Some or all instruction for all or part of Academic Year 2021-22 may be delivered remotely. Tuition and mandatory fees have been set regardless of the method of instruction and will not be refunded in the event instruction occurs remotely for any part of the Academic Year.

It is not possible to know at this time whether the COVID-19 pandemic will result in changes to operations in student housing and residential life in Academic Year 2021-2022. Consequently, we are not offering a housing guarantee.
WELCOME TO UC SANTA CRUZ

Welcome to UC Santa Cruz!

The student experience at UCSC is unique, fusing high academic standards with a passion for transformative engagement in the world. This experience is shaped by exceptional faculty whose work is at the forefront of their fields and who are invested in helping students grow their own intellectual interests. As a result, UCSC is routinely ranked among the top universities in the world for research excellence and impact, and our students have opportunities to collaborate with top scholars and scientists in the creation of new knowledge.

But what defines UCSC is not just academic excellence or our spectacular campus. It is our diverse community. The motto of UCSC’s first residential college is “the pursuit of truth in the company of friends.” Since 1965, UCSC has been the site of innovation and experimentation about what a university community could and should be. Today, our residential college system provides flexible support and opportunities aimed at recognizing the student as a whole person and prioritizing their success. Only through community can we realize the responsibilities we have to one another, and the ways the pursuit of knowledge can improve the lives of our many communities — local, national, and global.

I encourage you to take advantage of all of the opportunities that UCSC has to offer. There is so much to learn about — from the depths of the ocean to the farthest stars and everything in between.

I welcome you to UC Santa Cruz, which is not just a place, but a community of learning that spans the world.

Sincerely,

Cynthia Larive
Chancellor
INTRODUCING UC SANTA CRUZ

THE UNIVERSITY OF CALIFORNIA

The University of California opened its doors in 1869 with just 10 faculty members and 38 students, and it has since developed into one of the world’s most distinguished university systems. Acclaimed for its research, scholarship, and dedication to undergraduate and graduate education, the UC system improves the lives of people in California and around the world through world-class educational opportunities, groundbreaking research, top-rated health care, and agricultural expertise.

Ten University of California campuses are located regionally throughout the state, and the system also includes five medical centers, three national laboratories, and more than 800 associated research institutes, laboratories, agricultural field stations, and extension centers.

The University of California includes more than 280,380 students and more than 227,700 faculty and staff. More than 2 million UC alumni live and work around the world. UC faculty include 64 Nobel prizes and more than 60 National Medals of Science. UC academics include more than 600 members of the National Academy of Sciences. Detailed information about the University of California's teaching, research, and public service mission is available at the University of California website.

THE UC SANTA CRUZ CAMPUS

Established in 1965, the University of California, Santa Cruz, is dedicated to excellence in undergraduate education, graduate studies, and research. Named to the 2017 US News & World Report top 50 Best Global Universities list, the campus has earned national and international recognition both for the impact of its research and for its long-established commitment to quality undergraduate instruction. UC Santa Cruz combines the facilities and resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. A strong program of general education is enhanced with opportunities for academic specialization and original research, and UC Santa Cruz also provides unparalleled opportunities for students to learn through hands-on experience. Strong commitments to environmental stewardship and community engagement are also central to the campus’s core values.

Fall enrollment for the 2020-21 academic year was 12,685 students, of whom 1,490 were graduate students. UC Santa Cruz seeks and welcomes students, faculty, and staff of diverse ethnic and cultural experiences and is dedicated to enrolling a student body that reflects the state’s ethnic and socioeconomic diversity. UC Santa Cruz is a Hispanic Serving Institution member of the Hispanic Association of Colleges and Universities, with approximately 25 percent of undergraduates identifying as Hispanic or Latino (fall 2020).

The UC Santa Cruz faculty includes two of the University of California’s honored University Professors, 25 members of the American Academy of Arts and Sciences, 12 members of the National Academy of Sciences, and 36 fellows of the American Association for the Advancement of Science. Five faculty members have been awarded MacArthur "Genius" awards. UCSC faculty and researchers have received more than $100 million annually in external funding over the past five years, totaling more than $1.2 billion over the past 10 years. More information about our distinguished faculty may be found in the UCSC Newscenter.

The 10 residential colleges are supportive living and learning communities that characterize the UC Santa Cruz experience. All undergraduate students, whether they live in university housing or not, are affiliated with one of the colleges. Self-contained and architecturally distinct, each college is a relatively small community of 30 to 110 faculty members and between 1,500 and 1,800 students, about half of whom typically live on campus. In addition to housing students in small-scale residential communities, each college provides academic support, organizes student activities, and sponsors events that enhance the intellectual and social life of the campus.

Each college has a distinctive quality derived from its core course and extracurricular programs and from its faculty fellows and their academic disciplines. However, all of the colleges are interdisciplinary, and all academic majors are open to students from all colleges. Detailed descriptions of the 10 colleges can be found in The Colleges (p. Error! Bookmark not defined.) section of the catalog.

Undergraduate education. The campus offers more than 65 undergraduate majors in the arts, engineering, humanities, physical and biological sciences, and social sciences—as well as interdisciplinary major programs and minors. A complete list of academic programs and concentrations appears on the Fields of Study chart (p. 7), and detailed descriptions begin in the Academic Programs (p. Error! Bookmark not defined.) section of the catalog.

The major and minor programs are administered by departments within the academic divisions. In most cases, departments are composed of faculty in the same field, but interdisciplinary programs draw on faculty from several fields.

Undergraduate education at UC Santa Cruz is focused on student success. The college core courses give first-year students a small-seminar experience, including intensive work in reading, discussion, and critical reasoning, while also providing an orientation to academic life. With few exceptions, letter grades are assigned in all credit-bearing courses. In addition, academic performance in each course may be recorded by an optional narrative performance evaluation. See Evaluating Academic Performance (p. Error! Bookmark not defined.) for additional information.
Original undergraduate research is encouraged, and hundreds of research papers co-authored by UC Santa Cruz undergraduates and their professors have been published in journals. For additional information, visit the Undergraduate Research Opportunities website.

Global Engagement programs at UC Santa Cruz include Study Abroad opportunities and International Student and Scholar Services (ISSS). Global Engagement facilitates the exchange of people, ideas, and knowledge to support and promote the internationalization of teaching, learning, and research. Each year more than 500 UC Santa Cruz students broaden their academic horizons through the UC Education Abroad Program (UCEAP), which enables students to incorporate full-time study abroad as UC credit toward their degrees. The UC Santa Cruz campus also strongly encourages undergraduate students to take advantage of the many opportunities for public service, such as those provided through the campus’s field programs, colleges, and Career Center. Individual studies, apprentice teaching, field studies, and internships can be important parts of the undergraduate experience (see Field Programs (p. Error! Bookmark not defined.)).

**Graduate education.** UC Santa Cruz offers graduate study in more than 60 degree tracks, incorporating a range of options for concentrated study in a specialized field. Graduate study at UC Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. Further graduate program information is provided in the Academic Programs (p. Error! Bookmark not defined.) and Graduate Information (p. Error! Bookmark not defined.) (p. Error! Bookmark not defined.) sections of the catalog.

**Research.** The UC Santa Cruz campus hosts a number of major research units. UC Observatories, the Santa Cruz Institute for Particle Physics (SCIPP), and the Institute of Marine Sciences conduct state-of-the-art research on topics ranging from the discovery of planets outside our solar system, to the detection of new sub-atomic particles, to the ecology of marine mammals. UC Santa Cruz is also a primary partner in inter-UC campus initiatives—such as the Institute for Quantitative Biomedical Research (QB3) and the Center for Information Technology Research in the Interest of Society (CITRIS)—which focus on human health and the use of information technology to solve social, environmental, and health-care problems.

The Humanities Institute is a hub for academic research, cross-discipline collaboration, and public engagement that oversees a range of topical centers, including the Center for Cultural Studies, the Center for Jewish Studies, the Center for Public Philosophy, the Linguistics Research Center, and the Dickens Project. Research enterprises within the arts benefit from the Arts Research Institute and the Center for Documentary Arts and Research, while the Institute of the Arts and Sciences emphasizes interdisciplinary exhibitions, events, and residency programs. The Center for Agroecology and Sustainable Food Systems, the Center for Integrated Spatial Research, the Chicano/Latino Research Center, and the Science & Justice Research Center provide pioneering directions for research in the social sciences. Engineering at UC Santa Cruz has focused on strategic initiatives that include the UC Santa Cruz Genomics Institute, the Institute for the Biology of Stem Cells, the Center for Games and Playable Media, and the Center for Sustainable Energy and Power Systems. Beyond these organized research enterprises, UC Santa Cruz has a wide suite of investigator-driven research that spans the width and breadth of campus inquiry. For additional information see Resources for Learning and Research (p. Error! Bookmark not defined.).

**Location and facilities.** The main UC Santa Cruz campus occupies 2,000 acres on the west side of the city of Santa Cruz, on Monterey Bay, about 75 miles south of San Francisco and 35 miles southwest of San José. Expansive meadows at the campus entrance gradually slope up to a redwood forest that covers most of the site. Each residential college is within easy access of the campus’s central core, which includes library facilities, science laboratories, lecture halls, art studios, theater arts and music centers, a student union, and athletic facilities. Although the campus is spread out over many acres of hilly terrain, its programs are accessible to people with mobility impairments (see Disability Resource Center).

The UC Santa Cruz Coastal Science Campus, located on the edge of the Monterey Bay National Marine Sanctuary, provides extensive research and education facilities focused on marine and environmental sciences.

**The city of Santa Cruz** is a well-known recreational area and center for the arts. Mild weather, miles of beaches, and many cultural opportunities combine to make Santa Cruz an enjoyable place to study and live.

**Accreditation.** The University of California, Santa Cruz, is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 1001 Marina Village Parkway, Suite 402, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education. Specific degree programs at UC Santa Cruz are also accredited: The Engineering Accreditation Commission of ABET, http://www.abet.org (Electrical Engineering); the American Chemical Society Committee on Professional Training (Chemistry); and the California State Commission on Teacher Credentialing (Education). To review accreditation documents, please contact the Office of the Vice Provost for Academic Affairs, Kerr Hall, (831) 459-1349, or vpaa@ucsc.edu.

Combined majors. In addition, students may complete a combined major leading to a B.A. degree in a number of designated fields. Combined majors currently available include those in Earth sciences/anthropology, economics/mathematics, environmental studies/biology, environmental studies/Earth sciences, environmental studies/economics, Latin American and Latino studies/politics, and Latin American and Latino studies/sociology. Students also have the option of pursuing a double major.

c = concentration, or emphasis, within a program. Some programs give students the option of following a general course of study or selecting a concentration; other programs require students to choose a concentration. Consult the linked program.

1 An intensive major is also available.

2 A five-year contiguous bachelor's/master’s pathway is available coordinating the existing bachelor’s degree and master’s degree in computer science and engineering.

3 A Master of Fine Arts (M.F.A.) degree is awarded in digital arts and new media, social documentation, and environmental art and social practice.

4 The state of California does not allow academic majors in education that lead to a teaching credential. Instead, we offer an undergraduate major in education, democracy and justice and two minors in education for students who are considering a career in teaching or who hold a more general interest in educational studies. Please note that the major and minors in education do not provide a California Teaching Credential. Additionally, please note that the UC Santa Cruz teaching credential program is a graduate program and coursework taken in the major or minor cannot be substituted for credential requirements, except in specifically designated pathways.

UCSC offers the professional clear Cross-cultural, Language, and Academic Development (CLAD) and Bilingual Cross-Cultural, Language and Academic Development (BCLAD) multiple subjects credentials, which are used in self-contained elementary classrooms (K-6) where all subjects are taught by the same teacher. UCSC also offers the CLAD and BCLAD single subjects credentials, which are used in departmentalized settings where the teacher is responsible for one subject (7-12).

5 A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in linguistics.

6 A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in critical race and ethnic studies and the MA/Credential Master's in education.

7 A five-year contiguous bachelor's/master's pathway is available coordinating an existing bachelor's degree from within the chemistry or biology programs (majors administered by the departments of MCD Biology, EE Biology, Chemistry and Biochemistry, and Biomolecular engineering) and the M.S. in microbiology and environmental toxicology.

8 A Bachelor of Music (B.M.) degree in music also available. A Doctor of Musical Arts (D.M.A.) degree in composition is also available.

9 A five year contiguous bachelor's/master's pathway is available coordinating the exiting bachelor's and master's degree in philosophy.

10 A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in physics. Students in the B.S./M.S. path can pursue concentrations in material and device physics, energy and the environment, computational physics, and medical biophysics.

11 A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees in applied mathematics, mathematics, computer science, robotics engineering, physics, applied physics, physics (astrophysics), and the M.S. in scientific computing and applied mathematics.

12 A five-year contiguous bachelor's/master's pathway is available coordinating the biomolecular engineering and bioinformatics bachelor's degree (bioinformatics concentration) with the master's degree.
A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's and master's degree in mathematics.

A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees and the M.S. in Statistical Science.

A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degrees and M.S. in Electrical and Computer Engineering.

A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in science education and the M.A/Credential Master's in Education.

A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degrees and the ecology and evolutionary biology M.A.

A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degree in Earth sciences or environmental sciences and the M.S. degree in Earth sciences.

**Degrees**

B.A. = Bachelor of Arts  
B.M. = Bachelor of Music  
B.S. = Bachelor of Science  
D.M.A. = Doctor of Musical Arts  
Ed.D = Doctor of Education  
M.A. = Master of Arts  
M.F.A. = Master of Fine Arts  
M.S. = Master of Science  
Ph.D. = Doctor of Philosophy
ACADEMIC UNITS

ARTS DIVISION

Porter College, D Building, (831) 459-4940
http://arts.ucsc.edu

The Arts Division offers both creative and critical studies of art and culture at the undergraduate and graduate level. The division is committed to building our students' capacity for creative and critical thinking. Instruction in the arts inspires and develops the skills needed for individual and collaborative creative thought, analysis, and action within and beyond the university. Our faculty consists of artists, performers, historians, critics, makers, and theorists working across the arts in a global context, and addressing some of the most pressing issues of our day.

Undergraduate education in the arts includes bachelor of arts (B.A.) programs in art, and design: games and playable media, film and digital media, history of art and visual culture, music, and theater arts, and a bachelor of music (B.M.). There are also concentrations offered in film and digital media (critical studies; production; and integrated critical practice), history of art and visual culture (curation, heritage, and museums), and music (western art music; and global musics). Minors are offered in film and digital media, history of art and visual culture, electronic music, jazz music, theater arts, and dance.

Established graduate programs include the interdisciplinary digital arts and new media master of fine arts (M.F.A.) program, the social documentation master of fine arts (M.F.A.), the music master of arts (M.A.), and the theater arts master of arts (M.A.), as well as the recently launched environmental art program, the social documentation master of fine arts (M.F.A.), Doctoral programs include the music composition doctor of musical arts (D.M.A.), and Ph.D. programs in music, visual studies, and film and digital media.

The Arts Division provides students with access to quality research, work and maker spaces, including a digital-arts research facility with two experimental media labs, along with a state-of-the-art music recital hall, practice rooms, electronic music studios, and recording facilities, four theaters for dramatic productions, filmmaking studios and editing suites, surround-sound screen ing theaters, drama and dance studios, painting and printmaking studios, a foundry (unique to the U.C. system), photography and computer laboratories, and specialized lecture and seminar classrooms. McHenry Library houses an extensive collection of books and periodicals on the arts, as well as an analog and digital slide collection, music scores and recordings, and one of the largest collections of films and DVDs in the University of California system. Exhibition space in the arts includes galleries for students, faculty, and visiting artists to show their work. The Mary Porter Sesnon Art Gallery presents curated exhibitions to the university community and the general public. The Institute of the Arts and Sciences, a focus for interdisciplinary creative work, exhibitions, conferences, symposia, and seminars offers a robust schedule of programming.

Other Division Highlights: The Theater Arts Department offers a wide variety of performances in four venues, ranging from faculty-directed productions of classics and musicals on our Mainstage to intimate student-created productions in our century-old converted barn. Student work is regularly broadcast on SCTV, and Eyecandy, a student-run magazine and blog, publishes student critique on film, television, and digital media. The Music Department hosts an annual festival of contemporary music, April in Santa Cruz, and an opera in the spring quarter of each year, and presents a variety of solo and ensemble concert programs throughout the year. The History of Art and Visual Culture Department hosts a series of speakers and seminars each year on rotating topics that are supported by the Patricia and Rowland Rebele Endowed Chair and sponsors the student-run journal Refract. The Art Department sponsors regularly scheduled public presentations as well as quarterly open studios and a print and photo sale in the spring. The Digital Arts and New Media M.F.A. program regularly sponsors digital arts events, such as festivals, symposia, visiting speakers, and exhibitions of student work, both on- and off-campus, culminating in an annual exhibition of graduate thesis research each spring. The Arts Division supports the dissemination of student work through the Arts Dean's Fund for Excellence and provides professional internship opportunities through Arts Professional Pathways and departmental internship programs.

For more information about specific programs in the arts, please visit catalog listings and web sites for: Art; Digital Arts and New Media; Art + Design: Games + Playable Media; Film and Digital Media; History of Art and Visual Culture; Music; and Theater Arts.

**PROGRAMS OFFERED**

**Art B.A. (p. 21)**

Environmental Art and Social Practice M.F.A. (p. 24)

**UNDERGRADUATE PROGRAM**

The Art Department offers an integrated program of study in
time and practice exploring the power of visual
communication for personal expression and public interaction. The
department provides students with the means to pursue this
exploration through courses that provide the practical hands-on
learning skills for art production in a variety of media within the
contexts of critical thinking and broad-based social
perspectives.

The art program at UC Santa Cruz is composed of courses in
drawing, animation, painting, photography, sculpture, print
media, intermedia, critical theory, electronic art, public art,
environmental art, social art practice, and interactive
technologies. Baskin visual arts studios provide world-class
facilities for art production in these areas. The Art Department
is committed to pursuing a continuing dialogue about what
constitutes basic preparation in the arts while offering students
experience in established practices, new genres, and new
technologies.

Students graduating with a major in art may become
professional artists or pursue careers in such diverse areas as
arts administration, arts management, museum education, art
direction, communication design, web design, digital imaging,
curating, art education, multi-media specialist, industry
consultant, model maker, and publishing. Many students who
want to teach at the college level continue their education in
graduate school.

**GRADUATE PROGRAM**

The Environmental Arts and Social Practice M.F.A. integrates
ecological thinking with social justice principles in a two-year
degree program focusing on creative artistic inquiry and
project-based research. Designed for students who seek to
develop their artwork in relation to social and environmental
justice questions, contexts, and communities, our place-based
The program emphasizes making and locating art in the world, with human and non-human collaborators, and grounded in individual and collective commitments, inventions, and aesthetic visions.

The program invites students to experiment with a breadth of approaches, art mediums, research methods, theoretical frameworks and technologies ranging from the traditional to the most contemporary, with the understanding that all media can be relevant in developing new approaches and responses to environmental and social issues. The program’s interdisciplinary emphasis also encourages students to engage with other departments, divisions, centers, labs, and faculty across the university to deepen and enrich their research, and to partner with groups and organizations outside the university in the development and realization of their projects.

Students gain practical experience through direct engagement with places and communities and hone their skills of critical analysis, while studying methods, histories and theories of the field, and developing their own creative directions through their thesis projects. Students build career paths connecting multimedia art practices with environmental justice, social justice, public policy, public art, curatorial practices, art education, art writing, urban planning, landscape architecture, and other professional and creative practices.

**COURSES FOR NON-MAJORS**

The Art Department offers courses for non-art majors that fulfill general education requirements and offer students a chance to explore art to see if it interests them as a major.

These courses include ART 10D, 2D Foundation; ART 10E, 3D Foundation; ART 10F, 4D Foundation; ART 80D, Fundamentals of Photography; ART 80E, Environmental Art in the Expanded Field (online course); ART 80F, Introduction to Issues in Digital Media; ART 80T, Digital Tools for Contemporary Artists; ART 20L, Introduction to Drawing (online course); and ART 106O, 2D Animation (online course).

**ART B.A.**

**Information and Policies**

**Introduction**

The Art Department offers an integrated program of study in theory and practice exploring the power of visual communication for personal expression and public interaction. The department provides students with the means to pursue this exploration through courses that provide the practical hands-on learning skills for art production in a variety of media within the contexts of critical thinking and broad-based social perspectives.

The art program at UC Santa Cruz is composed of courses in drawing, animation, painting, photography, sculpture, print media, intermedia, critical theory, electronic art, public art, environmental art, social art practice, and interactive technologies. Baskin visual arts studios provide world-class facilities for art production in these areas. The Art Department is committed to pursuing a continuing dialogue about what constitutes basic preparation in the arts while offering students experience in established practices, new genres, and new technologies.

Students graduating with a major in art may become professional artists or pursue careers in such diverse areas as arts administration, arts management, museum education, art direction, communication design, web design, digital imaging, curating, art education, multi-media specialist, industry consultant, model maker, and publishing. Many students who want to teach at the college level continue their education in graduate school.

**Academic Advising for the Program**

For more information and advising on the art major, please contact the undergraduate advisor at artadvisor@ucsc.edu. For junior transfer students, please also see more detailed information below under Transfer Information and Policy.

**Getting Started in the Major**

**Acceptance to the Art Major**

Students should contact the undergraduate art advisor if they are interested in pursuing an art major and should meet with the advisor in their first quarter at UC Santa Cruz if they intend to enroll in art courses their frosh year. A portfolio is not required for entering frosh. Students are recommended to pass two foundation courses in their first year in order to meet the campus deadline to declare the major. However, all three foundation courses (ART 10D, ART 10E, ART 10F) are requirements for the major. Delaying taking these classes until the sophomore year may delay a student's graduation.

**Getting into Studio Classes**

Studio art classes are very small (average 25 students) compared to courses from other departments on campus that can accommodate large numbers of students. Frosh may not take any lower division studios until they complete all three of the Art 10 series foundation courses.

**General Education Requirements**

If you are not able to get into a foundation or studio course in a particular quarter at UC Santa Cruz, you can enroll in courses that fulfill the general education (GE) requirements. You should balance major requirements and GE requirements throughout your career at UCSC and not focus completely on your GE's in your frosh or sophomore years, as this could delay your graduation.

**Program Learning Outcomes**

Students who earn a Bachelor of Arts (B.A.) in Art will gain the skills, knowledge, and understanding that will enable them to:

- demonstrate proficiency in a range of techniques and media;
- demonstrate the ability to imagine, create, and resolve a work of art;
• demonstrate familiarity with and ability to analyze, both verbally and in writing, issues and forms of contemporary art with a clear understanding of historical precedents; and
• demonstrate critical thinking through the ability to articulate an insightful response and analysis of a work of art in order to participate in discussions and studio critiques.

Major Qualification Policy and Declaration Process

Major Qualification

Students entering UC Santa Cruz as frosh may apply for admission to the art major after completing two of the following:

- ART 10D  2D Foundation  5
- ART 10E  3D Foundation  5
- ART 10F  4D Foundation  5

Portfolio

A portfolio is not required for entering frosh students. Students should contact the undergraduate art advisor if they are interested in pursuing an art major and intend to enroll in foundation courses (ART 10 series) their freshman year. Acceptance into the art major is contingent on passing two of the three foundation courses that we offer. All three foundation classes are prerequisites to lower-division studios. Consequently, it is essential that students interested in pursuing the art major take the three foundation courses in their freshman year.

Transfer students should consult the Transfer and Information Policy section.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Appeals should be send via email to artadvisor@ucsc.edu.

How to Declare a Major

Students who complete the major qualification requirements may declare the major by meeting with the academic advisor (artadvisor@ucsc.edu) and filling out the declaration form.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy

Prospective transfer students should complete three courses articulated to courses in the Art 20 series in three different media.

Students applying for fall entry must pass a portfolio review in early April and be admitted to UC Santa Cruz to declare the art major. Admission to UC Santa Cruz does not guarantee eligibility to declare the major, nor does passing the portfolio review guarantee admission to the campus. Transfer students must identify themselves as proposed art majors when applying to the university in order to receive information on the portfolio review deadlines and the materials required for the review. If a student is admitted to UC Santa Cruz and does not pass the portfolio review, the student will need to pursue an alternate major. Students will be notified of the results of the portfolio review before they need to submit their Statement of Intent to Register for UC Santa Cruz.

For timely graduation, transfer students should also complete two history of art and visual culture courses prior to transfer, including one in Western art and culture and one in non-Western art and culture.

Prospective students are encouraged to prioritize required and recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

Getting Started at UCSC as a Transfer Student

Once a student is accepted to the university, has passed the portfolio review and has submitted their Statement of Intent to Register, the undergraduate advisor will be in contact with the student to declare their major and set up a program of study.

Letter Grade Policy

This program does not have a letter grade policy.

Three-Year Pathway

The Art Department has a three-year pathway designed for students who want to complete their Art B.A. in three years. It is an intensive program that includes all of the courses for the current art B.A. major, as well as all of the general education requirements and electives for the university. Students should begin this pathway in their frosh year to be able to complete the required courses in three years. Summer Session attendance is required for all three years. For more information, contact the undergraduate advisor.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

The UC Education Abroad Program (EAP) offers students the opportunity for study abroad. Art majors may participate in EAP in their junior year. When considering attending EAP, the student should be mindful that only three courses may be
substituted in the art major and each must receive a grade of C or better.

Honors

Honors in the art major are awarded to graduating seniors whose academic performance demonstrates excellence at a grade point average of 3.95 or above in their upper-division art studio courses and ART 190A. Highest honors in the art major are awarded to graduating seniors whose academic performance demonstrates excellence at a grade point average of 4.0 in their upper-division art studios and ART 190A.

[Optional Catchall]

Materials Fee

Art students should be aware of the materials fee required for some studio courses. The fee is billed to the student’s account for specific course materials purchased by the Art Department through the university. Fees generally range from $15 to $175 per course. Students may incur additional expense purchasing individual supplies.

Requirements and Planners

Course Requirements

The minimum requirements for art majors who were admitted to UC Santa Cruz in their frosh year are completion of nine lower-division and eight upper-division courses (consisting of seven upper-division studio courses and ART 190A) and satisfaction of the senior comprehensive requirement. Junior transfer students complete seven lower-division and eight upper-division courses and their senior comprehensive requirement. The comprehensive requirement may be fulfilled by ART 190B, Senior Project, as part of the required seven upper-division studios. The comprehensive requirement may also be fulfilled by a review of the students artwork by a ladder rank faculty. If the latter choice is selected, the student must then complete seven upper-division studios. A maximum of three courses total from outside the Art Department (including UC Education Abroad Program [EAP] courses) may be substituted for regular art courses with the approval of a major advisor. In courses taken outside the UC Santa Cruz Art Department, students must have received a grade of C or higher.

Students plan their course of study in consultation with a faculty advisor.

Lower-Division Courses

Students complete nine courses as follows:

The Foundation

All of the following (two of the ART 10 series are waived for junior transfers):

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 10D</td>
<td>2D Foundation</td>
<td>5</td>
</tr>
<tr>
<td>ART 10E</td>
<td>3D Foundation</td>
<td>5</td>
</tr>
<tr>
<td>ART 10F</td>
<td>4D Foundation</td>
<td>5</td>
</tr>
</tbody>
</table>

Introduction to Contemporary Art Practice

Three of the following (junior transfers should complete them at community college):

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 20G</td>
<td>Introduction to Print Media and Drawing</td>
<td>5</td>
</tr>
<tr>
<td>ART 20H</td>
<td>Introduction to Sculpture and Public Art</td>
<td>5</td>
</tr>
<tr>
<td>ART 20I</td>
<td>Introduction to Photography</td>
<td>5</td>
</tr>
<tr>
<td>ART 20J</td>
<td>Introduction to Drawing and Painting</td>
<td>5</td>
</tr>
<tr>
<td>ART 20K</td>
<td>Introduction to New Media and Digital Artmaking</td>
<td>5</td>
</tr>
<tr>
<td>ART 20L</td>
<td>Introduction to Drawing</td>
<td>5</td>
</tr>
</tbody>
</table>

Digital Tools

Students must take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 80T</td>
<td>Digital Tools for Contemporary Art Practice</td>
<td>5</td>
</tr>
</tbody>
</table>

Critical Theory and Historical Context

Students complete two courses from History of Art and Visual Culture (HAVC), one in Western Art and Culture and one in non-Western Art and Culture. Students take one course from each of the sections below:

Western Art and Culture: HAVC 30-HAVC 46, HAVC 48, HAVC 85, HAVC 133A-HAVC 143B, HAVC 143D-HAVC 143G, HAVC 157B-HAVC 157D, HAVC 186, HAVC 1900-HAVC 190S, HAVC 191B-HAVC 191N, HAVC 191P-HAVC 191S.

Note: Students may use Advanced Placement (AP) in Art History in lieu of the Western-emphasis HAVC requirement.

Students may contact the undergraduate advisor for updates to these lists.

Upper-Division Courses

Students complete eight courses as follows:

Studio Work

Students take seven upper-division studio courses. These include courses numbered ART 101—ART 189, ART 190B, ART 194, ART 196, ART 198, and ART 199. ART 190B satisfies both an upper-division studio as well as the comprehensive requirement.

Transfer students are strongly encouraged to take ART 194 during their junior year.
Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in art is satisfied by completing:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 190A</td>
<td>Writing for Artists</td>
<td>5</td>
</tr>
</tbody>
</table>

Comprehensive Requirement

All art majors satisfy the capstone/comprehensive requirement with the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 190A</td>
<td>Writing for Artists</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following options:

- Presenting an exhibition and, by appointment, meeting with a faculty member for review and critique of the exhibition; or
- Submitting a portfolio and, by appointment, meeting with a faculty member for review and critique of the portfolio; or
- Completing the following course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 190B</td>
<td>Senior Project</td>
<td>5</td>
</tr>
</tbody>
</table>

Planners

Art Major Planner (Incoming Frosh)

The following is a recommended academic plan for students to complete:

<table>
<thead>
<tr>
<th>Year</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (frosh)</td>
<td>ART 10E</td>
<td>ART 10D</td>
<td>ART 10F</td>
</tr>
<tr>

<td></td>
</tr>
</tbody>
</table>

Art Major Planner (Junior Transfers)

The following is a recommended academic plan for junior transfers who have completed three lower-division studios across three different media and partial IGETC:

<table>
<thead>
<tr>
<th>Year</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (junior)</td>
<td>UD studio</td>
<td>ART 190A</td>
<td>UD studio</td>
</tr>
<tr>
<td></td>
<td>ART 10 Series†</td>
<td>ART 80T</td>
<td>HAVC*</td>
</tr>
<tr>
<td>2nd (senior)</td>
<td>UD studio</td>
<td>UD studio</td>
<td>UD studio</td>
</tr>
<tr>
<td></td>
<td>HAVC*</td>
<td>UD studio</td>
<td>ART 190B</td>
</tr>
</tbody>
</table>

† Art 10 series: Only one of the three ART 10 series courses is required for junior transfers. Other Art 10 series courses are offered in winter and spring.

*Courses from history of art and visual culture (one with a Western emphasis, one with a non-Western emphasis). It is highly recommended that junior transfers take history of art and visual culture courses at the community college. Western emphasis courses are listed as “Europe and the Americas,” all others are non-Western on assist.org.

ENVIRONMENTAL ART AND SOCIAL PRACTICE M.F.A.

Introduction

The Master of Fine Arts in Environmental Art and Social Practice is a unique graduate program that trains students to critically analyze, understand, and respond to the challenges of our contemporary era through creative artistic inquiry and project-based research. The two-year program is designed for the student who seeks a career in the field of environmental art and social practice artmaking as these forms relate to environmental justice, social justice, public policy, and multimedia art practices, criticism, and theory. One of the first of its kind in the country integrating this dual focus, the program builds on the unique intellectual reputation of UC Santa Cruz as a leader in promoting social justice, ecological thinking, and inventive explorations of the nature/culture interface, and contributes to this ongoing legacy through the world-transforming potential of creative practice.

The field of environmental and social practice artmaking continues to develop rapidly in relation to the urgency of social and environmental pressures, requiring artists to learn new tools and strategies for effective engagement in society at large,
along with important aspects of traditional artistic training. Within this frame, the program invites students to utilize a breadth of approaches, art mediums, research methods, theoretical frameworks, and technologies ranging from the traditional to the most contemporary, with the understanding that all media can be relevant in developing new approaches and responses to environmental and social issues. The program’s interdisciplinary emphasis also encourages students to engage with other departments, divisions, centers, and faculty across the university to deepen and enrich their research, and to partner with groups and organizations outside the university in the development and execution of their projects.

Graduates of the program find employment in the art world and in academia as well as qualifying for job opportunities in hybrid and developing fields, including in green technology, environmental policy, public arts policy, community planning, public space design, and other forms of advising and design where creative approaches to problem-solving is called for. Depending on the focus of their thesis project, graduates’ access to academic positions is not limited to art practice fields, but may include political theory, humanities, and social issue curricula, as well as hybrid and cross-disciplinary art programs linked with science, social science, and the humanities. Graduates may also work as arts administrators in a variety of institutions or seek employment in curatorial positions, journalism, research, and editorial positions, as well as in audio-visual production and in the digital economy. Some graduates may also work as self-employed artists or in unique positions that defy existing job categories and are specifically tailored to their skills and interests.

Objectives

The M.F.A. in Environmental Art and Social Practice program supports the development of a student’s artistic practice in relation to issues and contexts relevant to these two related areas of study. The program aims to train students in practical skills as they relate to project-based arts research in the areas of: creative methodologies, critical analysis, historical perspectives, ethical standards, collaborative strategies, reflective critique, and art pedagogies.

Students learn to conceive and execute projects, articulate narratives to support their ideas, and establish working relationships with other practitioners in the field. They develop methods, perspectives, and concepts to support lifelong artistic inquiry and thriving careers, and to contribute to, and further develop, the emergent fields of environmental art and social practice.

Requirements

In the first year, students work collaboratively on practice-based research topics while studying methodologies, histories, theories and pedagogies relevant to the field. They also take electives relevant to their research interests chosen from course offerings throughout the university. In the spring of their first year they also take a 2-credit thesis course in which they develop a working bibliography and thesis outline.

In the second year, students develop and realize their thesis projects. They identify a focus and geographic location, find partners and design a project individually, or in collaboration. Each student’s creative research is supported by a series of core critique classes as well as electives chosen by the student to deepen their knowledge and fine-tune their research direction, and by 2 credits of thesis advising every quarter. In the spring of the second year they also take a 2-credit curatorial class focusing on the public presentation of their MFA research.

Course Requirements

A minimum of 72 credits are required for the Environmental Art and Social Practice MFA degree. Fifty-two credits are required core courses and 20 credits are electives.

First Year

Students take the following core courses in their first year. ART 230 can be taken in the first or second year.

<table>
<thead>

</table>

ART 299F is taken each quarter of the second year for a total of 6 credits.

Electives

Students take 20 credits of electives selected from the list of approved electives (p. 26). Additional courses at the university may fit into a student's research interests and be suitable as an elective. Students should consult their faculty advisor or director of graduate studies in the program if this is the case. Elective courses can come from other academic programs and departments at UC Santa Cruz or the Art Department, and are available throughout the academic year. Students may take up to 15 credits of upper-division art studio courses in addition to the courses specifically listed in the above link. Up to two 5-credit independent study courses may also contribute to fulfilling this requirement.
Other Requirements

First-Year Review

At the end of the spring quarter of their first year, students will undergo a first-year review by Art Department faculty in order to advance in the program. The review committee will be selected by the student and approved by the graduate program director and the dean of the Graduate Division. The review committee is comprised of the student’s faculty advisor, another Art Department Senate faculty member and a third faculty member who may either be in art, in another department at the university, or someone from outside the university whose expertise is relevant to the student's project and who can commit to following the student's progress through their thesis review in the spring of their second year. (The external committee members are selected based on their research interests and close work with the student). The same committee will later become the student’s Advancement to Candidacy and M.F.A. Thesis Review Committee.

The First-Year Review consists of a review and critique of creative research, along with confirmation that all first-year core courses and electives have been completed with satisfactory grades and in good academic standing. For the review, students submit a five-page paper outlining their creative research, and they perform an oral examination where they present their preliminary proposal for the project they will pursue for their second year. The committee will assess the student’s progress in terms of creative research, comprehension of methods, theories, and practices in environmental art and social practice, and commitment to the program.

Advancement to Candidacy and Capstone/Thesis

Advancement to candidacy happens in the fall quarter of the second year. At this time, students will present to their committee a final project proposal, revised and developed following the first year review, that will serve to direct their thesis research. Proposals will outline the focus of the project, conceptual and theoretical grounding, materials, location, partners and/or collaborators, preliminary annotated bibliography/list of related artworks, and a step-by-step plan for carrying out the project. Proposals will be evaluated based on clarity and quality of purpose, concept and plan, feasibility within the time-frame and budget proposed, evidence of established relationships with partners/collaborators, and potential to make a significant creative contribution to the field. The thesis committee must approve the thesis proposal/project outline no later than the end of the first quarter of the second year.

For the M.F.A. thesis capstone, each student is required to host a public exhibition and/or other public presentation of their creative work and submit a thesis paper that adequately defends their thesis, research, and findings, which will be no less than 25 pages. Students will also be required to pass an oral examination. The final exhibition may take place in the context of the group M.F.A. thesis exhibition or at a site off campus with an accompanying component in the group M.F.A. thesis exhibition. The M.F.A. thesis review committee will review each final thesis project in the spring quarter of the second year or after a student has completed a minimum of 72 credits.

While form and media will vary greatly, completed thesis projects will reflect original creative research and professional level production (individually or collaboratively authored), as well as command of the field.

Applying for Graduation

Students should contact the department advisor to confirm all requirements for the degree have been completed. Students must submit an Application for the M.F.A. to the department for review by the end of the second week of the quarter in which you intend to receive the certificate.

ENVIRONMENTAL ART AND SOCIAL PRACTICE M.F.A.

ELECTIVES

Approved Electives for the Environmental Art and Social Practice M.F.A.

In addition to the list below, students may take up to 15 credits of upper-division ART studio courses. Not all courses in this list are offered each year. Some courses may require consent of the instructor or have prerequisites. Consult with the affiliated department for more information.

DIGITAL ARTS AND NEW MEDIA
M.F.A.

Introduction
New technologies have profoundly changed contemporary culture and inevitably altered the role of the arts in society. The Digital Arts and New Media (DANM) Master of Fine Arts (M.F.A.) Program serves as a center for the development and study of digital media and the cultures that they have helped create. Faculty and students are drawn from a variety of backgrounds, such as the arts, computer engineering, humanities, the sciences, and social sciences, to pursue interdisciplinary artistic and scholarly research and production in the context of a broad examination of digital arts and cultures.

Curriculum
The DANM curriculum is designed to provide students with both the practical training and critical dialogue necessary to pursue their own individual goals as artists and cultural practitioners. The curriculum comprises core and research group-specific courses. Required core courses explore an array of recent methods and approaches in digital arts and culture. The research groups enable the student to pursue the construction of specific genealogies and theories with a sustained focus on a particular topic, by engaging in various dialogues at the intersection of theory and practice. While participating in the research group the students will also develop their thesis project and paper.

Research Groups
The DANM cohort is subdivided into research groups, each group of students focusing on a different research topic within the broader field of digital arts and new media. Each research group is led by a faculty member (or members) who serves as the faculty advisor to all students in their group. This faculty lead establishes a set of courses specific to their research topic, which are taken in addition to the core courses. Through these courses and faculty mentorship, students learn collaborative and practical research methodologies specific to their topic, have the opportunity to participate in professional-level academic research, and are provided a peer group pursuing similar research to their own. Coursework involves students working on faculty-initiated and -directed research projects, and creating their own related individual and collaborative projects. Research groups may also result in result in publications and exhibitions. The research experience and coursework in the research groups is intended to inform the student’s thesis project. Students are admitted into a specific research group, and generally take the courses specific to their group in their first year.

Research groups may vary in topic every three years, depending on participating faculty. The DANM Principal Faculty will review the progress of current research groups every spring quarter in relation to the overall direction of the program and needed areas of expansion or shift. For fall 2020 and beyond, admission there are the following research groups: Games and Playable Media, which explores radical approaches to interactive and playable media design; Future Stages which proposes a radical rethinking of live performance using critical and performative technologies, and the Isaac Julien lab which focuses on digital installation and multiple viewpoint technologies. The Isaac Julien lab also offers a concentration for students interested in media curating.

Applications
Prospective students in the Digital Arts and New Media program will have a foundation in the arts with some demonstrated interest in technology or a foundation in technology with demonstrated background in the arts. Many, but not all, entering students will have completed a Bachelor of Arts (B.A.) program in one or more of the arts disciplines (art or art history, film, multimedia, music, theater, video, etc.) or a Bachelor of Science (B.S.) program in computer science or computer or electrical engineering. Other successful applicants will have a B.A. or B.S. in another field but will be able to show substantial achievement in the arts, in technology, or in digital arts.

Prospective students are asked to identify their choice of research group in their application and statement of purpose. Admissions are tied to DANM research group foci. New students are admitted into a specific research group based on the quality and relevance of the student’s prior work and expertise in their chosen area of focus.

In certain cases, students who demonstrate excellent potential for the program but lack proficiency in a “cross discipline” will be admitted to the program with the understanding that they will take courses during their first two quarters of study to make up that deficiency. An arts student lacking sufficient programming experience, for example, will be expected to take one or two programming courses in their first two quarters in addition to the DANM program requirements.

Students will apply online through the Division of Graduate Studies website between October and January for the following fall quarter. In addition to submitting an online application, students will be expected to submit an online portfolio. Further information can be found at the Division of Graduate Studies website.

Requirements
The DANM M.F.A. Program requires 72 credits of academic course work. In the first year, students generally take three courses each term. In the second year, students primarily take elective courses, work with their thesis committees, and pursue independent and directed research leading to the completion of the thesis project and paper.

Course Requirements

Core Courses
The core courses explore an array of recent methods and approaches in digital arts and culture. All students complete each of the following courses. DANM 280 (a 2-credit course) is
taken every quarter (six times); DANM 299 is taken twice, in any two quarters of the second year.

DANM 201  Recent Methods and Approaches to Digital Arts and Culture  5
DANM 202  Dialogues and Questions in Digital Arts and Culture  5
DANM 211  Critique  5
DANM 212  Thesis Proposal  5
DANM 215  MFA Exhibition Production  5
DANM 280  Seminar in Digital Arts and New Media  2
DANM 299  Thesis Research  5

Research Group Courses

The faculty lead of each research group establishes a set of courses specific to their research topic, which are taken in addition to the core courses. Students are admitted into a specific research group, and take the courses specific to their group in their first year. Each research group and its courses are described below. There is a curricular planner specific to each group in the Planners section.

Experimental Play

Over the last 40 years we have seen a blossoming of new models of play. From the rise of the New Games movement and the role-playing game genre (in the 1970s) to the current moment’s rise of autobiographical, political, and independent art games on increasingly democratized platforms, to the emerging capabilities of augmented, virtual, and mixed reality platforms, we are changing who plays, how we play, and what play can mean. Each offering of the Experimental Play course will involve the creation of a different game prototype, reproducing this research group’s activity. A likely model is that one of these projects will be brought to completion as (part of) each student’s thesis work.

Experimental Play has three required courses; take the following course three times:

DANM 250E  Collaborative Research  5
            Project Group: Experimental Play

Future Stages

Future Stages investigates how we can stage “liveness” in a radically interconnected digital world and expand upon basic theatrical relationships in new and culturally relevant ways. Collaboration and integration of design, media, and storytelling are critical to this approach. Experimentation with new forms can reanimate the basic values of theater, foregrounding the essential nature of a live event and the creation of meaning in dialogue with an audience. By providing a laboratory environment with access to performance technologies, Future Stages will engage students in collaborative research and production that explore how media and narrative intersect in the cultural sphere.

Future Stages has six required courses; take all the courses below and THEA 294 is required to be taken twice. Students produce their thesis productions in THEA 151 Studies in Performance in either winter or spring of their second year.

THEA 151  Studies in Performance (Drama)  5
THEA 290A  Text Analysis  5
THEA 290B  Performance Histories  5
THEA 290C  Performance Analysis  5
THEA 294  Future Stages  5

The Isaac Julien Studio Lab

Engaging a range of artistic disciplines, students in this lab will draw upon moving and still images to create visual and sonic languages for production, exhibition and installation. While the commercial imperative, in our digital age, has dictated built-in obsolescence as an integral character of electronic media, this research group, in contrast, will consider the archive as an intrinsic part of a creative method—sampling, remixing, and reproduction. This research group invites artists who want to conceptualize, create, and exhibit works involving moving and still images.

The Isaac Julien Studio Lab has three required courses; take all the courses below and DANM 250F is required to be taken twice.

DANM 250F  Research Group: Isaac Julien Studio Lab  5
DANM 250G  Research Group: Isaac Julien Studio Lab - London Quarter  15

Elective Courses

Electives address areas of needed skill development or thesis topic specialization. In addition to Core and Research Group courses, some students must also take elective courses to meet the total 72-credit requirement, and/or maintain their full-time status in a given quarter. The number of elective courses to be taken is specific to the research group a student is in; see the Planners section below for details. The following DANM courses are approved as electives, but are not offered every year.

DANM 210  Project Design Studio  5
DANM 219  Introduction to Electronics for Artmaking  5
DANM 220  Introduction to Programming for the Arts  5
DANM 281  Special Topics in Digital Arts and New Media  5

Other Suggested Graduate Courses for Electives

Beyond the DANM elective courses listed above, generally any 5-credit graduate-level course may be counted for elective credit. Students are encouraged to consult with their advisors about choosing electives that directly support their thesis research. Independent studies can be counted for elective credit with approval of faculty advisor. Below is a list of suggested courses that may be of interest to DANM students. Please note courses may not be offered every year or may have prerequisites or restrictions on enrollment.

**Thesis Requirement**

Students are required to complete a thesis project and written paper under the supervision of their thesis committee. The thesis will be an arts project with digital documentation accompanied by a written paper. Thesis projects may be individual or collaborative and may grow out of the research pursued in the research groups during the three quarters prior as well as work developed in core courses. Each student will be expected to complete a paper discussing the student’s preparatory research as well as the theoretical significance of the project. In the case of collaborative projects, each student will be required to submit his or her own paper. During the thesis year, students will make at least two progress presentations to their thesis committee. A completed thesis project and paper must be submitted to and approved by the thesis committee before the degree can be awarded.

**Applying for Graduation**

By the end of the second week of the quarter of graduation, students complete the Application for Masters Degree form and submit to the DANM graduate adviser. After successfully completing an Oral Defense of their thesis, the student submits their completed thesis to ProQuest via upload, and a hard copy of their thesis title page, signed in ink by all thesis committee members, to the Graduate Division office.

Film and Digital Media B.A. (p. 31)
Film and Digital Media Minor (p. 41)
Social Documentation M.F.A. (p. 42)
Film and Digital Media Ph.D. (p. 44)
Film and Digital Media Designated Emphasis (p. 46)
Social Documentation Designated Emphasis (p. 46)

UNDERGRADUATE PROGRAM

How do I translate my ideas into images and sounds? What is the role of media in an era of climate crisis? Are documentaries real? Does social media change democracy? How does listening inform our understanding of culture and environment? How can we move toward an algorithmically ethical future? Who and what has been left out of the history of cinema and television? Do streaming services make film history more or less accessible? Who should be responsible for caring for historical media? How can the study of media contribute to forging a more just and sustainable future?

Sound, images and code shape today’s reality and our perspectives on the world. Students from diverse backgrounds join our program for its inclusiveness and the opportunity to explore media’s past, present and future in relation to race, ethnicity, gender and sexuality, class, intersectionality, community, place, and environment, among others.

The Film + Digital Media general major is neither strictly a theory program nor a production program; it is both—a liberal arts program using a rich toolbox of practical skills and collaborative strategies (writing, research, coding, editing, image making, recording, cinematography) to ask questions critical to our shared future. The major prepares students to analyze and contribute to an ever-evolving and interconnected landscape of film, TV, animation, games, software, social media, and other media forms. Courses in the major connect students with faculty research strengths in nonfiction media, screen representation and race, feminist media, queer theory, experimental and avant-garde movements, animation, games and playable media, global cinema, video and computer art, personal media, and collections and archives. Students in the program have many opportunities to work with one another and to work closely with faculty members as mentors, critics, and sponsors of independent studies. Together, we share the excitement of remaking the study of film and other media for the 21st century, equipping students to critique and produce in ways that will create a more just, inclusive, equitable, and environmentally sustainable world.

Our curriculum reflects an understanding that intellectual and creative work are related forms of production and inquiry. Undergraduates in Film + Digital Media may enroll in both critical studies and production-focused classes, and some of our classes incorporate overlapping skills and knowledge. Each of our pathways through the major equips our students with a foundation in historical and theoretical concepts, and exposes them to global and cross-cultural perspectives on a constantly widening media spectrum.

GRADUATE PROGRAM

The Doctor of Philosophy (Ph.D.) program in film and digital media challenges the traditionally conceived borders between creative and critical practice. The program enables dialogue between creative practice and theoretical knowledge as related forms of intellectual work and provides the conditions for students to realize a wide range of possible projects, including those that exist across the traditional divides of critical studies and production.

FILM AND DIGITAL MEDIA B.A.

Information and Policies

Introduction

Students in the general film and digital media major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium, while studying the cultural impact of television and the rise of video and digital art in recent decades.

The critical studies concentration is designed for film and digital media majors who have a special aptitude for and interest in the history and theory of film, television, video, and digital media. This rigorous program can help prepare undergraduates for graduate work in critical studies.

The integrated critical practice concentration is designed for film and digital media majors who have a special aptitude for and interest in combining work in critical studies and production. The concentration provides them with a more rigorous pathway through the major and, in their senior year, allows them to work on a senior project that integrates creative and intellectual work.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based, liberal arts perspective.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media
is available on the Film and Digital Media website. Students who earn a B.A. in film and digital media will gain the skills, knowledge, and understanding that will enable them to:

1. Demonstrate their ability to employ research skills, including the use of appropriate print and technology sources in the discipline, to construct effective arguments.
2. Demonstrate that they understand the pre-production, production, and postproduction digital media and filmmaking process.
3. Demonstrate the relationship between different types of form and meaning through the creation of film and digital media projects or the critical analysis of them.
4. Demonstrate their ability to work collaboratively to produce a film or digital media project.
5. Demonstrate broad knowledge of film and media history internationally.
6. Demonstrate scholarly writing skills appropriate to the discipline of film and digital media.
7. Demonstrate an ability to analyze, interpret, and critique films and media from a variety of theoretical perspectives using the critical vocabulary and methodologies of the discipline.
8. Demonstrate their ability to articulate and defend their research and practice in a critical environment.

Upper-division digital media and production studio courses require coursework to be completed on computers. Instruction in and software for production courses utilizes the macOS platform and primarily consists of Apple and Adobe video production software packages. Many UCSC students purchase laptop computers. Film and digital media students who are considering purchasing a laptop computer for production work are encouraged to consult with the department’s operations staff. A list of recommended computer configurations and information regarding education pricing on software packages is available on the Film and Digital Media website.

Academic Advising for the Program

Students seeking advice regarding the major may email fdmadvising@ucsc.edu or call the department’s main line at (831) 459-3204. Transfer students please also see the sections below regarding Transfer Information and Policy, Transfer Admission Screening Policy and Getting Started at UCSC as a Transfer Student.

Getting Started in the Major

Though no preparatory classes are required to be successful in the major, prospective students may opt to study introductory film analysis and production courses to become familiar with film and media concepts and techniques.

Program Learning Outcomes

Students who earn a B.A. in film and digital media will gain the skills, knowledge, and understanding that will enable them to:

1. Demonstrate their ability to employ research skills, including the use of appropriate print and technology sources in the discipline, to construct effective arguments.
2. Demonstrate that they understand the pre-production, production, and postproduction digital media and filmmaking process.
3. Demonstrate the relationship between different types of form and meaning through the creation of film and digital media projects or the critical analysis of them.
4. Demonstrate their ability to work collaboratively to produce a film or digital media project.
5. Demonstrate broad knowledge of film and media history internationally.
6. Demonstrate scholarly writing skills appropriate to the discipline of film and digital media.
7. Demonstrate an ability to analyze, interpret, and critique films and media from a variety of theoretical perspectives using the critical vocabulary and methodologies of the discipline.
8. Demonstrate their ability to articulate and defend their research and practice in a critical environment.

Major Qualification Policy and Declaration Process

Major Qualification

Declaration of the Film and Digital Media Major

Prior to declaring the film and digital media major, students must pass FILM 20A and either FILM 20B or FILM 20C with a grade of C or better. Students may choose to take FILM 20P to fulfill the third lower-division requirement but this course does not count toward declaring the major.

Students who are approaching the campus declaration deadline and have not passed FILM 20A and either FILM 20B or FILM 20C, or their transfer equivalents, may petition to declare the major: they will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) to be resolved within at most one more enrolled quarter.

Acceptance into the film and digital media major does not constitute acceptance into any of the concentrations (critical studies or integrated critical practice). Transfer students should also consult the Transfer and Information Policy section for instructions about declaring the major.

Appeal Process

Students may appeal a negative decision within 15 days by submitting an appeal letter to the Film and Digital Media undergraduate advisor. The department will notify the student of the outcome within 15 days of receipt of the appeal.

How to Declare a Major

All students are required to attend a declaration of major workshop in order to officially declare the major. Declaration workshops are offered each quarter before the deadline to declare and are posted on the department’s website. Please contact fdmadvising@ucsc.edu with questions.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Prospective transfer students entering at the junior level are encouraged to complete FILM
20A through UCSC Summer Session prior to their transfer, especially if they will be pursuing one of the concentrations available. Transfer students should be able to complete the general major within two years.

Students who have not fulfilled their general education requirements prior to transferring and pursue one of the film and digital media concentrations, a double major or minor, or study abroad may need additional time to complete their requirements.

Getting Started at UCSC as a Transfer Student

All transfer students must enroll in at least one lower-division major course (FILM 20A, FILM 20B, or FILM 20C) during their first quarter in residence. Transfer students are strongly encouraged to enroll in FILM 20A during the Summer Session preceding their first quarter in residence. At least one course out of FILM 20A, FILM 20B, or FILM 20C must be taken at UCSC. Transfer students who wish to have equivalent lower-division courses count toward their film and digital media major requirements must petition the department unless the courses are articulated at assist.org.

Letter Grade Policy

Students pursuing this major must take the courses required to declare, FILM 20A, FILM 20B and/or FILM 20C for a letter grade.

[Optional Catchall]

Course Substitution Policy

The department allows up to two courses to substitute for major requirements. At least one course out of FILM 20A, FILM 20B, or FILM 20C must be taken at UCSC.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The department strongly encourages students to explore studying abroad while attending UCSC. We allow up to two courses from abroad to substitute for major requirements. See Course Substitution Policy above for details. An exception is allowed for students who are in the Sussex Exchange Program which allows up to three course substitutions if approved by our faculty. The department also offers a direct exchange program with the University of Bergen in Norway.

Honors

Honors in film and digital media are awarded to graduating seniors whose academic performance in their major coursework is judged by a faculty committee to be consistently excellent to outstanding. Students must have at least a cumulative GPA of 3.5 in the major to be considered for Honors.

Three Year Pathway

The Film and Digital Media Department has a three-year pathway designed for students who want to complete their Film and Digital Media B.A. in three years. It is an intensive program which includes all of the courses for the current film and digital media general major as well as all general education requirements and electives required for the university. Students may complete all courses required for the general major only. No concentration options are available for this pathway, though the general major does allow students to take up to two production courses. Students should begin this pathway in their frosh year to be able to complete the required courses in three years. A sample planner can be found on the university advising website. For more information, contact the undergraduate advisor.

General Film and Digital Media Major

The general film and digital media major requires three lower-division and nine upper-division courses in residence and satisfaction of the senior comprehensive requirement. Students must include among these 13 courses at least one upper-division, 5-credit course that focuses on diversity (i.e., non-Western perspectives; races/ethnicities, genders, classes, sexualities or abilities). A list of courses satisfying the department’s diversity requirement is available at the department office. Students in the general film and digital media major may apply for admission to the critical studies concentration (see Critical Studies Concentration below), or the more rigorous integrated critical practice concentration (see Integrated Critical Practice Concentration below) within the major.

Course Requirements

Lower-Division Courses

FILM 20A Introduction to Film Studies 5

Two additional 20-level courses:

FILM 20B Introduction to Television Studies 5
FILM 20C Introduction to Digital Media 5
FILM 20P Introduction to Production Technique 5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Core Curriculum

Students in the general major complete the following required upper-division core curriculum:

FILM 120 Introduction to Media Theory 5

One course from each of the following three groups:

Group 1:
FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5

Group 2:
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5
Group 3:
FILM 136A Experimental Film and Video 5
FILM 136B History of Television 5
FILM 136C Visual Culture and Technology: History of New Media 5
FILM 136D Documentary Film and Video 5

Plus one course from the following to satisfy the senior comprehensive requirement:
FILM 194A Film Theory Seminar 5
FILM 194B Electronic Media Theory Seminar 5
FILM 194C New Media Theory Seminar 5
FILM 194D Film History Seminar 5
FILM 194E International Cinemas 5
FILM 194F Film and the Other Arts 5
FILM 194G New(s) Media Filmmaking 5
FILM 194H Ethics and Documentary Filmmaking 5
FILM 194S Special Topics Seminar 5

Electives
Five upper-division elective courses are to be chosen from the following:
• up to five additional upper-division critical studies courses in film and digital media (see Electives for the Integrated Critical Practice Concentration for a list of upper-division critical studies courses)
• up to two upper-division courses in film and digital media production (see Integrated Critical Practice Concentration for a list of upper-division production courses)
• up to two upper-division courses offered by other departments or another institution; course substitutions must be pre-approved by the Film and Digital Media Department
• at least one course must focus on diversity, i.e. non-Western perspectives; races/ethnicities, genders, classes, sexualities, or abilities. See list below.

Courses that Satisfy the Diversity Requirement
ANTH 110P India and Indian Diaspora through Film 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5
FILM 165A Film, Video, and Gender 5
FILM 165B Race on Screen 5
FILM 165C Lesbian, Gay, and Queer Film and Video 5
FILM 165D Asian Americans and Media 5
FILM 165E Chicana/o Cinema, Video 5
FILM 165G Gender and Global Cinema 5
HAVC 141O Sex, Lies, and Surveillance: Contemporary Documentary Arts 5
LALS 122 Media and Nationalism 5
LALS 124 Brazilian Cinema 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and guidance about the major's DC requirement from the department's undergraduate advisor.

The DC requirement is met by passing one course from each of the two following categories:

First Category
FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5

Second category:
FILM 194A Film Theory Seminar 5
FILM 194B Electronic Media Theory Seminar 5
FILM 194C New Media Theory Seminar 5
FILM 194D Film History Seminar 5
FILM 194E International Cinemas 5
FILM 194F Film and the Other Arts 5
FILM 194G New(s) Media Filmmaking 5
FILM 194H Ethics and Documentary Filmmaking 5
FILM 194S Special Topics Seminar 5
FILM 196A Senior Project in Narrative Production 5
FILM 196B Senior Project in Screenwriting 5
FILM 196C Senior Documentary Workshop 5
FILM 197 Senior Digital Media Workshop 5

Comprehensive Requirement
Senior Seminar
Seniors in the general film and digital media major satisfy the comprehensive requirement with a senior seminar (courses in the FILM 194 series).
FILM 194A Film Theory Seminar 5
FILM 194B Electronic Media Theory Seminar 5
FILM 194C New Media Theory Seminar 5
FILM 194D Film History Seminar 5
FILM 194E International Cinemas 5
FILM 194F Film and the Other Arts 5
FILM 194G New(s) Media Filmmaking 5
FILM 194H Ethics and Documentary Filmmaking 5
FILM 194S Special Topics Seminar 5
**Planners**

Plan One is a guideline for students committed to the major early in their academic career and interested in pursuing a concentration; Plan Two is a guideline for students considering the major after their freshman year.

Students who are interested in the critical studies concentration, or the integrated critical practice concentration should consider Plan One to be better prepared for the application process to the concentrations. However, four-year students following Plan Two may also be able to pursue a concentration and still meet their expected graduation term.

</tbody>
</table>
**Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective.

**The following general education requirements can be satisfied with Film and Digital Media courses: IM, ER, CC, PE-T, PR-E, PR-C, DC. General education requirements not satisfied with Film and Digital Media courses are: MF, SI, SR, TA, C

**Critical Studies Concentration

The critical studies concentration provides a more rigorous pathway than the general major and offers classes specifically reserved for seniors who have exceptional abilities. Students are eligible to apply for the critical studies concentration in spring quarter of their junior year, provided they have completed or are currently enrolled in FILM 120 and at least three other upper-division critical studies classes. Applicants must already be declared film and digital media majors in good academic standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- a Film and Digital Media (FDM) faculty statement of support (submitted directly to the department)

Application materials and instructions are available at the Film and Digital Media Department office. Applications are reviewed by a committee of film and digital media critical studies faculty. Admission to the critical studies concentration will be granted to students who have excellent grades in film and digital media courses, an outstanding writing sample, a clear statement of purpose, and a strong FDM faculty endorsement. Students may reapply a second time if not accepted, but not later than the first quarter of their senior year. Students accepted in the fall quarter of their senior year are not eligible to propose a student-directed seminar as part of their senior comprehensive requirement.

**Course Requirements

**Lower-Division Courses

<table>

<td>Tutorial</td>
<td>5</td>
</tr>
</tbody>
</table>
FILM 199 supervised independent study for thesis or student-directed seminar preparation

Plus one of the following courses:
FILM 192 Directed Student Teaching 5
FILM 195 Senior Thesis/Project 5

Electives
Two upper-division elective courses are to be chosen from the following:
- up to two additional upper-division critical studies courses in film and digital media (see Electives for the Integrated Critical Practice Concentration for a list of upper-division critical studies courses)
- up to one upper-division course in film and digital media production (see the Integrated Critical Practice Concentration for a list of upper-division production courses)
- up to one upper-division course offered by other departments; course substitutions must be pre-approved by the Film and Digital Media Department

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and guidance about the major's DC requirement from the department's undergraduate advisor.

The DC requirement is met by passing one course from each of the two following categories:

First category
FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5

Second category
FILM 194A Film Theory Seminar 5
FILM 194B Electronic Media Theory Seminar 5
FILM 194C New Media Theory Seminar 5
FILM 194D Film History Seminar 5
FILM 194E International Cinemas 5
FILM 194F Film and the Other Arts 5
FILM 194G New(s) Media 5
FILM 194H Ethics and Documentary Filmmaking 5
FILM 194S Special Topics Seminar 5
FILM 196A Senior Project in Narrative Production 5
FILM 196B Senior Project in Screenwriting 5
FILM 196C Senior Documentary Workshop 5
FILM 197 Senior Digital Media Workshop 5

Choose one of the following courses:
FILM 192 Directed Student Teaching 5
FILM 195 Senior Thesis/Project 5

Comprehensive Requirement
Seniors in the critical studies concentration must complete the following to satisfy the campus exit requirement:

Plus one of the following courses
FILM 192 Directed Student Teaching 5
FILM 195 Senior Thesis/Project 5

Planners
The following is a sample academic plan for students pursuing the critical studies concentration for the film and digital media major.

Plan One

<table>

*Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective.

**The following general education requirements can be satisfied with Film and Digital Media courses: IM, ER, CC, PE-T, PR-E, PR-C, DC. General education requirements not satisfied with Film and Digital Media courses are: MF, SI, SR, TA, C

Integrated Critical Practice Concentration

The integrated critical practice concentration (ICPC) provides a more rigorous pathway than the general major and offers classes specifically reserved for seniors with exceptional abilities in both critical studies and production who seek to combine creative and scholarly work. Students are eligible to apply for the integrated critical practice concentration in the last quarter of their junior year, provided they have completed or are currently enrolled in FILM 120; at least three other upper-division critical studies classes; and have completed FILM 170A or FILM 170B plus one other course from the 150 or 170 series. Applicants must already be declared film and digital media majors in good academic standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- a FDM faculty statement of support (submitted directly to the department)

Application materials and instructions are available at the Film and Digital Media Department office. Student application materials are reviewed by a committee of film and digital media faculty. Admission to the integrated critical practice concentration will be granted to students who have excellent grades in film and digital media courses, an outstanding writing sample, a clear statement of purpose outlining a senior project that integrates critical studies and production work, and a strong FDM faculty endorsement. Students may apply a second time if not accepted, but not later than the first quarter of their senior year.

Course Requirements

Lower-Division Courses

- FILM 20A  Introduction to Film Studies 5
- FILM 20B  Introduction to Television Studies 5
- FILM 20C  Introduction to Digital Media 5
- FILM 20P  Introduction to Production Technique 5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Students in the integrated critical practice concentration complete the following required upper-division core curriculum:

- FILM 120  Introduction to Media Theory 5

One course from each of the following five groups

**Group 1:**

- FILM 130  Silent Cinema 5
- FILM 132A  International Cinema to 1960 5
- FILM 132B  International Cinema, 1960 to Present 5

**Group 2:**

- FILM 134A  American Film, 1930-1960 5
- FILM 134B  American Film, 1960-Present 5

**Group 3:**

- FILM 136A  Experimental Film and Video 5
- FILM 136B  History of Television 5
FILM 136C Visual Culture and Technology: History of New Media 5
FILM 136D Documentary Film and Video 5

Group 4:
FILM 170A Fundamentals of Digital Media Production 5
FILM 170B Fundamentals of Film and Video Production 5

Group 5:
FILM 194A Film Theory Seminar 5
FILM 194B Electronic Media Theory Seminar 5
FILM 194C New Media Theory Seminar 5
FILM 194D Film History Seminar 5
FILM 194E International Cinemas 5
FILM 194F Film and the Other Arts 5
FILM 194G New(s) Media Ethics and Documentary Filmmaking 5
FILM 194S Special Topics Seminar 5

Two courses to satisfy the senior comprehensive requirement:
The following course:
FILM 199 Tutorial 5

Plus one of the following courses:
FILM 195 Senior Thesis/Project 5
FILM 196A Senior Project in Narrative Production 5
FILM 196B Senior Project in Screenwriting 5
FILM 196C Senior Documentary Workshop 5
FILM 197 Senior Digital Media Workshop 5

Electives
Five upper-division elective courses to be chosen from the following:

Two upper-division critical studies courses
In film and digital media chosen from the following:
FILM 160 Film Genres 5
FILM 162 Film Authors 5
FILM 165A Film, Video, and Gender 5
FILM 165B Race on Screen 5
FILM 165C Lesbian, Gay, and Queer Film and Video 5
FILM 165D Asian Americans and Media 5
FILM 165E Chicana/o Cinema, Video 5
FILM 165G Gender and Global Cinema 5
FILM 168 National Cinema and Culture: Morocco 5
FILM 168M National Cinema and Culture: Morocco 5
FILM 180 Writing About Film, Television, and Digital Media 5

FILM 185D Sound and Image in Theory and Criticism 5
FILM 185R The Film Remake 5
FILM 185S Advanced Topics in Film Studies 5
FILM 185X EyeCandy Seminar 5
FILM 187 Advanced Topics in Television Studies 5
FILM 189 Advanced Topics in Digital and Electronic Media Studies 5

Three upper-division production courses
In film and digital media chosen from the following:
FILM 150 Screenwriting 5
FILM 151 Film Directing 5
FILM 170A Fundamentals of Digital Media Production 5
FILM 170B Fundamentals of Film and Video Production 5
FILM 171A Sound 5
FILM 171C Special Topics Workshop: Found Footage 5
FILM 171D Social Information Spaces 5
FILM 171F Special Topics Workshop: Autobiographical Film 5
FILM 171S Special Topics in Film and Digital Media Production 5
FILM 172 Narrative Video Workshop 5
FILM 173 Narrative Digital Media Workshop 5
FILM 175 Documentary Video Workshop 5
FILM 176 Experimental Video Workshop 5
FILM 177 Digital Media Workshop: Computer as Medium 5
FILM 178A Personal Computers in Film and Video 5
FILM 178B Advanced Personal Computers in Film and Video 5
FILM 179A Special Topics in Animation 5
FILM 179B Documentary Animation Workshop 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and guidance about the major's DC requirement from the department's undergraduate advisor.

The DC requirement is met by passing one course from each of the two following categories:

First category
FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5

#### Planners

The following are two recommended academic plans for students pursuing the integrated critical practice concentration for the film and digital media major. Plan One is a guideline for students committed to the major early in their academic career; Plan Two is for students considering the major.

Students who are interested in the integrated critical practice concentration should consider Plan One to be better prepared for application to production studio classes in their junior year. However, four-year students following Plan Two should be able to pursue a concentration and still meet their expected graduation term. FILM 20A is not guaranteed to any incoming frosh and most four-year students will use Plan Two as a guideline.

*Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective.

**The following general education requirements can be satisfied with Film and Digital Media courses: IM, ER, CC, PE-T, PR-E, PR-C, DC. General education requirements not satisfied with Film and Digital Media courses are: MF, SI, SR, TA, C

FilM and Digital Media Minor

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines. Students earn a minor in film and digital media by completing eight courses: FILM 20A and either FILM 20B or FILM 20C, and six upper-division courses including three from the core curriculum of the general major and three electives. There is no production component in the minor, nor is there a comprehensive requirement.

Declaring the Film and Digital Media Minor

Students who pass FILM 20A, FILM 20B or FILM 20C are eligible to declare the film and digital media minor. To enroll in these classes, students contact the instructor and request a permission code.

Course Requirements

Lower-Division Courses

Complete the following course:
FILM 20A Introduction to Film Studies 5

Plus one of the following courses:
FILM 20B Introduction to Television Studies 5
FILM 20C Introduction to Digital Media 5

Upper-Division Courses

Students in the minor must complete the following upper-division core curriculum.

One course from each of the following three groups:

Choose one of the following courses:
FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5

Plus one of the following courses:
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5

Plus one of the following courses:
FILM 136A Experimental Film and Video 5
FILM 136B History of Television 5
FILM 136C Visual Culture and Technology: History of New Media 5
FILM 136D Documentary Film and Video 5

And three upper-division elective courses to be chosen from the following:

Any three additional upper-division film and digital media critical studies courses other than production studio courses (FILM 150, FILM 151, FILM 170A through FILM 179B) that have not been used to satisfy the above upper-division core curriculum. One of the electives may be substituted from another department or institution. Course substitutions must be approved by the Film and Digital Media Department.

FILM 130 Silent Cinema 5
FILM 132A International Cinema to 1960 5
FILM 132B International Cinema, 1960 to Present 5
FILM 134A American Film, 1930-1960 5
FILM 134B American Film, 1960-Present 5
FILM 136A Experimental Film and Video 5
FILM 136B History of Television 5
The Master’s of Fine Arts (M.F.A.) in Social Documentation (SocDoc) is an innovative and unique interdisciplinary two-year program in the Film and Digital Media Department (FDM) that trains students to critically analyze, frame and reflect upon contemporary social issues through the art of documentary media. SocDoc M.F.A. students produce documentary video, photography and other media throughout the program culminating in well-researched, socially engaged and aesthetically crafted thesis project. In a rapidly expanding and changing field, the Social Documentation M.F.A. invites students to investigate critical social issues through an interdisciplinary approach that fuses arts based, social science and humanities research methods to the art of documentary media and storytelling. We don’t just tell a story; our students go beyond the story to place individuals in context and struggles in history, deepening the public’s understanding of the societies in which we live and with which we connect.

Documentaries produced in the program have called attention to a range of under-recognized communities, problems, and structural inadequacies.

Upon completion of the program, Master’s of Fine Arts graduates will be qualified to enter a range of documentary-related professions. Degree holders may work within industries such as public broadcasting, as independent producers and artists, at archives or museums, or within organizations committed to exploring the relationships between media and social change. As a terminal degree, M.F.A. degree holders are also qualified to teach arts, documentary and/or digital media at institutions of higher learning.

Objectives

The Social Documentation M.F.A. program aims to train graduate students in critical thinking, social science analysis, arts-based approaches, and ethical standards for engaging with and documenting underrepresented communities. Additionally, students receive training in video production, animation and new media. In supplement to this broad curriculum, the FDM Department offers one-to-two-day master classes in audio and visual production taught by professionals in the field. The program’s advisor structure requires M.F.A. students to work with faculty from FDM and across the UCSC campus, providing students with a broad range of research approaches and aesthetic models for documentary practice. For example, a student may take courses in anthropology, feminist studies, history, literature and sociology wherein they learn social science and humanities research methodologies related to their topic of study. And a student will take a variety of required and elective courses within the Film and Digital Media Department where they will engage with the history and theory of documentary representations and receive technical instruction and professionalization in a variety of production and post-production techniques.

The core curriculum concentrates on critical approaches to the production of documentary media and on the role of documentary in framing and effecting social change. M.F.A. candidates may work in film or video; in photography (a book, a photo essay, gallery exhibition and/or time-based media); animation and multimedia; audio productions; and/or transmedia and web-platform projects. Graduates are expected to generate work that will have an impact on the world outside the academy and in the public realm. The M.F.A. thesis project, which constitutes the culmination of the two years of study, is to be given a public exhibition and becomes the springboard for continuing work after graduation.

Requirements

Course Requirements

The Social Documentation M.F.A. program offers a required and foundational core curriculum in the theory, history and practice of social documentary. Students work with three faculty advisors to design an individualized course of study that supplements the core curriculum with classes that support the student’s specific project, both in terms of content and technical production. Toward that end, students take elective courses in their area of interest in the social sciences and/or humanities,
write and develop a written thesis, and then create a final documentary media project.

A total of 72 credits is required to complete the SocDoc M.F.A. Required courses include seminars on social documentary history, practice, theory, and social science research; and technical instruction on production and post-production processes and techniques. Full-time enrollment is required.

### Additional Course Requirements

#### Electives (15 credits)

In addition to the required courses above, 15 credits of electives (offered by departments) are identified individually in consultation with the director of Graduate Studies and faculty advisors. SocDoc students choose elective courses based on their research needs and interests and will be advised to take graduate elective courses offered by their thesis advisors. Students may also elect to take independent studies with their advisors as a form of concentrated study in a specialized area.

### Advancing to Candidacy

To satisfy requirements for the M.F.A. degree, a student must complete and pass all of the required first-year courses and electives, assemble a committee of three advisors, develop a thesis proposal and successfully pass a qualifying examination (QE). The thesis proposal serves as the basis for the QE and includes: a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works.

Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master’s project. The successful pre-qualifying examination proposal should address the following questions:

- What is the story to be told?
- What is the social analysis that will guide, inform, and underwrite the story?
- What is the social analysis that will guide, inform, and underwrite the story?
- How will the documentary use social analysis to make the personal political, and how will it move from analysis to critique?

The second year is focused on completion of the final documentary project, required for the M.F.A. degree. This project must reflect original research and creative activity while demonstrating a command of the field or topic of study. With an understanding of budgetary, equipment, and time limitations, students’ projects should reflect a level of quality appropriate for publication, exhibition, or broadcast (including digital/webcast).

Typically, the expectation in each medium is as follows:

#### Documentary Film/Video

- One 20-minute documentary suitable for professional distribution and public exhibition.

#### Documentary Photography

- One major exhibition on or off campus with a minimum of 10-20 images with text, and/or a 10-minute multimedia presentation and/or a publication-ready book of photographs and essay(s).

#### Documentary Animation

- One complete documentary animation suitable for professional distribution and public exhibition.

#### Transmedia Projects

- One complete documentary transmedia project suitable for professional distribution and public exhibition.

#### Audio Documentary/Sound Recording

- One 20-30-minute documentary suitable for radio broadcast or museum/public installation.

The final M.F.A. critique consists of a presentation and discussion of the student’s thesis work with their three advisors. In addition, every project must be accompanied by a written M.F.A. thesis describing its relationship to its field and must document its research via field notes, bibliographies, archival searches, filmographies, videographies, and photography searches. Final deliverables also include a basic website for the thesis project along with production stills, a press kit, and a draft civic engagement campaign. A public presentation of the project will complete graduation requirements. All materials will be filed in digital form and archived for future reference and access. All final projects, in every medium, must be
Applying for Graduation

You must submit an Application for the M.F.A. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirements the quarter you intend to graduate.

For additional forms and information please visit the UCSC Graduate Division website.

FILM AND DIGITAL MEDIA PH.D.

Introduction

Focusing on a diverse range of cultural production that includes cinema, television, video art, and Internet-based media, Ph.D. students interrogate the historical, aesthetic, political, ideological, and technological aspects of these media forms across a range of international contexts, investigating their points of connection and convergence as well as their relationship to broader cultural and historical change. The program thus prepares students for intellectually informed creative practice as well as theoretical and critical production in a range of environments, not limited to traditional academic contexts.

Advancement to Candidacy

Course Requirements

- A minimum of 108 units of study in coursework at UC Santa Cruz. Residence for a minimum of six quarters.
- Applicants who already hold an M.A. or M.F.A. degree may petition to waive up to 30 credits of coursework; including up to two of the six required Film and Digital Media (FDM) Ph.D. electives; such a waiver is subject to the approval of the director of Graduate Studies. Such a waiver would advance the normative timeline described below; students will determine the exact timing of milestones with their advisors and the director of Graduate Studies.
- Residence for a minimum of six quarters.
- When in residence, students will take a minimum of 36 credits per year until advancement to candidacy.
- First-year students will be required to take the three foundational courses (FILM 200A-FILM 200B-FILM 200C), FILM 202 (Pedagogy in Film and Digital Media, 2 credits), plus at least two film and digital media graduate elective courses.*
- Second-year students must then take at least four film and digital media graduate elective courses.*
- FILM 203 (Professional Development in Film and Digital Media) is a required course, to be taken after the first year.
- Students are not permitted to enroll in FILM 295 (Directed Reading) classes during their first year and are limited to one during their second year, unless they enter the program with an M.A. or M.F.A.
- Third-year students arrange three Directed Readings (FILM 295) to prepare for the three topic areas of their qualifying examination.
- Prior to advancing to candidacy, students will continue to meet the minimum number of credits with other 2-5 credit elective courses as appropriate.
- A student will thus take at least nine film and digital media graduate courses over the degree, not including FILM 295, FILM 297 and FILM 299 classes.
- The remaining course units may be selected from film and digital media graduate courses or graduate courses other departments, subject to approval from the student’s faculty advisor.
- Students must obtain permission from the director of Graduate Studies, their faculty advisor to take advanced undergraduate courses.
- Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

*Non-film and digital media graduate courses that are taught by film and digital media faculty can count as film and digital media graduate electives. Graduate electives in this category are listed in the annual and quarterly courses posted on the Programs page on department’s website, select Courses.

Foreign Language Requirements

Students must demonstrate proficiency in a language other than English. This may include a computer programming language instead of a natural language when such a language is integral to the student’s field of study. The language requirement may be satisfied in one of two ways:

- by passing an upper-division course in a language related to the student’s research;
- by passing a reading proficiency test administered by a qualified person approved by the director of Graduate Studies.

A student must pass the language requirement before taking Ph.D. qualifying examinations. There are three exceptions. (Documentation for the exception must be received and approved by the director of Graduate Studies at least two months before the qualifying examination.)
• The “foreign” language requirement may be waived for a non-English native speaker who has passed the proficiency test in English required for admission.

• The requirement may be waived for a student who is a native speaker of another language in addition to English. The student must submit a statement to the director of Graduate Studies attesting to their proficiency in the additional native language.

• The requirement may be waived if a student has proof of proficiency in a language other than English in the form of a language major or minor from recent undergraduate or master’s level education or equivalent. This must have been completed within the past five years at an accredited institution.

**Teaching Requirement**

Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

**Pre-Qualifying Requirements**

During the first year of study in FILM 200A–FILM 200B–FILM 200C classes, students will be introduced to the methodologies of developing a critical practice approach. This will occur while students simultaneously strengthen, with the appropriate elective classes, areas of theory or practice that pertain to their focus.

During the second year, the student will focus on selecting classes from the film and digital media elective series numbered FILM 200–FILM 289. Students will also be encouraged to take electives from other graduate programs on campus.

At the end of the second year, students undergo a second year review which functions as the master’s examination. Students will submit four to five coursework projects for the examination. One of these must be the final project from FILM 200C. Students will also submit a statement about that work and its contexts, which will form the basis for oral examination questions by faculty members.

Students may nominate faculty members to the committee. The student’s faculty advisor and the director of Graduate Studies will assemble the committee, taking into account the student’s nominations. The committee will have a minimum of three faculty members, at least two of whom must be from the film and digital media faculty. One of those two must be the faculty advisor, who will chair the meeting. The committee must also include the director of Graduate Studies. (The director of Graduate Studies will not necessarily sit on the student’s committee for future exams/reviews.) The examination is closed; only the student and the faculty committee will be present.

For students entering without a master's degree, the committee will recommend one of three grades for the M.A. examination: fail, pass, or pass with permission to proceed. Students who fail may retake the oral component of the examination one time. A student with a pass only may leave the program with the degree of master of arts. Students who pass with permission to proceed may enter the third year of coursework toward the Ph.D. For students entering with a master's degree, the committee will discuss the result of the review and its recommendations for further progress in the program, including the timeline to the Ph.D. qualifying examination (QE).

**Qualifying Examination**

The third year will be spent developing three qualifying examination topics that will lead to the dissertation in close consultation with the student’s faculty advisor. (This may occur earlier for students who enter with a master’s degree.) Students work with three faculty members to develop three distinct topic areas with a corresponding bibliography/mediagraphy in FILM 295 (Directed Reading). Topic areas must be pre-approved by the director of Graduate Studies who will ensure that the breadth requirement is met.

Students will also begin assembling a qualifying examination (QE) committee. The QE committee will be comprised of three faculty members, at least one of whom must be from another discipline at UC Santa Cruz or from another campus. Students will also nominate a faculty member to chair the examination committee. The chair should be a tenured faculty member from the Film and Digital Media Department, holding a Ph.D., but should not be the student’s primary faculty advisor or the person who will chair the dissertation. The composition of the QE committee must be approved by the Graduate Division and must be submitted to the director of Graduate Studies at least five weeks prior to the written examination.

The qualifying examination will typically be scheduled for the fall of the fourth year and no later than the end of the fourth year. (Students who enter with a master’s degree may be eligible to take the qualifying examination before their fourth year.) The QE will consist of a written examination and an oral examination. A student who fails the Ph.D. qualifying examination will be permitted to re-take it one time. During the qualifying examination quarter, students may enroll in up to two FILM 299 (Thesis Research) classes with members of their committee.

**Post-Qualifying Examination Requirements**

No later than two academic quarters after successfully passing the qualifying examination, students must submit and defend a Dissertation Prospectus. The candidate’s dissertation committee must approve this prospectus. After the dissertation prospectus has been approved, the student will schedule a dissertation colloquium open to all film and digital media faculty and graduate students. The colloquium can be scheduled before or shortly after the official advancement to candidacy.

Students will advance to candidacy once they have successfully:

- completed all required coursework with satisfactory grade;
- satisfied the language requirement;
- passed the Ph.D. qualifying examination;
- organized an approved dissertation committee, through the dissertation nomination form; and
• defended a dissertation prospectus and had it approved by their dissertation committee.

[Optional Catchall]

Dissertation

Completion of the Degree

Upon successful advancement to candidacy, students must then complete the following requirements for the Ph.D.

The dissertation, or Ph.D. thesis, is to be an original contribution of high quality to the field of film and digital media. If a student’s thesis contains a substantial creative component, the thesis project must also include a written component of no less than 75 pages. The dissertation must be approved by a committee consisting of a minimum of three faculty members. The dissertation chair must be a film and digital media faculty member and at least two committee members must be from the film and digital media faculty. If the dissertation chair does not hold a Ph.D. degree, then the majority of the remaining committee members must hold Ph.D.s. Also, the majority of the dissertation committee membership shall be members of the Santa Cruz Division of the Academic Senate.

The Ph.D. candidate shall submit the dissertation providing a minimum of 45 days for the committee members to review it. Once the committee has deemed it ready to defend, the candidate will work with the department and committee to schedule the oral dissertation defense.

Dissertation Defense

The oral defense will be comprised of a brief introduction of the dissertation’s form and content, and an articulation of the scholarly and artistic intervention it forges; the student will then answer questions posed by their dissertation committee. Invited members of the academic community may attend the defense, but the discussion will remain among the candidate and the committee.

Once the student has passed the oral dissertation defense, responds to any questions or suggestions for revisions, and has the dissertation approved by the committee, they will be eligible to “Announce Candidacy for Ph.D.” by submitting the dissertation and required documents to the Division of Graduate Studies.

Academic Progress

Normative time for completion of the program is six years. The first two years of the program are primarily devoted to coursework. Preliminary exams for the master’s degree occur in the spring of the second year. By the end of the third year, students should have formulated a dissertation topic and proposal deriving from their work in that year and should have nominated a Ph.D. qualifying examination committee and dissertation committee. Qualifying examinations for advancement to Ph.D. candidacy typically occur in the fall of the fourth year. These are approximate timelines, subject to variation depending on previous degree(s), transfer credits, substitutions, progress in program, leaves and/or other factors.

[Optional Catchall]

Applying for Graduation

You must submit an application for the Ph.D. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirement the quarter you intend to graduate.

For additional forms and information please visit the UCSC Graduate Division website.

[Optional Catchall]

FILM AND DIGITAL MEDIA DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in film and digital media as part of their Ph.D. degree.

Requirements

Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals

Secure approval from a member of the film and digital media core faculty to serve as the advisor for the designated emphasis.

Course Requirements

Successfully complete four graduate courses (not independent studies) taught by either core or affiliated faculty of the film and digital media Ph.D. program. The courses must be pre-approved by the student's designated emphasis advisor.

Writing, Research and/or Teaching Requirements

Submit a significant piece of writing, or a project that includes both writing and creative practice, that demonstrates competence in the field of film and digital media. A writing submission could take the form of a seminar paper or dissertation chapter. A writing/creative project may be constituted from a range of possible media such as film, video, web-based or other digital media. The submitted project must meet the approval of the student's film and digital media advisor.

[Optional Catchall]

SOCIAL DOCUMENTATION
DESIGNATED EMPHASIS

Introduction
UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in social documentation as part of their doctoral or master of fine arts degree.

Requirements
Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals
Secure approval from a member of the Film and Digital Media (FDM) faculty to serve as the adviser for the designated emphasis.

Have one faculty member from the FDM faculty serve on the student’s qualifying examination committee or dissertation committee.

Course Requirements
Successfully complete four graduate courses within the Social Documentation Program curriculum. The courses must be pre-approved by the student’s FDM faculty adviser. In most cases, these courses would include SOCD 200, SOCD 202, and two others, but may be adapted to fit the needs of particular students.

Writing, Research and/or Teaching Requirements
Submit a significant piece of documentary work that demonstrates competence in the field of social documentation. This project could consist of a digital video or photography project, or possibly an audio or web-based piece, focused on the student’s area of study and thus constituting a parallel investigation into the subject of the Ph.D. or M.F.A. dissertation. In certain circumstances, a documentary project on a subject other than the dissertation could be approved, but generally that would not be the case. The submitted project must meet the approval of the student’s FDM faculty adviser.

[Optional Catchall]

History of Art and Visual Culture
D-201 Porter College
(831) 459-4564
havc@ucsc.edu
https://havc.ucsc.edu

PROGRAMS OFFERED
History of Art and Visual Culture B.A. (p. 47)
History of Art and Visual Culture Minor (p. 53)
Visual Studies Ph.D. (p. 53)
Visual Studies Designated Emphasis (p. 55)

UNDERGRADUATE PROGRAM

In the History of Art and Visual Culture (HAVC) Department, students study the production, use, form, and reception of visual products and cultural manifestations past and present. Objects of study include paintings, sculptures, and architecture, which are within the traditional purview of art history, as well as art and non-art objects and visual expressions that sit beyond disciplinary boundaries. The HAVC Department offers courses covering a wide variety of material from the cultures of Africa, the Americas, Asia, Europe, the Mediterranean, and the Pacific Islands, including media as diverse as ritual, performative expression, bodily adornment, landscape, the built environment, installation art, textiles, manuscripts, books, photography, film, video games, apps, websites, and data visualizations.

HAVC students at UC Santa Cruz investigate complex questions concerning the social, political, economic, religious, and psychological impact of images from the perspective of their producers, users, and viewers. Visual objects play a central role in the formation of values and beliefs, including the perception of gender, sexuality, ethnicity, race, and class. Through attentive historical study and close analysis, students are taught to recognize and assess these systems of value, and are introduced to theoretical and methodological frameworks for future research.

Courses for Non-Majors
HAVC courses numbered 10-85 are lower-division introductory courses appropriate for non-majors. Most upper-division HAVC courses are also open to non-majors, but we recommend first completing at least one year of university coursework before taking upper-division classes.

GRADUATE PROGRAM

The Visual Studies Ph.D. offers an interdisciplinary program focused on visual-cultural scholarship, comprising specialized coursework and individual dissertation research in close coordination with faculty supervision. The expansive expertise of our diverse faculty addresses, and offers a broad scope of supervisory possibilities in researching, a variety of art forms and visual cultures with historical and contemporary perspectives and with global reach, including such regions as Sub-Saharan Africa, the Middle East, North America, Latin America, the Indigenous Americas (including pre-colonial California), Asia, Europe, the Mediterranean, and the Pacific Islands. Our program provides students with unparalleled opportunities to consider the role of social, political, and cultural forces in both shaping and being shaped by assorted modes of visual experience and their relations as well as to complex workings of multisensory perception. Areas of particular concern, both historical and current, include spatial and visual theories, environmental, social, and racial justice, colonial and decolonial visual culture, Anthropocene and Indigenous studies.

HISTORY OF ART AND VISUAL
CULTURE B.A.

Information and Policies

Introduction

The history of art and visual culture (HAVC) curriculum guides students in acquiring skill in critical thinking about art and visual culture, leading to a bachelor of arts (B.A.) degree. Each student who chooses to major in HAVC devises an individual study plan with the undergraduate advisor. The lower-division HAVC courses numbered 10-85, intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division HAVC courses numbered 110-189 cover a broad range of issues in various aspects of world cultures from earliest times to the present. The most advanced HAVC courses, numbered in the 190-191 series, are taught in seminar format. Students also have the opportunity to take independent study courses and write senior theses.

Academic Advising for the Program

Undergraduate Advisor

The undergraduate advisor offers specific information about navigating through the program and the curriculum and assists students with academic planning, requirements, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. Please contact the HAVC undergraduate advisor at havc@ucsc.edu.

Faculty Advisors

Faculty are the best resource for learning about the philosophies and foundations of history of art and visual culture. Faculty advisors can work individually with students to develop a specific course of study, recommend additional courses of interest, and discuss long-term career goals including education beyond the baccalaureate. A faculty advisor is selected by the student within one quarter of declaring the major or minor. Students choose a faculty advisor who specializes in their field of interest within HAVC.

Getting Started in the Major

Lower-Division Coursework

It is recommended that students begin by taking four lower-division HAVC courses from four different geographic regions.

Languages

All majors are encouraged to study at least one foreign language. Graduate programs in visual culture, art history, and other related disciplines generally require competence in one or more languages beyond English. Students are encouraged to consult with their faculty advisor to discuss an appropriate course of language study.

Program Learning Outcomes

Graduates from the history of art and visual culture B.A program will have demonstrated the following:

Program Learning Outcome (PLO) 1: Breadth of Cultural Knowledge

Students will be able to demonstrate an appreciation for, and foundation in, visual studies grounded in a range of historical, social, cultural, and ideological perspectives.

PLO 2: Critical Thinking

Students will be able to apply critical thinking skills that will enable them to analyze and solve problems through observation, experience, reflection, interpretation, analysis, evaluation, and/or explanation of visual, material, and historical cultural forms and values. Students will demonstrate critical thinking skills through oral and/or written communication.

PLO 3: Research Proficiency

Students will be able to formulate research questions that expand their knowledge of art and visual culture. Students will be able to apply research methods to answer these questions by consulting the current literature and developing independent results through archival, library, or field research.

PLO 4: Written Communication

Students will be able to present clear visual and historical analysis and interpretation in writing. Students will be able to demonstrate standard writing conventions in visual studies appropriate to purpose and context.

Major Qualification Policy and Declaration Process

Major Qualification

To be eligible to declare the major, students must pass two lower-division HAVC courses chosen from two different geographic regions listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-division HAVC courses may also be used to meet the major qualification criteria, as long as the lower- and upper-division courses cover two different geographic regions.

Transfer students should also consult the Transfer Information and Policy section.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date of the
notification. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to havc@ucsc.edu.

**How to Declare a Major**

Students who are eligible to declare the HAVC major must consult with the undergraduate advisor. Please email havc@ucsc.edu to make an appointment or visit during drop-in hours.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Transfer students are, however, encouraged to complete some of their lower-division history of art and visual culture requirements prior to transfer. Refer to the ASSIST articulation agreements at www.assist.org for approved lower-division courses offered at community colleges. Transfer credit for courses from four-year institutions or for community college courses not included in the ASSIST system is evaluated on a case-by-case basis; students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

A student may transfer up to three lower-division and two upper-division art history courses toward the major. HAVC majors must take a minimum of eight regularly scheduled HAVC courses from members of the HAVC faculty. Please keep in mind that the four lower-division courses required for the HAVC major must cover four different geographic regions.

Prospective students are also encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation. Transfer students are strongly encouraged to contact the HAVC undergraduate advisor before enrolling at UCSC by emailing havc@ucsc.edu.

**Getting Started at UCSC as a Transfer Student**

Students seeking to declare the HAVC major must consult with the undergraduate advisor. Please email havc@ucsc.edu to make an appointment or visit during drop-in hours.

**Letter Grade Policy**

Only courses with grades of C or better can be used to fulfill major requirements. Courses in which students receive a grade of C-, D+, D, D- or F cannot be used to satisfy major requirements. Courses can be taken Pass/No Pass to satisfy major requirements. Please consult with your college academic advising office or the Office of the Registrar to determine limits on selecting the Pass/No Pass grading option.

[Optional Catchall]

**Course Substitution Policy**

For the major, a student may transfer up to three lower-division and up to two upper-division art history courses taken from other institutions. Students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

**Double Majors and Major/Minor Combinations Policy**

**Study Abroad**

The University of California’s Education Abroad Program provides an excellent opportunity to take courses related to the history of art and visual culture in a range of locations. The department strongly encourages HAVC majors and minors to take advantage of this educational opportunity. Successfully completed EAP courses count as in-residence UC credit.

Upon return, you must submit a Petition for Transfer Credit, Substitution, or Waiver to substitute EAP courses for HAVC major requirements (EAP courses do not automatically satisfy major requirements). Petitions are evaluated on a case-by-case basis. We look for evidence that the course(s) provided critical analysis of the class material in its social and cultural context, as well as significant reading and writing requirements. We recommend you retain all relevant documentation (syllabi, reading lists, papers written, etc.) to support your case. We also suggest you consult with your HAVC advisor to plan your EAP courses in advance.

For additional information, visit the UC Education Abroad Program website.

**Honors**

**Honors and Highest Honors in the Major**

Honors and highest honors are awarded in the history of art and visual culture major to students who have shown a consistently outstanding level of performance throughout their coursework and maintained a superior GPA in the major. These distinctions are earned by only a small percentage of each graduating class. This notation appears on the transcript as well as on the diploma.

- **Honors in the major** are awarded to students with a GPA of 3.7 and above in all HAVC courses and with HAVC Department approval.*
- **Highest honors in the major** are awarded to students with a GPA of 3.9 and above in all HAVC courses and with HAVC Department approval.*

* Department approval is guided by consideration of criteria such as overall performance in HAVC coursework and the number of courses taken for a letter grade.

**Honors in the Senior Comprehensive Requirement**

All seniors must complete one HAVC seminar (courses in the 190-191 series) as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior
exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

[Optional Catchall]

Careers
The preparation students receive from the bachelor of arts (B.A.) degree in HAVC can lead to successful careers in education, law, business, and social services, in addition to more disciplinary-specific careers in museum curating, art restoration, library and information science, heritage studies, design, criticism, arts education and administration, and advanced studies in architecture, visual culture, and art history.

General Major

Course Requirements
The HAVC major requires four lower-division and nine upper-division courses for a total of 13 courses, including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the six different geographic regions listed below to ensure cultural, methodological, and disciplinary breadth.

For specific course offerings, please see the Course List by Geographic Region (p. 56).

For a current list of courses offered this academic year, please visit the HAVC website.

Lower-Division Courses
Take four courses from four different geographic regions listed below:
• HAVC courses 10-19: Africa and its Diaspora
• HAVC courses 20-29: Asia and its Diaspora
• HAVC courses 30-49: Europe and the Americas
• HAVC courses 50-59: Mediterranean
• HAVC courses 60-69: Native Americas
• HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses
Take the following course:
HAVC 100A Approaches to Visual Studies

Plus two upper-division geographic regional courses:
Take two upper-division geographic regional courses, one each from the two geographic regions not studied at the lower-division level. These are:
• HAVC courses 110-119: Africa and its Diaspora
• HAVC courses 120-129: Asia and its Diaspora
• HAVC courses 130-149: Europe and the Americas
• HAVC courses 150-159: Mediterranean
• HAVC courses 160-169: Native Americas
• HAVC courses 170-179: Oceania and its Diaspora

Plus five upper-division electives:
These are any HAVC courses numbered 110-191.

The department encourages students to take cross-regional and topical courses. These are HAVC courses numbered 180-189, which can fulfill upper-division major elective requirements but do not fulfill specific regional requirements.

Plus one senior exit seminar:
HAVC seminar courses are numbered 190-191. The senior exit seminar can be taken any quarter in which a student is in senior standing. Seminars can be taken for senior exit credit only by permission of the instructor.

Electives

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. Students in HAVC meet the DC requirement by completing:
HAVC 100A Approaches to Visual Studies

Comprehensive Requirement
All seniors must complete one HAVC seminar (courses in the 190-191 series) as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

Planners
Below are planners for freshmen and junior transfer students.

Please note that LD = lower-division and UD = upper-division.

Concentration in Curation, Heritage, and Museums

This program is for HAVC majors who wish to pursue the study and practice of curation, heritage, and museums. Students will expand on the broad knowledge they gain through the major by means of a variety of historical, theoretical, and practical courses within the domains of curation, museum studies, and critical cultural heritage studies. Students can use the concentration as a launching point toward internships or jobs in museums or cultural heritage institutions or to identify their interests for future graduate study.

Course Requirements

The HAVC major requires four lower-division and nine upper-division courses for a total of 13 courses, including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the six different geographic regions listed below to ensure cultural, methodological, and disciplinary breadth.

For specific course offerings, please see the Course List by Geographic Region (p. 56).

For a current list of courses offered this academic year, please visit the HAVC website.

In fulfilling the major requirements, students in the concentration must successfully complete four courses from the “Approved Concentration Courses” list below. No more than one of the four courses can be lower-division and at least two of the four courses must be HAVC-sponsored courses. Concentration courses fulfill the elective requirement, and if appropriate, concentration courses can be used to fulfill the geographic regional requirement. Students can petition to apply courses that are not on the approved list. Approval of petitions will be determined by the amount of relevant course content and assignments.

Lower-Division Courses

Take four courses from four different geographic regions listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Take the following course:

HAVC 100A Approaches to Visual Studies

Plus two upper-division geographic regional courses:

Take two upper-division geographic regional courses, one each from the two geographic regions not studied at the lower-division level. These are:

- HAVC courses 110-119: Africa and its Diaspora
- HAVC courses 120-129: Asia and its Diaspora
• HAVC courses 130-149: Europe and the Americas
• HAVC courses 150-159: Mediterranean
• HAVC courses 160-169: Native Americas
• HAVC courses 170-179: Oceania and its Diaspora

Plus five upper-division electives:
These are any HAVC courses numbered 110-191. Students in the concentration should note that courses from the "Approved Concentration Courses" list below will most likely be taken in the process of completing the five upper-division electives.

The department encourages students to take cross-regional and topical courses. These are HAVC courses numbered 180-189, which can fulfill upper-division major elective requirements but do not fulfill specific regional requirements.

Plus one senior exit seminar:
HAVC seminar courses are numbered 190-191. The senior exit seminar can be taken any quarter in which a student is in senior standing. Seminars can be taken for senior exit credit only by permission of the instructor.

</tbody>
</table>

Students may petition for HAVC 199 or HIS 199 to count for a concentration course under certain circumstances. Students should consult the HAVC undergraduate advisor prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. Students in HAVC meet the DC requirement by completing:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HAVC 100A</td>
<td>Approaches to Visual Studies</td>
<td>5</td>
</tr>
</tbody>
</table>

Comprehensive Requirement

All seniors must complete one HAVC seminar (courses in the 190-191 series) as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

Planners

Below are planners for freshmen and junior transfer students. Please note that LD = lower-division and UD = upper-division.

Four-Year Freshman Planner

<table>
<thead>
<tr>
<th>Year 1 (Fr)</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>HAVC LD regional requirement</td>
<td>HAVC LD regional requirement</td>

HISTORİFY OF ART AND VISUAL CULTURE MINOR

The history of art and visual culture (HAVC) minor works well when combined with other programs offered at UC Santa Cruz. Many students choose to combine HAVC with other major/minor programs such as anthropology, art, business management economics, classical studies, education, history, legal studies, literature, politics, psychology, and sociology.

For the minor, a student may transfer up to three lower-division art history courses (from three different geographic regions) taken from other institutions. HAVC minors must take a minimum of six regularly scheduled HAVC courses from members of the HAVC faculty. Refer to the articulation agreements at www.assist.org for approved lower-division courses offered at community colleges. Transfer credit for courses from four-year institutions or community college courses not included in the ASSIST system is evaluated on a case-by-case basis; students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

Course Requirements

The HAVC minor requires three lower-division and six upper-division courses for a total of nine courses.

For specific course offerings, please see the Course List by Geographic Region (p. 56).

For a current list of courses offered this academic year, please visit the HAVC website.

Lower-Division Courses

Three courses from three different geographic regions listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Six courses planned in consultation with the undergraduate adviser. These are HAVC courses numbered 110-191.

VISUAL STUDIES PH.D.

Introduction

The History of Art and Visual Culture Department offers a course of study leading to the Ph.D. in visual studies. Visual studies is an interdisciplinary program focused on visual-cultural scholarship, comprising specialized coursework and individual dissertation research in close coordination with faculty supervision. The expansive expertise of our diverse faculty addresses, and offers a broad scope of supervisory possibilities in researching, a variety of art forms and visual cultures with historical and contemporary perspectives and with global reach, including such regions as Sub-Saharan Africa, the Middle East, North America, Latin America, the Indigenous Americas (including pre-colonial California), Asia, Europe, the Mediterranean, and the Pacific Islands.

Our program provides students with unparalleled opportunities to consider the role of social, political, and cultural forces in both shaping and being shaped by assorted modes of visual experience and their relations as well to complex workings of multisensory perception. Areas of particular concern, both historical and current, include spatial and visual theories, environmental, social, and racial justice, colonial and decolonial visual culture, Anthropocene and Indigenous studies.

Our graduates consider a range of theoretical approaches and significant methodologies for the study of visuality, including object-centered, ecocritical, de- and post-colonial, new materialist, and social-historical (feminist, antiracist, Indigenous, and Marxist) varieties. Students explore diverse
cultural perspectives across time and space, and cultivate the necessary skills, knowledge, and expertise—including those of archival analysis, site-specific research, live interview and digital humanities techniques—in order to excel in academic, curatorial, publishing, and other related professional careers.

Focusing on a wide range of visual culture, our program is unconstrained by traditional mediums of art or conventional canons of art history. The capacious array of subjects examined in our courses and in the research of our faculty and students are as diverse as landscapes, ritual, performance, material culture, bodily adornment, popular entertainment, digital art and cybernetic data, photography, film, advertising, and design, as well as painting, sculpture, and architecture. Our Ph.D. program is particularly strong in comparative studies with a historical and geographical expansiveness, examining significant differences in how disparate cultural groups engage, shape, and interpret their visual worlds.

**Advancement to Candidacy**

**Course Requirements**

Students take a minimum of 60 credits during their first two years of study, comprised of three core courses and nine electives.

**Take the following three core courses:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HAVC 201A</td>
<td>Introduction to Visual Studies and Critical Theory</td>
<td>5</td>
</tr>
<tr>
<td>HAVC 202</td>
<td>Introduction to Visual Studies Methods</td>
<td>5</td>
</tr>
<tr>
<td>HAVC 204</td>
<td>Grant Writing</td>
<td>5</td>
</tr>
</tbody>
</table>

HAVC 201A: fall of the first year
HAVC 202: winter of the first year
HAVC 204: second year

**Take nine electives:**

Of the nine elective courses, at least five must have a visual studies designation (i.e., taught by core or affiliated faculty), and at least three must be drawn from departments outside of visual studies. Among the five visual studies electives, at least three must be from the HAVC courses numbered 212-282 and taught by core faculty, and at least one of the three must be a seminar course on a subject outside the student’s disciplinary focus. Only two of the five visual studies electives may be independent study courses. Please review the visual studies website for a list of electives offered in the current year.

**Field Clusters/Field Specialties**

Appreciating that most of our graduates will be required to fit themselves back into traditional disciplinary structures once they enter the academic job market, the program is designed to provide students with both new means of interpreting visual evidence and suitable depth of understanding in older disciplinary traditions. While all graduates will acquire a shared foundation in different approaches to visuality (attained through our core course requirements), individual student programs vary considerably depending on the type of department or other intellectual and professional context in which the student hopes to secure employment after graduation. In addition to completion of the core courses required of all students, students will develop a cluster of individualized field courses in consultation with their advisor based on their particular professional goals.

To provide our students with the disciplinary background to facilitate employment within curatorial departments in museums and non-visual studies departments at colleges and universities, each student is required to take a minimum of four 5-credit courses in a disciplinary cluster (beyond the core course requirements). This requirement pertains both to students entering with a B.A. and an M.A. Acceptable field cluster courses might center on a medium (i.e., painting or architecture), a temporal/stylistic category (i.e., Early Modern or Postmodernism), a cultural, national, or social group (i.e., Pacific Islanders or China), or a disciplinary approach (i.e., cultural anthropology or gender studies). Field clusters are developed in consultation with the student’s advisor based on the student’s intellectual and professional goals. To count toward the degree, field clusters must receive prior approval from the director of graduate studies.

**Foreign Language Requirements**

Students must demonstrate reading knowledge of one foreign language prior to the start of their second year (either by attaining a score of 550 or higher on the Educational Testing Service Graduate Student Foreign Language Test or by passing a reading/translation examination administered by the department).

Students are encouraged to master a second foreign language. Based on a student’s area of interest, and the joint assessment of the student’s advisor and the director of graduate studies, proof of proficiency in additional languages may be required prior to the student being admitted to candidacy for the Ph.D. Should proficiency in additional languages be required, it must be demonstrated prior to the close of the student’s third year of study.

**Teaching Requirement**

**Pre-Qualifying Requirements**

**Qualifying Examination**

After completing all coursework and passing one language examination, students are required to pass a qualifying examination prior to the close of the winter quarter of their third year, unless a petition for an extension, demonstrating reasonable cause, is approved by the visual studies director of graduate studies. The qualifying examination is divided into three topic areas, with each one including a written and an oral component. Each topic area should display historical breadth and variety of media. Two of the topic areas should ideally relate to the future dissertation topic, while one of the remaining must constitute an outside area, examining a topic that is chronologically, geographically, and/or methodologically distinct from the other two.
During their second year, a student should consult with their advisor to assemble a group of four faculty members who will serve as examiners and aid the student in assembling the necessary topic areas, compiling the needed reading lists, and preparing for the written and oral components of the examination in each area. The examination will have two parts. In part one, students will respond in writing to three general questions, posed by three of their examiners in the pre-arranged topic areas. In part two, students will gather together with their examiners to field questions probing and clarifying the previously submitted written component of the qualifying examination. In order to pass the qualifying examinations, students must receive the unanimous endorsement of the committee members.

**Post-Qualifying Requirements**

**Dissertation Prospectus and Colloquium**

After passing the qualifying examination, a student must complete an approved dissertation prospectus and a colloquium. The written dissertation prospectus is due no later than the end of the second quarter following the student’s completion of the qualifying examination. The prospectus is a brief, concise essay of approximately 25 pages (with bibliography) that defines the scope, methodology, and rationale for the proposed dissertation. It is prepared in consultation with the student’s dissertation advisor, who must approve of the document prior to sending it to the colloquium committee. The prospectus must be sent to the colloquium committee at least one month before the colloquium.

The dissertation advisor, in consultation with the student and director of graduate studies, will invite four to five faculty members, in appropriate fields, to be on the colloquium committee, attend the colloquium, provide input on the prospectus, and assess the student’s preparedness to begin researching and writing the dissertation. Faculty participating in the colloquium may or may not have been members of the qualifying examination committee, and should represent faculty whose expertise has bearing on the student’s project. A student will pass the colloquium after having demonstrated to the satisfaction of all colloquium committee members adequate preparation to begin researching and writing the dissertation.

**Advancement to Candidacy**

Advancement to candidacy follows and is contingent upon passing the qualifying examination, all needed language examinations, completing an approved dissertation prospectus, passing the colloquium, and the subsequent appointment of a dissertation reading committee of at least three members. The requirements for advancement to candidacy must be completed no later than the end of the winter quarter of the fourth year.

**Dissertation Defense**

An oral defense of the dissertation is the only final examination requirement, unless a petition to waive the oral defense, demonstrating reasonable cause, is approved by the student’s primary advisor and the visual studies director of graduate studies. The student’s dissertation committee, under the direction of an exam moderator, will conduct the examination. The moderator is selected in consultation with the faculty advisor and must be a visual studies core or affiliated tenured faculty who is not part of the dissertation reading committee.

**Academic Progress**

**Applying for Graduation**

**Normative Time from Matriculation to Degree**

The visual studies Ph.D. program at UCSC is designed to require six years of study. During the pre-candidacy period students will devote themselves to coursework, completion of the language examination, some teaching, preparation for and completion of qualifying examinations, completion of an approved version of their prospectus, passing their colloquium and selecting their dissertation committee. Requirements for advancing to candidacy must be completed by the end of winter quarter of the fourth year. Students will finish their dissertation and successfully defend it before the end of their sixth year.

**VISUAL STUDIES DESIGNATED EMPHASIS**

**Introduction**

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in visual studies as part of their Ph.D. degree.

**Requirements**

Graduate students enrolled in doctoral programs at UC Santa Cruz may obtain a Designated Emphasis in visual studies on their Ph.D. degree by meeting the following requirements:

**Committee Composition and Departmental Approvals**

Secure approval from a core member of the visual studies faculty to serve as an adviser for their designated emphasis.

Have at least one core member of the visual studies faculty serve on either their qualifying examination or dissertation committee.

**Course Requirements**

Successfully complete four graduate courses taught by either core or affiliated members of the Visual Studies program. The courses must form a coherent cluster in visual studies and be pre-approved by the student’s designated emphasis adviser.
Writing, Research and/or Teaching Requirements
Submit a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the student's visual studies adviser.

[Optional Catchall]

HISTORY OF ART AND VISUAL CULTURE COURSES BY GEOGRAPHIC REGION

Course List by Geographic Region
The courses listed herein fulfill geographic regional requirements for the history of art and visual culture (HAVC) major and minor. Please see the 'Courses' section of the general catalog for a full list of HAVC course offerings.

**Note:** Not all of these courses are offered each academic year.

Undergraduate Program

The Music Department at UC Santa Cruz offers two undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Music (B.M.). The B.A. degree offers a uniquely diverse curriculum, with the option of completing a concentration in either Contemporary Practices, Global Musics, or Western Art Music. The B.M. degree is designed for students who intend to pursue a career in music performance. The department also offers minors in “Electronic Music,” “Jazz, Spontaneous Composition and Improvisation,” and “Western Art Music,” providing more access for music students and students in other disciplines to engage with music during their studies at UC Santa Cruz. Both B.A. and B.M. degrees are distinctive in that they integrate elements of performance, theory, composition, literature, and history, and culture.

Students leave UC Santa Cruz prepared for graduate studies and music careers in performance, teaching, and the digital arts.

Through these curricular offerings, students will encounter an extraordinarily rich variety of performance opportunities. Specifically, our students engage with music:

- as a cultural practice in ensembles focusing on musical traditions from Europe, Central Asia, Latin America, North America, South Africa, South Asia and Southeast Asia;
- temporally in ensembles based on Baroque, Classical and contemporary idioms to deepen their understanding of performance practices;
- technologically in electronic music ensembles and workshops where students experiment with innovative technologies to develop their own projects with the support of their advisors and peers.
- collaboratively in seminars geared toward student composition and improvisation.

Programs for Non-Majors

All music courses are open to non-majors, with many fulfilling general education requirements while offering exploration in the field of music. Courses in the MUSC 11, MUSC 80, and MUSC 81 series cover a wide array of topics that may interest students. Non-majors are also able to enroll in all performing ensembles. Students should check out music.ucsc.edu for further information regarding preparation and auditions, and contact the Music Department if they have further questions.

Graduate Program

There are three graduate programs in music: the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in music and the Doctor of Musical Arts (D.M.A.) degree in music composition. The M.A. degree in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. The Ph.D. degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another. The D.M.A. degree in music composition allows doctoral students...
to pursue various and intersecting areas of emphasis such as algorithmic/computer-assisted composition, world music composition, collaborative composition in music, and other contemporary practices to provide a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

**MUSIC B.A.**

**Information and Policies**

**Introduction**

The Music Department supports an unusually diverse curriculum for a department of its size. By a choice of concentrations within the bachelor of arts (B.A.) degree, the student can emphasize different aspects of music. The “Contemporary Practices” and “Global Musics” concentrations offer a variety of modules (groupings of courses with various focuses) that students will be required to select from in addition to core requirements designed specifically for each concentration. All students pursuing the B.A. degree must select one of the three concentrations.

The concentrations and corresponding modules relevant to each concentration are:

**Contemporary Practices Concentration.** A concentration emphasizing composition and improvisation across multiple genres of music composition. Modules offered are:

- Global Art Musics
- Spontaneous Composition and Improvisation
- Experimental & Contemporary Musics. This module offers a variety of electronic music studio courses.

All module offerings are based on availability within the curriculum plan. Students should visit the Music Department website for a list of when each module’s courses will be offered.

**Global Musics Concentration.** A concentration emphasizing global music research, performance, and writing. Modules offered are:

- Africa and the Americas
- Asia
- Contemporary/Experimental
- Jazz
- Popular Music
- World Music

All module offerings are based on availability within the curriculum plan. Students should visit the Music Department website for a list of when each module’s courses will be offered.

**Western Art Music Concentration.** A concentration emphasizing classical Western art music performance, theory and history. This concentration requires some performance ability on a standard orchestral instrument or voice in classical repertoire (or improvisational repertoire for drum set majors) upon entry to the concentration. This concentration does not have a set of modules, but rather has a set course list of requirements.

The list of course requirements and when the courses are offered can be found on the Music Department website.

**Academic Advising for the Program**

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department advisor by emailing music@ucsc.edu or calling (831) 459-2292. Slug Success is also available to make an appointment.

**Getting Started in the Major**

It is essential that frosh students plan to take MUSC 30A, as well as begin participating in ensembles in the fall of their second year, or as early as possible, in order to make satisfactory progress toward their degree objectives.

The Theory Placement Exam is for placement of students, including transferring or re-entering students, into the appropriate music core course (MUSC 13, MUSC 14, MUSC 15, or MUSC 30A). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.). Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing melodic and harmonic structures, and complex rhythmic patterns.

Students with some theory background should plan to take the Theory Placement Exam to place into MUSC 13, MUSC 14 and MUSC 15, or MUSC 30A. Students without any theory background, or weak aural skills, should enroll in MUSC 13, MUSC 14 and MUSC 15 in their first year in order to prepare for the placement exam. Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of “A” from the preparatory music theory classes (MUSC 14 and MUSC 15) are eligible to automatically place into MUSC 30A.
The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins in fall quarter, from 10:00 a.m.-12:30 p.m., and at the beginning of spring quarter (schedule TBA), both in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

**Program Learning Outcomes**

The bachelor of arts program in music is designed to accomplish the following learning outcomes:

1. Attainment of knowledge and understanding of music in an integrated way, through historical and cultural studies, musicianship, theory, composition, and performance. These studies prepare students to pursue a career in some aspect of music, to further develop their skills in graduate study, and/or to maintain music as a central part of their lives.

2. Acquisition of musical competency, including literacy (the use of music notation in reading, performing, composing, analyzing, and hearing music).

3. Developing skills of critical thinking and writing about music by taking courses on past and present musical cultures in a variety of global heritages.

4. Creating music by performing, composing, and improvising.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

In order to declare the music major, students must successfully complete MUSC 30A with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses. Students in the Western Art Music concentration also need signature approval by the applied instrument instructor on the primary instrument authorization form.

Students approaching their major declaration deadline quarter (sixth quarter for four-year students, second quarter for transfer students), should reach out to the Music Department office as soon as possible to set up a declaration advising appointment.

Transfer students should also see the "Transfer Information and Policy" section below.

**Appeal Process**

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed.

The appeal process can be started by emailing the undergraduate advisor in the music office.

Within 15 days of receipt of the appeal, the department will notify the student and college of the decision.

**How to Declare a Major**

All students should meet with the academic advisor to begin the major declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office, Music Center, Room 244 or 248. Students are also required to meet with a faculty advisor (assigned with help from the academic advisor) as part of the declaration process.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). The declaration deadline for four-year students is their sixth quarter, and the second quarter for transfer students.

Students petitioning when the campus declaration deadline is imminent, will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

Students planning to apply to UC Santa Cruz in this major are not required to complete specific courses for consideration of admission to UCSC.

Transfer students are strongly recommended to take some music theory courses before transfer to UC Santa Cruz, which generally enables them to test into MUSC 30A. They should also have completed most general education requirements, although some GE requirements may be fulfilled by lower-division courses in the major.

**Getting Started at UCSC as a Transfer Student**

Transfer students should plan to take the Theory Placement Exam to place into MUSC 13, MUSC 14 and MUSC 15, or MUSC 30A. All transfer students should take the Theory Placement Exam fall of their first quarter. It is an option for transfer students to take the examination prior to applying to UC Santa Cruz as a practice guide for future preparation, or in the spring quarter before their first fall quarter. Students can also visit the Music Department website to view the sample examination.

Transfer students can also take MUSC 15 during Summer Session at UCSC prior to fall of their arrival. Taking MUSC 15 will help prepare students for the Theory Placement Exam and generally results in students placing into MUSC 30A.

Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of “A” from the preparatory music theory classes (MUSC 14, and MUSC 15) are eligible to automatically place into MUSC 30A.

The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins, from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall, and at the beginning of spring quarter (schedule TBA). No signup is necessary. Students should bring a pencil.
All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate advisor prior to application.

**Letter Grade Policy**

All upper-division courses applied toward the music majors must be taken for a letter grade, except MUSC 120 (Composition) and ensembles, which may be taken Pass/No Pass.

Lower-division courses may be taken Pass/No Pass.

**Course Substitution Policy**

Students who have taken introductory or topical large lecture music courses at other institutions may email the curriculum committee to propose course substitutions. To begin this process, email music@ucsc.edu.

**Double Majors and Major/Minor Combinations Policy**

Double majors are possible for the music major. A student can double major with a Music Bachelor of Arts (B.A.) Degree or a Bachelor of Music (B.M.) Degree, and a major from another department. Students that plan to double major should meet with the music undergraduate advisor for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However, it is possible to pursue the B.M. and add the "Jazz, Spontaneous Composition and Improvisation Minor" or "Electronic Music Minor." It is not possible to add the "Western Art Music Minor" to the Music B.A. or Music B.M. degrees.

Students are not able to add the "Western Art Music Minor" or "Jazz, Spontaneous Composition and Improvisation Minor" to the Music B.A. Contemporary Practices or Global Musics concentrations in the Music B.A., due to potential overlap between these curricula. Similarly, the "Electronic Music Minor" cannot be added to the Contemporary Practices concentration.

The "Jazz, Spontaneous Composition and Improvisation Minor" can be added to the Western Art Music concentration. The "Electronic Music Minor" can still be added to the Global Musics or Western Art Music concentration.

**Study Abroad**

The department encourages students to explore studying abroad while attending UC Santa Cruz. In particular, the UCSC Music Department has an exchange program agreement with the Music Department at the University of Sussex. University of Sussex offers many courses that can be substituted for music major or minor requirements.

For more information on approved course substitutions and the exchange program please visit the Study Abroad website.

**Honors**

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework and a capstone course (research thesis or creative portfolio). Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must also complete an additional senior project (not required for their concentration) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.

**How Music Majors Are Assessed**

For students in the Western Art Music concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.

2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.

3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.

4. A juried "proficiency audition" is required for students enrolled in MUSC 130. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.

5. Students will always declare as a music B.A. If you are interested in becoming a music B.M. student, auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M. program present a senior recital which is evaluated by faculty. See the music B.M. page for more information.

6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.

7. Compositional skills are assessed through the rehearsal and public performance of student works.

For students in the Global Musics concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.

2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.

3. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.

4. Compositional skills are assessed through the rehearsal and public performance of student works, when applicable.
For students in the Contemporary Practices concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.

2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.

3. Compositional skills are assessed through the rehearsal and public performance of student works, when applicable. Additionally, students will be expected to present a senior composition recital at the end of their residency.

4. In required and elective seminars, critical thinking and writing are assessed when students present a project or paper at the end of term.

[Optional Catchall]

Contemporary Practices Concentration

Course Requirements

In addition to the core course work and electives listed below, students pursuing the Contemporary Practices concentration are required to complete three modules, relating to cross-cultural themes and genres:

- Experimental & Contemporary Musics
- Global Art Musics
- Spontaneous Composition & Improvisation

The following course list outlines the general concentration requirements. See the list of approved courses relevant to each module.

Lower-Division Courses

MUSC 13 is designed for students with barely any or no music theory experience. MUSC 14 and MUSC 15 (the Summer Session version of MUSC 14) are meant for students with some music theory experience. Students can bypass these requirements by placing into MUSC 30A via the Theory Placement Exam. Students that don't place into MUSC 30A but place into MUSC 14 only need to take one of MUSC 14 or MUSC 15, not both. Students may also place directly into MUSC 30A by receiving a final grade of "A" or "A+" in MUSC 14/MUSC 15.

The Theory Placement Exam is offered twice per year: in fall quarter, the Tuesday before classes start; and in the beginning of spring quarter. See the Music Department website for exam details.

MUSC 14 Beginning Theory & Musicianship II 5
MUSC 16 Theoretical Foundations of Music 5
MUSC 30A Theory, Literature, and Musicianship 5
MUSC 30B Theory, Literature, and Musicianship 5

Upper-Division Courses

Students must take two quarters of MUSC 120, both with different instructors.

MUSC 101C History of Western Art Music 5
MUSC 120 Seminar in Music Composition 5
MUSC 121 Orchestration 5

Modular Requirements

Each module consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total)
- two quarters of performing ensembles or performance practice workshops specific to each module (six total)

See the list of approved courses (p. 84) relevant to each module.

Electives

Take one course from the MUSC 150 series, or equivalent (theory/composition-based), plus another course from any of the ones listed below (two quarters total).

Courses may not be repeated for credit, or be double-counted with courses applied toward modular requirements.

Students may also elect to take a graduate-level seminar in place of their final elective. All graduate courses require instructor and/or department permission to add.

MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5
MUSC 101B History of Western Art Music 5
MUSC 105A Music of the United States 5
MUSC 105C Folk and Traditional Music in California 5
MUSC 105E Early Keyboard Music 5
MUSC 105I Improvisation and Collaborative Practices in the 20th Century 5
MUSC 105M Solo Song: from Monophony to Monody 5
MUSC 105O Opera from Peri to Pergolesi 5
MUSC 105P The Piano 5
MUSC 105Q The String Quartet from Haydn to the Present 5
MUSC 105R History of Russian Music 5
MUSC 111B Seminar in Jazz Analysis 5
MUSC 123 Electronic Sound Synthesis 5
MUSC 124 Intermediate Electronic Sound Synthesis 5
MUSC 125 Advanced Electronic Sound Synthesis 5
MUSC 130 Harmony and Form in 19th-Century and Early 20th-Century Music 5  
MUSC 150A Music Analysis for Performers 5  
MUSC 150C Special Topics in Music: Tonal Counterpoint 5  
MUSC 150I Special Topics in Music: Hindustani Music 5  
MUSC 150P Special Topics in Music: 20th-Century Popular Song 5  
MUSC 150R Field Recording: Mapping and Composing Sound, Identity, and Place 5  
MUSC 150S Focus on Spontaneous Composition 5  
MUSC 150T Post Tonal Analysis 5  
MUSC 174 Intermediate Spontaneous Composition and Improvisation 5  
MUSC 175 Jazz Theory II 5  
MUSC 180A Studies in World Musics: Asia and the Pacific 5  
MUSC 180B Studies in World Musics: Africa and the Americas 5  
MUSC 180C Studies in World Musics: Central Asia 5  
MUSC 203B Performance Practice in the Renaissance 5  
MUSC 75 Jazz Theory I 5  
MUSC 80Z Laptop Music 5  
MUSC 102 University Orchestra 2  
MUSC 103 University Concert Choir 2  
MUSC 129 Live Electroacoustic Music Ensemble 2  
MUSC 158 South African Music Ensemble 2  
MUSC 163 Early Music Ensemble 2  
MUSC 164 Jazz Ensembles 2  
MUSC 165 Chamber Music Workshop 2  
MUSC 166 Chamber Singers 2  
MUSC 167 Workshop in Electronic Music 2  
MUSC Recording Workshop 2  
MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5  
MUSC 101B History of Western Art Music 5  
MUSC 105A Music of the United States 5  
MUSC 105C Folk and Traditional Music in California 5  
MUSC 105M Solo Song: from Monophony to Monody 5  
MUSC 105Q The String Quartet from Haydn to the Present 5  
MUSC 196A Senior Recital Preparation (without individual lessons) 5  
MUSC 168 Experimental Music Ensemble 2  

**Disciplinary Communications (DC) Requirement**

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. The DC requirement for the music B.A. degree is satisfied by completing two courses.

Students in the Contemporary Practices concentration are required to take MUSC 101C as part of the concentration’s core requirements, which fulfills one half of the D.C. requirement. The second half of the D.C. requirement can be fulfilled by taking one of the following courses as your upper-division elective, or as the upper-division component to one of your chosen modules. If taken toward a module, the course can count as both a modular course and D.C. course.

MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5  
MUSC 101B History of Western Art Music 5  
MUSC 105A Music of the United States 5  
MUSC 105C Folk and Traditional Music in California 5  
MUSC 105M Solo Song: from Monophony to Monody 5  
MUSC 105Q The String Quartet from Haydn to the Present 5  

**Comprehensive Requirement**

For their Senior Capstone project, students in the Contemporary Practices concentration must present a senior composition recital or portfolio.

Students should consult their faculty advisor (chosen when you declare the major) and department advisor when planning their recital/portfolio.

MUSC 196A Senior Recital Preparation (without individual lessons) 5  

**Planners**

In addition to core curriculum requirements for the Contemporary Practices Concentration, students must also complete three modules. Each module will consist of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total);
• an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total);

• two quarters of performing ensembles or performance practice workshops specific to each module (six total).

Please see sample two and four-year plans below.

**General Education (GE) Codes**

MUSC 11, MUSC 80, and MUSC 81 series courses will fulfill a variety of GE requirements including: IM, CC, ER, MF, PE-E, PE-H, PE-T, and PR-C.

MUSC 150C, MUSC 150P, MUSC 150T, MUSC 150X fulfill the IM GE requirement. MUSC 150I fulfills the CC GE.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other general education requirements.

**Transfer Student Progress**

Some courses from the MUSC 11, MUSC 80, and MUSC 81 series, along with some performing ensembles, can be articulated from courses taken at other institutions. Please email music@ucsc.edu with any questions about course articulations/substitutions.

**Global Musics Concentration**

**Course Requirements**

In addition to the core course work and electives listed below, students pursuing the Global Musics concentration are required to complete three modules, relating to geographical areas, themes, and genres:

- Africa & the Americas
- Asia
- Contemporary/Experimental Music
- Europe
- Jazz
- Popular Music
- World Musics

The following course list outlines the general concentration requirements. See the list of approved courses relevant to each module.
Lower-Division Courses

MUSC 13 is designed for students with barely any or no music theory experience. MUSC 14 and MUSC 15 (the Summer Session version of MUSC 14) are meant for students with some music theory experience. Students can bypass these requirements by placing into MUSC 30A via the Theory Placement Exam. Students that do not place into MUSC 30A but place into MUSC 14 only need to take one of MUSC 14 or MUSC 15, not both. Students may also place directly into MUSC 30A by receiving a final grade of "A" or "A+" in MUSC 14/MUSC 15.

The Theory Placement Exam is offered twice per year: in fall quarter, the Tuesday before classes start; and in the beginning of spring quarter. See the Music Department website for exam details.

MUSC 105C Music of the United States 5
MUSC 105M Solo Song: from Monophony to Monody 5
MUSC 105Q The String Quartet from Haydn to the Present 5

Comprehensive Requirement

The senior comprehensive requirement (capstone) is a two-part requirement that is satisfied by 1) enrollment in one of the course listed below, and 2) an independent study course with your faculty advisor. The options for senior capstones focus in two areas: research project or creative portfolio.

The research project option requires a 15-25 page research paper, which is accomplished by taking the independent study course MUSC 195A (Senior Thesis) with their faculty advisor, concurrently with one of the listed research courses.

The creative portfolio option requires either a senior composition or recital, both accompanied by a 7-10 page short thesis. If a student chooses to do the creative portfolio options, they must concurrently enroll in the independent study course MUSC 196A (Global Musics Capstone) with their faculty advisor.

Research Project

Choose one of the following courses. Cannot double count with modular or upper-division electives.

MUSC 200 cannot be double counted if taken to satisfy the Graduate-Level Research Requirement.

MUSC 105A Music of the United States 5
MUSC 105C Folk and Traditional Music in California 5
MUSC 105E Early Keyboard Music 5
MUSC 105I Improvisation and Collaborative Practices in the 20th Century 5
MUSC 105M Solo Song: from Monophony to Monody 5
MUSC 105O Opera from Peri to Pergolesi 5
MUSC 105P The Piano 5
MUSC 105Q The String Quartet from Haydn to the Present 5
MUSC 105R History of Russian Music 5
MUSC 180A Studies in World Musics: Asia and the Pacific 5
MUSC 180B Studies in World Musics: Africa and the Americas 5
MUSC 180C Studies in World Musics: Central Asia 5
MUSC 180D Music of Insular Southeast Asia 5
MUSC 199 Tutorial 5
MUSC 200 Introduction to Research Methods 5

Take concurrently with selected course above

Students that select the research option for their capstone must also enroll in:

MUSC 195A Senior Thesis 5
Creative Portfolio

Choose one of the following courses. Cannot double count with modular or upper-division electives.

- MUSC 120 Seminar in Music Composition 5
- MUSC 150A Music Analysis for Performers 5
- MUSC 150C Special Topics in Music Theory: Tonal Counterpoint 5
- MUSC 150I Special Topics in Music Theory: Hindustani Music Song 5
- MUSC 150P Special Topics in Music Theory: 20th-Century Popular Song 5
- MUSC 150S Focus on Spontaneous Composition 5
- MUSC 150T Post Tonal Analysis 5
- MUSC 150X Theoretical Practices of American Music 5
- MUSC 199 Tutorial 5
- MUSC 203H Area Studies in Performance Practice 5

Take concurrently with selected course above

Students that select the creative portfolio option for their capstone must also enroll in:

- MUSC 196A Senior Recital Preparation (without individual lessons) 5

Planners

In addition to core curriculum requirements for the Global Musics Concentration, students must also complete three modules. Each module will consist of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 101, MUSC 105, MUSC 150, or MUSC 180 course specific to each module (three total)
- two quarters of performing ensemble or performance practice workshop specific to each module (six total)

General Education (GE) Codes

MUSC 11, MUSC 80 and MUSC 81 series courses will fulfill a variety of GE requirements including: IM, CC, ER, MF, PE-E, PE-H, PE-T, and PR-C.
MUSC 150C, MUSC 150P, MUSC 150T, MUSC 150X fulfill the IM GE requirement. MUSC 150I fulfills the CC GE.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other general education requirements.

Transfer Student Progress

Some courses from the MUSC 11, MUSC 80, and MUSC 81 series, along with some performing ensembles, can be articulated from courses taken at other institutions. Please email music@ucsc.edu with any questions about course articulations/substitutions.

Western Art Music Concentration

Course Requirements

Lower-Division Courses

Take each of the following courses:

- MUSC 30A Theory, Literature, and Musicianship 5
- MUSC 30B Theory, Literature, and Musicianship 5
- MUSC 30C Theory, Literature, and Musicianship 5

The following course is taken concurrently with the MUSC 30 sequence:

- MUSC 60 Fundamental Keyboard Skills 2

(They may be waived by instructor approval, or if the student is taking piano lessons from a UCSC instructor.)

Upper-Division Courses

Take each of the following courses:

- MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5
- MUSC 101B History of Western Art Music 5
- MUSC 101C History of Western Art Music 5
- MUSC 130 Harmony and Form in 19th-Century and Early 20th-Century Music 5

One course from the MUSC 150 series, Special Topics in Theory

<table>
<thead>

One of the following

- One additional class from the MUSC 150 series
- One additional class from the MUSC 180 series
- One of the courses below:
  - MUSC 121 Orchestration 5
  - MUSC 122 Conducting 2
  - MUSC 124 Intermediate Electronic Sound Synthesis 5

A minimum of six quarters of ensembles

All ensembles are 2 credits each and may be repeated. A minimum of one ensemble per quarter can be counted toward fulfillment of the total six quarter requirement.

If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

- MUSC 1C University Concert Choir 2
- MUSC 2 University Orchestra 2
- MUSC 3 Large Jazz Ensemble 2
- MUSC 5A West Javanese Gamelan Ensemble: Beginning 2
- MUSC 5B West Javanese Gamelan Ensemble: Intermediate 2
- MUSC 5C West Javanese Gamelan Ensemble: Advanced 2
- MUSC 8A Beginning Balinese Gamelan 2
- MUSC 8B Advanced Balinese Gamelan 2
- MUSC 9 Wind Ensemble 2
- MUSC 10 Central Asian Ensemble 2
- MUSC 12 Mariachi Ensemble 2
A minimum of six quarters of individual lessons.

Six quarters of enrollment in any of the courses listed are acceptable for fulfillment of this requirement.

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the Music Department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. The DC requirement in music is satisfied by completing two courses from the MUSC 101 series (MUSC 101A, MUSC 101B, and MUSC 101C). All three of these courses are already part of the core curriculum required for the Western Art Music Concentration.

Comprehensive Requirement

To fulfill the the comprehensive requirement, students may either take an additional MUSC 105 series course or the following course:

* Indicates a performance jury requirement at the end of the quarter.

** Select from the following list of options to fulfill this requirement: one additional class from the MUSC 150 or MUSC 180 series, MUSC 121, MUSC 122, or MUSC 124.

1 Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education (GE) Codes

MUSC 11A will fulfill the IM GE requirement.

2 Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other general education requirements.

Two-Year Plan for Transfer Students

The following two-year plan assumes that the student places into MUSC 30A and has completed most GE requirements.

(001A)
General Education Codes

one of the following courses: MUSC 61, MUSC 62, or MUSC requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

As a cultural practice in ensembles focusing on musical traditions from Europe, Eurasia, Latin America, North America, South Africa, South Asia and Southeast Asia; traditions from Europe, Eurasia, Latin America, North America, and the digital arts.

Our students engage with music during their studies at UC Santa Cruz. Both B.A. and B.M. degrees are distinctive in that they integrate elements of performance, theory, composition, literature, and history and culture. Students leave UC Santa Cruz prepared for graduate studies and music careers in performance, teaching, and the digital arts.

Through these curricular offerings, students will encounter an extraordinarily rich variety of performance opportunities. Specifically, our students engage with music:

- As a cultural practice in ensembles focusing on musical traditions from Europe, Eurasia, Latin America, North America, South Africa, South Asia and Southeast Asia;
- Temporally in ensembles based on Baroque, Classical and contemporary idioms to deepen their understanding of performance practices;
- Technologically in electronic music ensembles and workshops where students experiment with innovative technologies to develop their own projects with the support of their advisors and peers.

Students at UC Santa Cruz have extraordinary performance and professionalization opportunities. All instrument and voice faculty are celebrated professional musicians, who provide unparalleled guidance for students in performance and professional development. Ensemble courses culminate in an end-of-quarter performance, providing students with regular performance opportunities in a world-class recital hall. The electronic music minor provides hands-on opportunities for students to learn a variety of techniques related to electronic sound production, composition and recording in a state-of-the-art studio facility. The Opera Program allows students to be involved in every step of a major production, from concept and design considerations to marketing and arts management. As performers, composers, artistic collaborators and event-organizers, these programs allow students to develop musically and professionally for diverse career paths and industries.

Our programs shape responsible, independent and highly capable young artists that will push the frontiers of their fields. Graduates from the Music Department at UC Santa Cruz are musically attuned and socially engaged global citizens in the 21st century.

Introduction

The B.M. degree is for students who aspire to academic excellence and an advanced performance level. The B.M. degree is designed for exceptionally talented performers. It requires considerably more performance credits and slightly fewer courses in theoretical disciplines. B.M. students will major in an instrument or voice.

Once accepted to the B.M. program, students must take two juries per academic year: at the end of both fall and spring quarter, for continuing review and criticism of proficiency at their primary instrument.

If a student fails to participate in continuing B.M. juries, or does not attain, or maintain, an advanced level, and fails to maintain academic excellence, the Bachelor of Music Committee will re-examine the student's continued participation in the B.M. degree in consultation with the applied instructor. In cases in which the B.M. Committee finds the student did not meet these requirements the students will be dismissed from the B.M. program with an option to switch to the B.A. degree.

Time to degree: The determination of a dismissal can be made by the committee as long as a student has three remaining quarters before their expected graduation date. This will ensure enough time to make course changes from a B.M. to B.A. degree. A change to the B.A. degree is 10 to 25 fewer credits to be completed than the B.M. degree.

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal,
the department will notify the student, college, and Office of the Registrar of the decision.

**Academic Advising for the Program**

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department advisor by emailing music@ucsc.edu or calling (831) 459-2292. You may also use Slug Success to make an appointment.

**Getting Started in the Major**

It is essential that students begin the MUSC 30 sequence, ensembles, and applied instruction in fall of their second year or as early as possible to make satisfactory progress toward their degree objectives.

The theory placement exam is for placement of students, including transferring or re-entering students, into the appropriate music core course (MUSC 13, MUSC 14, or MUSC 30A). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.), and brief definition of terms relating to music history. Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing of melodic and harmonic structures, and complex rhythmic patterns.

Students with a theory background should plan to take the theory placement exam to place into MUSC 30A. Students without any theory background or weak aural skills are not required to take the placement exam and are encouraged to enroll in MUSC 13 or MUSC 14 in their first year. Taking MUSC 13, MUSC 14, or MUSC 15 will help prepare students for the theory placement exam. However, admission to MUSC 30A will be based solely on the theory placement exam scores and not on the final grades of the Preparatory theory courses (MUSC 13, MUSC 14, and MUSC 15).

The theory placement exam is held twice a year: on the Tuesday before instruction begins in fall quarter, from 10:00 a.m.-12:30 p.m., and at the beginning of spring quarter (schedule TBA), both in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

**Program Learning Outcomes**

The B.A. and B.M. programs in music are designed to accomplish the following learning outcomes:

1. Attainment of knowledge and understanding of music in an integrated way, through historical and cultural studies, musicianship, theory, composition, and performance. These studies prepare students to pursue a career in some aspect of music, to further develop their skills in graduate study, and/or to maintain music as a central part of their lives.

2. Acquisition of musical competency, including literacy (the use of music notation in reading, performing, composing, analyzing, and hearing music).

3. Developing skills of critical thinking and writing about music by taking courses on past and present musical cultures in European and other heritages.

4. Creating music by performing, composing, and improvising.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

In order to declare the music major, students must successfully complete MUSC 30A with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses.

Bachelor of music students must also audition in the fall or spring juries as a "B.M. Audition." Applied instructor approval is required to sign-up for this audition. If the B.M. committee determines that the performance level demonstrated is appropriate for the B.M. program, the student can then declare the B.M. major (in addition to passing MUSC 30A). Students can consult with their applied instrument instructor about this potential. If faculty supports this option they can sign up with the undergraduate advisor for the next available jury.

Students approaching their major declaration deadline quarter (sixth quarter for four-year students, second quarter for transfer students), should reach out to the Music office as soon as possible to set up a declaration advising appointment.

Transfer students should also see the "Transfer Information and Policy" section below.

**Appeal Process**

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision. Appeals should be submitted in person at Music Center 244, or sent to music@ucsc.edu care of the undergraduate advisor.

If a student is not accepted into the B.M. program via the results of their B.M. audition, they can sign up for the next available jury. Students may audition for the B.M. program a maximum of two times. The latest that they can audition for the B.M. program is in spring quarter of their junior year.

**How to Declare a Major**

All students should meet with the academic advisor to begin the major declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office, Music Center, Room 244 or 248.
Students are also required to meet with a faculty advisor (assigned with help from the academic advisor) as part of the declaration process.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). The declaration deadline for four-year students is their sixth quarter, and the second quarter for transfer students.

Students petitioning when the campus declaration deadline is imminent, will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly recommended to take some music theory courses before transfer to UC Santa Cruz, which generally enables them to test into MUSC 30A. They should also have completed most general education requirements.

Voice students should have completed one introductory college-level language course each in Italian, French, and German.

Getting Started at UC Santa Cruz as a Transfer Student

Transfer students should plan to take the theory placement exam to place into MUSC 14 or MUSC 30A. Students that place into MUSC 14 will be required to take three years to graduate. Students that place into MUSC 30A will be able to graduate within two years.

All transfer students should take the theory placement exam during fall of their first quarter (see below for exam schedule). It is an option for transfer students to take the exam prior to applying to UC Santa Cruz as a practice guide for future preparation. However, students can also visit the Music Department website to view the sample exam.

Transfer students can also take MUSC 14 or MUSC 15 during Summer Session at UC Santa Cruz prior to fall of their arrival. Taking MUSC or MUSC 15 will help prepare students for the theory placement exam and generally results in students placing into MUSC 30A. However, admission to MUSC 30A will be based solely on the theory placement exam scores and not on the MUSC 15 grades.

The theory placement exam is held twice a year: on the Tuesday before instruction begins in fall quarter, from 10:00 a.m.-12:30 p.m., and at the beginning of spring quarter (schedule TBA), both in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate advisor prior to application.

Letter Grade Policy

All upper-division courses applied toward the music majors must be taken for a letter grade.

Lower-division courses may be taken Pass/No Pass.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Double majors are possible for the music major. A student can double major with a Music B.A. or B.M. degree, and a major from another department. Students that plan to double major should meet with the Music Department undergraduate advisor for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However, it is possible to pursue the B.M. or the B.A. (with a Western Art Music concentration), and additionally add the jazz minor or electronic music minor. It is not possible to add the Western Art Music minor to either of these majors.

Study Abroad

The department encourages students to explore studying abroad while attending UC Santa Cruz. In particular, the UC Santa Cruz Music Department has an exchange program agreement with the Music Department at the University of Sussex. University of Sussex offers many courses that can be substituted for music major or minor requirements.

However, due to the intense nature of the Music B.M. program, students are encouraged to plan potential study abroad far in advance to ensure they are able to maintain their UC Santa Cruz studies.

For more information on approved course substitutions and the exchange program please visit Study Abroad Courses.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework, senior project (thesis or recital), or a capstone course. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a senior project (not required for the B.A. degree) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.
How Music Majors are Assessed

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.

2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.

3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.

4. A juried "proficiency audition" is required for students enrolled in MUSC 130. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.

5. Auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M. program present a Senior Recital which is evaluated by faculty.

6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.

7. Compositional skills are assessed through the rehearsal and public performance of student works.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Take each of the following courses:

- MUSC 30A Theory, Literature, and Musicianship 5
- MUSC 30B Theory, Literature, and Musicianship 5
- MUSC 30C Theory, Literature, and Musicianship 5

The following course is taken concurrently with the MUSC 30 sequence:

- MUSC 60 Fundamental Keyboard Skills 2

May be waived by instructor approval, or if the student is taking piano lessons from a UC Santa Cruz instructor.

Foreign Language Requirement

FREN 1, GERM 1, and ITAL 1 are required for B.M. voice students. High school transcripts or Advanced Placement (AP) examination scores may satisfy this requirement. Students may take these courses during Summer Session or through any other college. The quarter varies for when each class is offered.

Students should check with the departments offering these courses to determine when they are regularly offered.

There are no foreign language requirements for other students in the B.A. or B.M. programs; however, students who are planning to apply for graduate school are strongly advised to study a language pertinent to their research area.

Upper-Division Courses

Take each of the following courses:

- MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5
- MUSC 101B History of Western Art Music 5
- MUSC 101C History of Western Art Music 5
- MUSC 130 Harmony and Form in 19th-Century and Early 20th-Century Music 5

One course from the MUSC 105 series, Special Topics in History

- MUSC 105A Music of the United States 5
- MUSC 105E Early Keyboard Music 5
- MUSC 105I Improvisation and Collaborative Practices in the 20th Century 5
- MUSC 105M Solo Song: from Monophony to Monody 5
- MUSC 105Q Opera from Peri to Pergolesi 5
- MUSC 105Q The String Quartet from Haydn to the Present 5
- MUSC 105R History of Russian Music 5

One course from the MUSC 150 series, Special Topics in Theory

- MUSC 150A Music Analysis for Performers 5
- MUSC 150C Special Topics in Music Theory: Tonal Counterpoint 5
- MUSC 150I Special Topics in Music Theory: Hindustani Music 5
- MUSC 150P Special Topics in Music Theory: 20th-Century Popular Song 5
- MUSC 150S Focus on Spontaneous Composition 5
- MUSC 150T Post Tonal Analysis 5
- MUSC 150X Theoretical Practices of American Music 5

One course from the MUSC 180 series, Studies in World Musics

- MUSC 180A Studies in World Musics: Asia and the Pacific 5
- MUSC 180B Studies in World Musics: Africa and the Americas 5
- MUSC 180C Studies in World Musics: Central Asia 5
- MUSC 180D Music of Insular Southeast Asia 5
B.M. students who wish to specialize in jazz

Take all the following three courses instead of one course from the MUSC 180 series:
- MUSC 111B Seminar in Jazz Analysis 5
- MUSC 174 Intermediate Spontaneous Composition and Improvisation 5
- MUSC 175 Jazz Theory II 5

A minimum of 12 quarters of ensembles

All ensembles are 2 credits each and may be repeated. A maximum of one ensemble per quarter can be counted toward fulfillment of the total 12-quarter requirement.

Transfer students are required to take six quarters of ensembles.

If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

- MUSC 1C University Concert Choir 2
- MUSC 2 University Orchestra 2
- MUSC 3 Large Jazz Ensemble 2
- MUSC 5A West Javanese Gamelan Ensemble: Beginning 2
- MUSC 5B West Javanese Gamelan Ensemble: Intermediate 2
- MUSC 5C West Javanese Gamelan Ensemble: Advanced 2
- MUSC 8A Beginning Balinese Gamelan 2
- MUSC 8B Advanced Balinese Gamelan 2
- MUSC 9 Wind Ensemble 2
- MUSC 10 Central Asian Ensemble 2
- MUSC 12 Mariachi Ensemble 2
- MUSC 102 University Orchestra 2
- MUSC 103 University Concert Choir 2
- MUSC 158 South African Music Ensemble 2
- MUSC 163 Early Music Ensemble 2
- MUSC 164 Jazz Ensembles 2
- MUSC 166 Chamber Singers 2
- MUSC 168 Experimental Music Ensemble 2

A minimum of 11 quarters of individual lessons.

Eleven quarters of enrollment in any of the courses listed are acceptable for fulfillment of this requirement.

Transfer students are required to take six quarters of applied instruction.

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

- MUSC 61 Individual Lessons: Half Hour 2
- MUSC 62 Individual Lessons: One Hour 3
- MUSC 161 Individual Lessons: One Hour 3
- MUSC 162 Advanced Individual Lessons: One Hour 5

Continuing B.M. Juries

Demonstration of an advanced level at Continuing B.M. juries each fall and spring quarter

Complete the following course
- MUSC 196B Senior Recital Preparation (with individual lessons) 5

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in music is satisfied by completing MUSC 101A and MUSC 101C (already a part of the core curriculum and required for the B.A. and B.M.).

Comprehensive Requirement

Students fulfill the comprehensive requirement by completing MUSC 196B.

* Indicates a performance jury requirement at the end of the quarter.

** Following acceptance to the B.M. program via audition (can be done anytime up to the end of the third year), continuing B.M. students complete "Continuing B.M." juries at the end of each fall and spring quarter.

1 Bachelor of music voice majors are required to take FREN 1, GERM 1, and ITAL 1. High school transcripts or AP scores may satisfy this requirement. Students may take these courses during Summer Session or through any other college. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered.

2 Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

**General Education (GE) Codes**

MUSC 11A will fulfill the IM general education requirement.

3 Most, but not all, ensembles satisfy the PR-C or PR-E general education requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other GE requirements.

**B.M.—Two-Year Plan for Incoming Transfer Students**

The two-year plan assumes that the student places into MUSC 30A, and has completed most GE requirements. Voice students are assumed to have completed introductory language courses prior to transfer. Transfer students are required to take six quarters of lessons and ensembles at UCSC.

Plus all of the following courses:

- MUSC 30A Theory, Literature, and Musicanship 5
- MUSC 30B Theory, Literature, and Musicanship 5
- MUSC 30C Theory, Literature, and Musicanship 5

Plus three quarters of the following lower-division instrumental/voice lesson course:

- MUSC 61 Individual Lessons: Half Hour 2
- MUSC 62 Individual Lessons: One Hour 3
- MUSC 63 Group Instrumental and Vocal Lessons 2

WESTERN ART MUSIC MINOR

The undergraduate minor program in Western art music offers a course of study leading to the minor in music. The goal of this program is to provide a focus for music activities, as well as a background in music theory, history, and performance.

**Course Requirements**

**Lower-Division Courses**

Choose one of the following courses:

- MUSC 11A Introduction to Western Classical Music 5
- MUSC 11D Introduction to World Music 5

MUSC 11A formerly Introduction to Western Art Music

Plus all of the following courses:

- MUSC 30A Theory, Literature, and Musicanship 5
- MUSC 30B Theory, Literature, and Musicanship 5
- MUSC 30C Theory, Literature, and Musicanship 5

Plus three quarters of the following lower-division instrumental/voice lesson course:

- MUSC 61 Individual Lessons: Half Hour 2
- MUSC 62 Individual Lessons: One Hour 3
- MUSC 63 Group Instrumental and Vocal Lessons 2
Upper-Division Courses

Six quarters of upper-division ensembles

- MUSC 102 University Orchestra 2
- MUSC 103 University Concert Choir 2
- MUSC 158 South African Music 2
- MUSC 163 Early Music Ensemble 2
- MUSC 164 Jazz Ensembles 2
- MUSC 166 Chamber Singers 2

Students can petition to take lower-division ensembles, rather than upper-division ensembles. Petitions can be sent to music@ucsc.edu.

Plus three quarters of the following upper-division instrumental/voice lessons course:

- MUSC 161 Individual Lessons: One Hour 3
- MUSC 161A Individual Lessons: Half Hour 2
- MUSC 161B Group Instrumental & Vocal Lessons 2

(Fee: $650 per quarter)

One course from the following list:

- MUSC 101A History of Western Art Music (Medieval, Renaissance, and Baroque) 5
- MUSC 101B History of Western Art Music 5
- MUSC 180A Studies in World Musics: Asia and the Pacific 5
- MUSC 180B Studies in World Musics: Africa and the Americas 5
- MUSC 180C Studies in World Musics: Central Asia 5
- MUSC 180D Music of Insular Southeast Asia 5

Students must take the Theory Placement Exam in order to test into the appropriate music theory course (MUSC 13, MUSC 14, or MUSC 30A). If a student places into MUSC 30A, they will satisfy the theory requirement. Students who place into MUSC **Satisfies upper-division requirement; can be replaced with MUSC 101B or MUSC 101C or a MUSC 180 series course.

Electrical Music Minor

The electrical music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition.

Course Requirements

Lower-Division Courses

One course from the following:

- MUSC 11A Introduction to Western Classical Music 5
- MUSC 11B Introduction to Jazz 5
- MUSC 11D Introduction to World Music 5
- MUSC 80P Popular Music in the United States 5

Plus the following course:

- MUSC 80C History, Literature, and Technology of Electronic Music 5

Plus one of the following courses to fulfill the music theory requirement

Students must take the Theory Placement Exam in order to test into the appropriate music theory course (MUSC 13, MUSC 14, or MUSC 30A). If a student places into MUSC 30A, they will satisfy the theory requirement. Students who place into MUSC...
13 must complete this course and MUSC 14 to meet the theory requirement.

**Upper-Division Courses**

**Take each of the following courses:**
- MUSC 123 Electronic Sound Synthesis 5
- MUSC 124 Intermediate Electronic Sound Synthesis 5
- MUSC 125 Advanced Electronic Sound Synthesis 5

**Two quarters of the following courses:**
- MUSC 167 Workshop in Electronic Music 2
- MUSC 167R Recording Workshop 2

MUSC 167 can be repeated, but MUSC 167R can only be taken once.

**One of the following:**
- MUSC 80L Artificial Intelligence and Music 5
- MUSC 80R Music in the Digital Age 5
- PHYS 80U Physics and Psychophysics of Music 5
- MUSC 80Z Laptop Music 5
- FILM 171A Sound 5
- THEA 114 Sound Design and Engineering for the Theater 5

Or a similar music course that has a technical focus as approved by the department

**One of the following courses:**
- PHYS 160 Practical Electronics 5
- ECE 101 Introduction to Electronic Circuits 5
- ECE 153 Digital Signal Processing 5
- ECE 171 Analog Electronics 5
- CSE 20 Beginning Programming in Python 5
- CSE 5J Introduction to Programming in Java 5

**JAZZ SPONTANEOUS COMPOSITION AND IMPROVISATION MINOR**

**Course Requirements**

The Jazz, Spontaneous Composition and Improvisation minor focuses on the study of the history, theory, and performance of jazz and other improvised musics. In addition, students may be introduced to musical styles that have had profound influences on the uniquely American art form of jazz: folk and popular musics of Africa, Europe, South Asia and the United States and Western classical music. The Jazz, Spontaneous Composition and Improvisation minor is limited to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles.

**Lower-Division Courses**

MUSC 13 is designed for students with barely any or no music theory experience. MUSC 14 and MUSC 15 are meant for students with some music theory experience—you only need to take one of MUSC 14 or MUSC 15, not both.

Students may test out of MUSC 13, MUSC 14, and MUSC 15 by placing directly into MUSC 30A via the Theory Placement Exam.

The Theory Placement Exam is offered twice per year—in fall quarter, the Tuesday before classes start; and in the beginning of spring quarter. See the Music Department website for exam details.

**Upper-Division Courses**

**Take one of the following courses:**
- MUSC 74 Spontaneous Composition/Improvisation I 5
- MUSC 75 Jazz Theory I 5

Or

In place of MUSC 74 or MUSC 75, students may elect to take two quarters of the following course (which may be repeated for credit):
- MUSC 3 Large Jazz Ensemble 2

**Take two of the following courses:**
- MUSC 105A Music of the United States 5
- MUSC 105C Folk and Traditional Music in California 5
- MUSC 105I Improvisation and Collaborative Practices in the 20th Century 5
- MUSC 203H Area Studies in Performance Practice 5
- MUSC 111B Seminar in Jazz Analysis 5
- MUSC 150I Special Topics in Music Theory: Hindustani Music 5
- MUSC 150S Focus on Spontaneous Composition 5
### Ensembles

Students in the Jazz, Spontaneous Composition and Improvisation minor are required to take six quarters of ensembles, at least three quarters of which must be jazz-focused ensembles (MUSC 3 or MUSC 164). The other three quarters can be any ensemble.

If a student elected to take two quarters of MUSC 3 instead of MUSC 74 or MUSC 75, they are only required to do one additional quarter of a jazz ensemble, plus the three quarters of elective ensembles.

### MUSIC M.A.

#### Introduction

The Master of Arts (M.A.) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty advisor, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

#### Requirements

### Course Requirements

A minimum of 60 course credits completed at UC Santa Cruz is required for the degree. All M.A. students are required to complete the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 200</td>
<td>Introduction to Research Methods</td>
<td>5</td>
</tr>

</tbody>
</table>
MUSC 203F Performance Practice in the 20th Century 5
MUSC 203G Concepts, Issues, and the Practice of Ethnomusicology 5
MUSC 203H Area Studies in Performance Practice 5

MUSC 206D: Music Perception and Cognition meets the requirement for one MUSC 203 course. It is possible, in some cases, to substitute a course from the MUSC 253 or MUSC 254 series for one MUSC 203 course. Students should contact the graduate advisor for more information on petitioning the Graduate Committee for course substitutions.

Other Requirements

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Two types of master’s degrees are offered: “A Thesis Plan I master’s requires a research thesis, while a Capstone Plan II master’s has a capstone requirement, which may be a comprehensive exam, an individual project, or a group project.”

Students with a composition emphasis will complete a Thesis Plan I master's. Students with this emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (MUSC 299); and they complete a full-length recital (MUSC 298) of their compositional work.

Students with a musicology/ethnomusicology emphasis will complete a Thesis Plan I master's, regardless of whether or not they complete a performance or lecture-recital. Students with this emphasis will complete a thesis (MUSC 299) and may choose to give a short performance or lecture-recital related to the thesis (MUSC 298).

Students with a performance practice emphasis will usually complete a Capstone Plan II master's and write a short essay to accompany a recital, but may have the option to choose a Thesis Plan I master's instead. Students in this emphasis complete a full-length recital (MUSC 298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (MUSC 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or a collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-H, MUSC 205A-D, MUSC 219, MUSC 220, MUSC 253A-D, and MUSC 254A-M. Graduate students must take all courses for a letter grade with the exception of independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) and the colloquium course (MUSC 252), which may be taken with the Satisfactory/Unsatisfactory grade option. Grades of C or D do not satisfy any course requirement for a music graduate degree.

[Optional Catchall]

Applying for Graduation

Students should contact the graduate advisor to confirm that all requirements for the M.A. degree have been met and to complete the Graduate Division “Application for the M.A. Degree” form.

MUSIC D.M.A

Introduction

The Doctor of Musical Arts (D.M.A.) degree program in music composition focuses on computer-assisted composition and world music composition. Computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. World music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Advancement to Candidacy

Course Requirements

For students entering with the bachelor’s degree, a minimum of 102 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter.

For students entering with a master’s degree from another institution, a minimum of 72 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter. D.M.A. students are expected to complete the degree within a maximum of six calendar years from entrance to the program (leaves of absence are not excluded from this count).

Students entering the D.M.A. program with a bachelor’s degree must take the following course:

MUSC 200 Introduction to Research Methods 5
Students entering the D.M.A. with an M.A. degree in a field other than music should consult their adviser about taking MUSC 200, Research Methods.

All students entering the DMA program must take the following courses:

- MUSC 202 Tonal and Posttonal Analysis 5
- MUSC 219 Techniques in Composition 5
- MUSC 220 Graduate Seminar in Music Composition 5
- MUSC 206A World Music Composition 5
- MUSC 206B Computer-Assisted Composition 5

Current Issues Colloquium

Before advancing to candidacy, all DMA students must enroll in MUSC 252, Current Issues Colloquium, each quarter in residence. MUSC 252 may be taken satisfactory/unsatisfactory or for a letter grade.

Five quarters of independent study:

- MUSC 297 Independent Study 5
- MUSC 298 Graduate Recital 5
- MUSC 299 Thesis Research 5

D.M.A. students must take at least five quarters of independent study.

MUSC 297 is taken in preparation for the Qualifying Exams.

MUSC 297 is typically taken the quarter of the Qualifying Recital.

MUSC 299 is usually taken after advancing to candidacy, in preparation for the dissertation.

Elective Requirements

D.M.A. students must take at least two of the following elective courses.

Note that if students elect to take MUSC 267, Workshop in Computer Music and Visualization, to satisfy one elective requirement, two quarters of the course are required.

- MUSC 201 History of Music Theory from the Greeks Through Rameau 5
- MUSC 267 Workshop in Computer Music and Visualization 2
- MUSC 203H Area Studies in Performance Practice 5
- MUSC 203G Concepts, Issues, and the Practice of Ethnomusicology 5

Foreign Language Requirements

Current skill in reading and comprehension of a relevant foreign language must be demonstrated by:

1. Satisfactory completion of level 3 of a foreign language at UCSC, preferably in the first year of the program; or
2. Submission of an official transcript documenting successful completion of one year of university-level foreign language at another institution (equivalent to level 3 at UCSC); or

3. Passing a foreign language proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words with no resources other than a dictionary to be completed in 1.5 hours.)

4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can prove equivalency to a level 3 course at UCSC. The graduate committee will determine whether or not to accept any such course.

With approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters or one year of university-level instruction in computer programming in lieu of the foreign language requirement.

Ph.D. students are required to demonstrate proficiency in a foreign language according to the same procedures as the M.A. or D.M.A. In addition, Ph.D. students are required during their first year of enrollment to demonstrate proficiency in a second foreign language relevant to their area of interest.

Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Department’s graduate committee. Graduate Division policy states that the language requirement must be completed prior to taking the qualifying examination.

Teaching Requirement

Pre-Qualifying Requirements

Pre-Qualifying Reviews

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess the student’s progress in the program. Faculty may also consider the student’s performance in MUSC 200, MUSC 201, and/or MUSC 202. In unusual cases, when progress has been minimal, faculty reserves the right to terminate a student’s enrollment in the program. Typically, the half recital is satisfied by a combination of 1) participation in a concert of graduate-student compositions sponsored each April by the Music Department, and 2) participation in a public reading of graduate-student final projects from MUSC 219 and MUSC 220.

The Qualifying Recital

At the end of their second year of study, all students admitted to the D.M.A. program must present a half-recital (35-40 minutes of music) representing their best work since entering the program. The D.M.A. qualifying recital will be evaluated by the student’s primary adviser and by a second faculty member (generally a second composer) selected by the student in consultation with the primary adviser.
Dissertation Prospectus

The dissertation prospectus must be submitted 12 months before the scheduled qualifying examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student’s qualifying examination committee three areas of study to be should be emphasized in the student’s qualifying examination. The three topics must be designed to prepare the student for an informed and successful completion of the dissertation project.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor’s degree, and the end of year two or the beginning of year three for students entering with a master’s degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student’s qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign language requirement, and the payment of the necessary fees.

Post-Qualifying Requirements

After advancing to candidacy, students must enroll in at least one quarter of MUSC 299, Thesis Research, in preparation for the dissertation.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-H, MUSC 206A-D, MUSC 219, MUSC 220, MUSC 253A-D, and MUSC 254A-M. Grades of C or D do not satisfy any course requirement for a music graduate degree.

Independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) and the colloquium course (MUSC 252) may be taken with the satisfactory/unsatisfactory grade option.

Dissertation Defense

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the dissertation committee.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC’s Graduate Division Handbook.

MUSIC PH.D.

Introduction

The Doctor of Philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to musical style, the program also encourages the integration of scholarly research with musical performance, emphasizing the manner in which performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of “performance practice” plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Advancement to Candidacy

Course Requirements

Students entering the Ph.D. program with a bachelor’s degree are required to complete the following course:

MUSC 200 Introduction to Research Methods

Plus three courses from the MUSC 203 Performance Practice series:

MUSC 203A Performance Practice in the Middle Ages
MUSC 203B Performance Practice in the Renaissance
MUSC 203C Performance Practice in the Baroque
MUSC 203D Performance Practice in the Classic Period
MUSC 203E  Performance Practice in the Romantic Period  5  
MUSC 203F  Performance Practice in the 20th Century  5  
MUSC 203G  Concepts, Issues, and the Practice of Ethnomusicology  5  
MUSC 203H  Area Studies in Performance Practice  5  

MUSC 206D or a course in the MUSC 254 series may each substitute for one 203 course.

**Plus two courses from the MUSC 253 series:**
MUSC 253A  Historical Perspectives in Musicology and Ethnomusicology  5  
MUSC 253B  Rhythm, Time, and Form  5  
MUSC 253C  Music and Discourse  5  
MUSC 253D  Issues in the Ethnography of Music  5  

**Plus three courses from the MUSC 254 series:**
MUSC 254C  Performativity and Music  5  
MUSC 254D  Organology and Acoustics  5  
MUSC 254E  Asian Resonances in 20th-Century American and European Music  5  
MUSC 254J  Jazz Historiography  5  
MUSC 254K  Music, Gender, and Sexuality  5  
MUSC 254L  John Cage: Innovation, Collaboration, and Performance Technologies  5  
MUSC 254M  Music in San Francisco, 1850-1950  5  
MUSC 254N  Cruising the Postcolony  5  
MUSC 254O  Historiography of American Music  5  
MUSC 254R  Research Design and Grant Writing for Music Scholars  5  

**Plus the following course during each quarter of residence:**
MUSC 252  Current Issues Colloquium  5  

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

**Elective Requirements**

Students entering the Ph.D. program with a bachelor’s degree must take three elective graduate seminars, one of which must be outside of the Music Department. Elective seminars should be selected in consultation with the student’s faculty adviser.

Electives in the Music Department might include an additional course from the MUSC 203 Performance Practice series, an additional course from the MUSC 253 series, or an additional course from the MUSC 254 series.

Elective course options also include the following seminars:
MUSC 201  History of Music Theory from the Greeks Through Rameau  5  
MUSC 202  Tonal and Posttonal Analysis  5  
MUSC 228  Techniques of Modernity and Aesthetic Formations  5  

**Fourth Quarter Research Paper**

Ph.D. students entering the program with a bachelor’s degree are required to submit a research paper by the beginning of the fourth quarter in residence, which will be revised that quarter under the supervision of the student’s faculty adviser, and will be evaluated at the end of the quarter by the adviser and an additional faculty member. Students whose paper is assessed as unsatisfactory will not be allowed to continue in the Ph.D. program.

**Students entering the Ph.D. program with a master’s degree are required to complete following courses:**

**Three courses from the MUSC 203 Performance Practice series:**
MUSC 203A  Performance Practice in the Middle Ages  5  
MUSC 203B  Performance Practice in the Renaissance  5  
MUSC 203C  Performance Practice in the Baroque  5  
MUSC 203D  Performance Practice in the Classic Period  5  
MUSC 203E  Performance Practice in the Romantic Period  5  
MUSC 203F  Performance Practice in the 20th Century  5  

**Two courses from the MUSC 253 series**
MUSC 253A  Historical Perspectives in Musicology and Ethnomusicology  5  
MUSC 253B  Rhythm, Time, and Form  5  
MUSC 253C  Music and Discourse  5  
MUSC 253D  Issues in the Ethnography of Music  5  

**Three courses from the MUSC 254 series**
MUSC 254C  Performativity and Music  5  
MUSC 254D  Organology and Acoustics  5  
MUSC 254E  Asian Resonances in 20th-Century American and European Music  5  
MUSC 254J  Jazz Historiography  5  
MUSC 254K  Music, Gender, and Sexuality  5  
MUSC 254L  John Cage: Innovation, Collaboration, and Performance Technologies  5  
MUSC 254M  Music in San Francisco, 1850-1950  5  
MUSC 254N  Cruising the Postcolony  5  
MUSC 254O  Historiography of American Music  5
MUSC 254R  Research Design and Grant Writing for Music Scholars  5

Plus the following course during each quarter of residence:
MUSC 252  Current Issues Colloquium

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

Plus the following course:
MUSC 299  Thesis Research  5

Elective Requirement

Students entering the Ph.D. program with a master’s degree must take one elective graduate seminar from outside the Music Department. This seminar should be selected in consultation with the student’s faculty adviser.

Foreign Language Requirements

Current skill in reading and comprehension of a relevant foreign language must be demonstrated by:

1. Satisfactory completion of level 3 of a foreign language at UCSC, preferably in the first year of the program; or

2. Submission of an official transcript documenting successful completion of one year of university-level foreign language at another institution (equivalent to level 3 at UCSC); or

3. Passing a foreign language proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words with no resources other than a dictionary to be completed in 1.5 hours.)

4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can prove equivalency to a level 3 course at UCSC. The graduate committee will determine whether or not to accept any such course.

With approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters or one year of university-level instruction in computer programming in lieu of the foreign language requirement.

In addition, Ph.D. students are required during their first year of enrollment to demonstrate proficiency in a second foreign language relevant to their area of interest.

Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Department’s graduate committee. Graduate Division policy states that the language requirement must be completed prior to taking the qualifying examination.

Teaching Requirements

Pre-Qualifying Requirements

Pre-qualifying Reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student’s status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student’s adviser. If progress is minimal, faculty reserves the right to terminate a student’s enrollment in the program.

Qualifying Examination

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student’s field of concentration. The oral examination will focus on the previously completed written examinations as well as the student’s developed expertise in her/his chosen specialization. Students must be registered in the quarter in which they take their qualifying examination.

The examinations will normally be administered at the end of year 3 for students entering with a bachelor’s degree, and at the end of year 2 for students entering with a master’s degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign-language requirement, and the payment of the necessary fees.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-H, MUSC 206A-D, MUSC 219, MUSC 220, MUSC 253A-D, and MUSC 254A-M. Grades of C or D do not satisfy any course requirement for a music graduate degree.

Independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) and the colloquium course (MUSC 252) may be taken with the Satisfactory/Unsatisfactory grade option.

Non-Terminal Master’s Degree

Students who entered the Ph.D. program with a bachelor’s degree may apply for the M.A. degree after completion of a minimum of five quarters in residence, evidence of the completion of the equivalent of one year of a foreign language at UCSC, the fourth-quarter research paper, and the following courses: MUSC 200, one course from the MUSC 203 series, MUSC 252 each quarter in residence, one course each from the MUSC 253 and MUSC 254 seminar series, two elective graduate seminars (one of which may be outside of the Music Department), and MUSC 297.
Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The student will develop a dissertation prospectus, which will be due six months after advancement to candidacy. Guidelines for the format and content of the prospectus can be found on the Music Department web site. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student’s grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Dissertation Preparation Course Requirements

Students preparing for the dissertation should complete at least one quarter of MUSC 299, Thesis Research, with the faculty adviser.

Dissertation Defense

The final examination will be an oral defense of the dissertation open to the university faculty.

Successful completion of this examination will be determined by a majority vote of the dissertation reading committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department website.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC’s Graduate Division Handbook.

CONTEMPORARY PRACTICES CONCENTRATION MODULE COURSE LIST

Courses by Module

Contemporary Practices Modules

In addition to the core course requirements for the Music Bachelor of Arts degree, students in the Contemporary Practices concentration must complete three modules, relating to cross-cultural themes and genres.

Each module consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total)
- two quarters of performing ensembles or performance practice workshops specific to each module (six total). Most ensemble/performance practice courses may be repeated for credit.

### GLOBAL MUSICS CONCENTRATION MODULE

#### COURSE LIST

**Courses by Module**

**Global Musics Modules**

In addition to the core course requirements for the Music Bachelor of Arts degree, students in the Global Musics concentration complete three modules, relating to geographical areas, themes, and genres.

Each module consists of:
- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 101, MUSC 105, MUSC 150, or MUSC 180 course specific to each module (three total)
- two quarters of performing ensemble or performance practice workshop specific to each module (six total). Courses may be repeated.

**Africa and the Americas**

**Lower-Division History and Culture**
- MUSC 11B Introduction to Jazz 5
- MUSC 80F Music in Latin American Culture: Regional Traditions 5
- MUSC 80Q A Survey of African Music 5
- MUSC 81E Jazz Mirror of Global Interconnection 5
- MUSC 81M Chicano/Latino Music in the United States 5

**Upper-Division History and Culture or Theory**
- MUSC 105C Folk and Traditional Music in California 5
- MUSC 150S Focus on Spontaneous Composition 5
- MUSC 180B Studies in World Musics: Africa and the Americas 5

**Performance Practice**
- MUSC 12 Mariachi Ensemble 2
- MUSC 12B Mexican Folklorico Music and Dance 2
- MUSC 74 Spontaneous Composition/Improvisation I 5
- MUSC 158 South African Music Ensemble 2
- MUSC 174 Intermediate Spontaneous Composition and Improvisation 5
- MUSC 203H Area Studies in Performance Practice 5

**Asia**

**Lower-Division History and Culture**
- MUSC 11D Introduction to World Music 5
- MUSC 80A Music of the Silk Road 5
- MUSC 80X Music of India 5

**Upper-Division History and Culture or Theory**
- MUSC 150I Special Topics in Music Theory: Hindustani Music 5
- MUSC 180A Studies in World Musics: Asia and the Pacific 5
- MUSC 180C Studies in World Musics: Central Asia 5

**Performance Practice**

The Performance, Play, and Design Department is a diverse group of scholars/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical group of scholars/artists united by a passionate belief in the history, theory, and practice of theater and dance to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity, and with a commitment to cultural diversity, we serve the research mission of UC Santa Cruz, our audiences, and the students who will shape the theater of the future.

Performance, Play, and Design

J106 Theater Arts Center
(831) 459-2974
theatery@ucsc.edu
http://theater.ucsc.edu

PROGRAMS OFFERED

(p. 94)Art and Design: Games and Playable Media B.A. (p. 88)
Theater Arts B.A. (p. 94)
Theater Arts Minor (p. 98)
Dance Minor (p. 100)
Theater Arts M.A. (p. 101)

OTHER PROGRAMS OF INTEREST

Computer Science: Computer Game Design B.S. (p. 448)

The Performance, Play, and Design Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all disciplines as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various concentrations and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of digital and new media on theater is also integrated into the curriculum.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in department-sponsored productions and annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome non-majors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for a breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater; acting, directing, design and dance studios; costume, scene, and properties shops; a sound recording room; and a computer lab. Also, located at the base of the campus is our 150-seat Barn Theater.

Library holdings in theater literature and history are extensive, including a large slide collection and dance video archives; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

GRADUATE PROGRAM

The Master of Arts degree combines intellectually rigorous coursework with challenging artistic practice. Like our undergraduate curriculum, our graduate program integrates the study of ancient and modern theater texts and practices, and it examines diverse approaches to performance. It encourages collaboration, initiative, and cross-disciplinary thinking.

ART AND DESIGN: GAMES AND
PLAYABLE MEDIA B.A.

Information and Policies

Introduction
The Art and Design: Games and Playable Media (AGPM) Bachelor of Arts (B.A.) degree at UC Santa Cruz focuses on the creation of novel game systems, spaces, and configurations that can produce broad ranges of player experiences, for a wide variety of purposes. It does this through:

- courses in related theory, history, and critical interpretation;
- courses that take a practice-based approach to experimental game creation;
- courses that provide a foundation in working with game media forms;
- courses that provide a foundation in working with game technical materials.

This degree complements the Computer Science: Computer Game Design (CSGD) Bachelor of Science (B.S.), which focuses particularly on the technical aspects of game development. The B.A. focuses more on experience design (in particular) as well as on history, theory, and media creation—while still taking advantage of courses developed for the B.S. and creating a shared community with those students.

Students in the AGPM major learn to understand game design as an art in and of itself, positioned within the context of a number of more disciplinary approaches. Furthermore, students understand game design as a practice of creation, within a much larger and deeper social and historical context.

Upper-division studio courses require coursework to be completed on computers. All students in the B.A. program are strongly encouraged to own a laptop computer. This expense is separate from the cost of tuition and other fees. There is not really a particular laptop that we recommend for AGPM since it really depends on what courses you take. Please take a look at the linked system requirement information below for the various programs that you might use when taking our courses:

- Adobe Photoshop (other Adobe Creative Cloud programs)
- Autodesk Maya
- Blender
- Unity

Getting Started in the Major
Students interested in entering the Art & Design: Games & Playable Media (AGPM) program as frosh can do so as long as they are admitted into UC Santa Cruz. Incoming frosh do not need to satisfy any programming or art requirements prior to arriving at UCSC.

While frosh may not need to satisfy specific requirements, they are urged to make games—using any materials, from Javascript to cardboard—and carefully study game systems. Developing an arts practice in any medium is also helpful, including drawing, writing, music, sculpture, filmmaking, and others. Finally, deepening your understanding of technology is good preparation, including computer programming, participating in maker groups, or whatever else grabs your interest.

Program Learning Outcomes

Students who earn a B.A. in Art and Design: Games and Playable Media gain the skills, knowledge, and understanding that enable them to:

Program Learning Outcomes (PLO)

PLO 1: Demonstrate understanding of the connections between technical commitments and game system design, on one hand, and player experience and cultural communication goals, on the other.

PLO 2: Demonstrate the ability to define, develop, and communicate artistically innovative game ideas—situated historically and employing the methods of multiple art practices.

PLO 3: Demonstrate the ability to design and build a technical system in response to an artistic goal for audience experience.
that employs a fundamental understanding of algorithms and data structures.

PLO 4: Demonstrate an understanding of game history and interpretation sufficient to do independent research on a topic, identify relevant games and secondary literature, think critically about a particular games-related topic, and make a convincing, research-based argument about games.

PLO 5: Demonstrate the ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.

PLO 6: Demonstrate the ability to effectively use techniques for understanding how players experience a game system, and to compare this with a project's artistic goals—then successfully iterate and revise project shape, scope, and function based on external feedback and personal/team constraints.

Major Qualification Policy and Declaration Process

Major Qualification

Prior to declaring the AGPM major, students must complete the following Major Qualification courses with a grade of C or better (these courses can also be taken as Pass/No Pass):

- ARTG 80H Critical History of Digital Games
- ARTG 80I Foundations of Play
- CMPM 80K Foundations of Video Game Design
- CSE 30 Programming Abstractions: Python

Note: CSE 30 has MATH 3 (or higher) and CSE 20 as prerequisites. Grades in these courses are not considered for qualification.

Appeal Process

We do not have a GPA requirement or appeal process for the AGPM major. As long as you complete all of our major qualification courses with a passing grade, you will be able to declare our major. If you have any questions, please reach out to the AGPM advisor.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification (MQ) courses.

All students declare via the AGPM Major Declaration Form. Students should wait until they have received passing grades in all major qualification courses before submitting.

- If a student will not complete all the major qualification courses by the campus declaration deadline, they submit the same form and indicate which requirements are incomplete. Their submission will be reviewed by the department as an attempt to declare via appeal.

- Students pursuing a double major or major/minor plan submit the online form above, and then additionally submit a PDF petition for major declaration form and send it to agpmadvising@ucsc.edu with the subject line: “Your Name - AGPM Double Major or Minor Declaration.” Students should have already created an AGPM academic plan with the advisor prior to declaring.

Transfer Information and Policy

Transfer Admission Screening Policy

In preparation for transfer to AGPM, students are required to demonstrate proficiency in programming, visual art, and game design.

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in fall:

Programming Requirement

Complete the following course or its equivalent:

CSE 30 Programming Abstractions: Python

A minimum GPA of 2.0 (C) required in the course listed above.

Students entering UCSC through fall 2021 also have the option to use a course articulated to CSE 15/CSE 15L (previously offered for this requirement as CMPS 12B/M, Introduction to Data Structures).

Lower-Division Art and Design Requirement

Complete one of the following courses or its equivalent:

ART 15 Introduction to Drawing for the Major
ART 20 Any course in the ART 20 series
ARTG 80G Visual Communication and Interaction Design
ARTG 80H Critical History of Digital Games
ARTG 80I Foundations of Play
ARTG 91 Introduction to Game Art Production
CMPM 25 Introduction to 3D Modeling
CMPM 26 Introduction to 3D Animation
CMPM 80K Foundations of Video Game Design
FILM 20P Introduction to Production Technique
MUSC 1C University Concert Choir
MUSC 2 University Orchestra
MUSC 3 Large Jazz Ensemble
MUSC 5A West Javanese Gamelan Ensemble: Beginning
**Additional Suggested Courses**

In addition, the following courses are recommended prior to transfer to ensure timely graduation:

- Community college courses that are articulated for credit with courses in the Foundational Courses and Lower-Division Arts Requirements and Electives courses listed in the Requirements and Planners tab.

Transfer students who meet the requirements above and complete general education requirements will be able to complete the major in two years as shown in the academic plan in the Planners section of the Requirements and Planners tab on this page. Because of the number of credits required by the B.A., transfer students who have general education requirements remaining may need to take summer session courses and/or additional courses over the academic year to allow graduation in two years.

Prospective students are encouraged to prioritize required and recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

**Getting Started at UCSC as a Transfer Student**

Transfer students are strongly advised to attend a UCSC Summer Orientation session for transfer students. Transfer students should consult with an AGPM academic advisor prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Please see a recommended academic plan for junior transfer students in the Planners section of the Requirements and Planners tab on this page.

**Letter Grade Policy**

All courses used to satisfy any of the Art and Design: Games and Playable Media major requirements can be taken for a letter grade or as Pass/No Pass. This includes both introductory lower-division and advanced upper-division requirements, and with the major qualification courses. A grade of "Pass" is equivalent to meeting the requirement of "C or better" in the Major Qualification policy.

**Course Substitution Policy**

Students are able to petition a course to count as a substitute for any given elective requirement via the AGPM Course Substitution Petition form. Once submitted, requests are reviewed by the program chair. After they come to a decision, the AGPM advisor will reach out to the student and let them know whether their petition was approved or not.

**Double Majors and Major/Minor Combinations Policy**

Students may choose to do a double major or minor along with the AGPM program, but are advised that AGPM has a high number of course requirements. As a result students may be required to petition for a later graduation date in order to complete a double major or minor.

**Study Abroad**

**Honors**

**Requirements and Planners**

**Course Requirements**

The AGPM major requires a minimum of nine lower-division and 11 upper-division courses in residence and satisfaction of the senior comprehensive requirement. The elective options for the major are grouped according to a student's desired career path at the AGPM Class Cluster website.

**Lower-Division Courses**

**Foundational Courses**

Complete the following seven courses:

<table>
<thead>
<tr>
<th>Course Code</th>

### History of Art and Visual Culture Requirement

Complete any one 5-credit History of Art and Visual Culture (HAVC) course. This can be either a lower- or upper-division course.

### Upper-Division Courses

#### Game Design Requirements

Complete all the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMPM 120</td>
<td>Game Development Experience</td>
<td>5</td>
</tr>
<tr>
<td>ARTG 120</td>
<td>Game Design Experience</td>
<td>5</td>
</tr>
<tr>
<td>ARTG 170</td>
<td>Game Design Studio I</td>
<td>5</td>
</tr>
<tr>
<td>ARTG 171</td>
<td>Game Design Studio II</td>
<td>7</td>
</tr>
<tr>
<td>ARTG 172</td>
<td>Game Design Studio III</td>
<td>7</td>
</tr>
</tbody>
</table>

### Electives

#### Upper-Division Electives

Click through to classes below and check with course home departments for availability, prerequisites, or enrollment restrictions. ART, CMPM and CSE courses may have restrictions or prerequisites. FILM courses have prerequisites and/or require an application, and are generally restricted to Film and Digital Media majors. MUSC courses are restricted to students in the electronic music minor.

Complete six courses from the following list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 101</td>
<td>Introduction to Computer Programming for the Arts</td>
<td>5</td>
</tr>
<tr>
<td>ART 104</td>
<td>Digital Video</td>
<td>5</td>
</tr>
<tr>
<td>ART 106A</td>
<td>2D Animation</td>
<td>5</td>
</tr>
<tr>
<td>ART 106E</td>
<td>3D Modeling and Animation</td>
<td>5</td>
</tr>
<tr>
<td>ART 106O</td>
<td>2D Animation</td>
<td>5</td>

CMPM 176 Game Systems 5
ARTG 170 Game Design Studio I 5
ARTG 171 Game Design Studio II 7
ARTG 172 Game Design Studio III 7

Completion of CMPM 25 AND CMPM 26 counts as one upper-division elective.

Click through to individual class descriptions for availability, prerequisites, or enrollment restrictions.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in Art and Design: Games and Playable Media is satisfied by completing:
ARTG 170 Game Design Studio I 5

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence (ARTG 170, ARTG 171, and ARTG 172). This sequence will meet in collaboration with CMPM 170, CMPM 171, and CMPM 172.
ARTG 170 Game Design Studio I 5
ARTG 171 Game Design Studio II 7
ARTG 172 Game Design Studio III 7

Planners

The following is a recommended academic plan for students to complete during their first two years as preparation for the AGPM major.

Art and Design: Games and Playable Media B.A. Planner

</tr>
</tbody>
</table>

^ The math prerequisite for CSE 30 can be satisfied in any of the following ways: successfully passing MATH 3, MATH 11A, MATH 19A, AM 3, AM 11A/ECON 11A, or a score of 400 or higher on the mathematics placement examination.

* ARTG and CMPM 120 are also offered during the summer.

** We highly recommend that students enroll in ARTG 80G for their LD Arts Elective course.

In addition to the specific courses shown in the four-year planner, a student must complete courses satisfying the CC, ER, SI, SR, TA, PR and C (WRIT 2) general education requirements.

The two-year planner assumes that a student has completed all general education requirements before transferring to UCSC.

THEATER ARTS B.A.

Information and Policies

Introduction

Academic Advising for the Program

General information about theater arts and dance degrees is available on the Theater Arts Department website. Students are also strongly encouraged to consult early with the Theater Arts Department advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university. Please use Slug Success to make an appointment. You may also contact the department advisor by emailing theater-ugradadv@ucsc.edu or calling (831) 459-2974.

Transfer students—please also see the How to Declare a Major and the Transfer Information and Policy sections below.

Program Learning Outcomes

Our program stresses dance, design, and drama as essential disciplines in the successful practice of theater arts in the contemporary world.

Graduates from the Theater Arts B.A. program should demonstrate the following:

1. Foundations of Performance. Students should be able to identify and apply basic theatrical techniques in dance, design, and drama.

2. Theatrical histories and theories. Students should be able to recognize and analyze performance works within the general culture and historical period that produced them.

3. Performance experience. Students should be able to translate theater arts concepts into performance, participating in any theatrical endeavor with the rigor, discipline, and imagination necessary to make a meaningful contribution.

4. Research proficiency. Students should be able to formulate personal research questions that expand their knowledge of theater arts, conducting independent research into the history and theory of at least one area of interest.

5. Creative practice. Students should be able to use theatrical practices and performance experiences to conceive, design, realize, and reflect on new performance projects.

6. Appreciation of diversity. Students should be able to recognize and appreciate a wide variety of approaches, cultures, and styles in both past and contemporary performance practice.

7. Communication and critical thinking. Students should be able to use critical vocabularies to communicate clearly about theater arts in written and oral forms.

8. Collaborative skills. Students should be able to work confidently and effectively in groups on a common project.
Main Qualification Policy and Declaration Process

Major Qualification

Transfer students—please see the How to Declare a Major and the Transfer Information and Policy sections below.

To declare the major no later than the major declaration deadline in their sixth term, as required by the university, students who start UC Santa Cruz as frosh must meet and make an academic plan with the Theater Arts Department academic advisor (make an advising appointment through Slug Success) and successfully completed three lower-division courses:

One course from:
- THEA 61A Ancient and Medieval Drama 5
- THEA 61B Drama from the Renaissance to the Modern Age 5
- THEA 61C The Birth of the Modern: Drama and Performance After the Renaissance 5

Plus two courses chosen from:
- THEA 10 Introduction to Theater Design and Technology 5
- THEA 30 Introduction to Dance Theory and Technique 5

Either this course
- THEA 20 Introductory Studies in Acting 5

or this course
- THEA 21 Acting Studio I: Psychological Realism 5

Either THEA 20 or THEA 21 may be used as one of the three courses taken for declaration eligibility (not both). THEA 20 is a non-audition course designed for students with little or no experience in acting. THEA 21 is appropriate for students with some acting experience and is audition-by-audition (audition requirements are listed when classes are published in the Schedule of Classes). Please speak with the department advisor for more information.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to theater-ugradadv@ucsc.edu.

How to Declare a Major

To declare the theater arts major, minor or dance minor all students meet with the academic advisor to begin the declaration process by making an appointment (via Slug Success).

Students are also required to meet with a faculty advisor (assigned by the academic advisor) as part of the declaration process.

If non-course requirements remain incomplete by the campus deadline (in their sixth quarter for students admitted as frosh, and in their second quarter for transfer students), the student must be allowed to declare the major by the declaration deadline in their next academic term (excluding summer) without appeal.

Transfer students are encouraged to declare the major as soon as possible and may declare as soon as their first quarter on campus after meeting with the Theater Arts Department academic advisor (make an advising appointment through Slug Success). Transfer students may declare the theater arts major even if they have not completed any theater arts courses and must declare a major by the end of their second quarter, as required by the university. Transfer students should also read the notes in the Transfer Information and Policy section.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to pursue the theater arts major are not required to audition, submit a portfolio, or complete specific major preparation courses for consideration of admission to UC Santa Cruz.

While not required for admission, transfer students are recommended to complete general education requirements (p. Error! Bookmark not defined.) before coming to UC Santa Cruz. Students may also complete courses that are articulated to UC Santa Cruz lower-division theater arts courses before coming to UC Santa Cruz. Please consult with the department advisor for more information.

Getting Started at UC Santa Cruz as a Transfer Student

Transfer students are strongly advised to consult with the Theater Arts Department academic advisor prior to enrolling in classes their first quarter (make an advising appointment through Slug Success, or email theater-ugradadv@ucsc.edu before you have access to that system).

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division major or minor requirements and should always consult with the Theater Arts Department academic advisor as early as possible regarding this option.

As stated in the How to Declare a Major section, transfer students may declare the major at any time after coming to UC Santa Cruz and are encouraged to do so as soon as possible, even if they have not completed any theater arts courses. Transfer students entering as juniors must declare a major by the deadline in their second quarter, as required by the university.

Letter Grade Policy

This program does not have a letter grade policy outside the university's Pass/No Pass limit and minimum grade requirement (more information is available on the Pass/No Pass website).
Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

There are many opportunities for students to study abroad, potentially fulfilling major or minor requirements. Credits earned through study abroad programs or off-campus programs are considered on a case-by-case basis by the department faculty. Please consult with the department academic advisor about this process.

It is important to learn about requirements and deadlines as early as possible from the Study Abroad/Global Learning office and then to carefully plan with department and college advisors. Some required courses at UC Santa Cruz are only offered in certain quarters, for example, and therefore careful planning is essential.

Please read more about study abroad opportunities on the Global Engagement website.

Requirements and Planners

Course Requirements

The theater arts major requires seven lower-division courses, six credits of course THEA 50, and eight upper-division courses (inclusive of a senior seminar course, THEA 185). Majors may organize their studies around an area of interest in accordance with the requirements outlined below.

Credits earned via a study abroad program, such as the UC Education Abroad Program (EAP), or other off-campus programs are considered on a case-by-case basis by the department chair. Students should consult with their department and college advisors before planning studies outside of UC Santa Cruz. Please read more about study abroad opportunities on the Global Learning website.

Lower-Division Courses

One of the following courses:

- THEA 20: Introductory Studies in Acting 5
- THEA 21: Acting Studio I: Psychological Realism 5

Plus all of the following courses:

- THEA 10: Introduction to Theater 5
- THEA 30: Introduction to Dance Theory and Technique 5
- THEA 61A: Ancient and Medieval Drama 5
- THEA 61B: Drama from the Renaissance to the Modern Age 5
- THEA 61C: The Birth of the Modern: Drama and Performance After the Renaissance 5

Plus one lower-division 5-credit elective

Plus the following course (three times):

- THEA 50: Fundamentals of Theater Production 2

NOTE: this 2-credit course must be taken three times for a total of six credits. Students are highly encouraged to complete all six required credits of THEA 50 before their last two quarters, and to contact the department advisor early to learn about the unique enrollment process for the class.

Upper-Division Courses

Eight upper-division courses must be taken as part of the major, as specified here:

The following course:

- THEA 160: Dramatic Theories 5

Plus two studio courses chosen from:

- THEA 103: Design Concept Development 5
- THEA 106: Digital Illustration 5
- THEA 114: Sound Design and Engineering for the Theater 5
- THEA 115A: Design Studio: Scenic Design B 5
- THEA 115B: Design Studio: Scenic Design B 5
- THEA 117: Design Studio: Costume Construction 5
- THEA 117A: Advanced Costume 5
- THEA 118: Design Studio: Scene Painting 5
- THEA 119: Design Studio: Lighting Studio B 5
- THEA 120: Voice and Movement for Performers 5
- THEA 121: Acting Studio II: Shakespeare 5
- THEA 123: Acting and Shakespeare 5
- THEA 124: Movement for Performers 5
- THEA 126: Acting Studio III 5
- THEA 126M: The Meisner Technique: A Practical Exploration 5
- THEA 131A: Dance Studio II: Asian or Asian Diasporic Practice 5
- THEA 131C: Dance Studio II: Advanced Contemporary Forms and Practices 5
- THEA 135: Choreography I 5
- THEA 136: Choreography II 5
- THEA 141: Play Direction Studio I 5
- THEA 142: Play Direction Studio II 5
- THEA 152: Advanced Stagecraft 5
- THEA 155: Shakespeare to Go 5
- THEA 157: Playwriting 5
- THEA 159: Advanced Playwriting 5

Optional: If a theater arts major takes more than the one required faculty-directed production course (listed in
the separate section below), the second may be used toward one of the two upper-division studio course requirements.

Plus two history/theory/critical studies courses, chosen from:

THEA 50 (2-credit)

In addition to the specific courses shown in this transfer planner, students must complete (or must have completed at another institution) courses satisfying all general education (GE) requirements. Students should consult their college advising office with any questions about GEs.

Faculty-Directed Production: Participation in one 5-credit Faculty-Directed Production class is a requirement for the theater arts major (separate from THEA 50 production classes). Enrollment is by audition or interview; therefore, it is important that students begin trying to fulfill the requirement as early as possible as it cannot be predicted when they will be cast or chosen to participate. Contact the department advisor for information: theater-ugradadv@ucsc.edu. Details can also be found in the Theater Arts Undergraduate Handbook.

THEATER ARTS MINOR

Students earn a minor in theater arts by completing eight courses (seven 5-credit courses and one 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Declaration of the minor

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites,
and a major must be officially declared before a minor may be declared.

To declare the minor, first have an Academic Planning Form and Petition for Minor Declaration form completed and signed by your major department advisor. While that plan is current, make an appointment to meet with the Theater Arts Department advisor to create a plan for and declare the minor—please use Slug Success to make an appointment. You may also contact the department advisor by emailing theater-ugradadv@ucsc.edu.

Students are strongly encouraged to consult early with the department advisor to create an academic plan for a minor in theater arts. This may be done prior to declaration.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts Department academic advisor as early as possible regarding this possibility.

Course Requirements

Lower-Division Courses

Choose one from the following series:

THEA 61A  Ancient and Medieval Drama 5
THEA 61B  Drama from the Renaissance to the Modern Age 5
THEA 61C  The Birth of the Modern: Drama and Performance After the Renaissance 5

Plus one course in the student’s area of focus chosen from:

THEA 10  Introduction to Theater Design and Technology 5
THEA 20  Introductory Studies in Acting 5
THEA 21  Acting Studio I: Psychological Realism 5
THEA 30  Introduction to Dance Theory and Technique 5
THEA 40  Introduction to Directing 5

Plus the following fundamentals course:

Students are highly encouraged to contact the department advisor early to learn about the unique enrollment process for THEA 50, as well as to complete this course as early as possible, before their last year on campus.

THEA 50  Fundamentals of Theater Production 2

Upper-Division Courses

Three history/theory/critical studies courses chosen from the following:

THEA 100A  Asian Theater/Dance and Global Impacts 5
THEA 100B  Black Theater USA 5
THEA 100C  Courts, Courtesans, Shamans, and Clowns: Asian Drama 5
THEA 100W  Black/African Diasporic World Theater 5
THEA 104  Multimedia Authoring 5
THEA 108  Theater and Interaction Design 5
THEA 113  The History of Design for Theater 5
THEA 116A  History of Clothing and Costume 5
THEA 122  Indian Performance: Rama, Siva, Krishna 5
THEA 161C  Theater and Drama of the Renaissance 5
THEA 161D  Asian Theater: An Anthropological Approach 5
THEA 161H  Shakespeare In Asia 5
THEA 161M  Sexuality, Gender, Drama, and Performance 5
THEA 161P  Theater in the Chicano Power Movement 5
THEA 161Q  Queer Theatricks: Representations and Sensibilities 5
THEA 161R  Theater of American Cultures 5
THEA 161S  American Drama: Politics and Theater 5
THEA 161T  Women in Theater 5
THEA 161U  Performance of Story in Theater and Film 5
THEA 161Y  Modern Ancient Drama 5
THEA 161B  Chekhov and His Impact 5
THEA 163A  Shakespeare 5
THEA 163G  Special Studies in Playwrights: Artaud 5
THEA 163H  Henrik Ibsen and His Impact: Ghosts of the Future 5
THEA 163K  Special Studies in Playwrights: Euripides 5
THEA 164  Issues in Dance History and Theory 5
THEA 165  Dance Modernism 5
THEA 166  Ballet: A History 5
THEA 167  Africanist Aesthetics: Live Dialogues in the Americas and Africa 5

Plus two studio courses (one of which may be a faculty-directed production; see separate section below):

THEA 103  Design Concept Development 5
THEA 106  Digital Illustration 5
THEA 114  Sound Design and Engineering for the Theater 5
THEA 115A  Design Studio: Scenic Design 5
THEA 115B  Design Studio: Scenic Design B 5
THEA 117  Design Studio: Costume 5
THEA 117A  Advanced Costume Construction 5
THEA 118  Design Studio: Scene Painting 5

**DANCE MINOR**

Students earn a minor in dance by completing eight courses (seven 5-credit courses and one 2-credit course) comprising a background in the theory and practice of dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

**DECLARATION OF THE MINOR**

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites, and a major must be officially declared before a minor may be declared.

To declare the minor, first have an Academic Planning Form and Petition for Minor Declaration form completed and signed by your major department advisor. While that plan is current, make an appointment to meet with the Theater Arts Department academic advisor to create a plan for and declare the minor. Please use Slug Success to make an appointment. You may also contact the department advisor by emailing theater-ugradadv@ucsc.edu.

Students are strongly encouraged to consult early with the department advisor to create an academic plan for a minor in dance. This may be done prior to declaration.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts Department academic advisor as early as possible regarding this possibility.

**Course Requirements**

**Lower-Division Courses**

Lower-division courses may be used to fulfill requirements in both the theater arts major and dance minor, but separate upper-division courses must be taken to satisfy major and minor requirements. Consult with the department advisor if planning to pursue both the theater arts major and dance minor.

**One course in creative practice, chosen from:**
- THEA 30 Introduction to Dance Theory and Technique
- THEA 33C Dance Studio I
- THEA 36 Introduction to Dance Composition

**Plus one course in cross-cultural techniques, chosen from:**
- THEA 22 Indonesian Dance and Drama
- THEA 31A Dance Studio I: Asian or Asian Diasporic Practice
- THEA 31B Dance Studio I: Ballet
- THEA 31C Dance Studio I: Contemporary Dance Theory and Technique
- THEA 37 African Dance
- THEA 80R Bollywood Dance and Culture in India and Indian Diaspora
- THEA 80U Everybody Dance Now!
- THEA 80Z Indian Dance

**The following fundamentals course:**

Students are highly encouraged to contact the department advisor early to learn about the unique enrollment process for THEA 50, as well as to complete this course as early as possible, before their last year on campus.
THEATER ARTS M.A.

Introduction

The Theater Arts Department offers a 12-month Master of Arts (M.A.) in Theater Arts degree, which serves as a bridge from undergraduate work to professional work in a range of performance-related fields. It can also place students in an excellent position to pursue further graduate academic work, such as an M.F.A. or Ph.D.

Requirements

Course Requirements

Students are required to complete 40 credits for the M.A. in Theater Arts.

This includes three graduate seminars for a total of 15 credits:

- THEA 290A Text Analysis 5
- THEA 290B Performance Histories 5
- THEA 290C Performance Analysis 5

Students must also complete a 10-credit performance research project that includes a professional internship project:

- THEA 293 Performance Research Project 10

Students must also complete the following three 5-credit courses:

- THEA 294 Future Stages 5
- THEA 295 Group Critique 5
- THEA 299 Capstone Thesis 5

Other Requirements

[Optional Catchall]

Applying for Graduation
HUMANITIES DIVISION

500 Humanities 1 Building
(831) 459-2696
https://humanities.ucsc.edu/

What does it mean to be human, to analyze and construct the human experience? These are the fundamental questions that guide and unite the learning, teaching and scholarship conducted in UC Santa Cruz's Humanities Division. The exploration and discussion of this query has culminated in some of humanity's most deeply and widely valued beliefs and teachings about ourselves and the world in which we live.

Departments and programs in the Humanities Division at UC Santa Cruz train students to research the human condition in all of its complexity and diversity to become aware and effective citizens of the world, and to become visionaries and leaders in their chosen careers. The humanities provide a critical framework for thinking about the future through the lens of the past and the present.

Programs in the Humanities at UC Santa Cruz are nationally recognized for their quality faculty in the Humanities are recognized for their dedication to research and teaching. Students in the Humanities have the opportunity to work closely with faculty mentors on research projects that achieve award-winning results.

The following undergraduate majors are offered: applied linguistics and multilingualism, classical studies, critical race and ethnic studies, feminist studies, history, Italian studies, Jewish studies, language studies, linguistics, literature, philosophy, and Spanish studies. In addition, there are minors in classical studies, East Asian studies, history of consciousness, history, Italian studies, Jewish studies, language studies, linguistics, literature, and philosophy.

At the graduate level, the Ph.D. is offered by programs in feminist studies, history, history of consciousness, linguistics, literature, and philosophy. Master's (M.A.) programs are offered in history, linguistics, literature, and philosophy.

The Writing Program offers courses and assessments related to university and campus writing requirements and coordinates with the undergraduate colleges in delivering the college core curriculum.

The Humanities Institute at UC Santa Cruz is a hub for academic research, cross-discipline collaboration, and public engagement. They incubate ideas and foster innovation by funding projects, centers, and research clusters that enable faculty and students to work on some of the biggest problems of our day.

Critical Race and Ethnic Studies

416 Humanities I
(831) 459-2757
https://cres.ucsc.edu/

PROGRAMS OFFERED

Critical Race and Ethnic Studies B.A. (p. 103)
Black Studies Minor (p. 109)
Critical Race and Ethnic Studies Designated Emphasis (p. 111)

UNDERGRADUATE PROGRAM

Launched in 2014-15, the Critical Race and Ethnic Studies (CRES) curriculum has been formally organized so that undergraduate students may pursue organized study leading toward a bachelor of arts degree. CRES majors develop a deep understanding of how race and other modalities of power have structured human life and have informed the imagination of social transformation and justice in the past and the present. CRES accordingly offers a study of the dynamic power relations resulting from the cultural and institutional productions of the idea of “race” on a local, national, and global scale. Here, “race” is understood as a major ideological framework through which both practices of power and domination and struggles for liberation and self-determination have been articulated and enacted throughout modern history and in the contemporary moment. The study of “race,” as such, is a rigorous project, one which yields critical insights into the social, political, cultural, and economic processes that have defined and shaped the modern era—colonialism and slavery, conquest and displacement, genocides and warfare, migration and creolization, criminalization, imprisonment and disenfranchisement, globalizations, and post-9/11 security state policies such as racial profiling. These phenomena orient our attention to particular academic fields with which CRES is necessarily in dialogue. These fields include postcolonial studies, settler colonialism studies, human rights studies, indigenous studies, migration, diaspora and border studies, mixed race studies, legal studies, environmental studies, and science studies.

Faculty from across the UC Santa Cruz campus have contributed significantly to conversations in critical race and ethnic studies for decades, with nationally renowned faculty in anthropology, community studies, feminist studies, film and digital media, history, history of art and visual culture, history of consciousness, Latin American and Latino studies, literature, politics, psychology, social documentation, sociology, and the sciences. In addition to courses specifically offered under the subject of CRES, many courses engaging critical race and ethnic studies are sponsored by these departments across campus.

Black Studies Minor

Launched fall 2020, the Black studies minor offers students grounding in the intellectual histories, political movements, cultural expressions, and critical theories of the Black diaspora, all while engaging a range of methodologies from across disciplines. Attention to the significance of social justice is a hallmark of the minor. Supported by faculty expertise in Africa, the Caribbean, the Americas, Europe, and the Pacific, students can explore the globally multi-sited nature of Black freedom...
struggles, both past and present, and examine blackness through a comparative lens.

**GRADUATE PROGRAM**

Also launched in 2014-2015, the Designated Emphasis (DE) in Critical Race and Ethnic Studies (CRES) is available for doctoral students to pursue alongside their doctoral degree program. To complete the DE, students must have a faculty adviser from the CRES faculty, complete four relevant courses, and complete a significant piece of scholarly writing in the area of CRES. Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES course, and may be eligible to teach a CRES course of their own design as a graduate student instructor.

**CRITICAL RACE AND ETHNIC STUDIES B.A.**

**Information and Policies**

**Introduction**

The B.A. program in critical race and ethnic studies (CRES) offers an interdisciplinary curriculum that enables majors to examine the dynamic power relations resulting from the cultural and institutional productions of the idea of "race" on a local, national, and global scale. Our majors study the history of race and ethnicity both in the United States and across the globe, and they learn how the constructs of race and racism have changed over time. By approaching race as a major ideological framework through which practices of power and domination as well as struggles for liberation and self-determination have been articulated and enacted throughout modern history and in the contemporary moment, our majors develop a deep understanding of how race and other modalities of power have informed the imagination and trajectory of social transformation and justice in the past and the present. The study of race in CRES yields critical insights into the social, political, cultural, and economic processes that have defined and shaped the modern era—colonialism, slavery, conquest, displacement, genocide, warfare, migration, creolization, criminalization, imprisonment, disenfranchisement, globalization, racial profiling, and post-9/11 security state policies. Our majors also examine historical racial/ethnic ideologies such as multiculturalism, colorblindness, and posttracialism as well as contemporary social phenomena such as changing working conditions, new migration patterns, and emergent cultural expressions. Students further explore the ways that race and ethnicity have developed in concert with gender, sexuality, class, indigeneity, citizenship, and other areas of power, privilege, and lived identity, as well as the role they play in access to education, employment, welfare services, and participation in politics, the economy, and the arts.

The academic fields with which CRES is necessarily in dialogue include postcolonial studies, settler colonialism studies, human rights studies, indigenous studies, migration, diaspora and border studies, mixed race studies, legal studies, environmental studies, and science studies. CRES majors draw on methods and concepts from different academic disciplines in order to better understand historical and contemporary social phenomena and problems. The major allows students flexibility at the upper-division level to design an interdisciplinary course of study that enables a general overview of areas of interest, while selecting electives from multiple areas of specific research and career interests. Alternatively, they can engage deeply with a key area of focus, taking a number of courses in a particular area in order to develop expertise in it. For example, they may wish to focus on a social group (e.g., members of the African diaspora), on a discipline (e.g., history), on a social phenomenon (e.g., social movements), or on a methodological or theoretical orientation (e.g., theories of race, gender and sexuality).

Through immersion in a program of study that is multidisciplinary, comparative, and transnational in scope, CRES majors develop a critical perspective on race, racial relations, and racial justice in the United States and beyond. CRES also helps students develop skills in critical thinking, comparative analysis, the application of social theory, research, communication, and writing so that they can act effectively in an ever-changing, complex, and culturally diverse world. A student with a bachelor’s degree in CRES will be well prepared for graduate-level study in the humanities, social sciences, law, medicine/public health, education and international affairs and strongly positioned to pursue careers in the private, public and non-profit sectors.

**Academic Advising for the Program**

Email: cres@ucsc.edu
Phone: (831) 459-2757

CRES advising is held in Humanities 1, room 416. Drop in hours are posted on the CRES website. Students can make an appointment by using the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should consult the Transfer Student Information and Policy section for specific requirements.

**Getting Started in the Major**

Students interested in CRES may declare at any time. While specific courses are not required in order to declare, ideally, students will be enrolled in or have completed CRES 10 with a C or better. (Please see the section "How to Declare a Major" for details.) All requirements of the major can be completed within two years.

**Program Learning Outcomes**

Students who complete the CRES major should emerge with the following skills, competencies, and knowledge:

**Critical Frameworks**

- Demonstrate deep knowledge of historical, contemporary, and intersectional perspectives on race and ethnicity.
- Demonstrate familiarity with different disciplinary methods applied to race and ethnicity.
• Demonstrate a critical perspective on institutional power and knowledge.

Communication
• Demonstrate ability to account for other people’s arguments, to formulate one’s own arguments, and to locate both arguments in the larger context of the field.
• Demonstrate ability to formulate an argument in alternative media, such as speech, audiovisual, digital, and other forms of non-written communication.
• Demonstrate writing effectively in the interdisciplinary field.

Research
• Demonstrate ability to design and implement a collaborative research project.
• Demonstrate ability to design and implement an independent research project.

Community Collaboration, Engagement, and Activism
• Demonstrate an understanding of the issues, ethics, and methods surrounding activist, collaborative, and community-based research projects.
• Demonstrate an understanding of collaborative knowledge that effectively integrates theoretical and experiential thinking about social justice.

Major Qualification Policy and Declaration Process

Major Qualification
Students may declare the CRES major at any time. Transfer students should consult the Transfer and Information Policy section below.

Appeal Process
A student may file an appeal with the CRES advisor within 15 days of the denial of major declaration. The CRES Department will notify the student and the college of the decision within 15 days of the receipt of the appeal.

How to Declare a Major
Students may declare the major by submitting a proposed Petition for Major/Minor Declaration to the department advisor. The major declaration should include a plan to complete CRES 10, CRES 100, and CRES 101 at the next possible opportunity.

Per campus policy, students must submit their major declaration no later than the third quarter of their sophomore year or, in the case of transfer students, no later than the second quarter of their junior year. CRES welcomes students who are pursuing more than one major or who are transferring from another major to declare after this time frame.

Transfer Information and Policy

Transfer Admission Screening Policy
No major preparation courses are required prior to transfer; however, prospective students are strongly encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started at UCSC as a Transfer Student
Transfer students are encouraged to declare the major and enroll in CRES 10 as soon as possible to be assured entrance into the required core courses. Transfer students and students in exceptional circumstances may substitute an equivalent course with the department chair or undergraduate director’s approval.

Letter Grade Policy
This program does not have a letter grade policy.

Course Substitution Policy
CRES is an interdisciplinary major that includes courses taught by faculty in other departments (see the Electives section below for a list of approved courses). Students who wish to substitute a course not on the electives list should complete the Petition for Course Credit form available on the CRES website and submit the completed form to CRES advising.

Double Majors and Major/Minor Combinations Policy
The CRES major works very well as a double major with numerous fields of study such as anthropology, community studies, creative writing, feminist studies, film and digital media, education, environmental studies, history, history of art and visual culture, legal studies, linguistics, languages, literature, politics, sociology, theater arts, and more.

Study Abroad

Honors
CRES awards honors and highest honors in the major. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the senior exit requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

Course Requirements
To graduate with a major in CRES, a student is required to complete 10 courses with the approval of the department.
Lower-Division Courses

One lower-division foundation course:

CRES 10 Critical Race and Ethnic Studies: An Introduction 5

Upper-Division Courses

Two upper-division core courses are required for the major:

CRES 100 Comparative Theories of Race and Ethnicity 5
CRES 101 Research Methods and Writing in Critical Race and Ethnic Studies 5

Electives

Students must complete at least six electives offered in critical race and ethnic studies (with the CRES designation) or from the lists below. At least five must be upper-division, and up to one lower-division course is allowed. For current offerings, please visit the CRES course page.

- At least two electives must be from the list of designated courses focusing on phenomena outside of the U.S. or on transnational or hemispheric subjects.
- At least two academic divisions must be represented in the elective coursework.

Students are encouraged to supplement their upper-division coursework with language study, internships, and individual or group independent studies. Students may petition to have up to 10 credits of such activities substituted for upper-division elective requirements, so long as these activities serve, or do not interfere with, the breadth requirements.

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. The DC requirement in CRES is satisfied by completing the Comprehensive Requirement (see below).

Comprehensive Requirement
The comprehensive requirement is fulfilled by completing a senior seminar from the CRES 190 series, or one of the other senior seminars listed below. CRES 190 series courses in the current General Catalog are also listed below; any CRES 190 series course that is listed in a subsequent General Catalog will also satisfy the comprehensive requirement.

Prerequisites for the CRES 190 series include CRES 10 and CRES 100 and satisfaction of the Entry Level Writing and Composition requirements. Senior seminars outside of CRES may have additional enrollment restrictions or prerequisites.

Students must also complete all general education requirements except for ER, which is satisfied by CRES 10.

Two-Year Sample Academic Plan for CRES Major (Transfer Students)
Transfer students should complete their general education (GE) requirements or IGETC before enrolling at UCSC, but this is not a requirement to complete the major within two years of transferring. The CRES major consists of 10 courses, allowing transfer students to complete about two CRES courses per quarter along with additional units to complete the required 180 units for graduation.

Blacks Studies Minor
Housed in the Critical Race and Ethnic Studies (CRES) Department, the Black Studies minor offers students grounding in the intellectual histories, political movements, cultural
expressions, and critical theories of the black diaspora, all while engaging a range of methodologies from across disciplines. Attention to the significance of social justice is a hallmark of the minor. Supported by faculty expertise in Africa, the Caribbean, the Americas, Europe, and the Pacific, students can explore the globally multi-sited nature of black freedom struggles, both past and present, and examine blackness through a comparative lens.

Through careful advising, students can pursue a set of electives, tailored to their interests, enabling broad or deep exploration of specific histories, geographic regions, and thematic concerns. With a foundation in CRES 68, Approaches to Black Studies (substitutable with CRES 10, Critical Race and Ethnic Studies: An Introduction), students will undertake an additional 25 credits—or five upper-division elective courses—drawn from the Arts, Humanities, and Social Sciences divisions. Students can select these five electives from a list of pre-approved courses, with no more than three from any one program or department. Courses not appearing on the approved list can be petitioned for credit.

**Course Requirements**

**Lower-Division Courses**

CRITICAL RACE AND ETHNIC STUDIES DESIGNATED EMPHASIS

Introduction

Requirements

Graduate students from other departments may obtain a designated emphasis in Critical Race and Ethnic Studies (CRES) by completing the following requirements in addition to the requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the CRES Department principal or affiliated faculty. The student must meet with this CRES advisor to develop a coherent plan for meeting the requirements for the designated emphasis, preferably before the end of the student’s first year. This plan must be approved by the CRES department chair.

A member of the CRES principal or affiliate faculty (usually the CRES graduate advisor) must serve on the student's qualifying examination committee and on the student's dissertation committee.

Course Requirements

The student must take four relevant graduate seminars taught by CRES Department faculty. One relevant graduate seminar taught by non-program faculty may be counted with the approval of the CRES advisor. The advisor may also approve the substitution of an individual or group independent study addressing a set of readings or focused on research and writing for one of the four required graduate courses. The specific courses used must reflect a coherent plan of study that embodies both breadth and focus.

Current academic year courses recommended for the designated emphasis (DE) are listed on the CRES website, but eligible courses are not limited to this list.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of scholarly writing in the area of CRES. This writing may take the form of a substantial seminar paper, a master's essay, or a portion of the doctoral dissertation. The student's CRES advisor will determine whether a particular piece of writing meets this requirement.

Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES core or elective course. CRES faculty are encouraged to appoint CRES designated emphasis students as teaching assistants when possible and appropriate.

Academic Progress

Proposing and Obtaining the Designated Emphasis

Once a plan for meeting the requirements is agreed upon, the student should complete the CRES DE application, obtain the CRES advisor’s and department chair’s signatures, and submit the application to the CRES administrative office. The request for the designated emphasis must originate in the degree-granting department.

Once the requirements have been met, the student submits relevant documentation to the CRES administrative office for final approval by the CRES Department chair. At a minimum, the student should submit copies of the qualifying examination and/or Dissertation Committee Nomination forms and a note from the advisor confirming that the writing sample and proposed courses have been completed. If the proposed courses have changed, an explanation of the changes should be included.

The CRES administrative office will notify the student and the home department of approval for the designated emphasis.

PROGRAMS OFFERED

Feminist Studies B.A. (p. 112)
Feminist Studies Ph.D. (p. 117)
Feminist Studies Designated Emphasis (p. 119)
Queer and Sexuality Studies (p. 120)

Feminist studies is an interdisciplinary field of analysis that investigates how relations of gender are embedded in social,
political, and cultural formations. Founded as Women's Studies in 1974, the Feminist Studies Department at UC Santa Cruz is one of the oldest departments focused on gender and sexuality studies in the U.S. The department has contributed to the development of internationally recognized feminist scholarship. We offer an undergraduate major, a Ph.D. program, and designated emphasis. Programs in feminist studies provide students with a unique interdisciplinary and transnational perspective by emphasizing theories and practices derived from multiracial and multicultural contexts. The program emphasizes feminist modes of inquiry and is designed to provide training in feminist theories and methods. Our faculty's expertise includes critical prison studies, critical race theory, film and cultural studies, postcolonial theory, postsocialism, queer and trans studies, science and technology studies, social justice, and transnational feminism.

FEMINIST STUDIES B.A.

Information and Policies

Introduction

Feminist studies is an interdisciplinary field of analysis in the humanities that investigates how relations of gender are embedded in social, political, and cultural formations. The undergraduate program in feminist studies provides students with a unique interdisciplinary and transnational perspective. The department emphasizes theories and practices derived from multiracial and multicultural contexts. Some topics you will find in our curriculum include: Black/Africana studies; colonialism and decolonization; trans, queer, and sexuality studies; media studies; law, politics, and social change; and science and technology studies.

Feminist studies prepares undergraduates for a variety of careers. The Bachelor of Arts (B.A.) degree in Feminist Studies provides excellent grounding for undergraduates who have career aspirations in, for example, law, health, non-governmental organizations, museum curation, politics, media and film, research institutes, journalism, community organizations, and social services.

Students wishing to pursue doctoral work will also find that interdisciplinary training in feminist studies equips them with theoretical and methodological strengths in most disciplines and applied research fields including American studies, ethnic studies, science studies, anthropology, communications, and legal studies. Specialists in feminist studies are employed as consultants in industry, higher education, and human resources. State and federal government agencies employ people who have special training in understanding gender and race relations. Educational institutions need specialists to develop and administer feminist studies programs, women's centers, and other institutional structures designed specifically to study and assist marginalized peoples, including women.

Academic Advising for the Program

Email: fmst@ucsc.edu
Phone: (831) 459-1478

Feminist studies advising is held in Humanities 1, Room 415A. Drop-in hours are posted on the Feminist Studies website. Students can make an appointment by using the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should also consult the Transfer Student Information and Policy section for specific requirements.

Getting Started in the Major

Program Learning Outcomes

Students who complete the feminist studies major should demonstrate the following skills upon graduation:

Outcome 1: Application of Feminist Approaches to Critical Interpretation

- Discuss a diversity of feminist approaches to understanding social, political, cultural, and scientific phenomena
- Connect feminist inquiry to a variety of other social phenomena including but not limited to race, nation, class, and sexuality
- Distinguish and evaluate assumptions underlying data and claims
- Place divergent interpretive frameworks in dialogue
- Perform close reading of texts and/or other objects

Outcome 2: Original Research

- Develop specific and detailed research questions
- Identify appropriate primary sources for feminist research projects
- Collect, evaluate, and analyze source material using appropriate theoretical framework(s)
- Identify key findings and draw conclusions for research and/or application

Outcome 3: Argumentative Communication

- Effectively formulate written arguments to frame research questions and analyze source material
- Present appropriate evidence to substantiate claims
- Logically organize arguments over the course of a research paper
- Use appropriate mechanics/grammar
Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the feminist studies major at any time. While specific courses are not required in order to declare, students ideally will have completed or be enrolled in FMST 1, Feminist Studies: An Introduction.

Appeal Process

How to Declare a Major

For a single major, complete the Petition for Major Declaration form and sign it. For a double major or major/minor, complete both the Major Declaration form and also an Academic Planning form. Both of these forms must be signed by you and by each departmental advisor.

Familiarize yourself with the content of the Feminist Studies website. Schedule a meeting with the feminist studies advisor during which you will fill out an online feminist studies major requirements worksheet, develop a curriculum plan, and officially declare the major.

If your proposed program exceeds your expected graduation term (EGT), you must visit your college for review and approval of extension of enrollment.

Students should submit a petition to declare as soon as they reach their declaration deadline quarter.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer. Prospective students are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started at UCSC as a Transfer Student

Transfer students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Please see the section How to Declare a Major for more details.

Transfer students may use an articulated equivalent of FMST 1 to satisfy the FMST 1 requirement. Please check assist.org for current articulation agreements.

If you have completed prior college-level coursework in feminist studies, women's studies, or a similar field of study, please contact feminist studies advising as soon as possible and provide a copy of your unofficial transcript and course syllabi so the coursework can be reviewed for potential fulfillment of feminist studies major requirements.

The Feminist Studies Department will consider, upon petition, which UC-transferrable courses from other institutions are acceptable. FMST 1, one feminist studies (FMST) lower-division course, and FMST 100 must be completed before the senior year so that the comprehensive requirement may be completed in the senior year.

Transfer students are strongly encouraged to enroll in FMST 105, Feminist Methodologies, a course designed specifically to aid in the transition to UCSC's feminist studies major for incoming transfer students. FMST 105 is offered every fall. This course will also satisfy the one upper-division core course requirement.

FMST 105 Feminist Methodologies 5

Letter Grade Policy

Letter grades are required for 10 of the 11 courses applied toward the feminist studies major. FMST 100 and the comprehensive requirement course (FMST 194 or FMST 195) must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Feminist studies is an interdisciplinary major that includes courses taught by affiliated faculty in other departments (see the Courses page of the Feminist Studies website for current year offerings). However, feminist studies majors must take a minimum of five courses at UC Santa Cruz taught directly in the Feminist Studies Department, (i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199). At most three courses may be transferred to count toward the major, including three Education Abroad Program (EAP) courses or courses from another university.

Double Majors and Major/Minor Combinations Policy

The feminist studies major works very well as a double major with fields of study such as community studies, critical race and ethnic studies, sociology, politics, education, legal studies, literature, psychology, and more.

Study Abroad

As stated in the course substitution policy, a maximum of three courses may be transferred to count toward the major, including courses from an Education Abroad Program (EAP).

Honors

Feminist studies awards honors and highest honors in the major. At the end of each quarter, a faculty committee meets to review graduating students’ files. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the comprehensive requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must
be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

[Optional Catchall]

Requirements and Planners

Course Requirements

Feminist studies majors must complete 11 courses including a comprehensive requirement in the Feminist Studies Department program. The three core courses—FMST 1, one lower-division feminist studies course, and FMST 100—must be taken at UC Santa Cruz absent a petition. A minimum of five courses at UCSC taught directly in the Feminist Studies Department, (i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199) must be completed for the major.

Lower-Division Courses

Take the following course:

FMST 1 Feminist Studies: An Introduction 5

And one of the following courses:

FMST 10 Feminisms of/and the Global South 5
FMST 13 California Indian History 5
FMST 14 Popular Culture in South Asia 5
FMST 15 Gender, Sexuality, and Transnational Migration Across the Americas 5
FMST 16 Media Histories—News and New Media 5
FMST 18 Black Feminist Ethnographies 5
FMST 20 Feminism and Social Justice 5
FMST 21 Religion in American Politics and Culture 5
FMST 30 Feminism and Science 5
FMST 31 Disability Studies 5
FMST 40 Sexuality and Globalization 5
FMST 41 Trans Gender Bodies 5

Upper-Division Courses

FMST 100 Feminist Theories 5

Students are required to complete FMST 100, Feminist Theories, at UC Santa Cruz absent a petition.

Electives

Students are required to complete seven upper-division (100-199), 5-credit electives. One independent study (FMST 199) may count toward the elective requirements. FMST 193 or FMST 198 (internship) may be used to count toward the elective requirements.

Feminist studies is an interdisciplinary major that includes courses taught by affiliated faculty in other departments (see the Courses page of the Feminist Studies website for current year offerings). However, as noted elsewhere, feminist studies majors must take a minimum of five courses at UC Santa Cruz taught directly in the Feminist Studies Department, (i.e.,

courses designated FMST, not including FMST 193, FMST 198, or FMST 199). At most three courses may be transferred to count toward the major, including three Education Abroad Program (EAP) courses or courses from another university.

The Feminist Studies Tentative Curriculum is the definitive list of courses offered during the current academic year that will satisfy major requirements and is comprised of courses offered both from within the Feminist Studies Department but also with approved courses originating from many different departments throughout UC Santa Cruz.

Please consult feminist studies advising with any questions regarding this requirement.

FMST 102 Feminist Critical Race Studies 5
FMST 105 Feminist Methodologies 5
FMST 112 Women and the Law 5
FMST 115 Gender, Sexuality, and Transnational Migration Across the Americas 5
FMST 117 Post Zora Interventions: Art, Activism and Anthropology 5
FMST 119 Indigenous Feminisms 5
FMST 120 Transnational Feminisms 5
FMST 123 Feminism and Cultural Production 5
FMST 124 Technology, Science, and Race Across the Americas 5
FMST 125 Race, Sex, and Technology 5
FMST 126 Images, Power, and Politics: Methods in Visual and Textual Analysis 5
FMST 131 The Politics of Matter and the Matter of Politics 5
FMST 132 Gender and Postcoloniality 5
FMST 133 Science and the Body 5
FMST 135 Topics in Science and Sexuality 5
FMST 139 African American Women's History 5
FMST 145 Racial and Gender Formations in the U.S 5
FMST 150 Mediating Desire 5
FMST 175 Gender and Sexualities in Latina/o America 5
FMST 188 Topics in Feminist Studies 5
FMST 189 Advanced Topics in Feminist Theory 5
FMST 193 Field Study 5
FMST 198 Independent Field Study 5
FMST 199 Tutorial 5

Approved Electives in Affiliated Departments

For a list of approved electives for the current year, see the Feminist Studies Tentative Curriculum list.

Students who wish to complete FMST 195, Senior Thesis or Project, should consult early with the feminist studies advisor and a prospective faculty advisor. The senior thesis or project option is by petition only, and faculty advisors may request that students complete a Senior Seminar (FMST 194) before agreeing to supervise a senior thesis or project.

Double majors may be able to write a thesis of 50 or more pages over three quarters to satisfy the comprehensive requirements of feminist studies and the second major. The Feminist Studies Department will review and approve or deny proposals for a double thesis on a case-by-case basis.

Students should be aware that not all departments will accept a double thesis. Students who wish to propose a double thesis should consult with both major advisors before the end of their junior year. Such a proposal must be approved by both departments or referred to the Committee on Educational Policy. In evaluating such proposals, the departments will require the student to have completed significantly more work than the minimum required for the comprehensive requirement of each major. The student's work must clearly explain to the reader the relevance of the work to both disciplines.

Students who wish to complete the comprehensive requirement in feminist studies may do so by completing the senior thesis or project (FMST 195) or by completing the following courses:

- FMST 194A Feminist Jurisprudence
- FMST 194B Queer/Feminist Historiography
- FMST 194C Gender and Iconicity
- FMST 194D Feminist Science Studies
- FMST 194F Chicana/Latina Cultural Production
- FMST 194G Images of Africa
- FMST 194H Michel Foucault: An Introduction
- FMST 194I Feminist Oral History and Memoir
- FMST 194K Black Diaspora
- FMST 194M/CRES 10/comparative settler colonial Studies
- FMST 194O The Politics of Gender and Human Rights
- FMST 194T Transgender Studies
- FMST 194U Touring War and Empire
- FMST 194V Marxism and Feminism
- FMST 194W Politics of Space, Time, and Matter
- FMST 195 Senior Thesis or Project
- CRES 190A Critical Race Feminisms
- HIS 194N Urbanites in the Global South, 18th Century to the Present

**Planners**

**Four Year Plan**
Introduction

The Department of Feminist Studies at the University of California, Santa Cruz welcomed its inaugural class of students who began studies toward a Doctor of Philosophy degree (Ph.D.) in Feminist Studies in Fall 2013. The Ph.D. in feminist studies at UC Santa Cruz is an interdisciplinary program that investigates how relations of gender are embedded in social, political, racial, and cultural formations. The program emphasizes feminist modes of inquiry and provides students with advanced training in feminist methods. It fosters a rethinking of the relationships between knowledge, power, and expertise. Conceived as a collaborative, cross-divisional enterprise, this graduate program draws upon the strengths of a range of feminist scholars and their departments and programs across the university.

*Revised: 7/15/21

Advancement to Candidacy

Students are expected to take the Ph.D. qualifying examination in their third year and no later than their fourth year, by which point they also must fulfill the course requirements and demonstrate proficiency in a second language.

Course Requirements

Ph.D. students will complete most of their coursework during their first two years. Students are required to complete a total of 12 courses: three required courses on Feminist Theories (FMST 200), Feminist Methodologies (FMST 201), and Disciplining Knowledge (FMST 202) and nine electives. Feminist studies requires FMST 200 and FMST 201 to be taken consecutively the fall and winter quarters of the first year, while FMST 202 will be offered in the spring of the second year.

In addition, students must enroll in three 2-credit advising courses (FMST 297F) with their first-year mentor or primary advisor. FMST 290, a 2-credit pedagogy training course, is to be taken prior to and/or in conjunction with the first teaching assistant appointment.

Elective Courses

Students may take elective courses in feminist studies as well as in other departments. Graduate seminars, independent studies, and directed readings in the Feminist Studies Department count toward the elective course requirement. Graduate seminars from other departments may also be used to fulfill the elective requirement.

Feminist Studies Ph.D.

Admissions to the Feminist Studies Ph.D. program is suspended for the 2021-22 year.*
Qualifying Examination

The qualifying examination focuses on the student’s research project and on the fields of scholarship it presupposes. The qualifying examination consists of:

1. Written Portion (75-95 pages total)
   a. Introduction to the Qualifying Exam (15-20p): This document explains the intellectual trajectory of the student, the development of the student’s research questions, and the relationship between the different written components submitted for the exam.
   b. Qualifying Essay(s) (50-60p): In consultation with the advisor, the student will submit one or two research essays totaling 50-60 pages. Depending on the nature of the student’s project and method, as well as the advisor’s preferences concerning the exam format, the Qualifying Essay(s) may consist of article- or chapter-length research paper(s), literature review(s), and/or field statement(s) related to the student’s primary areas of research.
   c. Dissertation Prospectus (10-15p): A draft dissertation prospectus is due at the time of exam. A revised prospectus will be due to the committee no later than the end of the quarter following the oral exam. The prospectus outlines the primary research questions, fields of intervention, timeline, and potential claims of the dissertation project.

2. Oral Examination
   a. The oral examination typically lasts 2.5-3 hours. The student is invited to give a 10-minute introduction to the qualifying essay and research project. Each examiner on the QE Committee will have approximately 20-30 minutes to put questions to the student regarding the written portion of their examination. A general discussion typically follows the round-robin questioning. Upon completion of the questions and discussion, the student is excused and the committee members evaluate the student’s performance with the goal of achieving some unanimity. The committee invites the student back to the room to share the group’s evaluation, offer advice, and articulate any requirements. The committee will also suggest revisions to the dissertation prospectus, to be completed by the end of the quarter following the oral exam.
   b. The chair of the committee composes a final report based on the committee’s evaluation of the student’s performance. After approval by the other committee members, the report is submitted to the Graduate Division to recommend advancement to candidacy.

Foreign Language Requirements

Students normally satisfy the language requirement by the end of the second year; the requirement must be satisfied in order to pass the qualifying exam. Fulfillment of the language requirement in feminist studies can be documented in several ways. The documentation should demonstrate current ability to use the language in an appropriate way in scholarship. The language appropriate to research could be oral, gestural, or written, or a combination of these. Depending on the specific language and on the research needs of the student, functional language competence could include the ability to read the scholarly literature or other written material needed in research, the ability to conduct fieldwork in the language, or the ability to produce written work in the language. Students should discuss their language requirement with their faculty advisor who, along with the graduate director, has responsibility for determining whether a student has satisfied the requirement. If neither the advisor nor the graduate director have proficiency in the proposed language, then an outside person will be consulted to verify competency in the proposed language. According to Graduate Division policy, proficiency should be demonstrated before the qualifying examination committee can be appointed and at least one month prior to taking the qualifying examination.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Advancement to candidacy depends on the general quality of a student’s work; demonstration of proficiency in a foreign language relevant to the student’s area of work, either by passing a written examination administered by the department or successfully completing a language course approved by the department; success in the qualifying examination, and proposal of an acceptable dissertation topic.

Students should consult their advisor when composing their qualifying examination committee. Per Academic Senate policy, committees must consist of at least four members, one of whom is not a member of the student’s department. The chair of the committee must be tenured, and will not be the student’s dissertation advisor. The outside member must be a tenured faculty member, or may be from a non-academic field. The department requires that at least two members of the committee must be members of the Feminist Studies Department. The graduate dean has authority to approve committee nominations and grant authorities.

The qualifying examination focuses on the student’s research project and on the fields of scholarship it presupposes. The qualifying examination consists of:

1. Written Portion (75-95 pages total)
   a. Introduction to the Qualifying Exam (15-20p): This document explains the intellectual trajectory of the student, the development of the student’s research questions, and the relationship between the different written components submitted for the exam.
   b. Qualifying Essay(s) (50-60p): In consultation with the advisor, the student will submit one or two research essays totaling 50-60 pages. Depending on the nature of the student’s project and method, as well as the advisor’s preferences concerning the exam format, the Qualifying Essay(s) may consist of article- or chapter-length research paper(s), literature review(s), and/or field statement(s) related to the student’s primary areas of research.
   c. Dissertation Prospectus (10-15p): A draft dissertation prospectus is due at the time of exam. A revised prospectus will be due to the committee no later than the end of the quarter following the oral exam. The prospectus outlines the primary research questions, fields of intervention, timeline, and potential claims of the dissertation project.

2. Oral Examination
   a. The oral examination typically lasts 2.5-3 hours. The student is invited to give a 10-minute introduction to the qualifying essay and research project. Each examiner on the QE Committee will have approximately 20-30 minutes to put questions to the student regarding the written portion of their examination. A general discussion typically follows the round-robin questioning. Upon completion of the questions and discussion, the student is excused and the committee members evaluate the student’s performance with the goal of achieving some unanimity. The committee invites the student back to the room to share the group’s evaluation, offer advice, and articulate any requirements. The committee will also suggest revisions to the dissertation prospectus, to be completed by the end of the quarter following the oral exam.
   b. The chair of the committee composes a final report based on the committee’s evaluation of the student’s performance. After approval by the other committee members, the report is submitted to the Graduate Division to recommend advancement to candidacy.
Post-Qualifying Requirements

Immediately after the qualifying examination, students will consult their primary advisor to convene a Dissertation Committee. The Dissertation Committee must be composed of at least three members, the majority of whom must be members of the UC Santa Cruz Academic Senate, and at least one of whom is a member in Feminist Studies. Advancement to candidacy will only take place after a committee is approved by the graduate dean.

Award of Master’s Degree

The department admits students only for the Ph.D. program. However, in exceptional circumstances, for example, if a student has to leave the program before completing the Ph.D., the Master of Arts (M.A.) degree in Feminist Studies may be conferred. In consultation with the advisor and graduate director, the M.A. requirements are as follows:

1. Completion of nine graduate seminars, including FMST 200, FMST 201, and FMST 202 to the satisfaction of the department. The remaining six seminars are to be selected from the department offerings to reflect the student's particular academic plan, agreed upon by the student and graduate advisor.

2. Successful completion of the qualifying examination, including all written and oral components.

3. Completion of the master’s degree cannot be accomplished in less than two full academic years.

Students who wish to petition for the M.A. degree in Feminist Studies must meet all guidelines for the degree established by the Graduate Division and petition for the degree prior to the due date set by the division. Upon successful completion of the qualifying examination, students must submit the completed qualifying examination written materials to the department as the final portfolio of work for the degree.

[Optional Catchall]

Dissertation

Dissertation

After advancement to candidacy, expected by the end of the third year, students take courses in the 290 sequence (FMST 299A) until the dissertation is submitted. Successful revision of the dissertation prospectus will be due to the Dissertation Committee no later than the end of the quarter after completion of the oral examination to remain in good academic standing. Students submit the revised prospectus to their committee for approval and transmit the document to the graduate coordinator.

Upon approval of the revised dissertation prospectus, students concentrate on dissertation writing. The current normative time to degree limit is six years, although students should plan dissertation research and writing timelines keeping in mind the funding commitments made by the department at the time of matriculation. Students also have the option of doing advanced work in a traditional discipline and receiving a Designated Emphasis of this specialization. In such cases, students must satisfy the appropriate department’s criteria (see the departmental web site for information). Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Dissertation Defense

The dissertation defense serves as the final opportunity for the student to receive focused feedback on research and writing, ideally with the goal of developing the dissertation into a book or other major project following completion of the Ph.D. The defense typically lasts two hours and is an occasion for thoughtful, constructive criticism and guidance; it is not an examination. For this reason, the defense will normally be conducted as a closed meeting between the committee and the student, along with a small audience of guests invited by the student and/or advisor. The student may elect to conduct a public defense with permission of the advisor. In such instances, the chair must convene a closed committee discussion at the end of the defense to complete conferral of the Ph.D.

Academic Progress

Normative time to completion of the Ph.D. is six years. Upon advancement to candidacy, students are expected to complete the dissertation within three years to make satisfactory academic progress.

Applying for Graduation

At the end of the dissertation writing process, the student must petition for the degree, format the dissertation according to Graduate Division guidelines, complete an oral dissertation defense with the Dissertation Committee, and obtain signatures of the committee members on the official title page. Once these items are complete, the student may file the dissertation to complete the Ph.D.

[Optional Catchall]

FEMINIST STUDIES DESIGNATED EMPHASIS

Introduction

Graduate students may work toward a Doctor of Philosophy (Ph.D.) degree that notes a designated emphasis in feminist studies on the graduation documents. Students wishing to pursue this option should consult with the chair of their respective Ph.D. program and are encouraged to apply in the first or second year of graduate study. The application and an annually updated list of regularly offered, approved graduate courses are available at the Feminist Studies website.

Requirements

The following are required for the designated emphasis:
Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the feminist studies core faculty who serves on the qualifying examination committee or in some other appropriate capacity.

Course Requirements

The student must take four graduate courses in feminist studies, two of which must be taught directly in the department. Two courses can be selected from among the graduate offerings of any UC Santa Cruz department, as long as they are taught by core or affiliated feminist studies faculty.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of feminist studies. This writing may be a master’s essay, qualifying examination essay, or a chapter of the doctoral dissertation.

(Optional Catchall)

Queer and Sexuality Studies

415 Humanities 1
fmst@ucsc.edu
https://qss.ucsc.edu/
https://language.ucsc.edu
Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found across a broad range of departments, programs, and colleges at UCSC.

For more specialization, departments such as Feminist Studies and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

Research activities are sponsored by the Queer Theory research cluster (a part of the Center for Cultural Studies), the Queer and Sexuality Studies Working Group, and many campus departments and student organizations.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at the Lionel Cantú Queer Center website or via e-mail to queer@ucsc.edu.

More information may be obtained from members of the faculty working group: Anjali Arondekar (Feminist Studies), Carla Freccero (Literature, Feminist Studies, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Feminist Studies), B. Ruby Rich (Film and Digital Media). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature, Feminist Studies), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Catherine S. Ramirez (Latin American and Latino Studies), Jenny Reardon (Sociology), Lisa Rofel (Anthropology), Danny Scheie (Theater Arts), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact Marcia Ochoa (marcia8a@ucsc.edu) or Anne Eickelberg (aeickelb@ucsc.edu) in the department of Feminist Studies in the Humanities Division for information about course offerings and resources.

**UNDERGRADUATE PROGRAM**

History is the stories humans tell about the past. For professional historians, those stories are based on evidence that is carefully collected and rigorously interpreted. Both the evidence and interpretation are passionately debated in the classroom, in articles and books, and in the public sphere. This makes history a dynamic enterprise. Students of history ask new questions, find new evidence, incorporate more voices, and reconsider old assumptions. Studying history enriches our understanding of the world by deepening our knowledge of the past and by pushing us to ask new questions that provide insight into our own time. Our History Department is committed to helping students learn to think historically, which entails asking not just what happened, but why it happened the way it did.

Thinking historically cultivates the empathy and imagination necessary to understand multiple perspectives on events both past and present.

It is impossible to understand the world we inhabit, including its complex global conflicts, climatic transformations, and fundamental shifts in understandings of individual identity, without history. Yet, as much as history can illuminate the present, its study also requires recognizing that often, "the past is a foreign country," where words, ideas, and even bodies themselves operate on radically unfamiliar terms. Our department's strengths in transnational, gender, environmental, cultural, and social history, including critical race and ethnic studies, enable students to engage in a variety of approaches to studying history.

This training equips students to be engaged citizens and prepares them for a wide range of careers. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world.
GREEK

The History Department offers instruction in elementary ancient Greek. It consists of a two-course sequence, GREE 1 and GREE 2, that begins in the fall quarter only. Students interested in Greek literature should see the course listings under Literature. Those interested in classical studies should see the program description for classical studies.

Campus Language Laboratories and Placement Exams

No placement examination is required for entry into GREE 1. Contact the History Department for more information about these topics.

LATIN

The History Department offers instruction in elementary Latin. It consists of a two-course sequence, LATN 1 and LATN 2, that begins in the fall quarter only. Students interested in Latin literature should see the course listings under Literature. Those interested in classical studies should see the program description for classical studies.

Campus Language Laboratories and Placement Exams

No placement exam is required for entry into LATN 1. Contact the History Department for more information about these topics.

GRADUATE PROGRAM

The Ph.D. program in history at UCSC emphasizes an interdisciplinary and cross-cultural approach to historical studies. The History Department offers a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. The department only admits those highly motivated students who are most qualified to pursue advanced studies in history. The department also only admits those applicants who can best benefit from the specific strengths of our faculty. Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

HISTORY B.A.

Information and Policies

Introduction

History is about the past, but it is also about understanding the world we live in today. Our faculty seek to understand and help you understand how the challenges that confront us today like economic inequality, environmental degradation, and racism developed and changed over time. We also explore the patterns of social movements and political transformation that help us understand how people change the world.

Students often think of studying history as a matter of memorizing names and dates. While having a command of basic facts is important, college-level study of history shifts the focus to learning how to ask illuminating questions about the past. UC Santa Cruz history majors cultivate a broad understanding of human history across time and space and develop deep knowledge of a particular region of the world. At the same time, they learn how to ask transformative questions, develop their ability to answer them through effective research, and convey their ideas clearly and persuasively through strong communication skills.

Students and their parents alike often express the sentiment that history is fascinating, but sometimes raise questions about its practicality as a college major. However, substantial research demonstrates that history majors thrive in their careers, and employers often express a need for the skills that studying history instills. A history major isn’t just fascinating; it’s a path to success. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world. Visit our website for selected reports on the value of the history major.

Academic Advising for the Program

Academic advising is an important part of your undergraduate education. The History Department undergraduate program coordinator can help you clarify your educational goals, select classes that complement your academic interests and develop an individualized plan of study. The undergraduate program coordinator can also help you identify faculty mentors and enrichment opportunities within and related to your major.

Advising is held in Humanities 1, room 201. Undergraduate advising email contact: historyundergrad@ucsc.edu

Transfer students are encouraged to additionally consult the "Transfer Information and Policy" information included below.

Getting Started in the Major

Four-year students considering the history major are encouraged to enroll in at least one lower-division history course during their first year. These offer a broad sweep of a historical period and give students a sense of how studying history in college differs from studying it in high school. Students are encouraged but not required to take three lower-division history courses, one from each of the three regions of concentration, during the first year. Taking courses from each of the three regions of concentration during the first year helps students decide on a concentration as their area of focus and clarify their educational goals (see the Regions of Concentration section below for more information).

Program Learning Outcomes

Students who complete the history major graduate with the following:
History
- Understanding of a basic narrative of historical events in a specific region of the world.

Critical Reading
- The ability to distinguish primary and secondary sources.
- The ability to evaluate historical ideas, arguments, and points of view.
- The ability to evaluate competing interpretations and multiple narratives of the past.

Research and Evidence
- The ability to gather and assess primary historical evidence.
- The ability to compile a bibliography.

Communication
- The ability to present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.
- The ability to develop a research question and complete a well-supported piece of historical writing about it.

Scope and Thematics
- Through completion of a combination of courses, become familiar with the history of:
  - The pre-modern world
  - The modern world
  - Transnational or transcultural circulations of ideas, people, and material goods
  - One or more national histories
  - Regional comparisons

Major Qualification Policy and Declaration Process

Major Qualification
The history major has no qualification. It is advisable to complete at least one lower-division history course (1–99) before declaring, but it is not required. Students who plan on majoring in history are encouraged to declare as soon as possible (see information about declaring below).

Appeal Process

How to Declare a Major
To declare the history major students should:

1. Create a history major academic plan. For planning documents and major planning instructions visit the declaring history major webpage.

2. Submit your history major plan and a completed Petition for Major/Minor Declaration to the History Undergraduate Program Coordinator for review and processing.

Transfer Information and Policy

Transfer Admission Screening Policy
Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UC Santa Cruz. Transfer course agreements and articulation between the University of California and California community colleges can be found on the ASSIST.ORG website. Prospective transfer students may also wish to consult the UC Transfer Pathway for History.

Transfer students are enthusiastically encouraged to study history at UC Santa Cruz. Transfer students can finish all of the UC Santa Cruz history major requirements within two years, even if they haven’t completed any preparatory history coursework prior to transferring. For additional information for transfer history majors please visit this transfer student information page.

Getting Started at UCSC as a Transfer Student
Transfer students are expected to complete HIS 100 within the first two quarters after transferring to UC Santa Cruz. Transfer students are also encouraged to take KRSG 25 during their first quarter of enrollment at UC Santa Cruz or as part of Summer Transfer Edge before their first quarter.

Letter Grade Policy
History majors may take up to two of their history major courses Pass/No Pass, with the exception of Senior Comprehensive Requirement, provided students are in compliance with the university’s Pass/No Pass regulation.

History Senior Check-in
In addition to all coursework, history majors must complete a senior check-in and exit survey in the first quarter of their senior year. Students who do not submit their senior check-in for review may have their graduation date delayed. Please consult the department website for a more detailed description.

Course Substitution Policy
History majors must complete a minimum of five regularly scheduled history courses plus the comprehensive requirement taught by members of the UC Santa Cruz history faculty. Intensive history majors must complete a minimum of eight. Subject to the limits indicated in parentheses, courses from the following categories may also be applied to the history major:
Courses completed at a California community college or other domestic university (limit of three)
Education Abroad Program (limit of three)
UCDC (limit of two)
UC in Sacramento (limit of two)
Interdisciplinary Coursework/upper-division courses taken in another UC Santa Cruz department (limit of one)
Independent and field studies (limit of one)

For information and instructions on how to petition courses from the above categories, visit the History Department webpage on course substitutions.

**Double Majors and Major/Minor Combinations Policy**

**Study Abroad**

All history students are encouraged to consider studying abroad. UC Education Abroad Program (EAP) offers students an opportunity to study abroad in more than 40 countries with more than 150 program options. A variety of academic programs are available: language and culture programs facilitate language acquisition; “focus” programs allow students to concentrate on a plan of study applicable to their major. More than half of all EAP programs are in English, and there are traditional semester and yearlong program options. Subject to the limitations described above under "Course Substitution Policy," up to three courses in history completed through EAP may be applied toward major requirements. Consult the History Department website and speak with the undergraduate program coordinator for further details.

**Honors**

Honors are awarded to the top 10-15 percent of graduating students per quarter; highest honors may be granted to approximately the top five percent. Honors are determined by the Undergraduate Education Committee in consultation with the History Department faculty. The department considers each student’s GPA in the history major, supplemented when appropriate by an assessment of work in the senior capstone course or honors thesis preparation. The history major GPA is calculated based upon all history courses attempted at UC Santa Cruz; grades from courses taken outside of the department will not be calculated into a student’s history major GPA, even in cases when the student is allowed to use said courses toward their history major degree requirements. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed using their earned history major GPAs as of the spring announcement of candidacy deadline.

**Interdisciplinary Coursework**

The History Department encourages its majors to take upper-division courses in disciplines related to history, including sociology, literature, community studies, politics, Latin American and Latino studies, and others. Students may petition to substitute one such appropriate upper-division course for a history elective. At least 50 percent of the readings and written work in these courses must be historical in nature. Consult the History Department website and speak with the undergraduate program coordinator for further details.

These courses are subject to the limitations described above under the "Course Substitution Policy" section.

**Regions of Concentration**

The History Department curriculum and major is broadly organized along three regions of concentration. Each history major identifies one of three geographic regions of concentration as their primary area of focus:

**The Americas and Africa**

The Americas and Africa caucus invites students to explore the complex history of intercultural encounter, exchange, and conflict that connects South, Central, and North America and the diverse nations of Africa. Courses in this concentration locate these regions within larger global movements of people, goods, and ideas. Major topical themes in the concentration include Indigenous history, African diaspora, immigration, gender, labor, religion, social movements, politics, and critical history of race. Courses in this concentration extend from the colonial era to the modern day and reflect interdisciplinary approaches to historical practice.

**Asia and the Pacific**

The Asia and Pacific concentration—which encompasses East, South, and Central Asia along with the Pacific and the Indian Ocean—offers students the opportunity to explore gender, class, race, and ethnicity through the examination of premodern and modern empires and nations, their borders and peripheries, and their flows of people, materials, and ideas. Major topics of focus include the early modern and modern eras, Western and Japanese imperialisms, labor and other major social movements, socialist transformations, and cultural, intellectual, and science history.

**Europe and the Mediterranean World**

The Europe and the Mediterranean World concentration offers students the opportunity to explore the histories of Europe, North Africa, and the Middle East, and connections between these places and the larger world. We look at the continual flow of ideas, people, and material goods across this region, from the earliest states in the ancient world until today. We examine how empires, colonialism, religion, culture, the environment, and social and economic forces, including the development of capitalism and of the nation-state, shaped these interactions in profound ways. Collectively, we trace more than 5,000 years of intersecting histories, examining linkages and conflicts forged by geography, trade, war, migration, imperial aspirations, colonial violence, religious and ethnic minorities, and struggles for liberation.

The caucus includes intensive study of the histories of Europe, Russia, North Africa and the Middle East, as well as imperial, colonial, and transnational histories that trace the changing relations among these places. Major periods and areas of focus include the ancient and medieval worlds, oceanic empires in the
early modern period (1450-1800 A.D.), modern imperialism and colonialism, and decolonization and postcolonial states in the 20th century.

**General History Major**

**Course Requirements**

A minimum of 12 unique courses are required for the major, of which no more than four may be lower-division. At least eight of the 12 courses must be upper-division, including the comprehensive requirement.

**Distribution requirements.** Among the 12 courses required for the major, at least three must meet chronological distribution requirements. One must be set before 600 C.E., and two must be set in periods prior to the year 1800 C.E.

Students are encouraged to reference the History Course List (p. 146) to determine how history courses may apply to the different geographic regions of concentration and the chronological distribution requirements. Students can also consult the department’s website for a sortable version of this information.

**Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)**

Each history major identifies one of three geographic regions of concentration as their primary area of focus:

- The Americas and Africa
- Asia and the Pacific
- Europe and the Mediterranean World

**Lower-Division Survey (1 Course)**

At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

**Americas/Africa**

- HIS 10A United States History to 1877 5
- HIS 10B United States History, 1877 to 1977 5
- HIS 11A Latin America: Colonial Period 5
- HIS 11B Latin America: National Period 5
- HIS 30 The Making of Modern Africa 5

**Asia/Pacific**

- HIS 40A Early Modern East Asia 5
- HIS 40B The Making of Modern East Asia 5
- HIS 44 Modern South Asia, 1500 to Present 5

**Europe/Mediterranean World**

- HIS 41 The Making of the Modern Middle East 5
- HIS 70A Modern European History, 1500–1815 5

**HIS 70B Modern European History, 1815–present**

Transfer coursework may or may not apply toward the survey course requirement; consult with the history undergraduate program coordinator.

**Additional Concentration Courses (4 Courses)**

Four additional courses in the region of concentration, at least three of which must be upper-division.

**Comprehensive Requirement**

One comprehensive requirement: All students must complete either a research seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive requirement can be found below.

**Breadth Requirements (4 Courses)**

Two courses from each of the remaining two regions of concentration.

At least one of the four breadth courses must be upper-division. If two lower-division courses (including the survey) are applied to the region of concentration, then at least two of the four breadth courses must be upper-division.

**Historical Skills and Methods (1 Course)**

Students who enter UC Santa Cruz as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UC Santa Cruz. HIS 100 is a prerequisite for all history research seminars (HIS 190 series, HIS 194 series, and HIS 196 series).

**Elective (1 Course)**

One upper-division history course from any of the three regions of concentration.

**Language Recommendation**

Proficiency in a foreign language is strongly recommended for all history students and is essential for those who plan to pursue graduate studies in history. Many Ph.D. programs in history require applicants to read one or two languages besides English. The University of California Education Abroad Program (EAP) is appropriate for history majors as a means to both enhance language skills and take history courses elsewhere.

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive requirement in their region of concentration. Students may complete a research seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a
more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

**Comprehensive Requirement**

History majors may satisfy the UC Santa Cruz comprehensive requirement in one of two ways:

**Research Seminar (one quarter: 190 series, 194 series, or 196 series)**

In courses designated as History 190, 194, or 196, students participate in a small discussion-based senior research seminar, which provides an opportunity to acquire experience in practical research skills while developing a research project culminating in the writing of a substantial research paper. Students must complete HIS 100 before taking a research seminar. Seminars require submission of written work totaling approximately 25 pages and satisfy the disciplinary communication (DC) general education requirement. Seminars must be taken in the student's chosen area of concentration to qualify as their comprehensive requirement.

Before undertaking an independent thesis, students must complete one research seminar in their region of concentration. In extraordinary circumstances, students may petition the History Department for an exception to this requirement. The successful completion of both HIS 195A and HIS 195B will satisfy the comprehensive and disciplinary communication (DC) requirements for students who are granted an exception to the seminar requirement.

Students who want to write a thesis need to begin planning well in advance. Students must first find a faculty thesis adviser and a second reader to sponsor and advise on the thesis project. Once a thesis adviser and a second reader have been secured and a topic defined, students must submit a thesis proposal to the department for consideration. Proposals are due at least one quarter before the start of the research quarter. Completed theses must be at least 40 pages in length and are due on the last day of the writing quarter.

Please consult the department website for more information about the thesis option.

**Research Pathways**

The history program encourages its students to carve out their own research pathways. Pathways can be straight or meandering, cover one area exhaustively or take a student across broad stretches. Even though you are required to select one of three geographic regions—the Americas and Africa, Asia and the Pacific, Europe and the Mediterranean World—as your primary area of focus, we encourage you to also think about your degree progress along thematic lines: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist students who choose this option with their course selection.

### Sample Four Year Plan

</tbody>
</table>

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) general education requirements, along with any other general education requirements that are not satisfied by the classes they have chosen for the major. Most lower-division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) general education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) general education requirement.

### Sample Three Year Plan

This plan is appropriate for students admitted to UC Santa Cruz as freshman who are considering the Three Year Accelerated Pathways program.

<table>

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

**Intensive History Major**

The intensive major track offers history majors a pathway to enrich their study of history, refine their skills in writing and research, and receive a designation on their transcripts that signals their ambition and accomplishment to potential employers and graduate schools. All history majors are eligible to declare the intensive track, including junior transfers. If a student attempts but does not complete the intensive track, they may still graduate with a standard history degree, provided the appropriate major coursework has been completed.

**Course Requirements**

A minimum of 15 unique courses are required for the intensive history major, of which no more than four may be lower-division. At least 11 of the 15 courses must be upper-division, including the comprehensive requirement. The intensive major also requires one year or equivalent of language study (see below).

**Distribution requirements.** Among the 15 courses required for the intensive major, at least three must meet chronological distribution requirements. One must be set before 600 C.E., and two must be set in periods prior to the year 1800 C.E.

Students are encouraged to reference the History Course List (p. 146) to determine how history courses may apply to the different geographic regions of concentration and the chronological distribution requirements. Students can also consult the department’s website for a sortable version of this information.

**Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)**

Each history major identifies one of three geographic regions of concentration as their primary area of focus:

- The Americas and Africa
- Asia and the Pacific
- Europe and the Mediterranean World

**Lower-Division Survey (1 Course)**

At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

**Americas Africa**

- HIS 10A United States History to 1877 5
- HIS 10B United States History, 1877 to 1977 5
- HIS 11A Latin America: Colonial Period 5
- HIS 11B Latin America: National Period 5
- HIS 30 The Making of Modern Africa 5
### Breadth Courses

At least one of the four breadth courses must be upper-division.

#### Europe Mediterranean

<table>

<td>5</td>
</tr>
</tbody>
</table>

Transfer coursework may or may not apply toward the survey course requirement; consult the history undergraduate program coordinator.

### Additional Concentration Courses (4 Courses)

Four additional courses in the region of concentration, at least three of which must be upper-division.

### Comprehensive Requirement

One comprehensive requirement: All students must complete either a research seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive requirement can be found below.

### Breadth Requirements (4 Courses)

Two courses from each of the remaining two regions of concentration.

At least one of the four breadth courses must be upper-division. If two lower-division courses (including the survey) are applied to the region of concentration, then at least two of the four breadth courses must be upper-division.

### Historical Skills and Methods (1 Course)

Students who enter UC Santa Cruz as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UC Santa Cruz. HIS 100 is a prerequisite for all history research seminars (HIS 190 series, HIS 194 series, and HIS 196 series).

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIS 100</td>
<td>Historical Skills and Methods</td>
<td>5</td>
</tr>
</tbody>
</table>

### Electives (4 Courses)

Four upper-division history courses from any of the three regions of concentration.

### Advanced Research Requirement

Three of the 15 courses required for the intensive major must require advanced historical research. Advanced research seminars (HIS 190 series, HIS 194 series, or HIS 196 series), the senior thesis (HIS 195A and HIS 195B) and/or independent studies (HIS 199) conducted under faculty supervisor may satisfy this requirement. At least one seminar or senior thesis must be completed in the student's chosen region of concentration to ensure the UC Santa Cruz comprehensive and disciplinary communication (DC) requirements are satisfied.

### Language Requirement

Intensive majors must pursue training in a second language by completing three quarters of college-level language study (or equivalent) in a single, non-English modern or ancient language (e.g. SPAN 1–SPAN 3, ITAL 2–ITAL 4, etc.). Students with prior training in a second language are advised to complete a language placement exam to determine the appropriate level of language course instruction. With prior approval by the undergraduate director, the language training requirement may be satisfied by at least one quarter study abroad with foreign language instruction. Students do not necessarily need to pursue a language related to their region of concentration, but are encouraged to do so when possible. After consultation with the undergraduate director, students can petition for alternative ways by which to satisfy this requirement.

### Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive requirement in their region of concentration. Students may complete a research seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

### Comprehensive Requirement

History majors may satisfy the UC Santa Cruz comprehensive requirement in one of two ways:

#### Research Seminar (one quarter: 190 series, 194 series, or 196 series)

In courses designated as History 190, 194, or 196, students participate in a small discussion-based Senior Research Seminar, which provides an opportunity to acquire experience in practical research skills while developing a research project culminating in the writing of a substantial research paper. Students must complete HIS 100 before taking a research seminar. Seminars require submission of written work totaling approximately 25 pages and satisfy the disciplinary communication (DC) general education requirement. Seminars must be taken in the student's chosen area of concentration to qualify as their comprehensive requirement.

Before undertaking an independent thesis students must complete one research seminar in their region of concentration. In extraordinary circumstances, students may petition the History Department for an exception to this requirement. The successful completion of both HIS 195A and HIS 195B will
satisfy the comprehensive and disciplinary communication (DC) requirements for students who are granted an exception to the seminar requirement.

Students who want to write a thesis need to begin planning well in advance. Students must find a faculty thesis adviser and a second reader to sponsor and advise on the thesis project. Once a thesis adviser and a second reader have been secured and a topic defined, students must submit a thesis proposal to the department for consideration. Proposals are due at least one quarter before the start of the research quarter. Completed theses must be at least 40 pages in length and are due on the last day of the writing quarter.

Please consult the department website for more information about the thesis option.

Research Pathways

The history program encourages its students to carve out their own research pathways. Pathways can be straight or meandering, cover one area exhaustively or take a student across broad stretches. Even though you are required to select one of three geographic regions—the Americas and Africa, Asia and the Pacific, Europe and the Mediterranean World—as your primary area of focus, we encourage you to also think about your degree progress along thematic lines: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist students who choose this option with their course selection.

Planners

Each of these planners indicates only one of the many possibly pathways through the major. Individual student plans will vary. For assistance developing your history major plan, meet with the undergraduate program coordinator.

</tbody>
</table>

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) general education requirements, along with any other general education requirements that are not satisfied by the classes they have chosen for the major. Most lower-division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) general education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) general education requirement.

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.
HISTORY MINOR

Students whose major area of study is not history may nonetheless find that a minor in history makes an invaluable contribution to their studies.

Course Requirements

Eight history courses are required, five of which must be upper-division. There are no distribution requirements, and there is no comprehensive requirement for the minor.

Lower-Division Courses

Three lower-division (HIS 1–HIS 99) and/or upper-division (HIS 100–HIS 199) history courses.

Upper-Division Courses

Five upper-division (HIS 100–HIS 199) history courses.

CLASSICAL STUDIES B.A.

Information and Policies

Introduction

Classical studies at UC Santa Cruz combines features of traditional programs, such as solid grounding in the ancient languages, with innovative, interdisciplinary approaches. While the core of the program is focused on courses in the ancient Greek and Latin languages, the program also encompasses courses in history, the history of art and visual culture, literature, philosophy, politics, and theater arts, from the Bronze Age through the Early Christian era. Recent offerings have included everything from introductory surveys in classical mythology and Greek and Roman history, to advanced courses in women and gender in Ancient Egypt and modern ancient drama. Students are encouraged to study the literary and material artifacts of Greece and Rome within the larger context of ancient Mediterranean and Near Eastern cultures.

The classical studies program provides the nurturing atmosphere and personal attention associated with a small liberal arts college, in the context of a large university. We offer students an opportunity to work in small classes with a distinguished and dedicated teaching faculty and excellent fellow students. Public lectures, guest speakers, and frequent social events bring students and faculty together and strengthen the program.

Classical studies students have the opportunity to give close, sustained attention to an area of study, from an almost unlimited variety of perspectives. For example, students with an interest in contemporary philosophy and political theory might want to concentrate in Greek, taking upper-division courses in Greek, history, philosophy, and politics. Students with an interest in European literature might want to concentrate in Latin, taking upper-division courses in Latin, history, and literature in translation. Students planning on pursuing a classics degree at the Ph.D. level should concentrate most of their coursework in the Greek and Latin languages themselves.

Classical studies is excellent preparation for further study in a wide variety of graduate and professional programs including history, art history, comparative literature, English, philosophy, law, education, and publishing.

Academic Advising for the Program

The Classical Studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to additionally consult the “Transfer Information and Policy” information included below.

Getting Started in the Major

GREE 1 and LATN 1 are only offered in the fall quarter. Students seeking their degree in four years should complete the introductory sequence in elementary ancient Greek or Latin language no later than their second year. Transfer students should complete the introductory sequence during their first two quarters of enrollment at UC Santa Cruz.

Students with prior knowledge of ancient Greek or Latin are advised to consult with the classical studies faculty to determine if they have satisfied any of the elementary language course requirements.

Program Learning Outcomes

Students who complete the classical studies major graduate with the following knowledge and skills:

Language

- Competence in one or more ancient languages. At present offerings include Greek and Latin (full curriculum offered yearly). Majors have also taken Biblical Hebrew and Hieroglyphics (offered less often).

Interdisciplinary Exposure

- Familiarity with one or more of the disciplinary approaches represented by the faculty in the program, as well as other relevant approaches in the division and the university. Courses at present credited for the major include (but are not limited to) offerings in: history, literature, philosophy, archaeology, art history, and theater arts. For the skills and outcomes fostered by these disciplines see the reports of the relevant departments.

Collaboration

- Provide constructive and effective critiques of each other’s work.
- Complete a shared research project.

Research, Critical Reading, Writing

- Gather and engage critically with primary sources.
- Evaluate competing interpretations and multiple narratives.
• Compile a bibliography.
• Present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

Scope and Thematics
• Through completion of a combination of courses, become familiar with the ancient cultures of:
  • the western Mediterranean.
  • the eastern Mediterranean.
  • the Near East.
• Comparative study: whether of diverse ancient cultures or of ancient and later cultures
• Reception: ancient culture as understood by later traditions

Major Qualification Policy and Declaration Process

Major Qualification
While classical studies does not have an official qualification policy, it should be noted that the major requires the successful completion of upper-division coursework in ancient Greek and/or Latin language literature. Students who are unable to successfully complete the introductory sequence in elementary ancient Greek or Latin language (or equivalent) will not be able to advance to the upper-division coursework required for this major.

Other Programs That May Be of Interest
Since classical studies is an interdisciplinary field of study, many of the courses in this major are offered by other UC Santa Cruz departments. Students with an interest in the ancient world who would prefer to take courses in English are encouraged to consider the following majors and programs: history, history of art and visual culture, literature, philosophy, and politics.

Appeal Process

How to Declare a Major
Students are permitted to declare the classical studies major at any time but encouraged to do so only after they have successfully completed the lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

1. Fill out a Classical Studies Major Planning Worksheet. Include classical studies courses you've completed, are currently taking, and plan on taking in the future.
2. Meet with the classical studies academic advising coordinator to review and discuss your proposed plan of study. Obtain their signature on your worksheet.
3. Submit your approved Classical Studies Major Planning Worksheet and a completed Petition for Major/Minor Declaration to the history undergraduate program coordinator for processing.

Transfer Information and Policy

Transfer Admission Screening Policy
Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students from California Community Colleges are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UC Santa Cruz.

Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, history, literature, philosophy, or politics, depending on the student's interests, may also be useful.

Getting Started at UCSC as a Transfer Student
Transfer students entering at the junior level can readily complete the classical studies major within two years, provided that they complete GREE 1 or LATN 1 during their first quarter of enrollment at UC Santa Cruz. These courses are only offered in the fall quarter.

GREE 1  Elementary Ancient Greek  5
LATN 1  Elementary Latin  5

Letter Grade Policy
Students are allowed to complete up to two of their classical studies major or minor requirements for Pass/No Pass.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad
We actively encourage our students to expand their horizons in interdisciplinary and international settings by taking advantage of the University of California Education Abroad Program (EAP). A quarter or year abroad may be seamlessly integrated into any classical studies student's academic plan; up to three of the major or minor elective requirements may be completed abroad.

Honors
All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The classical studies faculty advisers determine honors based upon courses applied toward the classical studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their
respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

[Optional Catchall]

Requirements and Planners

Course Requirements

The classical studies major requires three lower-division courses (including two elementary language courses), nine upper-division courses, and an additional two-credit upper-division seminar, CLST 197F, which is taken in the same quarter that the senior comprehensive examination is given (see Comprehensive Requirement section below for more information). These must include the following:

Lower-Division Courses

The lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

Either these courses

<table>

**PHIL 118**  Stoic Ethics  5
**POLI 105A**  Ancient Political Thought  5

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in classical studies is satisfied by completing two upper-division courses in Greek literature or Latin literature from the following list:

**Greek Literature:**
- **LIT 184B** Greek Drama  5
- **LIT 184C** Greek Poetry  5
- **LIT 184D** Prose Authors  5
- **LIT 184E** Special Topics in Greek Literature  5

**Latin Literature:**
- **LIT 186B** Roman Poetry  5
- **LIT 186C** Prose Authors  5
- **LIT 186D** Special Topics in Latin Literature  5

**Comprehensive Requirement**

Classical studies majors are required to pass a senior comprehensive examination. Each student shall identify a minimum of two classical studies faculty members to serve on the examination committee, one of which shall be designated as the committee chair. Please consult the classical studies website for a more detailed description of this requirement.

Enrollment in a 2-credit comprehensive examination preparatory course, CLST 197F, is required in the same quarter that the senior comprehensive examination will be given. The preparatory course will be taken with the chair of the student’s examination committee.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
<tr>
<td>4th (senior)</td>
<td>Upper-division elective</td>
<td>Upper-division elective</td>
<td>CLST 197F (2 credits)</td>
</tr>
</tbody>
</table>

In addition to the specific courses shown above, a student must complete courses satisfying all of UC Santa Cruz's general education requirements. Individual student plans will vary, and some general education requirements may be satisfied within the classical studies major requirements depending on each student's individual course selection.

**Sample Transfer Plan**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (junior)</td>
<td>GREE 1 or LATN 1</td>

<td>LIT 184-series/LIT 186-series</td>
<td>Upper-division elective</td>
</tr>
</tbody>
</table>

Please consult the classical studies website for a more detailed description of this requirement.
This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

**CLASSICAL STUDIES MINOR**

**Course Requirements**

The classical studies minor requires a minimum of seven courses: two lower-division ancient Greek or Latin language courses (or equivalent), and five upper-division courses (minimum of 25 upper-division credits).

**Lower-Division Courses**

A minor in classical studies requires the lower-division sequence in elementary Greek or Latin language (or equivalent):

Either these courses:

- **GREE 1** Elementary Ancient Greek 5
- **GREE 2** Elementary Ancient Greek 5

or these courses:

- **LATN 1** Elementary Latin 5
- **LATN 2** Elementary Latin 5

Students with prior knowledge of ancient Greek or Latin are advised to consult with the classical studies faculty to determine if they have satisfied any of the elementary language course requirements.

**Upper-Division Courses**

Choose one of the following courses:

- **LIT 184A** Introduction to Greek Literature 5
- **LIT 186A** Introduction to Latin Literature 5

Reading proficiency in ancient Greek or Latin required for these courses. LIT 184A should be taken after GREE 2, and LIT 186A should be taken after LATN 2.

**Plus any four of the upper-division courses listed below**

<table>

**EAST ASIAN STUDIES MINOR**

East Asian studies addresses the three societies of China, Japan, and Korea in northeast Asia. We recognize that they compose a meaningful regional designation that contains a diverse range of peoples, languages, and cultures. Linked by centuries of common use of the Chinese writing system, a shared textual canon, general principles of statecraft, and the continual circulation of people and goods, the three societies nevertheless also possess distinctive languages, histories, and social...
identities, making it necessary to explore each society in its own right.

In recognition of this diversity within the common bonds, East Asian studies at UC Santa Cruz encourages students to explore East Asia in both depth and breadth. Building first upon developing language skills in Chinese or Japanese, students also begin their studies in a historical survey—HIS 40A, HIS 40B, HIS 80C, or HIS 81—which explore the broad regional forces that contextualize each society’s particular trajectory. From these foundations, students are encouraged to investigate a broad range of questions pertinent to each society in classes across the university, including anthropology, economics, education, feminist studies, film and digital media, history, history of art and visual culture, languages, linguistics, literature, music, politics, sociology, and theater arts.

The East Asian studies minor is administered by the Department of History. For additional information on curriculum and advising, visit the East Asian studies website.

STUDY ABROAD

Because the minor is designed to support the integration of language training with exploration of East Asian societies, we strongly endorse participation in one of the many education abroad programs available for UC students in East Asia where language skills acquired at the university are put to practical use in daily life and research. At present, there are UC Education Abroad Programs in China, Japan, Hong Kong, Korea, and Taiwan. Students who complete Chinese or Japanese language courses while studying abroad are expected to complete a language placement exam upon their return to UCSC. Instructions for the placement exam can be found on the Languages and Applied Linguistics website. For more information about study abroad, see the UC Education Abroad Program (UCEAP) and UCSC Study Abroad websites.

Course Requirements

The East Asian studies minor requires a minimum of six courses, five of which must be upper-division (minimum of 25 upper-division credits). Additional lower-division coursework in Chinese or Japanese language may be need in order to gain the proficiency necessary to take the upper-division Chinese or Japanese language courses required for this minor (see below).

Lower-Division Courses

Language

All East Asian studies minors are expected to gain proficiency in Chinese or Japanese language. Students without prior knowledge of Chinese or Japanese should enroll in beginning Chinese (CHIN 1) or Japanese (JAPN 1) no later than fall quarter of their second year. Students with prior knowledge of Chinese or Japanese are required to complete a language placement exam to determine which course of Chinese or Japanese language instruction best suits their skill level. Instructions for the placement exam may be found on the Languages and Applied Linguistics website. Students may also pursue study abroad opportunities as a way of acquiring Chinese or Japanese language instruction.

Either these courses

| CHIN 1 | First-Year Chinese  | 5 |
| CHIN 2 | First-Year Chinese  | 5 |
| CHIN 3 | First-Year Chinese  | 5 |
| CHIN 4 | Second-Year Chinese | 5 |
| CHIN 5 | Second-Year Chinese | 5 |
| CHIN 6 | Second-Year Chinese | 5 |

or these courses

| CHIN 4H | Accelerated Chinese for Heritage Speakers | 5 |
| CHIN 5H | Accelerated Chinese for Heritage Speakers | 5 |

or these courses

| JAPN 1 | First-Year Japanese | 5 |
| JAPN 2 | First-Year Japanese | 5 |
| JAPN 3 | First-Year Japanese | 5 |
| JAPN 4 | Second-Year Japanese | 5 |
| JAPN 5 | Second-Year Japanese | 5 |
| JAPN 6 | Second-Year Japanese | 5 |

Core Courses

Choose one of the following courses:

| HIS 40A | Early Modern East Asia | 5 |
| HIS 40B | The Making of Modern East Asia | 5 |
| HIS 80C | Global China | 5 |
| HIS 81 | Science in the Colonial World | 5 |

Upper-Division Courses

Upper-Division Chinese or Japanese Language

All East Asian studies minors are required to complete two upper-division courses in Chinese language instruction or two upper-division courses in Japanese language instruction. Additional upper-division courses in Chinese or Japanese language may be applied to the upper-division electives requirements (see below).

Chinese Language Courses

| CHIN 103 | Advanced Chinese: Language and Society | 5 |
| CHIN 104 | Advanced Chinese: Readings in Literature | 5 |
| CHIN 105 | Advanced Chinese: Readings in History | 5 |
| CHIN 107 | Introduction to Classical Chinese Prose | 5 |
| CHIN 108 | Introduction to Classical Chinese Poetry | 5 |

Japanese Language Courses

| JAPN 103 | Advanced Japanese | 5 |
| JAPN 104 | Advanced Japanese | 5 |
| JAPN 105 | Advanced Japanese | 5 |
### Upper-Division Electives

Three additional upper-division courses from the East Asian studies curriculum, one of which may be a topically appropriate individual study: CHIN 199, HIS 199, JAPN 199, LIT 199, etc.

**JEWISH STUDIES B.A.**

**Information and Policies**
Introduction

The interdisciplinary program in Jewish studies introduces students to the study of classical, medieval, and modern Jewish cultures and to the range of disciplines that bear upon the field.

The Jewish studies major and minor offer students the chance to study Jewish communities and cultures across the world, with special reference (though not limited) to modern issues. The major and minor will help them prepare to move successfully into graduate programs in a variety of disciplines, especially in humanities, social sciences, and pre-professional programs, and will provide students with a grounding in materials fundamental to a liberal arts education. This program connects with a range of disciplines and programs on the UC Santa Cruz campus that explore the meanings of modernity; at the same time, this program will help students develop analytical tools, methodological versatility, and critical literacy.

Note that modernity here is not defined as unfolding solely in Europe or North America; the Jewish studies program intends to speak to modernity as a global phenomenon, dealing with sites where Jews lived. In the 19th and 20th centuries Jews were widely spread across the globe and often played active and influential roles in their communities. These include such places as China, India, Latin America, North Africa, the Middle East, as well as Europe and North America.

Academic Advising for the Program

The Jewish studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to consult the "Transfer Information and Policy" information included below.

Getting Started in the Major

Program Learning Outcomes

Jewish History and Culture

• Identify and interpret major events, figures, and topics in Jewish history and culture.

Holocaust

• Demonstrate thorough knowledge of the Holocaust as a historical phenomenon.

• Develop a nuanced understanding of the cultural dimensions of the Holocaust through an analysis of literature, films, art, and/or music.

Jewish Languages

• Develop basic competency in Hebrew (modern or Biblical) or Yiddish.

Critical Analysis

• Distinguish between primary and secondary sources.

• Evaluate competing interpretations and multiple narratives of the past.

• Analyze Jewish cultural sources, including literary texts, films, and music within a broader, cross-cultural context.

Effective Communication

• Present clear and compelling arguments, based on critical analysis of diverse literary, historical, film, and/or musical sources, and effectively communicate interpretations in written essays and/or other media.

Scope

• Classical Period.

• Modern Period.

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the Jewish studies major at any time. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements.

Appeal Process

How to Declare a Major

1. Fill out a Jewish Studies Major Planning Worksheet. Include Jewish studies courses you've completed, are currently taking, and plan on taking in the future.

2. Meet with a Jewish studies faculty advisor to review and discuss your proposed plan of study. Obtain their signature on your worksheet.

3. Submit your approved Jewish Studies Major Planning Worksheet and a completed Petition for Major/Minor Declaration to the history undergraduate program coordinator for processing.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students entering at the junior level can readily finish all of the Jewish Studies major requirements within two years, even if they haven’t completed any preparatory coursework prior to transferring. Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, philosophy, or politics, depending on the student’s interests, may also be useful.

Transfer students are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UC Santa Cruz.
Getting Started at UCSC as a Transfer Student

Transfer students are advised to complete the lower-division Jewish studies course requirements, including the language requirement, by the end of their first year. The upper-division courses required for this major may be taken simultaneously with the required lower-division courses. Please refer to the sample academic plan provided below.

Transfer students may declare the Jewish studies major during their first quarter of enrollment at UC Santa Cruz.

Letter Grade Policy

Students are allowed to complete up to two of their Jewish studies major or minor requirements for Pass/No Pass, with the exception of their comprehensive requirement.

[Optional Catchall]

Course Substitution Policy

Jewish studies majors must take a minimum of five regularly scheduled Jewish studies courses plus the comprehensive/disciplinary communications (DC) requirement from members of the UC Santa Cruz Jewish studies faculty. Subject to the limits indicated, courses from the following categories may be applied to the Jewish studies major:

- Courses transfer from a California Community College or other domestic university (limit of three)
- Education Abroad Program (limit of three)
- Related courses not currently on the pre-approved Jewish studies course list (limit of two)
- Independent and field studies (limit of one)

Double Majors and Major/Minor Combinations Policy

Study Abroad

The program in Jewish studies encourages students to take advantage of the UC Education Abroad Program (EAP). The University of California has developed educational opportunities abroad in conjunction with the Jerusalem Study Center at The Hebrew University of Jerusalem. Subject to the limitations described in the "Course Substitution Policy" section, up to three courses from EAP may be applied toward the Jewish studies major requirements.

Honors

All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The Jewish studies faculty advisors determine honors based upon courses applied toward the Jewish studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

[Optional Catchall]

Requirements and Planners

Course Requirements

The Jewish studies major requires a minimum of 11 courses, including the comprehensive requirement, and an additional three language courses (or equivalent).

In consultation with a faculty advisor, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses

Language Requirement

Three quarters of lower-division instruction (or equivalent) in a Jewish language in any combination of the student’s choosing:

<table>
<thead>

</table>
ACADEMIC UNITS | 139

HIS 185K Jewish Life in Eastern Mediterranean Port Cities 5
HIS 185L Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula 5
HIS 185M Zionism: An Intellectual History 5
HIS 185O The Holocaust and the Arab World 5
HAVC 135E Jewish Identity and Visual Representation 5
JWST 185N The Holocaust in a Digital World 5
LGST 114 Jews, Anti-Semitism, and the American Legal System 5
LGST 115 Law and the Holocaust 5
LIT 118A Hebrew Bible 5
LIT 164A Jewish Travel Narratives 5
LIT 164B Hebrew Poetry 5
LIT 164C Global Jewish Writing 5
LIT 164D Jewish Diaspora, Ethnicity, and Urban Life 5
LIT 164G Literature and the Holocaust 5
LIT 164H Jewish Writers and the European City 5
LIT 164J Jewish Writers and the American City 5
LIT 181A Biblical Hebrew, Part 1 5
LIT 181B Biblical Hebrew, Part 2 5
PHIL 148 The Holocaust and Philosophy 5

Electives

Four additional Jewish studies courses of the student's choice, three of which must be upper-division.

The following courses are electives only. Students may satisfy their Jewish studies elective requirements by taking additional language, lower-division core, and upper-division core courses from the Jewish studies curriculum.

HIS 2A The World to 1500 5
HIS 2B The World Since 1500 5
HIS 70A Modern European History, 1500-1815 5
HIS 70B Modern European History, 1815-present 5
HIS 78 Modern Authoritarianism in Europe and Beyond 5
HIS 167A The First World War 5
HIS 167B The Second World War in Europe 5
HIS 172C History of German Film, 1945 to Present 5
HIS 176 Eastern Europe, 1848-2000 5
HIS 178A European Intellectual History: The Enlightenment 5
HIS 178B European Intellectual History: The 19th Century 5
HIS 178C European Intellectual History, 1870-1970 5

HIS 184B Racism and Antiracism in Europe: From 1870 to the Present 5
JWST 199 Tutorial 5
LIT 112I Kafka in Translation 5
MUSC 80I Music of Modern Israel 5
MUSC 80T Mizrahi: Jewish Music in the Lands of Islam 5
MUSC 80Y Music, Anti-Semitism, and the Holocaust 5
MUSC 81P History of Jewish Music 5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in Jewish studies is satisfied by completing an exit seminar or thesis:

Choose an exit seminar

One quarter; choose one of the following courses:

HIS 194L Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East 5
HIS 194V Fascism and Anti-Fascism: The Global Spanish Civil War 5
HIS 196G Topics in Modern Germany and Europe 5
HIS 196M Shtetl: Eastern European Jewish Life 5
HIS 196N Eastern European Jewish Social History 5
LIT 190Y Topics in Jewish Literature and Culture 5

Or a thesis

Two quarters; all-of-the-following-courses:

JWST 195A Thesis Research 5
JWST 195B Thesis Writing 5

Comprehensive Requirement

Students may satisfy the Jewish studies comprehensive exit requirement by completing an approved exit seminar or senior thesis:

Choose an exit seminar

One quarter; choose one of the following courses:

HIS 194L Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East 5
HIS 194V Fascism and Anti-Fascism: The Global Spanish Civil War 5
HIS 196G Topics in Modern Germany and Europe 5
HIS 196M Shtetl: Eastern European Jewish Life 5
HIS 196N Eastern European Jewish Social History 5
LIT 190Y  Topics in Jewish Literature and Culture 5

Or a thesis
Two quarters; all of the following courses:
JWST 195A  Thesis Research 5
JWST 195B  Thesis Writing 5

Classical Chronological Distribution Requirement
One course from the following:
HEBR 80  Introduction to Biblical Hebrew 5
HIS 74  Introduction to Jewish History and Cultures 5
HIS 74A  Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern 5
HIS 163B  Genesis: A History 5
LIT 61J  Introduction to Jewish Literature and Culture 5
LIT 118A  Hebrew Bible 5
LIT 181A  Biblical Hebrew, Part 1 5
LIT 181B  Biblical Hebrew, Part 2 5

2nd (soph)  Upper-division core course 1
            Upper-division core course 2
            Upper-division core course 3

3rd (junior) Upper-division core course 4
               Additional core or elective 1 (classical requirement)
               Upper-division additional core or elective 2

4th (senior) Upper-division additional core or elective 3
               Upper-division additional core or elective 4
               Exit seminar or thesis (DC)

In addition to the specific courses shown in these planners, a student must complete courses satisfying all of UC Santa Cruz's general education requirements. Individual student plans will vary, and some general education requirements may be satisfied by Jewish studies major requirements depending on each student's individual course selection.

2nd (senior)  Upper-division core course 3
            Upper-division additional core or elective 4
            Exit seminar or thesis (DC)

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

These are sample plans. Actual student plans will vary according to annual course offerings and student's unique academic goals. Editable versions of these plans are available on the Jewish Studies website.

JEWISH STUDIES MINOR

Students whose major area of interest is not Jewish studies may nonetheless find that a minor in Jewish studies makes an invaluable contribution to their studies. This introduction to Jewish studies is helpful for students who plan to do graduate work in Jewish studies, whether through traditional academic disciplines or in Jewish studies programs, and also for students who plan to attend rabbinical schools or to find work with Jewish communities. For others with an interest in Jewish...
topics, but without such plans, a minor in Jewish studies offers intellectual enrichment and a focus within the student’s chosen field.

Course Requirements
The minor requires a minimum of eight courses. A minimum of 5 upper-division courses must be completed within the Jewish studies minor course requirements. In consultation with a faculty adviser, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses
One of the following Jewish studies core courses:
HIS 74 Introduction to Jewish History and Cultures 5
HIS 74A Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern 5
HIS 74B Introduction to Middle Eastern and North African Jewish History, 1500-2000 5
HIS 75 Film and the Holocaust 5
HIS 76 The Holocaust 5
LIT 61J Introduction to Jewish Literature and Culture 5

Upper-Division Courses
Three upper-division Jewish studies core courses:
HIS 155 History of Modern Israel 5
HIS 163B Genesis: A History 5
HIS 172A German History 5
HIS 172B German Film, 1919-1945 5
HIS 178E Modern Jewish Intellectual History 5
HIS 185C Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics 5
HIS 185I Latin American Jewish History in the Modern Period 5
HIS 185J The Modern Jewish Experience 5
HIS 185K Jewish Life in Eastern Mediterranean Port Cities 5
HIS 185L Where Civilizations Met: Jews, Judaism, and the Iberian Peninsula 5
HIS 185M Zionism: An Intellectual History 5
HIS 185O The Holocaust and the Arab World 5
HAVC 135E Jewish Identity and Visual Representation 5
JWST 185N The Holocaust in a Digital World 5
LGST 114 Jews, Anti-Semitism, and the American Legal System 5
LGST 115 Law and the Holocaust 5
LIT 118A Hebrew Bible 5
LIT 164A Jewish Travel Narratives 5

Electives
Four additional core or elective courses from the Jewish studies curriculum, two of which must be upper-division.

The following courses are electives only. Students may satisfy their Jewish studies elective requirements by taking additional lower-division core and/or upper-division core courses from the Jewish studies curriculum. Jewish studies minors may also apply lower-division Hebrew or Yiddish language courses to their elective requirements.

HIS 2A The World to 1500 5
HIS 2B The World Since 1500 5

HISTORY M.A.

Introduction
The Department of History offers an M.A. degree in history for those individuals who are interested in postgraduate work, but
who are not planning to complete a Ph.D. It is a degree program that can fulfill in-service education requirements for current teachers as well as for future teachers earning a single-subject credential in social studies. Part-time enrollment is allowed.

Each student will be required to choose one of three areas of specialization (U.S., Europe, East Asia). To complete the degree, each student must pass a total of 12 courses of 5 credits each and two courses of 2 credits each. Students are required to produce a substantial research essay (average word count of 8000-10,000) grounded in original research in primary historical documents. There is no language requirement.

Detailed information for prospective graduate students, including procedures for applications and admission to graduate studies, examinations and requirements is available from the Division of Graduate Studies.

Applications

The deadline for applications to the History Program is Dec. 10 of each year. Admission information and application material are on the Division of Graduate Studies website.

Requirements

The M.A. degree is awarded after two years in residence, provided that the following requirements have been met:

- Completion of 12 five-credit courses and two 2-credit proseminars
- Removal of all Incomplete notations on record
- Approval of an M.A. essay

Other Requirements

[Optional Catchall]

Applying for Graduation

The final essay (hard copy and pdf copy) must be submitted to the graduate program coordinator by the spring quarter deadline. A completed Application for the Master's Degree must be filed with the graduate coordinator with the submission of your final essay.

Essay Review and Evaluation

The Graduate Committee evaluates the master's essays and makes recommendations to the graduate director on the awarding of the M.A. degree. Applicants are notified of the committee's decision in June.

HISTORY PH.D.

Introduction

The Ph.D. program in history at UC Santa Cruz has a global and transnational orientation, and emphasizes an interdisciplinary and cross-cultural approach to historical studies, encouraging innovative thinking about global historical
Each Ph.D. student completes a course of study and original research related to a primary area of research interest. Every student also acquires expertise in a primary teaching field, defined in terms of geography and period, as well as a second teaching field that is different from the primary field. In consultation with their faculty advisors, students will designate primary fields for research and teaching, defined by their temporal, geographical, and thematic or methodological interests, by the end of their first year in the program.

Detailed information for prospective graduate students, including procedures for applications and admissions to graduate studies, examinations and requirement is available from the Division of Graduate Studies.

Applications

The deadline for applications to the History program in Dec. 10 of each year. Admission information and application material are on the Division of Graduate Studies website.

Advancement to Candidacy

Course Requirements

Until they pass the qualifying examination and are formally advanced to candidacy for the Ph.D. degree, students must be in residence at UC Santa Cruz and are expected to complete a minimum of 10 credits each quarter to maintain normal academic progress. Completion of a minimum of 10 courses of 5 credits each and one proseminar of 2 credits (HIS 280A) is required for advancement to candidacy. Courses taken are graduate seminars, independent study courses, and most upper-division courses.

HIS 280A: year 1

Second teaching field:

Each Ph.D student also prepares a second teaching field different from the primary field. Students are required to take at least two courses in their secondary teaching field.

Electives:

Six elective courses of 5 credits each, two of which may be taken outside the History Department. Courses taken are graduate seminars, independent study courses, and most upper-division courses.

Reading seminars in the area of concentration:

Graduate students will complete extensive coursework, no less than three readings seminars, in their primary field of research and teaching specialization. The primary field must be defined in consultation with faculty advisors and declared by the end of the student’s first year in the Ph.D. program. Students will acquire expertise in their primary field through regularly offered courses and tailored independent studies with advisors and other faculty members.

Foreign Language Requirements

Students whose research centers on a primarily English-speaking part of the world must demonstrate reading competency in at least one foreign language prior to taking the qualifying examination. Students working on all other parts of the world must demonstrate a reading competency in at least two foreign languages prior to taking the qualifying exam; competency in one of the languages must be demonstrated by the end of the sixth quarter of enrollment. Usually, competency will be demonstrated by passing a reading examination administered by a member of the history faculty. Students who are native speakers of the language in question or who believe that they have already demonstrated competency through previous coursework or through their performance on a standardized test should petition the graduate director to waive this language requirement.

Pre-Qualifying Requirements

Coursework

Students must successfully complete all required courses.

The M.A. Essay

Students are required to produce a substantial research essay grounded in original research in primary historical documents. A successful essay will reflect a general understanding of the field of inquiry along with a critical grasp of the scholarship that currently defines the field; deep knowledge of the specific subject under investigation; the application of appropriate analytical models; and a well-supported interpretation of the materials explored. This essay could (but need not) be a segment of a larger project; but it must be a complete, self-contained essay in and of itself.

Students enroll in HIS 201, Directed Research Colloquium, the winter quarter of their second year. The final essay (pdf copy)
must be submitted to the graduate program coordinator by the spring quarter deadline.

Qualifying Examination (QE) Dossier Requirements

The QE dossier includes three sections, each of which students will prepare in consultation with their primary academic adviser and with the advice of the examiners. Requirements for the contents of the dossier may vary by geographic and thematic areas of emphasis, and should be discussed with faculty advisors and other History Department faculty members on the QE committee at least one full quarter prior to the oral exam date. The exact contents of the dossier will be determined by the primary advisor and other members of the committee. Complete bibliographies must be appended to each piece of the QE dossier. Dossiers generally include:

1. Three field statement essay(s). The first and longest essay (25-30 pages) should review the state of the scholarship in students’ main area of teaching expertise, broadly defined and reflecting primary fields of employment within the discipline. One of the two shorter essays (roughly 15-20 pages each) should survey the historiography on the student’s more specific area of research. The other should focus either on interdisciplinary theoretical or methodological literature related to the student’s program of study or a second area of geographical or thematic specialization (or both). The field statements should demonstrate students’ broad competence in subject matter as well as mastery of the theoretical issues and historiographic debates in their designated research and teaching of expertise.

2. Two annotated syllabi that demonstrate students’ preparation to teach undergraduate courses in their primary and secondary teaching fields. The syllabi should be annotated to show how each class session would be prepared: principal sources for lectures, principal questions for discussion, reasons for assigning particular readings, etc.

3. A 15-page dissertation prospectus that includes an evaluative survey of the literature relevant to your proposed research topic, an explicit statement of research questions, a detailed discussion of the archival sources, and a consideration of the theoretical issues to be engaged.

Note: Although no specific section of the dossier focuses upon the coursework completed outside the History Department, it is expected that this work will be incorporated into different sections of the portfolio, particularly the theoretical or methodological literature and the dissertation prospectus.

Qualifying Examination

The qualifying examination (QE) emphasizes field mastery, integration of material from different fields, and focused preparation for dissertation research. The QE is a three-hour meeting during which a student presents and discusses a dossier that has been submitted to the student’s committee at least three weeks in advance. The examination is taken by the spring quarter of the third year. Prior to taking the QE, all incomplete notations (I) must be cleared from the student’s record. Additionally, the student must be registered the quarter the examination is taken.

A pass or fail will be given after the examination based on the student’s knowledge and research preparation as demonstrated by their dossier. In order to pass the QE, students must receive passing marks from each member of the committee. Immediately following the exam, the QE committee chair will complete the Report on Qualifying Examination form and submit it to the History Department. If a student does not pass the QE the first time, they may retake only those sections not passed. No one will be permitted to take the QE more than twice.

M.A. Degree

The master of arts (M.A.) degree is awarded to all Ph.D. students after two years in residence, successful completion of 12 courses of 5 credits each and the Teaching Pedagogy proseminar (HIS 280A) of 2 credits, demonstrated competency in at least one foreign language (for those whose research centers on a primarily English-speaking part of the world), removal of all Incomplete notations (I) on record, and approval of a M.A. essay (average word count of 8000-10000, excluding footnotes and bibliography) grounded in original research in primary historical documents.

Dissertation

The dissertation represents an extensive, book-length project grounded in research in original historical documents. A successful dissertation will reflect a broad and deep understanding of the field of inquiry, a mastery of the scholarship that currently defines the field, detailed knowledge of the subject of study growing out of dedicated research, and the incorporation of appropriate interpretive models.

Academic Progress

Evaluation of Academic Progress

Each spring, the History Department reviews the academic progress of all continuing students. All first-year students are required to meet with the Graduate Committee to discuss academic goals and progress.

Time to Degree

During your time in the graduate program, you will become familiar with the terms “normative time” or “timely progress.” It is important to progress within expected timetables as it affects many aspects of financial support as well as good academic standing. (See the Graduate Division Graduate Student Handbook.

Applying for Graduation

Degree Application

By the end of the first week of the quarter you intend to finish, an Application for Doctor of Philosophy Degree form, which requires dissertation adviser(s) and graduate director signatures, must be filed with the Graduate Division.

Dissertation Completion

The dissertation should be submitted to the dissertation reading committee before the end of the fifth week of the quarter in
which the degree is to be conferred. As a courtesy to the committee, students should provide a hard copy draft unless the committee is willing to accept an electronic copy.

A copy of the signed title page along with a PDF of the dissertation must be filed with graduate program coordinator and one copy must be filed online with the Graduate Division by the deadline in the quarter in which the degree is to be conferred (see Academic and Administrative Calendar.
History Course List

Catalog of Course Requirements

The following is a summary list of undergraduate history courses and how they may apply to the different geographic regions of concentration and the chronological distribution requirements. Questions about this list or how to apply courses to the history major should be directed to the history undergraduate program coordinator. The information on this list is subject to change.

History of Consciousness

315 Humanities 1
(831) 459-4324
https://histcon.ucsc.edu/

PROGRAMS OFFERED

History of Consciousness Ph.D. (p. 167)
History of Consciousness Designated Emphasis (p. 169)

OTHER PROGRAMS OF INTEREST

Critical Race and Ethnic Studies B.A. (p. 103)
Feminist Studies B.A. (p. 112)

History of consciousness is an interdisciplinary graduate program centered in the humanities, with links to the social sciences and the arts. It is concerned with forms of expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

History of consciousness fosters problem-driven research vital to new forms of knowledge and intelligibility and to meet the challenges of imagining new modes of scholarship for the arts, social sciences, and humanities. The department emphasizes a variety of topics in its seminars and research pursuits. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of Consciousness facilitates its expansive intellectual and pedagogical mission by maintaining strong cooperative relations with affiliated faculty from other campus programs who offer seminars and participate in advising, qualifying examinations, and dissertation committees. The formal list of affiliated faculty is a non-exhaustive indication of advising possibilities beyond the program’s core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Humanities Institute, Critical Race and Ethnic Studies, the Science and Justice Working Group, and the Research Center for the Americas, also provide venues for collaborative work.

GRADUATE PROGRAM

Over more than 50 years of existence, the history of consciousness graduate program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are influential scholars at prominent universities, and their dissertations have been published by important trade and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

Students also have the option of doing advanced work in a traditional discipline and receiving a designated emphasis in that specialization. In such cases, students must satisfy the appropriate department’s criteria (see departmental websites for information).

HISTORY OF CONSCIOUSNESS PH.D.

Introduction

Detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

Applications

The deadline for applications to the history of consciousness (HISC) program is Dec. 10 of each year. Admissions information and application materials are available online. Applications are invited from students with backgrounds and interests in the humanities, arts, and social sciences and are especially encouraged from individuals with a clear idea of the project they wish to undertake. Strong preference is given to applicants working in areas for which the faculty resources in history of consciousness are appropriate and available. Graduate Record Examination (GRE) scores are optional. A writing sample is required of no more than 10 pages. Admission is for the fall quarter only.

It is important to note that in light of California’s elimination of affirmative action as an admissions criterion, the History of Consciousness Department reaffirms its commitment to the principles of affirmative action. These principles mean a commitment to diversity, equal opportunity, and outreach to underrepresented communities. Further, this commitment underlines our understanding that the very fabric and quality of our scholarship depends on the representation and interplay
of diverse experience and perspectives. So defined, affirmative action is reflected in every aspect of the history of consciousness program, including scholarship, teaching, admissions, hiring, and the process of departmental governance.

**Advancement to Candidacy**

**Course Requirements**

The common requirements are:

- HISC 203A, Approaches, to be taken in fall quarter of the first year;
- HISC 203B, the writing-intensive version of Approaches, to be taken in spring quarter of the first year;
- A minimum of five history of consciousness graduate seminars to be taken during the first two years (HISC 203A and four additional HISC seminar classes, not including HISC 203B);
- HISC 291, a two-credit advising course, to be taken each quarter;

Students register for a minimum of two courses (5 credits each) plus HISC 291 (2 credits) per quarter until after Advancement to Candidacy, at which time they may register for one course per quarter (normally HISC 299A) plus the 2-credit HISC 291 in order to qualify for full-time enrollment. With the exception of HISC 203A, HISC 203B, HISC 240 and the five required history of consciousness seminars, courses taken to fulfill the university enrollment requirements may include not only history of consciousness seminars but also independent study courses with specific faculty and graduate seminars offered in other departments.

**Minimum of five HISC grad seminars**

A minimum of five history of consciousness graduate seminars during the first two years (HISC 203A and four additional HISC seminar classes, not including HISC 203B).

**Foreign Language Requirements**

Students must demonstrate a proficiency in a language other than English (as demonstrated by an undergraduate degree in the language, taking a translation examination, completing coursework, or petitioning for exemption).

**Teaching Requirement**

Students must complete three quarters of supervised teaching experience.

**Pre-Qualifying Requirements**

**Qualifying Examination**

The qualifying examination includes a written and oral component. The written component consists of a qualifying essay (normally drafts of one to two chapters of the proposed dissertation) that demonstrates the candidate’s ability to do extended, dissertation-level research, analysis, and writing on an original topic. The written component also includes a dissertation prospectus. The oral examination focuses on the student’s qualifying essay, dissertation prospectus, and relevant fields of scholarship.

**Post-Qualifying Requirements**

**Advancement to Candidacy**

Students are encouraged to advance to candidacy in their third year. In order to remain within normative time they must advance by the end of their fourth year in the program. In order to advance to candidacy, students must complete their coursework; demonstrate proficiency in a second language (by taking a translation examination, completing coursework, or petitioning for exemption), be in good academic standing, and complete and pass the written and oral portion of the qualifying examination.

[Optional Catchall]

**Dissertation**

**Dissertation**

After advancement to candidacy, students concentrate on dissertation writing. The current normative time to degree limit of seven years means that a student usually has a minimum of three years after advancement to candidacy for completion of the dissertation. Students register for one course per quarter (normally HISC 299A) plus the 2-credit HISC 291 which qualifies as full-time enrollment.

**Dissertation Defense**

A formal dissertation defense is optional. Please consult with the department if you want to pursue this option.

**Academic Progress**

In order to remain within normative progress, students must advance by the end of their fourth year in the program.

A student who has been advanced to candidacy for more than nine quarters is not considered to be making satisfactory progress.

For a complete list of Academic Requirements and Standards, visit the Graduate Division website.

**Applying for Graduation**

For information on how to apply for graduation, visit the Graduate Division website.
HISTORY OF CONSCIOUSNESS
DESIGNATED EMPHASIS

Introduction
To receive a designated emphasis in history of consciousness, graduate students from other departments must complete the requirements in addition to degree requirements for the doctorate in their home department.

Guidelines and application forms are available in the History of Consciousness Department office.

Requirements

Committee Composition and Departmental Approvals
The student must have a faculty graduate advisor from core or affiliate faculty in history of consciousness, who serves both on the qualifying examination committee and the dissertation reading committee.

To obtain the designated emphasis in history of consciousness:
1. The request for a designated emphasis must originate in the degree-granting department.
2. Student should complete an application, obtain the history of consciousness advisor’s signature and submit with supporting documentation (copies of the QE and Dissertation Committee Nomination forms) to the History of Consciousness Department office.
3. The History of Consciousness Department will notify the student and the home department of approval for the designated emphasis.

Course Requirements
The student must take four graduate courses in history of consciousness. With the approval of the history of consciousness advisor, one of the four required graduate courses may be an independent study.

Writing, Research and/or Teaching Requirements

Languages and Applied Linguistics
Department of Languages and Applied Linguistics

PROGRAMS OFFERED
Applied Linguistics and Multilingualism B.A. (p. 173)
Spanish Studies B.A. (p. 178)

OTHER PROGRAMS OF INTEREST

Language Studies B.A. (p. 191)
Linguistics B.A. (p. 185)

Language is an intellectual tool basic to all disciplines. In today’s communities, multicultural and global, learning a second language is not a refinement but a necessity—the key to understanding and communicating with others near and far. The goal of the Department of Languages and Applied Linguistics at UC Santa Cruz is to allow students to achieve a substantial level of proficiency in languages other than English. Since such proficiency always includes cultural as well as linguistic comprehension, our courses examine the complex relationship between language and culture.

The Department of Languages and Applied Linguistics offers rigorous training by professional instructors. Most courses are taught in the target language from the very beginning. Currently, we offer courses in Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Persian, Portuguese, Punjabi, Russian, Spanish, Spanish for Heritage speakers, and Yiddish.

Students with previous language preparation who wish to continue in that language take a placement examination to determine the course level appropriate for them. Each language’s placement examination format is described in the quarterly Schedule of Classes, along with the date, time, and location of the examination.

Our upper-division courses further expand students’ understanding of language in its social contexts, focusing on linguistic, historical, literary, sociological and cultural issues, among others.

Students may also use language courses for the following majors and minors that have a language requirement: classical studies, East Asian studies, global economics, human biology, Italian studies, Jewish studies, Latin American and Latino studies, linguistics, language studies, and literature.

Students of language who are interested in theater have the opportunity to participate in the annual International Playhouse, which presents highly successful programs every spring. To date, pieces have been performed in Chinese, French, German, Hebrew, Italian, Japanese, Latin, Portuguese, Punjabi, Russian, and Spanish.

Study abroad is an important component of language study at UCSC. Language students have various opportunities to study abroad, for a summer, quarter, semester, or year. Students may choose to study abroad through the Division of Global Engagement through the UCSC Summer Abroad Program, or through affiliate programs around the globe. The Division of Global Engagement offers programs in Argentina, Australia, Barbados, Botswana, Brazil, Canada, Chile, China, Costa
Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Tanzania, Thailand, Turkey, United Kingdom, and Vietnam. There are programs available for students of all levels of language ability, including Language and Culture programs for beginner or intermediate speakers, to full immersion programs for students with advanced language skills. For a list of current programs and requirements, please visit the following Global Engagement website.

UNDERGRADUATE PROGRAM

The department houses two vibrant majors, in applied linguistics and multilingualism, and in Spanish studies, as well as a minor in Spanish studies. The applied linguistics and multilingualism major is designed for students who wish to pursue the study of a particular language and, at the same time, gain an in-depth understanding of language use in bilingual and multilingual settings. Applied linguistics courses are taught in English and cover topics such as language and gender, second-language teaching, bilingualism, discourse analysis, and intercultural communication. In Spanish studies, the major and minor are both interdisciplinary programs that promote advanced linguistic proficiency in Spanish studies as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

PLACEMENT EXAMS

Information about this topic can be found under the Department of Languages and Applied Linguistics website in the "placement" tab located in the navigation bar at the top of the page.

ACADEMIC ENGLISH

The Department of Languages and Applied Linguistics offers a series of courses in Academic English (ACEN) designed specifically for students whose native language is not English, and who would benefit academically by improving their English language skills. The main objective of these courses is to raise the linguistic, academic, and cultural competence of international students who are currently pursuing various majors at UCSC. ACEN courses help students develop and refine their knowledge of English usage, advanced grammar, vocabulary and idiomatic expressions, while at the same time developing their listening, oral communication, and academic reading and writing skills. The specific content of each course varies per quarter, and thus, none of the courses are prerequisites to the others.

ARABIC

Students interested in acquiring proficiency in Modern Standard Arabic can enroll in language courses from beginning to intermediate levels (ARBC 1 - ARBC 6). The curriculum aims to build a solid foundation in speaking, listening, reading, and writing, as well as imparting an understanding of culture and society in the modern Arabic-speaking world. Other courses at UC Santa Cruz that may be of interest to students of Arabic are detailed here.

Study Abroad

Students may apply to spend time in Jordan or Morocco, visit the Division of Global Engagement website for information about current programs.

CHINESE

Students interested in acquiring proficiency in Chinese can enroll in language courses from beginning to advanced levels. Only those with no prior experience with the language may enroll in CHIN 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major in language studies or linguistics, a minor in East Asian studies through the History Department, an individual major in East Asian studies through their college, a major in literature with an emphasis in Chinese literature, or a major in global economics.

The sequence of lower-division courses CHIN 1—CHIN 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing skills. Instruction takes place mostly in Chinese from the second half of the first quarter. Upper-level courses include CHIN 103, Language and Society; CHIN 104, Readings in Chinese Literature; CHIN 105, Readings in Chinese History; CHIN 107, Introduction to Classical Chinese Prose; and CHIN 108, Introduction to Classical Poetry.

Study Abroad

Students may apply to study intensive Chinese language at universities—in Taipei, Hong Kong, or Beijing—for periods ranging from a summer up to a full year through the Division of Global Engagement. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, please contact the appropriate department.

FRENCH

Students interested in acquiring proficiency in French can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major in language studies, a major in literature with an emphasis in French literature, or a major in global economics.

Lower-division FREN 1–FREN 6 are taught entirely in French and prepare students for advanced study either on
Campus or abroad. They are designed to help students develop proficiency in aural comprehension, speaking, reading, and writing skills, and to introduce students to French and Francophone cultures. Upper-division courses, also taught in French, are offered on topics such as French phonetics, advanced grammar and composition, French civilization, French linguistics, history of the French language, French for professions, and French social activism through song.

**Study Abroad**

The Division of Global Engagement offers both semester and one-year programs in many regions of France, including Bordeaux, Lyon, Grenoble, Toulouse, and Paris. With the approval of an adviser, some French courses taken abroad may be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website.

**GERMAN**

Students interested in learning German at UCSC can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major or minor in language studies, a major in literature with an emphasis in German literature, or a major in global economics.

The sequence of lower-division courses GERM 1–GERM 6 is aimed at helping students to develop listening and reading comprehension, as well as speaking, reading, and writing skills. Another sequence of lower-division courses, equivalent to levels 1, 2, and 3, consists of courses GERM 1A and GERM 1B, which offer accelerated German language instruction. GERM 1A and GERM 1B are taught sequentially, winter and spring quarters. The German language sequence also includes a course on German Media (GERM 119) and a third-year course entitled Advanced German Conversation and Composition (GERM 120); successful completion of GERM 5 is a prerequisite for these courses. Instruction takes place in German. After completing German 5 (or testing out of that course), students are also able to take courses in the literature department that are taught almost exclusively in German.

**Study Abroad**

The Division of Global Engagement offers study abroad opportunities in Berlin and Munich. Students may spend a summer semester or full academic year in Berlin or a summer in Munich. The semester and full-year programs are at the Freie Universität, the Humboldt Universität and the Technische Universität. Both the Freie Universität and the Technische Universität also offer summer programs. The summer program at the Freie Universität is self-designed. Students may choose their own curriculum from a variety of available courses (in English or German). The summer program at the Technische Universität is designed for science and engineering majors. Students concentrate on a single engineering course (in English), with visits to relevant companies and research facilities in Berlin. The summer program in Munich (in English) is designed for science, engineering, and environmental studies majors and concentrates on sustainability and green technology, with visits to relevant companies and research facilities. Language requirements for admission to these programs range from little or no German required (summer programs in Berlin and Munich and the FU-BEST program in Berlin) to two years of college-level German required (regular course of study in Berlin). Academic and professional internship opportunities are also available to all students on study abroad in programs Germany.

Students may apply to any of these programs at any point in their student career. For the yearlong programs, students generally apply in their sophomore year for a junior year abroad. As an exception, some students apply in their junior year for a senior year abroad; such students must sometimes spend an additional quarter at UC Santa Cruz in order to satisfy all requirements for their major. Courses taken abroad can, with approval of an adviser, be applied to major requirements.

For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, contact the appropriate department.

**HEBREW**

Students interested in acquiring proficiency in modern Hebrew can enroll in language courses from beginning to intermediate levels. In addition, credits from these courses may be counted toward the major or minor in Jewish studies. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture, history, and religion that have been expressed through the Hebrew language from antiquity until today. Students interested in learning the basic lexicon and grammatical structures of biblical Hebrew can enroll in HEBR 80. HEBR 1, HEBR 2, and HEBR 3 (or equivalency) are required for the major in Jewish studies, and other Hebrew courses are encouraged. In addition, credits from modern or biblical Hebrew courses may be counted toward the minor in Jewish studies.

**ITALIAN**

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major or minor in Italian studies, a major or minor in language studies, a major in global economics.

The sequence of lower-division courses ITAL 1–ITAL 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. ITAL 1A
and ITAL 1B offer lower-division intensive Italian language instruction equivalent to levels 1, 2, 3. The ITAL 1, ITAL 2, ITAL 3 sequence starts once a year in the fall quarter, while the ITAL 1A-ITAL 1B sequence starts once a year in the winter quarter. Classes are taught in Italian from the beginning level.

Study Abroad

The Division of Global Engagement sponsors programs of study in Italy. For a list of current programs and requirements, visit the Global Engagement website.

JAPANESE

Students interested in acquiring proficiency in Japanese can enroll in language courses from beginning (JAPN 1, JAPN 2, JAPN 3, JAPN 4, JAPN 5, JAPN 6) to advanced levels (JAPN 103, JAPN 104, JAPN 105, JAPN 106). Only those with no prior experience with the language may enroll in JAPN 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. See the placement website for more information.

The curriculum aims to build a solid foundation in all four aspects of linguistic skills (speaking, listening, reading, and writing) as well as sociolinguistic competence and cultural knowledge. Instruction takes place mostly in Japanese from the second half of the first quarter.

Students may use Japanese courses for the following majors and minors: a major in applied linguistics and multilingualism, a major in language studies, a major in linguistics, an East Asian minor, a major in global economics, or a major in literature.

See the department's Japanese website for more information about the Japanese program.

Study Abroad

The Division of Global Engagement has information on study in Japan. There are study abroad—programs at many universities, including Doshisha, Hitotsubashi, ICU, Keio, Meiji Gakuin, Osaka, Tsuru, and Waseda. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, contact the appropriate department.

PERSIAN

Students interested in acquiring proficiency in Persian (Farsi) can enroll in beginning language courses (PERS 1–PERS 3), courses available to both heritage and non-heritage speakers. The curriculum aims to build a solid foundation in speaking, listening, reading, and writing, as well as imparting an understanding of Persian culture. Other courses at UC Santa Cruz that may be of interest to students of Arabic are detailed here.

PORTUGUESE

Students interested in acquiring proficiency in Portuguese may enroll in the first-year Portuguese sequence: PORT 1, PORT 2, and PORT 3. A second-year accelerated Portuguese sequence (PORT 65A–PORT 65B) follows the first-year sequence and is offered over two quarters. The completion of this sequence fulfills the two-year language requirement for study abroad programs. The program is aimed at enabling students to gain proficiency in listening comprehension, speaking, reading, and writing. Instruction takes place in Portuguese from the beginning and draws heavily on Brazilian culture through popular music and cinema.

Study Abroad

Students may apply to spend time either in Rio de Janeiro, Brazil or in Salvador (Bahia) through the Division of Global Engagement. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, contact the appropriate department.

PUNJABI

Students interested in acquiring proficiency in Punjabi can enroll in PUNJ 1, PUNJ 2, and PUNJ 3. These courses are aimed for both heritage and non-heritage learners and are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Punjabi language. This program is part of Sikh and Punjabi studies at UCSC. Punjabi language courses are offered every other academic year.

RUSSIAN

The Department of Languages and Applied Linguistics offers beginning level courses in Russian that provide a comprehensive introduction to the language and develop communicative skills (speaking, listening, reading, and writing) within the framework of contemporary Russian culture. RUSS 1 is offered fall quarter; RUSS 2, winter quarter; and RUSS 3, spring quarter.

SPANISH AND SPANISH FOR HERITAGE SPEAKERS

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for heritage speakers (SPHS) courses, from beginning to advanced levels. The language and culture sequence of lower-division courses (SPAN 1–SPAN 6) as well as SPHS 4–SPHS 6) and upper-division series (SPAN 114,
SPAN 6 or SPHS 6 by the end of the sophomore year to qualify for a junior year abroad. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information, see the Division of Global Engagement website. For information on credit applied to a particular major, contact the appropriate department.

**YIDDISH**

Students interested in acquiring proficiency in Yiddish can enroll in beginning language courses. In addition, some credit from these courses may be counted toward the major or minor in Jewish studies; consult with the Jewish studies program. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Yiddish language.

**APPLIED LINGUISTICS AND MULTILINGUALISM B.A.**

**Information and Policies**

**Introduction**

Applied linguistics is an interdisciplinary field that seeks to understand how languages are learned (first and second language acquisition), how more than one language is represented and accessed in the mind of the individual (bilingualism), the ways in which language and society intersect (sociolinguistics), how people from different cultural and linguistic backgrounds interact (intercultural communication), and methods and principles of language teaching (pedagogy).

The major in Applied Linguistics and Multilingualism is designed for students who wish to pursue the study of a particular language (e.g., Chinese, French, German, Italian, Japanese, or Spanish), and at the same time, gain an in-depth understanding of language use in bilingual and multilingual settings. Coursework for the major presupposes some familiarity with theoretical linguistics, and thus majors are required to take three foundational courses offered in the Linguistics Department (LING 50; LING 101; LING 111 or LING 112) in addition to APLX 80, the introductory course to applied linguistics. Since applied linguistics is integrally connected to other disciplines such as cognitive and developmental psychology, education, anthropology, and sociology, students have the option of taking some elective courses in these areas. Finally, majors are encouraged to pursue the study of more than one language in order to reflect on and enhance their understanding of the process of second language acquisition.

**Academic Advising for the Program**

218 Cowell College
831-459-2054
languages@ucsc.edu
The earlier you declare your major in your academic career the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early, you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in Applied Linguistics and Multilingualism. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: large-group informational session at the beginning of fall quarter, and small-group or individual meetings with a faculty and/or staff advisor throughout the academic year.

Transfer students: Please also consult the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Graduates from the applied linguistics and multilingualism studies bachelor of arts program should:

• Demonstrate proficiency in a second language. Students who successfully complete the applied linguistics and multilingualism major will reach an Intermediate-high level of proficiency in their second language (L2) as described in the scale of the American Council of Teachers of Foreign Languages (ACTFL). This is similar to the B2 level on the Common European Framework of Reference. Speakers who complete additional course work through study abroad (an aspect of the major that is very much encouraged) may reach the advanced level in their L2.

• Be able to analyze critically the contexts and processes of (second and other) language acquisition. Students will develop an in-depth understanding of processes of and issues relating to the acquisition of more than one language, bilingualism and multilingualism, including social, psycholinguistic and metalinguistic aspects of these processes.

• Be able to analyze critically the contexts and uses of language in society. Students will gain an in-depth understanding of social aspects of bilingualism and multilingualism, and issues of language in social contexts. Students will also develop an understanding of how different disciplines work together to make sense of human communication in multilingual contexts.

• Demonstrate research skills appropriate for the field of applied linguistics, such as collecting and analyzing data. Students will develop the receptive and productive skills necessary for becoming members of this community of practice. Specifically, they will develop the disciplinary skills to summarize, interpret and critique both quantitative and qualitative research studies in applied linguistics. Through this process, students will develop the ability to engage in independent reading of scientific texts and research articles, to design basic research projects as well as to collect, analyze, and write about applied linguistic data.

• Demonstrate effective written and oral communication appropriate for the discipline of applied linguistics. Students will learn how to review and report on relevant applied linguistic research critically, using discipline-appropriate conventions in written and oral presentations (i.e., expected content, organization, register, and language).

Major Qualification Policy and Declaration Process

Major Qualification

To declare the major, students must have completed Level 4 of a non-English language (e.g., ARBC 4, CHIN 4, FREN 4, ITAL 4, JAPN 4, PORT 65A, SPAN 4, SPHS 4) with a grade of B- or better, or place into Level 5 or higher via placement exam.

If your native language is other than English, please consult with the faculty director to discuss alternative options for meeting this requirement.

Transfer students: Please also consult the Transfer Information and Policy section.

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification (MQ) requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e. in their sixth quarter, for
students admitted as frosh), will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification (MQ) courses.

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty advisor and then with the academic advisor. Please contact languages@ucsc.edu for further information.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements or the Intersegmental General Education Transfer Curriculum (IGETC). In addition, transfer students are strongly advised to complete two years of language study in accredited two and four year institutions. While two years of prior language study is strongly advised, transfer students should be able to complete the applied linguistics and multilingualism major in normative time as long as they place into language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students may declare at any time after completing Level 4 of a non-English language with a grade of B- or better, following the process in "How to Declare a Major." Transfer students who place into Level 5 or higher of their language when they enter UC Santa Cruz can declare the major immediately.

Transfer students should consult an academic advisor at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Letter Grade Policy

A maximum of two courses that are used to satisfy the major requirements may be taken for a Pass/No Pass. Please note that the Level 4 course in the student's chosen language and APLX 190 must be taken for a letter grade.

Course Substitution Policy

Double Majors and Major/Minor Combinations

Policy

Study Abroad

The Division of Global Engagement sponsors programs of study. Students who wish to major in applied linguistics and multilingualism are strongly encouraged to study abroad. For a list of current programs and requirements, visit Global Engagement.

Students who participate in study abroad may petition to apply up to three courses (up to 15 upper-division credits) toward the major.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to students with a GPA of 3.75 or higher in relevant coursework. Only those students whose performance in coursework is excellent will qualify. Highest honors are awarded only to students whose performance in relevant coursework is outstanding (GPA of 3.90 and above) and who have completed an outstanding original research paper.

Requirements and Planners

Course Requirements

There are a total of 65 credits (50 upper-division and 15 lower-division) required for the applied linguistics and multilingualism major. See below for a breakdown of the credit requirements.

These courses have Level 1 to Level 5 language prerequisites that have to be completed or placed out of.
Upper-Division Courses

Foundation Courses

Take the following course:
APLX 101 Second-Language Acquisition 5

and one of the following courses:
LING 100 Phonetics I 5
LING 101 Phonology I 5

and one of the following courses:
LING 111 Syntactic Structures 5
LING 112 Syntax I 5

Advanced Language Proficiency Courses

(10 credits total)

Students must take a minimum of two upper-division, 5-credit courses in the student’s target language (Arabic, Chinese, French, German, Italian, Japanese, Portuguese, or Spanish). The complete Advanced Language Proficiency course list is posted on the department’s web page. Courses used to fulfill the advanced language proficiency requirement cannot be counted toward the APLX electives. Students may petition to have other 5-credit, upper-division courses offered in the student’s target language count toward the advanced language proficiency requirement.

Although languages and applied linguistics does not currently offer upper-division coursework in Arabic or Portuguese, students who have completed the two-year sequence in this language (or demonstrate equivalent proficiency) have the option to, and are welcome to, complete approved upper-division coursework in Arabic or Portuguese through the Division of Global Engagement in order to satisfy the upper-division language requirement for the major in applied linguistics and multilingualism. The department wants to accommodate students having studied Arabic or Portuguese, and satisfaction of the upper-division courses via study abroad is one option to do so. However, participation in study abroad is not a requirement: If students are unable to participate in study abroad for any reason, they are able to choose to fulfill the upper-division language requirement in the Applied Linguistics and Multilingualism major by studying a language that the Languages and Applied Linguistics Department offers at the upper-division level.

SPANISH STUDIES B.A.

Information and Policies

Introduction

The interdisciplinary major in Spanish studies is designed to offer students advanced linguistic proficiency in Spanish as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

The Spanish studies major at UC Santa Cruz combines the strengths of language and applied linguistics with those of literary and cultural studies. The sequence of courses first exposes students to the academic registers of Spanish, a critical component for both heritage speakers and second language learners. Students then develop academic literacy in the language while gaining familiarity with the methods of analysis in different fields. The configuration of the major affords students flexibility in following their particular interests by choosing one of two tracks: (1) literature and culture or (2) language and linguistics.

These pathways within the major prepare students for a range of career possibilities that involve working with the Spanish-speaking public in a variety of professions (e.g., law, business, public service). Students may also pursue further training in teaching Spanish as a second language at the high school or university level.

Academic Advising for the Program

218 Cowell College
831-459-2054
languages@ucsc.edu

The earlier you declare your major in your academic career, the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early, you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in Spanish studies. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: quarterly large-group informational sessions, and small group or individual meetings with a faculty and/or staff advisor.

Transfer students: Please also consult the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Graduates from the Spanish studies B.A. program should be able to demonstrate:

- **Advanced-level oral proficiency in Spanish.** Students will have the ability to use all the major timeframes (past, present, and future) in their speech and will be able to produce connected discourse of paragraph length. They will be able to satisfy the demands of work and/or school situations in Spanish with both accuracy and fluency.

- **Academic language and literacy skills in Spanish.** Students will be able to read and understand a wide range of authentic texts (e.g., academic articles, journalistic texts) in Spanish, including those with historical, sociological, and literary content. Students will be able to clearly explain their ideas in writing, demonstrating the ability to summarize, interpret, and substantiate an opinion or argument.

- **Metalinguistic awareness.** Students will be able to describe the main features of the Spanish language (e.g., the sound system, the structure of sentences) and will be able to identify the main regional varieties of Spanish. Students will be able to articulate some of the main differences between English and Spanish using precise terminology.

- **Critical analysis.** Students will be able to comment with critical insight on a range of topics and cultural productions (e.g., literary texts, film, music) of the U.S., Latin America, and Spain. They will be able to read closely in order to evaluate historical ideas, arguments, and points of view.

- **Cultural and historical competency.** Students will be able to compare and contrast multiple interpretations of the same phenomena in different cultures. Students will be able to recognize and reflect on the social, cultural, economic, and political changes that connect Latin America, Spain, and U.S. and Latina/o communities.

Major Qualification Policy and Declaration
Process

Major Qualification

To declare the major in Spanish studies, students must have completed SPAN 4 or SPHS 4 at UC Santa Cruz with a grade of C or better or demonstration of proficiency at this level, or place into Level 5 or higher via placement exam.

Transfer students: Please also consult the Transfer Information and Policy section.

<table>

<tbody>
<tr>
<td>SPAN 4</td>
<td>Second-Year Spanish</td>
<td>5</td>
</tr>
<tr>
<td>SPHS 4</td>
<td>Spanish for Heritage Speakers</td>
<td>5</td>
</tr>
</tbody>
</table>

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petition when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty advisor and then with the academic advisor. Please contact languages@ucsc.edu for further information.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements or the Intersegmental General Education Transfer Curriculum (IGETC). In addition, transfer students are strongly encouraged to complete two years of Spanish language study at an accredited two- or four-year institution. While two years of prior Spanish language study is strongly advised, transfer students should be able to complete the Spanish studies major in normative time as long as they place into Spanish language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students may declare at any time after completing SPAN 4 or SPHS 4 with a grade of C or better, following the process in "How to Declare a Major." Transfer students who place into Spanish Level 5 or higher when they enter UC Santa Cruz can declare the major immediately.

Transfer students should consult an academic advisor at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Letter Grade Policy

Courses used to satisfy major requirements may be taken for a Pass/No Pass or letter grade, with the exception that the Level 4 Spanish course and senior comprehensive course must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Spanish studies encourages students to take advantage of the Division of Global Engagement. Some programs do not require prior language study while others have language prerequisites. Many of these programs provide students with the language skills needed to participate in regular university courses taught in the language of the host country. Study abroad opportunities in Spanish include Argentina, Chile, Mexico, Spain, and Costa Rica.

Students who participate in study abroad may petition to apply up to three courses (up to 15 upper-division credits) from study abroad toward the major.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to students with a GPA of 3.75 or higher in relevant coursework. Only those students whose performance in coursework is excellent will qualify. Highest honors are awarded only to students whose performance in relevant coursework is outstanding (GPA of 3.90 and above) and who have completed an outstanding original research paper.
There are a total of 45 upper-division credits required for the Spanish studies major. See Program Major Requirements below for a breakdown of the credit requirements.

**Lower-Division Courses**

**Comprehensive Requirement**

In their senior year, Spanish studies majors must satisfy the senior comprehensive requirement as described below:

Successful completion of a capstone course (a designated upper-division course taught in Spanish, 5 credits total) in the student's chosen concentration: language and linguistics, or literature and culture.

Students must have senior standing and have completed at least three out of four core courses. The comprehensive course requirement is in addition to the three upper-division concentration courses; the same course cannot be used for both.

**Languages and Linguistics Capstone Courses**

- SPAN 151 Topics in Hispanic Linguistics: Varieties of Spanish 5
- SPAN 152 Topics in Hispanic Linguistics: Spanish in the U.S. 5
- SPAN 153 Topics in Hispanic Linguistics: Spanish as a Second Language 5
- SPAN 154 Topics in Hispanic Linguistics: Spanish Pragmatics 5

LIT 189Q Ficción y marginalidad 5
LIT 189R La Novela de la Dictadura 5
REQUIRED COURSES

There are six required courses for this certificate (prerequisites in parentheses):

1. LING 50: Introduction to Linguistics (already approved requirement for the APLX major)
2. APLX 101: Second Language Acquisition (APLX 80 or LING 50)
3. APLX 113: Intercultural Communication (junior or senior standing)
4. APLX 135: Second Language Teaching (junior or senior standing)
5. APLX 136: Second Language Assessment (APLX 135)
6. APLX 138: English Grammar for TESOL (APLX 80 or LING 50)

Linguistics

239 and 241 Stevenson College
(831) 459-4765 (graduate)
(831) 459-4988 (undergraduate)
https://linguistics.ucsc.edu

PROGRAMS OFFERED

Linguistics B.A. (p. 185)
Linguistics Minor (p. 191)
Language Studies B.A. (p. 191)
Language Studies Minor (p. 197)
Contiguous Bachelor's/Master's Pathway (p. 197)
Linguistics M.A. (p. 198)
Linguistics Ph.D. (p. 199)

OTHER PROGRAMS OF INTEREST

Applied Linguistics and Multilingualism B.A. (p. 173)
Cognitive Science B.S. (p. 702)
Computer Science B.S. (p. 479)
Computer Science B.A. (p. 484)
Natural Language Processing M.S. (p. 502)

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is
the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which language is put to use in producing and perceiving speech.

The faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include computational and corpus linguistics, sociolinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, linguistics and language studies, and a graduate program in theoretical linguistics. The linguistics major leads to a bachelor of arts (B.A.) degree in linguistics; the language studies major leads to a B.A. degree in language studies (see Language Studies). The graduate program leads to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degrees in linguistics.

The department also offers a combined B.A./M.A. pathway which makes it possible for certain well-qualified, highly motivated students to complete the requirements for both degrees in five years rather than the usual six.

**COURSES FOR NON-MAJORS**

LING 50, Introduction to Linguistics, an introduction to the major areas, problems, and techniques of modern linguistics. (Gen Ed: SI)

LING 53, Semantics 1, introduction to the logical foundations of natural language semantics. A basic literacy course in the language of logical representation. (Gen Ed: MF)

LING 80C, Language, Society and Culture, the study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects. (Gen Ed: CC)

LING 80D, Language and Mind, a critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain. (Gen Ed: PE-H)

LING 80K, Invented Languages, explores invented languages, including Elvish and Klingon, as well as lesser-known ones that tackle ethical, social, or cognitive concerns. (Gen Ed: TA)

LING 80M, Language and Indigeneity in Mesoamerica, explores indigenous experiences in Mesoamerica, focusing on the role of language in the formation of indigenous identities, both historically and in contemporary society. (Gen Ed: ER)

LING 80S, The Science of Language, an introduction to linguistics for non-majors. (Gen Ed: SI)

LING 80V, Structure of the English Vocabulary, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language.

LING 131, Spanglish, an investigation of Spanglish as a linguistic and cultural phenomenon.

LING 133, Language OnLine (LOL): Communication in the digital era, an investigation of the language of memes and social media.

**LINGUISTICS B.A.**

**Information and Policies**

**Introduction**

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which language is put to use in producing and perceiving speech.

**Academic Advising for the Program**

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

**Undergraduate Advisor**

The undergraduate advisor can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available and posted on the department website.
If none of the drop-in office hours work for you, email the undergraduate advisor at ling@ucsc.edu for an appointment.

Transfer students, please also refer to Transfer Information and Policy.

Peer Advisors

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisors are advanced students in the major who volunteer their time and expertise to provide guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the Linguistics Department office at Stevenson College (STEV 245). Peer advisors do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate advisor for any forms requiring a department signature. We encourage any prospective and current linguistics majors to stop by during the peer advisors' office hours if they have questions about the linguistics program.

Faculty

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate advisor first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the Undergraduate Program director.

Getting Started in the Major

Here are four tips to keep in mind when embarking on your major in linguistics:

- Meet with a peer advisor to create your academic plan and get questions answered about your major.

- Determine how many language courses you need in order to fulfill your language competency requirement, as specified in the Requirements and Planners section. Begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department website to find out about language placement, articulation and course offerings. Many language placement exams take place just before classes start in September. You may opt to satisfy the mathematics/computer science requirement instead.

- Take at least one introductory linguistics course in your first year, and plan to take at least syntax and phonology in your second year. (Junior transfers: take all of these courses in your first year.) If linguistics is not for you, you should find this out early, in order to consider a change in your plans.

- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career, when you would like to take more advanced courses.

Program Learning Outcomes

The program learning outcomes for the linguistics major are the following:

1. Analytical Thinking
   Students will formulate testable hypotheses, and present them clearly and completely. Students will accurately and insightfully use relevant evidence to evaluate hypotheses and determine routes for future investigation.

2. Writing
   Students will formulate well-organized written arguments. At the micro-level, sentences will be grammatical, follow appropriate conventions, and strike an appropriate balance of clarity and complexity. At the macro-level, sentences will be linked together into paragraphs, and paragraphs into logical sections of a larger document.

3. Properties of Language
   Students will apply analytical techniques to identify general properties of language, including but not limited to sound structure, word structure, sentence structure, meaning, use, and language processing. Students will explain the significance of relevant universal properties in some domain.

4. Linguistic Theory and Investigation
   Students will demonstrate an active command of linguistic theory and linguistic investigation in at least one area of linguistic theory, including but not limited to morphology, phonetics, phonology, pragmatics, psycholinguistics, syntax, and semantics.

5. Second Language Proficiency or Mathematics Competency
   Linguistics majors will demonstrate either competence in the mathematical foundations of theories used in linguistics or proficiency in a second language at or above the intermediate-high level.

Major Qualification Policy and Declaration Process

Major Qualification

The Linguistics Department has adopted a major qualification policy for linguistics majors that is intended to encourage students to take their performance in the
gateway courses seriously and to help them lay a solid foundation for further course work in the major.

Transfer students, please also refer to Transfer Information and Policy.

In order to declare the linguistics major, a student must pass two gateway courses, with a grade of C+ or better in each:

- **LING 50** Introduction to Linguistics 5
- **LING 53** Semantics I 5
- **LING 101** Phonology I 5
- **LING 112** Syntax I 5
- **LING 171** Psycholinguistics I 5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was mailed. They should do this by submitting a formal letter, addressed to the department’s undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student of the decision.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for linguistics before you graduate.

Once you have successfully completed the two gateway courses, please meet with the department advisor or a peer advisor, to complete or update your academic plan. If you are declaring a second major, please first complete an Academic Planning Form with the advisor for your declared major.

To declare the major, you must attend one of the department’s Declaration and Orientation Meetings. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department advisor for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language placement test when they enter UC Santa Cruz may not be able to complete the major in a timely manner. Bear in mind that placement exams, and the resulting credit for the major, are only available for languages taught at UC Santa Cruz.

Prospective students are also encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started at UC Santa Cruz as a Transfer Student

Consult with the undergraduate advisor before enrolling for your first term, to create a two-year plan. Some required courses are only offered once a year, and careful planning is essential. Plan to take LING 50 and LING 53 in your first quarter, along with a language course. If you expect to test out of level 5 in your chosen language, or plan to complete the Mathematics/Computer Science competency requirement, you need not enroll in a language course. Transfer students can declare the major in their second quarter, after completing two gateway courses with a C+ or better.

Letter Grade Policy

The two qualifying courses for the major must be completed with a grade of C+ or better. Once you qualify, there is no requirement that courses for the major be taken for a letter grade. There is a campuswide requirement that you need to be aware of and to keep track of (no more than 25 percent of all of your UC Santa Cruz courses can be taken on a Pass/No Pass basis). Further information about campus letter grade policy is available at the website of the Office of the Registrar.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. At most three such courses can be applied toward the major. These courses must be upper-division and clearly fit into a coherent program of study in linguistics. The list of approved courses from other UC Santa Cruz departments is given below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 139</td>
<td>Language and Culture</td>
<td>5</td>
</tr>
<tr>
<td>APLX 101</td>
<td>Second-Language Acquisition</td>
<td>5</td>
</tr>
</tbody>
</table>
Overlap between the two programs. Linguistics and language studies, as there is too much for students with advanced language skills. Programs for students with advanced language skills. For students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion language abroad, for a summer, quarter, semester, or year. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills. Study abroad does require careful planning, especially for those who wish to pursue a year-long program, or who wish to study abroad during the senior year. Meeting with your major advisor early and often throughout the Study Abroad planning process is encouraged. Before being approved for UC Education Abroad Program (EAP), you must declare your major. Also, majors must complete LING 101, and either LING 111 or LING 112, before they leave for any EAP programs that take place during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year, and do not plan to return to UC Santa Cruz before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed abroad. Please consult with the department advisor before the end of your sophomore year if you are considering this option.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. A maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Global Learning Office (105 Classroom Unit, 459-2858). Global Learning staff can provide detailed information concerning EAP selection criteria and application procedures. The first step in preparing to study abroad is to set up a profile on the Global Learning website.

**Honors**

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. It is important to minimize the number of major courses you take on a Pass/No Pass basis. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

**Preparation for the UC Santa Cruz Master’s Degree**

Every year, UC Santa Cruz undergraduates in the final year of their linguistics major can apply to be admitted into the graduate program to pursue the M.A. in

Double Majors and Major/Minor Combinations Policy

A student may not double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

Students majoring in linguistics should consider studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. Linguistics students have various opportunities to study abroad, for a summer, quarter, semester, or year. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.
theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department’s website; and see the graduate coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites. Although most of them will fulfill a general education requirement, they do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics 1; LING 100, Phonetics 1; LING 101, Phonology 1; LING 112, Syntax 1; and LING 171, Psycholinguistics 1, serve as entry courses to the specialized upper-division sequences. Upper-division courses often have at least two of these courses as a prerequisite.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

Requirements and Planners

Course Requirements

Lower-Division Courses

LING 50 Introduction to Linguistics 5
LING 53 Semantics I 5

Foreign-Language/Mathematics Competency Requirement:

Linguistics majors are required to demonstrate either foreign-language or mathematics competency as follows:

Students must successfully complete five quarters of language study at UC Santa Cruz or demonstrate an equivalent level of competence through a recognized language test or evidence of credit from another institution. In cases where five quarters of instruction for a language are not offered at UC Santa Cruz, students may opt to complete (or demonstrate equivalent level of competence for) three quarters of one language and three quarters of a second language. For Latin or Greek, three of the designated courses will be equivalent to all five levels.

Alternatively, students with a strong formal background can choose to satisfy the mathematics/computer science competency requirement by demonstrating sufficient preparation in mathematics for advanced formal work in linguistics. This requirement is satisfied by passing two courses chosen from the following list:

CSE 5J Introduction to Programming in Java 5
CSE 10 Introduction to Computer Science 5
CSE 16 Applied Discrete Mathematics 5
CSE 20 Beginning Programming in Python 5
CSE 140 Artificial Intelligence 5
MATH 100 Introduction to Proof and Problem Solving 5
MATH 160 Mathematical Logic I 5
MATH 161 Mathematical Logic II 5
PHIL 9 Introduction to Logic 5
STAT 5 Statistics 5
STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
STAT 131 Introduction to Probability Theory 5

Any course which has one of the courses listed above as a prerequisite may also be used toward the mathematics/computer science competency requirement.

Upper-Division Courses

Students in the linguistics major are required to complete a total of 10 upper-division courses in linguistics and related disciplines, including seven named courses in linguistics:

LING 100 Phonetics I 5
LING 101 Phonology I 5
LING 171 Psycholinguistics I 5

Plus one of the following courses:

LING 111 Syntactic Structures 5
LING 112 Syntax I 5

And three of the following courses:

LING 102 Phonology II 5
LING 113 Syntax II 5
LING 116 Semantics II 5
LING 151 Phonetics II 5
LING 172 Psycholinguistics II 5

Electives

The major requires three upper-division elective courses in linguistics. Upper-division linguistics electives include any upper-division course offered by the Linguistics Department (except courses LING 100, LING 101, LING 111, LING 112, and LING 171). See Course Substitution Policy in the Information and Policies section of the catalog for information on substituting courses outside the department to meet this requirement.
Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in linguistics is satisfied by completing:

LING 101 Phonology I 5

Plus one of the following courses:

LING 111 Syntactic Structures 5
LING 112 Syntax I 5

Comprehensive Requirement

Senior exit requirement: In their senior year, linguistics majors must satisfy the senior exit requirement in one of three ways:

Option 1

Capstone course: Students complete a 2-credit senior research course, LING 190. Each instance of LING 190 is taught concurrently with one of the upper-division electives offered in that quarter. Students must enroll in both an instance of LING 190 (the senior research course) and its associated upper-division elective (the capstone course). This capstone course can also serve as one of the three linguistics electives required for the major.

Students must enroll concurrently in an upper-division elective and in the corresponding instance of the following course:

LING 190 Senior Research 2

Option 2

Senior thesis supervised by a faculty member. The proposal for a senior thesis must be submitted for approval by the department faculty at least three quarters prior to the quarter of graduation.

Students enroll in the following course:

LING 195 Senior Thesis 5

Option 3

By exception, students in their senior year may enroll in a graduate-level class, by permission of instructor. This option is for students who have performed exceptionally in the available undergraduate courses in a particular sub-discipline of the field. Under these conditions, a graduate-level course may satisfy the senior exit requirement.

Planners

Four-Year Linguistics Students

The following planner is a recommended academic plan for four-year students who wish to pursue the linguistics major.

*This is a 2-credit course.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements. The courses in the four-year planner cover at least the following GE requirements: C, MF, SI, SR.
LANGUAGE STUDIES B.A.

Information and Policies

Introduction

Language studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with advanced competence in a foreign language and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. The major also provides an opportunity to explore the culture or cultures connected with the language of concentration. The cultural context electives may include courses in art, history, literature or politics. Currently, majors may choose a concentration in Chinese, French, German, Italian, Japanese, or Spanish. Interested students should contact the Linguistics Department office early in their college careers to obtain essential information about requirements. The requirements for the major may also be found in the Requirements and Planners tab.

Students interested in spending a portion of a year or a full year studying abroad should review the UCSC Study Abroad website. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the undergraduate program director or a designated advisor. A maximum of three outside courses may be used toward the major.

Academic Advising for the Program

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

Undergraduate Advisor

The undergraduate advisor can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available and posted on the department website.

If none of the drop-in office hours work for you, email the undergraduate advisor at ling@ucsc.edu for an appointment.

Transfer students, please also refer to Transfer Information and Policy.

Peer Advisors

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisors are advanced students in linguistics or language studies who volunteer their time and expertise to provide guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the Linguistics Department office at Stevenson College (245 Stevenson).
Peer advisors do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate advisor for any forms requiring a department signature. We encourage any prospective and current language studies majors to stop by during the peer advisors' office hours if they have questions about the program.

**Faculty**

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate advisor first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the Undergraduate Program director.

**Getting Started in the Major**

Here are a few tips to keep in mind when embarking on your major in language studies:

- Meet with a peer advisor to create your academic plan and get questions answered about your major.
- Determine how many language courses you need and begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department to find out about language placement, articulation and course offerings. Many language placement exams take place just before classes start in September.
- Prospective students should declare the major as early as possible so that they can complete the language, linguistics, and context requirements within the allowed period of enrollment. Major requirements are specified in the Requirements and Planners section of this statement.
- Students who wish to include a study abroad experience in their course of study will have to coordinate their choice of time abroad with the scheduling of UC Santa Cruz courses. Transfer students who have not made significant progress with the language requirements before entering UC Santa Cruz may find it difficult to include a time abroad before completion of graduation requirements.
- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career, when you would like to take more advanced courses.

**Program Learning Outcomes**

The program learning outcomes for this major are the following:

1. **Analytical Thinking**
   Students will formulate testable hypotheses, and present them clearly and completely. Students will accurately and insightfully use relevant evidence to evaluate hypotheses and determine routes for future investigation.

2. **Writing**
   Students will formulate well-organized written arguments. At the micro-level, sentences will be grammatical, follow appropriate conventions, and strike an appropriate balance of clarity and complexity. At the macro-level, sentences will be linked together into paragraphs, and paragraphs into logical sections of a larger document.

3. **Properties of Language**
   Students will apply analytical techniques to identify general properties of language, including but not limited to sound structure, word structure, sentence structure, meaning, use, and language processing. Students will explain the significance of relevant universal properties in some domain.

4. **Linguistics Theory and Investigation**
   Students will demonstrate an active command of linguistic theory and linguistic investigation in at least one area of linguistic theory, including but not limited to morphology, phonetics, phonology, pragmatics, psycholinguistics, syntax, and semantics.

5. **Second Language Proficiency**
   Students will demonstrate proficiency in a second language at an advanced level.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

The Linguistics Department has adopted a major qualification policy for language studies majors that is intended to encourage students to take their performance in the gateway courses seriously and to help them lay a solid foundation for further coursework in the major.

Transfer students, please also refer to Transfer Information and Policy.

**In order to declare the language studies major, a student must pass two gateway courses with a grade of C+ or better in each:**

- **LING 50 Introduction to Linguistics**
- **LING 53 Semantics I**
- **LING 101 Phonology I**

And one of the following courses:

- **LING 53 Semantics I**
- **LING 101 Phonology I**

5
Meetings tend to fill quickly. Assistance. Please sign up well in advance, as these

The campus undergraduate advising website has further

who do not place into Level 2 or higher in a language

students admitted to UC Santa Cruz for the winter term

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing. Students pursuing the concentration in Japanese or Chinese should place into Level 4 (Level 5 for students entering in the winter term) or higher when they enter UC Santa Cruz, if they wish to complete the major in two years. Students in other languages may be able to complete the major in two years if they have completed general education requirements. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was mailed. They should do this by submitting a formal letter, addressed to the department's undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student of the decision.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for language studies before you graduate.

Once you have successfully completed the two gateway courses, please meet with the department advisor or a peer advisor, to complete or update your academic plan. If you are declaring a second major, please first complete an Academic Planning Form with the advisor for your declared major.

To declare the major, you must attend one of the department’s Declaration and Orientation Meetings. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department advisor for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Students majoring in language studies often spend at least one quarter studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.

Study abroad does require careful planning, especially for those who wish to pursue a yearlong program, or who wish to study abroad during the senior year. Meeting with your major advisor early and often throughout the Study Abroad planning process will help to mitigate lengthening time to degree. Before being approved for the UC Education Abroad Program (EAP), you must declare your major. Also, majors must complete LING 101, and either LING 111 or LING 112, before they leave for any EAP programs during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year, and do not plan to return to UC Santa Cruz before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed abroad. Please consult with the department advisor before the end of your sophomore year if you are considering this option.

Language studies majors can satisfy certain major requirements in the course of study abroad; for instance, some of the context elective course requirements. No more than three elective course requirements can be satisfied abroad. Students can also make progress in the language component of the language studies major while studying abroad. In order to determine the level of proficiency achieved, they must take a placement exam upon return. Whether a given course requirement in linguistics can be satisfied abroad depends on the course and the study site.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. Remember that a maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Global Learning Office (105 Classroom Unit, 459-2858). Global Learning staff can provide detailed information concerning EAP selection criteria and application procedures. The first step in preparing to study abroad is to set up a profile on the Global Learning website.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. It is important to minimize the number of major courses you take on a Pass/No Pass basis. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Double Majors and Major/Minor Combinations Policy

A student may not double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

A student may not double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

A student may not double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.
Preparation for the UC Santa Cruz Master’s Degree

Every year, UC Santa Cruz undergraduates in the final year of their language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department’s website; and see the graduate coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites. Although most will fulfill a general education requirement, they do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics 1; LING 100, Phonetics 1; LING 101, Phonology 1; LING 112, Syntax 1; and LING 171, Psycholinguistics 1, serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least two of these courses as prerequisites.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

Course Requirements

Language studies majors must satisfy course requirements in languages and linguistics, and complete elective coursework in linguistics and/or the cultural context of the language of concentration.

Lower-Division

Lower-Division Language Requirements

Language studies majors must achieve a level equivalent to six quarters in the language of concentration.

Lower-Division Linguistics Requirements

<table>

<td>5</td>
</tr>
</tbody>
</table>

Upper-Division

Upper-Division Language Requirements

One advanced language course after level 6 is required for students concentrating in French, German, Italian, or Spanish. Majors in Chinese and Japanese must take two advanced language courses after level 6, the second of which (and any subsequent) counts toward the cultural context course requirement.

Upper-Division Linguistics Requirements

</thead>
<tbody>
<tr>
<td>LING 111</td>
<td>5</td>
</tr>
<tr>
<td>LING 112</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one additional upper-division linguistics elective:

This upper-division linguistics elective may serve as the capstone course for students completing Option 1 (Capstone Course) for the major's senior exit requirement. Capstone electives for the language studies major will be offered every quarter during the academic year, in conjunction with LING 190, Senior Research. Please see the Comprehensive Requirement section below.

Electives

The major also requires five upper-division elective courses in linguistics or the cultural context of the language of concentration. Linguistics elective courses include any upper-division course offered by the Linguistics Department (except LING 100, LING 101, LING 111, and LING 112). Cultural context courses are to be selected from among those approved by the department, and include disciplines such as literature, history, and politics. A list of approved cultural context courses (p. 200) is available, and a list of those available within the current or upcoming quarters is also available on the Linguistics Department’s Language Studies Major Requirements webpage. Further upper-division courses conducted in the language of concentration may also be used as electives.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in language studies is satisfied by completing:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 101</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following courses:

<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 111</td>
<td>5</td>
</tr>
<tr>
<td>LING 112</td>
<td>5</td>
</tr>
</tbody>
</table>
Comprehensive Requirement

Senior exit requirement. In their senior year, language studies majors must satisfy the senior exit requirement in one of three ways:

Option 1

Capstone course: Students complete a 2-credit senior research course, LING 190. Each instance of LING 190 is taught concurrently with one of the upper-division linguistics electives offered in that quarter. Students must enroll in both an instance of LING 190 and its associated upper-division elective. This elective can also serve as the one linguistics elective required for the major.

Students must enroll concurrently in an upper-division elective and in the corresponding instance of the following course:
- LING 190 Senior Research

Option 2

Senior thesis supervised by a faculty member. The proposal for a senior thesis must be submitted for the approval of the department faculty at least three quarters prior to the quarter of graduation. The senior thesis is an original investigation of the major language in some relevant way, such as the linguistic structure or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context.

Students may enroll in the following course:
- LING 195 Senior Thesis

Option 3

By exception, students in their senior year may enroll in a graduate-level linguistics class, by permission of an instructor. This option is for students who have performed exceptionally in the available undergraduate courses in a particular sub-discipline of the field. Under these conditions, a graduate-level course may satisfy the senior exit requirement.

Planners

Four-Year Students

LANGUAGE STUDIES MINOR

Course Requirements

Lower-Division Courses

The minor requires completion of six quarters of language study, or demonstration of an equivalent level of ability, and the following:

LING 50 Introduction to Linguistics 5

Upper-Division Courses

The upper-division requirements for the minor are comprised of two required linguistics courses, one advanced language course, and two electives, as follows:

Two linguistics courses:
LING 100 Phonetics I 5

Plus one of the following courses:
LING 111 Syntactic Structures 5
LING 112 Syntax I 5

One advanced language course after level 6.

Two upper-division electives in linguistics or in the cultural context of the language of concentration.

Linguistics elective courses include any upper-division course offered by the Linguistics Department (except LING 100, LING 111, and LING 112). Cultural context courses are to be selected from among those approved by the department, and include disciplines such as literature, history, and politics, subject to departmental approval. These cultural context courses are related to the language of concentration.

A master list of approved cultural context courses (p. 200) and a list of those available within the current or upcoming quarter are available via these links, as well as links on the Linguistics Department’s Language Studies Major Requirements webpage.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the minor requirements. At most two such courses can be applied toward the minor. These courses must be upper-division and clearly fit into a coherent program of study. Because language studies minors routinely take classes from other UCSC departments to fulfill their cultural context requirements, these are not considered course substitutions. However, students may substitute an outside class for an upper-division linguistics elective. A list of approved outside courses being offered in the current or upcoming term may be found on the department website.

LINGUISTICS CONTIGUOUS BACHELORS/MASTERS PATHWAY

The B.A./M.A. pathway in linguistics is a demanding, selective option that allows students who are well prepared and well motivated to complete the requirements for both degrees in five years rather than the usual six.

Admission to the pathway has two stages. In the first stage, interested students first consult with the undergraduate program director and one or more faculty members, and then apply to be admitted to the pathway by the sixth week of the first quarter of their junior year. Transfer students should consult with the undergraduate program director if they are contemplating this pathway. In order to be accepted at this first stage, students must
have demonstrated excellence in at least three courses that are named requirements for the linguistics major.

Students accepted at this initial stage are assigned a faculty mentor who monitors their progress closely.

At the second stage of the admission procedure, students apply in their senior year to be admitted to the M.A. program through UCSC’s normal graduate admissions process. If accepted, ideally they complete all course requirements and complete and defend the M.A. thesis by the end of the fifth year.

Students in the B.A./M.A. pathway take a number of graduate courses in their senior year which are selected in close consultation with the faculty mentor. Performance in these courses forms a central part of the ongoing evaluation process. If a student’s performance does not meet the standards set for the pathway, the student completes the B.A. at the end of the senior year and does not proceed to the M.A.

Graduate courses required for the M.A. are taken partly in the senior year and partly in the fifth year. The M.A. thesis is written in the fifth year. Thus, by the end of the fifth year, students in the pathway will have fulfilled the requirements for both the B.A. and the M.A. degrees. Students who need additional time may remain in the pathway until the M.A. thesis is completed and defended. Students admitted into the B.A./M.A. pathway must complete a minimum of 35 credits as an M.A. student, regardless of the number of graduate courses completed as an undergraduate.

**LINGUISTICS M.A.**

**Introduction**

For information on applying and admissions, please consult the Linguistics Department website.

The M.A. degree involves a two-year course of study. It may be completed in one year by students who have a B.A. in linguistics from UC Santa Cruz and who have taken a number of the core graduate courses during their undergraduate career; the combined B.A./M.A. program provides another pathway to the M.A. program.

Every year, UC Santa Cruz undergraduates in the final year of their linguistics or language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year.

For up-to-date information about the application process, consult the Linguistics Department’s website; and see the graduate coordinator.

**Requirements**

**Course Requirements**

The following courses must be taken by all students.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 211</td>
<td>Phonology A</td>
<td>5</td>
</tr>
<tr>
<td>LING 221</td>
<td>Syntax A</td>
<td>5</td>
</tr>
<tr>
<td>LING 231</td>
<td>Semantics A</td>
<td>5</td>
</tr>
</tbody>
</table>

All students are required to take two additional core courses drawn from the following list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 212</td>
<td>Phonology B</td>
<td>5</td>
</tr>
<tr>
<td>LING 222</td>
<td>Syntax B</td>
<td>5</td>
</tr>
<tr>
<td>LING 232</td>
<td>Semantics B</td>
<td>5</td>
</tr>
</tbody>
</table>

Students must take the third core course from the above list of ‘B’ courses, or one course from the following list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 214</td>
<td>Phonetics</td>
<td>5</td>
</tr>
<tr>
<td>LING 257</td>
<td>Psycholinguistics and Linguistic Theory</td>
<td>5</td>
</tr>
<tr>
<td>LING 280</td>
<td>Proseminar in Experimental Linguistics</td>
<td>5</td>
</tr>
<tr>
<td>LING 282</td>
<td>Field Methods</td>
<td>5</td>
</tr>
</tbody>
</table>

**Electives**

Additionally students must take **three electives** that form a coherent plan of study, as determined by the student’s advisor in consultation with the student. These electives are typically drawn from graduate courses offered by Linguistics and other related disciplines and independent study courses with Linguistics faculty.

**Other Requirements**

**Foreign Language Requirements**

Reading competence in one foreign language, to be demonstrated by examination at the end of your first year.

**Course Credit Requirement**

The nine required courses must be taken as 5-credit courses. For any of the courses above, satisfactory completion (grade of P or A- or higher) prior to entry to the M.A. program will count toward course requirements for the M.A. degree. Pursuant to UC Santa Cruz Graduate Division policy, students must complete a minimum of 35 credits within the Linguistics Department graduate curriculum as an M.A. student.

**Master’s Thesis**

Students in the master’s program complete a master’s thesis in linguistics. This thesis often grows out of a promising term paper written by the student, and is read by a committee composed of three faculty members in linguistics. Preparation for research projects should begin far in advance. In general, a good goal for those working on their M.A. thesis is to approach a possible thesis chair by the end of their first academic year.

**Applying for Graduation**

See the Graduate Student Handbook for administrative requirements.
See the Academic and Administrative Calendar for Announcement of Candidacy dates.

Note: The completed master’s thesis, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the thesis, and cover sheet, should be submitted to the graduate coordinator.

LINGUISTICS PH.D.

Introduction

The graduate program in linguistics at UCSC is a small, focused program in linguistic theory leading to Doctor of Philosophy (Ph.D.) or Master of Arts (M.A.) degrees. The research interests of faculty and students draw mostly on the framework of generative grammar, with a primary focus on theoretical and experimental approaches to morphology, phonetics, phonology, pragmatics, psycholinguistics, semantics, and syntax. Research strengths also include the study of various languages, computational methods, and field methods.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical and experimental understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers principles and parameters theory, minimalism, and experimental syntax. Research in phonetics and phonology is pursued in various current frameworks, including optimality theory and dispersion theory. The issues covered range from phonetics and the phonetics-phonology interface to prosodic theory, prosodic morphology, and the syntax-phonology interface. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation. Experimental research in these areas reaches out to a broad range of issues in psycholinguistics and cognitive science.

The faculty have expertise in a diverse range of languages, including Chamorro, German, Hebrew, Hindi, Hungarian, Irish, Japanese, Kaqchikel Mayan, Uspanteko Mayan, Latin, Northern Paiute, Persian, Polish, Romanian, Russian, Spanish, Turkish, and Zapotec.

From the beginning of their studies, students are engaged in original research and critical evaluation, since the program aims to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation courses in phonetics, phonology, syntax, semantics, and psycholinguistics, addressing both formal and experimental approaches. Subsequent coursework emphasizes depth; it is increasingly centered around the doctoral student’s independent research, culminating in the completion of a dissertation.

For information on applying and admissions, please consult the Linguistics Department website.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student applying for admission to this program should, at a minimum, have a good foundation in at least one of the following: phonetics, phonology, psycholinguistics, morphology, semantics, or syntax. Students entering the program with a deficiency in one or more areas may need to take appropriate undergraduate courses at UCSC during the first year of graduate study.

To apply, please consult the Linguistics Department website.

Advancement to Candidacy

Course Requirements

A minimum of 65 credits of graduate-level work.

All students are required to take the following eight core courses:

- LING 211 Phonology A 5
- LING 212 Phonology B 5
- LING 214 Phonetics 5
- LING 221 Syntax A 5
- LING 222 Syntax B 5
- LING 231 Semantics A 5
- LING 232 Semantics B 5
- LING 257 Psycholinguistics and Linguistic Theory 5

Plus one of the following courses:

- LING 280 Proseminar in Experimental Linguistics 5
- LING 282 Field Methods 5

Each student must also take four seminars.

One of these must be LING 290 (Research Seminar) and the remaining three seminars or proseminars must form a coherent program of study, as determined by the student’s adviser in consultation with the student.

The 13 required courses must be taken as 5-credit courses.

Foreign Language Requirements

Reading competence in one foreign language, to be demonstrated by examination at the end of the first year of study.

Teaching Requirement

Pre-Qualifying Requirements

Two qualifying papers (QP), each in a distinct area, must be separately and orally defended by the end of the third
year as part of the requirements for advancement to candidacy.

Qualifying Examination

After a student successfully defends the two qualifying papers, they proceed to prepare for the qualifying exam (QE) in order to advance to candidacy. The function of the qualifying exam is to determine whether the student has achieved sufficient competence in a chosen subfield to be able to proceed to dissertation research. The QE is based on a substantial research paper written by the student and presented to the committee at least two weeks in advance of the exam. The topic of this paper is decided by the QE chair in consultation with the student. In most cases, it will be a revised version of one of the QPs that the student has successfully defended. Whether or not the paper originated as a QP, it must be in the subfield in which the student plans to pursue dissertation research.

Post-Qualifying Requirements

Dissertation Prospectus

The dissertation prospectus lays out the direction of research that the student plans to pursue in the dissertation. It relates the student’s planned research to previous relevant research and to the larger questions with which the field is engaged. This milestone can be satisfied by the QE paper at the discretion of the faculty adviser.

[Optional Catchall]

Dissertation

The final requirement for the Ph.D. degree is the completion of a dissertation representing a significant contribution in some central area of linguistic research.

Dissertation Defense

Once a student has completed the dissertation, they defend it at a public dissertation defense that is generally attended by graduate students and faculty in linguistics. The candidate first presents the results of the dissertation and then responds to questions, first from committee members, and then, time permitting, from the audience. Afterwards, the committee confers privately and decides either to accept the dissertation, reject it, or accept it provisionally, pending specific revisions. Following the defense, the candidate will revise the dissertation according to the committee’s recommendations and then submit the final copy to the Graduate Division and graduate coordinator. See the Graduate Handbook for administrative requirements.

A copy of the completed dissertation, formatted according to UC Santa Cruz specifications, should be electronically submitted to the Graduate Division office (see Dissertation and Thesis Submission Guidelines) and an original, signed cover sheet should be submitted to the Graduate Division office as well. In addition, a pdf copy of the dissertation and physical copy of the cover sheet should be submitted to the graduate coordinator.

Academic Progress

The Linguistics Department faculty meet at the end of spring quarter each year to ensure that all graduate students are making timely progress in the program. Students may receive letters from the faculty based on this discussion.

To remain in good academic standing, a student must make timely progress toward degree completion and satisfactorily meet the following standards of scholarship established by the Graduate Council. Please see the Graduate Division handbook for details about 'Academic Good Standing' and 'Time to Degree.'

Applying for Graduation

See the Graduate Handbook for administrative requirements.

See the Academic and Administrative Calendar for Announcement of Candidacy dates.

NOTE: The completed dissertation, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the dissertation, and cover sheet, should be submitted to the graduate coordinator.

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, including modern and ancient literatures in the original language and in translation, literary theory, and creative writing. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the department encompass traditional literary history and interpretation, cross-cultural inquiry and current theoretical debates, and new media. The Literature Department also sponsors the Italian studies minor.

**UNDERGRADUATE PROGRAM**

Literature majors learn to read, think, and write critically. These skills have wide applicability, and offer pathways into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and the history of art and visual culture. Literature majors enter a variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels. The literature major prepares students for careers in digital storytelling and electronic media; film, television, and video; theater and the visual arts; and many other fields.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

**GRADUATE PROGRAM**

The graduate program in literature is relatively small, and students work closely with an internationally recognized faculty throughout their graduate careers. Graduate students are able to take advantage of a rich array of intellectual and cultural events, to participate in collaborative research clusters, and to attend lectures by scholars whose work is transforming the discipline. The goal of the program is to develop scholars who will be qualified to teach in departments of national and comparative literatures, cultural studies, ethnic studies, and interdisciplinary programs.

Graduate study in literature includes Ph.D. and free-standing M.A. programs. M.A. students typically take two years to complete the degree and are well prepared to continue in a doctoral program elsewhere. Normative time for the Ph.D. is seven years, and graduates go on to...
teach at institutions of higher learning across the world. Ph.D. students are required to be able to read proficiently in at least two languages that are integral to their intellectual work, one of which may be English. Within these guidelines students create their own programs of study, with dissertations on a range of comparative, translational and interdisciplinary projects. (See list of recent titles.)

COURSES FOR NON-MAJORS

The Literature Department invites students from all disciplines to take courses in the LIT 60/LIT 61 and LIT 80/LIT 81 series.

LITERATURE B.A.

Information and Policies

Introduction

The Literature Department at UC Santa Cruz fosters innovative and comparative approaches to reading and interpretation in courses in a variety of languages that encompass traditional literary history, cross-cultural inquiry, current theoretical debates, and new media.

Literature majors learn to read, think, and write critically. These skills have wide applicability, and offer pathways into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and the history of art and visual culture. Literature majors enter a variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels. The literature major prepares students for careers in digital storytelling and electronic media; film, television, and video; theater and the visual arts; and many other fields.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

Academic Advising for the Program

Faculty advisors are available in the Literature Department office throughout each academic term; students may make appointments in advance to meet with them. Staff advisors are available by appointment and on a drop-in basis. Students are encouraged to consult with an advisor once per quarter.

Transfer students should also consult the section Transfer Information and Policy.

Advisors for the literature program are available at litdept@ucsc.edu, (831) 459-4778, or by visiting the Literature Department office in Humanities 1, room 303.

Getting Started in the Major

All students considering a literature major or minor should consult with staff and/or faculty advisors at the Literature Department office as early as possible, and declare the major or minor before the end of their sophomore year. Transfer students are urged to declare their major or minor during their first quarter at UC Santa Cruz, and should also consult the section Transfer Information and Policy.

Program Learning Outcomes

Following is a summary of the program learning outcomes for the Literature B.A.:

Students who complete the literature major should emerge with the following knowledge and skills:

1. A capacity for critical analysis of texts that is attentive to:
   - the formal structures, genres, and rhetorical strategies of different kinds of writing, public discourse, and media;
   - the historical and social contexts of such texts;
   - the role cultural and linguistic differences play in the interpretation of texts read in translation and in a language not one's own.

2. Effective written communication that demonstrates the following abilities:
   - to evaluate multiple interpretations of texts;
   - to write effective argumentative prose;
   - to situate texts in relation to a critical/theoretical tradition;
   - to design and initiate a substantive independent project of research or creative activity.

3. Experience reading a variety of texts:
   - from a breadth of world cultures and traditions;
   - from different historical periods, including the pre-modern;
   - originally written in languages other than English.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete LIT 1 or its transfer equivalent in order to declare the literature major or minor.

Transfer students should also consult the section Transfer Information and Policy.
Appeal Process

Students notified that they are not eligible to declare the literature major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students must complete LIT 1 or its transfer equivalent in order to declare the literature major. In order to declare the major, students meet with a department advisor to complete and submit a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a major should consult with a department advisor as early as possible to make an academic plan.

Students who have not completed LIT 1 or its transfer equivalent and who are approaching the campus declaration deadline (their sixth quarter, for students admitted as frosh) may petition to declare the literature major. The petition will be approved or denied, or the student will be provided with conditions (completion of LIT 1 or its equivalent with a grade of C or better) that must be resolved within one additional quarter of enrollment.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Students transferring from California community colleges may use an articulated equivalent of LIT 1 to satisfy the LIT 1 course requirement. Students transferring from other colleges may petition to use an introduction to literature course to satisfy the LIT 1 course requirement. Another literature course may be applied toward the LIT 60/LIT 61 or the LIT 80/LIT 81 course requirement.

Transfer students planning to major in literature are strongly recommended to complete the equivalent of one year of college-level study of a language other than English before entering UC Santa Cruz.

Transfer students planning to major in literature with a language literature concentration are strongly recommended to have completed two years of college-level language study (or comparable ability) to allow for a two-year graduation.

Getting Started at UCSC as a Transfer Student

Transfer students may declare the literature major or minor after completing LIT 1 or its transfer equivalent, and are urged to declare the major during their first quarter at UC Santa Cruz.

For information about declaring the literature major or minor, please see the section How to Declare a Major.

A student may receive credit toward the lower-division requirements of the major or minor for up to two courses taken at other institutions.

Students who attend another campus of the University of California may petition to apply a maximum of three upper-division courses toward the literature major, or two upper-division courses toward the literature minor.

Students may not use upper-division coursework taken at non-UC colleges or universities to satisfy upper-division literature major or minor credit.

Letter Grade Policy

Letter grades are required for 75 percent of the upper-division courses applied toward the literature major. The senior seminar or senior thesis must be taken for a letter grade.

Course Substitution Policy

Students who participate in a UC Education Abroad Program and/or attend another campus of the University of California may petition to apply a combined maximum of three upper-division courses toward the literature major, or two upper-division courses toward the literature minor.

Students may petition to receive literature elective credit for a maximum of one upper-division course taken in another department at UC Santa Cruz. In order to petition for a course from another department to substitute for a literature elective, students should submit a current course syllabus to the literature undergraduate program coordinator. Courses accepted from other departments may not be used to satisfy the literature major's critical approaches or distribution requirements.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The University of California’s Education Abroad Program (EAP) operates study centers in countries throughout the world, all associated with host institutions of high academic standing. EAP serves more than 1500 upper-division students from the nine UC campuses every year. Students who participate in a UC Education Abroad Program may petition to apply up to three upper-division courses from EAP toward the literature major, or two upper-division courses toward the literature minor.

Honors

Honors in the literature major are awarded to graduating seniors who have earned a 3.70 to 3.89 grade-point average in their upper-division literature courses. Highest honors in the literature major are awarded to graduating seniors who have earned a 3.90 or higher grade-point
average in their upper-division literature courses. Honors are not awarded in the minor.

Creative Writing Courses
Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing courses LIT 179A, LIT 179B, LIT 190V, LIT 190W, and LIT 195C to satisfy major requirements.

Senior Checklist
Three quarters before anticipated graduation, all literature majors must complete a checklist in collaboration with a department advisor. The purpose of the checklist is to confirm progress toward graduation and the satisfaction of all major requirements. Completion and approval of a senior checklist are required for graduation.

Credit for Repeated Courses
Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UC Santa Cruz General Catalog.

Individual Study Credit for the Major
Students may apply a maximum of two of the following courses—LIT 195 (Senior Essay), LIT 198 (Group Tutorial), and/or LIT 199 (Tutorial)—for satisfaction of literature major requirements. LIT 195 may be used only once for satisfaction of literature major requirements.

Intensive Literature Major Option
The intensive literature major requires students to complete upper-division literature coursework in a second language. The intensive literature major is especially useful for students who plan to apply to graduate programs in literature and other humanities disciplines; those programs typically require students to do academic work in at least two languages. In order to satisfy an intensive literature major, students complete all of the requirements for a general literature, language literature, or creative writing concentration (including the critical approaches and distribution requirements); students must also complete at least two additional upper-division courses in a second-language literature studied in the original language, for a total of 14 courses (12 upper-division courses and two lower-division courses).

Two years of college-level language study (or comparable ability) are needed before a student is prepared to enter an upper-division language-literature course. In select languages (Greek, Latin, Middle Egyptian hieroglyphics, Sanskrit), less time is needed for this purpose.

General Literature Concentration

Course Requirements
The general literature concentration of the Literature major requires: (1) basic proficiency in a second language; and (2) 12 courses in literature.

- Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.
- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Requirements
- Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

- Two lower-division courses are required:
  LIT 1 Literary Interpretation 5

Plus
One LIT 60/LIT 61-series course
or
One LIT 80/LIT 81-series course

LIT 1 is a writing-intensive course.

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Courses
Ten upper-division courses are required:
LIT 101 Theory and Interpretation 5
LIT 102 Translation Theory 5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course studied in the original language for LIT 102.

Plus
- Eight additional upper-division literature courses.

These eight courses must between them fulfill the critical approaches and distribution requirements specified below. Some courses may be used to fulfill more than one distribution requirement, as specified below.
Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

Critical Approaches Requirements

- Six courses, one satisfying each of the six critical approaches to the study of literature.

While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

Canons: The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

Genres: The study of fiction, poetry, drama, epic, testimonio, etc., across time and space: what happens when we classify together works of similar form?

Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature’s possibilities?

Media: The study of the written word as one medium among others: what can we learn from the analysis of visual, performative, sonic, filmic, and other media?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

The course descriptions in the General Catalog specify the critical approaches satisfied by each course.

These courses may also satisfy distribution requirements (below).

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Distribution Requirements

- Two upper-division courses on literature written before 1750.
- One upper-division course on non-Western literature or literature in a global perspective.
- One upper-division course on poetry and poetics (may not be a creative writing course).
- A senior seminar (a course in the LIT 190 series) or a senior thesis (LIT 195), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course.

Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior seminar.

The senior seminar (courses in the LIT 190 series) may be counted as one of the required upper-division courses. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior thesis.

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement.

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195A or LIT 195B), and may count LIT 195A or LIT 195B as one of the upper-division courses required for the major.

**Language Literature Concentration**

The language literature concentration examines literature within the frameworks of particular languages or national and regional traditions, and requires that texts be read in the original language. Enrollment in upper-division language literature courses normally requires completion of two years of college-level language coursework, or the equivalent.

**Course Requirements**

The language literature concentration of the literature major requires: (1) completion of two years of college-level language coursework, or the equivalent; and (2) 12 courses in literature.

- The 12 required courses must include two lower-division and 10 upper-division courses.

**Lower-Division Requirements**

- Language proficiency: Two years (six quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

**Critical Approaches Requirements**

- Six courses, one satisfying each of the six critical approaches to the study of Literature.

While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

**Canons:** The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

**Genres:** The study of fiction, poetry, drama, epic, testimonio, etc., across time and space: what happens when we classify together works of similar form?
Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature’s possibilities?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

The course descriptions in the General Catalog specify the critical approaches satisfied by each course. These courses may also satisfy distribution requirements (below).

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Language Literature Concentration Requirements

• Five courses in a single language literature.

French Literature (courses in the LIT 182 series)
The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.

German Literature (courses in the LIT 183 series)
The study of the literature, language, and cultural practices of the German-speaking areas of central Europe including Germany, Austria, and Switzerland.

Greek and/or Latin Literature (courses in the LIT 184 and LIT 186 series)
The study of the literature, languages, and cultural practices of ancient Greece and Rome. Students may choose to concentrate in Greek or Latin or both.

Italian Literature (courses in the LIT 185 series)
The study of Italian literature, language, and cultural practices from the Middle Ages to the present.

Spanish/Latin American/Latino Literatures (courses in the LIT 188-LIT 189 series, LIT 190X)
The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Each of these courses may also satisfy one of the critical approaches requirements, and/or one or more distribution requirements (see below).

Distribution Requirements

• Two upper-division courses on literature written before 1750.
• One upper-division course on non-Western literature or literature in a global perspective.
• One upper-division course on poetry and poetics (may not be a creative writing course).
• A senior seminar (a course in the LIT 190 series) or a senior thesis (LIT 195), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course. Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior seminar.

The senior seminar (courses in the LIT 190 series) may be counted as one of the required upper-division courses. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior thesis.

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from the faculty supervisor may complete a thesis to satisfy the senior exit requirement.

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195A or LIT 195B), and may count LIT 195A or LIT 195B as one of the upper-division courses required for the major.

### Creative Writing Concentration

The Literature Department offers a sequence of creative writing workshops from introductory through advanced levels. Admission to the creative writing concentration is selective. Interested students are required to take one lower-division creative writing workshop at UC Santa Cruz (LIT 90, LIT 90X, LIT 91A or LIT 91B) before applying to the concentration; however, students are strongly encouraged to complete two lower-division workshops (at least one at UCSC) before applying. To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office and on the Literature Department website). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature, with a concentration in creative writing.

In addition to the critical approaches and distribution requirements required for all literature majors, students in the creative writing concentration must complete four of their eight upper-division literature courses in creative writing, including a senior project seminar.

### Course Requirements

#### Lower-Division Requirements

- **Basic language proficiency**: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.

  Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

  - Three lower-division courses are required:
    - LIT 1 Literary Interpretation 5

  **Plus**

  One LIT 60/LIT 61-series course

  or

  One LIT 80/LIT 81-series course

  LIT 1 is a writing-intensive course.

  LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

  LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

  LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

  **Plus at least one of the following**

  - LIT 90 Introduction to Creative Writing 5
  - LIT 90X Introduccion a la Escritura Creativa/Introduction to Creative Writing 5
  - LIT 91A Intermediate Fiction/Prose Writing 5
  - LIT 91B Intermediate Poetry Writing 5

  An additional course from among LIT 90, LIT 90X, LIT 91A and LIT 91B is strongly encouraged.

#### Upper-Division Courses

Ten upper-division literature courses are required:

- LIT 101 Theory and Interpretation 5
- LIT 102 Translation Theory 5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.
Students may substitute one upper-division non-English literature course studied in the original language for LIT 102.

Plus

• Eight additional upper-division courses.
  These eight courses must between them fulfill the creative writing workshop, critical approaches, and distribution requirements specified below. Some courses may be used to fulfill more than one distribution requirement, as specified below.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

Critical Approaches Requirements

Six courses, one satisfying each of the six critical approaches to the study of literature. While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

Canons: The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

Genres: The study of fiction, poetry, drama, epic, testimonio, etc., across time and space: what happens when we classify together works of similar form?

Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature’s possibilities?

Media: The study of the written word as one medium among others: what can we learn from the analysis of visual, performative, sonic, filmic, and other media?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

Students in the creative writing concentration will fulfill the genres critical approaches requirement through an upper-division creative writing workshop (LIT 179A, LIT 179B, or LIT 179C); they will fulfill the Media Critical Approaches requirement through the creative writing senior project seminar (LIT 190V or LIT 190W) if they choose the Senior Seminar option to fulfill the comprehensive requirement.

Distribution Requirements

• Two upper-division courses on literature written before 1750.
• One upper-division course on non-Western literature or literature in a global perspective.
• One upper-division course on poetry and poetics (may not be a creative writing course).
• A creative project senior seminar (LIT 190V [Fiction] or LIT 190W [Poetry]) or a senior thesis (LIT 195C), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course.

Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior seminar

The senior seminar may be counted as one of the required upper-division courses. Extensive writing is required in all seminars. Creative writing senior seminars are offered only during spring quarter.

LIT 190V Fiction Senior Seminar 5
LIT 190W Poetry Senior Seminar 5
**Senior essay**

Students who wish to propose a creative writing senior essay (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a senior essay to satisfy the senior exit requirement.

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195C), and may count LIT 195C as one of the required upper-division courses for the major.

Note: LIT 195C does not satisfy the Media Critical Approaches requirement.

*LIT 195C Senior Essay 5*

LIT 179A, LIT 179B, or LIT 179C

*Not required for the major, but strongly recommended before applying for admission to the Creative Writing concentration.

**LITERATURE MINOR**

Students who minor in literature take courses that examine a variety of literary texts and cultural artifacts from around the world, produced from pre-antiquity through the present. The literature minor requires a total of seven literature courses; literature minors do not have to satisfy certain major requirements such as second-language proficiency, distribution or critical approach requirements, or a senior seminar.

Students must complete LIT 1 or its equivalent prior to declaring the minor. In order to declare the minor, students meet with a department advisor to complete and submit a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a minor should consult with a department advisor as early as possible to make an academic plan.

**Course Requirements**

The minor in literature requires seven courses.

**Lower-Division Courses**

**Two lower-division courses are required:**

LIT 1  
Literary Interpretation  

5

This is a writing-intensive course.

**Plus**

One LIT 60/LIT 61-series course: categories, methodologies, and problems of literary study, or one LIT 80/LIT 81-series course: topical, thematic, and comparative studies of literary and filmic texts. LIT 60/LIT 61 and LIT 80/LIT 81 courses are recommended for both literature minors and non-majors.

**Upper-Division Courses**

**Five upper-division courses are required:**

LIT 101  
Theory and Interpretation  

5
Plus

Four other upper-division literature courses (except creative writing courses). The literature minor does not require second-language proficiency or a senior seminar.

ITALIAN STUDIES MINOR

Students interested in an interdisciplinary approach to Italian culture through the combined study of language, literature, history, and art history may pursue a minor in Italian studies. A detailed checklist for the minor is available on the Italian studies program web site.

Staff advisers for the Italian studies minor are available in the Literature Department office, located in Humanities 1, room 303. The Italian studies program is administered by the Literature Department. Declaring a minor in Italian studies is a three-step process:

1. Complete the Petition for Major/Minor Declaration and submit it to litdept@ucsc.edu. Be sure to indicate your expected graduation term (EGT) on the petition. Your EGT is visible in your Student Advising Summary or on your MyUCSC Student Portal.

2. Make an appointment with the Italian studies program director to discuss your plans and fill out an Italian Studies Minor Checklist.

3. Make an appointment with an Italian studies advisor in the Literature Department in order to review and complete your declaration form. To schedule an advising appointment, visit ucsc.campus.eab.com, send an email to litdept@ucsc.edu, or leave a message at 831-459-4778.

Course Requirements

Lower-Division Courses

Each student must complete the lower-division language sequence (ITAL 1–ITAL 6), or equivalent.

Upper-Division Courses

Students must complete five upper-division courses in Italian studies as follows.

One course

ITAL 106 Italian Culture Through Film 5

Plus

• Two Italian literature courses
• One course in Italian history
• One course in Italian art history.

A course featuring the work of Dante is recommended. Three of the five upper-division courses must be completed at UC Santa Cruz; three must be taught substantially in Italian. A maximum of two courses may be transferred from EAP.

Students can consult Italian studies course offerings (p. 221) for each of the above categories.

Students may also consult departmental websites to view available courses.

LITERATURE M.A.

Introduction

The Master's Degree in Literature. A separate master of arts degree program is intended for students whose aim is to deepen and expand their literary/critical training and to prepare for entry into a Ph.D. program, usually at another institution. Priority for admission is given to students interested in underrepresented areas of study within the Literature Department’s offerings, such as the non-English language literatures and, more broadly, critical theory.

The M.A. program requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

Requirements

Course Requirements

• LIT 200, Proseminar, to be taken in fall quarter of the first year;
• Seven additional courses leading to the definition of an area of concentration. Up to two of these may be taken in other departments. One may be an independent study course;
• LIT 291F, a two-credit advising course, each quarter;
• LIT 299A or LIT 299B, Thesis Research.

M.A. Thesis Description

The thesis for a Master's Degree in Literature will be a substantial critical work (typically ranging from 35 to 50 pages, plus a bibliography), written in conjunction with LIT 299. The project must be developed in close consultation with the thesis advisor, who serves as chair of the thesis reading committee, and ultimately be approved by at least two other reading committee members, who are chosen by the student and the advisor.

The majority of the reading committee must be members of the UC Santa Cruz Academic Senate (ladder-rank and Security of Employment faculty). The chair must be a
tenured member of the literature faculty. At least two of the three members of the committee should be literature faculty.

Once the student and advisor have chosen the reading committee members and secured their agreement to serve, the student must submit a Master's Thesis Reading Committee nomination form to the department office; this form should be submitted as early as possible and in any case no later than the second week of the quarter in which the degree is to be conferred.

M.A. Degree Application and Department Verification

An Application for the Master's Degree form must be submitted to the department at least one week prior to the Graduate Division deadline as stated on the academic calendar (normally by the end of the first week in which the degree is to be awarded).

The thesis is approved by all committee members up to six weeks, but no less than three weeks, prior to the last day of instruction (or commencement, if the student intends to participate in the ceremony). A copy of the title page, signed by all thesis committee members, must be submitted to the department for verification of completion. The department does not require a copy of the thesis.

The student must file the thesis with Graduate Division by the last day of instruction of the quarter in which the degree is to be conferred.

NOTE: In spring quarter, the deadline for students wishing participate in the commencement ceremony is approximately one week earlier. Guidelines for the style and filing requirements of the M.A. Thesis are detailed in the PDF "Dissertation & Thesis Guidelines", available on the Graduate Division website.

Admissions and Financial Aid

The Literature Department does not provide financial support to students pursuing the M.A. degree. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students may not automatically transfer from the M.A. program into the Ph.D. program, but must reapply. Further information and application materials are available from the Division of Graduate Studies and on the department website.

|Optional Catchall|

Applying for Graduation

LITERATURE PH.D.

Introduction

The UC Santa Cruz doctoral program in literature offers an innovative multilingual and multidisciplinary approach to literary studies, involving the use of more than one language literature. The program is relatively small, and students work closely with faculty throughout their graduate careers. They are encouraged to take advantage of the rich array of intellectual and cultural events, research clusters, and lectures offered on campus.

The doctoral program combines critical and independent thought with global perspectives. Working across linguistic, national, and period boundaries, students blend critical approaches, literary traditions, and/or cultural archives in comparative and interdisciplinary projects.

A creative/critical writing concentration within the Ph.D. program is available, for which students apply during the admissions process. Creative/critical applicants submit additional creative writing samples of poetry, prose fiction, creative non-fiction or hybrid/cross genre. Students in the creative/critical concentration complete all the requirements for the literature Ph.D. with the addition of a creative/critical degree component in the form of coursework, original creative work with a critical introduction and, if desired, work in poetics, translation, form and/or critical writing focused on creative practices.

Students may apply for a designated emphasis on the literature doctoral diploma in programs and departments such as Critical Race and Ethnic Studies, Education, Feminist Studies, History of Consciousness, Latin American and Latino Studies, Philosophy, Politics, Sociology, and the History of Art and Visual Culture. Applications and requirements are available at the respective department offices.

Advancement to Candidacy

Course Requirements

- LIT 200, Proseminar, to be taken in fall quarter of the first year;
- LIT 201, Pedagogy of Teaching/Teaching Assistant Training, to be taken prior to or in conjunction with the first teaching assistant appointment;
- Twelve additional courses leading to the definition of an area of concentration. At least two of these must be in a second-language literature; at least one must focus on pre-modern literature and culture. A minimum of six courses must be regularly scheduled Literature seminars;
- LIT 291F, a two-credit advising course, each quarter.

Second Language Requirements

The program requires significant literary work in two languages. All students are required to complete the Literature Department's intensive three-week Graduate Summer Language Program or its equivalent and a minimum of two graduate courses in a second-language literature in which 50 percent or more of the reading is
The second literature must serve as a component of the qualifying examination.

Teaching Requirements
Students must complete at least three quarters of supervised teaching experience.

Pre-Qualifying Requirements
Qualifying Examination
The qualifying examination must be taken by the first quarter of the fourth year. It consists of three components: 1. a portfolio with a field statement and comprehensive bibliography, a topic statement, a paper of publishable quality, and a dissertation sketch; 2. translation examination; and 3. oral examination.

Post-Qualifying Requirements
Students must submit a prospectus outlining and defining the dissertation project within a quarter following the qualifying examination, but no later than the end of the fourth year. The prospectus identifies the research problem, methodologies, and case studies, with chapter outlines, footnotes, and bibliography.

Non-Terminal Master’s Degree
A master of arts (M.A.) degree is conferred upon request to doctor of philosophy (Ph.D.) candidates who have successfully completed the literature Ph.D. qualifying examination or who have completed the coursework required for the doctorate (teaching assistant training and supervised teaching experience exempted) and elect to write a master’s thesis under the supervision of a faculty advisor.

Dissertation
The dissertation is a substantial piece of original research in the field of literature, akin to a monograph.

A dissertation submitted for the Creative/Critical Concentration may take alternative forms:

1. A book-length original creative project--novel, novella, collection of poems, collection of stories, creative non-fiction, or a hybrid/experimental form (including but not limited to digital/new media, performance/performativity/screenplay, the lyric essay) with a critical chapter or chapters totaling at least 75 pages exploring the historical, methodological, and/or theoretical foundations of the creative work; or

2. A dissertation on theory, form poetics or literary history; a translation of a creative work with a 30-50-page, substantive, critical introduction; a critical edition.

The dissertation committee is composed of three members, with the dissertation advisor acting as chair. The majority of the membership of a dissertation committee shall be members of the Santa Cruz Division of the Academic Senate.

Detailed instructions for the preparation of the dissertation are available on the Graduate Division website.

Dissertation Defense

Academic Progress
To maintain satisfactory academic progress and eligibility for fellowships and other benefits, students must:

- complete required coursework in the first two to three years;
- satisfy the department’s second-language requirement;
- pass the qualifying examination (QE) during the third year or fall quarter of the fourth year;
- complete a dissertation prospectus and advance to candidacy by the end of the fourth year; and
- complete the dissertation by the end of the seventh year.

Applying for Graduation
For information on how to apply for graduation, visit the Graduate Division website.

Further Information
Additional detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

LITERATURE DESIGNATED EMPHASIS

Introduction
Graduate students may work toward a Doctor of Philosophy (Ph.D.) degree that notes a designated emphasis in literature on the graduation documents. Students wishing to pursue this option should consult with the chair of their respective Ph.D. program and are encouraged to apply in the first or second year of graduate study.

Requirements
Graduate students in other programs may obtain a designated emphasis in literature on the Ph.D. degree by completing the following requirements:

Committee Composition and Departmental
Approvals
The student must have a faculty graduate adviser from Literature, who serves both on the qualifying examination committee and the dissertation reading committee.

Course Requirements
The student must take four graduate courses in literature. With the approval of the literature adviser, one of the four required graduate courses may be an independent study.

Writing, Research and/or Teaching Requirements
The student must prepare a significant piece of writing in the area of literature, such as a substantial seminar paper or a chapter of the doctoral dissertation. The adviser from Literature, in consultation with the student, determines whether a particular piece of writing meets this requirement.

Designated Emphasis Application
When the above requirements have been fulfilled, the formal steps to obtain the Designated Emphasis in Literature are:

• The student should complete Designated Emphasis Application form, obtain the literature adviser's signature and submit the application with supporting documentation (copies of the Qualifying Examination and Dissertation Committee Nomination forms) to the Literature Department graduate program coordinator.

• The Literature Department will notify the student and the home department of approval for the designated emphasis.

**PHILOSOPHY B.A.**

**Information and Policies**

**Introduction**

Philosophy investigates fundamental questions about the most basic facets of human thought and life, e.g., concerning knowledge and belief (epistemology), the nature of reality (metaphysics), and morality and aesthetics (value theory). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, “philosophy” names not only a historically defined subject matter, but also inquiry into any of the fundamental determinants of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, social, political, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers many of the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy.

Philosophy prepares students for many careers as well as for most professional schools, including law, education, business, and non-profit management. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

**Academic Advising for the Program**

For undergraduate advising, please contact philadvi@ucsc.edu. For transfer students, please also consult the Transfer Information and Policy section and contact the undergraduate advisor with any questions.

**Getting Started in the Major**

**Program Learning Outcomes**

Students who complete the philosophy major should emerge with the following knowledge and skills:

- an ability to argue cogently for a philosophical point and to analyze and criticize the arguments of others;
• a familiarity with the central concepts and key debates in the core areas of contemporary philosophical thought, including ethics, metaphysics, and epistemology;
• a familiarity with the works of the major figures in the history of philosophy; and
• a familiarity with formal logic, including the ability to carry out proofs within symbolic formal systems.

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the major once they have enrolled in at least one lower-division philosophy course. Students of any year can declare the major. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements. There is no GPA requirement to declare the philosophy major. A student approaching the campus declaration deadline who has not enrolled in any philosophy courses will be allowed to declare the philosophy major if they enroll in a lower-division philosophy course in the next quarter. Students should contact philadvi@ucsc.edu in order to declare.

Appeal Process

How to Declare a Major

In order to officially declare, students must schedule a meeting with the undergraduate advisor and complete an Academic Plan and Petition for Major/Minor Declaration form. Students should contact philadvi@ucsc.edu in order to declare.

Transfer Information and Policy

Transfer Admission and Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Although this is not required for admission, students are recommended to complete courses in the following areas:

• Introduction to Symbolic Logic
• Ancient Philosophy
• Modern Philosophy
• Ethical Theory
• Philosophy of Mind or Epistemology

Students may petition to substitute courses taken at other institutions, or take courses articulated on assist.org. Please note that logic classes offered at community colleges will not fulfill the department’s logic requirement (i.e., PHIL 9). However, most students should be able to satisfy their second required lower-division introductory course before transferring in.

Transfer students wishing to major in philosophy are encouraged to consult with the Philosophy Department undergraduate advisor as soon as possible.

Getting Started at UCSC as a Transfer Student

Students can declare the major once they are enrolled in or have taken one philosophy course. To declare the major, please contact the undergraduate advisor and complete an Academic Plan and Petition for Major/Minor Declaration form.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

For majors, students are allowed to substitute two upper-division courses for their required philosophy courses. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. Students must have received a B or higher to transfer a course for credit.

Double Majors and Major/Minor Combinations Policy

Study Abroad)

Honors

Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at UC Santa Cruz. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UCSC. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (PHIL 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (PHIL 195B), but only if the writing requirements for PHIL 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite lower-division courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department
sponsors workshops for students contemplating graduate school in philosophy.

Requirements and Planners

Course Requirements

Eleven courses are required: two at the lower-division level, two in the history of philosophy sequence (PHIL 100A, PHIL 100B, PHIL 100C), six additional upper-division courses (including one advanced seminar), and an elective course which may be from any level. These 11 courses must meet the following distribution requirements:

Lower-Division Courses

The following course:

PHIL 9 Introduction to Logic 5

Plus

At least one other course numbered below PHIL 100A, with the exception of PHIL 8.

Transfer students should check Assist.org for articulation agreements.

Upper-Division Courses

History of philosophy

Two of the following courses:

PHIL 100A Ancient Greek Philosophy 5
PHIL 100B The Rationalists 5
PHIL 100C The Empiricists 5

All three are strongly recommended for students who anticipate graduate work in philosophy.

Plus

Six courses numbered PHIL 100A or above, at least one in value theory and two in metaphysics and/or epistemology.

Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these six additional courses.

Courses satisfying the value theory requirement:

PHIL 118 Stoic Ethics 5
PHIL 140 History of Ethics 5
PHIL 142 Advanced Ethics 5
PHIL 143 Applied Ethics: Ethics 5
PHIL 144 Topics in Social and Political Philosophy 5
PHIL 147 Topics in Feminist Philosophy 5
PHIL 148 The Holocaust and Philosophy 5
PHIL 152 Aesthetics 5
PHIL 153 Philosophy of Race 5

Courses satisfying the metaphysics and epistemology requirement:

PHIL 106 Kant 5
PHIL 113 The History of Analytic Philosophy 5
PHIL 114 Probability and Confirmation 5
PHIL 121 Epistemology 5
PHIL 122 Metaphysics 5
PHIL 124 Other Minds 5
PHIL 125 Philosophy of Science 5
PHIL 126 Philosophy of Social Sciences 5
PHIL 127 Philosophy of Biology 5
PHIL 133 Philosophy of Mind 5
PHIL 135 Philosophy of Psychology 5

PHIL 195A, PHIL 195B, and PHIL 199 also cannot be counted among these six courses.

Senior Seminar

One advanced seminar numbered:

PHIL 190 Senior Seminar 5

Elective

An 11th course which may be from any level.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in philosophy is met by completing any two from the sequence:

PHIL 100A Ancient Greek Philosophy 5
PHIL 100B The Rationalists 5
PHIL 100C The Empiricists 5

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course.

PHIL 190 Senior Seminar 5

Planners

Courses must be satisfied in the following sequence.

Before being eligible to enroll in any course in the history sequence (PHIL 100A-PHIL 100B-PHIL 100C), a student must have completed two lower-division courses (one of these may be PHIL 9 or PHIL 8, but not both). Before being eligible to enroll in any philosophy course above PHIL 100C, students must have taken PHIL 9 and at least one of the required history of philosophy courses (i.e., either PHIL 100A, PHIL 100B, or PHIL 100C). In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements.

Four-Year Major Planner
Students must have taken or currently be enrolled in at least one lower-division philosophy course in order to declare the minor. Students declare by contacting the undergraduate advisor, who will develop an individual academic plan and complete a Petition for Major/Minor Declaration form. Students should contact philadvi@ucsc.edu in order to declare.

A minor in philosophy consists of seven of the 11 courses required for the major, and will meet the following distribution requirements:

**Lower-Division Courses**

The following course:

```
PHIL 9       Introduction to Logic  5
```

**Plus**

One other course numbered below PHIL 100A, with the exception of PHIL 8.

Transfer students should check Assist.org for articulation agreements.

**Upper-Division Courses**

**History of Philosophy**

One of following courses:

```
PHIL 100A       Ancient Greek Philosophy  5
PHIL 100B       The Rationalists  5
PHIL 100C       The Empiricists  5
```

**Plus**

Four additional upper-division courses numbered 100A or above. This includes one in value theory and two in metaphysics and/or epistemology (see Philosophy B.A. course requirements for a list of courses that satisfy this requirement).

**Course Substitution Policy**

One upper-division course substitution may be considered, but lower-division courses may not be substituted for an upper-division requirement. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. There is no senior exit requirement for the minor.

For the sequence in which courses must be taken, see Major Requirements.

### PHILOSOPHY CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

The B.A./M.A. pathway is an option that allows students to complete the requirements for both degrees in five years, rather than the usual six.
Interested students with a GPA of at least 3.5 will be asked to indicate their intention to participate in the program no later than the seventh week of the spring quarter of their junior year (spring quarter advising week). Intentions to participate should be directed to the undergraduate staff advisor. Subject to instructor consent, students may then enroll in two graduate philosophy seminars in their senior year.

Actual admission to this program requires that students apply to the M.A. program through the standard graduate admissions process as specified on the UCSC’s Graduate Division’s website. If a student is then admitted, up to two graduate philosophy seminars taken in their senior year will count as credit toward their graduate degree. Students matriculating through the B.A./M.A. pathway will be required to take the remaining seven courses required for the M.A., as well as to write and defend their M.A. capstone paper, in the fifth year. Those needing additional time may continue in the pathway in accordance with normative time expectations for the stand-alone master’s program.

PHILOSOPHY M.A.

Introduction

The M.A. program is host to talented students from diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one to two years.

Preparation for the Master’s Degree

Students can apply to be admitted into the graduate program to pursue the M.A. in philosophy. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during fall quarter. For up-to-date information about the application process, consult the department’s website and contact the graduate advisor.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650 or visit the department website.

Requirements

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Every graduate student in philosophy is required to complete six courses in their first year. These six core courses will constitute the bare minimum of courses required for the M.A. or Ph.D.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate the professionalization of students in the exchange and development of academic knowledge and skills, all first- and second-year doctoral students will be required to enroll in:

- PHIL 280, Graduate Colloquia Course, 2
- PHIL 281, The Pedagogy of Philosophy, 2

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.

For further details, see the department’s web page or consult with the department’s graduate advisor.

Courses

A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.
Other Requirements

By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's capstone paper, which will normally be defended before a committee of two faculty.

[Optional Catchall]

Applying for Graduation

Students apply to graduate by contacting the department graduate advisor and completing the relevant forms from Graduate Division.

PHILOSOPHY PH.D.

Introduction

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

The department has three distinguishing characteristics: a focus on philosophy understood through its history, an emphasis on the relation of philosophy to science, and an eclecticism regarding philosophical styles.

The department’s faculty recognize the importance of doing philosophy in a way that is sensitive to its history. Their commitment to the history of philosophy extends from Ancient Philosophy to several of the main figures and topics in 20th century philosophy, and covers a wide range of topics and historical figures in between.

The department also has a focus on the relation of philosophy to science. Every member of the department is currently engaged in empirically informed philosophical research, or research in the history of science or the philosophy of science, or both.

Finally, while grounded in the analytic tradition, the department has an eclectic philosophical profile, manifested in its openness to a variety of philosophical styles, including continental philosophy, and in the importance it places on making philosophy relevant, beneficial, and accessible to the public. This eclecticism, which, among other things, fosters an academic environment that allows our students and faculty to make intellectual connections with academics in other disciplines and members of the general public, makes UC Santa Cruz a unique and attractive place to study philosophy.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650 or by visiting the department website.

Advancement to Candidacy

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Six courses, to be completed in the first year, are required of every graduate student in philosophy. These six core courses will constitute the bare minimum required for the M.A. or Ph.D.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate the professionalization of students in the exchange and development of academic knowledge and skills, all first- and second-year doctoral students will be required to enroll in:

<table>
<thead>

<tbody>
<tr>
<td>PHIL 280</td>
<td>Graduate Colloquia</td>
<td>2</td>
</tr>
<tr>
<td>PHIL 281</td>
<td>The Pedagogy of Philosophy</td>
<td>2</td>
</tr>
</tbody>
</table>

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.
A minimum of 12 graduate courses

Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Foreign Language Requirements

The foreign language will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate committee.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Qualifying examination and Research Seminar

The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Near the end of the required coursework, doctoral students will develop a research project resulting in a substantial paper. The paper is required to enroll in the research seminar, PHIL 270, which must be completed during or before winter quarter of the third year. The seminar will allow students to make substantial progress on a qualifying essay and cultivate their ability to assess and provide critical feedback on another author’s philosophical work. PHIL 270 is only offered in winter quarter, and will normally be taken in the third year, though with permission of the instructor, it may be taken earlier than the third year. It is optional for M.A. students.

Post-Qualifying Requirements

[Optional Catchall]

Dissertation

Prospectus

Within one year of passing the qualifying examination (usually during the fourth year) doctoral students will submit and defend a dissertation prospectus, consisting of some written foundation and a plan for completion of the dissertation. The committee for the prospectus defense is normally the dissertation committee.

The prospectus will be submitted at least one month prior to the defense. It will normally consist of:

1. A detailed outline or table of contents of the entire dissertation
2. A bibliography indicating knowledge of the scope of the relevant literature
3. A paper that would be suitable as a chapter of the dissertation and that (a) clearly shows the potential for developing the rest of the dissertation, or (b) lays out the central problem which the dissertation will address.

Dissertation

The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research. Students submit their dissertation committee to the department for approval once they complete their qualifying exam. They may change their committee at a later time pending department approval. This committee is submitted to Graduate Division for final approval.

Dissertation Defense

Academic Progress

Applying for Graduation

Students apply to graduate by contacting the department graduate advisor and completing the relevant paperwork from graduate division.

[Optional Catchall]

PHILOSOPHY DESIGNATED EMPHASIS

Introduction

Requirements

To receive a designated emphasis in philosophy, graduate students from other departments must complete the following requirements in addition to degree requirements for the doctorate in their home department.

Guidelines and application forms are available in the Philosophy Department office.

Committee Composition and Departmental Approvals

A Philosophy Department faculty member is to be consulted about the intention to pursue a philosophy designated emphasis. This advisor is required to serve on both the qualifying examination committee and the dissertation reading committee.

Course Requirements

Students must complete four graduate courses in philosophy selected in consultation with the philosophy faculty advisor. One of the four may be an independent study approved by the philosophy faculty advisor.
Writing, Research and/or Teaching Requirements

Students must submit a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the philosophy advisor.

Academic Progress

[Optional Catchall]

Writing Program

209 Humanities 1
(831) 459-2431
https://writing.ucsc.edu

PROGRAMS OFFERED

Academic Literacy Curriculum (p. 230)

The Writing Program offers lower-division general education composition courses, upper-division peer tutoring courses, and graduate-level pedagogy courses. In collaboration with the colleges, the Writing Program administers the Academic Literacy Curriculum. The Writing Program also houses the Don Rothman Endowed Award in First-Year Writing, which honors outstanding first-year writers and recognizes the pedagogical inspirations of their teachers.

LOWER-DIVISION COURSES

The Writing Program's lower-division courses are designed to help students become confident writers, learners, and researchers who communicate effectively in a variety of writing situations and disciplinary fields. These courses teach students how to develop analytical, reflective, and flexible writing practices to meet the expectations of academic, professional, and civic audiences.

Specifically, the program offers courses that satisfy:

- General Education Composition (C) Requirement
- WRIT 2, Rhetoric and Inquiry (F, W, S)
  Prerequisite(s): College 1 and satisfaction of the Entry-Level Writing Requirement by exam or course selection via Directed Self-Placement; or College 80A, 80D, or 80F and satisfaction of the C1 requirement
- WRIT 2H, Rhetoric and Inquiry Honors (W, S)
  Prerequisite(s): College 1 and satisfaction of the Entry-Level Writing Requirement by exam or course selection via Directed Self-Placement. Enrollment is restricted to College Scholars Program or students with an Analytical Writing Placement Exam (AWPE) score of 10-12 or equivalent
- Systemwide Entry-Level Writing Requirement (ELWR)
- WRIT 1, Introduction to Composition (W, S)
  Prerequisite(s): College 1 and WRIT 26; or College 1 and course selection via Directed Self-Placement
- WRIT 1E, Introduction to Composition for Multilingual Students (W, S)
  Prerequisite(s): College 1 and WRIT 26; or College 1 and course selection via Directed Self-Placement

Students from previous catalog years may place into WRIT 1 and WRIT 1E based on AWPE scores.

For more information about the Directed Self-Placement process, please visit the DSP website.

For more information regarding undergraduate campus requirements and course offerings, please visit the Writing Program's website.

The Writing Program also offers the Multilingual Curriculum for linguistically diverse students. These courses are designed to strengthen students' use of English for purposeful, authentic, and culturally appropriate communication. These courses prepare students for subsequent writing requirements, including the systemwide Entry-Level Writing Requirement (ELWR) and the campus's General Education Composition (C) Requirement.

Based on students' course selection via Directed Self-Placement, multilingual students may place into the following courses, which are taken prior to the ELWR (WRIT 1 or WRIT 1E) and C Requirement (WRIT 2 or WRIT 2H):

- WRIT 25, Writing about Place (F, W)
  Prerequisite(s): Course selection via Directed Self-Placement
- WRIT 26, Writing about Language (F, W, S)*
  Prerequisite(s): WRIT 25 or course selection via Directed Self-Placement

Students from catalog years 2018-2019 and 2019-2020 may place into WRIT 25 and WRIT 26 based on AWPE-MLS scores.

*Upon completion of WRIT 26, multilingual students are highly encouraged to take WRIT 1E, which carries the same outcomes as WRIT 1 but is taught by trained faculty with expertise in language acquisition.

For a full list of Writing Program course descriptions, please visit the courses page on our website.

UPPER-DIVISION WRITING COURSES

The Writing Program offers courses for undergraduates interested in serving as peer tutors for lower-division
writing students striving to satisfy the Entry-Level Writing Requirement. By exploring theory and research on writing pedagogies, tutors gain insight into composing processes, meeting the academic needs of diverse learners, and providing responsive assistance in one-to-one tutoring settings.

- WRIT 159: Grammar for Tutors and Teachers (3 credits, S)
  Prerequisite(s): WRIT 169, or by instructor permission

- WRIT 169: Theory and Practice of Tutoring Writing (3 credits, W)
  Prerequisite(s): C requirement and by instructor permission

GRADUATE-LEVEL WRITING COURSES

The Writing Program supports graduate education by offering pedagogical training for graduate students from all disciplines in the theory and practice of teaching composition courses, with an emphasis on course and assignment design that foregrounds disability studies and inclusive teaching. This course is designed for students who would like to serve as graduate student instructors in the Writing Program or enhance their own pedagogical development as teaching assistants in other departments.

- WRIT 203, Teaching Writing (F, W)

Note: Courses in creative writing are offered through the Literature Department.

Academic Literacy Curriculum

ACADEMIC LITERACY CURRICULUM

The Academic Literacy Curriculum (ALC) is an articulated sequence of courses jointly administered by the colleges and the Writing Program (p. 229). This curriculum is designed to help first-year students cultivate the foundational proficiencies in critical reading, writing, critical thinking, and research they will need throughout their university career.

All first-year students begin the ALC by taking College 1 (Core Course), Academic Literacy and Ethos, in the fall quarter. College 1 course learning outcomes are organized through the acronym ACMES: Analysis, Critical Thinking, Metacognition, Engagement with Others, and Self-Efficacy. This course teaches students strategies for critical reading and critical thinking important to the study of academic discourse through themes that are unique to each college. For specific descriptions of College 1 (Core Course) by residential college, please visit the individual program statements for the colleges.

After the successful completion of College 1, students will take a course to satisfy the Entry-Level Writing Requirement (ELWR) and/or will enroll in WRIT 2, Rhetoric and Inquiry, to satisfy the campus’s Composition (C) General Education Requirement. This course provides students with conceptual and procedural knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts. College 1 is a prerequisite for WRIT 2 and WRIT 1 and corequisite for WRIT 25 and/or WRIT 26.

The Writing Program also offers sections of WRIT 2 Honors for students in the College Scholars Program or who score 10-12 on the AWPE or equivalent. This course carries the same outcomes as WRIT 2 but provides an in-depth focus on conducting sustained scholarly inquiry about one topic throughout the quarter.

Academic Literacy Curriculum Course Sequence

<table>
<thead>
<tr>
<th>ELWR Status</th>
<th>Fall</th>
<th>Winter</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELWR Satisfaction via Directed Self-Placement or accepted standardized test scores</td>
<td>College 1 WRIT 2</td>
<td>WRIT 2</td>

<tr>
<td>ELWR Satisfaction and College Scholars Program or ELWR Satisfaction and AWPE score of 10-12 or equivalent</td>
<td>College 1 WRIT 2 or WRIT 2H</td>
<td>WRIT 2H</td>
</tr>
</tbody>
</table>

Together, College 1 and WRIT 2 help students transition to university-level discourse and develop confidence and competency in the basic skills necessary to succeed in any discipline on campus. As a linked sequence of classes, with articulation of academic vocabulary and pedagogical practices between the Colleges and the Writing Program, the ALC is the foundation of the First-Year Experience, with the higher aim of fostering a sense of belonging and the ability to think, at a metacognitive level, about the education students will receive at the university.

PATHWAYS FOR ELWR-REQUIRED STUDENTS

Students who have not satisfied ELWR before matriculation via accepted standardized test scores or Directed Self-Placement have various pathways for satisfying ELWR and completing the ALC requirements. These pathways, outlined in the table below, are based on the course sequence selected via the Directed Self-Placement process.
**ELWR Student Pathways for the Academic Literacy Curriculum**

For more information, please visit the ELWR satisfaction website.

For more information about the Directed Self-Placement process, please visit the Directed Self-Placement website.

For a full list of Writing Program course descriptions, please visit the courses page on our website.
A broad range of majors is offered through the physical and biological sciences. The intellectual rigor of these majors ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in scientific research, environmental research, medicine, law, engineering, technology, and business.

The interdisciplinary framework of the Division of Physical and Biological Sciences provides students with the opportunity to attend classes and pursue research that ranges from the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, or from evolution to plate tectonics. These experiences equip students not only with the skills to explore and discover the world, but also to define and improve it.

Departments and programs affiliated with the Division of Physical and Biological Sciences include the Departments of Astronomy and Astrophysics; Chemistry and Biochemistry; Earth and Planetary Sciences; Ecology and Evolutionary Biology; Microbiology and Environmental Toxicology; Mathematics; Molecular, Cell, and Developmental Biology; Ocean Sciences; Physics; and programs in Coastal Science and Policy, and Science Communication. More information about our undergraduate and graduate programs can be found on our website.

PROGRAMS OFFERED
Astronomy and Astrophysics Ph.D. (p. 233)
Astrophysics Minor (p. 233)

OTHER PROGRAMS OF INTEREST
Physics (Astrophysics) B.S. (p. 390)

Astronomy and astrophysics has the universe as its domain. Galaxies, stars, planets, and an ever-increasing variety of phenomena observed from ground- and space-based observatories are among the objects of study. Areas of special interest at UCSC include cosmology, the formation and evolution of planets, stars, and galaxies, high-energy astrophysics, active galaxies, supernovae and nucleosynthesis, black holes, exoplanets, interstellar medium, intergalactic medium, solar system dynamics, Research areas include observations across a broad range of wavelengths, with a focus on the visible and infrared, the creation of new instruments and telescope technology including adaptive optics, and theory and simulation, using state-of-the-art computing resources. Astronomers use concepts from and contribute to the development of many other scientific disciplines, including optics, mechanics, relativity, atomic and nuclear physics, applied mathematics, chemistry, geology, and meteorology. The interdisciplinary nature of astronomy, including its historical and philosophical elements, makes its study valuable to those planning careers in a variety of fields.

The Department of Astronomy and Astrophysics offers an undergraduate curriculum focused on a diverse set of general education classes, intended for the broad undergraduate community. The department also offers an astrophysics minor as well as additional upper-division classes focusing on computational methods and in astrophysics.

The graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and industry. The interests of the faculty embrace a wide range of theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include our stellar structure and evolution, solar system and other planetary systems, stellar spectroscopy, the interstellar medium, galactic structure, cosmology, general relativity, gravitational radiation, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation.

Graduate students have access to state-of-the-art instrument development and data reduction technology, the UCO/Lick Observatory computer network, and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research using selected telescopic facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter Keck Telescope in Hawaii, the world’s largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

UNDERGRADUATE PROGRAM

Courses for non-majors
Instruction in astronomy for undergraduates at UC Santa Cruz is designed to meet the needs of several groups of students.

ASTR 1, ASTR 2, ASTR 3, ASTR 4, ASTR 5, ASTR 6, ASTR 7, and ASTR 8 provide a general survey of the universe as now understood from historical and modern observations, and are offered for those not specializing in a scientific discipline. ASTR 1 is a non-mathematical
introduction to the universe. ASTR 1 and ASTR 6 on exploring our solar system in the space age, satisfy the scientific inquiry (SI) general education (GE) requirement. ASTR 2 through ASTR 5 and ASTR 7 provide an introduction, with the use of basic mathematics, to a diverse array of modern astronomy, covering planets, stars, the formation of the universe, and black holes, and satisfy the mathematical and formal reasons (MF) general education requirement. ASTR 8 explores the universe with astronomical data and satisfies the statistical reasoning (SR) GE.

### ASTROPHYSICS MINOR

For undergraduate students having a particular interest in the subject, a minor in astronomy and astrophysics is offered. Most students who minor in astronomy and astrophysics are majors in another science, though majors in other fields are also possible.

### ASTRONOMY AND ASTROPHYSICS, PH.D.

**Introduction**

The Astronomy and Astrophysics graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and in industry. The interests of the faculty embrace a wide range of both theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include our stellar structure and evolution, solar system and other planetary systems, stellar spectroscopy, the interstellar medium, galactic structure, cosmology, general relativity, gravitational radiation, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation.

Graduate students have access to state-of-the-art instrument development and data reduction technology, the UCO/Lick Observatory computer network, and an on-campus supercomputer dedicated to astrophysical
computation. Graduate students may conduct supervised research using selected telescopic facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter Keck Telescope in Hawaii, the world’s largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

Advancement to Candidacy

Course Requirements

Preparation for Graduate Work in Astrophysics

The UC Santa Cruz graduate program in astronomy and astrophysics is predominantly designed for Ph.D. students seeking a professional career in research and teaching, but with flexibility for students to prepare for careers outside of academia. In view of the thorough preparation in mathematics and physics required for graduate study, most entering astronomy graduate students major in physics or astrophysics as undergraduates.

The suggested minimum requirements for admission to graduate standing at UC Santa Cruz include the following undergraduate courses:

Basic physics.

Mechanics, wave motion, sound, light, electricity and magnetism, thermodynamics, atomic physics, and quantum mechanics.

- PHYS 5A Introduction to Physics I 5
- PHYS 5B Introduction to Physics II 5
- PHYS 5C Introduction to Physics III 5
- PHYS 5D Introduction to Physics IV 5

Basic mathematics.

Calculus

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5
- MATH 23A Vector Calculus 5
- MATH 23B Vector Calculus 5

or equivalent.

And Statistics

- STAT 5 Statistics 5

Intermediate-level physics.

- PHYS 105 Mechanics 5
- PHYS 110A Electricity, Magnetism, and Optics 5
- PHYS 110B Electricity, Magnetism, and Optics 5
- PHYS 116A Mathematical Methods in Physics 5
- PHYS 116B Mathematical Methods in Physics 5
- PHYS 116C Mathematical Methods in Physics 5

- PHYS 129 Particle Physics and Astrophysics 5
- PHYS 139A Quantum Mechanics I 5
- PHYS 139B Quantum Mechanics II 5

Intermediate-level mathematics.

- MATH 21 Linear Algebra 5
- MATH 103A Complex Analysis 5
- MATH 106 Systems of Ordinary Differential Equations 5
- MATH 107 Partial Differential Equations 5

Graduate Program Requirements

The graduate curriculum consists of eight astronomy and astrophysics courses, including six required core courses and a choice of two elective courses. Students must additionally satisfy three equivalent educational requirements in the form of additional elective courses, research projects, independent study, or reading seminars. These requirements are detailed below.

Six courses are specifically required:

- ASTR 202 Astrophysics I 5
- ASTR 204 Astrophysics II 5
- ASTR 205 Introduction to Astronomical Research and Teaching 5
- ASTR 220A Stars and Planets I 5
- ASTR 230 Galaxies and Cosmology I 5
- ASTR 257 Observational Astronomy 5

Electives

Choose two over the first two years

- ASTR 222 Stars and Planets II 5
- ASTR 225 High-Energy Astrophysics 5
- ASTR 230 Diffuse Matter in Space 5
- ASTR 234 Statistical Techniques in Astronomy 5
- ASTR 240A Galaxies and Cosmology II 5
- ASTR 260 Instrumentation for Astronomy 5
- ASTR 289 Adaptive Optics and Its Application 5

Equivalent Educational Requirements

Choose three over the first two years

Equivalent educational requirements (EER) may take one of several forms, and three pre-approved options are listed below. Other EERs may be approved by the department. Students must complete three EERs during their first two years.

EER Option 1: Additional Elective Courses (5 credit course = 1 EER)

- PHYS 224 Particle Astrophysics and Cosmology 5
EER Option 2: Parallel Research Project

One quarter equals one EER.

A parallel research project is scientific research conducted in parallel to a student’s thesis research, with faculty other than their primary advisor and in an area outside their primary research field. These projects will be designed to broaden the knowledge and skills of the student while increasing collaborative connections within the department, and may lead to publishable results. Each quarter students may choose from a department provided list of faculty who have available research projects designed to be completed in approximately 10 weeks. The evaluation methodology of the course will be a review by the designated faculty member of the completed research project and a write-up of the results. This option may only be taken twice in satisfaction of EERs, and may only be taken once per quarter. This option may not be taken in the fall quarter of year one.

EER Option 3: Reading Seminar

One quarter equals one EER.

A reading seminar is an independent study of the scientific literature or related subject matter, guided by a faculty member. Each quarter students may choose from a department-provided list of faculty who will supervise the seminar and select the course material. The goal is to broaden the knowledge of the students in a field where they do not plan to conduct active research, and a reading seminar in a student’s area of research will not qualify for an EER. Students will be required to meet with the faculty member over a 10-week period to discuss the papers. The evaluation methodology for the course will be an oral exam of the material, administered by the faculty member leading the seminar.

Additional Selective Coursework

Students are encouraged to leverage their opportunities for taking additional courses during their Ph.D studies at UC Santa Cruz. If students desire to supplement the coursework required for the astronomy and astrophysics degree with additional domain classes in other departments or with classes likely to advance their career goals, they can take more courses throughout their graduate career. Students should consult with their Ph.D. advisor and the graduate advisor to identify appropriate additional courses.

Additional Degree Requirements

In addition to the curriculum described above, students must fulfill the following requirements:

Students must meet at least quarterly with an assigned advisor.

Each student must also be a teaching assistant for at least two quarters. See the teaching educational requirement.

By the time of the annual board review, which occurs in July at the end of their second academic year, students must:

- Complete one quarter of master's project research with a primary UC Santa Cruz advisor and give a department talk on that work.
- Maintain a 3.0 GPA average in the six required core courses, in which students must register for an assigned grade.
- Submit one lead-author paper to a refereed journal that is based on research conducted at UC Santa Cruz. By the time of the board review, second-year students are expected to either (1) have submitted a paper for publication to a refereed journal; or (2) submit to the board review a complete first draft of such a paper and a detailed plan for completion. If the student pursues option (2), they are expected to submit the paper for publication by the first day of the fall quarter, and provide the electronic submission acknowledgement for the paper to the chair of the graduate advising committee. If the student does not complete this requirement, they will meet with their advisor, the graduate advising committee chair, and the department chair before the first faculty meeting of the fall quarter, in order to discuss the status of the paper. The faculty at that meeting will then make a recommendation whether the student should be granted an extension to the next board review, and the full faculty will then vote on whether to grant an extension.
After passing the board review based on the above-mentioned requirements and the qualifying examination, students pursue independent research leading to the doctoral dissertation.

Foreign Language Requirements

Teaching Requirements

During their Ph.D. studies, graduate students in UC Santa Cruz astronomy and astrophysics will gain formative experience teaching undergraduate students, usually through teaching assistantships (TAs) in collaboration with department faculty.

- Students will serve as an official TA for at least two academic year quarters during their Ph.D. studies. One quarter must be during the first two years of Ph.D. studies. The remainder of this teaching educational requirement must be satisfied before receiving a doctorate degree.
- The teaching education requirement applies to all students, including those with external fellowships or other forms of support.
- The department may require students to serve as a TA for more than two quarters as a condition of the student’s financial support during their Ph.D. studies.

Pre-Qualifying Requirements

Qualifying Examination

By the end of the third year, students must complete a qualifying examination that presents and defends a proposed thesis topic.

Post-Qualifying Requirements

Degree Timeline and Funding

The department has established five years as the normative time to degree. Normative time is the elapsed calendar time, in years, that, under normal circumstances and excluding department-approved leaves, will be needed to complete all requirements for the Ph.D.

We expect funding in the form of graduate student researcher positions or teaching assistantships to be available for our PhD students for five years, provided the student makes sufficient progress towards a degree. A one-year extension may be granted if funding is available. Funding support will not, in general, be provided beyond six years. Exceptions for extension beyond six years will be granted only for exceptional extenuating circumstances, and will be decided upon by the department chair, associate chair, and the department graduate advising committee.

Applying for Graduation

[Optional Catchall]

Chemistry and Biochemistry

Chemistry and Biochemistry Department
230 Physical Sciences Building
(831) 459-4125
https://www.chemistry.ucsc.edu/

PROGRAMS OFFERED

Chemistry B.A. (p. 238)
Chemistry B.S. (p. 243)
Biochemistry and Molecular Biology B.S.
Chemistry Minor (p. 256)
Chemistry M.S. (p. 258)
Chemistry Ph.D. (p. 258)
OTHER PROGRAMS OF INTEREST

Science Education B.S. (p. 398)

Chemistry is central to modern science. Ultimately, most phenomena in biology, medicine, materials, engineering, geology, and the environmental sciences can be described in terms of the chemical and physical behavior of atoms and molecules. Because of the wide appeal and utility of chemistry, UC Santa Cruz offers comprehensive lower-division courses in introductory and organic chemistry, differing in emphasis and style, to meet diverse needs. Students should also note the numerous upper-division course offerings and select those most suitable to their academic interests. The curriculum in chemistry exposes the student to the principal areas of modern chemistry, including organic, inorganic, physical, materials, analytical, and biochemistry. The curriculum is designed to meet the needs of students who plan to graduate with a bachelor of arts (B.A.) or bachelor of science (B.S.) degree, as well as those who wish to pursue an advanced degree. The UCSC chemistry B.A. or B.S. graduate is well prepared to pursue a career in chemistry or related field.

Research in chemistry at UCSC is closely interwoven with graduate and undergraduate education. The chemistry and biochemistry research program is highly active at the graduate level, and faculty also encourage undergraduates to become involved in research. Research leads to academic credit in Senior Thesis (CHEM 195A, CHEM 195B, CHEM 195C) or Senior Research (CHEM 199). There are also opportunities for interdisciplinary research combining chemistry with a wide range of sciences, for example, biology, physics, geology, ocean sciences, microbiology and environmental toxicology. At UCSC, it is not uncommon for students to become co-authors of original work published in research journals.

Chemistry and biochemistry faculty and approximately 100 graduate students and 15-20 postdoctoral fellows are housed in the Physical Sciences Building near the Science and Engineering Library. The department maintains and constantly expands cutting-edge facilities (such as the Chemical Screening Center, Macromolecular Structure Function Core Facility, Mass Spectrometry, NMR Facility, and X-Ray Facility) that enable scientists to carry out their research.

The Science and Engineering Library has an excellent collection of current journals and reference works, as well as access to earlier volumes of all the major journals. Many of these are subscribed to online. Additional source material can be readily and rapidly obtained on interlibrary loan.

UNDERGRADUATE PROGRAM

A degree in chemistry opens the door to a wide variety of academic careers. Some UC Santa Cruz graduates are working as industry researchers in electronic materials, biotechnology, medicinal chemistry, pharmacy, or laser technology. Others have entered government service as research chemists in the Food and Drug Administration, the Environmental Protection Agency, DOD, DOE or law enforcement crime laboratories. Fields such as patent law, commercial development, and scientific writing are open to graduates. Many chemistry majors go on to university graduate programs across the nation to prepare for careers in academia, government, or industry. The degree in chemistry also provides a strong disciplinary background in preparation for a career in the important and much needed area of science teaching in high school. A major in chemistry is also an excellent beginning for one of the many opportunities in the health sciences.

The UCSC Chemistry and Biochemistry Department offers both B.S. and B.A. degree programs. The B.S. degree should be the choice if a student is interested in getting a job in industry immediately after receiving his or her college degree. The B.S. program also provides a good background for graduate work in chemistry. The B.A. program has fewer requirements and should be considered by students who wish to take more science courses outside of chemistry to enter an interdisciplinary area. Examples might be chemical oceanography, geochemistry, chemical physics, environmental chemistry, or health sciences. The B.A. might also be a good choice for students who wish to become high school teachers. For either degree, the courses stress the fundamentals of chemistry and allow students to pursue independent research.

A minor in chemistry is also offered for those who wish to have a strong complementary program in chemistry while majoring in another area of study.

GRADUATE PROGRAM

The Department of Chemistry and Biochemistry offers three graduate degrees: the Doctor of Philosophy (Ph.D.), a thesis Master of Science (M.S.), and a coursework M.S. The Ph.D. and thesis M.S. programs are designed to help students develop into independent scholars while pursuing the excitement of scientific research in a personal, supportive environment. Both the Ph.D. and the research M.S. programs prepare students for careers in academia, industry, government laboratories, and other settings requiring an advanced education in chemistry and related disciplines. The coursework M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. Approximately 100 graduate students are currently enrolled in the graduate program.

The Department of Chemistry and Biochemistry invites well-known researchers from outside UC Santa Cruz to share and discuss their current research. Visiting speakers from other universities and government or industrial research labs expose students to advances at the frontiers of chemical research, offering the opportunity for personal contact with leading scientists. All Ph.D. and thesis M.S students are required to enroll in the CHEM
Teaching assistantships provide both financial support and the opportunity to put into practice the required pedagogical training offered in CHEM 296 (presentation techniques, discussion strategies, laboratory teaching skills, laboratory safety procedures, and time management). Doctoral students may also be supported as graduate-student researchers.

CHEMISTRY B.A.

Information and Policies

The requirements for the bachelor of arts (B.A.) in chemistry have been kept to a minimum so that students may tailor their program to their own purposes, for example, to pursue a double major, to complete major requirements late in their college career, or to concentrate on a specific branch of chemistry. The minimum requirements (including prerequisites) constitute 54 percent of a student’s total undergraduate program; consequently, there is ample time to explore and discover other interests within the university. To plan wisely, students are advised to refer to each course description for a detailed listing of prerequisites. Students who decide they want a professional career in chemistry are advised to meet with the chemistry undergraduate faculty advisor.

Introduction

Academic Advising for the Program

The chemistry and biochemistry advisors provide counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major in a timely manner. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the Transfer Information and Policy Section below.

Getting Started in the Major

High School Preparation

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Students taking chemistry at UCSC begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

In order to determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C, students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

The program learning outcomes clearly communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.A. in chemistry should be able to:

• demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, and physical chemistry);

• solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;

• use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry;

• know and follow the proper procedures and regulations for safe handling and use of chemicals;

• understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;

• use computers in data acquisition and processing, and use available software as a tool in data analysis;

• use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;

• communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and

• collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration
**Process**

**Major Qualification**

Students must complete the following qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these six required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>

</tr>
</tbody>
</table>

**Determining qualification for the major**

When determining qualification to declare the major:

- All courses must be taken for a letter grade.

- For courses required to qualify for the major that have been satisfied with AP credit based on an AP examination score of 5 (for CHEM 1A), and an AP Calculus BC examination score of 4 or 5 (for MATH 11A or MATH 19A), students may substitute a grade of A for each course when calculating their cumulative GPA.

- Students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the Transfer Information and Policy Section below.

**Appeal Process**

Students may appeal to the major either prior to OR after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent).

To appeal to declare a Chemistry major, submit a letter to the chemistry advisor, chemistryadvising@ucsc.edu.

Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process on the Chemistry website.

**How to Declare a Major**

You may declare a major as early as you would like if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students who enter UC Santa Cruz as frosh are required to formally petition to declare a major by the campus deadline in their sixth quarter and before enrolling in their third year (or equivalent). Upper-division transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Chemistry and Biochemistry Department website. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>

MATH 11B  Calculus with Applications  5
or these courses
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 19B  Calculus for Science, Engineering, and Mathematics  5

In addition, the following courses are recommended prior to transfer to ensure timely graduation:
CHEM 8A  Organic Chemistry  5
CHEM 8L  Organic Chemistry Laboratory  2
CHEM 8B  Organic Chemistry  5
CHEM 8M  Organic Chemistry Laboratory  2
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I Laboratory  1
PHYS 6B  Introductory Physics II  5
PHYS 6M  Introductory Physics II Laboratory  1

Getting Started at UCSC as a Transfer Student

Transfer students are highly encouraged to meet with the chemistry academic advisor in their first quarter. For assistance with advising, please contact Chemistry Advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found on our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to UC Santa Cruz but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Transfer students who are proposed in a different major (other than chemistry) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed. For more information on qualifying for the major as a transfer applicant, see the Transfer Students webpage.

Letter Grade Policy

For all students entering UCSC in fall 2001 and later, all courses used to satisfy degree requirements in any of the chemistry and biochemistry majors must be taken for a letter grade. Additionally, letter grades of C or higher must be attained to meet major and minor requirements for graduation.

Course Substitution Policy

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the chemistry program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact a department undergraduate advisor before enrolling in any upper-division courses at other institutions to verify articulation. For more information on transferring courses to UCSC, please consult the Transfer Preparation website.

CHEM 199, Independent Study Course, may not be taken more than once per quarter and may be repeated no more than three times during an undergraduate career.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

To receive honors in the chemistry major, a GPA of 3.5 or higher is required in all chemistry courses; highest honors requires a 3.8 or higher GPA in all chemistry courses for the major. Students may also receive honors for a senior research thesis.

Materials Fee

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student’s account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Fees generally range from $18 to $75 per course. Students may incur additional expenses for individual supplies.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are urged to contact the Career Center for assistance with the application process.

Requirements and Planners

Course Requirements

Lower-Division Courses

General Chemistry:
CHEM 1A  General Chemistry  5
CHEM 1B  General Chemistry  5
CHEM 1M  General Chemistry Laboratory  2
CHEM 1C General Chemistry 5
CHEM 1N General Chemistry Laboratory 2

**Calculus:**
Choose one of the following options:
Either these courses
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
or these courses
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

**Multivariable Calculus:**
Either this course
MATH 22 Introduction to Calculus of Several Variables 5
or these courses
MATH 23A Vector Calculus 5
MATH 23B Vector Calculus 5
or this course
AM 30 Multivariate Calculus for Engineers 5

**Physics:**
Choose one of the following options:
Either these courses
PHYS 5A Introduction to Physics I 5
PHYS 5L Introduction to Physics I Laboratory 1
PHYS 5B Introduction to Physics II 5
PHYS 5M Introduction to Physics II Laboratory 1
PHYS 5C Introduction to Physics III 5
PHYS 5N Introduction to Physics III Laboratory III 1
or these courses
PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1
PHYS 6B Introductory Physics II 5
PHYS 6M Introductory Physics II Laboratory 1

**Calculus:**
Choose one of the following options:
Either these courses
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
or these courses
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

**Multivariable Calculus:**
Either this course
MATH 22 Introduction to Calculus of Several Variables 5
or these courses
MATH 23A Vector Calculus 5
MATH 23B Vector Calculus 5
or this course
AM 30 Multivariate Calculus for Engineers 5

**Physics:**
Choose one of the following options:
Either these courses
PHYS 5A Introduction to Physics I 5
PHYS 5L Introduction to Physics I Laboratory 1
PHYS 5B Introduction to Physics II 5
PHYS 5M Introduction to Physics II Laboratory 1
PHYS 5C Introduction to Physics III 5
PHYS 5N Introduction to Physics III Laboratory III 1

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

**Intermediate Organic Chemistry:**
CHEM 110 Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods 5
CHEM 110L Intermediate Organic Chemistry Laboratory 2

**Inorganic Chemistry:**
CHEM 151A Chemistry of Metals 5
CHEM 151L Inorganic Chemistry Laboratory 2

**Physical Chemistry:**
CHEM 163A Quantum Mechanics and Basic Spectroscopy 5
CHEM 163B Chemical Thermodynamics 5
CHEM 164 Physical Chemistry Laboratory 5

A student may combine the CHEM 163 series with the BIOC 163 series to complete this portion of the major requirement(s). For example, a student can take and complete CHEM 163A and then take and complete BIOC 163B.

**One of the following laboratory courses:**
CHEM 146A Advanced Laboratory in Organic Chemistry 3
CHEM 146B Advanced Laboratory in Inorganic Chemistry 3
CHEM 146C Advanced Laboratory in Physical Chemistry 3

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

**Electives**
At least two from the following:
<table>

</tbody>
</table>

Students cannot receive elective credit toward the major for both BIOC 100A and CHEM 103. Students may also satisfy the elective requirement by completing a chemistry graduate course with the permission of the instructor and department. Please consult with a department undergraduate advisor prior to enrolling.

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of arts degree in chemistry is satisfied by completing:

- CHEM 151L Inorganic Chemistry Laboratory 2 units

**Plus one of the following courses:**

- CHEM Advanced Laboratory in Organic Chemistry 3 units
- CHEM 146B Advanced Laboratory in Inorganic Chemistry 3 units
- CHEM 146C Advanced Laboratory in Physical Chemistry 3 units

**Comprehensive Requirement**

The comprehensive requirement is a part of all UCSC degrees. For the Chemistry B.S., this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences.

- CHEM 151L Inorganic Chemistry Laboratory 2 units

**Plus one of the following courses:**

- CHEM Advanced Laboratory in Organic Chemistry 3 units

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF & SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice.

**Sample Transfer Two-Year Planner**
This is the ideal planner for students who have transferred in with both the required and the highly recommended courses. Note: Failure to complete both the required and highly recommended courses prior to transfer may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed. Please see an academic advisor in the Chemistry Department to create your specific official academic plan.

Required Courses prior to transfer:
- General chemistry (full sequence with lab) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Single variable calculus (full sequence) MATH 11A, MATH 11B
- Multivariable calculus (one-semester course) MATH 22

Highly Recommended Courses prior to transfer:
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L, CHEM 8B & CHEM 8M
  - Calculus-based physics PHYS 6A & PHYS 6L, PHYS 6B & PHYS 6M

ACADEMIC UNITS| 243

Academic Advising for the Program

The chemistry and biochemistry advisors provide counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major on time. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the Transfer Information and Policy Section below.

Getting Started in the Major

High School Preparation

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Students taking chemistry at UCSC begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

To determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C, students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop throughout their studies.

The program learning outcomes communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. in chemistry should be able to:
- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;
- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry;
- know and follow the proper procedures and regulations for
safe handling and use of chemicals;

• understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;

• use computers in data acquisition and processing, and use available software as a tool in data analysis;

• use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;

• communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and

• collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following six qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these six required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1C</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following options:

Either these courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11A</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>MATH 11B</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
</tbody>
</table>

or these courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

And one of the following options:

Either this course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 22</td>
<td>Introduction to Calculus of Several Variables</td>
<td>5</td>
</tr>
</tbody>
</table>

or this course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 23A</td>
<td>Vector Calculus</td>
<td>5</td>
</tr>
</tbody>
</table>

Determining qualification for the major

When determining qualification to declare the major:

• All courses must be taken for a letter grade.

• For courses required to qualify for the major that have been satisfied with advanced placement (AP) credit based on an AP examination score (See Admissions AP Chart), students may substitute a grade of A for each course when calculating their GPA.

• Students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the Transfer Information and Policy Section below.

Appeal Process

Students may appeal to the major either prior to OR after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent).

To appeal to declare a chemistry major, submit a letter to the chemistry advisor, chemistryadvising@ucsc.edu.

Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process on the Chemistry website.

How to Declare a Major

You may declare a major as early as you would like if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students who enter UC Santa Cruz as frosh are required to formally petition to declare a major by the campus deadline in their 6th quarter and before enrolling in their third year (or equivalent). Upper-division transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of Chemistry website. For assistance, please contact chemistry advising at chemistryadvising@ucsc.edu.
Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required before the transfer, by the end of the spring term for students planning to enter in the fall:

- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1C General Chemistry 5
- MATH 22 Introduction to Calculus of Several Variables 5

**Plus one of the following options:**

Either these courses:

- MATH 11A Calculus with Applications 5
- MATH 11B Calculus with Applications 5

or these courses:

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

Students must complete the above courses or their equivalents, with a grade of C or better, and have a cumulative GPA in these courses of 2.5 or greater.

**In addition, the following courses are recommended prior to transfer to ensure timely graduation:**

- CHEM 8A Organic Chemistry 5
- CHEM 8L Organic Chemistry Laboratory 2
- CHEM 8B Organic Chemistry 5
- CHEM 8M Organic Chemistry Laboratory 2
- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1

**Getting Started at UCSC as a Transfer Student**

Transfer students are highly encouraged to meet with the chemistry academic advisor in their first quarter. For assistance with advising, please contact chemistry advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found on our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to UCSC but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Transfer students who are proposed in a different major (other than chemistry) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed. For more information on qualifying for the major as a transfer applicant, see the Transfer Students webpage.

**Letter Grade Policy**

For all students entering UCSC in fall 2001 and later, all courses used to satisfy degree requirements in any of the chemistry and biochemistry majors, must be taken for a letter grade. Additionally, letter grades of C or higher must be attained to meet major and minor requirements for graduation.

**[Optional Catchall]**

**Course Substitution Policy**

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the chemistry program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact a department undergraduate advisor before enrolling in any upper-division courses at other institutions to verify articulation. For more information on transferring courses to UCSC, please consult the Transfer Preparation website.

CHEM 199, Senior Research: Independent Research in the Lab, may not be taken more than once per quarter and may be repeated no more than three times during an undergraduate career.

**Double Majors and Major/Minor Combinations Policy**

**Study Abroad**

**Honors**

To receive honors in the chemistry major, a GPA of 3.5 or higher is required in all chemistry courses; highest honors requires a 3.8 or higher GPA in all chemistry courses for the major. Students may also receive honors for a senior research thesis.

**Materials Fee**

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student’s account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Fees generally range
from $18 to $75 per course. Students may incur additional expenses for individual supplies.

**Program for Students of the Health Sciences**

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are urged to contact the Career Center for assistance with the application process.

**American Chemical Society Certification**

The American Chemical Society (ACS) recognizes certain undergraduate programs, including those of UCSC, to be of such quality as to entitle graduates to become ACS members immediately upon graduation. Graduates must be individually certified to the ACS by the Chemistry and Biochemistry Department chair if they have satisfactorily completed an approved program of study. ACS certification standards are rigorous; a graduate who has met them carries a distinction that is well recognized in the profession. Broadly speaking, ACS certification requirements are satisfied by completing CHEM 122 as an elective and graduating with a Chemistry B.S. (biochemistry concentration excluded). A year of study in a major modern foreign language is recommended. More information is available from the Chemistry and Biochemistry undergraduate advisor.

[Optional Catchall]

**General B.S. Degree**

**Course Requirements**

The Bachelor of Science (B.S.) major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly based. The course requirements for the B.S. major are as follows; please refer to each course description for a detailed listing of prerequisites.

**Lower-Division Courses**

**General Chemistry:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1M</td>
<td>General Chemistry Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>CHEM 1C</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1N</td>
<td>General Chemistry Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

**Calculus:**

Choose one of the following options:

Either these courses:

- MATH 11A Calculus with Applications 5

or these courses:

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

**Multivariable Calculus:**

Choose one of the following options:

Either this course:

- MATH 22 Introduction to Calculus of Several Variables 5

or these courses:

- MATH 23A Vector Calculus 5
- MATH 23B Vector Calculus 5

or this course:

- AM 30 Multivariate Calculus for Engineers 5

**Advanced Mathematics:**

Choose one of the following courses:

- AM 10 Mathematical Methods for Engineers I 5
- MATH 21 Linear Algebra 5
- MATH 24 Ordinary Differential Equations 5

**Physics:**

Choose one of the following options:

Either these courses:

- PHYS 5A Introduction to Physics I 5
- PHYS 5L Introduction to Physics I Laboratory 1
- PHYS 5B Introduction to Physics II 5
- PHYS 5M Introduction to Physics II Laboratory 1
- PHYS 5C Introduction to Physics III 5
- PHYS 5N Introduction to Physics Laboratory III 1

or these courses:

- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1
A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 5A and PHYS 5L and then take and complete PHYS 6B and PHYS 6M and PHYS 6C and PHYS 6N.

**Organic Chemistry:**
- CHEM 8A: Organic Chemistry 5
- CHEM 8L: Organic Chemistry Laboratory 2
- CHEM 8B: Organic Chemistry 5
- CHEM 8M: Organic Chemistry Laboratory 2

By permission and invitation of the instructor, students may substitute CHEM 8M with CHEM 8N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

**Upper-Division Courses**

**Intermediate Organic Chemistry:**
- CHEM 110L: Intermediate Organic Chemistry Laboratory 2

By permission and invitation of the instructor, students may substitute CHEM 110L with CHEM 110N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

**Inorganic Chemistry:**
- CHEM: Chemistry of Metals 5
- CHEM 151L: Inorganic Chemistry Laboratory 2

**Biochemistry:**
- CHEM 103: Biochemistry 5

**Physical Chemistry:**
- CHEM 163A: Quantum Mechanics and Basic Spectroscopy 5
- CHEM 163B: Chemical Thermodynamics 5
- CHEM 163C: Statistical Thermodynamics and Kinetics 5
- CHEM 164: Physical Chemistry Laboratory 5

One of the following laboratory courses:
- CHEM 146A: Advanced Laboratory in Organic Chemistry 3
- CHEM 146B: Advanced Laboratory in Inorganic Chemistry 3
- CHEM 146C: Advanced Laboratory in Physical Chemistry 3

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

**Electives**

At least two from the following list:
- CHEM 122: Principles of Instrumental Analysis 5
- CHEM 143: Organic Chemical Structure and Reactions 5
- CHEM 144: Catalysis In Organic Synthesis Using Metals and Metalloids Based Reagents 5
- CHEM 151B: Group Elements 5
- CHEM 156C: Materials Chemistry 5
- CHEM 169: Chemistry and Biology of Drug Design and Discovery 5
- CHEM 171: Chemical Biology 5
- BIOC 100C: Biochemistry and Molecular Biology 5
- METX 101: Sources and Fates of Pollutants 5
- METX 102: Cell and Molecular Toxicology 5
- OCEA 120: Aquatic Chemistry: Principles and Applications 5
- OCEA 121: Aqueous Geochemistry 5
- PHYS 180: Biophysics 5

To receive certification from the American Chemical Society, you must complete CHEM 122.

Students may also satisfy the elective requirement by completing a Chemistry Graduate Course with permission from the instructor and department. Please consult with a department undergraduate advisor before enrolling.

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) Requirement.
The DC Requirement for the Bachelor of Science (B.S.) degree in chemistry is satisfied by completing:

**CHEM 151L**
Inorganic Chemistry Laboratory 2

**Plus one of the following courses:**

- **CHEM 146A**
  Advanced Laboratory in Organic Chemistry 3
- **CHEM 146B**
  Advanced Laboratory in Inorganic Chemistry 3
- **CHEM 146C**
  Advanced Laboratory in Physical Chemistry 3

**Comprehensive Requirement**

The comprehensive requirement is a part of all UCSC degrees. For the Chemistry B.S., this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences.

**CHEM 151L**
Inorganic Chemistry Laboratory 2

**Plus one of the following courses:**

- **CHEM 146A**
  Advanced Laboratory in Organic Chemistry 3
- **CHEM 146B**
  Advanced Laboratory in Inorganic Chemistry 3
- **CHEM 146C**
  Advanced Laboratory in Physical Chemistry 3

**Planners**

This is the ideal academic plan for those pursuing a chemistry B.S. major. If needed, this plan can be arranged differently. Please see an academic advisor in the Chemistry Department to create your specific official academic plan.

**CHEM 146A** is offered in the fall quarter; CHEM 146B or CHEM 146C is offered in spring.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF and SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice.
Note: Failure to complete both the required and highly recommended courses before transfer may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

Required courses before transferring:

- General chemistry (full sequence with lab) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Single variable calculus (full sequence) MATH 11A, MATH 11B
- Multivariable calculus (one-semester course) MATH 22

Highly Recommended Courses before transferring:

- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L, CHEM 8B & CHEM 8M
- Calculus-based physics PHYS 6A & PHYS 6L, PHYS 6B & PHYS 6M

Biochemistry Concentration

The biochemistry concentration is designed for students who intend to pursue a career in biochemistry or in a related field such as biotechnology, and it provides an exceptionally rigorous chemistry emphasis.

Course Requirements

Lower-Division Courses

General Chemistry:

- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1M General Chemistry Laboratory 2
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2

Calculus:

Choose one of the following options:

- MATH 11A Calculus with Applications 5
- MATH 11B Calculus with Applications 5
- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

Multivariable Calculus:

Either this course

- MATH 22 Introduction to Calculus of Several Variables 5

or these courses

- MATH 23A Vector Calculus 5
- MATH 23B Vector Calculus 5

or this course

- AM 30 Multivariate Calculus for Engineers 5

Advanced Mathematics:

Choose one of the following courses:

- AM 10 Mathematical Methods for Engineers I 5
- MATH 21 Linear Algebra 5
- MATH 24 Ordinary Differential Equations 5

Introductory Biology:

- BIOL 20A Cell and Molecular Biology 5
- BIOE 20B Development and Physiology 5

Physics:

Choose one of the following options:

Either these courses

- PHYS 5A Introduction to Physics I 5
- PHYS 5L Introduction to Physics I Laboratory 1
- PHYS 5B Introduction to Physics II 5
- PHYS 5M Introduction to Physics II Laboratory 1
- PHYS 5C Introduction to Physics III 5
- PHYS 5N Introduction to Physics III Laboratory 1

or these courses

- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1
- PHYS 6C Introductory Physics III 5
- PHYS 6N Introductory Physics III Laboratory 1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 6A and then take and complete PHYS 5B.
complete PHYS 5A and PHYS 5L and then take and complete PHYS 6B and PHYS 6M and PHYS 6C and PHYS 6N.

**Organic Chemistry:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 8A</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8L</td>
<td>Organic Chemistry Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>CHEM 8B</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8M</td>
<td>Organic Chemistry Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

By permission and invitation of the instructor, students may substitute CHEM 8M with CHEM 8N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

**Upper-Division Courses**

**Intermediate Organic Chemistry:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 110</td>
<td>Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 110L</td>
<td>Intermediate Organic Chemistry Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

By permission and invitation of the instructor, students may substitute CHEM 110L with CHEM 110N, Honors Intermediate Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

**Inorganic Chemistry:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 151A</td>
<td>Chemistry of Metals</td>
<td>5</td>
</tr>
<tr>

<tr>
<td>CHEM 163C</td>
<td>Statistical Thermodynamics and Kinetics</td>
<td>5</td>
</tr>
</tbody>
</table>

**Electives**

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in chemistry with a biochemistry concentration is satisfied by completing:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 151L</td>
<td>Inorganic Chemistry Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>BIOC 110L</td>
<td>Advanced Biochemistry Laboratory</td>
<td>5</td>
</tr>
</tbody>
</table>

**Comprehensive Requirement**

The comprehensive requirement is a part of all UCSC degrees. For the Chemistry B.S with a Biochemistry Concentration, this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 151L</td>
<td>Inorganic Chemistry Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>BIOC 110L</td>
<td>Advanced Biochemistry Laboratory</td>
<td>5</td>
</tr>
</tbody>
</table>

**Planners**

This is the most general academic plan for this major. If needed, the plan can be rearranged. Please see an academic advisor in the Chemistry Department to create your specific official academic plan.

<table>
<thead>
<tr>
<th>Semester</th>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (frosh)</td>

</tr>
</tbody>
</table>

**Note:** Failure to complete both the required and highly recommended courses prior to transfer may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

**Required Courses prior to transfer:**

* General chemistry (full sequence with lab) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N

* Single variable calculus (full sequence) MATH 11A, MATH 11B

* Multivariable calculus (one-semester course) MATH 22

**Highly Recommended Courses prior to transfer:**

* Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L, CHEM 8B & CHEM 8M

* Calculus-based physics PHYS 6A & PHYS 6L, PHYS 6B & PHYS 6M

**BIOCHEMISTRY AND MOLECULAR BIOLOGY B.S.**

**Information and Policies**

**Introduction**

Research at the macromolecular, molecular, and atomic levels is revolutionizing our understanding of the fundamental processes of life. Students interested in joining this search are best prepared by undertaking coursework in biology, chemistry, physics, mathematics, and computer science. The undergraduate major in Biochemistry and Molecular Biology (BMB) is offered by faculty who are actively engaged in research on biological systems.

Students who declare the BMB major earn a bachelor of science (B.S.) degree. The BMB major constitutes an integrated curriculum of basic instruction in biology, chemistry, mathematics, and physics, followed by the opportunity to pursue advanced study in specialized areas of interest. In modern, well-equipped laboratories, distinguished faculty are engaged in frontline research at UCSC. The Department of Chemistry and Biochemistry and the Department of Molecular, Cell, and Developmental Biology each host a very active seminar series in which internationally-recognized scientists present their current research findings. Advanced BMB undergraduates are encouraged to attend.

The BMB program features close faculty-student interaction, stimulating learning environments, and opportunities for independent research and study. Students majoring in BMB are encouraged to become involved in research under the guidance of a faculty sponsor. Many students participating in this aspect of the program have made important contributions to the scientific literature.

Given the wide scope and interdisciplinary nature of this program, a considerable degree of flexibility has been incorporated into the major. All prospective majors should see the BMB academic advisor in the Chemistry and Biochemistry Department Office as early as possible. Junior transfer students or others with questions should consult the program website. A double major of BMB
Academic Advising for the Program

The Chemistry and Biochemistry advisor provides counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major in a timely manner. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the Transfer Information and Policy Section below.

Getting Started in the Major

Prospective majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Students taking chemistry at UC Santa Cruz begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

In order to determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. in biochemistry and molecular biology should be able to:

• demonstrate mastery of a broad set of chemical and biological knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, biochemistry, and molecular biology);

• solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;

• use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about topics relating to chemistry and biology;

• know and follow the proper procedures and regulations for safe handling and use of chemicals, nucleic acids and common laboratory instruments;

• understand the objective of their chemical and biological experiments, properly carry out the experiments, and appropriately record and analyze the results;

• use computers in data acquisition and processing, and use available software as a tool in data analysis;

• use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;

• communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and

• collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these five required courses:

CHEM 1B General Chemistry 5
CHEM 1C General Chemistry 5
CHEM 8A Organic Chemistry 5
CHEM 8B Organic Chemistry 5
BIOL 20A Cell and Molecular Biology 5

Note that since CHEM 1A is a prerequisite for CHEM 1C, students must also complete CHEM 1A with a grade of C or better. Transfer students must have a full year of general chemistry.

Students must have taken CHEM 8B or be enrolled prior to the end of year two.

Plus one of the following options:

Either this course
MATH 11A Calculus with Applications 5

or this course
MATH 19A Calculus for Science, Engineering, and Mathematics 5
Appeal Process

Students may appeal to the major either prior to OR after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent).

To appeal to declare a Chemistry major, submit a letter to the chemistry advisor, chemistryadvising@ucsc.edu.

Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process on the Chemistry website.

How to Declare a Major

You may declare a major as early as you would like if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students who enter UC Santa Cruz as frosh are required to formally petition to declare a major by the campus deadline in their sixth quarter and before enrolling in their third year (or equivalent). Upper-division transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of Chemistry website. For assistance, please contact chemistry advising at chemistryadvising@ucsc.edu.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh) will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1C</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8A</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8B</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following options:

Either this course

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11A</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>or this course</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

Students Entering at the Junior Level

Students entering at the junior level who wish to graduate in two years after coming to UC Santa Cruz should also complete the equivalents of the following preparatory courses prior to transfer:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8L</td>
<td>Organic Chemistry</td>
<td>2</td>
</tr>
<tr>
<td>CHEM 8M</td>
<td>Organic Chemistry</td>
<td>2</td>
</tr>
</tbody>
</table>

As well as one of the following:

Either this course

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11B</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>or this course</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

While not a required course, MATH 22 is recommended for students who wish to take CHEM 163A/CHEM 163B instead of BIOC 163A/BIOC 163B

Getting Started at UCSC as a Transfer Student

Transfer students are highly encouraged to meet with the chemistry academic advisor in their first quarter. For assistance with advising, please contact Chemistry Advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found on our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to UC Santa Cruz but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Transfer students who are proposed in a different major (other than chemistry) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed. For more information on qualifying for the major as a transfer applicant, see the Transfer Students webpage.

Letter Grade Policy

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the major requirements must be taken for a letter grade.
Additionally, letter grades of C or higher must be attained in all major courses to meet requirements for graduation.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses (numbered 100–199) required for any biochemistry and molecular biology major must be taken through the chemistry or biology programs at UCSC, not as transfer credits from another department or institution. Students are advised to contact the Chemistry and Biochemistry Department undergraduate advisor before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the Chemistry and Biochemistry Department website.

Double Majors and Major/Minor Combinations Policy

A double major of BMB with the biological sciences majors or chemistry is not permitted. No minor is offered.

Study Abroad

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a GPA of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Program Planning Notes

Students who do not begin the lower-division requirements during their first year, and who do not complete the organic chemistry requirements by the end of their second year, will have difficulty completing the program within four years. The BMB academic advisor works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward completion.

It is strongly recommended that students avail themselves of the opportunities to obtain firsthand research experience through either independent study, senior thesis research, or by working in a faculty research lab.

A number of graduate courses in Biochemistry and Molecular Biology are offered by both the molecular, cell, and developmental biology (MCDB), and chemistry and biochemistry departments. Advanced undergraduates possessing the necessary prerequisites may take one or more of these courses with the consent of the instructor.

Materials Fee

Biochemistry and Molecular Biology students should be aware of the materials fee required for some laboratory courses. The fee is billed to the student’s account for specific laboratory materials purchased through the university. Fees generally range from $18 to $75 per course. Students may incur additional expenses purchasing individual supplies.

BIOC 100C  Biochemistry and Molecular Biology AND

Either this course
BIOL 101L  Molecular Biology Laboratory 2

or this course
BIOL 102L  Toxic RNA Lab II 5

Genetics
BIOL 105  Genetics 5

Cell Biology
BIOL 110  Cell Biology 5

Eukaryotic Molecular Biology
BIOL 115  Eukaryotic Molecular Biology 5

Physical Chemistry
BIOC 163A  Quantum Mechanics, Spectroscopy and Molecular Structure for Biochemistry and Molecular Biology 5
BIOC 163B  Biochemical Thermodynamics and Statistical Mechanics for Biochemistry and Molecular Biology 5

A student may combine the CHEM 163 series with the BIOC 163 series to complete this portion of the major requirement(s). For example, a student can take and complete CHEM 163A and then take and complete BIOC 163B. Be aware of the MATH 22 prerequisite for CHEM 163A and CHEM 163B.

Senior Exit Lab
One of the following laboratory courses (also satisfies the Disciplinary Communication (DC) and Comprehensive Requirement):
BIOC 110L  Advanced Biochemistry Laboratory 5
BIOL 100L  Biochemistry Laboratory 5
BIOL 103L  Toxic RNA Lab III 5
BIOL 105L  Eukaryotic Genetics Laboratory 5
BIOL 106L  Eukaryotic Genetic Engineering 5
BIOL 108L  Synthetic Gene Regulation Lab III 5
BIOL 109L  Yeast Molecular Genetics Laboratory 5
BIOL 110L  Cell Biology Laboratory 5
BIOL 115L  Eukaryotic Molecular Biology Laboratory 5
BIOL 121L  Environmental Phage Biology Laboratory 5
BIOL 186L  Undergraduate Research in MCD Biology 5
METX 119L  Microbiology Laboratory 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in Biochemistry and Molecular Biology is satisfied by completing one of the Senior Exit Labs listed in the previous section.

The DC requirement must be satisfied at UC Santa Cruz and may not be transferred from another institution.

Comprehensive Requirement
Students must satisfy the comprehensive requirement by receiving a passing letter grade in any of the Senior Exit Labs listed in the previous section. In addition, students are encouraged to get research experience by working in a faculty research lab.
Planners

This is the ideal academic plan for those pursuing the biochemistry and molecular biology B.S. major. Please see an academic advisor in the Chemistry Department to create your specific official academic plan.

UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M, CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A & MATH 11B, MATH 22
- Organic chemistry with lab (one-year sequence) CHEM 8A & CHEM 8L, CHEM 8B & CHEM 8M

Courses are subject to being offered in different terms. Please check departmental websites for updates on course offerings.

CHEMISTRY MINOR

For all students entering UC Santa Cruz in fall 2014 and later, all courses used to satisfy degree requirements in the chemistry and biochemistry minor must be taken for a letter grade.

For assistance please contact chemistry advising at chemistryadvising@ucsc.edu or visit our department website.

How to Declare the Chemistry Minor

Students electing a chemistry minor may not use the online petition to declare. Students should obtain a signed
UCSC Academic Planning Form from their first major advisor then bring a copy of that plan to the second major advisor. The second major advisor will review policy and time to degree guidelines on a quarter-by-quarter basis to determine ability to complete the program within the maximum number of quarters of enrollment available to you at UCSC. Advisors from both programs will sign both your Petition for Declaration of Major and your Academic Planning Form.

More information on minors may be found in the Office of the Registrar's Degree Requirements section of the Navigator.

CHEMISTRY M.S.

Introduction

Note: Applications for the Research Thesis path master’s degree are not being accepted at this time.

The Department of Chemistry and Biochemistry offers a coursework path to the master’s degree in which a student may earn the M.S. degree after approximately one year of coursework and a capstone seminar. This program serves the needs of such diverse groups as teachers on sabbaticals, technicians from industry and re-entry students. The coursework M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. The degree can be finished in one year if the student is well prepared for attainment exams. No financial aid is available for this program, although student loans may be available based from the FAFSA (Free Application for Federal Student Aid) program.

Prerequisites: A bachelor of arts (B.A.) or bachelor of science (B.S.) degree in chemistry or biochemistry. Applicants with a bachelor’s degree in another discipline must have taken all or most of the courses required for a B.A. or B.S. in chemistry or biochemistry at UC Santa Cruz.

Requirements

Course Requirements

Nine courses are required. Of these, at least seven must be lecture courses offered by the Department of Chemistry and Biochemistry. The remaining two courses may be lecture courses, seminars or independent study.

Of the seven Chemistry and Biochemistry lecture courses, at least four must be graduate level (200), but up to three may be advanced undergraduate level (100), excluding CHEM 109-CHEM 110. Courses used to satisfy attainment deficiencies (CHEM 163A-CHEM 163C, CHEM 151A, CHEM 103, and CHEM 143) do not count.

The seven lecture courses must include representatives from at least three of the chemistry subdisciplines: biochemistry, inorganic, organic, and physical.

For a further description of courses available, please visit the Graduate Student Handbook.

Other Requirements

A solid foundation in undergraduate chemistry is essential to a student’s progress in graduate studies and research. For this reason, all graduate degree candidates are required to take entrance (attainment) exams to confirm their preparation in the fields of biochemistry, inorganic, organic and/or physical chemistry.

Students must satisfy the attainment requirement in three of four subdisciplines of their choosing.

Capstone Requirement

The candidate is required to present a passing literature seminar on a topic of their choosing, demonstrating the ability to read and critically analyze research data, to organize data into a coherent presentation, and to communicate the information in a clear and logical manner.

Applying for Graduation

M.S. students must complete the Application for the Master’s Degree form by the appropriate quarter’s deadline listed in the current Academic calendar.

The form can be found on the Graduate Division website or can be provided by the Chemistry Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

CHEMISTRY PH.D.

Introduction

Within the Ph.D. program students have the flexibility to design a course of study focused on personal research interests, and at the same time are expected to maintain the high intellectual standards associated with the doctoral degree. Research options include biochemistry, physical chemistry, biophysical chemistry, inorganic chemistry, bioinorganic chemistry, materials chemistry, physical-organic chemistry, and bioorganic chemistry. Some research groups are interdisciplinary and are involved in two or more of these areas.

The Program in Biomedical Sciences and Engineering fosters interdisciplinary research between the Chemistry and Biochemistry Department and the Departments of Molecular, Cell and Development Biology; Microbiology and Environmental Toxicology; and Biomolecular Science and Engineering. First-year students can do research rotations with more than 60 faculty members, who come primarily from the Departments of Molecular, Cell, and Developmental Biology, Biomolecular Engineering, Chemistry and
Biochemistry, and Microbiology and Environmental Toxicology.

Advancement to Candidacy

Course Requirements

Graduate students are expected to acquire an in-depth understanding of their area of specialization through a core curriculum that prepares them for advanced study and research. The course requirement is 15 credits of core courses (three courses) and 10 credits (two courses) of electives. Electives may be either at the graduate level (200 series) or at the advanced undergraduate level (100 series). Twenty of the 25 credits (four 5-credit courses) must be chemistry and biochemistry courses. The remaining 5 credits may be in chemistry and biochemistry or in a related discipline such as molecular, cell, and developmental (MCD) biology; microbiology and environmental toxicology; physics; math; biomolecular engineering; electrical engineering; etc. Eligible electives do not include CHEM 163A/CHEM 163B/CHEM 163C, CHEM 109, CHEM 110, CHEM 110L, CHEM 143 or CHEM 151A, but can include CHEM 151B and CHEM 169. Undergraduate courses taken to satisfy attainment exam deficiencies cannot be counted. The lecture course requirement must be met before advancing to candidacy. Students may take more than the required five courses at any time depending on their interests or research.

Please refer to the Graduate Student Handbook for the current core and elective curriculum by area of specialization.

Pre-Qualifying Requirements

- Graduate students must choose their research advisor and join a lab in spring quarter (by May 1) of the first year. Ph.D. students choose two additional faculty members to complete their research committee.

- The Department of Chemistry and Biochemistry requires that all Ph.D. students give a literature seminar in their fourth, fifth or sixth quarter. Physical, inorganic and biochemistry students present a second-year seminar on a topic of current interest in published research outside the candidate's own research area. Organic students present a second-year seminar on a topic of current interest within the candidate's own research area with the understanding that their actual Ph.D. research may be different and will be subject to the approval of their principal investigator. In each case, the oral presentation is accompanied by a detailed written document that describes the contents of the presentation.

Teaching Requirement

The focus on high quality undergraduate education is one of the most outstanding features of the UC Santa Cruz campus. Teaching is a job that is taken very seriously and many graduate students and faculty come to UCSC because they want to be in an atmosphere where both teaching and research are important. Therefore, we require that each chemistry graduate student serve as a teaching assistant for a minimum of three quarters.

Qualifying Examination

By the end of the seventh quarter (typically fall of the third year), pass the Ph.D. oral qualifying examination before an examining committee consisting of three research committee members plus one outside member approved by the graduate dean. The Ph.D. candidate presents (a) a summary of current research results and future directions, and (b) an original research proposal on a chemistry or biochemistry topic unrelated or partially related to the candidate's current thesis research. The latter must be approved by committee prior to the oral examination. In addition, a detailed written research proposal will be submitted for evaluation by the examining committee.

Dissertation

Dissertation

When the dissertation reading committee agrees that the research is ready to be submitted, the student writes the dissertation according to the guidelines prescribed by the University Library and the Graduate Division.

The dissertation, completed in the format specified by the Graduate Council and approved by the dissertation committee, must be submitted to the Graduate Division no later than the last day of the term in which the degree is to be awarded.

Academic Progress

The academic progress of each continuing graduate student shall be reviewed annually by the student's department or committee of studies by the end of the spring term. Students will receive a notice with the committee findings and details of expected requirements for the following year.

Advanced students must meet with their dissertation reading committee at least once a year, typically during the fall quarter, to report progress in an updated prospectus and get advice and guidance for the coming year.

The fourth-year review gives the student an opportunity to focus and plan their research and to begin shaping the final product—the research dissertation. With this goal in mind, the student presents their research progress to the committee, obtains feedback and receives guidance on future directions.
Progress discussions and reviews are held in fall quarter of the fifth year and the sixth year, if necessary, until the dissertation is submitted. The format is the same as described above for the fourth-year review.

Dissertation Defense

The dissertation seminar, a presentation open to the public, should be scheduled at least one week prior to submitting the dissertation. Students must submit the doctoral thesis to the dissertation reading committee for tentative approval at least one month before presenting a defense seminar. The faculty, through the dissertation reading committee chair, makes the final departmental decision regarding the awarding of the Ph.D. degree. The decision is subject to the approval of the graduate dean.

Applying for Graduation

Students close to completing their degree must file an application for the Ph.D. degree early in the quarter in which they wish to graduate (see the Academic and Administrative Calendar for deadline). The application is your official notification to the graduate dean of your intent to graduate. This form is available on the Graduate Division’s web site.

Normative Time to Degree

The department has established five years and one quarter normative time to degree. Extensions may be granted in the 17th and 18th quarters if funding is available. Ph.D. candidates are expected to complete research and write the dissertation within nine quarters after advancing to candidacy following a successful Ph.D. oral qualifying examination. Financial support is not available after 18 quarters in the graduate program.

Ph.D. Program in Biomedical Sciences and Engineering (PBSE) Chemical Biology
Biochemistry and Biophysics (CB3)

The Department of Chemistry and Biochemistry participates in the graduate Program in Biomedical Science and Engineering (PBSE) through its administration of the Chemical Biology, Biochemistry and Biophysics (CB3) training track. Sixty-one faculty members, who come primarily from the Departments of Molecular, Cell, and Developmental Biology; Biomolecular Engineering; Chemistry and Biochemistry; and Microbiology and Environmental Toxicology offer an unusual breadth of expertise and exceptional opportunities in interdisciplinary graduate research training. When students apply to the PBSE they indicate interest in one of four training tracks:

- Molecular, cell and developmental biology (MCD)
- Chemical biology, biochemistry and biophysics (CB3)
- Microbial biology and pathogenesis (MICRO)
- Molecular, cell and developmental biology (MCD)

The Ph.D. track in chemical biology, biochemistry and biophysics (CB3) provides students with the opportunity to carry out cutting-edge research at the interface between biology and chemistry. The training program emphasizes analysis of molecular structure and mechanism as well as the use of organic chemistry to address biological questions. Interdisciplinary research is encouraged and supported by a diverse group of faculty.

After successful completion of all of the Ph.D. requirements, students in this track will be awarded a Ph.D. degree in chemistry from the Department of Chemistry and Biochemistry.

The program provides the flexibility to craft an individual curriculum that specifically suits the needs of the student's research interests. Second-year students take oral qualifying examinations and initiate independent research projects that ultimately lead to their dissertation. Advanced graduate students work under the direct supervision of faculty members in a highly interactive, collaborative research environment. All students participate in a variety of seminars, advanced special-topics courses, and research group meetings designed to provide continuing learning opportunities.

Laboratory Rotations

First-year students do three, seven-week rotations during fall and winter quarters in the laboratory of three PBSE-affiliated faculty members. Performance in each rotation is graded as satisfactory/unsatisfactory. At the end of each rotation period, students will present on their project either with a short talk or poster presentation.

Teaching Assistant

Serve as a TA for a minimum of two quarters. Students must meet this requirement before advancing to candidacy.

Oral Qualifying Examination

Pass the Ph.D. oral qualifying examination before an examining committee by the end of the student’s sixth quarter. Students must demonstrate an expertise in their area of research and a six-page NIH-style research strategy and specific aims page on their planned dissertation research. Upon passing that examination, the Dissertation Reading Committee (DRC) is formed. The committee comprises the advisor plus two members of the CB3 track.

Third-Year Talk

Students present a public seminar that is based on their dissertation research in the spring quarter of their third year.
Advance to Candidacy

After successfully completing the third year talk and all other requirements have been completed, the student will advance to candidacy.

All students must meet with their dissertation advisory committee each year until completion of the thesis.

Dissertation

The final requirement for the Ph.D. degree is acceptance of the student's dissertation under the rules of the Academic Senate. A three-member dissertation advisory committee (DRC), headed by the student's research advisor, evaluates the dissertation for the department.

Students are required to give a public talk before their final submission on the principal results of their research.

Required Coursework

In addition to the courses listed below, CB3 Ph.D. students are required to take at least three additional graduate-level lecture courses by the end of the third year. A list of approved elective courses is available on the PBSE-CB3 website.

Students also enroll in CHEM 291 (weekly research seminars) until they advance to candidacy.

COASTAL SCIENCE AND POLICY M.S.

Introduction

Students in the University of California, Santa Cruz's Coastal Science and Policy Program (CSP) will develop a range of skills, interdisciplinarity knowledge, and pragmatic approaches to become effective leaders at solving coastal sustainability challenges, from watersheds to the open ocean. We offer in-depth interaction with faculty members, professionals, and practitioners for small cohorts of diverse students hailing from California, additional U.S. states, and other nations. In year one of the two-year master's degree program, students take courses on concepts and approaches from the natural and social sciences, including biophysical, ecological, social, economic, policy, leadership, and communication dimensions. During the first year, students also submit a guided, strategic process for each student to develop their second-year capstone project and to identify capstone partner organizations from the non-governmental, government, or private sectors. Students will additionally participate in workshops to strengthen communication, technical, and leadership skills and in seminars with diverse leaders to build their professional networks. In the second year, each student embeds with their selected partner organization to conduct the solutions-focused capstone project and participates weekly in a video-link capstone seminar. Students also use a summer placement (between years one and two) to gain training in specific skills or to start the capstone project. At the end of the second year, students present their capstone deliverables in writing and via an oral public presentation. With the combination of focused courses, skill set development, and practical experience, students will be well prepared and highly competitive for the diverse job opportunities in the growing fields of coastal science and policy. Although the focus of most material will be coastal or marine, the principles and practices learned by the students will be applicable in any geographical location or sector.

The program focuses on practical training to provide integrated, scalable solutions to social and ecological challenges under four broad themes that leverage UCSC’s existing leadership in coastal sustainability:

- Conserving biodiversity, sustaining ecosystem processes, and ensuring human well-being
- Mitigating hazards to nature and society; fostering societal adaptation and climate action
- Sustaining marine, freshwater, and terrestrial food and energy systems
- Advancing innovative financial and policy approaches in business, government, and civil society
Preparation for Graduate Work in Coastal Science and Policy

Students admitted to the Master of Science (M.S.) in Coastal Science and Policy Program will have completed a bachelor’s degree at a four-year university in a field relevant to coastal sustainability. Relevant fields are diverse and include the natural sciences (e.g., biology, earth sciences, chemistry, oceanography), social sciences (e.g., economics or business, human ecology, political science, sociology), interdisciplinary programs (e.g., environmental studies and sciences) and engineering. Regardless of undergraduate major and/or minors, specific additional requirements prior to admission include at least one course in writing and one course in statistics; as well as coursework in at least two of the following three areas: biological sciences, physical sciences, and the social sciences (including policy and economics). Students are not expected to have identified a faculty advisor prior to joining the program. Students from underrepresented and diverse racial, ethnic, cultural, socioeconomic, and disciplinary backgrounds are encouraged to apply. We anticipate that competitive applicants to the program will have additional experience, such as a combination of coursework, internships, jobs and research, in relevant fields.

Requirements

Course Requirements

The master's degree in coastal science and policy is a Plan II (capstone project) degree.

Core Courses

The M.S. program will include a core set of three foundational and seven developmental courses.

Foundational Courses

- CSP 200 Natural Sciences for Coastal Sustainability 5
- CSP 210 Social Sciences for Coastal Sustainability 5
- CSP 220 Economics for Coastal Sustainability 5

Developmental Courses

These courses cut across multiple disciplines and will be taught by core faculty, partner practitioner-scientists, and specialist trainers.

- CSP 230 Integrated Problem-Based Discussion
- CSP 231A CSP Year 1 Capstone Planning & Design Fall 2
- CSP 231B CSP Year 1 Capstone Planning & Design Winter 2
- ENVS 240 Public Policy and Conservation 5
- ENVS 250 Coastal Governance 5
- CSP 244 Adaptation and Planning 5
- BIOE 262 Facilitating Change in Coastal Science Policy 5

Methods and Elective Courses

M.S. students are also required to take one methods course and one additional elective course in their first year. The methods and elective courses can be drawn from courses currently offered across the UCSC campus. The methods course should provide training in quantitative or qualitative research design, tools, and analysis, as well as broaden the student’s disciplinary knowledge. For example, incoming students with an undergraduate degree in the natural sciences (e.g., biology, ecology) may be expected to take a graduate-level elective course in the social sciences (e.g., politics, economics).

The methods requirement can be met by taking CSP 241/CSP 241L (cross-listed with BIOE 286/BIOE 286L), another course from the list of approved methods courses found here, or by approval of the program director. The selection of the methods and elective courses will be made in consultation with the student’s faculty advisor and program, with final approval from the program director.

- CSP 281A Hacking for Oceans—Lean Design Methods 5
- CSP 292 Special Topics in Coastal Science and Policy 2
- CSP 297 Independent Study in Coastal Science and Policy 5
- BIOE 286 Experimental Design and Data Analysis 5
- BIOE 286L Experimental Design and Data Analysis Lab 2

Other Requirements

Summer Placement

During the summer at the end of their first year, M.S. students will be required to participate in an intensive summer placement program. Students may use the summer placement to gain training in specific skills or to start the capstone project. This placement will consist of working within a partner agency, nongovernmental organization, or business to provide trainees with practical awareness in the conservation and sustainability science field and give them firsthand immersion in the processes involved in implementing scientific knowledge and innovations as components of solutions to the complex challenge of domestic or international coastal sustainability. Placement projects will be required to include: 1) a real concern of the institutional partner, 2) research, solutions development, and implementation, and 3) strong interdisciplinary elements. A faculty advisor will oversee the placement. It is the intention that, in collaboration with institutional partners and CSP advisors, students’ capstone projects will emerge from, or be heavily informed by this summer placement experience.

Capstone Project

In the second year, students will implement a capstone project by enrolling in and fulfilling the requirements for
CSP 290, Coastal Science and Policy Capstone Project (10 credits/quarter). This project is typically developed during Year 1 of the program in collaboration with a practitioner partner and a CSP faculty advisor, and with oversight from the program. The project should: a) address a real concern of the institutional partner; and b) include research, solutions development, and implementation, and be strongly interdisciplinary in nature. A program team consisting of the student’s CSP faculty advisor and practitioner partner will advise on the capstone project, with programmatic guidance from the CSP assistant director. In the final quarter (spring, Year 2) students will provide a final written report and oral presentation of the capstone project to CSP students, faculty and institutional partners. The final presentations will be required to address both the social science and natural science elements of the selected project.

CSP 290A Coastal Science and Policy Capstone Project 10
CSP 290B Coastal Science and Policy Capstone Project 10
CSP 290C Coastal Science and Policy Capstone Project 10

Capstone Project Seminar
Each quarter of the second year, students will enroll in CSP 291, Coastal Science and Policy Capstone Seminar (2 credits/quarter). This seminar will serve as a forum, led by an interdisciplinary team of social/natural science faculty, for students to discuss current topics and approaches in sustainability science as well as an opportunity for students to present issues, topics, and proposals relevant to their capstone projects. Students enrolled in this course will provide oral and written peer review of other students’ projects and presentations.

CSP 291 Coastal Science and Policy Capstone Seminar 2

Applying for Graduation

COASTAL SCIENCE AND POLICY DESIGNATED EMPHASIS

Introduction
The goal of the Coastal Science and Policy (CSP) program is to train future leaders in the science and policy of coastal sustainability in order to propel sustainable use of coastal resources and conservation of coastal biodiversity, ecosystems, socio-economic integrity, and ecological services. A CSP designated emphasis (DE) will serve Ph.D. students who desire to strengthen their ability to directly connect their science to actionable solutions in collaboration with practitioner organizations.

Students obtaining a DE in Coastal Science and Policy, will develop a range of skills, interdisciplinary knowledge, and trans-disciplinary approaches pertinent to creating real-world solutions to current and emerging concerns for coastal sustainability.

Preparation for Designated Emphasis in Coastal Science and Policy
To receive a designated emphasis in Coastal Science and Policy, graduate students must complete the following requirements in addition to the degree requirements for the doctorate in their home department:

Requirements
Ph.D. students will ideally apply for the CSP DE during their first year and complete a minimum of three CSP courses (15 credits) prior to proceeding to Ph.D. candidacy. The DE will only be available to Ph.D. students; master’s students are not eligible.

Committee Composition and Departmental Approvals
The student must have a DE advisor from the CSP core or affiliated faculty. The DE advisor commits to serving on the Ph.D. qualifying exam committee (typically as the outside member), and the dissertation reading committee.

The Ph.D. student’s primary faculty advisor, graduate program coordinator/advisor in the student’s home department, and CSP program must approve participation in the CSP DE. Only applications from registered students in good standing will be approved for the CSP DE.

The student must meet with their DE advisor to develop a coherent plan for meeting the requirements for the CSP DE, preferably before the end of the student’s first year. This plan must be approved by the CSP program director.
Course Requirements

Students are required to complete at least three CSP courses including two required courses (CSP 244 and CSP 245 [BIOE 262]; both offered in spring quarter).

Courses taken to fulfill program requirements within the home department will not count toward the designated emphasis program's required coursework.

CSP 244 Adaptation and Planning 5
BIOE 262 Facilitating Change in Coastal Science Policy 5

Additional Courses

Students work with their CSP advisor to review their academic background and select at least one and up to six additional CSP courses (minimum of five additional credits) to assure overall interdisciplinary competence in: social sciences for sustainability, economics for sustainability, natural sciences for sustainability, statistics, coastal governance, and policy analysis. Select courses from the list below:

CSP 200 Natural Sciences for Coastal Sustainability 5
CSP 210 Social Sciences for Coastal Sustainability 5
CSP 220 Economics for Coastal Sustainability 5
BIOE 286 Experimental Design and Data Analysis 5
BIOE 286L Experimental Design and Data Analysis Lab 2
ENVS 240 Public Policy and Conservation 5
ENVS 250 Coastal Governance 5
CSP 281A Hacking for Oceans—Lean Design Methods 5
CSP 292 Special Topics in Coastal Science and Policy 2
CSP 297 Independent Study in Coastal Science and Policy 5

Writing, Research and/or Teaching Requirements

Ph.D. students must work closely with a practitioner partner (from a government, business, or non-profit entity) on one interdisciplinary dissertation chapter on a coastal sustainability issue.

In-depth interaction with the practitioner is necessary in the conceptual formation and execution of the work to be reported in the chapter (i.e., the student cannot solely receive and analyze data from the collaborating practitioner).

The CSP program, via core courses, workshops, and mentoring by CSP faculty, provides substantial guidance on how to collaborate with partners in a manner that fits well with the dissertation research process. This requirement ensures that the student’s work will bring their knowledge to action, addresses real-world challenges and implements new, cutting-edge solutions.

Earth and Planetary Sciences

A232 Earth and Marine Sciences Building

PROGRAMS OFFERED

Earth Sciences B.S. (p. 265)
Environmental Sciences B.S. (p. 282)
Earth Sciences/Anthropology Combined Major (p. 286)
Earth Sciences Minor (p. 291)
Earth Science B.S./M.S Contiguous Pathway (p. 291)
Environmental Science B.S./Earth Science M.S. Contiguous Pathway (p. 291)
Earth Sciences M.S. (p. 294)
Earth Sciences Ph.D. (p. 295)

OTHER PROGRAMS OF INTEREST

Environmental Studies B.A. (p. 621)
Environmental Studies/Earth Science B.A. (p. 642)
Chemistry B.S. (p. 243)
Ecology and Evolutionary Biology B.S. (p. 302)
Science Education B.S. (p. 398)

The Earth and Planetary Sciences Department teaches and conducts research in a wide array of topics. We seek to answer questions such as:

How did the Earth form? How has it evolved since then? What makes up the interior of the Earth? How were Earth’s ocean and atmosphere generated, and how have they changed through time?

What is the history of life on Earth? What are the causes and effects of past mass extinctions?

How do mountain ranges form? What causes earthquakes? What causes island chains to form? What controls the evolution of glaciers? How do we prevent coastal erosion? How well can we predict tsunamis?

What has Earth’s climate been like in the past? How will climate change in the future? What changes are likely in Earth’s atmospheric properties?

What controls the supply and quality of our freshwater resources?

How are other planets in our solar system different from Earth? How did they evolve to their present state? How
have the impacts of asteroids on Earth and other planets affected their evolution?

A variety of methods and tools are used to help us address these questions. Geologists examine rocks and geologic formations in order to understand the processes that control their formation and evolution. Geochemists and mineralogists examine the chemical and mineral composition of rocks, sediments, and fossils using a variety of sophisticated analytical instruments. Geophysicists use seismometers to not only record earthquakes, but also to learn about the deeper parts of the Earth, which are studied in tandem using high-pressure experiments. Environmental scientists collect samples of the atmosphere, rivers, lakes, and the oceans, sometimes requiring the use of aircraft and ships. Spacecraft have visited and explored all of the planets in our solar system. Space-based satellites have provided a massive amount of data about Earth over the past few decades. Scientists from all disciplines use computer models to help them understand these complex systems.

The Department of Earth and Planetary Sciences offers a number of degrees that teach undergraduate and graduate students the knowledge and skills necessary to address these and many other questions. Along with the standard Earth sciences major, we offer degrees with concentrations in environmental geology, geology, ocean sciences, and planetary sciences. We also offer combined majors with environmental studies and anthropology. A minor in Earth sciences is also available. We offer courses across a wide range of topics, allowing students to tailor the curriculum to their interests. Courses are comprised of not only classroom lectures, but frequently field trips, laboratories, and computer exercises are involved. Many related courses are offered by other departments such as Ocean Sciences, Microbiology and Environmental Toxicology, Environmental Studies, Biological Sciences, Chemistry and Biochemistry, and Astronomy and Astrophysics. The university capstone requirement is often fulfilled by attending the departmental field camp, or by completing a senior research thesis, but other choices are also possible.

Graduates of our department continue on to a variety of careers, such as:

- Business and industry
- Geological and environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the people in the department, their areas of interest, departmental facilities, contact e-mails and phone numbers, and how to apply to join our department as an undergraduate or graduate student, please see our website.

**UNDERGRADUATE PROGRAM**

Classes suitable for non majors: EART 1, EART 2, EART 5, EART 8, EART 10, EART 11, EART 12, EART 20, EART 30, EART 66.

**GRADUATE PROGRAM**

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor’s degree at UCSC is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UCSC awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for some seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project.

**EARTH SCIENCES B.S.**

**Information and Policies**

**Introduction**

The bachelor of science (B.S.) program is designed for students who intend to pursue professional careers in Earth and planetary sciences, engineering, policy, law, teaching, or business or who otherwise desire the broad, quantitative training available at UC Santa Cruz. In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in Earth and planetary sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace.

The core of the major includes calculus, physics, chemistry, and a group of comprehensive Earth and
planetary sciences courses. For the standard B.S., students then select at least six additional courses from a diverse list of upper-division electives, with at least two that involve significant laboratory or field data acquisition and analysis. These electives, often in combination with additional upper-division courses from this and related departments, provide the student with expertise in one or more subdisciplines within Earth sciences.

Elective distributions can be designed to emphasize earthquake and faulting studies, Earth surface processes, Earth system sciences, geologic hazards, geology, crustal and deep-Earth geophysics, marine geophysics, and water resources. Four formal concentrations, all with specific course requirements and leading to an Earth and planetary sciences B.S., are available: geology, geophysics, ocean sciences, and planetary sciences. A senior comprehensive experience (senior thesis, geologic field camp, or intensive capstone course) is required of all majors.

**Academic Advising for the Program**

A student who wants to become an Earth sciences major should contact the Earth and Planetary Sciences Department undergraduate staff advisor, epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to meet with the undergraduate advisor to plan their program in detail. Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate advisor for the substitution petition form and more information about this process. Transfer students should consult the Transfer Information and Policy section for more detailed information about academic advising.

**Getting Started in the Major**

Welcome! Now that you are a registered freshman, the following information is your guide to getting started in your Earth sciences major.

All freshmen are required to complete summer orientation, for more information visit Campus Orientation Programs. Our freshmen orientation includes everything you need to know to get started on your Earth science major. If you have already attended orientation and simply need a refresher on getting enrolled, see our Freshmen Enrollment Guide.

Students with advanced placement credit must provide Admissions an official copy of your test score. You can verify your Advanced Placement (AP) examinations credit in your MyUCSC portal. For information on how your AP credit applies to your enrollment and your major, see our advanced placement credit page. If you have taken a college-level course that you would like credit for, you must send an official transcript to Admissions. If you wish to have that same course applied toward your major requirements, send an unofficial copy of your transcripts to epsadvising@ucsc.edu.

If you have already been admitted to UC Santa Cruz as a transfer student, our transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

**Program Learning Outcomes**

Students graduating with a B.S. in Earth and planetary sciences (all concentrations) should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

To qualify for the Earth sciences B.S. (including all concentrations within the major), a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology:

- **EART 5** California Geology 5
- **EART 10** Geologic Principles 5
- **EART 20** Environmental Geology 5

Transfer students may take an approved substitution for one of the above courses and should consult assist.org for equivalencies and the Transfer and Information Policy section for information about major qualifications.

**Appeal Process**

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter.

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences advisor within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

**How to Declare a Major**

Students who wish to declare the Earth science major start the process by scheduling an appointment with the department staff advisor to create an academic plan. Once academic planning has been completed students submit
the online major declaration petition to begin the major declaration process. Students are expected to complete the academic planning and online petition by the campus declaration deadline.

Transfer Information and Policy

Transfer Admission Screening Policy

The Earth and Planetary Sciences Department welcomes applications from transfer students who are prepared to enter as Earth Sciences majors. Students should reference assist.org to determine course equivalencies.

No major preparation courses are required prior to transfer; however, the following courses or their equivalents are recommended to ensure timely graduation:

<table>

Getting Started at UCSC as a Transfer Student

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UCSC.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and enrolling:

1. **Confirm you are a proposed Earth sciences major.** If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your proposed major is Earth Sciences, you will need to meet with the advisor for Earth Sciences.

2. **Once your courses have been articulated, you will receive an email from our office.** This email will include information on how your coursework articulated, suggestions for Fall enrollment, and invite you to make an appointment to talk with your major advisor.

3. **Make an appointment to talk to an advisor.** Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.

4. **Participate in Transfer Orientation and Welcome Week.** Transfer Orientation provides instructions on how to transfer your coursework to UCSC, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UCSC and begin your major coursework.

   - The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

5. **Declaring the Earth Sciences major.** In order to declare the Earth sciences major, transfer students must complete EART 5, or EART 10 or EART 20 or an approved equivalent course (with a C or better) and meet with the Earth and Planetary Sciences Department advisor by the declaration deadline.

Letter Grade Policy

All courses used to satisfy requirements for any of the Earth and planetary science majors must be taken for a
letter grade with the exception of the following courses, which may be taken Pass/No Pass: EART 195 Senior Thesis, EART 198 Internship, EART 199 Tutorial. Combined majors (Earth sciences/anthropology and Earth sciences/environmental studies) are currently exempt from this policy.

[Optional Catchall]

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate advisor for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Honors in the combined major with environmental studies are evaluated by the Environmental Studies Department. Highest honors may also be awarded in exceptional cases when a student’s overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Upper-Division Courses

All of the following courses:

- EART 110A Evolution of the Earth 5
- EART 110L Evolution of the Earth Laboratory 2
- EART 110B Earth as a Chemical System 5
- EART 110C The Dynamic Earth 5
- EART 110M Earth as a Chemical System Laboratory 2
- EART 110N The Dynamic Earth Laboratory 2

Two field/laboratory/data analysis

Lecture/lab combinations count as one course. The following courses satisfy this requirement:

- EART 107 Remote Sensing of the Environment 5
- EART 109 Elements of Field Geology 5
- EART 116 Hydrology 5
- EART 119 Introductory Computer Programming for Geoscientists 5
- EART 120 Sedimentology and Stratigraphy 5
- EART 125 Statistics and Data Analysis in the Geosciences 5
- EART 130 Igneous and Metamorphic Petrology 5
- EART 130L Petrology Laboratory 2
- EART 135L Practical Geochemistry 5
- EART 140 Geomorphology 5
- EART 140L Geomorphology Laboratory 2
- EART 142 Engineering Geology for Environmental Scientists 5
- EART 146 Groundwater 5
- EART 148 Glaciology 5
- EART 150 Structural Geology 5
- EART 150L Structural Geology Laboratory 2
- EART 150N Environmental Applications in Earth Sciences 5
- EART 150S Summer Field Study 5
- EART 150U Practical Geophysics 5
- EART 150V Senior Thesis 5

Electives

At least four additional upper-division elective courses from Earth sciences or ocean sciences offerings must be completed. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 196B and EART 198 may not be used to satisfy this requirement.

No more than one quarter of EART 199 may be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

- EART 100 Vertebrate Paleontology 5
- EART 101 Invertebrate Paleobiology 5
- EART 102 Marine Geology 5
- EART 104 Geologic Hazards 5
- EART 109 Elements of Field Geology 5
- EART 120 Sedimentology and Stratigraphy 5
- EART 140 Geomorphology 5
- EART 146 Groundwater 5
- EART 148 Glaciology 5
- EART 150 Structural Geology 5
- EART 160 Planetary Science 5
- EART 189B Summer Field Study 5
- EART 191A Climate Change Science and Policy 5
- EART 191C Practical Geophysics 5
- EART 195 Senior Thesis 5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.
Note: Courses used to satisfy the senior comprehensive requirement cannot be used to satisfy the upper-division elective requirement or the field/laboratory/data analysis requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field
EART 189A Geographic Information Systems with Applications in Earth Sciences 5
EART 189B Summer Field Study 5

Satisfactory completion of a senior thesis
A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199, Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

EART 195 Senior Thesis 5

Satisfactory completion of one of the following capstone course offerings:
EART 191A Climate Change Science and Policy 5
EART 191B Planetary Capstone 5
EART 191C Practical Geophysics 5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences advisor.

Other Options
Other options such as external field research experiences or internships may be suitable by permission of the faculty advisor.

Please meet with an advisor if you have an idea to propose.

Planners
Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate advisor and from faculty members.

Sample Four-Year Planner

<table>

|                 |                 | EART elective    |

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior
theses usually require at least two or three quarters for completion.

Sample Transfer (Two-Year) Planner

This planner assumes that students have completed all lower-division requirements, other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

<table>

</tbody>
</table>

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 110L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least two or three quarters for completion.

Geology Concentration

Course Requirements

Lower-Division Courses

All of the following courses:
- CHEM 1A: General Chemistry 5
- CHEM 1B: General Chemistry 5
- CHEM 1M: General Chemistry Laboratory 2
- CHEM 1C: General Chemistry 5
- CHEM 1N: General Chemistry Laboratory 2

Plus one of the following options:
- Either these courses
  - MATH 11A: Calculus with Applications 5
  - MATH 11B: Calculus with Applications 5

or these courses
- MATH 19A: Calculus for Science, Engineering, and Mathematics 5
- MATH 19B: Calculus for Science, Engineering, and Mathematics 5

Plus all of the following courses:
- PHYS 6A: Introductory Physics I 5
- PHYS 6L: Introductory Physics I Laboratory 1
- PHYS 6B: Introductory Physics II 5
- PHYS 6M: Introductory Physics II Laboratory 1

Plus one of the following options:
- Either these courses
  - EART 5: California Geology 5
  - EART 5L: California Geology Laboratory 1

or these courses
- EART 10: Geologic Principles 5
- EART 10L: Geologic Principles Laboratory 1

or these courses
- EART 20: Environmental Geology 5
- EART 20L: Environmental Geology Laboratory 1

Upper-Division Courses

All of the following courses:
- EART 109: Elements of Field Geology 5
- EART 109L: Field Geology Laboratory 2
- EART 110A: Evolution of the Earth 5
- EART 110L: Evolution of the Earth Laboratory 2
- EART 110B: Earth as a Chemical System 5
- EART 110M: Earth as a Chemical System Laboratory 2
- EART 110C: The Dynamic Earth 5
- EART 110N: The Dynamic Earth Laboratory 2
EART 120  Sedimentology and Stratigraphy 5  
EART 120L Sedimentology and Stratigraphy Laboratory 2  
EART 150 Structural Geology 5  
EART 150L Structural Geology Laboratory 2  

Geology Elective: One of the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

- EART 100 Vertebrate Paleontology 5  
- EART 100L Vertebrate Paleontology Laboratory 2  
- EART 101 Invertebrate Paleobiology 5  
- EART 101L Invertebrate Paleobiology Laboratory 1  
- EART 140 Geomorphology 5  
- EART 140L Geomorphology Laboratory 2  
- EART 142 Engineering Geology for Environmental Scientists 5  
- EART 146 Groundwater 5  

Electives

At least two additional upper-division elective courses (5+ credits each) from Earth sciences or ocean sciences offerings must be completed. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

- EART 196B and EART 198 may not be used to satisfy this requirement.

No more than one quarter of EART 199 may be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

- EART 100 Vertebrate Paleontology 5  
- EART 101 Invertebrate Paleobiology 5  
- EART 102 Marine Geology 5  
- EART 104 Geologic Hazards 5  
- EART 109 Elements of Field Geology 5  
- EART 120 Sedimentology and Stratigraphy 5  
- EART 140 Geomorphology 5  
- EART 146 Groundwater 5  
- EART 148 Glaciology 5  
- EART 150 Structural Geology 5  
- EART 160 Planetary Science 5  
- EART Summer Field Study 5  

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement.

The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career and to provide the instructional hours in the field needed to prepare students for the California professional geologist licensing requirements. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement cannot also be used to fulfill the upper-division elective requirement.

To do so, each student in the geology concentration must complete:

Satisfactory completion of Summer Field

EART 189A Geographic Information Systems with Applications in Earth Sciences 5  
EART 189B Summer Field Study 5  

Planners

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate advisor and from faculty members.

</table>
**Planetary Sciences Concentration**

The planetary sciences concentration is designed to provide students with a quantitative background appropriate for career pathways in the interdisciplinary study of planets and their satellites. The upper-division elective courses can be tailored for students interested in planetary interiors, atmospheres, and/or surfaces.

### Course Requirements

#### Lower-Division Courses

This planner assumes that students have completed all lower-division requirements other PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

<table>
<thead>
<tr>
<th>Year</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>

<td>EART 110B &amp; EART 110M</td>
<td>EART 109 &amp; EART 109L</td>
<td></td>
</tr>
</tbody>
</table>

#### Plus all of the following courses:

- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1M General Chemistry Laboratory 2
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2
- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1

#### Plus one of the following options:

Either these courses

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5
or these courses
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
or these courses
AM 15A Case-Study Calculus I 5
AM 15B Case-Study Calculus II 5

Plus one of the following courses:
MATH 22 Introduction to Calculus of Several Variables 5
MATH 23A Vector Calculus 5
EART 111 Mathematics in the Earth Sciences 5

Upper-Division Courses

All of the following courses:
EART 110A Evolution of the Earth 5
EART 110L Evolution of the Earth Laboratory 2
EART 110B Earth as a Chemical System 5
EART 110M System Laboratory 2
EART 110C The Dynamic Earth 5
EART 110N Laboratory 2
EART 119 Introductory Computer Programming for Geoscientists 5
EART 160 Planetary Science 5

Plus one of the following:

One elective from the following planetary science courses:
EART 162 Planetary Interiors 5
EART 163 Planetary Surfaces 5
EART 164 Planetary Atmospheres 5
EART 165 History and Geochemistry of the Solar System 5

Electives

At least three electives from upper-division Earth sciences, ocean sciences, astronomy, or mathematics must be completed. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 162 and EART 198 may not be used to satisfy this requirement.

No more than one quarter of EART 199 may be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Choosing from the following list is recommended, but not mandatory.
EART 107 Remote Sensing of the Environment 5
EART 109 Elements of Field Geology 5
EART 109L Field Geology Laboratory 2
EART 116 Hydrology 5
EART 121 The Atmosphere 5
EART 128 Isotopes: Fundamentals and Applications in Earth and Marine Sciences 5
EART 130 Igneous and Metamorphic Petrology 5
EART 130L Igneous and Metamorphic Petrology Laboratory 2
EART 140 Geomorphology 5
EART 140L Geomorphology Laboratory 2
EART 148 Glaciology 5
EART 150 Structural Geology 5
EART 150L Structural Geology Laboratory 2
EART 152 Tectonics 5
EART 162 Planetary Interiors 5
EART 163 Planetary Surfaces 5
EART 164 Planetary Atmospheres 5
EART 165 History and Geochemistry of the Solar System 5
EART 172 Geophysical Fluid Dynamics 5
ASTR 112 Physics of Stars 5
ASTR 118 Physics of Planetary Systems 5
MATH 130 Celestial Mechanics 5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:
EART 100 Vertebrate Paleontology 5
EART 101 Invertebrate Paleobiology 5
EART 102 Marine Geology 5
EART 104 Geologic Hazards 5
EART 109 Elements of Field Geology 5
EART 120 Sedimentology and Stratigraphy 5
EART 140 Geomorphology 5
EART 146 Groundwater 5
EART 148 Glaciology 5
EART 150 Structural Geology 5
EART 160 Planetary Science 5
EART 189B Summer Field Study 5
189B
EART Climate Change Science 5
191A and Policy
Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement cannot also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A  Geographic Information Systems with Applications in Earth Sciences  5
EART 189B  Summer Field Study  5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following capstone course offerings:

EART 191A  Climate Change Science and Policy  5
EART 191B  Planetary Capstone  5
EART 191C  Practical Geophysics  5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences advisor.

Other options

Other options such as external field research experiences or internships may be suitable by permission of the faculty advisor.

Please meet with an advisor if you have an idea to propose.

Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least two or three quarters for completion.

### Ocean Sciences Concentration

The ocean sciences concentration is intended to provide quantitative preparation for career pathways that include oceanography and biogeochemistry. Additional biology and chemistry courses are required for this concentration along with other distributions of upper-division requirements and electives.

### Course Requirements

#### Lower-Division Courses

Choose one of the following options:

- **Either these courses**
  - EART 5
  - EART 5L
- or these courses
  - EART 10
  - EART 10L

or these courses

- EART 20
- EART 20L

### Upper-Division Courses

All of the following courses:

- EART 110A
- EART 110L
- EART 110B
- EART 111
- EART 110C

Plus all of the following courses:

- BIOE 20C
- CHEM 1A
- CHEM 1B
- CHEM 1M
- CHEM 1C
- CHEM 1N
- PHYS 6A
- PHYS 6L
- PHYS 6B
- PHYS 6M

Where the lab course follows a lecture course the pair of courses counts as a single course.

- BIOE 20C
  - Ecology and Evolution
- CHEM 1A
  - General Chemistry
- CHEM 1B
  - General Chemistry
- CHEM 1M
  - General Chemistry
  - Laboratory
- CHEM 1C
  - General Chemistry
- CHEM 1N
  - General Chemistry
  - Laboratory
- PHYS 6A
  - Introductory Physics I
- PHYS 6L
  - Introductory Physics I
  - Laboratory
- PHYS 6B
  - Introductory Physics II
- PHYS 6M
  - Introductory Physics II
  - Laboratory

Plus one of the following options:

- Either these courses
  - MATH 11A
  - Calculus with Applications
  - 5
  - MATH 11B
  - Calculus with Applications
  - 5
- or these courses
  - MATH 19A
  - Calculus for Science, Engineering, and Mathematics
  - 5
  - MATH 19B
  - Calculus for Science, Engineering, and Mathematics
  - 5
- or these courses
  - AM 15A
  - Case-Study Calculus I
  - 5
  - AM 15B
  - Case-Study Calculus II
  - 5

Plus one of the following courses:

- MATH 22
  - Introduction to Calculus of Several Variables
  - 5
- MATH 23A
  - Vector Calculus
  - 5
- EART 111
  - Mathematics in the Earth Sciences
  - 5
EART 110N  The Dynamic Earth Laboratory  2

**Plus one of the following courses:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>

**Electives**

At least four elective courses from upper-division Earth sciences or ocean sciences offerings must be completed. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 196B and EART 198 may not be used to satisfy this requirement.

No more than one quarter of EART 199 may be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Choosing from the following list is recommended, but not mandatory:

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

<table>

</tbody>
</table>

**Comprehensive Requirement**

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.

**Note:** Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:
Satisfactory completion of Summer Field
EART 189A Geographic Information Systems with Applications in Earth Sciences 5
EART 189B Summer Field Study 5

Satisfactory completion of a senior thesis
A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following capstone course offerings:
EART 191A Climate Change Science and Policy 5
EART 191B Planetary Capstone 5
EART 191C Practical Geophysics 5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences advisor.

Other options
Other options such as external field research experiences or internships may be suitable by permission of the faculty advisor.

Please meet with an advisor if you have an idea to propose.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least two or three quarters for completion.

Geophysics Concentration

The geophysics concentration provides quantitative, rigorous instruction in the geophysical sciences. Solid Earth geophysics is an internationally recognized field that includes seismology, geodesy, geodynamics and applied methods to image the Earth’s interior. All of these subdisciplines have in common a strong mathematical, physical, and computational underpinning, and students wishing to pursue these subjects need training in mathematics, physics, and computer science as well as geosciences. This program will guide students through these fundamentals and then train them to apply the tools to problems in geophysics. Graduates will be prepared to pursue careers in natural hazard research and mitigation, the energy industry, or environmental consultancy.

Course Requirements

Lower-Division Courses

All of the following courses:

- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1M General Chemistry Laboratory 2
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2
- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1

Plus one of the following options:

- EART 5 California Geology 5
- EART 5L California Geology Laboratory 1

or these courses

- EART 10 Geologic Principles 5
- EART 10L Geologic Principles Laboratory 1

or these courses

- EART 20 Environmental Geology 5
- EART 20L Environmental Geology Laboratory 1

Plus one of the following options:

Either these courses

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

or these courses

- MATH 11A Calculus with Applications 5
- MATH 11B Calculus with Applications 5

MATH 19A and MATH 19B are strongly preferred.

Upper-Division Courses

All of the following courses:

- EART 110A Evolution of the Earth 5
- EART 110L Evolution of the Earth Laboratory 2
- EART 110B Earth as a Chemical System 5
- EART 110M Earth as a Chemical System Laboratory 2
- EART 110C The Dynamic Earth 5
- EART 110N The Dynamic Earth Laboratory 2

Plus one of these courses:

One of these courses

- EART 112 Geophysical Data Science 5
- EART 119A Introduction to Scientific Programming 5
Plus one of these courses:
One of these courses
EART 118 Seismotectonics 5
EART 126 Geomechanics 5
EART 162 Planetary Interiors 5

Electives
At least four additional electives (5+ credits each) from upper-division Earth sciences or upper level math or physics courses (see below) are required. Where the lab course follows a lecture course, the pair of courses counts as a single course.
EART 191C, EART 195, and EART 198 may not be used to satisfy this requirement.
Choosing from the following list is recommended, but not mandatory:
EART 104 Geologic Hazards 5
EART 107 Remote Sensing of the Environment 5
EART 109 Elements of Field Geology 5
EART 109L Field Geology Laboratory 2
EART 116 Hydrology 5
EART 118 Seismotectonics 5
EART 125 Statistics and Data Analysis in the Geosciences 5
EART 140 Geomorphology 5
EART 142 Engineering Geology for Environmental Scientists 5
EART 146 Groundwater 5
EART 148 Glaciology 5
EART 150 Structural Geology 5
EART 160 Planetary Science 5
EART 189B Summer Field Study 5
EART Climate Change Science and Policy 5
EART Practical Geophysics 5
EART 191C Senior Thesis 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes.
Currently the list (subject to change) consists of:
EART 100 Vertebrate Paleontology 5
EART 101 Invertebrate Paleobiology 5
EART 102 Marine Geology 5
EART 104 Geologic Hazards 5
EART 109 Elements of Field Geology 5
EART 120 Sedimentology and Stratigraphy 5
EART 140 Geomorphology 5
EART 146 Groundwater 5
EART 148 Glaciology 5
EART 150 Structural Geology 5
EART 160 Planetary Science 5
EART 189B Summer Field Study 5
191A Climate Change Science and Policy 5
191C Senior Thesis 5

Comprehensive Requirement
All students must satisfy the senior comprehensive requirement.
The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, EART 110B, and EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement cannot also be used to fulfill the upper-division elective requirement.

To do so, each student in the geophysics concentration must complete one of the following capstone options:

Satisfactory Completion of Summer Field
EART 189A Geographic Information Systems with Applications in Earth Sciences 5
EART 189B Summer Field Study 5

Satisfactory completion of a senior thesis
A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.
Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following
**Capstone Course Offerings**

- **EART 191A** Climate Change Science and Policy 5
- **EART 191B** Planetary Capstone 5
- **EART 191C** Practical Geophysics 5

Capstone course offerings vary year to year. If you are interested in completing a capstone course, please contact the Earth sciences advisor.

**Other Options**

Other options such as external field research experiences or internships may be suitable by permission of the faculty advisor.

Please meet with an advisor if you have an idea to propose.

ENVIRONMENTAL SCIENCES

B.S.

Information and Policies

Introduction

The UC Santa Cruz environmental sciences (ESCI) major is an interdepartmental, undergraduate-only program. The purpose of the ESCI major is to educate students interested in environmental science problems and issues, with a focus on issues within the physical sciences (as opposed to focusing on biological sciences). The major specializes primarily on the following areas:

- **Hydrosphere**: water resources, water quality, aquatic chemistry, physical oceanography, chemical oceanography, glaciology
- **Pollution and transport**: environmental toxicology, environmental transport/fluid mechanics, environmental monitoring
- **Global scale environment**: climate, climate dynamics, global cycles of water, carbon and nutrients, remote sensing of the environment
- **Atmosphere**: meteorology, air quality, atmospheric chemistry

The core faculty of the major are primarily from two departments, Earth and Planetary Sciences and Ocean Sciences. Faculty from other departments such as Microbiology and Environmental Toxicology and Environmental Studies may also be involved.

The ESCI major has three broad program learning outcomes, each with three specific learning outcomes:

**PLO 1: Disciplinary Knowledge Goals**

- **Reservoirs**: Understand and describe the properties of the various environmental “reservoirs”, which represent different, interacting physical regimes. For example, a global model might have the atmosphere, oceans, plants and soils as four primary interacting reservoirs.
- **Processes**: Understand and describe the processes governing the properties and evolution of Earth’s
physical environment, i.e., the properties and evolution of reservoirs and their interactions.

• Application: Apply the knowledge of reservoirs and processes to explain, analyze and predict phenomena within the environmental sciences.

PLO 2: Quantitative Reasoning Goals

• Calculation: Utilize mathematical tools (e.g. algebra, calculus) to address questions in the environmental sciences.

• Visualization: Interpret and produce visual representations of data in the environmental sciences (e.g. graphs and charts) that conform to disciplinary standards.

• Analysis: Use quantitative analysis as the basis for drawing insights and conclusions, while expressing the appropriate assumptions and qualifications.

PLO 3: Written Communication Goals

• Mechanics: Write sentences with correct grammar, punctuation and spelling.

• Conventions: Accurately utilize the formatting, stylistic, citation and bibliographic conventions of environmental sciences in the written document.

• Organization: Construct paragraphs, sections and an overall document that flows logically and persuasively argues a thesis.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should consult the Transfer and Information Policy section for information about major qualification.

To qualify for the environmental sciences major, a student must complete (with a minimum grade of C) the following introductory courses:

CHEM 1A General Chemistry 5
CHEM 1C General Chemistry 5
CHEM 1N General Chemistry Laboratory 2
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1

A minimum GPA of 2.00 must be obtained in the courses listed above.

Recommended Courses

In addition, the following courses are recommended prior to transfer to ensure timely graduation:

PHYS 6B Introductory Physics II 5
PHYS 6M Introductory Physics II Laboratory 1

Getting Started at UCSC as a Transfer Student

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UC Santa Cruz.

If you are planning on transferring to UC Santa Cruz to pursue an environmental sciences major, our Transfer Preparation information provides a list of the coursework you should complete prior to transfer. Completing coursework prior to transfer allows you more time and flexibility to take advantage of the educational opportunities our programs provide and can reduce the cost of your education. For more information please visit Transfer Preparation.

How to Declare a Major

Students who qualify start the declaration process by scheduling an appointment with the department staff advisor. You must consult with the department’s undergraduate staff advisor to discuss options for the degree and coursework priorities before you start the process of officially declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

The environmental sciences program welcomes applications from prospective transfer students. Students should reference assist.org to determine course equivalencies.

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

CHEM 1A General Chemistry 5
CHEM 1C General Chemistry 5
CHEM 1N General Chemistry Laboratory 2
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1

A minimum GPA of 2.00 must be obtained in the courses listed above.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the environmental sciences advisor, epsadvising@ucsc.edu, within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.
For information regarding applying for admission to UC Santa Cruz as a transfer student, visit the UCSC Admissions web site.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and getting enrolled:

1. **Confirm you are a proposed environmental sciences major.**
   If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed environmental sciences you are all set. If the proposed major listed is not environmental sciences, you will need to meet with the advisor for environmental sciences to determine if you are eligible for the major.

2. **Once your courses have been articulated, you will receive an email from our office.**
   This email will include information on how your coursework articulated, suggestions for fall enrollment, and invite you to make an appointment to talk with your major advisor.

3. **Make an appointment to talk to an advisor.**
   Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.

4. **Participate in Transfer Orientation and Welcome Week.**
   Transfer Orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework. The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the environmental sciences major, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

5. **Declaring the environmental sciences major.**
   In order to declare the environmental sciences major transfer students entering at the junior level must complete CHEM 1A, CHEM 1C and CHEM 1N, MATH 11A, MATH 11B, and PHYS 6A and PHYS 6L or an approved equivalent course (with a C or better) by the end of their first quarter at UC Santa Cruz and meet with the Environmental Sciences advisor by the declaration deadline.

**Letter Grade Policy**

All courses used to satisfy requirements for the environmental sciences major must be taken for a letter grade, with the exception of the following courses, which may be taken pass/no pass: ESCI 195 Senior Thesis, EART 198 Earth Sciences Internship, and EART 199 Tutorial.

[Optional Catchall]

**Course Substitution Policy**

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate advisor for the substitution petition form and more information about this process.

**Double Majors and Major/Minor Combinations Policy**

**Study Abroad**

**Honors**

Honors in the major are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in exceptional cases when a student’s overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The program reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors in the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

</tbody>
</table>

**At least five elective courses.**

At least five elective courses from upper-division Earth sciences, environmental sciences or ocean sciences offerings must be completed.

**NOTE:** Lecture/lab combinations count as one course. Courses from other departments may also be considered for upper-division elective credit by permission of a faculty advisor. Please consult with an advisor for more details.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

**Disciplinary Communication (DC) Requirement**

Students fulfill the disciplinary communication (DC) requirement through successful completion of either (1) one of the environmental sciences senior capstone seminars (ESCI 191) or (2) a senior thesis based on original research performed by the student (completion of ESCI 195: Senior Thesis is required).

- ESCI 191 Capstone Seminar 5
- ESCI 195 Senior Thesis 5

**Comprehensive Requirement**

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student’s undergraduate career. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity.

Other capstones will not be considered unless they also satisfy the DC requirement.

Courses that are used to satisfy the capstone may not also count toward fulfilling the upper-division elective requirement.

**Satisfactory completion of one of the following capstone course offerings:**

**Senior Thesis**

- ESCI 195 Senior Thesis 5

ESCI 195 requires original research performed by the student. Approval from a faculty sponsor is required prior to embarking on a senior thesis. Completion of the senior thesis is necessary to pass ESCI 195.

ESCI 195 also satisfies the DC requirement.

**Capstone Seminar**

- ESCI 191 Capstone Seminar 5

Enrollment in ESCI 191 is limited to environmental science majors with senior standing.

ESCI 191 also satisfies the DC requirement.

**Planners**

Students planning a professional career in environmental sciences should take more than the minimum number of courses required for the major, if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their lower-division preparatory courses
before entry. Further advice can be obtained from the undergraduate advisor and from faculty members.

Sample Four-Year Planner

Note: CHEM 1A, CHEM 1B and CHEM 1M, CHEM 1C and CHEM 1N, and MATH 11A and MATH 11B are offered every quarter. PHYS 6A and PHYS 6L are offered every quarter, but PHYS 6B and PHYS 6M are not offered in fall.

†Students expecting to write a senior thesis (ESCI 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least three quarters for completion.

EARTH SCIENCES/ANTHROPOLOGY COMBINED MAJOR B.A.

Information and Policies

Introduction

The Earth sciences/anthropology combined major is intended for students with interests in Earth sciences and the laboratory-based aspect of anthropology. These include anthropology students interested in archaeology or paleoanthropology who desire more intensive training in natural sciences and Earth sciences students interested in paleobiology or archaeology. The combined major provides a rigorous training in both anthropology and Earth sciences and will permit students to enter graduate programs in Earth sciences, archaeology, or paleoanthropology. The combined major has a significantly different set of cognate science and required lower- and upper-division courses than the standard major; therefore, students are advised to plan carefully and to contact academic advisors in the Earth and Planetary Sciences and Anthropology departments early if they have questions.

Academic Advising for the Program

A student who wants to become an Earth sciences/anthropology combined major should contact the Earth and Planetary Sciences Department undergraduate staff advisor, epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to meet with the undergraduate advisor to plan their program in detail. Transfer students should

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, TA, PE, and PR general education requirements.

†Students expecting to write a senior thesis (ESCI 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least three quarters for completion.
consult the Transfer Information and Policy section for more detailed information about academic advising.

**Getting Started in the Major**

Welcome! Now that you are a registered freshman, the following information is your guide to getting started in your Earth sciences major.

All freshmen are required to complete summer orientation, for more information visit Campus Orientation Programs. Our freshmen orientation includes everything you need to know to get started on your Earth science major. If you have already completed orientation and simply need a refresher on getting enrolled, see our Freshmen Enrollment Guide.

Students with advanced placement credit must provide Admissions an official copy of your test score. You can verify your AP credit in your MyUCSC portal. For information on how your AP credit applies to your enrollment and your major, see our advanced placement credit page. If you have taken a college-level course that you would like credit for, you must send an official transcript to Admissions. If you wish to have that same course applied toward your major requirements, send an unofficial copy of your transcripts to epsadvising@ucsc.edu.

If you have already been admitted to UC Santa Cruz as a transfer student, our transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

**Program Learning Outcomes**

Students graduating with a B.A. in Earth sciences/anthropology should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

To qualify for the combined Earth sciences and anthropology major, a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EART 5</td>
<td>California Geology</td>
<td>5</td>
</tr>
</tbody>
</table>

Transfer students may take an approved substitution for one of the above courses and should consult assist.org for equivalencies and the Transfer and Information Policy section for information about major qualifications.

**Appeal Process**

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter.

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences advisor within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

**How to Declare a Major**

Students who wish to declare the Earth science major start the process by scheduling an appointment with the department staff advisor to create an academic plan. Once academic planning has been completed students submit the online major declaration petition to begin the major declaration process. Students are expected to complete the academic planning and online petition by the campus declaration deadline.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The Earth and Planetary Sciences Department welcomes applications from prospective transfer students who are prepared for the major. Students should reference assist.org to determine course equivalencies.

No major preparation courses are required prior to transfer; however, the following courses or their equivalents are recommended to ensure timely graduation:

**One of the following options:**

Either these courses

<table>

**Getting Started at UCSC as a Transfer Student**

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UC Santa Cruz.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and getting enrolled:

1. **Confirm you are a proposed Earth sciences/anthropology major.**
   If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed Earth sciences/anthropology you are all set. If the proposed major listed is not Earth sciences/anthropology, you will need to meet with the advisor for Earth sciences.

2. **Once your courses have been articulated, you will receive an email from our office.**
   This email will include information on how your coursework articulated, suggestions for fall enrollment, and invite you to make an appointment to talk with your major advisor.

3. **Make an appointment to talk to an advisor.**
   Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.

4. **Participate in Transfer Orientation and Welcome Week.**
   Transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

   The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

5. **Declaring the Earth Sciences/Anthropology combined major.**
   In order to declare the Earth sciences/anthropology combined major transfer students must complete EART 5, or EART 10 or EART 20 or an approved equivalent course (with a C or better) and meet with the Earth and Planetary Sciences Department advisor by the declaration deadline.

   Welcome, we look forward to meeting you!

**Letter Grade Policy**

This program, Earth sciences/anthropology, does not have a letter grade policy. Students must adhere to the campus letter grade policy.

*[Optional Catchall]*

**Course Substitution Policy**

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate advisor for the substitution petition form and more information about this process.

**Double Majors and Major/Minor Combinations**
Policy

Study Abroad

Honors
Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in exceptional cases when a student’s overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Keys to Success in the Major

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses:

- ANTH 1 Introduction to Biological Anthropology 5
- ANTH 2 Introduction to Cultural Anthropology 5
- ANTH 3 Introduction to Archaeology 5

Plus one of the following options:

Either these courses

- EART 5 California Geology 5
- EART 5L California Geology Laboratory 1

or these courses

- EART 10 Geologic Principles 5
- EART 10L Geologic Principles Laboratory 1

or these courses

- EART 20 Environmental Geology 5
- EART 20L Environmental Geology Laboratory 1

Upper-Division Courses

- EART 110A Evolution of the Earth 5
- EART 110L Evolution of the Earth Laboratory 2

Electives

At least three upper-division elective courses from upper-division Earth sciences offerings must be completed. EART 198 may not be used to satisfy this requirement.

Any four upper-division elective courses between five and seven units listed under the Anthropology Department’s biological, medical, environmental anthropology and archeology course subdivisions (see program statement for the anthropology B.A.).

Disciplinary Communication (DC) Requirement

At least two courses that are part of the DC requirement must be completed as part of the required upper-division courses.

Earth Sciences courses that are part of the DC curriculum are:

- EART 100 Vertebrate Paleontology 5
- EART 101 Invertebrate Paleobiology 5
EART 102 | Marine Geology | 5
EART 104 | Geologic Hazards | 5
EART 109 | Elements of Field Geology | 5
EART 120 | Sedimentology and Stratigraphy | 5
EART 140 | Geomorphology | 5
EART 146 | Groundwater | 5
EART 148 | Glaciology | 5
EART 150 | Structural Geology | 5
EART 160 | Planetary Science | 5
EART | | |
EART 189B | Summer Field Study | 5
EART 191A | Climate Change Science and Policy | 5
EART 195 | Senior Thesis | 5
EART | Practical Geophysics | 5
EART 191C |

EART 189B formerly EART 188B

Anthropology courses that are part of the DC curriculum are:

| ANTH 100 | History and Theory of Biological Anthropology | 5 |
| ANTH 170 | History of Archaeological Theory | 5 |
| ANTH 194B | Chimpanzees: Biology, Behavior, and Evolution | 5 |
| ANTH | Archaeology of the African Diaspora | 5 |
| ANTH | Archaeologies of Space and Landscape | 5 |

Comprehensive Requirement

One of the following:

- Satisfactory completion of Anthropology 194-series (any senior seminar in physical anthropology or archaeology).
- Satisfactory completion of EART 189A and EART 189B*, Geographic Information Systems with Applications in Earth sciences and Summer Field Internship.
- Satisfactory completion of a senior thesis (EART 195) with faculty readers from both departments, which must include a significant element of independent research or original work and can only be undertaken after agreement is obtained from faculty members to supervise it (at least three quarters in advance of completion).
- Satisfactory completion of a 5-credit internship (EART 198) under the guidance of an on-site supervisor, with coordination and prior approval of the Earth and Planetary Science Department’s internship director. The project must include a comprehensive final written report.

* EART 189A and EART 189B have as prerequisites EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M.

Note: Courses used to satisfy the senior comprehensive requirement cannot also be used to fulfill the upper-division elective requirement.

Sample Four-Year Planner

EART electives
110L*

(Sr thesis only)
EART 199†

†Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 & EART 109L, EART 110A & EART 110L, and EART 110B & EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

+Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty advisor. Senior theses usually require at least two or three quarters for completion.

EARTH AND PLANETARY SCIENCES CONTIGUOUS BACHELORS MASTERS PATHWAY

Introduction
The Earth and Planetary Sciences contiguous five-year Bachelor's/Master's program allows motivated students to complete a B.S. in Earth sciences or environmental sciences, and then an M.S. in Earth sciences in five years with appropriate planning. The program is designed for promising students who have demonstrated aptitude for fundamental course work in the classroom, as well as the capacity, interest, and motivation to conduct independent research through collaborations with a faculty mentor.

Eligibility Requirements
Students enrolled in the Earth sciences B.S. or Environmental sciences B.S. programs who will complete their undergraduate degree within normative time (four years for students who enter the B.S. program as frosh, three years for sophomore transfer students, or two years for junior transfer students) are eligible for the contiguous Bachelor's/Master's program. Interested students from other majors may petition the department for admission to the pathway, provided that they have been participating in research with faculty in Earth and Planetary Sciences and have a coursework foundation that will enable success in the graduate curriculum. A GPA in the major of 3.0 or higher is required, as well as demonstrated research progress and a strong endorsement from a sponsoring faculty advisor. Students must complete their undergraduate degree requirements by the end of the summer quarter prior to enrolling in the M.S. program in the fall.

Application Process
Interested students should attend an information session during their junior year and complete an associated survey to declare their interest in the Bachelor's/Master's program. During the fall quarter of their senior year, students must formally apply to the master's program during the normal admissions cycle and through the standard graduate application process. The application deadline is typically in early January.
Program Requirements

Students in the Bachelor's/Master's program must take a minimum of 35 credits total of graduate and upper-division undergraduate courses, of which no more than 15 credits may be upper-division undergraduate courses. Of the required graduate-level courses, a minimum of 20 credits must be courses other than supervised research (EART 297) except by special exception of the Graduate Council. All Bachelor's/Master's program students will take the required graduate core series of EART 203, Introductory Teaching Seminar, EART 204, Earth And Planetary Sciences Foundations, and EART 206, Great Papers in the Earth Sciences.

Students in the program must also take one graduate-level “analytical” course and one graduate-level “subject” course. The classes that fulfill these requirements are listed in the EPS Graduate Student Handbook and in the course lists below. Analytical and subject classes may be taken in the senior year; the credits will count toward 180 undergraduate credits and the course can count toward the B.S. degree upper-division elective requirement, but the analytical or subject content will fulfill the M.S. program requirement. However, class credits cannot be double counted in both B.S. and M.S. degrees, so students are still required to complete 35 credits (no more than 15 of which may be upper-division undergraduate) during their M.S. career. In addition, EART 195 cannot count toward the M.S. degree and students cannot earn credit for a graduate course when they have previously taken the cross-listed undergraduate version. In order to fulfill the capstone requirement for the M.S. degree, students must also complete a master's thesis (Plan I).

Subject Courses

EART 207  Tectonics  5
EART 208  Methods in Paleoclimatology  5
EART 220  Ground Water Modeling  5
EART 254  The Climate System  5
EART 258  Deep Time Paleoclimates  5
EART 262  Planetary Interiors  5
EART 263  Planetary Surfaces  5
EART 264  Planetary Atmospheres  5
EART 270  Global Seismology  5
EART 272  Geophysical Fluid Dynamics  5
AM 275  Magnetohydrodynamics  5
OCEA 213  Biogeochemical Cycles  5

AM 100  Mathematical Methods for Engineers  5
AM 147  Computational Methods and Applications  5
AM 211  Foundations of Applied Mathematics  5
AM 215  Stochastic Modeling in Biology  5
ASTR 260  Instrumentation for Astronomy  5
CHEM 122  Principles of Instrumental Analysis  5
BIOE 286  Experimental Design and Data Analysis  5
ENVS 215A  Geographic Information Systems and Environmental Applications  5
ENVS 215L  Exercises in Geographic Information Systems  2
MATH 106  Systems of Ordinary Differential Equations  5

</tr>
</tbody>
</table>

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone. In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

‡‡ In consultation with their research advisor and faculty graduate representative, the student will select at least one “subject” course focusing on specific Earth and planetary sciences content and one “analytical” course that builds quantitative analytical skills (from a list in the EPS Graduate Handbook) and also included above.

Three-Year Planner for Students Entering the Earth Sciences B.S. as Junior Transfers

This planner assumes that students have completed all lower-division requirements, other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math/coding.

<table>
<thead>
<tr>

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

‡‡ In consultation with their research advisor and faculty graduate representative, the student will select at least one “subject” course focusing on specific Earth and planetary
sciences content and one “analytical” course that builds quantitative analytical skills (from a list in the EPS Graduate Handbook) and also included above.

**EARTH SCIENCES M.S.**

**Introduction**

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research.

Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UC Santa Cruz is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UC Santa Cruz awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for someone seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project. Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

**Requirements**

**Course Requirements**

**Plan 1 Thesis M.S. Track.**

Prior to the first quarter of study, each first-year thesis track student must meet with their faculty advisor to determine a customized study plan designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the faculty graduate representative to finalize and approve this initial discussion with a written course plan. Yearly academic review meetings with the primary advisor will then reassess the student's progress in completing these courses and independent research.

**In their first year, all thesis-track graduate students register for:**

- EART 203 Introductory Teaching Seminar 1
- EART 204 Earth and Planetary Sciences Foundations 5
- EART 206 Great Papers in the Earth Sciences 5

**In subsequent years, all students participate in:**

- EART 293 Graduate Research Seminar 1

**Plan 2 Coursework M.S. Track.**

The coursework M.S. track is a professional program designed to allow students to increase their breadth, quantitative depth, or emphasis on a particular specialty; to provide the student with a stronger background toward competition for jobs or an enhancement of skills for current employment (e.g., K–14 teaching); and to allow students from other disciplines (e.g., biology, physics, chemistry, mathematics, environmental studies) to acquire advanced training in Earth and planetary sciences. Prior to the first quarter of study, students meet with their faculty advisor to develop a study plan of at least nine 5-credit courses, and a statement of objectives. Of these courses, only one can be from the EART 280-EART 290 series, and at least 20 credits must come from graduate courses numbered EART 200-EART 279. One of the nine courses can be an independent study involving a focused research project. It is expected that the course plan will comprise a minimum of 45 quarter credits at the graduate-level and quantitative, upper-division, undergraduate-level elective courses. The course plan must be approved by the graduate representative. Degree completion in one year would be emphasized.

Coursework M.S. students are required to fulfill one of the following capstone options: a substantial review/research manuscript or a comprehensive oral examination based on their coursework.

**Pre-Qualifying Requirements**

Admission to the Coursework M.S. Track would require willing and explicit sponsorship by an EPS faculty member.

**Foreign Language Requirements**

There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

**Teaching Experience**

It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.
Other Requirements

Applying for Graduation

EARTH SCIENCES PH.D.

Introduction
The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UC Santa Cruz is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UC Santa Cruz awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for someone seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project. Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

Advancement to Candidacy

Course Requirements

Thesis Ph.D. Track

In their first year, all thesis-track graduate students register for:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EART 203</td>
<td>Introductory Teaching Seminar</td>
<td>1</td>

</tr>
</tbody>
</table>

Foreign Language Requirements
There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

Teaching Requirement
It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.

Pre-Qualifying Requirements

Qualifying Examination
To qualify for candidacy in the Ph.D. program, each student must pass an oral examination in their area of specialization by the end of their third year of graduate study (second year if entering with a master's degree in the same field), although students are strongly encouraged to take the examination earlier. The examination is based on a written research proposal presenting one or more specific questions to be researched by the student in the course of completing their Ph.D. thesis. Students are expected to have in-depth knowledge of fields relevant to the proposal, including familiarity with the professional literature.

Post-Qualifying Requirements

[Optional Catchall]

Dissertation

Dissertation
The Ph.D. dissertation is a scholarly contribution to knowledge that embodies the results of original and creative effort by the student. Students are urged to prepare their dissertations for publication in peer-reviewed professional journals.

Dissertation Defense
A public oral defense of the thesis is required prior to completion of the Ph.D. degree.

Academic Progress
Prior to the first quarter of study, each first-year thesis track student must meet with their faculty advisor to determine a customized study plan designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the faculty graduate representative to finalize and approve this initial discussion with a written course plan. Yearly academic review meetings will then reassess the student's progress in completing these courses and independent research, initially with the primary advisor but eventually with a reading committee.

Environmental Studies/Biology Combined Major B.A. (p. 642)

UNDERGRADUATE PROGRAM

The Department of Ecology and Evolutionary Biology (EEB) is devoted to the study of ecological and evolutionary processes across marine, terrestrial, and freshwater environments. Our approach is to blend an emphasis on key ideas and concepts with a focus on organismal biology and natural history. Recent advances in both analytical and genetic methods have given us a far richer understanding of the complexities of ecological and evolutionary processes in the natural world, allowing us to tackle ever more sophisticated questions. Biologists at UC Santa Cruz have played and will continue to play an important part in these advances, and the campus programs offer unique educational opportunities in biology that feature small class sizes, field studies, and extensive faculty-student interactions.

Class offerings and student research opportunities leverage the varied natural environments in the Monterey Bay region, throughout the western US, and in more distant locations such as Africa, Europe, Mexico, Tahiti, Australia, and East Asia. This emphasis on field and laboratory studies is the hallmark of our undergraduate majors. Within this context they address not only basic ecological and evolutionary processes, but also the application of this knowledge to advance environmental, conservation and sustainability science.

An outstanding group of faculty, each with a vigorous, internationally recognized research program, is available to teach courses in their specialties as well as core courses for the major. Areas of research strength within the department include plant biology, animal behavior, physiology, evolution, ecology, and marine biology. UC Santa Cruz is unique in the UC system in providing exceptional opportunities for undergraduate research, allowing students to interact one-on-one with faculty and other researchers in a laboratory or field setting.

Students may plan a program that leads to one of several bachelor of arts (B.A.) and bachelor of science (B.S.) degrees. These different majors overlap considerably in content and differ mainly in providing students with flexibility to take a few more courses that focus on the major subject. Students may choose from the following major options:

- Biology B.A.
- Ecology and Evolution B.S.
- Marine Biology B.S.
- Plant Sciences B.S.

EEB offers a variety of independent research opportunities for students. Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratories, including state-of-the-art genetics, physiology, and marine science facilities, for independent research. Fieldwork draws on a remarkable variety of terrestrial, marine, and freshwater ecosystems, all in close proximity to campus. Terrestrial studies are supported by the UC Santa Cruz reserve on campus, an arboretum, greenhouse facility, and vehicles to transport students to field sites off campus. Freshwater studies have access to a number of coastal tributaries and laboratory facilities at the Coastal Biology Building. Marine studies are supported on the Coastal Science Campus with running seawater facilities, a boating program, and an AAUS accredited SCUBA diving program for underwater classes and research. Año Nuevo Island, north of Santa Cruz, is the site of extensive behavioral studies of marine mammals. The Norris Center, located in the Environmental Studies Department on the main campus, provides a natural history hub for the entire campus and offers opportunities for students to learn about natural history and museum techniques. In addition to coursework, there is an array of opportunities for directed independent study that enables majors to enhance their upper-division programs to reflect and strengthen their own interests and goals in the sciences.

Descriptions of faculty research interests and nearby coastal and marine environments, institutions, and facilities are available through the Ecology and Evolutionary Biology (EEB) Department website.
GRADUATE PROGRAM

The ecology and evolutionary biology (EEB) graduate program at UC Santa Cruz reflects the remarkable local and global diversity of species and environments studied by the EEB faculty and students. The vision of the EEB graduate program is to provide a nurturing, creative, and intellectual environment conducive to the development of world-class scientists. The EEB graduate program encourages close working relations between students and faculty in an informal atmosphere advantageous to rapid learning and professional growth. Interdisciplinary collaborations with oceanographers, geologists, mathematicians, environmental and conservation biologists, toxicologists, and others enable students to explore the conceptual connections between related fields as they acquire mastery in their areas of specialization.

The graduate program in EEB at UC Santa Cruz is one of the premier EEB programs in the country. UCSC graduate students in EEB regularly win prestigious research fellowships and awards for their presentations at international meetings in addition to publishing their work in the best journals of their fields. Students take advantage of local field sites and state-of-the-art departmental laboratories, more than two-thirds of the EEB faculty also participate in field studies throughout the world, especially in Africa, Latin America, Antarctica, the Arctic, and around the Pacific Rim. Research in EEB comprises four core areas: ecology, evolutionary biology, physiology, and behavior.

BIOLOGY B.A.

Information and Policies

Introduction

The general biology bachelor of arts major permits flexibility, but demands careful attention to a student’s own interests and plans. Each student should select courses on the basis of up-to-date information in consultation with an Ecology and Evolutionary Biology (EEB) Department advisor or faculty advisor whose interests reflect the student’s interests. A hallmark of the major is the many field courses that introduce students to a diversity of ecosystems and the skills to conduct field research. See the Ecology and Evolutionary Biology undergraduate webpage for more information on these courses.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students’ most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.

2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.

3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.

4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.

5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to...
properly interpret published research and apply such skills in their own research.

6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.

7. Students will exhibit strong teamwork and problem-solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

**All of the following courses:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20C</td>
<td>Ecology and Evolution</td>
<td>5</td>
</tr>
</tbody>
</table>

**Appeal Process**

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

**How to Declare a Major**

Students may submit a petition to declare after successful completion of the qualification policy courses. Students submit their major declaration petition on the EEB website here. Students proposed in the major should submit a major declaration petition in the quarter of their major declaration deadline (i.e., sixth quarter for students admitted as frosh). The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment) based on the student's qualification to declare at the time the major declaration petition is received. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20C</td>
<td>Ecology and Evolution</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
</tbody>
</table>

A minimum GPA of 2.0 must be obtained in the courses listed above.

**Getting Started at UCSC as a Transfer Student**

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB Advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements. EEB Advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB Advising in June, July, and August with additional information about the major.

**Letter Grade Policy**

All courses used to satisfy any major requirement must be taken for a letter grade.

**[Optional Catchall]**

**Course Substitution Policy**

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.
Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Requirements and planners
BIOE 135L  Plant Physiology Laboratory  2
BIOE 136  Environmental Physiology  5
BIOL 130  Human Physiology  5
BIOL 130L  Human Physiology Laboratory  2
METX 135  Functional Anatomy  5
METX 135L  Functional Anatomy Laboratory  2

Note: Lecture/lab combinations count as a single course.

BIOE 131 & BIOE 131L, BIOL 130 & BIOL 130L: Laboratory optional

Electives

Four additional electives chosen from BIOE courses numbered 100-179 or the following BIOL courses:

BIOL 100  Biochemistry  5
BIOL 101  Molecular Biology  5
BIOL 110  Cell Biology  5
BIOL 111  Immunology  5
BIOL 115  Eukaryotic Molecular Biology  5
BIOL 120  Developmental Biology  5
BIOL 125  Introduction to Neuroscience  5
METX 100  Introduction to Microbiology  5
METX 119  Microbiology  5
METX 119L  Microbiology Laboratory  5

Note: Lecture/lab combinations count as a single course.

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement for the biology bachelor of arts degree is satisfied by completing two of the following Ecology and Evolutionary Biology courses:

BIOE 108  Marine Ecology  5
BIOE 114  Herpetology  5
BIOE 114L  Field Methods in Herpetological Research  2
BIOE 117  Systematic Botany of Flowering Plants  5
BIOE 120  Marine Botany  5
BIOE 120L  Marine Botany Laboratory  2
BIOE 122  Invertebrate Zoology  5
BIOE 122L  Invertebrate Zoology Laboratory  2
BIOE 127  Ichthyology  5
BIOE 127L  Ichthyology Laboratory  2
BIOE 128L  Large Marine Vertebrates Field Course  5
BIOE 129  Biology of Marine Mammals  5

Note: Lecture and 2-credit lab combinations count as a single course. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below;
- completing a senior thesis;
- achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
- obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

**Introduction**

The ecology and evolution major focuses on general topics that are not specific to taxonomic group or habitat. As such it provides students with interdisciplinary skills necessary for understanding and solving complex problems in ecology, evolution, behavior, and physiology. All of these disciplines address questions on larger spatial and temporal scales that can be applied to important environmental problems, including genetic and ecological aspects of conservation biology and biodiversity.

Students majoring in ecology and evolution will receive a B.S. degree based on an integrated series of courses providing breadth in fundamental areas of biology and allied sciences that enhance understanding of evolutionary and ecological processes. The capstone of this curriculum is a suite of field courses providing students unique opportunities to learn and conduct research in a host of ecological systems. Students are encouraged to take field courses in their areas of specialization. Other opportunities include participation in research projects with faculty sponsors and the intensive Education Abroad Programs (UCEAP) in Costa Rica (tropical biology) and Australia (marine sciences).

**Academic Advising for the Program**

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students’ most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

**Getting Started in the Major**

**Prerequisites**

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

**ECOLOGY AND EVOLUTION B.S.**

**Information and Policies**
Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by EEB is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.

2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.

3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.

4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.

5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.

6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.

7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

All of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
</tbody>
</table>

And one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20C</td>
<td>Ecology and Evolution</td>
<td>5</td>
</tr>
</tbody>
</table>

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students submit their major declaration petition on the EEB website. Students proposed in the major should submit a major declaration petition in the quarter of their major declaration deadline (i.e., sixth quarter for students admitted as frosh). The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment) based on the student's qualification to declare at the time the major declaration petition is received. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>

<td>Introductory Physics III</td>
<td>5</td>
</tr>
</tbody>
</table>

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements. EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

[Optional Catchall]

Requirements and Planners
Course Requirements

Lower-Division Courses

Introductory Biology:
- BIOL 20A Cell and Molecular Biology 5
- BIOE 20B Development and Physiology 5
- BIOE 20C Ecology and Evolution 5

General Chemistry:
- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2

Calculus:
Choose one of the following options:
- Either these courses
  - MATH 11A Calculus with Applications 5
  - MATH 11B Calculus with Applications 5
- or these courses
  - MATH 19A Calculus for Science, Engineering, and Mathematics 5
  - MATH 19B Calculus for Science, Engineering, and Mathematics 5

Biostatistics:
- STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
- STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Physics:
Choose one of the following options:
- Either these courses
  - PHYS 7A Elementary Physics I 5
  - PHYS 6L Introductory Physics I Laboratory 1
  - PHYS 7B Elementary Physics II 5
- or these courses
  - PHYS 6A Introductory Physics I 5
  - PHYS 6L Introductory Physics I Laboratory 1
  - PHYS 6B Introductory Physics II 5
  - PHYS 6A Introductory Physics I 5

Upper-Division Courses

A total of 11 upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

Three upper-division core courses:
- BIOL 105 Genetics 5
- BIOE 107 Ecology 5
- BIOE 109 Evolution 5

One of the following physiology courses:

BIOE 131 Animal Physiology 5
BIOE 131L Animal Physiology Laboratory 2
BIOE 133 Exercise Physiology 5
BIOE 133L Exercise Physiology Laboratory 2
BIOE 134 Comparative Vertebrate Anatomy 5
BIOE 134L Comparative Vertebrate Anatomy Laboratory 2
BIOE 135 Plant Physiology 5
BIOE 135L Plant Physiology Laboratory 2
BIOE 136 Environmental Physiology 5

BIOE 131/BIOE 131L: lab optional

One of the following organism courses:

BIOE 112 Ornithology 5
BIOE 112L Ornithology Field Studies 2
BIOE 114 Herpetology 5
BIOE 114L Field Methods in Herpetological Research 2
BIOE 117 Systematic Botany of Flowering Plants 5
BIOE 117L Systematic Botany of Flowering Plants Laboratory 2
BIOE 120 Marine Botany 5
BIOE 120L Marine Botany Laboratory 2
BIOE 122 Invertebrate Zoology 5
BIOE 122L Invertebrate Zoology Laboratory 2
BIOE 124 Mammalogy 5
BIOE 124L Mammalogy Laboratory 2
BIOE 127 Ichthyology 5
BIOE 127L Ichthyology Laboratory 2
BIOE 129 Biology of Marine Mammals 5
BIOE 129L: Biology of Marine Mammals Laboratory 2
METX 100: Introduction to Microbiology 5
METX 119: Microbiology 5
METX 119L: Microbiology Laboratory 5

BIOE 129/BIOE 129L: lab required
METX 119/METX 119L or METX 100/METX 119L: both lecture and laboratory required

Electives

Three topical electives chosen from the following:

NOTE: Lecture and 2-credit lab combinations count as one course.

BIOE 108: Marine Ecology 5
BIOE 112: Ornithology 5
BIOE 112L: Ornithology Field Studies 2
BIOE 114: Herpetology 5
BIOE 114L: Field Methods in Herpetological Research 2
BIOE 117: Systematic Botany of Flowering Plants 5
BIOE 117L: Systematic Botany of Flowering Plants Laboratory 2
BIOE 118: Plants and Society: the Biology of Food, Shelter, and Medicine 5
BIOE 120: Marine Botany 5
BIOE 120L: Marine Botany Laboratory 2
BIOE 122: Invertebrate Zoology 5
BIOE 122L: Invertebrate Zoology Laboratory 2
BIOE 124: Mammalogy 5
BIOE 124L: Mammalogy Laboratory 2
BIOE 125: Ecosystems of California 5
BIOE 126: Biology of Large Marine Vertebrates 5
BIOE 127: Ichthyology 5
BIOE 127L: Ichthyology Laboratory 2
BIOE 128L: Large Marine Vertebrates Field Course 5
BIOE 129: Biology of Marine Mammals 5
BIOE 129L: Biology of Marine Mammals Laboratory 2
BIOE 131: Animal Physiology 5
BIOE 131L: Animal Physiology Laboratory 2
BIOE 133: Exercise Physiology 5
BIOE 133L: Exercise Physiology Laboratory 2
BIOE 134: Comparative Vertebrate Anatomy 5
BIOE 134L: Comparative Vertebrate Anatomy Laboratory 2
BIOE 135: Plant Physiology 5

BIOE 135L: Plant Physiology Laboratory 2
BIOE 136: Environmental Physiology 5
BIOE 137: Molecular Ecology 5
BIOE 137L: Molecular Ecology Laboratory 2
BIOE 138: Modeling Evolution and Ecology 5
BIOE 139: Mathematical Modeling and Data Science in Ecology and Evolution 5
BIOE 140: Behavioral Ecology 5
BIOE 141L: Behavioral Ecology Field Course 5
BIOE 142L: Animal Behavior in the Wild (A Virtual Field Course) 5
BIOE 145: Plant Ecology 5
BIOE 145L: Field Methods in Plant Ecology 5
BIOE 147: Community Ecology 5
BIOE 149: Disease Ecology 5
BIOE 150: Ecological Field Methods 5
BIOE 150L: Ecological Field Methods Laboratory 5

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an
upper-division general elective:

Biological Sciences-EEB
Any 5 credits of undergraduate research from:
- BIOE 183W Undergraduate Research in EEB—Writing 2
- BIOE 183L Undergraduate Research in EEB 3
- BIOE 193 Independent Research in EEB 5
- BIOE 193F Independent Research in EEB 2
- BIOE 195 Senior Thesis 5

Environmental Studies
ENVS 183 Environmental Studies Internship 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in ecology and evolution is satisfied by completing two of the following ecology and evolutionary biology courses:

NOTE: Lecture and 2-credit lab combinations count as a single course.

- BIOE 108 Marine Ecology 5
- BIOE 114 Herpetology 5
- BIOE 114L Field Methods in Herpetological Research 2
- BIOE 117 Systematic Botany of Flowering Plants 5
- BIOE 120 Marine Botany 5
- BIOE 120L Marine Botany Laboratory 2
- BIOE 122 Invertebrate Zoology 5
- BIOE 122L Invertebrate Zoology Laboratory 2
- BIOE 127 Ichthyology 5
- BIOE 127L Ichthyology Laboratory 2
- BIOE 128L Large Marine Vertebrates Field Course 5
- BIOE 129 Biology of Marine Mammals 5
- BIOE 129L Biology of Marine Mammals Laboratory 2
- BIOE 137 Molecular Ecology 5
- BIOE 141L Behavioral Ecology Field Course 5
- BIOE 145 Plant Ecology 5
- BIOE 145L Field Methods in Plant Ecology 5
- BIOE 150L Ecological Field Methods Laboratory 5
- BIOE 151B Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory 5
- BIOE 153C Disciplinary Communication for Biologists 5
- BIOE 158L Field Methods in Marine Ecology 5
- BIOE 159A Marine Ecology Field Quarter: Marine Ecology with Laboratory 5
- BIOE 161L Kelp Forest Ecology Laboratory 5
- BIOE 171 Disciplinary Communication for Biologists 5
- BIOE 172 Population Genetics 5

For 2-credit laboratory courses listed above that are taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

Comprehensive Requirement
All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below;
- completing a senior thesis;
- achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
- obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

NOTE: Lab courses may have associated prerequisite or corequisite lecture courses.

- BIOE 112L Ornithology Field Studies 2
- BIOE 114L Field Methods in Herpetological Research 2
- BIOE 117L Systematic Botany of Flowering Plants Laboratory 2

MARINE BIOLOGY B.S.

Information and Policies

Introduction

The marine biology major is designed to introduce students to the great diversity of marine organisms and the biological and physical processes that affect these organisms, their populations, and their coastal and oceanic ecosystems. Curricular emphasis is on basic principles that help in understanding the processes that shape life in marine environments. The Department of Ecology and Evolutionary Biology (EEB) is located on UC Santa Cruz’s Coastal Science Campus (CSC). CSC is situated on Monterey Bay and its great diversity of coastal marine ecosystems, nature reserves, and state, federal, and private marine research institutions and management agencies. Both the National Marine Fisheries Service and the California Department of Fish and Game have laboratories located on the CSC, providing students with research and internship opportunities. Long Marine Laboratory on the CSC provides logistical support including diving and boating facilities, running seawater systems, and marine mammal facilities. Descriptions of nearby environments, institutions, and facilities are available through the EEB Department website. These resources, combined with computing and analytical facilities on main campus and the CSC, make for exceptional opportunities for the study of marine biology and its application to coastal conservation and management. Students can readily engage in basic and applied (e.g., fisheries management) research from estuaries to the deep sea, and plankton to whales.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students’ most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.
Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.

2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.

3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.

4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.

5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.

6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.

7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20C</td>
<td>Ecology and Evolution</td>
<td>5</td>
</tr>
</tbody>
</table>

And one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11A</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science,</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Engineering, and Mathematics</td>
<td></td>
</tr>
</tbody>
</table>

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students submit their major declaration petition on the EEB website. Students proposed in the major should submit a major declaration petition in the quarter of their major declaration deadline (i.e., sixth quarter for students admitted as frosh). The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment) based on the student's qualification to declare at the time the major declaration petition is received. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20C</td>
<td>Ecology and Evolution</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus, one of the following calculus courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11A</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science,</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Engineering, and Mathematics</td>
<td></td>
</tr>
</tbody>
</table>

A minimum GPA of 2.0 must be obtained in the courses listed above.

In addition, the following courses are recommended prior to transfer to ensure timely
graduation.
CHEM 1C  General Chemistry  5
CHEM 1N  General Chemistry Laboratory  2
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I Laboratory  1

Plus one of the following calculus courses:
MATH 11B  Calculus with Applications  5
MATH 19B  Calculus for Science, Engineering, and Mathematics  5

Plus one of the following physics courses:
PHYS 6B  Introductory Physics II  5
PHYS 6C  Introductory Physics III  5

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements. EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' Fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of biology (B.A., B.S., or minor), ecology and evolution B.S., marine biology B.S., plant sciences B.S., or environmental studies/biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.
[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Introductory Biology:
- BIOL 20A Cell and Molecular Biology 5
- BIOE 20B Development and Physiology 5
- BIOE 20C Ecology and Evolution 5

General Chemistry:
- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2

Calculus:
Choose one of the following options:
- Either these courses
  - MATH 11A Calculus with Applications 5
  - MATH 11B Calculus with Applications 5
- or these courses
  - MATH 19A Calculus for Science, Engineering, and Mathematics 5
  - MATH 19B Calculus for Science, Engineering, and Mathematics 5

Biostatistics:
- STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
- STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Physics:
Choose one of the following options:
- Either these courses
  - PHYS 7A Elementary Physics I 5
  - PHYS 6L Introductory Physics I Laboratory 1
  - PHYS 7B Elementary Physics II 5
- or these courses
  - PHYS 6A Introductory Physics I 5
  - PHYS 6L Introductory Physics I Laboratory 1

Upper-Division Courses

A total of 11 upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

Two core courses:
- BIOL 105 Genetics 5
- BIOE 109 Evolution 5

One ecology course:
- BIOE 107 Ecology 5
- BIOE 108 Marine Ecology 5

One marine-environment course:
- OCEA 101 The Marine Environment 5
- OCEA 130 Biological Oceanography 5

One marine course:

Electives

Three topical electives chosen from the following:

Note: Lecture and 2-credit lab combinations count as one course.
- BIOE 120 Marine Botany 5
- BIOE 120L Marine Botany Laboratory 2
- BIOE 122 Invertebrate Zoology 5
- BIOE 122L Invertebrate Zoology Laboratory 2
- BIOE 126 Biology of Large Marine Vertebrates 5
- BIOE 127 Ichthyology 5
- BIOE 127L Ichthyology Laboratory 2
- BIOE 129 Biology of Marine Mammals 5
- BIOE 129L Biology of Marine Mammals Laboratory 2
- BIOE 129/BIOE 129L: lab optional

Ocean Sciences
OCEA 118 Marine Microbial Ecology 5
OCEA 130 Biological Oceanography 5

Psychology
PSYC 123 Cognitive Neuroscience 5

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an upper-division general elective:

Biological Sciences-EEB
Any 5 credits of undergraduate research
BIOE 183W Undergraduate Research in EEB--Writing 2
BIOE 183L Undergraduate Research in EEB 3
BIOE 193 Independent Research in EEB 5
BIOE 193F Independent Research in EEB 2
BIOE 195 Senior Thesis 5

Environmental Studies
ENVS 183 Environmental Studies Internship 5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division disciplinary communication (DC) Requirement. The DC requirement in marine biology is satisfied by completing two of the following ecology and evolutionary biology courses:

Note: Lecture and 2-credit lab combinations count as a single course.

BIOE 108 Marine Ecology 5
BIOE 114 Herpetology 5
BIOE 114L Field Methods in Herpetological Research 2
BIOE 117 Systematic Botany of Flowering Plants 5
BIOE 120 Marine Botany 5
BIOE 120L Marine Botany Laboratory 2
BIOE 122 Invertebrate Zoology 5
BIOE 122L Invertebrate Zoology Laboratory 2
BIOE 127 Ichthyology 5
BIOE 127L Ichthyology Laboratory 2
BIOE 128L Large Marine Vertebrates Field Course 5
BIOE 129 Biology of Marine Mammals 5
BIOE 129L Biology of Marine Mammals Laboratory 2
BIOE 137 Molecular Ecology 5
BIOE 141L Behavioral Ecology Field Course 5
BIOE 145 Plant Ecology 5

BIOE 145L Field Methods in Plant Ecology 5
BIOE 150L Ecological Field Methods Laboratory 5
BIOE 151B Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory 5
BIOE 153C Disciplinary Communication for Biologists 5
BIOE 158L Field Methods in Marine Ecology 5
BIOE 159A Marine Ecology Field Quarter: Marine Ecology with Laboratory 5
BIOE 161L Kelp Forest Ecology Laboratory 5
BIOE 171 Disciplinary Communication for Biologists 5
BIOE 172 Population Genetics 5

For 2-credit laboratory courses listed above that are taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

Comprehensive Requirement
All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

• receiving a passing grade in an independent research course, or field/laboratory course listed below;
• completing a senior thesis;
• achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
• obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

Note: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L Ornithology Field Studies 2

PLANT SCIENCES B.S.

Information and Policies

Introduction

UC Santa Cruz has a strong program in the plant sciences (sometimes called botany). Resources that support the plant sciences major include state-of-the-art greenhouse facilities, natural ecosystems on the campus from coastal wetlands to redwood forests, the collections of the UCSC Arboretum, and the Center for Agroecology and Sustainable Food Systems (including the UC Santa Cruz Farm and Garden). A hallmark of the major is the many field courses that introduce students to a diversity of terrestrial and aquatic ecosystems and the skills to conduct field research. See the Ecology & Evolutionary Biology undergraduate webpage for more information on these courses.

The plant sciences major is designed for students with an interest in plant biology and its associated curricular fields such as plant ecology and evolution, plant physiology, plant pathology, plant genetics, soils, and applied plant sciences. After completion of the core courses, students can proceed in one of several directions depending on their interests. For example, a more in-depth study of physiology and evolution courses can serve as preparation for work in biotechnology or plant breeding; further studies in plant ecology, tropical ecology, or restoration ecology can lead to careers in resource ecology and management or biodiversity exploration; upper-division training in agroecology can lead to careers in agriculture or food systems. There are many opportunities for internships both on the UC Santa Cruz campus and in the greater community.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students’ most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental
Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

**Program Learning Outcomes**

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

**All of the following courses:**
- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- BIOL 20A Cell and Molecular Biology 5
- BIOE 20B Development and Physiology 5
- BIOE 20C Ecology and Evolution 5

**And one of the following courses:**
- MATH 11A Calculus with Applications 5
- MATH 19A Calculus for Science, Engineering, and Mathematics 5

**Appeal Process**

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

**How to Declare a Major**

Students may submit a petition to declare after successful completion of the qualification policy courses. Students submit their major declaration petition on the EEB website. Students proposed in the major should submit a major declaration petition in the quarter of their major declaration deadline (i.e., sixth quarter for students admitted as frosh). The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment) based on the student's qualification to declare at the time the major declaration petition is received. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.
BIOL 20A  Cell and Molecular Biology  5
BIOE 20B  Development and Physiology  5
BIOE 20C  Ecology and Evolution  5
CHEM 1A  General Chemistry  5
CHEM 1B  General Chemistry  5

Plus, one of the following calculus courses:
MATH 11A  Calculus with Applications  5
MATH 19A  Calculus for Science, Engineering, and Mathematics  5

A minimum GPA of 2.0 must be obtained in the courses listed above.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.
CHEM 1C  General Chemistry  5
CHEM 1N  General Chemistry Laboratory  2
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I Laboratory  1

Plus one of the following calculus courses:
MATH 11B  Calculus with Applications  5
MATH 19B  Calculus for Science, Engineering, and Mathematics  5

Plus one of the following physics courses:
PHYS 6B  Introductory Physics II  5
PHYS 6C  Introductory Physics III  5

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students’ reported transfer course work and determine how it applies to their major's requirements.
EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy
All courses used to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy
To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UCSC biology course.

Double Majors and Major/Minor Combinations Policy
Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad
The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.
Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

**Honors**

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

**[Optional Catchall]**

**Requirements and Planners**

**Course Requirements**

**Lower-Division Courses**

**Introductory Biology:**
- BIOL 20A: Cell and Molecular Biology 5
- BIOE 20B: Development and Physiology 5
- BIOE 20C: Ecology and Evolution 5

**General Chemistry:**
- CHEM 1A: General Chemistry 5
- CHEM 1B: General Chemistry 5
- CHEM 1C: General Chemistry 5
- CHEM 1N: General Chemistry Laboratory 2

**Calculus:**

Choose one of the following options:
- Either these courses
  - MATH 11A: Calculus with Applications 5
  - MATH 11B: Calculus with Applications 5
- or these courses
  - MATH 19A: Calculus for Science, Engineering, and Mathematics 5
  - MATH 19B: Calculus for Science, Engineering, and Mathematics 5

**Biostatistics:**
- STAT 7: Statistical Methods for the Biological, Environmental, and Health Sciences 5
- STAT 7L: Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

**Physics:**

Choose one of the following options:
- Either these courses
  - PHYS 7A: Elementary Physics I 5
  - PHYS 6L: Introductory Physics I Laboratory 1
  - PHYS 7B: Elementary Physics II 5
- or these courses
  - PHYS 6A: Introductory Physics I 5
  - PHYS 6L: Introductory Physics I Laboratory 1
  - PHYS 6B: Introductory Physics II 5
- or these courses
  - PHYS 6A: Introductory Physics I 5
  - PHYS 6L: Introductory Physics I Laboratory 1
  - PHYS 6C: Introductory Physics III 5

**Upper-Division Courses**

A total of 11 upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

**Two core courses:**
- BIOL 105: Genetics 5
- BIOE 109: Evolution 5

**One Ecology Course**
- BIOE 107: Ecology 5
- BIOE 145: Plant Ecology 5

**One plant physiology course from the following:**
- BIOE 135: Plant Physiology 5
- BIOE 135L: Plant Physiology Laboratory 2
- ENVS 162: Plant Physiological Ecology 5

**One botany course from the following:**
- BIOE 117: Systematic Botany of Flowering Plants 5
- BIOE 117L: Systematic Botany of Flowering Plants Laboratory 2
- BIOE 120: Marine Botany 5
- BIOE 120L: Marine Botany Laboratory 2
**Electives**

*Three topical electives chosen from the following:*

**Note:** Lecture and 2-credit lab combinations count as one course.

### Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in plant sciences is satisfied by completing two of the following ecology and evolutionary biology courses:

Note: Lecture and 2-credit lab combinations count as a single course.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOE 108</td>
<td>Marine Ecology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 114</td>

</tr>
<tr>
<td>BIOE 150L</td>
<td>Ecological Field Methods Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 151B</td>
<td>Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 153C</td>
<td>Disciplinary Communication for Biologists</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 158L</td>
<td>Field Methods in Marine Ecology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 159A</td>
<td>Marine Ecology Quarter: Marine Ecology with Laboratory</td>
<td>5</td>
</tr>
</tbody>
</table>
For 2-credit laboratory courses listed above that are taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

**Comprehensive Requirement**

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- Receiving a passing grade in an independent research course, or field/laboratory course listed below.
- Completing a senior thesis.
- Achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.
- Obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

**Comprehensive courses offered by Ecology and Evolutionary Biology**

**Note:** Lab courses may have associated prerequisite or corequisite lecture courses.

**ECOLOGY AND EVOLUTIONARY BIOLOGY BACHELORSMASTERS CONTIGUOUS PATHWAY**

The Ecology and Evolutionary Biology (EEB) Department offers a contiguous bachelor’s/master’s path program, which can be completed with an appropriate bachelor’s degree at UC Santa Cruz in five years. The program provides highly motivated undergraduate majors...
the opportunity to earn separate bachelor’s (B.A.) and master’s (M.A.) degrees. This pathway provides an additional level of preparation and experience to help students pursue careers in industry or government, or to increase their competitiveness for doctoral programs.

Students applying to the EEB Contiguous Bachelor’s/Master’s Path must be UC Santa Cruz undergraduates who are in the process of developing or conducting an independent research project with an EEB ladder rank faculty as their advisor or co-advisor. The undergraduate thesis advisor is the person who recommends applicants to the contiguous B.A./M.A. program and agrees to continue serving as their master’s advisor or co-advisor. Students applying to this program will either be completing an undergraduate degree in one of the majors administered by EEB (i.e., biology, ecology and evolutionary biology, marine biology, or plant science) or completing an undergraduate degree in a related field and have completed and done well in the EEB coursework relevant to their proposed research. The master's degree consists of 35 total credits, 15 credits from upper-level undergraduate courses and 20 credits in graduate-level courses.

Applications to the contiguous B.A./M.A path are completed in a two-step process. In spring of the undergraduate’s junior year, they will complete the EEB departmental application form as described in the checklist below. If approved for the additional-year Contiguous Bachelor’s/Master’s Path, students will go through the regular EEB master’s program application process in fall of their senior year. Admission to the program is not guaranteed; significant progress on the thesis research project combined with an excellent academic track record will indicate the preparedness of the student to undertake this accelerated master’s program.

**Checklist for Bachelor's/Master's Students**

1. Read the program information on the Contiguous Bachelor’s/Master’s Path website, including requirements and deadlines. **Note:** The M.A. is a Plan I Thesis Track master’s.

2. To be able to take advantage of this program, by the middle of your junior year you will need to find an EEB ladder rank faculty advisor or co-advisor with whom you will design and complete your research project. If you choose to work with an adjunct or affiliated faculty, you must also have a ladder rank faculty as your co-advisor. At this point the research project may develop either into an undergraduate senior thesis project or a master’s research project.

3. By spring of the junior year, submit your EEB departmental application for consideration to apply to the contiguous B.A./M.A. program. This must include:
   a. a letter from a ladder rank faculty in EEB who agrees to be your master’s advisor or co-advisor;
   b. a brief description (maximum one page) of your planned research;
   c. a curricular plan that has been reviewed by your proposed EEB faculty advisor and any other proposed faculty co-advisors, Biology Advising (or the appropriate advising for your undergraduate major at UCSC) and the EEB Graduate Program coordinator to ensure you can complete all coursework required for both degrees in five years.

4. In the fall of your senior year, if your departmental application is approved and you and your advisor still believe the research project could develop into a master’s thesis, apply for admission through the UCSC Graduate Division portal to the M.A. Program (due date Dec. 10).
   a. Your statement of purpose must include a proposed research plan for your master’s thesis.
   b. You must include a letter of recommendation from a ladder rank EEB faculty advisor or co-advisor stating that they approve this plan and agree to serve as your advisor or co-advisor for your master’s research and thesis.

5. By the end of senior year, complete all requirements for your bachelor’s degree from UCSC and submit an undergraduate thesis, which includes a section on your proposed research extension (for the master’s thesis), following the same guidelines as the existing Two-Year Master’s Program. This thesis must be read and approved by your EEB ladder rank faculty advisor. Recommendation: enroll in a graduate-level class at some time during your senior year and also attend EEB departmental seminars (BIOE 294). Entry-level graduate classes include BIOE 203, BIOE 215, BIOE 238, BIOE 239, and BIOE 245.

6. During the master’s year, complete the graduate course and seminar requirements while working on your master’s thesis.
   a. You will enroll in BIOE 200A, BIOE 200B, BIOE 279, and attend EEB departmental seminars (BIOE 294) every quarter, and enroll in two quarters of BIOE 203 or one of BIOE 203 and one of BIOE 215. A student may take BIOE 203 and BIOE 215 during their senior undergraduate year as long as these courses are not used to meet course and credit requirements for their undergraduate degree. Establish a master’s thesis committee consisting of your research advisor (chair) plus two other ladder rank faculty.

7. Master’s Thesis/Master’s Thesis Defense
a. At the beginning of your senior undergraduate year, develop a timeline with your adviser that includes deadlines for all components of the thesis; a complete draft should be submitted to your advisor by early April at the latest. There is usually an extensive revising process prior to giving the thesis to the other committee members.

b. By Friday of week 10 of winter quarter schedule your defense and public seminar with your master’s thesis committee members through the departmental graduate coordinator.

c. One month (30 days) before the thesis defense date (at the latest), email the thesis to your other thesis committee members.

d. During your defense you will present your work to be reviewed by your committee. They may also ask general knowledge questions to test your mastery of the subject area. Corrections and/or additions to your thesis may be suggested.

e. Next, a formal, public research seminar will be presented by the student. This seminar should be scheduled with the EEB Graduate Program coordinator for the regular time slot when possible, and may not be scheduled for less than a week after the closed defense meeting. It is important to leave enough time before the public seminar for the student to make changes to the thesis manuscript that are requested by the committee. The M.A. Thesis Reading Committee chair signs the title sheet only after the research has been presented in a public seminar.

f. Submit the final version of your master’s thesis and complete your final appointment with the Graduate Division. In order to participate in the graduation ceremony, students must submit all documentation to the Graduate Division by the deadline as stated in the Academic and Administrative Calendar. This usually occurs during week nine of spring quarter.

If a student completes their UCSC bachelor’s degree and is admitted to the Contiguous Bachelor’s/Master’s Path, but does not successfully complete all requirements expected for this program, then they would revert to the existing EEB Master’s Program requirements. They must remain in good standing in the program and follow all existing guidelines of the EEB Master’s Program. The baseline assumption is that students admitted to the Contiguous Bachelor’s/Master’s Path will be self-funded throughout their enrollment in the master’s program.

ECOLOGY AND EVOLUTIONARY BIOLOGY

M.A.

Introduction

All curricular requirements are aimed at preparing students for timely and successful completion of a master thesis. The master of arts (M.A.) curriculum in Ecology and Evolutionary Biology (EEB) includes two stages: 1) required coursework, 2) the research, writing, and defense of the master thesis.

Requirements

Course Requirements

M.A. students must take BIOE 200A, BIOE 200B, BIOE 279, and two quarters of BIOE 203 (or one quarter of BIOE 203 and one quarter of BIOE 215 (formerly BIOE 295) within their first two years. BIOE 281, BIOE 294, and BIOE 297 (Independent Study) must be taken every quarter the student is in residence. All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status. No more than 15 credits from upper-division undergraduate courses may be used as part the student’s coursework.

Core Courses

- BIOE 200A: Scientific Skills 5
- BIOE 200B: Advanced Organismal Biology 5
- BIOE 203: Introductory Seminar in Ecology and Evolutionary Biology 3
- BIOE 279: Evolutionary Ecology 5
- BIOE 203: must be taken twice
- BIOE 215 (formerly BIOE 295): may substitute for BIOE 203 once

The following courses must be taken every quarter the student is in residence.

- BIOE 281: Graduate Seminar
- BIOE 294: Ecology, Evolutionary Biology Seminar
- BIOE 297: Independent Study

Elective Courses

- BIOE 208: Marine Ecology 5
- BIOE 245: Plant Ecology 5
- BIOE 245L: Field Methods in Plant Ecology Laboratory 5
- BIOE 247: Community Ecology 5
- BIOE 239: Mathematical Modeling and Data Science in Ecology and Evolution 5
- BIOE 238: Modeling Evolution and Ecology 5
- BIOE 258L: Experimental Marine Ecology 5
- BIOE 262: Facilitating Change in Coastal Science Policy 5
BIOE 271  Disciplinary Communication for Biologists  5
BIOE 272  Population Genetics  5
BIOE 286  Experimental Design and Data Analysis  5
BIOE 286L  Experimental Design and Data Analysis Lab  2
BIOE 139  Mathematical Modeling and Data Science in Ecology and Evolution  5

Other Requirements
The master research project is identified by students and requires approval from the students’ masters reading committee in the fall of the second year. The master thesis manuscript is submitted to the students’ masters reading committee, defended in a closed oral examination, and presented in a departmental seminar by the end of the second year.

Deadlines at each stage must be confirmed with the graduate program coordinator.

Academic Progress
Normative time to degree for the M.A. program is two years. Academic progress is formally reviewed in the spring quarter of each academic year.

Applying for Graduation
Information on applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the graduate program coordinator.

ECOLOGY AND EVOLUTIONARY BIOLOGY PH.D.

Introduction
All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. The Ph.D. curriculum in Ecology and Evolutionary Biology (EEB) includes six stages: 1) required coursework, 2) the comprehensive examination, 3) the qualifying examination, 4) two quarters of teaching experience, 5) submission of at least one paper for publication, 6) the research, writing, and defense of the dissertation.

Advancement to Candidacy

Course Requirements

Core Courses
Ph.D. students must take BIOE 200A and BIOE 200B in the fall of the first year, and BIOE 279 in the winter of the first year. Two quarters of BIOE 203 are taken in the winter and spring of the first year. In addition, two quarters of BIOE 215 (formerly BIOE 295) or two additional quarters of BIOE 203 should be completed by the end of the second year.

BIOE 200A  Scientific Skills  5
BIOE 200B  Advanced Organismal Biology  5
BIOE 203  Introductory Seminar in Ecology and Evolutionary Biology  3
BIOE 279  Evolutionary Ecology  5
BIOE 139  Mathematical Modeling and Data Science in Ecology and Evolution  5

BIOE 215 (formerly BIOE 295): may be substituted with additional BIOE 203

The following courses must be taken every quarter the student is in residence.

All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status.

BIOE 281  Graduate Seminar
AND
BIOE 294  Ecology, Evolutionary Biology Seminar
AND

Either this course
BIOE 297  Independent Study
or this course
BIOE 299  Thesis Research

BIOE 297 or BIOE 299 is required, not both. BIOE 297 is taken until the student advances to candidacy. BIOE 299 is taken after the student advances to candidacy.

Elective Courses

BIOE 208  Marine Ecology  5
BIOE 245  Plant Ecology  5
BIOE 245L  Field Methods in Plant Ecology Laboratory  5
BIOE 247  Community Ecology  5
BIOE 239  Mathematical Modeling and Data Science in Ecology and Evolution  5
BIOE 238  Modeling Evolution and Ecology  5
BIOE 258L  Experimental Marine Ecology  5
BIOE 262  Facilitating Change in Coastal Science Policy  5
BIOE 271  Disciplinary Communication for Biologists  5
BIOE 272  Population Genetics  5
BIOE 272L  Population Genetics Laboratory  2
Foreign Language Requirements

Teaching Requirement

Each Ph.D. student should expect to complete at least two quarters as a teaching assistant during their graduate career.

Pre-Qualifying Requirements

The comprehensive examination is completed in the fall of the second year. This is a two-part examination, written and oral, the goal of which is to examine the student’s breadth and depth of knowledge of evolution, ecology, organismal biology (including physiology and behavior), and general biology. In both the written and oral examinations, the expected level of knowledge of basic biology ranges from introductory level in fields most removed from the student’s focus area to a more substantial and advanced level in fields closer to the student’s focus area.

Qualifying Examination

The qualifying examination follows the comprehensive examination and is completed no later than the third year. The goal of this two-part examination is to establish the student’s proposed dissertation project. Students submit a dissertation research proposal to their qualifying exam committee and defend it in an oral examination. The proposal should be submitted no less than ten days before the oral defense. The proposal defense must be completed by the spring quarter of the third year and be followed by a departmental seminar on the student’s research proposal. Students advance to candidacy after having completed all required coursework, the comprehensive examination, and the qualifying examination.

Dissertation

Dissertation

Within EEB, a dissertation usually contains three or four chapters that comprise original research, each of which is substantial enough to be published in a scientific journal, plus a short introduction and a conclusion/synthesis. The conclusion synthesizes the results of the dissertation as a whole, reflects on how novel insights come from the whole body of work, and may point the reader toward future research directions.

At least one chapter of the dissertation must be submitted to a refereed journal for publication as a final program requirement before receipt of the Ph.D.

Dissertation Defense

The dissertation is defended in a closed oral examination and then presented in a departmental seminar.

Academic Progress

Normative time to degree is six years, though it is possible to complete the program in less time. Academic progress is formally reviewed in the spring quarter of each academic year.

Applying for Graduation

Information for applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the Graduate Program coordinator.

[Optional Catchall]

ECOLOGY AND EVOLUTIONARY BIOLOGY DESIGNATED EMPHASIS

Introduction

Requirements

To receive a designated emphasis in ecology and evolutionary biology (EEB), graduate students must complete the following requirements in addition to the degree requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

1. Identify a designated faculty advisor from among the faculty of the EEB department, who commits to serve on the qualifying examination committee and on the Ph.D. dissertation reading committee.

2. Once a designated faculty advisor has been identified, file intent to complete the designated emphasis in EEB with the EEB department graduate program coordinator.

Course Requirements

Students are required to complete at least 20 credits of EEB coursework. Courses taken to fulfill program requirements within the home department will not count toward the designated emphasis program's required coursework.

Take the following EEB core courses (required for all EEB graduate students):

- BIOE 200A Scientific Skills 5
- BIOE 200B Advanced Organismal Biology 5
- BIOE 279 Evolutionary Ecology 5

Enroll in the following course and attend all EEB Department seminars for one quarter:

- BIOE 294 Ecology, Evolutionary Biology Seminar

Enroll in the following course corresponding to
their EEB faculty advisor and attend their laboratory group seminars for one quarter:

**BIOE 281**  Graduate Seminar

Take at least two other EEB graduate courses.

- **BIOE 208**  Marine Ecology  5
- **BIOE 245**  Plant Ecology  5
- **BIOE 245L**  Field Methods in Plant Ecology Laboratory  5
- **BIOE 247**  Community Ecology  5
- **BIOE 239**  Mathematical Modeling and Data Science in Ecology and Evolution  5
- **BIOE 238**  Modeling Evolution and Ecology  5
- **BIOE 258L**  Experimental Marine Ecology  5
- **BIOE 262**  Facilitating Change in Coastal Science Policy  5
- **BIOE 271**  Disciplinary Communication for Biologists  5
- **BIOE 272**  Population Genetics  5
- **BIOE 286**  Experimental Design and Data Analysis  5
- **BIOE 286L**  Experimental Design and Data Analysis Lab  2
- **BIOE 203**  Introductory Seminar in Ecology and Evolutionary Biology  3
- **BIOE 139**  Mathematical Modeling and Data Science in Ecology and Evolution  5

**Writing, Research and/or Teaching Requirements**

**Academic Progress**

**OTHER PROGRAMS OF INTEREST**

**Economics and Mathematics Combined B.A.** (p. 589)

**UNDERGRADUATE PROGRAM**

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, and psychology. Researchers in all these areas are constantly developing new ways of applying mathematics to their fields. A strong mathematics background is vital to the advanced study of many disciplines, including the physical and biological sciences, engineering, and the social sciences.

The UC Santa Cruz mathematics program offers a wide variety of undergraduate courses:

- Students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Students needing mathematics courses for their intended major are strongly encouraged to consider their options, and take the necessary steps for assessment and placement as early as possible. Progress in some majors could be delayed if the calculus series is not begun upon arrival at UCSC. Students concerned about their ability to place into courses above MATH 3 should consider taking MATH 2 or its equivalent prior to entering UCSC.

- Lower-division courses with numbers in the range MATH 11A through MATH 24 (calculus, linear algebra, vector calculus, and differential equations) prepare students for further study in mathematics, the physical and biological sciences, engineering, or quantitative areas of the social sciences. Science and engineering majors take some or all of these courses as part of their undergraduate studies.

- Upper-division courses, with numbers in the range MATH 100-MATH 199, are intended for majors in mathematics and closely related disciplines. Some of these courses provide students with a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and number theory, whereas others introduce students to more specialized areas of mathematics. Calculus, linear algebra, vector calculus, and proof and problem solving are prerequisite to most of these advanced courses.

All students should review the catalog's requirements for their major or intended major, and possibly consult with the department sponsoring their major (or expected major) before deciding which math courses to take. More information on which courses are intended for the various types of students may be found here at the Mathematics Department website.
Enrollment Requirements

Students who plan to take a mathematics course at UC Santa Cruz must first demonstrate sufficient preparation for that course by completing mathematics placement (see below), the College Entrance Examination Board’s Advanced Placement (AP) calculus examination, the International Baccalaureate (IB) Mathematics Examination, or by passing the appropriate prerequisite course.

Through placement, some students may be required to start their UCSC mathematics classes with MATH 2 (followed by MATH 3) or MATH 3 before progressing to one of the calculus series. Students who have passed MATH 2 may enroll in MATH 3. Students who have passed MATH 3 may enroll in course MATH 11A or MATH 19A. Students who have passed a precalculus course at a college or university may enroll in course MATH 11A or MATH 19A, but they must first verify eligibility of the course (on Assist.org) and course completion with the mathematics adviser.

UC Santa Cruz Mathematics Placement

Mathematics placement assesses student readiness for their first UC Santa Cruz mathematics class. Students whose areas of study require precalculus or calculus courses are strongly advised to complete placement, as well as any required courses, early in their academic careers. Students intending to take one or more mathematics courses at UCSC should begin placement as early as possible to fully benefit from the process.

Students completing placement by assessment through ALEKS PPL should familiarize themselves with the instructions and guidelines, course eligibility cutoffs, and score posting schedule.

Advanced Placement (AP) Calculus Examinations

Students completing placement requirements by using their scores on the College Board’s Advanced Placement Calculus Exam should refer to this table for course equivalencies.

International Baccalaureate (IB) Examination in Mathematics

Students completing placement requirements by using their scores from the International Baccalaureate Exam should refer to this table for course equivalencies.

GRADUATE PROGRAM

The Mathematics Department offers programs leading to the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.; students admitted to the M.A. program may apply to the department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

In order to be prepared for the master’s or Ph.D. program, it is recommended to have a B.A. or B.S. in mathematics. Having taken more than the bare minimum of required upper-division classes in the mathematics major will be most helpful.

The Mathematics Department at UC Santa Cruz is small but dynamic, with an ongoing commitment to both research and teaching. The department has leading programs in several actively developing areas on the frontiers of pure and applied mathematics, interacting strongly with theoretical physics and mechanics.

Current areas of research in Algebra: Number Theory Topology, and Vertex Operators include:

- Vertex operator algebras, conformal field theory, modular forms, Hopf algebras, category theory, infinite-dimensional Lie algebras, mathematical physics.
- Representations of Lie and p-adic groups, applications to number theory, Bessel functions, Rankin-Selberg integrals, Gelfand-Graev models.
- Finite groups, their representations and representation rings. Conjectures of Alperin, Broué and Dade. Mackey functors, biset functors, Burnside rings, fusion systems, blocks of group algebras. ring theory, module theory, category theory, homological algebra.
- Algebraic topology, cobordism cohomology theories, elliptic genera and modular forms, string topology of loop spaces, topological quantum field theories.
- Triangulated categories, tensor triangular geometry, stable homotopy theory, and higher category theory.
- Galois and incidence geometry.
- Arithmetic algebraic geometry of moduli spaces and locally symmetric varieties.

Current areas of research in Analysis, Geometry and Dynamics include:

- Symplectic and contact geometry and topology, Floer homology, periodic orbits and dynamics of Hamiltonian systems and Reeb flows.
- Dynamical systems, celestial mechanics, geometric mechanics, bifurcation theory, control theory.
- Geometric integration schemes, numerical methods on manifolds.
- Differential geometry, nonlinear analysis, Ginzburg-Landau problem.
• General relativity, Einstein's equations, positive mass conjecture, Teichmuller theory.

• Geometric Analysis: geometric flows, harmonic maps, minimal surfaces, surfaces of constant mean curvature, min-max theory.

• Functional analysis, spectral theory, and Banach algebras; Toeplitz and Hankel operators, matrices, and determinants; Wiener-Hopf factorization and Riemann-Hilbert problems; applications to random matrix theory and statistical physics.

• Inverse problems in PDEs and integral geometry, X-ray/Radon transforms, non-abelian X-ray transforms, with applications to imaging sciences.

• Spectral Zeta Functions and applications in Quantum Field Theory and Number Theory.

Further information about the research pursued by our faculty can be explored via the links above. Also, see individual faculty websites for more information.

Admission to the Graduate Program

Submit your application through the Graduate Division. The deadline is usually during the first half of January. Admission is decided by a faculty committee, and is based on a combination of factors including: GRE scores (in particular the GRE Math Subject Score), letters of recommendation, GPA, and classes taken.

Financial Support

The Mathematics Department is strongly committed to the financial support of graduate students who are making good progress toward either the master's or the Ph.D. degree. For the purpose of financial support, a student’s progress is measured against the degree requirements and timetables.

A teaching assistantship (TA) is the most common form of financial support for graduate students in good academic standing. TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours for the quarter). Teaching assistants are under the supervision of the faculty member responsible for the course.

All students are strongly urged to complete a Free Application for Financial Student Aid (FAFSA) each year by the start of fall quarter to determine eligibility for need-based awards. Students are also encouraged to apply for support from the Financial Aid Office as well as from the Mathematics Department.

No need-based fellowship can be awarded to a student who does not have a current FAFSA on file. Students facing special financial hardship are urged to make this known to the department in a timely manner.

The Mathematics Department will do everything in its power to ensure that all students in good standing are granted sufficient financial aid to continue their study of mathematics.

Relationship of Master’s and Doctoral Programs

Students in the master’s and doctoral program take the same classes in the core sequences and the same preliminary examinations. Ph.D. and master’s students have the same passing requirements in the core classes. However, the preliminary examination requirements for Ph.D. and master’s students are different, and are outlined within the requirements section of each program.

MATHEMATICS B.A.

Information and Policies

Introduction

The mathematics bachelor of arts (B.A.) program provides an excellent liberal arts background from which to pursue a variety of career opportunities. UC Santa Cruz graduates with a B.A. in mathematics hold teaching posts at all levels, as well as positions in law, government, civil service, insurance, software development, business, banking, actuarial science, forensics, and other professions where skills in logic, numerical analysis, and computing are required. In particular, students are trained in the art of problem-solving--- an essential skill in all professions.

Within the major, there are two concentrations leading to the Bachelor of Arts in Mathematics: pure mathematics and computational mathematics.

Pure Mathematics

This pathway emphasizes the importance of a well-rounded, in-depth mathematical education, and includes advanced coursework in algebra, analysis, and geometry. Students often pursue a career with a focus on research and theory.

Computational Mathematics

Students explore ways math can be used to answer questions in many other fields. They gain experience in mathematical modeling of real-world phenomena via ordinary and partial differential equations, approximation and optimization techniques, programming, or game theory.

Both of these concentrations are designed to give students a strong background for graduate study, for work in industry or government, or for teaching. Each concentration requires nine or ten courses, one of which must be a senior thesis or senior seminar. A minor in pure mathematics is also offered.

Academic Advising for the Program

The undergraduate advisor may be contacted via email at mathadvising@ucsc.edu. The advisor provides
information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the advisor assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Getting Started in the Major

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the “big” problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students’ abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Curriculum Matrix

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student’s mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department’s website.

Major Qualification Policy and Declaration Process

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.
Major Qualification

It is strongly recommended that only students who earn grades of B- or better in MATH 100 consider applying to the major in mathematics.

Admission to the mathematics major (all concentrations) is contingent on students successfully passing the following introductory courses or their equivalents:

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major.

How to Declare a Major

See the Mathematics Department website for directions on How to Qualify for and Petition to Declare a Math Major.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy

Transfer Admissions Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

Students planning to transfer to UC Santa Cruz from a California community college should reference the assist website to determine which courses are equivalent to these required courses.

Prospective students are encouraged to prioritize recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

Getting Started at UCSC as a Transfer Student

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students will have taken a course that may also be equivalent to MATH 23B. Students are encouraged to contact the undergraduate advisor to determine if this applies to their situation.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see the UCSC-wide policies on grading options.

[Optional Catchall]

Course Substitution Policy

The Mathematics Department’s undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Pure Mathematics Concentration

This concentration is intended for students who desire a comprehensive understanding of mathematics.
Course Requirements

Lower-Division Courses

Choose one of the following courses:
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 20A  Honors Calculus  5

Plus one of the following courses:
MATH 19B  Calculus for Science, Engineering, and Mathematics  5
MATH 20B  Honors Calculus  5

Plus all of the following courses:
MATH 21  Linear Algebra  5
MATH 23A  Vector Calculus  5
MATH 23B  Vector Calculus  5
MATH 24  Ordinary Differential Equations  5

Upper-Division Courses

The following course:
MATH 100  Introduction to Proof and Problem Solving  5

Plus one of the following courses:
MATH 103A  Complex Analysis  5
MATH 105A  Real Analysis  5

Plus one of the following courses:
MATH 110  Introduction to Number Theory  5
MATH 111A  Algebra  5
MATH 111T  Algebra  5
MATH 117  Advanced Linear Algebra  5

Plus one of the following courses:
MATH 121A  Differential Geometry  5
MATH 124  Introduction to Topology  5
MATH 128A  Classical Geometry: Euclidean and Non-Euclidean  5
MATH 129  Algebraic Geometry  5

Plus one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

Electives
The remaining three courses are selected by the student from among any mathematics course numbered above 100 (excluding MATH 188 and MATH 189) and Applied Mathematics (AM) or Statistics (STAT) 100 or above. Only one of the three courses can be from the AM or STAT series.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by
MATH 100  Introduction to Proof and Problem Solving  5

Plus one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

### Computational Mathematics Concentration

This concentration is intended to prepare students for technical careers in industry or government while providing a solid mathematical background.

### Course Requirements

#### Lower-Division Courses

**Choose one of the following courses:**
- MATH 19A  Calculus for Science, Engineering, and Mathematics  5
- MATH 20A  Honors Calculus  5

**Plus one of the following courses:**
- MATH 19B  Calculus for Science, Engineering, and Mathematics  5
- MATH 20B  Honors Calculus  5

**Plus all of the following courses:**
- MATH 21  Linear Algebra  5
- MATH 23A  Vector Calculus  5
- MATH 23B  Vector Calculus  5
- MATH 24  Ordinary Differential Equations  5

#### Upper-Division Courses

**All of the following courses:**
- MATH 100  Introduction to Proof and Problem Solving  5

**Plus one of the following courses:**
- MATH 103A  Complex Analysis  5
- MATH 105A  Real Analysis  5

**Plus one of the following courses:**
- MATH 106  Systems of Ordinary Differential Equations  5
MATH 107  Partial Differential Equations 5

Plus the following course:
MATH 110  Introduction to Number Theory 5

Plus one of the following courses:
MATH 111A  Algebra 5
MATH 111T  Algebra 5
MATH 117  Advanced Linear Algebra 5

Plus one of the following options:
MATH 148  Numerical Analysis 5
MATH 145  Introductory Chaos Theory 5
AM 114  Introduction to Dynamical Systems 5
AM 147  Computational Methods and Applications 5

Plus one of the following courses:
MATH 194  Senior Seminar 5
MATH 195  Senior Thesis 5

Electives

Two courses selected from the following:

AM 100 or above
STAT 100 or above
BME 110  Computational Biology Tools 5
CSE 101  Introduction to Data Structures and Algorithms 5
CSE 102  Introduction to Analysis of Algorithms 5
CSE 103  Computational Models 5
CSE 104  Computability and Computational Complexity 5
CSE 106  Applied Graph Theory and Algorithms 5
CSE 107  Probability and Statistics for Engineers 5
CSE 110A  Fundamentals of Compiler Design I 5
CSE 111  Advanced Programming 5
CSE 112  Comparative Programming Languages 5
CSE 142  Machine Learning 5
EART 172  Geophysical Fluid Dynamics 5
ECE 103  Signals and Systems 5
ECE 135  Electromagnetic Fields and Waves 5
ECE 130  Introduction to Optoelectronics and Photonics 5
ECE 141  Feedback Control Systems 5
ECE 151  Communications Systems 5
ECE 153  Digital Signal Processing 5
ECON 113  Introduction to Econometrics 5
MATH 115  Graph Theory 5

MATH 116  Combinatorics 5
MATH 120  Coding Theory 5
MATH 134  Cryptography 5
MATH 145  Introductory Chaos Theory 5
MATH 148  Numerical Analysis 5
MATH 152  Programming for Mathematics 5
MATH 160  Mathematical Logic I 5
PHYS 115  Computational Physics 5

Some of these courses have prerequisites within their departments.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by MATH 100  Introduction to Proof and Problem Solving 5

Plus one of the following courses:
MATH 194  Senior Seminar 5
MATH 195  Senior Thesis 5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:
MATH 194  Senior Seminar 5
MATH 195  Senior Thesis 5

**MATHEMATICS B.S.**

**Information and Policies**

**Introduction**

The Mathematics Bachelor of Science degree (B.S.) is designed for students who value the theoretical study of mathematics— not only for application, but also for its own sake. Theoretical mathematicians focus on the big how and why questions of mathematics, and attempt to
find new formulae and methods while utilizing insights from a tradition of thousands of years. The Mathematics B.S. is recommended for those students who seek an education that involves not only foundational computational skills but also rigorous explanations of how mathematics works. A well-rounded education in mathematics requires an introduction to proof class, and a balance of advanced coursework in algebra, analysis, and geometry. Majors who seek graduate study at top institutions often go beyond the required courses to enroll in graduate courses as well.

Academic Advising for the Program

The undergraduate adviser may be contacted via email at mathadvising@ucsc.edu. The adviser provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the adviser assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Getting Started in the Major

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real-world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the “big” problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

**Critical thinking.** The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

**Problem solving.** The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

**Effective communication.** The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students’ abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

**Curriculum Matrix**

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level;
the latter courses make heavy use of particular skills, and thus enhance and reinforce the student’s mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department’s website.

**Major Qualification Policy and Declaration Process**

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.

**Major Qualification**

Admission to the Mathematics B.S. major is contingent on students successfully passing the following introductory courses or their equivalents:

**Choose one of the following courses:**
- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 20A Honors Calculus 5

**Plus one of the following courses:**
- MATH 19B Calculus for Science, Engineering, and Mathematics 5
- MATH 20B Honors Calculus 5

**Plus all of the following courses:**
- MATH 21 Linear Algebra 5
- MATH 23A Vector Calculus 5
- MATH 23B Vector Calculus 5
- MATH 100 Introduction to Proof and Problem Solving 5

**Appeal Process**

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major.

**How to Declare a Major**

See the Mathematics Department website for directions on How to Qualify for and Petition to Declare a Math Major.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>

### MATHEMATICS EDUCATION B.A.

#### Information and Policies

**Introduction**

The Mathematics Education Bachelor’s of Arts (B.A.) is specially designed to prepare students for a career in K-12 mathematics education. It shares a rigorous approach to advanced mathematics, but requires coursework that is particularly relevant to the K-12 classroom: number theory, classical geometry, and the history of mathematics. In addition, the math education major requires experience in supervised teaching. Many math education majors also participate in CalTeach, to enhance their experience and directly connect with local schools.

In California, students seeking a single-subject credential for secondary teaching in mathematics are required to take the CSET (formerly The National Teachers Examination), a series of examinations that must be passed in order to enter a teaching-credential program. Students who are interested in teaching in high schools can obtain a waiver of the CSET Examinations by completing the mathematics education major, plus three additional specified courses. The Mathematics
Department undergraduate advisor, the Mathematics Department’s website, and the Education Department advising office have more information about the additional required course.

**Academic Advising for the Program**

The undergraduate advisor may be contacted via email at mathadvising@ucsc.edu. The advisor provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the advisor assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

**Getting Started in the Major**

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as possible. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

**Program Learning Outcomes**

**Mathematics Undergraduate Student Learning Objectives**

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real-world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the “big” problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

- **Critical thinking.** The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.
- **Problem solving.** The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.
- **Effective communication.** The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students’ abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

**Curriculum Matrix**

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student’s mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department’s website.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

Admission to the mathematics education major is contingent on students successfully passing the following introductory courses or their equivalents:
Choose one of the following courses:
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 20A  Honors Calculus  5

Plus one of the following courses:
MATH 19B  Calculus for Science, Engineering, and Mathematics  5
MATH 20B  Honors Calculus  5

Plus all of the following courses:
MATH 21  Linear Algebra  5
MATH 23A  Vector Calculus  5
MATH 23B  Vector Calculus  5
MATH 100  Introduction to Proof and Problem Solving  5

Appeal Process
If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major.

How to Declare a Major
See the Mathematics Department website for directions on How to Qualify for and Petition to Declare a Math Major.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy
Transfer Admission Screening Policy
The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 20A  Honors Calculus  5

Recommended Course for Transfer Students
In addition, the following course is recommended prior to transfer to ensure timely graduation.
STAT 5  Statistics  5

Getting Started at UCSC as a Transfer Student
While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students will have taken a course that may also be equivalent to MATH 23B. Students are encouraged to contact the undergraduate advisor to determine if this applies to their situation.

Letter Grade Policy
There are no restrictions on grading options for Mathematics Department courses. Please see the UCSC-wide policies on grading options.

Course Substitution Policy
The Mathematics Department’s undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Honors
Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest Honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Requirements and Planners
The Mathematics Education B.A. is intended to introduce students to the mathematics necessary for a career teaching kindergarten through high school (K-12) mathematics.

Course Requirements
Lower-Division Courses

One of the following courses:
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 20A  Honors Calculus  5

Plus one of the following courses:
MATH 19B  Calculus for Science, Engineering, and Mathematics  5
MATH 20B  Honors Calculus  5
Plus all of the following courses:
MATH 21  Linear Algebra  5  (fresh)  19A  or MATH 19B
MATH 23A  Vector Calculus  5  or MATH 20A  or MATH 20B
MATH 23B  Vector Calculus  5  MATH 23A
STAT 5  Statistics  5

Upper-Division Courses
All of the following courses:
MATH 100  Introduction to Proof and Problem Solving  5
MATH 110  Introduction to Number Theory  5
MATH 128A  Classical Geometry: Euclidean and Non-Euclidean  5
MATH 181  History of Mathematics  5
STAT 131  Introduction to Probability Theory  5

Plus one of the following courses:
MATH 103A  Complex Analysis  5
MATH 105A  Real Analysis  5

Plus one of the following courses:
MATH 111A  Algebra  5
MATH 111T  Algebra  5

Plus all the following courses:
EDUC 50B  CAL Teach 1: Mathematics  2
EDUC 100B  CAL Teach 2: Mathematics  2

Plus one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in the Mathematics Education B.A. is satisfied by:
MATH 100  Introduction to Proof and Problem Solving  5

Plus one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

Comprehensive Requirement
The comprehensive exit requirement in mathematics is satisfied by one of the following courses:
MATH 194  Senior Seminar  5
MATH 195  Senior Thesis  5

The MF, PR, SR and TA general education requirements are satisfied through this sample plan.

MATHEMATICS MINOR

Course Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least 10 courses as follows:

Lower-Division Courses

Choose one of the following courses:
- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 20A Honors Calculus 5

Plus one of the following courses:
- MATH 19B Calculus for Science, Engineering, and Mathematics 5
- MATH 20B Honors Calculus 5

Plus all of the following courses:
- MATH 21 Linear Algebra 5
- MATH 23A Vector Calculus 5
- MATH 23B Vector Calculus 5

Upper-Division Courses

- MATH 100 Introduction to Proof and Problem Solving 5

The remaining four courses are selected by the student from among any mathematics course numbered above MATH 100 excluding MATH 188 and MATH 189, any Applied Mathematics (AM) or Statistics (STAT) course numbered AM 100 or STAT 100 or above, or, subject to approval of the undergraduate vice chair, a course from another department. Only one of the four courses can be from the AM or STAT series or another outside department. Under exceptional circumstances, MATH 100 may be substituted by another upper-division mathematics course. The undergraduate vice chair will review requests on an individual basis.

No senior seminar or thesis is required.

MATHEMATICS CONTIGUOUS BACHELORS/MASTERS PATHWAY

The 4+1 pathway into the mathematics master’s program is an option that allows undergraduates at UC Santa Cruz to:

- Take two required graduate courses during their undergraduate degree in preparation to finish the master’s degree in just one additional year.
- Apply to the mathematics master’s program through a streamlined application process.
Undergraduate students currently enrolled in the mathematics B.S. have the opportunity, any time after the start of their junior year until December 1st of their senior year, to apply to be admitted to the 4+1 contiguous pathway leading to the mathematics master’s degree. Qualified undergraduates from other undergraduate majors may also apply to the pathway and their applications will be considered on a case-by-case basis.

The requirements for admission into the 4+1 pathway are:

1. a GPA in the major of 3.5 or more;
2. to have taken MATH 105B or MATH 111B; and
3. to have taken, to be currently enrolled, or have the plan to enroll by fall of the senior year in one of the required graduate courses.

Interested students should set up a meeting with the mathematics undergraduate advisor to discuss their curriculum plan and complete the application forms. The deadline for application to the pathway is December 1st of their senior year, although students are encouraged to apply earlier.

Students in the pathway who apply through the streamlined application process to the master’s program are not guaranteed admission. The Mathematics Department expects to admit students who have passed two of the required graduate courses and have maintained a GPA in the major of 3.5 or more. Once accepted into the master’s program, students from the pathway will follow the same requirements as any other students in the two-year track with expected graduation in the fifth year.

**MATHEMATICS M.A.**

**Introduction**

The objectives of the mathematics M.A. program give students advanced fundamental knowledge in the areas of algebra, analysis, and geometry in order to prepare them for admission in top Ph.D. programs, for work in industry, or for a teaching career at community colleges. Students will possess the ability to solve problems and communicate solutions and concepts clearly and in rigorous mathematical language.

Master's students are expected to complete their degree within two years. Students admitted to the M.A. program may apply to the Mathematics Department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

**Requirements**

**Course Requirements**

**The following course:**

MATH 288A Pedagogy of Mathematics 2

**Students are required to complete four of the following courses from the three core sequences:**

- MATH 200 Algebra I 5
- MATH 201 Algebra II 5
- MATH 202 Algebra III 5
- MATH 204 Analysis I 5
- MATH 205 Analysis II 5
- MATH 206 Analysis III 5
- MATH 208 Manifolds I 5
- MATH 209 Manifolds II 5
- MATH 210 Manifolds III 5

**Students are also required to complete five additional courses in mathematics**

Courses in a related subject may be substituted by approval from the graduate vice chair. Sample courses include:

- MATH 203 Algebra IV 5
- MATH 207 Complex Analysis 5
- MATH 211 Algebraic Topology 5
- MATH 212 Differential Geometry 5
- MATH Partial Differential 5
- 213A Equations I 5
- MATH Partial Differential 5
- 213B Equations II 5
- MATH 214 Theory of Finite Groups 5
- MATH 215 Operator Theory 5
- MATH 216 Advanced Analysis 5
- MATH 217 Advanced Elliptic Partial Differential Equations 5
- MATH 218 Advanced Parabolic and Hyperbolic Partial Differential Equations 5
- MATH 219 Nonlinear Functional Analysis 5
- MATH Representation Theory I 5
- 220A Representation Theory II 5
- MATH Algebraic Number Theory 5
- 222A Algebraic Number Theory 5
- MATH Algebraic Geometry I 5
- 223A Algebraic Geometry II 5
- MATH Lie Algebras 5
- 225A Infinite Dimensional Lie Algebras 5
- MATH Algebra and Quantum Field Theory I 5
- 226A Infinite Dimensional Lie Algebras and Quantum Field Theory II 5
- MATH Lie Groups 5
- 227 Lie Incidence Geometries 5
- MATH Kac-Moody Algebras 5
- 229 Morse Theory 5
- MATH Random Matrix Theory 5
MATH 234  Riemann Surfaces  5
MATH 235  Dynamical Systems Theory  5
MATH 238  Elliptic Functions and Modular Forms  5
MATH 239  Homological Algebra  5
240A  Representations of Finite Groups I  5
240B  Representations of Finite Groups II  5
MATH 246  Representations of Algebras  5
MATH 248  Symplectic Geometry  5
MATH 249  Mechanics I  5
249A  Mechanics II  5
249B  Mechanics III  5
MATH 252  Fluid Mechanics  5
MATH 254  Geometric Analysis  5
MATH 256  Algebraic Curves  5
MATH 260  Combinatorics  5
MATH 280  Topics in Analysis  5
MATH 281  Topics in Algebra  5
MATH 282  Topics in Geometry  5
MATH 283  Topics in Combinatorial Theory  5
MATH 284  Topics in Dynamics  5
MATH 285  Topics in Partial Differential Equations  5
MATH 286  Topics in Number Theory  5
MATH 287  Topics in Topology  5

Other Requirements
Additional requirements for the M.A. degree are dependent on the student’s chosen track: the thesis track or the comprehensive examination track.

Thesis Track
Students are required to complete a master’s thesis. A master’s thesis does not have to consist of original research results. At the minimum, it should show mastery of a specific subject area that goes beyond the knowledge taught in the core sequences in algebra, analysis, or geometry. This track is recommended for students that want to transfer into a top Ph.D. program.

The student, in consultation with the graduate vice chair, is responsible for selecting a master’s thesis reading committee. The majority of the membership of a thesis reading committee shall be members of the Santa Cruz Division of the Academic Senate. The Graduate Division must approve the committee.

The Nominations for Master’s Thesis Reading Committee Form must be completed and submitted by the end of the second week of the quarter in which the degree will be granted. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

More information about thesis submission can be found at the Graduate Division website.

Comprehensive Examination Track
Students are required to obtain a second-level pass on one of three written preliminary examinations: algebra, analysis, or geometry. A second-level pass signifies that the student has a very good understanding of the basic concepts, but not necessarily enough to conduct independent research.

[Optional Catchall]

Applying for Graduation
M.A. students must complete the Application for the Master’s Degree form by the appropriate quarter’s deadline listed in the current academic calendar.

The application can be found on the Graduate Division website or can be provided by the Mathematics Department. The application should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

MATHEMATICS PH.D.

Introduction
The objectives of the mathematics Ph.D. program are to prepare students for a career in academia, industry, or teaching. At the end of their studies, students will possess the ability to solve problems and communicate solutions in rigorous mathematical language, to communicate mathematical concepts effectively, and to conduct independent research.

Entering graduate students are advised initially by an assigned faculty mentor. Within the first two years, and typically after passing the preliminary examinations, the student selects a Ph.D. advisor in the area of the student's research interest.

Each graduate student is expected to consult with their advisor to formulate a plan of study and research. The student's advisor ultimately will be the student's thesis advisor.

Ph.D. students are expected to obtain their Ph.D. degree within six years. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.

Advancement to Candidacy

Course Requirements
A three-course sequence in each of the three fields of algebra, analysis, and geometry-topology (manifolds) will be offered each year. Preliminary examinations will be
given for each core sequence at the beginning, middle, and end of each academic year.

First-level passage of a preliminary examination satisfies the core sequence requirement for that field. Ph.D. students are required to complete the full core sequence in the field associated with the preliminary examination in which they do not achieve a first-level pass. The core sequences are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 200</td>
<td>Algebra I</td>
<td>5</td>

</tr>
</tbody>
</table>

Foreign Language Requirements

The foreign language requirement must be satisfied before taking the oral qualifying examination. Graduate students in the Ph.D. program are required to demonstrate knowledge of French, German, or Russian, sufficient to read the mathematical literature in the language. Any member of the mathematics faculty may administer a foreign language examination.

The examination can be either oral or written. It typically requires translation of a text in one of the three foreign languages into English.

The Report on Language Requirement Form must be filled out by the student and the faculty member administering the examination. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in
Teaching Requirement

Ph.D. students must complete a minimum of three quarters as a teaching assistant (TA). All TAs are required to participate in the department's teaching assistant training program.

TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours per quarter). TAs are under the supervision of the faculty member responsible for the course. TAs are covered by a collective bargaining agreement between the University of California and the United Auto Workers (UAW).

Instructors and their TA(s) will meet at the beginning of the quarter to complete the Notification of TA Duties form in order to identify the agreed upon tasks. The performance of these tasks will form the basis of the end-of-quarter performance evaluation and will use the following criteria: quality of work; accuracy and attention to detail; interaction with students, peers, and instructor; knowledge of subject; and dependability. The specific allocation of TA duties is subject to change, depending on enrollments and the number of teaching assistantships in the department allocation. The general duties vary, depending on the course assigned and level of the course.

Pre-Qualifying Requirements

Preliminary Examinations

Preliminary examinations are given for each core sequence in the fields of algebra, analysis, and geometry-topology at the beginning, middle, and end of each academic year. The exams will be designed and graded by a committee of three members.

A first-level pass signifies that the student has the basic knowledge to start research with a thesis advisor in this particular area. A second-level pass signifies that the student has a very good understanding of the basic concepts, but not necessarily enough to conduct independent research.

Ph.D. students must obtain a first-level pass on at least one of the three written preliminary examinations and a second-level pass on at least one other. Students must complete the full three-course sequence in the field associated with the preliminary examination in which they did not achieve a first-level pass. Students may take the preliminary examinations as often as they wish.

Topics for the preliminary examinations include:

- Algebra
  - Linear algebra
  - Group theory
  - Ring and module theory
  - Field theory
  - Galois theory
- Analysis
  - Basic analysis
  - General topology
  - Metric spaces
  - Measure and integration
  - Complex analysis
  - Functional analysis
- Geometry-topology (manifolds)
  - Manifold and tangent bundle
  - Differential forms and integration on manifolds
  - Fundamental group and covering space
  - (Co)homology
  - Differential geometry

Qualifying Examination

Oral Qualifying Examination

All graduate students in the Ph.D. program are required to take an oral examination, called the oral qualifying examination, for advancement to candidacy for the Ph.D. degree. Students typically complete this examination between their 7th and 9th quarter in residence.

Students will demonstrate that they have a sufficient understanding of their Ph.D. thesis problem. Any student who has not passed their oral exam by the end of the fourth year may be subject to academic probation or dismissal from the program.

The Report on Qualifying Examination Form must be filled out by the qualifying examination committee immediately following the examination. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division. The student may request to see a copy of the report.
If the student fails the examination, a re-examination can be given within the next three months. The membership of the examining committee usually remains fixed.

**Qualifying Examination Committee Composition**

The examining committee consists of the student’s faculty advisor, at least two other faculty members from the Mathematics Department, and at least one outside tenured faculty member from either another discipline at UCSC or another academic institution (involved in research and graduate education of the same or different discipline). The student, in consultation with the student’s faculty advisor, selects the committee. The chair of the committee must be someone other than the student’s faculty advisor.

The Graduate Division must approve the committee. The Committee Nomination of Ph.D. Qualifying Examination Form must be completed and submitted at least one month prior to the requested exam date. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

The committee decides on the topics for the examination, which should be broad enough to encompass a substantial body of knowledge in the area of the student’s interest. The written list of topics to be included in the examination, along with a short bibliography, is prepared by the student. A copy is given to each committee member and a copy is put into the student’s permanent records.

**Post-Qualifying Requirements**

**Dissertation Reading Committee Composition**

A Ph.D. student, in consultation with the graduate vice chair, is responsible for selecting a dissertation reading committee. The committee consists of the student’s advisor and at least two other members of the mathematics faculty. In special circumstances, a committee member may be chosen from another department and/or from another institution. The student’s advisor is the chair of the committee.

The Graduate Division must approve the committee. The Nominations for Dissertation Reading Committee Form must be completed and submitted prior to advancement to candidacy. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

A new form must be submitted for approval if changes to the dissertation reading committee must be made.

**Advancement to Candidacy**

To make satisfactory progress, a Ph.D. student should advance to candidacy by the end of their fourth year. A Ph.D. student who has not advanced to candidacy by the end of the fourth year will be placed on academic probation or be subject to dismissal from the program.

Students must complete the following in order to advance to candidacy:

1. Complete the preliminary examinations and core sequences in accordance with the requirements outlined above;
2. Satisfy the language requirement;
3. Pass the qualifying examination;
4. Have a dissertation reading committee approved by the Mathematics Department and the Graduate Division;
5. Have no incomplete grades (I) on their record.

An advancement to candidacy fee will be billed to the student’s account. The student will be officially advanced the following term after all of these requirements are met.

**Optional Catchall**

**Dissertation**

Each graduate student in the Ph.D. program is required to write a Ph.D. dissertation or thesis on a research topic in mathematics. The Ph.D. dissertation should contain original research results that are publishable in a peer-reviewed journal. All members of the student’s dissertation committee must read and approve the dissertation.

More information about dissertation submission can be found at the Graduate Division website.

**Dissertation Defense**

After the dissertation has been approved, the student has an option of making a public oral presentation of the mathematical results contained in the dissertation—the “thesis defense.” A recommendation by the dissertation committee will be made to the Mathematics Department and to the Graduate Council on the granting of the Ph.D. degree.

**Academic Progress**

Ph.D. students are expected to adhere to the below degree timetable:

1. Preliminary examinations and course sequence requirements
   Completed by the end of the student’s 2nd year
2. Language examination
   Completed by the end of the student’s 3rd year
3. Oral qualifying examination (and advancement to candidacy)
   Completed no later than student’s 9th quarter
4. Dissertation defense
Completed no later than the end of the 6th year

Annual meetings with the graduate vice chair and the graduate advisor and program coordinator are conducted with each student on a one-on-one basis. These meetings serve to notify the student of their current progress within the program and outline expectations for the continuation of normative progress toward the Ph.D. degree.

**Applying for Graduation**
Ph.D. students must complete the Application for the Doctor of Philosophy degree form by the appropriate quarter’s deadline listed in the current Academic and Administrative Calendar.

The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

[Optional Catchall]

**Microbiology and Environmental Toxicology**

430 Physical Sciences Building
Telephone (831) 459-4719
FAX (831) 459-3524
https://www.metx.ucsc.edu

**PROGRAMS OFFERED**
Contiguous Bachelor’s/Master’s Pathway (p. 351)

Microbiology and Environmental Toxicology M.S. (p. 352)

Microbiology and Environmental Toxicology Ph.D. (p. 353)

Microbiology and Environmental Toxicology Designated Emphasis (p. 355)

**OTHER PROGRAMS OF INTEREST**

Microbial Biology and Pathogenesis Track within the Program in Biomedical Sciences and Engineering (PBSE)

The Microbiology and Environmental Toxicology Department (METX) offers undergraduate and graduate courses in microbiology and environmental toxicology, both within the department and through affiliated departments. The curriculum provides a strong foundation in fundamental and applied toxicology and microbiology to achieve the breadth and depth of perspective required for this interdisciplinary science. Research interests of students and faculty in METX span the fields of biology, microbiology, chemistry, Earth sciences, ocean sciences, environmental studies, and human health.

**UNDERGRADUATE PROGRAM**
The METX Department only awards graduate degrees, although it does offer a select number of undergraduate courses to prepare and attract promising undergraduates for advanced studies in microbiology and environmental toxicology or health-related disciplines. Students interested in microbiology and environmental health should major in a field such as biology; marine biology; molecular, cell, and developmental biology; biochemistry; chemistry; Earth sciences; engineering; or environmental studies while taking microbiology and environmental toxicology electives.

In addition, the program provides unique opportunities for exceptional undergraduates to conduct research in microbiology and environmental toxicology. These opportunities are limited to students who have demonstrated their potential in undergraduate courses in the basic sciences and environmental health. With department approval, these undergraduates may also take graduate courses in microbiology and environmental toxicology, that coursework may be applied toward a graduate degree in microbiology and environmental toxicology if the student is accepted into the program.

**MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY CONTIGUOUS BACHELORSMASTERS PATHWAY**

METX offers a fifth-year Plan I (thesis) M.S. degree path when earned contiguous with an appropriate Bachelor of Science (B.S.) degree at UCSC. The fifth-year M.S. path provides highly motivated undergraduate majors the opportunity to earn separate B.S. and M.S. degrees in five years. The path provides the additional level of preparation and experience that students need to pursue careers in industry, government, or to increase their competitiveness for top Ph.D. programs.

To be accepted to the path, students will need to prepare an application in consultation with their Plan I and undergraduate advisor and plan for their fifth-year BS/MS, providing evidence of solid academic performance in general and in their undergraduate major. The application should be submitted by Aug. 1st prior to their senior year, and should include:

- A one-page personal statement describing a) the student’s motivation and academic preparation for entering the path; b) the student’s goals for the fifth-year path, including the area of concentration; c) the name of a faculty member willing to serve as their thesis advisor (if appropriate); and d) future professional goals.
• Copy of unofficial transcripts establishing the GPA requirements in the undergraduate major and overall. Applicants should possess a GPA in courses of their undergraduate major (biology, chemistry, etc.) of 3.2 or above, and an overall GPA of 3.0 or above.

• A letter of recommendation from the METX faculty member attesting to the student’s promise for a M.S. degree in METX.

• A coursework plan that will enable them to complete both the requirements for the B.S. in their undergraduate department and M.S. in METX in five years, including demonstrating sufficient coursework capacity to complete at least one to two METX graduate courses in their final undergraduate year.

If accepted into the fifth-year B.S./M.S. path, students will go through the regular METX M.S. application process early in their senior year. The criteria for admission to the METX M.S. program will be the same as for all METX M.S. program applicants.

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY M.S.

Introduction
The Microbiology and Environmental Toxicology Department offers a master of science (M.S.) degree in microbiology and environmental toxicology (METX). The METX M.S. degree can be attained through Plan I (thesis) or Plan II (coursework and capstone project). In addition, METX offers a fifth-year Plan I (thesis) M.S. degree path when earned contiguous with an appropriate bachelor of science (B.S.) degree at UC Santa Cruz. The METX M.S. degree combines core courses and electives to provide interdisciplinary training in microbiology, toxicology, and environmental health sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with microbial and environmental health-related sciences. Graduates may also pursue fields in education or enter doctoral programs in biological and environmental health sciences or related fields.

Requirements

Course Requirements

Plan I (coursework, research, and thesis) M.S. degree

Prospective students who are interested in research careers, or gaining research experience prior to entering a doctoral program, may consider the thesis M.S. degree (Plan I).

Two required core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>METX 200</td>
<td>Interdisciplinary Approaches in Environmental Toxicology</td>
<td>5</td>

</tbody>
</table>
Plan II (Coursework and Capstone) M.S. Degree

The Plan II coursework M.S. degree may be of interest to students interested in interdisciplinary graduate training in microbiology and environmental health-related fields, but with career goals other than research, such as government service, non-profit NGOs, and private sector biotech and environmental health companies.

Required core course:
METX 200 Interdisciplinary Approaches in Environmental Toxicology 5

Two courses from the following:
- METX 201 Sources and Fates of Pollutants 5
- METX 202 Cell and Molecular Toxicology 5
- METX 206A Advanced Microbiology 5
- METX 210 Molecular and Cellular Basis of Bacterial Pathogenesis 5

One course from the following:
- METX 238 Pathogenesis: Molecular Mechanisms of Disease 5
- BIOL 217 Influence of Environment and Experience on Brain Development 5

At least one additional course
At least one additional course approved graduate-level METX course or from another department.

At least one additional approved general elective course
From METX or from another department

Each quarter, students must enroll in the following course:
METX 292 Introductory Graduate Seminar

Winter and Spring Quarter Capstone Courses
Both of the following courses:
- METX 245A Scientific Communication in Microbiology and Environmental Toxicology A 5
- METX 245B Scientific Communication in Microbiology and Environmental Toxicology B 5

Other Requirements

Plan I (coursework, research, and thesis)

M.S. degree

Literature review
Under direction of the student's advisor, write a literature review of the current state of the field of the proposed dissertation research. The written review will be handed in to the student's advisor at the end of the summer of the first year.

Department seminars
Give a 20-minute departmental seminar in the first academic year and one 50-minute departmental seminar on thesis work during the spring of the second year.

Master's comprehensive examination
The master's comprehensive exam is a presentation and defense of the student's master's research proposal, including relevant background knowledge. The examination will not be specifically course-based, but will draw on knowledge from courses. This examination is taken in the fall quarter of the second year.

Thesis
Students are required to submit a thesis for fulfillment of the degree requirements. The thesis should be submitted to the student's master's reading committee one month before the due date.

Plan II (coursework and capstone) M.S. degree

Capstone Writing Project:
Plan II M.S. students will also complete a capstone writing project (METX 245A and METX 245B) to be completed under the guidance/mentorship of a faculty member in the department. As an example, capstone projects may include a scientific research proposal or a substantial review article.

[Optional Catchall]

Applying for Graduation

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY PH.D.

Introduction
METX training includes robust critical thinking, project design, oral and written communication, and in-depth field-specific knowledge.

Key components of METX Ph.D. training include a minimum six courses, plus BIOL 289.

First-quarter training introduces students to critical thinking and how to approach complex problems in
environmental health: METX 200, Interdisciplinary Approaches to Problems at the Interface of Microbiology and Environmental Toxicology.

Second-quarter training builds expertise in their area of interest, microbiology or environmental toxicology, by taking METX 206A or METX 202. These classes build students’ foundational knowledge of microbiology or environmental toxicology, understanding of methodological approaches, and mastering experimental design and skills in research project design.

Second-quarter training further exposes students to multidisciplinary approaches by taking BIOL 200F, a Program in Biomedical Sciences & Engineering (PBSE) core course. This class will provide students with samples of multidisciplinary tools and approaches and an appreciation of their strengths and limitations, as well as working in teams.

Third-quarter training provides in-depth field and methodology competency, project design, written communication, and research ethics. Ph.D. students will take:

One of METX 210, METX 238, METX 201, or METX 250 which provides additional topic-related content and methodology, and skills at crafting and defending a research project on a non-thesis topic.

METX 205. Develop student’s ability to craft grant proposals and to write clearly

BIOL 289, Practice of Science. Instruction in responsible conduct of research.

Fourth quarter, fall quarter of 2nd year:

Oral and written presentation skills training through coursework and yearly departmental presentations and scientific writing and literature mastery through the writing of a literature review in the first year.

Weekly seminars expose students to the breadth of our fields and provide students with opportunities to interact closely with speakers and form connections and collaborations.

Qualifying examinations designed to perfect the student’s ability to craft and defend research plans.

Extensive laboratory research training that starts immediately upon entering the program and culminates in the student’s Ph.D. dissertation or master's thesis.

**Advancement to Candidacy**

The student advances to candidacy after completing all coursework, completing the literature review, giving the third-year seminar and passing the Ph.D. qualifying examination.

**Course Requirements**

**Four required core courses:**
- METX 200 Interdisciplinary Approaches in Environmental Toxicology 5
- METX 205 Scientific Grant Writing 5
- BIOL 200F Logic and Approaches to Scientific Discovery 5
- BIOL 289 Practice of Science 5

**One course from the following:**
- METX 202 Cell and Molecular Toxicology 5
- METX 206A Advanced Microbiology 5

**At least one additional approved graduate-level METX course or from another department:**
- METX 201 Sources and Fates of Pollutants 5
- METX 210 Molecular and Cellular Basis of Bacterial Pathogenesis 5
- METX 238 Pathogenesis: Molecular Mechanisms of Disease 5
- METX 250 Environmental Microbiology 5
- METX 270 Drug Action and Development 5

**Any two additional courses as recommended by your first-year advising committee.**

**The following course each quarter:**
- METX 292 Introductory Graduate Seminar

**And one of the following as appropriate:**
- METX 297A Independent Study 5
- METX 297B Independent Study 10
- METX 297C Independent Study 15
- METX 299A Thesis Research 5
- METX 299B Thesis Research 10
- METX 299C Thesis Research 15

**Plus a topical seminar from the METX 281 series:**
- METX 281A Topics in Environmental Toxicology 5
- METX 281B Topics in Environmental Microbiology 2

Foreign Language Requirements

Teaching Requirement

Doctoral students are required to work as teaching assistants (TA) for at least one quarter. Priority for TA positions is given to first-year doctoral students, then to current doctoral students who have not yet worked as a teaching assistant. Fulfilling this requirement may happen pre- or post-candidacy.

Pre-Qualifying Requirements

Qualifying Examination

Ph.D. qualifying examination (QE). Present and defend a dissertation research proposal to the student’s Ph.D QE committee. The student must complete Ph.D. QE no later than the end of fall quarter of the third year.

Post-Qualifying Requirements

Literature Review

Under direction of the student’s advisor, write a literature review of the current state of the field of the proposed dissertation research. The written review will be handed in to the student’s advisor and the program graduate advisor by the first day of fall quarter of the second year.

Department Seminar

Give a 10-20-minute departmental seminar each academic year, and one 50-minute departmental seminar during the fall quarter of the third year. Rotation students give their rotation talks in lieu of a departmental seminar.

[Optional Catchall]

Dissertation

Dissertation and Defense

The student must submit their doctoral dissertation to the dissertation committee for tentative approval at least one month before presenting a formal, public doctoral research seminar.

Academic Progress

Applying for Graduation

[Optional Catchall]

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY DESIGNATED EMPHASIS

Introduction

Master of arts (M.A.) degree and doctoral students from departments at UC Santa Cruz may complete a Designated Emphasis (DE) in Microbiology and Environmental Toxicology (METX) by completing two graduate courses in METX (from an approved list) and one quarter of METX 292, the weekly departmental seminar. In addition, students may have a Microbiology and Environmental Toxicology faculty member on their qualifying examination committee, and must have a Microbiology and Environmental Toxicology faculty member on their thesis reading committee, complete a significant scholarly written component on a microbiology and/or environmental health/toxicology related topic, and complete the requirements for an M.A. degree or Ph.D. in their own department.

Requirements

Doctoral and master’s students completing the following requirements, in addition to the degree requirements of their home department, will receive the Designated Emphasis in Microbiology and Environmental Toxicology:

Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the faculty of the Department of Microbiology and Environmental Toxicology, who may also serve on the Ph.D./M.A. qualifying exam committee and must serve on the Ph.D. dissertation/master’s thesis reading committee.

Course Requirements

At least two of METX courses from the following list for a minimum of 10 credits:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>METX 200</td>
<td>Interdisciplinary Approaches in Environmental Toxicology</td>
<td>5</td>
</tr>
<tr>
<td>METX 201</td>
<td>Sources and Fates of Pollutants</td>
<td>5</td>
</tr>
<tr>
<td>METX 202</td>
<td>Cell and Molecular Toxicology</td>
<td>5</td>
</tr>
</tbody>
</table>
METX 206A Advanced Microbiology 5
METX 210 Molecular and Cellular Basis of Bacterial Pathogenesis 5
METX 238 Pathogenesis: Molecular Mechanisms of Disease 5
METX 250 Environmental Microbiology 5
METX 270 Drug Action and Development 5

Additional Requirements and Application Information

In addition, students must:

1. Attend METX department seminars (enroll in METX 292, 0 credits) for at least one quarter. Optionally, the student can schedule a presentation on their research for the departmental seminar series.

2. Include a significant scholarly written component (e.g., a dissertation chapter or a paper to be submitted for publication) on an appropriate topic in microbiology, environmental toxicology, and/or environmental health. The content, length, and topic requires approval by the METX faculty committee member.

Application Process:

Students who wish to pursue the DE in METX will submit an application to the METX Department. The application will include:

- identification of a METX faculty advisor and their signature of approval, along with signature from your primary faculty advisor;
- list of the courses that will be taken and when; and
- copies of the unofficial transcripts.

Students should submit their application to the METX Department at: metxadmn@ucsc.edu.

Completion of the DE in METX:

Upon completion of the DE in METX, students will submit a completion form. The form is to be submitted to the METX Graduate Program coordinator.

Molecular, Cell, and Developmental Biology

Molecular, Cell and Developmental Biology Department 225 Sinsheimer Laboratories (831) 459-4986 https://mcd.ucsc.edu/

PROGRAMS OFFERED

Biology B.S. (p. 357)
Human Biology B.S. (p. 362)
Molecular, Cell and Developmental Biology B.S. (p. 367)
Neuroscience B.S. (p. 372)
Biology Minor (p. 377)
Molecular, Cell and Developmental Biology M.S. (p. 377)
Molecular, Cell and Developmental Biology Ph.D. (p. 378)

OTHER PROGRAMS OF INTEREST

Science Education B.S. (p. 398)
Biochemistry and Molecular Biology B.S. (p. 251)

This is an extraordinary time to be involved in biomedical research. New technologies are rapidly changing our understanding of the molecular and cellular basis of life, with dramatic implications for how we treat human disease. Members of the Department of Molecular, Cell and Developmental Biology, along with affiliated faculty in the departments of Biomolecular Engineering, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, and Physics, are participating in an extraordinary revolution in biomedical science. A broad spectrum of cutting-edge research tools are being employed to tackle problems in key areas that include: the structural and functional role of RNA in regulation of gene expression; chromatin biology and epigenetic control of genes; the cell biology of the cytoskeleton and the cell cycle; decisions controlling embryogenesis and organ development; and developmental neurobiology. The insights generated by this basic research enable new strategies for treatments of aging disorders, birth defects, neurological diseases, cancer and other human ailments. The department offers a spectrum of courses that reflect the exciting new developments and directions in these fields, and trains students to participate in these exciting fields.

UNDERGRADUATE PROGRAM

Students may plan a program that leads to one of several Bachelor of Science (B.S.) degrees. Students may choose from the following major options:

Biology B.S. (p. 357)
Human biology B.S. (p. 362)
Molecular, cell and developmental biology B.S. (p. 367)
Neuroscience B.S. (p. 372)

Students may choose from one minor option

Biology minor (p. 377)

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental
laboratory facilities for independent research. Many students take advantage of the numerous opportunities with local physicians, health care providers, and biotech companies to gain experience in a real world setting. This array of opportunities for directed independent study enables biological science majors to enhance their upper-division programs to reflect and strengthen their own interests and goals.

GRADUATE PROGRAM

The program in Molecular, Cell and Developmental (MCD) biology (courses BIOL) leads to either the doctor of philosophy (Ph.D.) or the Master of Science (M.S.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD Biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.

BIOLOGY B.S.

Information and Policies

Introduction

Biology has entered into an exciting new era in which phenomena that once seemed insoluble mysteries—such as embryonic development, the functions of the brain, and the dynamics of ecosystems—are now yielding their secrets as the technology to study them becomes more and more sophisticated. From molecular biology, with its potential to revolutionize medicine and agriculture, to ecology, with its lessons for the sustainable management of the environment, biologists are fully engaged in meeting the challenges of the future, helping to improve the quality of human life, and to preserve habitats and biodiversity. Thus, it is no surprise that biology is at the heart of many of today’s most pressing intellectual and social concerns. The Biology B.S. degree program gives students a rigorous education in modern biology, while allowing a student the opportunity to select from a wide array of upper-division elective courses offered by the departments of Molecular, Cell and Developmental Biology and Ecology and Evolutionary Biology. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check the Health Careers webpage for more information on how you can academically prepare for a career in health care. Additional information is available at the UCSC Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisors to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 19A; CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to MCD biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S. and neuroscience B.S. majors. For an overview of prerequisites and getting started in the major, please visit our biology B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the Biology major will be able to:

• Demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues.

• Recognize that biology has a basis in chemistry, physics, and mathematics.

• Describe how scientific method is used to explain natural phenomena.

• Use effective oral and written language skills to communicate scientific data and ideas.

• Understand safe laboratory practices and perform basic molecular biology techniques.

• Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.

• Present broad knowledge in biochemistry, genetics, evolutionary biology, cell biology, developmental biology, physiology, and ecology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular, Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.
To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

**One of the following courses**

- MATH 11A  Calculus with Applications  5
- MATH 19A  Calculus for Science, Engineering, and Mathematics  5

**and all of the following courses**

- CHEM 1A  General Chemistry  5
- CHEM 1B  General Chemistry  5
- CHEM 1C  General Chemistry  5
- CHEM 8A  Organic Chemistry  5
- BIOL 20A  Cell and Molecular Biology  5
- BIOE 20B  Development and Physiology  5

**and one of the following courses**

- BIOL 20L  Experimental Biology Laboratory  2
- BIOL 102J  Toxic RNA Lab I  5

**Appeal Process**

Students who are not eligible to declare the major may submit an appeal to the Molecular, Cell and Developmental Biology faculty advisor. The department will notify the student and their college of the decision within 15 days of the quarterly appeal deadline. See our appeal process for more information.

**How to Declare a Major**

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UCSC as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a biology B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall:

- CHEM 1A  General Chemistry  5
- CHEM 1B  General Chemistry  5
- CHEM 1C  General Chemistry  5
- CHEM 8A  Organic Chemistry  5
- BIOL 20A  Cell and Molecular Biology  5
- BIOL 20L  Development and Physiology  5
- BIOL 20B  Experimental Biology Laboratory  2

**Plus, one of the following calculus courses:**

- MATH 11A  Calculus with Applications  5
- MATH 19A  Calculus for Science, Engineering, and Mathematics  5

The CHEM 8A and MATH 11A or MATH 19A requirement will be enforced for transfer students entering in the fall of 2022 and thereafter. BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B from California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

**One of the following courses**

- MATH 11B  Calculus with Applications  5
- MATH 19B  Calculus for Science, Engineering, and Mathematics  5

**Plus one of the following options**

Either this course

- STAT 5  Statistics  5

or these courses

- STAT 7  Statistical Methods for the Biological, Environmental, and Health Sciences  5
- STAT 7L  Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory  2

**Plus both of the following courses**

- CHEM 8B  Organic Chemistry  5
- CHEM 8L  Organic Chemistry Laboratory  2
Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student’s institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising and receive their approval.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Students take one of the following courses

- BIOL 20L Experimental Biology Laboratory 2
- BIOL 102J Toxic RNA Lab I 5

Plus all of the following courses

- BIOL 20A Cell and Molecular Biology 5
- BIOE 20B Development and Physiology 5
- BIOE 20C Ecology and Evolution 5
- CHEM 1A General Chemistry 5
- CHEM 1B General Chemistry 5
- CHEM 1C General Chemistry 5
- CHEM 1N General Chemistry Laboratory 2
- CHEM 8A Organic Chemistry 5
- CHEM 8L Organic Chemistry Laboratory 2
- CHEM 8B Organic Chemistry 5

BIOL 20L is waived for junior transfer students

Plus one of the following options:

- Either these courses
  - MATH 11A Calculus with Applications 5
  - MATH 11B Calculus with Applications 5
or these courses

MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calulus for Science, Engineering, and Mathematics 5

Plus one of the following options:

Either this course

STAT 5 Statistics 5

or these courses

STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Plus one of the following options:

Either these courses

PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1
PHYS 6B Introductory Physics II 5

or these courses

PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1
PHYS 6C Introductory Physics III 5

PHYS 7A Elementary Physics I 5
PHYS 7B Elementary Physics II 5
PHYS 6L Introductory Physics I Laboratory 1

Note: PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses

Choose one of the following options:

Either these courses

BIOL 100 Biochemistry 5
BIOL 101 Molecular Biology 5

or these courses

BIOC 100A Biochemistry and Molecular Biology 5
BIOC 100B Biochemistry and Molecular Biology 5
BIOC 100C Biochemistry and Molecular Biology 5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus all of the following courses:

BIOL 105 Genetics 5
BIOL 110 Cell Biology 5
BIOE 107 Ecology 5
BIOE 109 Evolution 5

Laboratory requirement:

Students must complete two upper-division courses that include regular laboratory or fieldwork:

Choose one of the following courses:

BIOL 101L Molecular Biology Laboratory 2
BIOL 102L Toxic RNA Lab II 5

Electives

Students must complete three additional upper-division electives (5-7 credits each) chosen from below:

Note: Some of the following courses fulfill the disciplinary communication (DC) requirement.

Note: Lecture/lab combinations count as one course.

BIOL 111A Immunology I 5
BIOL 114 Cancer Cell Biology 5
BIOL 115 Eukaryotic Molecular Biology 5
BIOL 118 Principles of Human Genetics 5
BIOL 125 Introduction to Neuroscience 5
BIOL 120 Developmental Biology 5
BIOL 130 Human Physiology 5
BIOL 140 The RNA World 5
BIOC 100C Biochemistry and Molecular Biology 5
BIOE 108 Marine Ecology 5
BIOE 112 Ornithology 5
BIOE 112L Ornithology Field Studies 2
BIOE 114 Herpetology 5
BIOE 114L Field Methods in Herpetological Research 2
BIOE 117 Systematic Botany of Flowering Plants 5
BIOE 117L Systematic Botany of Flowering Plants Laboratory 2
BIOE 120 Marine Botany 5
BIOE 120L Marine Botany Laboratory 2
BIOE 122 Invertebrate Zoology 5
BIOE 122L Invertebrate Zoology Laboratory 2
BIOE 124 Mammalogy 5
BIOE 124L Mammalogy Laboratory 2
BIOE 127 Ichthyology 5
BIOE 127L Ichthyology Laboratory 2

**Disciplinary Communication (DC) Requirement**

The DC requirement in the biology B.S. degree can be satisfied either by completing two BIOE courses or by completing one 5-credit BIOL lab.

**For the BIOE option, choose two Ecology and Evolutionary Biology courses from this group:**

**Note**: Lecture/lab combinations count as one course.

- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B

**HUMAN BIOLOGY B.S.**

**Information and Policies**

**Introduction**

The human biology major is designed for students interested in careers in healthcare or biomedical research. Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply. Students are required to take introductory biology and laboratory (BIOL 20L), genetics, biochemistry, molecular biology, cell biology, human physiology with laboratory, and additional courses directly relevant to human health. As a unique feature of this program, students must also fulfill Spanish-language and health-care internship requirements. The courses required for this major satisfy many of the prerequisites for medical and other health professional schools. However, you should always check the specific requirements for every program you hope to apply. Check our Health Careers webpage for more information on how you can academically prepare for a career in health care. Additional information is available at the UCSC Career Center.
Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisors to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 19A; CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to MCD biology-sponsored majors, the biology B.S., human biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors. For an overview of prerequisites and getting started in the major, please visit our Human Biology B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Students intending to major in human biology should take the Spanish placement examination, offered by the language program, to determine the level at which they should begin the Spanish sequence.

Program Learning Outcomes

Students who successfully complete the human biology major will be able to:

- achieve fluency in Spanish and an understanding of how cultural differences can affect health care delivery;
- refine a career-related and/or postgraduate goal through internship experience;
- present advanced knowledge in the specialized field of human physiology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular, Cell and Developmental Biology has a separate qualification policy that applies to the human biology B.S. major.

To qualify for the human biology major, students must pass the following courses or their equivalents with a grade of C+ or better in each course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1C</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8A</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>BIOE 20B</td>
<td>Development and Physiology</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20L</td>
<td>Experimental Biology Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

Students must also pass one of the following courses:

- Either this course: MATH 11A, Calculus with Applications, 5 units
- or this course: MATH 19A, Calculus for Science, Engineering, and Mathematics, 5 units

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the Molecular, Cell and Developmental Biology faculty advisor. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for
students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer and Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed human biology B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall with grades of C+ or higher in each course.

<table>
<thead>
<tr>

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100) and molecular biology (BIOL 101) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Transfer students should take the Spanish placement exam upon arrival. We encourage transfer students to complete the required Spanish courses (including SPAN 5M) before the fall of their second year.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student’s institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101, or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses
taken either at UCSC or at another institution should contact MCD Advising.

**Double Majors and Major/Minor Combinations Policy**

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major
- Any combination of the following: Human Biology, Molecular, Cell and Developmental Biology, Neuroscience, or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the Disciplinary Communication and comprehensive requirements for each of the majors.

**Study Abroad**

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising and receive their approval.

**Honors**

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

**Medical and Professional School Admission**

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

---

**Course Requirements**

**Lower-Division Courses**

<tr>
<td>CHEM 8M Organic Chemistry Laboratory</td>
</tr>
</tbody>
</table>

BIOL 20L is waived for junior transfer students.

**Note:** CHEM 109 is also recommended for pre-med students.

**Plus one of the following options:**

- Either these courses
  - MATH 11A Calculus with Applications | 5 |
  - MATH 11B Calculus with Applications | 5 |

- or these courses
  - MATH 19A Calculus for Science, Engineering, and Mathematics | 5 |
  - MATH 19B Calculus for Science, Engineering, and Mathematics | 5 |

**Plus one of the following options:**

- Either this course
  - STAT 5 Statistics | 5 |

- or these courses
  - STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences | 5 |
  - STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory | 2 |

**Plus one of the following options:**

- Either these courses
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I  1
PHYS 6B  Introductory Physics II  5
or these courses
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I  1
PHYS 6C  Introductory Physics III  5
or these courses
PHYS 7A  Elementary Physics I  5
PHYS 7B  Elementary Physics II  5
PHYS 6L  Introductory Physics I  1

Note: PHYS 7A/PHYS 7B, and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Language Requirement:
SPAN 1-SPAN 4 or the equivalent and one quarter of Spanish for health-care workers (SPAN 5M).

Upper-Division Courses
Choose one of the following options:
Either these courses
BIOL 100  Biochemistry  5
BIOL 101  Molecular Biology  5
or these courses
BIOC 100A  Biochemistry and Molecular Biology  5
BIOC 100B  Biochemistry and Molecular Biology  5
BIOC 100C  Biochemistry and Molecular Biology  5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus all of the following courses:
BIOL 105  Genetics  5
BIOL 110  Cell Biology  5
BIOL 130  Human Physiology  5
BIOL 130L  Human Physiology Laboratory  2

Internship Requirement:
BIOL 189  Health Sciences Internship  3
BIOL 189W  Communication: Human Biology  3

Electives
At least two upper-division electives chosen from the following (only one of which may be a 3-credit course: BIOL 112, BIOL 116 or BIOL 188).

Note: Lecture/lab combinations count as one course.
BIOC 100C  Biochemistry and Molecular Biology  5
BIOE 133  Exercise Physiology  5
BIOE 133L  Exercise Physiology Laboratory  2
BIOL 111A  Immunology I  5
BIOL 111B  Immunology II  5
BIOL 112  Virology  3
BIOL 114  Cancer Cell Biology  5
BIOL 115  Eukaryotic Molecular Biology  5
BIOL 116  Advanced Topics in Cell Biology  3
BIOL 117  Global Health and Neglected Diseases  5
BIOL 118  Principles of Human Genetics  5
BIOL 120  Developmental Biology  5
BIOL 125  Introduction to Neuroscience  5
BIOL 127  Mechanisms of Neurodegenerative Disease  5
BIOL 140  The RNA World  5
BIOL 188  A Life in Medicine  3
BME 130  Genomes  5
BME 178  Stem Cell Biology  5
CMMU 163  Health Care Inequalities  5
METX 100  Introduction to Microbiology  5
METX 119  Microbiology  5
METX 135  Functional Anatomy  5
METX 135L  Functional Anatomy Lab  2
METX 140  Molecular Biology and Microbial Genetics  5
PHYS 180  Biophysics  5

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in human biology is satisfied by completing the following courses:
BIOL 130L  Human Physiology Laboratory  2
BIOL 189W  Communication: Human Biology  3

Comprehensive Requirement
All majors have a comprehensive requirement. For the Human Biology B.S., this requirement can be satisfied by receiving a passing grade in the Health Sciences Internship, BIOL 189.

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B & CHEM 8M

MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY B.S.

Information and Policies

Introduction

The molecular, cell and developmental (MCD) biology major is designed to prepare students for rigorous graduate programs in biomedical research, medical and other healthcare professional programs, for careers in the biotechnology industry. This major is more structured than the general biology major and requires that students pay careful attention to the prerequisites required for upper-division biology courses. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or healthcare professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisors to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:
Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 19A; CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to MCD biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors. For an overview of prerequisites and getting started in the major, please visit our MCD Biology B.S. website.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the MCD major will be able to:

• demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues;
• recognize that biology has a basis in chemistry, physics, and mathematics;
• describe how scientific method is used to explain natural phenomena;
• use effective oral and written language skills to communicate scientific data and ideas;
• understand safe laboratory practices and perform basic molecular biology techniques;
• generate hypotheses, evaluate data, and design experiments to investigate a scientific problem; and
• present advanced knowledge in the specialized fields of molecular and cell biology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular, Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors. To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

### One of the following courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 11A</td>
<td>Calculus with Applications</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

### And all of the following courses

<td>BIOL 20L</td>
<td>Experimental Biology Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>BIOL 102J</td>
<td>Toxic RNA Lab I</td>
<td>5</td>
</tr>
</tbody>
</table>

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the Molecular, Cell and Developmental Biology faculty advisor. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first. Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a
subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed molecular, cell and developmental biology B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall.

CHEM 1A General Chemistry 5
CHEM 1B General Chemistry 5
CHEM 1C General Chemistry 5
CHEM 8A Organic Chemistry 5
BIOL 20A Cell and Molecular Biology 5
BIOL 20L Experimental Biology Laboratory 2
BIOE 20B Development and Physiology 5

Plus, one of the following calculus courses:
MATH 11A Calculus with Applications 5
MATH 19A Calculus for Science, Engineering, and Mathematics 5

The CHEM 8A and MATH 11A or MATH 19A requirement will be enforced for transfer students entering in the fall of 2022 and thereafter. BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B from California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

One of the following courses
MATH 11B Calculus with Applications 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5

Plus one of the following options
Either this course
STAT 5 Statistics 5
or these courses
STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Plus both of the following courses
CHEM 8B Organic Chemistry 5
CHEM 8L Organic Chemistry Laboratory 2

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student’s institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:
- Biology (B.A., B.S., or minor) AND any other biological sciences major
- Any combination of the following: Human Biology, Molecular, Cell and Developmental Biology, Neuroscience, or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their
educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising and receive their approval.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

One of the following courses
BIOL 20L Experimental Biology 2
BIOL 102J Toxic RNA Lab I 5

BIOL 20L is waived for junior transfer students.

Plus one of the following options:
Either these courses
MATH 11A Calculus with Applications 5
MATH 11B Calculus with Applications 5
or these courses
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5

Plus one of the following options
Either this course
STAT 5 Statistics 5
or these courses
STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Plus one of the following options
Either these courses
PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1
PHYS 6B Introductory Physics II 5
PHYS 6C Introductory Physics III 5
or these courses
PHYS 7A Elementary Physics I 5
PHYS 7B Elementary Physics II 5
PHYS 6L Introductory Physics I Laboratory 1
PHYS 7C Elementary Physics III Laboratory 2

Note: The combination of PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses

Choose one of the following options:
Either these courses
BIOL 100 Biochemistry 5
BIOL 101 Molecular Biology 5
or these courses

BIOC 100A Biochemistry and Molecular Biology 5
BIOC 100B Biochemistry and Molecular Biology 5
BIOC 100C Biochemistry and Molecular Biology 5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus one of the following courses:

BIOL 101L Molecular Biology Laboratory 2
BIOL 102L Toxic RNA Lab II 5

Plus the following course:

BIOL 104L Coronavirus Bioinformatics Lab 2

Plus all of the following courses:

BIOL 105 Genetics 5
BIOL 110 Cell Biology 5

Electives

At least three elective courses from the following list (only one of which may be a 3-credit course: BIOL 112 or BIOL 116):

Note: Lecture/lab combinations count as one course.

BIOL 111A Immunology I 5
BIOL 111B Immunology II 5
BIOL 112 Virology 3
BIOL 114 Cancer Cell Biology 5
BIOL 115 Eukaryotic Molecular Biology 5
BIOL 116 Advanced Topics in Cell Biology 3
BIOL 117 Global Health and Neglected Diseases 5
BIOL 118 Principles of Human Genetics 5
BIOL 120 Developmental Biology 5
BIOL 125 Introduction to Neuroscience 5
BIOL 127 Mechanisms of Neurodegenerative Disease 5
BIOL 130 Human Physiology 5
BIOL 140 The RNA World 5
BIOC 100C Biochemistry and Molecular Biology 5
BIOE 109 Evolution 5
BIOE 135 Plant Physiology 5
BIOE 135L Plant Physiology Laboratory 2
BIOL 124 Optical Imaging for Biological Research 3
BME 110 Computational Biology Tools 5
BME 130 Genomes 5
BME 160 Research Programming in the Life Sciences 6

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in molecular, cell, and developmental biology is satisfied by completing one of the following courses:

<table>
<thead>
<tr>
<th>Laboratory Courses</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 100L</td>
<td>Biochemistry Laboratory 5</td>
</tr>
<tr>
<td>BIOL 103L</td>

This planner assumes that a student has completed all UC Transfer Pathway courses

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B

NEUROSCIENCE B.S.

Information and Policies

Introduction

Neuroscience, the study of the nervous system and behavior of animals, is a frontier area in biology, touching psychology on the one hand and computer science on the other. The neuroscience major provides students with rigorous preparation for graduate studies and research in the field of neuroscience. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.
Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisors to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 19A; CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to MCD Biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors. For an overview of prerequisites and getting started in the major, please visit our Neuroscience B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the Neuroscience major will be able to:

- Demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues.
- Recognize that biology has a basis in chemistry, physics, and mathematics.
- Describe how scientific method is used to explain natural phenomena.
- Use effective oral and written language skills to communicate scientific data and ideas.
- Understand safe laboratory practices and perform basic molecular biology techniques.
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.
- Present advanced knowledge in the specialized field of neuroscience.

Major Qualification Policy and Declaration

Process

Major Qualification

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

One of the following courses

- MATH 11A Calculus with Applications
- MATH 19A Calculus for Science, Engineering, and Mathematics

And all of the following courses

- CHEM 1A General Chemistry
- CHEM 1B General Chemistry
- CHEM 1C General Chemistry
- CHEM 8A Organic Chemistry
- BIOL 20A Cell and Molecular Biology
- BIOE 20B Development and Physiology

and one of the following courses

- BIOL 20L Experimental Biology Laboratory
- BIOL 102J Toxic RNA Lab I

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the MCD Biology faculty advisor. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.
Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed neuroscience B.S. major, transfer students must complete the following courses or their equivalents prior to transfer by the end of the spring term for students planning to enter in the fall.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student’s institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major
• Any combination of the following: Human Biology, Molecular, Cell and Developmental Biology, Neuroscience, or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Students choose one of the following courses

<table>
<thead>
<tr>
<th>Course</th>

<tr>
<td>PHYS 7B</td>
<td>Elementary Physics II</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 6L</td>
<td>Introductory Physics I</td>
<td>1</td>
</tr>
</tbody>
</table>

Note: The combination of PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses

Choose one of the following options:

Either these courses
| BIOL 100 | Biochemistry | 5 |
| BIOL 101 | Molecular Biology | 5 |
| or these courses |
| BIOC 100A | Biochemistry and Molecular Biology | 5 |
| BIOC 100B | Biochemistry and Molecular Biology | 5 |
| BIOC 100C | Biochemistry and Molecular Biology | 5 |

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

**Plus one of the following courses:**

| BIOL 101L | Molecular Biology Laboratory | 2 |
| BIOL 102L | Toxic RNA Lab II | 5 |

**Plus all of the following courses:**

| BIOL 105 | Genetics | 5 |
| BIOL 125 | Introduction to Neuroscience | 5 |
| BIOL 126 | Advanced Molecular Neuroscience | 5 |
| BIOL 128 | Developmental Neurobiology | 5 |

**Electives**

Students must complete additional upper-division electives chosen from the courses below and one additional laboratory course.

**One of the following electives:**

NOTE: Lecture/lab combinations count as one course.

| BIOE 131 | Animal Physiology | 5 |
| BIOE 131L | Animal Physiology Laboratory | 2 |
| BIOL 110 | Cell Biology | 5 |
| BIOL 114 | Cancer Cell Biology | 5 |
| BIOL 115 | Eukaryotic Molecular Biology | 5 |
| BIOL 118 | Principles of Human Genetics | 5 |
| BIOC 100C | Biochemistry and Molecular Biology | 5 |
| BME 110 | Computational Biology Tools | 5 |
| BME 130 | Genomes | 5 |
| BME 160 | Research Programming in the Life Sciences | 6 |
| PHYS 180 | Biophysics | 5 |
| PSYC 121 | Perception | 5 |
| PSYC 123 | Cognitive Neuroscience | 5 |

**The following laboratory course:**

| BIOL 129L | Neurobiology Lab | 5 |

**One of the following courses:**

| BIOL 129A | Advanced Topics in System Neuroscience | 5 |
| BIOL 129B | Advanced Topics in Developmental Neurobiology | 5 |

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement.

**Comprehensive Requirement**

All majors require a comprehensive requirement. For the neuroscience B.S., this requirement can be satisfied by receiving a passing grade in the following laboratory course.

| BIOL 129L | Neurobiology Lab | 5 |

**Planners**

**Sample First-Year Student Four-Year Planner**

**Additional first-year student sample planners**

| 1st (frosh) | Fall | Winter | Spring |
| CHEM 1A | CHEM 1B & CHEM 1N |
| MATH 11A | MATH 11B | BIOL 20A |

| 2nd (soph) | Fall | Winter | Spring |
| BIOE 20B | BIOL 105 | CHEM 8B |
| BIOL 20L | CHEM 8A & CHEM 8L | PHYS 6A & PHYS 6L |

| 3rd (junior) | Fall | Winter | Spring |
| BIOL 100 | BIOL 101 & BIOL 101L | Upper-division elective |
| STAT 5 | or STAT 7 & STAT 7L | |
| PHYS 6C | BIOL 125 |

| 4th (senior) | Fall | Winter | Spring |
| BIOL 126 | BIOL 129A or B |
| BIOL 128 | Upper-division elective |
| BIOL 129L | | | |
The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, and SR. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

### Sample Transfer Two-Year Planner

<table>
<thead>
<tr>

### MOLECULAR, CELL AND DEVELOPMENTAL BIOLOGY M.S.

#### Introduction

Students apply to the master’s degree program through the same portal as for the Ph.D. degree program. While the M.S. is research intensive, master’s students do not do research rotations; they must identify a research advisor prior to the training period. Students are required to participate in laboratory research meetings and departmental seminar series every quarter.

#### Requirements

**Course Requirements**

**Complete the graduate core course:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 200A</td>
<td>Critical Analysis of Scientific Literature</td>
<td>5</td>
</tr>
</tbody>
</table>

BIOL 200A to be completed in the first year.

**And the following courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 288</td>
<td>Pedagogy in STEM</td>
<td>2</td>
</tr>
<tr>
<td>BIOL 289</td>
<td>Practice of Science</td>
<td>5</td>
</tr>
</tbody>
</table>

**Enroll in the following seminar series each quarter:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 291</td>
<td>Molecular, Cellular, and Developmental Biology Seminar</td>
<td>2</td>
</tr>
<tr>
<td>BIOL 292</td>
<td>MCD Seminar</td>
<td></td>
</tr>
</tbody>
</table>

**Approved Graduate Electives**

(M.S. students must complete two electives)
### Introduction

The program in Molecular, Cell, and Developmental (MCD) biology (courses BIOL) leads to the doctor of philosophy (Ph.D.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.
Advancement to Candidacy

Course Requirements

Ph.D. students complete the graduate core courses, BIOL 200A, BIOL 200E, and BIOL 200F, along with BIOL 215, BIOL 288, and BIOL 289 (ethics) in the first year. Students are required to participate in laboratory research meetings and departmental seminar series (BIOL 291/Biol 292) every quarter. First-year rotating Ph.D. students complete three six-week laboratory rotations. Students choose their rotation laboratories in consultation with the Graduate Advisory Committee. The laboratory rotations give students a chance to learn about the diverse fields of inquiry and to interact with members of the department. At the end of each rotation, students present a short talk or present a poster to the department on their rotation project. At the end of winter quarter, students consult with rotation faculty to identify a permanent thesis laboratory.

Ph.D. students must take two approved advanced graduate electives, in addition to the core courses.

Complete the graduate core courses:

<table>
<thead>
<tr>
<th>Course Code</th>

Foreign Language Requirements

Teaching Requirement

Complete two quarters of service as a teaching assistant.

Pre-Qualifying Requirements

Qualifying Examination

Complete an oral and written qualifying examination.

Second-year Ph.D. students are required to submit a written proposal on their thesis research. The oral component of the qualifying examination, taken in spring quarter of the second year, is an oral examination on the proposal. The examining committee is comprised of three internal reviewers and one external reviewer.

Post-Qualifying Requirements

Advancement to Candidacy

Advancement to candidacy occurs by the end of the third year (nine quarters). Students must give a full research seminar (45-50-minute talk followed by questions) in an MCD seminar slot. This should be attended and evaluated by the Thesis Advisory Committee. A passing evaluation requires demonstration of a good understanding of their project and background knowledge, and a clear presentation of their questions or hypotheses, tests of those, and progress to date. A passing evaluation leads to advancement to candidacy. Students have an additional three years (nine quarters) to complete their degree within normative time.

Dissertation

Dissertation Defense

Present the thesis defense in a departmental seminar.

Academic Progress

Applying for Graduation

[Optional Catchall]

Ocean Sciences

A312 Earth and Marine Sciences Building
(831) 459-4730
https://oceansci.ucsc.edu/

PROGRAMS OFFERED

Ocean Sciences M.S. Plan 1 and Plan 2 (p. 381)
Ocean Sciences Ph.D. (p. 382)

OTHER PROGRAMS OF INTEREST

Environmental Sciences B.S. (p. 282)
Ecology and Evolution B.S. (p. 302)
Marine Biology B.S. (p. 310)
Earth Sciences B.S. (p. 265)

The Ocean Sciences Department includes faculty, students, and staff involved in oceanography and other marine sciences and offers undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island Reserve (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute (MBARI), the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Laboratory, and other facilities. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology,
ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, among others.

Ocean Sciences Department affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from Polar Regions to the tropics.

UNDERGRADUATE PROGRAM

While offering a range of undergraduate courses, the Ocean Sciences Department presently only confers graduate degrees (Master of Science—M.S. or Doctor of Philosophy—Ph.D.) However, the undergraduate major in environmental science includes required and elective courses in ocean sciences. In addition, the undergraduate major in marine biology, sponsored by the Biological Sciences departments, includes required and elective courses in ocean sciences, and includes an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

GRADUATE PROGRAM

Our graduate education mission is to train the next generation of talented and diverse ocean scientists. Through core training in oceanography and focused advanced training in biology, chemistry, Earth sciences, physics, and data science we prepare students to tackle the pressing issues facing society today. Ocean sciences is a highly interdisciplinary field that requires diversity in thinking and experience. We welcome and provide support for students with diverse backgrounds such as URM, LGBTQ, and first-generation college students. From faculty training to peer mentoring and other programmatic elements we are dedicated to fostering the success of all students in our program.

The Ocean Sciences Department offers both master of science and doctorate degree programs. The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The graduate programs encourage collaborative and interdisciplinary approaches, and are designed to support and promote diversity, equity and inclusion. There are professional development events and opportunities such as an annual career panel, several designated emphasis degrees that can be combined with the ocean sciences graduate degrees, and training in innovative and inclusive teaching. There is an advising structure that provides support from a main advisor, thesis committee members, an advisory committee, and peers. A student-run group, Communicating Oceanographic Research Effectively (CORE), offers community building activities.

The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in ocean sciences should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical science) or an equivalent background. If a student does not have a degree in one of these areas, the student must demonstrate that they have taken the classes necessary to do their research.

The prerequisites for entering either the master's or the Ph.D. programs are a minimum of two quarters or two semesters in each of the following: a calculus series; chemistry, biology, and physics. In addition, one course in each of the following is required: earth sciences or geological principles; and statistics or biostatistics.

Details regarding admission, graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies.

OCEAN SCIENCES M.S.

Introduction

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The ocean sciences M.S. degree can be attained through plan I: thesis (coursework and thesis, minimum 42 credits), or plan II: examination (coursework and comprehensive examination, minimum 40 credits). The degree combines core courses and electives to provide depth and breadth in the ocean sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with the marine environment, to become educators, or to enter doctoral programs in ocean sciences or related fields. The thesis M.S. degree is preparation for research careers.

Whereas the doctoral program has an oceanographic orientation, the ocean sciences master's program is even broader and has traditionally attracted many students in marine biology and ecology. Students are encouraged to select a course of study that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Requirements
Course Requirements

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

**Plan I: M.S. (thesis) requirements:**

OCEA 200 (Physical Oceanography) and any two of the remaining three core courses. Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. Students are also encouraged to take the fourth core course, in which case it can count as an elective.

The core ocean sciences courses are expected to be completed in the first year

- OCEA 200 Physical Oceanography 5
- OCEA 220 Chemical Oceanography 5
- OCEA 230 Biological Oceanography 5
- OCEA 280 Marine Geology 5

Two graduate-level or upper-division electives

A minimum of two graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis, one of which must be a 5-credit graduate-level course in statistics/data analysis, such as OCEA 260 (Introductory Data Analysis in the Ocean and Earth Sciences) or OCEA 267 (Applied Environmental Time Series Analysis). These courses are selected in consultation with the student's advisor and the department’s graduate advising committee. A maximum of one course may be a graduate-level seminar (OCEA 290), and at least two courses must be graduate or upper-division undergraduate lecture courses.

Attendance in the following course is required each quarter of enrollment.

OCEA 292 Seminar

Other Requirements for Plan I: M.S. (thesis)

Plan I M.S. students must complete an M.S. thesis and must make a public presentation of their thesis before the deadline in which all degree requirements are to be completed within the term of receiving the degree. In addition, the M.S. thesis satisfying all format and content requirements must be submitted to the Graduate Division before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Other Requirements for Plan II: M.S. (examination)

Plan II M.S. students must take and pass a comprehensive exam that covers the material from the core courses.

Applying for Graduation

Once requirements for the degree have been met, including approval from their academic advisor and the Ocean Sciences Department, M.S. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

**OCEAN SCIENCES PH.D.**

Introduction

The program leading to a doctorate in ocean sciences is designed around a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines—biology, chemistry, Earth sciences, and physics—as chosen by the student and his or her advisers. The core training is provided through courses in ocean sciences; a subset of which is taken by all students in the first two
years and reinforced by the student's seminars throughout the program. Preparation also includes upper-
division/graduate courses in ocean sciences and in the
specialty discipline, graduate seminars, independent study
research credits, participation in a departmental student
seminar series, and a minimum requirement of two
quarters as a teaching assistant. There is no formal
language requirement.

A scheduling meeting in the first quarter of enrollment is
used to map out the course program in the first year. The
course program is determined by a faculty advisory
committee in consultation with the student and courses
are drawn from Ocean Sciences and other science
departments (e.g., Biology, Chemistry, Earth and
Planetary Sciences, Physics). A departmental oral
examination covering material from the core courses is
usually taken at the beginning of a student's second year
in the program and must be completed successfully
within two years of entering the program. The purpose of
this examination is to ensure that the doctoral student
candidate has acquired sufficient fundamental knowledge
of oceanography to proceed toward the doctoral degree.

A qualifying examination requiring a written research
proposal to be defended orally in front of the student's
qualifying examination committee is recommended to be
taken during the fall quarter the year after the
departmental exam of the program, normally the third
year. A dissertation demonstrating original thought and
research must be written, presented in an open seminar,
and defended to the student's dissertation reading
committee. Students are strongly encouraged to prepare
their dissertation in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program
are differentiated from related degrees in the traditional
disciplines by their focus on global-scale problems and
interactions, a focus on the ocean, and their inherently
interdisciplinary approach. Interdisciplinary projects
across and between pathways are encouraged, as are
interactions with faculty in related departments.

Biological Oceanography

This area of study involves the interactions of organisms
with their chemical and physical environments. It
includes research on the physiology and ecology of
organisms, but differs from marine biology in its focus on
the oceanographic setting of the organism in relationship
to, for example, biogeochemical cycling and the effects of
ocean currents on distributions of organisms. The focus is
mainly on small oceanic life-forms (plankton and
bacteria, molecular ecology) and their roles in the
biogeochemical cycles of marine systems.

Chemical Oceanography

The measurement of chemical distributions in the sea to
understand fundamental ocean processes is the focus of
this area of study. Research includes development of
analytical techniques, measurement of inorganic and
organic species and isotopes in marine particles and
seawater, and investigation of marine biogeochemical
processes using analytical and modeling approaches.

Geological Oceanography

Paleoceanography, paleoclimateology, and sediment
geochemistry are the focus in this pathway. Research
areas include the history of global geochemical cycles
and composition of the ocean on various timescales, the
fate and diagenesis of materials in sediments and their
contribution to the paleoceanographic record,
understanding ocean and climate history by the use of
records of stable isotopes and trace elements, and
paleoclimate modeling.

Physical Oceanography

The physics and dynamics of the ocean and atmosphere
are the main aspects of this program. Research includes
observational, computational, theoretical, and
experimental physical oceanography, geophysical fluid
dynamics, ocean acoustics, dynamical meteorology,
climate, and global change.

Advancement to Candidacy

Course Requirements

To introduce students to the breadth and depth of the field
of ocean sciences, students will be required to complete
the following.

The four core ocean sciences courses are expected to be
completed in the first year of the program prior to taking
the departmental oral examination:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>OCEA 200</td>
<td>Physical Oceanography</td>
<td>5</td>
</tr>
<tr>
<td>OCEA 220</td>
<td>Chemical Oceanography</td>
<td>5</td>
</tr>
<tr>
<td>OCEA 230</td>
<td>Biological Oceanography</td>
<td>5</td>
</tr>
<tr>
<td>OCEA 280</td>
<td>Marine Geology</td>
<td>5</td>
</tr>
</tbody>
</table>

Three Graduate-Level or Upper-Division Elective
courses:

A minimum of three graduate-level or upper-division
elective courses is required to provide depth in the chosen
area of emphasis or supporting disciplines, one of which
must be a 5-credit graduate-level course in statistics/data
analysis, such as OCEA 260 (Introductory Data Analysis
in the Ocean and Earth Sciences) or OCEA 267 (Applied
Environmental Time Series Analysis). These courses are
selected in consultation with the student's advisor and the
department's graduate advising committee. A maximum
of one course may be a graduate-level seminar (OCEA
290), and at least two courses must be graduate or upper-
division undergraduate lecture courses.

Attendance in the following course is required
each quarter of enrollment:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>OCEA 292</td>
<td>Seminar</td>
<td>5</td>
</tr>
</tbody>
</table>

The following course is taken prior to, or
concurrent with, being a teaching assistant:
Generally offered during the fall quarter each year.
OCEA 296  Teaching in Ocean Sciences  2

Independent Studies or Thesis Research:
A minimum of three courses in independent studies (OCEA 297, before advancing to candidacy), or thesis research (OCEA 299, after advancing to candidacy) under the direction of an adviser. Students beyond their first year will usually take 10 or 15 credits of independent study or thesis research each quarter.
OCEA 297  Independent Study
OCEA 299  Thesis Research

Foreign Language Requirements

Teaching Requirement
Teaching experience is satisfied by two quarters of teaching assistant experience in ocean sciences or related departments.

Pre-Qualifying Requirements
Ph.D. students must pass a Department Examination typically taken at the beginning of their second year. The purpose of this exam is to ensure that the Ph.D. student has acquired sufficient fundamental knowledge of oceanography, and developed a suitable research plan, before developing their thesis proposal and before taking their Qualifying Examination.

Qualifying Examination
Ph.D. students must pass a departmental Qualifying examination to advance to candidacy. Students will submit a written research proposal to their qualifying examination committee, then defend this proposal orally before the committee.

Post-Qualifying Requirements

Dissertation

Dissertation Defense
The Ph.D. dissertation defense is composed of two parts: one part is the open presentation of the dissertation; the second part is a meeting, following the presentation, with the dissertation reading committee to determine completion of degree requirements. The Ph.D. dissertation defense must be presented before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Academic Progress
Ph.D. students meet with a member of the Ocean Sciences Department's advisory committee once each fall and spring. In addition, during the spring quarter each year, beginning with the second year and continuing until degree completion, students must meet with their committee members and provide an annual academic progress report to the department.

Applying for Graduation
Once requirements for degree have been met, including approval from their academic advisor and the Ocean Sciences Department, Ph.D. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

Physics M.S. (p. 403)
Physics Ph.D. (p. 404)

OTHER PROGRAMS OF INTEREST
Astrophysics Minor (p. 233)
Astronomy and Astrophysics Ph.D. (p. 233)

Physics seeks to discover the fundamental regularities or “laws” that govern our universe and to apply these laws
to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and this fundamental nature can be appreciated even at an elementary level.

The Physics Department offers majors in physics, physics (astrophysics), and applied physics. These programs prepare students for graduate work in physics, astrophysics, and astronomy, and for engineering and other technical positions in industry. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Faculty work with students in both formal and informal settings. Students have the opportunity to do a senior thesis. If they do a senior thesis, they will work individually with a faculty member.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, materials physics, astrophysics/cosmology, and biophysics.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the SLAC National Accelerator Laboratory at Stanford University and the European Council for Nuclear Research (CERN) near Geneva, Switzerland. SCIPP experimentalists have also played an important role in creating the major satellite for gamma-ray astronomy (the Fermi Gamma-ray Space Telescope), are involved in the Dark Energy Survey, and conduct a thriving particle astrophysics program detecting TeV gamma rays as part of the UC VERITAS collaboration. SCIPP theorists are active in the phenomenology of high-energy particle interactions, including dark matter models, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics, including research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology and the very early universe. SCIPP is also home to a research program in experimental biophysics, exploiting instrumentation technologies developed in other areas of physics for the study of functional organization and development of neural systems in a variety of living organisms. In addition, there is closely related research in biomedical applications such as retinal prostheses.

The presence of the strong astrophysics group from the Astronomy and Astrophysics Department at UCSC provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major but does participate in teaching and mentoring Physics Department astrophysics majors. UCSC is the headquarters for the University of California Observatories, which includes the Lick Observatory near San Jose and the Keck Observatory in Hawaii. These provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter and materials physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors) and quantum materials (such as topological insulators and Weyl semimetals); magnetic phase transitions; magnetic and magnetoelectric surfaces, interfaces, and thin films; two-dimensional materials and heterostructures; complex systems (proteins, DNA, and polymers); biophysics; and the development of new electronic devices using novel materials. The experimental program includes optical, magnetometry, magnetotransport, X-ray, and specific heat measurement techniques, as well as thin film growth and characterization facilities at UCSC. X-ray and synchrotron radiation scattering and spectroscopy measurements are available at the Lawrence Berkeley National Laboratory Advanced Light Source and at the Stanford Synchrotron Radiation Light-source, while neutron scattering measurements are performed at the NIST Center for Neutron Research and the Oak Ridge Spallation Neutron Source. Undergraduate students are actively involved in several condensed matter physics laboratories during the academic year and summer months.

**UNDERGRADUATE PROGRAM**

**Undergraduate Majors**

The physics, physics (astrophysics), and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. Students earn a bachelor of science (B.S.) degree. The UC Santa Cruz physics, physics (astrophysics), and applied physics programs begin with a four-quarter presentation of the introductory concepts of the subject, Introduction to Physics, PHYS 5A, PHYS 5B, PHYS 5C, and PHYS 5D. Note that the applied physics program also requires completion of a general chemistry course. In order for a student to finish the UCSC physics program in four years, it is important to start the Introduction to Physics sequence as early as possible. Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

This introductory sequence is followed by a course that provides an introduction to quantum physics and its applications, Modern Physics, PHYS 102. The programs continue with a three-quarter sequence in mathematical methods of physics, PHYS 116A, PHYS 116B, and PHYS 116C, designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the
upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments that were important in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair.

The senior thesis provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on the student’s original research or participation in a faculty member’s research project or a review of some particular area of physics, under the supervision of a faculty member. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The department is also the administrative home of the science education major, which is a collaboration between several departments in the Physical and Biological Sciences Division and the Department of Education. This major is designed for a career in teaching in California high schools by preparing students for the California Subject Examination for Teachers. (Students interested in a high school teaching career will have to fulfill additional requirements after the degree, such as earning a teaching credential.)

**Courses for Non-Majors**

The department offers the three-quarter sequence PHYS 6A, PHYS 6B, and PHYS 6C that covers introductory physics at a level suitable for many majors. A two-quarter sequence, PHYS 7A and PHYS 7B, is tailored for students in the life sciences. A one-quarter overview of physics, PHYS 1, and a course on the physics underpinning music, PHYS 80U, are also offered by the department.

**GRADUATE PROGRAM**

The Physics Department offers graduate programs leading to the Master of Science (M.S.) and/or the Doctor of Philosophy (Ph.D.) degrees. Each student has a faculty advisor who helps to determine which courses are most appropriate, taking into account the student’s background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental/observational high-energy astrophysics (including cosmology).

Students may obtain a master’s degree through coursework (eight physics graduate courses) and submission of an approved thesis. The thesis requirement may be waived by passing four sections of the written Ph.D. qualifying examination. Master’s candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty advisor who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics (SCIPP) and the UC Observatories (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

**PHYSICS B.S.**

**Information and Policies**

**Introduction**

**Academic Advising for the Program**

The department undergraduate advisor (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

**Getting Started in the Major**

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department undergraduate advisor and the Alternatives webpage. Students who do not begin the lower-division requirements during their
first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in physics will demonstrate:

PLO 1. Ability to solve problems using concepts in classical and quantum mechanics, statistical mechanics and electromagnetism.

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5B</td>
<td>Introduction to Physics II</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5C</td>
<td>Introduction to Physics III</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 23A</td>
<td>Vector Calculus</td>
<td>5</td>
</tr>
</tbody>
</table>

A minimum GPA of 2.7 must be obtained in the following courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5B</td>
<td>Introduction to Physics II</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5C</td>
<td>Introduction to Physics III</td>
<td>5</td>
</tr>
</tbody>
</table>

In addition, the following course is recommended prior to transfer to ensure timely graduation:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5D</td>
<td>Introduction to Physics IV</td>
<td>5</td>
</tr>
</tbody>
</table>

Getting Started at UCSC as a Transfer Student

Transfer students admitted to UC Santa Cruz in the physics major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate advisor to draw up an academic plan. Students who are proposed in a different major (other than physics (astrophysics) or applied physics) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.
Letter Grade Policy

All courses used to satisfy the physics major requirements must be taken for a letter grade, except the programming requirement.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis advisor.

Timely Graduation and Alternative Plans

- Students planning a senior thesis should find a faculty thesis advisor as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate advisor.
- Students who fall behind the planners should consult the Physics Department undergraduate advisor and Alternatives.
- All the transfer major planners assume that the Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 20B</td>
<td>Honors Calculus</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus all of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 20A</td>
<td>Honors Calculus</td>
<td>5</td>
</tr>
</tbody>
</table>

Upper-Division Courses

All of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 102</td>
<td>Modern Physics</td>
<td>5</td>
</tr>
<tr>
<td>116A</td>
<td>Physics</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 110A</td>
<td>Mathematical Methods in Physics</td>
<td>5</td>

<td>PHYS 134</td>
<td>Physics Advanced Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 139A</td>
<td>Quantum Mechanics I</td>
<td>5</td>
</tr>
</tbody>
</table>

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics and a mathematics B.A., and take MATH 107 in the year 2017 or later.
Programming Requirement

Students in the physics B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119 teaches programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Two courses, each 5 credits or more, chosen from upper-division elective courses offered by the Physics Department or ASTR 111 - ASTR 118. In some cases, with the approval of the department, one of the elective requirements may be satisfied by an upper-division science or engineering course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the physics major satisfy the DC requirement by completing one of the following options:

Either this course

PHYS 182 Scientific Communication for Physicists 5

or these courses

PHYS 195A Senior Thesis I 5
PHYS 195B Senior Thesis II 5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

PHYS 134 Physics Advanced Laboratory 5

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.

Physics 110B

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

Physics 112

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

PHYSICS (ASTROPHYSICS) B.S.

Information and Policies

Introduction

Academic Advising for the Program

The department undergraduate advisor (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department undergraduate advisor and Alternatives. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Program learning outcomes (PLO) summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in Physics (Astrophysics) will demonstrate:

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.
All students are required to review their academic plan with a faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5B</td>
<td>Introduction to Physics II</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5C</td>
<td>Introduction to Physics III</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 23A</td>
<td>Vector Calculus</td>
<td>5</td>
</tr>
</tbody>
</table>

A minimum GPA of 2.7 must be obtained in the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5B</td>
<td>Introduction to Physics II</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5C</td>
<td>Introduction to Physics III</td>
<td>5</td>
</tr>
</tbody>
</table>

In addition, the following course is recommended prior to transfer to ensure timely graduation:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5D</td>
<td>Introduction to Physics IV</td>
<td>5</td>
</tr>
</tbody>
</table>

**Getting Started as a UCSC Transfer Student**

Transfer students admitted to UC Santa Cruz in the physics (astrophysics) major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate advisor to draw up an academic plan. Students who are proposed in a different major (other than physics or applied physics) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

**Letter Grade Policy**

All courses used to satisfy the physics (astrophysics) major requirements must be taken for a letter grade, except the programming requirement.

**Study Abroad**

**Honors**

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis advisor.

**Timely Graduation and Alternative Plans**

- Students planning a senior thesis should find a faculty thesis advisor as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate advisor.
- Students who fall behind the planners should consult the Physics Department undergraduate advisor and Alternatives.
- All the transfer major planners assume that IGETC has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

**Requirements and Planners**

**Course Requirements**

**Lower-Division Courses**

**Choose one of the following courses:**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Double Majors and Major/Minor Combinations Policy**

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.
PHYS 5N  Introduction to Physics Laboratory III  1
PHYS 5D  Introduction to Physics IV  5

Plus one of the following courses or equivalent:
ASTR 119  Introduction to Scientific Computing  5
CSE 20  Beginning Programming in Python  5
PHYS 115  Computational Physics  5

ASTR 119 recommended. PHYS 115 does not teach programming, but it assumes a knowledge of programming. Students should only take the course if they have learned basic programming elsewhere. Therefore, completion of PHYS 115 is sufficient to fulfill the programming requirement.

Upper-Division Courses

All of the following courses:
PHYS 102  Modern Physics  5
PHYS 116A  Mathematical Methods in Physics  5
PHYS 116B  Mathematical Methods in Physics  5
PHYS 116C  Mathematical Methods in Physics  5
PHYS 105  Mechanics  5
PHYS 110A  Electricity, Magnetism, and Optics  5
PHYS 110B  Electricity, Magnetism, and Optics  5
PHYS 112  Thermodynamics and Statistical Mechanics  5
PHYS 133  Intermediate Laboratory  5
PHYS 139A  Quantum Mechanics I  5

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics (astrophysics) and mathematics B.A., and take MATH 107 in the year 2017 or later.

Plus one of the following options:
Either this course
PHYS 135  Astrophysics Advanced Laboratory  5
or these courses
PHYS 135A  Astrophysics Advanced Laboratory  3
PHYS 135B  Astrophysics Advanced Laboratory  2

or this course
ASTR 136  Advanced Astronomy Laboratory  5

Capacity in the lab courses is limited, and they should be taken as early as possible.

Programming Requirement

Students in the physics (astrophysics) B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119 teaches programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Complete three courses, each 5 credits or more, chosen from the following:
ASTR 111  Order-of-Magnitude Astrophysics  5
ASTR 112  Physics of Stars  5
ASTR 113  Introduction to Cosmology  5
ASTR 117  High Energy Astrophysics  5
ASTR 118  Physics of Planetary Systems  5
ASTR 257  Observational Astronomy  5
PHYS 129  Nuclear and Particle Astrophysics  5
PHYS 137  Advanced Optics Laboratory  5
PHYS 171  General Relativity, Black Holes, and Cosmology  5
EART 160  Planetary Science  5
EART 162  Planetary Interiors  5
EART 163  Planetary Surfaces  5
EART 164  Planetary Atmospheres  5
AM 107  Introduction to Fluid Dynamics  5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the physics (astrophysics) major satisfy the DC requirement by completing one of the following options:
Either this course
PHYS 182  Scientific Communication for Physicists  5
or these courses
PHYS 195A  Senior Thesis I  5
PHYS 195B  Senior Thesis II  5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing one of the following options:
Either this course
Physics (Astrophysics) B.S.: Freshman Academic Plan

APPLIED PHYSICS B.S.

Information and Policies

Introduction

Academic Advising for the Program

The department undergraduate advisor (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department undergraduate advisor and Alternatives. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in Applied Physics will demonstrate:

PLO 1. Ability to solve problems using concepts in classical and quantum mechanics, statistical mechanics and electromagnetism.

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

Major Qualification Policy and Declaration

Process

Major Qualification

To qualify to declare the Applied Physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A Introduction to Physics I 5
PHYS 5B Introduction to Physics II 5
PHYS 5C Introduction to Physics III 5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with one of the faculty mentors listed for Declaring the Major. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

All students are required to review their academic plan with a faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

PHYS 5A Introduction to Physics I 5
PHYS 5B Introduction to Physics II 5
PHYS 5C Introduction to Physics III 5
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5
MATH 23A    Vector Calculus  5

A minimum GPA of 2.7 must be obtained in the following courses
PHYS 5A    Introduction to Physics I  5
PHYS 5B    Introduction to Physics II  5
PHYS 5C    Introduction to Physics III  5

In addition, the following course is recommended prior to transfer to ensure timely graduation:
PHYS 5D    Introduction to Physics IV  5

Getting Started at UCSC as a Transfer Student

Transfer students admitted to UC Santa Cruz in the applied physics major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate advisor to draw up an academic plan. Students who are proposed in a different major (other than physics (astrophysics) or physics) and have advanced standing when they come UC Santa Cruz require permission from the department to change into the major.

Letter Grade Policy

All courses used to satisfy any of the applied physics major requirements must be taken for a letter grade, except the programming requirement and chemistry.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis advisor.

Timely Graduation and Alternative Plans

- Students planning a senior thesis should find a faculty thesis advisor as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate advisor.

- Students who fall behind the planners should consult the Physics Department undergraduate advisor and Alternatives.
- All the transfer major planners assume that Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

Course Requirements

Lower-Division Courses

Choose one of the following courses:
MATH 19A    Calculus for Science, Engineering, and Mathematics  5
MATH 20A    Honors Calculus  5

Plus one of the following courses:
MATH 19B    Calculus for Science, Engineering, and Mathematics  5
MATH 20B    Honors Calculus  5

Plus all of the following courses:
MATH 23A    Vector Calculus  5
MATH 23B    Vector Calculus  5
PHYS 5A    Introduction to Physics I  5
PHYS 5L    Introduction to Physics I Laboratory  1
PHYS 5B    Introduction to Physics II  5
PHYS 5M    Introduction to Physics II Laboratory  1
PHYS 5C    Introduction to Physics III  5
PHYS 5N    Introduction to Physics Laboratory III  1
PHYS 5D    Introduction to Physics IV  5

Plus one of the following courses:
CHEM 1A    General Chemistry  5
CHEM 1B    General Chemistry  5

Plus one of the following courses or equivalent:
CSE 20    Beginning Programming in Python  5
ASTR 119    Introduction to Scientific Computing  5
PHYS 115    Computational Physics  5

PHYS 115 does not teach programming, but it assumes a knowledge of programming. Students should only take the course if they have learned basic programming elsewhere. Therefore, completion of PHYS 115 is sufficient to fulfill the programming requirement.
Upper-Division Courses

All of the following courses:

- PHYS 102 Modern Physics 5
- PHYS 116A Mathematical Methods in Physics 5
- PHYS 116B Mathematical Methods in Physics 5
- PHYS 116C Mathematical Methods in Physics 5
- PHYS 105 Mechanics 5
- PHYS 110A Electricity, Magnetism, and Optics 5
- PHYS 110B Electricity, Magnetism, and Optics 5
- PHYS 112 Thermodynamics and Statistical Mechanics 5
- PHYS 133 Intermediate Laboratory 5
- PHYS 134 Physics Advanced Laboratory 5

Students may take ECE 135/ECE 135L instead of PHYS 110A and PHYS 110B. This is not recommended for students who wish to pursue graduate studies in physics.

PHYS 133 is offered all three terms. PHYS 134 (for physics B.S. and applied physics B.S. majors) is offered in the winter and spring terms. Capacity in the lab courses is limited, and they should be taken as early as possible.

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in applied physics and a mathematics B.A., and take MATH 107 in the year 2017 or later.

Programming Requirement

Students in the applied physics B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119 teaches programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Complete three courses, each 5 credits or more, chosen from the following:

- PHYS 115 Computational Physics 5
- PHYS 120 Polymer Physics 5
- PHYS 137 Advanced Optics Laboratory 5
- PHYS 139A Quantum Mechanics I 5

Complex Systems

- PHYS 139B Quantum Mechanics II 5
- PHYS 155 Solid State Physics 5
- PHYS 150 Quantum Computing 5
- PHYS 136 Applications of Solid State Physics 5
- PHYS 160 Practical Electronics 5
- PHYS 180 Biophysics 5
- AM 107 Introduction to Fluid Dynamics 5
- AM 114 Introduction to Dynamical Systems 5
- ASTR 111 Order-of-Magnitude Astrophysics 5
- CHEM 122 Principles of Instrumental Analysis 5
- CHEM 164 Physical Chemistry Laboratory 5
- CHEM 165 Introduction to Fluid Dynamics 5
- CHEM 167 Introduction to Solid Mechanics 5
- ECE 118 Introduction to Mechatronics 10

Or other courses with approval of the undergraduate faculty advisor.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the applied physics major satisfy the DC requirement by completing one of the following options:

Either this course
- PHYS 182 Scientific Communication for Physicists 5

or these courses
- PHYS 195A Senior Thesis I 5
- PHYS 195B Senior Thesis II 5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

- PHYS 134 Physics Advanced Laboratory 5
Planners

Applied Physics B.S.: Freshman Academic Plan

Plan 1: For students who place into MATH 19A or MATH 20A.

<table>
<thead>
<tr>
<th></th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (frosh)</td>
<td>MATH 19A or MATH 20A</td>
<td>MATH 19B or MATH 20B</td>
<td>MATH 23A</td>
</tr>
<tr>
<td></td>
<td>PHYS 5B &amp; PHYS 5M</td>
<td>PHYS 5A &amp; PHYS 5L*</td>
<td>PHYS 105</td>
</tr>
<tr>

<td>Elective</td>
</tr>
</tbody>
</table>

*Students who complete the equivalent of MATH 19A before coming to UC Santa Cruz can take the PHYS 5A, PHYS 5B, PHYS 5C courses and the MATH 19B, MATH 23A, MATH 23B courses in their first year.

**Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

This planner assumes that a student has completed PHYS 5D and general education requirements.

Students who wish to do a more demanding senior thesis or seek greater flexibility in choosing electives may consider delaying graduation.

Applied Physics B.S.: Transfer Academic Plan Two

For students who have not completed the equivalent of PHYS 5D.

<table>
<thead>
<tr>

<td>PHYS 134</td>
<td>Elective</td>
</tr>
</tbody>
</table>

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

PHYSICS MINOR

Course Requirements

Lower-Division Courses

Choose one of the following options:

Either these courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5L</td>
<td>Introduction to Physics I</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Laboratory</td>
<td></td>
</tr>
</tbody>
</table>
PHYS 5B  Introduction to Physics II  5
PHYS 5M  Introduction to Physics II Laboratory  1
PHYS 5C  Introduction to Physics III  5
PHYS 5N  Introduction to Physics Laboratory III  1

or these courses
PHYS 6A  Introductory Physics I  5
PHYS 6L  Introductory Physics I Laboratory  1
PHYS 6B  Introductory Physics II  5
PHYS 6M  Introductory Physics II Laboratory  1
PHYS 6C  Introductory Physics III  5
PHYS 6N  Introductory Physics III Laboratory  1

Plus the following course:
PHYS 5D  Introduction to Physics IV  5

Plus one of the following courses:
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 20A  Honors Calculus  5

Plus one of the following courses:
MATH 19B  Calculus for Science, Engineering, and Mathematics  5
MATH 20B  Honors Calculus  5

MATH 20B can only be taken if a student has taken Math 20A instead of Math 19A.

Plus all of the following courses:
MATH 23A  Vector Calculus  5
MATH 23B  Vector Calculus  5

Upper-Division Courses

All of the following courses:
PHYS 102  Modern Physics  5
PHYS 133  Intermediate Laboratory  5

Plus three elective courses

These can be any physics upper-division courses, or courses from the following list:
AM 107  Introduction to Fluid Dynamics  5
AM 114  Introduction to Dynamical Systems  5
ASTR 111  Order-of-Magnitude Astrophysics  5
ASTR 112  Physics of Stars  5
ASTR 113  Introduction to Cosmology  5
ASTR 117  High Energy Astrophysics  5
ASTR 118  Physics of Planetary Systems  5
EART 121  The Atmosphere  5
EART 160  Planetary Science  5
ECE 101  Introduction to Electronic Circuits  5
ECE 102  Properties of Materials  5
ECE 103  Signals and Systems  5
ECE 130  Introduction to Optoelectronics and Photonics  5
ECE 136  Engineering Electromagnetics  5
ECE 141  Feedback Control Systems  5
ECE 171  Analog Electronics  5
ECE 172  Advanced Analog Circuits  5
ECE 178  Device Electronics  5
MATH 130  Celestial Mechanics  5
EART 172  Geophysical Fluid Dynamics  5

The elective courses cannot be offered by the department that sponsors the student’s major. Other courses may be taken as electives with the approval of the Physics Department undergraduate faculty advisor.

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or the physics minor.

SCIENCE EDUCATION B.S.

Information and Policies

Introduction

Twenty-first century science educators must be able to help their students develop and apply a scientific perspective to a wide range of information. The science education major is designed to prepare future secondary science teachers in California with a broad background across the sciences—the physical sciences, life sciences, Earth sciences, and space sciences—with advanced specialization in two fields of science (chosen from physics, chemistry, biology, and Earth sciences). The major integrates education coursework and middle and high school classroom internships designed to develop skills and knowledge relevant to teaching K-12 students in the state of California. The major is mainly intended to prepare students for teacher certification programs and the California Subject Examinations for Teachers (CSET), so that they can teach science in California high schools.

Cal Teach is one home base for all students in this major, no matter the choices for specialization. Cal Teach (CaT) provides the required sequence of middle and high school-based internships and associated courses in partnership with schools throughout Santa Cruz County. Each internship placement depends on school schedules and the intern’s schedule, interests, and academic preparation. The CaT seminar courses provide the framework for science education majors to develop classroom-management strategies, practice communicating scientific concepts for non-specialists (children), and design lessons to teach the science standards currently used in K-12 education. Departmental
advising is provided by the Physics Department and the program faculty.

The program is designed to prepare outstanding candidates to enter teaching credential programs after completion. Students earn a Bachelor of Science (B.S.) degree. They do not earn a teaching credential. Most students elect to complete this after graduation. Details of how to prepare for admission to a teaching credential program are available on the Education Department's Careers in K-12 School Teaching page.

Academic Advising for the Program

Academic advising for the major is provided by the Physics Department undergraduate advisor, physicsadvising@ucsc.edu. Transfer students should also consult the Transfer Information and Policy section of this program statement. Students should contact calteach@ucsc.edu as early as possible to be set up to enroll in the Cal Teach internship courses, which are required for the major.

Getting Started in the Major

Because of the broad based nature of the major, with introductory courses in physics, chemistry and mathematics, there is considerable flexibility in what courses are taken in the first two years, as long as enough courses required for the major are completed. However, it is simplest to follow the appropriate major planner given below; students should consult with the physics undergraduate advisor if they want to do something different.

Students should complete at least two courses in the calculus sequence (MATH 11A and MATH 11B or MATH 19A and MATH 19B) in the first year; MATH 19A and MATH 19B are required for students who choose physics as one of their specializations.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty’s expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes:

- Students will demonstrate knowledge and an understanding of scientific connections across the broad spectrum of the sciences.
- Students will demonstrate advanced knowledge in two areas of specialization.
- Students will show that they have learned laboratory skills in multiple scientific fields, enabling them to take measurements in a laboratory and in the field and analyze the measurements to draw valid conclusions.
- Students will communicate scientific concepts effectively and accurately, both orally and in writing, for both college-level and secondary audiences.
- Students will apply strategies to address a diversity of K-12 learners’ needs.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete at least six courses from the lower-division course requirements before they can declare the major. (Lecture/lab combinations count as one course.)

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the program director through physicsadvising@ucsc.edu by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received. Within 15 days of receipt of the appeal, the program director will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Students should meet with the Physics Department undergraduate advisor and prepare an academic plan when they declare the major.

Transfer Information and Policy

Transfer Admission Screening Policy

Note: This major is intended for students who are interested in teaching science in high schools in the state of California. For more information, please see the program statement for this major in the UCSC General Catalog.

Six of the following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.
<table>

**Getting Started at UCSC as a Transfer Student**

Transfer students admitted to UC Santa Cruz in this major may declare the major at any time after coming to UC Santa Cruz. Contact physadvn@ucsc.edu for details. Also contact the faculty program director for the Science Education program at sci-ed@ucsc.edu immediately after coming to UC Santa Cruz, with the two fields out of physics, chemistry, biology and Earth sciences which you wish to specialize in, to prepare an academic plan. Students should also contact calteach@ucsc.edu as soon as possible after coming to UC Santa Cruz to be set up to enroll in the Cal Teach internship courses, which are required for the major.

Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the Science Education faculty program director to change into the major.

**Letter Grade Policy**

All courses used to satisfy any of the major requirements must be taken for a letter grade.

**Course Requirements**

**Lower-Division Courses**

**Choose one of the following courses:**
- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 11A Calculus with Applications 5

**Plus one of the following courses:**
- MATH 19B Calculus for Science, Engineering, and Mathematics 5
- MATH 11B Calculus with Applications 5

**Plus the following course:**
- MATH 22 Introduction to Calculus of Several Variables 5

MATH 22 is waived for a student who chooses their electives from chemistry and biology or from Earth sciences and biology.

**Plus one of the following options:**

Either these courses
- PHYS 5A Introduction to Physics I 5
- PHYS 5L Introduction to Physics I Laboratory 1
- PHYS 5B Introduction to Physics II 5
- PHYS 5M Introduction to Physics II Laboratory 1
- PHYS 5C Introduction to Physics III 5
- PHYS 5N Introduction to Physics Laboratory III 1

or these courses
- PHYS 6A Introductory Physics I 5
- PHYS 6L Introductory Physics I Laboratory 1
- PHYS 6B Introductory Physics II 5
- PHYS 6M Introductory Physics II Laboratory 1
- PHYS 6C Introductory Physics III 5
- PHYS 6N Introductory Physics III Laboratory 1

**Honors**

Honors in the major are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above in the courses used to satisfy major requirements. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in the courses used to satisfy major requirements. The program faculty reserve the right to withhold honors and highest honors based on other criteria such as an incident of academic dishonesty.

### Disciplinary Communication (DC) Requirement

The disciplinary communication requirement for this major is fulfilled by completing:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 100A</td>
<td>Cal Teach 2: Science and Mathematics</td>
<td>2</td>
</tr>
<tr>
<td>EDUC 100C</td>
<td>Cal Teach 2: Science</td>
<td>2</td>
</tr>
<tr>
<td>Plus the following course:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>EDUC 185L</td>
<td>Introduction to Teaching: Cal Teach 3</td>
<td>3</td>
</tr>
</tbody>
</table>

### Comprehensive Requirement

The senior capstone requirement for this major is fulfilled by completing:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 185C</td>
<td>Introduction to Teaching: Cal Teach 3</td>
<td>5</td>
</tr>
</tbody>
</table>

### Planners

**Four-Year Planner**

There are several alternatives to this planner. However, changes to an individual plan must take into account various prerequisites, both within the sequence of courses in a single discipline and between disciplines. Consult with an advisor before attempting an alternative path.

<table>
<thead>
<tr>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st (frosh)</td>
<td>MATH</td>
<td>MATH</td>
</tr>
<tr>
<td>11A</td>
<td>11B</td>
<td></td>
</tr>
</tbody>
</table>
In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, IM and TA general education requirements.

*Students choosing physics as one of their fields of specialization must take MATH 19A and 19B instead of MATH 11A and MATH 11B, and the PHYS 5 series of courses instead of PHYS 6.

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). A student who has completed the equivalent at their community college will not need to complete this course at UCSC. MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your advisor with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

Field A and B refer to the two subject areas a student chooses for specialization. Courses in each field are:

1. Physics: PHYS 5D (fall), PHYS 102 (winter), PHYS 133 (spring)
2. Earth sciences: OCEA 90 (fall), EART 110B & EART 110M (winter), Earth science upper-division elective (spring).

3. Biology: BIOL 105 (fall), BIOE 107 (winter), BIOE 109 (spring)

4. Chemistry (three options):
   a. CHEM 163A (fall), CHEM 8A & CHEM 8L (winter), CHEM 8B & CHEM 8M (spring) for chemistry with Earth sciences
   b. CHEM 8A & CHEM 8L (fall), CHEM 163B (winter), CHEM 8B & CHEM 8M (spring) for chemistry with physics
   c. CHEM 8A & CHEM 8L (fall), CHEM 8B & CHEM 8M (winter), CHEM 103 (spring) for chemistry with biology

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). A student who has completed the equivalent at their community college will not need to complete this course at UCSC. MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your advisor with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

This planner assumes that the student has completed all general education requirements, and nine courses out of the 12 breadth requirements in physics, chemistry, biology and mathematics & statistics. The remaining three “breadth courses” can be taken in the three slots shown.

Elective courses for each field are described below the four-year planner. If courses in Field A cannot be taken in the junior year, they can be exchanged with the breadth courses shown in the senior year.

**PHYSICS CONTIGUOUS**
BACHELOR'S/MASTER'S PATHWAY

The five-year combined Bachelor's/Master's degree physics program provides undergraduate students the opportunity to earn a Master of Science (M.S.) degree in five years. Students are able to start their graduate coursework in their junior year and can use up to two elective requirements between degrees. This program is designed for students who intend to go into industry upon graduation and is not well-suited for those who ultimately want to obtain a Ph.D. in physics. The Combined B.S./MS. has a two-stage application, one at the departmental level (due second quarter of junior year) and then another at the graduate program level (due first quarter of senior year). Upon successful completion of their undergraduate requirements students are awarded their B.S. in Physics, and providing that they still meet the relevant criteria, may continue into the M.S. program. In order to be awarded the M.S. students finish any remaining M.S. coursework and then defend their M.S. thesis.

Requirements for taking graduate courses:

Students must perform at a B+ or better in the related undergraduate course. For example, for a student to take PHYS 210 in their senior year they must acquire a grade of B+ or better in PHYS 105.

Departmental Admission Requirements:

- 3.3 GPA overall and within physics
- Two letters of recommendation (at least one from a physics faculty member)
- Departmental Application
- Statement of Purpose. This statement should explain your interest in the BS./M.S. program and your proposed research topic.
- Due by the end of the second quarter of junior year

Graduate Program Requirements:

- 3.0 GPA overall and within physics
- Three letters of recommendation (two from physics faculty, one from research adviser)
- Unofficial transcripts
- Statement of Purpose
- Due by the end of the first quarter of their senior year.

Letters of recommendation for departmental admission requirements can overlap with letters of recommendation for graduate program requirements.

With approval from the program director, students may take graduate courses from other departments.

PHYSICS M.S.

Introduction

The Physics Department welcomes students interested in the master’s degree. Master’s candidates can perform research in any of the areas covered by the department. They develop laboratory and computational skills which are of value in many fields. These include electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, materials science and biophysics. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UC Santa Cruz research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics (SCIPP) and the UC Observatories (headquartered at UC Santa Cruz). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology,
chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UC Santa Cruz faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

The application procedure and requirements for the M.S. program is identical to those of the Ph.D. program. Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

Students pursuing the Ph.D. degree can apply for a master's degree upon successful completion of the requirements for a master's degree.

M.S. Thesis Requirement

Students may obtain a master’s degree through coursework (nine physics graduate courses) and submission of an approved thesis. The thesis requirement may be waived by passing four sections of the written pre-qualifying examination. Master’s candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Other Requirements

[Optional Catchall]

Applying for Graduation

Students must apply for graduation in order to receive their M.S. degree. The form can be found on the physics graduate student forms page and should be submitted to the Graduate Division.

PHYSICS PH.D.

Introduction

The Physics Department welcomes students interested in the Ph.D. degree. Doctoral candidates can perform research in any of the areas covered by the department, including experimental and theoretical astrophysics, biophysics, condensed matter physics and materials science, cosmology, and particle physics theory and experiment. Each doctoral student is assigned a faculty advisor who helps to design a research project suited to the interests of the student.

The UC Santa Cruz Physics Department is committed to providing an excellent education to a diverse population of graduate students and we encourage candidates from all backgrounds to apply. We employ a holistic process to assess candidates’ knowledge and passion for physics, as well as whether or not they have the perseverance and tenacity required to complete the doctoral program. Of particular importance is the alignment between the research interests of the candidate and those of the department. While taking into consideration a candidate's undergraduate grade point average (GPA), letters of recommendation, student statements, and Graduate Record Examinations (GRE) scores (if provided), we do not disqualify applicants based on any single factor. In
particular, the department recognizes the documented limitations of the GRE as an equitable predictor of success in graduate studies and research.

**Admission Process**

Required application materials:

- **Recommendations**
  Three letters of recommendation are required. Additional letters, up to five total recommendations, will be reviewed but will not help or hurt your application.

- **Statement of Purpose**
  The candidate is asked to describe plans for graduate study or research and for future occupation or profession, and to include any information that may aid the selection committee in evaluating your preparation and qualifications for graduate study at the University of California, Santa Cruz. Recommended length is a concise 1-2 pages.

- **Personal History Statement**
  This statement will be used in conjunction with your application for graduate admission and financial support. Note that the Personal History Statement should not duplicate the Statement of Purpose. Recommended length is a concise 1-2 pages. UC Santa Cruz is interested in a diverse and inclusive graduate student population. In an essay, discuss how your personal background informs your decision to pursue a graduate degree. Candidates should include any educational, familial, cultural, economic, or social experiences, challenges, or opportunities relevant to your academic journey; how you might contribute to social or cultural diversity within your chosen field; and/or how you might serve educationally underrepresented segments of society with your degree.

- **Resume**

- **Research Interests**
  Candidates are asked to indicate the three research areas they are most interested in studying. This information will be used to ensure that the faculty in your areas of interest have an opportunity to review your application. Fields of studies include:
  - Applied Physics
  - Astrophysics and cosmology experiment
  - Astrophysics and cosmology theory
  - Biophysics
  - Condensed matter experiment
  - Condensed matter theory
  - Material Science
  - Particle physics experiment
  - Particle physics theory
  - **GRE Scores** (Educational Testing Service offers a fee reduction program)
    Please note that the we have recently changed our policy concerning application materials and the GRE:
    - General Exam—Optional
    - Physics Subject Exam—Recommended

- **English Language Competence**
  - Test of English as a Foreign Language (TOEFL) Exams. For those choosing to take the TOEFL, a minimum score on the paper-based TOEFL of 550, or 220 on the computer-based test, or 83 on the Internet-based test is required for admission. Any international students who wish to be considered for teaching assistant opportunities must score a 26 or higher on the spoken word portion of the Internet-based test.
  - International English Language Testing System (IELTS) Exams. For those choosing to take the IELTS, a minimum overall score of 7 from the IELTS test is required for admission. A speaking portion score of 8 from the IELTS test is required for all new international students who may serve as a teaching Assistant at any time during their graduate career.

- **Grade Point Average**
  - Undergraduate GPA and Scale
  - Upper-division GPA. Calculate your GPA in your junior and senior level physics and mathematics courses.
  - Graduate GPA and Scale (if applicable)

- **Transcripts**
  *Unofficial transcripts must be uploaded to the application before you can submit this application.* You must upload at least one transcript to your application. For review and decision purposes we accept electronic versions (PDF) of your academic records, which we consider to be "unofficial." If an offer of admission is made, you will be required to send us official paper documents for verification. Admission offers will not be considered final until we have received the official documents that match the uploaded record.

- **Academic Information (publications, teaching experience, etc.)**
List articles, books, or any other materials published, with dates of publication. Provide URLs to publications where possible. List name, approximate dates, and location of any institution at which you have taught.

- **Present Occupation or Position**

- **Language Proficiency**
  Describe degree of proficiency (reading and speaking) in languages other than your first language.

- **Foreign Language Proficiency**

- **Research Work**
  List relevant advanced or research work that you have completed in your chosen field of study.

- **Research Experience**

- **Diversity Fellowships**
  This page is optional. The Santa Cruz campus of the University of California has a longstanding goal of achieving a graduate student population that reflects the diversity of the state. Applicants who have excellent potential as future faculty and researchers, and whose enrollment would contribute to the diversity of our graduate student population, are invited to apply for these fellowships. You should complete this form if you believe that you meet both criteria and wish to be considered for one of these awards.

### Advancement to Candidacy

The following sections are meant to define all that is necessary to advance to candidacy for the Ph.D. degree.

### Course Requirements

#### Core courses

In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter from the following list of courses required for the Ph.D. degree:

- **PHYS 210** Classical Mechanics 5
- **PHYS 212** Electromagnetism I 5
- **PHYS 214** Electromagnetism II 5
- **PHYS 215** Introduction to Non-Relativistic Quantum Mechanics 5
- **PHYS 216** Advanced Topics in Non-Relativistic Quantum Mechanics 5
- **PHYS 219** Statistical Physics 5

One or more of these first-year courses can be waived if students have taken equivalent graduate-level courses at their undergraduate institution. However, this requires that the course covers the material in the first-year courses syllabi, that the students obtained a satisfactory grade, and that the student passes the associated written qualifying examination.

- **First-year students are also required to take the following two courses:**
  - **PHYS 205** Introduction to Research in Physics 2
  - **PHYS 202** Introduction to Teaching in Physics 1

- **First- and second-year students are required to take the following course every quarter:**
  - **PHYS 292** Seminar

### Pre-Qualifying Requirements

All students in the Ph.D. program must pass a qualifying examination consisting of five written tests in the areas of mathematical methods for physics, classical mechanics, quantum mechanics, statistical mechanics, and electricity and magnetism. Students have a first opportunity to take these five tests at the beginning of their first year. Once a student passes an examination in any one of the five areas they do not need to take an exam in that area again. If necessary, each student has a second opportunity to pass the written tests at the beginning of the second year. Students with at most one or two failed tests have a third opportunity to pass their remaining tests at the beginning of the winter quarter of their second year. Students who fail any of the remaining tests at this third and last attempt, and students who have not passed three or more of the five written tests after two attempts can either transfer to the terminal M.S. program (the M.S. degree is automatically awarded to students who passed at least four of the five sections, and it requires an additional written research thesis for those who only passed three of the five sections), or appeal to the Graduate Committee to continue on the Ph.D. route. In this latter case, the Graduate Committee considers whether there is evidence of likely success in the Ph.D. program. The committee evaluates and reviews the student’s progress toward candidacy, including performance in courses and progress in research, and recommends possible remedial coursework or an oral examination, or recommends that the student transfer to the terminal M.S. route.

### Qualifying Examination

After identifying an appropriate research project with their faculty advisor, students form an Oral Qualifying Examination Committee.

At a time determined in consultation with their advisor, the student takes the Oral Qualifying Examination. The student presents their research progress, outlines a path to successful completion of their dissertation work, and answers questions both about their research program and about the research area generally. The graduate advisor and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.
Post-Qualifying Requirements

Dissertation

Students complete a dissertation under the supervision of their research advisor. When the student and advisor agree that the thesis is nearing completion or is complete, the thesis is examined by the student's dissertation reading committee (typically composed of the same members as the Oral Qualifying Examination Committee).

Dissertation Defense

A public dissertation defense is required. Students should work with their committee to confirm a defense date and time. The Physics Department can assist with providing a room for the defense and with publicizing the event. Students should have a final or nearly final draft of their dissertation and provide it to their committee prior to the defense. We suggest at least one month prior, but this is at the committee’s discretion. The graduate advisor and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.

Academic Progress

Annual evaluation ordinarily is the joint responsibility of the graduate coordinator and the assigned faculty advisor or the chair of the student's doctoral committee. An evaluation should include a brief review of the student's work to date, with particular attention to the period since the last report, describing the student's progress toward the degree, pointing out any areas in which improvement is recommended or required, and establishing academic objectives for the following period.

The results of annual reviews are committed to writing and signed by the supervisor and another faculty member. Before a doctoral student has advanced to candidacy, the second signor may be the graduate coordinator; after advancement, a second thesis committee member must also sign. The annual evaluations are distributed to the student and kept in the student's file in the department office. They form the basis for decisions about continued financial support, academic probation and/or dismissal, extensions of financial aid beyond normative time, and other matters.

Normative time to degree for the program is five years.

Applying for Graduation

Students should apply for the Ph.D. at the beginning of the term in which they will complete all degree requirements. The necessary form is called Application for the Ph.D Degree and can be found on the Division of Graduate Studies forms page.
Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing, and a strong desire to communicate science to the general public are ideal candidates for the program. All applicants must have a prior degree in science or engineering (B.S./B.A., M.S., or Ph.D.) to be eligible. Other admission requirements are: full-time research experience of at least six months duration; official Graduate Record Exam (GRE) General Test scores; and at least three references from faculty or supervisors familiar with the applicant's research and communications skills. Applications and instructions can be found online through the UCSC Graduate Division website.

Further Information

Details about the Science Communication M.S. program may be obtained from the Science Communication Program office, our website, or by sending e-mail to scicom@ucsc.edu.

Graduate Office
595 Engineering 2
(831) 459-3531

Professor Alexander Wolf, Dean

The Baskin School of Engineering (BSOE) has a high-technology focus incorporating programs and curricula that educate students to meet the changing demands of society and a high-technology global marketplace. The school offers a stimulating academic environment that provides a foundation for professional growth as well as a lifetime of learning. The Baskin School’s programs and courses prepare students for the human aspects, as well as the technical challenges, of careers in engineering, computer science, and bioinformatics. The Baskin School of Engineering includes the Department of Applied Mathematics, the Department of Biomolecular Engineering, the Department of Computational Media, the Department of Computer Science and Engineering, the Department of Electrical and Computer Engineering, and the Department of Statistics.

GRADUATE STUDY

The Baskin School of Engineering offers 17 graduate programs designed to prepare students for advanced study and research in major areas of biomolecular, computer, and electrical engineering, as well as statistics and applied mathematics:

- Applied Mathematics M.S. and Ph.D.
- Biomolecular Engineering and Bioinformatics M.S. and Ph.D.
- Computational Media M.S. and Ph.D.
- Computer Engineering M.S. and Ph.D.
- Computer Science and Engineering M.S. and Ph.D.
- Electrical and Computer Engineering M.S. and Ph.D.
- Games and Playable Media M.S.
- Human Computer Interaction M.S.
- Natural Language Processing M.S.
- Scientific Computing and Applied Mathematics M.S.
- Serious Games M.S.
- Statistical Science M.S. and Ph.D.

These programs are described in subsequent sections. The aim of these programs is to develop professionals who can address the complex scientific and technological problems of today and tomorrow.

Graduate Student Affairs Office

The Baskin School of Engineering Graduate Student Affairs/Advising Office offers general advising for prospective and current students in the School of Engineering graduate programs. The office handles general advising, financial support processing, and degree certifications. Graduate students obtain and submit all paperwork requiring departmental approval to the Graduate Student Affairs office. Students may obtain additional information and assistance on the School of Engineering Graduate Student Affairs website.

UNDERGRADUATE STUDY

Undergraduate Majors

The School of Engineering offers eight undergraduate Bachelor of Science (B.S.), three Bachelor of Arts (B.A.) and three contiguous B.S./M.S. degree programs in the following majors:

- Applied Mathematics B.S.
• Biomolecular Engineering and Bioinformatics B.S. or contiguous B.S./M.S.*
• Biotechnology B.A.
• Computer Engineering B.S. or combined B.S./M.S.
• Computer Science B.A. and B.S. or combined B.S./M.S.
• Computer Science: Computer Game Design B.S.
• Electrical Engineering B.S.
• Network and Digital Technology B.A.
• Robotics Engineering B.S.
• Technology and Information Management B.S.

*The contiguous B.S./M.S. is only available from the bioinformatics concentration in the B.S.

**Applied Mathematics.** Applied mathematics is a field of research specializing in the development and application of analytical and numerical tools and techniques toward the solution of complex quantitative problems in science and engineering. A Bachelor of Science (B.S.) in Applied Mathematics prepares graduates for careers in the industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). It can be a terminal degree, or prepare students for graduate school in applied mathematics or related fields.

**Biomolecular Engineering and Bioinformatics.** The biomolecular engineering and bioinformatics major includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations. The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology. The BINF concentration combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

**Biotechnology.** The Bachelor of Arts in Biotechnology is intended for students who plan to be involved in the biotechnology industry as writers, artists, ethicists, executives, sales force, regulators, lawyers, politicians, and other roles that require an understanding of the technology, but not the intensive training needed for technicians, research scientists, engineers, and bioinformaticians. (For those more technical roles, the biomolecular engineering and bioinformatics major or the molecular, cell, and developmental biology major is recommended.) A biotechnology student completing the program will have familiarity with several different biotechnologies and be able to apply ethical reasoning to make decisions about biotechnology in a global, economic, environmental, and societal context.

**Computer Engineering.** The computer engineering curriculum focuses on making digital systems that work. It overlaps with computer science on one end (software systems) and with electrical engineering on the other (digital hardware). The emphasis of our program is on design rather than analysis—on making things work, rather than on explaining the abstract theory of computation or electronics. The program’s emphasis on problem solving provides both excellent training for future engineers and a strong foundation for graduate study. The combined B.S./M.S. program provides an opportunity for outstanding undergraduates to begin advanced study and earn both degrees in five years.

**Computer Science.** The computer science curriculum has options that include topics in hardware and software, giving students a solid grounding in both theoretical and practical aspects of computer technology and computer usage. The bachelor of arts focus is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including many courses outside of science and engineering. The bachelor of science curriculum has a stronger concentration in the sciences, with more courses in computer science and computer engineering. Students become proficient in many areas, with a good academic foundation for various careers in the software industry, as well as preparation for graduate school.

**Computer Science: Computer Game Design.** The computer game design curriculum is a four-year interdisciplinary program that focuses on the technical, dramatic, and artistic elements of computer games. The program provides a rigorous education in computer science, in concert with a broad introduction to those aspects of art, music, narrative, digital media, and computer engineering most relevant to games. An intensive year-long game design studio sequence permits students to create substantial video games as part of a multi-student team. Students receive proficiency in many aspects of computer science, a good academic foundation for careers in the computer game industry or information technology industry, or for the pursuit of graduate studies in computer science, or computer game design.

**Electrical Engineering.** The electrical engineering curriculum provides a balance of engineering science and design and allows students to specialize in both the traditional topics and the latest subjects in electrical engineering. Students may concentrate their electives in the areas of electronics and optics, or communications, signals and systems. The major is designed to attract motivated students who, upon graduation, will be sought by employers in the high-tech industry. The electrical engineering program is accredited by The Engineering Accreditation Commission of ABET, https://www.abet.org.
Network and Digital Technology. The network and digital technology B.A. program provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes which make these technologies function. The program, through its flexible requirements, is especially tailored to students who wish to combine technology with other fields, such as through a double major or a minor, or who, through the choice of electives, wish to concentrate on the digital design or computer networks aspects of computer engineering in preparation for future employment. The network and digital technology B.A. program is offered by the Computer Science and Engineering Department.

Robotics Engineering. The robotics engineering program prepares graduates for rewarding careers at the interfaces between electrical, computer, and mechanical engineering. UCSC robotics engineering graduates will have a thorough grounding in the principles and practices of robotics and control, and the scientific and mathematical principles upon which they are built; graduates will be prepared for further education (both formal and informal) and for productive employment in industry.

Technology and Information Management. The technology and information management (TIM) curriculum is multidisciplinary and focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology (IT) solutions will be applied—through economics, business, and management of technology courses. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology.

Undergraduate Minors

Undergraduate students may choose from the following nine minor options:

Applied Mathematics. The applied mathematics minor is available to students who wish to develop 1) proficiency in modeling real-life problems using mathematics and 2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Assistive Technology. The guiding principle of the assistive technology minor is robotic assistance for people with movement disabilities, which can include such concepts as motorized prostheses, exosuits, motorized wheelchairs, or follow-me luggage.

Bioelectronics and Biophotonics. The bioelectronics and biophotonics minor is primarily focused on electronics and photonics from devices to systems required for interfacing biology with electronics from sensors to actuators and diagnostics.

Bioinformatics. The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics.

Computer Engineering. The computer engineering minor provides a solid foundation in digital hardware, electronics, and computer software, as well as the prerequisite material in mathematics and physics. The minor is well-suited to students who wish to take part in the design of computer and embedded systems in any discipline.

Computer Science. The computer science minor is available for students whose primary interest is in another area, and are interested in the applications of computer science in other areas of study, from art and music to business and science.

Electrical Engineering. The electrical engineering minor provides a solid foundation in the core areas of electronic circuits and signals and systems, as well as the prerequisite material in mathematics and physics. Concentration of upper-division electives in either of the major tracks constitutes substantial and focused work in the discipline of electrical engineering. This minor is particularly suitable for students with majors in applied physics or any School of Engineering major.

Statistics. The statistics minor is available for students who wish to gain a quantitative understanding of how to a) measure uncertainty, and b) make good decisions on the basis of incomplete or imperfect information and apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

Technology and Information Management. The technology and information management minor provides undergraduates in the School of Engineering as well in other programs and divisions in the university, such as economics and business management economics, the physical and biological sciences, and arts, the opportunity to expand the breadth of their knowledge and training to include the management of information systems and the management of technology.

UNDERGRADUATE ADVISING OFFICE

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major
declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Students may obtain additional information and assistance on the School of Engineering undergraduate advising website.

ADMISSION TO SCHOOL OF ENGINEERING MAJORS

High School Preparation for Engineering Students

It is recommended that high school students intending to apply to a School of Engineering major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare students for these majors.

College Board Advanced Placement Credit

Prospective students are encouraged to take the College Board Advanced Placement (AP) and International Baccalaureate (IBH) Examinations as acceptable scores on these examinations may satisfy both university or major degree requirements. Prospective engineering students should consider taking examinations in computer science, mathematics, economics, chemistry, physics, or biology. Students must provide official examination scores to the UCSC Office of Admissions to be granted credit toward course prerequisites or degree requirements. The following AP and IBH scores are accepted for course credit requirements as follows:
<table>
<thead>
<tr>
<th>CEEB AP Exam</th>

*Students who earn AP course credit for Physics 5A or 6A and Physics 5C or 6C who are pursuing School of Engineering majors that require physics, will need to take the associated laboratories once at UC Santa Cruz to satisfy major requirements. For specific lab course to take, students should refer to the specific major's list of requirements which can be found on the curriculum chart for their major.

Students may check with the Office of Admissions for details about other AP and IBH examinations that also satisfy university requirements.

Admission as First-Year Students

Students interested in pursuing a School of Engineering major should indicate the major as their first or second choice on the UC application for admission. Students who do not indicate this on their application will NOT be allowed to declare the computer science major. Students must be admitted as proposed computer science majors in order to declare the major.

PROPOSED MAJOR RETENTION

A proposed engineering major status carries several benefits including being connected to advising, receiving pertinent communication, and priority access to enrolling in some required major courses. The School of Engineering majors require students to be listed as a proposed major in one of the following majors in order to declare: biomolecular engineering and bioinformatics, computer engineering, computer science: computer game design, computer science (B.A. and B.S.), electrical engineering, robotics or technology and information management.

Students who earn AP course credit for Physics 5A or 6A and Physics 5C or 6C who are pursuing School of Engineering majors that require physics, will need to take the associated laboratories once at UC Santa Cruz to satisfy major requirements. For specific lab course to take, students should refer to the specific major's list of requirements which can be found on the curriculum chart for their major.

Students who are interested in computer science who are NOT listed as proposed computer science majors will not be allowed to migrate into the major. Students must properly list computer science as their proposed major.

Students pursuing network and digital technology and biotechnology are not required to be proposed in any BSOE majors in order to declare network and digital technology and biotechnology.

Students in their fourth quarter or beyond who would like to become a proposed major, or students who are proposed and would like to retain their proposed status, must have passed MATH 19A or MATH 20A, and two additional BSOE classes from the following list within their first three quarters: CHEM 1A, CHEM 1B, CSE 12, ECE 13 or CSE 13S, CSE 16, CSE 30, MATH 19B, MATH 20B, PHYS 5A, PHYS 5C, TIM 50, or TIM 58.

Students who are in an engineering proposed major and who do not meet these criteria will be removed from their proposed major. Students who want to change to an engineering proposed major must also meet these criteria. Students that do not meet these criteria can appeal this decision within 15 days of notification. Within 15 days of receipt of the appeal, the student will receive the appeal decision. More information about the appeals process can be found on the Undergraduate Advising website.

DECLARING A SCHOOL OF ENGINEERING MAJOR

The School of Engineering major declaration process can be found on the BSOE Undergraduate Advising Declare Your Major page. Students should start the declaration of the major process as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). Major qualification criteria for BSOE majors are specified on the BSOE Undergraduate Advising Major Qualification Requirements page.
Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses. Major declaration petitions must be submitted by the sixth quarter of study at UC Santa Cruz (second regular quarter for students admitted with upper-division standing), including students petitioning to declare a BSOE major as their second major.

**Appeal Process**

Students who are informed that they are not eligible to declare the major may appeal this decision within 15 days of notification by following the steps on the BSOE Undergraduate Advising Major Declaration Appeal site. In most cases, within 15 days of receipt of the appeal, the student will receive the appeal decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising Office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

**JUNIOR TRANSFER ACCEPTANCE TO MAJORS**

The School of Engineering strongly encourages applications from transfer students. Due to the prerequisite structure for upper-division courses, prospective transfer students should have completed as many of the lower-division major requirements as possible to complete the degree within a reasonable time. Students must plan carefully because many courses must be taken sequentially.

Students are encouraged to follow the new UC Transfer Pathways. Any student who finishes the UC Transfer Pathways courses for computer science will more than satisfy the admission requirements for transfer to computer science, computer engineering, robotics, and network and digital technology. Any student who finishes the UC Transfer Pathways courses for electrical engineering will more than satisfy the admission requirements for electrical engineering, computer engineering, and robotics. Note that each department will have different GPA requirements for these courses.

Completion of mathematics and engineering courses is essential for transfer students; those applying to selective majors should carefully verify the admission requirements for their major.

Students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from the School of Engineering must indicate a School of Engineering major as their first choice on their UC application.

Acceptance into the major is based on the student’s academic college record and preparation for the major. Applicants are encouraged to take and excel in as many courses that are equivalent to the department’s lower-division major requirements as possible. For many School of Engineering majors, this includes completion of a year of calculus (accepted as equivalent to Mathematics 19A-B), linear algebra, differential equations, a year of calculus-based physics courses (accepted as equivalent to Physics 5A, 5B, 5C), and two programming courses are strongly recommended.

**LETTER GRADE POLICY**

Starting fall 2014, all students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade.

**ETHICS REQUIREMENT**

Graduates of the Baskin School of Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available on the IEEE and ACM websites. Students of the Baskin School of Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

**SUBSTITUTIONS FOR COURSES TAKEN AT UCSC**

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the undergraduate advising office and on the Undergraduate Affairs Forms, Petitions, and Policies page.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

**COURSE EQUIVALENCIES AND SUBSTITUTIONS TAKEN AT AN OUTSIDE INSTITUTION**

Once enrolled in the School of Engineering continuing students must have permission to take courses at another institution to apply toward their School of Engineering major or minor requirements.
Community Colleges

Once enrolled in the School of Engineering students who wish to take a course at a California community college must first check Assist.org to see if the course is equivalent at UC Santa Cruz. If the course is not listed on Assist.org, students must submit a course substitution petition to the BSOE Undergraduate Advising Office to have it reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better.

If the course is approved for equivalency or was on Assist.org, then the student must also receive approval by their major department to take the class at the community college PRIOR to taking it. Forms and procedures for approval can be obtained from and submitted to the BSOE Undergraduate Advising Office.

Four-Year Institutions and the UC Education Abroad Program (UCEAP)

Students who intend to take a course at a four-year institution or UC Education Abroad, must submit a Course Substitution Petition to the BSOE Undergraduate Advising Office to have the course reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better.

If the course is approved for equivalency, then the student must also receive approval by their major department PRIOR to taking the class. Forms and procedures for approval can be obtained from and submitted to the BSOE Undergraduate Advising Office.

COMPUTING

Personal Computer Requirement

The Baskin School of Engineering (BSOE) requires that all BSOE students own a laptop. A MAC or PC from the last several years is generally acceptable. The exact minimum specifications appear on the Undergraduate Advising website.

Computing Facilities

The Baskin School of Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec. All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access the School of Engineering and the Information Technology Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see the ITS website.

PREREQUISITES

Because of the sequential nature of the School of Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly Schedule of Classes. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite, but is not listed in current articulation agreements, should promptly consult with the School of Engineering’s staff advisers for guidance. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See Course Equivalencies and Substitutions Taken at an Outside Institution above.)

PERMISSION NUMBERS

Students not meeting the regular prerequisite requirements for courses sponsored by the Baskin School of Engineering may petition the course instructor to receive a permission number to enroll. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no instructor has been assigned to the course, please contact the Undergraduate Advising Office for direction. The Computer Science and Engineering Department requires that students wait until the first day of instruction to contact instructors about enrolling in their courses.

FEES

Materials Fee

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student
will assemble into a project and keep. Please refer to the Baskin Engineering Laboratory Support web page for specific course material-fee amounts.

**Miscellaneous Fees**

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information.

**Applied Mathematics**

Scientific Computing and Applied Mathematics M.S. (p. 428)  
Scientific Computing Designated Emphasis (p. 430)

**APPLIED MATHEMATICS B.S.**

**Information and Policies**

**Introduction**

Applied mathematics is a field of research specializing in the development and application of analytical and numerical tools and techniques toward the solution of complex quantitative problems in science and engineering. A Bachelor of Science (B.S.) in Applied Mathematics prepares graduates for careers in the industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). It can be a terminal degree, or prepare students for graduate school in applied mathematics or related fields.

**GRADUATE PROGRAM**

The Department of Applied Mathematics offers master's and doctoral programs in applied mathematics, as well as a master's program in scientific computing and applied mathematics, and a designated emphasis in scientific computing.

The goal of the Applied Mathematics graduate program is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The Master of Science (M.S.) degree may be used as a terminal degree or as the first step toward the associated Doctor of Philosophy degree (Ph.D.).

The goal of the SciCAM M.S. program is primarily to prepare students interested in scientific computing for productive careers in industry. However, it also serves as excellent preparation for students who prefer to pursue an academic career and wish to transfer into a Ph.D. program later, either in scientific computing/applied mathematics, or in a field related to their undergraduate degree.

**UNDERGRADUATE PROGRAM**

The Department of Applied Mathematics offers a bachelor of science degree in applied mathematics. The goal of the program is to prepare students for careers in the industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). It can be a terminal degree, or prepare students for graduate school in applied mathematics or related fields.

Applied mathematics major at UC Santa Cruz provides students with a holistic training in mathematical modeling. The core of the degree program includes six courses that introduce modern analytical (and semi-analytical) techniques as well as general aspects of scientific computing. Students gain further depth or breadth by taking three (or more) electives among a large list of upper-division or graduate courses offered by applied mathematics faculty or in related subject areas. Finally, students learn to apply the techniques and tools learned through two capstone courses that focus on modeling “real-life” quantitative problems in science and engineering. In these courses, students also learn additional skills such as mathematical abstraction, critical thinking, and disciplinary communication.
The major has been designed to allow students to easily pursue an additional minor or major in an area of applications of mathematics (such as physics, astrophysics, Earth sciences, computer sciences, computer engineering, electrical engineering), and/or to pursue the 4+1 pathway into the Master of Science (M.S.) degree program in Scientific Computing and Applied Mathematics also offered by the Department of Applied Mathematics.

Academic Advising for the Program

The Baskin School of Engineering (BSOE) Undergraduate Advising Office is located in the Baskin Engineering Building, Room 225. It can be contacted by email at bsoeadvising@ucsc.edu or at the Undergraduate Advising website.

Transfer students to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

Getting Started in the Major

It is recommended that high school students intending to apply to this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at another institution also serve to properly prepare students for these majors.

Program Learning Outcomes

Recipients of a B.S. degree in applied mathematics at UC Santa Cruz are expected to have the following skills and experiences:

1. To be able to take a real-life science or engineering problem, and create a mathematical model for it, under the supervision of a professor.
2. To be competent with a number of analytical methods for the solution of linear algebra problems, as well as ordinary and partial differential equations.
3. To be competent with constructing numerical algorithms for the solution of linear algebra problems and ordinary differential equations.
4. To be competent in at least two scientific computing languages such as: Fortran, C, Python, R, Matlab, etc. and to be familiar with other computational elements such as Unix-type operating systems, the use of compilers, professional scientific computing libraries, efficient IO algorithms, data visualization tools, etc.
5. To be able to analyze critically the results from the model obtained, and identify when the model is inappropriate.

6. To be able to communicate clearly and coherently with professionals (orally and/or in writing), in order to: (1) understand what is needed of the mathematical model prior to the investigation; and (2) report on the results of the model after the investigation.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the applied mathematics major, students must be listed as a proposed major within the School of Engineering or within the Division of Physical and Biological Sciences. Please refer to Prepare to Declare a BSOE Major.

Transfers to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

In addition to being listed as a proposed School of Engineering or Physical and Biological Sciences major, admission to the applied mathematics major is based on passing the following foundational courses:

Foundation Courses

One of the following series:

Either these courses

- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

or these courses

- MATH 20A Honors Calculus 5
- MATH 20B Honors Calculus 5

Plus these courses:

- AM 30 Multivariate Calculus for Engineers 5
- CSE 16 Applied Discrete Mathematics 5

Plus one of the following:

- AM 10 Mathematical Methods for Engineers I 5
- MATH 21 Linear Algebra 5

Plus one of the following:

- AM 20 Mathematical Methods for Engineers II 5
- MATH 24 Ordinary Differential Equations 5

Appeal Process

Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Advising office, addressed to the
How to Declare a Major

There are four steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Students should start the declaration of major process by completing Step One on the BSOE "Declare Your Major" website as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to the applied mathematics major, incoming transfer students should complete the following courses:

**All of the following courses:**
- AM 10: Mathematical Methods for Engineers I 5
- AM 20: Mathematical Methods for Engineers II 5
- AM 30: Multivariate Calculus for Engineers 5
- CSE 16: Applied Discrete Mathematics 5

**Plus one of the following options:**

Either these courses:
- MATH 19A: Calculus for Science, Engineering, and Mathematics 5
- MATH 19B: Calculus for Science, Engineering, and Mathematics 5

or these courses:
- MATH 20A: Honors Calculus 5
- MATH 20B: Honors Calculus 5

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

The Baskin School of Engineering requires letter grades for all courses in an engineering major.

[Optional Catchall]

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement. Petition forms are available at the undergraduate advising office and on the SoE advising website.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Major Policy

Students who are planning a double-major with physics can replace the AM 100, AM 112 and STAT 131 (or CSE 107) courses with the PHYS 116A, PHYS 116B, and PHYS 116C series. Special approval by both undergraduate directors will be required to do so.

Education Abroad Program (EAP)

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major."

The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

School of Engineering Policies

Please refer to the School of Engineering's Admission to School of Engineering Majors section of the catalog for additional policies that apply to all School of Engineering programs. These policies include admission to the major and the need for students to obtain preapproval before taking courses elsewhere.

Requirements and Planners

Course Requirements

Course requirements are divided into foundational lower-division courses and advanced upper-division courses:

Lower-Division Courses

Choose one of the following series:

Either these courses
MATH 19A  Calculus for Science, Engineering, and Mathematics  5
MATH 19B  Calculus for Science, Engineering, and Mathematics  5

or these courses
MATH 20A  Honors Calculus  5
MATH 20B  Honors Calculus  5

Credit for one or both MATH 19A and MATH 19B may be granted with adequate performance on the CEEB calculus AB or BC Advanced Placement examinations.

Plus one of the following courses:
AM 10  Mathematical Methods for Engineers I  5
MATH 21  Linear Algebra  5

AM 10 is preferred.

Plus one of the following courses:
AM 20  Mathematical Methods for Engineers II  5
MATH 24  Ordinary Differential Equations  5

AM 20 is preferred.

Plus one of the following options:
AM 30  Multivariate Calculus for Engineers  5

or these courses
MATH 23A  Vector Calculus  5
MATH 23B  Vector Calculus  5

AM 30 is preferred.

Plus the following course:
CSE 16  Applied Discrete Mathematics  5

Plus one of the following programming courses
CSE 20  Beginning Programming in Python  5
CSE 13S  Computer Systems and C Programming  7
ECE 13  Computer Systems and C Programming  7

The programming requirement can be satisfied if students have a prior programming course, AP credit, or clearing the “Test-out” bar.

Lower-Division Electives

Students are required to take two lower-division electives from the following list, in preparation for the upper-division electives they are later required to take. Students are encouraged to plan ahead carefully in consultation with undergraduate advising in making their selection.

EART, ECE, PHYS lower-division electives

Students interested in EART, ECE, PHYS upper-division electives should consider taking some of the following PHYS lower-division electives:

PHYS 5A  Introduction to Physics I  5
PHYS 5B  Introduction to Physics II  5
PHYS 5C  Introduction to Physics III  5
PHYS 6A  Introductory Physics I  5
PHYS 6B  Introductory Physics II  5
PHYS 6C  Introductory Physics III  5

Only one course out of PHYS 5A and PHYS 6A, one course out of PHYS 5B and PHYS 6B, and one course out of PHYS 5C and PHYS 6C can be taken. Several of these courses have corequisite lab courses.

CSE or ECE lower-division electives

Students interested in CSE or ECE upper-division electives should consider taking some of the following CSE or ECE lower-division electives (in addition to possible PHYS electives):

CSE 30  Programming Abstractions: Python  7
ECE 9  Statics and Mechanics of Materials  5

ECON lower-division electives

Students interested in ECON upper-division electives should consider taking some of the following ECON or STAT lower-division electives:

ECON 1  Introductory Microeconomics: Resource Allocation and Market Structure  5
ECON 2  Introductory Macroeconomics: Aggregate Economic Activity  5
STAT 5  Statistics  5

Lower-division electives for mathematical biology

Students interested in mathematical biology (in particular AM 115) should consider taking some of the following BIOL or BIOE lower-division electives:

BIOL 20A  Cell and Molecular Biology  5
BIOL 20C  Ecology and Evolution  5

Upper-Division Courses

Complete the following core courses:
AM 100  Mathematical Methods for Engineers  5
AM 129  Foundations of Scientific Computing for Scientists and Engineers  5
AM 147  Computational Methods and Applications  5
Plus one of the following courses:
AM 112  Introduction to Partial Differential Equations  5
AM 212A  Applied Partial Differential Equations  5

Plus one of the following courses:
AM 114  Introduction to Dynamical Systems  5
AM 214  Applied Dynamical Systems  5

Plus one of the following courses:
STAT 131  Introduction to Probability Theory  5
CSE 107  Probability and Statistics for Engineers  5

Students who intend to pursue an M.S. degree in scientific computing and applied mathematics later are strongly encouraged to take the AM 212A and AM 214 options instead of AM 112 and AM 114.

Upper-Division Electives
Students are required to take three upper-division elective courses from the following list of possible electives. Note that many of these electives have lower-division prerequisites. Students should plan carefully which ones to take to ensure they are prepared for their selected upper-division electives. Also note that enrollment in the graduate courses is by permission of the instructor, who will verify adequate preparation.

Possible AM Electives
Any 5-credit upper-division AM course that is not already a core course. Any 5-credit graduate AM course with the exception of AM 200, AM 211, AM 212A and AM 214.

Possible CSE Electives
Note that many require lower-division CSE courses. Lecture-lab combinations count as one course.
CSE 101  Introduction to Data Structures and Algorithms  5
CSE 102  Introduction to Analysis of Algorithms  5
CSE 106  Applied Graph Theory and Algorithms  5
CSE 140  Artificial Intelligence  5
CSE 142  Machine Learning  5
CSE 144  Applied Machine Learning  5
CSE 160  Introduction to Computer Graphics  5
CSE 160L  Introduction to Computer Graphics Laboratory  2
CSE 161  Introduction to Data Visualization  5
CSE 161L  Data Visualization Laboratory  2
CSE 162  Advanced Computer Graphics and Animation  5
CSE 162L  Advanced Computer Graphics and Animation Laboratory  2

Note that most of these courses require CSE 101 as prerequisite and that enrollment restrictions vary and might apply to any of the CSE courses listed here on short notice. CSE 101, CSE 102, CSE 140, CSE 142, CSE 144 are courses for which enrollment restrictions may apply, and that may only be appropriate for double-majors (or major-minor combinations). CSE 162 & CSE 162L is a course that has more than one upper-division prerequisite beyond those that are already part of the core requirements. This course may only be appropriate for double-majors (or major-minor combinations).

Possible EART Electives
Note that many require lower-division PHYS or CHEM courses:
EART 124  Modeling Earth's Climate  5
EART 160  Planetary Science  5
EART 162  Planetary Interiors  5

Either of the following courses:
EART 125  Statistics and Data Analysis in the Geosciences  5
EART 225  Statistics and Data Analysis in the Geosciences  5

Either of the following courses:
EART 172  Geophysical Fluid Dynamics  5
EART 272  Geophysical Fluid Dynamics  5

Possible ECE Electives
Lecture-lab combinations count as one course.
ECE 101  Introduction to Electronic Circuits  5
ECE 101L  Introduction to Electronic Circuits Laboratory  2
ECE 103  Signals and Systems  5
ECE 115  Introduction to Solid Mechanics  5
ECE 135  Electromagnetic Fields and Waves  5
ECE 135L  Electromagnetic Fields and Waves Laboratory  2
ECE 141  Feedback Control Systems  5
ECE 153  Digital Signal Processing  5

Note that most of these courses require ECE 101 as prerequisite. ECE 141 and ECE 153 are courses that have more than one upper-division prerequisite beyond those that are already part of the core requirements. These courses may only be appropriate for double-majors (or major-minor combinations).
Possible ECON Electives
Note that many require ECON lower-division courses:
ECON 100M Intermediate Microeconomics, Math Intensive 5
ECON 100N Intermediate Macroeconomics, Math Intensive 5
ECON 113 Introduction to Econometrics 5
ECON 166A Applications I 5
ECON 166A is a course that has more than one upper-
division prerequisite beyond those that are already part of 
the core requirements. This course may only be 
appropriate for double-majors (or major-minor 
combinations).

Possible MATH Electives
MATH 105A Real Analysis 5
MATH 110 Introduction to Number Theory 5
MATH 111A Algebra 5
MATH 111T Algebra 5
MATH 115 Graph Theory 5
MATH 116 Combinatorics 5
MATH 117 Advanced Linear Algebra 5
MATH 118 Advanced Number Theory 5
MATH 120 Coding Theory 5
MATH 134 Cryptography 5
MATH 160 Mathematical Logic I 5
Note that many MATH electives require MATH 100 as a prerequisite.

Possible OCEA Electives
Note that some require lower-division PHYS electives, or 
upper-division ESCI electives:
OCEA 260 Introductory Data Analysis in the Ocean and Earth 
Sciences 5
OCEA 286 Introduction to Ocean Modeling 5
Either of the following courses:
OCEA 100 Physical Oceanography 5
OCEA 200 Physical Oceanography 5
Either of the following courses:
OCEA 111 Climate Dynamics 5
OCEA 211 Climate Dynamics 5
Possible PHYS Electives
Note that many require lower-division PHYS courses:
PHYS 105 Mechanics 5
PHYS 110A Electricity, Magnetism, and Optics 5

Possible STAT Electives
STAT 132 Classical and Bayesian Inference 5

Disciplinary Communication (DC) Requirement
The DC requirement in the Applied Mathematics B.S. is 
satisfied by completing the capstone course AM 170A 
(see below).

Comprehensive Requirement
Students satisfy the senior comprehensive requirement by 
receiving a passing grade in the two Mathematical 
Modeling courses:
AM 170A Mathematical Modeling 1 5
AM 170B Mathematical Modeling 2 5

Planners
The following are four sample academic plans that 
students can use to plan their sequence of courses in the 
major. The first two plans are suggested guidelines for 
students who begin their studies in their frosh year. Such 
students, if they plan carefully, will have several openings 
free to take other breadth courses they find interesting, or 
pursue an additional minor or major. The other two plans 
are for students transferring to UC Santa Cruz as juniors.

Plan One: This planner is for a student entering UCSC in 
their frosh year who is prepared to go directly into 
MATH 19A or MATH 20A.
The SI general education requirement is satisfied by passing the capstone course AM 170B. The MF general education requirement is satisfied by passing any of the lower-division mathematical foundations requirements.

**Plan Two:** This planner is for a student entering UCSC their frosh year who needs to take preparatory courses prior to MATH 19A to ensure a successful outcome in this course.

**APPLIED MATHEMATICS MINOR**

The applied mathematics minor is available for students who wish to develop (1) proficiency in modeling real-life problems using mathematics and (2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

**Course Requirements**

**Lower-Division Courses**

Basic calculus sequence:
Either these courses:
- MATH 19A: Calculus for Science, Engineering, and Mathematics
- MATH 19B: Calculus for Science, Engineering, and Mathematics

or these courses:
- MATH 20A: Honors Calculus
- MATH 20B: Honors Calculus

Either these courses:
- MATH 23A: Vector Calculus
- MATH 23B: Vector Calculus

or these courses:
- AM 30: Multivariate Calculus for Engineers
- AM 100: Mathematical Methods for Engineers

Upper-Division Courses

**Complete one of the following sequences:**

Either these courses:
- AM 10: Mathematical Methods for Engineers I
- AM 20: Mathematical Methods for Engineers II

or these courses:
- MATH 21: Linear Algebra
- MATH 24: Ordinary Differential Equations

or this course:
- PHYS 116A: Mathematical Methods in Physics

**Note:** Students who complete MATH 21 and MATH 24 or PHYS 116A are strongly recommended to complete the MATLAB self-paced tutorial.

**Plus one course from each of the following categories:**

Students interested in later pursuing an M.S. degree in scientific computing and applied mathematics, or in applied mathematics, are strongly encouraged to take the graduate courses AM 212A and AM 214 instead of the undergraduate courses AM 112 and AM 114.

**Probability Theory**
- CSE 107: Probability and Statistics for Engineers
- STAT 131: Introduction to Probability Theory

**Dynamical Systems:**
- AM 114: Introduction to Dynamical Systems
- AM 214: Applied Dynamical Systems

**Introduction to Numerical Methods:**
- AM 147: Computational Methods and Applications
- PHYS 115: Computational Physics

**Partial Differential Equations:**
- AM 112: Introduction to Partial Differential Equations
- AM 212A: Applied Partial Differential Equations
- PHYS 116C: Mathematical Methods in Physics
- MATH 107: Partial Differential Equations

**Plus one applied-mathematics elective from the following list:**
- AM 107: Introduction to Fluid Dynamics
- AM 115: Stochastic Modeling in Biology
- AM 129: Foundations of Scientific Computing for Scientists and Engineers
- AM 198: Independent Study or Research
- AM 212B: Applied Mathematical Methods II
- AM 213A: Numerical Linear Algebra
- AM 213B: Numerical Methods for the Solution of Differential Equations
- AM 215: Stochastic Modeling in Biology
- AM 216: Stochastic Differential Equations
- AM 217: Introduction to Fluid Dynamics
- AM 231: Nonlinear Control Theory
- AM 232: Applied Optimal Control
- AM 250: An Introduction to High Performance Computing
- ECE 103: Signals and Systems
- ECE 115: Introduction to Solid Mechanics
- ECE 141: Feedback Control Systems
- MATH 103A: Complex Analysis
- MATH 117: Advanced Linear Algebra
- MATH 121A: Differential Geometry
- PHYS 105: Mechanics
- PHYS 139A: Quantum Mechanics I
- PHYS 139B: Quantum Mechanics II
- PHYS 171: General Relativity, Black Holes, and Cosmology
Students may also propose other electives which use applied mathematical methods, subject to approval by the department.

SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

4+1 CONTIGUOUS PATHWAY LEADING TO THE SCICAM M.S.

Degree

The 4+1 pathway into the SciCAM M.S. program is an option that allows undergraduates at UC Santa Cruz to (1) take the SciCAM foundational courses during their undergraduate degree in preparation to join the 1-year track of the SciCAM program, and (2) apply to SciCAM through a streamlined application process. Undergraduate students currently enrolled in approved programs (currently, the B.S. in applied mathematics, the B.A. in mathematics, the B.S. in computer science, the B.S. in robotics engineering, the B.S. in physics, the B.S. in applied physics and the B.S. in physics [astrophysics]) have the opportunity, any time between the start of their junior year and the end of the fall quarter of their senior year, to join the 4+1 contiguous pathway leading to the SciCAM degree program. Qualified undergraduates from other undergraduate majors may also apply to the pathway and their applications will be considered on a case by case basis.

Admission Requirements

The requirements for admission into the 4+1 pathway are (1) a cumulative GPA of 3.3 or more, and (2) to have taken, or to have a plan to take, at least two of the three SciCAM foundational courses before the end of their senior year. Note that some of the foundational courses are waived depending on the student’s major. Interested students should set up a meeting with the SciCAM adviser to discuss their curriculum plan and fill the application form. The ultimate deadline for application to the pathway is the end of the fall quarter of the senior year, although students are encouraged to apply significantly earlier, ideally at the same time as their major declaration.

Students in the pathway who apply to SciCAM through the streamlined application process are not guaranteed admission, although we do expect to admit anyone who has passed all the foundational courses and has maintained a GPA of 3.3 or more. Once accepted into the SciCAM program, students from the pathway will follow the same requirements as any other students in the one-year track with anticipated graduation in June of their 5th year for Plan II (comprehensive exam track) students, and the end of the summer of their fifth year for Plan I (thesis track) students. Note that while students would normally begin their M.S. year in the fall quarter, a winter start is possible for students with anticipated B.S. graduation in the fall. This is considered on a case-by-case basis only. Winter-start students then graduate from the M.S. at the end of the calendar year.

Relationship of SciCAM Masters program and AM Doctoral Program

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the AM Ph.D. program. Applications are reviewed in the standard academic cycle, so that students interested in applying to the AM Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year.

Transfer Credit

Up to three UCSC courses (15 credits) fulfilling the degree requirements of the SciCAM degree may be taken before beginning the graduate program. However, students will still need to take courses totaling 35 credits as graduate students to satisfy university requirements. Note that this limit does not apply to the foundational requirements, which may all be taken prior to the start of the SciCAM program without penalty.

Up to one course from other institutions may be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Review of Progress

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress).

APPLIED MATHEMATICS M.S.

Introduction

Graduate studies in applied mathematics (AM) at UC Santa Cruz focus on developing skillsets in mathematical modeling, analysis, and scientific computation applied to a broad range of science and engineering disciplines, including fluid mechanics, mathematical biology, dynamical systems, stochastic processes, control, and optimization. The overarching goal of the AM graduate programs at UCSC is to underscore the application of
This is a Plan II capstone M.S. program.

**Requirements**

**Course Requirements**

**Core Courses**

All AM M.S. students must complete the following core courses. All non-seminar core courses must be taken for letter grades.

**Elective Courses**

In addition to these 22 credits, M.S. students must complete four additional 5-credit courses for a total requirement of 42 credits. As part of the four additional courses, students are required to take (at least) one elective course (first-year elective) during their first year. First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. They must be taken during the first year, and must be selected from the following list, with approval from the student's official advisor:

<table>

**M.S. Project Requirements**

A capstone project is required for the M.S. degree.

For the M.S. degree, students will conduct a capstone research project. Students must submit a proposal to the potential faculty sponsor. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the project. The project will involve the solution of a problem or problems from the selected area of application. When the project is completed and written, it will be submitted to and must be accepted by a committee of two ladder-rank faculty members, consisting of the faculty adviser and one additional reader. At least one of these core two readers must be from within the Applied Mathematics Department. Additional readers will be chosen appropriately from within the Applied Mathematics Department or outside of it. Either the adviser or the additional reader must be from within the Applied Mathematics Department.

**Relationship of AM Master’s Program and AM Doctoral Program**

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may request to transfer into the Ph.D. program (provided they pass the pre-qualifying examination), and students in the Ph.D. program can receive a non-terminal M.S. degree upon completion of M.S. requirements, including the capstone research project.

**Transfer Credit**

Up to three School of Engineering courses (15 credits) fulfilling the degree requirements of the M.S. degree may be taken during students' undergraduate study at UC Santa Cruz. Courses from other institutions may not be applied to the M.S. degree course requirements.

Petitions should be submitted along with the transcript from their UC Santa Cruz undergraduate study. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz. At most, a total of three courses may be transferred.

Students who complete the M.S. degree in AM at UC Santa Cruz and continue on to the Ph.D. program in AM at UCSC can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by the UCSC Graduate Division.
Foreign Language Requirements

Review of Progress

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

Applying for Graduation

All candidates for a degree must submit an application for the M.S. degree to the Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered during the quarter in which the degree is conferred. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

APPLIED MATHEMATICS PH.D.

Introduction

Graduate studies in applied mathematics (AM) at UC Santa Cruz focus on developing skillsets in mathematical modeling, analysis, and scientific computation applied to a broad range of science and engineering disciplines, including fluid mechanics, mathematical biology, dynamical systems, stochastic processes, control, and optimization. The overarching goal of the AM graduate programs at UCSC is to underscore the application of mathematics in solving real-life problems. In particular, the doctor of philosophy (Ph.D.) program prepares the students with the foundational tools of applied mathematics, enabling them to perform independent research that transcends the disciplinary boundaries in science and engineering.

Advancement to Candidacy

Course Requirements

Foundational Courses

Students in the AM Ph.D. program must demonstrate mastery in the foundations of scientific computing and applied mathematics, either by producing evidence through undergraduate transcripts or by taking all of the following foundational courses upon entry to the Ph.D. program, or a combination of the two, by the end of their first year:

All of the following three courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM 129</td>
<td>Foundations of Scientific Computing for Scientists and Engineers</td>
<td>5</td>
</tr>
</tbody>
</table>

Core Courses

All AM Ph.D. students must complete the following core courses (non-seminar). All non-seminar core courses must be taken for letter grades. The AM 280 seminar series (i.e., AM 280A, AM 280B, and AM 280C) needs to be taken at least three times in a combination of the three courses. The combination must include at least one time of AM 280B.

<table>

</tr>
<tr>
<td>AM 280C</td>
<td>Seminar in Geophysical and Astrophysical Fluid Dynamics</td>
<td>2</td>
</tr>
</tbody>
</table>

Elective Courses

In addition to these 26 credits, Ph.D. students must complete six additional 5-credit courses for a total requirement of 56 credits. As part of the six additional courses, students are required to take (at least) one elective course (first-year elective) during their first year to help them engage in research as early as possible. First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. These electives can be selected from any 5-credit AM graduate courses (level 200 or above), with approval from the student's official advisor.

Ph.D. students who already have an M.S. degree (or equivalent) will be allowed to substitute up to two elective courses with corresponding numbers of credits of independent study (i.e., 5 or 10), during which they conduct research with their advisor toward their advancement to candidacy.

All elective courses, including the AM courses and non-AM courses, must be approved by the student's official advisor or the graduate director.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the Ph.D. degree may be taken during students' undergraduate study at UC Santa Cruz. Ph.D. students who have previously earned an M.S. degree in a related field at another institution may substitute courses from their previous university with the approval of the advisor and the graduate committee.
Petitions should be submitted along with the transcript from the other institution or from their UCSC undergraduate study. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC. At most, a total of three courses may be transferred.

Students who complete at UCSC the M.S. degree in AM or the M.S. degree in Scientific Computing and Applied Mathematics (SciCAM) and continue on to the Ph.D. program in AM at UCSC can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by the UCSC Graduate Division.

Foreign Language Requirements

Teaching Requirement

Ph.D. students will be required to serve as teaching assistants for at least two quarters during their graduate study. Certain exceptions may be permitted for those with extensive prior teaching experience, for those who are not allowed to be employed due to visa regulations, or for other reasons approved by the graduate director.

Ph.D. students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) exam or the International English Language Testing System (IELTS) exam and score a minimum of 26 on the spoken portion of the Internet-based TOEFL or an overall 8 on the IELTS before being considered for a position of teaching assistant. The English-language requirement for teaching assistants is waived for students who have received a degree from an English-speaking institution or have lived in the United States for more than four years. International students may also participate in the Graduate Preparation Program (GPP) prior to starting the graduate program. Successful completion of the GPP satisfies the English-language requirement for teaching assistants.

Pre-Qualifying Requirements

At the end of the first year, all Ph.D. students will take a pre-qualifying examination covering the (non-seminar) core courses. This examination is a take-home project involving analysis, simulations, and writing a formal written report. Ph.D. students who do not pass this examination will be allowed to retake it before the start of the following fall quarter; if they fail the second examination they will not be allowed to continue in the Ph.D. program but will have the option to continue into the M.S. program and exit with the M.S. as the terminal degree.

After passing the pre-qualifying examination, a Ph.D. student must form an advisory committee by the end of the fall quarter of the student's second year. The advisory committee consists of two or more ladder-rank faculty members and must include one ladder-rank faculty from within the Applied Mathematics Department. The student shall meet with the advisory committee annually until the advancement.

Qualifying Examination

Ph.D. students must complete the oral proposal defense, through which they advance to candidacy, by the end of the spring quarter of their third year. The proposal defense is a public seminar followed by an oral qualifying examination given by the qualifying committee. The student's oral presentation must be approximately 45 minutes in length. Applied mathematics students will also be required to submit a substantial written document to the qualifying examination committee, describing their research to date as well as their Ph.D. proposal ahead of time.

Students will advance to candidacy after they have completed all course requirements (including removal of all incomplete grades), passed the pre-qualifying examination and the qualifying examination, nominated their dissertation reading committee, and paid the advancement to candidacy fee. Under normal progress, a student will advance to candidacy by the end of the spring quarter of the student's third year. A student who has not advanced to candidacy by the start of the fourth year will be subject to academic probation.

Dissertation

Upon successful completion of the qualifying examination, a dissertation reading committee will be formed, consisting of the dissertation supervisor and at least two additional readers appointed by the graduate director upon recommendation of the dissertation supervisor. At least one of these additional readers must be a ladder-rank faculty in the Applied Mathematics Department. The committee is subject to the approval of the Graduate Division. The third reader is to be a ladder-rank UC Santa Cruz faculty or a recognized expert in the student's research area with credentials equivalent to a ladder-rank UCSC faculty member as judged by the Graduate Director and the Dean of Graduate Studies. At least two members of the committee must be AM faculty.

Post-Qualifying Requirements

After the advancement, a Ph.D. student shall meet with the dissertation committee annually to present and discuss progress made, and receive comments/suggestions from committee members.

Relationship of AM Master's Program and AM Doctoral Program

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either program. Students completing the M.S. program may request to transfer into the Ph.D. program (provided they pass the pre-qualifying examination), and students in the Ph.D. program can receive a non-terminal M.S. degree upon completion of M.S. requirements, including the capstone research project. Each Ph.D. student will be
required to have knowledge of applied mathematics equivalent to that required for the M.S. degree. In addition, Ph.D. candidates will be required to complete coursework beyond the M.S. level.

Dissertation

A dissertation is required for the Ph.D. degree. The dissertation will consist of a minimum of three chapters composed of material suitable for submission and publication in major professional journals in applied mathematics (or related subject areas of application).

Dissertation Defense

The completed dissertation will be submitted to the reading committee at least one month before the dissertation defense, which consists of a public presentation of the research followed by a private examination by the reading committee. Successful completion of the dissertation defense is the final requirement for the Ph.D. degree.

Academic Progress

Each year, the faculty reviews the progress of every student in the graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

Applying for Graduation

All candidates for a degree must submit an application for the Ph.D. degree to the Graduate Advising Office by the date stated in the Academic and Administrative Calendar for the quarter you wish to receive the degree. Failure to declare candidacy by the deadline means that you cannot be considered a candidate until the next term.

A student is required to be registered or on Filing Fee Status, whichever is applicable, during the quarter in which the degree is conferred. Students should consult the department advisor to determine which option fits their situation. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS M.S.

Introduction

The Department of Applied Mathematics offers an M.S. program in Scientific Computing and Applied Mathematics (SciCAM). SciCAM students learn a combination of cutting-edge computational methods for modern high-performance computing architectures and applied mathematical modeling. The SciCAM M.S. degree is ideal for meeting the increasing need for graduates in the rapidly growing markets of computational mathematics and modeling and high-performance computing. Such computationally knowledgeable and experienced modelers are highly sought after in industry and government agencies.

Requirements

Course Requirements

Foundational Courses

Students in the SciCAM program must also demonstrate mastery in the foundations of scientific computing and applied mathematics, either by producing evidence through undergraduate transcripts or by taking some or all of the following foundational courses upon entry to the M.S. program:

All of the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM 129</td>
<td>Foundations of Scientific Computing for Scientists and Engineers</td>
<td>5</td>
</tr>
<tr>
<td>AM 100</td>
<td>Mathematical Methods for Engineers</td>
<td>5</td>
</tr>
<tr>
<td>AM 147</td>
<td>Computational Methods and Applications</td>
<td>5</td>
</tr>
</tbody>
</table>

Core Courses

All SciCAM M.S. students are required to take the core courses listed below.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM 212A</td>
<td>Applied Partial Differential Equations</td>
<td>5</td>
</tr>
<tr>
<td>AM 213A</td>
<td>Numerical Linear Algebra</td>
<td>5</td>
</tr>
<tr>
<td>AM 213B</td>
<td>Numerical Methods for the Solution of Differential Equations</td>
<td>5</td>
</tr>
<tr>
<td>AM 214</td>
<td>Applied Dynamical Systems</td>
<td>5</td>
</tr>
<tr>
<td>AM 250</td>
<td>An Introduction to High Performance Computing</td>
<td>5</td>
</tr>
</tbody>
</table>

All non-seminar core courses must be taken for letter grades.

Electives

Any 5-credit AM graduate courses (200 or above) not already listed as a core course can be counted as electives with approval from the student's official advisor or the graduate director. Also, elective courses outside of AM must be approved by the student's official advisor or the graduate director.

Note that some upper-division electives are allowed, bearing in mind that no more than a total of 15 credits of upper-division courses may be used to satisfy the degree requirements.
Other Requirements

Students in the SciCAM program may pursue either a Plan I thesis or Plan II capstone (comprehensive examination) curriculum.

- Candidates for a Plan I thesis must complete one elective and take a minimum of two-quarters of independent study to write a thesis. The thesis requirements are as follows. Students must submit a thesis proposal to the potential faculty sponsor before completion of all core courses. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the thesis project. The project will involve the solution of a problem or problems from the selected area of application. The thesis must consist of at least 30 pages and no more than 60 pages of printed written work and accompanying pertinent figures, consisting of a coherent introduction and presentation of the current state of the field, a clear presentation of the questions raised, of the methodology used to solve them, and a discussion of the results obtained. The thesis will be read by a committee of three ladder-rank faculty members, consisting of the faculty advisor and two additional readers. Additional readers will be chosen appropriately from within the Applied Mathematics Department or outside of it. At least two members of the reading committee must be from within the Applied Mathematics Department. The student will then be required to give a short (20-minute) public oral presentation of their thesis, which will be evaluated by the reading committee. The reading committee will assess the quality of both written work and oral presentation in making their recommendation for awarding the SciCAM M.S. degree to the student.

- Candidates for a Plan II capstone (comprehensive examination) must complete three electives and pass the SciCAM comprehensive examination. The exam takes place in June at the end of the academic year. Students may only take this exam following completion of the last core course. The exam will take the form of a take-home exam covering all core and foundational courses. Passing the comprehensive examination fulfills the capstone requirement. A student will have two attempts to pass the exam.

Accelerated One-Year Program Plan

The expected time to completion of the SciCAM M.S. degree program is two years. However, AM also offers a one-year accelerated track for interested students who can demonstrate sufficient proficiency in the foundational subjects. The minimum requirements to join the accelerated track are:

1. having completed at least three calculus courses, including multivariate differential and integral calculus,

2. having completed a course on ordinary differential equations, a course on linear algebra, and a course on programming,

3. having completed at least two of the three foundational requirement courses of the SciCAM program or their equivalents.

Requests to join the accelerated track must be made to the graduate director by email no later than Aug. 31 of each year.

Transfer Credit

Up to three UC Santa Cruz courses (15 credits) fulfilling the degree requirements of the SciCAM M.S. degree may be taken during students' undergraduate study at UCSC. However, students will still need to take courses totaling 35 credits as graduate students to satisfy university requirements. Note that this limit does not apply to the foundational requirements, which may all be taken prior to the start of the SciCAM program without penalty.

Up to one course from other institutions may be applied to the SciCAM M.S. degree course requirements.

Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Relationship of SciCAM Master's Program and AM Doctoral Program

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the AM Ph.D. program. Applications are reviewed in the standard academic cycle. Students interested in applying to the AM Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year.

Review of Progress

Each year, the faculty review the progress of every student in all graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

Foreign Language Requirements

Applying for Graduation

All candidates for a degree must submit an application for the M.S. degree to the Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on filing fee during the quarter in which the
degree is conferred. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

SCIENTIFIC COMPUTING DESIGNATED EMPHASIS

Introduction

Students from another degree program who meet certain requirements can have the designated emphasis of “Scientific Computing” annotated to their degree title. For example, an M.S. or Ph.D. student in physics who meets the requirements would get a certification that reads “M.S. in Physics with an emphasis in Scientific Computing” or “Ph.D. in Physics with an emphasis in Scientific Computing”.

Requirements

Committee Composition and Departmental Approvals

Upon electing to pursue a designated emphasis (DE) in scientific computing, students must choose a DE faculty adviser in the Department of Applied Mathematics. A list of eligible DE advisers is maintained online. The student must organize a preliminary meeting with the DE adviser, and agree on a plan for completion of the requirements. Once this plan has been designed, the student and the adviser must complete the DE application form available online. The completed application form should then be signed by the Applied Mathematics graduate director and filed in the Baskin School of Engineering Graduate Student Affairs Office. This should ideally be done before the student’s advancement to candidacy (for Ph.D. students), and no later than three months before the planned date for the oral presentation completion requirement.

Course Requirements

Students declaring a designated emphasis in Scientific Computing must complete the courses listed below.

All of the following courses:
- AM 213A Numerical Linear Algebra 5
- AM 213B Numerical Methods for the Solution of Differential Equations 5
- AM 250 An Introduction to High Performance Computing 5

Plus one of the following approved elective courses:
- AM 230 Numerical Optimization 5
- AM 260 Computational Fluid Dynamics 5
- CSE 201 Analysis of Algorithms 5
- CSE 242 Machine Learning 5

Students can add a different elective course to the list by submitting a petition to the AM graduate director.

Writing, Research and/or Teaching Requirements

- Writing requirements: a substantial and original written body of work related to scientific computing, associated with substantial code development or substantial modification of existing code, or development of significant computational tools for data analysis. The write-up could take the form of a paper (at least submitted), or an M.S., M.A., or Ph.D. thesis chapter, for instance.

- Oral presentation requirement: a presentation of no less than 30 minutes during which the student must demonstrate mastery of the scientific computing component of the submitted written piece of work. This presentation could be the student’s qualifying exam, or the Ph.D. defense, or a separate presentation. The DE adviser must be invited to attend this presentation.

Review of Progress

Applying for Graduation

All candidates for a degree must submit an application for the master's degree or an application for the doctorate in philosophy degree to the appropriate office in their primary department by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. Students who have completed a designated emphasis should be sure to note the designated emphasis on the degree application. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on filing fee during the quarter in which the degree is conferred.

Biomolecular Engineering

Baskin School of Engineering
335 Baskin Engineering Building
(831) 459-2158
https://www.soe.ucsc.edu/departments/biomolecular-engineering

PROGRAMS OFFERED

Biomolecular Engineering and Bioinformatics B.S. (p. 431)
Biotechnology B.A. (p. 440)
Bioinformatics Minor (p. 444)
Contiguous Bachelor's/Master's Pathway (p. 444)
Biomolecular Engineering and Bioinformatics M.S. (p. 445)
Biomolecular Engineering and Bioinformatics Ph.D. (p. 446)
The Department of Biomolecular Engineering (BME) is an interdisciplinary department that combines expertise from biology, mathematics, chemistry, computer science, and engineering to train students and develop technologies to address major problems at the forefront of biomedical and bio-industrial research. Students trained in the Department of Biomolecular Engineering can look forward to careers in academia, the information and biotechnology industries, public health, or medical sciences.

The department offers a bachelor of science (B.S.) degree in biomolecular engineering and bioinformatics, a minor in bioinformatics, and graduate master of science (M.S.) and doctor of philosophy (Ph.D.) degrees in biomolecular engineering and bioinformatics. The department co-sponsors the Program in Biomedical Science and Engineering (PBSE), a doctoral training program, with the departments of MCD Biology, Chemistry and Biochemistry, and Microbiology and Environmental Toxicology.

Departmental faculty advise undergraduate and graduate researchers enrolled in the bioinformatics, bioengineering, and related degree programs. Members of the Department of Biomolecular Engineering actively collaborate with faculty from other Baskin School of Engineering departments, such as Applied Mathematics and Statistics, Computer Engineering, Computer Science, and Electrical Engineering; and with the Physical and Biological Sciences departments of MCD Biology, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, Ecology and Evolutionary Biology, and Ocean Sciences.

UNDERGRADUATE PROGRAM

Courses for Nonmajors

BME 5, Introduction to Biotechnology, presents a broad overview of the impact of biotechnology on the diagnosis and treatment of disease.

BME 18, Scientific Principles of Life, covers the principles of life as it exists on this planet and how they generalize. Discusses Darwinian evolution, genomes, scientific theories of life (mechanistic, thermodynamic, information theoretic), and future of life (Internet, machine learning and adaptation, artificial intelligence, genome editing, fully artificial life).

BME 80G, Bioethics in the Twenty-First Century: Science, Business, and Society, is particularly appropriate to all students interested in the societal issues surrounding the revolutions in bioinformatics and biotechnology.

BME 80H, The Human Genome, covers principles of human inheritance and techniques used in gene analysis and discusses the evolutionary, social, ethical, and legal issues associated with knowledge of the human genome.

BME 110, Computational Biology Tools, provides an introduction to the tools and techniques of bioinformatics from a user's view. It is intended for biologists and biochemists who need to use bioinformatics tools, but are not primarily interested in building new bioinformatics tools.

BME 130, Genomes, teaches the principles of genome-scale analysis to answer biological questions.

BME 160, Programming for Biologists and Biochemists, provides an introductory programming class using Python to analyze, transform, and publish biological data.

BME 163, Applied Visualization and Analysis of Scientific Data, extends this life-science data focus with an emphasis on understanding and presenting that data.

GRADUATE PROGRAM

The Department of Biomolecular Engineering offers interdisciplinary M.S. and Ph.D. degrees in biomolecular engineering and bioinformatics and accepts students from a wide-variety of backgrounds. A typical cohort includes incoming students from molecular biology, genetics, computer science, engineering, and mathematics. The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions in biology and biomedical science. The Ph.D. program prepares students to lead independent research programs in academic or industry settings. The M.S. program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations (Ph.D. only), and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking their dissertation research (Ph.D.) or capstone projects (M.S.), and have first-hand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS B.S.

Information and Policies

Introduction

The biomolecular engineering and bioinformatics major includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations. The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions,
and the underlying sciences are biochemistry and cell biology.

The BINF concentration combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

In both concentrations, students participate in a capstone experience. Options for the senior capstone experience include

- **Senior Design**—a three-quarter group project intended to prepare students for work in industry,
- a summer full-time synthetic biology project based on the iGEM competition,
- A three-quarter **Senior thesis,**
- or an **Advanced bioinformatics** course series. The last option is the required capstone for students participating in the bioinformatics concentrations.

All capstone options involve working closely with faculty and other researchers at UCSC, analyzing ideas, developing technologies, and discovering new approaches. Application areas include biomolecular sensors and systems, nano-electronic implants, assistive technologies for the elderly and disabled, bioinformatics, microfluidics, nanoscale biotechnology, environmental monitoring, and other areas at the junction between engineering and the life sciences.

More information about bioengineering research and undergraduate research opportunities can be found at Undergraduate Research Opportunities, the Genomics Institute, the Program in Biomedical Sciences and Engineering, the STEM Maximizing Access to Research Careers (MARC) program, and the STEM diversity programs.

The immense growth of biological information stored in computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of statistics, science, and engineering. A classically trained engineer may be unfamiliar with the chemistry and biology required in the field. Thus, this major strives for a balance of the two: an engineer focused on the problems of the underlying science or, conversely, a scientist focused on the use of engineering tools for analysis and discovery.

**Academic Advising for the Program**

The Baskin School of Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

**Getting Started in the Major**

Students applying for admission as first-year students proposing to take the biomolecular engineering and bioinformatics major should have completed four years of high school mathematics (through advanced algebra and trigonometry) and three years of science, including one year of chemistry and one year of biology. Comparable college mathematics and science courses completed at other institutions may be accepted in place of high school preparation. Students without this preparation may be required to take additional courses to prepare themselves for the program.

**Program Learning Outcomes**

A biomolecular engineering and bioinformatics student completing the program should:

- have a broad knowledge of science and engineering disciplines including biology, chemistry, mathematics, statistics, and computer science; those completing the BINF concentration will also have a detailed knowledge of mathematics, statistics, and computer science; and, those completing the BME concentration will have broader knowledge in biology and chemistry;
- be able to apply their knowledge to identify, formulate, and solve engineering design problems;
- be able to write programs in Python;
- be able to find and use information from a variety of sources, including books, journal articles, online encyclopedias, and manufacturer data sheets;
- be able to design and conduct experiments, as well as to analyze and interpret data;
be able to work effectively with partners and on teams;
be able to communicate problems, experiments, and design solutions in writing, orally, and as posters; and
be able to apply ethical reasoning to make decisions about engineering methods and solutions in a global, economic, environmental, and societal context.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the biomolecular engineering and bioinformatics major students must be listed as a proposed major within the School of Engineering. Please refer to the School of Engineering's "Proposed Major Retention" and its "Declaring a School of Engineering Major" sections in the catalog and the Undergraduate Affairs website for more information.

In addition to being listed as a proposed School of Engineering major, students must have completed at least 45 credits with a GPA of 2.8 or better in courses required for the major. Students with more than 7 credits of grades of NP, C-, D+, D, D-, or F in these courses are not qualified for the major.

Students wishing to declare the biomolecular engineering and bioinformatics major after the sixth quarter must appeal, must already have a declared major in which they have completed at least one major requirement course and be making reasonable progress, and must have completed 10 more credits of required courses in the biomolecular engineering and bioinformatics major for each additional quarter.

Transfer students should refer to the Transfer Information and Policy section.

Appeal Process

Students who are informed that they are not eligible to declare may appeal this decision by submitting a letter to the undergraduate director within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the Undergraduate Advising office will notify the student, the college, and the Office of the Registrar of the decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

More information is available regarding the appeal process.

How to Declare a Major

Instructions for declaring a major in the Baskin School of Engineering are on the division's website here.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students need to complete the equivalents of eight courses from the following list with a GPA in those courses of 2.8 or better:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1B</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1C</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8A</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 8B</td>
<td>Organic Chemistry</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 20A</td>
<td>Cell and Molecular Biology</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>AM 10</td>
<td>Mathematical Methods for Engineers I</td>
<td>5</td>
</tr>
</tbody>
</table>

Transferring to Biomolecular Engineering

Students transferring into the biomolecular engineering concentration may also count any of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5A</td>
<td>Introduction to Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 5B</td>
<td>Introduction to Physics II</td>
<td>5</td>
</tr>
<tr>
<td>BME 21L</td>
<td>Introduction to Basic Laboratory Techniques</td>
<td>3</td>
</tr>
<tr>
<td>AM 20</td>
<td>Mathematical Methods for Engineers II</td>
<td>5</td>
</tr>
</tbody>
</table>

Transferring to Bioinformatics

Students transferring into the bioinformatics concentration may also count any of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 16</td>
<td>Applied Discrete Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>CSE 13S</td>
<td>Computer Systems and C Programming</td>
<td>7</td>
</tr>
<tr>
<td>CSE 30</td>
<td>Programming Abstractions: Python</td>
<td>7</td>
</tr>
</tbody>
</table>

Transfer students may use courses articulated to PHIL 22, PHIL 24, or PHIL 28 in place of BME 80G, if these courses are taken prior to registering at UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are at https://undergrad.soe.ucsc.edu/declare-your-major.
Letter Grade Policy
The Baskin School of Engineering requires letter grades for all courses in an engineering major.

[Optional Catchall]

Course Substitution Policy
Please refer to the Undergraduate Affairs course substitution website for Baskin School of Engineering policies about taking courses at other institutions after enrolling at UCSC.

Double Majors and Major/Minor Combinations Policy
Double majors with other biology-related majors are permitted for the bioinformatics concentration, but not for the biomolecular engineering concentration.
The BMEB major cannot be combined with a bioinformatics minor.

Study Abroad
Students are encouraged to investigate studying for short periods of time (a summer or a quarter) at other institutions, to broaden their education.
The BME Department has established an exchange program with Danish Technical University (DTU), which makes study there for one semester relatively easy, particularly for the bioinformatics concentration. Proposed plans of study should still be cleared with the undergraduate director.
Other exchange programs are also being developed.

Honors
Biomolecular engineering and bioinformatics majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research. Students with a GPA of 3.7 or higher receive "Highest Honors in the Major." Students with a GPA of 3.3 or higher, but lower than 3.7, receive "Honors in the Major." Students with particularly significant accomplishments in undergraduate research may receive honors or highest honors with a lower GPA. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

Because of the enormous breadth of requirements, biomolecular engineering and bioinformatics majors are urged to take honors courses or sections whenever possible to get as much as possible out of the courses they take in each field.

[Optional Catchall]

Biomolecular Engineering Concentration
The biomolecular engineering concentration focuses on wet-lab work, but with a modern appreciation for the statistics and computational tools needed for high-throughput experimentation.

Course Requirements
Biomolecular engineering concentration majors must complete the following courses:

Lower-Division Courses

Biology
All of the following courses:
BIOL 20A Cell and Molecular Biology 5

Chemistry
All of the following courses:
CHEM 1A General Chemistry 5
CHEM 1B General Chemistry 5
CHEM 1M General Chemistry Laboratory 2
CHEM 1C General Chemistry 5
CHEM 1N General Chemistry Laboratory 2
CHEM 8A Organic Chemistry 5
CHEM 8B Organic Chemistry 5

Laboratory courses
One of the following options:
Either these courses
BME 22L Foundations of Design and Experimentation in Molecular Biology, Part I 2
BME 23L Foundations of Design and Experimentation in Molecular Biology, Part II 2
or these courses
CHEM 8L Organic Chemistry Laboratory 2
CHEM 8M Organic Chemistry Laboratory 2

BME 22L and BME 23L are strongly preferred.
### Mathematics

Choose one of the following options:

**Either these courses**
- MATH 20A  Honors Calculus  5
- MATH 20B  Honors Calculus  5

**or these courses**
- MATH 19A  Calculus for Science, Engineering, and Mathematics  5
- MATH 19B  Calculus for Science, Engineering, and Mathematics  5

MATH 19A and MATH 19B are the recommended sequence. Credit for one or both can be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination.

### Applied Math

Both of these applied math courses:
- AM 10  Mathematical Methods for Engineers I  5
- AM 20  Mathematical Methods for Engineers II  5

Students may substitute MATH 21 for AM 10, and MATH 24 for AM 20, if they can show MATLAB proficiency at the level of students in the AM class that they are replacing.

### Physics

All of the following courses:
- PHYS 5A  Introduction to Physics I  5
- PHYS 5L  Introduction to Physics I Laboratory  1
- PHYS 5B  Introduction to Physics II  5
- PHYS 5M  Introduction to Physics II Laboratory  1

### Upper-Division Courses

#### Statistics

Two statistics courses:
- STAT 131  Introduction to Probability Theory  5
- STAT 132  Classical and Bayesian Inference  5
- STAT 206  Applied Bayesian Statistics  5

#### Biochemistry and Molecular Biology

All of the following courses:
- BIOC 100A  Biochemistry and Molecular Biology  5
- BIOC 100B  Biochemistry and Molecular Biology  5

### Biomolecular Engineering

#### Choose one of the following courses:
- BME 105  Genetics in the Genomics Era  5
- BIOL 105  Genetics  5

BME 105 is strongly recommended.

#### Plus all of the following courses:
- BME 110  Computational Biology Tools  5
- BME 160  Research Programming in the Life Sciences  6
- BME 163  Applied Visualization and Analysis of Scientific Data  3

#### Plus one of the following Modeling/Design sequences:

**Either these courses**
- BME 128  Protein Engineering  5
- BME 128L  Protein Engineering Laboratory  2

**or these courses**
- BME 177  Engineering Stem Cells  5
- BME 128L  Protein Engineering Laboratory  2

**or these courses**
- AM 115  Stochastic Modeling in Biology  5

### Technical Writing (one of the following courses)

BME 185  Technical Writing for Biomolecular Engineers  5
CSE 185E/CSE 101  Technical Writing for Computer Science and Engineering  5

BME 185 is recommended, as CSE 185E has additional prerequisites.

### Elective

One of the following (the course taken to satisfy this elective cannot be used to satisfy other requirements of the major):

- AM 147  Computational Methods and Applications  5
- METX 119  Microbiology  5
- METX 140  Molecular Biology and Microbial Genetics  5
- BIOC 100C  Biochemistry and Molecular Biology  5
- BIOL 115  Eukaryotic Molecular Biology  5
- BME 122H  Extreme Environmental Virology  5
- BME 128  Protein Engineering  5
BME 128L Protein Engineering Laboratory 2
BME 130 Genomes 5
BME 132 Evolutionary Genomics 5
BME 140 Bioinstrumentation 5
BME 175 Entrepreneurship in Biotechnology 5
BME 177 Engineering Stem Cells 5
BME 178 Stem Cell Biology 5
ECE 104 Bioelectronics 5
or any 5-credit biomolecular engineering graduate course

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Biomolecular engineering and bioinformatics majors satisfy the DC requirement by completing one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 185</td>
<td>Technical Writing for Biomolecular Engineers</td>
<td>5</td>
</tr>
<tr>
<td>CSE 185E</td>
<td>Technical Writing for Computer Science and Engineering</td>
<td>5</td>
</tr>
</tbody>
</table>

BME 185 is recommended, as CSE 185E has additional prerequisites.

Comprehensive Requirement

All biomolecular engineering concentration students must complete a senior capstone project as a group project, as a series of Advanced Bioinformatics courses, or as an individual senior thesis doing research in a faculty laboratory.

Note that the Technical Writing requirement is a prerequisite for all the capstone options, including the senior thesis. Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the independent study courses, typically spring quarter of the third year. Students are responsible for ensuring that they meet the prerequisites for whichever capstone they choose.

To complete the senior capstone requirement, Biomolecular Engineering concentrations students must complete one of the following:

Either these courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 129A</td>
<td>Project Design and Implementation in Biomolecular Engineering I</td>
<td>5</td>
</tr>
<tr>
<td>BME 129B</td>
<td>Project Design and Implementation in Biomolecular Engineering II</td>
<td>5</td>
</tr>
<tr>
<td>BME 129C</td>
<td>Project Design and Implementation in Biomolecular Engineering III</td>
<td>5</td>
</tr>
</tbody>
</table>

or these courses

<table>

</tr>
</tbody>
</table>

Exit Requirements

Students are required to submit a portfolio, exit survey, and attend an exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:

- A substantial written report on a modeling/design project. This is typically satisfied by a senior thesis, or a written capstone project report.
- Slides from a substantial verbal presentation. This is typically satisfied by a capstone design presentation, Stem Cell Engineering, or other design courses.
- A research poster. This is typically satisfied by a senior thesis poster or a capstone design project poster, presented at the undergraduate poster symposium.

The three parts of the portfolio should represent at least two different design projects. If a senior thesis is completed, it must be provided as the written report. If a capstone project is completed, it must be provided as one (or more) of the three submissions.

Exit interviews are scheduled during the last week of the quarter by the Baskin School of Engineering (BSOE) advising office, generally as small group interviews.
Planners

Every biomolecular engineering and bioinformatics major must have a faculty advisor, assigned by the Baskin School of Engineering undergraduate advising office, and with that advisor must formulate a program of proposed coursework that meets the major requirements. The choice of capstone and electives should be made early, so that the plan can be tailored to fit in the chosen courses.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available on the BSOE website.

Sample Plan: Biomolecular Engineering Concentration (CHEM 8A & CHEM 8B In summer after first year)

General education requirements:

CC, ER, and IM are not met by any courses in the program.

MF, SI, SR and PE are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

PR-E can be met by some capstone options: BME 129C or BME 180.

C is not met by courses in the program, but is a prerequisite for the required BME 185 or CSE 185E course.

Students who can take Organic Chemistry (CHEM 8A and CHEM 8B, or transferable equivalents) in summer after their first year can take BIOC 100A in their second year and be ready to join a research lab a year earlier.
This transfer planner assumes that a student has completed the equivalent of CHEM 1A, CHEM 1B, CHEM 1M, CHEM 1C, CHEM 1N, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, PHYS 5A, PHYS 5L, BIOL 20A, AM 10, a molecular biology lab, and all general education courses before coming to UC Santa Cruz. Students are also expected to have completed all the general education requirements, except those covered by the required courses. This planner is only a proof-of-concept that the major can be completed in another two years; each student will need to work with an advisor to tailor their own schedule.

### Bioinformatics Concentration

The bioinformatics concentration focuses on dry-lab (computational) techniques.

Bioinformatics concentration majors must complete the following courses:

#### Course Requirements

##### Lower-Division Courses

**Biology**
- BIOL 20A: Cell and Molecular Biology 5

**Biomolecular Engineering**

**Chemistry**
- All of the following courses:
  - CHEM 1A: General Chemistry 5
  - CHEM 1B: General Chemistry 5
  - CHEM 1M: General Chemistry Laboratory 2
  - CHEM 1C: General Chemistry 5
  - CHEM 1N: General Chemistry Laboratory 2
  - CHEM 8A: Organic Chemistry 5
  - CHEM 8B: Organic Chemistry 5

**Computer Science and Engineering**
- All the following courses:
  - CSE 13S: Computer Systems and C Programming 7
  - CSE 16: Applied Discrete Mathematics 5
  - CSE 30: Programming Abstractions: Python Structures and Algorithms 7
  - CSE 101: Introduction to Data Structures and Algorithms 5

BME 160 is prerequisite to both CSE 13S and CSE 30.

**Mathematics**

Choose one of the following options:

Either these courses:
- MATH 20A: Honors Calculus 5
- MATH 20B: Honors Calculus 5
- AM 10: Mathematical Methods for Engineers I 5

or these courses:
- MATH 19A: Calculus for Science, Engineering, and Mathematics 5
- MATH 19B: Calculus for Science, Engineering, and Mathematics 5
- AM 10: Mathematical Methods for Engineers I 5

MATH 19A and MATH 19B are the recommended sequence. Credit for one or both can be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination.

Students may substitute MATH 21 for AM 10, if they can show MATLAB proficiency at the level of students in the AM class.

##### Upper-Division Courses

**Statistics**

Two statistics courses:
- STAT 131: Introduction to Probability Theory AND
- Either one of these courses
  - STAT 132: Classical and Bayesian Inference 5
  - STAT 206: Applied Bayesian Statistics 5

**Biochemistry and Molecular Biology**
- BIOC 100A: Biochemistry and Molecular Biology 5
Biomolecular Engineering

**Plus one of the following courses:**
- BME 105  Genetics in the Genomics Era  5
- BIOL 105  Genetics  5

BME 105 is strongly recommended.

**Plus all of the following courses:**
- BME 110  Computational Biology Tools  5
- BME 160  Research Programming in the Life Sciences  6
- BME 163  Applied Visualization and Analysis of Scientific Data  3

**Plus one of the following Modeling/Design sequences:**
Either these courses
- AM 20  Mathematical Methods for Engineers II  5
- AM 115  Stochastic Modeling in Biology  5

or these courses
- AM 30  Multivariate Calculus for Engineers  5
- CSE 142  Machine Learning  5

Students may substitute MATH 24 for AM 20, and MATH 22 or MATH 23A for AM 30, if they can show MATLAB proficiency at the level of students in the AM class that they are replacing.

**Technical Writing**
Choose one of the following courses:
- BME 185  Technical Writing for Biomolecular Engineers  5
- CSE 185/CSE 101  Technical Writing for Computer Science and Engineering  5

CSE 185E is recommended, as it has more focus on writing about computer programming and includes some LaTeX instruction.

**Elective**
One of the following (courses satisfying an elective cannot be used to satisfy other requirements of the major):
- AM 147  Computational Methods and Applications  5
- BME 122H  Extreme Environmental Virology  5
- BME 128  Protein Engineering  5

- BME 128L  Protein Engineering Laboratory  2
- BME 130  Genomes  5
- BME 132  Evolutionary Genomics  5
- BME 140  Bioinstrumentation  5
- BME 175  Entrepreneurship in Biotechnology  5
- BME 177  Engineering Stem Cells  5
- BME 178  Stem Cell Biology  5
- BIOC 100B  Biochemistry and Molecular Biology  5
- CSE 142  Machine Learning  5
- CSE 144  Applied Machine Learning  5
- METX 119  Microbiology  5
- METX 140  Molecular Biology of Prokaryotes  5
  or any 5-credit biomolecular engineering graduate course

**Database management**
The following course is required:
- CSE 182  Introduction to Database Management Systems  5

CSE 180 may be substituted for CSE 182, but BMEB students do not have registration priority.

**Disciplinary Communication (DC) Requirement**
Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Biomolecular engineering and bioinformatics majors satisfy the DC requirement by completing one of the following courses:
- BME 185  Technical Writing for Biomolecular Engineers  5
- CSE 185E  Technical Writing for Computer Science and Engineering  5
- 185E/CSE 101  Technical Writing for Computer Science and Engineering  5

**Comprehensive Requirement**
The senior capstone is fulfilled by completing all of the following courses:
- BME 205  Bioinformatics Models and Algorithms  5
- BME 230A  Introduction to Computational Genomics and Systems Biology  5

**Exit Requirements**
Students are required to submit a portfolio, exit survey, and attend an exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:

- A substantial written report on a modeling/design project. This is typically satisfied by a senior thesis, or a written capstone project report.
The three parts of the portfolio should represent at least two different design projects. If a senior thesis is completed, it must be provided as the written report. If a capstone project is completed, it must be provided as one (or more) of the three submissions.

Exit interviews are scheduled during the last week of the quarter by the Baskin School of Engineering (BSOE) advising office, generally as small group interviews.

Planners

Every biomolecular engineering and bioinformatics major must have a faculty advisor, assigned by the Baskin School of Engineering undergraduate advising office, and with that advisor must formulate a program of proposed coursework that meets the major requirements. The choice of capstone and electives should be made early, so that the plan can be tailored to fit in the chosen courses.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available on the BSOE website.

General education requirements:

CC, ER, IM, and PR-E are not met by any courses in the program.

MF, PE-T, SI, and SR are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

C is not met by courses in the program, but is a prerequisite for the required BME 185 or CSE 185E course.

This transfer planner assumes that a student has completed the equivalent of CHEM 1A, CHEM 1B, CHEM 1M, CHEM 1C, CHEM 1N, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, BIOL 20A, CSE 16, and CSE 13S and all general education requirements, except those covered by the required courses. This planner is only a proof-of-concept that the major can be completed in another two years; each student will need to work with an advisor to tailor their own schedule.

BIOTECHNOLOGY B.A.

Information and Policies

Introduction

The Bachelor of Arts in Biotechnology is intended for students who plan to be involved in the biotechnology industry as writers, artists, ethicists, executives, sales force, regulators, lawyers, politicians, and other roles that require an understanding of the technology, but not the intensive training needed for technicians, research scientists, engineers, and bioinformaticians. (For those
more technical roles, the biomolecular engineering and bioinformatics major or the molecular, cell, and developmental biology major is recommended.)

The major is deliberately designed to be suitable as a double major for students in the humanities or social sciences.

Academic Advising for the Program

The Baskin School of Engineering (BSOE) Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

Getting Started in the Major

Students applying for admission as first-year students proposing to take biotechnology should have completed high-school biology. Any UC-eligible student with a strong interest in biotechnology is welcome in the program.

Program Learning Outcomes

A biotechnology student completing the program should:

• have familiarity with several different biotechnologies;
• be able to find and use information from a variety of sources, including books, journal articles, and online encyclopedias;
• be able to write programs in Python;
• be able to communicate clearly in writing, orally, and as posters; and
• be able to apply ethical reasoning to make decisions about biotechnology in a global, economic, environmental, and societal context.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should refer to the Transfer Information and Policy section.

To qualify for the biotechnology major, students must have completed four of the following lower-division courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH 1A</td>
<td>General Chemistry</td>
<td>5</td>
</tr>
<tr>

<td>5</td>
</tr>
<tr>
<td>ST 7L</td>
<td>Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

Can only take either STAT 5 and STAT 7. STAT 7 and STAT 7L must be taken together and count as one course.

Appeal Process

Students who are informed that they are not eligible to declare may appeal this decision by submitting a letter to the BSOE Undergraduate Advising Office. Within 15 days of receipt of the appeal, the Undergraduate Advising office will notify the student, the college, and the Office of the Registrar of the decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

More information regarding the appeal process can be found on the BSOE Undergraduate Affairs website.

How to Declare a Major

Instructions for declaring a major in the Baskin School of Engineering are on the BSOE Undergraduate Affairs website.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).
Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

Transfer students need to have completed the following three courses:

- **Both these courses**
  - BIOL 20A Cell and Molecular Biology 5
  - CSE 20 Beginning Programming in Python 5

- **And**

- **Either this course**
  - STAT 5 Statistics 5

- **Or these courses**
  - STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
  - STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

CHEM 1A is waived for students transferring in credit for BIOL 20A.

**Getting Started at UCSC as a Transfer Student**

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are the BSOE Undergraduate Affairs website.

**Letter Grade Policy**

The Baskin School of Engineering requires letter grades for all courses in a major.

**Course Substitution Policy**

Please refer to the Undergraduate Affairs course substitution website for Baskin School of Engineering policies about taking courses at other institutions after enrolling at UCSC.

**Double Majors and Major/Minor Combinations**

**Policy**

Double majoring with humanities or social science majors is encouraged. Double majoring with other biology-related majors is permitted, except for the Biomolecular Engineering and Bioinformatics major, which has too high an overlap in courses.

**Honors**

Students with a GPA of 3.3 or higher in the major courses will receive Honors in the Major, unless they have been found guilty of academic misconduct.

**[Optional Catchall]**

**Requirements and Planners**

**Course Requirements**

**Lower-Division Courses**

- CHEM 1A General Chemistry 5
- BIOL 20A Cell and Molecular Biology 5
- BME 5 Introduction to Biotechnology 5
- CSE 20 Beginning Programming in Python 5

CSE 20 is waived for students who have already passed BME 160.

**Statistics: either both of these courses**

- STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5
- STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

or this course

- STAT 5 Statistics 5

STAT 7 and STAT 7L is strongly preferred.

Students may substitute STAT 132 for STAT 7 and STAT 7L, but it has several prerequisites that are not required for the major.

**Biotechnology and Society**

**Either**

- BME 18 Scientific Principles of Life 5
  - OR

**And**

- B The Human Genome 5
- M
- E
Upper-Division Courses
BME 105  Genetics in the Genomics Era  5
BME 110  Computational Biology Tools  5
BME 160  Research Programming in the Life Sciences  6

Electives
Three of the following courses, at least two of which are from the Biomolecular Engineering Department:
BME 122H  Extreme Environmental Virology  5
BME 128  Protein Engineering  5
BME 130  Genomes  5
BME 132  Evolutionary Genomics  5
BME 140  Bioinstrumentation  5
BME 177  Engineering Stem Cells  5
BME 178  Stem Cell Biology  5
ECE 104  Bioelectronics  5
FMST 124  Technology, Science, and Race Across the Americas  5
FMST 133  Science and the Body  5
METX 100  Introduction to Microbiology  5
SOCY 121  Sociology of Health and Medicine  5
SOCY 123  Global and Transnational Perspectives in Science and Technology Studies  5
SOCY 127P  Sociology of Drugs, Botanicals and Pharmaceuticals  5

BME 128, BME 177, BME 178, ECE 104, and SOCY 127P all have additional prerequisites not covered by the major requirements.

Disciplinary Communication (DC) Requirement
BME 185  Technical Writing for Biomolecular Engineers  5

Comprehensive Requirement
The comprehensive requirement is covered by the project in the entrepreneurship course:
BME 175  Entrepreneurship in Biotechnology  5

Exit Requirements
Students are required to submit a portfolio and exit survey, and they must attend an exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:
- A substantial written report on a project. This is typically satisfied by the capstone project report.
- Slides from a substantial verbal presentation.
- A poster. This is typically satisfied by a capstone design project poster, presented at the undergraduate poster symposium.

The three parts of the portfolio should represent at least two different projects. At least one of the submissions must be from the capstone course.

Exit interviews are scheduled during the last week of the quarter by the Baskin School of Engineering (BSOE) advising office, generally as small group interviews.

**BIOINFORMATICS MINOR**

The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics. The bioinformatics minor cannot be combined with the biomolecular engineering and bioinformatics major.

**Course Requirements**

A bioinformatics minor consists of the following 11 courses:

**Lower-Division Courses**

**Biology**

All of the following courses:

- BIOL 20A  Cell and Molecular Biology  5

**Chemistry**

The following course:

- CHEM 1A  General Chemistry  5

**Single-Variable Calculus**

Choose one of the following options:

Either these courses:

- MATH 19A  Calculus for Science, Engineering, and Mathematics  5

or these courses:

- MATH 11A  Calculus with Applications  5

or these courses:

- MATH 19B  Calculus for Science, Engineering, and Mathematics  5

**Upper-Division Courses**

**Bioethics**

Choose one of the following courses:

- BME 18  Scientific Principles of Life  5

**Genetics**

Choose one of the following courses:

- BME 105  Genetics in the Genomics Era  5

- BIOL 105  Genetics  5

BME 105: strongly recommended

**Programming**

All of the following courses:

- BME 160  Research Programming in the Life Sciences  6

- BME 163  Applied Visualization and Analysis of Scientific Data  3

**Statistics**

The following courses:

One of these courses:

- STAT 131  Introduction to Probability Theory
- STAT 132  Classical and Bayesian Inference
- STAT 206  Applied Bayesian Statistics

**Bioinformatics**

The following course:

- BME 110  Computational Biology Tools  5

**BIOMOLECULAR ENGINEERING CONTIGUOUS BACHELOR’S/MASTER’S PATHWAY**

Because the bioinformatics concentration of the Biomolecular Engineering and Bioinformatics (BME)
B.S. provides excellent preparation for a graduate program in bioinformatics, we offer a contiguous B.S./M.S. degree pathway that allows those students to complete the M.S. somewhat sooner than students with a less-tailored preparation.

The current B.S. and M.S. requirements have three courses in common:

- BME 80G, Bioethics in the 21st Century*
- BME 205, Bioinformatics Models and Algorithms*
- BME 230A, Intro to Computational Genomics and Systems Biology*

*These courses must be passed with a grade of B- or better to meet the M.S. requirements.

In accordance with UCSC Graduate Council guidelines for contiguous five-year bachelor’s/master’s programs, students are required to complete 35 credits during the master’s phase of the program. Since BME 205 and BME 230A are taken in the undergraduate phase, the credits cannot be counted toward the overall credits required by the M.S. degree.

Classes should be chosen in consultation with the BME Graduate Advising Committee. Per UCSC Graduate Council policy, up to 15 credits may be upper-division undergraduate courses not already counted toward the B.S. Typically, these courses are selected to address specific interests, cover topics specific for the capstone project, or address specific deficiencies of each student.

Biomolecular engineering graduate courses suitable for fulfilling the 35-credit requirement include, but are not limited to, BME 215, Applied Gene Technology; BME 230B, Advanced Computational Genomics and Systems Biology; BME 232, Evolutionary Genomics. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty mentor.

The combined B.S./M.S. degree pathway does not make any changes to the undergraduate program nor the graduate program, except that students must pass the overlapping courses listed above for a grade of B- or better.

To apply for the combined pathway, students apply to the M.S. program through the normal graduate admission process in the fall of their senior year. If admitted into the graduate program, they are automatically included in the combined B.S./M.S. pathway.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS M.S.

Introduction

The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions in biology and biomedical science. The master of science (M.S.) program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking capstone projects (M.S.), and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Requirements

Course Requirements

M.S. students must complete a total of at least 41 credits as described below.

Core courses (5-credit) six are required

The following course:

- BME 205, Bioinformatics Models and Algorithms 5

Plus one of the following courses:

- BME 230A, Introduction to Computational Genomics and Systems Biology 5
- BME 229, Protein and Cell Engineering 5

Graduate-Level Quantitative Science Course

Students must take one 5-credit graduate-level course focused on quantitative science. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty mentor.

Ethics Course:

Choose one of the following courses:

- SOCY 268A, Science and Justice: Experiments in Collaboration 5

BME 80G can be taken to meet the ethics requirement, but the credits will not be counted toward the overall credit requirement for the M.S. since it is a lower-division course.

Graduate-Level Biomolecular Engineering Electives

Students must take at least two 5-credit, graduate-level BME courses. Suitable courses are to be selected in
consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty advisor. Alternative electives may be considered with the approval of a student's faculty advisor and the graduate director.

Seminars
A minimum of three seminar courses, including at least one quarter of the 2-credit biomolecular engineering seminar:
- **BME 280B** Seminar on Bioinformatics and Bioengineering 2

Research Experience
One quarter of independent study from the following courses:
- **BME 297A** Independent Study or Research 5
- **BME 297B** Independent Study or Research 10
- **BME 297C** Independent Study or Research 15
- **BME 297F** Independent Study or Research 2

Transfer Limitations
Up to two courses may be transferred from other graduate institutions with the approval of the faculty advisor and the graduate director.

Other Requirements
Bootcamp Activity
Entering graduate cohorts are strongly encouraged to participate in the hands-on “bootcamp” just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project.

Further Study Outside the Department
No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

M.S. Capstone Requirement
This is a Plan II capstone. Students must complete an individual project or a group project with a final written report submitted as part of the final evaluation. That project must be proposed by the student or student-group and be approved by BME faculty. Group projects must include a mechanism for evaluating the contributions of each member of the group.

Adequate Progress
Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on academic probation for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on probation may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from probation are immediately returned to academic probation.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their advisor and the graduate director.

Applying for Graduation
All candidates for a degree must submit an Application for Master's Degree to the Graduate Division by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS PH.D.

Introduction
Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations, and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics (BME) faculty members while undertaking their dissertation research, and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Advancement to Candidacy

Course Requirements
Ph.D. students must complete a total of at least 55 credits as described below.

Core Courses

The following courses:
- **BME 205** Bioinformatics Models and Algorithms 5
- **BIOL 200F** Logic and Approaches to Scientific Discovery 5
BME 201 Scientific Writing 3

BIOL 200F is typically taken as a first-year Ph.D. student, in winter quarter.

BME 201 is typically taken as a second-year Ph.D. student, in winter quarter.

Plus one of the following courses:
BME 230A Introduction to Computational Genomics and Systems Biology 5
BME 229 Protein and Cell Engineering 5

Graduate-Level Quantitative Science Course

Students must take one 5-credit graduate-level course focused on quantitative science. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty mentor.

Ethics Course:

Choose one of the following courses:
SOCY 268A Experiments in Science and Justice: Collaboration 5

BME 80G can be taken to meet the ethics requirement, but the credits will not be counted toward the overall credit requirement for the Ph.D. since it is a lower-division course.

Graduate-Level Biomolecular Engineering Electives

Students must take at least two 5-credit, graduate-level BME courses. Alternative electives may be considered. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty advisor.

Seminars

BME 280B Seminar on Bioinformatics and Bioengineering 2

A minimum of six seminar courses, including at least two quarters of the 2-credit Biomolecular Engineering seminar. Because the intent of the seminar requirement is to ensure breadth of knowledge, laboratory group meetings (BME 281 courses) do not count for the seminar requirement.

Lab Rotations

Three research laboratory rotations (BME 296 - must enroll in fall and winter quarters of their first year) with different supervisors. Laboratory rotations for Ph.D. students are generally completed in the first two quarters (three 7-week rotations).

BME 296 Research in Bioinformatics 5

Bootcamp Activity

Entering graduate cohorts are strongly encouraged to participate in the hands-on “bootcamp” just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project.

Transfer Limitations

Up to two courses may be transferred from other graduate institutions with the approval of the faculty advisor and the graduate director.

Further Study Outside the Department

No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

Foreign Language Requirements

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Ph.D. students must select a faculty research adviser by the end of the first year. A qualifying examination committee is then formed in the second year, which consists of the adviser and three additional members, and which is approved by the graduate director and the campus graduate dean. At least two of the four must be members of the Department of Biomolecular Engineering. The student must submit a written dissertation proposal to all members of the committee and the graduate program adviser one month in advance of the examination. The dissertation proposal is publicly and formally presented in an oral qualifying examination given by the qualifying committee.

Ph.D. students are required to pass the qualifying examination and advance to candidacy by the end of their second year.

Post-Qualifying Requirements

Dissertation

Dissertation

Ph.D. candidates will submit the completed dissertation to a reading committee at least one month prior to the dissertation defense. The reading committee, formed
upon advancement to candidacy, consists of the dissertation supervisor and two readers appointed by the graduate director upon the recommendation of the dissertation supervisor. At least one of the three must be a member of the Department of Biomolecular Engineering.

**Dissertation Defense**

The candidate will present their research in a public seminar. The seminar will be followed by a defense of the dissertation to the reading committee and attending faculty, who will then decide whether the dissertation is acceptable or requires revision.

**Academic Progress**

Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on academic probation for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on probation may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from probation are immediately returned to academic probation.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their adviser and the graduate director.

**Applying for Graduation**

All candidates for a degree must submit an Application for PhD Degree to the Graduate Division by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

[Optional Catchall]

**Computational Media**

Baskin School of Engineering  
(831) 459-2158  
https://www.soe.ucsc.edu/

**PROGRAMS OFFERED**

Computer Science: Computer Game Design B.S. (p. 448)  
Computational Media M.S. (p. 454)  
Computational Media Ph.D. (p. 457)  
Computational Media Designated Emphasis (p. 453)  
Games and Playable Media M.S. (p. 463)  
Human Computer Interaction M.S. (p. 466)  
Serious Games M.S. (p. 468)

**OTHER PROGRAMS OF INTEREST**

Art and Design: Games and Playable Media B.A. (p. 88)  
Digital Arts and New Media M.F.A. (p. 28)  
Film and Digital Media Ph.D. (p. 44)

Computational media includes the creation, enhancement, and study of media forms for which computational processes enable deeply interactive and generative experiences, as well as the use of computation to understand and assist creation of media broadly. The department emphasizes the construction of technologies that make possible novel media experiences and tools, while simultaneously embracing and engaging in theoretical and practical approaches from the arts, humanities, and social sciences. The Computational Media (CMPM) Department offers courses on a wide range of topics, many of which integrate technical subject matter with design-oriented, theoretical, and historical topics. The Computational Media Department administers an undergraduate bachelor of science (B.S.) degree in Computer Game Design, a master of science (M.S.) degree in Games and Playable Media, a master of science (M.S.) degree in Serious Games, a master of science (M.S.) degree in Human Computer Interaction, as well as a master of science (M.S.), a doctor of philosophy (Ph.D.), and a designated emphasis in Computational Media. Besides offering instructional courses, the department engages in a substantial research program in which both advanced undergraduates and graduate students participate.

**COMPUTER SCIENCE: COMPUTER GAME DESIGN B.S.**

**Information and Policies**

**Introduction**

The goal of this degree is to provide students a deep understanding of the technical aspects of computer game engineering and a broad background in the artistic, systemic, and production elements of game design and development. The core of the degree program is a strong grounding in computer science and computer engineering, preceded by a foundation in mathematics. Classes also develop skills in areas such as visual communication and team-oriented game production, while developing knowledge of topics such as game history, play experiences, game systems, and social and ethical issues. In their upper-division courses, students gain depth by taking electives in computational media and computer science and engineering, with options such as Game AI, Game Graphics and Real-Time Rendering, Generative Design (Procedural Content Generation), Mobile Applications, Interactive Storytelling, and Algorithmic Music. A two-course
interdisciplinary Game Development Experience and a yearlong interdisciplinary capstone Game Design Studio class allow students to develop substantial computer games and integrate materials from the rest of the program.

**Academic Advising for the Program**

The Baskin School of Engineering (BSOE) Undergraduate Advising Office is located in the Baskin Engineering Building, Room 225. It can be contacted by email at bsoeadvising@ucsc.edu or at the Undergraduate Advising website.

Transfer students to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

**Getting Started in the Major**

It is recommended that high school students intending to apply to the major have completed four years of mathematics (through advanced algebra and trigonometry) as well as any available courses in computer science, arts, and media (especially interactive media). Comparable college mathematics, arts, and media courses completed at other institutions also serve to properly prepare a student for the major.

**Program Learning Outcomes**

Recipients of a B.S. degree in Computer Game Design at UC Santa Cruz are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas: algorithms, data structures, complexity, and software engineering and development.
2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
3. Apply problem-solving skills and the knowledge of computer science to solve real problems.
4. Recognize and take into account the social, legal, ethical, and cultural issues in the discipline of computer games.
5. Demonstrate written and oral communication skills regarding technical material about computer science and computer games, broadly conceived.
6. Design and build a technical system that achieves an artistic goal for audience experience, employing sound computer science techniques.
7. Demonstrate the ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

In order to be admitted into the Computer Science: Computer Game Design major, students must be listed as a proposed major within the School of Engineering. Please refer to https://undergrad.soe.ucsc.edu/prepare-declare-bsoe-major.

Transfers to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

In addition to being listed as a proposed School of Engineering major, admission to the Computer Science: Computer Game Design major is based on the following criteria:

**Students have to complete all the foundation courses to qualify for the major**

**Students are required to take**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 16</td>
<td>Applied Discrete Mathematics</td>
<td>5</td>
</tr>
</tbody>
</table>

**And one of the following calculus courses**

- Either these courses
  - MATH 19A Calculus for Science, Engineering, and Mathematics 5
  - MATH 20A Honors Calculus 5

**And a core programming sequence to include one of the following group of classes**

- Either these courses
  - CSE 12 Computer Systems and Assembly Language and Lab 7
  - CSE 30 Programming Abstractions: Python 7
  - ECE 13 Computer Systems and C Programming 7

- Or these courses
  - CSE 12 Computer Systems and Assembly Language and Lab 7
  - CSE 30 Programming Abstractions: Python 7
  - CSE 13S Computer Systems and C Programming 7

**Appeal Process**

Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Advising office, addressed to the computational media undergraduate director within 15
days from the date the notification was mailed. The appeal letter must describe why the prior performance is not an accurate reflection of the student's potential. Within 15 days of receipt of the appeal, the Undergraduate Advising office will notify the student and their college of the decision.

**How to Declare a Major**

Students should submit a petition to declare by completing the petition for major/minor declaration form as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

There are five steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

- **MATH 19A** Calculus for Science, Engineering, and Mathematics 5
- **MATH 19B** Calculus for Science, Engineering, and Mathematics 5
- **CSE 16** Applied Discrete Mathematics 5
- **CSE 30** Programming Abstractions: Python 7

and one of the following courses

- **ECE 13** Computer Systems and C Programming 7
- **CSE 13S** Computer Systems and C Programming 7
- **CSE 12** Computer Systems and Assembly Language and Lab 7

Lecture and lab combinations count as one course.

**In addition, completing all but one of the following courses prior to transfer is recommended to ensure timely graduation:**

- **CSE 20** Beginning Programming in Python 5
- **CSE 12** Computer Systems and Assembly Language and Lab 7

One of these courses

- **AM 10** Mathematical Methods for Engineers I 5
- **MATH 21** Linear Algebra 5
- **One of these courses**
  - **ECE 13** Computer Systems and C Programming 7
  - **CSE 13S** Computer Systems and C Programming 7

(Lecture-lab combinations count as one course.)

**Getting Started at UCSC as a Transfer Student**

Transfer students may declare the major at any time after coming to UCSC by following the steps in "How to Declare a Major."

Please note that most major courses have a strong theoretical component to prepare the student for designing, as opposed to simply using, technical and game systems. Often, other institutions' courses that emphasize applications of current programming languages and authoring tools do not count toward the major at UCSC. For specifics on the BSOE's transfer student policies, please see Baskin Engineering's Transfer Students website.

**Letter Grade Policy**

The Baskin School of Engineering requires letter grades for all courses in an engineering major.

[Optional Catchall]

**Course Substitution Policy**

**Double Majors and Major/Minor Combinations Policy**

**Study Abroad**

**Honors**

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of “Highest Honors in the Major.” Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of “Honors in the Major.” The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

[Optional Catchall]

**School of Engineering Policies**

Please refer to Admission to School of Engineering Majors (p. Error! Bookmark not defined.) in the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs. These policies include admission to the major and the
need for students to obtain preapproval before taking courses elsewhere.

Requirements and Planners

Course Requirements

The Computer Science: Computer Game Design curriculum has 24-26 courses (depending on the core programming sequence taken). Thirteen of the courses are upper-division. Several of the required courses and electives are also general education courses. Please consult with the schedule of classes or the General Catalog for more information.

Course requirements are divided into five conceptual areas and may not be credited in more than one area:

Lower-Division Courses

Upper-Division Courses

Mathematics

Choose one of the following options:

Either these courses

- MATH 19A: Calculus for Science, Engineering, and Mathematics 5
- MATH 19B: Calculus for Science, Engineering, and Mathematics 5

or these courses

- MATH 20A: Honors Calculus 5
- MATH 20B: Honors Calculus 5

Credit for one or both MATH 19A/MATH 19B may be granted with adequate performance on the CEEB calculus AB or BC Advanced Placement examinations.

Plus one of the following courses:

- MATH 21: Linear Algebra 5
- AM 10: Mathematical Methods for Engineers I 5

Plus the following course:

CSE 16: Applied Discrete Mathematics 5

Computational Foundations

Choose one of the following options:

Either this course

- ECE 13: Computer Systems and C Programming 7

or this course

- CSE 13S: Computer Systems and C Programming 7

CSE 12 is a prerequisite for this course.

Plus all of the following courses:

CSE 20: Beginning Programming in Python 5
CSE 12: Computer Systems and Assembly Language and Lab 7
CSE 30: Programming Abstractions: Python 7
CSE 101: Introduction to Data Structures and Algorithms 5
CSE 111: Advanced Programming 5

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30 and CSE 12.

Games and Playable Media Foundations

Complete all of the following courses:

- ARTG 80G: Visual Communication and Interaction Design 5
- ARTG 80H: Critical History of Digital Games 5
- FILM 80V: Video Games as Visual Culture 5

Game Design and Development

Complete all of the following courses:

- CMPM 80K: Foundations of Video Game Design 5
- ARTG 120: Game Design Experience 5
- CMPM 120: Game Development Experience 5
- CMPM 170: Game Design Studio I 5
- CMPM 171: Game Design Studio II 7
- CMPM 172: Game Design Studio III 7
- CMPM 176: Game Systems 5

Computer Game Engineering

Complete five courses from the following list. The majority of these computer game engineering electives (CGEs) are technical practice electives which focus on the development and analysis of computational systems (the “programming” part of game creation). No more than two of the five can be from CMPM 131, CMPM 132, CMPM 150, CMPM 177, CSE 103, CSE 104 or ECON 166A. (These seven courses focus on other skills useful in computer game development, such as design, production, and mathematical analysis.)

NOTE: Lecture/lab combinations count as one course

- CMPM 121: Game Technologies 5
- CMPM 131: User Experience for Interactive Media 5
- CMPM 132: Interaction Design Studio 5
- CMPM 146: Game AI 5
- CMPM 147: Generative Design 5
Electives

Disciplinary Communication (DC) Requirement

Students must satisfy the major's upper-division disciplinary communication (DC) requirement by completing the first course in the game design studio sequence:

CMPM 170 Game Design Studio I 5

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence: CMPM 170, CMPM 171, and CMPM 172.

Planners

The following are three sample academic plans that students can use to plan their sequence of courses in the major. The first two plans are suggested guidelines for students who begin their studies in their frosh year. Such students, if they plan carefully, will have several openings free to take other breadth courses they find interesting.

Plan one is for a student entering UCSC in their frosh year who is prepared to go directly into MATH 19A/MATH 20A and CSE 30.

Plan two is for a student entering UCSC their frosh year who needs to take preparatory courses prior to MATH 19A or CSE 30 to ensure a successful outcome in those courses.

Plan three is for a junior transfer student who has completed their mathematics, computational foundations, and general education requirements.

Plan One

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>ARTG 80H</td>
<td>CSE 80K</td>
<td>CSE 12</td>
</tr>
<tr>
<td></td>
<td>MATH 19A</td>
<td>MATH 19B or MATH 20B</td>
<td>CSE 30</td>
</tr>
</tbody>
</table>

Year 2

|        | ARTG 80G | FILM 80V | CSE 120 |
|        | MATH 21 or AM 10 | | ARTG 120 |

CMPM 179 may be repeated for credit, but only the first offering counts toward the computer game engineering requirement.
### Plan Two

<table>
<thead>
<tr>
<th>Year 1 (Jr)</th>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>

### Computational Media Designated Emphasis

#### Introduction

The graduate designated emphasis (DE) leading to the degree notation “with an emphasis in Computational Media” provides specialization in the theory, principles, and practices of the field of computational media. This DE is administered by the Department of Computational Media. Students wishing to complete an M.F.A. or Ph.D. degree with an emphasis in this area must satisfy the degree requirements of a primary program as well as the degree requirements of the DE. The DE is most suitable for students pursuing degrees in computer science and engineering, digital art and new media, film and digital media, literature, and psychology. However, students from any area may work in this interdisciplinary field as long as they meet all requirements, including progress, within the primary degree program. It is intended for students in terminal degree programs (e.g., Ph.D., M.F.A.) rather than non-terminal master’s or certificate programs.

#### Requirements

##### Committee Composition and Departmental Approvals

The student’s M.F.A. thesis or capstone, Ph.D. qualifying exam, or Ph.D. dissertation committee must include one member of the Computational Media (CM) Department faculty.

Both the student's CM adviser and the department's graduate director must sign the student's "Application for the Designated Emphasis in Computational Media" form, when the student's DE is proposed. The graduate director...
signs this form again when the DE is completed, and may approve exceptions either at the time of proposal or completion.

**Course Requirements**

All students must complete CMPM 201 (Introduction to Computational Media) and two additional 5-credit graduate courses offered or crosslisted by the CM department and/or faculty with (non-zero percentage) appointments in the department. One of the additional courses may be fulfilled through a graduate independent study (of 5 credits or greater) with a CM faculty member, with approval of the CM graduate director.

**Writing, Research and/or Teaching Requirements**

The student must complete a significant piece of computational media writing. Examples include a student’s M.F.A. thesis (or substantial section of one) or a Ph.D. dissertation chapter—but other pieces of writing are also acceptable, at the discretion of the CM graduate director, including conference and journal publications.

[Optional Catchall]

**COMPUTATIONAL MEDIA M.S.**

**Introduction**

The goal of the M.S. in Computational Media (CM) is to help students build on existing strengths and move into new areas of computational media work. The design of the degree ensures, first, that students have a meaningful foundation in the key areas needed for undertaking interdisciplinary CM work. This may require some additional development in one or more areas (e.g., a sequence of computer programming classes). In addition, the M.S. coursework includes both broad and topical classes that help students understand the different ways that innovative work in CM connects the knowledge and methods of the different disciplines that contribute to it. Finally, the M.S. also includes a student-defined thesis, in which they demonstrate their ability to apply their foundational and integrative knowledge while developing novel work through supervised research. The M.S. is appropriate for students continuing in a variety of directions, including pursuing a terminal degree and performing innovative media creation.

M.S. students must complete a minimum of 35 quarter credits of graduate and upper-division courses, including 15 credits of core courses, 10 credits of topical courses, CMPM 204 (5 credits), and at least 2 credits of supervised research. No more than 15 credits may be upper-division undergraduate courses.

**Topics Courses (10 Credits)**

M.S. students are required to take 10 credits of CM topics courses. This category includes all 5-credit CMPM graduate classes, as long as they are not already counted in another category (e.g., it cannot include core courses), in addition to courses available in other departments. Current topics courses are listed below.

GAME 238 Computer Graphics for Games 5
GAME 240 Game Usability 5
GAME 250 Foundations of Serious Games 5
GAME 251 Games User Research 5
GAME 290A Advanced Topics in Games 5

DANM 250A, DANM 250B, DANM 250C, DANM 250E: can be repeated.

Other Requirements

In addition to the above curricular requirements, students are also required to satisfy the three Foundation Areas requirements. There are three additional program requirements, though students may have completed the necessary work for one or more before admission.

Students are expected to demonstrate an understanding of the following three Foundation Areas:

• Media Creation in a CM context
• Computer Programming sufficient to carry out CM research
• Interpretive Practices sufficient to carry out CM research

Media Creation: All M.S. students must demonstrate an understanding of media creation in a CM context, and must do so by the end of their second year in the program. This can be completed by any of:

• The Computer Science: Computer Game Design B.S. game studio sequence (CMPM 170, CMPM 171, CMPM 172) before graduate enrollment.
• The Art and Design: Games and Playable Media B.A. game studio sequence (ARTG 170, ARTG 171, ARTG 172) before graduate enrollment.
• A Digital Arts and New Media (DANM) project group sequence (three DANM 250 courses in same area, in sequence) during or before computational media M.S./Ph.D. graduate enrollment.
• The Games and Playable Media M.S. project sequence (GAME 270, GAME 271, GAME 272) before computational media M.S./Ph.D. graduate enrollment (due to Professional Degree Supplemental Tuition (PDST) and cohort model, these cannot be taken by students in other programs).
• At least three graduate or upper-division undergraduate courses from a list of offerings at UCSC that require programming knowledge and are focused on defining and developing CM-related projects (e.g., CMPM 148) during or before CM graduate enrollment. See the media creation courses list below.

• Petition to CM graduate director, presenting evidence of equivalent coursework at another institution and/or equivalent CM project experience in another context.

Computer Programming: All M.S. students must demonstrate an understanding of computer programming sufficient to carry out CM research, and must do so by the end of their second year in the program. This can be completed by:

• Taking a series of courses that integrate media and programming knowledge (e.g., GAME 235, GAME 236, and CMPM 120).
• Taking core programming (e.g., CSE 30 and CSE 101) and advanced programming (e.g., CSE 111) at UCSC or another institution.
• Petition to CM graduate director, presenting evidence of programming knowledge developed in another context.

Interpretive Practices: All M.S. students are expected to have an understanding of interpretive and critical methods sufficient to carry out CM research. Students who lack such a background are strongly encouraged to take a series of courses in this area, consulting with their advisor regarding which courses would be most appropriate. The appropriate Interpretive Practices for a given student depends on the specific research area for the student. The key is that the student is able to critique and intervene in their research area from a broader social, cultural, and historical perspective. One recommended sequence (which may or may not be appropriate for a specific student) is:

• HISC 1: Introduction to the History of Consciousness. If this is not possible, take an 80-level course that integrates introductory interpretive content (e.g., FILM 80V: Video Games as Visual Culture).
• Take two more graduate or upper-division undergraduate courses that focus on interpretive practices. The CM department offers courses that integrate this with CM knowledge, such as some offerings of CMPM 290A (e.g., Media Constellations) and CMPM 176: Game Systems. Other programs also offer courses that make this integration, such as DANM 201: Recent Methods and Approaches to Digital Arts and Culture and DANM 202: Dialogues and Questions in Digital Arts and Culture. Courses that do not make this integration, but that are connected to the student's research area, are also acceptable.

Note: In extraordinary circumstances the graduate director can reduce the number of required courses based on a petition presenting past accomplishments, for
example, reducing the number of required topics courses by one for each substantial past research publication or system accepted from the petition.

**Current Media Creation Courses**

- CMPM 146 Game AI 5
- CMPM 147 Generative Design 5
- CMPM 148 Interactive Storytelling 5
- CMPM 150 Creating Digital Audio 5
- CMPM 151 Algorithmic Music for Games 5
- CMPM 163 Game Graphics and Real-Time Rendering 5

- CMPM 169 Creative Coding 5
- CMPM 179 Game Design Practicum 5
- CMPM 244 Artificial Intelligence in Games 5
- CMPM 248 Interactive Storytelling 5
- CMPM 265 Generative Methods 5
- CMPM 290J Playable Media 5
- CSE 160 Introduction to Computer Graphics 5
- CSE 161 Introduction to Data Visualization 5
- CSE 163 Data Programming for Visualization 5
- CSE 183 Web Applications 5
- CSE 245 Computational Models of Discourse and Dialogue 5
- CSE 260 Computer Graphics 5
- CSE 261 Advanced Visualization 5
- CSE 263 Data Driven Discovery and Visualization 5
- GAME 210 Game Art Intensive 5
- GAME 215 Audio Direction 5

**M.S. Research Thesis (7-10 credits)**

The M.S. requires a research thesis. It is a substantial undertaking within the CM field, which may emphasize technical, media-creation, or interpretive aspects—or may emphasize more than one area equally. Regardless of which of the above areas the M.S. research emphasizes, a written thesis is required. This written thesis is reviewed by a committee of at least two faculty that must include at least one member of the CM department and draw half or more of its members from the UCSC academic senate.

M.S. students are required to take CMPM 204 (Computational Media Project Definition), in which their thesis topic is developed, as well as CMPM 299, an independent study with the faculty advisor for their thesis.

- CMPM 204 Computational Media Project Definition 5
- CMPM 299 Thesis Research 5

**Lower-Division Courses**

Students who are considering enrolling in lower-division courses in order to fulfill additional degree requirements (e.g., CSE 30, HISC 1) may wish to consult with the course instructor and their advisor about instead taking an independent study or directed study (with the course instructor, their advisor, or a third faculty member) that subsumes the work of the course and adds additional content to bring it up to a graduate level. Graduate students must be enrolled in some combination of at least 10 credits of courses or independent studies that are either graduate or upper-division undergraduate courses in order to be considered full-time enrolled.

**Transfer Credit**

Up to 10 credits transferred from equivalent courses in previous graduate work at UCSC or elsewhere can be applied toward the M.S. course requirements. This can satisfy the topics requirement, but is not to exceed the three-course overall limit on transfers from outside institutions. A Course Substitution/Waiver form can be found on the Jack Baskin School of Engineering (BSOE) Graduate Advising website.

**Review of Progress**

On an ongoing basis, the faculty reviews the progress of every student remaining on track to complete the degree in six consecutive academic quarters. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements, which includes courses and a master's thesis, in two years.

Students receiving two or more unsatisfactory grades (U or grade below B) in School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in the Computational Media core course sequence (CMPM 201, CMPM 202, CMPM 203), are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their advisor and the graduate director immediately. Students may appeal their dismissal.

**Planners**

**M.S. in One Year (Student with technical CM B.S. degree)**
This is a sample program for a student who has completed a bachelor’s degree with significant technical content and a focus on some form of computational media (such as computer games). The B.S. in Computer Science: Computer Game Design at UCSC is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking the CMPM 170, CMPM 171, and CMPM 172 sequence at UCSC) and the requirement for demonstrating an understanding of computer programming (e.g., by taking a core programming sequence and CSE 111 at UCSC). This program is for a student who wants to complete the M.S. degree in one year.

**Fall** | **Winter** | **Spring**
---|---|---
CMPM 201 | CMPM 202 | CMPM 203
Topics course | Topics course | CMPM 299
 CMPM 204 | Elective/independent study (optional) | Elective/independent study (optional) (M.S. thesis approved)

**M.S. in Five Quarters (Student requiring technical and interpretive foundation work)**

This is a sample program for a student who has graduated from a digital media program or other undergraduate degree that provides experience in media creation in a CM context, but not an understanding of computer programming or interpretive practices. (CMPM 202 is moved to the second year, to reflect the need for computer programming knowledge before taking this course.)

**Applying for Graduation**

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

**COMPUTATIONAL MEDIA PH.D.**

**Introduction**

The Ph.D. in computational media (CM) is designed for those who are already actively working in computational media and want to develop new knowledge that will change what is possible and how we understand it. The Ph.D. program includes all the course requirements of the M.S., with the exception of those related to the M.S. thesis. Ph.D. students have a number of additional requirements, as well. First, they must take additional topics courses, building understanding of a broader set of CM approaches. Second, they must pass both a first-year exam and a comprehensive exam, setting clear milestones for the development of expert-level knowledge in CM. Third, they must engage in substantial independent research that contributes to the development of the field, working closely with CM research faculty. Fourth, they must propose, complete, and defend a significant and novel dissertation project. The Ph.D. is appropriate for those who aim to lead future CM research efforts, within the academy, industry, government, non-profit, and other contexts.

**Advancement to Candidacy**

**Course Requirements**

Ph.D. students will complete 15 credits of core courses, 20 credits of topics courses, and 12 credits of courses involved in preparation for the comprehensive examination.

**Core Courses (15 Credits)**

- CMPM 201 Introduction to Computational Media 5
- CMPM 202 Computation Media Research 5
- CMPM 203 Computational Media Methods 5

**Topics Courses (20 Credits)**

Ph.D. students are required to take 20 credits of CM topics courses. The courses may be any combination of these types (as long as not already counted in another category):

- 5-credit CMPM graduate classes.
Classes in other subject codes that cover the theory and/or practice of a CM area, as listed in the "topics courses."

Up to 10 credits transferred from equivalent courses in previous graduate work at UC Santa Cruz or elsewhere (not to exceed three course overall limit on transfers from outside institutions, between this and other requirements).

</table>

CMPM 206: Teaches skills for gathering literature and preparing portfolio for comprehensive exam, taken the same quarter as exam. 2 credits.

CMPM 297B: Research in preparation for the comprehensive exam, usually taken with the student’s advisor. Students should enroll in 5 credits of CMPM 297B the quarter prior to their comprehensive exam, and then 5 credits alongside CMPM 206 the quarter they plan to take the comprehensive exam.

Additional Requirements

In addition to the above curricular requirements, students are also required to satisfy the three Foundation Areas requirements. Students may have completed the necessary work for one or more before admission. Students are expected to demonstrate an understanding of the following three Foundation Areas:

- Media Creation: Ph.D. students must demonstrate an understanding of media creation in a CM context, and must do so by the end of their second year in the program—and before the comprehensive exam. This can be completed by any of:
  - The Computer Science: Computer Game Design B.S. game studio sequence (CMPM 170, CMPM 171, CMPM 172) before graduate enrollment.
  - The Art and Design: Games and Playable Media B.A. game studio sequence (ARTG 170, ARTG 171, ARTG 172) before graduate enrollment.
  - A DANM project group sequence (three DANM 250 courses in same area, in sequence) during or before CM M.S./Ph.D. graduate enrollment.
• The Games and Playable Media M.S. project sequence (GAME 270, GAME 271, GAME 272) before CM MS/PhD graduate enrollment (due to PDST and cohort model, these cannot be taken by students in other programs).

• At least three graduate or upper-division undergraduate courses from a list of offerings at UCSC that require programming knowledge and are focused on defining and developing CM-related projects (e.g., CMPM 148) during or before CM graduate enrollment. See the list of media creation courses.

• Petition to CM graduate director, presenting evidence of equivalent coursework at another institution and/or equivalent CM project experience in another context.

Computer Programming: All Ph.D students must demonstrate an understanding of computer programming sufficient to carry out CM research, and must do so by the end of their second year in the program—and before the comprehensive exam. This can be completed by:

• Taking a series of courses that integrate media and programming knowledge (e.g., GAME 235, GAME 236, and CMPM 120).

• Taking core programming (e.g., CSE 30 and CSE 101) and advanced programming (e.g., CSE 111) at UCSC or another institution.

• Petition to CM graduate director, presenting evidence of programming knowledge developed in another context.

Interpretive Practices: All Ph.D. students are expected to have an understanding of interpretive and critical methods sufficient to carry our CM research. Students who lack such a background are strongly encouraged to take a series of courses in this area, consulting with their advisor regarding which courses would be most appropriate. The appropriate Interpretive Practices for a given student depends on the specific research area for the student. The key is that the student is able to critique and intervene in their research area from a broader social, cultural and historical perspective. One recommended sequence (which may or may not be appropriate for a specific student) is:

• HISC 1: Introduction to the History of Consciousness. If this is not possible, take an 80-level course that integrates introductory interpretive content (e.g., FILM 80V: Video Games as Visual Culture).

• Take two more graduate or upper-division undergraduate courses that focus on interpretive practices. The CM department offers courses that integrate this with CM knowledge, such as some offerings of CMPM 290A (e.g., Media Constellations) and CMPM 176: Game Systems. Other programs also offer courses that make this integration, such as DANM 201: Recent Methods and Approaches to Digital Arts and Culture and DANM 202: Dialogues and Questions in Digital Arts and Culture. Courses that do not make this integration, but that are connected to the student's research area, are also acceptable.

The final determination that a student has satisfied the media creation, programming, and interpretation requirements is made during the comprehensive exam, including the portfolio review portion of the exam. The coursework suggested above is intended to provide students with the knowledge and skills to successfully pass their comprehensive exam, and to provide appropriate projects for the portfolio portion of the exam. A student should consult with both their advisor and the grad director to determine the best path for being prepared for the comprehensive exam.

Note: In extraordinary circumstances the graduate director can reduce the number of required courses based on a petition presenting past accomplishments. For example, reducing the number of required topics courses by one for each substantial past research publication or system accepted from the petition.

**Lower-Division Courses**

Students who are considering enrolling in lower-division courses in order to fulfill additional degree requirements (e.g., CSE 30, HISC 1) may wish to consult with the
course instructor and their advisor about instead taking an independent study or directed study (with the course instructor, their advisor, or a third faculty member) that subsumes the work of the course and adds additional content to bring it up to a graduate level. Graduate students must be enrolled in some combination of at least 10 credits of courses or independent studies that are either graduate or upper-division undergraduate courses in order to be considered full-time enrolled.

**Teaching Requirement**

**Pre-Qualifying Requirements**

The Ph.D. requires two examinations before the qualifying examination.

**First-Year Examination**

The Ph.D. first-year exam measures students’ understanding of, and ability to synthesize and apply core computational media knowledge (history, theory, research approaches, and evaluation methods). This is the material covered in the CM core courses. The first-year exam must be taken the spring of the year in which students finish their core coursework—which should be the first year, unless students need additional foundation work before taking one of the core courses, in which case it may be the second year.

There are three possible outcomes of the first-year exam:

- **Pass at Ph.D. level**
- **Pass at M.S. level**
- **Fail**

Students who pass at the Ph.D. level are done with the exam. Students who pass at the M.S. level may elect to leave the program with an M.S., upon completion of all M.S. requirements. Both students who pass at the M.S. level and students who fail have the option to take the exam again, in the immediately following summer offering (unless granted an exception to take it the following academic year). Students who take the exam again may not decrease their outcome (e.g., a student who passes at the M.S. level in spring, then fails in summer, retains the option of completing the M.S.). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

In extraordinary circumstances the graduate director may give a student the option of taking the first-year exam without having taken the core coursework (CMPM 201, CMPM 202, and CMPM 203) during any quarter. Those who pass may complete the degree without taking the core courses.

**Ph.D. Comprehensive Examination**

The Ph.D. comprehensive exam measures students’ preparation to perform independent CM research. It must be taken (for the first time) no later than the end of a student’s third year in the program (the ninth quarter, excluding summer quarters). Before taking the exam, students must have completed the preparatory coursework for understanding media creation and computer programming, as well as demonstrated an understanding of interpretive practices (Foundation Areas, as outlined above). The quarter prior to taking the comprehensive exam, students enroll in a 5-credit independent study (CMPM 297B) with their advisor to prepare for the exam. During the quarter in which they plan to take the exam, students enroll in CMPM 206 (a 2-credit course, usually offered by the CM graduate director each quarter) and a 5-credit independent study (CMPM 297B, usually with their advisor), and take an exam evaluated by advisor and graduate director (with another faculty member stepping in if advisor is graduate director). The exam itself includes two components, a literature review and portfolio:

- **Literature Review**: Reading a significant body of material in two or three depth areas of CM—from a list developed by the student, advisor, and course instructor—integrating it, and writing one or more essays about it.
- **Portfolio**: A portfolio review of CM projects, with (a) a detailed written description of the computational system-building goals and process of at least one project led (in this aspect) by the student and (b) a detailed written description of the media-making goals and process of at least one project led (in this aspect) by the student. The projects may be from during or before enrollment in the program, and the written descriptions may be of the same or different projects.

There are three possible outcomes of the comprehensive exam:

- **Pass at Ph.D. level**
- **Pass at M.S. level**
- **Fail**

As with the first-year exam, students who pass the comprehensive exam at the Ph.D. level are done with the exam. Students who pass at the M.S. level may elect to leave the program with an M.S., upon completion of all M.S. requirements. Both students who pass at the M.S. level and students who fail have the option to take the exam again, in a future quarter, not later than the middle of their fourth year in the program (the 11th quarter, excluding summer quarters). Students who take the exam again may not decrease their outcome (e.g., a student who passes at the M.S. level in spring, then fails the following fall, retains the option of completing the M.S.). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.
Qualifying Examination

Qualifying Examination and Advancement to Candidacy

The Ph.D. qualifying examination (QE) measures students’ preparation to begin Ph.D. research. It must be taken (for the first time) no later than the end of a student’s fourth year in the program (the 12th quarter, excluding summer quarters). It has two parts: first, a detailed written description of a proposed dissertation project, distributed to the committee before the oral examination; second, an oral presentation of the project, followed by questioning from the committee.

The committee policy for the CM Ph.D. follows that of UC Santa Cruz. Specifically: The qualifying examination committee shall consist of at least four examiners, one of whom is not a member of the student's department. The department shall submit to the Office of the Graduate Dean at least one month before the proposed examination a list of four qualified persons who are willing to serve on the examination committee, and who meet the following conditions:

- The chair of the examination committee must be a tenured faculty member.
- The student's thesis advisor cannot chair the examination committee.
- The outside member must be (a) a tenured faculty member from a different discipline on the University of California, Santa Cruz, campus, (b) a tenured faculty member of the same or different discipline from another academic institution involved in research and graduate education, or (c) a qualified person outside of academia with significant research experience (as determined by the Graduate Division).

After passing the qualifying examination, students advance to candidacy. Students who do not pass the examination may take it again, but must do so no later than the end of their fifth year in the program. Students may only take the examination twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the examination again.

Planners

Ph.D., Not Seeking M.S. Degree (Students with Technical CM M.S. Degree)

This is a sample program for a student who has completed a master’s degree with significant technical content and a focus on some form of computational media (such as computer games). The M.S. in games and playable media at UC Santa Cruz (offered in Silicon Valley) is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking the GAME 270, GAME 271, and GAME 272 sequence at UCSC) and the requirement for demonstrating an understanding of computer programming (such master’s degrees generally only accept students who know how to program). This program is for a student who wants to complete the Ph.D. without getting a second M.S. in the process.

Ph.D., Seeking M.S. Degree (Students with Non-technical Master’s Degree)

This is a sample program for a student who has completed a master’s degree with significant arts content and a focus on some form of computational media (such as digital art). The M.F.A. in digital art and new media at UC Santa Cruz is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking one of the DANM 250 sequences at UCSC) but not necessarily the
requirement for demonstrating an understanding of computer programming (such master’s degrees generally focus on the strength of the student’s arts portfolio, rather than technical skills). This program is for a student who wants to complete the Ph.D. while getting an M.S. in the process.

This is a sample program for a student who has completed a bachelor’s degree with significant technical content but little focus on any form of computational media. The B.S. in computer science at UC Santa Cruz is such a degree. Such students will have already satisfied the requirement for demonstrating an understanding of computer programming (e.g., by taking a core programming sequence and CSE 111 at UCSC) though students strongly focused on theoretical computer science may need to take an advanced programming course. This program is for a student who wants to complete the M.S. degree on the way to the Ph.D.

Ph.D., Also Seeking M.S. Degree (Students with Technical Non-CM B.S.)
Transfer Credit

Up to 10 credits transferred from equivalent courses in previous graduate work at UC Santa Cruz or elsewhere can be applied toward the Ph.D. course requirements. This can partially satisfy the topics requirement, but is not to exceed the three-course overall limit on transfers from outside institutions. A Course Substitution/Waiver form can be found on the BSOE Graduate Advising webpage.

[Optional Catchall]

Dissertation

Dissertation

The Ph.D. dissertation is a significant contribution to the CM field. It may emphasize technical, media-creation, or interpretive aspects, but must have a significant secondary contribution from at least one of the other areas—and may also emphasize areas equally. It requires an oral defense before a faculty committee, as well as a final dissertation document reviewed by that committee (distributed to the committee before the defense, and revised after the defense in response to committee comments). The committee must include at least two members of the CM Department.

Dissertation Defense

Academic Progress

As noted above, in order to remain in good academic standing, students must:

- Take the first-year exam (for the first time) the spring of the year they finish the core coursework, which should be the first year unless students need additional foundation work, in which case it may be the second year. Students who fail have the option to take the exam again, in the immediately following summer offering (unless granted an exception to take it the following academic year). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

- Take the comprehensive exam (for the first time) no later than the end of a student’s third year in the program (the ninth quarter, excluding summer quarters). Students who fail have the option to take the exam again, in a future quarter, not later than the middle of their fourth year in the program (the 11th quarter, excluding summer quarters). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

- Take the qualifying exam (for the first time) no later than the end of a student’s fourth year in the program (the 12th quarter, excluding summer quarters). Students who do not pass the examination may take it again, but must do so no later than the end of their fifth year in the program. Students may only take the examination twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the examination again.

In addition, because the primary work in the Ph.D. is independent research under the supervision of a faculty advisor, students are expected to be working with a research advisor at all times. This advisor must either be a voting member of the Computational Media Department faculty or another UCSC faculty member granted advisor status by the department in the student's case (either at the time of the student's admission or at a later point). Any student who ends a term without a faculty advisor will be issued a warning. If a student ends two academic quarters without an advisor they will be recommended for dismissal from the program immediately, unless granted an exception.

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

[Optional Catchall]

GAMES AND PLAYABLE MEDIA M.S.

Introduction

The M.S. in games and playable media prepares students to make professional contributions to the creation of games and other forms of media that invite and structure play. The degree is offered through the UC Santa Cruz location in Silicon Valley, enabling connection and collaboration with local industry. The curriculum includes deep engagement with game creation as well as a focus on professional development. Students can also take advantage of the opportunities for coursework and collaboration offered by its “sister” degree, the M.S. in serious games (also offered in Silicon Valley), as well as course offerings in games and related technologies on the Santa Cruz campus, and the potential for connections with the department’s field-leading research groups.

The curriculum covers four core competencies: (1) game design and development, which includes working in a group to design, develop software experiences, elicit user input and test the user experience; (2) game development technologies, including gameplay programming techniques and knowledge of game engines and middleware; (3) knowledge and working practice in industry-standard tools for collaboration and project management, source code management, and content creation; and (4) specialized concentrations in areas such as development of alternative input devices, level design, game audio, game narrative, and others.
The M.S. in Games and Playable Media is a five-quarter program that spans one and two-thirds academic years. Students are expected to complete coursework in five academic quarters, without leaves of absence.

Requirements

Course Requirements

All students are required to take 60 credits to complete the M.S.. Required courses are as follows:

All of the following courses:

- GAME 200 Game Design Systems 5
- GAME 221 Professional Development for Game Makers I 2
- GAME 231 Game Technologies 5
- GAME 270 Games and Playable Media Studio I 5
- GAME 271 Games and Playable Media Studio II 5
- GAME 272 Games and Playable Media Studio III 5
- GAME 280A Games Proseminar 2

GAME 280A must be taken a minimum of two times.

Plus one of the following options:

Either this course
- GAME 230 Fundamentals of Game Engineering 5

or these courses
- GAME 235 Game Development I 5
- GAME 236 Game Development II 5

Students who lack sufficient technical preparation to enter course Games and Playable Media GAME 230, Fundamentals of Game Engineering, must take both GAME 235, Game Development I, and GAME 236, Game Development II. Assessment of technical preparation will be performed based on completed coursework prior to entry into the program, discussion with the student, and, at the program’s discretion, use of a technical assessment examination.

Three courses from the electives list below, 15 credits (5 credits each)

- CMPM 235 User Evaluation of Technology 5
- CMPM 244 Artificial Intelligence in Games 5
- CMPM 248 Interactive Storytelling 5
- CMPM 265 Generative Methods 5
- CMPM 290J Playable Media 5
- CMPM 297 Independent Study 5
- DANM 201 Recent Methods and Approaches to Digital Arts and Culture 5
- DANM 202 Dialogues and Questions in Digital Arts and Culture 5
- DANM 219 Introduction to Electronics for Artmaking 5
- DANM 241B Modern Art: Cubism to Pop 5
- DANM 250E Collaborative Research Project Group: Experimental Play 5
- DANM 254I Empirical Approaches to Art Information 5
- DANM 281 Special Topics in Digital Arts and New Media 5
- GAME 201 Level Design 5
- GAME 202 Foundations of Alternative Controller Games 5
- GAME 210 Game Art Intensive 5
- GAME 215 Audio Direction 5
- GAME 232 Advanced Game Technologies 5
- GAME 238 Computer Graphics for Games 5
- GAME 240 Game Usability 5
- GAME 250 Foundations of Serious Games 5
- GAME 251 Games User Research 5
- GAME 252 Modeling and Simulation 5
- GAME 290A Advanced Topics in Games 5
- MUSC 206B Computer-Assisted Composition 5

Credit for various CMPM 297 options varies. A maximum of five credits of Computational Media 297 (Independent Study or Research) can be used to meet degree requirements.

Master's Capstone Project

Completion of a master's capstone project is required for the master's degree. These are generally collaborative projects, created together with other students in the Games and Playable Media M.S. program. Projects are typically completed by students during GAME 272, Games and Playable Media Studio III. Students are evaluated based on their individual contributions to the project and on the overall success of the project as a whole. Each project will be demonstrated via a public presentation, and this demonstration comprises part of the final project evaluation.

Evaluation of projects is performed by a committee consisting of at least three people, comprised of at least the games and playable media vice chair and will contain other members of the games and playable media program faculty, or members of the games and playable media program advisory committee, or other instructors in the games and playable media program. A majority of the committee’s voting members are members of the UC Santa Cruz academic senate.

Planners

There are two primary paths through the first year of the degree. Students with less technical background take GAME 235 and GAME 236 in their first year, while
those with more technical background take GAME 230 in their first year. All students, regardless of whether they do GAME 235 and GAME 236 or GAME 230, are required to complete at least 60 credits.

The sample programs include summer internships or sponsored projects. These are not required, and do not bear academic credit. They are, however, strongly suggested.

**Sample program for students with more technical background**

| Fall Quarter 1 | GAME 230, Fundamentals of Game Engineering (5 credits) |
|               | GAME 200, Game Design Systems (5 credits) |
|               | GAME 280A, Games Proseminar (2 credits) |
| Winter Quarter 2 | Elective 1 (5 credits) |
|               | Elective 2 (5 credits) |
|               | GAME 280A, Games Proseminar (2 credits) |
| Spring Quarter 3 | GAME 231, Game Technologies (5 credits) |
|               | GAME 270, Games and Playable Media Studio 1 (5 credits) |
|               | GAME 221, Professional Development for Game Makers I (2 credits) |
| Summer | Internship or Sponsored Project |
| Fall Quarter 4 | GAME 271, Games and Playable Media Studio II |
|               | Elective 3 (5 credits) |
|               | GAME 280A, Games Proseminar (2 credits) |
| Winter Quarter 5 | GAME 272, Games and Playable Media Studio III (5 credits) |
|               | Elective 4 (5 credits) |
|               | GAME 280A, Games Proseminar (2 credits) |

**Sample program for students with less technical background**

| Fall Quarter 1 | GAME 235, Development I (5 credits) |
|               | GAME 200, Game Design Systems (5 credits) |
|               | GAME 280A, Games Proseminar (2 credits) |
| Winter Quarter 2 | GAME 236, Game Development II (5 credits) |

**Transfer Credit**

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. The game art, game writing, and game sound requirements of the M.S. program may also be satisfied through courses from other institutions or prior UCSC coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

**Review of Progress**

On an ongoing basis, the faculty reviews the progress of every student remaining on track to complete the degree in five consecutive academic quarters. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in five academic quarters.
Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the Games and Playable Media Studio sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half-quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their advisor and the graduate director immediately. Students may appeal their dismissal.

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

HUMAN COMPUTER INTERACTION M.S.

Introduction

The Master’s of Science (M.S.) in Human Computer Interaction aims to train students in core skills for human-computer interaction professionals: design methodologies, prototyping and technical build skills, eliciting and integrating subject matter knowledge, designing and conducting efficacy measurements, effective teamwork, and career planning—all within the context of user experience and interaction. The curriculum is designed to accommodate students who have expertise in the social sciences, technical skills, and/or subject matter knowledge. Students with varying knowledge will be intentionally mixed together in coursework, in order to maximize peer learning and collaboration across strengths. The degree is offered through the UC Santa Cruz location in Silicon Valley, alongside the Games + Playable Media, Serious Games, and Natural Language Processing M.S. degrees, to enable students to connect and collaborate across programs and with local industry leaders.

The M.S. in Human Computer Interaction is a four-quarter program that begins in fall quarter, includes career planning courses and activities, and encourages student internships during summer. Students are expected to complete coursework in four academic quarters, without leaves of absence.

Requirements

Course Requirements

All students are required to complete at least 53 credits for the M.S. The required courses are as follows:

All of the following courses:

- HCI 200 Introduction to HCI 5
- HCI 201 Introduction to Design 5
- Methods in HCI
- HCI 203 Introduction to Research 5
- HCI 271 HCI Capstone 1 5
- HCI 272 Capstone 2 5

Plus one of the following courses:

- HCI 202A Introduction to HCI Build: Bootcamp 5
- HCI 202B Introduction to Build: Advanced 5

Students with less technical background should enroll in HCI 202A, while students with more technical background should enroll in the advanced course HCI 202B. The courses share some class time and will, therefore, be delivered during the same quarter.

Plus this two-credit course which must be taken every academic quarter:

- HCI 290 HCI Seminar 2

HCI 290 must be taken every quarter for a total of four times (8 credits).

Two courses from the elective list below:

All students are required to enroll and pass (letter grade "B-" or better or an "S" grade) in a minimum of two elective courses chosen from the list below.

- ART 184 3D Art and Design: Laser Cutting and CNC Routing 5
- ART 185 3D Art and Design II 5
- CMPM 201 Introduction to Computational Media 5
- CMPM 202 Computation Media Research 5
- CMPM 203 Computational Media Methods 5
- CMPM 235 User Evaluation of Technology 5
- CMPM 290J Playable Media 5
- CMPM 297A Independent Study or Research 5
- FILM 225 Software Studies 5
- FILM 232 Audiovisual Ethnography 5
- FILM 283 New Media Art and Digital Culture 5
GAME 200  Game Design Systems  5
GAME 210  Game Art Intensive  5
GAME 215  Audio Direction  5
GAME 231  Game Technologies  5
GAME 232  Advanced Game Technologies  5
GAME 240  Game Usability  5
GAME 250  Foundations of Serious Games  5
GAME 251  Games User Research  5
GAME 290A  Advanced Topics in Games  5

A maximum of five credits of CMPM 297A, Independent Study or Research, can be used to meet degree requirements.

Master's Capstone Project

Completion of a master's capstone project is required for the M.S. degree. All students are required to take the capstone sequence (HCI 271 and HCI 272), in which they collaborate to develop an interactive system and measure its efficacy. The capstone sequence also includes professional development modules in its curriculum. During HCI 271, Capstone I, students form project teams, brainstorm and iterate ideas for the capstone projects, culminating in approved briefs and project teams, including an approved committee of advisors for each project. Advisors may be local industry professionals (including industry partners who have proposed projects), or may also be UC Santa Cruz faculty from the main campus. HCI 272, Capstone II, is a double-weighted course (10 credits) in which students produce their capstone projects through extensive workshopping, critique, and testing. The quarter culminates in a showcase of student work.

Evaluation of projects is performed by a committee consisting of at least three people, including the HCI vice chair. The committee will also contain other members of the HCI program faculty, or members of the HCI program advisory committee, or other instructors in the HCI program. A majority of the committee's voting members are members of the UC Santa Cruz academic senate.

Planners

There are two primary paths through the first year of the degree that require the same number of courses. Students with less technical background take HCI 202A, while those with more technical background take HCI 202B. The sample programs include summer internships or sponsored projects. These are not required, and do not bear academic credit. They are, however, strongly recommended.

Sample program for students with less technical background

Fall Quarter 1

HCI 200, Foundations of HCI (5 credits)

HCI 201, Introduction to Design Methods in HCI (5 credits)

Spring Quarter 3

HCI 271, Capstone I (5 credits)

HCI 203, Introduction to Research (5 credits)

Summer

Internship or Sponsored Project

Fall Quarter 4

HCI 272, Capstone II (10 credits)

Elective 2 (5 credits)

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. One of the three core introduction classes (Intro to Build, Intro to Methods, and Intro to Design) may also be satisfied through courses from other institutions or prior UC Santa Cruz coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such
petitions are not considered until the completion of at least one quarter at UC Santa Cruz.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

Review of Progress

On an ongoing basis, the faculty reviews the progress of every student so they remain on track to complete the degree in four consecutive academic quarters. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in a single four-quarter year.

Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the HCI capstone sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their advisor and the graduate director immediately. Students may appeal their dismissal.

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

SERIOUS GAMES M.S.

Introduction

The M.S. in serious games prepares next generation designers and developers for games and interactive experiences that have a purpose other than entertainment, such as experiences that can serve as applications for education, informal learning, health or training. We expect students coming into this degree to be highly motivated to make social impact by designing experiences targeting different markets, such as EdTech, health and wellbeing, personal enrichment, fitness, and medicine. The degree is offered through the UC Santa Cruz location in Silicon Valley to enable students to connect and collaborate with the local industry in the markets mentioned above.

The curriculum covers four core competencies: (1) game design and development, which includes working in a group to design, develop software experiences, elicit user input and test the user experience (similar to its “sister” degree games and playable media also offered in Silicon Valley Campus); (2) fundamental knowledge of working with experts in an application area to develop and measure a targeted impact; (3) statistical analysis, modeling and simulation; and (4) conducting efficacy measurements and developing summative evaluation measures.

The M.S. in serious games is a five-quarter program that begins in fall quarter, includes career planning courses and activities, and encourages student internships during summer. Students are expected to complete coursework in five academic quarters, without leaves of absence.

Requirements

Course Requirements

Students are required to complete at least 50 credits for the M.S., and more credits are recommended for students without full preparation before beginning the degree, as discussed in the “Planners” section, below. The required courses are as follows:

All of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GAME 200</td>
<td>Game Design Systems</td>
<td>5</td>
</tr>
<tr>
<td>GAME 221</td>
<td>Professional Development for Game Makers</td>
<td>5</td>
</tr>
<tr>
<td>GAME 250</td>
<td>Foundations of Serious Games</td>
<td>5</td>
</tr>
<tr>
<td>GAME 255</td>
<td>Serious Games Studio I</td>
<td>5</td>
</tr>
<tr>
<td>GAME 256</td>
<td>Serious Games Studio II</td>
<td>5</td>

<tr>
<td>GAME 221</td>
<td>Game Development I</td>
<td>5</td>
</tr>
<tr>
<td>GAME 226</td>
<td>Game Development II</td>
<td>5</td>
</tr>
</tbody>
</table>

GAME 280A must be taken a minimum of two times.

Plus one of the following options:

Either this course

- GAME 230 | Fundamentals of Game Engineering | 5 |

or these courses

- GAME 235 | Game Development I | 5 |
- GAME 236 | Game Development II | 5 |

Students who lack sufficient technical preparation to enroll in GAME 230, Fundamentals of Game Engineering, must take both GAME 235, Game Development I, and GAME 236, Game Development II. Assessment of technical preparation will be performed...
based on completed coursework prior to entry into the program, discussion with the student, and, at the program’s discretion, use of a technical assessment examination.

**Three courses from the elective list below**

Students are required to take a minimum of three electives. These electives may be of two types: computational media electives and subject matter electives. Students are expected to take at least one computational media elective.

Computational media electives are offered at the Silicon Valley or Santa Cruz campus of UC Santa Cruz and focus on games, or related forms of computational media, or related topics in computing and culture. The current offerings in this category are listed below. Subject matter electives are taken to deepen a student’s understanding of the specific subject matter on which they may develop a game, or may already be developing a game. These may be drawn from across the graduate and upper-division undergraduate curriculum at UC Santa Cruz, given that the potential subject areas for serious games are vast.

| CMPM 235 | User Evaluation of Technology | 5 |
| CMPM 244 | Artificial Intelligence in Games | 5 |
| CMPM 248 | Interactive Storytelling | 5 |
| CMPM 265 | Generative Methods | 5 |
| CMPM 290J | Playable Media | 5 |
| CMPM 297 | Independent Study | 5 |
| CSE 201 | Analysis of Algorithms | 5 |
| CSE 210A | Programming Languages | 5 |
| DANM 201 | Recent Methods and Approaches to Digital Arts and Culture | 5 |
| DANM 202 | Dialogues and Questions in Digital Arts and Culture | 5 |
| DANM 219 | Introduction to Electronics for Artmaking | 5 |

| GAME 251 | Games User Research | 5 |
| GAME 252 | Modeling and Simulation | 5 |

Credit for different CMPM 297 options vary. A maximum of five credits of CMPM 297 (Independent Study or Research) can be used to meet degree requirements.

**Master's Capstone Project**

Completion of two master's capstone projects are required for the master's degree targeting two different Serious Games markets, and thus enabling students a diverse portfolio targeting different markets and application areas. These projects are usually done in collaboration with other students and involve a design process of ideation, user experience inquiry and design, rapid prototyping and development given a stakeholder, usually a subject matter expert who defines the project goal, desired impact and outcomes. The two capstone projects are completed through interdisciplinary teamwork working closely with a stakeholder, which is also how the professional field is organized. Students are evaluated based both on their individual contributions to the project and on the overall success of the project as a whole given the stakeholders’ goals, desired impacts and outcomes. Each project will be demonstrated via a public presentation, and this demonstration constitutes part of the final project evaluation.

Evaluation of projects is performed by a committee consisting of at least three people, comprised of at least the Serious Games vice chair, a Computational Media Faculty member, and an outside member, who can be a faculty member, an industry practitioner, or other members of the program advisory boards, or other instructors in the programs. A majority of the committee’s voting members are members of the UC Santa Cruz academic senate.

**Planners**

There are two primary paths through the first year of the degree. Students with less technical background take GAME 235, GAME 236, and GAME 231 in their first year, while those with more technical background take GAME 230 and GAME 231 in their first year.

The sample programs include summer internships or sponsored projects. These are not required, and do not bear academic credit. They are, however, strongly suggested.

**Sample program for students with more technical background**

<p>| Fall Quarter | GAME 230, Fundamentals of Game Engineering (5 credits) |
| GAME 200, Game Design Systems (5 credits) |</p>

**Transfer Credit**

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. The elective requirement of the M.S. program may also be satisfied through courses from other institutions or prior UCSC coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

**Review of Progress**

On an ongoing basis, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two five-credit courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in five academic quarters.

Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the Serious Games Studio sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.
Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

Computer Science and Engineering

Baskin School of Engineering
(831) 459-2158
http://www.soe.ucsc.edu

PROGRAMS OFFERED

Computer Engineering B.S. (p. 473)
Computer Science B.S. (p. 479)
Computer Science B.A. (p. 484)
Network and Digital Technology B.A. (p. 489)
Computer Engineering Minor (p. 494)
Computer Science Minor (p. 494)
Computer Science and Engineering Bachelor’s/Master’s Contiguous Pathway
Computer Science and Engineering M.S. (p. 496)
Natural Language Processing M.S. (p. 502)
Computer Science and Engineering Ph.D. (p. 499)
Human Language Media and Modeling Designated Emphasis (p. 504)

OTHER PROGRAMS OF INTEREST

Computer Science: Computer Game Design B.S. (p. 448)
Robotics Engineering B.S. (p. 514)
Technology and Information Management B.S. (p. 540)
Technology and Information Management Minor (p. 545)

Computing spans multiple areas that are continually evolving, spurred by both technological and theoretical advances; the current areas can be roughly categorized as follows:

• Design and architecture, or how computing systems are built: from VLSI/CAD, to architectures and parallel systems.

• Systems, or how the architectures can be organized: operating systems, storage, networking, and databases, the languages used to program them, and the techniques used to ensure their secure operation.

• Theory, concerning the abstract properties of computing systems, spanning from the theory of computation to algorithms, from the foundations of programming languages and concurrency to the theory of databases and distributed systems.

• Data science, or how to computationally understand information about the world, including artificial intelligence and machine learning, natural language processing and vision.

• Applications, or how computing systems can be used and what the implications of their use are, from web to mobile systems, from vision to assistive technologies, from fairness and privacy issues to the societal implications of computing, to the incentive structures that make collaboration and communication possible.

Computing at UC Santa Cruz has already attained a very high level of international recognition. The Computer Science and Engineering Department’s organization, as a single cohesive department, facilitates new projects and courses that span multiple areas. As a broad department, it benefits from a wider and more prepared graduate student cohort, and the close coordination of degrees with course offerings that provide engineering majors with more streamlined and cutting-edge degree programs. With its proximity to Silicon Valley and its outstanding research, UCSC is a leader in computing research and education.

The Computer Science and Engineering Department offers five undergraduate degree programs, three undergraduate minors, and graduate master’s and doctoral degree programs.
Two additional programs in the Baskin School of Engineering share the same introductory programming courses as the Computer Science and Engineering Department’s computing majors. The Computational Media Department offers a degree that focuses on computer game design by providing students with artistic, systems, and management perspectives for developing computer games. The Electrical and Computer Engineering Department offers a degree in robotics that builds on courses in computer engineering and electrical engineering, combined with mechanical engineering, that focuses on constructing and controlling robotic devices.

UNDERGRADUATE PROGRAM

The Computer Science and Engineering Department at UC Santa Cruz offers five undergraduate degrees and three related minors:

The bachelor of science (B.S.) in computer engineering prepares graduates for a rewarding career in engineering. UCSC computer engineering graduates will gain a thorough grounding in the principles and practices of computer engineering and the scientific and mathematical principles upon which they are built; they will be prepared for further education (both formal and informal) and for productive employment in industry. Because computer engineering is so broad, the B.S. in computer engineering offers four specialized concentrations for completing the program: systems programming, computer systems, networks, and digital hardware.

The bachelor of science (B.S.) in computer science is appropriate for students desiring a strong concentration in the core areas of computer science—algorithms, programming languages, and systems—with more courses in computer science, computer engineering, and computational media; this program also allows for a few electives outside of science and engineering.

The bachelor of arts (B.A.) in computer science is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including some courses outside of science and engineering, or even for a double major in another discipline.

The bachelor of arts (B.A.) in network and digital technology provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes that make those technologies function. The program is tailored to students who wish to combine technology with other fields or have a general focus on digital design or computer networks. The B.A. in network and digital technology is not an engineering degree, but B.A. graduates will be prepared to work with technology development in other capacities, or join the computer network workforce.

At UC Santa Cruz, students in computing majors are first introduced to programming using the Python programming language in CSE 20, Beginning Programming in Python. The core programming sequence, courses CSE 13S, Computer Systems and C Programming, (or CSE 13E Embedded Systems and C Programming), and CSE 30, Programming Abstractions: Python, expose students to more advanced concepts in C and Python. CSE 12, Computer Systems and Assembly Language & Laboratory, is taken prior to CSE 13S or CSE 13E to provide the underpinnings of computer organization necessary for mastering the C programming language. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30 and CSE 12. Note that CSE 30 assumes some Python experience, students trained in a different language should self-study Python to prepare for CSE 30. See the CSE 20 Testout Exam website for resources and further information.

Many computer engineering and computer science students continue their education through the M.S. degree. The Department of Computer Science and Engineering offers a combined B.S./M.S. pathway in computer science and engineering that enables eligible undergraduates to move without interruption to the graduate program. Interested students should contact their adviser for more details.

COURSES FOR NON-MAJORS

The Department of Computer Science and Engineering offers course CSE 3, Personal Computer Concepts: Software and Hardware, providing students an introductory course on the design and use of computers from an engineering viewpoint. Other courses of interest to non-majors include CSE 20, Beginning Programming in Python and CSE 12, Computing Systems and Assembly Language & Laboratory an introductory course on computer systems, system software, and machine-level programming; CSE 80N, Introduction to Networking and the Internet, an introduction to technological services of the Internet; and CSE 80A, Universal Access: Disability, Technology, and Society.

GRADUATE PROGRAM

The Department of Computer Science and Engineering offers a doctorate (Ph.D.) and a master of science (M.S.) degree program. Graduate students in these programs establish a solid foundation in algorithms, architectures, programming languages, and then proceed to a thorough study of recent developments in their selected area of specialization. The department offers the M.S. in the Natural Language Processing professional degree program.

The normative time for the CSE Ph.D. program is five years for a full-time student. Students admitted to the CSE Ph.D. program are generally supported in the form of a combination of fellowships, teaching assistantships, and/or graduate research assistantships.
The normative time for CSE M.S. thesis track programs is two years for a full-time student and from one year to four quarters for the M.S. project track programs. The CSE M.S. thesis track is for students interested in advanced studies and carrying out independent research as well as those contemplating pursuit of a Ph.D. degree. The M.S. in Natural Language Processing program is a full yearlong program (fall through summer) offered through the UCSC campus location in Silicon Valley.

COMPUTER ENGINEERING B.S.

Information and Policies

Introduction

The following concentrations are specializations for the computer engineering student. Students must complete all of the courses listed within their selected concentration. The four concentrations differ by only five specialized courses; the remaining courses are the same.

Systems Programming Concentration

The systems programming concentration focuses on software systems: courses include operating systems, compilers, software engineering, and advanced programming. Students finishing this concentration are very well prepared for building large software systems of all types. This concentration is the closest one to a computer science major—the main differences are that it does not require computer science theory courses, but because of the core computer engineering requirements, includes more hardware and electronics than a computer science bachelor's degree.

Computer Systems Concentration

The computer systems concentration provides a balance between software and hardware design. Students are prepared for a large variety of different design tasks, especially those requiring the integration of hardware and software systems, but may need further training for any particular specialization.

Networks Concentration

The networks concentration focuses on communication between computers, covering both network hardware and protocols. Students finishing this concentration are well prepared for the design of wired and wireless network systems.

Digital Hardware Concentration

The digital hardware concentration focuses on hardware design and includes more electronics than the other concentrations. Students finishing this concentration are well prepared for building hardware systems. This concentration is the closest one to an electronics major; the main differences are that it does not require as much electronics theory or analog electronic design, but because of the core computer engineering requirements, requires more software skills.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

Getting Started in the Major

Program Learning Outcomes

For the Computer Engineering B.S. degree, the program learning outcomes are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process to meet desired needs within realistic constraints;
- an ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Qualification Policy and Declaration Process

Major Qualification

In order to declare the computer engineering major students must be listed as a proposed major within the School of Engineering. Please refer to the School of Engineering's "Proposed Major Retention" and its "Declaring a School of Engineering Major" sections in the catalog for more information.

To qualify for the computer engineering major students must have completed at least 36 credits in the CE Major Qualification Courses listed below and satisfy the following:

1. their combined GPA is at least 2.8 in all of the CE Major Qualification Courses attempted; and
2. they have no more than 7 credits resulting in grades of C-, D+, D, D-, F or NP among all of the CE Major Qualification Courses attempted.

### CE Major Qualification Courses

All of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>

<td>1</td>
</tr>
</tbody>
</table>

### Appeal Process

Students who are informed that they are not qualified for the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

### How to Declare a Major

There are four steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Students should start the declaration of major process by completing Step One on the BSOE Declare Your Major website as soon as they complete 36 credits in the CE major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed enough courses.

### Transfer Information and Policy

### Transfer Admission Screening Policy

**Students should complete at least six of the following**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 19B</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>AM 10</td>
<td>Mathematical Methods for Engineers I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 21</td>
<td>Linear Algebra</td>
<td>5</td>
</tr>
<tr>
<td>AM 20</td>
<td>Mathematical Methods for Engineers II</td>
<td>5</td>
</tr>
<tr>

<td>1</td>
</tr>
</tbody>
</table>

Lecture/lab combinations count as one course.

CSE 13S and ECE 13 are alternatives; only one or the other, whichever is completed first, can count toward the six courses.
AM 30 and MATH 23A are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 10 and MATH 21 are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

Cumulative GPA

Their cumulative GPA should be at least 2.8 in all of the courses attempted.

Transfer students who wish to graduate in two years are strongly recommended to complete all lower division major requirements and most General Education requirements before coming to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's website.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

| Optional Catchall |

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from another department at UC Santa Cruz, or from another academic institution, must first seek approval through the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution to be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the undergraduate advising office and on the Undergraduate Affairs website.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students completing the computer engineering major cannot also receive the computer engineering minor or the Network and Digital Technology B.A. degree.

Study Abroad

Honors

Majors are considered for “Honors in the Major” and “Highest Honors in the Major” based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.70, in most cases, receive highest honors. Students with a GPA of 3.30, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA. Computer engineering juniors and seniors may also be eligible for election to the UC Santa Cruz chapter of Tau Beta Pi, the national engineering honor society founded in 1885.

Materials Fee and Miscellaneous Fees

Please see the section on fees under the School of Engineering.

Requirements and Planners

Course Requirements (all concentrations)

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

Lower-Division Courses

All of the following

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 19A</td>
<td>Calculus for Science, Engineering, and Mathematics</td>
<td>5</td>

</thead>
<tbody>
<tr>
<td>CSE 13S</td>
<td>Computer Systems and C Programming</td>
<td>7</td>
</tr>
<tr>
<td>ECE 13</td>
<td>Computer Systems and C Programming</td>
<td>7</td>
</tr>
</tbody>
</table>
Plus all of the following
CSE 16  Applied Discrete Mathematics  5
CSE 20  Beginning Programming in Python  5
CSE 30  Programming Abstractions: Python  7
PHYS 5A  Introduction to Physics I  5
PHYS 5L  Introduction to Physics I Laboratory  1
PHYS 5C  Introduction to Physics III  5
PHYS 5N  Introduction to Physics Laboratory III  1

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30, and CSE 12.

Plus one of the following options
Either these courses
PHYS 5B  Introduction to Physics II  5
PHYS 5M  Introduction to Physics II Laboratory  1
or this course
ECE 9  Statics and Mechanics of Materials  5

Upper-Division Courses
Core requirements:
(In addition to the core requirements students must complete the courses for one of the concentrations.)
CSE 100  Logic Design  5
CSE 100L  Logic Design Laboratory  2
CSE 101  Introduction to Data Structures and Algorithms  5
CSE 107  Probability and Statistics for Engineers  5
CSE 120  Computer Architecture  5
CSE 121  Microprocessor System Design  5
CSE 185E/CSE 101  Technical Writing for Computer Science and Engineering  5
ECE 101  Introduction to Electronic Circuits  5
ECE 101L  Introduction to Electronic Circuits Laboratory  2
ECE 103  Signals and Systems  5
ECE 103L  Signals and Systems Laboratory  2

Disciplinary Communication (DC) Requirement
Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in computer engineering is satisfied by one of the following:

CSE 195  Senior Thesis Research  5
CSE 185E/CSE 101  Technical Writing for Computer Science and Engineering  5

Comprehensive Requirement
Capstone Requirement
All computer engineering students complete one of the following capstone sequences:

Both of the following courses
CSE 123A  Engineering Design Project I  5
CSE 123B  Engineering Design Project II  7

Or all of the following courses
CSE 129A  Capstone Project I  2
CSE 129B  Capstone Project II  5
CSE 129C  Capstone Project III  5

Or the following course
CSE 195  Senior Thesis Research  5

CSE 195 also requires the submission of an approved senior thesis.

Or all of the following courses
CSE 115A  Introduction to Software Engineering  5
CSE 115B  Software Design Project  5
CSE 115C  Software Design Project II  5

Or the following course
ECE 118  Introduction to Mechatronics  10

May not also be used as a concentration elective.

Or both of the following courses
CSE 115A  Introduction to Software Engineering  5
CSE 115D  Software Design Project - Accelerated  5

Or the following course
CSE 157  Internet of Things  7

May not also be used as a concentration elective.

Exit Requirement
Students are required to complete an exit survey and attend an exit interview. Portfolios of the student's work will be collected from our courses for program evaluation. The portfolios will be reviewed by the computer engineering undergraduate committee and will include two project reports: CSE 121 and either the senior capstone report (CSE 115C, or CSE 115D, or CSE 129A and CSE 129B and CSE 129C, or CSE 123A and CSE 123B, or ECE 118, or CSE 157) or the student’s senior thesis.
Concentration Courses

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

Computer Systems Concentration Requirements

One of the following courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 125</td>
<td>Logic Design with Verilog</td>
<td>5</td>
</tr>
<tr>
<td>CSE 122</td>
<td>Introduction to VLSI</td>
<td>5</td>
</tr>
</tbody>
</table>

CSE 222A, Advanced VLSI Digital System Design, may be substituted for CSE 122 with department approval.

Plus the following course

CSE 130 Principles of Computer Systems Design 5

Plus one of the following courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 111</td>
<td>Advanced Programming</td>
<td>5</td>
</tr>

<tr>
<td>CSE 220</td>
<td>Computer Architecture</td>
<td>5</td>
</tr>
<tr>
<td>ECE 171</td>
<td>Analog Electronics</td>
<td>5</td>
</tr>
</tbody>
</table>

ECE 171L Analog Electronics Laboratory 2
ECE 173 High-Speed Digital Design 5
ECE 173L High-Speed Digital Design Laboratory 2

Lecture/lab combinations count as one course.

Note that CSE 122 or ECE 171 and ECE 171L cannot be used again here.

Plus one upper-division or graduate elective

From the approved elective list (p. 507) or the department’s approved list of electives for the computer engineering major.

Networks Concentration Requirements

All of the following courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 150</td>
<td>Introduction to Computer Networks</td>
<td>5</td>
</tr>
<tr>
<td>CSE 150L</td>
<td>Introduction to Computer Networks Laboratory</td>
<td>2</td>

<tr>
<td>CSE 156</td>
<td>Network Programming</td>
<td>5</td>
</tr>
<tr>
<td>CSE 156L</td>
<td>Network Programming Laboratory</td>
<td>2</td>
</tr>
<tr>
<td>CSE 130</td>
<td>Principles of Computer Systems Design</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus one of the following options

Either the lecture/lab combination of CSE 151 and CSE 151L, or one upper-division or graduate elective from the approved elective list (p. 504) or the department’s approved list of electives for the computer engineering major.

System Programming Concentration Requirements

The following course

CSE 130 Principles of Computer Systems Design 5

Plus one of the following courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 111</td>
<td>Advanced Programming</td>
<td>5</td>
</tr>
<tr>
<td>CSE 115A</td>
<td>Introduction to Software Engineering</td>
<td>5</td>
</tr>
<tr>
<td>CSE 134</td>
<td>Embedded Operating Systems</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus both of the following courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 150</td>
<td>Introduction to Computer Networks</td>
<td>5</td>
</tr>
<tr>
<td>CSE 150L</td>
<td>Introduction to Computer Networks Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

Plus one of the following options

Either the lecture/lab combination of CSE 151 and CSE 151L, or one upper-division or graduate elective from the approved elective list (p. 506) or the department’s approved list of electives for the computer engineering major.
Plus one of the following courses
CSE 113 Parallel and Concurrent Programming 5
CSE 156 Network Programming 5
CSE 156L Network Programming Laboratory 2
CSE 110A Fundamentals of Compiler Design I 5

CSE 156 and CSE 156L lecture/lab combination count as one course.

Planners
Below are two sample academic plans for students majoring in computer engineering. Since the plans for the third and fourth years will vary according to the concentration and capstone selected, placeholders for these courses have been indicated with “concentration course” and “capstone course.” As part of the major declaration process students prepare a four-year plan based on a concentration and this may affect the placement of other courses as well. Careful planning at the time of declaration is required to complete the degree within four years. Entering frosh who have little programming experience, are strongly advised to take a programming course in the fall quarter. Students completing the courses in the four-year planners will have satisfied the MF, PR-E, SI, and SR general education requirements.

Plan One for Entering Frosh
This plan is for students with programming experience who are prepared for MATH 19A.

<table>
<thead>
<tr>

Plan for Junior Transfers
Below is a sample academic plan for students transferring to UC Santa Cruz in computer engineering for their junior year. It assumes that all but one lower-division and all general education course requirements have been satisfied. Since the plans for the third and fourth years vary according to the concentration and capstone selected, placeholders for these courses have been indicated with “concentration course” and “capstone course.” As part of the major declaration process students prepare a plan based on a concentration and this may affect the placement of other courses as well. Careful planning at the time of declaration is required to complete the degree within two years.

<table>
<thead>
<tr>
<th>Fall</th>
<th>Winter</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>

Careful planning at the time of declaration is required to complete the degree within two years.
Computers and the changing landscape of healthcare.

The rapid advancement of technology has brought about significant changes in the healthcare sector. Electronic health records (EHRs) have become a cornerstone of modern healthcare, improving access to patient information and facilitating more efficient patient care. However, this digital transformation also presents new challenges, particularly in the realm of data security and privacy.

The most common computer-related risk in healthcare is the potential for personal information such as medical records and patient identities to be compromised. This can happen through a variety of means, including hacking, phishing, and wrongful disclosure. These incidents can lead to serious consequences for both patients and the organizations that manage their data.

To address these risks, organizations must implement robust security measures. This includes not only technical safeguards such as firewalls and encryption but also organizational policies that promote a culture of awareness and accountability.

1. **EHRs and Privacy**
   - EHRs store sensitive information that must be protected.
   - Proper access controls and encryption are critical.

2. **Data Privacy Laws**
   - HIPAA (Health Insurance Portability and Accountability Act) is the main U.S. law governing the protection of sensitive health information.
   - Understanding and adhering to data privacy laws is essential.

3. **Employee Training**
   - Regular training on data security and privacy is necessary for all employees.

4. **Cybersecurity Measures**
   - Implementing strong firewalls and intrusion detection systems is vital.
   - Regularly testing systems for vulnerabilities can prevent data breaches.

By addressing these areas, organizations can better safeguard the sensitive information that is so crucial to effective patient care.
ECE 13 Computer Systems and C Programming 7
CSE 13S recommended
And these courses
CSE 12 Computer Systems and Assembly Language 5
CSE 30 Programming Abstractions: Python 7
Plus one of the following
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 20A Honors Calculus 5
Plus one of the following
MATH 19B Calculus for Science, Engineering, and Mathematics 5
MATH 20B Honors Calculus 5
Cumulative GPA
Students must also have a cumulative GPA of at least 3.0 in the CS major qualification courses attempted at UC Santa Cruz, with at most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) permitted in a CS major qualification course.

Appeal Process
Students who are informed that they do not qualify for the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major
Students interested in pursuing computer science must indicate computer science as a proposed major on their application for admission to UC Santa Cruz. Students admitted to UCSC in fall 2018 or later will be able to declare a computer science major only if they have been admitted to UCSC as proposed computer science majors.

There are four steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Students should start the declaration of major process by completing Step One on the BSOE Declare Your Major website as soon as they complete the CS major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed all CS major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy
Prior to admission, transfer students must have completed the following five courses or their articulated equivalents with a combined minimum GPA of 3.0.

Lecture/lab combinations count as one course.

This course
CSE 30 Programming Abstractions: Python 7
Plus one of the following
CSE 13S Computer Systems and C Programming 7
ECE 13 Computer Systems and C Programming 7
Plus one of the following options
Either this course
CSE 12 Computer Systems and Assembly Language 5
or this course
CSE 16 Applied Discrete Mathematics 5
Plus one of the following
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 20A Honors Calculus 5
Plus one of the following
MATH 19B Calculus for Science, Engineering, and Mathematics 5
MATH 20B Honors Calculus 5
Minimum GPA
The combined GPA in the five courses above must be at least of 3.0. A student lacking one of these five courses may be admitted if they have completed CSE 16, and CSE 12, or the articulated alternative.

Furthermore, transfer students entering in the fall must have completed at least three of these courses by the end of the fall term of the previous academic year and have a minimum 3.0 GPA over all completed CS major qualification courses at that time.

Transfer students are strongly recommended to complete CSE 16 as part of their screening courses, and to complete one course out of MATH 21, AM 10, MATH 23A or AM 30, and most general education requirements prior to arriving at UC Santa Cruz.
Transfer students admitted for the winter term must satisfy the major preparation criteria for transfer students admitted for the fall term and, additionally, must have successfully completed at least two additional courses that are required for the proposed degree, prior to admission. It is highly recommended that these courses should be AM 10 (or MATH 21) and AM 30 (or MATH 23A).

Most courses in the computer science program at UC Santa Cruz have a strong theoretical component to prepare the student for designing, as opposed to simply using, computer systems. Often, courses taken at other institutions which emphasize applications of current languages and computers do not count toward the computer science major at UCSC.

At UCSC, computer science students are first introduced to programming using the programming language Python. The core programming sequence—courses CSE 30 and CSE 13S (or ECE 13)—exposes students to both Python and C. Many upper-division courses that involve programming use the C and C++ programming languages.

Transfer students who are not familiar with both an object-oriented language and C may need to take a remedial course. Students familiar with C++ and Unix should find the transition to Python and C relatively simple.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from another department at UC Santa Cruz, or from another academic institution, must first seek approval through the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students may not receive both the computer science B.A. and computer science B.S. degrees.

Study Abroad

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

[Optional Catchall]

Requirements and Planners

Course Requirements

This program is designed for students who wish to maximize exposure to computer science concepts and methods by taking a large selection of upper-division computer science courses, as well as courses in the sciences and mathematics. A minimum of 20 courses must be completed for the B.S. in computer science.

Lower-Division Courses

Computer Science and Engineering

All of the following

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 12</td>

AM 30  Multivariate Calculus for Engineers  5
MATH 23A  Vector Calculus  5

Engineering Science

ECE 30  Engineering Principles of Electronics  5

Upper-Division Courses

Computer Science and Engineering

The following courses:
CSE 101  Introduction to Data Structures and Algorithms  5
CSE 102  Introduction to Analysis of Algorithms  5
CSE 103  Computational Models  5
CSE 120  Computer Architecture  5
CSE 130  Principles of Computer Systems Design  5

Plus one of the following
CSE 112  Comparative Programming Languages  5
CSE 116  Introduction to Functional Programming  5

Statistics

One of the following:
STAT 131  Introduction to Probability Theory  5
CSE 107  Probability and Statistics for Engineers  5

Electives

Four courses must be completed from the list below. At least one course must be a computer science and engineering course. At most two courses can be from applied mathematics, statistics or mathematics, of which at most one may be substituted with two physics classes, chosen from the following list of class pairs: PHYS 6A and PHYS 6C, PHYS 6A and PHYS 6B, PHYS 5A and PHYS 5C, PHYS 5A and PHYS 5B. Any laboratories required or recommended by the Physics Department associated with these classes are not part of the computer science B.S. major requirements.

List of B.S. electives:

1. Any CSE course with a number below 170, or between 180 and 189, except for the DC courses CSE 115A and CSE 185E/CSE 185S.

2. or any course from the following list:
   AM 114  Introduction to Dynamical Systems  5
   AM 147  Computational Methods and Applications  5
   CMPM 120  Game Development Experience  5
   CMPM 131  User Experience for Interactive Media  5
   CMPM 146  Game AI  5
   CMPM 163  Game Graphics and Real-Time Rendering  5
   CMPM 164  Game Engines  5
   CMPM 164L  Game Engines Lab  2
   CMPM 171  Game Design Studio II  7
   CMPM 172  Game Design Studio III  7
   CSE 195  Senior Thesis Research  5
   CSE 195  Senior Thesis Research  5
   MATH 110  Introduction to Number Theory  5
   MATH 115  Graph Theory  5
   MATH 116  Combinatorics  5
   MATH 117  Advanced Linear Algebra  5
   MATH 118  Advanced Number Theory  5
   MATH 134  Cryptography  5
   MATH 145  Introductory Chaos Theory  5
   MATH 145L  Introductory Chaos Laboratory  1
   MATH 148  Numerical Analysis  5
   MATH 160  Mathematical Logic I  5
   MATH 161  Mathematical Logic II  5
   STAT 132  Classical and Bayesian Inference  5

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement in computer science B.S. is satisfied by completing an additional course from the following options.

Either one of these courses
CSE 115A  Introduction to Software Engineering  5
CSE 185E/CSE 101  Technical Writing for Computer Science and Engineering  5
CSE 195  Senior Thesis Research  5
Course CSE 195 may be used either as an elective, or to satisfy the DC requirement, but not for both.

**Comprehensive Requirement**

In addition to the above requirements, students must satisfy one of the following two exit requirements: pass one of the capstone courses (see Capstone Courses below); or successfully complete a senior thesis. A passed capstone course also counts toward satisfying the minimum number of upper-division electives requirement.

**Capstone Courses**

Students may choose from one of the following capstone courses to satisfy their exit requirement (lecture/lab combinations count as one course):

<table>

</tbody>
</table>

**Senior Thesis**

The senior thesis consists of a self-contained project within the broad scope of computer science, but one that is not available in the regular course offerings. A student wishing to complete a senior thesis must successfully complete a minimum of 5 credits in CSE 195, Senior Thesis Research. The supervision of a senior thesis student is always at the discretion of the faculty member.

The student first submits a written thesis proposal and obtains approval of a faculty sponsor. Then the student submits a written draft and makes an oral presentation to a faculty examining committee. After receiving feedback from the examining committee, the student submits one or more additional drafts, until the final draft is approved by the examining committee. The total amount of writing shall be consistent with the campus Disciplinary Communication requirement. A passing grade in CSE 195 is earned when the final thesis is approved.

**Planners**

The following are three sample academic plans: (1) a four-year plan for the B.S. major for first-year students with programming experience; (2) an alternative first-year plan for students without programming experience; and (3) a two-year plan for the B.A. major for transfer students that have completed all general education requirements.

Students completing the courses in the planners will have satisfied the MF and SR general education requirement.

**Four-Year Plan for Students with Programming Experience**

**COMPUTER SCIENCE B.A.**

**Information and Policies**

**Introduction**

The bachelor of arts (B.A.) program at UC Santa Cruz is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including some courses outside of science and engineering, or even for a double major in another discipline.

**Academic Advising for the Program**

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

**Getting Started in the Major**

It is recommended that high school students intending to apply to the computer science major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare a student for the computer science major.

**Program Learning Outcomes**

Recipients of a Bachelor of Science or a Bachelor of Arts degree in Computer Science at UC Santa Cruz are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas:
   - Algorithms, data structures, and complexity
   - Programming languages
   - Software engineering and development
   - Computer systems

2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
3. Apply problem-solving skills and the knowledge of computer science to solve real problems.

4. Understand how technological advances impact society and the social, legal, ethical and cultural ramifications of computer technology and their usage.

5. Write about and orally communicate technical material about computer science and computer systems, broadly conceived.

**Major Qualification Policy and Declaration Process**

**Major Qualification**

For all students, it is necessary to be listed as proposed computer science majors within the School of Engineering before being able to declare the major. Additionally, students must satisfy the following three criteria to qualify for the CS B.A. major:

**Declare**

Students must declare CS (Computer Science B.S. or Computer Science B.A.) as their major between student’s second to sixth quarter.

**CS Major Qualification courses**

Students must have completed the following CS major qualification courses to qualify for the major:

- **Either this course**
  - CSE 13S Computer Systems and C Programming 7
  - or this course
  - ECE 13 Computer Systems and C Programming 7

- CSE 13S recommended

- **And these courses**
  - CSE 12 Computer Systems and Assembly Language 5
  - CSE 30 Programming Abstractions: Python 7

- **Plus one of the following**
  - MATH 19A Calculus for Science, Engineering, and Mathematics 5
  - MATH 20A Honors Calculus 5

- **Plus one of the following**
  - MATH 19B Calculus for Science, Engineering, and Mathematics 5
  - MATH 20B Honors Calculus 5

- **Cumulative GPA**

Students must also have a cumulative GPA of at least 2.80 in the CS major qualification courses attempted at UC Santa Cruz, with at most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) permitted in a CS major qualification course.

**Appeal Process**

Students who are informed that they do not qualify for the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

**How to Declare a Major**

Students interested in pursuing computer science must indicate computer science as a proposed major on their application for admission to UC Santa Cruz. Students admitted to UCSC in fall 2018 or later will be able to declare a computer science major only if they have been admitted to UCSC as proposed computer science majors.

There are four steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Students should start the declaration of major process by completing Step One on the BSOE Declare Your Major website as soon as they complete the CS major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed all CS major qualification courses.

**Transfer Information and Policy**

**Transfer Admission Screening Policy**

Prior to admission, transfer students must have completed the following five courses or their articulated equivalents with a combined minimum GPA of 2.8.

Lecture/lab combinations count as one course.

- **This course**
  - CSE 30 Programming Abstractions: Python 7

- **Plus one of the following**
  - CSE 13S Computer Systems and C Programming 7
  - ECE 13 Computer Systems and C Programming 7

- **Plus one of the following options**
  - Either this course
CSE 12 Computer Systems and Assembly Language 5
or this course
CSE 16 Applied Discrete Mathematics 5

Plus one of the following
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 20A Honors Calculus 5

Plus one of the following
MATH 19B Calculus for Science, Engineering, and Mathematics 5
MATH 20B Honors Calculus 5

Minimum GPA

The combined GPA in the five courses above must be at least of 2.8. A student lacking one of these five courses may be admitted if they have completed CSE 16, and CSE 12, or the articulated alternative.

Furthermore, transfer students entering in the fall must have completed at least three of these courses by the end of the fall term of the previous academic year and have a minimum 2.80 GPA over all completed CS major qualification courses at that time.

Transfer students admitted for the winter term must satisfy the major preparation criteria for transfer students admitted for the full term and, additionally, must have successfully completed at least two additional courses that are required for the proposed degree, prior to admission. It is highly recommended that these courses should be AM 10 (or MATH 21) and AM 30 (or MATH 23A).

Most courses in the computer science program at UC Santa Cruz have a strong theoretical component to prepare the student for designing, as opposed to simply using, computer systems. Often, courses taken at other institutions which emphasize applications of current languages and computers do not count toward the computer science major at UCSC.

At UCSC, computer science students are first introduced to programming using the programming language Python. The core programming sequence—courses CSE 30 and CSE 13S (or ECE 13)—exposes students to both Python and C. Many upper-division courses that involve programming use the C and C++ programming languages.

Transfer students who are not familiar with both Python and C may need to take a remedial course. Students familiar with C++ and Unix should find the transition to Python and C relatively simple.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

[Optional Catchall]

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from another department at UC Santa Cruz, or from another academic institution, must first seek approval through the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students may not receive both the computer science B.A. and computer science B.S. degrees.

Study Abroad

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

[Optional Catchall]

Requirements and Planners

Course Requirements

The aim of this program is to expose students to a rigorous curriculum in computer science while maintaining sufficient flexibility so that students can take courses outside computer science, pursue a minor in another discipline, or complete a double major. Every student must complete a minimum of 16 courses—eight
lower-division and eight upper-division. Out of these, the eight lower-division courses and the first upper-division course are required preparatory courses for every student. Once these preparatory courses are completed, students tailor their own program by choosing seven upper-division elective courses.

Lower-Division Courses

Computer Science and Engineering

One of the following courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSE 13S</td>
<td>Computer Systems and C Programming</td>
<td>7</td>
</tr>
<tr>
<td>ECE 13</td>
<td>Computer Systems and C Programming</td>
<td>7</td>
</tr>

ECE 118  Introduction to Mechatronics  10

Lecture/lab combinations count as one course.

**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement for the computer science B.A. is satisfied by completing one of the following additional courses:

- One of these courses
- CSE 115A  Introduction to Software Engineering  5  
- CSE 115E  Technical Writing for Engineering  5  
- 101  Computer Science and Engineering  5  
- CSE 195  Senior Thesis Research  5  

The course used for the DC requirement cannot also be used as an upper-division elective.

**Comprehensive Requirement**

In addition to the above B.A. requirements, students in the computer science majors must satisfy one of the following two exit requirements: pass one of the capstone courses (see Capstone Courses below); or successfully complete a senior thesis. A passed capstone course also counts toward satisfying the minimum number of upper-division electives requirement.

**Capstone Courses**

Students may choose from one of the following capstone courses to satisfy their exit requirement (lecture/lab combinations count as one course):

**Senior Thesis**

The senior thesis consists of a self-contained project within the broad scope of computer science, but one that is not available in the regular course offerings. A student wishing to complete a senior thesis must successfully complete a minimum of 5 credits in CSE 195, Senior Thesis Research. The supervision of a senior thesis student is always at the discretion of the faculty member.

The student first submits a written thesis proposal and obtains approval of a faculty sponsor. Then the student submits a written draft and makes an oral presentation to a faculty examining committee. After receiving feedback from the examining committee, the student submits one or more additional drafts, until the final draft is approved by the examining committee. The total amount of writing shall be consistent with the campus Disciplinary
Communication requirement. A passing grade in CSE 195 is earned when the final thesis is approved.

CSE 195 Senior Thesis Research 5

Planners

The following are three sample academic plans: (1) a four-year plan for the B.A. major for first-year students with programming experience; (2) an alternative first-year plan for students without programming experience; and (3) a two-year plan for the B.A. major for transfer students.

Students completing the courses in the planners will have satisfied the MF general education requirement.

NETWORK AND DIGITAL TECHNOLOGY B.A.

Information and Policies

Introduction

The UC Santa Cruz B.A. in network and digital technology provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes that make those technologies function. The program is tailored to students who wish to combine technology with other fields or have a general focus on digital design or computer networks. The B.A. in network and digital technology is not an engineering degree, but B.A. graduates will be prepared to work with technology development in other capacities, or join the computer network workforce. Students interested in graduate study should pursue a B.S. program.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring
departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225  
bsoeadvising@ucsc.edu  
(831) 459-5840

Getting Started in the Major

Program Learning Outcomes

For the Network and Digital Technology B.A. degree the program learning outcomes are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Qualification Policy and Declaration Process

Major Qualification

Qualification for the network and digital technology major is based on performance in the following lower-division courses and associated labs required for the major. To qualify for the network and digital technology major students must have completed at least 36 credits in these courses with a cumulative GPA of at least 2.30 or greater.

All of the following
MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 19B Calculus for Science, Engineering, and Mathematics 5

Plus one of the following
AM 30 Multivariate Calculus for Engineers 5
MATH 23A Vector Calculus 5

Plus one of the following
AM 10 Mathematical Methods for Engineers I 5
MATH 21 Linear Algebra 5

Plus one of the following
AM 20 Mathematical Methods for Engineers II 5
MATH 24 Ordinary Differential Equations 5

Plus the following
CSE 12 Computer Systems and Assembly Language 5

Plus one of the following
CSE 13S Computer Systems and C Programming 7
ECE 13 Computer Systems and C Programming 7

Plus all of the following
CSE 16 Applied Discrete Mathematics 5
CSE 30 Programming Abstractions: Python 7

Plus one of the following lecture/lab options
Either these courses
PHYS 5A Introduction to Physics I 5
PHYS 5L Introduction to Physics I Laboratory 1
or these courses
PHYS 6A Introductory Physics I 5
PHYS 6L Introductory Physics I Laboratory 1

Plus one of the following lecture/lab combinations
Either these courses
PHYS 5C Introduction to Physics III 5
PHYS 5N Introduction to Physics III Laboratory 1
or these courses
PHYS 6C Introductory Physics III 5
PHYS 6N Introductory Physics III Laboratory 1

Cumulative GPA

Students seeking to change their current major to network and digital technology after their sixth quarter must have completed the courses listed above with a cumulative GPA of at least 2.30.

Appeal Process

Students who are informed that they do not qualify for the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

There are four steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.
Students should start the declaration of major process by completing Step One on the BSOE Declare Your Major website as soon as they complete 36 credits in the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed enough major qualification courses.

Transfer Information and Policy

Transfer Admission Screening Policy

Students should complete at least six courses from the following list

<table>

AM 30 and MATH 23A are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 10 and MATH 21 are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 20 and MATH 24 are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

ECE 13 and CSE 13S are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

PHYS 5A and PHYS 5L are alternatives to PHYS 6A and PHYS 6L; only one or the other can count toward the six courses.

PHYS 5C and PHYS 5N are alternatives to PHYS 6C and PHYS 6N; only one or the other can count toward the six courses.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

[Optional Catchall]

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from another department at UC Santa Cruz, or from another academic institution, must first seek approval through the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students completing the Network and Digital technology B.A. cannot also receive the computer engineering minor.
Students completing the Robotics Engineering B.S. or the Computer Engineering B.S. cannot receive the Network and Digital Technology B.A. degree.

Study Abroad

Honors

Majors are considered for “Honors in the Major” and “Highest Honors in the Major” based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.70, in most cases, receive highest honors. Students with a GPA of 3.30, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs.

Materials Fee and Miscellaneous Fees

Please see the section on fees under the School of Engineering.

Requirements and Planners

Course Requirements

All students in the network and digital technology major must take the following courses. The comprehensive requirement is satisfied by completion of the capstone course and the portfolio exit requirement.

Lower-Division Courses

Students who may have originally pursued another major should discuss with the Baskin School of Engineering undergraduate advising office whether or not already completed coursework may be substituted for one or more lower division-requirements.

One of the following
- AM 10 Mathematical Methods for Engineers I 5
- MATH 21 Linear Algebra 5

Plus one of the following
- AM 20 Mathematical Methods for Engineers II 5
- MATH 24 Ordinary Differential Equations 5

Plus one of the following
- AM 30 Multivariate Calculus for Engineers 5
- MATH 23A Vector Calculus 5

Plus the following
- CSE 12 Computer Systems and Assembly Language 5

Plus one of the following
- CSE 13S Computer Systems and C Programming 7
- ECE 13 Computer Systems and C Programming 7

Plus all of the following
- CSE 16 Applied Discrete Mathematics 5
- CSE 20 Beginning Programming in Python 5
- CSE 30 Programming Abstractions: Python 7
- MATH 19A Calculus for Science, Engineering, and Mathematics 5
- MATH 19B Calculus for Science, Engineering, and Mathematics 5

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30 and CSE 12.

Plus one of the following lecture/lab combinations

Either these courses
- PHYS 5A Introduction to Physics I 5
- PHYS 5L Introduction to Physics I Laboratory 1

or these courses
- PHYS 6A Introductory Physics I Laboratory 5
- PHYS 6L Introductory Physics I Laboratory 1

Plus one of the following lecture/lab combinations

Either these courses
- PHYS 5C Introduction to Physics III 5
- PHYS 5N Introduction to Physics Laboratory III 1

or these courses
- PHYS 6C Introductory Physics III Laboratory 5
- PHYS 6N Introductory Physics III Laboratory 1

Upper-Division Courses

All of the following
- CSE 100 Logic Design 5
- CSE 100L Logic Design Laboratory 2
- CSE 150 Introduction to Computer Networks 5
- CSE 150L Introduction to Computer Networks Laboratory 2
**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in network and digital technology is satisfied by completing CSE 185E, Technical Writing for Computer Engineers.

**Comprehensive Requirement**

One of the following courses must be completed. This course cannot be counted as one of the three required electives. Lecture/lab combinations count as one course.

- CSE 115A Introduction to Software Engineering 5
- CSE 121 Microprocessor System Design 5
- CSE 125 Logic Design with Verilog 5
- CSE 156 Network Programming 5
- CSE 156L Network Programming Laboratory 2
- ECE 118 Introduction to Mechatronics 10

**Planners**

The following are two sample academic plans: (1) a four-year plan for first-year students with no prior programming experience, and (2) a two-year plan for transfer students that have completed all lower-division major requirements except AM 30, CSE 12 and CSE 12L, CSE 13E or CSE 13S, and CSE 30. Students completing the courses in the four-year planner will have satisfied the MF and SI General Education requirements.

**COMPUTER ENGINEERING MINOR**

**Course Requirements**

**Lower-Division Courses**

**The following course**

- CSE 12: Computer Systems and Assembly Language 5

**Plus one of the following**

- CSE 13S: Computer Systems and C Programming 7
- ECE 13: Computer Systems and C Programming 7

**Plus all of the following**

- CSE 16: Applied Discrete Mathematics 5
- CSE 20: Beginning Programming in Python 5
- CSE 30: Programming Abstractions: Python 7
- MATH 19A: Calculus for Science, Engineering, and Mathematics 5
- MATH 19B: Calculus for Science, Engineering, and Mathematics 5

Students with no prior programming will take CSE 20 before CSE 30, and CSE 12 & CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, and CSE 12 and CSE 12L.

**Plus one of the following**

- AM 20: Mathematical Methods for Engineers II 5
- MATH 24: Ordinary Differential Equations 5

AM 20 and MATH 24 both require one additional mathematics course as a prerequisite.

**Plus one of the following lecture/lab combinations**

Either these courses

- PHYS 5A: Introduction to Physics I 5
- PHYS 5L: Introduction to Physics I Laboratory 1

or these courses

- PHYS 6A: Introductory Physics I 5
- PHYS 6L: Introductory Physics I Laboratory 1

**Upper-Division Courses**

**All of the following**

- CSE 100: Logic Design 5
- CSE 100L: Logic Design Laboratory 2
- CSE 120: Computer Architecture 5

**Plus one of the following**

- ECE 118: Introduction to Mechatronics 10
- CSE 121: Embedded System Design 7

**Plus all of the following**

- CSE 101: Introduction to Data Structures and Algorithms 5
- ECE 101: Introduction to Electronic Circuits 5
- ECE 101L: Introduction to Electronic Circuits Laboratory 2

**COMPUTER SCIENCE MINOR**

**Course Requirements**

Thirteen courses are required for the computer science minor.
### Lower-Division Courses

**CSE 130** Principles of Computer Systems Design 5

**CSE 132** Computer Security 5

**CSE 138** Distributed Systems 5

**CSE 140** Artificial Intelligence 5

**CSE 142** Machine Learning 5

**CSE 143** Introduction to Natural Language Processing 5

**CSE 160** Introduction to Computer Graphics 5

**CSE 160L** Introduction to Computer Graphics Laboratory 2

**CSE 180** Database Systems I 5

Students choosing CSE 160 must also take CSE 160L, and the combination counts as one course.

**Plus two additional upper-division courses**

Two additional upper-division 5-credit computer science and engineering courses and their associated labs, numbered below 170 or between 180 and 189.

### COMPUTER SCIENCE AND ENGINEERING CONTIGUOUS BACHELOR’S/MASTER’S PATHWAY: COMPUTER SCIENCE AND ENGINEERING

The Department of Computer Science and Engineering (CSE) offers a combined Bachelor's/Master's pathway. Undergraduate students from any major in the Baskin School of Engineering (BSOE) can apply to the pathway in order to earn a bachelor's degree together with an M.S. degree in Computer Science and Engineering. Depending on the student’s progress and advance planning, it is expected that the combined pathway can be completed in five years.

The five-year Bachelor's/Master's pathway offers a competitive edge to students who are completing their undergraduate degree at UC Santa Cruz, by enabling those with advanced preparation to move directly from the undergraduate to the graduate program. The pathway assists qualified enrolled students with a simplified graduate application process that does not require students to take the Graduate Record Examination (GRE) and makes it possible to complete an M.S. degree with as few as seven courses beyond the bachelor's degree.

The pathway prepares students for leadership positions in industry, and is also attractive for undergraduate students planning to pursue a Ph.D. degree targeting research careers in industry or academia. The School of Engineering (SOE) has many opportunities for undergraduate and graduate research, and Bachelor's/Master's pathway students may be able to continue their undergraduate research projects as graduate students with the same research group.
Students in the M.S. programs are not guaranteed any form of financial support from the department. It is the student’s responsibility to ensure that they have sufficient funds for completing the M.S. degree program. Most M.S. students manage their finances by working as interns at companies in the Bay Area during the summer months.

Particularly motivated students can complete both the bachelor’s and the master’s degrees in 15 quarters. However, advance planning is essential. Interested students should contact the BSOE Graduate Affairs Office and their faculty adviser early in their college career—no later than the end of their junior year. Students in this pathway retain undergraduate status until the completion of all undergraduate requirements, but may begin graduate coursework in advance of graduate standing.

ADMISSION TO THE CONTIGUOUS FIVE-YEAR BACHELOR’S/MASTER’S PATHWAY

The undergraduate degree requirements are not changed by the Bachelor's/Master's pathway; however, the pathway capitalizes on graduate-level courses that may apply toward both the undergraduate and graduate degree requirements (see Course Requirements below). Students should consult the Undergraduate Affairs Office with questions about their respective undergraduate degree requirements.

Acceptance into the CSE Bachelor's/Master's pathway is by informal application, and is very simple. Students interested in the Bachelor's/Master's pathway should declare their interest to the Graduate Affairs Office, and attend a Bachelor's/Master's Workshop (typically offered in the fall and spring quarters). Undergraduates interested in the pathway can complete the interest form at any time starting in the first quarter of junior standing. To qualify, applicants must be current UC Santa Cruz undergraduates declared in a major within the School of Engineering, must have a 3.0 GPA when they apply to the Bachelor's/Master's pathway, and must maintain a 3.0 GPA or higher until the completion of their undergraduate requirements. The Graduate Affairs Office will verify and track students' eligibility for the pathway until completion of the bachelor's degree. Applicants who maintain eligibility through completion of their undergraduate program will not be required to submit GRE scores when completing the CSE M.S. graduate admission application.

Confirmed eligibility for the Bachelor's/Master's pathway does not guarantee admission to the CSE M.S. program. Pathway applicants must formally apply and be admitted to the Computer Science and Engineering Master's program through the regular graduate admissions process, although the GRE requirement is waived. The CSE M.S. application deadline is usually in December or early January. Students who apply to the M.S. program through the Bachelor's/Master's pathway are not guaranteed admission to the M.S. program—they will be measured against the full applicant pool during the admissions decisions process. If admitted to the CSE M.S. program, pathway students are able to count qualified courses previously completed as an undergraduate toward their CSE M.S. degree requirements. To ensure courses are qualified to count toward the M.S. degree, students should review the CSE M.S. degree requirements and communicate with their graduate student adviser.

Students who do not meet the Bachelor's/Master's pathway eligibility requirements or who wish to take time off between the bachelor's and master's degree programs are encouraged to apply for admission to the standard CSE M.S. program through the regular graduate admissions process.

COURSE REQUIREMENTS

Master's students can graduate by pursuing either Thesis Plan I or a Capstone Plan II. The Thesis Plan I is appropriate for students interested in advanced studies and in carrying out independent research, as well as for those students contemplating pursuit of a Ph.D. degree. The Thesis Plan I may extend the normative time for graduation beyond the expected one year as students typically take two to three quarters to complete a thesis. Advance planning is essential to graduate from the CSE M.S. program with the Thesis Plan I in one year. The Capstone Plan II is appropriate for students interested in advanced studies to better prepare themselves in the information technology workforce. The normative time for graduation with Capstone Plan II is one year for a full-time student.

Students may count up to 13 credits of courses taken as an undergraduate toward the M.S. coursework requirements. Of these 13 course credits, no more than 5 can be from undergraduate courses, and the undergraduate course credits must not be used to satisfy any undergraduate degree requirements. A minimum of 35 credits of graduate coursework must be completed during the graduate career. At most one upper-division undergraduate course can be counted toward the M.S. degree requirements.

Students should refer to the CSE M.S. program statement for more specific information on degree requirements, concentrations, academic progress, and applying to graduate.

COMPUTER SCIENCE AND ENGINEERING M.S.

Introduction

The Computer Science and Engineering Department offers a master of science (M.S.) degree program. An M.S. student can graduate by pursuing either Thesis Plan
I or Capstone Plan II. The normative time for graduation with Thesis Plan I is two years for a full-time student. This option is appropriate for students interested in advanced studies and in carrying out independent research, as well as for those students contemplating pursuit of a Ph.D. degree. The normative time for graduation with Capstone Plan II is one year for a full-time student. This option is appropriate for students interested in advanced studies to better prepare themselves in the information technology workforce. Students in the M.S. programs are not guaranteed any form of financial support from the department. It is the student’s responsibility to ensure that they have sufficient funds for completing the M.S. degree program. Most M.S. students manage their finances by working as interns at companies in the Bay Area during the summer months.

Thesis Plan I

Each student is required to take 48 credits as follows:

1.) A core requirement must be met by taking CSE 200, Research and Teaching in Computer Science and Engineering (CSE), and any two out of the following three courses: CSE 201, Analysis of Algorithms; CSE 210A, Programming Languages; and CSE 220, Computer Architecture. In addition, students must take 5 credits of CSE 299, Thesis Research. Each student must complete CSE 200 in their first year.

2.) One course each from three different breadth categories for a total of three courses (15 credits)—see the Breadth Requirements webpage.

3.) Up to 10 credits of CSE 299 may be counted toward the degree requirements; 5 credits are required.

4.) All remaining courses must be regular, 5-credit graduate courses (not seminars). Courses that do not count toward the 48-credit requirement include all courses numbered CSE 296, and all courses in the CSE 280 and CSE 299 series. CSE 297 may be taken more than once; however, only 5 credits of CSE 297 will be counted toward the required 48 credits.

5.) Upper-division undergraduate UCSC CSE courses may be taken as a graduate student to strengthen a student's knowledge base. At most, 5 credits of UCSC upper-division undergraduate CSE courses may be counted toward the 48 credits requirement.

6.) With the exception of CSE 200, CSE 296, and all courses in the CSE 280 and CSE 299 series, all graduate courses and upper-division courses must be taken for a letter grade. Only courses with a letter grade of B- or higher can be counted toward the M.S. degree requirements.

Capstone Plan II

Each student is required to take 48 credits as follows:

1.) A core requirement must be met by taking CSE 200, Research and Teaching in Computer Science and Engineering (CSE), and any two out of the following three courses: CSE 201, Analysis of Algorithms; CSE 210A, Programming Languages; and CSE 220, Computer Architecture. In addition, students must take 5 credits of CSE 297, Independent Study or CSE 247, Projects in Artificial Intelligence. Each student must complete CSE 200 in their first year.

2.) One course each from three different breadth categories for a total of three courses (15 credits)—see the Breadth Requirements webpage.

3.) All remaining courses must be regular, 5-credit graduate courses (not seminars). Courses that do not count toward the 48-credit requirement include all courses numbered CSE 296, and all courses in the CSE 280 and CSE 299 series. CSE 297 may be taken more than once; however, only 5 credits of CSE 297 will be counted toward the required 48 credits.

4.) Up to 10 credits from courses taught by departments other than CSE may be counted toward the degree requirements. The student must obtain the graduate director's authorization to count a course from outside of the Baskin School of Engineering.

5.) Upper-division undergraduate UCSC CSE courses may be taken as a graduate student to strengthen a student's knowledge base. At most, 5 credits of UCSC upper-division undergraduate CSE courses may be counted toward the 48 credits requirement.

Other Requirements

Students in Thesis Plan I must complete an M.S. thesis, while students in Capstone Plan II must complete an M.S. project.

Thesis Plan I

After the student has completed some coursework in the proposed area of research and become acquainted with the faculty conducting research in that area, a student electing Thesis Plan I submits a written proposal to a faculty member, usually by the third academic quarter. If the faculty member determines they are able to advise the
student's thesis, they collaborate with the student to further develop the scope of the student's research and refine the proposal. By accepting the proposal, the faculty member becomes the student's faculty/thesis advisor. In consultation with the advisor, the student forms a Master's Thesis Reading Committee with at least two additional faculty members, each of whom is provided a copy of the proposal. Exceptions to the committee structure may be granted by the graduate program director and/or by the graduate dean. Changes in the membership of the committee, once appointed, may only be made with the approval of the graduate dean.

Members of a Master's Thesis Reading Committee must meet the following criteria:

1. The first member must be a Senate CSE faculty member.
2. The second member must be a Senate UCSC Baskin School of Engineering (BSOE) faculty member (may be CSE as well).
3. The third member must be a UCSC BSOE faculty member or a recognized expert in the student's research area as judged by the graduate program director and the Graduate Division dean.

Additional members may be added to the committee. Students should consult their advisors about the membership of their committee.

By the end of the second week of the quarter in which a student plans to graduate, the student must submit a formal nomination of their Master's Thesis Reading Committee to the Graduate Division for approval. The required form for nominating a Master's Thesis Reading Committee is located on the Graduate Division's website. Once the thesis is completed, the student presents an expository talk on the thesis research. A final draft of the thesis must be provided to the members of the Master's Thesis Reading Committee for review at least 30 days before the last day of the quarter in which the student plans to graduate. The final thesis must be accepted by the Master's Thesis Reading Committee before the M.S. degree is awarded.

CSE 299A Thesis Research 5

**Capstone Plan II**

The M.S. project is an individual or a team-based project supervised by a faculty advisor and approved by a Master's Project Reading Committee composed of the faculty advisor and a faculty member from the Baskin School of Engineering.

Members of a Master's Project Reading Committee must meet the following criteria:

1. The first member must be a Senate CSE faculty member.
2. The second member must be a Senate UCSC School of Engineering (SOE) faculty (may be CSE as well).

Master's Project Reading Committees are nominated by completing a Master's Project form and are approved by the graduate director.

A team consists of up to five members. Projects can either be proposed by the team or the team may bid on projects proposed by faculty members. It is also possible to have industry-sponsored or government-sponsored projects, in which case the industry/government supervisor can be invited to be an optional third member on the Master's Project Reading Committee.

The final project must be accepted by the Reading Committee before the M.S. degree is conferred.

CSE 297A Individual Study or Research 5

**Transfer Credit**

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program.

Courses from other institutions may be substituted for equivalent courses at UCSC (with the approval of the graduate director) but may not count toward the 48-credit requirement. For example, an equivalent Computer Architecture course taken elsewhere may be used in lieu of CSE 220. However, the student will need to replace it with 5 credits of another graduate elective course. As another example, a student may substitute an equivalent graduate course for CSE 260 and count that for a breadth requirement, but may not count that course toward the 48-credit requirement.

Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

**Concentrations**

M.S. students are offered the option to receive a concentration. Concentrations denote areas of specialized curriculum, training, and research within a given department or degree-granting program. The concentration is an informal indication of a student's area of expertise. No notation of it appears on the student's transcript or diploma. However, the student will have the right to note the concentration in their curriculum vitae using the words “a degree in CSE with a concentration in XXX.” The department may refer to the student's degree with the concentration noted, and writers of letters of reference may note the concentration when referring to the student's degree.

There are four possible concentrations available to CSE M.S. students:
In order to receive a concentration annotation, an M.S. student must satisfy three requirements:

1. Take two courses in the list of concentration-specific required courses.
2. Take one course in the list of concentration-specific elective courses.
3. Choose a faculty member in the concentration-specific list of affiliate faculty as project or thesis advisor.

The required and elective courses and the affiliated faculty for each concentration are available on our website.

Students normally request to receive a concentration annotation at the time they request to be assigned an advisor.

**Academic Progress**

Each year, the faculty reviews the progress of every student. Normative academic progress for master's students includes selecting a capstone plan (Thesis Plan I or Capstone Plan II) and identifying a faculty advisor by the end of the third quarter. Many students complete the program in four quarters, and all full-time students are expected to complete the degree within six quarters.

Students without adequate academic preparation may be required to take additional courses. Full-time students are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time CSE students must complete CSE 201, CSE 210A, and CSE 220 within two years and normally must complete all course requirements within two years for the M.S.

Students receiving two or more unsatisfactory grades (U or a letter grade below B-) in School of Engineering courses are not making adequate progress and will be recommended for academic probation for the following three quarters of registered enrollment. Taking a leave of absence does not count as enrollment, and it does not extend the degree timeline. Part-time enrollment is counted as a half quarter of enrollment.
