Finance	236 Financial Engineering
216 Applied Econometric Analysis	Master's elective	Master's elective
294A Applied Economics Lab	294A Applied Economics Lab	294B Applied Economics Seminar
*186 Math Methods for Economic Analysis	294B Applied Economics Seminar	

\*Note: M.S. students are strongly encouraged to enroll in Econ 186, a pre-fall math course, which is highly beneficial to students' success in the program. Econ 186 is offered as an accelerated short course before the start of fall quarter.

## Economics

### Electives

Students may satisfy the elective requirements by taking approved courses within the Economics Department or from another discipline. The department has assembled a list of pre-approved masters electives (curricular offerings are subject to change annually). Students will need to file a departmental petition for review and approval of courses that are not on the pre-approved elective list.

#### Pre-Approved M.S. Electives

Department	Winter		Spring	
Economics	Econ 188: Management in the Global Economy		Econ 211C: PhD Time Series	with permission of instructor
	Econ 209B: Accounting II	Must have prior accounting coursework	Econ 220: PhD Development Economics	with permission of instructor
			Econ 250: PhD Public Economics	with permission of instructor
Applied Mathematics and Statistics	AMS 206: Classical and Bayesian Inference		AMS 207: Intermediate Bayesian Statistical Modeling	
	AMS 206B: Intermediate Bayesian Inference		AMS 245: Spatial Statistics	
	AMS 216: Stochastic Differential Equations		AMS 256: Linear Statistical Models	
Environmental Studies	ENVS 140: National Environmental Policy			
Computer Science	CMPS 101: Algorithms and Abstract Data Types		CMPS 101: Algorithms and Abstract Data Types	
	CMPS 102: Introduction to Analysis of Algorithms		CMPS 102: Introduction to Analysis of Algorithms	
	CMPS 109: Advanced Programming	with permission of instructor	CMPS 109: Advanced Programming	with permission of instructor

## Economics

Department	Winter		Spring	
	CMPS 201: Analysis of Algorithms	with permission of instructor	CMPS 142: Machine Learning and Data Mining	with permission of instructor
	CMPS 211: Combinatorial Algorithms	with permission of instructor	CMPS 182: Introduction to Database Management Systems	
Technology Management	TM 225: Management of Technology	with permission of instructor	TM 207 Random Process Models in Engineering	with permission of instructor
			TM 211 E-Business Technology and Strategy	with permission of instructor
			TM 245 Data Mining	with permission of instructor
			TM 260 Information Retrieval	with permission of instructor

Upon successful completion of these classes, master's students must either pass a comprehensive examination or complete a final paper. The final paper alternative is only available via petition

### PH.D. PROGRAM IN ECONOMICS

The Ph.D. program in economics provides students with training in modern microeconomics, macroeconomics, and econometrics, combined with specialized training in the fields of international finance, international trade, economic development, monetary economics, applied microeconomics, experimental economics, and other areas. Graduates of the program have conducted research on a wide variety of topics; examples include international economics, monetary economics, experimental economics, environmental economics, and economic growth and development.

#### Courses and Program Requirements

First-year Ph.D. students are required to take the three sequences: Economics 204A-B-C, Advanced Micro Theory, Economics 205A-B-C, Advanced Macro Theory, and Economics 211A-B-C, Advanced Econometrics. In late June each year, first-year students take two written preliminary exams; one each in Micro and Macro. First-year students must also write an econometrics paper

and submit it to the department by September 30 (beginning) of the second year.

Ph.D. students are required to complete two field sequences, and take 40 units of coursework in the second year. Only two courses per topic are needed to satisfy one sequence. Students may choose one of the following sequences: Economics 240A-B-C, Adv. International Trade, Economics 241A-B-C, Adv. International Finance, Economics 220A-B, Development Economics, Economics 221A-B, Monetary Economics, and Economics 270 or 273, Applied Microeconomics. At the end of their second year, students are required to submit a field paper.

Third-year Ph.D. students must enroll in a workshop focused on advanced topics in their field of interest: Economics 274, Workshop in Macroeconomics; Economics 275, Workshop in Microeconomics; Economics 276, Workshop in Experimental Economics. In addition, students enroll in Economics 295 A-B-C, Directed Reading under their advisor and the Third Year Seminar, Economics 296 A-B-C.

## Economics

In their fourth and fifth years, students are focused on their dissertation research and enroll in either or both Economics 297A-B-C, Independent Study, and/or Economics 298 Dissertation Research.

### Courses and Program Requirements

Year	Fall	Winter	Spring
1st	204A Advanced Micro Theory	204B Advanced Micro Theory	204C Advanced Micro Theory

\*ECON 243 is not required, but Ph.D. students are encouraged to enroll in the course when it is offered.

\*\*Not all field sequences are necessarily offered every year.

+Enrollment in Economics 274, 275, 276 is based on student interest.

Based on university policy, course requirements are satisfied by a letter grade of B or better or a grade of S (satisfactory). A letter grade of C in a course is not satisfactory for meeting a course requirement for the Ph.D. program.

### Preliminary Requirements

Preliminary examinations are given in two parts: one test in micro theory and one test in macro theory. Students are expected to pass both examinations before the beginning of their second year. Preliminary examinations are currently offered in June and September, although scheduling is subject to change.

In the fall quarter of the second year, each student must enroll in Economics 212. An econometrics paper is due September 30 (beginning) of the second year. A field paper is due August 31 (beginning) of the third year of the program. The graduate handbook of the department details the evaluation procedure for the econometrics and the field papers.

Students who do not pass both preliminary examinations, the econometrics paper, and the field

## Economics

paper requirements will not be allowed to continue in the Ph.D. program.

### Qualifying Examination

---

Advancement to candidacy for the Ph.D. degree requires completion with satisfactory grades or better of the required coursework, preliminary examinations, the econometrics paper, the field paper, and the oral examination. The oral examination is taken after all other requirements have been completed. A student cannot advance to candidacy before clearing any incomplete grades from their record. Students are

expected to complete the oral qualifying examination (QE) during the fall quarter of their third year.

### Dissertation

---

The final requirement for the Ph.D. degree is acceptance of the student's dissertation under the rules of the Academic Senate. A three-member dissertation advisory committee, headed by the student's research adviser, evaluates the dissertation for the department. The dissertation advisory committee must be approved by both the Economics Ph.D. Committee and the Graduate Division. The committee may require a formal public defense of the dissertation.

---

## ECONOMICS FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**Carlos E. Dobkin**

Public health, public policy, and econometrics

**Robert W. Fairlie**

Labor economics, entrepreneurship, education, applied econometrics

**Daniel Friedman**

Microeconomic theory, experimental/behavioral economics, evolution and learning, financial markets

**K.C. Fung**

International trade and finance, WTO, foreign direct investment, global environmental economics, and Asia/Pacific economies

**Michael M. Hutchison**

International finance, open economy macroeconomics, emerging markets, European and Asian economies

**Kenneth Kletzer**

International economics, macroeconomics, economic development

**Nirvikar Singh**

Industrial organization, political economy, economic development, technology and innovation, South Asian immigrants in the U.S., Indian economy, Sikhs and the Punjab

**Carl E. Walsh**

Monetary theory and policy, macroeconomics

**Donald A. Wittman**

Economic theory, politics, law

### ASSOCIATE PROFESSOR

---

**Justin G. Marion**

Public economics, empirical industrial organization

**Jonathan Robinson**

Development economics, program evaluation and applied microeconomics

**Alan Spearot**

International trade; industrial organization, applied econometrics

**Assistant Professor****Eric Aldrich**

Financial econometrics, finance, computational economics and macroeconomics

**George Bulman**

Applied public and labor, economics of education

**Weishi Gu**

Macroeconomics, international economics, labor economics and computational economics

**Natalia Lazzati**

Microeconomic theory, industrial organization, econometrics, experimental economics

**Kristian Lopez-Vargas**

Behavioral economics, experimental economics, microeconomic theory

**Hikaru Saijo**

Macroeconomics, applied econometrics

**Ajay Shenoy**

Development economics, economic growth, macroeconomics, political economy

### LECTURER

---

**James Costain**

Macroeconomics, monetary economics, labor markets, game theory

**Julie Hupton Gonzalez**

Environmental economics and policy, natural resource economics and policy, microeconomics, energy economics, managerial economics

## Economics

### **Mallory McWilliams**

Financial accounting, managerial accounting, cost accounting, accounting information systems, advanced accounting and non-profit accounting

### **Kai Pommerenke**

Entrepreneurship and e-commerce; corporate finance, investments, financial engineering, and Chartered Financial Analyst examination

EMERITI

---

**Robert F. Adams, Emeritus**

**Joshua Aizenman, Emeritus**

**Yin-Wong Cheung, Emeritus**

**Michael P. Dooley, Emeritus**

**Bernard Elbaum, Emeritus**

**Mary Flannery, Emerita Lecturer**

**Ronald E. Grieson, Emeritus**

**John W. Isbister, Emeritus**

**David E. Kaun, Emeritus**

**Lori G. Kletzer, Emerita**

**Jacob B. Michaelsen, Emeritus**

**Peggy B. Musgrave, Emerita**

**Robert J. Shepherd, Emeritus Senior Lecturer**

**Gregory Laughlin, Professor of Astronomy and Astrophysics**

Extra-solar planets, numerical astrophysics, astrophysical phenomena of the extremely distant future

**Adam Millard-Ball, Assistant Professor of Environmental Studies**

Transportation planning and policy, environmental economics, urban sustainability, climate change policy

**John T. Musacchio, Associate Professor of Information Systems Management**

Control, analysis, and pricing of communications networks; applications of game theory in networking; wireless ad-hoc networks; and management of technology

**Yi Zhang, Associate Professor of Technology and Information Management**

Information retrieval, knowledge management, natural language processing, machine learning

---

## ECONOMICS COURSES

---

### LOWER-DIVISION COURSES

#### **1. Introductory Microeconomics: Resource Allocation and Market Structure. F,W,S**

For all interested students as well as prospective economics majors. Examines how markets allocate resources in different kinds of economies. Topics include competitive markets, monopoly, financial markets, income distribution, market failures, the environment, and the role of government. (General Education Code(s): PE-H, IS.) The Staff

#### **2. Introductory Macroeconomics: Aggregate Economic Activity. F,W,S**

For all interested students and prospective economics majors. Examines how the overall level of national economic activity is determined, including output, employment, and inflation. Explores the roles of monetary and fiscal

policies in stabilizing the economy and promoting growth, with a focus on contemporary policy debates. (General Education Code(s): PE-H, IS.) The Staff

#### **10A. Economics of Accounting. F,W**

Introduction to accounting principles and practice; preparation and analysis of financial statements; study of internal control procedures. Courses 10A and 10B satisfy the Accounting 1A-B requirement at UC Berkeley. The Staff

#### **10B. Economics of Accounting. W,S**

Managerial accounting emphasizing analysis and control; accounting for corporations; introduction to taxation, budgeting, and equity/debt financing; management decision making. Courses 10A and 10B satisfy the Accounting 1A-B

requirement at UC Berkeley. Prerequisite(s): course 10A. The Staff

#### **11A. Mathematical Methods for Economists I. F,W,S**

Introduction to mathematical tools and reasoning, with applications to economics. Topics are drawn from differential calculus in one variable and include limits, continuity, differentiation, elasticity, Taylor polynomials, and optimization. Students cannot receive credit for both this course and Mathematics 11A or 19A or Applied Mathematics and Statistics 15A. (Also offered as Applied Mathematics and Statistics 11A. Students cannot receive credit for both courses.) (Also offered as Applied Math and Statistics 11A. Students cannot receive credit for both courses.) Students who have already taken Mathematics 11A or 19A should not take this course. Prerequisite(s): score of 300 or

## Economics

higher on the mathematics placement examination (MPE), Applied Math and Statistics 2, 3, or 6, or Mathematics 3. (General Education Code(s): MF, IN, Q.) The Staff

### **11B. Mathematical Methods for Economists II. F,W,S**

Mathematical tools and reasoning, with applications to economics. Topics are drawn from multivariable differential calculus and single variable integral calculus, and include partial derivatives, linear and quadratic approximation, optimization with and without constraints, Lagrange multipliers, definite and indefinite integrals, and elementary differential equations. Students cannot receive credit for both this course and Mathematics 11B or 19B or Applied Math and Statistics 15B. (Also offered as Applied Math and Statistics 11B. Students cannot receive credit for both courses.) Prerequisite(s): course 11A, or Applied Mathematics and Statistics 11A, or Mathematics 11A, or Mathematics 19A. (General Education Code(s): MF, IN, Q.) The Staff

### **30. Introduction to Entrepreneurship. S**

Provides an overview of the role and importance of entrepreneurship in the economy and society; a framework for approaching entrepreneurship and innovation; and exposure to the core competencies required of all entrepreneurs. The course incorporates case studies and speakers (often actual entrepreneurs) to provide context for the entrepreneurial topics covered in the course. The Staff

**42. Student-Directed Seminar. \***  
Seminars taught by upper-division students under faculty supervision. (See course 192.) The Staff

### **80A. The Theory, Hope, and Crisis of Capitalism.**

Assessment of modern-day capitalism from the three major economic paradigms-liberal, conservative, radical. Theories of Smith, Marx, and Keynes are explored in contemporary writing, with focus on the U.S. from WW II to present. Students cannot receive credit for this course and course 189. (General Education Code(s): T3-Social Sciences.) D. Kaun  
**80G. Money and the Arts: Two All-Consuming Passions. F**  
Analysis of the performing arts: a commodity providing a rich and varied source of satisfaction, an occupation for thousands of talented and creative individuals, and an activity whose funding (public versus private) is the source of significant controversy. Students cannot receive credit for this course and course 137. (General Education Code(s): T3-Social Sciences.) D. Kaun

### **80H. Wall Street and the Money Game. \***

Provides a demystifying introduction to financial markets. Examines the theory of stock market investment, the workings of the international money market, the implications of corporate takeovers, and the regulation of the economy by the Federal Reserve Board. (General Education Code(s): T3-Social Sciences.) The Staff

### **93. Field Study. F,W,S**

Supervised fieldwork experience, off campus, in an area connected with economics or business. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **93F. Field Study (2 credits). F,W,S**

Supervised off-campus fieldwork experience in an area connected

with economics or business. Prerequisite(s): permission of instructor; students submit petition to sponsoring agency. The Staff

### **99. Tutorial. F,W,S**

May be repeated for credit. The Staff

## UPPER-DIVISION COURSES

### **100A. Intermediate Microeconomics. F,W,S**

Covers major theoretical issues arising in the study of resource allocation, the function of markets, consumer behavior, and the determination of price, output, and profits in competitive, monopolistic, and oligopolistic market structures. Also considers issues of welfare and public policy. Students cannot receive credit for this course and course 100M. Prerequisite(s): courses 1; 2; and 11B or Applied Mathematics and Statistics 11B or Mathematics 22 or 23A. The Staff

### **100B. Intermediate Macroeconomics. F,W,S**

Covers major theoretical issues arising in the study of income, employment, interest rates, and the price level. Examines the role of monetary and fiscal policy in economic stabilization. Also considers these issues as they relate to the global economy. Students cannot receive credit for this course and course 100N. Prerequisite(s): courses 1; 2; and 11B or Applied Mathematics and Statistics 11B or Mathematics 22 or 23A. The Staff

### **100M. Intermediate Microeconomics, Math Intensive. \***

Mathematically sophisticated version of course 100A. Provides analytically rigorous treatment of the subject using a calculus-intensive presentation of microeconomic theory. For specific topics, see course 100A. Students cannot receive credit for this course

## Economics

and course 100A. Prerequisite(s): courses 1; 2; and 11B or Applied Mathematics and Statistics 11B, or Mathematics 22 or 23A. The Staff

### **100N. Intermediate Macroeconomics, Math Intensive.**

\*  
Provides rigorous, mathematical-intensive treatment of topics covered in course 100B. Core is devoted to model-based analysis of questions in macroeconomics. Use of mathematical tools allows study of advanced topics and data-intensive applications. See course 100B for specific topics. Students cannot receive credit for this course and course 100B. Prerequisite(s): courses 1; 2; and 11B or Applied Mathematics and Statistics 11B, or Mathematics 22 or 23A. The Staff

### **101. Managerial Economics. W**

Analysis of the theory and practice of decision making in business firms, applying the concepts and techniques of microeconomics. Topics may include pricing schemes, non-price competition, internal organization of firms, incentive contracts, asymmetric information, and game theory. Case studies are used to illustrate some topics. Prerequisite(s): courses 100A or 100M, and 113. The Staff

### **104. Is There Truth in Numbers: The Role of Statistics in Economics. W,S**

Applies the techniques of econometrics and experimental economics to the understanding of economics. A "hands-on" course where real economic data is used in an interactive way so that students develop the art of empirical analysis. Prerequisite(s): courses 100A or 100M, and 113, and Entry Level Writing and Composition requirements. The Staff

### **105. Topics in Macroeconomic Theory. F**

A seminar in advanced macroeconomics focusing on a selection of theoretical issues. Emphasis is on detailed modeling and analysis of macroeconomic processes. Prerequisite(s): course 100B or 100N, and 113. The Staff

### **110. Managerial Cost Accounting and Control. S**

Focuses on how cost data are used by managers in the planning and control of both private- and public-sector organizations. Specific topics include organization of the management and control function, use of cost data for the pricing of goods and services, the effect of cost systems on management performance, and capital budgeting. Prerequisite(s): course 10B. The Staff

### **111A. Intermediate Accounting I. F**

Principles, control, and theory of accounting for assets; accounting as an information system; measurement and determination of income. Projects involving spreadsheet software required. Students cannot receive credit for this course and course 209A. Prerequisite(s): course 10B. The Staff

### **111B. Intermediate Accounting II. W**

Principles, control, and theory of accounting for liabilities and equities; preparation and analysis of cash flow statements and earnings per share computation. Projects involving spreadsheet software required. Students cannot receive credit for this course and course 209B. Prerequisite(s): course 10B. The Staff

### **112. Auditing and Attestation. W**

For business management economics majors interested in careers that emphasize accounting, finance, or technology management. Also for students who intend to take the CPA exam. Covers audit techniques, risk analysis, and development of control structures for major financial processes including cash, investments, accounts receivable, inventories, accounts payable, debt, equity capital, and related information systems security. Prerequisite(s): course 10B. The Staff

### **113. Introduction to Econometrics. F,W,S**

Practical methods for organizing and analyzing economic data, testing economic hypotheses, and measuring economic relationships. Regression analysis is the main empirical method, and basic statistical and probability theory is included. Students gain hands-on computer experience with an econometric software package. Students cannot receive credit for this course and Applied Mathematics and Statistics 113. Prerequisite(s): courses 1 and 2; Applied Mathematics and Statistics 5 or 7; and one of the following: course 11B, Applied Mathematics and Statistics 11B, Mathematics 22, or Mathematics 23A. Courses 100A or 100B strongly recommended as preparation. (General Education Code(s): SR, Q.) The Staff

### **114. Advanced Quantitative Methods. W**

Application of statistical methods to estimating and testing economic relationships, i.e., econometric techniques. Topics include the effects of misspecification, choice of functional form, serial correlation, heteroscedasticity, limited dependent variables, and simultaneous equations. Includes

## Economics

discussion of existing empirical work and econometric projects by students. Prerequisite(s): courses 100A or 100M, and 113. The Staff

### **115. Introduction to Management Sciences. W**

The scientific study of management decision making. Topics include linear, integer, and non-linear programming. Special emphasis on a wide variety of practical applications, including production scheduling, optimal transportation assignments, and optimal inventory policy. Prerequisite(s): course 100A or 100M. The Staff

### **116. Advanced Topics in Accounting and Ethics. S**

Covers topics in accounting and ethics. Builds a strong accounting foundation; develops critical thinking skills; and explores ethical standards in accounting, forensic accounting, international financial recording standards, and accounting for sustainability. Meets the California State educational ethics requirement for certified public accountant (CPA) licensure. Prerequisite(s): courses 10A, 10B, 111A, and 111B. Enrollment is restricted to economics, business management economics, global economics, and the combined economics and environmental studies and mathematics majors. K. Erin

### **117A. Income Tax Factors for Individuals. W**

Introduces federal taxation for individuals. Topics for study include taxable income, gross income exclusions and inclusions, capital gains, depreciation, business and itemized deductions, personal and dependency exemptions, passive activity losses, tax credits, and methods of accounting. Prerequisite(s): course 10B. The Staff

### **117B. Tax Factors of Business and Investment. F**

Focuses on various tax subjects providing a strong foundation in tax concepts and preparation for work in either public or corporate accounting. Topics include historical perspective of the U.S. tax system, introduction to estate and gift taxes, employment and self-employment taxes, tax concepts and laws, business expenses, capital recovery, tax credits, capital gains and losses, capital investments, and corporate operations. (Formerly course 117.) Prerequisite(s): course 10B. The Staff

### **119. Advanced Accounting. S**

Accounting for business organizations; partnerships; government and non-profit organization funds; branches, consolidations, and installment sales. Projects involving spreadsheet software required. Prerequisite(s): courses 111A and 111B. The Staff

### **120. Economic Development. W**

A comparative approach to the study of the economic development of low-income countries. Various obstacles to growth are identified, and different types of solutions are analyzed. Prerequisite(s): courses 1, 2, and 113. (General Education Code(s): E.) The Staff

### **121. Economic Growth. F,S**

Studies economic growth from theoretical, empirical, and historical perspectives. Topics include: theories of economic growth and their empirical importance, technology and innovation, social institutions and growth, and competing explanations of the global distribution of wealth. Prerequisite(s): courses 1, 2, 11A, and 11B (or the equivalent); course 100B is strongly recommended. The Staff

### **125. Economic History of the U.S. S**

The development of the American economy from colonial times to the present, with emphasis on the interaction between institutional structure and economic development. Topics include the economics of slavery, the rise of big business, and the causes of the Great Depression. Prerequisite(s): courses 1 and 2. Related coursework in history also helpful. Enrollment restricted to juniors and seniors. The Staff

### **126. Why Economies Succeed or Fail: Lessons from Western and Japanese History. F**

Examines the emergence of capitalism and the world's first industrial revolution in Britain, continental Europe industrialization, Soviet economic growth and collapse, and the Japanese economic miracle. Asks about the historical sources of long-run economic development, stagnation, and decline. Draws lessons for current debates over free market versus more interventionist policies, economic reform in the former Communist nations, and economic rivalry between the U.S. and Japan. Prerequisite(s): courses 1 and 2. Related coursework in history also helpful. Enrollment restricted to juniors and seniors. The Staff

### **128. Poverty and Public Policy. S**

Studies the causes, consequences, and governmental response to urban poverty in the U.S. Topics include how public policy, the macroeconomy, race, gender, discrimination, marriage, fertility, child support, and crime affect and are affected by urban poverty. Emphasizes class discussion and research. (Also offered as Legal Studies 128. Students cannot receive credit for both courses.)

## Economics

Prerequisite(s): courses 100A or 100M; and course 113. Enrollment restricted to economics, business management economics, global economics, legal studies, or economics combined majors. (General Education Code(s): E.) The Staff

### **130. Money and Banking. W**

The institutional structure of central banking and of bank and nonbank financial intermediation in the U.S.; theoretical and empirical investigations of the role of monetary policy in macroeconomic stabilization and economic growth. Prerequisite(s): courses 100B or 100N, and 113. The Staff

### **131. International Financial Markets. S**

International financial management analyzes the key financial markets and instruments that facilitate trade and investment activity on a global scale. Inquiry spans two areas: (1) economic determinants of prices in international financial markets; and (2) decisions facing private individuals and enterprises, with topics including capital financing, investment, and risk management. Prerequisite(s): courses 100A or 100M, and 100B or 100N. The Staff

### **133. Security Markets and Financial Institutions. F,S**

An examination of all major financial markets: equities, bonds, options, forwards, and futures. Uses modern financial theory, including asset pricing models such as CAPM and APT. Prerequisite(s): courses 100A or 100M, and 113. The Staff

### **135. Corporate Finance. W**

An analysis of financial policies of business enterprises. Topics include cash flow analysis, stock and bond valuation, asset pricing models, capital budgeting, financial market institutions, and financial planning.

Prerequisite(s): courses 10A, 100A or 100M, and 113. The Staff

### **136. Business Strategy. S**

The strategic management process, techniques for analyzing single-business and diversified companies, implementing strategy, organization, business planning, financial strategy, competitive analysis, entrepreneurial skills. Prerequisite(s): courses 10A and either 100A or 100M. Concurrent enrollment in course 136L is not required. The Staff

### **137. Performing Arts in the Public and Private Economy. F**

Analysis of the performing arts: a commodity satisfying a rich and varied source of satisfaction, an occupation for thousands of talented and creative individuals, and an activity whose funding (public versus private) is the source of significant controversy. Economics 1 is strongly recommended as a preparation. Students cannot receive credit for this course and course 80G. D. Kaun

### **138. The Economics and Management of Technology and Innovation. F**

Examines the analytics of issues in technology and innovation, including cooperation in research and development (R&D), standardization and compatibility, patents and intellectual property rights, and strategic management, using economic models and firm case studies. Prerequisite(s): course 100A or 100M, or permission of instructor. The Staff

### **139A. The Economics of Electronic Commerce. S**

An analysis of the broad spectrum of issues affecting commercial uses of the Internet and the next-generation information infrastructure. Uses economics to

examine market structure, pricing quality, intellectual property rights, security, electronic payments and currencies, and public policy implications. Prerequisite(s): course 100A or 100M, or permission of instructor. The Staff

### **139B. E-Commerce Strategy. \***

Introduction and review of economic principles for e-commerce. Overview of trends in e-commerce. Online retailing of physical products; digital products; financial services; housing and related markets. Online business-to-business transactions. Internet infrastructure industry. Government regulation of e-commerce and business strategy responses. Prerequisite(s): course 139A. The Staff

### **140. International Trade. F**

The theory of international production and trade. The effects of tariffs and quantitative trade restrictions; the nature of economic integration; multinational firms; effects of trade and protection on economic stability and welfare. Prerequisite(s): course 100A or 100M. The Staff

### **141. International Finance. S**

Topics include national accounting, balance of payments theories, parity conditions in international finance, exchange rate determination models, forward-looking financial instruments, international monetary systems, country interdependence and exchange rate regimes, international monetary integration, and Eurocurrency market. Prerequisite(s): course 100B or 100N. The Staff

### **142. Advanced Topics in International Economics. \***

Selected issues in contemporary international economics: theory,

## Economics

empirical evidence, and public policy. Seminar emphasizing discussion and individual research. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, courses 100A or 100M, and 100B or 100N, and 140 or 141. (General Education Code(s): W.) The Staff

### **143. Policy Issues in the International Economy. W**

Covers selected issues concerning the international economy. Topics include: U.S. competitiveness; U.S. trade policy; immigration; trade and the environment; developing countries; foreign investment; foreign exchange markets; and international economic institutions. Prerequisite(s): courses 1, 2, and 100A or 100M. The Staff

### **148. Latin American Economies. \***

This course is designed to familiarize students with the economic and business environment in Latin America. Prerequisite(s): courses 1 and 2. The Staff

### **149. The Economies of East and Southeast Asia. W**

Examines the pattern of international trade, investment, and industrial structure in Asia. Examines competing explanations of rapid growth of Japan, Korea, and Taiwan; presents an overview of economic developments in China, Hong Kong, and Taiwan. Concludes with an analysis of high technology trade and multinationals in Asia in 2000 and beyond. Prerequisite(s): courses 1 and 2. The Staff

### **150. Public Finance. F**

Economics of taxation, including incidence, equity issues, efficiency, and supply side effects. Close attention to taxes in the U.S. system and tax-reform issues. Students cannot receive credit for this course

and course 250. Prerequisite(s): course 100A or 100M, and course 100B or 100N. The Staff

### **156. Health Care and Medical Economics. \***

Health economics theory and review of studies of the health industry, including current topics. Focuses on the structure of the U.S. health care system, including analysis of health policy issues. Relationship to models of perfect competition and efforts at reform. Prerequisite(s): courses 100A or 100M and 113. The Staff

### **159. The Economics of Organizations. \***

Uses an economic approach to shed light on questions such as why and how organizations are formed, and what consequences they may have on the adoption of different types of organizations for economic performance. Also emphasizes differences between the "internal markets" within organizations and market transactions. Prerequisite(s): course 100A or 100M. The Staff

### **160A. Industrial Organization. S**

The structure and conduct of American industry with strong emphasis on the role of government, regulation, anti-trust, etc. The evolution of present-day industrial structure. The problems of overall concentration of industry and of monopoly power of firms. Pricing, output decisions, profits, and waste. Approaches include case study, theory, and statistics. (Also offered as Legal Studies 160A. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100M. The Staff

### **160B. Government and Industry. \***

The influence of government regulation on industry and the

allocation of resources is rigorously examined using theory and statistics. Areas of regulation include transportation and power, pollution and congestion, rent control, and liability insurance regulation. Both optimal and actual regulation are examined from the point of view of effectiveness, efficiency, social welfare, and redistribution. Prerequisite(s): course 100A or 100M. The Staff

### **161A. Marketing. F,S**

The evolution of markets and marketing; market structure; marketing cost and efficiency; public and private regulation; the development of marketing programs including decisions involving products, price, promotional distribution. (Formerly course 161.) Prerequisite(s): course 100A or 100M. The Staff

### **161B. Marketing Research. W**

Prepares students to conduct market research and use it in solving real management problems. Students work with a company to solve marketing-based problems. Students conduct research, process data, and make a presentation to the company's management. Course work involves marketing, statistics, and communications; material is both qualitative and quantitative. Prerequisite(s): courses 113 and 161A. The Staff

### **162. Legal Environment of Business. W**

A study of law and the legal process, emphasizing the nature and function of law within the U.S. federal system. Attention is given to the legal problems pertaining to contracts and related topics, business association, and the impact of law on business enterprise. (Also offered as Legal Studies 162. Students cannot receive credit for both courses.)

## Economics

Prerequisite(s): course 100A or 100M. The Staff

### **164. Economics and the Telecommunications Industry. \***

Covers the economics of the telecommunications industry including telephone, cellular telephone, and data communications. Particular emphasis on the Internet, satellite, paging, cable television, radio and television broadcasting. Examines the industry structure and implications of moving from a regulated environment to competition. Topics examined from a competitive strategic standpoint as well as public policy perspective. Prerequisite(s): courses 100A or 100M, and 113. The Staff

### **165. Economics as an Experimental Science. \***

The design, execution, and analysis of laboratory experiments in economics. Students study experimental methodology, critically survey the published literature, and design an experiment. Literature includes lab studies of investigations in auctions, markets, social choice theory, and game theory. Prerequisite(s): course 100A or 100M, and course 113. Enrollment limited to 40. (General Education Code(s): W.) The Staff

### **166A. Game Theory and Applications I. F**

Introduces modern game theory, including applications in social science, biology, and engineering. Topics include extensive form, strategic form, mixed strategies, incomplete information, repeated games, evolutionary games, and simulation techniques. (Also offered as Technology & Info Management 166A. Students cannot receive credit for both courses.) Prerequisite(s): Applied Math and Statistics 5 or 7 or Economics 113;

and Economics 11B, Applied Math and Statistics 11B, or Mathematics 11B or 19B. Enrollment restricted to juniors and seniors. Enrollment limited to 100. The Staff

### **166B. Game Theory and Applications II. W**

Explores research frontiers in game theory, emphasizing applications in social science, biology, and engineering. Each interdisciplinary team develops a topic, and presents it to the class in oral and written reports and demonstrations. Students must have shown a strong performance in course 166A or equivalent. Students cannot receive credit for this course and Economics 272, Computer Science 272, or Biology: Ecology and Evolutionary 274. (Also offered as Computer Science 166B. Students cannot receive credit for both courses.) Prerequisite(s): course 166A or Computer Science 166A; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 40. (General Education Code(s): W.) The Staff

### **169. Economic Analysis of the Law. S**

The application of the theories and methods of neoclassical economics to the central institutions of the legal system, including the common law doctrines of negligence, contract, and property; bankruptcy and corporate law; and civil, criminal, and administrative procedure. (Also offered as Legal Studies 169. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100M or permission of instructor. The Staff

**170. Environmental Economics. \*** Economic analysis of environmental issues. Environmental pollution and

deterioration as social costs. Economic policy and institutions for environmental control. Influences of technology, economic growth, and population growth on environmental quality. Prerequisite(s): course 100A or 100M. The Staff

### **171. Natural Resource Economics. F**

The application of economic analysis to the use of renewable and nonrenewable natural resources. Efficiency and distributional aspects of natural resource scarcity. Measurement of the benefits and costs. Optimal extraction or use policies. Common property and externalities. Government policies. Prerequisite(s): course 100A or 100M. The Staff

### **175. Energy Economics. S**

Applications of micro, welfare, and international economic theory and methodology to the energy field. Questions considered include optimal allocation of natural resources; pricing and investment; regulations and taxes; import and export control; redistributive policies. Prerequisite(s): course 100A or 100M. The Staff

### **180. Labor Economics. S**

A study of the changing nature and composition of the U.S. labor force. Topics include the demand for and supply of labor; wage determination; the role and impact of unions in the labor market; racial, ethnic, and gender differences in job and income opportunities and the role of discrimination in explaining these differences; and the theory of human capital, all considered from the traditional neoclassical as well as institutional and radical perspectives. Prerequisite(s): course 100A or 100M. Course 113 is strongly recommended as preparation. The Staff

## Economics

### **183. Women in the Economy. S**

Study of gender roles in economic life, past and present. Topics include occupational structure, human capital acquisition, income distribution, poverty, and wage differentials. The role of government in addressing economic gender differentials is examined. (Also offered as Legal Studies 183. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100M; course 113 is strongly recommended. The Staff

### **184. Labor Wars in Theory and Film. W**

This seminar focuses on the impact of trade unions and labor-market discrimination on the U.S. work force. The neo-classical, institutional, and radical/Marxist approaches to these questions are employed in the analysis. Films, both fictional and documentary, are utilized as primary source material. Prerequisite(s): permission of instructor based on quality of work in economics; courses 100A or 100M, 100B or 100N, and 113; satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) D. Kaun

### **186. Mathematical Methods for Economic Analysis. F**

Presents mathematical methods commonly used in graduate-level economic analysis: basic matrix algebra, real analysis, functions, continuity concepts, differentiation, Taylor expansions, and implicit function theorem and optimization. Prerequisite(s): interview only: enrollment restricted to students admitted to the APEF M.S. Program. The Staff

### **188. Management in the Global Economy. W**

An overview of how firms do

business in the global economy. The focus is on the motivations of firm behavior, but also explores the impact of corporate decision-making on national welfare.

Includes a mix of business case studies, applied economic theory, and empirical applications. Prerequisite(s): course 113 and either course 100A or 100M. The Staff

### **189. Political Economy of Capitalism. W**

An assessment of modern day capitalism from the three major economics paradigms-liberal, conservative, radical. Theories of Smith, Marx, and Keynes are explored in contemporary writing, with focus on the U.S. from WW II to present. Students cannot receive credit for this course and course 80A. Prerequisite(s): courses 1 and 2; courses 100A or 100M, and 100B or 100N are recommended as preparation. D. Kaun

### **190. Senior Proseminar. \***

Courses focus on problems of interest to advanced students of economics. They offer a flexible framework, so those interested in specific issues can read, present papers, and develop their ideas. The Staff

### **191. Economics Teaching Practicum. F,W,S**

Each student serves as facilitator for small discussion group in connection with core economics courses. Facilitators complete course readings and meet with instructor as a group to discuss the teaching process. May not be counted toward upper-division major requirements. The Staff

### **192. Directed Student Teaching. F,W,S**

Teaching of a lower-division seminar, course 42, under faculty

supervision. May not be counted toward the upper-division major requirements. Students submit petition to sponsoring agency. The Staff

### **193. Field Study. F,W,S**

Provides for department-sponsored individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (in contrast to course 198 where faculty supervision is by correspondence). May not be counted toward the upper-division major requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **193F. Field Study (2 credits). F,W,S**

Provides for department-sponsored individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. May not be counted toward the upper-division major requirements. Students spend 8-10 hours per week at job site. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194. Advanced Topics in Management. \***

Honors course providing detailed analysis of specialized topics in management. Possible topics include: venture capital, the financial services industry, e-business, behavioral finance, advanced consumer behavior, entrepreneurship, high-tech marketing, risk management, and option value approaches to business strategy. Students cannot receive credit for this course and course 194F. Prerequisite(s): courses 100A or 100M, 100B or 100N, and 113. Enrollment by permission of instructor, and review of performance in economics courses. Enrollment

## Economics

restricted to senior and junior business management economics majors. (Formerly Advanced Topics in Business Management Economics.) Enrollment limited to 30. The Staff

### **194F. Advanced Topics in Management (2 credits). \***

Detailed analysis of specialized topics in management. Possible topics include: venture capital, the financial services industry, e-business, behavioral finance, advanced consumer behavior, entrepreneurship, high-tech marketing, risk management, and option value approaches to business strategy. Students cannot receive credit for this course and course 194F. Prerequisite(s): courses 100A or 100M, 100B or 100N, and 113. Enrollment by permission of instructor, and review of performance in economics courses. Enrollment restricted to senior and junior business management economics majors. Enrollment limited to 30. The Staff

### **195. Senior Thesis. F,W,S**

A supervised research project. If the project is of unusual scope, the course may be repeated for credit. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, students submit petition to sponsoring agency. (General Education Code(s): W.) The Staff

### **197. Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy. F,W,S**

Economics students are expected to learn to effectively communicate economic theory and evidence relating to economic policy to audiences that do not have economics degrees. The skills to be learned are both written and oral communication. Students learn to present convincing policy

arguments in position papers, executive summaries, and in oral presentation that may include charts and other means of communication.

Prerequisite(s): Entry Level Writing & Composition requirement; one of the following courses:

100A, 100M, 100B, 100N, or 113.

Restricted to

sophomore, junior, senior economics, business-management economics, global economics and combined economics/math majors. The Staff

### **198. Independent Field Study.**

**F,W,S**

Provides for department-sponsored individual study program off campus for which faculty supervision is not in-person, but by correspondence. May not be counted toward the upper-division major requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Independent Field Study (2 credits). F,W,S**

Provides for department-sponsored individual study program off campus for which faculty supervision is not in person, but by correspondence. May not be counted toward the upper-division major requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199. Tutorial. F,W,S**

May be repeated for credit, but may be counted only once toward the upper-division major requirements. Undergraduates may not take graduate courses for credit as 199. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S** Specialized study with individual faculty. May not be applied toward the major requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## GRADUATE COURSES

### **200. Microeconomic Analysis. F**

Survey of partial equilibrium analysis, market distortions, consumer choice and production and trade theory, perfect and imperfect competition, price discrimination, and intertemporal choice theory. Enrollment restricted to applied economics and finance graduate students. The Staff

### **201. Applications in Microeconomics. S**

Applies concepts and tools developed in course 200 to problems encountered in private- and public-sector output and labor markets. The focus is empirical; topics include analysis of labor supply and labor demand and the role of government labor market policies, analysis of pricing policies and regulation, estimation of the returns to schooling, estimation of demand and cost functions, and the role of unions in the economy. Course 200 is strongly recommended as preparation. Enrollment restricted to applied economics and finance graduate students. The Staff

### **202. Macroeconomic Analysis. F**

Aggregate economic analysis: determinants of aggregate expenditures and output, the roles of monetary and fiscal policy, recent developments in macro theory; macro policy issues. Enrollment restricted to applied economics and finance graduate students. The Staff

## Economics

### **204A. Advanced Microeconomic Theory. F**

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Illustrative examples emphasize international applications. Courses must be taken in sequence. Enrollment restricted to graduate students or by permission of instructor. The Staff

### **204B. Advanced Microeconomic Theory. W**

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Illustrative examples emphasize international applications. Courses must be taken in sequence. Prerequisite(s): course 204A. The Staff

### **204C. Advanced Microeconomic Theory. S**

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Illustrative

examples emphasize international applications. Courses must be taken in sequence. Prerequisite(s): course 204B. The Staff

### **205A. Advanced Macroeconomic Theory. F**

Modern macroeconomic theory: determination of national income; employment, inflation, and exchange rates; theories of growth and business cycle fluctuations; international transmission of inflation and other disturbances; recent developments in the analysis of macroeconomic policy; modern theoretical and empirical analysis of aggregate relationships. Courses must be taken in sequence. Enrollment restricted to graduate students or by permission of instructor. The Staff

### **205B. Advanced Macroeconomic Theory. W**

Modern macroeconomic theory: determination of national income; employment, inflation, and exchange rates; theories of growth and business cycle fluctuations; international transmission of inflation and other disturbances; recent developments in the analysis of macroeconomic policy; modern theoretical and empirical analysis of aggregate relationships. Courses must be taken in sequence. Prerequisite(s): course 205A. The Staff

### **205C. Advanced Macroeconomic Theory. S**

Modern macroeconomic theory: determination of national income; employment, inflation, and exchange rates; theories of growth and business cycle fluctuations; international transmission of inflation and other disturbances; recent developments in the analysis of macroeconomic policy; modern theoretical and empirical analysis of aggregate relationships. Courses

must be taken in sequence. Prerequisite(s): course 205B. The Staff

### **209A. Accounting 1. \***

Principles, control, and theory of accounting for assets; accounting as an information system; measurement and determination of income. M.S. level projects required. Students cannot receive credit for this course and course 111A. Enrollment restricted to graduate students. The Staff

### **209B. Accounting II. W**

Principles, control, and theory of accounting for liabilities and equities; preparation and analysis of cash flow statements and earnings per share computation. M.S. level projects required. Students cannot receive credit for this course and course 111B. Enrollment restricted to graduate students. The Staff

### **210A. Mathematical Methods for Economic Analysis. \***

Mathematical methods commonly used in economic analysis are discussed. Covers basic matrix algebra, real analysis, functions, continuity concepts, differentiation, Taylor expansion, implicit function theorem, and optimization. Prerequisite(s): qualifications as determined by instructor; inquire at department office. The Staff

### **210B. Mathematical Methods for Economic Analysis. F**

A course in introductory mathematical economics which covers standard optimization problems, difference and differential equations, optimal control theory, decisions under uncertainty, game theory, and stochastic calculus. Course 210A or equivalent is strongly recommended as preparation. The Staff

## Economics

### **211A. Advanced Econometrics. F**

Advanced econometric methods are introduced. Topics include the standard regression analysis, simultaneous equation estimation, nonlinear models, qualitative response models, panel data analysis, and univariate and multivariate time series analysis. Enrollment restricted to graduate students or by permission of instructor. The Staff

### **211B. Advanced Econometrics. W**

Advanced econometric methods are introduced. Topics include the standard regression analysis, simultaneous equation estimation, nonlinear models, qualitative response models, panel data analysis, and univariate and multivariate time series analysis. Course 211A is strongly recommended as preparation for course 211B. The Staff

### **211C. Topics in Empirical Research. S**

A topic course in econometrics designed for graduate students interested in quantitative analysis. Selected topics, including standard and recently developed econometric techniques, are critically and thoroughly discussed. In addition to methodology, focuses on exploring the research potential and applications of advanced econometric techniques. Courses 211A and 211B are strongly recommended as preparation. The Staff

### **212. Empirical Project in Econometrics (2 credits). \***

Empirical project or paper in econometrics to demonstrate student's ability to conduct applied econometric analysis. Ph.D. requirement to be completed by beginning of student's third year of study. Prerequisite(s): courses 211A and 211B. May be repeated for credit. The Staff

### **216. Applied Econometric Analysis I. F**

The use of statistical techniques for the testing of economic hypotheses and the estimation of parameters, with emphasis on regression analysis. Includes methods of dealing with serial correlation, errors in variables, multicollinearity, and heteroscedasticity. Experience with common statistical packages. Enrollment restricted to applied economics and finance graduate students. The Staff

### **217. Applied Econometric Analysis II. W**

Focuses on the application of advanced econometric and time series techniques to economic issues. Computer assignments and empirical applications are used to discuss and illustrate the practical aspects of simultaneous equation systems, nonlinear models, qualitative response models, time series model specification, unit root test, and cointegration analysis. Course 216 is strongly recommended as preparation. Enrollment restricted to applied economics and finance graduate students. The Staff

### **220A. Development Economics: Theory and Cases. W**

Surveys traditional development economics and the neoclassical resurgence in development theory. Topics include sources of growth, income distribution, population and human capital development, savings, fiscal and monetary mobilization and allocation, foreign investment and aid, and macroeconomic policies. Case study focus in the second quarter. Courses 204A and 205A are strongly recommended as preparation. The Staff

### **220B. Development Economics: Theory and Cases. S**

Surveys traditional development economics and the neoclassical resurgence in development theory. Topics include sources of growth, income distribution, population and human capital development, savings, fiscal and monetary mobilization and allocation, foreign investment and aid, and macroeconomic policies. Case study focus in the second quarter. Courses 204A and 205A are strongly recommended as preparation. The Staff

### **221A. Advanced Monetary Economics I. \***

Covers major issues in monetary economics, focusing on the core theoretical models employed in monetary economics. Topics include: money in general equilibrium; money-in-the-utility function approaches; cash-in-advance models; search-based models; welfare costs of inflation; optimal inflation tax; informational frictions in monetary economies; financial and credit frictions; nominal price and wage frictions; time-dependent and state-dependent models of price adjustment; and money in new Keynesian models. Prerequisite(s): course 205 A-B-C, or by permission of instructor. Enrollment restricted to graduate students. The Staff

### **221B. Advanced Monetary Economics II. S**

Covers major issues in monetary economics, focusing on the core lessons for design and implementation of monetary policies. Topics include: welfare-based policy objectives; optimal policy under discretion; optimal commitment policies; model dynamic stochastic general equilibrium (DSGE) for policy analysis; open economy models for

## Economics

monetary policy analysis; learning; model uncertainty and policy design; empirical evidence on the channels of monetary policy transmission; monetary policy operating procedures; zero nominal interest-rate bound; international transmission of monetary policy; policy and asset prices.

Prerequisite(s): course 205 A-B-C, or by permission of instructor. Enrollment restricted to graduate students. The Staff

### **233. Finance I. W**

Applications of economic analysis in private finance. Topics include risky choice and intertemporal choice theory, asset pricing models, efficient market hypotheses, market institutions, and derivative securities. Course 200 is strongly recommended as preparation. Enrollment restricted to applied economics and finance graduate students. The Staff

### **234. Financial Institutions and Markets. \***

This course examines the evolving microstructure of financial markets, instruments, and institutions. Topics include the role of banks and other financial intermediaries and the trading practices for domestic and international financial instruments, including equity, debts, futures, and options. Prerequisite(s): course 233. The Staff

### **235. Corporate Finance. \***

Application of modern financial theory to corporate decision making. Topics covered include capital budgeting and the firm's investment decision, capital structure, dividend policies, and the implications of corporate governance for enterprise financial goals. Prerequisite(s): course 233. The Staff

### **236. Financial Engineering. S**

This course surveys the financial risks faced by corporation, banks, and other financial institutions that arise from changes in interest rates, foreign exchange rates, commodity prices, and stock prices. It examines the characteristics, payoffs, and pricing of financial derivatives and other instruments for managing risk, including options, forwards, futures, swaps, structured notes, and asset-backed securities. Several cases will be used to illustrate how actual firms solve financial risk management problems.

Prerequisite(s): course 233. Enrollment restricted to applied economics and finance graduate students. The Staff

### **239. Current Topics in Finance. \***

Topics in finance selected by the instructor. Prerequisite(s): course 233. The Staff

### **240A. Advanced International Trade Theory I. F**

The theory of international trade and commercial policy. Both traditional analyses and recent developments are covered. Topics include both normative and positive theoretical analyses, as well as empirical testing of theory. Enrollment restricted to graduate students. Courses 204A-B-C are strongly recommended as preparation. The Staff

### **240B. Advanced International Trade Theory II. \***

This is the second quarter of a two-quarter sequence. It deals with most major current advanced research topics in trade. It is both theoretical and empirical and is designed to acquaint students with recent research in the field. Research topics include models of political economy of trade policies; trade and labor markets; regionalism and multilateralism;

trade and environment; theories, determinants, and implications of foreign direct investments; economic geography.

Prerequisite(s): course 240A. The Staff

### **240C. Advanced International Trade Theory III. \***

Covers the empirical aspects of international trade issues. Topics include the testing and estimation of various trade models such as the Ricardian model, Heckscher-Ohlin-Vanek model, intra-industry trade models, trade models associated with multinational corporations, models of trade and intellectual property rights, the impact of trade on income inequality, and trade between developed and developing economies. Prerequisite(s): course 240B. Enrollment restricted to graduate students. The Staff

### **241A. Advanced International Finance I. F**

Financial aspects of aggregate capital and trade flows and income determination in open economies. Specific topics include financial risk in the international setting, international borrowing and lending, money and exchange rate regimes, income determination and macroeconomic policy, current issues in international monetary reform. The Staff

### **241B. Advanced International Finance II. W**

An examination of the formulation and implementation of international economic policy from both theoretical and empirical perspectives. Topics include case studies in fiscal, monetary, exchange rate, tariff, and other regulatory policies. The Staff

**241C. Advanced International Finance III. \***

Focuses on empirical applications in international finance. Topics include structural and reduced form models of exchange rates, interest parity conditions, purchasing power parity, capital controls, capital flows to emerging markets, and government intervention in foreign exchange markets. Courses 202 and 203 or 205A-B-C strongly recommended as preparation. The Staff

**243. History of the International Economy. \***

Studies the evolution and functioning of the international economy from the days of the gold standard to the present. Particular attention is paid to the interwar period with its problems of structural transformations and their relation to the Great Depression and its immediate aftermath, the rise and fall of the Bretton Woods system, the experience of floating exchange rate regimes, the rise of the "new industrial countries," and the problems of international indebtedness. Courses 204A and 205A are strongly recommended as preparation. The Staff

**249A. International Trade and Development Policy I. \***

Focuses on a range of real-life issues in international trade and development. Topics include North American Free Trade Agreement (NAFTA), the semiconductor industry, the Boeing-Airbus aircraft trade problems, the World Trade Organization (WTO) and developing countries, U.S./Japan trade, trade and the environment, and U.S./China trade. Enrollment restricted to graduate students. The Staff

**249B. International Trade and Development Policy II. \***

Emphasizes government policies to promote growth. Topics include the "Washington Consensus," the East Asian "model," and recent policy changes in East Asia, Latin America, Eastern Europe, and the former Soviet Union. Prerequisite(s): course 249A. Enrollment restricted to graduate students. The Staff

**250. Advanced Public Finance. S**

Theory of the role of public sector expenditures and taxes in market economies. Analyzes efficiency and equity arguments for government intervention. Topics include the role of public debt and deficits in economies, international effects of tax and spending policies, and economic theories of public sector decision making. Courses 204A and 205A are strongly recommended as preparation. Students cannot receive credit for this course and course 150. The Staff

**259A. Cost-Benefit Analysis. \***

Applications of economic analysis in public finance, largely from the revenue side: taxation. The issues considered include the effects of taxation on consumer welfare, consumption, labor, capital, production, growth. Course 200 is strongly recommended as preparation. Students cannot receive credit for this course and course 153. The Staff

**259B. Public Policy Analysis. \***

Applications of welfare and microeconomic theory and methodology to the public expenditure question: cost-benefit. Effects of the taxes discussed in course 259A and sophisticated tools used in the face of these and other distortions with regard to measurement of benefits, costs, and the discount rate. Course 200 strongly recommended as preparation. The Staff

**270. Advanced Topics in Applied Microeconomics. \***

Advanced topics and current research in microeconomic theory, including game theory and general equilibrium analysis. Courses 204A-B and 205A are strongly recommended as preparation. (Formerly Advanced Topics in Microeconomic Theory.) The Staff

**271. Advanced Topics in Macroeconomic Theory. F**

Advanced topics and current research in macroeconomic theory, including DSGE models, empirical issues, and optimal policy analysis. Prerequisite(s): courses 204A-B-C, 205A-B-C, and 211A-B-C are strongly recommended as preparation. The Staff

**272. Evolutionary Game Theory. W**

Reviews static equilibrium concepts, games of incomplete information, and the traditional theory of dynamic games in discrete time. Develops recent evolutionary game models, including replicator and best reply dynamics, and applications to economics, computer science, and biology. Prerequisite(s): upper-division math courses in probability theory are strongly recommended. Cannot receive credit for this course and Economics 166B or Computer Science 166B. (Also offered as Computer Science 272. Students cannot receive credit for both courses.) The Staff

**273. Advanced Applied Microeconomics. F**

Covers topics in applied microeconomics, including labor economics, public economics, and demography. Discusses advanced econometric techniques and theory commonly used in applied microeconomics and microeconomic theory. Students

## Economics

make extensive use of statistical packages and large data sets to complete course assignments. Upper-division econometric and microeconomics courses strongly recommended. The Staff

### **274. Workshop in Macroeconomics and Monetary Economics (3 credits). F,W,S**

For Ph.D. students in economics who are at the early stages of their research careers as well as for those who are engaged in dissertation work in macroeconomics and monetary economics. Topics vary from quarter to quarter depending on the interests of participants. Prerequisite(s): courses 205A, 205B, and 205C, or by consent of instructor. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **275. Workshop in Applied Microeconomics (3 credits). F,W,S**

For Ph.D. students in economics who are at the early stages of their research careers as well as for those who are engaged in dissertation work in applied microeconomics or other empirical work. Topics vary from quarter to quarter depending on the interests of participants. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **276. Workshop in Experimental Economics (3 credits). F,W,S**

For economics doctoral students who are at early stages of their research careers as well as those engaged in dissertation research using laboratory experiments and related techniques. Topics vary from quarter to quarter depending on the interest of participants. Enrollment by permission of instructor. May be repeated for credit. D. Friedman

### **290. Topics in International Economics. \***

Covers several advanced topics in the history of international economics, international trade, and international finance. Topics include imperfect competition and trade, strategic trade policies, increasing returns, and the pattern of trade, economic geography, exchange rate target zones, and balance of payment crises. Topics vary from year to year. Courses 204A-B-C and 205A-B-C are strongly recommended as preparation. The Staff

### **291. Workshop in Applied Economics. \***

Experience in applied projects, report writing and presentation, drawing on previous coursework. The Staff

### **293. Field Study. F,W,S**

Students will undertake analytical projects in public or private institutions. The material covered must be different from that of the thesis topic. The Staff

### **294A. Applied Economics and Finance Laboratory (2 credits). F,W**

Practical experience in managing computerized data sets and running statistical packages. Covers STATA and R. (Formerly Applied Economics Laboratory.) Enrollment is restricted to applied economics and and finance graduate students. May be repeated for credit. The Staff

### **294B. Applied Economics and Finance Seminar (2 credits). W,S**

Bi-weekly seminars designed to present students with current working applications in various fields of applied economics and finance. (Formerly Applied Economics Seminar.) Enrollment is restricted to applied economics and and finance graduate students. May

be repeated for credit. The Staff

### **294C. Economics Guest Seminar Series (1 credit). \***

Bi-weekly seminars by visiting faculty and industry leaders who are experts in their fields provide in-depth insight on topics relevant to graduate students in economics. Enrollment restricted to graduate students. The Staff

### **294D. Applied Economics Seminar (2 credits). F,W,S**

Weekly seminar designed to present students with current working applications in various fields of applied economics. Enrollment is restricted to economics Ph.D. students. The Staff

### **295A. Directed Reading. F**

Reading in research area of student interest, with faculty supervision through weekly discussion. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **295B. Directed Reading. W**

Reading in research area of student interest, with faculty supervision through weekly discussion. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **295C. Directed Reading. S**

Reading in research area of student interest, with faculty supervision through weekly discussion. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **296A. Third Year Ph.D. Seminar. F**

Student presentations of literature and/or original research in areas of student research interest. Student discussion of presentations under faculty supervision. Prerequisite(s): courses 204C, 205C, 211B, 240A, 240B, 241A, and 241B are required preparation. The Staff

Economics

**296B. Third Year Ph.D. Seminar. \***

Student presentations of literature and/or original research in areas of student research interest. Student discussion of presentations under faculty supervision. Prerequisite(s): courses 204C, 205C, 211B, 240A, 240B, 241A, and 241B are required preparation. The Staff

**296C. Third Year Ph.D. Seminar. \***

Student presentations of literature and/or original research in areas of student research interest. Student discussion of presentations under faculty supervision. Prerequisite(s): courses 204C, 205C, 211B, 240A, 240B, 241A, and 241B are required preparation. The Staff

**297. Independent Study. F,W,S**

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. The Staff

## PROGRAM DESCRIPTION

---

The purpose of the Education Department's instructional programs is to prepare all students, undergraduates and graduates, to engage in the analysis and integration of educational theory, research, and practice for an increasingly diverse society. The department's primary intellectual and practical focus is on fostering equitable and effective schooling for all students. In working toward this goal, the department seeks to understand the profound issues involved in transforming public education so that it better meets the needs of students from diverse language, ethnic, racial, and class backgrounds. We are a small department with the large agenda of developing educational leaders and pursuing educational research that will affect the future of teaching and learning both inside and outside of schools. Our commitment lies in three essential and interrelated domains: 1) school, families, and communities; 2) teacher education and development; and 3) mathematics and science education. Undergirding them all is a focus on the socio-cultural context in which learning and teaching takes place and an understanding of the power of language and literacy in both formal and informal educational settings.

The Education Department has an active doctor of philosophy (Ph.D.) program that attracts students who have exemplary academic preparation as well as experience working in educational settings. Our doctor of education (Ed.D.) program is currently not accepting new students. We have a model teacher-education program; and two vibrant minor tracks that serve more than 300 undergraduates each year.

---

### MINORS IN EDUCATION

---

The UCSC undergraduate courses in education engage students in the study of the history of educational thought and philosophy, the politics and economics of education, learning theory and pedagogy, and issues of cultural and linguistic diversity in education.

Because an academic major in education is not permitted in the state of California, UCSC offers two

minors in education for those students who are considering a career in teaching and also for those who hold a general interest in educational studies. Please note that the minors in education do not provide a California Teaching Credential. Additionally, the UCSC teaching credential program is a graduate program and coursework taken in the minor cannot be substituted for credential requirements.

---

### GENERAL MINOR IN EDUCATION

---

The general minor in education consists of six courses totaling 30 credits:

- Education 60, Introduction to Education
- Education 180, Introduction to Teaching
- Four upper-division education courses (courses number Education 102-189). (Please refer to the [Education Department's web site](#) for a list of approved upper-division courses being offered during the current academic year.
- Declared minors have priority enrollment for upper-division education courses. Upper-division electives may be taken before Education 180.

To be eligible to declare the general minor in education, students must have:

- Completed or be enrolled in Education 60, Introduction to Education
- Successfully declared a major.

To officially declare a general minor in education, students must bring from their major department a completed Petition for Major/Minor Declaration and UCSC Academic Planning Form to the Education Department's undergraduate adviser. Students pursuing a minor in education should meet with the Education Department's undergraduate adviser as early as possible. The adviser will assist students in completing the Petition for a Major/Minor Declaration and the UCSC Academic Planning Form.

---

## FOR FURTHER INFORMATION

---

For specific instructions about how to declare a minor in education and for the current Drop-in Advising Schedule, please refer to the Education Department's web site <http://education.ucsc.edu>. For other inquiries, please contact the undergraduate adviser by sending an e-mail to [education@ucsc.edu](mailto:education@ucsc.edu).

---

## SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM) EDUCATION MINOR

---

The STEM minor specifically serves students in STEM majors who are considering careers in secondary mathematics or science teaching. The STEM minor in education consists of eight courses, totaling 32 credits and including 90-100 hours of classroom field placements:

EDUC 50 (A, B or C, Introduction to Teaching, Cal Teach 1 (2 credits)

EDUC 60, Introduction to Education

EDUC 100 (A, B or C), Science and Mathematics, Cal Teach 2 (2 credits)

EDUC 185B, Introduction to Mathematics Education, or 185C, Introduction to Teaching Science

EDUC 185L, Introduction to Teaching: Cal Teach 3

One upper-division education course addressing cultural and linguistic diversity (e.g., EDUC 128, 135, 141, 164, 170, 177, or 181),

Two upper-division education courses (courses number EDUC 102-189). Please refer to the Education Department's web site for a list of approved upper-division courses being offered during the current academic year, <http://education.ucsc.edu>).

Students pursuing the STEM education minor should meet with the Cal Teach staff as early as possible. Entry into EDUC 50 is by interview only, and interested students must submit an application to the Cal Teach program (see <http://calteach.ucsc.edu> or e-mail [calteach@ucsc.edu](mailto:calteach@ucsc.edu)).

---

## GRADUATE PROGRAMS

---

### MASTER OF ARTS IN EDUCATION AND CALIFORNIA TEACHER CREDENTIAL PROGRAM

---

The Master of Arts (M.A.) in education and California teacher credential program prepare prospective teachers to work with California's culturally and linguistically diverse student population. Students in this program earn a master's degree and are eligible to apply for a Preliminary California Credential upon completing a five-quarter program comprised of two

summers and one academic year. Graduates of the program are prepared to teach English language learners enrolled in K-12 public schools. The program also offers the Bilingual Authorization (in Spanish) for primary language instruction or dual language immersion instruction in a K-12 setting.

Students who complete the program are eligible to apply for a California Preliminary Multiple Subjects Teaching Credential or a California Preliminary Single Subject Teaching Credential. The Multiple Subjects Teaching Credential authorizes the holder to teach in a K-6, self-contained public school classroom, where all subjects are taught by the same teacher. The Single Subject Teaching Credential authorizes the holder to teach in his/her credential subject area in a 6-12 departmentalized classroom setting within a public school system.

The UCSC single-subject, teacher-credential program offers the following subject areas: mathematics, English, social science, and science. Programs of study are subject to change. Please note that students are not admitted into the program for a stand-alone Master of Arts in education or a stand-alone credential. Additionally, holders of a previously issued California or out-of-state credential are not eligible for admission to the program.

Because program requirements are authorized by statutes and regulated by a state entity, the California Commission on Teacher Credentialing program requirements must be responsive to new legislation and regulatory policies. Admission requirements and programs of study referred to are subject to change to comply with regulatory mandates.

### MASTER OF ARTS IN EDUCATION AND PRELIMINARY CREDENTIAL IN SECONDARY SCIENCE IN SILICON VALLEY (CURRENTLY NOT ACCEPTING NEW STUDENTS)

---

The Silicon Valley Master of Arts in education and preliminary secondary science credential has the same degree requirements as the campus-based program. The program's course work is offered at UCSC and UCSC Extension in Santa Clara with student teaching placements in middle and high schools in the greater San Jose area. Program details are available at web site <http://education.ucsc.edu/macsv/>.

## PROGRAM LEARNING OUTCOMES

<b>Table 1. M.A./Credential Program Learning Outcomes for Multiple Subject Candidates and Single Subject Candidates</b>	
<b>Making Subject Matter Comprehensible to Students</b>	
Program Learning Outcome (PLO) 1	Specific Pedagogical Skills for Subject Matter Instruction
<b>Assessing Student Learning</b>	
PLO 2	Monitoring Student Learning During Instruction
PLO 3	Interpretation and Use of Assessments
<b>Engaging and Supporting Students in Learning</b>	
PLO 4	Making Content Accessible
PLO 5	Student Engagement
PLO 6	Developmentally Appropriate Teaching Practices
PLO 7	Teaching English Learners
<b>Planning Instruction and Designing Learning Experiences for Students</b>	
PLO 8	Learning About Students
PLO 9	Instructional Planning
<b>Creating and Maintaining Effective Environments for Student Learning</b>	
PLO 10	Instructional Time
PLO 11	Social Environment
<b>Developing as a Professional Educator</b>	
PLO 12	Professional, Legal, and Ethical Obligations
PLO 13	Professional Growth
PLO 14	Integrating Pedagogical Theory, Research, and Practice

### PREREQUISITE ADMISSION REQUIREMENTS

All candidates for the M.A./Credential program must have preparation in the following areas:

A course, or equivalent experience, that addresses cultural and linguistic diversity. The following UCSC undergraduate education courses are examples of courses that meet this requirement: 128, Immigrants and Education; 141, Bilingualism and Schooling; 164, Urban Education; 181, Race, Class, and Culture in Education; and 92C Introduction to Issues in Diversity and Education. Other courses offered outside the Education Department may be acceptable, however,

outside coursework cannot be preapproved, it should be included with the application and a description included in the Statement of Purpose as to how it addressed these topics.

A documented field experience with children or youth in an educational setting at the same age level which the candidate aspires to teach. Experiences such as directed observation, substitute teaching, school tutoring, work in after-school programs, camp counseling, instructional aide, or the equivalent are acceptable experiences. When applying to the program, please describe your field experience in the designated area of the application titled Statement of Purpose.

### APPLICATION SELECTION CRITERIA

Admission to the program is competitive. Candidates for admission are selected, in part, on the following criteria:

#### Academic Record

College coursework is evaluated with attention to content and grades or narrative evaluations. The appropriateness of courses taken for the credential sought is also taken into consideration. For the multiple subjects credential, students should have an extensive breadth of courses in the core subject areas taught in elementary school—math, science, social science, and English. For the single subject credential, students should have an extensive body of coursework in the content area.

#### Statement of Purpose, Writing Sample, Letters of Recommendation, Personal History, and Résumé

Information provided in these documents is used in the selection of candidates. All documents must be submitted by the application deadline.

The **Statement of Purpose** should discuss the following:

- an explanation of why you want to become a teacher
- how your experience has contributed to your motivation and potential to be an educational leader
- a description of your experiences related to youth, cultural and linguistic diversity, and community involvement

#### Writing Sample:

- a sample of your writing (no more than 10 pages)
- a research-based paper is preferred, for example, a paper written on an educational topic or a paper written in your content area
- alternatively, applicants may choose to write a brief piece specifically for this application

## Education

### Letters of Recommendation:

- three letters of recommendation are required
- at least one letter should be written by university faculty who can address the applicant's academic merit, and at least one letter written from someone in the field who has observed the applicant's work with children or youth
- it is recommended that these letters are current and address your qualifications in the following areas:
  - academic performance
  - field work with youth
  - experience in culturally and linguistically diverse settings and with student populations who have traditionally been underserved in schools and classrooms

### Personal History:

- write a statement (approximately two to five pages) explaining how your personal history has influenced your decision to apply to this graduate program

### Résumé:

- a résumé that includes an employment history; any relevant volunteer or community work, especially in schools and/or with children; and experiences in multicultural and multilingual settings
- include information on languages (other than English) in which you have competence
- **Bilingual Authorization Essay (Bilingual Authorization applicants only):**
- candidates must submit an essay in Spanish as described in the online application

---

## ADMISSION REQUIREMENTS

---

### TESTING

---

All required examinations must be met by the stated deadlines.

All admitted applicants must verify completion of the California Basic Educational Skills Test (CBEST) requirement and submit a passing-status verification by June 1 in order to enroll in the program.

Additional information can be found at the California Educator Credential Examination web site, <http://www.cset.nesinc.com/> (state requirement and subject to change). It is recommended that passing verification be submitted with the application.

### SUBJECT-MATTER COMPETENCE

---

California state law mandates that all teachers provide evidence of their subject-matter knowledge (state requirement and subject to change).

Admitted Multiple Subject applicants must submit verification of having passed the California Subject Examinations for Teachers (CSET): Multiple Subjects Subtests by June 1 prior to enrollment in the program. However, it is highly recommended that documentation of passing CSET scores be submitted with the application. Multiple Subject applicants must pass each section of the CSET; no coursework or "waiver" program can substitute for passing CSET scores.

Deadline to complete this requirement: June 1 of each year prior to enrollment into the program. However, applicants are encouraged to complete this requirement prior to applying to the program.

Additional information can be found at the CSET Registration web site, <http://www.cset.nesinc.com/>.

### SINGLE SUBJECT

---

The California Subject Examinations for Teachers (CSET), or verification of an approved subject matter program from the applicant's undergraduate institution is required. Admitted applicants must submit verification of having passed the CSET examination for their subject (e.g., mathematics), or confirmation of 100 percent completion of an approved subject matter program.

Deadline to complete this requirement: June 1 of each year prior to enrollment into the program. However, it is highly recommended that documentation of subject matter competence be submitted with the application. Additional information can be found at the CSET Registration web site, <http://www.cset.nesinc.com/>.

### CERTIFICATE OF CLEARANCE

---

In accordance with Education Code Section 44320(b), each credential candidate for an initial credential, prior to admission to any credential program, must have their fingerprints cleared by the Federal Bureau of Investigations and the California Department of Justice and obtain a Certificate of Clearance from the California Commission on Teacher Credentialing.

To comply with this regulation, the UCSC Education Department requires all applicants to provide evidence of obtaining their clearance as part of their application for admission to the credential program. Applicants are required to upload a copy of their Certificate of Clearance within their program application by the January 15 application deadline.

Detailed instructions for obtaining a Certificate of Clearance including the required LiveScan fingerprinting form LS-41 can be found on the commission's web site at <http://www.ctc.ca.gov/help/application/cert-of-clear.html>.

## Education

**NOTE:** A U.S. Government-issued social security number is required to apply for a Certificate of Clearance and the fingerprinting process.

Applicants who hold a valid (non-expired) Emergency 30-Day Substitute Teaching Permit are not required to reapply for a Certificate of Clearance. Please submit verification of your **valid** Emergency Permit with your program application by the January 15 application deadline.

Out-of-state/international applicants **must** contact the UCSC Education Department for further instructions: [education@ucsc.edu](mailto:education@ucsc.edu).

Applicants should be aware that a criminal conviction on their record may preclude them from obtaining a Certificate of Clearance.

### PROGRAM AND STATE OF CALIFORNIA REQUIREMENTS (NOT REQUIRED FOR INITIAL ADMISSION TO THE PROGRAM)

---

These requirements may be met prior to or while enrolled in the program, but they must be met to be eligible for a California teaching credential.

### U.S. CONSTITUTION REQUIREMENT

---

A course on the U.S. Constitution (or completion of an examination offered by the Education Department to enrolled students) is required. UCSC-approved courses that meet this requirement are Politics 20, American Politics; Politics 111, Constitutional Law; Politics 120A, Congress, President, and the Court in American Politics; and History 25A, United States History to 1877.

### READING INSTRUCTION COMPETENCE ASSESSMENT (RICA)

---

Multiple Subjects candidates are required—prior to completion of the program and in order to be recommended for a preliminary credential—to pass the RICA examination. The RICA measures the knowledge, skills, and abilities essential to offer effective reading instruction to K–12 students. Candidates should not take this examination prior to completing course 220.

### CPR

---

A certified cardiopulmonary resuscitation (CPR) course (infant, child, and adult) must be completed and valid upon application for the credential.

### TUBERCULOSIS (TB) TEST

---

All K-12 schools require anyone working with children to be tested for TB. You can get tested through the UCSC Student Health Center (831-459-2500 to make an appointment) or your private doctor. A copy of your official results must be turned into the Education Department before the end of the first summer quarter.

---

## BILINGUAL AUTHORIZATION CANDIDATES

---

### 1. CSET—Spanish Language and Culture of Emphasis Requirements

The CSET LOTE (Spanish) Subtest III (CSET test code 147) and CSET LOTE (Spanish) Subtest V (CSET test code 258) (Culture of Emphasis) are required. Admitted applicants must submit verification of having passed the examination **prior** to completing the final quarter of the M.A./Credential program.

Additional testing information can be found at the CSET Registration web site at <http://www.cset.nesinc.com>.

### 2. Three-page essay in Spanish

Bilingual Program applicants will be required to submit a three-page essay in Spanish with their application to the M.A./Credential Program. The essay should address topical questions listed on the Education M.A.

Supplemental Application contained within the online [UCSC Graduate School Application](#).

### Student Teaching

The successful development of teaching skills in the classrooms is the culmination of a teacher education program. Therefore, candidates must demonstrate, by the end of their program, teaching competence in the classroom. Credentialed public school teachers are responsible for the nurturing of children and youth. Therefore, teaching credential candidates must consistently display conduct befitting the profession. To this end, the candidate must be able to cope with the demands and responsibilities of teaching as outlined below:

- Meet university and program requirements and deadlines (including school expectations during field experiences).
- Plan ahead to anticipate needs and potential student teaching problems.
- Be able to adapt to institutional and/or professional expectations and policies.
- Relate appropriately to children, parents, and school staff.
- Demonstrate sensitivity to the social, cultural, economic context of the school environment.
- Adhere to school expectations for dress, appearance, and personal hygiene.

Candidates whose professional behavior does not meet these minimal standards may be recommended for dismissal from the program.

Beginning Student Teaching, which begins during the Summer Bridge between the university summer and fall

## Education

quarters, constitutes the first classroom observation experience for students in the program. Student teachers are in their classroom placements from 10–14 hours a week depending on the school site schedule. To enroll in this course, students must have a Certificate of Clearance issued and on file with the California Commission on Teacher Credentialing.

Intermediate and advanced student teaching is a two-quarter experience (winter/spring) in which student teachers are placed with cooperating teachers in local schools. Students are in the classroom placements 14 or more hours a week in winter quarter leading toward full time in the classroom by spring quarter. They gradually assume responsibility for preparation, instruction, and evaluation of the class during this two-quarter period. Supervisors of teacher education give ongoing and frequent support to students in their classroom placements and in seminars at UCSC. Multiple Subject candidates obtain classroom experience in both primary and intermediate grades. Single Subject candidates obtain classroom experience in middle school/junior high and high school.

Admission to course 201 and 201A, Intermediate Student Teaching, and courses 202A-B-C, Advanced Student Teaching, is based on an assessment of academic performance, experience, leadership, and initiative shown in public school placements and required courses taken earlier in the program. Please note that passing the CSET examination is a requirement for Advanced Student Teaching.

---

### CAPSTONE REQUIREMENTS

---

Students will complete a capstone portfolio, which includes a teaching performance assessment and reflective papers. Prompts for these assignments may vary from year to year as they reflect the most current California state credentialing requirements.

---

### MULTIPLE SUBJECT COURSE REQUIREMENTS

---

200 Applied Classroom Analysis and Methods: Beginning Student Teaching  
201 Intermediate Student Teaching  
202A-B-C Advanced Student Teaching  
203 Methods of English Language Development  
205 Teaching, Learning, and Schooling  
207 Social Foundations of Education  
208 Portfolio Development  
210 Creating Supportive, Healthy Environments for Student Learning  
211 Teaching Special Populations

212A-B-C (Bilingual Authorization students only) Bilingualism and Biliteracy  
217 Topics in Elementary Education: Physical Education  
218 Topics in Elementary Education: Visual Arts  
219 Topics in Elementary Education: Performing Arts  
220 Reading and Language Arts for Elementary Classrooms  
221 Science Learning and Teaching in Elementary Classrooms  
222 Mathematics Learning and Teaching in Elementary Classrooms  
MA/C students must fulfill the requirements for Level 1 technology skills. Students meet this requirement in one of two ways: (a) passing the CSET examination, or (b) passing an approved course offered via UCSC Extension.

---

### SINGLE SUBJECT COURSE REQUIREMENTS

---

200 Applied Classroom Analysis and Methods: Beginning Student Teaching  
201 Intermediate Student Teaching  
201A Intermediate Student Teaching: Single Subject  
202A-B-C Advanced Student Teaching  
204 Methods of English Language Development  
206 Teaching, Learning, and Schooling  
207 Social Foundations of Education  
208 Portfolio Development  
210 Creating Supportive, Healthy Environments for Student Learning  
211 Teaching Special Populations  
212A-B-C (Bilingual Authorization students only) Bilingualism and Biliteracy  
225 Reading Across the Curriculum in Middle School and Secondary  
Single Subject Credential students enroll in the two methods courses related to their subject area:  
226 English Teaching: Theory and Curriculum  
227 English Teaching for Secondary Classrooms  
228 Math Education: Research and Practice  
229 Teaching Mathematics in the Secondary Classroom  
230 Science Education: Research and Practice  
231 Teaching Science in the Secondary Classroom  
232 Social Science: Theory and Curriculum  
233 Social Science Teaching for Secondary Classrooms

## Education

M.A./Credential students must fulfill the requirements for Level 1 technology skills. Students meet this requirement in one of two ways: (a) passing the CSET examination, or (b) passing an approved course offered via UCSC Extension.

---

### FOR FURTHER INFORMATION

---

Please contact the credential analyst by sending an e-mail to [education@ucsc.edu](mailto:education@ucsc.edu), or view the department's home page on the web at <http://education.ucsc.edu> where potential applicants can obtain full details about the programs.

---

### ED.D. IN COLLABORATIVE LEADERSHIP

---

**(Currently not admitting new students)**

#### OVERVIEW

---

The goal of the Ed.D. program is to prepare educational professionals to enact research-based leadership in the transformation of schools and other educational institutions serving racially, culturally, and linguistically diverse communities in California's Central Coast and Bay Area region. Ed.D. students' dissertations apply cutting-edge theory and research in action-research reform efforts. Research projects will often be situated within the student's professional work site. Graduates of the Ed.D. program will be qualified for leadership positions in schools and school districts, as well as for the instruction of professional courses in universities and colleges. Graduates may also choose to work for independent or governmental policy centers.

#### ADMISSION REQUIREMENTS

---

- M.A. or equivalent with a background in research methodology
- 3.0 grade point average (GPA) or above
- Official Graduate Record Examination (GRE) scores <http://www.gre.org/~> taken within the last five years
- Documentation of second language and/or multicultural focus
- Statement of Purpose
- Personal History
- A research project proposal
- Official transcripts from all undergraduate and graduate work
- Application essay
- Three current recommendation letters specifying potential for collaborative leadership and scholarly productivity.

- Application fee

Prior to completing your application, we highly recommend a personal interview with at least one of our faculty members. Please contact an Education Department faculty member whose research interest is similar to your own (please visit the Education Department web site at <http://education.ucsc.edu/>)

---

### FOR FURTHER INFORMATION

---

Contact the doctoral adviser by sending an e-mail to [edphd@lists.ucsc.edu](mailto:edphd@lists.ucsc.edu).

---

### PH.D. IN EDUCATION

---

#### OVERVIEW

---

The goal of the Ph.D. in education is to support graduate students in becoming creative scholars who engage in research focused on the educational needs of students from linguistic and cultural groups that have historically not fared well in our nation's public schools. To achieve this goal, this program provides students with grounding in the varieties of interdisciplinary theorizing, research methods, and applications needed to advance the study of learning and teaching for diverse student populations. The courses and research experiences are closely related to practice in K-12 classrooms. Students in this interdisciplinary program apply tools and perspectives from education, anthropology, linguistics, philosophy, psychology, sociology, cognitive science, and cultural historical activity theory. The program integrates theory and practice to examine learning and teaching within the multiple contexts of classroom, school, family, and community. Graduates of this program will be qualified to teach and to conduct the kinds of educational research demanded by tenure-track positions in research and regional universities. Graduates may also work in non-university based institutions that focus on teacher professional development, curriculum development, and related areas of educational research and development.

Together with his or her faculty adviser, each student develops an integrated program of study that includes advanced coursework, seminars, and electives. Students learn through an apprenticeship model in which they develop expertise through active participation in research. Courses may be taken in other departments, when appropriate.

#### PH.D. ADMISSIONS GUIDELINES

---

The minimum grade-point average (GPA) established by the University of California for admission to graduate school is 3.0. In general, the Ph.D. in education program looks for potential excellence in graduate

## Education

students, whether this manifests itself in a high grade-point average, strong letters of recommendation, or a high Graduate Record Examination (GRE) score, or a strong Statement of Purpose. Applicants will be evaluated on their individual merits and also with regard to how well their proposed doctoral research can be supported by the existing resources of the program.

### ADMISSION REQUIREMENTS

---

- Bachelor's degree, or its equivalent, from an accepted university prior to the quarter for which admission is sought
- 3.0 GPA or above
- Official GRE scores <http://www.gre.org/> taken within the last five years
- Experience working with culturally and linguistically diverse communities
- Statement of Purpose
- Personal History
- A writing sample, preferably in education or a related field. The sample can be a term paper, a field report, a research proposal, or an essay written especially for the application
- Official transcripts from all colleges/universities attended after high school
- Three current recommendation letters specifying potential for scholarly productivity
- Current résumé
- Application fee
- International applicants must take the Test of English as a Foreign Language (TOEFL). A minimum score of 550 on the TOEFL (paper), 220 on the TOEFL (computer), or 83 on the Internet-based test is required for admission. The TOEFL examination may be waived for international students who have taken and successfully passed a freshman composition course at an accredited university in the United States.

Prior to completing your application, we highly recommend a personal interview with at least one of our faculty members. Please contact an education faculty member whose research interest is similar to your own (please visit the Education Department web site at <http://education.ucsc.edu/>)

### PROGRAM REQUIREMENTS

---

During the first two years of study, all students are expected to enroll in a set of required courses, including foundational courses, methodology courses, and elective courses. The student and his/her adviser will determine the overall individualized program of study, depending on the student's preparation, interests, and

plans, which are determined in consultation with relevant faculty and the department chair. The program encourages interdisciplinary study.

To achieve Ph.D. candidacy, students are expected to pass an annual review of their written work, maintain satisfactory academic progress, complete all required courses, attend department colloquia, complete a second-year research project, complete a TAship or teaching internship, pass a qualifying examination (QE), and meet the specific requirements of the Division of Graduate Studies.

The QE is intended to assess a student's depth and breadth of knowledge in his or her areas of concentrations and his/her competence to do extended dissertation-level research and analysis. Normally taken near the end of the third year of enrollment, the QE consists of both written and oral components. For the written portion, the student prepares three papers, two of which advance a position based on a review of related research, theoretical framework, or research design/methods; the third is a dissertation prospectus. The student presents and defends his/her work at the oral examination.

A dissertation based on original research is required. After the dissertation has been completed and submitted, students must defend the dissertation in an oral examination.

### COURSE REQUIREMENTS AND SEQUENCING

---

The following courses constitute the minimum requirements: four foundational courses, four research methods courses, and four elective courses. Incoming students should consult with their faculty advisers and the current course offerings to determine the order in which they will complete required courses. Students are encouraged to take courses beyond the minimum required; in consultation with their advisers, students will determine the full set of research methods and elective courses they will complete based on their intellectual interests and professional goals. All required courses must be completed prior to advancement to candidacy.

Courses required in years one and two:

- EDUC 235, Introduction to Educational Inquiry
- EDUC 236, Quantitative Methods in Educational Research
- EDUC 237, Qualitative Research Methods
- EDUC 250, Teaching and Teachers
- EDUC 255, Intermediate Quantitative Methods; or EDUC 256, Advanced Qualitative Analysis
- EDUC 261, Thinking, Learning and Teaching

## Education

- EDUC 262, Social and Cultural Context of Education
- EDUC 272, Language in Education and Society

And four electives, two of which must be from the list below:

- EDUC 263, Foundations of Educational Reform
- EDUC 264, Research on Teacher Development and Teacher Education
- EDUC 268, Schools, Communities, and Families
- EDUC 280, Language and Literacy across disciplines
- EDUC 286, Research in STEM Education
- EDUC 295, Critical Perspectives on Education
  1. M.A. course in Education with additional readings and assignments (one maximum to count toward the four electives)
  2. Graduate courses in other departments
  3. Independent Study, Reading Group, Research Apprenticeship (EDUC 293), or undergraduate course with additional readings and assignments taken as is (one maximum undergraduate course to count toward the four electives)

---

### REQUIREMENTS FOR THE M.A. DEGREE

---

Although applications for a master's degree independent of the Ph.D. program are not accepted, students in the Ph.D. program may obtain a M.A. degree after successfully completing a minimum of six quarters residency, 60 course credits including 4 foundational courses, 4 research methods courses, 4 elective courses, and a second-year research project. Students seeking an M.A. degree must adhere to the guidelines set forth by the Graduate Division.

#### OTHER REQUIREMENTS

---

Students are required to attend the Education Department's colloquium series during their first and second years in the program.

The education Ph.D. program emphasizes teaching experience, and all students are required to complete one TAship or teaching internship in education prior to advancement to candidacy.

Students are required to complete a second-year project paper by the first day of fall quarter in year three.

---

### FINANCIAL SUPPORT

---

It is each student's responsibility to secure funding for graduate studies. Over the course of students' enrollment in the graduate program, students typically

fund their education with some combination of the following: TAships, GSRships, UCSC graduate fellowships, scholarships or fellowships from outside sources, loans, personal savings, family income, and support from other individuals (e.g., extended family members). When possible, first-year students are supported with UCSC graduate fellowships which typically cover part of a student's expenses for the first year only. Beginning in the student's first year, he or she is strongly encouraged to apply for TAships in Education Department courses and in other departments on campus. Students are also encouraged to seek and apply for outside funding from government agencies, private foundations, and industry, and to plan alternative financing should none of these opportunities become available.

Financial support for students includes a variety of fellowships, research assistantships, and teaching assistantships in the Education Department. Students may participate in research projects under the auspices of several interdisciplinary research centers, including the Chicano/Latino Research Center (CLRC), the Vocabulary Innovations in Education (VINE) project, The Teachers With Computers: Ward Annotations for Vocabulary Education (tecWAVE) project, Effective Science Teaching for English Language Learners (ESTELL) project, The Center for Collaborative Research for an Equitable California (CREC), and the Center for Educational Research in the Interest of Underserved Students (CERIUS).

---

### DESIGNATED EMPHASIS IN EDUCATION

---

The Designated Emphasis in Education enables doctoral students in other departments to pursue interests in education and obtain formal certification of a "minor" level of competence in the field of education. The requirements for obtaining a Designated Emphasis in Education are the following:

1. Obtain a designated graduate adviser from the faculty in education. This adviser will be in addition to the graduate adviser from the student's home department. The education adviser must serve on the student's qualifying examination committee and, as appropriate, may also serve on the student's dissertation committee.
2. Complete at least two of the following three core courses in education:
  - EDUC 261, Thinking and Learning
  - EDUC 262, Social and Cultural Contexts of Education

## Education

- EDUC 263, Foundations of Educational Reform
3. Complete additional courses as needed to total five graduate courses in education, no more than one of which may be a directed readings course (Independent Studies). Courses must be approved by the student's faculty adviser in the Education Department. Courses in other departments focused on education may be approved by petition to the Education Department's Doctoral Programs Committee.
  4. Prepare a significant piece of writing in some area of education. This writing may take the form of a substantial position paper (seminar paper, qualifying examination paper, dissertation chapter, master's thesis) grounded in the literature of educational research, as determined by the faculty adviser in education.

Education is an institutional field in which scholars from a wide variety of disciplines—including sociology,

psychology, politics, economics, mathematics and science—have scholarly interests. A Designated Emphasis in Education enables graduate students from other departments to ground their work in theory and research on important issues in education.

The Education Department's foundational courses, EDUC 261 and 262, are offered in successive quarters every other year; and EDUC 263, an elective course, is offered every other year. The department typically offers five doctoral courses during each year. The Education Department annually admits 7-10 Ph.D. students, leaving room for doctoral students from other departments to take courses in education.

### FOR FURTHER INFORMATION

---

Contact the doctoral graduate adviser by sending an e-mail to [edphd@ucsc.edu](mailto:edphd@ucsc.edu) or view the department's home page on the web at <http://education.ucsc.edu> where potential applicants can obtain full details about the programs.

## EDUCATION FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

#### **Margaret (Greta) A. Gibson, Emerita**

#### **Ron Glass**

Education as a practice of freedom; research for equity; ethical issues in collaborative research; moral and political philosophy and education; ideology and education; race and education; school reform; democracy and education

#### **June A. Gordon**

Urban education; international comparative education; the impact of economics, culture and politics on educational attitudes and expectations of immigrants; marginalized youth; schooling and society in Japan, China, India, the U.K., and the U.S.A.; sociology of education

#### **Judit Moschkovich**

Mathematical thinking and learning; student conceptions of functions; mathematical discourse; everyday mathematical practices; bilingual mathematics learners

#### **Rodney Ogawa, Emeritus**

#### **Brad Olsen**

Teacher development (with emphasis on knowledge and identity), English education, and sociolinguistics

#### **Art Pearl, Emeritus**

#### **Lucinda Pease-Alvarez, Emerita**

#### **Trish Stoddart**

Teacher education, science education, educational reform

#### **David Swanger, Emeritus**

#### **Kip Téllez**

Preparation of teachers for linguistic and cultural diversity, second language learning, studies of the school curriculum, educational assessment

#### **Roland G. Tharp, Emeritus**

#### **C. Gordon Wells, Emeritus**

### ASSOCIATE PROFESSOR

---

#### **Doris Ash**

Informal science learning, teacher professional development, science discourse in and out of the classroom

#### **Lora Bartlett**

Educational policy and school reform, schools as workplaces for teachers, the conditions of teachers' commitment

#### **George Bunch**

Language and education in linguistically diverse settings, preparation of teachers for linguistic diversity, language policy, and bilingualism

#### **Judith Scott**

Literacy and language learning, particularly with students who depend on schools to learn about

## Education

academic language; reading, writing, vocabulary development; vocabulary assessment; teachers' professional development through collaboration and inquiry

**Jerome Shaw, Emeritus**

ASSISTANT PROFESSOR

**Cynthia Cruz**

Feminist ethnography; community-based learning; decolonial pedagogies; LGBTQ street youth; women of color thought; cultural studies and education

**Eduardo Mosqueda**

Mathematics education of English learners; large-scale data set quantitative analysis; urban education issues

PROFESSOR

**Catherine R. Cooper (Psychology)**

Cultural perspectives on child and adolescent development; linkages among families, peers, schools, and work; issues of diversity, ethnicity, and gender in identity; research, practice, and policy in university outreach programs; linking qualitative and quantitative research

**Bruce N. Cooperstein (Mathematics)**

Algebra, algebraic number theory

**Barbara Rogoff (Psychology)**

Human development in sociocultural activity; informal and formal arrangements for learning; adult/child and peer communication in families and schools in diverse cultural communities; learning through observation; cognitive development, especially problem solving, planning, and attention

---

## EDUCATION COURSES

---

### LOWER-DIVISION COURSES

**50A. CAL Teach 1: Science and Mathematics (2 credits).**

Introductory seminar exploring secondary students, teaching, and schools in the context of science and/or mathematics instruction.

Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement

experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a science or math classroom. Enrollment limited to 25. (General Education Code(s): PR-S.) The Staff

**50B. CAL Teach 1: Mathematics (2 credits). F,W**

Introductory seminar exploring secondary students, teaching, and schools in the context of mathematics instruction.

Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement

experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a math classroom. Enrollment limited to 25. (General Education Code(s): PR-S.) The Staff

**50C. CAL Teach 1: Science (2 credits). F,W**

Introductory seminar exploring secondary students, teaching, and schools in the context of science instruction. Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a science classroom. Enrollment limited to 25. (General Education Code(s): PR-S.) The Staff

**60. Introduction to Education: Learning, Schooling, and Society. F,S**

Explores the foundations of learning and teaching, the social and political forces within schools and school systems in the U.S., and the educational policies and practices in culturally and linguistically diverse communities. (General Education Code(s): IS, E.) L. Bartlett, D. Ash

**99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### UPPER-DIVISION COURSES

**100A. Cal Teach 2: Science and Mathematics (2 credits). W**

Examines students, schools, and science and/or mathematics instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Concurrent participation in a secondary school internship required. Course content

## Education

supports and enhances students' internship experience. (Formerly course 75A.) (General Education Code(s): W satisfied by taking this course and course 185L.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50A, 50B, or 50C; and acceptance into the Cal Teach program. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. The Staff

### **100B. Cal Teach 2: Mathematics (2 credits). S**

Examines students, schools, and mathematics instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Concurrent participation in a secondary school internship required. Course content supports and enhances students' internship experience. (Formerly course 75B.) (General Education Code(s): W satisfied by taking this course and course 185L.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50A, 50B, or 50C; and acceptance into the Cal Teach program. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. The Staff

### **100C. Cal Teach 2: Science (2 credits). S**

Examines students, schools, and science instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Student must concurrently participate in a K-12 school internship. Concurrent participation in a secondary school internship required. Course content supports and enhances students' internship experience. (Formerly course 75C.) (General Education Code(s): W satisfied by taking this

course and course 185L.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50A, 50B, or 50C; and acceptance into the Cal Teach program. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. The Staff

### **102. Education, Media, and Society. F**

Focusing on ways the media (both news and the entertainment industry) portrays schools, teachers, and students to the public, investigates the way society views education, the way education is presented in the media, and the way education is influenced by society. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): IM.) The Staff

### **104. Ethical Issues and Teaching.**

\* Emphasizes a philosophical exploration of the moral complexities of teaching. Students read theoretical investigations of these complexities, and examine case studies that pose difficult moral questions and illuminate the dilemmas of everyday life in classrooms. Course is grounded in a dialogical approach to learning. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. The Staff

### **115. K-12 Student Assessment. W**

Provides an overview of

educational testing. Appropriate use and interpretation of standardized, classroom achievement and special needs assessments are examined. Issues on fair testing of diverse populations of students are discussed within each topic area. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. K. Tellez

### **120. The Arts in Schools: Aesthetic Education Theory and Practice. S**

Explores the historical legacy of the arts within education; considers aesthetic education as an inter-arts philosophical and practical endeavor; studies alternatives to the current situation of the arts in education; develops theory, curricula and methods necessary to teach the arts. Addresses both elementary and secondary teaching in the arts. Meets third-course requirements. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): IM.) B. Olsen

### **125. Multicultural Children's Literature for Elementary Classrooms. S**

Offers opportunities for undergraduate and graduate students to learn about fundamental aspects of children's literature, increase their knowledge of range and quality of children's literature, enhance their understanding of multicultural children's literature, and develop ways to integrate children's

## Education

literature into elementary- and middle-school curriculum areas. (Formerly Introduction to Teaching Children's Literature in Grades K–8.) Enrollment is restricted to junior and senior majors in education, minors in STEM, and junior and senior majors in physics education, mathematics education, Earth sciences education, and biology education, or by permission of instructor. J. Scott

### **128. Immigrants and Education. F**

Research and theory on the education of immigrant students. Major topics include the Americanization movement and America's changing demography, identity maintenance and change, home-school relations, and educators' roles in meeting the needs of culturally and linguistically diverse student populations. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): ER, E.) E. Mosqueda

### **135. Gender and Education. W**

Addresses the changing but continuing patterns of unequal expectations, opportunities, and treatment throughout the educational system for all students, female and male, who do not match a standard model of gender performance. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. C. Cruz

### **140. Language, Diversity, and Learning. S**

Explores the intersection between language, diversity, and education to examine the education of youth who have been historically underserved by schools. Topics include dialect and register variation; language policy; and sociocultural perspectives on learning/teaching of language. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): ER, E.) The Staff

### **141. Bilingualism and Schooling. W**

Introduces participants to issues related to the schooling of students who speak languages other than or in addition to English. Uses a multidisciplinary perspective to understand the circumstances these students face in schools and considers approaches and policies that best meet their needs. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): E.) G. Bunch

### **160. Issues in Educational Reform. F**

Explores a variety of perspectives on key educational policy issues including desegregation, bilingual education, affirmative action, charter schools, national and state curriculum standards, student assessment and the assessment and certification of teachers. Enrollment restricted to education or STEM

minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. The Staff

### **164. Urban Education. \***

Focuses on urban schooling through critical readings, fieldwork, group projects, and extensive writing. Students explore how socialization, marginalization, and assimilation impede or support academic success, how class intersects with "race", and how "culture" affects one's orientation to education. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) E. Mosqueda

### **170. East Asian Schooling and Immigration. F**

Focuses on an historical and contemporary study of education in Japan, China, Korea, Hong Kong, and Taiwan, and the adaptation to schooling in the U.S. of immigrant families from those cultures. Topics include the effects on schooling of language acquisition, religion and cultural practices, family patterns, socioeconomic status, career aspirations, and parental expectations. (Formerly Schools and Asian Cultures.) Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): CC.) J. Gordon

**171. South and Southeast Asian Schooling and Immigration. S**

Historical and contemporary study of education in India, Vietnam, Cambodia, Laos, and the Philippines, and the adaptation to schooling in the U.S. of immigrant families. Topics include: effects of language acquisition; religion and cultural practices; family patterns; socioeconomic status; career aspirations; and parental expectations. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): CC.) J. Gordon

**173. Seminar in Critical Pedagogy. F**

Philosophical and pedagogical exploration of relationships among oppression, power, society, education, and change. Examines how history, power, economics, and discrimination shape societal perspectives and schooling practices, and considers ways to transform education. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. May be repeated for credit. The Staff

**177. Teaching Culturally and Linguistically Diverse Students Math and Science. W**

Examines equity issues in the learning and teaching of math and science in culturally and linguistically diverse school settings. Draws on multicultural, bilingual, and math/science education perspectives. Intended for undergraduate majors

considering a K–12 teaching career. Satisfies an elective requirement for the minor in education program. Prior completion of course 180 is advised. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): ER.) P. Stoddart

**178. Advanced Educational Studies. \***

Advanced academic development, field research, and guided experiential learning for students planning to work in education. Enrollment by interview only. Enrollment restricted to juniors and seniors. May be applied only once to the minor. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. May be repeated for credit. The Staff

**180. Introduction to Teaching. F,W**

Designed to encourage students to think about teaching in new ways. Assumptions about teaching and schooling are examined as well as considering what it takes to teach so that children learn and understand. Not a course in how to teach, but an opportunity to reconsider what teaching should try to accomplish and what kinds of learning teachers should foster. Practicum in the schools of 30 hours per quarter required. Prerequisite(s): course 60. Enrollment restricted to education minors or by permission of instructor. Enrollment limited to 120. (General Education Code(s): PR-S.) J. Gordon, P. Stoddart

**181. Race, Class, and Culture in Education. F**

Examines the schooling experience and educational attainment of racial/ethnic minority students in the U.S. Focuses primarily on domestic minorities. Addresses issues of variability between and within minority groups and the role of cultural, structural, and psychological factors in the educational attainment of these students. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. (General Education Code(s): ER, E.) C. Cruz

**182. American Teacher. W**

Examines multiple and competing images of "teachers" and, more specifically, notions of the "good teacher"; also explores social, cultural, historical, and policy context of teachers' work in the U.S. Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor. The Staff

**183. Children's Mathematical Thinking. S**

Provides an introduction to children's mathematical thinking and an overview of major themes, issues, and questions that researchers in mathematics education have studied in relation to children's mathematical thinking. Prerequisite(s): course 60. Enrollment restricted to education or STEM minors; physics education majors; students with math education concentration; Earth Sciences science education

## Education

concentration; biology B.A. bioeducation; or by instructor permission. J. Moschkovich

### **185B. Introduction to Mathematics Education. W**

Provides an introduction to principles and practices for mathematics education; examines how research on learning and teaching mathematics informs approaches to teaching mathematics; provides an introduction to national and state standards, mathematics curricula, and other current issues in mathematics education. (Formerly Introduction to Teaching Mathematics.) Enrollment restricted to majors in mathematics, physics, Earth sciences, computer science, computer engineering, and electrical engineering or to STEM minors or by permission of the instructor, or by permission of instructor. J. Moschkovich

### **185C. Introduction to Teaching Science. S**

An introduction to the principles and practices for teaching science in secondary classrooms. Course examines theoretical and practical approaches to teaching science, provides an introduction to national and state standards and an overview of science curricula and current issues in science teaching. Enrollment restricted to juniors, seniors, or education minors or by permission of instructor. The Staff

### **185L. Introduction to Teaching: Cal Teach 3 (3 credits). S**

Supplements theoretical and practical introduction to the teaching of science or mathematics with subject-pedagogical approaches. Concurrent participation in an advanced Cal Teach internship provides context to apply theory and practical techniques. Prerequisite(s):

satisfaction of the Entry Level Writing and Composition requirements; course 50A, 50B, or 50C; course 100A, 100B, or 100C; course 185B or 185C. Enrollment restricted to juniors and seniors or education minors, or by permission of instructor. (General Education Code(s): W satisfied by taking this course and one of the following: courses 100A, 100B, and 100C.) Enrollment limited to 30. The Staff

### **187. Cognition and Instruction. \***

Addresses the question, "How do people learn?" by examining theories of learning and research on cognition, learning, and instruction. Enrollment restricted to juniors, seniors, or education minors, or by permission of instructor. The Staff

### **194. Group Projects. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194F. Group Projects (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **197A. Cal Teach Special Project (1 credit). F,W,S**

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment restricted to majors in the physical and biological sciences and majors in the school of engineering or by permission of instructor. May be repeated for credit. The Staff

### **197B. Cal Teach Special Project (2 credits). F,W,S**

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment restricted to majors in the physical and biological sciences and majors in the school of engineering or by permission of instructor. May be repeated for credit. The Staff

### **197C. Cal Teach Special Project (3 credits). F,W,S**

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment restricted to majors in the physical and biological sciences and majors in the school of engineering or by permission of instructor. May be repeated for credit. The Staff

### **198. Independent Field Study. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Independent Field Study (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## Education

### **199. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## **GRADUATE COURSES**

---

### **200. Beginning Student Teaching. F**

A required course that introduces students to the diverse cultural and linguistic settings of today's classrooms. Classroom practices, instructional strategies, and analysis are emphasized. First course in the student teaching placement series. Placements are used to examine and apply teaching methods while developing classroom management skills. Class meetings include discussion and demonstration of teaching methods. (Formerly Applied Classroom Analysis and Methods: Beginning Student Teaching.) Enrollment restricted to MA/credential students. The Staff

### **201. Intermediate Student Teaching. W**

Designed to provide students enrolled in the UCSC teacher education program a coherent, integrated, pre-professional experience in public school classrooms. Students assume part-time student teaching responsibilities totalling 14–16 hours per week under the direct supervision of an exemplary classroom teacher. Weekly seminars and ongoing supervision by department staff are required. Prerequisite(s): course 200. Enrollment restricted to MA/credential students. The Staff

### **201A. Intermediate Student Teaching: Single Subject. W**

Provides advanced pre-professional experience for single subject teaching candidates who progressively assume full-time responsibility for public school student teaching beginning in winter quarter. Taken concurrently with course 201. Weekly supervision and seminars with teacher supervisors are required. Prerequisite(s): course 200. Enrollment restricted to MA/credential students. The Staff

### **202A. Advanced Student Teaching. S**

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching. Prerequisite(s): course 201. Enrollment restricted to M.A./credential students. The Staff

### **202B. Advanced Student Teaching. S**

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching. Prerequisite(s): course 201. Enrollment restricted to M.A./credential students. The Staff

### **202C. Advanced Student Teaching. S**

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching. Prerequisite(s): course 201. Enrollment restricted to

M.A./credential students. The Staff

### **203. Teaching English Language Development: Foundations, Approaches, and Strategies. W**

This course will help future educators develop a practical theory for teaching English as a second language in K-5 schools. Topics include the theoretical foundation for language acquisition; current trends and research in the field; the role of culture in teaching English learners; language assessment; and the design of instructional units. Also focuses on teaching social studies to English learners. Enrollment restricted to M.A./credential students. (Formerly, Methods of English Language Development: Multiple Subject Credential) Enrollment restricted to MA/credential students. The Staff

### **204. Methods of English Language Development: Single Subject. F**

Course helps future educators develop a practical theory for teaching English in the elementary and secondary schools to students who speak other languages. Topics include current trends in the field, language assessment, and the design of instructional units. Enrollment restricted to MA/credential students. G. Bunch, The Staff

### **205. Teaching, Learning, and Schooling in a Diverse Society: Multiple Subject.**

Required for master's students in education; offered in summer. Three basic units comprise the subject matter: teaching/learning, with such topics as development, learning, pedagogy, and socialization theories; second, schooling, as the context of teaching/learning both in its existent structures and its reform

## Education

movements; third, the sociocultural context in which educational institutions exist, topics such as cultural and historical forces, political and economic condition, family, and community structures. Enrollment restricted to MA/credential students. The Staff

### **206. Teaching, Learning, and Schooling: Single Subject.**

Required for master's students in education; offered in summer. Three basic units comprise the subject matter: teaching/learning, with such topics as development, learning, pedagogy, and socialization theories; schooling, as the context of teaching/learning both in its existent structures and its reform movements; and the sociocultural context in which educational institutions exist, including topics such as cultural and historical forces, political and economic conditions, family, and community structures. Enrollment restricted to MA/credential students. Enrollment limited to 30. The Staff

### **207. Social Foundations of Education.**

Offered in summer. A sustained inquiry into the social, political, economic, and historical foundations of schools with an emphasis on community attitudes toward education. Student narratives of engagement and resistance will provide a basis for insights and interventions useful to educators. Enrollment restricted to MA/credential students. The Staff

### **208. Portfolio Development (2 credits). \***

Offered in summer. Provides student and faculty adviser with time to confer over the completion of the required portfolio. Enrollment restricted to MA/credential students. The Staff

### **210. Health, Safety, and Community (2 credits).**

Offered in summer. Addresses the preparation of teachers for creating a supportive, healthy environment for student learning. Covers topics related to physical, emotional, and social health. Enrollment restricted to MA/credential students. The Staff

### **211. Topics in Elementary Education: Teaching Special Populations (2 credits). F**

Addresses the preparation of teachers for meeting needs of special populations within the general education setting. Covers basic knowledge, skills, and strategies. Enrollment restricted to MA/credential students. The Staff

### **212A. Bilingualism and Biliteracy: History, Politics, Theory, and Practice (2 credits). F**

Taught in Spanish. Prepares future bilingual teachers to be knowledgeable about history, politics, theory, and practices related to bilingual instructional programs. Topics: second-language acquisition, bilingual-program models, equity pedagogy. Enrollment restricted to MA/credential students. The Staff

### **212B. Bilingualism and Biliteracy: Language, Literacy and Content Instruction (2 credits). W**

Taught in Spanish. Prepares future bilingual teachers to teach language, literacy, and the content areas in ways that address the needs of culturally and linguistically diverse students. Topics: literacy in two languages; academic language; assessment. Enrollment restricted to MA/credential students. The Staff

### **212C. Bilingualism and Biliteracy: Community and School Partnerships (2 credits). S**

Taught in Spanish. Provides opportunities for future bilingual teachers to develop culturally relevant practices that build collaboration between the school, students' families, and community. Topics: Latino culture and history, school-parent communication. Enrollment restricted to MA/credential students. The Staff

### **213. Child and Adolescent Development for Educators (2 credits).**

Offered in summer. Addresses theories of child and adolescent development and how these theories apply to student success in school. Topics include: cognitive, social, emotional, and physical development, and how this knowledge influences decisions teachers make about instruction and their interaction with students. Enrollment restricted to graduate students. Enrollment limited to 25. The Staff

### **217. Topics in Elementary Education: Physical Education (2 credits).**

Offered in summer. Examines pedagogical understanding in teaching physical education. Introduces candidates to theoretical and research basis in physical education and content standards and frameworks. Also investigates and presents instructional practices. Enrollment restricted to MA/credential students. The Staff

### **218. Topics in Elementary Education: Visual Arts (2 credits).**

Offered in summer. Examines pedagogical understanding in teaching visual arts. Introduces candidates to theoretical and research basis for teaching visual arts and content standards and

## Education

frameworks. Also investigates and presents instructional practices. Enrollment restricted to MA/credential students. The Staff

### **219. Topics in Elementary Education: Performing Arts (2 credits).**

Offered in summer. Examines pedagogical understanding in teaching performing arts. Introduces candidates to theoretical and research basis for teaching performing arts and content standards and frameworks. Also investigates and presents instructional practices. Enrollment restricted to MA/credential students. The Staff

### **220. Reading and Language Arts for Elementary Classrooms. F**

This course provides both a theoretical and practical foundation for literacy instruction, emphasizing reading and language arts instruction in grades K-8. Interactive instruction and field experience will be used to examine curricula, methods, materials, and literacy evaluation. Enrollment restricted to MA/credential students. J. Scott, K. Tellez

### **221. Science Learning and Teaching in Elementary Classrooms. W**

Examines constructivist and sociocultural approaches to the learning and teaching of science in elementary classrooms, including beliefs about the nature of science and theories of how children learn science. Provides a critical overview of curricula, instructional theories, and multiple approaches to teaching the "big ideas" in elementary science. Students are billed a materials fee. Enrollment restricted to MA/credential students. The Staff

### **222. Mathematics Learning and Teaching in Elementary Classrooms. F**

This course is required for the multiple subject credential. Examines constructivist and sociocultural approaches to the learning and teaching of mathematics in elementary classrooms, including the nature of mathematics and theories of how children learn mathematics. Provides an introduction to mathematics teaching standards and a critical overview of curricula, instructional theories, and multiple approaches to teaching the "big ideas" in elementary mathematics. Enrollment restricted to MA/credential students. The Staff

### **225. Reading Across the Curriculum in Middle School and Secondary.**

Offered in summer. Provides a theoretical and practical foundation for teaching reading within content area instruction in middle school and secondary classrooms. Field experiences and interactive instruction will facilitate learning about strategies, curricula, methods, materials, and observation. Intended for students pursuing a single subject credential. Enrollment restricted to MA/credential students. The Staff

### **226. English Teaching: Theory and Curriculum. F**

Required for the single subject English credential student. Examines sociocultural approaches to the learning and teaching of English in secondary classrooms, including theories of how children learn English language, literature, and composition. Enrollment restricted to MA/credential students. The Staff

### **227. English Teaching for Secondary Classrooms. W**

Prepares English single subject credential candidates for student teaching in winter and spring. Course focuses on developing curricula and strategies in the content area. Through classroom placements, students observe and apply techniques to develop curriculum units used in student teaching. Enrollment restricted to MA/credential students. The Staff

### **228. Math Education: Research and Practice. F**

Examines research on the learning and teaching of mathematics. Topics include the nature of mathematics cognition and learning, how children learn mathematics, mathematical discourse, and perspectives on addressing diversity in mathematics classrooms. Course is required for M.A./credential students in secondary (single subject) mathematics and of Ph.D. students in mathematics education. Enrollment restricted to MA/credential students. J. Moschkovich

### **229. Teaching Mathematics in the Secondary Classroom. W**

Examines constructivist and sociocultural approaches to teaching mathematics in the secondary classroom. Course will provide an introduction to mathematics teaching standards and a critical overview of curricula, instructional theories, and multiple approaches to teaching the "big ideas" in secondary mathematics. Required for mathematics secondary credential. Prerequisite(s): course 228. Enrollment restricted to MA/credential students. The Staff

## Education

### **230. Science Education: Research and Practice. F**

Examines theoretical approaches to the learning and teaching of science including the nature of scientific knowledge, theories of how children learn science, approaches to scientific discourse, and perspectives on addressing diversity in science classrooms. Course is required for single subjects science credential. Enrollment restricted to MA/credential students. D. Ash

### **231. Teaching Science in the Secondary Classroom. W**

Examines constructivist and sociocultural approaches to teaching science in secondary classrooms. Course will provide a critical overview of curricula, instructional theories, and multiple approaches to teaching the "big ideas" in science. Students are billed a materials fee. Enrollment restricted to MA/credential students. The Staff

### **232. Social Science: Theory and Curriculum. F**

Required for the single subject social science credential student. Tracks both the implicit and explicit connections between theory and practice, illustrating that theory suggests best practice while practice informs theory-formation and testing. Enrollment restricted to MA/credential students. The Staff

### **233. Social Science Teaching for Secondary Classrooms. W**

Prepares social science single subject credential candidates for student teaching in winter and spring. Course focuses on developing curricula and strategies in the content area. Through classroom placements, students observe and apply techniques to develop curriculum units that are used in student teaching.

Enrollment restricted to MA/credential students. The Staff

### **235. Introduction to Educational Inquiry. F**

Addresses foundational knowledge needed to understand and conduct educational inquiry and research. Topics include epistemology in the human sciences, philosophical foundations of modern research strategies, and general classes of research investigations in education. Enrollment restricted to graduate students. Enrollment limited to 15. J. Scott

### **236. Quantitative Methods in Educational Research. W**

Promotes intermediate-level knowledge of quantitative research methods in educational settings. Students learn the foundations of quantitative data theory, general logic behind statistical inference, and specific methods of data analysis in educational contexts. Enrollment restricted to graduate students. Enrollment limited to 15. E. Mosqueda

### **237. Qualitative Research Methods. S**

Graduate level introduction to qualitative methods, with special attention to ethnographic research on schooling. Moves from overview of different methods, through examination of selected studies, to discussion of issues in research design, data collection, analysis, and writing. Enrollment restricted to graduate students; priority is given to graduate students in education. Enrollment limited to 12. L. Bartlett

### **250. Teaching and Teachers. F**

Examines the historical, socio-political, and research contours of the teaching profession. Investigates histories of teaching and teacher's work in the 19th and 20th centuries. Analyzes the

contemporary era of teachers and teaching in the United States. Enrollment is restricted to graduate students. Enrollment limited to 15. K. Tellez

### **251. Analysis of Activity and Interaction in Educational Settings. \***

Analyzes topics, which vary systematically from year to year, including analysis of classroom interaction, video recording and transcription, coding and analysis of discourse data, and software programs for qualitative analysis. Prerequisite(s): course 237. Enrollment restricted to graduate students. Enrollment limited to 12. May be repeated for credit. The Staff

### **252. Hermeneutics of Education. \***

Investigates philosophical hermeneutics to deeply interrogate education. Addresses such questions as: What is hermeneutics? How is education an hermeneutic enterprise? How does knowing hermeneutics deepen the ability to engage in education research? Enrollment restricted to graduate students. Enrollment limited to 12. B. Olsen

### **253. Research Design in Mathematics and Science Education. \***

Examines multiple approaches to designing research studies in mathematics and science education. Introduces multiple types of research designs and principles used by education researchers examining mathematics/science learning and teaching. Enrollment restricted to graduate students. Enrollment limited to 15. J. Moschkovich

**254. Critical and Alternative Paradigms in Education Research. \***

Examines theoretical foundations of critical and alternative research paradigms commonly used in education, including critical ethnography, participatory research, counter-storytelling, and social-design experiments. Examines critiques of qualitative/quantitative research from feminist and critical theory; surveys how such critiques have informed the development of new paradigms in education research; and explores the benefits and limits of selected alternative paradigms. Enrollment restricted to graduate students. Enrollment limited to 15. C. Cruz

**255. Intermediate Quantitative Methods. S**

Focuses on the applied statistical modeling and analysis of educational data (large-scale data sets), not on the mathematical foundations of science. Students learn to address quantitative research questions using general linear model (GLM) statistical methods. GLM includes regression analysis, analysis of variance (ANOVA), and analysis of covariance (ANCOVA). Students learn statistics by doing statistics. Prerequisite(s): introductory statistics course (course 236 or equivalent). Enrollment restricted to graduate students. Enrollment limited to 15. E. Mosqueda

**256. Advanced Qualitative Analysis in Education Research. \***

Emphasizes the analysis of qualitative data in education research and introduces interpretive analytical approaches for its use with empirical data, the use of coding software for ethnographic analysis, and video recording and transcription.

Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. C. Cruz

**260. The Teacher and The School: An Investigation of Related Practice, Reform, and Research. \***

Explores empirical and theoretical interconnections between teachers and teaching on the one side, and schools as situated organizations on the other. The course examines these various interconnections in relation to contemporary educational research, practice, and policy reform. Enrollment restricted to graduate students. Enrollment limited to 12. B. Olsen

**261. Thinking, Learning, and Teaching. \***

Examines multiple theoretical perspectives on thinking, learning, and teaching; the development of the whole person in a variety of cultural contexts; the roles thinking, learning, and teaching play in that development; and how researchers' and educators' conceptions shape instruction. Enrollment restricted to graduate students. Enrollment limited to 15. J. Scott

**262. Social and Cultural Context of Education. \***

Application of anthropological and sociological theories to study of education. Examines social, cultural, and linguistic context of schooling with particular attention to role of race, class, culture, power, and language in influencing schooling outcomes. Enrollment restricted to graduate students. Enrollment limited to 15. M. Gibson

**263. Foundations of Educational Reform. \***

Provides students with multiple analytic perspectives from which to examine important educational issues by analyzing political, historical, and philosophical origins

of educational reform in the U.S. and internationally. Enrollment restricted to graduate students. Enrollment limited to 15. R. Ogawa

**264. Research on Teacher Development and Teacher Education. S**

Addresses personal and professional development of teachers. Explores models of teacher education with specific attention to methods and processes by which teachers can be better prepared to work with culturally and linguistically diverse students. Enrollment restricted to graduate students. Enrollment limited to 15. B. Olsen

**265. Teacher as Educational Policy Maker. \***

Focuses on the role teachers play in making/implementing educational policy. Addresses how this topic is implicated in enhancing the educational opportunities available to students who, historically, have been underserved by schools. Enrollment restricted to graduate students. Enrollment limited to 15. L. Pease-Alvarez

**266. Program Evaluation and Action Research in Educational Reform. \***

Overview of the purpose of and practice in program evaluations in a variety of contexts with a specific focus on educational settings. Students learn the techniques of program evaluation; the historical and theoretical context of program evaluations, including its relation to experimental research; and how action research can be used in conducting field-based evaluations. Students should be familiar with basic quantitative and qualitative methodologies. Enrollment restricted to graduate students. Enrollment limited to 15. K. Tellez

**268. Schools, Communities, and Families. \***

Examines the nexus of schools, communities, and families, and, in particular, how collaboration across institutional boundaries can facilitate school and community reform. Enrollment restricted to graduate students. Enrollment limited to 15. R. Glass

**269A. First-Year Doctoral Proseminar (2 credits). \***

This three-quarter seminar supports professional development for first-year doctoral students. Students develop essential skills for success as scholars, discuss issues in educational research and practice, and are introduced to research by Education Department faculty. Enrollment restricted to education graduate students. Enrollment limited to 15. G. Bunch

**269B. First-Year Doctoral Proseminar (2 credits). \***

This three-quarter seminar supports professional development for first-year doctoral students. Students develop essential skills for success as scholars, discuss issues in educational research and practice, and are introduced to research by Education Department faculty. Enrollment restricted to education graduate students. Enrollment limited to 15. G. Bunch

**269C. First-Year Doctoral Proseminar (2 credits). \***

This three-quarter seminar supports professional development for first-year doctoral students. Students develop essential skills for success as scholars, discuss issues in educational research and practice, and are introduced to research by Education Department faculty. Enrollment restricted to education graduate students. Enrollment limited to 15. G. Bunch

**270A. Second-Year Professional Development Seminar (2 credits). \***

Three-quarter seminar supports professional development for second-year doctoral students. Activities include preparation of research and conference proposals, presentation of second-year project findings, and attendance at department colloquia. Enrollment restricted to second-year Ph.D. students. Enrollment limited to 12. J. Scott

**270B. Second-Year Professional Development Seminar (2 credits). \***

Three-quarter seminar supports professional development for second-year doctoral students. Activities include preparation of research and conference proposals, presentation of second-year project findings, and attendance at department colloquia. Enrollment restricted to second-year Ph.D. students. Enrollment limited to 12. J. Scott

**270C. Second-Year Professional Development Seminar (2 credits). \***

Three-quarter seminar supports professional development for second-year doctoral students. Activities include preparation of research and conference proposals, presentation of second-year project findings, and attendance at department colloquia. Enrollment restricted to second-year Ph.D. students. Enrollment limited to 12. J. Scott

**271. Theoretical Perspectives on Learning and Using Literacy. \***

Examines theoretical perspectives, educational issues, and scholarship related to use and development of literacy among diverse populations, particularly those who have not

fared well in U.S. schools. Enrollment restricted to graduate students. Enrollment limited to 12. J. Scott

**272. Sociolinguistics in Education. W**

Investigates discipline of sociolinguistics and explores actual ways in which sociolinguistics has become a useful lens for better understanding teaching, learning, and schooling. Conduct own sociolinguistic analyses of data collected for culminating project. Enrollment restricted to graduate students. Enrollment limited to 15. B. Olsen

**273. Language Acquisition, Bilingualism, and Education. \***

Foundations of first- and second-language acquisition and bilingualism with emphasis on implications for education in linguistically diverse settings. Topics include linguistic, cognitive, sociolinguistic, and sociocultural approaches to development of languages and the nature of individual and societal bilingualism. Enrollment restricted to graduate students. Enrollment limited to 15. G. Bunch

**274. Language and Power in Education. \***

Examines relationships between sociopolitical struggles and language/language practices. Students study ways in which Marxism, critical theory, and post structuralism have represented links between language and power, and investigate contemporary studies of language and power in education. Enrollment restricted to graduate students. Enrollment limited to 15. B. Olsen

## Education

### **276. Theory and Practice of Writing.\***

Explores first and second language-writing theory, research, and practice, especially relating to language minority students and others considered academically under-prepared. Focuses on educational settings from pre-school settings including families and communities. Enrollment restricted to graduate students. Enrollment limited to 15. G. Bunch, L. Pease-Alvarez

### **277A. Second-year Doctoral Proseminar (2 credits).\***

This three-quarter seminar supports professional development for second-year doctoral students as they prepare their qualifying materials and begin dissertation work. Prerequisite(s): courses 269 A-B-C. Enrollment restricted to graduate students. Enrollment limited to 20. The Staff

### **277B. Second-year Doctoral Proseminar (2 credits).\***

This three-quarter seminar supports professional development for second-year doctoral students as they prepare their qualifying materials and begin dissertation work. Prerequisite(s): courses 269 A-B-C. Enrollment restricted to graduate students. Enrollment limited to 20. The Staff

### **277C. Second-year Doctoral Proseminar (2 credits).\***

This three-quarter seminar supports professional development for second-year doctoral students as they prepare their qualifying materials and begin dissertation work. Prerequisite(s): courses 269 A-B-C. Enrollment restricted to graduate students. Enrollment limited to 20. The Staff

### **278. Critical Exploration of Reading Theory and Practice.\***

Doctoral seminar that examines historical and current research on reading processes and instructional practices. Intensive study of factors affecting the development of proficient, engaged, and reflective readers who can acquire new knowledge from text. Enrollment restricted to graduate students. Enrollment limited to 15. J. Scott

### **279A. Dissertation Supervision for Ed.D..\***

Supervision of Ed.D. candidate through third and fourth year of research analysis, writing, and editing of dissertation. Preparation for oral defense and assistance with bringing dissertation to standards of publication and conference presentation. Enrollment restricted to Ed.D. graduate students. Enrollment limited to 20. The Staff

### **279B. Dissertation Supervision for Ed.D..\***

Supervision of Ed.D. candidate through third and fourth year of research analysis, writing, and editing of dissertation. Preparation for oral defense and assistance with bringing dissertation to standards of publication and conference presentation. Enrollment restricted to Ed.D. graduate students. Enrollment limited to 20. The Staff

### **279C. Dissertation Supervision for Ed.D..\***

Supervision of Ed.D. candidate through third and fourth year of research analysis, writing, and editing of dissertation. Preparation for oral defense and assistance with bringing dissertation to standards of publication and conference presentation. Enrollment restricted to Ed.D. graduate students. Enrollment limited to 20. The Staff

### **280. Academic Language.\***

Considers and critiques conceptualizations of the language used for academic pursuits, from the early years of schooling to higher education. Focuses on implications for research and practice related to the education of students in linguistically diverse schools and societies. Enrollment restricted to graduate students. Enrollment limited to 15. G. Bunch

### **281. Conceptual Change in Science and Mathematics.\***

Examines approaches in cognitive science, mathematics education, and science education to documenting student conceptions in science and mathematics, defining conceptual change, and describing relationship between conceptual change and learning with understanding. Enrollment restricted to graduate students. Enrollment limited to 12. J. Moschkovich

### **282. Informal Learning in Sciences and Mathematics.\***

Explores research on learning outside of school in multiple settings such as museums, after-school clubs, aquariums, workplaces, and homes. Readings draw from multiple fields and disciplines, including cognitive psychology, cognitive anthropology, cognitive science, education, museum education and evaluation, science, and mathematics education. Examine theoretical approaches to describing and understanding how people learn science and mathematics outside of school, empirical studies documenting learning in multiple non-school settings, and diversity issues in out-of-school settings. Enrollment restricted to graduate students. Enrollment limited to 15. D. Ash

## Education

### **283. Equity and Social Justice in Mathematics and Science Education. \***

Examines the theory, research, policy and practice of social justice and equity in mathematics and science education in local, national, and international contexts. Emphasizes the promotion of equity and critical mathematics and science literacy in schools and communities. Enrollment restricted to graduate students. J. Shaw

### **284. Gender in Mathematics and Science Education. \***

Explores basic aspects of gender in the fields of mathematics and science education. Discusses historical trends, current dilemmas, and how science and mathematics block or enable access for women. Enrollment restricted to graduate students. Enrollment limited to 15. D. Ash

### **285. Culture and Learning. \***

Examines multiple approaches to the study of the relation between culture and learning. Readings include historical and contemporary perspectives from cognitive science, cognitive anthropology, cross-cultural psychology, cultural psychology, and socio-cultural theories as frameworks for the study of culture and learning. Enrollment restricted to graduate students. Enrollment limited to 15. J. Moschkovich

### **286. Special Topics in Math and Science Education. W**

Focuses on particular issues of theoretical importance to research in mathematics and science education. Topics vary from year to year. Particular issues in cognition, learning, teaching, curriculum, and assessment in mathematics and science education may be covered. Enrollment restricted to graduate students. Enrollment limited to 15.

May be repeated for credit. D. Ash

### **287. Issues in Educational Assessment. \***

Familiarizes students with the basic concepts of educational assessment and explores issues related to the design and implementation of educational assessment as well as the application of educational assessment in educational research. Enrollment restricted to graduate students. Enrollment limited to 12. J. Shaw

### **288. Ethnographies of Education. \***

Offers opportunity to critique a range of book-length ethnographic studies of education focusing on relationship between culture, learning, and schooling in the U.S. with comparative studies from other countries. Enrollment restricted to graduate students. Enrollment limited to 12. The Staff

### **289. School Organization. \***

Applies multiple perspectives drawn from organizational theory, highlighting important aspects of organization of schools, including their operational environment, instructional organization, and professional and bureaucratic dimensions. Enrollment restricted to graduate students. Enrollment limited to 12. R. Ogawa

### **290. CHAT and Educational Practice and Research. \***

Introduction to cultural-historical activity theory (CHAT) based on work of Vygotsky, Bakhtin, and contemporary developments of their ideas. Explores the utility of CHAT as a framework for thinking about educational practice and research. Enrollment restricted to graduate students. Enrollment limited to 15. J. Moschkovich

### **291. Globalization and Transnationalism in Education. \***

Examines educational access and advancement in several nations affected by globalization, national policies, and localized identity and opportunity structures. Attention to language and cultural expectations relevant to research in international contexts and how this knowledge provides reflection on the American condition. (Formerly "Comparative and International Education.") Enrollment restricted to graduate students. Enrollment limited to 15. J. Gordon

### **292. Ideology and Education. \***

Philosophical study of the theory of ideology from Marx to the present and how ideologies (racism, sexism, classism, linguisticism, abilityism) become embodied, reproduced, resisted, and transformed (and particularly the role of education therein). Enrollment restricted to graduate students. Enrollment limited to 22. R. Glass

### **293A. Research Apprenticeship (2 credits). F,W,S**

Research apprenticeship under guidance of faculty member during first or second year of doctoral studies. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **293B. Research Apprenticeship. F,W,S**

Research apprenticeship under guidance of faculty member during first or second year of doctoral studies. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **294. Second-Year Research Project. F,W,S**

Doctoral students work with faculty advisors to plan, carry out, and

## Education

write up small independent research project during second year of graduate studies. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **295. Critical Theories of Education. F**

Investigates critical theories in education. Situates the themes against and within critical theory and philosophic foundations of Paulo Freire's theory of liberation education. Elaborates these themes within the discourses on critical race theory and education, and feminism and education. Enrollment restricted to graduate students. Enrollment limited to 15. C. Cruz

### **296. Educational Policy and the Context of Teachers' Work. \***

Focuses on both the conceptual and methodological developments in the study of policy and on the research relation to the policy context of teachers' work. Enrollment restricted to graduate students. Enrollment limited to 12. L. Bartlett

### **297. Independent Study. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **297F. Independent Study (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **298. TA Apprenticeship (2 credits). F,W,S**

Students work with a faculty member who is teaching an undergraduate or MA/Credential course. Students will not be responsible for final grades, narrative evaluations, or holding discussion section. The expected course time commitment is limited to 2-3 hours per week, plus class meeting time. Students gain perspectives and practices of teaching undergraduate and graduate courses, working with the instructor on lesson planning, class instruction, and grading some student work. Course cannot be repeated for course credit. Enrollment restricted to graduate students. The Staff

### **299. Thesis Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

\* Not offered in 2015-16

Revised: 09/01/15

## BASKIN SCHOOL OF ENGINEERING

---

The Baskin School of Engineering has a high-technology focus incorporating programs and curricula that educate students to meet the changing demands of society and a high-technology global marketplace. The school offers a stimulating academic environment that provides a foundation for professional growth as well as a lifetime of learning. The Baskin School's programs and courses prepare students for the human aspects, as well as the technical challenges, of careers in engineering, computer science, and bioinformatics. The Baskin School of Engineering includes the Department of Applied Mathematics and Statistics, the Department of Biomolecular Engineering, the Department of Computer Engineering, the Department of Computational Media, the Department of Computer Science, the Department of Electrical Engineering, and the Department of Technology Management.

- Biomolecular engineering and bioinformatics master of science (M.S.) and doctor of philosophy (Ph.D.)
- Computer engineering M.S. and Ph.D.
- Computer science M.S. and Ph.D.
- Games and playable media M.S.
- Electrical engineering M.S. and Ph.D.
- Statistics and applied mathematics M.S. and Ph.D.
- Technology and information management M.S. and Ph.D.

These programs are described in subsequent sections. The aim of these programs is to develop professionals who can address the complex scientific and technological problems of today and tomorrow.

---

## UNDERGRADUATE STUDY

---

The School of Engineering offers 12 undergraduate degree programs in the following majors:

- Bioengineering bachelor of science (B.S.)
- Bioinformatics B.S. or combined B.S./Graduate
- Computer engineering B.S. or combined B.S./M.S.
- Computer science bachelor of arts (B.A.) and B.S.
- Computer science: computer game design B.S.

---

## GRADUATE STUDY

---

The Baskin School of Engineering offers 13 graduate programs designed to prepare students for advanced study and research in major areas of biomolecular, computer, and electrical engineering, as well as computer science and statistics and applied mathematics:

## School of Engineering

- Electrical engineering B.S.
- Network and digital technology B.A.
- Robotics engineering B.S.
- Technology and information management B.S.

**Bioengineering.** The bioengineering program prepares graduates for a rewarding career at the interfaces between engineering, medicine and biology. UCSC bioengineering graduates will have a thorough grounding in the principles and practices of bioengineering and the scientific and mathematical principles upon which they are built; they will be prepared for further education (both formal and informal) and for productive employment in industry. The program includes a broad range of courses in the sciences, engineering, ethics, and other topics, and is co-sponsored by the Departments of Biomolecular Engineering, Computer Engineering, Electrical Engineering, and Molecular, Cell and Developmental Biology.

**Bioinformatics.** The bioinformatics curriculum combines mathematics, the physical sciences, computer science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing and gene expression chips. The immense growth of biological information stored in computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of mathematics, science, and engineering. The undergraduate bioinformatics degree program prepares students for graduate school or a career in the fast-paced pharmaceutical or biotechnology industries.

**Computer Engineering.** The computer engineering curriculum focuses on making digital systems that work. It overlaps with computer science on one end (software systems) and with electrical engineering on the other (digital hardware). The emphasis of our program is on design rather than analysis—on making things work, rather than on explaining the abstract theory of computation or electronics. The program's emphasis on problem solving provides both excellent training for future engineers and a strong foundation for graduate study. The computer engineering B.S. program is accredited by The Engineering Accreditation Commission of ABET, <http://www.abet.org>. The combined B.S./M.S. program provides an opportunity for outstanding undergraduates to begin advanced study and earn both degrees in five years.

**Computer Science.** The computer science curriculum has options that include topics in hardware and software, giving students a solid grounding in both theoretical and practical aspects of computer

technology and computer usage. The bachelor of arts focus is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including many courses outside of science and engineering. The bachelor of science curriculum has a stronger concentration in the sciences, with more courses in computer science and computer engineering, as well as courses in physics or chemistry. Students become proficient in many areas, with a good academic foundation for various careers in the software industry, as well as preparation for graduate school.

**Computer Science: Computer Game Design.** The computer game design curriculum is a four-year interdisciplinary program that focuses on the technical, dramatic, and artistic elements of computer games. The program provides a rigorous education in computer science, in concert with a broad introduction to those aspects of art, music, narrative, digital media, and computer engineering most relevant to games. An intensive year-long game design studio sequence permits students to create substantial video games as part of a multi-student team. Students receive proficiency in many aspects of computer science, a good academic foundation for careers in the computer game industry or information technology industry, or for the pursuit of graduate studies in computer science, or computer game design.

**Electrical Engineering.** The electrical engineering curriculum provides a balance of engineering science and design and allows students to specialize in both the traditional topics and the latest subjects in electrical engineering. Students may concentrate their electives in the areas of electronics and optics, communications, or signals and systems. The major is designed to attract motivated students who, upon graduation, will be sought by employers in the high-tech industry. The electrical engineering program is accredited by The Engineering Accreditation Commission of ABET, <http://www.abet.org>.

**Network and Digital Technology.** The network and digital technology B.A. program provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes which make these technologies function. The program, through its flexible requirements, is especially tailored to students who wish to combine technology with other fields, such as through a double major or a minor, or who, through the choice of electives, wish to concentrate on the digital design or computer networks aspects of computer

engineering in preparation for future employment. The network and digital technology B.A. program is offered by the Computer Engineering Department.

**Robotics Engineering.** The robotics engineering program prepares graduates for rewarding careers at the interfaces between electrical, computer, and mechanical engineering. UCSC robotics engineering graduates will have a thorough grounding in the principles and practices of robotics and control, and the scientific and mathematical principles upon which they are built; graduates will be prepared for further education (both formal and informal) and for productive employment in industry.

**Technology and Information Management.** The technology and information management (TIM) curriculum is multidisciplinary and focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology (IT) solutions will be applied—through economics, business, and management of technology courses. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology.

---

## UNDERGRADUATE MINORS

---

Undergraduate students may choose from the following seven minor options:

**Applied Mathematics.** The applied mathematics minor is available to students who wish to develop 1) proficiency in modeling real-life problems using mathematics and 2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

**Bioinformatics.** The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics.

**Computer Engineering.** The computer engineering minor provides a solid foundation in digital hardware, electronics, and computer software, as well as the

prerequisite material in mathematics and physics. The minor is well-suited to students who wish to take part in the design of computer and embedded systems in any discipline.

**Computer Science.** The computer science minor is available for students whose primary interest is in another area, and are interested in the applications of computer science in other areas of study, from art and music to business and science.

**Electrical Engineering.** The electrical engineering minor provides a solid foundation in the core areas of electronic circuits and signals and systems, as well as the prerequisite material in mathematics and physics. Concentration of upper-division electives in either of the major tracks constitutes substantial and focused work in the discipline of electrical engineering. This minor is particularly suitable for students with majors in applied physics or any School of Engineering major.

**Technology and Information Management.** The technology and information management minor provides undergraduates in the School of Engineering as well in other programs and divisions in the university, such as economics and business management economics, the physical and biological sciences, and arts, the opportunity to expand the breadth of their knowledge and training to include the management of information systems and the management of technology.

**Statistics.** The statistics minor is available for students who wish to gain a quantitative understanding of how to a) measure uncertainty and b) make good decisions on the basis of incomplete or imperfect information and apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

---

## UNDERGRADUATE ADVISING OFFICE

---

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Students may obtain additional information and assistance on the School of Engineering undergraduate advising web site: <http://ua.soe.ucsc.edu/>.

## ADMISSION TO SCHOOL OF ENGINEERING MAJORS

### HIGH SCHOOL PREPARATION FOR ENGINEERING STUDENTS

It is recommended that high school students intending to apply to a School of Engineering major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare students for these majors.

### COLLEGE BOARD ADVANCED PLACEMENT CREDIT

Prospective students are encouraged to take the College Board Advanced Placement (AP) and International Baccalaureate (IBH) Examinations as acceptable scores on these examinations may satisfy both university or major degree requirements. Prospective engineering students should consider taking examinations in computer science, mathematics, economics, chemistry, or biology. Students must provide official examination scores to the UCSC Office of Admissions to be granted credit toward course prerequisites or degree requirements. The following AP and IBH scores are accepted for course credit requirements as follows:

### COMMON ENTRANCE EXAMINATION FOR ADMISSION TO POLYTECHNICS

CEEP AP Exam	Score	UCSC Course Credit
Biology	5	Biology 20A: Cell and Molecular Biology, and
		Biology 20B: Development and Physiology
Chemistry	5	Chemistry 1A, General Chemistry
Computer Science:		
Exam A	3	Computer Science 5J: Introduction to Programming in Java
	4,5	Computer Science 12A/L: Introduction to Programming
Computer Science:		
Exam AB	4,5	Computer Science 12 A/L: Introduction to Programming

CEEP AP Exam	Score	UCSC Course Credit
		and Lab and Computer Science 12B/M: Introduction to Data Structures Lab
Economics:		
Microeconomics	4 or 5	Economics 1: Introductory Microeconomics
Economics:		
Macroeconomics	4 or 5	Economics 2: Introductory Macroeconomics
Mathematics:		
Calculus AB	3	Mathematics 3 or AMS 3: Precalculus
Mathematics:		
Calculus AB	4 or 5	Mathematics 19A: Calculus for Science, Engineering and Math
Mathematics:		
Calculus BC	3	Mathematics 19A: Calculus for Science, Engineering and Math (enrollment in first quarter calculus is recommended for proposed majors in the School of Engineering)
Mathematics:		
Calculus BC	4 or 5	Mathematics 19A: Calculus for Science, Engineering and Math and Mathematics 19B: Calculus for Science, Engineering and Math
Statistics	4 or 5	Applied Mathematics and Statistics 5

### INTERNATIONAL BACCALAUREATE CREDIT

IBH Exam	Score	UCSC Course Credit
Computer Science	5	Computer Science 12A/L: Introduction to Programming and Lab
Computer Science	6 or 7	Computer Science 12A/L: Introduction to Programming and Lab and Computer Science 12B/M: Introduction to Data Structures and Lab

## School of Engineering

Students may check with the Office of Admissions for details about other AP and IBH examinations that also satisfy university requirements.

### ADMISSION AS FIRST-YEAR STUDENTS

---

Students interested in pursuing a School of Engineering major should indicate the major as their first or second choice on the UC application for admissions. Some school of engineering programs offer direct acceptance to qualified first-year applicants. For those engineering majors offering direct acceptance, admission is based upon high school grade point average, courses completed in mathematics and sciences, scores on standardized tests, and/or their personal statement. Some majors may specify criteria for directly accepted students to remain declared in the major. Please consult the department program statements for more information about which majors offer direct admission for first-year students and additional criteria, where applicable.

### POST FIRST-YEAR CURRENT STUDENTS ACCEPTANCE TO MAJORS

---

Students interested in declaring a School of Engineering major can do so by following the major declaration policy for that major as specified in the corresponding program statement. Major declaration must be completed by the sixth quarter of study at UCSC, but can be done earlier. Students are encouraged to declare as early as possible, to ensure placement into courses required for the major. Specific information about requirements and the School of Engineering major declaration process can be found at <http://ua.soe.ucsc.edu/>.

### JUNIOR TRANSFER ACCEPTANCE TO MAJORS

---

The School of Engineering strongly encourages applications from transfer students. Due to the prerequisite structure for upper-division courses, prospective transfer students should have completed as many of the lower-division major requirements as possible to complete the degree within a reasonable time. Students must plan carefully because many courses must be taken sequentially.

Transfer students should **not** follow the Intersegmental General Education Transfer Curriculum (IGETC) because it will not provide transfer students with enough mathematics and engineering courses to allow them to complete School of Engineering programs at UCSC in two years.

Students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from the School of

Engineering must indicate a School of Engineering major as their first choice on their UC application.

Junior transfers who do not list a School of Engineering major on their application to UCSC will not be considered for admission to such majors after the first day of their first quarter on campus. Junior transfers who are qualified by the applicable declaration of major deadline will be considered by exception.

Acceptance into the major is based on the student's academic college record and preparation for the major. Applicants are encouraged to take and excel in as many courses that are equivalent to the department's lower-division major requirements as possible. For many School of Engineering majors, this includes completion of a year of calculus (accepted as equivalent to Mathematics 19A-B), linear algebra, differential equations, a year of calculus-based physics courses (accepted as equivalent to Physics 5A, 5B, 5C), and two programming courses (accepted as equivalent to Computer Science 12A/L or Computer Engineering 13/L, Computer Science 12B/M, and Computer Engineering 12/L) are strongly recommended.

Students who are approved for acceptance and who have course credit for all the lower-division major requirements must declare the major in their first term of enrollment at UCSC. The status of students who are approved for acceptance but who, upon review of their transcripts, are found not to have course credit for all the lower-division major requirements must complete those courses during their first term at UCSC in order to declare the major at the beginning of the following term at UCSC.

Students who are unsuccessful in their attempt to complete their remaining lower-division major requirement courses should be prepared to declare an alternative major outside of the School of Engineering.

### COURSE SUBSTITUTIONS

---

Undergraduate engineering students who wish to complete a course at another institution or study abroad must first consult the School of Engineering Undergraduate Advising Office. The advising office may require that a Petition for Course Substitution be approved before credit for a course completed at another institution can be applied to any School of Engineering major requirement. This petition is in addition to and separate from the transfer credit awarded by the university. Petition forms are available at the undergraduate advising office and online at <http://ua.soe.ucsc.edu/policies-forms>. Each petition must be accompanied by a course description, syllabus, and verification of the number of credits earned with a

grade of C or better. To guarantee equivalency, departments may sometimes require a grade of B or better. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations.

---

## APPEAL PROCESS

---

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, the college, and the Office of the Registrar of the decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Student Affairs Office at (831) 459-5840 or e-mail [advising@soe.ucsc.edu](mailto:advising@soe.ucsc.edu).

---

## LETTER GRADE POLICY

---

Starting fall 2014, all students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade.

---

## ETHICS REQUIREMENT

---

Graduates of the Baskin School of Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available at <http://www.ieee.org/about/corporate/governance/p7-8.html> and <http://www.acm.org/about/code-of-ethics>. Students of the Baskin School of Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

---

## COURSES TAKEN ELSEWHERE AFTER ENROLLMENT

---

Once enrolled in the School of Engineering continuing students must have permission to subsequently take courses elsewhere. Course substitutions, such as taking a course at another UC campus, in the Education Abroad Program (EAP), or at a community college, require approval prior to taking the class.

Continuing students must get pre-approval before taking a class at a California community college. Applications and procedures for pre-approval can be obtained from and submitted to the Undergraduate Advising Office.

When a student declares their major, minor, or proposed major in a School of Engineering program, the decision as to whether a course taken elsewhere is accepted for this School of Engineering major or minor is made by the major department at that point. (Note: There is no guarantee that a course will be applicable toward a School of Engineering major, minor, or proposed major even if the student has completed more advanced courses in that department.)

---

## SCHOOL-WIDE INFORMATION AND POLICIES

---

---

### COMPUTING FACILITIES

---

The Baskin School of Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec.

All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access the School of Engineering and the Information Technology Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see <http://its.ucsc.edu/>.

---

### PREREQUISITES

---

Because of the sequential nature of the School of Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly Schedule of Classes. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped.

For example, to enroll in Computer Science 101, a prerequisite to many upper-division courses, the prerequisite courses that must be completed or in progress are Computer Science 12B, Computer Engineering 16, Mathematics 19B, and one of the following: Mathematics 21, 22, 23A, 24, or Applied Mathematics and Statistics 10.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite, but is not listed in current

## School of Engineering

articulation agreements, should promptly consult with the School of Engineering's staff advisers for guidance. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See the Course Substitutions section under Admission to School of Engineering Majors.)

### PERMISSION NUMBERS

---

Students not meeting the regular prerequisite requirements for courses sponsored by the Baskin School of Engineering may petition the course instructor to receive a permission number to enroll. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no instructor has been assigned to the course, please contact the Undergraduate Advising Office for direction.

### MATERIALS FEE

---

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student will assemble into a project and keep. Please refer to the Baskin Engineering Laboratory Support web page for specific course material fee amounts:

<https://intranet.soe.ucsc.edu/lab-support/fees>.

### MISCELLANEOUS FEES

---

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information:

<https://intranet.soe.ucsc.edu/lab-support/fees>.

# APPLIED MATHEMATICS AND STATISTICS

---

2015-16 General Catalog

Baskin School of Engineering

(831) 459-2158

<http://www.soe.ucsc.edu>

[Faculty](#) | [Course Descriptions](#)

---

## PROGRAM DESCRIPTION

---

Applied mathematics and statistics are disciplines devoted to the use of mathematical methods and reasoning to solve real-world problems of a scientific or decision-making nature in a wide variety of subjects, principally (but not exclusively) in engineering, medicine, the physical and biological sciences, and the social sciences. Applied mathematical modeling often involves the use of systems of (partial) differential equations to describe and predict the behavior of complex real-world systems that unfold dynamically in time. Statistics, construed broadly, is the study of uncertainty: how to measure it (using ideas and methods in probability theory), and what to do about it (using concepts from statistical inference and decision theory).

The Applied Mathematics and Statistics Department at UCSC offers master's and doctoral programs in Statistics and Applied Mathematics, or Applied Mathematics and Statistics, depending on chosen emphasis, and a master's program in Scientific Computing and Applied Mathematics (SciCAM). The goal of these programs is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The department also offers a designated emphasis in statistics, a minor in statistics, and a minor in applied mathematics.

Additional information on these programs can be found on the department's web pages at [www.soe.ucsc.edu](http://www.soe.ucsc.edu).

---

### UNDERGRADUATE PROGRAMS

---

#### REQUIREMENTS OF THE MINOR IN STATISTICS

---

The statistics minor is available for students who wish to gain a quantitative understanding of how to (a) measure uncertainty and (b) make good decisions on the basis of incomplete or imperfect information, and to apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

Students are required to take a two-quarter basic calculus sequence:

- Applied Mathematics and Statistics 11A-B or Economics 11A-B or Applied Mathematics and Statistics 15A-B or Mathematics 11A-B or Mathematics 19A-B or Mathematics 20A-B
- Plus one course from each of the following seven categories:
  - Statistical Concepts: Applied Mathematics and Statistics 5 or 7/L
  - Computer Programming: Biomolecular Engineering 160/L, Computer Science 12A/L or 5C or 5J or 5P or Computer Engineering 13/L
  - Linear Algebra: Applied Mathematics and Statistics 10 or Mathematics 21 (also recommended that students take Applied Mathematics and Statistics 20 or Mathematics 24)
  - Multivariate Calculus: Mathematics 22 or both Mathematics 23A and Mathematics 23B
  - Probability: Applied Mathematics and Statistics 131 Applied Mathematics and Statistics 203 or Computer Engineering 107
  - Statistical Inference: Applied Mathematics and Statistics 132
  - Computational Methods: Applied Mathematics and Statistics 147
- Plus two electives from the following category:
  - Statistical Elective: Applied Mathematics and Statistics 156; 198; 202; 205B; 206B; 207; 256;
  - Biomolecular Engineering 205; Computer Engineering 108; 145; Computer Science 142; Economics 104; 113; 114; 120; 161B; and 190; Electrical Engineering 151; Mathematics 114; Psychology 181; Sociology 103A; Technology and Information Management 230.

## Applied Mathematics and Statistics

**Note:** Students planning graduate work in statistics are recommended to choose Mathematics 23A-B, Applied Mathematics and Statistics 205B, and Mathematics 105A-B.

### REQUIREMENTS OF THE MINOR IN APPLIED MATHEMATICS

---

The applied mathematics minor is available for students who wish to develop (1) proficiency in modeling real-life problems using mathematics and (2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Students are required to take the four-quarter calculus sequence:

- Calculus Sequence: Mathematics 19A-B or Mathematics 20A-B, and Mathematics 23A-B
- Plus one of the following sequences:
  - Applied Mathematics and Statistics 10 and 20
  - Mathematics 21 and 24
  - Physics 116A and 116B

**Note:** Students who complete Mathematics 21 and 24 or Physics 116A and 116B, are strongly recommended to complete the MATLAB self-paced tutorial at:

<http://matlab-training.soe.ucsc.edu/>

- Plus one course from each of the following categories:
  - Probability Theory: Applied Mathematics and Statistics 131 or Computer Engineering 107
  - Dynamical Systems: Applied Mathematics and Statistics 114 or Applied Mathematics and Statistics 214
  - Introduction to Numerical Methods: Applied Mathematics and Statistics 147, Physics 115, or Earth Sciences 119
  - Partial Differential Equations: Applied Mathematics and Statistics 212A, Physics 116C, or Mathematics 107
- Plus one applied-mathematics elective from the following list:
- Applied Mathematics elective: Applied Mathematics and Statistics 107/217, 115/215, 132, 198, 212B, 213, 216, 231, 290B
- Electrical Engineering 103, 154; Computer Engineering 115; Mathematics 103A, 117, 121A; Physics 105, 139A, 139B, 171.

Students may also propose other electives which use applied mathematical methods, subject to approval by the department.

---

### GRADUATE PROGRAMS (M.S., PH.D.)

---

The department of Applied Mathematics and Statistics at UCSC offers both masters and doctoral degrees within the Statistics and Applied Mathematics (SAM) graduate program, with respective emphasis in statistics (for a degree title in "Statistics and Applied Mathematics") or in applied mathematics (for a degree title in "Applied Mathematics and Statistics"). In addition, the department also offers an independent masters program in "Scientific Computing and Applied Mathematics (SciCAM)."

The goal of the two tracks of the SAM graduate program is to help students develop into independent scholars specialized in statistics or applied mathematics respectively, who are prepared for productive careers in research, teaching, and industry. The master of science (M.S.) degree may be used as a terminal degree or as the first step toward the associated doctor of philosophy degree (Ph.D.).

The goal of the SciCAM M.S. program is primarily to prepare students interested in scientific computing for productive careers in industry. However, it also serves as an excellent further preparation for students who prefer to pursue an academic career and wish to transfer into a Ph.D. program later, either in scientific computing/applied mathematics, or in the field related to their undergraduate degree.

---

### GRADUATE PROGRAM IN STATISTICS AND APPLIED MATHEMATICS

---

#### REQUIREMENTS FOR A GRADUATE DEGREE IN STATISTICS AND APPLIED MATHEMATICS

---

This track is for students emphasizing statistics. All students must complete the core courses described below.

#### REQUIRED CORE COURSES:

---

- 200 Research and Teaching in Applied Mathematics and Statistics
- 203 Introduction to Probability Theory
- 205B Intermediate Classical Inference
- 206B Intermediate Bayesian Inference
- 207 Intermediate Bayesian Statistical Modeling
- 211 Foundations of Applied Mathematics
- 256 Linear Statistical Models
- 280B Seminar in Statistics and Applied Mathematical Modeling

## Applied Mathematics and Statistics

In addition to these 35 credits, master of science (M.S.) students must complete two additional 5-credit courses from the approved list, for a total requirement of 45 credits; doctor of philosophy (Ph.D.) students must complete four additional 5-credit courses from the approved list, for a total requirement of 55 credits.

### REQUIREMENTS FOR A GRADUATE DEGREE IN APPLIED MATHEMATICS AND STATISTICS

---

This track is for students emphasizing Applied Mathematics. All students must complete the core courses described below.

#### REQUIRED CORE COURSES:

---

200 Research and Teaching in Applied Mathematics and Statistics

203 Introduction to Probability Theory

211 Foundations of Applied Mathematics

212A Applied Mathematical Methods I

212B Applied Mathematical Methods II

213B Numerical Solutions of Differential Equations

214 Applied Dynamical Systems

280B Seminar in Statistical and Applied Mathematical Modeling

In addition to these 35 credits, master of science (M.S.) students must complete two additional 5-credit courses from the approved list, for a total requirement of 45 credits; doctor of philosophy (Ph.D.) students must complete four additional 5-credit courses from the approved list, for a total requirement of 55 credits.

For both emphasis tracks, M.S. students will be allowed to substitute up to two courses with their required research project in which they conduct a research program in one or two of the quarters of their second year. The project will consist of solving a problem or problems from the selected area of application and will be presented to the sponsoring faculty member as a written document.

Ph.D. students will be required to serve as teaching assistants for at least two quarters during their graduate study. Certain exceptions may be permitted for those with extensive prior teaching experience, for those who are not allowed to be employed due to visa regulations, or for other reasons approved by the graduate director.

#### QUALIFYING EXAMINATIONS

---

At the end of the first year, all students will take a pre-qualifying examination covering the six (non-seminar) core courses. This examination will have two parts: an in-class written examination, followed by a take-home project involving data analysis. Students who do not

pass this examination will be allowed to retake it before the start of the following fall quarter; if they fail the second examination they will be dismissed from the program.

Ph.D. students must complete the oral proposal defense, through which they advance to candidacy, by the end of the spring quarter of their third year. The proposal defense is a public seminar as part of an oral qualifying examination given by the qualifying committee.

#### THESIS AND/OR DISSERTATION REQUIREMENTS

---

A capstone project is required for the M.S. degree and a dissertation for the Ph.D. degree.

For the M.S. degree, students will conduct a capstone research project in their second year (up to three quarters). Students must submit a proposal to the potential faculty sponsor by the start of the fourth academic quarter. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the project. The project will involve the solution of a problem or problems from the selected area of application. When the project is completed and written, it will be submitted to and must be accepted by a committee of two individuals, consisting of the faculty adviser and one additional reader. Additional readers will be chosen appropriately from within the Applied Mathematics and Statistics Department or outside of it. Either the adviser or the additional reader must be from within the Applied Mathematics and Statistics Department.

A dissertation is required for the Ph.D. degree. Ph.D. students must select a faculty research adviser by the end of the second year. A written dissertation proposal will be submitted to the adviser, and filed with the graduate secretary. A qualifying examination committee will be formed, consisting of the adviser and three additional members, approved by the Chair of the Graduate Program and the Dean of the Graduate Division. The student will submit the written dissertation proposal to all members of the committee and the graduate secretary no less than one month in advance of the qualifying examination. The dissertation proposal will be formally presented in a public oral qualifying examination with the committee, followed by a private examination.

Students will advance to candidacy after they have completed all course requirements (including removal of all incompletes), passed the qualifying examination, and paid the filing fee. Under normal progress, a student will advance to candidacy by the end of the spring quarter of her/his third year. A student who has not advanced to candidacy by the start of the fourth

## Applied Mathematics and Statistics

year will be subject to academic probation. Upon advancement to candidacy, a dissertation reading committee will be formed, consisting of the dissertation supervisor and at least two additional readers appointed by the Graduate Program chair upon recommendation of the dissertation supervisor. At least one of these additional readers must be in the Applied Mathematics and Statistics Department. The committee is subject to the approval of the Graduate Division.

The dissertation will consist of a minimum of three chapters composed of material suitable for submission and publication in major professional journals in statistics or applied mathematics. The completed dissertation will be submitted to the reading committee at least one month before the dissertation defense, which consists of a public presentation of the research followed by a private examination by the reading committee. Successful completion of the dissertation defense is the final requirement for the Ph.D. degree.

### RELATIONSHIP OF MASTERS AND DOCTORAL PROGRAMS

---

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may proceed into the Ph.D. program, and students in the Ph.D. program can receive a M.S. degree upon completion of M.S. requirements, including the capstone research project. Each Ph.D. student will be required to have knowledge of statistics and applied mathematics equivalent to that required for the M.S. degree. In addition, Ph.D. candidates will be required to complete coursework beyond the M.S. level.

### TRANSFER CREDIT

---

Up to three School of Engineering courses fulfilling the degree requirements of either the M.S. or Ph.D. degrees may be taken before beginning the graduate program through the concurrent enrollment program. Ph.D. students who have previously earned a master's degree in a related field at another institution may substitute courses from their previous university with approval of the adviser and the graduate committee. Courses from other institutions may not be applied to the M.S. degree course requirements.

Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC. At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

### REQUIREMENTS FOR A DESIGNATED EMPHASIS TO AN EXTERNAL DEGREE PROGRAM

---

Students from another degree program who meet the following requirements can have the designated emphasis of statistics<sup>2</sup> annotated to their degree title. For example, a Ph.D. student in electrical engineering who meets the requirements would get a certification that read Ph.D. Electrical Engineering (Statistics). The course requirements are:

#### Required Core Courses:

203 Introduction to Probability Theory

206 Classical and Bayesian Inference (or 206B Intermediate Bayesian Inference)

207 Intermediate Bayesian Statistical Modeling

256 Linear Statistical Models

and one other statistics course from a list of approved courses in AMS (currently 202, 205B, 221, 223, 225, 241, 245, 261, 263, 274, and 291).

### GRADUATE PROGRAM IN SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS (SCICAM)

---

#### PROGRAM LEARNING OUTCOMES (PLOS)

##### M.S. PLOS:

---

1. The ability to take a real-life science or engineering problem, and create a mathematical model of it, under supervision or with the help of discussions with colleagues.
2. Proficiency in analytical methods for the solution of linear algebra problems, ordinary and partial differential equations.
3. Proficiency in the construction of numerical algorithms for the solution of linear algebra problems, as well as ordinary and partial differential equations.
4. Proficiency in at least two scientific computing languages such as: Fortran, C, Python, R, Matlab, etc. Familiarity with Unix-type operating systems, the use of compilers, professional scientific computing libraries, efficient IO algorithms, data visualization tools, etc.
5. Proficiency in the two main parallel computing paradigms (shared vs. distributed memory) and in the use of OpenMP and MPI. Familiarity with parallel architectures and with supercomputing environments such as batch submission scripts, data transfer protocols, scripting, etc.
6. The ability to identify and implement, among all of the methods and languages known, the most

## Applied Mathematics and Statistics

appropriate and efficient approach for the original problem posed.

7. The ability to analyze critically the results from the model obtained, and to present them clearly and coherently to peers (orally and/or in writing).

### Assessment:

The progress of each student towards the PLOs will be monitored by the program faculty through:

- regular formative and summative assessments in the classroom context (participation, homework, quizzes, midterms);
- final examinations or final projects in each of the individual core course;
- the comprehensive capstone requirement (whether thesis or comprehensive exam).

## REQUIREMENTS FOR A GRADUATE DEGREE IN SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS

---

### Required core courses and foundational requirements:

209 Foundations of Scientific Computing

212A Applied Mathematical Methods I

213A Numerical Linear Algebra

213B Numerical Solutions of Differential Equations

214 Applied Dynamical Systems

250 Introduction to parallel computing

Students in the SciCAM program must also demonstrate mastery in the foundations of Scientific Computing and Applied Mathematics, either by producing evidence through undergraduate transcripts, or by taking some or all of the following foundational courses upon entry to the M.S. program: AMS 147 (Computational Methods and Applications), AMS 210 (Foundations of Scientific Computing) and AMS 211 (Foundations of Applied Mathematics).

### Electives and capstone requirements:

**Approved elective courses:** Any regular graduate AMS course not already in the core except AMS 200 and supervised research courses; a list of current allowable electives in other departments is maintained by the graduate director, and updated on a yearly basis. Students may also petition the program to add one or more courses to the elective list. Note that some upper-division electives are allowed, bearing in mind that no more than a total of 15 credits of upper-division courses may be used to satisfy the degree requirements.

Students in the SciCAM program may pursue a Plan I (thesis capstone) or a Plan II (comprehensive examination capstone) curriculum.

Candidates for a Plan I capstone must, in addition to the 25 credits required from core courses, (1) complete one additional 5-credit course from the approved elective list, (2) complete 10 credits of supervised research (in the form of AMS 297 or AMS 298 with one of the program faculty), and (3) write a thesis.

The thesis requirements are as follows. Students must submit a thesis proposal to the potential faculty sponsor after completion of all core courses. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the thesis project. The project will involve the solution of a problem or problems from the selected area of application. The thesis must consist of at least 30 pages and no more than 60 pages of printed written work and accompanying pertinent figures, consisting of a coherent introduction and presentation of the current state of the field, a clear presentation of the questions raised, of the methodology used to solve them, and a discussion of the results obtained. The thesis will be read by at least two faculty from the AMS Department, one of which must be the student's adviser. The student will then be required to give a short (20-minute) public oral presentation of their thesis, which will be evaluated by the reading committee. The reading committee will assess the quality of both written work and oral presentation in making their recommendation for awarding the M.S. degree to the student.

Candidates for a Plan II capstone must, in addition to the 25 credits required from core courses, (1) complete three additional 5-credit courses from the approved elective list, and (2) successfully pass the SciCAM comprehensive examination. The latter takes place in June at the end of the academic year. Students may only take this exam following completion of the last core course. The exam will take the form of a take-home project covering all core and foundational courses.

### Accelerated 1-Year Program Plan

The expected time to completion of the SciCAM degree program is two years. However, AMS also offers a one-year accelerated track for interested students who can demonstrate sufficient proficiency in the foundational subjects. Information on the minimum requirements to join the accelerated track can be found on the program web site. Requests to join the accelerated track must be made to the graduate director by e-mail no later than August 31 of each year.

---

## RELATIONSHIP OF SCICAM MASTERS PROGRAM AND AMS DOCTORAL PROGRAM

---

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the SAM Ph.D. program. Applications are reviewed in the standard academic cycle, so that students interested in applying to the SAM program are encouraged to discuss this option with the graduate director in the fall of each year.

---

### TRANSFER CREDIT

---

Up to three UCSC courses fulfilling the degree requirements of the SciCAM degree may be taken before beginning the graduate program.

Up to one course from other institutions may be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the

other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

---

### REVIEW OF PROGRESS

---

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress). For specific guidelines on the annual student reviews, please refer to <http://www.soe.ucsc.edu/programs/ssm/graduate/index.html>.

---

## APPLIED MATHEMATICS AND STATISTICS FACULTY AND PROFESSIONAL INTERESTS

---

---

### PROFESSOR

---

#### **Nicholas Brummell**

Fluid dynamics; magnetohydrodynamics; numerical simulations of geophysical and astrophysical dynamics, especially solar interior physics; supercomputing

#### **David Draper**

Bayesian inference, prediction and decision-making; hierarchical modeling; Bayesian non-parametric methods; model specification and model uncertainty; Bayesian data science; accurate Bayesian computations with massive data; quality assessment; risk assessment; statistical applications in the environmental, medical, and social sciences

#### **Pascale Garaud**

Astrophysical and geophysical fluid dynamics, magnetohydrodynamics; analytical and numerical solutions of partial differential equations related to these phenomena

#### **Athanasios Kottas**

Bayesian nonparametrics, mixture models, modeling and inference for point processes, nonparametric regression, survival analysis, applications in biometrics, ecology, and the environmental sciences

#### **Herbert Lee**

Bayesian statistics, computer simulation experiments, spatial statistics, inverse problems, model selection and model averaging, nonparametric regression, neural networks, classification and clustering

#### **Marc Mangel, Emeritus**

#### **Raquel Prado**

Bayesian non-stationary time series modeling, multivariate time series, biomedical signal processing and statistical genetics

#### **Abel Rodriguez**

Bayesian nonparametrics, Bayesian time series and spatial models, machine learning, document modeling, public health, financial econometrics, structural proteomics, genomics

#### **Bruno Sanso**

Bayesian spatio-temporal modeling, environmental and geostatistical applications, modeling of extreme values, statistical assessment of climate variability

#### **Hongyun Wang**

Single molecule studies and biophysics, statistical physics, stochastic processes and stochastic differential equations, classical analysis; numerical analysis

---

### ASSOCIATE PROFESSOR

---

#### **Qi Gong**

Computational methods for real-time control systems, trajectory optimization and motion planning, nonlinear filtering and observer design, robust and adaptive control of nonlinear systems, industry applications of control theory

ASSISTANT PROFESSOR

---

**Rajarshi Guhaniyogi**

Areal wombling, compressive methods for high dimensional regression, multi-linear modeling, manifold regression, nonparametric bayes, online learning with massive streaming data, spatial bayes modeling for massive geostatistical datasets, Bayesian tensor regression. applications in epidemiology, forestry, genomics, neuroscience and several other machine learning applications

**Dongwook Lee**

Computational magnetohydrodynamics and gas dynamics; computational mathematics for large-scale scientific computing on high-performance parallel architectures; numerical algorithms for finite-volume, high-order shock capturing methods; Newton-Krylov-type iterative implicit solvers for stiff nonlinear system; nonlinear numerical methods for astrophysics and high-energy-density physics applications

**Ju Hee Lee**

Bayesian statistics, bayesian nonparametrics, modeling in biosciences and clinical trials

**Daniele Venturi**

Uncertainty Quantification (UQ) and computational probability, multi-fidelity stochastic modeling and data-driven stochastic multiscale mathematics, numerical analysis and high-performance scientific computing, probability density function methods for forward and inverse UQ problems, Mori-Zwanzig approach to dimension reduction and uncertainty quantification, functional differential equations

ASSOCIATE ADJUNCT PROFESSOR

---

**Robin Morris**

Statistics and machine learning on massive datasets for recommendation systems, text and image classification, and web traffic analysis

VISITING ASSISTANT PROFESSOR

---

**Tatiani Xifara**

Bayesian and computational statistics, hidden Markov models, adaptive MCMC and MALA algorithms, statistical ecology

LECTURER

---

**Yonatan Katznelson**

Number theory

**Bruno Mendes**

Parameter and model uncertainty in geophysics and groundwater contamination modeling, Bayesian statistics, parallel computation

**Douglas Bonett (Psychology)**

Psychometrics and statistics

**William Dunbar (Computer Engineering)**

Theory and application of feedback control, single-molecule biophysics, nanopore sensors, dynamics and control of biomolecules

**Gabriel Elkaim (Computer Engineering)**

Embedded systems; robust software architectures for real-time reactive systems; sensor fusion; guidance, navigation, and control (GNC) system identification; robust and advanced control schemes; feedback control systems; robotics; unmanned autonomous vehicles (UAVs); and cooperative control

**Andrew T. Fisher (Earth Sciences)**

Hydrogeology, crustal studies, coupled flows, modeling

**Lise Getoor (Computer Science)**

Machine learning, reasoning under uncertainty, analysis of graphs and networks, artificial intelligence, databases, information integration, visual analytics, data science

**Gary A. Glatzmaier (Earth Sciences)**

Computer simulation of geodynamics and planetary dynamics

**David Haussler (Biomolecular Engineering)**

Bioinformatics, genomics, computational genomic data analysis, molecular evolution and comparative genomics, genomic and clinical data sharing and standards, cancer genomics, neurodevelopment, stem cell research, immunogenomics, information theory, pattern recognition, machine learning, artificial intelligence, information theory, theoretical computer science

**David P. Helmbold (Computer Science)**

Machine learning, computational learning theory, analysis of algorithms

**Roberto Manduchi (Computer Engineering)**

Computer vision and sensor processing, with application to assistive technology for the visually impaired, mobile and pervasive computing

**Richard Montgomery (Mathematics)**

Celestial mechanics, differential geometry, gauge theory, mechanics (quantum and classical), and control theory

**Katia Obraczka (Computer Engineering)**

Computer networks, distributed systems, operating systems, Internet information systems, mobile computing, wireless networks

**Hamid Sadjadpour (Computer Engineering)**

Wireless communication systems, network information theory and scaling laws, performance analysis of wireless ad hoc and sensor networks, routing and MAC protocol design for wireless networks

**Manfred Warmuth (Computer Science)**

Online learning, machine learning, statistical decision theory, game theory, analysis of algorithms

**A. Peter Young, Emeritus (Physics)**

**Yi Zhang (Technology Management)**

Large-scale information retrieval, recommendation systems, Internet advertising, data mining, natural language processing, and applied machine learning

## APPLIED MATHEMATICS AND STATISTICS COURSES

---

---

### LOWER-DIVISION COURSES

**3. Precalculus for Science and Engineering. F,W**

Includes inequalities, linear and quadratic equations, functions (linear, quadratic, rational, power, exponential, logarithms, trigonometric), and analytic geometry, with application to science and engineering. Students cannot receive credit for both this course and Mathematics 3. Mathematics 3 can substitute for course 3. Prerequisite(s): score of 200 or higher on the mathematics placement examination (MPE), or Mathematics 2. (General Education Code(s): MF, Q.) The Staff, P. Garaud, B. Mendes

**5. Statistics. F,W,S**

Introduction to statistical methods/reasoning, including descriptive methods, data-gathering (experimental design and sample surveys), probability, interval estimation, significance tests, one- and two-sample problems, categorical data analysis, correlation and regression. Emphasis on applications to the natural and social sciences. Students cannot receive credit for this course if they have already received credit for course 7. (General Education Code(s): SR, IN, Q.) The Staff, H. Lee, A. Kottas, R. Morris, B. Mendes, J. Katznelson, A. Rodriguez, B. Sanso

**6. Precalculus for Statistics.**

Reviews and introduces

mathematical methods useful in the elementary study of statistics, including logic, real numbers, inequalities, linear and quadratic equations, functions, graphs, exponential and logarithmic functions, and summation notation. (Formerly course 2, Pre-Statistics.) Prerequisite(s): Mathematics 2 or mathematics placement examination (MPE) score of 200 or higher or higher. (General Education Code(s): MF, Q.) B. Mendes, The Staff

**7. Statistical Methods for the Biological, Environmental, and Health Sciences. F,W,S**

Case-study-based introduction to statistical methods as practiced in the biological, environmental, and health sciences. Descriptive methods, experimental design, probability, interval estimation, hypothesis testing, one- and two-sample problems, power and sample size calculations, simple correlation and simple linear regression, one-way analysis of variance, categorical data analysis. (Formerly Statistical Methods for the Biological and Environmental Sciences.) Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), or course 2 or 3 or 6 or 11A or 15A or Mathematics 3 or 11A or 19A. Concurrent enrollment in course 7L is required. (General Education Code(s): SR, IN, Q.) The Staff, H. Lee, A. Rodriguez, J. Lee, D. Draper, R. Prado

**7L. Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory (2 credits). F,W,S**

Computer-based laboratory course in which students gain hands-on experience in analysis of data sets arising from statistical problem-solving in the biological, environmental, and health sciences. Descriptive methods, interval estimation, hypothesis testing, one- and two-sample problems, correlation and regression, one-way analysis of variance, categorical data analysis. (Formerly Statistical Methods for the Biological and Environmental Sciences Laboratory.) Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), course 2 or 3 or 6 or 11A or 15A or Mathematics 3 or 11A or 19A. Concurrent enrollment in course 7 is required. H. Lee, R. Prado, J. Lee, A. Rodriguez, D. Draper

**10. Mathematical Methods for Engineers I. F,S**

Applications-oriented course on complex numbers and linear algebra integrating Matlab as a computational support tool. Introduction to complex algebra. Vectors, bases and transformations, matrix algebra, solutions of linear systems, inverses and determinants, eigenvalues and eigenvectors, and geometric transformations. Students cannot receive credit for

## Applied Mathematics and Statistics

this course and for courses 10A or Mathematics 21. Prerequisite(s): score of 400 or higher on the mathematics placement examination (MPE), or course 3, or Mathematics 3. (General Education Code(s): MF, Q.) The Staff, H. Wang, Q. Gong, J. Katznelson, N. Brummell, B. Mendes

### **10A. Basic Mathematical Methods for Engineers I (3 credits). F,S**

Applications-oriented course on complex numbers and linear algebra integrating Matlab as a computational support tool. Introduction to complex algebra. Vectors, bases and transformations, matrix algebra, solutions of linear systems, inverses and determinants. Students cannot receive credit for this course and courses 10 or Mathematics 21. Prerequisite(s): score of 400 or higher on the mathematics placement examination (MPE), or course 3, or Mathematics 3. The Staff, H. Wang, Q. Gong, J. Katznelson, N. Brummell, B. Mendes

### **10B. Mathematical Methods for Engineers IB (2 credits).**

Can only be taken by students who need a transition from course 10A to course 10. Students cannot receive credit for this course and for course 10 or Mathematics 21. Prerequisite(s): course 10A. Enrollment by permission of instructor only. The Staff

### **11A. Mathematical Methods for Economists I. F,W,S**

Introduction to mathematical tools and reasoning, with applications to economics. Topics are drawn from differential calculus in one variable and include limits, continuity, differentiation, elasticity, Taylor polynomials, and optimization. Students cannot receive credit for both this course and Mathematics

11A or 19A or Applied Mathematics and Statistics 15A. (Also offered as Applied Mathematics and Statistics 11A. Students cannot receive credit for both courses.) (Also offered as Economics 11A. Students cannot receive credit for both courses.) Students who have already taken Mathematics 11A or 19A should not take this course. Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), Applied Math and Statistics 2, 3, or 6, or Mathematics 3. (General Education Code(s): MF, IN, Q.) J. Katznelson, B. Mendes

### **11B. Mathematical Methods for Economists II. F,W,S**

Mathematical tools and reasoning, with applications to economics. Topics are drawn from multivariable differential calculus and single variable integral calculus, and include partial derivatives, linear and quadratic approximation, optimization with and without constraints, Lagrange multipliers, definite and indefinite integrals, and elementary differential equations. Students cannot receive credit for both this course and Mathematics 11B or 19B or Applied Math and Statistics 15B. (Also offered as Economics 11B. Students cannot receive credit for both courses.) Prerequisite(s): course 11A, Economics 11A, Mathematics 11A, or Mathematics 19A. (General Education Code(s): MF, IN, Q.) J. Katznelson

### **15A. Case-Study Calculus I.**

Case-study-based, first-quarter introduction to single-variable calculus, with computing labs/discussion sections featuring contemporary symbolic, numerical, and graphical computing tools. Case studies drawn from biology, environmental sciences, health sciences, and psychology. Includes

functions, mathematical modeling, limits, continuity, tangents, velocity, derivatives, the chain rule, implicit differentiation, higher derivatives, exponential and logarithmic functions and their derivatives, differentiating inverse functions, the mean value theorem, concavity, inflection points, function optimization, and curve-sketching. Students cannot receive credit for this course and course 11A or Economics 11A or Mathematics 11A or 19A. Prerequisite(s): course 3 or Mathematics 3 or score of 300 or higher on the mathematics placement examination (MPE) or by permission of instructor. (General Education Code(s): MF, IN, Q.) P. Garaud, B. Mendes

### **15B. Case-Study Calculus II.**

Case-study based, second-quarter introduction to single-variable calculus, with computing labs/discussion sections featuring symbolic numerical, and graphical computing tools. Case studies are drawn from biology, environmental science, health science, and psychology. Includes indefinite and definite integrals of functions of a single variable; the fundamental theorem of calculus; integration by parts and other techniques for evaluating integrals; infinite series; Taylor series, polynomial approximations. Students cannot receive credit for this course and course 11B or Economics 11B or Mathematics 11B or 19B. Prerequisite(s): course 15A or 11A or Economics 11A or Mathematics 11A or 19A. (General Education Code(s): MF, IN, Q.) The Staff, P. Garaud, B. Mendes

### **20. Mathematical Methods for Engineers II. W,S**

Applications-oriented class on ordinary differential equations (ODEs) and systems of ODEs using Matlab as a computational support

tool. Covers linear ODEs and systems of linear ODEs; nonlinear ODEs using substitution and Laplace transforms; phase-plane analysis; introduction to numerical methods. Students cannot receive credit for this course and for courses 20A or Mathematics 24. Prerequisite(s): Mathematics 19B, and course 10 or 10A or Mathematics 21. (General Education Code(s): MF.) J. Katznelson, D. Lee, Q. Gong

### **20A. Basic Mathematical Methods for Engineers II (3 credits). W,S**

Applications-oriented class on ordinary differential equations (ODEs) and systems of ODEs integrating Matlab as a computational support tool. Covers linear ODEs and systems of linear ODEs; nonlinear ODEs using substitution and Laplace transforms. Students cannot receive credit for this course and for courses 20 or Mathematics 24. Prerequisite(s): Mathematics 19B, and course 10 or 10A or Mathematics 21. J. Katznelson, D. Lee, Q. Gong

### **20B. Mathematical Methods for Engineers IIB (2 credits).**

Can only be taken by students who need a transition from course 20A to course 20. Students cannot receive credit for this course and for course 20 or Mathematics 24. Prerequisite(s): course 20A. Enrollment by permission of instructor only. The Staff

### **80A. Gambling and Gaming. F,W**

Games of chance and strategy motivated early developments in probability, statistics, and decision theory. Course uses popular games to introduce students to these concepts, which underpin recent scientific developments in economics, genetics, ecology, and

physics. (General Education Code(s): SR, T7-Natural Sciences or Social Sciences, Q.) H. Lee, A. Kottas, R. Guhaniyogi, A. Rodriguez, B. Mendes

### **80B. Data Visualization. S**

Introduces the use of complex-data graphical representations to extract information from data. Topics include: summary statistics, boxplots, histograms, dotplots, scatterplots, bubble plots, and map-creation, as well as visualization of trees and hierarchies, networks and graphs, and text. (General Education Code(s): SR.) A. Rodriguez

## **UPPER-DIVISION COURSES**

### **100. Mathematical Methods for Engineers III.**

Applications-oriented course on complex analysis and partial differential equations using Maple as symbolic math software support. In addition, introduces Fourier analysis, special functions, and asymptotic methods. Students cannot receive credit for this course and Physics 116B or Physics 116C. Prerequisite(s): course 20, or by permission of instructor. Enrollment limited to 25. The Staff

### **107. Introduction to Fluid Dynamics. F**

Covers fundamental topics in fluid dynamics: Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and Applied Mathematics and Statistics 217. (Also offered as Physics 107. Students cannot receive credit for both courses.) Prerequisite(s): Mathematics 107 or Physics 116C or Earth and Planetary Sciences 111. N.

Brummell, The Staff

### **114. Introduction to Dynamical Systems. W**

Introduces continuous and discrete dynamical systems. Topics include: fixed points; stability; limit cycles; bifurcations; transition to and characterization of chaos; fractals. Examples are drawn from sciences and engineering. Students cannot receive credit for this course and course 214. (Formerly course 146.) Prerequisite(s): course 20 or 20A, or Mathematics 21 and Mathematics 24, or Physics 116B. Enrollment restricted to sophomores, juniors and seniors. (General Education Code(s): MF.) P. Garaud, D. Milutinovic, Q. Gong

### **115. Stochastic Modeling in Biology.**

Application of differential equations, probability, and stochastic processes to problems in cell, organismal, and population biology. Topics include life-history theory, behavioral ecology, and population biology. Students may not receive credit for this course and course 215. Prerequisite(s): course 131, a university-level course in biology, and operational knowledge of a programming language; or consent of instructor. The Staff

### **131. Introduction to Probability Theory. F**

Introduction to probability theory and its applications. Combinatorial analysis, axioms of probability and independence, random variables (discrete and continuous), joint probability distributions, properties of expectation, Central Limit Theorem, Law of Large Numbers, Markov chains. Students cannot receive credit for this course and course 203 and Computer Engineering 107. Prerequisite(s): course 11B or Economics 11B or

Mathematics 11B or 19B. (General Education Code(s): SR, Q.) R. Prado, D. Draper, B. Sanso, A. Kottas

**132. Classical and Bayesian Inference. W**

Introduction to statistical inference at a calculus-based level: maximum likelihood estimation, sufficient statistics, distributions of estimators, confidence intervals, hypothesis testing, and Bayesian inference. Students cannot receive credit for this course and course 206. (Formerly Statistical Inference.) Prerequisite(s): course 131 or Computer Engineering 107. (General Education Code(s): SR.) R. Prado, A. Kottas, A. Rodriguez, D. Draper, J. Lee

**147. Computational Methods and Applications. W**

Applications of computational methods to solving mathematical problems using Matlab. Topics include solution of nonlinear equations, linear systems, differential equations, sparse matrix solver, and eigenvalue problems. Prerequisite(s): course 10 or 10A, or Mathematics 21. Knowledge of differential equations is recommended (course 20 or 20A, or Mathematics 24). (General Education Code(s): MF.) H. Wang

**156. Linear Regression.**

Covers simple linear regression, multiple regression, and analysis of variance models. Students learn to use the software package R to perform the analysis, and to construct a clear technical report on their analysis, readable by either scientists or nontechnical audiences. (Formerly Linear Statistical Models.) Prerequisite(s): course 132 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. (General Education Code(s): W.) H. Lee

**198. Independent Study or Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**198F. Independent Study or Research (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**GRADUATE COURSES**

**200. Research and Teaching in AMS (3 credits). F**

Basic teaching techniques for teaching assistants, including responsibilities and rights; resource materials; computer skills; leading discussions or lab sessions; presentation techniques; maintaining class records; and grading. Examines research and professional training, including use of library; technical writing; giving talks in seminars and conferences; and ethical issues in science and engineering. Enrollment restricted to graduate students. A. Kottas, The Staff

**202. Linear Models in SAS.**

Case study-based course teaches statistical linear modeling using the SAS software package. Teaches generalized linear models; linear regression; analysis of variance/covariance; analysis of data with random effects and repeated measures. Prerequisite(s): course 156 or 256, or permission of instructor. Enrollment restricted to graduate students. B. Mendes

**203. Introduction to Probability Theory. F**

Introduces probability theory and its applications. Requires a multivariate calculus background, but has no measure theoretic content. Topics include: combinatorial analysis; axioms of probability; random variables

(discrete and continuous); joint probability distributions; expectation and higher moments; central limit theorem; law of large numbers; and Markov chains. Students cannot receive credit for this course and course 131 or Computer Engineering 107. Enrollment restricted to graduate students, or by permission of the instructor. R. Prado, B. Sanso, A. Kottas

**205B. Intermediate Classical Inference. W**

Statistical inference from a frequentist point of view. Properties of random samples; convergence concepts applied to point estimators; principles of statistical inference; obtaining and evaluating point estimators with particular attention to maximum likelihood estimates and their properties; obtaining and evaluating interval estimators; and hypothesis testing methods and their properties. (Formerly Statistical Inference.) Prerequisite(s): course 203 or equivalent. Enrollment restricted to graduate students. B. Sanso, R. Guhaniyogi, D. Draper

**206. Classical and Bayesian Inference. W**

Introduction to statistical inference at a calculus-based level: maximum likelihood estimation, sufficient statistics, distribution of estimators, confidence intervals, hypothesis testing, and Bayesian inference. Students cannot receive credit for this course and course 132. (Formerly Bayesian Statistics.) Prerequisite(s): course 203. Enrollment restricted to graduate students; undergraduates may enroll by permission of instructor. H. Lee, D. Draper, A. Kottas, R. Prado

**206B. Intermediate Bayesian Inference. W**

Bayesian statistical methods for inference and prediction including: estimation; model selection and prediction; exchangeability; prior, likelihood, posterior, and predictive distributions; coherence and calibration; conjugate analysis; Markov Chain Monte Carlo methods for simulation-based computation; hierarchical modeling; Bayesian model diagnostics, model selection, and sensitivity analysis.

Prerequisite(s): course 203.

Enrollment restricted to graduate students; undergraduates may enroll by permission of instructor.

R. Prado, A. Rodriguez, J. Lee

**207. Intermediate Bayesian Statistical Modeling. S**

Hierarchical modeling, linear models (regression and analysis of variance) from the Bayesian point of view, intermediate Markov chain Monte Carlo methods, generalized linear models, multivariate models, mixture models, hidden Markov models. Prerequisite(s): courses 206 or 206B; enrollment restricted to graduate students or by permission of instructor. R. Prado, D. Draper, B. Sanso

**209. Foundations of Scientific Computing. F**

Covers the fundamental aspects of scientific computing for research. Introduces algorithmic development; programming (including the use of compilers, libraries, debugging, optimization, and code publication); computational infrastructure; and data-analysis tools. Students gain hands-on experience through practical assignments. Enrollment is restricted to graduate students. Undergraduates may enroll with the permission of the instructor. D. Lee, N. Brummell

**211. Foundations of Applied Mathematics. F**

Accelerated class reviewing fundamental applied mathematical methods for all sciences. Topics include: multivariate calculus, linear algebra, Fourier series and integral transform methods, complex analysis, and ordinary differential equations. Enrollment restricted to graduate students. N. Brummell, J. Katznelson

**212A. Applied Mathematical Methods I. W**

Focuses on analytical methods for partial differential equations (PDEs), including: the method of characteristics for first-order PDEs; canonical forms of linear second-order PDEs; separation of variables; Sturm-Liouville theory; Green's functions. Illustrates each method using applications taken from examples in physics. Course 211 or equivalent is strongly recommended as preparation. Enrollment restricted to graduate students. Undergraduates are encouraged to take this class with permission of instructor. H. Wang, N. Brummell, P. Garaud

**212B. Applied Mathematical Methods II. S**

Covers perturbation methods: asymptotic series, stationary phase and expansion of integrals, matched asymptotic expansions, multiple scales and the WKB method, Padé approximants and improvements of series. (Formerly course 212.) Prerequisite(s): course 212A. H. Wang, N. Brummell, P. Garaud

**213. Numerical Solutions of Differential Equations.**

Teaches basic numerical methods for numerical linear algebra and, thus, the solution of ordinary differential equations (ODEs) and partial differential equations (PDEs). Covers LU, Cholesky, and

QR decompositions; eigenvalue search methods (QR algorithm); singular value decomposition; conjugate gradient method; Runge-Kutta methods; error estimation and error control; finite differences for PDEs; stability, consistency, and convergence. Basic knowledge of computer programming is needed. Enrollment restricted to graduate students or permission of instructor. H. Wang, Q. Gong, N. Brummell, P. Garaud

**213A. Numerical Linear Algebra. W**

Focuses on numerical solutions to classic problems of linear algebra. Topics include: LU, Cholesky, and QR factorizations; iterative methods for linear equations; least square, power methods, and QR algorithms for eigenvalue problems; and conditioning and stability of numerical algorithms. Provides hands-on experience in implementing numerical algorithms for solving engineering and scientific problems. Basic knowledge of mathematical linear algebra is assumed. (W) Q. Gong, (W) The Staff

**213B. Numerical Methods for the Solution of Differential Equations. S**

Introduces the numerical solutions of ordinary and partial differential equations (ODEs and PDEs). Focuses on the derivation of discrete solution methods for a variety of differential equations, and their stability and convergence. Also provides hands-on experience in implementing such numerical algorithms for the solution of engineering and scientific problems using MATLAB software. The class consists of lectures and hands-on programming sections. Basic mathematical knowledge of ODEs and PDEs is assumed, and a basic working knowledge of programming in MATLAB is

expected. Enrollment is restricted to graduate students. D. Lee

#### **214. Applied Dynamical Systems. W**

Introduces continuous and discrete dynamical systems. Topics include: fixed points; stability; limit cycles; bifurcations; transition to and characterization of chaos; and fractals. Examples drawn from sciences and engineering; founding papers of the subject are studied. Students cannot receive credit for this course and course 114. Enrollment restricted to graduate students. Enrollment of undergraduates by permission of instructor. Enrollment limited to 15. P. Garaud, D. Milutinovic, Q. Gong

#### **215. Stochastic Modeling in Biology.**

Application of differential equations and probability and stochastic processes to problems in cell, organismal, and population biology. Topics include: life-history theory, behavioral ecology, and population biology. Students may not receive credit for this course and course 115. Enrollment restricted to graduate students or permission of instructor. The Staff

#### **216. Stochastic Differential Equations.**

Introduction to stochastic differential equations and diffusion processes with applications to biology, biomolecular engineering, and chemical kinetics. Topics include Brownian motion and white noise, gambler's ruin, backward and forward equations, and the theory of boundary conditions. Enrollment restricted to graduate students or consent of instructor. H. Wang

#### **217. Introduction to Fluid Dynamics. F**

Covers fundamental topics in fluid dynamics at the graduate level:

Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and course 107. Enrollment restricted to graduate students. N. Brummell, The Staff

#### **221. Bayesian Decision Theory. S**

Explores conceptual and theoretical bases of statistical decision making under uncertainty. Focuses on axiomatic foundations of expected utility, elicitation of subjective probabilities and utilities, and the value of information and modern computational methods for decision problems. Prerequisite(s): course 206. Enrollment restricted to graduate students. D. Draper, B. Sanso

#### **223. Time Series Analysis.**

Graduate level introductory course on time series data and models in the time and frequency domains: descriptive time series methods; the periodogram; basic theory of stationary processes; linear filters; spectral analysis; time series analysis for repeated measurements; ARIMA models; introduction to Bayesian spectral analysis; Bayesian learning, forecasting, and smoothing; introduction to Bayesian Dynamic Linear Models (DLMs); DLM mathematical structure; DLMs for trends and seasonal patterns; and autoregression and time series regression models. Prerequisite(s): course 206B, or by permission of instructor. Enrollment restricted to graduate students. R. Prado

#### **225. Multivariate Statistical Methods. F**

Introduction to statistical methods

for analyzing data sets in which two or more variables play the role of outcome or response. Descriptive methods for multivariate data. Matrix algebra and random vectors. The multivariate normal distribution. Likelihood and Bayesian inferences about multivariate mean vectors. Analysis of covariance structure: principle components, factor analysis. Discriminant, classification and cluster analysis. Prerequisite(s): course 206 or 206B, or by permission of instructor. Enrollment restricted to graduate students. D. Draper, J. Lee

#### **227. Waves and Instabilities in Fluids. W**

Advanced fluid dynamics course introducing various types of small-amplitude waves and instabilities that commonly arise in geophysical and astrophysical systems. Topics covered include, but are not limited to: pressure waves, gravity waves, Rossby waves, interfacial instabilities, double-diffuse instabilities, and centrifugal instabilities. Advanced mathematical methods are used to study each topic. Undergraduates are encouraged to take this course with permission of the instructor. Prerequisite(s): courses 212A and 217. P. Garaud

#### **231. Nonlinear Control Theory. S**

Covers analysis and design of nonlinear control systems using Lyapunov theory and geometric methods. Includes properties of solutions of nonlinear systems, Lyapunov stability analysis, effects of perturbations, controllability, observability, feedback linearization, and nonlinear control design tools for stabilization. Prerequisite(s): basic knowledge of mathematical analysis and ordinary differential equations is assumed.

Enrollment restricted to graduate students or permission of instructor. Q. Gong

**232. Applied Optimal Control.**

Introduces optimal control theory and computational optimal control algorithms. Topics include: calculus of variations, minimum principle, dynamic programming, HJB equation, linear-quadratic regulator, direct and indirect computational methods, and engineering application of optimal control. Prerequisite(s): course 114 or 214, or Computer Engineering 240 or 241, or Mathematics 145. Enrollment restricted to graduate students. Q. Gong

**236. Motion Coordination of Robotic Networks.**

Comprehensive introduction to motion coordination algorithms for robotic networks. Emphasis on mathematical tools to model, analyze, and design cooperative strategies for control, robotics, and sensing tasks. Topics include: continuous and discrete-time evolution models, proximity graphs, performance measures, invariance principles, and coordination algorithms for rendezvous, deployment, flocking, and consensus. Techniques and methodologies are introduced through application setups from multi-agent robotic systems, cooperative control, and mobile sensor networks. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

**241. Bayesian Nonparametric Methods. F**

Theory, methods, and applications of Bayesian nonparametric modeling. Prior probability models for spaces of functions. Dirichlet processes. Polya trees. Nonparametric mixtures. Models for regression, survival analysis,

categorical data analysis, and spatial statistics. Examples drawn from social, engineering, and life sciences. Prerequisite(s): course 207. Enrollment restricted to graduate students. A. Rodriguez, A. Kottas

**245. Spatial Statistics.**

Introduction to the analysis of spatial data: theory of correlation structures and variograms; kriging and Gaussian processes; Markov random fields; fitting models to data; computational techniques; frequentist and Bayesian approaches. Prerequisite(s): course 207. Enrollment restricted to graduate students. B. Sanso, H. Lee

**250. An Introduction to High Performance Computing. S**

Designed for STEM students and others. Through hands-on practice, this course introduces high-performance parallel computing, including the concepts of multiprocessor machines and parallel computation, and the hardware and software tools associated with them. Students become familiar with parallel concepts and the use of MPI and OpenMP together with some insight into the use of heterogeneous architectures (CPU, CUDA, OpenCL), and some case-study problems. Enrollment is restricted to graduate students. Undergraduates may enroll with permission of instructor. D. Lee, N. Brummell

**256. Linear Statistical Models. S**

Theory, methods, and applications of linear statistical models. Review of simple correlation and simple linear regression. Multiple and partial correlation and multiple linear regression. Analysis of variance and covariance. Linear model diagnostics and model selection. Case studies drawn from natural, social, and medical

sciences. Course 205 strongly recommended as a prerequisite. Undergraduates are encouraged to take this class with permission of instructor. Prerequisite(s): course 205A or 205B or permission of instructor. Enrollment restricted to graduate students. The Staff, R. Prado, A. Rodriguez, B. Sanso, J. Lee

**260. Computational Fluid Dynamics.**

Introduces modern computational approaches to solving the differential equations that arise in fluid dynamics, particularly for problems involving discontinuities and shock waves. Examines the fundamentals of the mathematical foundations and computation methods to obtain solutions. Focuses on writing practical numerical codes and analyzing their results for a full understanding of fluid phenomena. Prerequisite(s): Basic knowledge of computer programming languages is assumed. Enrollment is restricted to graduate students. N. Brummell

**261. Probability Theory with Markov Chains. W**

Introduction to probability theory: probability spaces, expectation as Lebesgue integral, characteristic functions, modes of convergence, conditional probability and expectation, discrete-state Markov chains, stationary distributions, limit theorems, ergodic theorem, continuous-state Markov chains, applications to Markov chain Monte Carlo methods. Prerequisite(s): course 205B or by permission of instructor. Enrollment restricted to graduate students. A. Kottas

**263. Stochastic Processes.**

Includes probabilistic and statistical analysis of random processes, continuous-time Markov chains, hidden Markov models, point

## Applied Mathematics and Statistics

processes, Markov random fields, spatial and spatio-temporal processes, and statistical modeling and inference in stochastic processes. Applications to a variety of fields. Prerequisite(s): course 205A, 205B, or 261, or by permission of instructor. A. Rodriguez, A. Kottas

### **274. Generalized Linear Models. S**

Theory, methods, and applications of generalized linear statistical models; review of linear models; binomial models for binary responses (including logistical regression and probit models); log-linear models for categorical data analysis; and Poisson models for count data. Case studies drawn from social, engineering, and life sciences. Prerequisite(s): course 205A, 205B, or 256. Enrollment restricted to graduate students. A. Kottas, The Staff

### **280A. Seminar in Mathematical and Computational Biology (2 credits).**

Weekly seminar on mathematical and computational biology. Participants present research findings in organized and critical fashion, framed in context of current literature. Students present own research on a regular basis. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. The Staff

### **280B. Seminars in Statistical and Applied Mathematical Modeling (2 credits). F,W,S**

Weekly seminar series covering topics of current research in applied mathematics and statistics. Permission of instructor required. Enrollment restricted to graduate students. (Formerly Seminar in Applied Mathematics and Statistics.) May be repeated for

credit. The Staff

### **280C. Seminar in Geophysical and Astrophysical Fluid Dynamics (2 credits). F,W,S**

Weekly seminar/discussion group on geophysical and astrophysical fluid dynamics covering both analytical and computational approaches. Participants present research progress and findings in semiformal discussions. Students must present their own research on a regular basis. Enrollment restricted to graduate students. May be repeated for credit. N. Brummell, P. Garaud

### **280D. Seminar in Bayesian Statistical Methodology (2 credits). S**

Weekly seminar/discussion group on Bayesian statistical methods, covering both analytical and computational approaches. Participants present research progress and finding in semiformal discussions. Students must present their own research on a regular basis. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **285. Seminar in Career Skills (2 credits).**

Seminar in career skills for applied mathematicians and statisticians. Learn about professional activities such as the publication process, grant proposals, and the job market. Enrollment restricted to graduate students, typically within two years of their expected Ph.D. completion date. The Staff

### **290A. Topics in Mathematical and Computational Biology (2 credits).**

Focuses on applications of mathematical and computational methods with particular emphasis on advanced methods applying to organismal biology or resource

management. Students read current literature, prepare critiques, and conduct projects. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. The Staff

### **290B. Advanced Topics in the Numerical Solution of PDEs.**

Modern practical methods for the numerical solution of partial differential equations. Methods considered depend on the expertise of the instructor, but are covered in-depth and up to the cutting-edge of practical contemporary implementation. Content could be method-based (e.g., spectral methods, finite-element methods) or topic-based (e.g., simulations of turbulence). Some programming and numerical analysis (e.g., course 213) highly recommended. Enrollment restricted to graduate students and undergraduates with permission of the instructor. H. Wang, N. Brummell, P. Garaud

### **291. Advanced Topics in Bayesian Statistics (3 credits).**

Advanced study of research topics in the theory, methods, or applications of Bayesian statistics. The specific subject depends on the instructor. Enrollment restricted to graduate students and by permission of instructor. May be repeated for credit. The Staff

### **296. Masters Project (2 credits). F,W,S**

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

**297. Independent Study or Research. F,W,S**

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. The Staff

**297F. Independent Study (2 credits). F,W,S**

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

**299. Thesis Research. F,W,S**

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. The Staff

## PROGRAM DESCRIPTION

---

The four concentrations of the UCSC bachelor of science (B.S.) degree in bioengineering prepare graduates for productive employment in industry or further education in graduate school. Each concentration is based on different essential underlying science, but all share an emphasis on teaching engineering design using that basis in science.

The biomolecular engineering concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology.

The bioelectronics concentration is designed for students interested in the interface between organisms and electronic instrumentation or implants. The emphasis is on the interfacing of biological sensors to computer systems, and the underlying sciences are physics and chemistry.

The assistive technology: motor concentration is designed for students interested in helping people with movement disabilities. The emphasis is on designing exoskeletons and robots, and the underlying sciences are physics and anatomy.

The assistive technology: cognitive/perceptual concentration is designed for students interested in helping people with cognitive or perceptual disabilities. The emphasis is on designing computer systems that help people compensate for disabilities, and the underlying sciences are psychology and computer science.

In all four concentrations, students participate in a capstone design experience: a two-quarter group project intended to prepare students for work in industry, a summer full-time synthetic biology project based on the iGEM competition, or a three-quarter senior thesis intended to prepare students for Ph.D. research. All options involve working closely with faculty and other researchers at UCSC, analyzing ideas,

developing technologies, and discovering new approaches. Application areas include biomolecular sensors and systems, nano-electronic implants, assistive technologies for the elderly and disabled, bioinformatics, microfluidics, nanoscale biotechnology, environmental monitoring, and other areas at the junction between engineering and the life sciences.

More information about bioengineering research and undergraduate research opportunities can be found on the web at [ugr.ucsc.edu](http://ugr.ucsc.edu), [beng.soe.ucsc.edu](http://beng.soe.ucsc.edu), [cbse.ucsc.edu](http://cbse.ucsc.edu), [biomedical.ucsc.edu](http://biomedical.ucsc.edu), [marcmbrs.ucsc.edu](http://marcmbrs.ucsc.edu), [surf-it.soe.ucsc.edu](http://surf-it.soe.ucsc.edu), and [stemdiv.ucsc.edu/ucleads/](http://stemdiv.ucsc.edu/ucleads/).

The program is sponsored by the Departments of Biomolecular Engineering, Computer Engineering, Electrical Engineering, and Molecular, Cell, and Developmental Biology, with additional participating faculty in the Departments of Applied Mathematics and Statistics, Chemistry and Biochemistry, and Psychology.

The program has course requirements in mathematics, science, and engineering. Students interested in bioengineering as a major should contact the School of Engineering advising office ([advising@soe.ucsc.edu](mailto:advising@soe.ucsc.edu)) before enrolling in any courses at UCSC. Early advising is particularly important before choosing calculus and physics courses.

Bioengineering students may continue their research and studies at UCSC in any of several graduate programs. Information may be found at <http://www.graddiv.ucsc.edu>.

---

## PROGRAM LEARNING OUTCOMES

---

A bioengineering student completing the program should:

- have a broad knowledge of science and engineering disciplines including biology, chemistry, physics, mathematics, statistics, and computer science;
- be able to apply their broad knowledge to identify, formulate, and solve engineering design problems;

## Bioengineering

- be able to find and use information from a variety of sources, including books, journal articles, online encyclopedias, and manufacturer data sheets;
- be able to design and conduct experiments, as well as to analyze and interpret data;
- be able to communicate problems, experiments, and design solutions in writing, orally, and as posters; and
- be able to apply ethical reasoning to make decisions about engineering methods and solutions in a global, economic, environmental, and societal context.

---

### COURSES FOR NONMAJORS

---

The following courses are recommended for nonmajors interested in bioengineering. Computer Engineering 80A, Universal Access: Disability, Technology, and Society; Biomolecular Engineering 80G, Bioethics in the 21st Century: Science, Business, and Society; and Biomolecular Engineering 5, Introduction to Biotechnology. Students are also advised to consult the program discussions of the collaborating departments for additional possibilities related to bioengineering.

---

### DECLARATION OF THE MAJOR

---

To be admitted by the end of the 5th quarter, students need to have taken 50 credits from the following list of courses with a GPA of 2.8 or better:

Applied Mathematics and Statistics (AMS) 7/L, AMS 10, AMS 20, Molecular, Cell, and Developmental Biology (BIOL) 20A, Ecology and Evolutionary Biology (BIOE) 20B, Biomolecular Engineering (BME) 5, BME 80G, Chemistry and Biochemistry (CHEM) 1A, CHEM 1B/M, CHEM 1C/N, CHEM 108A/L, CHEM 108B/M, Computer Engineering (CMPE) 9, CMPE 12/L, CMPE 13/L, CMPE 80A, CMPE 100/L, Computer Science (CMPS) 12A/L, CMPS 12B/M, Mathematics (MATH) 19A, MATH 19B, MATH 22 or MATH 23A, Physics (PHYS) 5A/L (or 6A/L), PHYS 5B/M (or 6B/M), PHYS 5C/N (or 6C/N), and Psychology (PSYC) 20A.

Students changing majors after the 6th quarter will need to have completed 10 more credits of required courses in the major for each additional quarter past the 6th quarter.

Appeals for major declaration may be filed with the Baskin School of Engineering Office of Undergraduate Affairs by the end of the fifth week of each regular quarter for faculty review. Determinations will be made by the end of the seventh week of the quarter. After the campus major declaration deadline, students submitting an appeal must have a declared alternate major.

---

### TRANSFER STUDENTS

---

Transfer students need to have completed eight transferable courses from the list used for admission for on-campus students, with a GPA in those courses of 2.8 or better. However, students are recommended to complete at least ten transferable courses prior to transfer, as they may otherwise have difficulty finishing in a timely fashion.

Students may satisfy the bioethics requirement if they have completed a suitable ethics course at their community college.

---

### HONORS IN THE MAJOR

---

Bioengineering majors are considered for “Honors in the Major” and “Highest Honors in the Major” based on their GPA and on the results of undergraduate research. Students with a GPA of 3.7 receive “Highest Honors in the Major.” Students with a GPA of 3.3 receive “Honors in the Major.” Students with particularly significant accomplishments in undergraduate research may receive honors or highest honors with a lower GPA. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

---

### LETTER GRADE POLICY

---

Please refer to the letter grade policy in the [School of Engineering](#) section.

---

### BASKIN SCHOOL OF ENGINEERING POLICIES

---

Please refer to the [School of Engineering](#) section of the catalog for additional policies that apply to all Baskin School of Engineering programs.

---

### MATERIALS FEE AND MISCELLANEOUS FEES

---

Please see the section on fees in the [School of Engineering](#) section.

---

### MAJOR REQUIREMENTS

---

---

#### ADVISING AND ELECTIVE APPROVAL

---

Every major must have a bioengineering faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office. With assistance from the adviser, students must formulate a program of proposed course work that meets the major requirements. All electives must be pre-approved by the faculty adviser or bioengineering undergraduate director.

## Bioengineering

### OPTIONAL COURSES FOR MAJORS

---

Biomolecular Engineering 88A, BMES Freshman Design Seminar, is recommended for first-year students interested in learning to think like engineers. Students considering the assistive technology: motor concentration or desiring an early introduction to the use of mathematics in engineering may wish to take Computer Engineering 8, Robot Automation, in their first quarter.

#### **Courses required for all concentrations (lower-division, 7):**

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics

Biomolecular Engineering 80G, Bioethics in the 21st Century: Science, Business, and Society

Chemistry and Biochemistry 1A, 1B/M General Chemistry

Biology (BIOL) 20A, Cell and Molecular Biology

Biology (BIOE) 20B, Development and Physiology

All concentrations also require physics and computer programming, but the details of the requirements differ, due to the different needs of the concentrations (see below).

#### **Courses required for all concentrations (upper-division, 4):**

Biomolecular Engineering 101/L, Applied Circuits for Bioengineers

Computer Engineering 185, Technical Writing or Biomolecular Engineering 185, Technical Writing

Applied Mathematics and Statistics 131, Introduction to Probability Theory

Applied Mathematics and Statistics 132, Classical and Bayesian Inference

#### **Capstone requirement, all concentrations, 2-3 courses**

All bioengineering students complete a senior capstone project in bioengineering, either as a group project or as an individual senior thesis doing research in a faculty laboratory. (Satisfies the campus comprehensive requirement.)

Note that the Technical Writing requirement is a prerequisite for all the capstone options, including the senior thesis. The group project courses all have additional prerequisites that may not be met with just the required courses in a concentration. Students are responsible for ensuring that they meet the prerequisites for whichever capstone they choose.

Most students in the Assistive Technology: Cognitive/Perceptual concentration will need to do a

senior thesis, because of the number of additional prerequisites they would need to take for any of the group project courses.

#### **Capstone Sequences**

Biomolecular Engineering 123A-B, Bioengineering Project; or

Computer Engineering, or Electrical Engineering 129A-C, Capstone Project; or

BME 180, Professional Practice in Bioengineering (2 credits), and BME 188, Synthetic Biology—Mentored Research (10 credits); or

Fifteen credits of independent study (198), Field Study (193), or senior thesis research (195), in biomolecular engineering, computer engineering, or electrical engineering; and Biomolecular Engineering 123T, Senior Thesis Presentation (2 credits).

Students pursuing the senior thesis option must seek approval of their project one year before graduation, typically spring quarter of the third year. Students spend three or more quarters working on their thesis projects. Thesis students must enroll in 123T, Senior Thesis Presentation, before completing their thesis.

#### **Additional required courses for Biomolecular concentration (16 courses)**

Biomolecular Engineering 5, Introduction to Biotechnology

Physics 5A/L or 6A/L, Introduction to Physics I or Introductory Physics I

Physics 5C/N or 6C/N, Introduction to Physics III or Introductory Physics III

Chemistry 1C/N, General Chemistry

Chemistry 108A/L, Organic Chemistry

One of two three-course sequences in biochemistry or molecular biology. The first sequence is intended for students primarily interested in the design of proteins, while the second is intended for students interested in cellular engineering.

Chemistry 108B/M, Organic Chemistry; Biochemistry and Molecular Biology (BIOC) 100A-B; and Biology (BIOL) 101L, Molecular Biology Laboratory; or

Biology (BIOL) 100, Biochemistry; Biology (BIOL) 101/L, Molecular Biology and Biochemistry Laboratory; and one of Biology 110L, Cell Biology Laboratory; 115L, Eukaryotic Molecular Biology Laboratory; or 120L, Development Laboratory

One of three introductions to programming:

- Computer Science 12A/L, Introduction to Programming/Laboratory; or Computer Science 5J, Introduction to Programming in Java and 11,

## Bioengineering

Intermediate Programming; or Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory and Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

- Biomolecular Engineering 160/L, Research Programming in the Life Sciences

Biomolecular Engineering 110, Bioinformatics Tools

Biology (BIOL) 105, genetics

Biomolecular Engineering 150, Molecular Biomechanics

One of Biology 110, Cell Biology; Biology 115, Eukaryotic Molecular Biology; or Microbiology and Environmental Toxicology 119, Microbiology.

Design elective from Baskin School of Engineering.

Upper-division elective from Baskin School of Engineering or Division of Physical and Biological Sciences.

### **Additional required courses for Bioelectronics concentration (16 courses)**

Chemistry 1C/N, General Chemistry

Physics 5A/L, 5B/M, and 5C/N, Introduction to Physics I, II, and III

Mathematics 23A, Vector Calculus; or Mathematics 22, Introduction to Calculus of Several Variables

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I

Applied Mathematics and Statistics 20, Mathematical Methods for Engineers II

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Engineering 100/L, Logic Design/Laboratory

Electrical Engineering 101/L, Introduction to Electronic Circuits/Laboratory

Electrical Engineering 103/L, Signals and Systems/Laboratory

Computer Engineering 167/L, Sensing and Sensor Technologies/Laboratory

Electrical Engineering 171/L, Analog Electronics/Laboratory

Biomolecular Engineering 140, Bioinstrumentation

One upper-division computer or electrical engineering elective approved by the faculty adviser

### **Additional required courses for Assistive Technology: Motor concentration (16 courses)**

Computer Engineering 80A, Universal Access: Disability, Technology, and Society, or Computer

Engineering 8, Robot Automation: Intelligence Through Feedback Control

Physics 5A/L and 5C/N, Introduction to Physics I/Laboratory and Physics III/Laboratory

Computer Engineering 9, Introduction to Statics Dynamics & Biomechanics

Mathematics 23A, Vector Calculus; or Math 22, Introduction to Calculus of Several Variables

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I

Applied Mathematics and Statistics 20, Mathematical Methods for Engineers II

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Engineering 100/L, Logic Design/Laboratory

Microbiology and Environmental Toxicology (METX)

135/L, Functional Anatomy/Laboratory

Computer Engineering 118/L, Introduction to Mechatronics/Laboratory

Electrical Engineering 101/L, Introduction to Electronic Circuits/Laboratory

Electrical Engineering 103/L, Signals and Systems/Laboratory

Computer Engineering 167/L, Sensing and Sensor Technologies/Laboratory

Upper-division elective from Baskin School of Engineering or Division of Physical and Biological Sciences.

### **Additional required courses for Assistive Technology: Cognitive/Perceptual concentration (16 courses)**

Computer Engineering 80A, Universal Access: Disability, Technology, and Society

Physics 5A/L or 6A/L, Introduction to Physics I/Laboratory or Introductory Physics I/Laboratory

Physics 5B/M or 6B/M, Introduction to Physics I/Laboratory or Introductory Physics II/Laboratory

Physics 5C/N or 6C/N, Introduction to Physics III/Laboratory or Introductory Physics III/Laboratory

Mathematics 23A, Vector Calculus; or Mathematics 22, Introduction to Calculus of Several Variables

Applied Mathematics and Statistics 7/L, Statistical Methods for the Biological, Environmental, and Health Sciences/Laboratory

One of three introductions to programming:

## Bioengineering

- Computer Science 12A/L, Introduction to Programming/Laboratory; or
- Computer Science 5J, Introduction to Programming in Java and 11, Intermediate Programming; or
- Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory and Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Science 12B/M, Introduction to Data Structures/Laboratory

Computer Science 109, Advanced Programming

Psychology 20A, Cognition: Fundamental Theories

Psychology 100, Research Methods in Psychology

Two upper-division Psychology courses selected from the following:

- Psychology 120, Visual and Spatial Cognition
- Psychology 121, Perception
- Psychology 123, Cognitive Neuroscience
- Psychology 128, Human Factors
- Psychology 129, Human Learning and Memory

Computer Engineering 131, Human Computer Interaction

Computer Engineering 161, Mobile Sensing and Interaction

Upper-division elective from Baskin School of Engineering, Division of Physical and Biological Sciences, or Psychology.

### Disciplinary Communication

The Disciplinary Communication requirement is satisfied by the Technical Writing course (CMPE 185 or BME 185) plus the capstone requirement, though oral presentation and writing are integrated throughout the upper-division coursework. The portfolio in the exit requirement is a verification of disciplinary communication in several different forms.

### Exit Requirement

Students are required to submit a portfolio, exit survey, and exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:

- 1) A substantial written report on a design project. This is typically satisfied by a senior thesis, a written capstone project report, or a design report from the Applied Circuits for Bioengineers course.
- 2) Slides from a substantial verbal presentation. This is typically satisfied by a capstone design presentation,

Molecular Biomechanics, Stem Cell Engineering, or other design courses.

3) A research poster. This is typically satisfied by a senior thesis poster or a capstone design project poster, presented at the undergraduate poster symposium.

The three parts of the portfolio should represent at least two different design projects. If a senior thesis is completed, it must be provided as the written report. If a capstone project is completed, it must be provided as one (or more) of the three submissions.

Exit interviews are scheduled during the last week of the quarter by the Baskin School of Engineering (BSOE) advising office, generally as small group interviews.

### Bioengineering Major Planners

The following sample academic plans show possible courses of study for a bioengineering major. The first plan follows the biomolecular engineering concentration, the second the bioelectronics concentration, the third the assistive technology: motor concentration, and the fourth the assistive technology: cognitive/perceptual concentration.

All plans assume that students are ready for calculus and advanced computer programming courses when they start. Those who need to take precalculus or the CMPS 5J+11 programming series may not be able to complete the entire program within four years.

Students should consider taking courses during the summer to ensure timely completion of the degree. Courses planned to be taken at institutions other than UCSC require pre-approval by the undergraduate director.

All students should meet quarterly with an adviser from the School of Engineering Undergraduate Advising Office to review their finished and planned courses, as schedules and prerequisites change frequently. Any electives should be chosen well ahead of time, to ensure that prerequisites can be scheduled.

## BIOENGINEERING PARTICIPATING FACULTY AND PROFESSIONAL INTERESTS

---

**Mark Akesson (Biomolecular Engineering)**

Development of nanopore sensors for single molecule identification, epigenetics, bioethics

**Manuel Ares Jr. (Molecular, Cell, and Developmental Biology)**

RNA processing, structure and function of RNA

**Phillip Berman (Biomolecular Engineering)**

Baskin Distinguished Professor  
Drug development, vaccines, AIDS, monoclonal antibody therapeutics, immunology, molecular cell/biology, recombinant protein production (commercial scale)

**David Deamer (Biomolecular Engineering, Emeritus, UC Davis)**

Membrane biophysics, nanopore analysis, DNA sequencing, biomolecular self-assembly

**David Draper (Applied Mathematics and Statistics)**

Bayesian inference, prediction and decision-making; hierarchical modeling; Bayesian non-parametric methods; model specification and model uncertainty; Bayesian data science; accurate Bayesian computations with massive data; quality assessment; risk assessment; statistical applications in the environmental, medical, and social sciences

**William Dunbar (Computer Engineering)**

Theory and application of feedback control, single-molecule biophysics, nanopore sensors, dynamics and control of biomolecules

**Camilla Forsberg (Biomolecular Engineering)**

Hematopoietic stem cells, transcriptional regulation, chromatin, blood cell development, cell surface receptors, genomics

**Alexander A. Grillo (SCIPP)**

Neurophysiology, neural systems, high-energy particle physics

**Grant Hartzog (Molecular, Cell, and Developmental Biology)**

Biochemistry, genetics, chromatin and transcriptional regulation

**David Haussler (Biomolecular Engineering)**

Bioinformatics, genomics, computational genomic data analysis, molecular evolution and comparative genomics, genomic and clinical data sharing and standards, cancer genomics, neurodevelopment, stem cell research, immunogenomics, information theory, pattern recognition, machine learning, artificial

intelligence, information theory, theoretical computer sciences

**Richard Hughey (Biomolecular Engineering and Computer Engineering)**

Bioinformatics, hidden Markov models, computer architecture, parallel computation

**Michael Isaacson (Electrical Engineering)**

Nano- and microfabrication technology and applications to biomedical and diagnostic devices, nanocharacterization of materials with emphasis on the development of microscopy tools, novel modes of imaging, electron and light optics; renewable energy systems; STEM education

**Kevin Karplus (Biomolecular Engineering)**

Genome assembly from next-generation sequence data (Formerly protein structure prediction), signal processing and statistics for nanopore signals

**Douglas Kellogg (Molecular, Cell, and Developmental Biology)**

Coordination of cell growth and cell division

**Joel Kubby (Electrical Engineering)**

Micro-Electro-Mechanical-Systems (MEMS), adaptive optics (AO), optical-MEMS, bio-MEMS, bio-imaging, AO microscopy, AO astronomy

**Sri Kurniawan (Computational Media; Computer Engineering)**

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; human-centered design

**Alan M. Litke (SCIPP)**

Neural systems; retinal processing; development and prosthesis; technology development for neurophysiology; high-energy physics

**Todd Lowe (Biomolecular Engineering)**

Experimental and computational genomics, non-coding RNA gene finders, high-throughput small RNA sequencing, small RNA roles in cancer, evolution of RNA-based gene regulation

**Roberto Manduchi (Computer Engineering)**

Computer vision and sensor processing, with application to assistive technology for the visually impaired

**Dominic W. Massaro, Emeritus (Psychology)**

**Glenn L. Millhauser (Chemistry and Biochemistry)**  
Electron spin resonance; nuclear magnetic resonance, melanocortin receptor signaling, agouti proteins, prions, peptide synthesis

## Bioengineering

### **Linda Ogren (Molecular, Cellular, and Developmental Biology)**

Endocrinology

### **Eric Palkovacs (Ecology and Evolutionary Biology)**

Freshwater ecology, eco-evolutionary dynamics, fisheries and fish ecology

### **Nader Pourmand (Biomolecular Engineering)**

Bioelectronics, biosensors, chemosensors, nanotechnology, single cell characterization, sequencing, genotyping, pathogen detection, DNA fingerprinting

### **Raquel Prado (Applied Mathematics and Statistics)**

Bayesian non-stationary time series modeling, multivariate time series, biomedical signal processing and statistical genetics

### **Wendy Rothwell (Biomolecular Engineering)**

Biotechnology, molecular genetics

### **Holger Schmidt (Electrical Engineering)**

Narinder Singh Kapany Endowed Chair in Optoelectronics  
Optofluidics, atom photonics, hollow-core photonics for biomedicine and quantum optics, nano-magnetism, nano-magneto-optics, single-particle spectroscopy, ultrafast optics

### **Andrea Steiner (Community Studies)**

Health-care systems, health justice, critical public health, gerontology, ageism, long-term care

### **Joshua Stuart (Biomolecular Engineering)**

Jack Baskin Endowed Chair of Biomolecular Engineering

Computational functional genomics, comparative analysis of gene regulation, cross-species inference of gene networks, probabilistic graphical models

### **Ellen Kappy Suckiel, Emerita (Philosophy)**

Ethics, William James, American philosophy, genetic ethics, ethics of biotechnology

### **John Tamkun (Molecular, Cell, and Developmental Biology)**

Transcriptional regulation, molecular genetics of Drosophila development, regulation of gene expression

### **John F. Vesecky (Electrical Engineering)**

HF radar design and construction and observation of ocean surface winds, waves and currents with applications to coastal and deep water ocean processes; project MEDSAT

### **Alan M. Zahler (Molecular, Cell, and Developmental Biology)**

Molecular biology, splice site selection, and alternative pre-mRNA processing

### **Jin Z. Zhang (Chemistry and Biochemistry)**

Design, synthesis, characterization, and application of nanomaterials, including semiconductor and metal nanoparticles; femtosecond laser spectroscopy; ultrafast dynamics on surfaces and at interfaces; cancer biomarker detection; surface-enhanced Raman spectroscopy

### **Yi Zuo (Molecular, Cell, and Developmental Biology)**

Glia-synapse interaction and synaptic plasticity in vivo

Revised: 09/01/15

## PROGRAM DESCRIPTION

---

The Department of Biomolecular Engineering is an interdisciplinary department that combines expertise from biology, mathematics, chemistry, computer science, and engineering to train students and develop technologies to address major problems at the forefront of biomedical and bio-industrial research. Students trained in the Department of Biomolecular Engineering can look forward to careers in academia, the information and biotechnology industries, public health, or medical sciences.

The department offers an undergraduate minor and a bachelor of science (B.S.) degree in bioinformatics, and graduate master of science (M.S.) and doctor of philosophy (Ph.D.) degrees in biomolecular engineering and bioinformatics. The department co-sponsors the B.S. in bioengineering program, described elsewhere in this catalog, with the departments of Computer Engineering, Electrical Engineering, and Molecular, Cell, and Developmental (MCD) Biology. The department co-sponsors the Program in Biomedical Science and Engineering (PBSE), a doctoral training program, with the departments of MCD Biology, Chemistry and Biochemistry, and Microbiology and Environmental Toxicology.

Departmental faculty advise undergraduate and graduate researchers enrolled in the bioinformatics, bioengineering, and related degree programs. Members of the Department of Biomolecular Engineering actively collaborate with faculty from other Baskin School of Engineering departments, such as Applied Mathematics and Statistics, Computer Engineering, Computer Science, and Electrical Engineering; and with the Physical and Biological Sciences departments of MCD Biology, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, Ecology and Evolutionary Biology, and Ocean Sciences.

---

### BIoinFORMATICS MAJOR

---

Bioinformatics combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome

sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Center for Biomolecular Science and Engineering, <http://cbse.ucsc.edu>.

The Human Genome Project, the international collaboration to determine the sequence of human DNA and understand its function, had its origin in a conference that took place at UCSC in 1985. One notable output from our research is that UCSC is the primary release site for the public version of the human genome (<http://genome.ucsc.edu>), as well as the repository for the ENCODE (**Encyclopedia Of DNA Elements**) project, an international effort to annotate the entire human genome with multiple functional assays. We also have a strong research group in systems biology, functional genomic characterization of stem cells, and play a lead role in national efforts to discover molecular underpinnings of various cancers, including participating as a Dream Team for the Stand Up To Cancer project and a data-analysis center for The Cancer Genome Atlas project.

The undergraduate bioinformatics degree program prepares students for graduate school or a career in the pharmaceutical or biotechnology industries.

The immense growth of biological information stored in computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of statistics, science, and engineering. A classically trained scientist may be unfamiliar with the statistical and algorithmic knowledge required in this field. A classically trained engineer may be unfamiliar with the chemistry and biology required in the field. Thus, this program strives for a balance of the two: an engineer focused on the problems of the underlying science or, conversely, a scientist focused on the use of engineering tools for analysis and discovery.

The undergraduate degree program in bioinformatics builds a solid foundation in the constituent areas of the field. Students complete core sequences in mathematics (including calculus, statistics, and discrete

## Biomolecular Engineering

mathematics), science (including biology, chemistry, and biochemistry), and engineering (including programming, algorithms, and databases). The core topics are brought together in two bioinformatics courses: Biomolecular Engineering 110, Computational Biology Tools, and Biomolecular Engineering 205, Bioinformatics Models and Algorithms. Students have two electives for specialization within the fields of bioinformatics and are required to take Biomolecular Engineering 80G, Bioethics in the Twenty-First Century: Science, Business, and Society to study the ethical, legal, and social implications of this new technology.

---

### PROGRAM LEARNING OUTCOMES

---

A bioinformatics student completing the program should:

- have a detailed knowledge of statistics, computer science, biochemistry, and genetics;
- be able to find and use information from a variety of sources, including books, journal articles, and online encyclopedias;
- be able to design and conduct computational experiments, as well as to analyze and interpret data;
- be able to apply their knowledge to write programs for answering research questions in biology;
- be able to communicate problems, experiments, and design solutions in writing, orally, and as posters; and
- be able to apply ethical reasoning to make decisions about engineering methods and solutions in a global, economic, environmental, and societal context.

---

### COURSES FOR NONMAJORS

---

Biomolecular Engineering 5, Introduction to Biotechnology, presents a broad overview of the impact of biotechnology on the diagnosis and treatment of disease.

Biomolecular Engineering 160, Programming for Biologists and Biochemists, provides an introductory programming class using Python to analyze, transform, and publish biological data.

Biomolecular Engineering 80G, Bioethics in the Twenty-First Century: Science, Business, and Society, is particularly appropriate to all students interested in the societal issues surrounding the revolutions in bioinformatics and biotechnology.

Biomolecular Engineering 110, Computational Biology Tools, provides an introduction to the tools and techniques of bioinformatics from a user's view. It is intended for biologists and biochemists who need to

use bioinformatics tools, but are not primarily interested in building new bioinformatics tools.

Biomolecular Engineering 130, Genomes, teaches the principles of genome-scale analysis to answer biological questions.

Biomolecular Engineering 155, Biotechnology and Drug Development, examines the science and process of discovering, testing, and manufacturing new drugs within the pharmaceutical industry.

---

### BIOINFORMATICS POLICIES

---

#### DECLARATION OF THE MAJOR

---

Admission to the bioinformatics major is based on the required lower-division courses: BIOL 20A, BIOE 20B, BME 80G, CHEM 1A, CHEM 1B/M, CHEM 1C/N, CMPE 16, CMPS 12A/L (or CMPS 5J and 11 OR CMPE 12/L and CMPE 13/L), CMPS 12B/M, MATH 19A, MATH 19B, MATH 23A, and fundamental upper-division courses: AMS 131, CHEM 108A/L, CHEM 108B/M, and CMPS 101. Students must have completed 50 credits from this list by the end of the fifth quarter. Students must also have a GPA of 2.8 or better in all attempts in these courses. Students changing major after the sixth quarter will need 10 additional credits for each additional quarter.

Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Office, describing why the grade point average obtained is not an accurate reflection of the student's potential, or requesting that other completed upper-division courses be considered in admissions process.

#### COURSES TAKEN ELSEWHERE

---

Please refer to the School of Engineering section of the catalog for policies about taking courses at other institutions after enrolling at UCSC.

#### HONORS IN THE MAJOR

---

Bioinformatics majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research. Students with a GPA of 3.7 receive "Highest Honors in the Major." Students with a GPA of 3.3 receive "Honors in the Major." Students with particularly significant accomplishments in undergraduate research may receive honors or highest honors with a lower GPA. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

## Biomolecular Engineering

### TRANSFER STUDENTS

---

Transfer students need eight transferable courses from the list of courses used for admission to the major for on-campus students, with a GPA in those courses of 2.8 or better. Students with fewer than 10 transferable courses may find it difficult to complete the major in only two more years.

### SCHOOL OF ENGINEERING POLICIES

---

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs.

### PREPARATION FOR THE MAJOR

---

Students applying for admission to the bioinformatics major should have completed four years of high school mathematics (through advanced algebra and trigonometry) and three years of science, including one year of chemistry and one year of biology. Comparable college mathematics and science courses completed at other institutions may be accepted in place of high school preparation. Students without this preparation may be required to take additional courses to prepare themselves for the program.

### REQUIREMENTS OF THE BIOINFORMATICS MAJOR

---

Every bioinformatics major must have a faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office, and with that adviser must formulate a program of proposed course work that meets the major requirements. Because of the enormous breadth of requirements, bioinformatics majors are urged to take honors courses or sections whenever possible to get as much as possible out of the courses they take in each field.

### LOWER-DIVISION REQUIREMENTS

---

Majors must complete the following lower-division courses:

#### **Biology**

Biology (BIOL) 20A, Cell and Molecular Biology

Biology (BIOE) 20B, Development and Physiology

#### **Biomolecular Engineering**

Biomolecular Engineering 80G, Bioethics in the Twenty-First Century: Science, Business, and Society

#### **Chemistry**

Chemistry 1A, 1B/M, and 1C/N, General Chemistry/Laboratory

#### **Computer Engineering**

Computer Engineering 16, Applied Discrete Mathematics

#### **Programming 1**

Computer Science 12A/L, Introduction to Programming/Laboratory (accelerated); or

Computer Science 5J, Introduction to Programming in Java, and 11, Intermediate Programming; or

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory, and 13/L, Computer Systems and C Programming/Laboratory

#### **Programming 2**

Computer Science 12B/M, Introduction to Data Structures/Laboratory

#### **Mathematics**

Mathematics 20A-B, Honors Calculus; or

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics (Credit for one or both can be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination.)

Mathematics 23A, Multivariable Calculus

### UPPER-DIVISION REQUIREMENTS

---

Majors must complete the following upper-division courses:

#### **Applied Mathematics and Statistics**

Applied Mathematics and Statistics 131, Introduction to Probability Theory

Applied Mathematics and Statistics 132, Statistical Inference

#### **Biochemistry and Molecular Biology**

Biochemistry 100A, Biochemistry (first in three-part sequence)

#### **Bioinformatics**

Biomolecular Engineering 110, Computational Biology Tools

Biomolecular Engineering 130, Genomes

Biomolecular Engineering 205, Bioinformatics Models and Algorithms

One of the following:

Biomolecular Engineering 211, Computational Systems Biology; or

Biomolecular Engineering 230/L, Computational Genomics/Laboratory; or

Biomolecular Engineering 195, Senior Thesis Research

#### **Biology (BIOL)**

Biology 105, Genetics

## Biomolecular Engineering

### Chemistry

Chemistry 108A/L and 108B/M, Organic Chemistry/Laboratory; or

### Technical Writing

Computer Engineering 185, Technical Writing for Computer Engineers; or

Biomolecular Engineering 185, Technical Writing for Biomolecular Engineers

### Computer Science

Computer Science 101, Algorithms and Abstract Data Types

Computer Science 109, Advanced Programming

One of the following:

Computer Science 182, Introduction to Database Management Systems, or

Computer Science 180, Database Systems

### REQUIRED ELECTIVES

---

Students must select one additional course as an elective, justify their choice in writing, and get the choice approved by their faculty adviser. The following courses are typical of the ones chosen, but do not constitute a pre-approved list:

Applied Mathematics and Statistics 162

Biochemistry 100B, 100C, 110

Biology 105L, 105M, 109L, 110, 115, 115L, 117A, 117B, 140, 187L, 200A, 200B

Biomolecular Engineering 101/L, 128, 140, 150, 155, 177, 178, 211, 230

Computer Engineering 108, 177

Computer Science 104A, 105, 115, 116, 130, 140, 142, 160/L

Microbiology and Environmental Toxicology 119, 119L

Technology and Information Management 105, 206

**Note:** many of these courses are offered only once a year and have long prerequisite chains, so advance planning is necessary to make sure elective courses can be fit into the student's schedule.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Bioinformatics majors satisfy the DC requirement by completing Computer Engineering 185, Technical Writing for Engineers, or Biomolecular Engineering 185, Technical Writing for Biomolecular Engineers.

### COMPREHENSIVE REQUIREMENT

---

The bioinformatics comprehensive requirement can be met by taking Biomolecular Engineering 211, Computational Systems Biology; or Biomolecular Engineering 230/L, Computational Genomics, which include substantial projects; or Biomolecular Engineering 195, Senior Thesis Research. Students electing the senior thesis must submit a written thesis proposal to the undergraduate director of bioinformatics for approval one quarter prior to submitting the final thesis.

---

### REQUIREMENTS OF THE BIOINFORMATICS MINOR

---

Where the bioinformatics major is intended for people who wish to become bioinformaticians and create the tools needed to solve new problems in computational biology, the bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics.

A bioinformatics minor consists of the following 16 courses:

#### LOWER-DIVISION (10 COURSES)

---

##### **Biology (2)**

Biology 20A, Cell and Molecular Biology; and  
Biology 20B, Development and Physiology

##### **General chemistry (3)**

Chemistry 1A, 1B/M, and 1C/N

##### **Single-Variable Calculus (2)**

Mathematics 19A and 19B (preferred); or

Mathematics 11A and 11B; or

Mathematics 20A and 20B

##### **Programming 1 (1)**

Computer Science 12A/L; or

Computer Science 5J and 11; or

Computer Engineering 12/L and 13/L

##### **Programming 2 (1)**

Biomolecular Engineering 160/L; or

Computer Science 12B/M

##### **Bioethics (1)**

Biomolecular Engineering 80G

#### UPPER-DIVISION (6 COURSES)

---

##### **Organic chemistry (1)**

Chemistry 108A

## Biomolecular Engineering

### **Biochemistry (1)**

Biochemistry 100A; or

Chemistry 103; or

Biology 100

### **Statistics (2)**

Computer Engineering 107; or

Applied Mathematics and Statistics 131

Applied Mathematics and Statistics 132

### **Bioinformatics (1)**

Biomolecular Engineering 110

### **ELECTIVE(1)**

Biochemistry 100B; or

any other upper-division or graduate biomolecular engineering course

The bioinformatics minor requirements may satisfy the requirements of other majors or minors under the campus policy discussed in Major and Minor Requirements. Majors with substantial overlap include biochemistry, bioengineering, all biology majors, chemistry, computer science, and computer engineering. Students pursuing one of these majors are particularly encouraged to consider the bioinformatics minor.

## **THE BIOINFORMATICS COMBINED B.S./GRADUATE DEGREE PROGRAM**

Because our bioinformatics B.S. program provides excellent preparation for a graduate program in bioinformatics, we offer a combined B.S./graduate degree program that allows our B.S. students to complete the M.S. (or Ph.D.) somewhat sooner than students with a less tailored preparation.

The current B.S. and graduate requirements have three courses in common:

Biomolecular Engineering 80G, Bioethics in the 21st Century

Biomolecular Engineering 205, Bioinformatics Models and Algorithms

Biomolecular Engineering 230, Computational Genomics

The combined B.S./graduate degree program does not make any changes to the undergraduate program, except that students must pass the three overlapping courses listed above for a grade of B- or better.

The requirements at the graduate level are changed to remove the three courses that overlap with the B.S. and to add one graduate elective to be chosen by the students with the approval of their advisers. Thus, the

total number of full courses required is reduced from nine to seven.

To apply for the combined program, students apply to the M.S. or Ph.D. program through the normal graduate admission process in the fall of their senior year. If admitted into the graduate program, they are automatically included in the combined B.S./M.S. or B.S./Ph.D. program.

## **BIOINFORMATICS MAJOR PLANNERS**

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Students undecided about pursuing a bioengineering or bioinformatics degree should follow the biomolecular engineering concentration of the bioengineering B.S. program and complete the programming sequence (Computer Science 12A and 12B) by the end of their second year.

Four-year plans require individual design to fit in the desired electives, so only the first two years of the academic plan are presented here. It is recommended that students reserve the summer after the junior year for undergraduate research. One popular plan involves taking organic chemistry and the associated laboratories in the summer after completing general chemistry, so that biochemistry may be started in the junior year.

Biomolecular Engineering 205, Bioinformatics Models and Algorithms, should be taken after Biomolecular Engineering 110, Computational Biology Tools.

Sample Plan			
Year	Fall	Winter	Spring
1st (frsh)	MATH 19A	MATH 19B	MATH 23A
	CHEM 1A	CHEM 1B/M	CHEM 1C/N
	college core	gen ed	gen ed
2nd (soph)	BIOL 20A	CMPS 12A/L	CMPS 12B/M
	CHEM 108A/L	BIOE 20B	CMPE 16
	BME 80G	gen ed	gen ed

## **BIOMOLECULAR ENGINEERING AND BIOINFORMATICS GRADUATE PROGRAM**

The Department of Biomolecular Engineering offers interdisciplinary M.S. and Ph.D. degrees in biomolecular engineering and bioinformatics.

### **COURSE REQUIREMENTS**

Both masters and doctoral students must complete eight, 5-credit courses and one 3-credit research and teaching course. In addition, M.S. students must

## Biomolecular Engineering

complete three seminar courses, while Ph.D. students must complete five seminar courses. M.S. students must also complete one lab rotation, and Ph.D. students must complete three research laboratory rotations (course 296) with different supervisors.

### **Core courses (5-credit) six are required**

#### **Bioinformatics Emphasis**

- BME 205, Bioinformatics Models and Algorithms
- Two Biomolecular Engineering graduate courses from the bioinformatics list
- One Biomolecular Engineering graduate course from the biomolecular engineering list
- One graduate statistics course (Applied Mathematics and Statistics 206B recommended)
- One graduate course from MCD Biology, Chemistry and Biochemistry, or Microbiology and Environmental Toxicology

#### **Biomolecular Engineering Emphasis**

- BME 250, Molecular Biomechanics
- Two Biomolecular Engineering graduate course from the biomolecular engineering list
- One Biomolecular Engineering graduate courses from the bioinformatics list
- Two graduate courses from Applied Mathematics and Statistics, MCD Biology, Chemistry and Biochemistry, or Microbiology and Environmental Toxicology

### **Ethics Course (5-credit) one is required**

- BME 80G, Bioethics in the Twenty-First Century: Science, Business, and Society
- Sociology 268A, Science and Justice: Experiments in Collaboration.

### **Electives (5-credit) one is required**

One graduate course consistent with the students degree objectives. With preapproval by the graduate director, this elective may be an upper-division undergraduate course selected to improve background in areas not studied as an undergraduate.

Independent or thesis research courses cannot be counted as electives.

Students must choose courses with faculty guidance and approval to balance their preparation and make up for deficiencies in background areas. With consent of the graduate director, variations in the composition of the required courses may be approved.

### **OTHER CURRICULUM REQUIREMENTS**

BME 200, Research and Teaching in Bioinformatics, 3 credits

## Seminars

M.S. students: a minimum of three seminar courses, including at least one quarter of the 2-credit Biomolecular Engineering seminar, 280B

Ph.D. students: a minimum of six seminar courses, including at least two quarters of the 2-credit Biomolecular Engineering seminar, 280B

Before and after advancement, full-time Ph.D. students are required to enroll in at least one seminar course each quarter (e.g., 280 or 281), and must present the results of their ongoing research at least once each year. Because the intent of the seminar requirement is to ensure breadth of knowledge, lab group meetings (BME 281 courses) do not count for the seminar requirement.

### **Research Experience**

M.S. students: one laboratory rotation (BME 296), and one quarter of independent study (BME 297).

Ph.D. Students: three laboratory rotations (course 296), generally within the first 12 months. One of the laboratory rotations must be with a faculty supervisor who does wet-lab research, though the students rotation project may be purely computational.

### **COURSE LISTS**

The following are the bioinformatics and biomolecular engineering course lists. The lists are subject to change as courses and course content changes. The graduate office maintains the current list.

Bioinformatics list: 205, 211, 230, 235

Biomolecular Engineering list: 215, 250, 255

### **QUALIFYING EXAMINATIONS**

Ph.D. students are required to pass the qualifying examination and advance to candidacy by the end of their second year.

### **ADEQUATE PROGRESS**

Graduate students receiving two or more U (unsatisfactory) grades or grades below B in courses relevant to the program are not making adequate progress and will be placed on academic probation for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B) a relevant course while on probation may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from probation are immediately returned to academic probation.

Graduate students experiencing circumstances that may adversely affect their academic performance

## Biomolecular Engineering

should consult with their adviser and the graduate director.

### MASTERS CAPSTONE REQUIREMENT

---

M.S. students must complete a one-quarter research project with written report to fulfill the capstone requirement. In consultation with the faculty adviser, the student forms a Master's Capstone Reading Committee of at least two faculty members (including the adviser), each of whom is provided a copy of the project report. The final project report must be signed by the reading committee before the award of the Master of Science Degree.

### DOCTORAL DISSERTATION REQUIREMENTS

---

Ph.D. students must select a faculty research adviser by the end of the first year. A qualifying examination committee is then formed in the second year, which consists of the adviser and three additional members, and which is approved by the graduate director and the campus graduate dean. At least two of the four must be members of the Department of Biomolecular Engineering. The student must submit a written dissertation proposal to all members of the committee

and the graduate program adviser one month in advance of the examination. The dissertation proposal is publicly and formally presented in an oral qualifying examination given by the qualifying committee.

Ph.D. candidates will submit the completed dissertation to a reading committee at least one month prior to the dissertation defense. The reading committee, formed upon advancement to candidacy, consists of the dissertation supervisor and two readers appointed by the graduate director upon the recommendation of the dissertation supervisor. At least one of the three must be a member of the Department of Biomolecular Engineering. The candidate will present his or her research in a public seminar. The seminar will be followed by a defense of the dissertation to the reading committee and attending faculty, who will then decide whether the dissertation is acceptable or requires revision.

### TRANSFER LIMITATIONS

---

Up to two courses may be transferred from other graduate institutions with the approval of the faculty adviser and the graduate director.

---

## BIOMOLECULAR ENGINEERING FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

#### **Mark Akeson**

Development of nanopore sensors for single molecule identification, epigenetics, bioethics

#### **Phillip Berman**

#### **Baskin Distinguished Professor**

Drug development, vaccines, AIDS, monoclonal antibody therapeutics, immunology, molecular cell/biology, recombinant protein production (commercial scale)

#### **Camilla Forsberg**

Hematopoietic stem cells. transcriptional regulation, chromatin, blood cell development, cell surface receptors, genomics

#### **David Haussler**

Bioinformatics, genomics, computational genomic data analysis, molecular evolution and comparative genomics, genomic and clinical data sharing and standards, cancer genomics, neurodevelopment, stem cell research, immunogenomics, information theory, pattern recognition, machine learning, artificial intelligence, information theory, theoretical computer science

#### **Richard Hughey (joint with Computer Engineering)**

Bioinformatics, hidden Markov models, computer architecture, parallel computation

#### **Kevin Karplus**

Genome assembly from next-generation sequence data (Formerly protein structure prediction), signal processing and statistics for nanopore signals

#### **Todd Lowe**

Experimental and computational genomics, non-coding RNA gene finders, and high-throughput small RNA sequencing small RNA roles in cancer, evolution of RNA-based gene regulation

#### **Nader Pourmand**

Bioelectronics, biosensors, chemosensors, nanotechnology, single-cell characterization, sequencing, genotyping, pathogen detection, DNA fingerprinting

#### **Joshua Stuart**

#### **Jack Baskin Endowed Chair of Biomolecular Engineering**

Computational functional genomics, comparative analysis of gene regulation, cross-species inference of gene networks, probabilistic graphical models

## Biomolecular Engineering

### ASSISTANT PROFESSOR

---

#### **Angela Brooks**

Genomics, functional genomics, cancer genomics, RNA processing, gene regulation, gene variant function

#### **Rebecca M. Dubois**

Protein engineering; structural virology and biomedical applications

#### **Richard "Ed" Green**

Genomics, computational molecular biology, genome assembly, human evolutionary genetics, ancient DNA, high-throughput sequencing, mRNA-processing and alternative splicing

#### **Christopher Vollmers**

Developing DNA sequencing tools to analyze B cells on a population and single cell level

### RESEARCH PROFESSOR

---

#### **David W. Deamer (UC Davis Emeritus)**

Membrane biophysics, nanopore analysis, DNA sequencing, biomolecular self-assembly

#### **Adjunct Professor**

#### **Robert Coffman**

Regulation of innate and adaptive immunity, systems biology of human immune responses, development of novel vaccines and oligonucleotide-based drugs

#### **Jonathan Trent**

Organic aggregates, marine snow, microbial physiology, microenvironments, robust proteins, genetic engineering for nanotechnology

#### **Zemin Zhang**

Cancer genomics, bioinformatics, anti-cancer target and biomarker discovery, tumor immunology, drug-genome interaction

#### **Assistant Adjunct Professor and Lecturer**

#### **David Bernick**

Biofuel production using reengineered extremophiles, especially halophiles; next-generation sequencing applications including genome assembly, metagenome assembly and RNA transcriptomics; extremozymes - viral/microbial gene discovery - RNA/RNA packing motors and porins; single-molecule sequencing of highly structured/modified tRNA; novel halo virus discovery

### LECTURER

---

#### **Wendy Rothwell**

Biotechnology, molecular genetics

#### **Manuel Ares, Jr. (Molecular, Cell, and Developmental Biology)**

RNA processing, structure and function of RNA

#### **Hinrich Boeger (Molecular, Cell, and Developmental Biology)**

Chromatin structure and gene regulation

#### **Manel Camps (Microbiology and Environmental Toxicology)**

Molecular mechanisms of reactive DNA methylation toxicity

#### **William Dunbar (Computer Engineering)**

Theory and application of feedback control, single-molecule biophysics, nanopore sensors, dynamics and control of biomolecules

#### **Lars Fehren-Schmitz (Anthropology)**

Palaeogenetics/anthropological genetics, human evolutionary ecology, evolutionary demography, gene-culture coevolution, migration theories, population history of the Americas, archaeology of South America

#### **A. Russell Flegal (Microbiology and Environmental Toxicology)**

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

#### **Robert S. Lokey (Chemistry and Biochemistry)**

Organic chemistry, combinatorial synthesis, biotechnology, molecular cell biology

#### **Glenn L. Millhauser (Chemistry and Biochemistry)**

Electron spin resonance; nuclear magnetic resonance, melanocortin receptor signaling, agouti proteins, prions, peptide synthesis

#### **Karen Ottemann (Microbiology and Environmental Toxicology)**

How bacterial pathogens are able to chronically colonize mammalian hosts and cause disease outcomes such as inflammation and cancer

#### **Beth Shapiro (Ecology and Evolutionary Biology)**

Evolutionary and molecular ecology, ancient DNA, genomics, pathogen evolution

#### **John W. Tamkun (Molecular, Cell, and Developmental Biology)**

Transcriptional regulation, molecular genetics of *Drosophila* development, regulation of gene expression

#### **Hongyun Wang (Applied Mathematics and Statistics)**

Single molecule studies and biophysics, statistical physics, stochastic processes and stochastic differential equations, classical analysis, numerical analysis

#### **Manfred K. Warmuth (Computer Science)**

Online learning, machine learning, statistical decision theory, game theory, analysis of algorithms

#### **W. Todd Wipke, Emeritus (Chemistry and Biochemistry)**

**Fitnat H. Yildiz (Microbiology and Environmental Toxicology)**

Understanding processes controlling transmission of bacterial pathogens

**Alan M. Zahler (Molecular, Cell, and Developmental Biology)**

Alternative pre-mRNA splicing and small RNA function

---

## BIOMOLECULAR ENGINEERING COURSES

---

### LOWER-DIVISION COURSES

---

**5. Introduction to Biotechnology. F,W,S**

Introduces the tools and applications of biotechnology in the fields of medicine, agriculture, the environment, and industry. (General Education Code(s): PE-T, IN.) W. Rothwell, The Staff

**80G. Bioethics in the 21st Century: Science, Business, and Society. F**

Serves science and non-science majors interested in bioethics. Guest speakers and instructors lead discussions of major ethical questions having arisen from research in genetics, medicine, and industries supported by this knowledge. (Also offered as Philosophy 80G. Students cannot receive credit for both courses.) (General Education Code(s): PE-T, T6-Natural Sciences or Humanities and Arts.) S. Dreisbach, The Staff

**80H. The Human Genome. F,W,S**

Course will focus on understanding human genes. Accessible to non-science majors. Will cover principles of human inheritance and techniques used in gene analysis. The evolutionary, social, ethical, and legal issues associated with knowledge of the human genome will be discussed. (General Education Code(s): PE-T, T2-Natural Sciences.) W. Rothwell, The Staff

**88A. BMES Freshman Design Seminar (2 credits). W**

A first course in engineering design for bioengineers. In cooperation

with the Biomedical Engineering Society (BMES). Students choose a design project and work on it in competitive and cooperative teams. Covers research, design, prototyping, and report writing. Enrollment restricted to first-year Bioengineering majors and proposed majors. Enrollment limited to 25. (General Education Code(s): PR-E.) K. Karplus

**94. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**94F. Group Tutorial (2 credits). F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### UPPER-DIVISION COURSES

---

**101. Applied Electronics for Bioengineers. S**

Introduces analog electronics. Topics include circuit theory (Kirchhoff's laws, Thevenin equivalents); constant and

sinusoidal signals; RC filters; op amps; feedback; oscillators; and instrumentation amplifiers. Emphasis is on design for sensors (thermistors, microphones, electrodes, pressure sensors, phototransistors); voltage dividers are a recurring theme. (Formerly Applied Circuits for Bioengineers.) Prerequisite(s): Mathematics 11B, 19B, or 20B and previous or concurrent enrollment in Physics 5C/N or 6C/N; concurrent enrollment in Biomolecular Engineering 101L is required. K. Karplus

**101L. Applied Electronics for Bioengineers Laboratory (2 credits). S**

Twice weekly, three-hour laboratory to design and build circuits to interface sensors used in bioengineering (thermistors, microphones, electrodes, pressure sensors, phototransistors). Students design and build a one-lead electrocardiograph (EKG). Students are billed a materials fee. (Formerly Applied Circuits Laboratory.) Prerequisite(s): Concurrent enrollment in course 101 is required. Enrollment limited to 48. K. Karplus

**110. Computational Biology Tools. F,W**

Hands-on lectures and laboratory geared to teach basic tools and skills used in computational biology (genome browsers, sequence database searching, motif analysis, multiple sequence alignment, gene finders, phylogenetics analysis, protein structure visualization, and others). Web-based tools/databases

## Biomolecular Engineering

are used on student laptops. Open to all science students; no prior programming or Unix experience required. Prerequisite(s): Biology 100, 105, Biochemistry 100A, or Chemistry 103 or declared Bioinformatics majors. Enrollment limited to 25. T. Lowe, The Staff

### **123A. Bioengineering Project 1 (7 credits). F**

First of a two-course sequence that is the culmination of the engineering program. Students apply knowledge and skills gained in elective track to complete a major design project. Students complete research, specification, planning, and procurement for a substantial project. Includes technical discussions, design reviews, and formal presentations; engineering design cycle, engineering teams, and professional practices. Formal technical specification of the approved project is presented to faculty. Students are billed a materials fee. Prerequisite(s): course 140 or 150, and previous or concurrent enrollment in course 185 or Computer Engineering 185. Enrollment restricted to senior biogengineering majors. (General Education Code(s): PR-E.) The Staff, M. Akesson, K. Karplus

### **123B. Bioengineering Project 2 (7 credits). W**

Second of two-course bioengineering group project sequence. Students implement and test the engineering designs from course 123A. Requires oral progress reports and formal oral presentation before faculty. Students are billed a materials fee. Prerequisite(s): course 123A, and course 185 or Computer Engineering 185. Enrollment restricted to senior biogengineering majors. Enrollment limited to 30. (General Education Code(s): PE-E.)

M. Akesson, The Staff

### **123T. Senior Thesis Writing (2 credits). W**

For bioengineering senior thesis students, guidance in preparing a draft manuscript describing their senior research project. Students also practice conference-style oral or poster presentation. Enrollment is restricted to senior biogengineering majors. (Formerly Senior Thesis Presentation.) Prerequisite(s): course 185 or Computer Engineering (CMPE) 185. Concurrent enrollment in course 193 or course 195 or course 198 or CMPE 193 or CMPE 195 or CMPE 198 or Electrical Engineering (EE) 193 or EE 195 or EE 198 is required. Enrollment limited to 25. The Staff, M. Akesson, K. Karplus

### **128. Protein Engineering. S**

For bioengineering, bioinformatics, and biology majors, focuses on engineering (i.e., changing) of proteins. Topics focus on practical aspects of protein engineering strategies that are crucial to modern biotechnology and biomedical applications. Prerequisite(s): Biology 20A, and Biology 100 or Biochemistry and Molecular Biology 100A, or by permission of instructor. R. Dubois, The Staff

### **128L. Protein Engineering Laboratory (2 credits). S**

Students address a current scientific question about protein stability using structure-guided protein engineering. Specifically, Students use recombinant DNA technology to produce an engineered protein that is predicted to have enhanced stability. Students then assess its stability with differential scanning fluorimetry. Students are billed a materials fee. Prerequisite(s): Biochemistry 100A or Biology 100, and Biology 100K or

Biology 101L. Concurrent enrollment in course 128 is required. Enrollment is restricted to junior and senior bioengineering majors; other majors by permission of instructor. Enrollment limited to 20. R. Dubois, (F) The Staff

### **130. Genomes. F**

Advanced elective for biology majors, examining biology on the genome scale. Topics include genome sequencing; large scale computational and functional analysis; features specific to prokaryotic, eukaryotic, or mammalian genomes; proteomics; SNP analysis; medical genomics; and genome evolution. Prerequisite(s): Biology 100 or Chemistry 103 or Biochemistry 100A; and Biology 105; or approval of instructor. Enrollment limited to 30. R. Green

### **140. Bioinstrumentation. F**

Introduces the fundamental aspects of bioinstrumentation that are essential for beginning-level employment in clinical, pharmaceutical, and biotechnology laboratories. The advantages and disadvantages of several instruments are discussed and demonstrated, such as thermocycler, polymerase chain reaction (PCR), next-generation DNA sequencing platforms, pyrosequencing, fabless nanofabrication, ion-sensitive measurements, microarray fabrication, and fluorescent-activated cell sorter (FACS). Students are billed a materials fee. Prerequisite(s): course 5, or course 101/L, or Electrical Engineering 101/L, or Biology 100, or Biochemistry and Molecular Biology 100A. N. Pourmand

### **150. Molecular Biomechanics. S**

Considers how assemblies of macromolecules (molecular

## Biomolecular Engineering

motors) convert chemical energy into mechanical work on the nanometer-to-Angstrom scale. Processes examined include ATP-dependent movement of organelles in the cytosol facilitated by kinesin; proton pumping by ATPases in the mitochondrial membrane; viral genome packaging; bacterial movement driven by flagella; processive addition of nucleotides by polymerases during replication and transcription; and protein synthesis by ribosomes. Cannot receive credit for this course and course 250. Prerequisite(s): Biology 20A; and Biology 20B or 105; and Biology 100 or Biochemistry 100A. M. Akeson

### **155. Biotechnology and Drug Development. W**

Recommended for students interested in careers in the biopharmaceutical industry. Focuses on recombinant DNA technology and the drug-development process, including discovery research; preclinical testing; clinical trials; and regulatory review, as well as manufacturing and production considerations. Students may not receive credit for this course and Biomolecular Engineering 255 and Chemistry 255. Prerequisite(s): Biology 20A and Biology 100 or Chemistry 103 or Biochemistry and Molecular Biology 100A. Enrollment limited to 15. P. Berman

### **160. Research Programming in the Life Sciences. F,S**

No programming experience is required, but basic computer and molecular biology understanding is assumed. Students learn programming in Python to manipulate biological data. Programming assignments comprise the majority of the assignments, and a final project

using skills developed in this course is required. BioPython and other modules introduced for use in the final project. (Formerly Research Programming for Biologists and Biochemists.) Prerequisite(s): Biology 20A or 21A. Previous or concurrent enrollment in course 160L is required. (General Education Code(s): MF.) J. Stuart, The Staff

### **160L. Research Programming in the Life Sciences Laboratory (1 credit). F,S**

Laboratory sequence illustrating topics covered in course 160. One two-hour laboratory per week. (Formerly Research Programming for Biologists and Biochemists Laboratory.) Prerequisite(s): Biology 20A or 21A. Previous or concurrent enrollment in course 160 is required. J. Stuart, The Staff

### **170. Drug Action and Development. \***

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 270. (Formerly Frontiers in Drug Action and Discovery.) (Also offered as Chemistry and Biochemistry 170. Students cannot receive credit for both courses.) Prerequisite(s): Biology 100 or Chemistry 103 or Biochemistry 100A. Biology 110 and 130/L or 131/L are recommended. Enrollment restricted to juniors and seniors. D. Smith, T. Holman, M. Camps, R. Lington, P. Berman

### **177. Engineering Stem Cells. W**

For bioengineering students

interested in stem cells. Class uses project-based learning to discuss basic stem cell concepts and past breakthrough approaches to identify and design solutions for technological hurdles in stem cell research. Prerequisite(s): course 140 or 150, and BIOL 100, or by consent of instructor. Enrollment limited to 30. C. Forsberg, The Staff

### **178. Stem Cell Biology. W**

Basic concepts, experimental approaches, and therapeutic potential are discussed. Students gain experience in reading the primary scientific literature. Prerequisite(s): Biology 110; Biology 115 recommended. C. Forsberg

### **180. Professional Practice in Bioengineering (2 credits). S**

Seminar course where students develop a research proposal and the collaborative skills needed for independent research projects. Includes professional practice development in collaboration skills, project management, proposal development, and funding. Prerequisite(s): previous or concurrent enrollment in course 185 or Computer Engineering 185. Enrollment is restricted to junior and senior bioengineering and bioinformatics majors or by permission of instructor. Enrollment limited to 25. (General Education Code(s): PR-E.) D. Bernick

### **185. Technical Writing for Biomolecular Engineers. W**

Writing by biomolecular engineers, not to general audiences, but to engineers, engineering managers, and technical writers. Exercises include job application and resume, library puzzle, graphics, laboratory protocols, document specification, progress report, survey article or research proposal, poster, and oral

## Biomolecular Engineering

presentation. Prerequisite(s): satisfaction of Entry Level Writing and Composition

requirements; previous or concurrent enrollment in BIOL 101L, BIOL 100K, or BME 150L. Enrollment restricted to junior or senior bioengineering or bioinformatics majors. Enrollment limited to 20. K. Karplus

### **193. Field Study. F,W,S**

Provides for individual programs of study with specific aims and academic objectives carried out under the direction of a BME faculty member and a willing sponsor at a field site, using resources not normally available on campus. Credit is based upon written and oral presentations demonstrating the achievement of the objectives of the course. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **193F. Field Study (2 credits). F,W,S**

Provides for individual programs of study with specific aims and academic objectives carried out under the direction of a BME faculty member and a willing sponsor at a field site, using resources not normally available on campus. Credit is based upon written and oral presentations demonstrating the achievement of the objectives of the course. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194. Group Tutorial. F,W,S**

A program of study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194F. Group Tutorial (2 credits). F,W,S**

A program of independent study arranged between a group of

students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **195. Senior Thesis Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **195F. Senior Thesis or Research (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198. Individual Study or Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Individual Study or Research (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199. Tutorial. F,W,S**

For fourth-year students majoring in bioinformatics or bioengineering. May be repeated for credit. The Staff

## GRADUATE COURSES

---

### **200. Research and Teaching in Bioinformatics (3 credits). F**

Basic teaching techniques for teaching assistants, including responsibilities and rights of teaching assistants, resource materials, computer security, leading discussion or lab sessions, presentation techniques, maintaining class records, electronic handling of homework, and grading. Examines research and professional training, including use of library and online databases, technical typesetting, writing journal and conference papers, publishing in bioinformatics, giving talks in seminars and conferences,

and ethical issues in science and engineering. Required for all teaching assistants. Enrollment restricted to graduate students. K. Karplus

### **201. Scientific Writing (3 credits). W**

Covers effective writing styles for scientific communication for bio-science and engineering graduate students. Covers instruction for writing grant applications, scientific manuscripts, and thesis proposals. Students practice by preparing, editing, and evaluation each of these documents. Enrollment is restricted to graduate students. R. Green

### **205. Bioinformatics Models and Algorithms. F**

Covers bioinformatics models and algorithms: the use of computational techniques to convert the masses of information from biochemical experiments (DNA sequencing, DNA chips, and other high-throughput experimental methods) into useful information. Emphasis is on DNA and protein sequence alignment and analysis. Enrollment restricted to graduate students. Undergraduates may enroll with prerequisite(s): Computer Science 12B; and Computer Engineering 107 or Applied Math and Statistics 131; and Biology 20A; and concurrent enrollment in Biochemistry 100A. K. Karplus

### **211. Computational Systems Biology. F**

Teaches machine-learning methods relevant for the analysis of high-throughput molecular biology experiments. Students should be fluent in a programming language and should have taken basic molecular biology courses. Prerequisite(s): course 205. Enrollment restricted to graduate students; undergraduates may

## Biomolecular Engineering

enroll if they have completed course 205, Computer Science 101, and any upper-division molecular biology or biochemistry course, such as Biochemistry 100 or 100A. J. Stuart

### **215. Applied Gene Technology.**

Detailed insight into the techniques and technological trends in genomics and transcriptomics, building the necessary foundations for further research in genetic association studies, population genetic association studies, population genetics, diagnostics, medicine, and drug development. Students should already have a deeper understanding of the basic tools of molecular biotechnology than acquired in introductory courses in biotechnology, biochemistry, and molecular biotechnology. Enrollment restricted to graduate students. N. Pourmand

### **230. Computational Genomics. W**

Genomics databases: analysis of high-throughput genomics datasets; BLAST and related sequence comparison methods; pairwise alignment of biosequences by dynamic programming; statistical methods to discover common motifs in biosequences; multiple alignment and database search using motif models; constructing phylogenetic trees; hidden Markov models for finding genes, etc.; discriminative methods for analysis of bioinformatics data, neural networks, and support vector machines; locating genes and predicting gene function, including introduction to linkage analysis and disease association studies using SNPs; and modeling DNA and RNA structures. Prerequisite(s): course 205; concurrent enrollment in course 230L, 296, or 297 is required. Enrollment restricted to graduate students; undergraduates may enroll by instructor permission

if they have completed course 205, Computer Science 101, BIOC 100A. J. Stuart, R. Green, D. Haussler

### **230L. Computational Genomics Laboratory (1 credit). W**

Project in computational genomics. Prerequisite(s): course 205; concurrent enrollment in course 230 is required. J. Stuart, R. Green, D. Haussler

### **233. A Technological History of Antibody Genetics. W**

Covers the genetics of antibody formation and the histories of immunology and genetics. Students read and analyze seminal papers on antibody genetics. Enrollment is restricted to graduate students. C. Vollmers

### **235. Banana Slug Genomics.**

Students will assemble and annotate the banana slug genome (*Ariolimax dolichophallus*) from next-generation sequencing data. Students also will explore the capabilities of the latest next-generation bioinformatics tools and write their own as needed. Prerequisite(s): course 205 or graduate status. Seniors who have taken course 110 and a computer programming course may enroll with permission of instructor. May be repeated for credit. K. Karplus, The Staff

### **237. Applied RNA Bioinformatics. F**

Teaches methods for RNA gene discovery; gene expression quantification; probabilistic modeling, secondary structure/trans-interaction prediction; mRNA splicing; and functional analysis. Emphasis on leveraging comparative genomics and employing high-throughput RNA sequencing data. Includes lectures, scientific literature discussion, problem sets, and final

gene-discovery project. Enrollment restricted to seniors and graduate students. T. Lowe, The Staff

### **250. Molecular Biomechanics. S**

Considers how assemblies of macromolecules (molecular motors) convert chemical energy into mechanical work on the nanometer-to-Angstrom scale. Processes examined in the course include ATP-dependent movement of organelles in the cytosol facilitated by kinesin; proton pumping by ATPases in the mitochondrial membrane; viral genome packaging; bacterial movement driven by flagella; processive addition of nucleotides by polymerases during replication and transcription; and protein synthesis by ribosomes. Cannot receive credit for this course and course 150. Enrollment restricted to graduate students. M. Akeson

### **255. Biotechnology and Drug Development. W**

Recommended for students interested in careers in the biopharmaceutical industry. Focuses on recombinant DNA technology and the drug-development process, including discovery research; preclinical testing; clinical trials; and regulatory review, as well as manufacturing and production considerations. Students may not receive credit for this course and Biomolecular Engineering 155 and Biology 179. (Also offered as Chemistry and Biochemistry 255. Students cannot receive credit for both courses.) Enrollment limited to graduate students. Enrollment limited to 15. P. Berman

### **268A. Science and Justice: Experiments in Collaboration. \***

Considers the practical and epistemological necessity of collaborative research in the

## Biomolecular Engineering

development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Anthropology 267A. Students cannot receive credit for both courses.) Enrollment limited to 15. The Staff

### **268B. Science and Justice Research Seminar. \***

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): Sociology 268A, Biomolecular Engineering 268A, Feminist Studies 268A, or Anthropology 267A. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Anthropology 267B. Students cannot receive credit for both courses.) Enrollment limited to 15. The Staff

### **270. Drug Action and Development. \***

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 170. (Formerly Frontiers in Drug Action and Discovery.) (Also offered as Chemistry and Biochemistry 270. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. D. Smith, T. Holman, M.

Camps, R. Linington, P. Berman

### **280B. Seminar on Bioinformatics and Bioengineering (2 credits). F,W,S**

Weekly seminar series covering topics of current research in computational biology, and bioinformatics. Current research work and literature in these areas are discussed. (Formerly Seminar on Bioinformatics.) May be repeated for credit. The Staff

### **281A. Seminar on Processive Enzymes and Nanopores (2 credits). F,W,S**

Weekly seminar series covering experimental research in nanopore technology and single-molecule analysis of polymerase function. Current research work and literature is discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students. Qualified undergraduates may enroll with permission of instructor. May be repeated for credit. M. Akesson

### **281B. HIV Vaccine Research (2 credits). F,S**

Weekly seminar series covering topics of HIV vaccine research. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 10. May be repeated for credit. P. Berman

### **281C. Seminar in Cancer Genomics (2 credits). F,W,S**

Presents current computational biology research to identify genomics-based signatures of cancer onset, progression, and treatment response. Examples of

such investigations include: genetic pathway interpretation of multivariate high-throughput datasets; discovery of mutations in whole-genome sequence; identifications and quantification of gene isoforms, alleles, and copy number variants; and machine-learning tools to predict clinical outcomes. Students present their own research, host journal clubs, and attend lectures and teleconferences to learn about research conducted by national and international projects. Enrollment restricted to graduate students. May be repeated for credit. D. Haussler, J. Stuart

### **281D. Seminar on Protein Engineering (2 credits). F,W,S**

Weekly seminar series covering experimental research in protein structure, function, and engineering. Current research work and literature in this area are discussed. Students lead some discussions and participate in all meetings. Enrollment is restricted to graduate students. May be repeated for credit. R. Dubois

### **281E. Seminar in Genomics (2 credits). F,W,S**

Current topics in genomics including high-throughput sequencing, genome assembly, and comparative genomics. Students design and implement independent research projects. Weekly laboratory meetings are held to discuss these projects and related research in the field. Enrollment restricted to graduate students. May be repeated for credit. R. Green

### **281F. Blood Cell Development (2 credits). F,W,S**

Weekly seminar covering topics in current research on blood cell development and stem cell biology. Current research and literature in these areas discussed. Students lead

## Biomolecular Engineering

some discussions and participate in all meetings. Enrollment restricted to graduate students.

Undergraduates may enroll with permission of instructor.

Enrollment limited to 10. May be repeated for credit. C. Forsberg

### **281H. Seminar in Comparative Genomics (2 credits). F,W,S**

Weekly seminar series covering topics of current computational and experimental research in comparative genomics. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. D. Haussler

### **281K. Seminar on Protein Structure Prediction (2 credits). F,W,S**

Weekly seminar series covering topics of current computational and experimental research in protein structure prediction. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. K. Karplus

### **281L. Seminar in Computational Genetics (2 credits). F,W,S**

Weekly seminar series covering topics and experimental research in computational genetics. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. T. Lowe

### **281P. Seminar on Nanotechnology and Biosensors (2 credits). F,W,S**

Weekly seminar covering topics of research in the development of new tools and technologies to detect and study genes and proteins. Latest research work and literature in these areas are discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. N. Pourmand

### **281S. Seminar in Computational Functional Genomics (2 credits). F,W,S**

Weekly seminar series covering topics of current computational and experimental research in computational functional genomics. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. J. Stuart

### **281V. Immunogenomics Seminar (2 credits). F,W,S**

Journal club and research presentations in immunogenomics. Enrollment is by consent of the instructor and is restricted to graduate students, juniors, and seniors. C. Vollmers

### **293. Seminar in Biomolecular Engineering.**

Weekly seminar series covering topics of bioinformatics and biomolecular engineering research. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings. Enrollment restricted to graduate

students; qualified undergraduates may enroll with permission of instructor. The Staff

### **296. Research in Bioinformatics. F,W,S**

Independent research in bioinformatics under faculty supervision. Although this course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **297. Independent Study or Research. F,W,S**

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **297F. Independent Study or Research (2 credits). F,W,S**

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. The Staff

### **299. Thesis Research. F,W,S**

Thesis research conducted under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

\* Not offered in 2015-16

Revised 09/01/15

---

# COMPUTATIONAL MEDIA

---

Baskin School of Engineering

(831) 459-2158

<http://www.soe.ucsc.edu>

[Faculty](#) | [Computational Media Course Descriptions](#) | [Games Courses](#)

---

## PROGRAM DESCRIPTION

---

Computational media includes the creation, enhancement, and study of media forms for which computational processes enable deeply interactive and generative experiences, as well as the use of computation to understand and assist creation of media broadly. The department emphasizes the construction of technologies that make possible novel media experiences and tools, while simultaneously embracing and engaging in theoretical and practical approaches from the arts, humanities, and social sciences. The Computational Media (CMPM) Department offers courses on a wide range of topics, many of which integrate technical subject matter with design-oriented, theoretical, and historical topics. The Computational Media Department administers an undergraduate bachelor of science (B.S.) degree in computer game design, as well as the master of science (M.S.) degree in games and playable media. Besides offering instructional courses, the department engages in a substantial research program in which both advanced undergraduates and graduate students participate.

---

### B.S. COMPUTER SCIENCE: COMPUTER GAME DESIGN MAJOR REQUIREMENTS

---

The goal of this degree is to provide students a deep understanding of the technical aspects of computer game engineering and a broad background in the artistic, systemic, and production elements of game design and development. The core of the degree program is a strong grounding in computer science and computer engineering, preceded by a foundation in mathematics. Classes also develop skills in areas such as visual communication and team-oriented game production, while developing knowledge of topics such as game and art history, play experiences, and social and ethical issues. In their upper-division courses, students gain depth by taking upper-division electives in computational media, computer science, and computer engineering, with options such as game AI, mobile app development, game engine architecture, and interactive narrative. A two-course interdisciplinary game creation experience (usually taken at the end of the sophomore year) and a year-long interdisciplinary

capstone game design and development studio class allow students to develop substantial computer games and integrate materials from the rest of the program.

---

### PROGRAM LEARNING OUTCOMES

---

Recipients of a B.S. degree in computer game design at UCSC are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas: algorithms, data structures, complexity, and software engineering and development.
  2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
  3. Apply problem-solving skills and the knowledge of computer science to solve real problems.
  4. Recognize and take into account the social, legal, ethical, and cultural issues in the discipline of computer games.
  5. Demonstrate written and oral communication skills regarding technical material about computer science and computer games, broadly conceived.
  6. Design and build a technical system that achieves an artistic goal for audience experience, employing sound computer science techniques.
  7. Demonstrate the ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.
- 

### DECLARATION OF THE MAJOR

---

First-year applicants may receive direct admission at the time they apply to UCSC based on their high school record and test scores. Admission to the major after a student has entered UCSC is based on the grades received in all foundation courses attempted at UCSC and will be considered no sooner than the student's second quarter. Students must receive a GPA of at least 2.80 in the foundation courses: a core programming sequence, Computer Engineering (CMPE) 16: Applied

## Computational Media

Discrete Mathematics, and a calculus sequence, which may be Mathematics 19A and 19B, or 20A and 20B.

Options for core programming include:

- Computer Science (CMPS) 5J, CMPS 11, and CMPS 12B/M;
- CMPS 12A/L and CMPS 12B/M;
- CMPE 13/L and CMPS 12B/M;
- CMPS 13H/L.

At most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) for a foundation course is permitted. Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Office, addressed to the Computational Media Undergraduate Director. The appeal letter must describe why the prior performance is not an accurate reflection of the student's potential. Students who are informed that they are not eligible to declare the major after their first appeal may submit a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

---

### FOUNDATION COURSES

---

The foundation courses are as follows:

CMPS 12A/L (or Computer Engineering 13/L, or both CMPS 5J and CMPS 11); CMPS 12B/M; and, CMPE 16; and Mathematics 19A and 19B, or 20A and 20B. CMPS 13H/L may be used instead of both CMPS 12A/L and 12B/M.

UCSC students that have completed three or more quarters at UCSC must complete the foundation courses before they can declare the major.

---

### HONORS IN THE MAJOR

---

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

---

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students must satisfy the Disciplinary Communication (DC) requirement by successfully passing CMPM 170.

---

### LETTER GRADE POLICY

---

Please refer to the School of Engineering section of the catalog (subheading: [Letter Grade Policy](#)).

---

## TRANSFER STUDENTS

---

Most courses have a strong theoretical component to prepare the student for designing, as opposed to simply using, technical and game systems. Often, courses taken at other institutions which emphasize applications of current programming languages and authoring tools do not count toward the major at UCSC.

At UCSC, the core programming sequence — courses Computer Science (CMPS) 12A/L (or 5J and 11) and 12B/M (or 13H/L, which covers both 12A/L and 12B/M) — exposes students to both Java and C. Many upper-division courses that involve programming use the C and C++ programming languages. Transfer students who are not familiar with both Java and C may need to take a remedial course. Students familiar with C++ and Unix should find the transition to Java and C relatively simple.

Transfer students must have completed all of the core programming, computer systems, and mathematics courses (CMPS 12A/L and 12B/M, CMPE 12/L, CMPE 16, MATH 19 A and B, MATH 21/AMS 10), or their articulated equivalents. A student lacking one such course may be admitted if they have completed at least CMPE 12/L. It is highly recommended that all transfer students complete this course prior to admission.

To the extent possible, it is recommended that transfer students take the equivalents of additional major required courses beyond the core programming, computer systems, and mathematics courses. For transfer students only, any course focused on the history of modern art (after 1900 C.E.) may satisfy the HAVC 141 requirement. In addition, if students have access to courses that develop a foundation in building and understanding games and other forms of interactive media, these are valuable to take — and in some cases may be substituted for CMPM 80K, Foundations of Video Game Design, once they enter the program. Transfer students who are planning a course substitution for HAVC 141 or CMPM 80K should refer to the School of Engineering portion of the catalog (subheading [Course Substitutions](#)).

Finally, transfer students should have completed as many general education requirements as possible.

---

### SCHOOL OF ENGINEERING POLICIES

---

Please refer to the School of Engineering section of the catalog (subheading: [Admission to School of Engineering Majors](#)) for additional policies that apply to all School of Engineering programs. These policies include admission to the major and the need for students to obtain preapproval before taking courses elsewhere.

---

## PREPARATION FOR THE MAJOR

---

It is recommended that high school students intending to apply to the major have completed four years of mathematics (through advanced algebra and trigonometry) as well as any available courses in computer science, arts, and media (especially interactive media). Comparable college mathematics, arts, and media courses completed at other institutions also serve to properly prepare a student for the major.

---

## MAJOR REQUIREMENTS

---

The curriculum has 24-26 courses (depending on core programming sequence taken). Fourteen of the courses are upper-division. Several of the required courses and electives are also general education courses. Please consult with the schedule of classes or the general catalog for more information.

---

### LOWER- AND UPPER-DIVISION REQUIREMENTS

---

Course requirements are divided into six conceptual areas and may not be credited in more than one area:

#### **Mathematics**

Complete all of the following courses:

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics (students can alternately take Mathematics 20A-B, Honors Calculus. Credit for one or both Mathematics 19A-B may be granted with adequate performance on the CEEB calculus AB or BC Advanced Placement examinations).

Mathematics 21, Linear Algebra, or Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I

Computer Engineering 16, Applied Discrete Mathematics

#### **Computational Foundations**

Complete all of the following courses:

Computer Science 12A/L, Introduction to Programming (Accelerated)/Laboratory\* (or both Computer Science 5J and 11 or Computer Engineering 13/L)

Computer Science 12B/M, Introduction to Data Structures/Laboratory\*

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Science 109, Advanced Programming

Computer Science 101, Algorithms and Abstract Data Types

\*Computer Science (CMPS) 13H/L may be used instead of both CMPS 12A/L and 12B/M

#### **Arts Foundations**

Complete both of the following courses:

Art and Design: Games and Playable Media (ARTG) 80G, Visual Communication and Interaction Design and

History of Art and Visual Culture (HAVC) 141A Modern Art: Realism to Cubism, 141B Cubism to Pop, or 141C Pop to Present

#### **Games and Playable Media Foundations**

Complete all of the following courses:

Art and Design: Games and Playable Media 80H, History of Digital Games

Film and Digital Media 80V, Video Games as Visual Culture

#### **Game Design and Development**

Complete all of the following courses.

Computational Media 80K, Foundations of Video Game Design

Computational Media 120, Game Development Experience

Art and Design: Games and Playable Media 120, Game Design Experience

Computational Media 170, Game Design Studio I

Computational Media 171, Game Design Studio II (7 credits)

Computational Media 172, Game Design Studio III (7 credits)

Computational Media 176, Systems Design

#### **Computer Game Engineering**

Complete five courses from the following list:

Applied Mathematics and Statistics 131, Introduction to Probability Theory

Applied Mathematics and Statistics 147, Computational Methods and Applications

Computational Media 131, User Experience for Interactive Media

Computational Media 147, Generating Worlds

Computational Media 148, Interactive Storytelling

Computational Media 146, Game Artificial Intelligence

Computational Media 164/L, Game Engines/Laboratory

Computational Media 177, Creative Strategies for Designing Interactive Media

Computational Media 178, Human-Centered Design Research

## Computational Media

Computational Media 179, Game Design Practicum (may be repeated for credit; only the first offering counts toward the Computer Game Engineering requirement)

Computer Science 102, Introduction to Analysis of Algorithms

Computer Science 104A, Fundamentals of Compiler Design I

Computer Science 104B, Fundamentals of Compiler Design II

Computer Science 105, Systems Programming

Computer Science 111, Introduction to Operating Systems

Computer Science 112, Comparative Programming Languages

Computer Science 115, Software Methodology

Computer Science 116, Software Design Project

Computer Science 117, Software Design Project II

Computer Science 119, Software for Society

Computer Science 121, Mobile Applications

Computer Science 122, Computer Security

Computer Science 128, Distributed Systems, File Sharing, Online Gaming, and More

Computer Science 129, Data Storage Systems

Computer Science 130, Computational Models

Computer Science 132, Computability and Computational Complexity

Computer Science 140, Artificial Intelligence

Computer Science 142, Machine Learning and Data Mining

Computer Science 143, Natural Language Processing

Computer Science 160/L, Introduction to Computer Graphics/Laboratory

Computer Science 161, Introduction to Data Visualization

Computer Science 162, Advanced Computer Graphics and Animation

Computer Science 164/L, Game Engines/Laboratory

Computer Science 165, Data Programming for Visualization

Computer Science 166A, Game Theory and Applications I

Computer Science 180, Database Systems I

Computer Science 181, Database Systems II

Computer Science 183, Web Applications

Computer Engineering 110, Computer Architecture

Computer Engineering 112, Computer and Game Console Architecture

Computer Engineering 113, Parallel and Concurrent Programming

Computer Engineering 118/L, Introduction to Mechatronics/Laboratory

Computer Engineering 131, Human-Computer Interaction

Computer Engineering 150/L, Introduction to Computer Networks/Laboratory

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students must satisfy the major's upper-division Disciplinary Communication (DC) requirement by completing the first course in the game design studio sequence CPM 170.

### COMPREHENSIVE REQUIREMENT

---

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence.

## MAJOR PLANNERS

---

The following are three sample academic plans that students can use to plan their sequence of courses in the major. The first two plans are suggested guidelines for students who begin their studies in their frosh year. Such students, if they plan carefully, will have several openings free to take other breadth courses they find interesting. Plan one is for a student entering UCSC in their frosh year who is prepared to go directly into Mathematics 19A/20A and Computer Science 12A/L. Plan two is for a student entering UCSC their frosh year who needs to take preparatory courses prior to Mathematics 19A or Computer Science 12A/L to ensure a successful outcome in those courses. The third plan is for a junior transfer student who has completed their mathematics, computational foundations, modern art history, and general education requirements.

Computational Media

**Plan One**

	Fall	Winter	Spring
<b>Year 1</b>	ARTG 80H (PE-T) MATH 19A College Core	CMPM 80K (IM) MATH 19B or 20B CMPS 12A/L (MF)	ARTG 80I (PE-H)* Composition 2 CMPS 12B/M
<b>Year 2</b>	ARTG 80G MATH 21 or AMS 10 CMPE 12/L	FILM 80V HAVC 141B CMPS 109	CMPM 120 (PR-E) ARTG 120 CMPE 16
<b>Year 3</b>	CMPS 101 CMPM 176 Elective / Gen Ed	Game Engineering 1 Game Engineering 2 Elective / Gen Ed	Game Engineering 3 Game Engineering 4 Elective / Gen Ed
<b>Year 4</b>	CMPM 170 (DC) Game Engineering 5 Elective / Gen Ed	CMPM 171 Elective / Gen Ed Elective / Gen Ed	CMPM 172 Elective / Gen Ed Elective / Gen Ed

\*ARTG 80I is recommended, but not required.

**Plan Two**

	Fall	Winter	Spring
<b>Year 1</b>	ARTG 80H (PE-T) MATH 3 (MF) College Core	CMPM 80K (IM) CMPS 5J MATH 19A	ARTG 80I (PE-H) CMPS 11 MATH 19B
<b>Year 2</b>	ARTG 80G CMPS 12B/M HAVC 141A	FILM 80V MATH 21 or AMS 10 CMPE 16	CMPM 120 (PR-E) ARTG 120 CMPS 109
<b>Year 3</b>	CMPS 101 CMPM 176 Elective / Gen Ed	Game Engineering 1 Game Engineering 2 CMPE 12/L	Game Engineering 3 Game Engineering 4 Elective / Gen Ed
<b>Year 4</b>	CMPM 170 (DC) Game Engineering 5 Elective / Gen Ed	CMPM 171 Elective / Gen Ed Elective / Gen Ed	CMPM 172 Elective / Gen Ed Elective / Gen Ed

**Plan Three**

	Fall	Winter	Spring
<b>Year 1 (Jr)</b>	ARTG 80H ARTG 80G Elective*	CMPM 80K FILM 80V CMPS 109	CMPS 101 CMPM 120 ARTG 120
<b>Year 2 (Sr)</b>	CMPM 170 (DC) CMPM 176 Game Engineering 1	CMPM 171 Game Engineering 2 Game Engineering 3	CMPM 172 Game Engineering 4 Game Engineering 5

\*Some transfer students need a prerequisite for CMPS 101, such as CMPE 16, for which this provides opportunity. Others may not have had the opportunity to fulfill other requirements, such as the HAVC 141 requirement, which this slot enables.

---

## GRADUATE PROGRAM

### MASTER'S DEGREE IN GAMES AND PLAYABLE MEDIA

---

The goal of the M.S. in games and playable media is to prepare students to make professional contributions to the creation of games and other forms of media that invite and structure play. The degree is offered through the UC Santa Cruz location in Silicon Valley, enabling connection and collaboration with local industry. The curriculum includes deep engagement with game creation as well as a focus on professional development. Students can also take advantage of the strong course offerings in games and related technologies on the Santa Cruz campus, as well as make connections with the department's field-leading research groups. The M.S. in games and playable media is a four-quarter program that begins in fall quarter and ends in the following summer. Students are expected to complete coursework in one academic year, without leaves of absence.

#### REQUIREMENTS FOR THE GAMES AND PLAYABLE MEDIA MASTER'S DEGREE

---

##### Course Requirements

Each student is required to take 46 credits, though the game art, game writing, and game sound requirements will likely lead to more. Required courses are as follows:

- Games and Playable Media 221, 222, and 223; Professional Development for Game Makers 1, 2, and 3; 6 credits (2 credits each)
- CPM 265, Generative Methods, 5 credits
- Games and Playable Media 270, 271, and 272; Games and Playable Media Studio 1, 2, and 3; 15 credits (5 credits each)
- Games and Playable Media 273, Game Development Intensive (10 credits)
- Two courses from the game engineering electives list below, 10 credits, (5 credits each); can be upper-division undergraduate if appearing on approved list for games and playable media M.S. degree; often satisfied by taking CPM 265, Generative Methods and CPM 248, Interactive Storytelling.

Before entering the Game Development Intensive (Games and Playable Media 273), students must satisfy the game art, game writing, and game sound requirements, as described below:

- The game art requirement is satisfied by (a) having completed, with a grade of B- or better, two or more courses in a relevant area of art, at any institution,

at either the undergraduate or graduate level (such as courses CPM 25, and CPM 26); or (b) by satisfactorily completing (S or grade of A or B) course Games and Playable Media 210, Game Art Intensive; or (c) by submitting a portfolio of prior work in one or more areas and undergoing an examination to determine level of art proficiency.

- The game writing requirement is satisfied by (a) having completed, with a grade of B- or better, two or more courses in a relevant area of writing or interactive narrative (such as CPM 148, Interactive Storytelling), at any institution, at either the undergraduate or graduate level; or (b) by satisfactorily completing (S or grade of A or B) course CPM 248, Interactive Storytelling; or (c) by submitting a portfolio of prior work in one or more areas and undergoing an examination to determine level of game writing proficiency.
- The game sound requirement is satisfied by (a) having completed, with a grade of B- or better, two or more courses in a relevant area of music, sound effects, or game audio, at any institution, at either the undergraduate or graduate level; or (b) by satisfactorily completing course (S or grade of A or B) Games and Playable Media 215, Audio Direction; or (c) by submitting a portfolio of prior work in one or more areas and undergoing an examination to determine level of game sound proficiency.

#### PROJECT

---

Completion of a master's project is required for the master's degree. These are generally collaborative projects, created together with other students in the games and playable media M.S. program. Projects are typically performed by students during Games and Playable Media 273, Game Development Intensive. Students are evaluated based both on their individual contributions to the project and on the overall success of the project as a whole. Each project will be demonstrated via a public presentation, and this demonstration comprises part of the final project evaluation.

Evaluation of projects is performed by a committee consisting of at least three people, comprised of at least the games and playable media program director and the games and playable media creative director, and which may contain members of the games and playable media program faculty, or members of the games and playable media program advisory board, or other instructors in the games and playable media program.

## Computational Media

### GAME ENGINEERING ELECTIVES

---

The following courses may be used to satisfy game engineering electives for the games and playable media M.S. degree:

#### **Graduate courses:**

CMPM 235: User Evaluation of Technology  
CMPM 244: Artificial Intelligence in Games  
CMPM 245: Computational Models of Discourse and Dialogue  
CMPM 248: Interactive Storytelling  
CMPM 265: Generative Methods  
CMPS 221: Advanced Operating Systems  
CMPS 223: Advanced Computer Security  
CMPS 229: Storage Systems  
CMPS 232: Distributed Systems  
CMPS 240: Artificial Intelligence  
CMPS 241: Knowledge Engineering  
CMPS 242: Machine Learning  
CMPS 253: Advanced Programming Languages  
CMPS 260: Computer Graphics  
CMPS 261: Advanced Visualization  
CMPS 262: Computer Animation  
CMPS 272: Evolutionary Game Theory  
CMPS 277: Principles of Database Systems  
CMPS 278: Design and Implementation of Database Systems  
Computer Engineering 202: Computer Architecture  
Computer Engineering 215: Models of Robotic Manipulation  
Computer Engineering 216: Bio-inspired Locomotion  
Computer Engineering 218: Mechatronics  
Computer Engineering 231: Human-Computer Interaction  
Computer Engineering 233: Human Factors  
Computer Engineering 248: Games in Design and Control  
Computer Engineering 250: Multimedia Systems  
Computer Engineering 253: Network Security  
Computer Engineering 263: Data Compression  
Computer Engineering 264: Image Analysis and Computer Vision.

#### **Upper-division undergraduate courses:**

CMPM 146: Game AI  
CMPM 148: Interactive Storytelling  
CMPM 164: Game Engines

CMPM 177: Creative Strategies for Designing Interactive Media  
CMPM 178: Human-Centered Design Research  
CMPM 179: Game Design Practicum  
CMPS 115: Software Methodology  
CMPS 119: Software for Society  
CMPS 122: Computer Security  
CMPS 128: Distributed Systems: File Sharing, Online Gaming, and More  
CMPS 130: Computational Models  
CMPS 140: Artificial Intelligence  
CMPS 142: Machine Learning and Data Mining  
CMPS 160: Introduction to Computer Graphics  
CMPS 161: Introduction to Data Visualization  
CMPS 162: Advanced Computer Graphics and Animation  
CMPS 165: Data Programming for Visualization  
CMPS 166A: Game Theory and Applications I  
CMPS 166B: Game Theory and Applications II  
CMPS 180: Database Systems I  
CMPS 181: Database Systems II  
CMPS 183: Web Applications  
CMPE 110: Computer Architecture  
CMPE 112: Computer and Game Console Architecture  
CMPE 118: Introduction to Mechatronics  
CMPE 131: Human-Computer Interaction.

---

### TRANSFER CREDIT

---

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. The game art, game writing, and game sound requirements of the M.S. program may also be satisfied through courses from other institutions or prior UCSC coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

---

### REVIEW OF PROGRESS

---

On an ongoing basis, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the

## Computational Media

Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in a single four-quarter year.

Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the Games and Playable Media Studio sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment.

Withdrawing or taking a leave of absence does not

count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

---

## COMPUTATIONAL MEDIA FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

#### **Katherine Isbister**

Games and human computer interactions, computer game character design, game user research

#### **Michael Mateas**

Artificial Intelligence (AI) for art and entertainment, game AI, AI and creativity, AI-based interactive storytelling, autonomous characters

#### **Marilyn Walker (joint with Computer Science)**

Dialogue systems, natural language processing, computer games, human-computer interaction, machine learning, artificial intelligence

#### **Noah Wardrip-Fruin**

Digital media, computer games, electronic literature, software studies

#### **E. James Whitehead Jr.**

Software engineering, software evolution, software bug

prediction, level design in computer games, procedural content generation

### ASSOCIATE PROFESSOR

---

#### **Arnav Jhala**

Artificial Intelligence: storytelling in games, intelligent machinima generation, smart graphics, and intelligent user interfaces

#### **Sri Kurniawan (joint with Computer Engineering)**

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; human-centered design

#### **Suresh K. Lodha (Computer Science)**

Data analytics and visualization, vision, innovation, technology for social good

#### **Warren Sack (Professor, Film and Digital Media)**

Theory and practice of digital media. Software design and media theory

---

## COMPUTATIONAL MEDIA COURSES

---

### LOWER-DIVISION COURSES

---

#### **25. Introduction to 3D Modeling. F**

Introduces theory and techniques of 3D computer graphics. Topics include: capabilities of modern graphics hardware; 3D coordinate spaces; modeling with polygons; NURBS and subdivision surfaces; applying textures and materials; lighting; and simple effects.

Students develop proficiency in 3D modeling via lectures and assignments focused on the use of a 3D modeling tool. (Formerly Computer Science 25, Introduction to Computer Graphics: 3D Modeling.) (General Education Code(s): PR-C.) The Staff, C. Yonge, E. Whitehead

#### **26. Introduction to 3D Animation. W**

Introduces theories and techniques of 3D computer animation. Topics include: character animation; rigging; simulation of cloth, liquids, and fire; motion capture; rendering; and editing animated scenes. Students develop proficiency in 3D animation via lectures and

## Computational Media

assignments focused on the use of a 3D animation tool and use of motion-capture software. (Formerly Computer Science 26, Introduction to Computer Graphics: 3D Animation.) Prerequisite(s): Computer Science 25. (General Education Code(s): PR-C.) C. Yonge

### **80K. Foundations of Video Game Design. W**

A generally accessible course in which students explore how video games (and games generally) shape experiences and express ideas. Students develop novel games, engage in game interpretation, and survey related topics (e.g., game history, technology, narrative, and ethics) through lectures and readings. Programming experience is not required. (General Education Code(s): IM, T2-Natural Sciences.) N. Whitehead, N. Wardrip-Fruin, E. Whitehead

### **94. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

### **94F. Group Tutorial (2 credits). F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

## UPPER-DIVISION COURSES

### **120. Game Development Experience. S**

Teaches the concrete programming and collaboration skills associated with making a digital game from start to finish, including but not limited to: establishing a team, concepting, storyboarding, prototyping, producing, and testing a game for release. Students are

organized into groups and work together to create and produce a playable game. This course is taught in conjunction with Art 120G which covers the skills required to design and critique digital games.

(Formerly course 20, Game Design Experience.) Prerequisite(s): course 80K, Computer Science 12B and 12M, and Film and Digital Media 80V; Art and Design: Games and Playable Media 80H or 80I; and concurrent enrollment in Art and Design: Games and Playable Media 120. (General Education Code(s): PR-E, IN.) A. Jhala

### **131. User Experience for Interactive Media. W**

Theories and practices for approaching the design problems of interactive media holistically, beyond usability and accessibility. Includes hands-on learning, application of human-centered design and evaluation skills in group projects, and peer critique. Prerequisite(s): Computer Science 12B. Enrollment is restricted to juniors, seniors, and graduate students. Enrollment limited to 60. S. Kurniawan

### **146. Game AI. W**

Course provides a comprehensive introduction to the use of artificial intelligence (AI) in computer games. Building on fundamental principles of AI, course explains how to create non-player characters (NPCs) with progressively more sophisticated capabilities. (Formerly Computer Science 146.) Prerequisite(s): Computer Science 101; familiarity with C++. Enrollment restricted to sophomores, juniors, seniors, and graduate students. The Staff, A. Jhala, M. Mateas

### **148. Interactive Storytelling. F**

Covers a range of design approaches and technologies including storytelling in games,

interactive fiction, interactive drama, and artificial intelligence-based story generation. Through a mixture of readings, assignments, and project work, students explore the theoretical positions, debates, and technical and design issues arising from these approaches. (Formerly Computer Science 148.) Prerequisite(s): Computer Science 101. Enrollment restricted to juniors and seniors. M. Mateas, A. Jhala, N. Wardrip-Fruin

### **164. Game Engines. S**

Covers the graphic elements in computer games. Topics include modifying, optimizing, adding components, and building a game engine. Course evaluation based on exams and several programming projects, including a game built using the student's game engine. (Formerly Computer Science 164.) Prerequisite(s): Computer Science 160 and 160L. Concurrent enrollment in course 164L required. A. Jhala

### **164L. Game Engines Lab (2 credits). S**

Provides hands-on experience in using, designing, and building game engines. Students also explore different special effects, such as particle systems, spring systems, and game physics. (Formerly Computer Science 164L.) Concurrent enrollment in course 164 required. A. Jhala

### **170. Game Design Studio I. F**

First of a three-course capstone sequence for the computer game design program. Students work in teams to develop a comprehensive game design for a substantial computer game, including detailed storyline, level design, artistic approach, implementation technologies, and art-asset pipeline. Emphasis placed on creating novel, artistic game design concepts.

## Computational Media

Includes design reviews and formal presentations. Companion lectures cover advanced topics in game design, game programming, and software project management. Students are billed a materials fee. (Formerly Computer Science 170.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 120, 80K, and Computer Science 101 and 109, and two from the computer game electives.

Enrollment restricted to Computer science: computer game design majors. The Staff, N. Wardrip-Fruin, M. Mateas, E. Whitehead

### **171. Game Design Studio II (7 credits). W**

Second of a three-course capstone sequence for the computer game design program. Students work in teams on the software design, implementation, and testing of the computer game designed in course 170. Includes design reviews, progress reviews, and formal presentations. Companion lectures cover topics in software engineering, including design, testing, and project management. Game design and game programming also covered.

Students are billed a materials fee. (Formerly Computer Science 171.) Prerequisite(s): course 170. Enrollment restricted to computer science: computer game design majors. E. Whitehead, N. Wardrip-Fruin, M. Mateas

### **172. Game Design Studio III (7 credits). S**

Third of a three-course capstone sequence for the computer game design program. Students work in teams on the software design, implementation and testing of the computer game designed in courses 170 and 171. Includes progress reviews and formal presentations. Companion lectures cover topics in

software engineering, including user and software testing, release engineering and project management; also covered are game design and game programming. Students are billed a materials fee. (Formerly Computer Science 172.) Prerequisite(s): course 171. Enrollment restricted to Computer science:computer game design major. E. Whitehead, A. Jhala, N. Wardrip-Fruin, M. Mateas

### **176. Game Systems. S**

Presents game design as the interplay of multiple interacting game systems. Surveys various game systems: movement, combat, reward, economic, logistics, quest, information visibility, narrative. Students explore systems via study, design, and play of board, card, and computer games. Prerequisite(s): course 80K. E. Whitehead, N. Wardrip-Fruin, M. Mateas

### **177. Creative Strategies for Designing Interactive Media. F**

Surveys tactical, structural, contextual, and other methods to enhance creativity and innovation in the design of games and other interactive media. Investigates strategies for creativity and innovation drawn from diverse fields, including interactive affordances, narrative and poetics, biology, contextual inquiry, and design research. To innovate in a field of fixed genres is challenging: the allure of modeling exemplars is strong. Although imitation can be successful in the marketplace, the most creative action occurs on the leading edge of change. Innovation benefits from strategies and methods that are directly aimed at exploring new perspectives and structures to learn through the process of discovery. (Formerly Computer Science 177.) Enrollment restricted to juniors and seniors. B. Laurel, N. Wardrip-Fruin

### **178. Human-Centered Design Research. W**

Students move through a rigorous design-research process involving skills and principles in human-centered design research as well as selected formal research methods. They learn to use tools for ideation, human-centered qualitative research, domestic probes, mock-ups, and prototypes. (Formerly Computer Science 178.) Enrollment restricted to juniors, seniors, and graduate students. (General Education Code(s): PR-C.) E. Whitehead, B. Laurel, N. Wardrip-Fruin

### **179. Game Design Practicum. \***

Provides the opportunity to practice the creation of novel computer games. Students learn a new game-making technology, then create three games using this technology. (Also offered as Art&Des:Games&PlayableMedia 179. Students cannot receive credit for both courses.) Prerequisite(s): course 20 or Computer Science 20 and course 80K or Computer Science 80K. May be repeated for credit. (General Education Code(s): PR-C.) The Staff, E. Whitehead, M. Walker, N. Wardrip-Fruin, A. Jhala, M. Mateas

### **194. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

### **194F. Group Tutorial (2 credits). F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

**195. Senior Thesis Research. F,W,S**

Students submit a petition to the sponsoring agency. Prerequisite(s): satisfaction of the Entry Level Writing requirement. The Staff

**195F. Senior Thesis Research (2 credits). F,W,S**

Intended for majors. Students submit a petition to the sponsoring agency. Prerequisite(s): satisfaction of the Entry Level Writing requirement. The Staff

**198. Individual Study or Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**198F. Individual Study or Research (2 credits). F,W,S**

Intended for majors. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**199. Tutorial. F,W,S**

For fourth-year students majoring in computational media. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

**199F. Tutorial (2 credits). F,W,S**

For fourth-year students majoring in computational media. Students submit a petition to the sponsoring agency. May be repeated for credit. The Staff

**GRADUATE COURSES**

**235. User Evaluation of Technology. F**

Presents a variety of evaluation methodologies to assess usability, acceptance, and effectiveness of technology with the intended users. Combines lectures and exercises for students to gain firsthand experiences of these methodologies with real users. (Formerly

Computer Engineering 235.)

Enrollment restricted to graduate students. Seniors may enroll with completion of Computer Science 131. The Staff

**244. Artificial Intelligence in Games. W**

Artificial intelligence has long used game-playing as a metric for progress. Key algorithms such as alpha-beta and HPA search studied. Computer algorithms for backgammon, poker, and chess examined. There will be individualized projects. (Formerly Computer Science 244.)

Prerequisite(s): course 201; and course 211 or 240 or 242. Enrollment limited to 20. A. Jhala, M. Mateas

**245. Computational Models of Discourse and Dialogue. W**

Focuses on classic and current theories and research topics in the computational modeling of discourse and dialogue, with applications to human-computer dialogue interactions; dialogue interaction in computer games and interactive story systems; and processing of human-to-human conversational and dialogue-like language such as e-mails. Topics vary depending on the current research of the instructor(s) and the interests of the students. Students read theoretical and technical papers from journals and conference proceedings and present class lectures. A research project is required. (Formerly Computer Science 245.) (Also offered as Linguistics 245. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. May be repeated for credit. M. Walker

**248. Interactive Storytelling. S**

Covers wide range of practices including hypertext, interactive fiction, embedded narratives in games, interactive drama, and artificial intelligence-based story generation. Through a mixture of readings, assignments, and project work, explores the theoretical positions, debates, and technical and design issues arising from these different approaches. (Formerly Computer Science 248.) Enrollment restricted to graduate students. Enrollment limited to 20. N. Wardrip-Fruin, M. Mateas

**265. Generative Methods. W**

In-depth exploration of algorithms for the automated generation of 2D and 3D models and content. Covers multiple approaches, including noise, grammars, genetic algorithms and programming, parametric design, and answer-set programming. Includes application of techniques to computer-game content and level design. (Formerly Computer Science 265.) Enrollment restricted to graduate students. M. Mateas, E. Whitehead

**280W. Seminar in Digital Media (2 credits).**

Covers advanced topics and current research in digital media—the interdisciplinary field at the intersection of computer science, media authoring, and models of interpretation from the humanities and social sciences. Focuses on student presentations and seminar participation. (Formerly Computer Science 280W.) Enrollment restricted to graduate students. May be repeated for credit. N. Wardrip-Fruin

**280X. Expressive AI (2 credits). F,W,S**

Weekly seminar covering topics of current research in artificial intelligence applied to interactive

## Computational Media

art and entertainment, including computer games. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Formerly Computer Science 280X.) Enrollment limited to 30. May be repeated for credit. N. Wardrip-Fruin, M. Mateas

### **280Z. Seminar in Natural Language Processing and Dialogue (2 credits). F,W,S**

Covers advanced topics and current research in natural language processing. Focuses on student presentations and seminar participation. (Also offered as Computer Science 280Z. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. May be repeated for credit. M. Walker

### **290J. Playable Media. W,S**

Focuses on media, such as computer games, that invite and structure play. Work includes building and critiquing a series of prototypes;

studying major examples in the field; and discussing both theoretical and practice-oriented texts. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Formerly Computer Science 290J.) (Also offered as Digital Arts and New Media 250D. Students cannot receive credit for both courses.) May be repeated for credit. N. Wardrip-Fruin

### **290P. Topics in Computational Cinematography. \***

Focuses on discussion of recent advances in visual storytelling in graphical environments. Major topics covered are: intelligent camera control, shot-compositions, lighting design, interactive storytelling, and computational techniques associated with these applications. Class consists of in-class discussions and student presentations of research papers and a final student project. (Formerly Computer Science 290P.)

(Also offered as Digital Arts and New Media 290P. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. A. Jhala

### **297. Independent Study or Research. F,W**

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **299. Thesis Research. F,W,S**

Thesis research conducted under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

---

## GAMES AND PLAYABLE MEDIA COURSES

---

### GRADUATE COURSES

#### **210. Game Art Intensive. F**

Teaches the basic vocabulary, concepts, and practices of creating 2D and 3D art assets for games, as well as their management and integration into game engines. Includes sprites, models, textures, animations, and an introduction to effects. Enrollment restricted to games and playable media graduate students; others by interview. The Staff

#### **215. Audio Direction. W**

Introduces fundamentals of digital audio and its implementation into a game project. Explores elements of acoustic audio therapy, musical theory, and digital audio theory, coupled with hands-on creation. Students work with audio software,

synthesis, plug-in processing and microphones to develop and create an audio direction. Enrollment restricted to games and playable media graduate students. E. Whitehead, A. Romero, B. Romero

#### **221. Professional Development for Game Makers I (2 credits). F**

First course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focuses on presenting yourself and your ideas. Includes elements of writing, speaking, and designing professional communication. Enrollment restricted to games and playable media graduate students; others by interview. The Staff

#### **222. Professional Development for Game Makers II (2 credits). W**

Second course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focus on design considerations and methodologies employed in the game industry with emphasis placed upon the student's ability to develop designs beyond mere ideas through to execution. Enrollment restricted to games and playable media graduate students. E. Whitehead, A. Romero, B. Romero

**223. Professional Development for Games Makers III (2 credits). S**

The third course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focuses on the business of the game industry, including funding, corporation types and formation, budgeting and burn rates, pitch decks, and marketing. Enrollment restricted to games and playable media graduate students. E. Whitehead, B. Romero, N. Wardrip-Fruin

**270. Game and Playable Media Studio I. F**

First course in a three-course sequence covering the fundamentals and advanced topics in game and playable-media development. Focuses on developing innovative project concepts using methods ranging from prototyping to design documents, planning, and initiating project development. Enrollment

restricted to games and playable media graduate students; others by interview. The Staff

**271. Games and Play Media Studio II. W**

The second course in a three-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects. Prerequisite(s): course 270. Enrollment restricted to games and playable media graduate students. N. Wardrip-Fruin, E. Whitehead

**272. Game and Playable Media Studio III. S**

The third course in a four-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production including agile

methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects. Enrollment restricted to graduate students in the games and playable media program. E. Whitehead, A. Romero, N. Wardrip-Fruin

**273. Game Production Intensive (10 credits). S**

Fourth course in a four-course sequence in which students work in teams to launch an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology, game and level design, development of code to implement game behavior, art direction, and audio design. The emphasis is on interacting with game media to publicize the game. Students receive frequent critiques on emerging game projects. Enrollment restricted to graduate students in the games and playable media program. E. Whitehead, A. Romero, N. Wardrip-Fruin

\* Not offered in 2015-16

## PROGRAM DESCRIPTION

---

Computer engineering focuses on the design, analysis, and application of computers and on their applications as components of systems. The UCSC Department of Computer Engineering sustains and strengthens its teaching and research program to provide students with inspiration and quality education in the theory and practice of computer engineering. The department offers the bachelor of science (B.S.) in computer engineering, the bachelor of science in robotics engineering, the bachelor of arts (B.A.) in digital and network technology, the master of science (M.S.) and the doctor of philosophy (Ph.D.) in computer engineering degrees as well as an undergraduate minor. A combined B.S./M.S. program allows students to complete both the B.S. and M.S. in computer engineering degrees in five years. The department administers the interdisciplinary graduate designated emphasis in robotics and control that may be pursued along with a graduate degree in computer engineering or another field such as applied mathematics and statistics or electrical engineering.

---

### UNDERGRADUATE PROGRAM DESCRIPTION

---

The department offers two bachelor of science majors, one in computer engineering and the other in robotics engineering. The department also offers a bachelor of arts in network and digital technology. The programs are closely related with many common requirements, so that students do not need to immediately decide among the three.

The two undergraduate engineering degrees have the same program objectives for their graduates. The program objectives of the UCSC B.S. in computer engineering and B.S. in robotics engineering are:

1. Graduates who choose to pursue a career in industry, government, or academia will become successful engineers, scientists, or educators who demonstrate strong leadership, technical, and team skills; and a commitment to continuing professional development.

2. Graduates who choose to pursue advanced degrees will gain admission to graduate programs and will be successful graduate students.

The UCSC B.S. in computer engineering prepares graduates for a rewarding career in engineering. UCSC computer engineering graduates will have a thorough grounding in the principles and practices of computer engineering and the scientific and mathematical principles upon which they are built; they will be prepared for further education (both formal and informal) and for productive employment in industry. Because computer engineering is so broad, the B.S. in computer engineering offers five specialized concentrations for completing the program: systems programming, computer systems, robotics and control, networks, and digital hardware.

Descriptions of these concentrations follow in the section on major requirements.

The UCSC B.S. in robotics engineering prepares graduates for a rewarding career at the interfaces between electrical, computer, and mechanical engineering. UCSC robotics engineering graduates will have a thorough grounding in the principles and practices of robotics and control, and the scientific and mathematical principles upon which they are built; graduates will be prepared for further education (both formal and informal) and for productive employment in industry.

The UCSC B.A. in network and digital technology provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes that make those technologies function. The program is tailored to students who wish to combine technology with other fields or have a general focus on digital design or computer networks. The B.A. in network and digital technology is not an engineering degree, but B.A. graduates will be prepared to work with technology development in other capacities, or join the computer network workforce. Students interested in graduate study should pursue either B.S. program.

## Computer Engineering

The Department of Computer Engineering offers an undergraduate minor, described after the B.A. program below. The minor in computer engineering focuses on the technical aspects of computer hardware, embedded systems, and software design. This minor is particularly recommended for students interested in the design of computer technology for use in another discipline.

The Department co-sponsors the B.S. in bioengineering with the Departments of Biomolecular Engineering, Electrical Engineering, and Molecular, Cell and Developmental Biology.

Beyond the extensive research, design, and development projects taking place within courses required for the major, many computer engineering students join faculty-led research projects to take part in cutting-edge research. The department sponsors the summer undergraduate research fellowship in information technology (SURF-IT), as well as many other research opportunities. The department holds regular faculty-undergraduate lunches to discuss research and other issues of interest.

Many computer engineering students continue their education through the M.S. degree. The Department of Computer Engineering offers a combined B.S./M.S. program in computer engineering that enables eligible undergraduates to move without interruption to the graduate program. Interested computer engineering and robotics engineering majors should contact their adviser for more details. The graduate program of the Department of Computer Engineering also offers both the standard M.S. and the Ph.D. degrees.

The computer engineering B.S. program is accredited by The Engineering Accreditation Commission of ABET, <http://www.abet.org>.

---

### PROGRAM LEARNING OUTCOMES

The program learning outcomes (PLO) of each of the three degrees in computer engineering are subsets of the ABET Student Outcomes. The ABET Student Outcomes are published at:

<http://ce.soe.ucsc.edu/ABET>. For the computer engineering and robotics engineering B.S. degree, the PLOs are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process to meet desired needs within realistic constraints, such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate, and solve engineering problems;

- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and the ability to engage in, life-long learning;
- a knowledge of contemporary issues; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

For the BANDT (B.A. in network and digital technology) program the PLOs are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process to meet desired needs within realistic constraints;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

---

### COURSES FOR NONMAJORS

The Department of Computer Engineering offers course Computer Engineering 1, Hands-on Computer Engineering, a two-credit laboratory course designed to introduce students to computer engineering via many short fun projects; course Computer Engineering 3, Personal Computer Concepts: Software and Hardware, providing students an introductory course on the design and use of computers from an engineering viewpoint; and Computer Engineering 8, Robot Automation: Intelligence through Feedback Control. Other computer engineering courses of interest to nonmajors include Computer Engineering 12, Computing Systems and Assembly Language, an introductory course on computer systems, system software, and machine-level programming; Computer Engineering 80N, Introduction to Networking and the Internet, an introduction to technological services of the Internet; Computer Engineering 80E, Engineering Ethics; and Computer Engineering 80A, Universal Access: Disability, Technology, and Society.

---

### COMPUTER ENGINEERING POLICIES

---

#### ADVISING FOR PROPOSED MAJORS

Students interested in pursuing any of the department's three majors but not yet ready to declare should have their status updated to reflect the associated proposed major. They should also visit the Baskin School of Engineering undergraduate advising office to plan a course of study that will allow them to complete any of the department's three majors as well as preserve their

## Computer Engineering

options for other majors that might be of interest. Computer engineering proposed majors will be assigned a faculty adviser on request and invited to School of Engineering and Computer Engineering advising events. Please note that students who are proposed majors still need to follow the procedure for declaring one of the three majors as describe below; a student may not graduate as a proposed major.

### DECLARATION OF THE COMPUTER ENGINEERING MAJORS

Declaration of the computer engineering major in the first six quarters of enrollment at UCSC is based on performance in the CE Major Qualification Courses: Mathematics 19A, Mathematics 19B, Mathematics 23A, Applied Mathematics and Statistics 10 or Mathematics 21 (whichever is completed first), Applied Mathematics and Statistics 20, Computer Engineering 12/L, Computer Engineering 13/L, Computer Engineering 16, Computer Science 12B/M, Physics 5A/L and Physics 5C/N. Students in their first six quarters who have completed at least 36 credits in these courses will be admitted to the computer engineering major if:

1. their cumulative grade point average is at least 2.8 in all of the CE Major Qualification Courses attempted; and
2. they have no more than 7 credits resulting in grades of C-, D+, D, D-, F or NP among all of the CE Major Qualification Courses attempted.

All other applications for admission to the major in the first six quarters of enrollment will be reviewed individually to ensure the major can be completed within the campus limits. After the first six quarters petitions to declare the major are reviewed individually to ensure the major can be completed within the campus limits. Students seeking to change their current major to computer engineering in their seventh through ninth quarters who have completed the four upper-division classes and associated labs, Computer Engineering 100/L, Computer Engineering 107, Computer Science 101 and Electrical Engineering 101/L with a cumulative grade point average of at least 2.50 or greater and have completed all of the lower-division courses listed above by their ninth quarter will also be admitted.

Declaration of the robotics engineering major in the first six quarters of enrollment at UCSC is based on performance in the following lower-division courses and associated labs required for the major: Mathematics 19A, Mathematics 19B, Mathematics 23A, Applied Mathematics and Statistics 10 or Mathematics 21 (whichever is completed first), Applied Mathematics

and Statistics 20, Computer Engineering 9, Computer Engineering 12/L, Computer Engineering 13/L, Computer Engineering 16, Computer Science 12B/M, Physics 5A/L and Physics 5C/N. Students in their first six quarters who have completed at least 41 credits in these courses will be admitted to the computer engineering major if

1. their cumulative grade point average is at least 2.8 among the courses listed above; and
2. they have attempted no more than 7 credits resulting in grades of C-, D+, D, D-, F or NP in all of the courses listed above.

All other applications for admission to the major in the first six quarters of enrollment will be reviewed individually to ensure the major can be completed within the campus limits. After the first six quarters petitions to declare the major are reviewed individually to ensure the major can be completed within the campus limits. Students seeking to change their current major to robotics engineering in their seventh through ninth quarters who have completed the five upper-division classes and associated labs, Computer Engineering 100/L, Computer Engineering 107, Computer Science 101, Electrical Engineering 101/L and Electrical Engineering 103/L with a cumulative grade point average of at least 2.50 or greater and have completed all of the lower-division courses listed above will also be admitted.

Declaration of the network and digital technology major is based on performance in the following lower-division courses and associated labs required for the major: Math 19A, Math 19B, Math 23A, Applied Mathematics and Statistics 10 or Mathematics 21 (whichever is completed first), Applied Mathematics and Statistics 20 or Mathematics 24 (whichever is completed first), Computer Engineering 12/L, Computer Engineering 13/L, Computer Engineering 16, Computer Science 12B/M, Physics 5A/L or Physics 6A/L and Physics 5C/N or Physics 6C/N. Students in their first six quarters who have completed at least 36 credits in these courses with a cumulative grade point average of at least 2.30 or greater will be admitted to the network and digital technology major. After the first six quarters petitions to change a students major to network and digital technology are reviewed individually to ensure the major can be completed within the campus limits. Students seeking to change their current major to network and digital technology after their sixth quarter must have completed the courses listed above with a cumulative grade point average of at least 2.30.

Denials of admission to the major may be appealed by submitting a letter to the School of Engineering

## Computer Engineering

Undergraduate Office, addressed to the Computer Engineering Undergraduate Director, describing why the grade point average obtained is not an accurate reflection of the student's potential.

---

### TRANSFER STUDENTS

---

Admission to the Computer Engineering Major and Robotics Engineering Major for transfer students is based on performance in all attempts at courses transferable to UCSC as Mathematics 19A, Mathematics 19B, Mathematics 23A, Applied Mathematics and Statistics 10 or Mathematics 21, Applied Mathematics and Statistics 20, Computer Engineering 12/L, Computer Engineering 13/L, Computer Engineering 16, Computer Science 12B/M, Physics 5A/L and Physics 5C/N. Before they transfer, students must complete Physics 5A/L, Physics 5C/M, Mathematics 19A, Mathematics 19B and at least one of the following three: Mathematics 23A, Applied Mathematics and Statistics 10 or Mathematics 21, Applied Mathematics and Statistics 20. In addition, completion of at least one programming course (even if not articulated) is required.

Admission to the Network and Digital Technology Major for transfer students is based on performance in all attempts at courses transferable to UCSC as Mathematics 19A, Mathematics 19B, Mathematics 23A, Applied Mathematics and Statistics 10 or Mathematics 21, Applied Mathematics and Statistics 20 or Mathematics 24, Computer Engineering 12/L, Computer Engineering 13/L, Computer Engineering 16, Computer Science 12B/M, Physics 5A/L or Physics 6A/L and Physics 5C/N or Physics 6C/N. Before transferring students must have completed at least 5 of these courses and their associated labs including at least one programming course (even if the programming course is not articulated).

Students should consult [assist.org](http://assist.org) to determine which courses at other institutions in California are transferable to UCSC.

---

### ADVISING

---

Every major and minor must have a computer engineering faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office, and with that adviser must formulate a program of proposed coursework that meets the major or minor requirements. Additional information can be found on the [SOE web pages](#).

---

### RESTRICTIONS ON DOUBLE MAJORS AND MINORS

---

Students completing any of the department's three majors cannot also receive the computer engineering minor.

Students completing the Robotics Engineering B.S. or the Computer Engineering BS cannot receive the Network and Digital Technology B.A. degree.

Students completing the Robotics Engineering B.S. can receive the Computer Engineering B.S. as well only by completing a concentration other than Robotics and Control.

---

### HONORS IN THE MAJOR

---

Majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.70, in most cases, receive highest honors. Students with a GPA of 3.30, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA. Computer engineering and robotics engineering juniors and seniors may also be eligible for election to the UCSC chapter of Tau Beta Pi, the national engineering honor society founded in 1885.

#### Letter Grade Policy

The Computer Engineering Department requires letter grading for all courses applied towards any of its three undergraduate degrees: the B.S. in computer engineering, the B.S. in robotics engineering and the B.A. in network and digital technology. This policy includes courses required for these degrees that are sponsored by other departments.

---

### SCHOOL OF ENGINEERING POLICIES

---

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs.

---

### MATERIALS FEE AND MISCELLANEOUS FEES

---

Please see the section on fees under the School of Engineering.

---

### REQUIREMENTS OF THE COMPUTER ENGINEERING MAJOR

---

All students in the computer engineering major take the same core courses, which give the fundamentals of

## Computer Engineering

programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

### LOWER-DIVISION CORE REQUIREMENTS

---

Students who may have originally pursued another major should discuss with the Baskin School of Engineering undergraduate advising office whether or not already completed coursework may be substituted for one or more lower-division requirements.

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I; or Mathematics 21, Linear Algebra

Applied Mathematics and Statistics 20, Mathematical Methods for Engineers II;

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Science 12B/M, Introduction to Data Structures/Laboratory

Computer Engineering 16, Applied Discrete Mathematics

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics

Mathematics 23A, Multivariable Calculus

Physics 5A/L, Introduction to Physics I /Laboratory;

Physics 5B/M, Introduction to Physics II/Laboratory; or Computer Engineering 9, Statics, Dynamics, and Biomechanics (recommended for robotics and control concentration).

Physics 5C/N, Introduction to Physics III/Laboratory;

Computer Engineering 80E, Engineering Ethics; or another approved ethics course. This course is required even for transfer students who have had their general education requirements waived.

### UPPER-DIVISION CORE REQUIREMENTS

---

Computer Engineering 100/L, Logic Design/Laboratory

Computer Engineering 107, Mathematical Methods of Systems Analysis: Stochastic

Computer Engineering 110, Computer Architecture

Computer Engineering 121/L, Microprocessor System Design/Laboratory

Computer Engineering 185, Technical Writing for Computer Engineers

Computer Science 101, Abstract Data Types

Electrical Engineering 101/L, Introduction to Electronics/Laboratory

Electrical Engineering 103/L, Signals and Systems/Laboratory

---

## CONCENTRATIONS

---

The following concentrations are specializations for the computer engineering student. Students must complete all of the courses listed within their selected concentration.

### SYSTEMS PROGRAMMING CONCENTRATION

---

The systems programming concentration focuses on software systems: courses include operating systems, compilers, software engineering, and advanced programming. Students finishing this concentration are very well prepared for building large software systems of all types. This concentration is the closest one to a computer science major-the main differences are that it does not require computer science theory courses, but because of the core computer engineering requirements, includes more hardware and electronics than a computer science bachelor's degree.

Computer Science 111, Introduction to Operating Systems

Computer Science 115, Software Methodology

Computer Engineering 150/L, Introduction to Computer Networks/Laboratory

Elective: Upper-division or graduate elective from the approved list

Any one of the following courses:

Computer Engineering 113, Parallel and Concurrent Programming

Computer Engineering 156/L, Network Programming/Laboratory

Computer Science 104A, Fundamentals of Compiler Design I

### COMPUTER SYSTEMS CONCENTRATION

---

The computer systems concentration provides a balance between software and hardware design. Students are prepared for a large variety of different design tasks, especially those requiring the integration of hardware and software systems, but may need further training for any particular specialization.

Computer Engineering 125/L, Logic Design with Verilog/Laboratory

## Computer Engineering

Computer Science 109, Advanced Programming; or  
Computer Science 115, Software Methodology

Computer Science 111, Introduction to Operating  
Systems

Elective: Upper-division or graduate elective from the  
approved list

### ROBOTICS AND CONTROL CONCENTRATION

---

This concentration covers the hardware, software,  
sensing, and control aspects of autonomous and  
embedded systems. Students receive training in the  
theory, design, and realization of complex systems such  
as mobile robots. The concentration emphasizes  
integration of embedded software with hardware  
systems that interact with the environment.

Any two of the following:

Computer Engineering 118/L, Introduction to  
Mechatronics/Laboratory

Computer Engineering 167/L, Sensing and Sensor  
Technologies/Laboratory

Computer Engineering 141, Feedback Control Systems

Elective: Upper-division or graduate elective from the  
approved list

Third course from above (Computer Engineering  
118/L, Computer Engineering 167/L, Computer  
Engineering 141); or any one of the following courses:

Computer Engineering 115, Solid Mechanics (requires  
prerequisite)

Computer Engineering 153, Digital Signal Processing  
Applied Mathematics and Statistics 114, Introduction to  
Dynamical Systems

Computer Engineering 215, Models of Robotic  
Manipulation

Computer Engineering 216, Bio-Inspired Locomotion

Computer Engineering 240, Introduction to Linear  
Dynamical Systems

Computer Engineering 242, Applied Feedback Control

Computer Engineering 244, Digital Control

Computer Engineering 264, Image Analysis and  
Computer Vision

### NETWORKS CONCENTRATION

---

The networks concentration focuses on communication  
between computers, covering both network hardware  
and protocols. Students finishing this concentration are  
well prepared for the design of wired and wireless  
network systems.

Computer Engineering 150/L, Introduction to  
Computer Networks/Laboratory

Computer Engineering 156/L, Network  
Programming/Laboratory

Computer Science 111, Introduction to Operating  
Systems

Elective: Computer Engineering 151/L, Advanced  
Computer Networks/Laboratory; or an upper-division  
or graduate elective from approved list.

### DIGITAL HARDWARE CONCENTRATION

---

The digital hardware concentration focuses on  
hardware design and includes more electronics than  
the other concentrations. Students finishing this  
concentration are well prepared for building hardware  
systems. This concentration is the closest one to an  
electronics major; the main differences are that it does  
not require as much electronics theory or analog  
electronic design, but because of the core computer  
engineering requirements, requires more software  
skills.

Computer Engineering 125/L, Logic Design with  
Verilog/Laboratory

Electrical Engineering 171/L, Analog  
Electronics/Laboratory

Elective: Upper-division or graduate elective from  
approved list

Any one of the following courses:

Computer Engineering 122, Introduction to VLSI Digital  
System Design

Electrical Engineering 173/L, High-Speed Digital  
Design/Laboratory (requires prerequisite)

Computer Engineering 202, Computer Architecture

Computer Engineering 222, Advanced VLSI Digital  
System Design

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's  
upper-division Disciplinary Communication (DC)  
requirement. The DC requirement in computer  
engineering is satisfied by completing Computer  
Engineering 185, Technical Writing for Computer  
Engineers.

### CAPSTONE REQUIREMENT

---

All computer engineering students complete either the  
two-quarter capstone project sequence Computer  
Engineering 123A/B, or the three-quarter capstone  
project sequence Computer Engineering 129A/B/C or a  
senior thesis along with the first capstone course.

One of the following sequences:

## Computer Engineering

Computer Engineering 123A, Computer Engineering Design Project I and Computer Engineering 123B, Computer Engineering Design Project II;

Computer Engineering 123A, Computer Engineering Design Project I and Computer Engineering 195, Senior Thesis Research

Computer Engineering 129A, Capstone Project I; and Computer Engineering 129B, Capstone Project II; and Computer Engineering 129C, Capstone Project III

Computer Engineering 129A, Capstone Project I and Computer Engineering 195, Senior Thesis Research

### EXIT REQUIREMENT

Students are required to submit a portfolio, complete the exit survey, and attend an exit interview. Students whose submissions are deemed inadequate, either in presentation or in content, may be required to revise and rewrite the portfolio or to complete an additional project course. The portfolios must be turned in electronically by the last day of the quarter of graduation. The online form can be found on the [computer engineering web pages](#).

The portfolios will be reviewed quarterly by the computer engineering undergraduate committee and must include the following:

- A hardware-oriented project report;
- A software-oriented project report;
- A third project report of the student's selection;
- and any additional information related to these projects requested.

If a project report is associated with a course, it must be an upper-division (other than CMPE100/L) or graduate course. One of the reports must be the result of a multi-person project. One of the reports must be the result of an individual project. One of the reports must be the result of the student's capstone design project.

Exit interviews are scheduled during the last week of the quarter.

### COMPUTER ENGINEERING MAJOR PLANNERS

The following are two sample academic plans for students to complete during their first two years as preparation for the computer engineering major. Plan One is suggested guidelines for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major. Students who take pre-calculus at UCSC, or who have little programming experience, are strongly advised to take course 8, Robot Automation in the fall quarter.

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	MATH 19A	MATH 19B	CMPE 80E
	CMPE 12/L	CMPE 13/L	CMPS 12B/M
	core course	gen ed	MATH 23A
2nd (soph)	PHYS 5A/L	AMS 20	PHYS 5C/N
	AMS 10	CMPE 107	CMPE 100/L
	CMPE 16	PHYS 5B/M	CMPS 101

Plan Two			
Year	Fall	Winter	Spring
1st (frsh)	MATH 3 (pre-calc)	MATH 19A	MATH 19B
	CMPE 8	CMPE 12/L	CMPE 13/L
	core course	gen ed	CMPE 80E
2nd (soph)	PHYS 5A/L	CMPE 100/L	PHYS 5C/N
	CMPS 12B/M	CMPE 9	MATH 23A
	AMS 10	AMS 20	CMPE 16

### REQUIREMENTS OF THE ROBOTICS ENGINEERING MAJOR

All students in the robotics engineering major must take the courses listed below. Although not required, it is strongly recommended that students interested in the robotics engineering major take Computer Engineering 8, Introduction to Robot Automation in their first quarter. The senior comprehensive requirement for robotics engineering majors is satisfied by completion of the capstone course and the portfolio exit requirement. The robotics engineering major requires two more courses than the computer engineering major, including one graduate course. Students not making sufficient progress in the major may be required to change to another major.

### LOWER-DIVISION CORE REQUIREMENTS

Students who may have originally pursued another major should discuss with the Baskin School of Engineering undergraduate advising office whether or not already completed coursework may be substituted for one or more lower-division requirements.

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I; or Mathematics 21 Linear Algebra

## Computer Engineering

Applied Mathematics and Statistics 20, Mathematical Methods for Engineers II

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Science 12B/M, Introduction to Data Structures/Laboratory

Computer Engineering 16, Applied Discrete Mathematics

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics

Mathematics 23A, Multivariable Calculus

Physics 5A/L, Introduction Physics /Laboratory I

Physics 5C/N, Introduction Physics III/Laboratory

Computer Engineering 9, Statics, Dynamics, and Biomechanics

Computer Engineering 80E, Engineering Ethics; or another approved ethics course. This course is required even for transfer students who have had their general education requirements waived.

### Upper-Division Core Requirements

Computer Engineering 100/L, Logic Design/Laboratory

Computer Engineering 107, Mathematical Methods of Systems Analysis: Stochastic

Computer Engineering 115, Solid Mechanics

Computer Engineering 118/L, Introduction to Mechatronics/Laboratory

Computer Engineering 121/L, Microprocessor System Design/Laboratory

Computer Engineering 141, Feedback Control Systems

Computer Engineering 167/L, Sensing and Sensor Technologies/Laboratory

Computer Engineering 185, Technical Writing for Computer Engineers

Computer Science 101, Abstract Data Types

Electrical Engineering 101/L, Introduction to Electronics/Laboratory

Electrical Engineering 103/L, Signals and Systems/Laboratory

Elective: Upper-division or graduate elective from approved list.

Advanced Robotics Elective (One of the following courses):

Computer Engineering 215, Models of Robotic Manipulation

Computer Engineering 216, Bio-Inspired Locomotion

Computer Engineering 240, Introduction to Linear Dynamical Systems

Computer Engineering 242, Applied Feedback Control

Computer Engineering 244, Digital Control

Computer Engineering 264, Image Analysis and Computer Vision.

### Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in robotics engineering is satisfied by completing Computer Engineering 185, Technical Writing for Computer Engineers.

### Capstone Requirement

All robotics engineering students complete either the two-quarter capstone project sequence Computer Engineering 123A/B, or the three-quarter capstone project sequence Computer Engineering 129A/B/C or a senior thesis along with the first capstone course:

One of the following sequences:

Computer Engineering 123A, Computer Engineering Design Project I and Computer Engineering 123B, Computer Engineering Design Project II;

Computer Engineering 123A, Computer Engineering Design Project I and Computer Engineering 195, Senior Thesis Research

Computer Engineering 129A, Capstone Project I; and Computer Engineering 129B, Capstone Project II; and Computer Engineering 129C, Capstone Project III

Computer Engineering 129A, Capstone Project I and Computer Engineering 195, Senior Thesis Research

### Exit Requirement

Students are required to submit a portfolio, complete the exit survey and attend an exit interview. Students whose submissions are deemed inadequate, either in presentation or in content, may be required to revise and rewrite the portfolio or to complete an additional project course. The portfolios must be turned in electronically by the last day of the quarter of graduation.

The portfolios will be reviewed quarterly by the computer engineering undergraduate committee and must include three project reports of the student's selection and any additional information related to these projects requested. The online portfolio form can be found on the [computer engineering web pages](#). If a project report is associated with a course, it must be an upper-division (other than Computer Engineering 100/L) or graduate course. One of the reports must be the result of a multi-person project. One of the reports

## Computer Engineering

must be the result of an individual project. One of the reports must be the result of the student's capstone design project.

---

### NETWORK AND DIGITAL TECHNOLOGY MAJOR REQUIREMENTS

---

All students in the network and digital technology major must take the following courses. The senior comprehensive requirement is satisfied by completion of the capstone course and the portfolio exit requirement.

---

#### LOWER-DIVISION REQUIREMENTS

---

Students who may have originally pursued another major should discuss with the Baskin School of Engineering undergraduate advising office whether or not already completed coursework may be substituted for one or more lower division-requirements.

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I; or Mathematics 21, Linear Algebra

Applied Mathematics and Statistics 20, Mathematical Methods for Engineers II; or Mathematics 24, Ordinary Differential Equations

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming/Laboratory

Computer Science 12B/M, Introduction to Data Structures/Laboratory

Computer Engineering 16, Applied Discrete Mathematics

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics

Mathematics 23A, Multivariable Calculus

Physics 5A/L, Introduction Physics /Laboratory I; or Physics 6A/L, Introductory Physics I/Laboratory

Physics 5C/N, Introduction Physics III/Laboratory; or Physics 6C/N, Introductory Physics III/Laboratory

---

#### UPPER-DIVISION REQUIREMENTS

---

Computer Engineering 100/L, Logic Design/Laboratory

Computer Engineering 150/L, Computer Networks/Laboratory

Computer Engineering 185, Technical Writing for Computer Engineers

Computer Science 101, Abstract Data Types; or Electrical Engineering 101/L, Introduction to Electronics/Laboratory

Three additional 5-credit upper-division electives, and associated laboratories, from the approved list of electives, and one capstone requirement course.

---

#### CAPSTONE REQUIREMENT

---

Each capstone course features a 3-month supervised design experience in digital or network technology culminating in a substantial written report. Computer Engineering 185, Technical Writing for Computer Engineers, must be completed prior to or concurrently with the capstone project course. Students must notify the instructor at the start of the quarter that they are working to complete their B.A. in Digital Technology Capstone Requirement. Students select one of the following:

Computer Engineering 118/L, Introduction to Mechatronics/Laboratory

Computer Engineering 121/L, Microprocessor System Design/Laboratory

Computer Engineering 125/L, Logic Design with Verilog/Laboratory

Computer Engineering 151/L, Advanced Computer Networks/Laboratory

Computer Engineering 156/L, Network Programming/Laboratory

Computer Science 115, Software Methodology

## Computer Engineering

### ELECTIVE CHOICE

---

Students wishing to focus on digital technology should consider including among their courses: Electrical Engineering 101/L, Computer Engineering 110, Computer Engineering 118/L, Computer Engineering 121/L, and Computer Engineering 125/L.

Students wishing to focus on network technology should consider including among their courses: Computer Science 101, Computer Engineering 151/L, Computer Engineering 156/L, and Computer Science 111.

In all cases, students should discuss their interests and elective choices with their faculty adviser.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in network and digital technology is satisfied by completing Computer Engineering 185, Technical Writing for Computer Engineers.

### EXIT REQUIREMENT

---

Students are required to submit a portfolio and complete the exit. Students whose submissions are deemed inadequate, either in presentation or in content, may be required to revise and rewrite the portfolio or to complete an additional project course. The portfolios must be turned in electronically by the last day of the quarter of graduation. The online form can be found on the [computer engineering web pages](#). The portfolios will be reviewed quarterly by the computer engineering undergraduate committee and must include the project report of the student's capstone course.

### NETWORK AND DIGITAL TECHNOLOGY MAJOR PLANNER

---

The first year is similar to option 2 for the computer engineering major. Students choosing between the B.S. and the B.A. program should follow the B.S. curriculum until major declaration. General education courses needed outside major requirements are not shown.

Year	Fall	Winter	Spring
1st (frsh)	MATH 3 (pre-calc)	MATH 19A	MATH 19B
	CMPE 8 (opt)	CMPE 12/L	CMPE 13/L

### COMPUTER ENGINEERING MINOR

---

The computer engineering minor provides a solid foundation in digital hardware, electronics, and computer software, as well as the prerequisite material in mathematics and physics. The minor is well-suited to students who wish to take part in the design of computer and embedded systems in any discipline. Computer Engineering 118/L, Introduction to Mechatronics/Introduction to Mechatronics Laboratory or Computer Engineering 121/L, Microprocessor System Design/Microprocessor System Design Laboratory provides a capstone engineering design experience for students pursuing the computer engineering minor.

### COMPUTER ENGINEERING MINOR REQUIREMENTS

---

Requirements for the minor in computer engineering are the following:

Applied Mathematics and Statistics 20A or 20, (Basic) Mathematical Methods for Engineers II (requires prerequisite); or Mathematics 24, Ordinary Differential Equations

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 16, Applied Discrete Mathematics

Computer Engineering 100/L, Logic Design/Laboratory

Computer Engineering 110, Computer Architecture

Computer Engineering 118/L Introduction to Mechatronics/Laboratory or 121/L, Microprocessor System Design/Laboratory

Computer Engineering 13/L, Computer Systems and C Programming (recommended); or Computer Science 12A/L, Introduction to Programming (Accelerated)/Laboratory; or Computer Science 5J, Introduction to Programming in Java, and Computer Science 11, Intermediate Programming

## Computer Engineering

Computer Science 12B/M, Introduction to Data Structures/Laboratory

Computer Science 101, Abstract Data Types

Electrical Engineering 101/L, Introduction to Electronics/Laboratory

Mathematics 19A-B, Calculus for Science, Engineering, and Mathematics

Physics 5A/L, Introduction to Physics I/Laboratory; or Physics 6A/L, Introductory Physics I/Laboratory

Physics 5C/N, Introduction to Physics III/Laboratory; or Physics 6C/N, Introductory Physics III/Laboratory

---

### B.S./M.S. UNDERGRADUATE PROGRAM

---

The Department of Computer Engineering offers a combined bachelor and master of science degree program. Undergraduate students in computer engineering, robotics engineering, electrical engineering, and computer science can apply to the program in order to earn a B.S. degree in their own major together with an M.S. degree in computer engineering. Depending on the student's progress, the B.S./M.S. program can be completed in five years.

The B.S./M.S. program offers a competitive edge to students who are completing their undergraduate degree at UCSC, by enabling those with advanced preparation to move directly from the undergraduate to the graduate program. The program assists qualified enrolled students with a simplified graduate application process that does not require students to take the graduate record examination (GRE), and makes it possible to complete an M.S. degree with just seven courses beyond the B.S. program in either of the allowed majors.

The program prepares students for leadership positions in industry, and is also attractive for undergraduate students planning to pursue a Ph.D. degree targeting research careers in industry or academia. The School of Engineering has many opportunities for undergraduate research, and B.S./M.S. students can continue their undergraduate research projects with the same research group. Upon advancement to graduate standing, B.S./M.S. students are eligible for financial support as graduate research assistants and teaching assistants.

Particularly motivated B.S./M.S. students can complete the entire program in 14 quarters (or fewer with Advanced Placement credit); however, advance planning is essential. Interested students should contact the department and their faculty adviser early in their college career—no later than the start of their junior year. B.S./M.S. students retain undergraduate

status until the completion of all undergraduate requirements, but may begin graduate coursework in advance of graduate standing.

---

### ADMISSION TO THE B.S./M.S. PROGRAM

---

The undergraduate degree requirements are the same as those for other computer engineering, robotics engineering, electrical engineering, and computer science majors; however, the B.S./M.S. program capitalizes on graduate-level courses that may apply toward both degree requirements. B.S./M.S. candidates may use (at most) two graduate courses taken as undergraduates toward both the M.S. degree and B.S. degree electives. At the time graduate status is achieved, no more than three graduate courses taken as an undergraduate may count toward the nine courses required for the M.S. degree. Furthermore, B.S./M.S. students may not apply undergraduate courses toward the M.S. degree.

Admission to the B.S./M.S. program is by formal application, but is very simple. Undergraduate applicants seeking admission to the program can apply at any time starting in the first quarter of junior standing, and no graduate record examination (GRE) is required to apply. To qualify, applicants must have a 3.0 GPA when they apply to the B.S./M.S. program, and must maintain a 3.0 GPA or higher until the completion of their undergraduate requirements.

Students who cannot meet the B.S./M.S. application requirements or who are not admitted into the program are encouraged to apply for admission to the standard M.S. or Ph.D. program during their senior year.

Additional information about this program can be found on the [department's web pages](#).

---

## GRADUATE PROGRAMS

---

---

### M.S. AND PH.D. DEGREE PROGRAMS

---

The graduate program in computer engineering accepts students for both the M.S. and the Ph.D. degrees. Graduate students in this program establish a solid foundation in computer algorithms and architectures and then proceed to a thorough study of recent developments in their selected area of specialization. This provides the basis for the M.S. degree and Ph.D. thesis work. The major areas of research concentration in computer engineering at UCSC are computer networks; embedded and autonomous systems; computer systems design; robotics and control, mobile and pervasive computing; and computer-aided design; and sensing and interaction.

The computer engineering program benefits from a close relationship with other graduate programs in the

## Computer Engineering

School of Engineering and UCSC as a whole. It maintains strong ties to local industry in the Silicon Valley and Monterey Bay areas. Graduates of the program are prepared for careers in academia and research as well as for positions in industrial research and development.

While in the program, most graduate students are supported as research assistants on faculty-sponsored projects or as teaching assistants for undergraduate courses.

Additional information on the computer engineering M.S. and Ph.D. degrees, including degree requirements and applications for admission, can be found on the department's web pages

at <http://ce.soe.ucsc.edu/academics/graduate/requirements>.

### BASE REQUIREMENT (FOR BOTH M.S. AND PH.D)

In their first year, graduate students (both M.S. and Ph.D.) must show proficiency in three fundamental subjects: 1) computer algorithms and data structures; 2) computer architecture; and 3) one of the following three subjects—logic design, circuits, or software systems. Proficiency can be demonstrated by either completing one of the associated undergraduate courses, by establishing that an equivalent undergraduate course has been completed elsewhere, or by passing the final examination (or project when deemed appropriate by the responsible faculty) of an associated course. Students should obtain a computer engineering base requirement worksheet for the list of associated courses and instructions on fulfilling this requirement.

All graduate students (both M.S. and Ph.D.) must meet the base requirement by the end of the spring quarter of their first year in the program.

### REQUIREMENTS FOR THE MASTER'S DEGREE THESIS TRACK

#### Course Requirements

Each M.S. student is required to complete a total of at least 48 credits. The coursework must include:

1. Completion of base requirement as described above.
2. Core requirements:
  - Computer Engineering 200, Research and Teaching in Computer Science and Engineering (to be taken in fall quarter of the first year)
  - Computer Science 201, Analysis of Algorithms
  - Computer Engineering 202, Computer Architecture

3. Research credits: Up to 10 credits of Computer Engineering 297, Independent Study or Research; or Computer Engineering 299, Thesis Research
4. Up to 10 credits of either graduate courses (not seminars) in related disciplines outside the School of Engineering (requires adviser and computer engineering graduate director approval) or upper-division undergraduate courses when necessary to strengthen the student's preparation for graduate studies (requires adviser approval).
5. All remaining courses must be regular 5-credit graduate courses from within the School of Engineering (with adviser and grad director approval); courses that do not count include all courses numbered 200, 280, 296, 297, and 299.

At least half of the credits from the graduate-level courses must be computer engineering graduate courses.

### THESIS

Completion of a master's thesis is required for award of the master's degree. To fulfill this requirement, the student must submit a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the thesis adviser for the proposed thesis. In consultation with the adviser, the student must form a master's thesis reading committee with at least two additional faculty members, each of whom is provided a copy of the proposal. It is recommended that the student give an expository talk on the thesis research. The approved reading committee must accept the final thesis before the master of science degree can be awarded.

### REQUIREMENTS FOR THE MASTER'S DEGREE PROJECT TRACK

#### Course Requirements

Each student is required to complete a total of at least 48 credits. The coursework must include:

1. Completion of base requirement as describe above.
2. Core requirements:
  - Computer Engineering 200, Research and Teaching in Computer Science and Engineering (to be taken in Fall quarter of first year)
  - Computer Science 201, Analysis of Algorithms
  - Computer Engineering 202, Computer Architecture

## Computer Engineering

- Computer Engineering 296, Master's Project, 2 credits;
3. Up to 10 credits of either graduate courses (not seminars) in related disciplines outside the School of Engineering (requires adviser and computer engineering graduate director approval) or upper-division undergraduate courses when necessary to strengthen the student's preparation for graduate studies (requires adviser approval).
  4. All remaining courses must be regular, 5-credit graduate courses from within the School of Engineering (with adviser's and grad director's approval); courses that do not count include all courses numbered 200, 280, 296, 297, and 299.

At least half of the credits from the graduate-level courses must be computer engineering graduate courses.

### Project

---

Completion of a master's project is required to satisfy the master's degree capstone requirement. The master's project is the culmination of the student's academic experience and builds upon the knowledge acquired during the program. In consultation with the adviser, the student forms a master's project reading committee of at least two faculty members, each of whom is provided a copy of the project report. The final project must be accepted by the review committee before the award of the master of science degree.

## REQUIREMENTS FOR THE PH.D. DEGREE

---

### COURSE REQUIREMENTS

---

A Ph.D. student is required to take a total of 58 credits of graduate courses, which must consist of:

1. Completion of base requirement as describe above
2. Core requirements:
  - Computer Engineering 200, Research and Teaching in Computer Science and Engineering (to be taken in fall quarter of the first year)
  - Computer Science 201, Analysis of Algorithms
  - Computer Engineering 202, Computer Architecture
3. Research credits: Up to 10 credits of Computer Engineering 297, Independent Study or Research; or Computer Engineering 299, Thesis Research
4. Up to 10 credits of graduate courses (not seminars) in related disciplines outside the School of

Engineering (requires adviser and computer engineering graduate director approval).

5. All remaining credits must be regular, 5-credit graduate courses from within the School of Engineering (with adviser and computer engineering graduate director approval); credits that do not count include all courses numbered 200, 280, 296, 297, and 299. At least 20 credits of these remaining courses must be Computer Engineering courses.

Course selection should form a coherent plan of study and requires adviser approval. Undergraduate courses may not be used to satisfy Ph.D. course requirements.

Ph.D. students who have satisfied the requirements for the master's degree are eligible to receive a master's degree.

### INTERNSHIPS

---

Where appropriate, research internships with companies, research organizations, or government labs are recognized as an integral part of the research leading to the Ph.D. dissertation. At the adviser's discretion, internships in an appropriate company, research organization, or government lab may be required for individual students.

### EXAMINATIONS AND DISSERTATION

---

To continue in the Ph.D. program, students must pass a preliminary examination in their chosen research area by the end of their third year. Preliminary examinations are held during the first three weeks of each spring quarter; students must petition the computer engineering graduate committee for an examination in their chosen area two weeks before the end of winter quarter.

Examination committees consist of four faculty members, two chosen by the student and two by the computer engineering graduate director. The format of this oral examination is up to the examination committee; the examination will typically evaluate both general knowledge of the chosen area and specific understanding of selected technical papers. The preliminary examination requirement is waived for students who advance to candidacy by the end of their third year.

Each student must write a Ph.D. dissertation. The dissertation must show the results of in-depth research, by an original contribution of significant knowledge, and include material worthy of publication. As the first step, a student must submit a written dissertation proposal to a School of Engineering faculty member. By accepting the proposal, the faculty member becomes the student's dissertation supervisor. The student may

## Computer Engineering

choose a faculty member outside the Computer Engineering Department within the School of Engineering as adviser only with approval from the computer engineering graduate director. The dissertation proposal is publicly and formally presented in an oral qualifying examination given by a qualifying examination committee, approved by the computer engineering graduate director and the graduate division. The student must submit his or her written dissertation proposal to all members of the qualifying examination committee and the graduate adviser at least one month in advance of the examination.

Students are advanced to candidacy after they have completed the course requirements, passed both the preliminary and qualifying examinations (or just the qualifying examination if passed prior to the end of the student's third year in the program), cleared all Incomplete grades from their records, have an appointed dissertation reading committee, and paid the filing fee. Students who have not advanced to candidacy by the end of their fourth year will be placed on academic probation.

Each Ph.D. candidate must submit the completed dissertation to a reading committee at least one month prior to the dissertation defense. The appointment of the dissertation reading committee is made immediately after the qualifying examination and is necessary for advancing to candidacy. The candidate must present his or her research results in a public seminar sponsored by the dissertation supervisor. The seminar is followed by a defense of the dissertation to the reading committee and attending faculty who will then decide whether the dissertation is acceptable or requires revision. Successful completion of the dissertation fulfills the final academic requirement for the Ph.D. degree.

### TRANSFER CREDIT

---

Up to three School of Engineering courses fulfilling the degree requirements of either the M.S. or Ph.D. degrees may be taken before beginning the graduate program through the concurrent enrollment program.

M.S. students who have previously successfully completed graduate-level classes in a related field at another institution may substitute courses from their previous institution with the approval of the graduate director. The number of courses that can be substituted is limited so that, in all cases, students must complete a minimum of four graduate-level classes during their matriculation at UCSC. These classes must be School of Engineering graduate-level courses and must be approved by the student's advisor and the computer engineering graduate director.

Petitions for course substitutions should be submitted along with the transcript from the other institution or UCSC extension. For courses taken at other institutions copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Ph.D. students who have previously earned a master's degree or have successfully completed graduate-level classes as regular students in a graduate program in a related field at another institution may apply for a modified program of course requirements taking into account their previous coursework. Such a modified program should specify the coursework that will be completed at UCSC, which must include no fewer than four graduate-level courses and must be approved by the student's adviser and the computer engineering graduate director. These four courses must be taken while in the graduate program at UCSC.

Application for a modified program of course requirements must be made within the first year of graduate study at UCSC, and will be reviewed by the graduate director and a committee of three faculty members approved by the graduate director. Copies of the syllabi, exams, other relevant coursework, and the relevant transcript from the other institution, must accompany the application. Interviews with the committee members may be required to properly assess the coursework.

Acceptance of prior work for course transfer and modified programs of study is at the discretion of the department.

### ROBOTICS AND CONTROL DESIGNATED EMPHASIS

---

The graduate designated emphasis (DE) leading to the degree notation "with an emphasis in Robotics and Control" is a collaboration of faculty from several Baskin School of Engineering programs and is administered by the Department of Computer Engineering. Students wishing to complete a master's thesis or doctoral dissertation in this area must satisfy the degree requirements of a primary program as well as of the DE. The DE is most suitable for students pursuing degrees in Applied Mathematics and Statistics, Computer Engineering and Electrical Engineering, but students from any area may work in this interdisciplinary field so long as they meet all requirements, including progress, within the primary degree program. A current list of the robotics and control faculty and electives is available at the Computer Engineering web site, [ce.soe.ucsc.edu](http://ce.soe.ucsc.edu).

## Requirements for the Designated Emphasis Notation

---

**Committee composition.** The student's Ph.D. or M.S. committee must include one member of the robotics and control faculty.

**Writing.** The student's dissertation or thesis must include a significant section (chapter) related to robotics and control, with content suitable for a conference or journal article.

**Course requirements.** The student must complete four five-credit graduate courses and several two-credit seminar courses. All students must complete CMPE 241/EE 241, Introduction to Feedback Control Systems, and three 5-credit robotics and control graduate electives.

Master's students must complete two offerings of CMPE 280C, Seminar in Control (2 credits).

Doctoral students must complete four offerings of CMPE 280C.

### Review of Progress

Each year, computer engineering faculty reviews the progress of every student in the graduate program. Students not making adequate progress towards completion of degree requirements (see the UCSC Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to

take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time students must complete Computer Science 201 and Computer Engineering 202 within two years and normally must complete all course requirements within two years for the M.S. and three years for the Ph.D. program.

Students receiving two or more grades of U (Unsatisfactory) or below B in School of Engineering courses are not making adequate progress and will be placed on academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half of a quarter of enrollment.

Should any computer engineering graduate student fail a School of Engineering course while on probation, the Computer Engineering Department may request the graduate dean to dismiss that student from the graduate program. If, after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

---

## COMPUTER ENGINEERING FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

**Alexandre Brandwajn, Emeritus**

**Gabriel Elkaim**

Embedded systems; robust software architectures for real-time reactive systems; sensor fusion; guidance, navigation, and control (GNC) system identification; robust and advanced control schemes; feedback control systems; robotics; unmanned autonomous vehicles (UAVs); and cooperative control

**F. Joel Ferguson**

Fault diagnosis, failure analysis, logic fault modeling, digital test pattern generation, design-for-test of digital circuits and systems

**J. J. García-Luna-Aceves (joint with Technology Management)**

**Jack Baskin Chair of Computer Engineering**

Principles of computer communication, Internet, mobile and pervasive computing, wireless networks, information-centric networks, network science

**Richard Hughey (joint with Biomolecular Engineering)**

Bioinformatics, hidden Markov models, computer architecture, parallel computation

**Tracy Larrabee**

Test-pattern simulation and generation, fault modeling, fault diagnosis, design verification, technical writing, logic simulation

**Roberto Manduchi**

Computer vision and sensor processing, with application to assistive technology for the visually impaired, mobile and pervasive computing

**Patrick E. Mantey (joint with Technology Management)**

**Jack Baskin Chair of Computer Engineering**

Multimedia systems, digital signal processing, sensor systems and networks, real-time monitoring and control, image systems, image processing, visualization, geographic information systems, decision support systems

**Katia Obraczka**

Computer networks, distributed systems, operating systems, Internet information systems, mobile computing, wireless networks, mobile and pervasive computing

**Martine D. F. Schlag**

VLSI design tools and algorithms, VLSI theory, field-programmable gate arrays, FPGA-based computing engines

**Anujan Varma**

Computer networking, computer architecture, optical networks

ASSOCIATE PROFESSOR

---

**Pak K. Chan, Emeritus**

**William Dunbar**

Theory and application of feedback control, single molecule biophysics, nanopore sensors, dynamics and control of biomolecules

**Matthew R. Guthaus**

Health sensor systems, digital health, mobile health applications, integrated circuits and chip design (VLSI), electronic computer-aided design (ECAD), low-power circuits, mobile and pervasive computing

**Sri Kurniawan (joint with Computational Media)**

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; human-centered design

**Dejan Milutinović**

Stochastic and nonlinear control, optimization, stochastic processes and estimation, hybrid and discrete event systems, signal processing and real-time computer control with applications to robotics, air-traffic and multi-agent systems

**Jose Renau**

Computer architecture, including design effort metrics and models, infrared thermal measurements and modeling, simulation, FPGA/ASIC design, mobile and pervasive computing

**Ricardo Sanfelice**

Modeling, stability, control, estimation, and simulation of nonlinear and hybrid systems with applications to autonomous vehicles, power systems, and biology

ASSISTANT PROFESSOR

---

**Jishen Zhao**

Computer architecture with an emphasis on memory systems

**Adjunct Professor**

**Victoria Bellotti**

Focus on user-centered design of context- and activity-aware computing systems

**Gano Chatterji**

Air traffic management simulation and decision support system development, flight dynamics, estimation, guidance, navigation and control

**Renwick Curry**

Control and optimization with special attention to aviation; air-traffic control; and collision-avoidance system design and analysis

**Harwood G. Kolsky, Retired**

**Bassam Musaffar**

Air traffic management (ATM), unmanned traffic management (UTM), computer vision, pattern recognition, robotics and automation, fuzzy logic, neural networks, data and sensor fusion and control systems

**Associate Adjunct Professor**

**Michael Drew**

Air traffic management operations modeling and analysis, system theory, dynamics and control, time series and frequency analysis of traffic data

**Seung Man Lee**

Air traffic management and unmanned aircraft systems, application of cognitive systems engineering methodologies for the design, analysis, and evaluation of complex socio-technical systems, agent-based modeling and simulation, human-automation interaction, computational human performance modeling and analysis.

**Waqar Malik**

Air traffic management, motion planning and control of unmanned vehicles, fixed structure controller synthesis

**Bradley Smith**

Computer communications, distributed systems, policy-based routing, routing protocols, security and trust in distributed systems

**Mircea Teodorescu**

Dynamics, vibrations, contact mechanics, biomechanics

ASSISTANT ADJUNCT PROFESSOR

---

**Bruce Sawhill**

Self-organizing systems, distributed control, dynamic scheduling, many-agent systems, agent-based simulation, game theory, computational logic, dynamics of social and economic networks, foundation of nonequilibrium economics

**Cedric Westphal**

Internet architecture, information-centric network, content and video distribution, wireless networks, analytical modeling, mobile and pervasive computing

LECTURER

---

**Gerald Moulds**

Technical writing, professional communications

**Luca De Alfaro (Computer Science)**

Reputation systems, crowdsourcing, game theory, formal methods

**Benjamin Friedlander (Electrical Engineering)**

Digital communications, wireless communication system, array processing, adaptive signal processing

**Qi Gong (Applied Mathematics and Statistics)**

Computational methods for real-time control systems, trajectory optimization and motion planning, nonlinear filtering and observer design, robust and adaptive control of nonlinear systems, industry applications of control theory

**Claire Gu (Electrical Engineering)**

Fiber sensors for bio-applications, optical fiber communications, volume holographic data storage, liquid crystal displays, nonlinear optics, optical information processing

**Kevin Karplus (Biomolecular Engineering)**

Genome assembly from next-generation sequence data. (Formerly protein structure prediction), signal processing and statistics for nanopore signals

**Suresh K. Lodha (Computer Science)**

Data analytics and visualization, vision, innovation, technology for social good

**Darrell D. E. Long (Computer Science)**

**Kumar Malavalli Endowed Chair in Storage Systems**

Data storage systems, distributed computing, operating systems, performance evaluation, reliability, cyber security, data science, multimedia

**Dominic W. Massaro, Emeritus**

**Charles E. McDowell (Computer Science)**

Programming languages, parallel computing, and computer science education

**Ethan L. Miller (Computer Science)**

**Symantec Presidential Chair for Storage and Security**

Archival storage; non-volatile memory and next-generation storage; storage security and reliability; file system metadata and search, computer security; scalable and distributed systems

**John Musacchio (Technology Management)**

Control, analysis, and pricing of communications networks; applications of game theory in networking; wireless ad-hoc networks; and management of technology

**Alex T. Pang (Computer Science)**

Uncertainty visualization, tensor visualization, scientific visualization, comparative visualization, collaboration software, virtual reality interfaces

**Ira Pohl, Emeritus (Computer Science)**

**Hamid Sadjadpour (Electrical Engineering)**

Wireless communication systems, network information theory and scaling laws, performance analysis of wireless and social networks, routing and MAC protocol design for wireless networks

**Patrick Tantalo (Computer Science)**

Graph theory, combinatorics, optimization, algorithms

**Linda Werner (Computer Science)**

Software engineering, computer-science education, testing, increasing diversity in computer science

**E. James Whitehead, Jr. (Computational Media)**

Software engineering, software evolution, software bug prediction, level design in computer games, procedural content generation

**Donald Wiberg, Emeritus (UCLA)**

Control systems, Kalman filtering, system parameter estimation, adaptive optics for large telescopes, and biomedical system modeling

**Yi Zhang (Technology Management)**

Large-scale information retrieval, recommendation systems, internet advertising, data mining, language processing, and applied machine learning

---

## COMPUTER ENGINEERING COURSES

---

**LOWER-DIVISION COURSES**

---

**1. Hands-On Computer Engineering (2 credits). \***

Hands-on introduction to computer engineering practice and research, including computer hardware, robotics, and embedded systems. Encourages interaction with UCSC's School of Engineering community. Designed for students without

previous background in computer engineering. Enrollment restricted to first-year students and sophomores. Enrollment limited to 20. The Staff

**3. Personal Computer Concepts: Software and Hardware. F,W,S**

Provides an introduction to computers. Personal computing is

emphasized, and students are introduced to word processing, spreadsheets, database management, graphics, and programming. Covers fundamentals of computing and current and future uses of computer technology, PC hardware, Windows operating system, applications software, networking and the Internet, and

## Computer Engineering

developments in the computer industry. Designed for students with little or no experience using computers. Students cannot receive credit for this course and Computer Science 2. (General Education Code(s): IN.) G. Moulds

### **7. Statistical Reasoning in the Age of the Internet.**

Elementary methods of statistical and probabilistic reasoning are introduced through applications from the Internet. Computer simulations and analyses performed by the instructor are presented to develop and discuss these methods. Students experiment with their own simulations (programming skills not required), analyzing and interpreting results. Students cannot receive credit for this course if they have already received credit for course 107 or Applied Mathematics and Statistics 5 or 7 or 131. Prerequisite(s): Applied Mathematics and Statistics 2 or 3 or 6, or Mathematics 3. (General Education Code(s): SR.) The Staff

### **8. Robot Automation: Intelligence through Feedback Control. F**

Introduction to dynamical systems, feedback control, and robotics. Fundamental concepts in dynamical systems, modeling, stability analysis, robustness to uncertainty, feedback as it occurs naturally, and the design of feedback-control laws to engineer desirable static and dynamic response. Course includes an introduction to MATLAB and programming in MATLAB. Priority enrollment restricted to first-year students and sophomores. (General Education Code(s): MF, IN, Q.) M. Teodorescu

### **9. Introduction to Statics, Dynamics, and Biomechanics. W**

Theory and application of mathematical models to analyze statics and dynamics of mechanical

and biomechanical systems (partials and rigid bodies) using a vector algebra. Covers: Newton's laws; free-body diagrams; structure analysis; friction; virtual work; energy and momentum methods; dynamics of bodies in two and three dimensions. Prerequisite(s): Mathematics 19A, and Physics 5A/L or 6A/L., and Applied Mathematics and Statistics 10 or Mathematics 21. D. Milutinovic

### **12. Computer Systems and Assembly Language. F,W,S**

Introduction to computer systems and assembly language and how computers compute in hardware and software. Topics include digital logic, number systems, data structures, compiling/assembly process, basics of system software, and computer architecture. May include C language. Students with no prior programming experience are strongly recommended to take course 3, Computer Science 5J, Computer Science 5P, Computer Science 10, or equivalent before taking this course. Prerequisite(s): previous or concurrent enrollment in course 12L is required. (General Education Code(s): IN, Q.) M. Dunne, J. Renau Ardevol

### **12L. Computer Systems and Assembly Language Laboratory (2 credits). F,W,S**

Introduction to computer systems and assembly language and how computers compute in hardware and software. Topics include digital logic, number systems, data structures, compiling/assembly process, basics of system software, and computer architecture. May include C language. Students with no prior programming experience are strongly recommended to take course 3, Computer Science 5J, Computer Science 5P, Computer Science 10, or equivalent before taking this course. Prerequisite(s):

previous or concurrent enrollment in course 12 is required. M. Dunne, J. Renau Ardevol

### **13. Computer Systems and C Programming. W,S**

Introduction to the C programming language as a means for controlling embedded and general computing systems. Continuing the exploration begun in course 12, students move to higher levels of abstraction in the control of complex computer systems. Prerequisite(s): courses 12 and 12L. Concurrent enrollment in course 13L is required. The Staff, M. Dunne, G. Elkaim

### **13L. Computer Systems and C Programming Lab (2 credits). W,S**

Laboratory sequence in C programming for embedded and general computing systems. Two 2-hour laboratories per week. Concurrent enrollment in course 13 is required. G. Elkaim, M. Dunne, (F) The Staff

### **16. Applied Discrete Mathematics. F,W,S**

Introduction to applications of discrete mathematical systems. Topics include sets, functions, relations, graphs, predicate calculus, mathematical proof methods (induction, contraposition, contradiction), counting methods (permutations, combinations), and recurrences. Examples are drawn from computer science and computer engineering. Knowledge of computer programming is useful before taking this course. Students who do not have prior programming experience are strongly recommended to take Computer Science 5C, 5J, or 5P before taking this course. Prerequisite(s): Mathematics 19A or 11B or Applied Mathematics and Statistics 11B or 15B or Economics 11B. (General Education Code(s): MF, Q.) M. Schlag, T. Larrabee

**80A. Universal Access: Disability, Technology, and Society. F**

Overview of human-centered technology and of its potential for increasing the quality of life and independence of disabled individuals. A substantial portion of the course is devoted to studying physical, psychological, and psychosocial aspects of disability. Topics include: diversity and integration, legislation, accessibility, and universal design. (Formerly Assistive Technology and Universal Access.) (General Education Code(s): PE-T, T7-Natural Sciences or Social Sciences.) S. Kurniawan, R. Manduchi

**80E. Engineering Ethics. S**

Ethical theories, analysis, and their application to issues in the practice of engineering, such as safety and liability, professional responsibility to clients and employers, codes of ethics, legal obligations, environmental issues, and social issues. Emphasis on developing independent ethical analysis through the use of case studies. (General Education Code(s): PE-T, T6-Natural Sciences or Humanities and Arts.) S. Kurniawan, The Staff

**80H. History of Modern Computing. \***

Presents a history of the development of computing technologies (CPUs and I/O devices, operating systems, and languages) through the latter half of the 20th century in order to build an understanding of how today's computing environment evolved. (General Education Code(s): T2-Natural Sciences.) The Staff

**80N. Introduction to Networking and the Internet. F,W,S**

Introduction to the evolution, technological basis, and services of the Internet, with descriptions of its underlying communications

structure, routing algorithms, peer-to-peer hierarchy, reliability, and packet switching. Network security, mail, multimedia and data compression issues, HTML, and digital images. Students who have completed course 150 cannot receive credit for this course. (General Education Code(s): PE-T, T2-Natural Sciences.) T. Larrabee, The Staff

**80U. Ubiquitous and Mobile Computing. \***

Ubiquitous computing integrates computer and communication technology with day-to-day life. Ubiquitous and mobile technology includes: MP-3 players, camera cell phones, Bluetooth headsets, sensor networks, and new emerging technologies. Course provides an overview of the technology and economics of ubiquitous computing. (General Education Code(s): T2-Natural Sciences.) The Staff

**94. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**94F. Group Tutorial (2 credits). F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**99F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

**UPPER-DIVISION COURSES**

**100. Logic Design. W,S**

Boolean algebra, logic minimization, finite-state machine design, sequential circuits, common logic elements, programmable logic devices, and an introduction to system level design. The electrical behavior of circuits including three state outputs, propagation delay, logic levels, and fanout.

Prerequisite(s): courses 12 and 12L; previous or concurrent enrollment in course 100L required. Enrollment limited to 60. J. Zhao, M. Schlag

**100L. Logic Design Laboratory (2 credits). W,S**

Laboratory sequence illustrating topics covered in course 100. Two 2-hour laboratory sessions per week. Weekly laboratory assignments which require the use of the oscilloscopes, TTL circuits, computer-aided design and simulation tools, and programmable logic. Students are billed a materials fee. Prerequisite(s): courses 12 and 12L; previous or concurrent enrollment in course 100 required. Enrollment limited to 60. J. Zhao, M. Schlag

**107. Probability and Statistics for Engineers. W,S**

Introduction to fundamental tools of stochastic analysis. Probability, conditional probability; Bayes Theorem; random variables and transforms; independence; Bernoulli trials. Statistics, inference from limited data; outcomes of repeated experiments; applications to design; assessment of relative frequency and probability; law of large numbers; precision of measurements. Elements of stochastic processes, Poisson processes; Markov chains. Students cannot receive credit for this course and Applied Mathematics and Statistics 131.

## Computer Engineering

(Formerly Mathematical Methods of Systems Analysis: Stochastic.)

Prerequisite(s): course 16 or 16H and Mathematics 22 or 23A. (General Education Code(s): SR.) J. Garcia-Luna-Aceves

### **108. Data Compression. \***

Basics of information theory, lossless coding (Huffman coding, arithmetic coding, dictionary coding), lossy coding (PCM, predictive coding, transform coding). Application to the compression of specific data set, which may include biological time series, DNA sequences, and multimedia streams. Programming experience is required.

Prerequisite(s): course 107 or Applied Mathematics and Statistics 131. The Staff

### **110. Computer Architecture. F,W**

Introduction to computer architecture including examples of current approaches and the effect of technology and software. Computer performance evaluation, basic combinatorial and sequential digital components, different instruction set architectures with a focus on the MIPS ISA and RISC paradigm.

Evolution of CPU microarchitecture from single-cycle to multi-cycle pipelines, with overview of super-scalar, multiple-issue and VLIW. Memory system, cache, virtual memory and relationship between memory and performance.

Evolution of PC system architecture. May include advanced topics, such as parallel processing, MIMD, and SIMD. Prerequisite(s): courses 12/L, and courses 13/L or Computer Science 12A/L or Computer Science 11. Course 16 recommended. J. Zhao, J. Renau Ardevol

### **112. Computer and Game Console Architecture. \***

Introduces computer and game

console architecture, including examples of current approaches and the effect of technology and software. Computer performance evaluation; instruction-set architectures; RISC CPU and pipelining; cache and memory; multi-core, system-level architecture; video card; special console architectures. Pre-requisite(s): course 12. The Staff

### **113. Parallel and Concurrent Programming. \***

Introduction to parallel and concurrent programming. Topics include: types of parallel computers and programming platforms; design, implementation, and optimization of programs for parallel and multicore processors; basic and advanced programming techniques; performance analysis and load balancing; and selected parallel algorithms. (Also offered as Computer Science 113. Students cannot receive credit for both courses.) Prerequisite(s): Computer Engineering 12 and 12L and Computer Science 101. Computer Engineering 110 or 112 recommended. The Staff

### **115. Introduction to Solid Mechanics. S**

Introduces the solid mechanics of materials. Topics include: stress and strain, torsion, bending of beams, shearing stresses in beams, compound stresses, principal stresses, deflections of beams, and statically indeterminate members and columns. Prerequisite(s): course 9 and Mathematics 19B, and Applied Mathematics and Statistics 10 or Mathematics 21. M. Teodorescu

### **118. Introduction to Mechatronics. F**

Technologies involved in mechatronics (intelligent electro-mechanical systems) and

techniques necessary to integrate these technologies into mechatronic systems. Topics include electronics (A/D, D/A converters, opamps, filters, power devices), software program design (event-driven programming, state machine-based design), DC and stepper motors, basic sensing, and basic mechanical design (machine elements and mechanical CAD). Combines lab component of structured assignments with a large and open-ended team project. Cannot receive credit for this course and course 218. Prerequisite(s): Electrical Engineering 101/L and courses 12/L and 100/L. Concurrent enrollment in course 118L is required. Enrollment limited to 36. G. Elkaim

### **118L. Introduction to Mechatronics Laboratory (2 credits). F**

Laboratory sequence illustrating topics covered in course 118. Two 2-hour laboratory sessions per week. Students cannot receive credit for this course and course 218L. Students are billed a materials fee. Prerequisite(s): Concurrent enrollment in course 118 is required. Enrollment limited to 36. G. Elkaim

### **121. Microprocessor System Design. F,S**

The design and use of microprocessor-based systems. Covers microprocessor and microcontroller architecture, programming techniques, bus and memory organization, DMA, timing issues, interrupts, peripheral devices, serial and parallel communication, and interfacing to analog and digital systems. Enrollment restricted to Computer Engineering and Robotics majors during First Pass Enrollment. Prerequisite(s): courses 12/L and 100/L and Electrical Engineering

## Computer Engineering

101/L; and course 13/L or Computer Science 12B/M. Previous or concurrent enrollment in course 121L required. Enrollment limited to 40. A. Varma

### **121L. Microprocessor System Design Laboratory (2 credits). F,S**

Laboratory sequence illustrating topics covered in course 121. Two 2-hour laboratory sessions per week. Students design, build, program, debug, document, and demonstrate a microprocessor-based system. Students are billed a materials fee. Prerequisite(s): courses 12/L and 100/L and Electrical Engineering 101/L; and course 13/L or Computer Science 12B/M. Previous or concurrent enrollment in course 121 required. Enrollment limited to 40. A. Varma

### **122. Introduction to VLSI Digital System Design. S**

Introduces very large scale integrated (VLSI) custom integrated circuits. Topics include: semiconductor manufacturing, logic families, field-effect transistors (FETs), interconnect models, simulation, and circuits. Introduces the design flow from logic design to layout with a focus on high performance and low power. Students cannot receive credit for this course and course 222. Prerequisite(s): courses 100/L and Electrical Engineering 101/L. Enrollment limited to 25. M. Guthaus

### **123A. Engineering Design Project I. \***

First of a two-course sequence that is the culmination of the engineering program. Students apply knowledge and skills gained in elective track to complete a major design project. Students complete research, specification, planning, and procurement for a substantial project. Includes

technical discussions, design reviews, and formal presentations; engineering design cycle, engineering teams, and professional practices. Formal technical specification of the approved project is presented to faculty. Students are billed a materials fee. Prerequisite(s): Computer Engineering 121; previous or concurrent enrollment in Computer Engineering 185; permission of department and instructor. (General Education Code(s): PR-E.) The Staff

### **123B. Engineering Design Project II (7 credits). \***

Second of two-course sequence in engineering system design. Students fully implement and test system designed and specified in course 123A. Formal written report, oral presentation, and demonstration of successful project to review panel of engineering faculty required. Students are billed a materials fee. Prerequisite(s): courses 123A and 185. Enrollment limited to 35. The Staff

### **125. Logic Design with Verilog. W**

Verilog digital logic design with emphasis on ASIC and FPGA design. Students design and verify large-scale systems. Assignments and project use the Verilog Hardware Description Language with emphasis on verification and high-frequency ASIC/FPGA targets. Prerequisite(s): courses 100 and 100L. Concurrent enrollment in course 125L required. Enrollment limited to 40. M. Guthaus

### **125L. Logic Design with Verilog Laboratory (2 credits). W**

Laboratory sequence illustrating topics covered in course 125. Two 2-hour laboratory sessions per week. Students are billed a materials fee. Prerequisite(s): courses 100 and 100L. Concurrent

enrollment in course 125 is required. Enrollment limited to 40. M. Guthaus

### **129A. Capstone Project I (2 credits). F**

First of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this first course, students complete the specification and planning for a substantial project. Topics covered: engineering design cycle, engineering teams, and professional practices. Prerequisite(s): previous or concurrent enrollment in courses 121 and 121L. P. Mantey

### **129B. Capstone Project II. W**

Second of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this second course, students complete the research and procurement for a substantial project and a preliminary implementation. Students are billed a materials fee. Prerequisite(s): courses 121, 121L, and 129A. Previous or concurrent enrollment in course 185. Enrollment by permission of instructor. (General Education Code(s): PR-E.) P. Mantey, D. Munday

### **129C. Capstone Project III. S**

Third of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this third course, students work in teams to complete the project specified and advanced in the first two courses. A formal written report, oral presentation, and demonstration of the successful project to a review panel of engineering faculty is required. Students are billed a materials fee. Prerequisite(s): courses 129B and 185. Enrollment by permission of

## Computer Engineering

instructor. P. Mantey, D. Munday

### **131. Human-Computer Interaction. \***

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Interdisciplinary course for social science and engineering majors. Students cannot receive credit for this course and Computer Engineering 231 or Digital Arts and New Media 231. Prerequisite(s): Computer Science 12B. The Staff

### **141. Feedback Control Systems. F**

Analysis and design of continuous linear feedback control systems. Essential principles and advantages of feedback. Design by root locus, frequency response, and state space methods and comparisons of these techniques. Applications. (Also offered as Electrical Engineering 154. Students cannot receive credit for both courses.) Prerequisite(s): Electrical Engineering 103. Enrollment restricted to School of Engineering and Division of Physical and Biological Sciences majors, or by permission of instructor. Enrollment limited to 30. R. Sanfelice, The Staff

### **145. Estimation and Introduction to Control of Stochastic Processes. S**

Provides practical knowledge of Kalman filtering and introduces control theory for stochastic processes. Selected topics include: state-space modeling; discrete- and continuous-time Kalman filter; smoothing; and applications in feedback control. Students learn through hands-on experience. Students cannot receive credit for

this course and course 245. Enrollment by permission of instructor. (Formerly Applied Mathematics and Statistics 118.) (General Education Code(s): SR.) D. Milutinovic

### **149. Introduction to Cyber-physical Systems. W**

Presents the basic concepts and tools for the study of cyber-physical systems, including modeling and analysis tools for continuous-time and discrete-time systems, finite state machines, stateflow, timed and hybrid automata, concurrency, invariants, linear temporal logic, verification, and numerical simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. The course is self-contained. Students are expected to have a basic background in logic circuits, programming, the mathematical modeling of dynamical systems (course 8 is recommended), differential equations, linear algebra, and basic calculus. Knowledge of MATLAB/Simulink is useful. Students cannot receive credit for this course and course 249. (Formerly course 142.) Prerequisite(s): courses 100/L or equivalent, and courses 13/L or equivalent. R. Sanfelice

### **150. Introduction to Computer Networks. F,W**

Addresses issues arising in organizing communications among autonomous computers. Network models and conceptual layers; Internet-working; characteristics of transmission media; switching techniques (packet switching, circuit switching, cell switching); medium access control (MAC) protocols and local area networks; error-control strategies and link-level protocols; routing algorithms for bridges and routers; congestion

control mechanisms; transport protocols; application of concepts to practical wireless and wireline networks and standard protocol architectures. Students who have completed course 80N can take this course for credit. Prerequisite(s): course 16 and either courses 12 and 12L, or Computer Science 12B and 12M. Concurrent enrollment in course 150L is required. K. Obraczka

### **150L. Introduction to Computer Networks Laboratory (2 credits). F,W**

Illustrates the concepts covered in course 150 and provides students with hands-on experience in computer networks. Students are billed a materials fee. Prerequisite(s): course 16 and either courses 12 and 12L, or Computer Science 12B and 12M. Concurrent enrollment in course 150 is required. K. Obraczka

### **151. Advanced Computer Networks. S**

Provides an in-depth coverage of fundamental topics introduced in course 150 including routing, transport, and internetworking. Also introduces advanced concepts not covered in course 150 including wireless, application-layer services, security, etc. (Formerly Network Administration.) Prerequisite(s): course 150. Concurrent enrollment in course 151L is required. Enrollment limited to 60. B. Smith

### **151L. Advanced Computer Networks Laboratory (2 credits). S**

Laboratory illustrating the concepts covered in course 151: provides students with hands-on experience in computer networks. Students are billed a materials fee. Prerequisite(s): course 150/L. Concurrent enrollment in course 151 is required. Enrollment limited

to 30. B. Smith

**153. Digital Signal Processing. S**

Introduction to the principles of signal processing, including discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, structures for discrete-time systems, the discrete Fourier transform, computation of the discrete Fourier transform, and filter design techniques. Taught in conjunction with Electrical Engineering 250. Students cannot receive credit for this course and Electrical Engineering 250. (Also offered as Electrical Engineering 153. Students cannot receive credit for both courses.) Prerequisite(s): Electrical Engineering 103. A. Fletcher

**156. Network Programming. W**

Methods and tools used for network programming. Topics include: operating system (OS) support for network protocols; inter-process communication (IPC) facilities, such as pipes, sockets, and remote procedure call (RPC); design of client and server sides of network applications; network security; and programming projects. Prerequisites: course 150/L and Computer Science 101. Concurrent enrollment in course 156L required. The Staff

**156L. Network Programming Laboratory (2 credits). W**

Laboratory sequence illustrating concepts taught in course 156. Students learn use of network programming tools and methods via programming exercises. Students are billed a materials fee. Prerequisites: course 150/L and Computer Science 101. Concurrent enrollment in course 156 required. The Staff

**158. Network Management and Operations. \***

Computer networking internship in the Network Management and Operations (NMO) Lab, an industry-sponsored, networks-research center at UCSC. Working in teams under faculty mentorship, students solve problems posed by industry sponsors over the course of a quarter. Students learn technical topics relevant to the problem, and gain experience and training in best practices for collaborative, multi-site problem solving. Prerequisite(s): course 150/L and 151/L; and previous or concurrent enrollment in course 185. Enrollment by instructor permission. The Staff

**161. Mobile Sensing and Interaction. W**

Provides hands-on knowledge and experience with modern mobile computing platforms for sensing and interactions tasks. Students learn how to create usable applications on a sensor-laden, mobile computing platform with adequate level of user interface. Prerequisite(s): courses 13/L or Computer Science 12B/M; and Physics 5A or Physics 6A. R. Manduchi

**167. Sensing and Sensor Technologies. W**

Introduces the fundamental issues in sensing and various sensor technologies including motion sensors, velocity sensors, GPS sensors, acoustic sensors, light and image sensors, and range sensors. Also demonstrates sensor technologies using a system approach to show how they can be integrated into a complete digital system. Prerequisite(s): Electrical Engineering 103. Concurrent enrollment in course 167L is required. S. Petersen

**167L. Sensing and Sensor Technologies Lab (2 credits). W**

Lab assignments reinforce the concepts and techniques learned in course 167. Assignments include measurement and estimation techniques, experiments with various sensors, and a course project in which students build digital sensing systems. Students are billed a materials fee. Prerequisite(s): Electrical Engineering 103. Concurrent enrollment in course 167 is required. S. Petersen

**177. Applied Graph Theory and Algorithms. \***

Basic concepts and algorithms are reviewed including trees, Eulerian and Hamiltonian graphs, and graph transversal. Algorithms are explored to solve problems in connectivity, routing, matching, and embedding of graphs. Graph theory and algorithms are developed around applications in computer engineering. Prerequisite(s): Computer Science 101. The Staff

**185. Technical Writing for Computer Engineers. F,W,S**

Writing by engineers and computer scientists, not to general audiences, but to engineers, engineering managers, and technical writers. Exercises include job application and resume, in-code documentation, algorithm description, naive-user documentation, library puzzle, survey article, proposal, progress report, formal technical report, and oral presentation. Offered in alternate quarters. Enrollment restricted to majors in Computer Engineering, Electrical Engineering, Bioengineering, Bioinformatics, Robotics Engineering, or Network and Digital Technology, or by permission of instructor. Prerequisite(s): satisfaction of Entry Level Writing and

## Computer Engineering

Composition requirements; and Computer Science 12B or Computer Engineering 12 or Biomolecular Engineering 160. Enrollment limited to 60. (General Education Code(s): W.) G. Moulds

### **193. Field Study. F,W,S**

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the Computer Engineering Department and a willing sponsor at the field site using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not be repeated for credit. Students submit petition to sponsoring agency. The Staff

### **193F. Field Study (2 credits). F,W,S**

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the Computer Engineering Department and a willing sponsor at the field site using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not be repeated for credit. Students submit petition to sponsoring agency. The Staff

### **194. Group Tutorial. F,W,S**

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **194F. Group Tutorial (2 credits). F,W,S**

A program of independent study arranged between a group of students and a faculty member.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **195. Senior Thesis Research. F,W,S**

Students submit petition to sponsoring agency. Prerequisite: course 123A. The Staff

### **195F. Senior Thesis Research (2 credits). F,W,S**

Students submit petition to sponsoring agency. Consent of instructor required. Prerequisite: course 123A. The Staff

### **198. Individual Study or Research. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **198F. Individual Study or Research (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199. Tutorial. F,W,S**

For fourth-year students majoring in computer engineering. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **199F. Tutorial (2 credits). F,W,S**

For fourth-year students majoring in computer engineering. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## GRADUATE COURSES

---

### **200. Research and Teaching in Computer Science and Engineering (3 credits). F**

Basic teaching techniques for teaching assistants including responsibilities and rights of teaching assistants, resource materials, computer security, leading discussion or lab sessions, presentation techniques,

maintaining class records, electronic handling of homework, and grading. Examines research and professional training, including use of the library and online databases, technical typesetting, writing journal and conference papers, publishing in computer science and computer engineering, giving talks in seminars and conferences, and ethical issues in science and engineering. Required for all T.A.s. Enrollment restricted to graduate students. K. Obraczka

### **202. Computer Architecture. W,S**

Provides a thorough and fundamental treatment of the art of computer architecture. Topics include concepts of von Neumann architectures, methods of evaluating CPU performance, instruction-set design and examples, compiler issues, instruction pipelining, superscalar processors, methods for reduction of branch penalty, memory hierarchies, I/O systems, floating-point arithmetic, and current issues in parallel processing. Prerequisite(s): course 110 or 112. Enrollment restricted to graduate students; undergraduates may enroll if they have completed course 110 or 112 and with consent of instructor. Enrollment limited to 30. J. Renau Ardevol, J. Zhao

### **215. Models of Robotic Manipulation. W**

Theory and application of mathematical models to analyze, design, and program serial kinematic chains (robot arms). Covers models of arbitrary articulated robotic or biological arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks; the forward and inverse kinematic models; the Jacobian matrix; trajectory generation; and dynamic models,

## Computer Engineering

including Newton-Euler and Lagrangian formulations. Enrollment restricted to graduate students; and to seniors who have taken electrical engineering 154, and applied mathematics and statistics 10 or 10A or mathematics 21; or by permission of instructor. M. Teodorescu

**216. Bio-Inspired Locomotion. S**  
Presents the principles of biological locomotion and application to robotics problems. Students learn about effective movements in the biological world (slithering, walking, climbing, and flying); extract their underlying principles; and apply them creatively to robotics design. Prerequisite(s): course 9 or equivalent. Enrollment restricted to graduate students, and seniors by permission of instructor. Enrollment limited to 20. M. Teodorescu, The Staff

**218. Mechatronics. F**  
Introduction to intelligent electro-mechanical systems, combining aspects of computer, electrical, mechanical, and software engineering. Students become proficient in all aspects of mechanical, electrical, computer system design, analysis, prototyping, presentation and team mentorship. Cannot receive credit for this course and course 118. Prerequisite(s): concurrent enrollment in course 218L. Enrollment restricted to graduate students. Enrollment limited to 36. G. Elkaim

**218L. Mechatronics Lab (2 credits). F**  
Laboratory sequence illustrating topics covered in course 218. Two 2-hour laboratory sessions per week. Students cannot receive credit for this course and course 118L. Students are billed a materials fee. Prerequisite(s):

concurrent enrollment in course 218. Enrollment restricted to graduate students. Enrollment limited to 36. G. Elkaim

**220. Advanced Parallel Processing. \***  
Introduction to programming advanced parallel computer architecture. Topics may include: SIMD massively parallel processor arrays; streaming parallel coprocessors, such as graphics cards used for general-purpose processing (GPGPU); or other hybrid MIMD/SIMD architectures. Course has programming lab component, a project, and student presentation on related topics. (Formerly Parallel Processing.) Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. The Staff

**221. Advanced Microprocessor Design. F**  
Introduction to latest advances in computer architecture. Focuses on processor core design. Topics include simultaneous multithreading, thread level speculation, trace caches, novel out-of-order mechanisms, and energy-efficient processor core designs. Final project is modification/enhancement of an out-of-order processor on an FPGA development system. Prerequisite(s): course 202; and course 125, 225, or equivalent Verilog experience. Concurrent enrollment in course 221L required. Enrollment restricted to graduate students. Enrollment limited to 20. J. Renau Ardevol

**221L. Advanced Microprocessor Design Laboratory (3 credits). F**  
Laboratory sequence illustrating topics covered in course 221. Prerequisite(s): course 202; and course 125, 225, or equivalent

Verilog experience. Concurrent enrollment in course 221 required. Enrollment restricted to graduate students. Enrollment limited to 20. J. Renau Ardevol

**222. VLSI Digital System Design. S**  
Advanced Very Large Scale Integrated (VLSI) custom integrated circuits. Topics include: semiconductors; field-effect transistors (FETs); circuits; and interconnect simulation, along with advanced material on manufacturability, variability, short-channel devices, and non-volatile memories. Students cannot receive credit for this course and course 122. (Formerly VLSI Digital System Design.) Prerequisite(s): course 122 or equivalent. Enrollment limited to 15. M. Guthaus

**223. VLSI System-on-a-Chip Design. \***  
Design methodologies for Application Specific Integrated Circuits (ASICs). Topics include: behavioral specification; logic synthesis; standard-cell libraries; advanced timing analysis; and physical design automation tools. Familiarizes students with real-world tools during the design of a small system-on-a-chip project. Students are encouraged to fabricate and test their chips in an independent study. Prerequisite(s): course 222 or permission of instructor. Enrollment restricted to graduate students. The Staff

**224. Testing Digital Circuits. \***  
An introduction to the theory and practice of testing. Topics are chosen from fault and defect models, test generation for combinational and sequential circuits, fault simulation, scan-design and built-in self-test. Enrollment restricted to graduate students; undergraduates may

## Computer Engineering

enroll if they have completed Computer Science 101. The Staff

### **225. Introduction to ASIC Systems Design. \***

Introduces reconfigurable computing systems with emphasis on field-programmable devices. Topics include: architectures of field-programmable devices; novel reconfigurable systems; and hardware algorithms. Students are billed a materials fee. Enrollment restricted to computer engineering graduate students. Enrollment limited to 10. Offered in alternate academic years. The Staff

### **229. Field-Programmable Gate Arrays Computer-Assisted Design. \***

Design methods for Field-Programmable Gate Arrays (FPGAs), including algorithms for technology mapping, routability estimation, placement, and routing. The relationship between FPGA architectures and their computer-aided design tools. Course project involves the modification and analysis of an FPGA tool. Enrollment restricted to graduate students or by consent of instructor. Courses 100, 125, 126, 222, 225, or other digital design experience recommended. Enrollment limited to 20. The Staff

### **230. Computer Performance Evaluation. \***

Introduction to methods of analysis of computer system performance. Predictive performance models with emphasis on queuing models; exact and appropriate solution methods, discrete-event simulation, and numeric iterative approaches; analytical solutions and their computation; separable queuing networks, decomposition approaches; examples of practical application; and performance measurement, model validation,

robustness of models, and operational analysis. Enrollment restricted to graduate students. Enrollment limited to 20. Offered in alternate academic years. The Staff

### **231. Human-Computer Interaction. \***

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Individual research project. Interdisciplinary course for art, social science and engineering graduate students. Students cannot receive credit for this course and course 131. (Also offered as Digital Arts and New Media 231. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. The Staff

### **232. Arithmetic Processors. \***

Concept of number systems: binary additions, multiplications, divisions; elementary function evaluations; algorithm acceleration; floating-point and significant arithmetics; IEEE standards; technology related issues; algorithm evaluation by implementation with gate arrays. Prerequisite(s): course 202. Enrollment restricted to graduate students. Enrollment limited to 15. The Staff

### **233. Human Factors. \***

Course focuses on theories, practices, and design of systems to optimize human well-being and system performance through consideration of psychological, social, physical, and biological factors. Covers human sensory systems and memory, workload management, error and reliability, performance measurement, and

ergonomic design. Interdisciplinary course for social science and engineering graduate students. Enrollment restricted to graduate students; undergraduates may enroll if they have completed course 131. The Staff

### **240. Introduction to Linear Dynamical Systems. W**

Introduction to applied linear algebra and linear dynamical systems with applications to circuits, signal processing, communications, and control systems. Topics include the following: Least-squares approximations of over-determined equations and least-norm solutions of underdetermined equations. Symmetric matrices, matrix norm and singular value decomposition. Eigenvalues, left and right eigenvectors, and dynamical interpretation. Matrix exponential, stability, and asymptotic behavior. Multi-input multi-output systems, impulse and step matrices; convolution and transfer matrix descriptions. Control, reachability, state transfer, and least-norm inputs. Observability and least-squares state estimation. Enrollment restricted to graduate students; undergraduates may enroll if they have completed Electrical Engineering 103 and Applied Math and Statistics 147. G. Elkaim

### **241. Introduction to Feedback Control Systems. F**

Graduate-level introduction to control of continuous linear systems using classical feedback techniques. Design of feedback controllers for command-following error, disturbance rejection, stability, and dynamic response specifications. Root locus and frequency response design techniques. Extensive use of Matlab for computer-aided controller

## Computer Engineering

design. Course has concurrent lectures with Electrical Engineering 154. (Also offered as Electrical Engineering 241. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. R. Sanfelice, The Staff

### **242. Applied Feedback Control. W**

Sequel to Electrical Engineering 154. After reviewing control design techniques examined in EE 154, this course explores state space control, discrete time control, and two case studies in control design. Students design and implement feedback controllers on an inverted pendulum experiment. Prerequisite(s): Electrical Engineering 154 or course 241. Enrollment restricted to juniors, seniors, and graduate students. G. Elkaim

### **243. System Identification. \***

Course provides introduction to the construction of linear dynamical models from experimental data using parametric and non-parametric identification techniques. Theoretical and practical aspects of these techniques addressed. Prerequisite(s): course 240, or by permission of instructor. The Staff

### **244. Digital Control. \***

Teaches the design and analysis of digital control systems. The topics covered are discrete-time system modeling; z-transform; stability, controllability, and observability of discrete-time systems; various design approaches to control design in which sensor, computer hardware, actuation, communication, and user interface are part of the design. Note: knowledge of linear algebra, calculus, basic differential equations, Laplace transform, signals and systems, linear-system

control theory, MATLAB, and the use of word-processing software are assumed. Prerequisite(s): course 141 or 241. Enrollment restricted to graduate students, or by permission of the instructor. The Staff

### **245. Estimation and Introduction to Control of Stochastic Processes. S**

Provides practical knowledge of Kalman filtering and introduces control theory for stochastic processes. Selected topics include: state-space modeling; discrete- and continuous-time Kalman filter; smoothing; and applications in feedback control. Students learn through hands-on experience. Students cannot receive credit for this course and course 145. (Formerly Applied Mathematics and Statistics 218.) Enrollment restricted to graduate students. D. Milutinovic

### **246. Hybrid Dynamical Systems. S**

Examines the modeling and analysis of hybrid dynamical systems, including the modeling of hybrid systems, the concept of solutions, Zeno behavior, equilibrium sets, stability, convergence, Lyapunov-based conditions, robustness, and simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. Prerequisite(s): course 241. Enrollment restricted to graduate students. R. Sanfelice

### **247. Advanced Feedback Control Design.**

Advanced methods for the design of control algorithms for systems with nonlinearities, input constraints, network actuators/sensors, and intermittent availability of information. Modeling of nonlinear systems, Lyapunov stability, feedback redesign, nonlinear

damping, control-Lyapunov functions, gain scheduling, passivity, network control, self- and event-triggered control, hybrid feedback control. Students validate analytical results using tools for numerical simulation of control systems. Prerequisite(s): courses 241 and 242. Enrollment is restricted to graduate students. R. Sanfelice

### **248. Games in Design and Control. \***

Graduate-level introduction to game theory and its applications to system design, verification, analysis, and optimal control. Enrollment restricted to graduate students. Computer Science 101, 201, or equivalent recommended. The Staff

### **249. Introduction to Cyber-physical Systems. W**

Presents the basic concepts and tools for the study of cyber-physical systems, including modeling and analysis tools for continuous-time and discrete-time systems, finite state machines, stateflow, timed and hybrid automata, concurrency, invariants, linear temporal logic, verification, and numerical simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. The course is self-contained. Students are expected to have a basic background in logic circuits, programming, the mathematical modeling of dynamical systems (course 8 is recommended), differential equations, linear algebra, and basic calculus. Knowledge of MATLAB/Simulink is useful. Students cannot receive credit for this course and course 149. Prerequisite(s): courses 100/L or equivalent, and courses 13/L or equivalent. R. Sanfelice

**250. Multimedia Systems. \***

Study of state-of-the-art technology for networked multimedia systems. Topics include audio, image, and video acquisition and compression standards (JPEG, MPEG, and ITU families); networking for multimedia; and digital television. Proficiency in C or C++ required. Prerequisite(s): Enrollment restricted to graduate students. The Staff

**251. Error-Control Coding. \***

Overview of coding to protect messages against error during transmission or storage. Topics include channel models, linear algebra over finite fields, linear block codes and bounds, cyclic codes (BCH and RS), decoding algorithms, spectral analysis, codes on graphs, and low-complexity algorithms. Enrollment restricted to graduate students or consent of instructor. The Staff

**252A. Computer Networks. F**

Issues resulting from organizing communication among autonomous computers. Includes network models and switching techniques; medium access control protocols and local area networks; error control and retransmission strategies; routing algorithms and protocols; congestion control mechanisms and end-to-end protocols; application-level protocols; and application of concepts to wireless and wireline networks, with emphasis on the Internet. Enrollment restricted to graduate students. A. Varma

**252B. Principles of Computer Communication. \***

Theory and practice of computer communication networks. Emphasis is on verification and performance analysis of network control processes. Topics include protocols for channel access, point-

to-point and multipoint reliable transmission, routing, congestion control, network management, multicasting, and ATM networks. (Formerly Modeling of Communications Protocols.) Prerequisite(s): courses 107 and 252A. J. Garcia-Luna-Aceves

**253. Network Security. \***

Fundamental mechanisms for network security and their application in widely deployed protocols. In-depth treatment of security mechanism at the data-link, network, and transport layers for both wired and wireless networks. Covers mechanisms for privacy and integrity, and methods for intrusion detection. Prerequisite(s): course 252A and Computer Science 201. Enrollment restricted to graduate students. The Staff

**254. High Speed Computer Networks. \***

Fiber-optic technology; fiber-optic link design; network protocol concepts; coding and error control; high-speed local area and metropolitan area networks; gigabit networks; error and congestion control; photonic networks; research topics. Prerequisite(s): course 252B. The Staff

**256. Design Project in Computer Networks. \***

Students develop a working implementation of a network protocol with the goal of obtaining hands-on experience in implementing real-world network protocols. Prerequisite(s): course 252A; enrollment restricted to graduate students. The Staff

**257. Wireless and Mobile Networks. S**

An interdisciplinary course on wireless communication and mobile computing. Covers the physical aspects of wireless communication

but emphasizes higher protocol layers. Topics include cellular networks, packet radio and ad hoc networks, wireless transport protocols, security, and application-level issues. Prerequisite(s): course 252A or permission of instructor. Enrollment limited to 20. K. Obraczka

**258. Unix Networking Internals. \***

In-depth treatment of the implementation of network protocols in typical open-source Unix systems. Topics include implementation of send and receive functions, buffer management, interrupt handling, locking, scheduling and timer management. Major implementation project required. Prerequisite(s): course 252A. Computer Science 111 recommended. Enrollment restricted to graduate students. The Staff

**259. Sensor Networks. \***

Focus is on the networking aspects of sensor networks: protocols at the various layers and how they answer the specific requirements posed by these networks (e.g., data driven, energy efficient, etc.) and their applications (monitoring, tracking, etc.). Explore how physical layer and hardware issues may influence protocol design. Courses 252A and 257 recommended. The Staff

**263. Data Compression. \***

Introduction to information theory and data compression. Lossless coding (Huffman, arithmetic, dictionary codes). Lossy coding (scalar and vector quantization, differential coding, transform coding). Applications to the compression of real data sets (DNA sequences, biological time series, multimedia streams). Concurrent lectures with course 108. Students cannot receive credit for both this course and course 108. Students

## Computer Engineering

must have basic knowledge of probability theory. Enrollment restricted to graduate students. The Staff

### **264. Image Analysis and Computer Vision. W**

Brief review of image processing. Binary images, thresholding, morphological operations; edge detection and segmentation; contours: digital curves and curve fitting; statistical texture analysis, shape from texture; depth cues, stereo matching, depth from stereo; color perception and segmentation; and shading and image radiance, surface orientation, and shape from shading. Electrical Engineering 264 encouraged, but not required. Undergraduate students who are interested in enrolling should meet with the instructor first. R. Manduchi

### **277. Graph Algorithms. S**

Explores graph theory and algorithms for solving problems in engineering. A review of basic graph concepts and algorithms is followed by topics in network flow, partitioning, spectral analysis of graphs, graph isomorphism, and intractability. Prerequisite(s): Computer Science 101 and 102; or course 177; or Computer Science 201; or equivalent. Enrollment restricted to graduate students. Enrollment limited to 20. M. Schlag

### **280C. Seminar on Control (2 credits). F,W,S**

Weekly seminar series covering topics of current research in theory and application of control to engineering systems. Current research work and literature in these areas discussed. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. May be repeated for credit. R. Sanfelice, D. Milutinovic, G. Elkaim

### **280G. VLSI/CAD Seminar (2 credits). F,W,S**

Weekly seminar on advanced topics in VLSI and computer-aided design (CAD). Students present and discuss modern issues in semiconductor design, fabrication, and CAD. Frequent guest speakers present pertinent results from industry and academia. Enrollment limited to 20. May be repeated for credit. M. Guthaus

### **280N. Seminar on Networks (2 credits). \***

Weekly seminar series covering topics of current research in networks and networked systems. Current research work and literature in these areas are discussed. Prerequisite(s): permission of instructor. Enrollment restricted to graduate students. May be repeated for credit. K. Obraczka, J. Garcia-Luna-Aceves

### **280P. Seminar on Parallel Processing (2 credits). \***

Weekly seminar series covering topics of current research in parallel systems, architectures, and algorithms. Current research work and literature in these areas are discussed. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. The Staff

### **280T. Seminar on New Technologies (2 credits). \***

Weekly seminar series in which distinguished speakers from industry, universities, and government discuss current developments in networking and computer technology. The emphasis is on open research questions that may lead to collaborative work with faculty and graduate students. The Staff

### **280V. Seminar on Computer Vision (2 credits). F,W,S**

Weekly graduate-level seminar series discussing advanced topics in computer vision and image analysis. Current research and literature presented during each meeting. Enrollment limited to 20. May be repeated for credit. R. Manduchi

### **285. Technical Writing for Engineering Graduates. \***

Writing skills development for graduate engineers. Students produce a major writing project with many subtasks. Exercises includes fellowship application; mathematical and algorithmic description; use of tables and graphs; experiment description; and producing technical web sites, presentations, and posters. Enrollment restricted to graduate biomolecular engineering, computer engineering, computer science, and electrical engineering majors. (Open to all School of Engineering graduate students.) Enrollment limited to 20. The Staff

### **290L. Advanced Topics in VLSI Computer-Aided Design. \***

A graduate course on a research topic in VLSI computer-aided design. Topic varies according to instructor. Possible topics include, but are not limited to specification languages and formal verification, logic minimization, testing and verification, electrical simulation, layout synthesis, and behavioral synthesis. Course 100, 125, 126, 222, or 225 recommended. The Staff

### **290M. Topics in Parallel Computation. \***

Investigates selected topics in applied parallel computation. Topics may include numerical methods, artificial intelligence and machine learning algorithms, graphics and image processing,

## Computer Engineering

systolic algorithms, and the interplay between hardware and algorithms. Students are encouraged to investigate and discuss the parallelization of their own research. Enrollment restricted to graduate students. The Staff

### **290N. Topics in Computer Performance. \***

Selected topics of current interest in the area of computer system performance. Subjects may include aspects of large systems, performability, computer networks, storage subsystems, and nontraditional approaches and are subject to periodic revision. Enrollment restricted to graduate students. The Staff

### **290V. Advanced Topics in Visual Computing. \***

Advanced course in image analysis and computer vision. Topics include motion analysis, multiple view geometry, 3D reconstruction, image-based rendering, vision-

based graphics, face detection and recognition, tracking, image and video retrieval, and human-computer interface. Enrollment restricted to seniors and graduate students. Enrollment limited to 20. The Staff

### **293. Advanced Topics in Computer Engineering. \***

A graduate seminar on a research topic in computer engineering which varies according to instructor. Possible topics include, but are not limited to, communication networks, data compression, special-purpose architectures, computer arithmetic, software reliability and reusability, systolic arrays. The Staff

### **296. Masters Project (2 credits). F,W,S**

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate

students. May be repeated for credit. The Staff

### **297. Independent Study or Research. F,W,S**

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. The Staff

### **299. Thesis Research. F,W,S**

Thesis research conducted under faculty supervision. Students submit petition to sponsoring agency. The Staff

### **299F. Thesis Research (2 credits). F,W,S**

Independent study or research under faculty supervision. Enrollment restricted to graduate students. Recommended for part-time students. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### PROGRAM DESCRIPTION

---

---

Computer science is the study of the theoretical and practical aspects of computer technology and computer usage. The Computer Science (CMPS) Department offers courses on a wide range of topics, many of which include a mathematical component, and offers undergraduate bachelor of arts and bachelor of science degrees in computer science, as well as the master of science and doctor of philosophy degrees. Besides offering instructional courses, the department engages in a substantial research program in which both advanced undergraduates and graduate students participate.

The bachelor of arts (B.A.) program at UCSC is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including many courses outside of science and engineering, or even for a double major in another discipline. The bachelor of science (B.S.) program is appropriate for students desiring a somewhat stronger concentration in the sciences, with more courses in computer science and computer engineering, as well as courses in physics or chemistry; this program also allows for electives outside of science and engineering.

Because many courses in both programs have prerequisites, students leaning toward any of these programs will enjoy greater scheduling flexibility if they begin some preparatory courses in their first year. The specific course requirements for each undergraduate degree are given below.

Applications of computer science are found in many other areas of study, from art and music to business and science. Thus, interdisciplinary activities are encouraged. For those students whose primary interest is in another area, a minor in computer science is offered.

These include CMPS 10, Introduction to Computer Science; CMPS 17, Social Networks; CMPS 80J, Technology Targeted at Social Issues; and CMPS 80S, From Software Innovation to Social Entrepreneurship. CMPS 10, Introduction to Computer Science, may be beneficial to students who are considering the major but have a limited background in computer science. There are also introductory programming classes intended for nonmajors: CMPS 5C, 5J, 5P, Introduction to Programming (in the C, Java, and Python languages).

---

### COMPUTER SCIENCE POLICIES

---

#### DECLARATION OF THE COMPUTER SCIENCE MAJORS

---

Admission to the computer science majors is selective. First-year applications may receive direct admission at the time they apply to UCSC based on their high school record and test scores. Admission to the major after a student has entered UCSC is based on the grades received in all foundation courses (see below) attempted at UCSC and will be considered no sooner than the student's second quarter. A cumulative GPA of at least 2.80 in these courses is required for declaration of computer science majors (Computer Science B.S. and Computer Science B.A.). At most one unsuccessful attempt (grade C-, D+, D, F, or NP) for a foundation course is permitted. In addition to this GPA requirement, after the first three quarters, students must have completed the foundation courses (listed below) and be able to complete the major within campus limits in order to be eligible to declare a computer science major. Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Office, addressed to the Computer Science Undergraduate Director, describing why the prior performance is not an accurate reflection of the student's potential. Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the

---

### COURSES FOR NONMAJORS

---

The Computer Science Department offers a wide range of courses intended for nonmajors as well as majors.

## Computer Science

student, college, and Office of the Registrar of the decision.

### FOUNDATION COURSES

---

The foundation courses for all computer science majors are as follows:

CMPS 12A/L (or Computer Engineering 13, or both CMPS 5J and CMPS 11) and 12B/M; Computer Engineering 16; and Mathematics 19A and 19B, or 20A and 20B, or 11A and 11B. CMPS 13H/L may be used instead of both CMPS 12A/L and 12B/M.

UCSC students that have completed three or more quarters at UCSC must complete the foundation courses before they can declare a computer science major.

### HONORS IN THE MAJORS

---

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

---

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Refer to major program statements for details.

### LETTER GRADE POLICY

---

Please refer to the School of Engineering section of the catalog (subheading: *Letter Grade Policy*).

### TRANSFER STUDENTS

---

Most courses in the computer science program at UCSC have a strong theoretical component to prepare the student for designing, as opposed to simply using, computer systems. Often, courses taken at other institutions which emphasize applications of current languages and computers do not count toward the computer science major at UCSC.

At UCSC, students are first introduced to programming using the programming language Java. The core programming sequence, courses 12A/L and 12B/M (or 13H/L, which covers both 12A/L and 12B/M), exposes students to both Java and C. Many upper-division courses that involve programming use the C and C++ programming languages. Transfer students who are not familiar with both Java and C may need to take a remedial course. Students familiar with C++ and Unix

should find the transition to Java and C relatively simple.

Transfer students must have completed all of the foundation courses listed above, or their articulated equivalents. A student lacking one foundation course may be admitted if they have completed at least one of CMPE 12/L or Physics 5A/L. It is highly recommended that all transfer students in computer science complete these two courses prior to admission.

Additional information on SOE policies can be found on the web at: <http://ua.soe.ucsc.edu/policies-forms/>.

### SCHOOL OF ENGINEERING POLICIES

---

Please refer to the School of Engineering section of the catalog (subheading: *Admission to School of Engineering Majors*) for additional policies that apply to all School of Engineering programs. These policies include admission to the major and the need for computer science students to obtain preapproval before taking courses elsewhere.

### PREPARATION FOR THE MAJOR

---

It is recommended that high school students intending to apply to the computer science major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare a student for the computer science major.

### PROGRAM LEARNING OUTCOMES FOR B.S. OR B.A. DEGREE

---

Recipients of a Bachelor of Science or Bachelor of Arts degree in Computer Science at UCSC are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas:
  - Algorithms, data structures, and complexity
  - Programming languages and compilers
  - Software engineering and development
  - Computer hardware and architecture
2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
3. Apply problem-solving skills and the knowledge of computer science to solve real problems.

## Computer Science

4. Understand how technological advances impact society and the social, legal, ethical and cultural ramifications of computer technology and their usage.

5. Write about and orally communicate technical material about computer science and computer systems, broadly conceived.

---

## B.A. MAJOR REQUIREMENTS

---

The aim of this program is to expose students to a rigorous curriculum in computer science while maintaining sufficient flexibility so that students can take courses outside computer science, pursue a minor in another discipline, or complete a double major. Every student must complete a minimum of 15 courses, 7 lower-division and 8 upper-division. Out of these, the 7 lower-division courses and the first upper-division course are required preparatory courses for every student. Once these preparatory courses are completed, students tailor their own program by choosing 7 additional upper-division elective courses.

---

### LOWER-DIVISION REQUIREMENTS

---

Each student must successfully complete the following seven required preparatory courses:

#### **Computer Science**

CMPS 12A/L, Introduction to Programming(Accelerated)/Laboratory (or CMPS 5), Introduction to Programming in Java and CMPS 11, Intermediate Programming. Computer Engineering 13 may be taken as an alternative to CMPS 12A/L. CMPS 13H/L may be taken as an alternative to CMPS 12A/L and CMPS 12B/M)

CMPS 12B/M, Introduction to Data Structures/Laboratory (CMPS 13H/L may be taken as an alternative to CMPS 12A/L and CMPS 12B/M)

#### **Computer Engineering**

Computer Engineering 12/L, Computer Systems and Assembly Language/Laboratory

Computer Engineering 16, Applied Discrete Mathematics

#### **Mathematics**

Mathematics 19A and 19B, Calculus for Science, Engineering, and Mathematics (credit for one or both may be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination), or Mathematics 11A and 11B (Calculus with Applications), or Mathematics 20A and 20B, Honors Calculus

## **Applied Mathematics and Statistics**

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I or Mathematics 21, Linear Algebra

---

### UPPER-DIVISION REQUIREMENTS

---

All students in the major must complete the following course:

CMPS 101, Algorithms and Abstract Data Types

In addition to the above course (and the lower-division requirements, listed above), students must complete upper-division electives chosen as follows:

- complete three courses from the breadth list below;
- complete two additional computer science electives chosen from any 5-credit upper-division computer science course except those numbered 191-194 and 196-199;
- complete two additional 5-credit technical electives selected from the technical elective list below.

Complete the Disciplinary Communication requirement given below. At least 50 percent of these upper-division courses must be completed at UCSC.

#### **Breadth List (complete at least three)**

CMPS 102, Introduction to Analysis of Algorithms

CMPS 104A, Compiler Design

CMPS 111, Operating Systems

CMPS 112, Comparative Programming Languages

CMPS 115, Software Methodology

CMPS 122, Computer Security

CMPS 140, Artificial Intelligence

CMPS 160/L, Computer Graphics / Laboratory

CMPS 180/CMPS 180W, Database Systems I

Computer Engineering 110, Computer Architecture

#### **Technical Elective List (complete at least two)**

Any 5-credit upper-division course offered by the Baskin School of Engineering except those numbered 191 through 194 and 196 through 199.

Any 5-credit upper-division course from the Division of Physical and Biological Sciences except those numbered 190 and above.

Art 118, Computer Art: Theories, Methods, and Practices

Art 120/121, Advanced Projects in Computer Art I/II

Economics 100M, Intermediate Microeconomics, Math Intensive

Economics 100N, Intermediate Macroeconomics, Math Intensive

## Computer Science

Economics 101, Managerial Economics  
Environmental Studies 115A/L, Geographic Information Systems  
Film and Digital Media 170A, Fundamentals of Introduction to Digital Media Production  
Film and Digital Media 177, Digital Media Workshop: Computer as Medium  
Linguistics 112/113/114, Syntax I/II/III  
Linguistics 116/118, Semantics II/III  
Linguistics 125, Foundations of Linguistic Theory  
Music 123, Electronic Sound Synthesis  
Music 124, Intermediate Electronic Sound Synthesis  
Music 125, Advanced Electronic Sound Synthesis  
**DISCIPLINARY COMMUNICATION (DC) REQUIREMENT**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in computer science (B.A.) is satisfied by completing CMPS 115, CMPS 195, Computer Engineering 185, CMPS 132 and 132W, CMPS 185, or CMPS 180 and 180W. Some of these courses may also fulfill one of the upper-division electives listed above.

## B.S. MAJOR REQUIREMENTS

This program is designed for students who wish to maximize exposure to computer science concepts and methods by taking a larger selection of upper-division computer science courses, as well as additional courses in the sciences and mathematics. A minimum of 21 courses must be completed for the B.S. in computer science, whereas a minimum of 15 courses must be completed for the B.A. in computer science. Out of the 21 courses, 10 are lower-division courses (including two science courses), and 11 are upper-division courses. The B.S. is more structured than the B.A.; 17 specific courses are required, and the remaining four are elective upper-division computer science or computer engineering courses.

### LOWER- AND UPPER-DIVISION REQUIREMENTS

Students are required to take the following 18 courses:

#### **Computer Science**

CMPS12A/L Introduction to Programming (Accelerated)/Laboratory (or CMPS5J, Introduction to Programming in Java and CMPS11, Intermediate Programming. Computer Engineering 13/L may be taken as an alternative to CMPS 12A/L. CMPS 13H/L may be taken as an alternative to CMPS 12A/L and CMPS 12B/M)

CMPS 12B/M Introduction to Data Structures/Laboratory (CMPS 13H/L may be taken as an alternative to CMPS 12A/L and CMPS 12B/M)  
CMPS 101 Algorithms and Abstract Data Types  
CMPS 102 Introduction to Analysis of Algorithms  
CMPS 104A Fundamentals of Compiler Design I  
CMPS 111 Introduction to Operating Systems  
CMPS 112 Comparative Programming Languages  
CMPS 130 Computational Models

#### **Computer Engineering**

Computer Engineering 12/L Computer Systems and Assembly Language/Laboratory  
Computer Engineering 16 Applied Discrete Mathematics  
Computer Engineering 110 Computer Architecture, or Computer Engineering 112, Computer and Game Console Architecture

#### **Mathematics**

Mathematics 19A and 19B, Calculus for Science, Engineering, and Mathematics, or Mathematics 20A and 20B, Honors Calculus  
Mathematics 23A, Multivariable Calculus

#### **Applied Mathematics and Statistics**

Applied Mathematics and Statistics 10, Mathematical Methods for Engineers I; or Mathematics 21, Linear Algebra

Applied Mathematics and Statistics 131, Introduction to Probability Theory, or Computer Engineering 107, Probability and Statistics for Engineers

#### **Physics or Chemistry**

Either two physics or two chemistry courses, with their associated laboratories, from the following:

Physics 5A/L, Introduction to Physics I/Laboratory (or 6A/L); and either

Physics 5B/M, Introduction to Physics II/Laboratory (or 6B/M); or

Physics 5C/N, Introduction to Physics III/Laboratory (or 6C/N)

Chemistry 1A and 1B/M, General Chemistry/Laboratory; or

Chemistry 1A and 1C/N, General Chemistry/Laboratory.

#### **Additional Upper-Division Electives**

Four upper-division computer science or computer engineering courses with course number 190 or below, or CMPS 195. One of these courses may be replaced by one of the following upper-division mathematics courses:

## Computer Science

Applied Mathematics and Statistics 114, Introduction to Dynamical Systems;

Applied Mathematics and Statistics 131, Introduction to Probability Theory;

Applied Mathematics and Statistics 147, Computational Methods and Applications;

Mathematics 115, Graph Theory;

Mathematics 117, Advanced Linear Algebra;

Mathematics 126, Mathematical Control Theory;

Mathematics 148, Numerical Analysis.

### DISCIPLINARY COMMUNICATION (DC) REQUIREMENT

The DC Requirement in computer science (B.S.) is satisfied by completing CMPS 115, CMPS 195, Computer Engineering 185, CMPS 132 and 132W, CMPS 185, or CMPS 180 and 180W. These courses may also fulfill one of the upper-division electives listed above.

### COMPREHENSIVE REQUIREMENT FOR THE COMPUTER SCIENCE B.A. AND B.S.

In addition to the above B.A. or B.S. requirements, students in the computer science majors must satisfy one of the following two exit requirements: pass one of the capstone courses (see Capstone Courses below); or successfully complete a senior thesis.

#### CAPSTONE COURSES

Students may choose from one of the following capstone courses to satisfy their exit requirement:

CMPS 104B Fundamentals of Compiler Design II

CMPS 117 Software Design Project II

CMPS 161/L Introduction to Data Visualization and Laboratory

CMPS 165 Data Programming for Visualization

CMPS 181 Database Systems II

CMPS 183 Web Applications

Students taking one of the capstone courses will enroll normally. Students need to pass the capstone course to pass the exit requirement. No course may be attempted more than twice without prior approval from the chair of the department offering the course. Withdrawals count as an attempted class for this purpose.

#### SENIOR THESIS

The senior thesis consists of a self-contained project within the broad scope of computer science, but one that is not available in the regular course offerings. A student wishing to complete a senior thesis must

successfully complete a minimum of 5 credits in CMPS 195, Senior Thesis Research. The supervision of a senior thesis student is always at the discretion of the faculty member. The student first submits a written thesis proposal and obtains approval of a faculty sponsor. Then the student submits a written draft and makes an oral presentation to a faculty examining committee. After receiving feedback from the examining committee, the student submits one or more additional drafts, until the final draft is approved by the examining committee. The total amount of writing shall be consistent with the campus disciplinary communication requirement. A passing grade in CMPS 195 is earned when the final thesis is approved.

### COMPUTER SCIENCE MAJOR PLANNERS

The following are four sample academic plans for first-year students as preparation for the computer science major. Plans One A and Two A are suggested guidelines for students who have some prior experience with programming. Plans One B and Two B are for students who are considering the major and have no prior programming experience. Students who plan carefully can still have several openings free to take other breadth courses they find interesting.

Plan One A, B.A. Degree			
Year	Fall	Winter	Spring
1st (frsh)	CMPS 10	MATH 19B	CMPS 12B/M
	MATH 19A	CMPS 12A/L	AMS 10
2nd (soph)	CMPE 12/L	CMPE 16	CMPS 101

Plan One B, B.A. Degree			
Year	Fall	Winter	Spring
1st (frsh)	AMS 3	MATH 19A	MATH 19B
	CMPS 10	CMPS 5J	CMPS 11
2nd (soph)	CMPS 12B/M	CMPE 16	CMPS 101
	AMS 10	CMPE 12/L	

## Computer Science

<b>Plan Two A, B.S. Degree</b>			
Year	Fall	Winter	Spring
1st (frsh)	CMPS 12A/L	CMPS 12B/M	CMPE 16
	MATH 19A	MATH 19B	MATH 23A
2nd (soph)	CMPS 101	CMPE 12/L	CMPS 102
	AMS 10	PHYS 6A/L	PHYS 6C/N

<b>Plan Two B, B.S. Degree</b>			
Year	Fall	Winter	Spring
1st (frsh)	CMPS 10	CMPS 5J	CMPS 11
	MATH 3	MATH 19A	MATH 19B
2nd (soph)	CMPS 12B/M	MATH 23A	CMPS 101
	AMS 10	PHYS 6A/L	PHYS 6C/N

## MINOR REQUIREMENTS

Twelve courses are required for the computer science minor. These courses are:

- Mathematics 11A and 11B or 19A and 19B or 20A and 20B;
- Applied Mathematics and Statistics 10 or Mathematics 21;
- CMPS 12A/L (or Computer Engineering 13/L, or both CMPS 5J and CMPS 11);
- CMPS 12B/M;
- Computer Engineering 16;
- CMPS 101;
- four additional upper-division computer science courses from a list of approved electives (see the department's curriculum chart for the computer science minor at <http://ua.soe.ucsc.edu/curriculum-charts/>).

Upper-division computer engineering and mathematics courses that generally apply toward the computer science major may not be applied toward the computer science minor. In addition, some upper-division computer science courses may not be applied toward the computer science minor. There is no comprehensive examination or senior thesis requirement for the minor.

## GRADUATE PROGRAMS

### PROGRAM DESCRIPTION

The Computer Science Department at UCSC offers both a master's program and a doctoral program in computer science, as well as a master's in games and playable media.

The goal of the computer science programs is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The master of science (M.S.) degree may be used as a terminal degree or as the first step toward the doctor of philosophy degree (Ph.D.). The student-faculty ratio is five to one, making it possible for students to receive individual attention and to pursue programs that fit their individual needs. The intellectual atmosphere is enriched by regular colloquia and seminars presented by eminent contributors to the field, many of whom are associated with other major universities and industrial research centers in Silicon Valley and the wider San Francisco Bay Area.

The goal of the M.S. in games and playable media is to prepare students to make professional contributions to the creation of games and other forms of media that invite and structure play. The degree is offered through the UC Santa Cruz location in Silicon Valley, making possible deep connection and collaboration with local industry and economic development groups. The curriculum includes deep engagement with game creation as well as a focus on professional development. Students can also take advantage of the strong course offerings in games and related technologies on the Santa Cruz campus, as well as make connections with the department's field-leading research groups. The M.S. in games and playable media is a four-quarter program that begins in fall quarter and ends in the following summer. Students are expected to complete coursework in one academic year, without leaves of absence.

The Computer Science Department enjoys a close relationship with the Computer Engineering and Electrical Engineering Departments, the Biomolecular Engineering Department, the Applied Mathematics and Statistics Department, Technology Management Department, and the new Computational Media Department.

Most computer science Ph.D. students are hired as teaching assistants helping with undergraduate courses, hired as research assistants working for computer science and other School of Engineering faculty, or awarded fellowships to pursue their research.

Additional information on the computer science graduate programs can be found on the department's web pages at [www.soe.ucsc.edu](http://www.soe.ucsc.edu).

## Computer Science

### REQUIREMENTS FOR THE COMPUTER SCIENCE MASTER'S DEGREE: PROJECT TRACK

#### Course Requirements

---

Each student is required to take 40 credits as follows:

- Computer Science 200, Research and Teaching in Computer Science and Engineering, 3 credits
- Computer Science 201, Analysis of Algorithms, 5 credits
- Computer Science 203, Programming Languages, 5 credits
- Computer Science 296, Master's Project, 2 credits
- a base requirement in computer architecture must be met by taking Computer Engineering 110 (grade B or higher) or Computer Engineering 202. Computer Engineering 110 can be taken to meet the architecture requirement, however, the credits will not be counted toward graduation requirements
- one course each from three different breadth categories for a total of three courses (15 credits)—see [www.cs.ucsc.edu/graduates/breadth/](http://www.cs.ucsc.edu/graduates/breadth/)
- all remaining courses must be regular, 5-credit graduate courses from computer science; courses that do not count include all courses numbered 200, 280, 296, 297, and 299
- at least 25 credits must be in computer science
- upper-division undergraduate UCSC computer science courses may be taken to strengthen a student's preparation for graduate studies. At most, 10 credits of UCSC upper-division undergraduate computer science courses (other than CMPS 101) may be counted toward the degree requirements.
- with the exception of 200, 280, 296, 297, and 299, all graduate courses and upper-division courses must be taken for letter grade. Only courses with a letter grade of B- or higher can be counted towards the M.S. degree requirements.
- courses that are taken to satisfy an undergraduate degree requirement cannot be counted towards the M.S. degree requirements. Undergraduates who are in their senior year at UCSC and are taking computer science upper-division courses or computer science graduate courses that are beyond their undergraduate degree requirements can count those courses as part of their M.S. degree should they apply to the computer science M.S. program.
- courses from other institutions may be substituted for equivalent courses at UCSC (with the approval of the graduate advisor and graduate committee) but may not count toward the 40-credit requirement of the computer science M.S. degree. For example, a

student may substitute an equivalent course for CMPS 201 but may not count that course toward the 40-credit requirement. As another example, a student may substitute an equivalent graduate course for CMPS 260 and count that as breadth but may not count that course toward the 40-credit requirement or as part of the 25 credits from computer science.

Each student must complete CMPS 200 in their first year.

Each student must complete CMPS 201 or a course to prepare the student for CMPS 201 in their first year, after which CMPS 201 should be completed by the end of the second year.

Each student must complete CMPS 203 or a course to prepare the student for CMPS 203 in their first year, after which CMPS 203 should be completed by the end of the second year.

Each student must complete Computer Engineering 110 or Computer Engineering 202 in their first year.

#### Project

---

Completion of a master's project is required for the master's degree. In consultation with the adviser, the student forms a master's project reading committee of at least two faculty members, each of whom is provided a copy of the project report. The final project must be accepted by the review committee before the award of the master of science degree.

### REQUIREMENTS FOR THE COMPUTER SCIENCE MASTER'S DEGREE: THESIS TRACK

#### Course Requirements

---

Each student is required to take 43 credits as follows:

- Computer Science 200, Research and Teaching in Computer Science and Engineering, 3 credits;
- Computer Science 201, Analysis of Algorithms, 5 credits;
- Computer Science 203, Programming Languages, 5 credits;
- Computer Science 299, Thesis Research, 5 credits;
- a base requirement in computer architecture must be met by taking Computer Engineering 110 (grade B or higher) or Computer Engineering 202. Computer Engineering 110 can be taken to meet the architecture requirement, however, the credits will not be counted toward graduation requirements;
- one course each from three different breadth categories for a total of three courses (15 credits)—see [www.cs.ucsc.edu/graduates/breadth/](http://www.cs.ucsc.edu/graduates/breadth/)

## Computer Science

- all remaining courses must be regular, 5-credit graduate courses from computer science courses that do not count include all courses numbered 200, 280, 296, 297, and 299
- at least 25 credits must be in computer science
- upper-division undergraduate UCSC computer science courses may be taken to strengthen a student's preparation for graduate studies. At most, 10 credits of UCSC upper-division undergraduate computer science courses (other than CMPS 101) may be counted toward the degree requirements.
- with the exception of 200, 280, 296, 297, and 299, all graduate courses and upper-division courses must be taken for letter grade. Only courses with a letter grade of B- or higher can be counted toward the M.S. degree requirements.
- courses that are taken to satisfy an undergraduate degree requirement cannot be counted toward the M.S. degree requirements. Undergraduates who are in their senior year at UCSC and are taking computer science upper-division courses or computer science graduate courses that are beyond their undergraduate degree requirements can count those courses as part of their M.S. degree should they apply to the computer science M.S. program.
- courses from other institutions may be substituted for equivalent courses at UCSC (with the approval of the graduate advisor and graduate committee) but may not count towards the 40-credit requirement of the computer science M.S. degree. For example, a student may substitute an equivalent course for CMPS201 but may not count that course towards the 40-credit requirement. As another example, a student may substitute an equivalent graduate course for CMPS2 60 and count that as breadth but may not count that course toward the 40-credit requirement or as part of the 25 credits from CMPS

Each student must complete CMPS 200 in their first year.

Each student must complete CMPS 201 or a course to prepare the student for CMPS 201 in their first year, after which CMPS 201 should be completed by the end of the second year.

Each student must complete CMPS 203 or a course to prepare the student for CMPS 203 in their first year, after which CMPS 203 should be completed by the end of the second year.

Each student must complete Computer Engineering 110 or Computer Engineering 202 in their first year.

## Thesis

---

Completion of a master's thesis is required for the master's degree. To fulfill this requirement, the student submits a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the thesis adviser. In consultation with the adviser, the student forms a master's thesis reading committee with at least two additional faculty members, each of whom is provided a copy of the proposal. The student presents an expository talk on the thesis research, and the final thesis must be accepted by the review committee before the award of the master of science degree.

## REQUIREMENTS FOR THE PH.D. DEGREE

### Course Requirements

---

Each student is required to take 58 credits as follows:

- CMPS 200, Research and Teaching in Computer Science and Engineering, 3 credits;
- CMPS 201, Analysis of Algorithms, 5 credits;
- CMPS 203, Programming Languages, 5 credits;
- a base requirement in computer architecture must be met by taking Computer Engineering 110 or Computer Engineering 202 or equivalent elsewhere (approval required); Computer Engineering 110 can be taken to meet the architecture requirement, however, the credits will not be counted toward degree requirements;
- one course each from three different breadth categories for a total of three courses (15 credits)—see [www.cs.ucsc.edu/graduates/breadth/](http://www.cs.ucsc.edu/graduates/breadth/);
- up to 10 credits of course 297, Independent Study or Research; or course 299, Thesis Research;
- all remaining courses must be regular, 5-credit graduate courses from: computer science, within the School of Engineering (with adviser's approval); or outside the School of Engineering (with adviser's and grad director's approval); courses that do not count include all courses numbered 200, 280, 296, 297, and 299;
- at least 33 credits must be in computer science;
- graduate courses (not seminars) in related disciplines outside the list of approved graduate courses may be substituted, when necessary to strengthen a student's preparation for graduate studies, with prior approval from the adviser and the graduate director. Course selection should form a coherent plan of study and requires adviser approval. Undergraduate courses may not be used to satisfy Ph.D. course requirements;

## Computer Science

- each student is required to complete at least one quarter of teaching assistantship. This requirement can be met after advancement to candidacy. Certain exceptions may be permitted for those with extensive prior teaching experience or those who are not allowed to be employed due to visa regulations.

Ph.D. students who have satisfied the requirements for the master's degree are eligible to receive a masters degree.

### Examinations and Dissertation

---

To continue in the Ph.D. program, students must pass a preliminary examination in their chosen research area by the end of their third year. Preliminary examinations are held during the first three weeks of each spring quarter; students must petition the computer science graduate committee for an examination in their chosen area two weeks before the end of winter quarter.

Examination committees consist of four faculty members, two chosen by the student and two by the computer science graduate committee. The format of this oral examination is up to the examination committee; the examination will typically evaluate both general knowledge of the chosen area and specific understanding of selected technical papers. The preliminary examination requirement is waived for students who advance to candidacy by the end of their third year.

Each student writes a Ph.D. dissertation. The dissertation must show the results of in-depth research, be an original contribution of significant knowledge, and include material worthy of publication. Where appropriate, research internships with companies, government labs, or elsewhere are recognized (and may be required) as an integral part of the research leading to the dissertation. As the first step, a student submits a written dissertation proposal to a School of Engineering faculty member. By accepting the proposal, the faculty member becomes the dissertation supervisor. The dissertation proposal is publicly and formally presented in an oral qualifying examination given by a qualifying examination committee, approved by the graduate committee. The student must submit his or her written dissertation proposal to all members of the committee and the graduate assistant one month in advance of the examination.

Students are advanced to candidacy after they have completed the course requirements, passed the qualifying examination, cleared all Incompletes from their records, have an appointed dissertation reading committee, and paid the filing fee. Students who have

not advanced to candidacy by the end of their fourth year will be placed on academic probation.

Each Ph.D. candidate submits the completed dissertation to a reading committee at least one month prior to the dissertation defense. The appointment of the dissertation reading committee is made immediately after the qualifying examination and is necessary for advancing to candidacy. The candidate presents his or her research results in a public seminar sponsored by the dissertation supervisor. The seminar is followed by a defense of the dissertation to the reading committee and attending faculty, who will then decide whether the dissertation is acceptable or requires revision. Successful completion of the dissertation fulfills the final academic requirement for the Ph.D. degree.

### Transfer Credit

---

Up to three School of Engineering courses fulfilling the degree requirements of either the M.S. or Ph.D. degrees may be taken before beginning the graduate program through the concurrent enrollment program.

Ph.D. students who have previously earned a master's degree in a related field at another institution may substitute courses from their previous university with approval of the adviser and the graduate committee.

Courses from other institutions may not be applied to the M.S. degree course requirements.

Petitions should be submitted along with the transcript from the other institution or UCSC extension. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

### Review of Progress

---

Each year, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time computer science students must complete course 201, Computer Engineering 202, and course 203 within two years and normally must complete all course requirements within two years for the M.S. and three years for the Ph.D.

## Computer Science

Ph.D. students who have not advanced to candidacy by the end of their fourth year will be placed on academic probation.

Students receiving two or more unsatisfactory grades (U or letter grade below B-) in the School of Engineering (SoE) courses are not making adequate progress and will be placed on academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment.

Should any computer science graduate student fail a School of Engineering course while on probation, the Computer Science Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

---

## COMPUTER SCIENCE FACULTY AND PROFESSIONAL INTERESTS

---

### PROFESSOR

---

#### **Martín Abadi, Emeritus**

#### **Dimitris Achlioptas**

Analysis of algorithms, machine learning, random structures

#### **Luca de Alfaro**

Reputation systems, crowdsourcing, game theory, formal methods

#### **Scott A. Brandt**

Operating systems, storage systems, real-time systems

#### **James E. Davis**

Information and Communication Technologies for Development (ICTD), technology for global social issues, human computation, computational photography, computer vision, computer graphics

#### **Cormac Flanagan**

Programming languages, computer security, web programming, concurrency, verification, type systems, dynamic analysis

#### **Lise Getoor**

Machine learning, reasoning under uncertainty, analysis of graphs and networks, artificial intelligence, databases, information integration, visual analytics, data science

#### **David P. Helmbold**

Machine learning, computational learning theory, analysis of algorithms

#### **Harry D. Huskey, Emeritus**

#### **Phokion G. Kolaitis**

#### **Baskin Distinguished Professor**

Principles of database systems, logic in computer science, and computational complexity

#### **Robert A. Levinson, Emeritus**

#### **Suresh K. Lodha**

Data analytics and visualization, vision, innovation, technology for social good

#### **Darrell D. E. Long**

#### **Kumar Malavalli Endowed Chair in Storage Systems**

Data storage systems, distributed computing, operating systems, performance evaluation, reliability, cyber security, data science, multimedia

#### **Charles E. McDowell**

Programming languages, parallel computing, and computer science education

#### **Ethan L. Miller,**

#### **Symantec Presidential Chair for Storage and Security**

Archival storage; non-volatile memory and next-generation storage; storage security and reliability; file system metadata and search, computer security; scalable and distributed systems

#### **Alex T. Pang**

Uncertainty visualization, tensor visualization, scientific visualization, comparative visualization, collaboration software, virtual reality interfaces

#### **Ira Pohl, Emeritus**

#### **Wang-Chiew Tan**

Data management, data integration and exchange, data provenance, crowdsourcing, and scientific databases

#### **R. Michael Tanner, Emeritus**

#### **Allen Van Gelder**

Logic programming algorithms, parallel algorithms, complexity, programming languages, automated theorem proving, scientific visualization

#### **S.V.N. Vishwanathan**

Analysis of algorithms, optimization for machine learning, structural prediction

#### **Marilyn Walker (joint with Computational Media)**

Dialogue systems, natural language processing, computer games, human-computer interaction, machine learning, artificial intelligence

## Computer Science

### **Manfred K. Warmuth**

Online learning, machine learning, statistical decision theory, game theory, analysis of algorithms

ASSISTANT PROFESSOR

---

### **Seshadhri Comandur**

Sublinear algorithms, theoretical foundations for massive data, social network analysis

**Acting Assistant Professor**

### **Peter Alvaro**

Data management systems, distributed systems, logic programming

**Visiting Professor**

### **Neoklis Polyzotis**

Databases, online database turning, crowdsourcing, and scientific data management

ADJUNCT PROFESSOR

---

### **Carlos Maltzahn**

Scalable file system data and metadata management, storage Quality of Service (QoS), data management games, network intermediaries, information retrieval and cooperation dynamics

### **Linda Werner**

Software engineering, computer science education, children and computer game creation, testing, increasing diversity in computer science

**Associate Adjunct**

### **Balder ten Cate**

Data management, logic, algorithms, and complexity

### **Thomas Schwarz**

Reliability and security in storage systems

**Lecturer**

### **Wesley Mackey**

Compiler construction, programming languages

### **Patrick Tantalo**

Graph theory, combinatorics, optimization, algorithms

### **Lawrence Andrews (Film and Digital Media)**

Documentary, sound, animation, installation

### **Alexandre Brandwajn, Emeritus (Computer Engineering)**

### **Pak K. Chan, Emeritus (Computer Engineering)**

### **Gabriel Elkaim (Computer Engineering)**

Embedded systems; robust software architectures for real-time reactive systems; sensor fusion; guidance, navigation, and control (GNC) system identification; robust and advanced control schemes; feedback control systems; robotics; unmanned autonomous vehicles (UAVs); and cooperative control

### **F. Joel Ferguson (Computer Engineering)**

Fault diagnosis, failure analysis, logic fault modeling, digital test pattern generation, design-for-test of digital circuits and systems

### **J. J. García-Luna-Aceves (Computer Engineering; Technology Management)**

### **Jack Baskin Chair of Computer Engineering**

Principles of computer communication, Internet, mobile and pervasive computing, wireless networks, information centric networks, network science

### **David Haussler (Biomolecular Engineering)**

Bioinformatics, genomics, computational genomic data analysis, molecular evolution and comparative genomics, genomic and clinical data sharing and standards, cancer genomics, neurodevelopment, stem cell research, immunogenomics, information theory, pattern recognition, machine learning, artificial intelligence, information theory, theoretical computer science

### **Richard Hughey (Biomolecular Engineering; Computer Engineering)**

Computer architecture, parallel processing, computational biology

### **Arnav Jhala (Computational Media)**

Artificial Intelligence: storytelling in games, intelligent machinima generation, smart graphics, and intelligent user interfaces

### **Kevin Karplus (Biomolecular Engineering)**

Genome assembly from next-generation sequence data (Formerly protein structure prediction), signal processing and statistics for nanopore signals

### **Tracy Larrabee (Computer Engineering)**

Test-pattern simulation and generation, fault modeling, fault diagnosis, design verification, technical writing, logic simulation

### **Patrick E. Mantey (Computer Engineering; Technology Management)**

### **Jack Baskin Chair of Computer Engineering**

Multimedia systems, digital signal processing, sensor systems and networks, real-time monitoring and control, image systems, image processing, visualization, geographic information systems, decision support systems

### **Michael Mateas (Computational Media)**

Artificial Intelligence (AI) for art and entertainment, game AI, AI and creativity, AI-based interactive storytelling, autonomous characters

### **Katia Obraczka (Computer Engineering)**

Computer networks, distributed systems, operating systems, Internet information systems, mobile computing, wireless networks

**Warren Sack (Film and Digital Media)**

Software design and media theory

**Martine D. F. Schlag (Computer Engineering)**

VLSI design tools and algorithms, VLSI theory, field-programmable gate arrays, FPGA-based computing engines

**Barry Sinervo (Ecology and Evolutionary Biology)**

Animal behavior, evolution, physiological ecology

**Anujan Varma (Computer Engineering)**

Computer networking, computer architecture, optical networks

**Noah Wardrip-Fruin (Computational Media)**

Digital media, computer games, electronic literature, software studies

**E. James Whitehead Jr. (Computational Media)**

Software engineering, software evolution, software bug prediction, level design in computer games, procedural content generation

**W. Todd Wipke, Emeritus (Chemistry and Biochemistry)**

---

## COMPUTER SCIENCE COURSES

---

### LOWER-DIVISION COURSES

---

**2. Computer Literacy.**

Introduction to how computers work and how to use them. Topics covered include network information systems, text editors, formatting, file and directory system, spreadsheets and databases. Computers as symbol manipulation devices. Introduction to programming concepts and computer languages. Impact of computers on society. Designed for students with little or no experience using computers. Preference is given to students who have not taken other computer engineering or computer science courses. Students cannot receive credit for this course and Computer Engineering 3. (General Education Code(s): PE-T, IN.) N. Polyzotis, The Staff

**5C. Introduction to Programming in C/C++.**

Students learn programming and documentation skills as well as algorithmic problem-solving and programming methodologies. Introduces computers, compilers, and editors. Students write small to medium-sized programs. No prior programming experience required, but a mathematics background at the pre-calculus level is assumed. This course and courses 5J and 5P cover similar concepts, but use different programming languages.

This course is recommended for students that have a specific desire or need to learn C/C++; others are encouraged to consider taking course 5P or 5J which use languages that provide a gentler introduction to programming. (General Education Code(s): MF, IN.) C. McDowell, D. Long

**5J. Introduction to Programming in Java. F,W,S**

Introduces programming in Java for students who have no prior programming experience. Students learn programming and documentation skills, as well as algorithmic problem-solving, and programming methodologies. Introduces computers, compilers, and editors. Students write small to medium-sized programs. This course and courses 5C and 5P cover similar concepts, but use different programming languages. Because 5J followed by course 11 is a two-quarter alternative to the accelerated course 12A/L, engineering majors and students planning on continuing the programming sequence are encouraged to take 5J rather than 5C or 5P. Students may not receive credit for 5J taken concurrently or subsequently to course 12A, 12B, or Computer Engineering 13. (General Education Code(s): MF, IN.) P. Tantalio, D. Helmbold, C. McDowell

**5P. Introduction to Programming in Python. W,S**

Introduces programming in Python, a high-level programming language used in the physical and social sciences and for Internet scripting. Students learn programming and documentation skills, as well as algorithmic problem-solving, coding, and debugging methodologies. Students write programs to solve sample problems drawn from a wide range of disciplines, primarily in the sciences. No prior programming experience is required, but a mathematics background at the pre-calculus level is assumed. This course and courses 5C and 5J cover similar concepts, but use different programming languages. Students may not receive credit for course 5P after receiving credit for course 11, 12A, or Computer Engineering 13. (General Education Code(s): MF, IN.) D. Long, E. Miller

**10. Introduction to Computer Science. F,W,S**

An overview of the theory, foundations, and practice of computer science with emphasis on what computers can and cannot do, now and in the future. Topics include algorithms and data, correctness and efficiency of algorithms, hardware, programming languages, limitations of computation, applications, and

## Computer Science

social issues. No programming skills are required as a prerequisite. Major concepts and open problems in computer science are presented without reliance on sophisticated mathematical tools. Students cannot receive credit for this course after completing course 12B. (General Education Code(s): MF, IN.) The Staff, N. Whitehead, P. Tantalo, M. Walker, S. Lodha, C. McDowell, C. Flanagan

### **11. Intermediate Programming. W,S**

Continuation of course 5J. Covers basic object-oriented programming, event-driven programming, graphical user interface (GUI) creation, recursion, two-dimensional arrays. The two-quarter sequence courses 5J and 11 cover in two quarters the same material as the accelerated introductory course and lab 12A/L cover in one quarter. Students cannot receive credit this course and course 12A. Prerequisite(s): course 5J, and Mathematics 3 or 11A or 19A or Applied Mathematics and Statistics 3 or Applied Mathematics and Statistics/Economics 11A or a score of 400 or higher on the mathematics placement examination (MPE). (General Education Code(s): MF.) C. McDowell, P. Tantalo

### **12A. Introduction to Programming (Accelerated). F,W,S**

Accelerated introduction to programming. Students write medium-sized programs. Topics include: functions; conditionals and loops; classes; event-driven programming and graphic user interfaces (GUIs); recursion; and arrays. Students who have no or very limited programming experience should consider courses 5J and 11 which cover the same

material in two quarters. Students may not receive credit for both this course and course 11. Some prior programming experience in a language such as C, C++, Java, or C# strongly recommended. Prerequisite(s): Mathematics 3 or 11A or 19A or Applied Mathematics and Statistics 3 or Applied Mathematics and Statistics/Economics 11A, or a score of 400 or higher on the mathematics placement examination (MPE). Concurrent enrollment in 12L required. (General Education Code(s): IN.) N. Whitehead, W. Mackey, N. Polyzotis, D. Helmbold, C. Flanagan, A. Pang, C. McDowell, D. Long

### **12B. Introduction to Data Structures. F,W,S**

Teaches students to implement common data structures and the algorithms associated with each data structure, through progressively difficult exercises. Topics include big "O" notation; pointers, recursion (induction), and dynamic allocation; linked lists and list processing; stacks, queues, binary trees and binary search trees; simple sorting techniques and simple search techniques. Students will gain a working knowledge of the elements of the Java and C programming languages. Prior experience with Unix is assumed. Prerequisite(s): course 11 or 12A or Computer Engineering 13. Concurrent enrollment in course 12M required. (General Education Code(s): MF, IN.) N. Whitehead, W. Mackey, P. Tantalo

### **12L. Computer Programming Laboratory (2 credits). F,W,S**

Laboratory sequence complementing topics taught in course 12A by providing training and exposure to several software development tools and practices not covered in course 12A. In

addition, the lab provides an initial exposure to a second programming language to reinforce concepts from course 12A. Concurrent enrollment in course 12A is required. N. Whitehead, W. Mackey, N. Polyzotis, D. Helmbold, C. Flanagan, A. Pang, C. McDowell, D. Long

### **12M. Data Structures Laboratory (2 credits). F,W,S**

Complements course 12B, gaining additional competence with a number of important software development tools, languages, and techniques. Included are advanced Unix features and utilities such as grep, find, diff, the shell, and pipes; C programs utilizing I/O, arrays, pointers, and structures; a scripting language to perform simple text and file manipulation; and the make utility. Concurrent enrollment in course 12B required. N. Whitehead, W. Mackey, P. Tantalo

### **13H. Introduction to Programming and Data Structures (Honors). F**

Provides an accelerated introduction to programming and data structures. Includes a review of basic programming, including loop and conditional control structures, procedures and parameter passing, and arrays. Course goes on to cover the same material as course 12B. Students cannot receive credit for this course and course 12A or 12B. Prerequisite(s): Students must have completed a high school or college-level programming course in Java, C, or C++. An entrance examination is given to ascertain programming level; enrollment contingent on passing this examination. Concurrent enrollment in course 13L is required. (General Education Code(s): IN.) D. Long

**13L. Introduction to Programming and Data Structures Laboratory (2 credits).**

**F**  
Provides an accelerated introduction to the practical aspects of programming and data structures. Covers three areas: 1) common programming tools, including Unix commands, compilers and linkers, editors, debuggers, and Makefiles; 2) basic programming techniques, including design, testing, and debugging; and 3) C programming, focusing on the major differences between C and Java. Previous or concurrent enrollment in course 13H is required. Prerequisite(s): Students must have completed a high school or college-level programming course in Java, C, or C++. An entrance examination is given to ascertain programming level; enrollment contingent on passing this examination. Concurrent enrollment in course 13H is required. D. Long

**17. Social Networks. S**

Introduction to social networks and game theory. Topics include the structure of social networks; the world wide web; the flow of information and behavior through networks; and the principles behind modern web search and search-ad placement. Prerequisite(s): Mathematics 3 or 11A; or Applied Mathematics and Statistics 2 or 3 or 6 or 11A or 15A; or Economics 11A; or score on math placement exam of 31 or higher. (General Education Code(s): SR.) B. Ten Cate, P. Kolaitis

**60M. Scientific Computation with Matlab and Maple.**

Basic concepts from calculus visualized using Matlab and Maple; plotting data and functions, integration, differentiation, limits; solving systems of equation; linear regression; and example

applications from science and engineering. Prerequisite(s): Mathematics 19B, or 20B, or by consent of instructor. M. Warmuth

**80B. Systems and Simulation.**

An introduction to systems analysis as an approach to understanding and solving complex problems. The use of simulation as an aid in this problem solving. Examples are taken from ecology, economics, physics, computer science, and other fields. Intended as a generally accessible undergraduate course in which students can develop and explore computer simulation models matched to their individual interests. (General Education Code(s): T2-Natural Sciences, Q.) The Staff

**80G. Introduction to Unix.**

Introduction to computing, the Internet, and the World Wide Web through the language of the Unix operating system. Oriented to the beginner, the course presupposes no previous acquaintance with any particular sort of computer. It covers the basic concepts of text editing and formatting, writing Web pages in basic HTML, and promotes a rigorous understanding of Unix commands and shell scripts. Views communication with a computer as a matter of learning a few simple though powerful languages. (General Education Code(s): T2-Natural Sciences.) The Staff

**80J. Technology Targeted at Social Issues.**

Introduces the idea that engineering can be a means for addressing social issues. Case studies and guest speakers. Issues might include: economic development, privacy, activism, safe drinking water, inexpensive shelters, sustainable energy, education, and waste disposal. (General Education Code(s): PE-T,

T7-Natural Sciences or Social Sciences.) J. Davis, S. Lodha

**80L. Social Data Analysis and Visualization. W**

Course examines: social data analytics--veracity, consistency, uncertainty, volume; statistical computation--misuse, bias, dispersion, correlation, regressions, differential scales, normal distributions, factor and cluster analysis, extrapolation, inference, simple programming; visual representations--communication, critique and design of infographics; applications--environment, energy, economics, education, empowerment. (General Education Code(s): SR.) S. Lodha

**80S. From Software Innovation to Social Entrepreneurship.**

Emerging software innovations with emphasis on social software. Web 2.0 companies and services. Software that has social impact in a global context. Entrepreneurial plan including social, economic, and innovation value. Final group project on innovative software design and entrepreneurship plan. (General Education Code(s): PE-T, T7-Natural Sciences or Social Sciences, E.) S. Lodha

**80V. Creating Virtual Worlds on the Web.**

Project-oriented course about creating and publishing interactive 3D content on the web. Focuses on the creation of static and dynamic objects, such as characters, terrain, accessories, and works of art. Also covers inclusion of animation and sound effects with these objects. The objects created can be used in a stand-alone setting (e.g., a 3D document) or incorporated into existing virtual worlds (e.g., as part of a level design in a computer game or assets in massively multiplayer online games). Uses 3D authoring

## Computer Science

tools (pending availability of resources) like VRML, Second Life, Alice, and/or Acrobat 3D. (Formerly VRML 3D Worlds on the Web.) (General Education Code(s): PR-C, T2-Natural Sciences.) A. Pang

### **94. Group Tutorial. F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **94F. Group Tutorial (2 credits). F,W,S**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **99. Tutorial. F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

### **99F. Tutorial (2 credits). F,W,S**

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

## UPPER-DIVISION COURSES

### **101. Algorithms and Abstract Data Types. F,W,S**

Studies basic algorithms and their relationships to common abstract data types. Covers the notions of abstract data types and the distinction between an abstract data type and an implementation of that data type. The complexity analysis of common algorithms using asymptotic (big "O") notation is emphasized. Topics include sorting and searching techniques, basic graph algorithms, and algorithm design techniques. Abstract data types covered include priority queues, dictionaries, disjoint sets, heaps, balanced trees, and hashing. Familiarity with C,

Java, and Unix is assumed. Prerequisite(s): course 12B or 13H; CMPE 16 or 16H; MATH 19B, 20B or 11B; and one course from the following: MATH 21, 22, 23A, or AMS 10. P. Tantalò, D. Helmbold, A. Van Gelder, M. Warmuth

### **102. Introduction to Analysis of Algorithms. W,S**

Methods for the systematic construction and mathematical analysis of algorithms. Order notation, the RAM model of computation, lower bounds, and recurrence relations are covered. The algorithm design techniques include divide-and-conquer, branch and bound, and dynamic programming. Applications to combinatorial, graph, string, and geometric algorithms. Prerequisite(s): course 101. M. Warmuth, A. Van Gelder, D. Achlioptas, D. Helmbold, S. Lodha

### **104A. Fundamentals of Compiler Design I. F,S**

An introduction to the basic techniques used in compiler design. Topics include compiler structure, symbol tables, regular expressions and languages, finite automata, lexical analysis, context-free languages, LL(1), recursive descent, LALR(1), and LR(1) parsing; and attribute grammars as a model of syntax-directed translation. Students use compiler building tools to construct a working compiler. Prerequisite(s): course 101 and Computer Engineering 12 and 12L. W. Mackey

### **104B. Fundamentals of Compiler Design II.**

Advanced study of compiler implementation. Topics include compiler structure back end, run-time environments, storage management, garbage collection, register allocation, code generation, basic blocks, control flow, data flow,

local and global optimization, interpretation, and machine-code generation. Students may not receive credit for this course and course 204. Taught in conjunction with course 204. Prerequisite(s): course 104A. W. Mackey

### **105. Systems Programming.**

Covers fundamentals of systems programming including standard tools, shell programming, file I/O, files and directories, system data files and information, Unix processes, process control, synchronization, signals, event-driven programming, terminal I/O, daemons, interprocess communication, basic network programming, and basic user-interface programming. Prerequisite(s): course 101 and Computer Engineering 12 and 12L. Enrollment restricted to School of Engineering majors. D. Long, E. Miller

### **109. Advanced Programming. W,S**

An introduction to object-oriented techniques of software development including data abstraction, inheritance, polymorphism, and object-oriented design. Extensive practice using a computer to solve problems, including construction of graphical user interfaces and a multithreaded client/server applications. Prerequisite(s): course 12B/M or 13H. C. McDowell, W. Mackey

### **111. Introduction to Operating Systems. W,S**

Fundamental principles of operating systems: process synchronization, deadlocks, memory management, resource allocation, scheduling, storage systems, and study of several operating systems. A major programming project will be required. Prerequisite(s): course

## Computer Science

101, and Computer Engineering 110 or Computer Engineering 112. E. Miller, D. Long, W. Mackey

### **112. Comparative Programming Languages. F,W**

Covers several programming languages and compares styles, philosophy, and design principles. Principles underlying declarative, functional, and object-oriented programming styles are studied. Students write programs emphasizing each of these techniques. Prerequisite(s): course 101 or 109. W. Mackey, W. Tan, C. McDowell, C. Flanagan, A. Van Gelder, D. Long

### **113. Parallel and Concurrent Programming. \***

Introduction to parallel and concurrent programming. Topics include: types of parallel computers and programming platforms; design, implementation, and optimization of programs for parallel and multicore processors; basic and advanced programming techniques; performance analysis and load balancing; and selected parallel algorithms. (Also offered as Computer Engineering 113. Students cannot receive credit for both courses.) Prerequisite(s): Computer Engineering 12 and 12L and Computer Science 101. Computer Engineering 110 or 112 recommended. J. Renau Ardevol, E. Miller

### **115. Introduction to Software Engineering. F,S**

Emphasizes the characteristics of well-engineered software systems. Topics include requirements analysis and specification, design, programming, verification and validation, maintenance, and project management. Practical and research methods are studied. Imparts an understanding of the steps used to effectively develop

computer software. (Formerly Software Methodology.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 101. Enrollment restricted to computer science, computer engineering, and technology and information management majors. E. Whitehead, L. Werner, C. Flanagan

### **116. Software Design Project. W**

Students in teams specify, design, construct, test, and document a complete software system in a specialized application domain. Class time is spent in technical discussions and ongoing design reviews. A formal presentation and demonstration of each project is required. An organizational meeting will be held during the preceding quarter. Projects may be drawn from industry and campus research groups. Students are billed a materials fee. Prerequisite(s): course 115. (General Education Code(s): PR-E.) E. Whitehead, L. Werner, L. De Alfaro

### **117. Software Design Project II. S**

Continuation of course 116. Students work in teams to develop, test, document, and deploy a substantial software project. Teams give a formal presentation and demonstration of each project. Students are billed a materials fee. Prerequisite(s): course 116. E. Whitehead, L. Werner, L. De Alfaro

### **119. Software for Society.**

Provides experience with applying computing to social issues. Case studies on multiple issues. For example: privacy, copyright, voting, education, poverty, energy, activism. Team project in which students develop software to address a pre-identified need of a global or local non-profit. Prerequisite(s): course 101. (General Education Code(s): PE-T.)

J. Davis

### **121. Mobile Applications. W**

Introduces programming and application development for mobile devices. Covers the SDK and main programming platforms available on mobile devices, methodologies for developing native applications, division of computation between the mobile platform and servers, and mobile-to-server communications. Introduces platforms based on JavaScript and HTML5 for the development of applications that are portable across platforms. Students develop components of applications, leading to fully functional applications by the end of the course. Course based on emulators and SDK tools, so ownership of a cellphone/tablet is not required for the course. Prerequisite(s): courses 12B and 12M. L. De Alfaro, E. Whitehead

### **122. Computer Security. F**

Introduction to computer security (including selected topics in network security). Access control. Security in programming languages. Basic cryptography. Security protocols. Prerequisite(s): course 111 or permission of instructor. Enrollment restricted to School of Engineering majors. E. Miller

### **128. Distributed Systems: File Sharing, Online Gaming, and More. S**

Covers topics in distributed computing including communication, naming, synchronization, consistency and replication, fault tolerance, and security. Examples drawn from peer-to-peer systems, online gaming, the World Wide Web; other systems also used to illustrate approaches to these topics. Students implement simple distributed systems over the course of the quarter. Prerequisite(s):

## Computer Science

course 101 or Computer Engineering 150. Course 111 or 105 recommended. E. Miller, P. Alvaro, D. Long

### **129. Data Storage Systems. W**

Covers all aspects of storage systems technology from magnetic media up through system software, including principles of magnetic recording, hard drive technology and evolution, performance measurement, file systems, storage networking, disk arrays, network-attached storage, and alternative storage technologies.

Prerequisite(s): course 101, 111, and Physics 5A or 6A. E. Miller, D. Long, S. Brandt

### **130. Computational Models. F,S**

Various representations for regular languages, context-free grammars, normal forms, parsing, pushdown automata, pumping lemmas, Turing machines, the Church-Turing thesis.

Prerequisite(s): course 101. P. Tantalo, M. Warmuth, D. Helmbold, P. Kolaitis, A. Van Gelder

### **132. Computability and Computational Complexity.**

Turing machines, general phase-structure grammars, the Chomsky hierarchy, recursive functions, diagonalization, the Halting problem, computability and unsolvability, computational complexity, time and space bounds, NP-completeness with emphasis on reductions between problems from various areas. Prerequisite(s): course 130. M. Warmuth, D. Helmbold, P. Kolaitis, A. Van Gelder

### **132W. Computability and Computational Complexity (2 credits).**

Disciplinary Communication (DC) course to be taken concurrently with course 132. Students satisfy the DC requirement by writing a survey paper on a topic related to

computability and computational complexity. Possible topics include: an overview of a different model of computation (e.g., quantum computing); an overview of a major complexity class; a critical analysis of the Church-Turing thesis.

Prerequisite(s): course 130; satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in course 132 required. Enrollment by permission of instructor. Enrollment limited to 15. M. Warmuth, D. Helmbold, P. Kolaitis, A. Van Gelder

### **140. Artificial Intelligence. W**

Introduction to the contemporary concepts and techniques of artificial intelligence, including any or all of: machine perception and inference, machine learning, optimization problems, computational methods and models of search, game playing and theorem proving. Emphasis may be on any formal method of perceiving, learning, reasoning, and problem solving which proves to be effective. This includes both symbolic and neural network approaches to artificial intelligence. Issues discussed include symbolic versus nonsymbolic methods, local versus global methods, hierarchical organization and control, and brain modeling versus engineering approaches. Lisp or Prolog may be introduced. Involves one major project or regular programming assignments. Prerequisite(s): course 101. The Staff, L. Getoor, M. Walker

### **142. Machine Learning. W**

Introduction to machine learning algorithms and their applications. Topics include classification learning, density estimation and Bayesian learning regression, and online learning. Provides introduction to standard learning methods such as neural networks,

decision trees, boosting, and nearest neighbor techniques. Prerequisite(s): course 101, Mathematics 23A, and Applied Mathematics and Statistics 131 or Computer Engineering 107. D. Helmbold, M. Warmuth

### **143. Introduction to Natural Language Processing. S**

Introduces the theory and practice of natural language processing (NLP)-- the creation of computer programs that can understand, generate, and learn natural language. Introduces the three major subfields of NLP: syntax (the structure of a sentence); semantics (the explicit meaning of a single sentence); and pragmatics (the implicit meaning of a sentence when it is used in a specific discourse). Projects focus on the techniques useful for a particular application area, alternating in different years. Project application areas include information extraction, narrative understanding, sentiment analysis, dialogue systems, and question answering. Prerequisite(s): courses 5P and 101. Enrollment limited to 40. M. Walker

### **160. Introduction to Computer Graphics. S**

Introduces techniques of modeling, transformation, and rendering for computer-generated imagery. Topics: 2D/3D primitives, projections, matrix composition, and shading algorithms. Programming assignments and a major project are required. Students cannot receive credit for both this course and course 260. Prerequisite(s): course 101 and Mathematics 21 or Applied Mathematics and Statistics 10. Concurrent enrollment in course 160L required. A. Pang, J. Davis, S. Lodha

## Computer Science

### **160L. Introduction to Computer Graphics Laboratory (2 credits). S**

Complements course 160, gaining additional competence with a number of important software development tools, graphics libraries, and graphical user interfaces. Topics include OpenGL, WebGL, rubberbanding, picking, sliders, buttons, dialog, event handling, double buffering, lighting, shading, materials, and textures. The topic list may be updated to reflect technological changes. Concurrent enrollment in course 160 required. A. Pang, J. Davis, S. Lodha

### **161. Introduction to Data Visualization.**

Concepts and methods for data analysis, information and scientific visualization, and effective communication of technical data. Topics include: mathematical foundations; scalar, vector, and tensor field visualization; multivariate visualization; and tree and graph visualizations. Applications are drawn from social-network analysis; environmental and space science; and medical imaging. Evaluation based on examinations, programming exercises, and a project. (Formerly Visualization and Computer Animation.) Prerequisite(s): course 160 or equivalent. Concurrent enrollment in course 161L required. S. Lodha, A. Pang

### **161L. Data Visualization Laboratory (2 credits).**

Complements course 161. Students gain additional competence with a number of important software development tools and techniques. Included are Paraview, Visualization Toolkit (VTK), and Insight Toolkit (ITK). Students get hands-on experience with designing transfer functions, isosurfacing, direct volume rendering, vector-

field visualization techniques, as well as methods for dealing with non-spatial data. (Formerly Visualization and Computer Animation Laboratory.) Concurrent enrollment in course 161 required. S. Lodha, A. Pang

### **162. Advanced Computer Graphics and Animation.**

Covers concepts and methods for modeling and rendering static and dynamic scenes. Topics include: mathematical foundations (e.g., splines and numerical integration; global illumination models; texture mapping; morphing; physically based animation; behavioral animations; and procedural animations. Evaluation based on examinations, programming exercises, and a project. Prerequisite(s): course 160 or equivalent. Concurrent enrollment in course 162L required. A. Pang, J. Davis, S. Lodha

### **162L. Advanced Computer Graphics and Animation Laboratory (2 credits).**

Complements course 162. Students gain additional competence in a hands-on computational laboratory setting. Representative examples include topics, such as interactive curve and surface design; shaders for advanced effects; crowd and behavioral animation; experiments with particle systems; facial animation; and motion and planning. Prerequisite(s): concurrent enrollment in course 162 is required. A. Pang, J. Davis, S. Lodha

### **165. Data Programming for Visualization. S**

Presents the basics of open-source programming tools to perform data analysis and create interactive visualizations and maps for the web, data integrity and scraping, statistical computation, simple and novel visualizations, and

geomapping. The examples are drawn from social science, public policy, and data journalism. Prerequisite(s): courses 12B and 12M. S. Lodha

### **166A. Game Theory and Applications I. F**

Introduces modern game theory, including applications in social science, biology, and engineering. Topics include extensive form, strategic form, mixed strategies, incomplete information, repeated games, evolutionary games, and simulation techniques. (Also offered as Technology & Info Management 166A. Students cannot receive credit for both courses.) Prerequisite(s): Applied Math and Statistics 5 or 7 or Economics 113; and Economics 11B, Applied Math and Statistics 11B, or Mathematics 11B or 19B. Enrollment restricted to juniors and seniors. Enrollment limited to 100. J. Musacchio

### **166B. Game Theory and Applications II. W**
