How to Use Class Search

- **Faculty**: log into MyUCSC (my.ucsc.edu) and click Main Menu, click the Faculty Center folder, click the Faculty Center page, then click the Class Search tab on the Faculty Center.

- **Advising Staff**: log into MyUCSC (my.ucsc.edu) and choose Class Search from the One-Click Curriculum pagelet.

- **Public Access**: go to http://reg.ucsc.edu/soc.htm and click Class Search.

**Class Search Criteria**

- Use the drop-down menu to select the term.
- You can enter part or all of a word in the course title.
- The default is to search for open classes. If you change this to search for all classes, you will need to fill in at least one additional criterion.
- **Tip**: Find **Lower Division** classes by searching for course numbers “Less Than or Equal to 99” or find **Upper Division** classes by searching for course numbers “Greater Than or Equal to 100.”
- Find graduate courses by choosing Graduate from the Course Career dropdown menu.
- Click Search.
Class Search Results Options

The search results page shows primary classes (lectures, seminars, graded labs etc.).

The search criteria and number of results are shown.

To change which columns are displayed, click Settings. The window shown on the left will pop up. Remove the check marks next to any columns you do not want to have included in your search results and click Apply.

Use this dropdown to choose how many results to show on a page.

To change the order of the columns, click the heading for a column and drag and drop it to move it left or right.

Use the navigation links to scroll between pages of results.

Click the class number or the class title to see details about the class, including associated sections.

You can refine this search, or begin a new one, using these links.

Click Print to print all the results from this search.

Description
Mathematical tools and reasoning, with applications to economics. Topics are drawn from multivariable differential calculus and single variable integral calculus, and include partial derivatives, linear and quadratic approximation, optimization with and without constraints, Lagrange multipliers, definite and indefinite integrals, and elementary differential equations.

Enrollment Requirements
Prerequisite(s): course 11A, Economics 11A, Mathematics 11A, or Mathematics 19A.
