Prerequisite(s): advancement to candidacy. Enrollment restricted to graduate students.

FREN - FRENCH**Lower-Division****FREN 1 - First-Year French (5)**

Introduction to French language and culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of French.

FREN 2 - First-Year French (5)

Further development of cultural competence and basic French language skills, both written and spoken. Students learn past tenses in this course.

Prerequisite: Prerequisite(s): FREN 1 or placement by interview.

FREN 3 - First-Year French (5)

Final quarter of first-year sequence. Students complete study of French language basics, including the future tense and the conditional and the subjunctive moods,

while continuing to learn about French and Francophone cultures.

Prerequisite: Prerequisite(s): FREN 2 or placement by interview.

FREN 4 - Second-Year French (5)

First course in intermediate sequence. Students review and expand upon their previous study of the language through short literary readings, vocabulary building, grammar study, composition, and discussions.

Prerequisite: Prerequisite(s): FREN 3 or placement by interview.

FREN 5 - Second-Year French (5)

Further development of intermediate-level oral and written skills through study of vocabulary and structures. Students also read and discuss a French or Francophone play.

Prerequisite: Prerequisite(s): FREN 4 or placement by interview.

FREN 6 - Second-Year French (5)

Final course of intermediate sequence includes grammar study, vocabulary building, extensive writing, and discussion. Reading of a French or Francophone novel is an integral part of course.

Prerequisite: Prerequisite(s): FREN 5 or placement by interview.

FREN 85 - (De)constructing contemporary French identity (5)

Taught in English, this course examines core values and events in France, such as Republican values (in the French sense of "Republican"), secularism, globalization, immigration, that have helped shape current French society.

FREN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

FREN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

FREN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

FREN 108 - French Cinema (5)

Investigation of a variety of topics (historical, cultural, and linguistic) in France and the French-speaking world. Topics are explored through film. Conducted in English.

FREN 111 - Stylistics (5)

Intensive work in French composition with the aim of attaining fluency and accuracy of expression while developing literary appreciation. May be repeated for credit with consent of instructor.

Prerequisite: Prerequisite(s): FREN 6. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting.

FREN 114 - French Phonetics (5)

Introduction to the French sound system and basic phonetics. Extensive practice of French pronunciation and phonetic transcriptions of both written and spoken language samples.

Prerequisite: Prerequisite(s): FREN 6.

FREN 120 - French Linguistics (5)

Major topics in contemporary French linguistics, covering both formal and social properties of French. Descriptive and theoretical study of phonetics and phonology, lexicon, morphology, syntax, sociolinguistic variation, status of regional and minority languages, and language planning. Taught in French.

Prerequisite: Prerequisite(s): FREN 6 or equivalent proficiency in French or by consent of the instructor.

FREN 121 - History of the French Language (5)

Overview of the history and development of the French language from Latin to early modern French. Sound changes, grammatical and lexical changes, language policy (e.g., l'Academie francaise), external influences on the language. Taught in French.

Prerequisite: Prerequisite(s): FREN 6 or equivalent proficiency in French, or by permission of the instructor.

FREN 125A - French Civilization: 19th Century (5)

Survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 19th century.

Prerequisite: Prerequisite(s): FREN 6.

FREN 125B - French Civilization: 20th Century (5)

A survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 20th century.

Prerequisite: Prerequisite(s): FREN 6.

FREN 130 - French for Professions (5)

Students better understand administrative organization in France through preparation of their own professional dossier in French, and preparation to look for professional opportunities in France. Taught in French.

Prerequisite: Prerequisite(s): FREN 6, or equivalent proficiency in French, or by permission of the instructor.

FREN 131 - Social Activism in France: The Tradition of Chanson Française Engagée (5)

Explores the French tradition of musical activism from the French Revolution to the present. Societal issues such as war, racism, poverty, environmental issues, globalization, and terrorism are addressed.

Prerequisite: FREN 6 or by interview with consent of instructor.

FREN 136 - La Francophonie (5)

In-depth multidisciplinary study of one or more French-speaking regions of the world. Topics may include history, language, society, literature, and the arts. All coursework will be done in French.

Prerequisite: Prerequisite(s): FREN 6.

FREN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

FREN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

FREN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

GAME - GAMES AND PLAYABLE MEDIA

Graduate

GAME 200 - Game Design Systems (5)

Analyzes how games aggregate mechanics to create dynamic, interactive systems. Students analyze and design systems by general categories (e.g., movement, economy, conflict) to better understand their histories, relationships, and implementations.

Prerequisite: Enrollment is restricted to graduate students.

GAME 201 - Level Design (5)

Level design integrates architecture, psychology, and drama with the tools of game making. Course explores both 2D and 3D level design through both analysis and construction of video game levels, along with key readings, particularly in architecture.

Prerequisite: Enrollment is restricted to graduate students.

GAME 202 - Alternative Controllers, AR, and VR (5)

Introduction to physical computing, AR, VR, and interaction design concepts critical for building novel physical interfaces. It employs a combination of theory and practice, ranging from gamepad, circuit, and interaction design to in-class activities and projects guiding students through creating their own alternative controller games. (Formerly offered as Foundations of Alternative Controller Games.)

Prerequisite: Enrollment is restricted to graduate students in games and playable media, human computer interaction, and serious games or by permission of the instructor.

GAME 210 - Game Art Intensive (5)

Teaches the basic vocabulary, concepts, and practices of creating 2D and 3D art assets for games, as well as their management and integration into game engines. Includes sprites, models, textures, animations, and an introduction to effects.

Prerequisite: Enrollment is restricted to games and playable media and serious games graduate students; others by interview.

GAME 215 - Audio Direction (5)

Introduces fundamentals of digital audio and its implementation into a game project. Explores elements of acoustic audio theory, musical theory, and digital audio theory, coupled with hands-on creation. Students work with audio software, synthesis, plug-in processing and microphones to develop and create an audio direction.

Prerequisite: Enrollment is restricted to games and playable media and serious games graduate students, or by permission of the instructor.

GAME 221 - Professional Development for Game Makers (5)

Professional preparation for students in Games and Playable Media, and Serious Games master's degree programs. Includes entrepreneurship, employment rights, IP law, interview skills, business analysis, and other topics aligned with the dynamic industry of computer games.

Prerequisite: Enrollment is restricted to games and playable media and serious games graduate students; others by interview.

GAME 222 - Professional Development for Game Makers II (2)

Second course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focus on design considerations and methodologies employed in the game industry with emphasis placed upon the student's ability to develop designs beyond mere ideas through to execution.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 223 - Professional Development for Games Makers III (2)

The third course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focuses on the business of the game industry, including funding, corporation types and formation, budgeting and burn rates, pitch decks, and marketing.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 230 - Fundamentals of Game Engineering (5)

Deep introduction to technologies used in the construction of computer games. Principles of 2D game engine design, including architecture, object-oriented design patterns, collision detection, particle systems. Also examines artificial intelligence techniques including pathfinding, state machines, and behavior trees.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 231 - Game Technologies (5)

Learn the fundamentals of at least two contemporary game engines. Develop 3D game prototypes using custom-level geometry and shaders. Understand common features of the engines and how engine-specific features shape the space games that are reasonable to implement.

Prerequisite: Prerequisite(s): GAME 230; or GAME 235 and GAME 236. Enrollment is restricted to graduate students.

GAME 232 - Advanced Game Technologies (5)

Exposes students to cutting-edge research technologies enabling the creation of games not possible with off-the-shelf techniques. Students learn how understand research to incorporate such technologies into a game. Students create rapid prototypes using several different technologies.

Prerequisite: Prerequisite(s): GAME 230; or GAME 235 and GAME 236. Enrollment is restricted graduate students.

GAME 235 - Game Development I (5)

First in a two-course sequence providing an introduction to game programming using a modern object-oriented language. Introduces the technologies used in the construction of computer games. Introduces the principles of 2D game engine design, including architecture, object-oriented design patterns, and collision detection. Students may not receive credit for this course and GAME 230.

Prerequisite: Enrollment is restricted to graduate students.

GAME 236 - Game Development II (5)

Second in a two-course sequence providing an introduction to game programming using a modern object-oriented language. Intermediate technologies are used in the construction of computer games. Includes NPC behavior, scenes and shaders, physics, debugging, and managing game code. Students may not receive credit for this course and GAME 230.

Prerequisite: Prerequisite(s): GAME 235. Enrollment is restricted to graduate students.

GAME 238 - Computer Graphics for Games (5)

Advanced computer-graphics techniques for computer games. Covers a range of computer graphics techniques used in contemporary computer games, with emphasis on those that complement existing game engines. Subjects covered include: lighting for models and scenes, shader programming (including several visual effects), procedural mesh manipulation, advanced use of particle systems, and non-photorealistic rendering techniques.

Prerequisite: Prerequisite(s): GAME 230 or GAME 235. Enrollment is restricted to graduate students.

GAME 240 - Game Usability (5)

Research approaches to game usability, from direct interaction with players to game instrumentation methods. Students learn to understand, select between, and adapt research designs and analysis approaches.

Includes defining and measuring impact and effect size of serious games.

Prerequisite: Enrollment is restricted to graduate students.

GAME 250 - Foundations of Serious Games and Gamification (5)

Provides an overview of serious games and its applications in health, education, training, and advertisements. Further, it introduces gamification and discusses various examples of gamifications used in the market today in various industries including social media, retail, health trackers, and food industry. Course also provides a practical guide of the process of design and development of serious games and gamification techniques. Through projects students apply these lessons and develop two serious games or gamification projects. (Formerly offered as Foundations of Serious Games.)

Prerequisite: Enrollment is restricted to graduate students in games and playable media, human computer interaction, and serious games, or by permission of the instructor.

GAME 251 - Games User Research (5)

Research approaches to user experience of games, from direct interaction with players to game instrumentation methods. Students learn to understand, select between, and adapt research designs and analysis approaches. Includes defining and measuring impact and effect size of serious games.

Prerequisite: Enrollment is restricted to Serious Games graduate students.

GAME 252 - Modeling and Simulation (5)

Introduces the concepts of models, including how models are created and represented both conceptually and computationally. Also delves into practical aspects of developing and evaluating simulations. Students introduced to the value of simulations for what-if analysis as well as a way to explore and derive models around specific phenomena such as social and cultural structures, global warming, weather systems, among other applications within the field of serious games. Students introduced to various theoretical concepts and then asked to implement a project involving developing a model and simulation given a particular topic.

Prerequisite: Enrollment is restricted to computational media graduate students.

GAME 255 - Serious Games Studio I (5)

Focuses on developing innovative project concepts, rapid prototyping and playtesting, and the creation of concept presentations. Students identify appropriate sources of subject matter expertise, elicit knowledge to inform a game project, and integrate that knowledge into the core gameplay experience.

Prerequisite: Prerequisite(s): GAME 200, or GAME 230, or GAME 236, or GAME 250. Enrollment is restricted to graduate students.

GAME 256 - Serious Games Studio II (5)

Students work in teams to develop serious games. Involves multiple aspects of game production with emphasis on initiating production and coordination between requirements and design, and preparing a game iteration for efficacy measurement. Students receive frequent critiques on emerging game projects.

Prerequisite: Prerequisite(s): GAME 255. Enrollment is restricted to graduate students.

GAME 257 - Serious Games Studio III (5)

Students work in teams to develop serious games. Involves multiple aspects of game production with emphasis on performing efficacy measurements and responding through iteration. Students receive frequent critiques on final game projects.

Prerequisite: Prerequisite(s): GAME 256. Enrollment is restricted to serious games graduate students.

GAME 270 - Games and Playable Media Studio I (5)

First course in a three-course sequence covering the fundamentals and advanced topics in game and playable-media development. Focuses on developing innovative project concepts using methods ranging from prototyping to design documents, planning, and initiating project development.

Prerequisite: Enrollment is restricted to games and playable media graduate students; others by interview.

GAME 271 - Games and Playable Media Studio II (5)

The second course in a three-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects.

Prerequisite: Prerequisite(s): GAME 270. Enrollment is restricted to games and playable media graduate students.

GAME 272 - Games and Playable Media Studio III (5)

The third course in a four-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production including agile methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects.

Prerequisite: Enrollment is restricted to graduate students in the games and playable media program.

GAME 273 - Game Production Intensive (10)

Fourth course in a four-course sequence in which students work in teams to launch an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology, game and level design, development of code to implement game behavior, art direction, and audio design. The emphasis is on interacting with game media to publicize the game. Students receive frequent critiques on emerging game projects.

Prerequisite: Enrollment is restricted to graduate students in the games and playable media program.

GAME 280A - Games Proseminar (2)

Students learn through guest speakers, design exercises, master classes, and interactive group activities. Students prepare through reading texts, playing games, and developing their own materials. Features visitors from small and large developers, game scholars, and those using games in general. Can be taken for Satisfactory/Unsatisfactory credit only.

Prerequisite: Enrollment is restricted to games and playable media, and serious games graduate students, or by permission of the instructor.

GAME 280Y - Games You Should Know (2)

Examines games that produce novel experiences. Each session consists of game play and discussion of associated readings. Students learn to appreciate the range of possible game experiences, and understand key design ideas that enable those experiences.

Prerequisite: Enrollment is restricted to graduate students.

GAME 290A - Advanced Topics in Games (5)

In-depth study of current topics in digital and non-digital games. Topics vary, but are expected to include virtual reality, augmented reality, novel game interfaces, advanced computer graphics techniques, advanced game-design techniques, advanced procedural content generation, and autonomous characters.

Prerequisite: Enrollment is restricted to graduate students.

GCH-GLOBAL AND COMMUNITY HEALTH

Lower-Division

GCH 1 - Foundations for Global and Community Health (5)

Foundations for Global and Community Health is an interdisciplinary introduction to global and community health. It provides students with the foundational knowledge, vocabulary, and analytical tools to enter global health. It emphasizes the wide-ranging

community meanings and contextual conditions shaping health from local to global scales. Co-taught by faculty from the natural sciences and social sciences, the course also introduces students to global and community health, highlighting opportunities for learning that involve collaboration and conversation between natural scientists and social scientists. (Formerly offered as POLI/ANTH/BIOL 89).

GCH 10 - COVID, Culture and Community Health (5)

Takes as its topic the still-unfolding story of COVID-19, its historical precursors, evolving scientific and policy questions, and present global challenges. It invites students from across disciplines to examine the medical, cultural, and public health concepts necessary in a post-pandemic world, and to explore the vital importance of rhetoric, representation, and narrative in the cultural politics of COVID more generally. A project-based, collaborative approach guides hands-on investigations to help students become audiences and advocates for health initiatives worldwide.

Upper-Division

GCH 190 - Global and Community Health Task Force (5)

Students conduct rigorous research on real world health challenges with a view to describing the associated problems accurately and recommending responses. All the work of research and writing is highly collaborative and interdisciplinary. Task Force members are comprised of seniors from both the B.A. and B.S. degrees in GCH. They work closely together under the guidance of the instructor who prepares them to collaborate effectively. The final report always includes writing from all the students in the team. Students are responsible for all of the associated editing, as well as a final presentation of the report to an external evaluator.

Prerequisite: Prerequisite(s): GCH 1, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to seniors majoring in global and community health.

GCH 195 - Global and Community Health Communication (2)

Focuses on enabling students to assess and communicate their learning in global and community health (GCH) using an iterative process of writing, review, and website development. The e-portfolio webpages students complete by the end of the course will together comprise their capstone "GCH e-Record" designed to communicate their disciplinary and interdisciplinary learning in their degree to a specific audience beyond the university. These written reflections, in turn, involve meta-learning about how expert knowledge moves between different communities, and about how audience expectations and writing conventions condition communications about health expertise in particular.

Prerequisite: Prerequisite(s): GCH 1, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to seniors majoring in global and community health.

GCH 199A - Global and Community Health Senior Thesis (5)

Provides an alternative way to satisfy the capstone requirements in place of GCH 190. Course is designed especially to serve the needs of students who do an individualized practical internship or community service project and who then want to reflect on its lessons and write it up as a form of academic research. To satisfy the DC requirements for the Global and Community Health B.A. degree, it is still necessary to also complete GCH 195. Thesis should be modeled after academic articles published in peer-reviewed journals and make a scholarly contribution based on original research and/or deep review of current literatures in global and community health. Prerequisite(s): GCH 1, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is by permission of the instructor and restricted to seniors majoring in global and community health. Please read the instructions for the senior thesis and secure the approval of GCH affiliate faculty mentor before enrolling.

Prerequisite: Prerequisite(s): GCH 1, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is by permission of the instructor and restricted to seniors majoring in global and community health. Please read the instructions for the senior thesis and secure the approval of GCH affiliate faculty mentor before enrolling.

GCH 199B - Global and Community Health Senior Thesis B (5)

For students who need an extra quarter, GCH 199B also provides 5 more credits in addition to GCH 199A while allowing them to complete their B.A. degree requirements. Provides an alternative way to satisfy the GCH capstone requirements in place of GCH 190. It is designed especially to serve the needs of students who do an individualized practical internship or community service project and who then want to reflect on its lessons and write it up as a form of academic research. To satisfy the DC requirements for the GCH B.A. degree, it is still necessary to complete GCH 195 as well as this Senior Thesis. An academic senior thesis should be modeled after academic articles published in peer-reviewed journals and make a scholarly contribution based on original research and/or deep review of current literatures in global and community health.

Prerequisite: Prerequisite(s): GCH 1, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to seniors majoring in global and community health.

GERM - GERMAN

Lower-Division

GERM 1 - First-Year German (5)

German 1, a beginning-level course, introduces the German language and culture for students with no previous knowledge of German. The course focuses on speaking, reading, writing, and listening. The first-year sequence (GERM 1-GERM 2-GERM 3) starts in fall quarter only. (An accelerated sequence, GERM 1A-GERM 1B, begins in winter quarter.) (Formerly Instruction in the German Language.)

GERM 1A - Accelerated German (5)

Accelerated course covers GERM 1 and part of GERM 2. It is designed for motivated beginning students. Students develop skills in speaking, reading, writing, and listening to real-life German.

GERM 1B - Accelerated German (5)

Accelerated course part 2 covers part of GERM 2 and all of GERM 3. In this course, students who have successfully completed GERM 1A (or its equivalent) continue to develop competence in speaking, reading, writing, and understanding real-life German.

Prerequisite: Prerequisite(s): GERM 1A or GERM 2 or placement by examination. For students completing GERM 2, GERM 3 is preferable.

GERM 2 - First-Year German (5)

GERM 2, a second-quarter course, is designed for students who have successfully completed German 1 (or its equivalent). Students continue to develop competence in speaking, reading, writing, and understanding in the context of real-life language use.

Prerequisite: Prerequisite(s): GERM 1 or GERM 1A or placement by examination.

GERM 3 - First-Year German (5)

GERM 3 is designed for students who have successfully completed GERM 2 (or its equivalent; e.g., 2-3 years of high school German). Students continue to develop competence in speaking, reading, writing, and understanding real-life German.

Prerequisite: Prerequisite(s): GERM 2 or placement by examination.

GERM 4 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 1B or GERM 3 or placement by examination.

GERM 5 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 4 or placement by examination.

GERM 6 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 5 or placement by examination.

GERM 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

GERM 99 - Tutorial (5)

Students submit petition to sponsoring agency.

GERM 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

GERM 119 - German Media (5)

This third-year language and culture course is designed for students who are comfortable speaking and writing German at the GERM 5 level or above. Using a variety of German media sources, students give oral presentations and write reports on contemporary issues. Taught in German.

Prerequisite: Prerequisite(s): GERM 5 or placement by examination.

GERM 120 - Advanced German Conversation and Composition (5)

This third-year language course is designed for students who are comfortable speaking and writing German at the GERM 5 level or above. Using a variety of German texts, including print- and visual media, students practice advanced conversation and composition skills. Taught in German.

Prerequisite: Prerequisite(s): GERM 5.

GERM 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

GERM 199 - Tutorial (5)

Students submit petition to sponsoring agency.

GERM 199F - Tutorial (2)

Students submit petition to sponsoring agency.

GRAD-GRADUATE

Graduate

GRAD 200 - Academic Writing for Graduate Students (0)

Introduces best practices in academic writing including issues of citation, plagiarism, and structure in research. Students receive feedback from instructors and peers in order to encourage a "writing process" and an awareness of student/faculty roles.

Prerequisite: Concurrent enrollment in GRAD 200 and GRAD 202 is required. Enrollment is restricted to international graduate students in the Graduate Preparation Program.

GRAD 201 - Oral Communication for Graduate Students (0)

Focuses on understanding and being understood in seminar style classroom environments, including academic conversation techniques, pronunciation as needed, and using/identifying evidence in discussion. Introduces U.S. classroom approaches to presentation and student-centered teaching and learning.

Prerequisite: Concurrent enrollment in GRAD 200 and GRAD 202 is required. Enrollment is restricted to international graduate students in the Graduate Preparation Program.

GRAD 202 - Reading and Research Skills for Graduate Students (0)

Introduces reading strategies and techniques, including skimming and scanning, note-taking, and text analysis to improve critical reading skills. Also introduces students to UCSC library resources as well as the basic research skills of gathering and analyzing evidence.

Prerequisite: Concurrent enrollment in GRAD 200 and GRAD 201 is required. Enrollment is restricted to international graduate students in the Graduate Preparation Program.

GREE - GREEK

Lower-Division

GREE 1 - Elementary Ancient Greek (5)

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only.

GREE 2 - Elementary Ancient Greek (5)

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature.

Prerequisite: Prerequisite(s): GREE 1, or permission of instructor.

GREE 99 - Tutorial (5)

Students submit petition to sponsoring agency.

GREE 99F - Tutorial (2)

Students submit petition to sponsoring agency.

HAVC - HISTORY OF ART AND VISUAL CULTURE

Lower-Division

HAVC 10 - Introduction to African Visual Culture (5)

An interdisciplinary approach to the study of the basic structures (gender, art within political sphere, and spiritual aspects of visual culture) and cultural institutions (initiations, closed associations, kingship, title association, etc.) around which the study of African visual culture revolves.

HAVC 20 - Visual Cultures of Asia (5)

An introduction to the art and architecture of East Asia, including China, India, Southeast Asia, and Japan. In order to achieve a fuller understanding of the arts of these countries a historical, cultural, and religious context is provided.

HAVC 22 - Religion and Visual Culture in China (5)

Introduction to the study of religious currents and practices in China and their visual expression. In addition to religious art, topics include such pivotal matters as body concepts and practices, representations of the natural world, and logics of the built environment.

HAVC 24 - Southeast Asia Visual Culture (5)

Introduces the visual cultures of Southeast Asia. Topics include indigenous megalithic art, textiles, and jewelry, as well as Hindu and Buddhist art and architecture. Also considers shadow play and dance performance as alternative lenses to looking at ritual and visual narratives rendered on stone temples.

HAVC 27 - Image and Ideology in Indian Art (5)

Examination of the ways social, religious, and political patronage have affected the production and reception of art in the Indian subcontinent. The course is designed as a series of case studies from different periods of Indian history.

HAVC 28 - Ghosts, Haunting, Memory, and Erasure in

the Films of Asia (5)

Explores the theme of memory, haunting, ghosts and the politics of erasure and remembrance in films made by Asian filmmakers and contemporary artists in Asia. Examines the intersecting themes of haunting, memory, and ghosts and how selected filmmakers and visual artists in Asia go about framing and unframing this topic in their work. The goal of the course is to see, through a comparative lens, how these selected filmmakers and artists treat the topic of specter and the politics of memory and erasure in their respective films from a national and transnational perspective.

HAVC 30 - Introduction to European Visual Culture (5)

General survey of European art and architecture with a focus on the southern, Mediterranean ancient cultures. Course consists of a number of case studies of works from various periods from ancient to modern.

HAVC 35 - European Visual Culture in a Global Context 1500-1900 (5)

Survey of the visual and material products of European contact with Africa, Asia, Oceania, and the Americas between 1500 and 1900 focused both on object-specific case studies and thematic discussions of contact, colonialism, appropriation, and the visual construction of race.

HAVC 40 - Museum Cultures: The Politics of Display (5)

Explores the history of collecting and displaying art (museums, galleries, fairs) since the mid-19th century and the effect of institutional changes on aesthetic conventions. Follows the history from the origins of museums and collections to contemporary critiques of institutional exclusion and misrepresentation.

HAVC 41 - Introduction to Modern Art (5)

Examines the social, economic, and political significance of European and U.S. modernist art and architecture, moving from French realism to American minimalism. Provides the historical background and theoretical frameworks needed to make sense of modernist art and culture.

HAVC 43 - History of Modern Architecture (5)

Examines the origins and development of modern architecture, from the Enlightenment and the Industrial Revolution to the 20th Century and beyond. Buildings, urban plans, and works of art and design are discussed in relation to political, social, and cultural currents.

HAVC 44 - Designing California: Architecture, Design, and Environment (5)

Introduces the complex interplay between design--including architecture, art, engineering, and city planning--and conceptions of environment during the 20th Century in the American West.

HAVC 45 - Photography Now (5)

Explores recent methods and approaches in photography. Surveys significant aesthetic, conceptual, and theoretical shifts occurring in the photographic medium and related discourses. Special attention given to the current landscape of contemporary photography (1980-present).

HAVC 46 - Introduction to U.S. Art and Visual Culture (5)

Overview of U.S. art and visual culture from the late 18th Century to the present. Examines art as evidence for understanding evolving beliefs and values of Americans. Explores the social and political meanings of art, and pays particular attention to how artists, patrons, and audiences have constructed nationalism, race, class, sexuality, and gender.

HAVC 47 - Introduction To Contemporary Art (5)

Introduces students to major debates and practices in contemporary art from 1960 to the present. Not a strict chronological survey or exhaustive catalogue, the course attends to movements and theoretical frameworks that still fuel contemporary practice and criticism.

HAVC 48 - Climate Justice Now! Art, Activism, Environment Today (5)

As climate change grows more severe, artists and activists are creating strategies of consciousness-raising, mass mobilization, and sustainable living. This course investigates the convergence of climate justice and cultural politics, exploring imperatives for a just transition to a post-carbon future.

HAVC 49 - From Memes to Metadata: an Introduction to Digital Visual Culture (5)

Introduction to digital visual culture including critical and historical approaches to memes; social media and politics; and the many intersections of data, images, and society. Sample topics include: digital art, digital activism, and surveillance.

HAVC 50 - Ancient Mediterranean Visual Cultures (5)

The role that ancient art and visual culture play in constructing social identities, sustaining political agendas, and representing various cultural, ritual, and mythological practices in Mesopotamia, Egypt, Greece, and Rome, including the sociology of ancient cultures, mythology, religious studies, gender studies and history.

HAVC 51 - Greek Eyes: Visual Culture and Power in the Ancient Greek World (5)

The central role of visual communication in ancient Greek civilization: examines the construction of cultural, social, political, religious, and gender identities through material objects and rituals. Includes discussions of images of the public and private sphere,

athletic and theatrical performances, mythology, pilgrimage, and magic.

HAVC 55 - Unclothed: The Naked Body from Antiquity to the Present (5)

The human body without clothing in European and European-American art and visual culture from ancient Greece to the present day. Among the themes to be addressed: gender, youth and age, sexuality and sexual preference, fecundity and potency, erotic art and pornography, primitivism and the naked body of the non-European. (Formerly HAVC 31, The Nude in the Western Tradition.)

HAVC 58 - Gardens of Delight: Fifteen Centuries of Islamic Visual Culture (5)

Examines some of the most representative creations of Islamic visual culture from the 7th Century to the present in order to appreciate the richness of this tradition and its extensive influence on other cultures. Focuses on the social, political, and religious role of a variety of materials, from mosques, palaces, and gardens to visual narratives, ceremonies, dance, and contemporary films.

HAVC 60 - Indigenous American Visual Culture (5)

Selected aspects of art and architecture of the first peoples of the Americas, north, central, and south, from ca. 2000 B.C.E. to present. Societies to be considered may include Anasazi, Aztec, Inca, Northwest Coast, Maya, Navajo, Plains, and others.

HAVC 64 - Indigenous North American Materiality and Resistance (5)

Through case studies of contemporary and historical practices, course examines the rich visual cultures of the United States and Canada. Students learn about the role artists play in resisting colonization and sustaining community knowledge.

HAVC 65 - Native American Art and the Environment (5)

Introduces students to the work of Native American artists that either reflects environmental knowledge or which reacts against threats to natural resources. By studying current issues such as fossil fuel extraction, invasive species, and wildfires, students learn how artists contend with threats to their ancestral homelands and how art functions as a powerful medium for raising awareness of these challenges.

HAVC 70 - Visual Cultures of the Pacific Islands (5)

Interdisciplinary course examines visual cultures of Australia, Melanesia, Micronesia, and Polynesia from the archaeological past through contemporary periods.

HAVC 80 - Colonial Histories and Legacies: Africa,

Oceania, and the Indigenous Americas (5)

The arts and visual cultures of selected cultures that developed outside the spheres of influence of major European and Asian civilizations, with an emphasis on the history and influence of colonialism in creating current ethnic and racial categories.

HAVC 85 - Introduction to Global Architecture (5)

Introduces the study of architecture and the built environment from a global perspective, focusing on architecture's relation to themes, such as ritual, power, the city, technology, and climate.

HAVC 99 - Tutorial (5)

Supervised study for undergraduates. Students submit petition to sponsoring agency.

Upper-Division

HAVC 100A - Approaches to Visual Studies (5)

Introduction to major issues of method and critique in study of art and visual culture. Focuses on understanding disciplinary and critical modes of scholarly inquiry in the visual arts, including role of historical research. Emphasizes intensive reading, discussion, and writing. HAVC 100A is a prerequisite for all History of Art and Visual Culture seminars.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior History of Art and Visual Culture majors and minors.

HAVC 110 - Visual Cultures of West Africa (5)

Explores visual cultures of West Africa through time (Nok to present). Attention paid to relationships between peoples and impact of European/Arab presence on visual cultures. Prerequisite(s): HAVC 10 or HAVC 80 recommended.

HAVC 111 - Visual Cultures of Central Africa (5)

Examination of visual cultures of Central Africa within a historical sequence from the Sanga archaeological excavations to contemporary easel painting.

Prerequisite: Prerequisite(s): HAVC 80 suggested. Enrollment is restricted to sophomores, juniors and seniors (recommended).

HAVC 115 - Gender in African Visual Culture (5)

In Africa, relationships exist between gender and visual culture. Course examines where categories come from, differences in men's and women's visual cultures, and how visual cultures teach, reinforce, and negotiate gender definitions. When are male/female boundaries crossed, and why?

HAVC 116 - African Architecture (5)

Study of the built environment in Africa. The course explores the diversity of architectural types and how gender, politics, religion, and culture shape and are shaped by architectural spaces and how the natural environment shapes the built environment.

HAVC 117 - Contemporary Art of Africa (5)

Examines contemporary arts in post-colonial Africa, 1960-present, including new popular cultural forms; arts resulting from new class and national structures; commodification of culture; Pan-Africanism; exhibitionism; and questions of destiny.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 118 - Art of the Contemporary African Diaspora (5)

Considers contemporary art by African artists operating in metropolitan centers, as well as Afro-British, Afro-Caribbean, and African-American production. Topics are organized thematically and address constructing and deconstructing the idea of Africa; cultural authenticity; diaspora; Creolite and creolization; hybridity; cosmopolitanism; post-black; and globalism in the arts.

Prerequisite: Background in history of art and visual culture recommended. Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 119 - Arts and Politics of African Urban Space (5)

Using contemporary art and other visual materials, examines how select African cities are structured, imagined, and contested, and how migration, colonialism, race, ethnicity, and globalization inform their spatial politics. Draws from urban studies, political theory, memoir, anthropology, and visual studies.

HAVC 122A - Sacred Geography of China (5)

An examination of the close relationship of religious traditions and the natural world in China, and its expression in visual representation. Particular emphasis on the ways in which competing groups sought to define or re-envision an understanding of the terrain.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 122B - Constructing Lives in China: Biographies and Portraits (5)

Consideration of biographies and portraits in China as representations of human types and individuals, and the use of these representations as models for constructing lives. Attention to historical and social contexts, early times to present. Special focus on Chinese Buddhist traditions. A previous course that focuses on traditional China or Buddhist studies strongly recommended.

HAVC 122C - Writing in China (5)

Examines material and conceptual phenomena of writing in Chinese visual culture. Focuses on the intersections of places and practices of writing through various inscribed sites, ranging from oracle bones, seals, and mountain facades to hand scrolls, architecture, and contemporary art.

HAVC 122D - Chinese Landscape Painting (5)

Examines the history and significance of the subjects most prominent in Chinese painting during the past one thousand years, focusing on the cultural factors that made landscape a fundamental value in the Chinese tradition and the methods whereby painters created pictorial equivalents.

HAVC 122F - Bodies in Chinese Culture (5)

Introduces images, thoughts, and practices of bodies in Chinese culture. In China and Taiwan, the body is to be cherished, adorned, nourished, cultivated, and gazed upon, but also disciplined, altered, and controlled. Examines texts and images of the Chinese body in relation to religion, gender, ethnic politics, martial arts, sports, nationalism, food, medicine, and death. No knowledge of the Chinese language is required.

HAVC 123A - Modernity and the Arts of India (5)

Deals with artistic responses to the forces of modernity, colonialism, industrialization and globalization in India during the 19th and 20th centuries. Addresses the complex and often painful climb toward re-establishing a truly Indian artistic identity. (Formerly Modernity and Nationalism in the Arts in India.)

HAVC 123B - Religions and Visual Culture of South Asia (5)

South Asia is the home of many religions (Hinduism, Buddhism, Jainism, Islam, and Sikhism). Introduces the role images (painting, sculpture, architecture, photography, film) play in shaping these diverse religious traditions.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124A - Arts of Ancient Southeast Asia (5)

Focuses on Hindu and Buddhist arts of ancient Southeast Asia (Indonesia, Cambodia, Vietnam, and Thailand). Materials covered include indigenous megalithic arts, stone sculptures, and monumental temple architecture such as Angkor Wat, Borobudur, Prambanan, and the Bayon.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124B - History of Photography in Southeast Asia (5)

Examines how photography was used in Southeast Asia to document the racial difference and the exotic Others

under the regime of colonialism. Considers the role photography played in documenting the Vietnam-American War and how contemporary Southeast Asian-American artists challenge this photographic history in their art.

Prerequisite: Enrollment is restricted to sophomores, juniors and seniors.

HAVC 124C - Arts and Politics in Theravada Traditions (5)

Consideration of the arts and architecture in Theravada Buddhist traditions in Sri Lanka and Southeast Asia. Topics and themes include ritual, relics, visual narrative, mural painting, contemporary art, mass-meditation movement, and political protest.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124D - Contemporary Art of Southeast Asia and its Diaspora (5)

Examines the respective national notions of modernity in the region through a comparative lens. How global capital flow and transnational cultural exchanges impact the production of arts of Southeast Asia and its diaspora. Themes and issues include: colonialism and art education; nationalism; identity politics; memory; trauma; gender; race; sexuality; and the body.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124E - Southeast Asian-American and Diasporic Visual Culture (5)

Focuses on Southeast Asian refugee visual culture in the United States. Themes and issues include: trauma; memory; the politics of race and ethnicity; gender and sexuality; and the politics of inclusion and exclusion from the nation-state.

HAVC 127A - Buddhist Visual Worlds (5)

Introduction to the study of Buddhist visual traditions, from their beginnings to the present day. Case studies examined with careful attention to historical, social and cultural contexts; particular emphasis on the relation of visual traditions to Buddhist practices.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior students.

HAVC 127B - Buddhist Pure Lands (5)

Explores Buddhist imaginative worlds of the "pure lands": worlds in outer space, sacred mountains, internal states of mind. Study of related practices, including expression and representation of these concepts in paintings, scriptures, poetry, and built environments. Focus is on Chinese traditions.

HAVC 127C - Ritual in Asian Religious Art (5)

Examination of interaction between image and ritual in Asian religious art. Case studies from different historical periods and geographical locations (e.g., China, Tibet, Japan, Indonesia, India). Examples include mandalas, ritual bronzes, tankas, sacred caves, temples, tea ceremonies, and calligraphy.

HAVC 127D - Storytelling in Asian Art (5)

Combination of theoretical perspectives on narrative from literary criticism, rhetoric, folklore, and film theory with art historical focus on images (cave temples, stone reliefs on stupas, scrolls, dance-drama, etc.) from India, Pakistan, China, Japan, Cambodia, and Indonesia.

HAVC 127E - Modern/Contemporary Architecture of the Asia Pacific (5)

Examines 20th- and 21st-century architecture in the Asia Pacific. Examines how aesthetic, socio-political, economic, and technological networks have contributed to Asia Pacific's dynamic and experimental approaches to contemporary architecture.

HAVC 127F - The Politics of Exclusion: Asian American Visual Culture (5)

Examines Asian American artists as well as representations of Asian Americans through U.S. history. Addresses such themes as migration and dislocation, race and identity, intergenerational relationships, origins and diasporas, and American foreign policies in Asia.

HAVC 133A - Themes in the Study of Medieval Visual Culture (5)

Many issues associated with contemporary artistic production and visual culture originated in the Middle Ages. Themes to be considered: role of secular art; women as artists and patrons; aesthetic attitudes; relationship between cultures in holy war, crusade, and pilgrimage.

HAVC 135B - German Art, 1905-1945 (5)

Expressionism, agitprop, the Bauhaus, New Objectivity, attacks on modernism, National Socialist realism. Painting, sculpture, graphic art, and some architecture and film, studied in the context of political events from the eve of World War I to the end of World War II.

HAVC 135D - Art, Revolt, and Revolution in Europe 1750-1850 (5)

Lecture course focusing on the dynamics of art and politics in France, Britain, and to a lesser extent Spain, from 1750 to 1850. This period of dramatic social change gave rise to new conceptions of subjectivity, freedom, nationhood, and the public address of visual culture. (Formerly French Painting, 1780-1855.)

HAVC 135E - Jewish Identity and Visual Representation

(5)

An exploration of the theoretical and practical or experiential applications of Jewish identity in European visual representation. Brief background on pre-emancipation textual and cultural issues followed by study of the Jewish subject and Jewish subjectivities in modernity.

Prerequisite: Enrollment is restricted to juniors and seniors.

HAVC 135F - Art of the Book in Western Europe 500-1600 (5)

The history of European books circa 500-1600, primarily medieval, illuminated manuscripts and the first years of printing. Focuses on the relationship between text and image. Topics include techniques of book production, the archeology of the book, and the life and travels of individual books. (Formerly course 191R.)

HAVC 135G - Blood, Guts, and Gore: Representing War from Leonard da Vinci to Abu Ghraib (5)

Examines images of war from 1400 to the present. Class discusses the many aspects of war while considering major painters of the last 600 years, including da Vinci, Rubens, Goya, Picasso. Class also discusses Callot, Marinetti, etc., and other media, including film, photography, and public monuments.

HAVC 135H - Topics in European and Euro-American Visual Culture (5)

Consideration of how and why Europeans in Europe and Europeans and European-Americans in North America blended nature and human response between 1600 and the present in a variety of media and practices (painting, maps, photography, tourism, film, scouting, artist colonies).

HAVC 135K - Art and Science in Europe 1500-1900 (5)

Examines a select number of case studies from 1500-1900 to see how thinkers and makers relied upon science and art to help them understand the world, asking how have scientists and natural philosophers used art to make their claims more convincing, how have artists relied on scientific research to do the same, and what practices do they have in common.

HAVC 135L - Nineteenth-Century Europe in Prints (5)

Focuses on the public lives of printed pictures in Europe between 1789 and 1914. In lectures and in written assignments, the class analyzes how artists created works in multiple, which were then circulated by publishers and dealers and consumed by viewers across Europe. In-class discussions compare 19th-century print cultures to our current practices of engaging socially with digital images to see what each illuminates about the other.

HAVC 135P - Paris, Capital of the 19th Century (5)

Examines the places, spaces, practices, and representations of Paris in the 19th century. Tracing the changing face(s) of Paris by way of its literary and visual representations, students consider the experiences and constructions of the modern city.

HAVC 137A - Northern Renaissance Art (5)

Considers the painting and prints produced in Northern Europe in the 15th and 16th centuries. Major issues include the status of realism and classicism, the role of religion and religious reform, and the rise of popular imagery.

HAVC 137E - Renaissance Prints (5)

Examines the issues surrounding the technology and uses of printed images from the early Renaissance through the end of the early modern period. Topics may include the political, religious, and satirical uses of prints and the representation of women in prints.

HAVC 140A - America in Art (5)

Introduction to American visual arts: architecture, painting, photography, sculpture, and performance art, from the nineteenth through the twenty-first century. Explore social and political meanings of art and what art reveals about our nation's values and beliefs, in particular, gender and race.

HAVC 140B - Victorian America (5)

Examines how American writers and artists negotiated complexities of U.S. society during the 19th century. Emphasis on issues ranging from women's rights to laissez-faire capitalism, and from Reconstruction to manifest destiny. Considers how the era's cultural products provided artists, patrons, and audiences with metaphorical coping strategies to counteract what Victorians perceived to be the period's overwhelming social and political changes.

HAVC 140C - Race and American Visual Arts (5)

Investigation of the role played by visual arts in fashioning the racial identities of European-Americans, African Americans, Asian Americans, Native Americans, and Latinos in the United States.

HAVC 140D - Chicano/Chicana Art: 1970-Present (5)

Taking the terms Chicano and Chicana as a critical framework, addresses cultural and conceptual themes in visual art production since 1970. Questions concerning aesthetics, identity, gender, and activism in painting, photography, murals, and installation art explored.

HAVC 140E - Art and Science in America: Contact to circa 1900 (5)

Examines the relationship between art and scientific inquiry in American visual culture from earliest European exploration through the 19th century, when new scientific theories and technological advancements

challenged earlier modes of understanding vision, spirituality, and the physical world.

HAVC 140P - Pop Culture as High Art (5)

Examines how Pop Art and popular culture in the United States were (re)formulated into public icons that challenged the visual and ideological associations between high and low art.

HAVC 141A - Modern Art: Realism to Cubism (5)

Modern art in Europe and America, 1848-1914. Consideration of painting, graphic arts, and sculpture in Realism, Impressionism, Post-Impressionism (Symbolism) Art Nouveau, Fauvism, and Cubism as well as exploration of photography's changing status and influence.

HAVC 141B - Death, Desire, and Modernity (5)

Explores war, consumption and desire in the art of the 20th century. From Paris to New York, Cubism to Feminism, explores the relationship between the visual arts and intellectual movements such as psychoanalysis, existentialism, and phenomenology with particular attention to racial and sexual politics.

HAVC 141C - Modern Art: Pop to Present (5)

Surveys the art forms and critical ideas that have shaped artistic practice from the 1950s to the present, including an overview of the socio-political, economic, and cultural forces that inspire artists to articulate human experience in visual form. Examines how popular culture in the post-war United States became intertwined with visual art, forming into the artistic genre known as Pop Art. This important aesthetic shift challenged the political, ideological, and representational value systems that inform our understanding of so-called "high art."

HAVC 141E - Histories of Photography (5)

Introduction to the histories of photography and the critical debates around different photographic genres such as medical photography, art photography, and political photography. Students will develop a critical language in order to analyze photographs while considering the importance of social and institutional contexts.

HAVC 141F - The Camera and the Body (5)

Through the study of historical and contemporary visual texts (from ethnography and portraiture to advertising and erotica), this course explores how photographic images of the body, while masquerading as natural, self-evident, or scientific, participate in highly coded sign systems that influence who looks at whom, how, when, and why.

HAVC 141H - Media History and Theory (5)

An introductory examination of the writing about the issue of medium and media theory in visual culture.

Technologies, discourses, and practices from all periods that use the comparison of media as a major approach to understanding the problems of the visual are highlighted. New media, film, television, video, traditional arts are also treated.

HAVC 141I - Be Here Now: Art, Land, Space (5)

From the "happenings" of the late 1950s to contemporary ecological art, this course will examine temporary, site-specific projects of the U.S and Western Europe. Students will be introduced to theories of public art and the social production of space, and invited to explore practices that change the role of the audience, remake museum spaces, situate art in nature, or transform urban life.

HAVC 141J - Critical Issues in Contemporary Art and Visual Culture (5)

Explores how theory can illuminate various forms of cultural production from art and cinema to popular and material cultures. Considers how scholars and visual producers utilize theory creatively and in the study of aesthetic objects and experiences.

HAVC 141K - Activist Art Since 1960: Art, Technology, Activism (5)

Students explore art and technology produced for social change since 1960 within the context of major historical ruptures, such as the Vietnam War, the women's movement, environmental protection, AIDS activism, anti-capitalist, and international human rights movements.

HAVC 141L - Museums in the Internet Era (5)

Explores the world of museums in the age of digital technologies and the Internet. Key themes include digital repatriation, social media, interactivity, participation, net art, and digital aesthetics.

HAVC 141M - Museum Practices (5)

How are museums organized, categorized, visited? How are objects physically handled, documented, and displayed? Course explores various concepts upon which museum practices are based and the impact these concepts have on society and cultures.

HAVC 141N - Data Cultures: Art, Technology, and the Politics of Visual Representation (5)

Through critical readings, interactive assignments, and primary sources, this course explores cultural and political issues around data, emphasizing the impacts of relevant technologies and practices on art and visual culture. Sample topics: digital art, critical mapping, social media, and surveillance.

HAVC 141O - Sex, Lies, and Surveillance: Contemporary Documentary Arts (5)

Focuses on contemporary experiments in artistic documentary practice, including photography and

digital imagery, moving-image media, and artistic installations. Considers artistic case studies and leading theoretical and critical elaboration in relation to international cultures of documentary practice.

HAVC 141P - Networks and Natures: Art, Technology, and the Nonhuman (5)

Through critical readings and primary sources, this course explores the historical and theoretical developments in the interactions of art, culture, nature, and technology. Sample topics include environmental art; media infrastructures; concepts of nature and the nonhuman; and climate change and visual culture.

HAVC 142 - Contemporary Art and Ecology (5)

Investigates contemporary art and the politics of ecology. Examines the intersection of art criticism, politico-ecological theory, environmental activism, and postcolonial globalization, considering geopolitical areas diverse as the Arctic, Nigeria, Bangladesh, India, Europe, and the Americas.

HAVC 142M - Museum Exhibitions (5)

Students work in collaborative teams to create and install an exhibition. Students take the roles of museum departments, moving the project from concept to installation. The impact exhibitions make in culture and society is examined throughout each step of the process. (Formerly History of Art and Visual Culture 191M).

HAVC 143A - Contemporary Architecture and Critical Debates (5)

Examination of practitioners, projects, issues, and theories in contemporary architecture circa 1968 to the present. Topics include the architecture of aftermath, the ethics of memory and memorialization, the corporatization of museums, the role of criticism and exhibitions, and the cult of the brand-name architect.

HAVC 143B - History of Urban Design (5)

Examines urban design from the Renaissance to the present, including Latin American colonial cities, Utopian plans, and sites such as Brasilia and Chandigarh. The course focuses on social justice, diversity, and the role of art and architecture.

HAVC 143C - Latin American Modern Architecture (5)

Presents Latin America's modern architecture with relation to colonization; the influence of immigrants from Europe, Africa, and Asia; the presence of indigenous cultures; and the search for autonomy. Case studies include Argentina, Brazil, Chile, Mexico, Venezuela, and Uruguay.

HAVC 143D - Architecture and the City in Modern and Contemporary Visual Culture (5)

Examines the modern and contemporary depictions of cities in visual and material culture, from paintings and photographs to logotypes and souvenirs. Also examines

the roles of narrative in spatial representations, including literature, film, and television productions.

Prerequisite: Enrollment is restricted to juniors and seniors.

HAVC 143E - History of Design: The Objects of Technology, 1850-The Present (5)

Traces the connections between key movements in modern design and the evolution of technology in society. Also provides a framework for engaging critically with the proliferation of technology in society today.

HAVC 143F - Memory, Place, and Preservation in Modern Architecture (5)

How have architects engaged with ideas of memory and place in architectural projects and built landscapes from the 18th century to the present? This course examines topics such as memorializing, erasure of place, historic preservation, and cultural heritage in modern architecture. (Formerly Memory, Place and Architecture.)

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 143G - After Utopia: Architecture and the City, 1968-Present (5)

Explores critical issues in the history of architecture and urbanism from 1968 to the present. Major themes in the development of contemporary architecture are introduced, including the uneven legacy of modernism, the growth of cities, changing technologies, environmental issues, and the social and political context of design.

HAVC 144A - Latin American Art and Visual Culture (5)

Investigates Latin American and Caribbean art and visual culture. Studies decolonial resistances, alternative modernisms, examining the shaping of race and ethnicity under global capitalism. Looks at practices by Latin American and Latinx artists, focusing on Afro-Latinx and indigenous knowledges.

HAVC 151 - Greek Myths Antiquity to the Present (5)

Myths dominated the culture and visual production of the ancient Greek world, and their presence is still strong today. How did they codify social, political, and religious realities and needs? How were they perceived in different time periods? In addition to ancient Greek and Roman and later European sculptures and paintings, this course considers less conventional sources, such as modern films, comics, and advertisements. HAVC 51 recommended as preparation.

HAVC 152 - Roman Eyes: Visual Culture and Power in

the Ancient Roman World (5)

Visual culture in the ancient Roman world, from temples and public monuments to houses and tombs, performances, and rituals. Examines the construction of social and cultural identities, including class, gender, and sexuality, through architecture, sculpture, painting, household objects, jewelry, etc.

HAVC 153 - Neither Venus Nor Virgin: Women's Lives Beyond Men's Constructs in Late Antiquity and Byzantium (5)

Explores the lives of women in Late Antiquity and Byzantium through a critical analysis of primary visual and textual sources, most of which were produced by men. Looking beyond social expectations, we attempt to understand female experiences and agency.

HAVC 154 - Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C (5)

Centered on the capital city of Constantinople (modern Istanbul), the Hellenized and Christianized Roman Empire of the Eastern Mediterranean today known as Byzantium played a major, yet often overlooked, role in European history for more than a millennium. This course examines its visual production and relation to politics and religion in court and church ceremonial, expressions of Christian faith, and cultural interactions with Western Europe, Islam, and the Slavic world.

HAVC 155 - Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages (5)

The construction of female identity and the production of history through the myth of Cleopatra. Critical analysis of archeological data and ancient sources, later sculptures and paintings, and contemporary films, movies posters, Internet sites, advertisements, comics, games, dolls, and household objects.

HAVC 157B - Italian Renaissance: Art and Architecture (5)

Lives of Italian Renaissance people from birth to death, examining the nature and roles of the institutions which defined human existence in this period. Uses visual arts both illustratively and to study how institutions fashioned their images through art and architecture.

HAVC 157C - High Renaissance (5)

An investigation of the High Renaissance as a period and stylistic concept, using the major artists and monuments of the period 1480–1525 to discuss issues of theory, history, and art. Artists considered include Leonardo da Vinci, Michelangelo, and Raphael.

HAVC 157D - Art of the Venetian Renaissance (5)

Considers Venetian art in the 15th and 16th centuries. Topics include major artists (the Bellini, Carpaccio, Titian, Tintoretto, Veronese, Palladio) and the

relationship of the city to outside forces (Byzantine Empire, Turkish Empires) and other Italian cities.

HAVC 160A - Indigenous American Visual Culture Before 1550: Mexico (5)

Art and architecture of selected pre-Hispanic cultures from the gulf coast, central, western, and southern Mexico including the Olmec, Zapotec, Toltec, Mixtec, Mexica (Aztec), and others.

HAVC 160B - Indigenous American Visual Culture Before 1550: The Andes (5)

The art of selected pre-hispanic cultures of Colombia, Ecuador, Peru, and Bolivia including the Nazca, Moche, Chimu, and Inca.

HAVC 162A - Special Studies in Early Indigenous American Visual Culture: The Ancient Maya (5)

The art and architecture of the Maya of southern Mesoamerica from the first century C.E. to ca. 1500. HAVC 80, HAVC 60, or HAVC 160A are recommended as preparation. (Formerly Advanced Studies in Early Indigenous American Visual Culture: The Ancient Maya.)

HAVC 162B - Special Studies in Early Indigenous American Visual Culture: The Inka (5)

The visual culture of the Inka of the Andean region of western South America including textiles, metalwork, and the built environment. HAVC 60 or HAVC 80 are recommended as preparation. (Formerly offered as Advanced Studies in Early Indigenous American Visual Culture: The Inka.)

HAVC 163 - The Native in Colonial Spanish America (5)

Indigenous contributions to colonial Spanish American visual culture including architecture, manuscripts, sculpture, painting, textiles, feather-work, and metallurgy. Focus on colonial Mexico, the Andes, and California.

HAVC 164A - Art and Visual Culture of Indigenous California (5)

Examines the diverse art and visual culture of California's Indigenous communities, by learning about historic practices and revitalization, artistic engagement with the built environment, performance and public art, activism through visual culture, and the deconstruction of stereotypes.

HAVC 165 - Indigenous Artists and the Borderland Missions (5)

The Missions of California, Arizona, New Mexico, Texas, Georgia and Florida impacted the lives of Indigenous peoples who were vital to the artistic and architectural development of these spaces. Course examines Indigenous contributions and ongoing reactions to these sites.

HAVC 170 - Art of the Body in Oceania (5)

Explores art of the body, defined broadly, from various perspectives. Examines colonial representations of Oceanic bodies, self-representation through bodily adornment and display (including tattoo, scarification, body painting, ornament, and dress), and bodily metaphors in Oceanic visual cultures.

HAVC 172 - Textile Traditions of Oceania (5)

Investigates how textiles contribute to cultural fabric of Oceania. Explores women's roles in socioeconomic exchanges and cultural production; gender issues regarding production and function of Oceanic textiles; and history of processes, functions, and aesthetics. Prerequisite: Prior coursework related to Oceania recommended.

HAVC 178 - Museums and Cultural Heritage in Oceania (5)

Examines representations of Pacific Island cultures. Explores the history of indigenous communities' relationships with museums and heritage institutions, and strategies to represent Oceanic histories, knowledges, and futures. Studies how stakeholders in cultural representation develop collaborative approaches to pursuing decolonized heritage practices.

HAVC 179 - Topics in Oceanic Visual Culture (5)

Examines selected and changing topics in the study of oceanic visual culture. The specific topic varies with each offering in order to keep up with recent directions in scholarship. Possible topics include: archaeological material and visual cultures; colonial-era images, objects, and spaces; architecture and environments; performance; gender; race and ethnicity; modern/contemporary art and visual culture; and/or a regional focus.

HAVC 180A - Contemporary Art in a Globalized World (5)

Examines major developments in art and theory, 1980s-present. Close consideration of how artists from around the globe innovatively respond to often fraught social, political, and economic circumstances. Topics include: experimental social relations, diaspora, migration, decolonization, institutional critique, globalization, the commons, and ecology. (Formerly Global Contemporary Art.)

HAVC 185 - Community Engagement Through the Arts (5)

Explores a variety of professional practices related to art history and visual studies. Focuses on critical issues central to community-engaged professional practice. Topics include: museums and communities, art and civic engagement, managing visual archives and collections, art law, cultural property, heritage preservation, art conservation, community arts organizations, public art, arts administration, academia,

pedagogy, the vital role of the arts and the humanities in contemporary life. (Formerly Art and Community: Arts Professions and Community Engagement.)

HAVC 186 - Horror and Gender in Art and Visual Culture (5)

Explores the theme of horror in 20th/21st-Century visual culture. Unpacks how horror is often reflective of entrenched cultural anxieties around the interplay between gender, morality, and female sexuality.

HAVC 186I - Indigenous Art and Activism (5)

Examines how indigenous artists and activists visually respond to issues related to land and sovereignty. Looks at a broad range of media used by indigenous creative practitioners, including documentary filmmaking, printmaking, photography, and performance.

HAVC 186Q - Queer Visual Culture (5)

Students gain critical skills to grapple with queer art, visual culture, and theory of diverse histories and geographies. Students consider how queer is applied and appropriated in the scope of in/visibility in a transnational context.

HAVC 188A - Introduction to Curatorial Studies (5)

Investigates display histories of natural, ethnographic, and historical objects as well as contemporary art curation practices. Explores how curatorial methodologies can reinforce or challenge inequalities implicit in choosing what and how objects are seen.

HAVC 188B - Biennials and Mega-Exhibitions (5)

Explores the recent history of curatorial practice. Through studying important exhibitions produced in recent decades, students learn about the range of social, political, and economic factors influencing how art is conceived and displayed today.

HAVC 188C - Site-Specific Art, Installations, Artists and Institutional Practice (5)

Examines key moments and projects in site-specific art since the 1960s, including Earth Works, the rise of installation art, and the interplay between artists and institutional venues sponsoring such projects, including museums, private galleries and patrons, and biennials.

HAVC 188M - Visual Culture of Memory (5)

Considers visual and material culture (art, architecture, heritage sites, monuments, and museums) from around the world to explore how expressions of collective memory address the present through memorializing, commemorating, changing, or forgetting the past. (Formerly Heritage, Memory, and Material Culture.)

HAVC 190A - African Art and Visual Culture (5)

Advanced seminar requiring intensive research and writing on changing topics related to a specific area of

African art and/or visual culture chosen to demonstrate critical mastery of this subject.

Prerequisite: Prerequisite(s): HAVC 10 or HAVC 80.

HAVC 190B - Play and Ritual in Visual Cultures (5)

Compares how play and ritual construct worlds and regulate visual cultures—from dolls to ritual objects and performances. Attention given to areas where play and ritual overlap and the visual cultures that result.

HAVC 190C - The Mediterranean from the Rise of Christianity to the Rise of Islam (5)

Examines the visual culture of the Mediterranean from the 3rd to the 7th centuries A.D., focusing on the historical and cultural developments which led to the survival of the Eastern Roman Empire and its transformation to what we call Byzantium.

HAVC 190D - The World of the Lotus Sutra (5)

Close study of the principal text of East Asian Buddhism as a self-enclosed vision of reality, with careful consideration of the forms and functions of the world of visual and aural representation that it has inspired.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190E - Huayan Visions (5)

Explores the distinctive conceptual world of the Buddhist Huayanjing (Avatamsaka-sutra) and its expression in visual forms. This long text, composed in Sanskrit and later translated into Chinese, is a principal scripture of the international Mahayana Buddhist traditions of Asia.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190F - Chan Texts and Images (5)

Examines selected issues in history of Chan (Zen) Buddhist traditions in China from medieval times to the present day. Concepts, methods, and visual expression of Chan practice situated through study of texts and visual materials.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190G - Buddhist Wisdom Traditions (5)

Careful study of Mahayana Buddhist perfection-of-wisdom traditions--texts and related material culture, including visual imagery and illustrated books--with focus on the particular vision of reality that they aim to produce or reveal.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190J - Visual Cultures of the Vietnam-American

War (5)

Examines the visual culture of the Vietnam-American war and its legacy in contemporary art of Southeast Asia. Considers representations in different media: painting, drawing, photography, film, novels, and material cultures. Issues addressed include memory, trauma, identity politics, body, race, gender, pornography, and prostitution.

HAVC 190K - Thematic Approach to Visual Cultures of Southeast Asia and Its Diaspora (5)

Undergraduate seminar that takes topical and thematic approaches to looking at the visual cultures of Southeast Asia and its diaspora. Media and themes include textile, film and literature, comparative modernity, race, gender, and sexuality. The specific topic and them varies from year to year.

HAVC 190M - Representations of Women in Indian Art (5)

Deals with representations of the female divinity in Indian religious imagery, and of women in secular and courtly paintings. Also examines roles women play in the production of art in the Indian subcontinent.

HAVC 190N - Topics in Mediterranean Visual Culture (5)

Examines selected and changing topics in the study of Mediterranean visual culture. Topics vary with each offering to keep up with recent directions in scholarship. Possible topics: Bronze Age Aegean cultures; myth, ritual, and religion in the Near East; Greek and Roman gender and sexuality; seafarers and cross-cultural interactions in the ancient Mediterranean; Islamic cultures of North African and Spain.

HAVC 190O - Berlin: History and the Built Environment (5)

Explores Berlin's urban and architectural history through themes: the meaning of memory in architecture; the political and cultural implications of preservation, globalization, and tourism. Because these questions are relevant beyond Berlin, course draws comparisons with other cities.

HAVC 190P - Death and Patriotism: The Case of the French Revolution (5)

What are the relations between the mortal body and politics in times of crisis? What purposes can death, or the threat of death, serve? Examines representations of executions, assassinations, and funerals during the French Revolution, with an emphasis on the Terror.

HAVC 190Q - Portraiture: Europe and America, 1400-1990 (5)

Western portraiture and self-portraiture at certain key moments (early modern Italy, 16th-century Germany, 17th-century Holland, France from the reign of Louis XIV to the Revolution, contemporary U.S.) are

explored by reading 20th-century interpretations and some primary sources. This course can be taken for senior exit credit only by permission of the instructor.

HAVC 190R - 19th-Century European Art Now (5)

Reframes and recontextualizes works of 19th-century European art by looking at recent scholarly approaches as well as the critical commentary offered by contemporary artists. (Formerly 19th-Century Art Now.)

HAVC 190S - New Directions in Contemporary Art (5)

Explores how critical theory illuminates forms of cultural production, from art and cinema to popular culture. Considers how scholars, artists, and filmmakers use critical theory both creatively and in the study of aesthetic objects and experiences.

HAVC 190T - Topics in Pre- and Post-Columbian Visual Culture (5)

Seminar on changing topics related to the current scholarship on pre-Hispanic and colonial Spanish American visual culture.

HAVC 190U - Word and Image in Illuminated Byzantine Manuscripts (5)

Religious, scientific, and secular manuscripts of Byzantium: examines how words and images interacted to express and promote central concepts of Byzantine culture; serve liturgical needs of private devotion; reflect imperial ideals; diffuse moral values and knowledge; and proclaim social status and cultural affiliations.

HAVC 190V - Cult of Mary in Byzantium (5)

Why did the cult of the Virgin Mary become so important in Byzantine culture? Examines historical, cultural, theological, political, and social reasons for this development, seen through the interaction of Byzantine visual culture and literature.

HAVC 190W - Art and Culture Contact in Oceania (5)

Examines impact of culture contact on Oceanic and Euro-American visual cultures in context of discovery, colonialism, and postcolonialism. Topics include 18th-century visual culture, colonial identities, primitivism, syncretism, impact of Christianity, contemporary art/market, media, tourism, transnationalism, and globalization. Prior coursework related to Oceania recommended but not required.

HAVC 190X - Art and Identity in Oceania (5)

Theoretical discussions and Pacific Basin case studies on 1) definitions of cultural, ethnic, and national identities; 2) relationship between art, museums, and construction of historical and cultural narratives; 3) ways tradition defined in art practices and used by groups to assert an identity in their present. Participants first develop a theoretical framework and vocabulary

for analyzing artistic production in a variety of cultures. Through specific case studies, will explore how art, architecture, and museums actively contribute to define and challenge ethnic and national identities. Prior course work related to Oceania recommended but not required.

HAVC 191A - Iconoclasm (5)

What happens when, to control an object, it is destroyed? Examines destruction of art as a way of ending the object's life cycle, as a device of social tension/change, and as a colonial and post-colonial mechanism of religious/political control.

HAVC 191B - The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S (5)

Focus on the histories of miraculous images of La Virgen de Guadalupe de Extremadura (Spain) and La Virgen de Guadalupe de Tepeyac (Mexico). The foundations and growth of the cult of the Mexican Guadalupe during the colonial period is examined along with the multivalent symbolism of her image. Considers contemporary appearances of the Virgin of Guadalupe, from the miraculous images on a tree in central California and the compositions of Chicano artists, to mass-produced kitsch.

HAVC 191C - Subalternities: Representing Others (5)

Explores how visual representation (in fine art, popular art, film, and television) encodes difference in selected cultural and historical contexts. Considers (post)colonial image-making both as a strategy of domination as well as resistance.

HAVC 191D - Semiotics and Visual Culture (5)

How can visual culture be understood as the production, circulation, and recirculation of signs? This course offers a history of semiotics and its methodological application in the analysis of images in popular culture and within the discipline of art history.

HAVC 191E - Feminist Theory and Art Production (5)

A close reading of works of art and theoretical texts by feminists working from 1970 to the present. The course encourages debate around the past, present, and future relevance of feminist theories to visual cultural studies, paying particular attention to issues of cultural and ethnic difference.

HAVC 191F - Image and Gender (5)

Examines what visual representations (feminine and masculine) reveal of gender in 19th- and 20th-century European and American culture; how images reflect norms of gender; and how we are conditioned to read images in gendered terms. Explores how femininity and masculinity were conceived during historical periods and how gender ideals changed in response to social, political, and economic pressures. Students encouraged to consider the fluid nature of 21st-century notions of

ideal femininity and masculinity and possible alternatives.

HAVC 191G - Art, Cinema, and the Postmodern (5)

Considers the relationship between art, cinema, and postmodernism. Specific, thematically oriented topics are considered including: the impact of cinema aesthetics on contemporary art; film and digital technology; cinematic structure as cultural critique; and filmic strategies as an ideological tool.

HAVC 191I - Topics in Architecture and Urban History (5)

Focuses on selected topics in the history of art and visual culture. Topics vary depending on instructor.

HAVC 191K - Decolonial Visual Culture (5)

Examines contemporary visual culture and processes of decolonialization in relation to topics including: petroculturalism, indigeneity, ecology, race, gender and sexuality, and multispecies ontology. Case studies include cultural practices in North America and Mexico, with diverse theoretical approaches.

HAVC 191L - Topics in Native American Visual Culture: Indigeneity and Pop Culture (5)

Examines the history of racist imagery and stereotypes that have shaped public perception of Indigenous American peoples. From imperialist propaganda through current-day manifestations, class examines the negative impacts misrepresentations have on Native communities and Indigenous responses.

HAVC 191N - Topics in Renaissance Art and Visual Culture (5)

Seminar on changing topics related to the current scholarship on the art and visual culture of the Renaissance.

HAVC 191O - Topics in Oceanic Visual Culture (5)

Seminar on current scholarship on Oceanic visual culture. Topics include pre-colonial, colonial, and post-colonial visualities; place and the built environment; performance; race; gender; travel and tourism; cultural institutions. Prior coursework related to Oceania recommended but not required.

HAVC 191P - Topics in Contemporary Art (5)

Addresses changing topics in contemporary art. The specific topic varies with each offering to keep up with new directions in scholarship.

HAVC 191S - Topics in American Art and Visual Culture (5)

Advanced seminar requiring intensive research and writing on changing topics related to a specific area of American art and/or visual culture chosen to demonstrate critical mastery of this subject.

HAVC 191U - City on a Hill: The Architecture of the Campus (5)

Explores the history of campus design in North America. Traces the ways designers have used the campus for staging new ideas of education and work, stimulating social relations, and connecting architecture with the natural world. Emphasis is devoted to UCSC and the Silicon Valley tech campus.

HAVC 191V - The Edge of the Sea: Architecture and Design on the California Coast (5)

The history of architecture and design along the California coast. Through a series of case studies selected from topics in twentieth century design, course explores the roles of designers in mediating relationships between infrastructure and landscape, technology and natural forces, ideas of the artificial and natural, as well as between humans and non-human species.

HAVC 191W - Art, Disaster, and Resilience (5)

Explores how art and other visual cultural practices--like participatory mapping, data visualization, and image sharing--negotiate the material and social consequences of both sudden and slow-moving disasters. Emphasizes critical, activist, and regenerative methods of representation, collaboration, and response.

HAVC 193F - History of Art and Visual Culture Service Learning (2)

Integrates academic study with meaningful community service to enrich the learning experience, teach civic responsibility, and strengthen communities. Projects may serve non-profit agencies, schools, or art/culture institutions. Enrollment is restricted to junior and senior history of art and visual culture majors and minors. Enrollment is by instructor permission.

HAVC 195 - Senior Thesis (5)

Students submit petition to sponsoring agency.

HAVC 198 - Independent Field Study (5)

Independent field study away from the campus. Students submit petition to sponsoring agency.

HAVC 198F - Independent Field Study (2)

Independent field study away from the campus. Students submit petition to sponsoring agency.

HAVC 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

HAVC 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

Graduate

HAVC 201A - Introduction to Visual Studies and Critical Theory (5)

Introduces the visual studies discipline, providing students with an overview of the field's development, its primary texts, and its issues of central concern. Features intensive readings and student-led discussions.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 202 - Introduction to Visual Studies Methods (5)

Examines research methods and approaches in a variety of materials, cultures, periods, and subjects that are relevant in the discipline of visual studies. Discussions focus on research and readings by history of art and visual culture faculty who share practices, experiences, and advice.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 204 - Grant Writing, Pedagogy, and Professional Development (5)

Students work on grants for educational support, dissertation funding, or both; learn about effective, accessible, and equity-minded TA- and GSI-related pedagogy (including developing course content, logistics, assessment, and grading criteria); and cultivate professional skills in relation to the publication process, CV preparation, and gaining employment in academia and beyond. (Formerly Grant Writing.)

Prerequisite: Enrollment is restricted to visual studies graduate students or by permission of the instructor.

HAVC 205 - Grant Writing in Visual Studies (3)

Devoted to grant-writing. Students work on composing and peer-reviewing research proposals, personal statements, bibliographies, CVs, and writing samples. Readings include literature on grant-writing and scholarly writing in the humanities.

Prerequisite: Enrollment is restricted to visual studies students or by permission of the instructor.

HAVC 212 - Yoruba Visualities and Aesthetics (5)

Yoruba conceptions of visibility are explored and compared to seeing through Western eyes. Critical reading focuses on Western and Yoruba scholars' work on visualities and complementary theoretical writings on Yoruba aesthetics and philosophy.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 213 - Theories and Visual Cultures of Iconoclasm (5)

Examines theories that attempt to explain iconoclasm, the willful destruction of religious or political objects,

by applying the theory (including theories of cultural heritage) to various case studies. The universal aspect of iconoclasm and the differences in understanding and practice are explored.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 220 - Topics in Asian Visual Studies (5)

Examines selected and changing topics in the visual studies of Asia. The specific topic varies with each offering to keep up with recent directions in scholarship.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 222 - The Image of Arhat in China (5)

Indian Buddhist sage-monks (arhats) are portrayed in China in ways that represent a remarkable variety of visual/historical/practice traditions. This seminar examines these depictions and explores the ranges of means and functions attached to this theme.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 224 - Engaged Buddhism and Visual Culture (5)

Begins with an analysis of photography and films capturing the Gandhian and Dalit movement in India. Students then read key Buddhist texts on engaged Buddhism, and look at the rise of engaged Buddhism in Southeast Asia in the 1960s and how it impacted modern and contemporary art in Southeast Asia and its diaspora.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 230 - Race, Aesthetics, and Art in 18th Century Europe (5)

Looks at the 18th-century connections of theories of beauty to practices of art-making, the production of knowledge about the natural world, and the construction of race. Students discuss not only the debates of this era but the impacts they have made on the study of visual culture.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 232 - The Monument Since 1750 in Relation to Nationhood and the Experience of War (5)

Investigates modern monuments (1750 to present) and the creation or maintenance of a nation, especially in terms of war and its immediate aftermath. Destruction or alteration of monuments and production of anti- or counter-monuments are also examined.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 233 - Visuality, Blackness, and the Human (5)

Focuses on recent scholarly approaches engaged with the representation of African-American culture and identity, with a specific emphasis in the visualization of blackness. Utilizing a cross-disciplinary approach, students explore the evolving critical discourses concerned with blackness and the human. (Formerly Topics in Contemporary Art and Visual Culture.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 235 - Photography and History (5)

Investigates the complex relationship between photography and history. Considers the evolving perceptions of photography's capacity to capture reality, the discursive means by which photographic truths are produced, and the utility of photographs as primary evidence.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 236 - Contemporary Art and Theories of Democracy (5)

Interdisciplinary approach to the study of democratic political theory of the last two decades and its relation to contemporary art practice with an emphasis on activist art, public art, and theories of speech and performance.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 240 - Seeing Race (5)

Investigates how discursive systems racialized the sight of various racial and ethnic groups in 19th- and 20th-century U.S. society. Focuses on the construction and maintenance of racial values systems and on the historically specific ways in which an eclectic assortment of visual artifacts have been read by groups over time. Considers the visual and material implications of race-based sight.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 241 - Decolonizing Nature: Contemporary Art and Ecology (5)

Considers how visual culture intersects with environment. Considers how, in the age of neoliberal globalization, documentary and neo-conceptual practices confront the biopolitics of climate change; the financialization and rights of nature; climate refugees; and indigenous ecologies.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 242 - Radical Futurisms (5)

Examines and compares radical futurisms-Indigenous, Afro, Chicana/Latina, multispecies, Postcapitalist-and situates them in relation to experimental visual cultural, media, and aesthetic practices, asking critical and creative speculative questions about what comes after end-of-world narratives.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 243 - Alternative Architecture (5)

Focuses on what is commonly left out of architectural history: the ephemeral, informal, illegal, and uncertain. Topics include: anonymous and collective architecture; temporary interventions; everyday urbanism; and vestigial urban spaces. These topics are understood through theories of space as socially produced (Henri Lefebvre, Michel de Certeau, among others), and through cultural movements and manifestoes (Situationist International, Aesthetics of Hunger, etc.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 244 - Reinventing "Reinventing Nature:" Visual Culture and Environmentalism, circa 1995 (5)

Departing from an interdisciplinary seminar held at the UC Humanities Research Institute in 1994 entitled "Reinventing Nature," course engages discourses around ecology, technology, environmental politics, and visual representation that emerged in the 1990s through debates about the idea of nature.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 245 - Race and Representation (5)

Explores how human subjects come to be visually defined and marked by race discourse. Covers diverse theoretical literatures on the topic, primarily in visual studies, but also in cultural studies, post-colonial studies, and psychoanalysis.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 249 - How to Do Things with Pictures: Media, Culture, and Performance (5)

An interdisciplinary exploration of the performative dimensions of art, visual culture, and new media. Investigates theories of performance and action across multiple fields and considers their relevance to themes, problems, and contexts of interest to those enrolled.

HAVC 250 - The Cult of Mary in Byzantium: Visualities of Political, Religious, and Gender Constructs (5)

Through the study of the Byzantine cult of Mary, we examine diverse modalities in the construction and interaction of political, religious, and gender values, and we investigate the interrelated role of images, rituals,

and text in human experience, expression, and communication.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 260 - Visual Literacy in Spanish America, 1500-1800 (5)

Visual literacy is considered as a particular predicament of colonial societies. Students consider the legibility of artifacts in colonial Spanish American contexts given its culturally diverse audiences and examine specific instances of (mis)interpreted images and transcultured representations.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 264 - Contemporary Native American Art (5)

Seminar focusing on the work of contemporary Native American artists. Students explore ecological activism, the relationship of Native artists with the art market and factors that shape artistic production, and what it means to be an Indigenous artist.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 270 - Colonial Cultures of Collecting and Display (5)

Examines collections and exhibitions of colonized people, places, and objects through primary sources, theoretical texts, and analytical case studies (with some emphasis on Oceania). Focuses on visual discourses of race, science, religious conversion, colonial settlement, nation-building, education, and entertainment.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 273 - Imaging Colonial Borderlands (5)

Considers 18th-century to 21st-century colonialisms, especially in Oceania. Concentrates on representations conditioned by particular cross-cultural engagements in colonial peripheries rather than focusing on metropolitan representations. Explores the construction and transgression of rigidly defined colonial identity categories, as expressed in visual/material form. (Formerly offered as Imaging Colonial Peripheries and Borderlands.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 275 - The Visual Cultures of Travel and Tourism (5)

Explores the visual cultures of travel and tourism with some focus on Oceania. Travel and tourism are implicated in the histories of colonialism, ethnography, and globalization, and offer rich sites for critical engagement with theories of transnationalism, imperialism, diaspora, and identity.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 280 - Visual Studies Issues (5)

Examines selected and changing issues in visual studies. The specific issue varies with each offering to keep pace with recent directions in scholarship.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 282 - Art of Independence, Liberation and the Cold War (5)

Explores art movements that played a role in major struggles for independence and liberation from colonial regimes or reflected upon them subsequently. These art movements are examined through international art and media exhibitions. Case studies vary with each course offering.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HAVC 295 - Directed Reading (5)

Directed reading that does not involve a term paper. Students submit petition to course-sponsoring agency. Enrollment is restricted to graduate students.

HAVC 297A - Independent Study (5)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

HAVC 297B - Independent Study (10)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

HAVC 297F - Independent Study (2)

Students submit petition to course-sponsoring agency. Enrollment is restricted to graduate students.

HAVC 299A - Thesis Research (5)

Students submit petition to course sponsoring agency. Enrollment is restricted to graduate students.

HAVC 299B - Thesis Research (10)

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students.

HEBR - HEBREW

Lower-Division

HEBR 1 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by work with computer tutorials. The first-year sequence (1-2-3) begins in fall quarter only.

HEBR 2 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by work with computer tutorials.

Prerequisite: Prerequisite(s): HEBR 1 or by consent of instructor.

HEBR 3 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by work with computer tutorials.

Prerequisite: Prerequisite(s): HEBR 2 or by consent of instructor.

HEBR 4 - Second-Year Hebrew (5)

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel.

Prerequisite: Prerequisite(s): HEBR 1B or HEBR 3 or by consent of instructor.

HEBR 80 - Introduction to Biblical Hebrew (5)

Introduces students to the basic lexicon and grammatical structures of biblical Hebrew, with an emphasis on the development of a set of useful translation strategies. Throughout the course, students apply their emergent skills to translating a variety of biblical texts.

HEBR 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

HEBR 99 - Tutorial (5)

Students submit petition to sponsoring agency.

HEBR 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

HEBR 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

HEBR 199 - Tutorial (5)

Students submit petition to sponsoring agency.

HEBR 199F - Tutorial (2)

Students submit petition to sponsoring agency.

HISC - HISTORY OF CONSCIOUSNESS

Lower-Division

HISC 1 - Introduction to History of Consciousness (5)

Investigates the politics of identity and recognition as the basis for claims about institutional legitimacy and social struggle. Examines such diverse figures as Sartre, Fanon, Bataille, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou.

HISC 12 - Historical Introduction to Philosophy (5)

Focuses on moral, metaphysical, and epistemological issues using classical texts along with some contemporary readings on related philosophical problems. Plato, Kant, and Sartre provide the central readings on ethics, while Descartes, Hume, Kant (again), and Wittgenstein provide the central metaphysical and epistemological discussions. Issues of philosophy of language and method are highlighted throughout.

HISC 60A - What is Revolution? (5)

Studies the modern concept of revolution. Course proposes to inquire into the concept of revolution, insurgency, revolt and resistance in theory and practice. The course aims to analyze thinkers such Thomas Hobbes, Jean-Jacques Rousseau, Immanuel Kant, G.W. F. Hegel, Karl Marx, Carl Schmitt, Hannah Arendt, V.I. Lenin, Rosa Luxemburg, and the revolutionary declarations from the French Revolution to the Zapatista insurgency.

HISC 60C - What Is Resistance? (5)

Explores the politics of resistance and how different thinkers have conceptualized what it means to resist, why it is necessary, and with what methods it should be done. Side by side with the theorists of resistance, the course analyzes examples of resistance from around the world, traversing different time periods, geographies, and cultures. Examples range from peasant revolts to labor movements, feminist struggles to anti-war mobilizations, prisoner uprisings to anti-colonial wars and contemporary forms of corporeal, self-sacrificial

resistance. Relying upon the concrete political problems posed by each historical instance as springboards into larger theoretical concerns, the course focuses on questions such as the nature of power relations, different forms of political organization and representation, the relationship between means and ends, the role of violence, and the function of different media, especially as they become manifest in the complexity of real politics.

HISC 70 - Gandhi and Us (5)

Places the anti-imperial radical and thinker Mohandas Gandhi in the context of twentieth-century global politics, philosophy, and history. Studies political and philosophical history through the global prism of empire and modernity.

HISC 80N - Prophecy Against Empire (5)

In the core of a London slum, with wars raging all around him, the printer William Blake sounded the trumpet of prophecy. This course channels Blake's war-time revelations, laying bare the antimonies of imperial violence and the prophetic tradition.

HISC 80O - Understanding Popular Music (5)

Students develop the skills necessary to analyze popular music. First, challenging common-sense understandings of how music functions. And second, understanding how history works its way into musical forms.

HISC 80P - The Black Panther Party: History and Theory of a Political Movement (5)

Examines the history and theory of the Black Panther Party (BPP). Texts situate the historical conditions leading to the BPP's rise; theoretical inspirations and contributions; national and international reach; and decline following state repression, electoral campaigns, and guerrilla warfare.

HISC 80R - Urban Consciousness: Life, Inequality, and the City (5)

Investigates the social, spatial, and economic inequalities that mark urban life in the United States. Focuses on broad debates and narratives about progress, development, race, creativity, and justice, tying these large themes to how the contemporary American city is produced, governed, and imagined.

HISC 80S - War and the Media (5)

Examines how histories of war are inextricably tied to the histories of media, particularly in the context of 20th-century United States. Emphasis given to the development of an interdisciplinary field of cybernetics (a study of control, purposiveness, information, and communication) as a response to the World War I. Interrogates how this field provided the theoretical material for media studies—at the same time contributing immense technological means to wartime development. Materials draw from political history, media studies, communication studies, philosophy of

science, and critical theory, as well as various audio-visual materials such as music and film, to examine the intricate relationship between mass-produced communication and conflict.

HISC 80T - What is the Witch: Terror, Subjectivity, Modernity (5)

What is the witch? A historical person? A vestige of pre-colonial European ancestry? A cultural object whose image and identity are shaped by film, paintings and literature. Class considers the witch's development in Europe. Also reviews the witch as a tool of racial, economic and social stratification in society. By looking at how the witch is represented through visual and literary culture, students develop an understanding of the witch as a historic symbol of shifting relations of gender, class and power.

HISC 80U - Labor and Globalization (5)

Examines how the integration of global trade, finance, and production networks has affected the lives of workers, with a particular emphasis on workers in (or from) the Global South. Each unit focuses on a particular aspect of working-class experience—migration, precarity, and coercion, successively.

HISC 80V - Introduction to Marxism (5)

The goal of this course is to introduce students to the thought of Karl Marx and some of the major thinkers working in the Marxist tradition. The majority of the course centers on Marx's writing, though students also read texts that extend and develop Marx's ideas into areas that Marx himself did not explore. Course addresses questions central to the Marxist tradition: What is capital? What is capitalism? What is a capitalist state? How did Marx understand colonialism and national liberation struggles? What is the specific nature of gendered oppression and exploitation under capitalism? What is the relationship between capitalist production and cultural production?

HISC 80W - What is Imperialism? (5)

Course takes, as its starting point, the formation of the Marxian concept of imperialism in the early 20th century, in the context of centuries of colonialism and the late 19th-century scramble for Africa. Course surveys debates about imperialism in the post-World War period, particularly as they relate to the history of capitalism in the Global South and developments in world trade, finance, and production, leading to consideration of the present moment and grappling with what is novel in global capitalism today.

HISC 85 - Politics and Religion (5)

Considers both the religious sources of political ideas and the political sources of religious ideas, addressing topics, such as sovereignty, justice, love, reason, revelation, sacrifice, victimhood, evil, racism, rebellion, reconciliation, and human rights.

HISC 86 - After the Human: Artificial Intelligence and the End of the World (5)

Starting from Donna Haraway's "A Cyborg Manifesto," course explores theoretical and myth-making texts that articulate visions of a future beyond humanity. Examines manifestations of the posthuman in film, fiction, and scholarly work. Readings include Haraway, Plato, Descartes, and others. Explores the concept of artificial intelligence as a fascination of science fiction, an engineering objective, a field of study, a philosophical problem, etc. Discussions on: (a) the figure of the thinking machine, its promises and attendant anxieties; (b) the history of ideas leading up to the birth of the field of artificial intelligence in the early 20th century; and (c) the philosophical roots of underlying concepts, such as intelligence, artificiality, agency, mechanism, identity, rationality, logic and free will.

Upper-Division

HISC 102 - Philosophy and Poetics (5)

Introduction to the relationship between philosophy and poetics in some major 19th- and 20th-century poets and thinkers.

Prerequisite: Enrollment restricted to juniors and seniors.

HISC 103 - The Problem of California (5)

From Muir Woods to Hollywood and Silicon Valley to the Central Valley, California has been a path breaker that has shaped politics and cultural production. The state's rich diversity makes it an especially exciting site for studying the relations between divergent social, economic, cultural, political, and ecological forces. Course investigates the histories, cultures, and geographies of California by exploring relations between power and place through ethnographic, archival, critical, and aesthetic lenses. Also examines the role of identity within constructions of inequality and struggles for political change. Course fulfills one upper-division course requirement for the minor in the history of consciousness.

HISC 104 - Political Writing (5)

Explores the politics of writing by moving beyond rehearsals of established form into an analysis of the politics of writing, asking: What are the philosophical and political implications of the writing forms we choose?

HISC 105 - Antisocial Media (5)

Provides an introduction to critical scholarship on media infrastructures with a focus on cybernetic systems, internet protocol, surveillance, logistics, and finance. It explores how these configurations of power are reorganizing our societies and restructuring our subjectivities.

HISC 106 - The U.S. Horror Film: Race, Capitalism, and Monsters (5)

Analyzes films and images to consider how the genre of horror has screened the problems, expectations, and fantasized afterlives of racism, labor exploitation, ruin, and war.

HISC 107 - The Idea of Reality (5)

Examines the "real" in a variety of registers—from realism in art to reality TV, from virtual reality to the real number system—and asks what, if anything, these usages have in common, what distinguishes the real from the unreal, from the ideal, and from the lie. Through writing, films, and television ranging from the serious to the whimsical, course looks at the ways in which the idea of "reality" is invoked, how it is represented, and to what ends.

HISC 108 - Parables for a Warming Planet: The Politics of Climate Change (5)

Takes up the literary form of the parable to illuminate a pressing and complex problem: the threat of global climate change. How can the simplest of stories help us to explore our options for a planetary future?

HISC 109 - Liberalism and Violence (5)

Explores the meanings of modernity, religion, and violence and examines the conceptual status that war and sovereignty, long associated with religious belief, have since been accorded within the modern humanist and secular tradition. Also explores aspects of this tradition and their relationship to questions of morality and violence and how violence-and its relationship to secularism-can be better understood today as a mode of negotiating human existence in a world dominated by technology and its myths.

Prerequisite: Enrollment is restricted to juniors and seniors.

HISC 110 - Histories of the Atom (5)

This interdisciplinary course considers the atom in four respects: as philosophical idea, as weapon, as catastrophe, and as clock. Students will learn about ancient atomisms, radiometric dating, the Manhattan Project, the bombing of Hiroshima, and the Chernobyl nuclear disaster.

HISC 111 - States, War, Capitalism (5)

Survey of seminal work on ancient origins of the state, diverse geo-political systems of war and diplomacy, and consequences of the formation of the world market on the evolution of geo-political systems up to and beyond the wars of today.

Prerequisite: Enrollment restricted to juniors and seniors.

HISC 112 - Foundations in Critical Theory (5)

Concentrates on the Marxist tradition of critical theory, centering on classical texts by Marx and by writers in the Marxist tradition up to the present.

HISC 113 - History of Capitalism (5)

Surveys major developments in the capitalist world economy from the 13th century to today. Topics include: the transition to capitalism in Europe; the emergence of banking; colonization, slavery, and uneven development; industrialization; and globalization.

HISC 114 - Histories of Miseducation (5)

Examines the history of the idea of "miseducation" through a transnational lens. Focuses in particular on histories of the (mis)education of people of African descent, drawing on historical cases and theorizations from both the Continent and the diaspora. This class will trace the emergence of the concept and proximate theorizations of "education" itself through an array of different social movements, institutional formations, and texts.

HISC 115 - The Radical Right, A Symptom of Capitalism (5)

Provides the historical context and the theoretical tools necessary for understanding today's radical right. Specific focus on considering the far right in the context of radical constructions under conditions of late capitalism.

HISC 116 - What is Species? (5)

Studies the multiplicity of meanings of the word "species" explored in Donna Haraway's "When Species Meet," including its use in biology, racial and gendered uses, religious and economic meanings. Examines discourses surrounding species from the ancient Greeks through the present.

HISC 117 - Making the Refugee Century: Non-Citizens and Modernity (5)

Examines the material, discursive, and racialized conditions that have produced refugees in the last century. Also examines the social claims made by refugees, institutional responses to them, and political alternatives to state belonging

HISC 118 - What is Money? (5)

Explores what happens if money is examined as a material and politically contingent phenomenon in its own right, rather than assuming the classic "three functions of money" (unit of account, means of exchange, and store of value). Students examine these functions separately with an eye to the tensions that arise between them, and trace a deep history of monetary systems as the outcome of a process of negotiation and contestation. Topics considered include palace economies, cowrie shells, metallic coinages, the

modern monetary revolution, and contemporary struggles over student debt.

HISC 119 - Politics of Recognition (5)

Course touches on the philosophical roots of Hegel's text, starting from the pre-World War II rereading of Hegel's master/slave dialectic that became the kernel of postwar thought arising from struggles over capitalism, communism, fascism, racism, colonialism, and feminism.

HISC 120 - What is a State? (5)

Examines the modern concept of state, its anthropological assumptions, categories, its critique, and its crisis. Inquires into the concept of representation, borders, security and control in thinkers, such as Thomas Hobbes, John Locke, Jean-Jacques Rousseau, Immanuel Kant, G.W.F. Hegel, Karl Marx, Carl Schmitt, and Lenin.

HISC 121 - What Is Politics? (5)

Examines the concept of politics, its anthropological assumptions, categories, and its crisis. It proposes to inquire into the concept of politics, justice, conflict and law in thinkers, such as Aristotle, Plato, Thomas Hobbes, Jean-Jacques Rousseau, Immanuel Kant, Karl Marx, Carl Schmitt, Hannah Arendt, Fanon, and Gandhi.

HISC 122 - What is the Psyche? (5)

Explores the clinical, political, and philosophical relevance of the (post) Freudian psyche. Examines how the psyche takes shape around various social forms (e.g., child, woman, queer, colonial, Black, proletarian, religious, digital), as well as how the social is shaped by psychical processes (e.g., projection, introjection, transference, splitting, repression, dissociation, identification, sublimation). Approaches the psyche from various disciplinary perspectives. Clinical and experimental research is used to illustrate a range of theoretical constructs.

HISC 125 - Queerness and Race (5)

Gives students a grasp of different definitions and uses of the concept queerness in its relationship to race and how it's tied to the politics of lesbian, gay, bisexual, and transgender (LGBT) identity.

HISC 129 - Politics of Violence (5)

Inquires into the relationship between politics and violence as articulated by early modern, modern, and contemporary political theorists. Investigates the role of violence in the constitution and maintenance of sovereign power and the construction of the modern subject of politics.

HISC 131 - Postcolonial Paths (5)

How postcolonial thought occasions the reconsideration of the Western tradition of political philosophy and the

discovery of alternative pathways of modernization within it.

HISC 135 - What is Freedom? (5)

Seminar in modern political thought. The focus and outcome of the course is developing the skill of analytical thinking and clear formulation of concepts in writing. Raises and discusses a set of fundamental questions around the method and methodology of moral and political thought, to which every member in the seminar contributes.

HISC 136 - Latin American Thought (5)

Does Latin American thought have to appeal to quintessential Western philosophical questions regarding knowledge, ethics, reality? Course explores how concepts such as identity and abstraction, as well as realities of indigeneity and diversity, both cause and effect the development of analytical and political frameworks across Latin America. Examines what difference social, political, and ethnic inequality might make to the development of core conceptual and philosophical questions and frameworks.

HISC 140A - Africa: How to Make a Continent (5)

Introduces the histories of exploration, museum collection, and photography that shape historical and contemporary ideas about race, culture, and place in Africa.

HISC 150 - Radical Political Theory (5)

Provides an introduction to classical and contemporary texts of radical political theory, a body of work that critically examines fundamental premises of politics. Addresses the question What is the 'political'?

HISC 160 - Advanced Topics in History of Consciousness (5)

Provides students an opportunity for in-depth analysis of advanced topics within the history of consciousness arena. Course topic changes; see the Class Search for current topic.

HISC 163 - Freud (5)

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning.

HISC 166 - Race, Science, and Humanities (5)

Is race a social construct or (partially at least) a biologically grounded reality? Which medical, biological, social, and political agendas are at play with respect to the genomics of race? Genomic results of the past few decades have added significant complexity to the view that race is primarily a social construct. The

debates rage, and the stakes are high. Course engages the history, philosophy, and anthropology of the genetics and genomics of race from the 19th century to today, also introducing the basic science on a "need-to-know" basis.

HISC 169 - Blue Humanities: Oceans, Humanity, and the Future (5)

As steerers of planetary climate systems, loci of biodiversity, sources of food, and cradles of inspiration to poets, philosophers, artists, and society in general, the oceans are essential to our future. Course combines history, philosophy, literature, and cinema, using them as lenses through which to analyze, understand, and effect positive change on troubled oceans. Course fits well with UCSC's oceanside location and marine campus.

HISC 185C - Comparative Religion: A Critical Introduction (5)

Introduces the comparative study of world religions and provides critical entry points toward the understanding of its history as a discipline. Special emphasis on the troubled history of imperialism, orientalism, and facile generalizations that have always accompanied the attempt to understand foreign or dead cultures.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HISC 185T - Marxism and Feminism (5)

Critically engages with feminist-Marxist perspectives on social-reproduction. Introduces the foundation of Marxism and feminist-Marxist critique while examining the international feminist struggle historically from the origins of capitalism to the present moment.

HISC 187 - The Emergence of the Avant-garde from Disenchantment to Dada (5)

Examines the socio-political and cultural origins of early 20th-century avant-garde movements focusing on the vanguard movement of futurism, the roles played by the disenchantment of the world, and technological rationalization as it relates to warfare and aesthetic production.

HISC 190 - Nature or Nurture? (5)

Examines baseline philosophical and scientific views of human nature in the context of the debate about existence and the role of human nature. Considers whether human nature is singular or plural, genetic or environmental, and what role it plays in political and social thought. Examines race and sex/gender as biological and/or cultural categories and realities. Concludes with explicit attention to theoretical and conceptual frameworks highlighting nurture, the environment, and social construction, vis-a-vis human "nature." As a critical and exploratory course, no ultimate position on human nature is endorsed.

Prerequisite(s): HISC 166 and by permission of instructor.

HISC 199 - Tutorial (5)

A program of individual study arranged between an undergraduate student and a faculty member. Students submit petition to sponsoring agency.

Graduate

HISC 203A - Approaches to History of Consciousness (5)

An introduction to history of consciousness required of all incoming students. The seminar concentrates on theory, methods, and research techniques. Major interpretive approaches drawn from cultural and political analysis are discussed in their application to specific problems in the history of consciousness.

Prerequisite(s): first-year standing in the program. See the department office for more information.

HISC 203B - Approaches to History of Consciousness (5)

Writing-intensive course based on readings in HISC 203A.

Prerequisite: Prerequisite(s): HISC 203A. Enrollment is restricted to graduate students.

HISC 205 - Global Political Thought (5)

Seminar anchored in a question fundamental to the history of ideas in the modern history of empire: How to think globally about political thought. Through sustained examinations of classic texts in the history of moral and political philosophy, the seminar explores how the "global" itself becomes a universal framework essential to understanding politics worldwide.

Prerequisite: Enrollment is restricted to graduate students.

HISC 208 - Humanism and its Critics (5)

Examines modern humanism and its critics in a trajectory composed of three moments: foundational texts of 19th century humanism and some of their 20th century interpreters, the critiques of humanism launched by structuralist/post-structuralist continental theory in the 1960s that dealt with the essentialization of the human (theoretical anti-humanism), and contemporary critiques that take issue with anthropocentrism (posthumanism/transhumanism). Students consider the thematics that have shaped humanism and the controversies surrounding it including questions of secularism, morality, and materialism, essentialism and class/gender/racial identity, anthropocentrism, and universalism. Readings include Feuerbach, Marx, Sartre, Heidegger, Foucault, Althusser, Haraway, Braidotti, and Ferrando.

Prerequisite: Enrollment is restricted to graduate students.

HISC 209 - Hegel's Phenomenology of Spirit (5)

Students read Hegel's Phenomenology of Spirit from cover to cover. This book has been critical for many disciplines such as philosophy, politics, psychology, anthropology, sociology

Prerequisite: Enrollment is restricted to graduate students.

HISC 214 - What is a Subject? (5)

Examines major streams of theorization about the subject in postwar and contemporary continental and critical theory. Thinkers include Althusser, Badiou, Balibar, Butler, Fanon, Foucault, Honneth, Laclau and Mouffe, Mbembe, Ranciere, and Sartre.

Prerequisite: Enrollment is restricted to graduate students.

HISC 215 - History of Unconsciousness (5)

There is a history of political consciousness that culminated in the project of enlightenment. There is a history of individual, collective, and political unconscious, which culminated in fascism. These two histories are intertwined, but their outcome is not preconceived. On the contrary, their relationship and integration constitute a field of possibilities for social, political, and human experimentation. This course inquires into the concept of political unconscious by exploring thinkers, such as Kant, Foucault, Adorno, Horkheimer, Freud, Jung, Reich, Fromm, Marcuse, and Klein.

Prerequisite: Enrollment is restricted to graduate students.

HISC 216 - Critical Race/Ethnic Studies (5)

Explores foundational and emergent theoretical and methodological approaches to the study of race. Issues examined include the production of race within and across various spheres of human activity and how race has shaped notions of difference and commonality in the past and present.

Prerequisite: Enrollment is restricted to graduate students.

HISC 217 - Critical Human Rights Theory (5)

Addresses about 10 of the significant critiques of human rights discourse published in the past decade by authors, such as Moyn, Douzinas, Fassin, Ticktin, J. Slaughter, D. Chandler, Mamdani, Weitzman, Badiou, and Meister.

Prerequisite: Enrollment is restricted to graduate students.

HISC 218 - French Hegel (5)

Students expected to locate with fluency and precision their own research projects within the conceptual and methodological frameworks defining the late-20th

century constellation of thought to be laid out systematically over the course of the term.

Prerequisite: Enrollment is restricted to graduate students.

HISC 219 - Radical Futures and Visual Culture (5)

Attempts to break through the pervasive dystopia and catastrophism of the present and open up speculative proposals regarding the not-yet and what's to come. Students critically consider methodologies of futurity among varieties of radical imaginaries grounded in the traditions of the oppressed—including Afrofuturisms, Indigenous, Chicana/Latina, multispecies, postcapitalist, and communist proposals—and place them in relation to threatening reactionary, neo-fascist tendencies.

Prerequisite: Enrollment is restricted to graduate students.

HISC 221 - Surveillance Culture: Privacy, Publicity, Art, and Critical Social Practice (5)

Examines how artists and activists are responding by using surveillance technologies to look over "big brother's" shoulder and to create greater awareness of privacy issues. Course pays particular attention to metadata, big data, bio-power, and the relationship between various forms of surveillance with respect to privacy, publicity, and free speech.

Prerequisite: Enrollment is restricted to graduate students.

HISC 222B - Theories of Late Capitalism (5)

Writing-intensive course based on readings in HISC 222A.

Prerequisite: Prerequisite(s): HISC 222A. Enrollment is restricted to graduate students.

HISC 223 - Althusser (5)

Through close readings of Althusser's major texts, this course systematically examines the political and philosophical thought of Louis Althusser and analyzes why he is one of the most important thinkers of the 20th century.

Prerequisite: Enrollment is restricted to graduate students.

HISC 224 - Marx's Capital Vol. 1 (5)

Investigates the many layers of Marx's Capital.

Prerequisite: Enrollment is restricted to graduate students.

HISC 226 - Liberty and Resistance (5)

Examines modern conceptions of liberty from a non-liberal perspective. Proposes to inquire into the concept of liberty as an individual and collective right by

exploring its philosophical justifications and criticism in thinkers, such as Kant, Hegel, and Marx.

Prerequisite: Enrollment is restricted to graduate students.

HISC 227 - Carl Schmitt (5)

Provides a careful contextualization and a critically informed interrogation of the major works of Carl Schmitt, a figure at the center of many contemporary debates in political and legal thought.

Prerequisite: Enrollment is restricted to graduate students.

HISC 230A - Poetry, Language, Thought (5)

Introduces the relation between philosophy and poetics in some major 20th-century poets and thinkers.

Prerequisite: Enrollment is restricted to graduate students.

HISC 230B - Poetry, Language, Thought (5)

Writing-intensive course based on readings in HISC 230A.

Prerequisite: Prerequisite(s): HISC 230A, or permission of instructor.

HISC 231 - From System to Fragment (5)

Explores the rise and fall of the philosophical system. It proposes to inquire into the origin of the systematic philosophy, its development, its crisis, and its disintegration. This theoretical trajectory will be investigated together with alternative trajectories in thinkers, such as I. Kant, G. Fichte, Novalis, K.W.F. Schlegel, G.W.F. Hegel, M. Stirner, S. Kierkegaard, K. Marx, F. Nietzsche, L. Wittgenstein, T.W. Adorno, W. Benjamin, Empedocles.

Prerequisite: Enrollment is restricted to graduate students.

HISC 232 - Music, Social, Thought (5)

Examines the various modes through which intellectuals, artists, and other commentators have written about music as a socially situated art as well as the ways they have theorized the social through examinations of musical phenomena. Focus changes with course offering.

Prerequisite: Enrollment is restricted to graduate students.

HISC 236 - 20th Century Critical Theory (5)

Focuses on the critical-theoretical approaches that are associated with an interdisciplinary group of scholars affiliated with the Institute for Social Research, known as the "Frankfurt School". Surveys some of their most important contributions to the critique of capitalism, the authoritarian state, instrumental reason, culture, historical progress, law, and social organization.

Discusses whether or not these different works fit together into a single tradition called "critical theory" and what theoretical and political implications the gesture of such naming entails. Investigates the normative foundations of critique and the philosophical influences that shape them. Course also explores the different "generations" of the Frankfurt School and map out the relationship of these thinkers to the traditions of Western Marxism, psychoanalysis, and social theory. Concludes by analyzing the limitations of critical theory and the intellectual challenges it faces in the contemporary world.

Prerequisite: Enrollment is restricted to graduate students.

HISC 237A - Historical Materialism (5)

Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are addressed.

Prerequisite: Enrollment is restricted to graduate students.

HISC 237B - Historical Materialism (5)

Writing-intensive seminar based on HISC 237A. Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are discussed.

Prerequisite: Enrollment is restricted to graduate students.

HISC 240 - Basic Principles of University-Level Pedagogy (2)

Provides training for graduate students in university-level pedagogy in general. Under the supervision of the department chair, coordinated by a graduate student with substantial experience as a teaching assistant.

Prerequisite: Enrollment is restricted to graduate students.

HISC 242A - Violence and Phenomenology: Fanon/Hegel/Sartre (5)

Study of the work and influence of Frantz Fanon from a range of viewpoints: existential, phenomenological, psychoanalytic, and political; a variety of genres: film, literature, case history, and critique; and a set of institutional histories: clinical, cultural, and intellectual.

Prerequisite: Enrollment is restricted to graduate students.

HISC 242B - Violence and Phenomenology: Fanon/Hegel/Sartre (5)

Writing intensive course based on readings in HISC 242A.

Prerequisite: Prerequisite: HISC 242A. Enrollment is restricted to graduate students.

HISC 246 - Black Radicalism (5)

Examines the history of black radical intellectual, cultural, political, and/or social movements. May take the form of a survey of different aspects of black radicalism or may focus on a particular individual, groups, period, etc.

Prerequisite: Enrollment is restricted to graduate students.

HISC 248 - Black Critical Theory (5)

Offers a critical introduction and overview of black critical theory across multiple fields and genres. Beginning with the question of race and ontology, students go on to consider questions of sovereignty and domination, freedom and liberation, identity and difference, and conclude with a study of race and the post-human. Major thinkers studied include: Sylvia Wynter, Achille Mbembe, Frantz Fanon, and W.E.B. DuBois, as well as contemporary figures, such as Frank Wilderson, Fred Moten, and Hortense Spillers.

Prerequisite: Enrollment is restricted to graduate students.

HISC 252 - Poststructuralism (5)

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits.

Prerequisite: Enrollment is restricted to graduate students.

HISC 261 - Modern Intellectual History (5)

Survey of 19th- and 20th-century intellectual history that focuses on a cross-section of major works from Hegel to Levi-Strauss.

Prerequisite: Enrollment is restricted to graduate students.

HISC 262 - Critical Theory After Habermas (5)

Examines key works of Frankfurt School theorist Jurgen Habermas, his followers, and critics, on topics such as the public sphere, the theory of communicative action, power and domination, and religion and secularism.

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

HISC 263 - European Philosophies of Difference (5)

Survey of European philosophies of difference, tracing the evolution of philosophical concepts and frameworks from Nietzsche, Kierkegaard, Bergson, and Heidegger through later 20th-century French post-structuralist, feminist, and Frankfurt School theory.

Prerequisite: Enrollment is restricted to graduate students.

HISC 264 - The Idea of Africa (5)

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy.

Prerequisite: Enrollment is restricted to graduate students.

HISC 265A - Biopolitics I: Problematics (5)

Focuses on the theorization of life and death in relation to power as proposed by 20th-century thinkers. Investigates how a biopolitical problematic has emerged and what insights into politics it offers. Explores the different ways in which thinkers have conceptualized biopolitics and its broader implications.

Prerequisite: Enrollment is restricted to graduate students.

HISC 265B - Biopolitics II: Corporealities (5)

Focuses on the exploration of biopolitics and necropolitics on the body. Examines how the body has become deeply integrated into power relations in modern society. Also explores different forms of corporeality that are conduits of political struggle and sites of transgression, resistance, and refusal.

Prerequisite: Enrollment is restricted to graduate students.

HISC 268A - Rethinking Capitalism (5)

Readings include works by speakers at UCSC's Rethinking Capitalism Initiative. Topics are: (1) financialization versus commodification (how options-theory has changed capitalism); (2) material markets (how this theory performs); and (3) valuation and contingency (how economies make worlds).

Prerequisite: Enrollment is restricted to graduate students.

HISC 268B - Rethinking Capitalism (5)

HISC 268A addressed changes in the theory and practice of capitalism as derivatives markets have become increasingly central to it. This course, which can be regarded as either background or sequel, concerns questions that surround recent debates about derivatives from the standpoint of broader developments in law, culture, politics, ethics, ontology, and theology. What would it mean to see questions of contingency and value as a challenge to late-modern understandings of these modes of thought?

Prerequisite: Enrollment is restricted to graduate students.

HISC 269 - Property and Possession (5)

Covers modern conceptions of property and their critique. Inquires into the concept of property as an individual right by exploring its philosophical justifications and criticism in thinkers, such as John Locke, Jean-Jacques Rousseau, Immanuel Kant, G.W. F. Hegel, Pierre-Joseph Proudhon, and Karl Marx.

Prerequisite: Enrollment is restricted to graduate students.

HISC 271 - Historical Temporalities (5)

Explores the critique of the unilinear historical time through the prism of Reinhart Koselleck, Walter Benjamin, and Ernst Bloch's attempts to reconfigure the concepts of time and history. During the course, students investigate how time affects both representation of reality and political praxis.

Prerequisite: Enrollment is restricted to graduate students.

HISC 272 - Deprovincializing Marx (5)

Course aims to rethink Marx against the grain, from the debate with Russian populists to Capital and the Grundrisse. Investigates formal subsumption not as a historical stage, but as a form that denotes how capitalism encounters, incorporates, and combines existing modes of production without creating a homogeneous world.

Prerequisite: Enrollment is restricted to graduate students.

HISC 275 - Sovereignties (5)

The guiding thought of this seminar is the question of what is, and is not, sovereign. Exploring a wide range of authors (such as Bodin, Hobbes, Spinoza, Rousseau, Kant, Schmitt, Bataille, and Fanon), this seminar addresses the most salient problems in recent discussions of sovereignty.

Prerequisite: Enrollment is restricted to graduate students.

HISC 285 - Topics in Political Theology (5)

Readings focus on the early 20th-century rediscovery of political theology; its use in theorizations of the Holocaust; and its return in 21st-century debates on empires, war, terror, enmity, reconciliation, fanaticism, human rights, political economy, and global catastrophe. Students cannot receive credit for this course and HISC 85.

Prerequisite: Enrollment is restricted to graduate students.

HISC 291 - Advising (2)

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess and monitor academic progress, and to evaluate coursework

as necessary. May be used to develop general bibliography of background reading and trajectory of study in preparation for the qualifying examination.

HISC 292 - Practicum in Composition (5)

A practicum in the genres of scholarly writing, for graduate students working on the *composition* of their qualifying essay or doctoral dissertation.

Prerequisite: Enrollment is restricted to graduate students.

HISC 293A - Field Study (5)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 293B - Field Study (10)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 293C - Field Study (15)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 294A - Ind Study-Teaching (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 294B - Ind Study-Teaching (10)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 294C - Ind Study-Teaching (15)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 295 - Directed Reading (5)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295A - Directed Reading (5)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295B - Directed Reading (10)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295C - Directed Reading (15)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 296 - Special Student Seminar (5)

A seminar study group for graduate students focusing each quarter on various problems in the history of consciousness. A statement and evaluation of the work done in the course will be provided each quarter by the students who have participated in the course for that quarter, and reviewed by the responsible faculty.

HISC 297A - Independent Study (5)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 297B - Independent Study (10)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 297C - Independent Study (15)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 298 - Doctoral Colloquium (5)

Under the supervision of a History of Consciousness faculty member, students finishing their dissertation meet weekly or bi-weekly to read and discuss selected draft chapters, design difficulties and composition problems.

HISC 299A - Thesis Research (5)

Prerequisite(s): advancement to candidacy.

HISC 299B - Thesis Research (10)

Prerequisite(s): advancement to candidacy.

HISC 299C - Thesis Research (15)

Prerequisite(s): advancement to candidacy.

HIS - HISTORY

Lower-Division

HIS 2A - The World to 1500 (5)

Surveys the rise of complex societies; the formation of classical civilizations in Afroeurasia and the Americas, post-classical empires and cross-cultural exchange, technology and environmental change, the Mongol Empire, and oceanic voyages and the origins of the modern world.

HIS 2B - The World Since 1500 (5)

Examines major world issues over the past 500 years. Topics include European expansion and colonialism, the Muslim empires, East Asia from Ming to Qing, the Americas, Africa, the scientific-technological revolution, decolonization, and modern environmental problems. Designed primarily for first- and second-year students, it provides a time frame for understanding events within a global framework.

HIS 4 - History of the Present: Investigating the Historical Origins of Contemporary Problems (5)

Explores how historical thinking can help you understand the developments, dilemmas, and crisis that are grabbing our attention in the present. It is organized around four themes: (un)natural disasters, the politics of representation, surveillance, and borders and belonging.

HIS 9 - Introduction to Native American History (5)

Introduction to the interdisciplinary field of Native American Studies and the Indigenous experience. Topics include: history of United States-Indian relations; colonialism; sovereignty; identity; representation of Native Americans in popular culture; and contemporary efforts toward decolonization in indigenous communities.

Offered: Spring.

HIS 10A - United States History to 1877 (5)

Focuses on the building of British American colonies and the establishment, disintegration, and reconstruction of the nation with an emphasis on how class, race, ethnicity, and gender impacted colonial development and structured the nation's agenda and the definition of citizenship.

HIS 10B - United States History, 1877 to 1977 (5)

Surveys the political, social, and cultural history of the United States from 1877 to 1977. Focuses on national politics with emphasis on how class, race, ethnicity, and gender changed the nation's agenda.

HIS 11A - Latin America: Colonial Period (5)

Introduces the social, cultural, economic, and political history of the New World through a close examination of the process of European conquest in the 16th century

and its consequences for both native and settler peoples. Medieval and Renaissance European and African backgrounds; Inca, Maya, Aztec, plains, woodland, and tropical rainforest native American societies; processes of military and cultural conquest; epidemics and ecological changes; native resistance and the establishment of the fundamental institutions of colonial society.

HIS 11B - Latin America: National Period (5)

An introduction to the study of Latin American history from the Independence Wars in the early 19th century to the present. Topics include changing economic models of development, U.S. role, rural and urban life, women, nationalisms, populism, revolution, the military in politics, and the problem of democracy.

HIS 12 - Introduction to Latino American History (5)

Introduces students to the history of U.S. Latinos drawing on the experience of Central Americans, people of Mexican descent, Puerto Ricans, Dominican Americans, and Cuban Americans. Emphasizes international processes that fundamentally shape U.S. Latino communities.

HIS 13 - Introduction to American Religious Culture (5)

Introduction to the many communities found within the American religious landscape, balancing extraordinary diversity characterizing American pluralism against the dominant religious culture. Proceeds historically, engaging major problems and developments including utopianism, the rise of evangelicalism, religion and reform, manifest destiny, secularization and modernity, and the intersection of politics and religion.

HIS 15 - The United States of America from its Founding through Our Time (5)

Takes students through five critical moments in United States history: the American Revolution, the Civil War, the New Deal, the Civil Rights era, and the years following the attack on the United States on Sept. 11, 2001. Designed for non-majors.

HIS 20 - U.S. Popular Music Movements (5)

Focuses on the development of popular music genres in the United States and the social contexts that have produced them, from the 19th Century to the present. Promotes an understanding of how music influences and reflects our political lives.

HIS 30 - The Making of Modern Africa (5)

Examines the loss and reassumption of local and state autonomy in Africa during the 19th and 20th centuries. Delineates the modalities of the colonial state and society, modes of resistance to alien occupation, and the deformation of social, class, and gender relations.

HIS 39D - Floods, Epidemics, and Famine: Environmental History of the Early Modern Atlantic

World (5)

Familiarizes undergraduates with environmental history as a discipline, as well as introduce them to the early modern period and the Atlantic World as a region of study by focusing on themes such as climate shifts and crises, the spread of epidemic disease, and the relationship between the environment and colonialism. Course does not assume previous experience with history courses and is intended to be a broad survey encompassing several regions of study. It is arranged both thematically and geographically and emphasizes environmental change throughout the early modern period to give a broad geographical overview of major environmental topics during the 15th through 18th centuries.

HIS 39E - Monsters, Media, and the History of the Supernatural in Modern Japan (5)

Study of modern Japanese history from the late Edo period to the present day. Examines the cultural lives of monsters and transformations in meaning through major events in Japanese history. Examines the intellectual, cultural, and social histories of monsters and their entanglement with the emergence of science and folklore; the formation of the nation-state; racism, politics, and war; urbanization and kinship structures; and capitalism and virtual worlds.

HIS 40A - Early Modern East Asia (5)

Surveys the history of East Asia from 1500 to 1894. Covers political, social, economic, and cultural histories of China, Japan, and Korea with the goal of perceiving a regional history that encompassed each society.

HIS 40B - The Making of Modern East Asia (5)

A broad introductory survey of the political, social, economic, philosophical, and religious heritage of modern China, Japan, and Korea. Emphasis on the historical foundations of modern nationalism, the colonial experience, and revolutionary movements.

HIS 41 - The Making of the Modern Middle East (5)

History of the modern Middle East from 1800 to the present, with special reference to the 20th century and forces which have shaped the area. The impact of imperialism, nationalism, and revolution in the area, with particular attention to the history of four countries: Turkey, Iran, Egypt, Israel.

HIS 44 - Modern South Asia, 1500 to Present (5)

Provides an introductory survey of South Asian history and society from the beginning of the 16th Century until the dawn of the 21st Century. Students gain an understanding of major events and long transformations in society, economy, culture, and politics.

HIS 50 - When Pharaohs Reigned: The History of

Ancient Egypt (5)

Introduces the political and social history of ancient Egyptian civilization from the Predynastic through the end of the Pharaonic period. (Formerly Pyramids and Papyrus: the History of Ancient Egypt.)

HIS 51 - Pyramids of Earth: Religion and Symbol in the Ancient World (5)

Investigates the use of the pyramid architectural form in ancient societies across the globe, including Egypt, Mesopotamia, the Americas, and Southeast Asia. The social, political, and religious motivation for building pyramids is explored.

HIS 58 - From Pirates to Refugees: The History of the Modern Mediterranean (5)

Covers the history of the Mediterranean from the end of the Ottoman Empire to the present. It focuses on the role of empire in shaping patterns of economic and cultural exchange.

HIS 59 - The History of the English Language (5)

Students acquire an understanding of the history of the development of the English language, from its origins to present, and engage critically with the quantitative evidence for that history, using accessible online databases and digital texts.

HIS 60 - Medical and Scientific Terminology (5)

Trains students in the principals that will help them make sense of Greco-Latin scientific and technical vocabulary. Introduces Greco-Roman natural philosophy and its general cultural context, and explains the historical relationship of that tradition to the emergence of modern European experimental science and technology. (Formerly Scientific Vocabulary and the Roots of the European Scientific Tradition.)

HIS 61 - Classical Mythology (5)

Introduces the philosophy of myth, and surveys classical Greek mythology. Students explore the mythic mode of thinking and its distinguishing characteristics as well as the repertoire of Greek myths and their cultural contexts.

HIS 62A - Classical World: Greece (5)

An overview of Greek history from the beginnings through the Hellenistic period, with emphasis on the Archaic and Classical periods (ca. 800 B.C. through 323 B.C.).

HIS 62B - Classical World: Rome (5)

A lecture course offering an overview of Roman history and civilization from the legendary founding of Rome in 753 B.C. to the collapse of the Roman Empire's central administration in the West in 476 A.D.

HIS 65B - Plagues, Peasants, and Pirates: Late Medieval

Europe, 1000-1500 (5)

Reviews major social, political, economic, and cultural developments in Europe from 1000 to 1500 and themes including gender, warfare, ethnicity and religion, through primary sources and secondary readings. Primary focus is Western Europe: England, France, the Iberian Peninsula, the Holy Roman Empire, the Low Countries, and Italy. (Formerly Europe, 1000-1500.)

HIS 70A - Modern European History, 1500-1815 (5)

Surveys the economic, social, cultural, and political history of Europe since the late 15th century: 1500-1815. Course 70A is not a prerequisite to course 70B.

HIS 70B - Modern European History, 1815-present (5)

Surveys the political, social, and cultural history of Europe from the era of the Industrial Revolution to the beginning of the second millennium. Course 70A is not prerequisite to 70B.

HIS 74 - Introduction to Jewish History and Cultures (5)

Surveys 3,000 years of Jewish history. Themes include origins of the Jews in the ancient world, formation and persistence of the Jewish diaspora, coherence and diversity of Jewish experience, Jewish narrative and textual traditions, interaction between Jews and other cultures, productive tensions between tradition and modernity in Jewish history and literature.

HIS 74A - Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern (5)

Popular media present Muslims and Jews as age-old enemies; this is far from the truth. Through primary sources, secondary texts, and films, students examine this fraught and politicized history, challenging conventional narratives of the region and its Jewish population.

HIS 74B - Introduction to Middle Eastern and North African Jewish History, 1500-2000 (5)

Surveys modern Jewish history from Morocco to Iran, 1500-2000. Studying these populations through original documents, scholarly works, and literature imparts a unique perspective on both modern Jewish history and that of the region, challenging and complementing standard narratives of each.

HIS 75 - Film and the Holocaust (5)

Examines a series of distinguished documentary and feature films about the destruction of European Jewry. Each film is placed in its historical context, and wherever possible, the readings include the original documents on which films were based. Emphasis is placed on the strategies the filmmakers used to address the problem of representing genocide without succumbing to mere melodrama.

HIS 76 - The Holocaust: A Global Perspective (5)

Investigates the genocide of the Jews from 1933 to 1945 within its broader historical context, including anti-Semitism, the Great Depression, Nazi-Soviet relations, and World War II. Examines how the Holocaust unfolded in Europe as well as its impact on Jews in North Africa and the Middle East. (Formerly The Holocaust.)

HIS 78 - Modern Authoritarianism in Europe and Beyond (5)

Examines modern authoritarianism and mass dictatorship as distinct political forms that promote and draw their strength from popular support and mobilization. Students study how non-democratic leaders are able to attain, exercise, perpetuate, and misuse their power.

HIS 80C - Global China (5)

Introductory and collaborative history course that examines the social dimensions of globalization through a focus on China since 1500. Asking how China shaped and was shaped by interactions with major world regions—Europe, the Americas, and Asia—course discusses how networks of trade, imperialism, revolutions, migration, popular culture, and capitalism created significant global conjunctures and interdependencies with lasting impact. In addition, course offers instruction on how to collaborate with others effectively to achieve common goals. Students apply knowledge and techniques learned to a series of group projects.

HIS 80D - Visualizing Modern East Asia (5)

Introduction to modern East Asian history, with a specific focus on the nations of China, Japan, and Korea. Students investigate major historical questions about modernity, imperialism, colonialism, nationalism, gender, and labor from the late 19th century to the late 20th century. This course is also designed to explore contemporary media, looking at how visual reproductions become instruments to remember the past. Through the exercise of visualizing East Asian history, the course aims to help students make critical assessments of mass media information on East Asia available to the American public.

HIS 80X - Civil Rights Movement: Grassroots Change and American Society (5)

The civil rights movement of the 1950s-60s was one of the most important grassroots social movements in American history. Course examines this movement and its effects on American society, focusing especially on the experiences of rank-and-file participants.

HIS 80Y - World War II Memories in the U.S. and Japan (5)

Examines how the meaning of such issues as war origins, war responsibility, the atomic bomb,

reparations, and racism have been subjects of contention in postwar U.S. and Japan. Students explore the relations between history, memory, and contemporary politics.

HIS 81 - Science in the Colonial World (5)

Introduces students to the history of science in colonized lands. Covers topics such as natural history collecting, medicine, bodily experimentation, botanical gardens, healing plants, and agriculture. Students learn about local colonial scientific production and anti-colonial resistance by focusing on case studies from Southeast Asia, with supplemental readings on colonial Caribbean, Latin American, and North African sites, as well as present-day North American indigenous territories. Students also investigate the possibilities for decolonizing science itself.

HIS 82 - California Gold Rush in Global History (5)

Course seeks to reframe a paradigmatic event in the history of California and the United States as an event in global history. Rather than assume the spatial and temporal boundaries of the Gold Rush, students explore different possible answers to the questions of where and when the Gold Rush happened, why it matters, and for whom. Students retrace connections and make comparisons between events in California and other places that often fall beyond the purview of "California History" as conventionally understood. (Formerly Global History of the California Gold Rush.)

HIS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

HIS 100 - Historical Skills and Methods (5)

Designed to introduce history majors to historical methods and provide preparation for exit seminars. Students develop critical reading, historical analysis, research, and disciplinary writing skills.

Prerequisite: Enrollment is restricted to history majors and proposed majors or by permission of the instructor.

HIS 101C - Oceans in World History (5)

Oceans, human communities, and the variety of relations between societies have been linked closely in world history. This course focuses on the three most well-researched and, historically, most important oceanic worlds--those that developed to link the regions bordering the Mediterranean Sea, Indian Ocean, and Atlantic Ocean.

HIS 101D - World History of Science (5)

Human curiosity and inquiry changed and varied widely across Eurasia. This course surveys how the curiosity and inquiry were framed in three major civilizations (China, Islam and Judeo-Christian) from the Mongol

conquest of Eurasia in the 13th century to the beginning of industrial capitalism in the 19th century.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HIS 101E - Global 1930s (5)

Explores the turbulent 1930s from a global perspective. Students consider the great events of the decade--the Great Depression, the consolidation of communism, and the rise of fascism--within the context of global connections and forces, including those fostered by imperialism and various forms of internationalism. (Formerly course 196A.)

HIS 101F - Global Environmental History (5)

Provides overview of global environmental history from prehistoric times to the present. Explores how Homo Sapiens became the dominant species on the planet, how some of them managed to grow food and domesticate animals, and how these agrarian or nomadic societies developed states or even empires. Explores what many have called the Anthropocene Epoch in the evolution of Earth.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HIS 104C - Celluloid Natives: American Indian History on Film (5)

Examines how American Indian history and culture has been portrayed in Hollywood films, with an emphasis on films that represent Native Americans over the broad spectrum of Native American/white relations.

HIS 104D - Museums and the Representation of Native American History, Memory, and Culture (5)

Provides an historical overview of the relationship between American Indians and museums. Current issues and practices in museums are explored, primarily those associated with ethics, collecting practices, exhibitions, education/interpretation, and administration/governance.

HIS 105 - Nations and Nationalism (5)

Provides an historical, comparative, and theoretical exploration of the development of nations and nationalism. Emphases include the historical formation of nation-states, modernization, colonialism, decolonization, nations and globalization, and the intersections between ethnicity, race, religions, and nationalism.

HIS 106A - Vietnam War Memories (5)

Compares memories and interpretations of war in Southeast Asia by diverse groups in France, America, and Vietnam. Topics include war origins, military strategies, propaganda, combat, civilians, media, activism, MIAs, refugees, mixed race children, memorials, textbooks, films, music, literature, and art.

HIS 106B - Asian and Asian American History, 1941-Present (5)

Analyzes immigration, race relations, war, gender ideology, family life, acculturation, political activism, interracial marriage, multiracial identity, and cultural representations between 1941 and the present. Emphasis on discussion, writing, research, and group presentations.

HIS 109A - Race, Gender, and Power in the Antebellum South (5)

Examines how ideologies of race and gender shaped the development of slavery and empire in the American South from European colonization to the eve of the American Civil War.

HIS 110A - Colonial America, 1500-1750 (5)

Explores the social, economic, cultural, and political development of British North America from the first European/Amerindian contacts in the late 16th century through the establishment of a provincial British colonial society. Course 110A is not a prerequisite to course 110B.

HIS 110B - Revolutionary America, 1740-1815 (5)

Explores the political, social, economic, and cultural development of British North America from the first stirrings of resistance to the establishment of the U.S. Course 110A is not a prerequisite to course 110B.

HIS 110D - The Civil War Era (5)

Social, political, and economic history of the American Civil War and Reconstruction, focusing on the war's changing nature and significance, emancipation, and the postwar struggle over the future of the South and the nation.

HIS 110E - Rise of the Machines: Technology, Inequality, and the United States, 1877 to 1914 (5)

History of the U.S. during what was perhaps its most socially turbulent era, the period following Reconstruction through the First World War. What did it mean to be a nation in the post-Reconstruction era? How did a country that had only recently unified itself under one system of labor now resolve the question of national identity? Was America truly a nation by 1914?

HIS 110F - World War USA: The United States from 1914 through 1945 (5)

Between the First and Second World Wars, American society accepted the need for a regulatory state to save capitalism from itself. Takes an in-depth look at many aspects of U.S. politics and culture during these years.

HIS 110G - Strange Days: The USA and its National Security State, 1945-1991 (5)

From the Good War to the Cold War, the Sixties to the rise of the New Right, the post-1945 American experience has been one of extremes. This survey

course looks for evidence of commonality during those times. (Formerly Age of Extremes: The United States During the Cold War, 1945 to 1991)

HIS 110H - Greater Reconstruction: Race, Empire, and Citizenship in the Post-Civil War United States (5)

Examines how the consolidation of United States sovereignty in North America and the establishment of an overseas empire during the period between the conclusion of the Civil War and the Phillippine-American War reshaped conceptions of race and citizenship.

HIS 112 - American Feminist Thought, 1750-1950 (5)

Traces history of feminist thought in the United States from the 18th century Enlightenment to the mid-20th century. Focusing on questions of social identity, gender difference, and legal/political status, examines writings of philosophers, activists, novelists, and ordinary women that challenged religious, political, and scientific beliefs underlying gender inequality.

HIS 113C - Women and American Religious Culture (5)

Historical introduction to religious culture of U.S. as experienced and created by women. Explores religious ideas about women, the treatment of women by mainstream institutions and religio-social communities, and female religious leaders and followers. Takes an explicitly feminist analytical approach and uses a variety of texts, including historical and literary scholarship, sacred texts, fiction, autobiography, material artifacts, visual art, and music.

HIS 114 - Market Revolution in Antebellum U.S. (5)

Examines the cultural, political, and environmental upheaval associated with antebellum market revolution. Topics include: markets and U.S. territorial expansion; reform movements that coalesced around disputes over what should, and should not be sold (e.g., antislavery activism; anti-prostitution reform movements).

HIS 116 - Slavery Across the Americas (5)

Examines the exploitation of African people as slaves throughout European colonies in the Americas. How did slavery affect slaves, enslavers, and their societies? Emphasizes the diversity of slave regimes and their importance for shaping American life for all.

HIS 116A - Unchained Memory: Slavery and the Politics of the Past (5)

Investigates the representation of slavery with scholarly and vernacular histories, focusing on the United States. Students examine representations of slavery in scholarly works, public-history venues like museums and historic sites, popular culture, and artistic productions. Students develop their own scholarly research into the history of slavery grounded in primary and secondary sources.

HIS 117 - Wired Nation: Broadcasting & Telecommunications in the US from the Telegraph to the

Internet (5)

Explores the history of telecommunications systems in the US starting with the telegraph, the telephone, wireless telegraph, radio, television and the Internet. Students learn about the development of these systems and the cultures that they foster.

HIS 117A - From the Player Piano to Pandora (5)

Explores the history, culture, and politics of the distribution of recorded and live sound from the 1870s through the present.

HIS 118 - The Global Cold War, 1945-1991 (5)

Explores the history of the Cold War from a global, multinational perspective. Begins with the opening salvos between the United States and the Soviet Union in 1945, and concludes with the collapse of the latter empire in 1991.

HIS 118A - Conspiracy Planet: How Conspiracies, Conspiracy Theories, and Conspiracy Scandals Shape History (5)

Explores the history of a principal obsession of our age: the conspiracy. Focuses on the people who love them most: conspiracy theorists. Millions of people around the world believe in conspiracy theories. Why?

HIS 120 - W.E.B. Du Bois (5)

Examines the thought and activities of W.E.B. Du Bois across changing historical circumstances. Considers the ways Du Bois's work has been used in the present to address issues such as racism and imperialism.

HIS 121A - African American History to 1877 (5)

A survey of pre-contact Africa, indigenous social structures, class relations, the encounter with Europe, forced migration, seasoning, resistance, Africa's gift to America, slavery and its opponents, industrialization, emigration vs. assimilation, stratification, Convention Movement, Black feminism, Civil War, and Reconstruction.

HIS 121B - African American History: 1877 to the Present (5)

A survey of the period from 1877 to present, highlighting Jim Crow, Militarism, Black feminism, WWI, New Negro, Garveyism, Harlem Renaissance, Black Radicalism, Pan Africanism, Depression, WWII, Desegregation Movement, Black Power, 1960s, Reaganism. Cultural and economic emphases.

HIS 122A - Jazz and United States Cultural History, 1900-1945 (5)

Explores the meaning of jazz in United States society and as a U.S.-based art form in other societies. Examines the social and cultural forces that have produced different jazz styles and the various ways that social conflicts and ideals have been displaced onto the music.

HIS 122B - Jazz and United States Cultural History, 1945 to the Present (5)

Explores the meaning of jazz in United States society and as a U.S.-based art form in other societies since 1945. Examines the social and cultural forces producing jazz movements and the social transformations, conflicts, and ideals read into the music.

HIS 123 - Immigrants and Immigration in U.S. History (5)

Introduces U.S. immigration history from the colonial era to the present, with emphasis on the recent past. Particular attention given to changing immigration patterns; the character of the immigrant experience; and the range of responses to immigration, including nativism.

HIS 124A - Panama Canal and U.S. Empire (5)

Explores the technological, environmental, social, political, and diplomatic history of a critical link in global transportation networks: the Panama Canal. The Canal has long been celebrated as one of the great triumphs in the history of technology and engineering. But this triumphalism obscures a more complicated history of struggle over issues including land, water, health, race, citizenship, and sovereignty. Course explores the Panama Canal's fraught history from the construction years of 1904-1914 through the restoration of full control to Panama in 1999.

HIS 128 - Chicana/Chicano History (5)

A survey course on the social history of the Mexican (Chicana/o) community and people in the U.S. through the 20th century. Themes include resistance, migration, labor, urbanization, culture and politics.

HIS 130 - History of Modern Cuba (5)

Covers from the Cuban sugar revolution (late 18th century) to the socialist revolution and its aftermath (1959-present). It is intended to be not only a modern history of Cuba but also a broader history of Latin America through the case of Cuba.

HIS 131 - Women in Colonial Latin America (5)

Introduction to the social history of Latin America through a focus on the inflections of class and ethnicity on gender in this region. First six weeks focuses on the colonial period. The last three weeks covers the 19th and 20th centuries.

HIS 134A - Colonial Mexico (5)

Covers the social, cultural, economic, and political history of colonial Mexico (New Spain). Special attention paid to colonial identity formation, religion, and labor systems. Begins by examining indigenous societies prior to the arrival of Europeans and concludes with Mexico's independence movement in the early 19th century.

HIS 134B - History of Mexico, 1850 to Present (5)

Social, cultural, economic, and political history from the triumph of Liberalism to the present day, focusing on four key periods: the dictatorship of Porfirio Diaz (1900–1910), the armed phase of the Revolution (1910–1920), the consolidation of revolutionary programs and a single-party democracy (1920–1940), and the developmentalist counter-revolution since 1940. Provides background for understanding the Mexican diaspora to the U.S.

HIS 137A - Africa to 1800 (5)

Introduction to history of Africa. Topics include states and stateless societies, culture, society and economy in the pre-modern era, stratification, oral traditions, long distance trade, the coming of Islam, and the evolution of the South Atlantic system and its social, political, and other consequences. Some background knowledge of Africa helpful.

HIS 137B - Africa from 1800 to the Present (5)

How Africa lost its continental, regional, and local autonomy in the era of European imperialism. The components of European hegemony, Christian proselytization, comparative colonial strategies and structures, nationalism, decolonization and independence and the disengagement from neo-colonial patterns and the colonial legacy. Case studies from northern and sub-Saharan Africa. Some background knowledge of Africa helpful.

HIS 137C - African Cinema (5)

Historical study of modern African cinematography from the emergence of film as a tool of social control in the imperial and colonial periods to its theoretical and practical transformation by African cineastes in the post-independence era. Films and videos from northern, eastern, western, central/equatorial, and southern Africa viewed.

Prerequisite: Prerequisite(s): HIS 30 or HIS 137A or HIS 137B, or by permission of instructor.

HIS 139C - Queer Pasts: A Radical Telling of LGBTQ History in the United States (5)

Critically explores how to preserve, represent, and study the history of queer and gender non-conforming people. Focuses on non-traditional and digital archives, oral history, and original research.

HIS 139G - Herbs, Potions, and Viruses: History of Medicine and Public Health in Modern China (5)

Introduction to the history of medicine and public health in China (primarily the 20th century) to help students gain a sense of modern Chinese history and make sense of the ongoing COVID-19 pandemic. Reviews how the pandemic has fundamentally changed life, including discussions of state governance and the public health system and the allocation of medical resources and the role of Traditional Medicine (TCM).

Surveys the historical development of medicine in 20th-century China, focusing on the dissemination of Western medicine, the evolution of TCM, and the development of the public health system. Reviews the 1911 Manchurian plague, the cholera pandemic in the 1960s, the 2002 SARS outbreak, and the present-day COVID-19 pandemic.

HIS 140B - History of Qing China, 1644-1911 (5)

Introduces students to how Qing China arose, expanded, and struggled to enter the modern world. Focuses on what the Qing empire had in common with other agrarian empires across Eurasia, commercialization and communication networks, elite mobility and peasant revolts, political legitimacy of the alien rule, maintaining social order (such as merchants' control and gender segregation), massive population growth and internal migration, as well as its conflicts with the industrial West.

HIS 140C - Revolutionary China 1895-1960 (5)

Explores history of China from the late 19th century to the early years of the People's Republic, focusing on the end of imperial rule, the sources and development of revolution, and early attempts at socialist transformation.

HIS 140D - Recent Chinese History (5)

Explores history of China from establishment of the People's Republic of China to the present, focusing on competing strategies of socialist transformation, urban/rural relations, and the effects of the post-Mao economic reforms.

HIS 140E - Women in China's Long 20th Century (5)

Introduces changes in Chinese women's lives--and changes in shared social ideas about what women should do and be--from the mid-19th century to the present. When we foreground gender as a category of analysis, how does history look different?

HIS 142 - History of Hong Kong and Taiwan: Two Peripheries of China (5)

Studies the history of two peripheries of China, Hong Kong and Taiwan, from the earliest written records to the present. These two places were at various times part of China, and, to some, are still parts of China. However, these two have historical trajectories distinct from China and have developed their unique positions in the world. This course invites students to think about Taiwan and Hong Kong, not only their local histories and development, but also their role as two peripheries of China in Chinese nationalism and in U.S.-China relations.

HIS 143B - History of the Philippines, 1815 to the Present (5)

Examines Philippine history from the early 19th century through the present. Though the course timeline begins in the Spanish colonial period, the class interrogates

understandings of the pre-colonial past and how these have informed Philippine nationalism, intellectual history, social sciences, and more. Students learn about debates in the field and become familiar with scholarship from the Philippines. Students also reflect on the political urgency of the contemporary moment and how transnational flows of migrants, activism, and cultural production have changed dominant approaches to historical studies on the archipelago.

HIS 146A - Colonial South Asia 1750-1947 (5)

Introduces key transformations--political, economic, social, and cultural--in colonial Indian history. The focus is on the processes, institutions, and ideas that shaped colonial power and resisted it.

HIS 147A - History of Premodern India (5)

A study of religions (Vaisnavism, Tantrism, Islam, Sikhism), art, literature, and social movements in their historical contexts from 1000 A.D. to 1800.

HIS 147B - Political and Social History of Modern South Asia (5)

Social, political, and religious movements in the colonial and postcolonial contexts of the 19th and 20th centuries in modern and contemporary South Asia.

HIS 147C - South Asia in the 20th Century (5)

Introduces historical change in 20th-century South Asia. Topics include: modernity, gender, state formation, nationalism, democracy, and development. Course material includes interdisciplinary secondary works, primary reading by important political actors, and films. Prior knowledge of South Asia is useful, but not necessary.

HIS 147D - Intellectual History of South Asia (5)

Highlights the power of ideas in making South Asia modern. Focuses on the 19th and 20th Centuries. Ideas assessed include liberalism, Marxism, Hindu revivalism, Islamic jihad, democracy, nationalism, secularism, and development.

HIS 149 - Plants, People, and the Making of Modern Southeast Asia (5)

Analyzes the entangled history of plants and people in Southeast Asia. Provides a broad sweep of the early modern period (pre-1500), imperial contact, anti-colonialism, nationalism, and decolonization up to present-day social and political conditions. The class examines plants of agricultural and medicinal value, political importance and ritual meaning. Students also consider how plants can be historical agents that shape and influence interaction in the region. Students likewise learn about the emergence of Southeast Asia as a field of study in the United States and debate the intellectual legitimacy of area studies, particularly through the optic of plant life.

HIS 150A - Emperors and Outcasts: Ancient Japan (5)

Surveys the history of the peoples of the Japanese islands from prehistorical migrations through the 15th century. Emphases include examination of social structures, political formations, cultural production, and religion. (Formerly Ancient Japan.)

HIS 150B - Tokugawa Japan (5)

Surveys the history of the peoples of the Japanese islands from the middle of the 15th century to the middle of the 19th century. Focus is on the era of civil war, the formation of the early modern federated state, social structure, and cultural production.

HIS 150C - Inventing Modern Japan: The State and the People (5)

Surveys the history of the peoples of the modern Japanese nation from the Meiji Restoration to the present. Focuses on the formation of the modern state, empire, social movements, and cultural production. (Formerly Modern Japan.)

HIS 150D - The Japanese Empire, 1868-1945 (5)

Examines the history of the Japanese colonial empire from 1868 to 1945, including the colonies of Taiwan, Korea, Micronesia, and Manchuria. Considers how the colonies were ruled and what the legacies of the empire have been.

HIS 150E - History and Memory in the Okinawan Islands (5)

Known historically as the Ryukyu Islands, Okinawa has long been an important transmitter of people, ideas, and goods in East Asia. Course explores this history by focusing not only on the royalty of these islands, but also on the lives of everyday people.

HIS 150F - Engendering Empires: Women in Modern Japan and Korea (5)

Explores how women's experiences in Japan and Korea were intertwined and differentiated before and during World War II under Japanese empire, and from the postwar to the present under American hegemony.

HIS 151 - History of Science, Medicine, and Technology from Antiquity to the Enlightenment (5)

Questions explored include the debate over when/where modern science began; the role of craft-based and artisanal skills in the production of knowledge; and the technological and social impacts of intellectual change, from the Bronze Age to the birth of computing.

HIS 151A - Medicine and the Body in the Colonial World (5)

Explores the histories of bodies and medicine in the colonial world. Charts the relationships among ideas about the body, medical practice, race, and labor in the colonial world between the 16th and the mid-20th centuries

HIS 151B - Drugs in World History (5)

What were drugs in the early modern world? Who grew and consumed them? How were they used, and why? Students study how humanity's ancient fascination with altered states shaped globalization, the Scientific Revolution, the Atlantic slave trade, colonialism, and modernity itself.

HIS 154 - Post-Colonial North Africa (5)

Introduces the history of modern North Africa from WWI to the so-called Arab Spring. Topics include the dynamics of colonial rule and reform, anti-colonial nationalism, decolonization, the rise of Islamism, and popular protest.

HIS 155 - History of Modern Israel (5)

The conflict between Israelis and Palestinians is one of the most intractable disputes in our troubled world. Course begins with a glimpse of Palestine in the late 19th and early 20th centuries, surveys the rise and fall of utopian Zionism, pays especially close attention to the events of 1948 and 1967, and concludes by analyzing the collapse of hopes for peace after Oslo and Camp David meetings.

HIS 156 - Interrogating Politics in the Post-Colonial Middle East (5)

Explores the political trajectory of the post-colonial Middle East. Topics include: the Cold War and rise of Third Worldism; women's movements; political Islam; Arab-Israeli conflict; Lebanese Civil War; impact of oil production; Iranian Revolution; rise of the Arabian Gulf.

HIS 156A - Art, Culture, and Mass Media in the Arab Middle East (5)

Chronicles the cultural history of the Arabic-speaking regions of the Middle East through art, literature, cinema, and mass media during the 20th and 21st Centuries.

HIS 156B - Modern Arab Thought (5)

Studies the intellectual history of the Arab world from the nineteenth century to the Arab Spring. Beginning with Arab responses to colonialism, it covers the evolution of various schools of thought including liberalism, Islamism, Marxism, nationalism, and feminism.

HIS 156C - Living Egyptian History in the City of Cairo (5)

Traces the history of the Egyptian capital of Cairo beginning with the establishment of the city following its conquest by Arab armies in the seventh century and ending in our contemporary moment. Through a deep engagement with space and place, course considers how Cairo evolved throughout different political regimes, what the influence of politics has been on life and space

in the city, and how the meaning and experience of urban space has changed over centuries.

HIS 157 - The Ottoman Empire (5)

Explores the history of the Ottoman Empire with emphasis on its Arabic-speaking provinces. In addition to critically considering the political trajectory of the empire, we interrogate a wide range of topics relating to community organization, economic networks, international affairs, and the significance of religion within the Ottoman realm.

HIS 158A - The Escapes of David George: Biographical Research on Slavery and Early America (5)

Invites student collaboration on a biography of David George, born enslaved in colonial Virginia. His attempts to escape slavery led to a remarkable odyssey throughout the Atlantic World, revealing the constraints of slavery and limits of American freedom. (Formerly COWL 161C.)

Prerequisite: Enrollment is restricted to College Scholars.

HIS 158C - Slavery in the Atlantic World: Historical and Archaeological Perspectives (5)

Explores the African diaspora resulting from the transatlantic slave trade, drawing on methodologies from two academic disciplines--history and archaeology. Examines key questions about the slave system, using an array of source materials, both written documents and artifacts.

Prerequisite: Enrollment is restricted to history, anthropology, and critical race and ethnic studies majors and minors and black studies minors or by permission of instructor.

HIS 159A - Cleopatra to Constantine: Greek and Roman Egypt (5)

Examines the political, social, religious, and material culture of ancient Egypt during these periods of intense interaction with the ancient Near East and Mediterranean, from the period of Alexander (332 BCE) through the beginning of Coptic Christianity (3rd century CE).

HIS 159B - Women and Gender in Ancient Egypt (5)

Explores sex and gender in ancient Egypt with a specific focus on women. Artistic representations, texts, objects of daily life, and burials are used to examine the practices that encoded gender in this ancient culture.

HIS 159C - Temple and City: The Egyptian New Kingdom and the City of Thebes (5)

Introduces the political and religious history of the Egyptian New Kingdom (1546-1086 BCE), using the city of Thebes as a focal point. The political, religious, and architectural history of the city is covered.

HIS 159D - When Cities Were New: the Rise of

Urbanism in the Ancient Near East and Mediterranean (5)

Investigates the rise and development of urbanism in the ancient Near East and Mediterranean world, including Mesopotamia, Syria, Egypt, Greece, and the Roman Empire. Close studies of individual ancient cities, as well as broader issues in ancient urbanism are covered.

HIS 160A - Athenian Democracy (5)

Athenian democracy from foundation to the fourth century B.C., with emphasis on its practices and ideologies. Readings from ancient sources and modern theory. Topics to include foundations and development; Athenian concepts of freedom, equality, law, citizenship. Lectures and discussion.

HIS 160C - Topics in Greek History (5)

Detailed consideration of some specific topic or period in Greek history, varying from year to year. Examples include Greek religion, Alexander, the Hellenistic world, the ancient Greek economy, and Greece and India; Thucydides and the Peloponnesian War; Greek art and archaeology.

HIS 161B - Topics in Roman History (5)

Detailed consideration of some specific topic or period in Roman history, varying from year to year. Examples include Roman religion, Augustus and the Roman Empire, Julio-Claudian emperors and the principate, Roman slavery, and Christianity and Rome.

HIS 163B - Genesis: A History (5)

Introduction to historical, textual, source, and redaction criticism of the book of Genesis and to exegesis as science and ideology. Texts, history, and iconography of neighboring traditions (Mesopotamian, Ugaritic, Egyptian, Greek) are also studied when appropriate.

HIS 165A - Medieval History and Architecture (5)

Covers the history and architecture of Europe and the Mediterranean from Late Antiquity through the fall of Constantinople in 1453. Beginning with Constantine and the rise of Christianity, this course follows the development and spread of new cultures and architectural forms, stretching from Islamic material in the east to the British Isles in the west. Course stresses the evolution of architecture during the medieval period as well as the cross-cultural influences that affected their form and what this can tell us about the cultures that created them.

HIS 166 - Northern Ireland: Communities in Conflict (5)

Introduction to the so-called troubles in Northern Ireland, from the 1960s to the present. Examination of the historical background to the conflict, the patterns of conflict in the 1970s and 1980s, and the emergence of a peace process in the 1990s.

HIS 167A - The First World War (5)

An intensive analysis of the First World War from multiple perspectives: military, diplomatic, political, economic, technological, global, and cultural. The emphasis is on the transformative impact of the war on European societies, international relations, and modern culture.

HIS 167B - The Second World War in Europe (5)

Making use of multiple perspectives, this course explores the origins of the Second World War, its course and outcome, and its transformative effects on European society, culture, politics, and demographics. Closely examines the war's impact on diverse civilian populations.

HIS 169 - Dutch and Belgian History, 1500 to Present (5)

The political, social, economic, and cultural history of the modern Netherlands and Belgium from 1500 to the present day.

HIS 170A - French History: Old Regime and Revolution (5)

French history from the Middle Ages through the Revolution. Focus on the rise and fall of absolute monarchy, the nature of Old Regime society, the causes and significance of the French Revolution. Attention to those who endured as well as to those who made events.

HIS 170B - French History: The 19th Century (5)

Social, political, and cultural history of France from the Revolution to WWI. Focus on the Revolutionary tradition, the Napoleonic myth, the transformation of Paris, and the integration of the peasantry into the national community. Readings may include novels by Stendhal and Balzac.

HIS 170C - From the Trenches to the Casbah: France and its Empire in the 20th Century (5)

Surveys major events in 20th-century French history, such as the two World Wars, the Thirty Glorious Years, European integration, decolonization, the Cold War, and the events of May 1968.

HIS 172A - German History (5)

The development of German civilization, including philosophy and literature as well as politics and diplomacy in the 19th and 20th centuries.

HIS 172B - German Film, 1919-1945 (5)

Introduction to German films from 1919 to 1945. Through combination of movies and documentaries, gain insight into political, economic, social, and cultural conditions of Weimar and Nazi Germany.

HIS 172C - History of German Film, 1945 to Present (5)

Uses films and documentaries to provide insight into the political, social, economic, and cultural conditions

of postwar East and West Germany, with a strong focus on remembrance of the country's Nazi past.

HIS 174 - Spies: History and Culture of Espionage (5)

Analyzes the roles of espionage and intelligence in modern European history with emphasis on major conflicts from the Franco-Prussian War through the Cold War and beyond. Also examines images of spies in popular culture from the early 20th century to the present.

HIS 176 - Eastern Europe, 1848-2000 (5)

Examines the political and social history of modern Eastern Europe, excluding the Balkans and Baltic States, from 1848 to the present. Focuses on the development of nationalism, war, occupation, ethnic strife, communism, and democratic reform in this region.

HIS 177A - Slaves, Soldiers, and Scientists: History of the Tropics (5)

Surveys the role of the tropics and tropical peoples in history, covering the post-Columbian encounters between indigenous Americans, Europeans, and Africans, colonialism, and the origins of fields, such as anthropology and tropical medicine. (Formerly Tropics of Empire.)

HIS 178A - European Intellectual History: The Enlightenment (5)

Study of European thought and literature from Hobbes and Swift to Rousseau and Goethe. Focuses on relation of ideas to their social and cultural context. Special attention to traditions of religious conflict and criticism rising from the Protestant Reformation; to the discovery of the world beyond Europe; and to the intellectual and cultural roots of the French Revolution.

HIS 178B - European Intellectual History: The 19th Century (5)

Study of European thought and literature from Blake to Nietzsche. Focuses on relation of ideas to their social and cultural context. Special attention to the rise and fall of the Romantic movement, to changing conceptions of history, and to the development of socialist and aesthetic critiques of industrial civilization.

HIS 178C - European Intellectual History, 1870-1970 (5)

Drawing on experiments in autobiography, the arts, and social theory, this course focuses on ideas and images of modernity in European culture. It also highlights the role of the intellectual as politically engaged or disillusioned witness in a violent century.

HIS 178E - Modern Jewish Intellectual History (5)

Surveys European Jewish intellectual history from the Enlightenment to the present. Major themes include emancipation and assimilation, the flowering of Yiddish literature, the rise of Zionism, new variations on the

messianic idea, and Jewish contributions to the culture of urban modernism.

HIS 181 - Modern Britain and the British Empire (5)

Examines the history of the British Isles and the British Empire from the late 17th century to the present. Traces the expansion, transformation, and dissolution of the British Empire as well as the changing meanings of Englishness and Britishness over this period.

HIS 181B - Africa and Britain in an Imperial World (5)

Covers the long history of interaction between Britain and Africa, from the Atlantic slave trade and British colonialism in Africa up to the post-colonial present, from British settlers in Africa to the African presence in the British Isles.

HIS 184B - Racism and Antiracism in Europe: From 1870 to the Present (5)

Explores the histories of racism and anti-Semitism alongside efforts to combat racism in Europe from 1870 to the present. Offers a conceptual basis for thinking about the definition of race and its historical evolution.

HIS 185C - Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics (5)

Comparative in approach, course examines Jewish radical politics across Europe, North Africa, the Middle East, and the Americas in the late 19th and 20th centuries. How did radical politics afford Jews greater agency in contexts that otherwise excluded them? What tensions arose with religious, nationalist, and internationalist obligations? What drew so many Jews across so many diverse contexts to focus on radical leftist politics? What, if anything, links Jews and radical politics across such diverse contexts? Through primary sources, memoirs, scholarly works, films and more, students compare Jewish engagement in radical leftist movements in several nodes, including Russia (and the former USSR), Poland, France, Egypt, Iraq, Morocco, Israel, Argentina, Mexico, and the USA among others.

HIS 185I - Latin American Jewish History in the Modern Period (5)

Explores Jewish immigration settlement and identity negotiation in Latin America from the mid-19th Century to the present.

HIS 185J - The Modern Jewish Experience (5)

Historical comparative overview of the political, socio-cultural, and intellectual transformation of Jewish societies in Europe and the Middle East from the late 18th Century to the present.

HIS 185K - Jewish Life in Eastern Mediterranean Port Cities (5)

Overview of the Jewish experience in important cities in the age of empire. Istanbul, Beirut, Alexandria, and Salonica were home to thriving, culturally diverse

Jewish populations. Course explores these urban Jewish cultures, the institutions, and intellectual production.

HIS 185L - Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula (5)

Surveys Jewish life in the Iberian Peninsula from Roman times to the present, and explores offshoot Hispanic Jewish societies in the aftermath of the 1492 expulsion.

HIS 185M - Zionism: An Intellectual History (5)

Zionism is one of the most complex--and contested--political and ideological movements of the modern period. This course explores the intellectual history of Zionism and its critics, from the late 19th century to the establishment of the State of Israel.

HIS 185O - The Holocaust and the Arab World (5)

Examines World War II in North Africa and the Middle East. Through primary and secondary sources, films, and novels, students consider WWII and the Holocaust as they intersect with colonial and Jewish histories in the Arab world.

HIS 189 - @history: Doing History in a Digital Age (5)

Investigates questions relating to how new technologies are changing the way historians do research and interact with the public. This course has both a critical classroom component and a hands-on computer laboratory component.

Prerequisite: Enrollment is restricted to junior and senior history, Jewish studies, German studies, and classical studies majors.

HIS 190A - Slavery and Race in Latin America (5)

Covers comparative history of slavery in Latin America with questions of race in the colonial and national periods and key moments and debates in the historiography of slavery and its relation to ideologies of the past and the nations.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190B - Race and the Nation in Latin America (5)

Focuses on the ways in which nation and race have been thought about in Latin America throughout the 19th and 20th centuries. These concepts were closely intertwined, albeit in differing and changing ways, since the wars of independence from Spain and Portugal (1810-1825). Compares the ways in which black, Indian, and racially mixed (mulatto or mestizo) have been socially constructed, ideologized, and contended in different countries, including Brazil, the Spanish-speaking Caribbean, Mexico, Peru, and Argentina.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190D - Asian and Latino Immigration Since 1875 (5)

Examines Asian and Latino immigration into the United States since 1875. Students explore the relationship between U.S. foreign policies and immigration policies, transnational ties and homeland connections, and the cultural and political influences they have on American society.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190E - Topics in Chicana/o History (5)

A seminar on the history of Chicanos/Mexicans in the United States, 1848 to the present. Topics include Chicana/o labor, family, social, urban, cultural, and political history.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190F - Research Seminar in the Americas (5)

Students learn how to conduct research and write history. Primary and secondary sources are extensively read. Research sources include a rich array of government documents, newspapers, memories and diaries, visual material and film.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190G - Comparative History of Redress and Reparations (5)

Explores why after World War II and especially in the past 30 years, demands for redress and reparations for war crimes, genocide, mass violence, slavery, colonialism, and other injustices proliferated. Students compare different views on the benefits of confronting the past, identifying perpetrators, and providing justice in multiple countries. Students also analyze how race, ethnicity, religion, class, and gender shaped injustices and assessments of reparations by public officials, international investigators, survivors, and descendants of victims. Topics include tribunals, prosecutions, truth commissions, apologies, restitution, compensation, and memorialization.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190H - History of Time (5)

Writing-intensive seminar on the experience, manipulation, and representation of time in history. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190J - Mexican History in the Archives (5)

Explores the history of early Mexico (the Colonial Era through the mid-19th century) through original archival research. Includes field trips to regional archives and research libraries. Reading knowledge of Spanish is recommended.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190K - Wired Planet: Readings on the Global History of Broadcasting and Telecommunications (5)

Locates common themes in the history of broadcasting and telecommunications throughout the world. Why do certain strategies for developing broadcasting and telecommunications systems succeed or fail? Why do some nations outstrip other nations of comparable development in the growth of their communications systems? Why do national or regional communication systems suddenly become more or less open, or more or less centralized?

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190L - Personal Politics in the New South (5)

Examines the tensions between movements for political reform and reaction in the southern United States between Reconstruction and the second world war. Students develop a research paper grounded in primary research that addresses these questions.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190M - History of Children and Culture of Childhood in the 19th Century (5)

Explores the lives of children and the functions of the literary figure of the child in the cultural politics of the 19th century in the United States. Examines the historically contingent nature of childhood through historical, literary, and visual sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190N - Topics in African History (5)

Examines contemporary crises in Africa: the new South Africa, refugees, HIV/AIDS, children of war, blood or conflict diamonds, civil war, and genocide in Rwanda. Seminar format where students will be prepared to undertake studies on specific subjects and two rounds of 15–20 page papers.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190O - African American Historiography (5)

Major themes in contemporary African American historiography on a topical basis.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190P - Early American Society and Culture (5)

Explores subjects and themes in the political, social, and cultural history of early U.S. history from the colonial period through 1850. Includes critical reading of current scholarship and research in primary texts. The focus of this course is the production of a 25-page research paper. Recommended for senior history majors.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Q - The Novel and History (5)

Explores novels and novelists in relation to the writing of historical scholarship. Breaking down the simplistic genre division between fiction and nonfiction, provides opportunities for students to read novels as historical evidence, novels as editorial commentary, and novels as analytical narrative. Students produce a series of papers that culminate in a 25-page research project.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors. senior history majors.

HIS 190R - Research in the History of American Religions (5)

Readings and research in the history of religions in the United States. Readings focus on topics including the rise of evangelicalism; gender and religion; class, race, and religious diversity; and modernity. Students produce papers that culminate in a 25-page research project.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190T - Latin America in the Cold War (5)

Writing-intensive seminar on Latin America during the Cold War. Particular attention given to U.S.-Latin American relations, including moments of covert or direct interventions. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190U - Power, Culture, and the Federal Bureau of Investigation (5)

In this research seminar, students explore F.B.I. files obtained under the Freedom of Information Act on a prominent citizen of the United States of America.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190V - Myths of California (5)

The history of California has been shrouded in myths. The historian Richard White describes myths as "timeless stories that differ from history" and "are not so much falsehoods as explanations." This course studies the history of myths that have shaped how many people in California understand the past, including myths about the histories of Indigenous peoples, European explorers, Spanish missions, the Gold Rush, and different visions of "the California Dream." In the final assessment for the course, students use historical thinking to create a research paper to challenge a mythic representation of California history.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100,

and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190W - U.S. Civil War and Reconstruction (5)

Students read historiographically significant works in the history of the U.S. Civil War and Reconstruction. Students develop research projects grounded in primary source material on a related topic of their choosing. (Formerly Topics in U.S. Civil War and Reconstruction.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190X - History of the Atlantic World, 1492-1824 (5)

Explores the transatlantic societies created by Europeans' colonization of the Americas, and their exploitation of African slaves. Questions whether the cultural, economic, and political links across the ocean integrated the adjacent lands into a fundamentally Atlantic World.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Y - The Atlantic Slave Trade (5)

Before 1800, far more Africans than Europeans colonized the Americas, arriving unwillingly in the slave trade. Course examines the captives' experiences; the trade's organization and significance in the Atlantic economy; and the eventual movement to abolish the traffic.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Z - The Long Civil Rights Movement (5)

Explores the concept of the long civil rights movement as a framework for understanding a wide range of social, economic, and political developments in the African American freedom struggle, in both North and South, from the 1930s through the 1980s.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See HIS 42.) Students submit petition to sponsoring agency.

HIS 193 - Field Study (5)

To allow promising, well-qualified undergraduates to pursue directed programs of archival or archaeological study in the field under supervision of the UCSC history faculty, concentrating their work within a single given quarter. Students may take two or three courses concurrently. Students submit petition to sponsoring agency.

HIS 194B - Okinawan History (5)

Examines the history of Okinawa with particular attention paid to the modern era. The goal is to give students a solid foundation in the historiography of major themes in the study of Okinawan society.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two additional upper-division history courses; or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194C - Topics in Modern Chinese History (5)

Explores important themes in modern Chinese history ranging from empire and nation-state formation, foreign imperialism, revolutionary movements and politics, global capitalism, and social and cultural change. Teaches the writing of a major research paper using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194E - Women in Japanese History (5)

Examines through both primary and secondary sources such issues as work, sexuality, education, class, and ethnicity in relation to constructions of female gender in Japanese society over the past several centuries, particularly focusing on the modern era.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194K - Topics in the History of Southeast Asia (5)

Examines the history of lands, peoples, and cultures in Southeast Asia. Covers case studies from early modern history, imperial contact, colonization, decolonization, as well as contemporary political and social conditions, including studies of displacement and im/migration. Topics include comparative studies of colonialisms in

the region; historiography of Southeast Asian studies in the United States; Southeast Asian technoscience and medicine; environmental history and eco-activism. As this course also qualifies as a senior exit seminar for history majors, the course dives into the particulars of academic research and writing. Students produce an original research paper that will be scaffolded throughout the term.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194L - Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East (5)

From Medieval Spain, Ottoman Salonica, 20th-century Baghdad, present day Casablanca, and beyond, this course examines Jewish experiences of exile, diaspora, and displacement, as well as how to read memoir and biography as sources in their broader historical context.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two upper-division history courses. Enrollment is restricted to junior and senior history majors, critical race and ethnic studies majors, and Jewish studies majors and minors.

HIS 194M - Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600-1900 (5)

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing, China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and HIS 294M.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), two additional upper-division history courses, or permission of the instructor. Enrollment is restricted to junior and senior history majors and East Asian studies minors.

HIS 194N - Urbanites in the Global South, 18th Century to the Present (5)

Urbanization is an important aspect of the making of the Global South. This course introduces the histories of urbanization from the 18th Century to the present. Students read the works of historians, anthropologists, geographers, and sociologists.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194O - South Asia in the Twentieth Century (5)

Introduces students to key ideas and ideologues of the Indian nation and the practices of the late-colonial and post-colonial Indian State. In the process, students become familiar with themes like modernity, gender, state formation, space, nationalism, democracy, and development.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194P - Urban South Asia (5)

Introduces important themes in urban studies in South Asia in the pre-modern and modern periods. These include political economic change; competing imaginations of city life; urban politics; land use; urban planning; and cultural life among others. This course begins with a brief survey of urbanism in pre-modern South Asia but focuses mostly on urbanities in the early modern and modern periods.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194Q - Making Space in the Colonial and Post-Colonial World (5)

Explores the production and experience of new forms of space in the colonial and post-colonial world through historical, political, and anthropological case studies with an emphasis on the Middle East and Africa.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194S - Special Topics in Ancient Egyptian History (5)

Focuses on different topics in ancient Egyptian history. In addition to assigned readings, each student does additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course vary from year to year.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100 (for history majors), and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history and classical studies majors.

HIS 194T - Worlds of Labor in Asia (5)

Introduces students to important debates in labor studies in Asia. Studies the relationship between labor,

capitalism, and imperialism. Also interrogates the relevance or irrelevance of Asia as a concept from the standpoint of labor.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two upper-division history courses; or permission of the instructor. Enrollment is restricted to junior and senior history majors.

HIS 194U - The Cold War and East Asia (5)

Considers through primary and secondary sources the events and aftermath of the Cold War in East Asia in terms of state formation, domestic and foreign policy, and protest movements in China, Taiwan, Korea, and Japan with reference to Vietnam.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194V - Fascism and Anti-Fascism: The Global Spanish Civil War (5)

Widely considered the antechamber of WWII, the Spanish Civil War (1936-1939) was the first large-scale international clash of Fascists and anti-Fascists. It was simultaneously a national conflict and a global proxy war, colonial and anti-colonial; and yet, it is often overlooked.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors and Jewish studies majors and minors.

HIS 194W - Social Movements in the Modern Middle East (5)

This writing-intensive seminar explores the social movements sweeping the contemporary Middle East. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194Y - Memories of WWII in the U.S. and Japan (5)

Research seminar comparing U.S. and Japanese memories of World War II. Topics include war origins, total war, the atomic bomb, war responsibility, reparations, memorials, museums, and monuments. Primary work devoted to research in original texts and documents.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100,

and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 195A - Thesis Research (5)

Prerequisite(s): petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration).

HIS 195B - Thesis Writing (5)

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration).

HIS 196E - Modern Irish History (5)

Aims to illuminate major themes and turning points of modern Irish history: the causes and consequences of the famine; the development of Irish nationalism; revolution, civil war, and partition; and the recent economic boom.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two upper-division history courses; or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196F - Topics in European Environmental History (5)

Examines the history of Europe and its empires within the context of human interactions with and attitudes toward a changing natural world. Topics include: European imperialism in ecological perspective; the effects of new developments in science and technology on urban and rural environments; the rise of public health, sanitation, and colonial medicine; environmental justice; and the historical context of contemporary environmental problems.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196G - Topics in Modern Germany and Europe (5)

A senior reading and research seminar that explores the selected historiographic debates in German history during the 19th and 20th centuries. (Formerly Modern Germany and Europe.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history and Jewish studies majors.

HIS 196H - Sex and the City--The History of Sexuality in

Urban Areas Around the Globe (5)

Focuses on the history of sexuality in major urban areas globally. Topics include: sexual identities and race, class, and gender; sex work, policing, and urban spaces; gay, lesbian, and transgender communities; race, gender, and sexuality within the context of colonialism.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100, and two additional upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196I - The French Revolution (5)

Students conduct original research on the French Revolution of 1789 based on mix of primary and secondary courses. Classroom discussions focus on interpreting contemporary documents and addressing historiographical issues. Seminar format with significant written requirements. Presumes familiarity with the period.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and HIS 100, and two additional upper-division history courses, or by permission of instructor. HIS 70A and/or HIS 170A recommended as preparation. Enrollment is restricted to junior and senior history majors.

HIS 196K - Studies in European Intellectual History (5)

Topics in European intellectual history from the French Revolution to World War I. Readings exemplifying approaches from history of ideas and intellectual biography to recent studies of rhetoric and political culture. Preparation and presentation of research paper.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196M - Shtetl: Eastern European Jewish Life (5)

For several centuries, the shtetl functioned as the center of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and course 257.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two additional upper-division history courses. Enrollment is restricted to junior and senior history and Jewish studies majors.

HIS 196N - Eastern European Jewish Social History (5)

Study of 19th- and 20th-century Eastern European and Russian Jewish social history.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two additional upper-division history courses. Enrollment is restricted to junior and senior history and Jewish studies majors.

HIS 196Q - Europe and the World During the Cold War (5)

Explores European history from the end of World War II through the fall of the Soviet Union. Examines how Europe evolved from a fragmented, polarized array of colonial rivals to a more economically and culturally integrated place.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 100 and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196S - Special Topics in Ancient History (5)

Seminar focuses on different topics in ancient history. In addition to assigned readings, the student is expected to do additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course will vary from year to year.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100 (for history majors), and two additional two upper-division history courses; or permission of instructor. Enrollment is restricted to junior and senior history and classical studies majors.

HIS 196Z - Europe from the Margins: Outside Influences on Modern European Thought and Culture (5)

Europe's engagement with the outside world, which ranged from cultural and intellectual borrowings to relations of domination and colonialism, shaped its modern history and culture. This course examines the cultural and intellectual history of modern Europe by focusing on the ways in which European thinkers and cultural producers drew upon or were influenced by non-European sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 100, and two additional upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 198 - Independent Field Study (5)

Student's supervision is conducted by a regularly appointed officer of instruction by means other than the usual supervision in person (e.g., by correspondence) or student is doing all or most of the course work off campus.

HIS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

HIS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

HIS 200 - Methods and Theories of History (5)

An overview of theories, methods, and philosophies concerning the nature and production of history. Topics vary with instructor.

Prerequisite: Enrollment is restricted to graduate history students and others by permission of instructor.

HIS 200B - Introduction to Research Methods in History (5)

This team-taught seminar introduces graduate students to the "how" of historical research. Designed to offer concrete, practical skills toward accomplishing an intensive research project, this course covers topic development, efficient reading strategies, research methods, and interpretive approaches. The seminar features professors from the Department of History, who expose students to the "hidden curriculum" of research-intensive scholarly work. Students also train in habits of note-taking, research planning, and inclusive discussion as well as facilitation techniques.

Prerequisite: Enrollment is restricted to graduate students.

HIS 201 - Directed Research Colloquium (5)

Having already prepared a bibliography and research prospectus in a graduate research seminar, students will undertake further research on their projects, write a 25–30 page research paper, and present their work to their fellow students.

Prerequisite: Prerequisite(s): history graduate research seminar. Enrollment is restricted to graduate history students.

HIS 202 - Practicing World History (5)

Because world history surfaces in curriculums at all educational levels, this seminar interrogates its value. Why do historians advocate world (and transnational) history? How do historians actually practice it? What are the pitfalls? Can global perspectives apply to localized subjects?

Prerequisite: Enrollment is restricted to graduate students.

HIS 203 - Global Decolonization (5)

Focuses on the histories and theories of decolonization in the mid-to-late 20th century, particularly, interactions among anticolonial movements, how Cold War era antagonisms inflected the process of decolonization, and efforts to forge Afro-Asian unity and/or a nonalignment movement.

Prerequisite: Enrollment is restricted to graduate students.

HIS 203A - Global History of War and Revolution, 1912-1929 (5)

Provides graduate students with an introduction to the key interpretations and controversies in the global history of the 1900-1930 period, one marked by a world war, a reconfiguration of empires and the emergence of anti-colonial nationalisms, an accelerated pace of social change in many places in the world, and several revolutions and popular uprisings with significant global impact.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204A - History of Gender Research Seminar (5)

Introduction to theories and methods employed in gendered historical research. Readings are drawn from a range of chronological, national, and thematic fields and explore the intersection of gender analysis with such historical problems as the body and sexuality, modernity, national identity, and production/consumption.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204B - Approaches to Social and Cultural History (5)

Graduate reading course focusing on both classic and contemporary approaches to social and cultural history. Readings include: Bakhtin, Benjamin, Foucault, Auerbach, and Berlin, and a variety of more recent studies in social, cultural, and intellectual history. Course not limited to graduate students in History.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204C - Colonialism, Nationalism and Race Research Seminar (5)

Research seminar introducing theories and methods of the comparative histories of race, ethnicity, colonialism, and nationalism.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204E - Transnationalism, Borderlands, and History (5)

Graduate seminar exploring the history of Canada-United States-Mexico borderlands. Approaches and arguments compare nation-state centered histories with narratives that construct the North American borderlands as places wrought from a multiplicity of overlapping indigenous, imperial, national, transnational, and global forces.

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

HIS 205 - Diaspora and World History (5)

Examines the histories and historiography concerning diaspora. This area of study includes populations from Asia, Africa, Europe, and the Americas. Students study the histories of diasporic populations, and the questions, theory, and methods that scholars use to approach the subject.

Prerequisite: Enrollment is restricted to graduate students.

HIS 206 - Empire in World History (5)

Introduces the study of empire (as opposed to nations, regions, or continents) as an approach to world history and to recent historiographical trends in the history of empires.

Prerequisite: Enrollment is restricted to graduate students.

HIS 208 - An Introduction to Digital Humanities (5)

Critically examines how digital processes are changing scholarly practice and pedagogy in the humanities. Students experiment with how digital media can impact research and communication for textual scholars, museum professionals, archivists, librarians, public historians and educators.

Prerequisite: Enrollment is restricted to graduate students. Crosslisted as: Enrollment is restricted to graduate students.

HIS 209A - Diaspora as Method (5)

Explores diaspora as a category of experience, imagination, and analysis. Tracks the field's interdisciplinary influences and how it has generated a new vocabulary and new tools to uncover fixed and bounded ideas of time, place, and actors in many inquiries. Course aims to rearrange geographies, chronologies, and agencies by avoiding simplistic narratives about globalization and the end of the nation-state by facilitating transnational, cross-regional, long-historical, intercultural, or intersectional approaches to discover new interpretative possibilities.

Prerequisite: Enrollment is restricted to graduate students.

HIS 210A - Readings in U.S. History (5)

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: colonial and early national periods.

Prerequisite: Enrollment is restricted to graduate students.

HIS 210B - Readings in U.S. History (5)

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both

chronological eras and topical subjects, often in a comparative context: 19th century.

Prerequisite: Enrollment is restricted to graduate students.

HIS 211A - Research Seminar in Early American History (5)

First quarter of a two-quarter introduction to research in early American history (1550-1820). Readings include both historiographically definitive texts as well as recent scholarship reflecting the field's developments. Students complete analyses of historical sources, brief critical essays, and a significant research project. HIS 211A is not a prerequisite to HIS 211B.

Prerequisite: Enrollment is restricted to graduate students.

HIS 211B - Research Seminar in Early American History (5)

Second quarter of a two-quarter introduction to research in early American history (1550-1820). Readings include both historiographically definitive texts as well as recent scholarship reflecting the field's developments. Students complete analyses of historical sources, brief critical essays, and a significant research project. HIS 211A is not a prerequisite to HIS 211B.

Prerequisite: Enrollment is restricted to graduate students.

HIS 212A - Citizenship in U.S. History (5)

A reading-intensive graduate seminar in United States history that examines citizenship and its exclusions, grounded in race, gender, sexuality, age, and disability. This seminar also explores how forms of belonging intersected with evolving understandings of nationalism and sovereignty.

Prerequisite: Enrollment is restricted to graduate students.

HIS 212B - Citizenship in United States History (5)

A reading-intensive graduate seminar in United States history examining citizenship and its exclusions, grounded in race, gender, sexuality, age, and disability. The course also explores how forms of belonging intersected with evolving understandings of nationalism and sovereignty.

Prerequisite: Enrollment is restricted to history graduate students.

HIS 214 - California History (5)

Concerns the history and historiography of California from indigenous dominion to the present. Considers the distinctive ways in which California has led the nation and globe in economic, political, and social change, while remaining a multiethnic borderland.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215A - Topics in American History: U.S. Labor and Working Class History (5)

Addresses topics in history of working people, the labor movement broadly defined, and political-economic change in the U.S. Topics include race, ethnic and gender dynamics, and U.S. labor and working-class history in global context.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215B - Visions of Progress (5)

Explores the emergence of the welfare/regulatory state in the United States from the 1870s to World War I, examining different schools of historical thought about this period.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215C - U.S. Immigration and Ethnic History (5)

Introduces key issues and debates in United States immigration and ethnic history. Topics include causes of immigration; constructions of race, gender and ethnicity; assimilation; transnationalism; and forces shaping immigration policy.

Prerequisite: Enrollment is restricted to graduate students.

HIS 216 - Readings in the History of American Religions (5)

Research in the history of religions in the United States. Addresses topics, such as the rise of evangelicalism; class, race, and religious diversity; gender and power; modernity; and civil religion through analyses of visual and literary texts, iconography, ritual, theology, and praxis.

Prerequisite: Enrollment is restricted to graduate students.

HIS 217 - Critical Conversations in Native American History (5)

Overview of key historical texts focusing on the Native American experience, with particular focus on scholarship that seeks to decolonize Western methodologies and research practices. Readings explore such topics as decolonization, indigenous identity, sovereignty, repatriation efforts, gender and sexuality, and historical memory. The format consists of discussions of readings. Students give oral presentations on the readings, and write book reviews and a final historiographical paper.

Prerequisite: Enrollment is restricted to graduate students.

HIS 220 - The Atlantic World, 1500-1800 (5)

Explores the economic, social, and cultural history of early America in terms of its Atlantic connections and intersection with the cultures of early modern Europe, Africa, and Latin America. Builds upon previous work in early America and early modern Europe, challenging students both to work comparatively and to break out of traditional geographic models.

Prerequisite: Enrollment is restricted to graduate students.

HIS 221 - Empires and New Nations in the Americas (5)

Compares the history of the colonial and 19th-century Americans through a world-history perspective. Focuses on the interrelated themes of indigenous histories, slavery and other forms of servitude, commodity production, and the meaning of equality and freedom in new nations.

Prerequisite: Enrollment is restricted to graduate students.

HIS 222 - Global Sexualities--A Seminar in the Queering of Historiographies (5)

Explores the history of sexuality covering diverse time periods, peoples, and regions. Examines methods and theories used in the study of sexuality. Readings draw from the Americas, Middle East, Africa, Europe, and Austro-Asia, as well as topics in queer and LGBTQ2 studies.

Prerequisite: Enrollment is restricted to graduate students.

HIS 225 - Spanish Colonialism (5)

Reading-intensive graduate seminar with emphasis on theoretical and historiographical questions regarding the field of Spanish colonialism in the Americas. Students encouraged to engage in discussions of comparative colonialisms.

Prerequisite: Enrollment is restricted to graduate students.

HIS 227 - Gender and Colonialism (5)

Explores the relationship between colonialism and gender. Examines the construction of gender categories (in conjunction with race) in the context of colonial conquest and rule; contested definitions of motherhood, domesticity, and citizenship; and regulation of sexuality.

Prerequisite: Enrollment is restricted to graduate students.

HIS 229 - Worlds of Labor in Asia (5)

Introduces students to important debates in labor studies in Asia. Studies the relationship between labor, capitalism, and imperialism. Also interrogates the

relevance or irrelevance of Asia as a concept from the standpoint of labor.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230A - Readings in Late Imperial China (5)

Survey of the major works on and historiographical controversies about Qing Dynasty (1644–1911) China.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230B - Engendering China (5)

Reading seminar on the history of Chinese gender, focusing on the Qing dynasty (1644 to 1911) to the present. Topics include marriage and family, sexuality, work, the gendered language of politics, and major reform movements.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230C - Readings in 20th-Century China (5)

A survey of major Western-language works and historiographical controversies in Chinese history from 1900 to the present. Weekly readings emphasize particular social and political movements as well as long-term changes in urban and rural society.

Prerequisite: Enrollment is restricted to graduate students.

HIS 231 - Historicizing the People's Republic of China (5)

An overview of the scholarly literature on the People's Republic of China. Readings include works by historians as well as by social scientists. Students consider what kinds of questions historians have and can ask.

Prerequisite: Enrollment is restricted to graduate students.

HIS 238A - Research Methods: China (5)

An introduction for graduate students to the use of major research tools and sources in Chinese history since 1600, with a focus on 20th-century materials. Students complete a series of bibliographical exercises and prepare a research prospectus.

Prerequisite: Enrollment is restricted to graduate students.

HIS 238B - Research Methods: China (5)

Building on the research and bibliographic skills developed in course 228A, students develop a research topic and write a paper of 20-30 pages using primary sources as appropriate in English, Chinese, and/or Japanese.

Prerequisite: Enrollment is restricted to graduate students.

HIS 242 - Readings in Modern Japan (5)

A graduate course intended to give students a fundamental understanding of the major themes in the study of modern Japanese history. Central themes include modernity and modernization, colonialism, postwar recovery, gender, race, and nationalism.

Prerequisite: Enrollment is restricted to graduate students.

HIS 243 - Transnational Japan (5)

Examines how Japanese history has been forged across, outside, and beyond the boundaries of the modern nation-state of Japan. Considers how Japan has transformed the world. Students debate how the world made Japan and how Japan re-made the world.

Prerequisite: Enrollment is restricted to graduate students.

HIS 244 - Gender and Japanese History (5)

Examines—through primary and secondary sources—constructions of gender (masculine, feminine, and transgender) in Japanese society over the past several centuries, focusing on the modern era.

Prerequisite: Enrollment is restricted to graduate students.

HIS 251A - Readings in Modern European History: Environment and Technology (5)

Introduces major themes and problems in recent historiographical trends in environmental history and the history of technology. Examines the role of environment and technology in the making of Europe and European societies' engagement with the world.

Prerequisite: Enrollment is restricted to graduate students.

HIS 251B - Readings in Modern European History: Empire (5)

The history of empire has emerged as one of the most influential and fastest growing areas of inquiry within the field of modern European history. This course introduces students to recent debates and trends in imperial, colonial, and postcolonial history.

Prerequisite: Enrollment is restricted to graduate students.

HIS 252 - Republicanism and Its Discontents: Universal Projects and Particular Discriminations (5)

Focuses on the histories and theories of republicanism and liberalism by investigating the tension between universal ideologies and discriminatory practices. Focuses on France and the United States, but Algeria, Syria, and Turkey will also be covered.

Prerequisite: Enrollment is restricted to graduate students.

HIS 255 - Religion and Modernity (5)

Examines the significance of religion and secularism in the modern period. How did modernity and the concept of the secular transform various religions and how, in turn, did these religions help to create modernity.

Prerequisite: Enrollment is restricted to graduate students.

HIS 257 - Shtetl: Eastern European Jewish Life (5)

For several centuries, the shtetl functioned as the center of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and HIS 196M.

Prerequisite: Enrollment is restricted to graduate students.

HIS 260 - History and the Spatial Turn: Making Space, Place, and Geography in History (5)

Explores the making of space, place, and geography in a body of recent historical work. Explores key theoretical work interrogating the significance of space as a critical element of social theory and historical consideration. Proceeds through three thematic units: questions of colonial economy in South Asia; spaces of empires and its end in the Eastern Mediterranean; and histories of infrastructure.

Prerequisite: Enrollment is restricted to graduate students.

HIS 261 - The Contours of the New Middle East History (5)

Explores the history and historiography of the modern Middle East through recent historical scholarship. Examines the new theoretical approaches that frame inquiries into the region's history and how contemporary historians are reinterpreting familiar questions and themes.

Prerequisite: Enrollment is restricted to graduate students.

HIS 263 - Histories of Science and Medicine in the Global South (5)

Focuses on the histories of science and medicine in the Global South. While these fields have historically been dominated by scholarship focusing on Europe and North America, in recent years, work produced by scholars of the Global South has begun to reshape these fields. This seminar critically considers the body of historical scholarship with an eye toward the following questions: Are there common themes that define this body of historiography? What do works that fall within

this genre have to teach us about other bodies of cultural, political and economic historical work? How is it productive to think with the Global South as a category of analysis?

Prerequisite: Enrollment is restricted to graduate students.

HIS 265 - History of the Body (5)

A multidisciplinary history of the body from late antiquity to the present. Topics include: medical and religious constructions; the raced, gendered, and sexualized body; adornment and performance markers; power and control through the body; body parts; and the body's permeability.

Prerequisite: Enrollment is restricted to graduate students.

HIS 280A - History Graduate Proseminar: Teaching Pedagogy (2)

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include TAs' ships, designing course syllabi, pedagogy, teaching technologies, and teaching in different venues.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students.

HIS 280B - History Graduate Proseminar: Research Presentations and Grant Writing (2)

Devoted to professionalism and socialization of history graduate students. Topics include discussion of researching grants; effective CV writing; successful grant applications and publication proposals; and conference paper and panel proposals. Required for first-year graduate students; however, open to all history graduate students as needed.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students.

HIS 280C - History Graduate Proseminar: Job Market (2)

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include researching position; preparing a CV and the job-application letter; preparing for an interview; practice interview; preparing a job talk and/or teaching presentation; and practice job talk.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students.

HIS 283 - Foreign Language Preparation (2)

Independent study course in which history graduate student reads selected texts to fulfill foreign language requirement. Student meets with instructor to discuss readings, deepening his knowledge of the foreign language. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 284 - Qualifying Examination Preparation (2)

Independent study course designed to help students prepare for qualifying exams. Students meet on regular basis with one or more members of qualifying examination committee to monitor preparation for exam. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 285 - Readings in Research Field (2)

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings and deepen their knowledge of a particular author or historical theory. Students submit petition to sponsoring agency.

Prerequisite: Enrollment restricted to graduate students.

HIS 285B - Readings in Research Field (5)

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings. Students submit petition to sponsoring agency.

HIS 286 - Research Colloquium on Colonialism, Nationalism, and Race (2)

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of a particular cluster to discuss most important readings in the field. Enrollment restricted to graduate students.

Prerequisite: Enrollment is restricted to graduate students.

HIS 287 - Research Colloquium on Gender (2)

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of this cluster to discuss most important readings in their field. Enrollment restricted to graduate students.

Prerequisite: Enrollment is restricted to graduate students.

HIS 288 - Teaching Assistant Preparation (2)

Independent study designed to help history graduate students prepare to teach in an area of history outside their specialization. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 289 - History Colloquium (2)

Independent study designed to foster departmental and cross-disciplinary participation in campus talks, colloquia, conferences, and events. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 294M - Literati, Samurai, and Yangban: A Comparative History of State (5)

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and HIS 194M.

Prerequisite: Enrollment is restricted to graduate students.

HIS 297A - Independent Study (5)

Students submit petition to sponsoring agency.

HIS 297B - Independent Study (10)

Students submit petition to sponsoring agency.

HIS 297C - Independent Study (15)

Students submit petition to sponsoring agency.

HIS 298A - Constructing a Field (5)

Required course for all first-year graduate students in the History Department. Course helps students situate themselves within the field of history by developing a research agenda in relation to the historiography on their geographical and thematic areas of interest, prepares students to embark on research during the summer after the first year, and equips them with a tentative reading list to guide their preparation for the Qualifying Exam. Course content varies according to the interests and needs of students. Students complete the course with a primary or secondary adviser.

Prerequisite: Enrollment is restricted to history graduate students.

HIS 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

HIS 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

HIS 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

HCI-HUMAN COMPUTER**INTERACTION****Graduate****HCI 200 - Introduction to HCI (5)**

Introduction to the core premises of human-computer interaction (HCI), including major phases in the evolution of HCI. Issues covered include the origins of HCI and its transformation alongside the spread of computing technologies into the fabric of everyday life.

Prerequisite: Enrollment is restricted to human computer interaction graduate students.

HCI 201 - Introduction to Design Methods in HCI (5)

Introduction to design methods in human-computer interaction (HCI). Students gain mastery of ideation, sketching, prototyping, and other current methods used in HCI design practice.

Prerequisite: Enrollment is restricted to human computer interaction graduate students.

HCI 202A - Introduction to HCI Build: Bootcamp (5)

Introductory build course that includes an introduction to hardware prototyping, introduction to programming, and introduction to soft electronics. Provides students with hardware/software skills that enable them to rapidly prototype interface concepts that include both physical and digital elements.

Prerequisite: Enrollment is restricted to graduate students.

HCI 202B - Introduction to Build: Advanced (5)

Advanced course on build methods in HCI. Includes hardware prototyping, advanced programming, and development of soft electronics systems. Provides students with existing technical competency the opportunity to produce robust physical-digital prototype systems.

Prerequisite: Enrollment is restricted to human computer interaction graduate students.

HCI 203 - Introduction to Research (5)

Introduction to research and analysis methods in human-computer interaction (HCI). Introduces theoretical perspectives on HCI arising from cognitive science, sociology, and distributed cognition. Explores the key methods to apply and test these theories including: designing and conducting studies, statistics, analysis, heuristic evaluation, ethnography, interviews, surveys, field studies, and other established methods used by HCI practitioners.

Prerequisite: Enrollment is restricted to human computer interaction graduate students.

HCI 220 - Ethics and Activism in Tech and Design (5)

Examines tech ethics/activism in design. Students discuss biases within tech at large and reflect on their values and biases in designing technology through coursework. Students learn the possibilities of political action as UX/HCI practitioners.

Prerequisite: Prerequisite(s): HCI 200 and HCI 201; or by permission of instructor. Enrollment is restricted to human computer interaction graduate students.

HCI 250 - Participatory Design (5)

Introduces theoretical and practical knowledge on participatory design of digital technologies and related services. Applies participatory design methods and techniques in designing digital solutions and applications. Enables students to learn how to plan and manage a participatory design process, understanding their stakeholders and designing tools to engage them in the design process. Allows students to conduct various studies with their participants and engage in qualitative analysis of the results.

Prerequisite: Enrollment is restricted to graduate students in games and playable media, serious games, human computer interaction, and computational media programs, or by permission of the instructor.

HCI 271 - HCI Capstone 1 (5)

Teaches students how to form project teams, brainstorm, and iterate ideas for the capstone projects, culminating in approved briefs and project teams, including an approved committee of advisers for each project. Advisers may be local industry people (including industry partners who have proposed projects), or may also be UCSC faculty from the main campus.

Prerequisite: Prerequisite(s): HCI 200, HCI 201, and either HCI 202A or HCI 202B. Enrollment is restricted to human computer interaction graduate students.

HCI 272 - HCI Capstone 2 (10)

The goal of this course is for students in the Professional Master's Degree in Human-Computer Interaction to produce successful capstone projects. The course is organized around iterative feedback from peers and project advisers (both academic and professional), and includes extensive workshoping, critique, and testing. The course culminates in an end-of-quarter showcase of student work, with all project advisers and project sponsors invited. Also includes professional development. (Formerly Capstone 2.)

Prerequisite: Prerequisite(s): HCI 271. Enrollment is restricted to human computer interaction graduate students.

HCI 290 - HCI Seminar (2)

Weekly speakers on human-computer interaction topics. Course can be taken for Satisfactory/Unsatisfactory credit only.

Prerequisite: Enrollment is restricted to graduate students.

ITAL - ITALIAN**Lower-Division****ITAL 1 - First-Year Italian (5)**

During the first quarter of this first-year sequence, students learn to introduce themselves, to talk about their daily activities and hobbies, to describe themselves and their friends/families, and to recount past events. The first-year sequence (1-2-3) begins in fall quarter.

ITAL 1A - Accelerated Italian (5)

The first quarter of accelerated instruction in elementary Italian language. The accelerated pace allows a rapid mastery of grammar and vocabulary, giving students a basic knowledge of Italian in only two quarters. Completion of the sequence is equivalent to the completion of the 1-2-3 sequence. This sequence starts once a year in the winter quarter.

ITAL 1B - Accelerated Italian (5)

The second quarter of accelerated instruction in elementary Italian language. The accelerated pace allows a rapid mastery of grammar and vocabulary, giving students a basic knowledge of Italian in only two quarters. Completion of the sequence is equivalent to the completion of the 1-2-3 sequence.

Prerequisite: Prerequisite(s): ITAL 1A or ITAL 2 or placement by examination. For students completing ITAL 2, ITAL 3 is preferable.

ITAL 2 - First-Year Italian (5)

During the second quarter of this first-year sequence, students learn to tell a story in the past, to make plans about their future, and to express commands and requests. The sequence starts once a year in the fall quarter.

Prerequisite: Prerequisite(s): ITAL 1 or placement by examination.

ITAL 3 - First-Year Italian (5)

During the third quarter of this first-year sequence, students learn to talk about historical events, to formulate hypothetical scenarios, to express wishes, desires, doubts, and opinions, and to discuss more abstract topics (e.g., immigration, work, politics).

Prerequisite: Prerequisite(s): ITAL 2 or placement by examination.

ITAL 4 - Second-Year Italian (5)

Short stories, articles, films, and newsclips are used as the basis for studying intermediate-level conversation and composition. Laboratory assignments involve use of the World Wide Web, conversations with native speakers, films and video clips. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 1B or ITAL 3 or placement by examination.

ITAL 5 - Second-Year Italian (5)

Reading of Italian short stories and a play are used as basis for further study and refinement of oral and written skills at the intermediate level. Particular emphasis is placed on oral/written discussion of abstract ideas and topics, and on the study of different language registers/contexts. Laboratory work is regularly assigned. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 4 or placement by examination.

ITAL 6 - Second-Year Italian (5)

Reading of first novel in the language and weekly viewing of Italian films serve as basis for oral reports and discussions on various aspects of Italian culture and civilization. Weekly assignments, three essays, and a paper on topics derived from or related to the text. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 5 or placement by examination.

ITAL 80 - Italian Culture Through Cinema (5)

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. Students cannot receive credit for this course and Italian 106.

ITAL 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ITAL 99 - Tutorial (5)

Students submit petition to sponsoring agency.

ITAL 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division**ITAL 100 - Advanced Italian Composition and Conversation (5)**

Provides intensive practice in oral and written Italian. Focuses on vocabulary building and increased oral and written expression. Active student participation is essential and constitutes a significant portion of the course including class discussions, oral presentations, written reports, responses and essays, using different genres of writing, including, but not limited to diaries, epistles (formal and informal), blogs, text messaging, dialogues, short stories, memoirs, interviews, podcasts, and media language.

Prerequisite: Prerequisite(s): ITAL 6 or by permission of the instructor.

ITAL 101 - Italian Culture through Food (5)

Explores how the evolution of the Italian culinary tradition and the variety of eating habits reflect the historical and economical changes that took place in Italian society over the most recent centuries. Course is taught in English.

ITAL 106 - Italian Culture Through Film (5)

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Students focus on pivotal issues in Italian culture, society, history, and politics, and develop an informed opinion on relevant issues in Italian studies. The course is taught in English with a mandatory enhancement section in Italian. The enhancement section meets once a week and is designed to give students who are already familiar with the language the opportunity to discuss the films in Italian and to read/view additional material in the language. Students cannot receive credit for this course and ITAL 80.

Prerequisite: Prerequisite(s): ITAL 6.

ITAL 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ITAL 199 - Tutorial (5)

Students submit petition to sponsoring agency.

ITAL 199F - Tutorial (2)

Students submit petition to sponsoring agency.

JAPN - JAPANESE

Lower-Division

JAPN 1 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write Japanese scripts (hiragana, katakana, and about 40 kanji).

JAPN 2 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji.

Prerequisite: Prerequisite(s): JAPN 1 or by consent of instructor.

JAPN 3 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji.

Prerequisite: Prerequisite(s): JAPN 2 or by consent of instructor.

JAPN 4 - Second-Year Japanese (5)

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji.

Prerequisite: Prerequisite(s): JAPN 3 or by consent of instructor.

JAPN 5 - Second-Year Japanese (5)

Students develop intermediate-level competence in listening, speaking, reading, and writing in diverse social contexts; acquire a deeper and broader understanding of Japanese society and culture; and learn how to read and write 70 additional kanji characters.

Prerequisite: Prerequisite(s): JAPN 4 or by consent of instructor.

JAPN 6 - Second-Year Japanese (5)

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis is placed on developing the student's cultural knowledge relevant to inter-cultural communication.

Prerequisite: Prerequisite(s): JAPN 5 or by consent of instructor.

JAPN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

JAPN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

JAPN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

JAPN 103 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication.

Prerequisite: Prerequisite(s): JAPN 6 or by consent of instructor.

JAPN 104 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication.

Prerequisite: Prerequisite(s): JAPN 103 or by consent of instructor.

JAPN 105 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Further development of cultural knowledge and understanding through critical examination of authentic Japanese materials in a variety of genres, including literary work, expository writing, and films. May be repeated for credit with consent of instructor.

Prerequisite: Prerequisite(s): JAPN 104 or by consent of instructor.

JAPN 106 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and writing. Emphasis is placed on increasing the student's in-depth cultural knowledge about Japan and knowledge relevant to intercultural communication as well as developing the student's ability to critically read a variety of texts.

Prerequisite: Prerequisite(s): JAPN 104 or by permission of instructor.

JAPN 109 - Japanese Language, Culture, and Society (5)

Critical reading of Japanese texts, such as essays, film scripts, and novels in regard to linguistic diversity related to cultural and social diversity. Topics include standard Japanese and regional variation, politeness and

honorifics, age-related stylistic variation, and gendered language.

Prerequisite: Prerequisite(s): JAPN 104 or by consent of instructor.

JAPN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

JAPN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

JAPN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

JRLC-JOHN R LEWIS COLLEGE

Lower-Division

JRLC 1 - Academic Literacy and Ethos: Social Justice and Community (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Reflects our college theme of Social Justice and Community, addressing topics such as identity formation, inequality, and environmental injustice.

Prerequisite: Enrollment is restricted to first-year college members.

JRLC 1A - Introduction to University Life and Learning (1)

Orientation to and exploration of the nature of the liberal arts, and of learning at research universities. Topics include: academic planning for upper-division coursework; enrollment processes; and understanding pathways to degree completion; UCSC resources that support health and well-being strategies for academic success; the cultivation of just communities; the prevention of sexual harassment and violence; campus conduct policies; awareness of risks associated with drug and/or alcohol use; and an introduction to traditions of community-engaged learning, ground-breaking research, and interdisciplinary thinking that define a UC Santa Cruz degree. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year College Ten students.

JRLC 30 - (H)ACER Undergraduate Community Internship (2)

Student Internship through the Apprenticeship in Community Engaged Research (H)ACER Program at

College Nine and John R. Lewis College. The (H)ACER Program joins community engagement with critical reflexive components of qualitative research to support transformative learning and strengthen community-university partnerships. Students will be placed at a variety of internships and work with our community partners such as Calabasas Elementary School classroom teachers, Calabasas Elementary School After School Program, Calabasas Community Garden, and Watsonville High School classroom teachers. Students also may propose internships if they already have strong ties with a community partner and receive approval from the (H)ACER Director. Requires students to read selected readings on critical service learning, community learning, qualitative research methods and a variety of texts relevant to the history, context and activities at the sites where they will intern. Internships will take place primarily in Watsonville. Enrollment by permission of the instructor.

JRLC 35 - Knowledge For Justice (5)

Introduction to the (H)ACER program at John R. Lewis College. (H)ACER trains students in participatory research methodologies and creates opportunities for students to work in real world contexts addressing issues such as social, economic, educational, and environmental injustice. Students gain a foundation in understanding the context of the research university and developing critical research methods for working with communities. Students grapple with questions of how to conduct research in an ethical way and to build relationships that both recognize and are not foreclosed by histories of violence, with particular attention to race, class, gender, and nationality.

JRLC 60 - Understanding Sustainability: Researching Environmental Justice at UCSC (5)

Through readings, discussions, and primary research on campus, course explores the following questions: What is sustainability at UCSC and what assumptions about the relationships between humans and nature are privileged in these definitions? (Formerly, I Couldn't Imagine Myself Anywhere Else: Understanding UCSC Undergraduate Narratives.)

Prerequisite: Enrollment is restricted to College Scholars students.

JRLC 85 - Social Justice Issues Workshop (2)

Series of presentations, films, and workshops that address personal and cultural identity and examine social, cultural, political, environmental, and other justice concerns.

Prerequisite: Enrollment is restricted to John R. Lewis College members during priority enrollment only.

JRLC 86 - College Leadership Development (2)

Students newly appointed into leadership positions at John R. Lewis College explore the concept of leadership relating to the college's theme of Social

Justice and Community. Prerequisite(s): current John R. Lewis College student leader; permission of instructor.

JRLC 92 - Social Justice Issues Colloquium (1)

Weekly colloquium on social justice issues with a different topical focus each quarter. Presentations by UCSC faculty and invited speakers. Students must attend class, read an assigned article or book chapter(s) on the week's topic, and write a one-page synopsis.

JRLC 95 - Social Justice and Nonviolent Communication (Rumi's Field) (2)

Nonviolent Communication provides tools for the work needed to bring our reality closer to the ideal of a world with dignity and equity for all its members. Explores righteous anger, grief, empathy, diplomacy, and making requests others want to say "yes" to. The course nickname is "Rumi's Field," which comes from a Rumi poem: "out beyond ideas of wrongdoing and rightdoing/there is a field/I'll meet you there." Formerly Social Justice and Nonviolent Communication (Rumi's Field Living-Learning Community).

JRLC 98 - Alternative Spring Break (2)

Provides students with the opportunity to conduct service-learning work in a local Santa Cruz community over spring break. There are four preliminary class meetings in the winter quarter. Winter meeting attendance is required. Enrollment is by interview only. Enrollment is restricted to College Nine and John R. Lewis College members.

Upper-Division

JRLC 105 - The Making and Influencing of Environmental Policy (5)

Explores how environmental policy is made and influenced. Students learn about key contemporary environmental issues and the forces at play in determining environmental policy outcomes. Focuses on skills that enable citizens to impact environmental policy.

Prerequisite: Enrollment is restricted to sophomore, junior, and seniors.

JRLC 106 - Expressive Arts for Social Justice (2)

Students explore their own creative output in order to inspire community dialogue around social justice issues. Open to those who identify as artists as well as those who do not. Interested students must attend an information session and commit to expectations. Preference is given to College Nine and John R. Lewis College members.

JRLC 115 - Research Methods for Social Justice (2)

Fosters a deeper intellectual engagement with the theme of John R. Lewis College through the design and implementation of community-based research projects developed in close consultation with community

partners. Students gain methodological, teamwork, and critical-thinking skills while furthering social justice. Prerequisite(s): CLNI 85, or JRLC 85, or equivalent. Enrollment is restricted to College Nine and John R. Lewis College members and by permission of instructor.

JRLC 120 - Practical Activism Conference Planning and Development (2)

Offers an applied experience of collaborative planning, production, and leadership. Students plan workshops and other event components; conduct outreach and publicity; and address all aspects of educational event planning. Enrollment is restricted to members of the spring volunteer Practical Activism planning group. Enrollment is by permission of the instructor.

JRLC 125A - Transcommunal Peace Making (2)

Explores the theoretical tenets and applications of Transcommunality, an outgrowth of the principles of Kingian non-violence, which works toward peace, tolerance, and mutual respect across difference and diversity. UCSC students connect with the Cemanahuac Cultural group, a multi-ethnic and multi-racial gathering of incarcerated men who are warriors for peace within and outside the prison community. Three meetings will be held at the Correctional Training Facility (CTF) in Soledad, California. Enrollment is restricted to junior and senior John R. Lewis College members and by interview.

JRLC 125B - Transcommunal Peace Making (2)

Explores the principles of community, guided by established texts, for inmates at the Correctional Training Facility (CTF) in Soledad, California. Covers the theoretical tenets and applications of Transcommunality, an outgrowth of the principles of Kingian non-violence. Three joint meetings will be held with UCSC students enrolled in the parallel JRLC 125A. Enrollment by permission of instructor.

JRLC 135 - Apprenticeship in Community Engaged Research (5)

Course takes a holistic approach in familiarizing students about how to effectively and ethically conduct community engaged research, from contextualized understandings of power and knowledge to hands-on training in various methodologies through a class project. The topical focus of the course varies (e.g., sustainability, water justice, educational equity etc.).

JRLC 136 - Methodologies of Critical Praxis (5)

Considers an ethic of engaging with communities that honors existing knowledges and integrates them into community-engaged action plans and research strategies. Explores a list of questions critical scholars must consider when building socially just community partnerships. Interrogates notions of help and volunteerism and explores theories and practices of popular education as a praxis engagement. Includes

practice interviews, oral histories, field notes, and other research methods. Interacts with community partners through forums, blogs, and other multimedia.

Prerequisite: Prerequisite(s): JRLC 135 or an equivalent course.

JRLC 191 - Teaching Social Justice (5)

Undergraduates at upper-division level participate in teaching discussion groups for JRLC 85 (W).

Prerequisite(s): permission of instructor: essay describing interest in becoming course assistant, copies of evaluations, and letter of recommendation from faculty member and/or college staff member.

Enrollment is restricted to John R. Lewis College juniors and seniors.

JRLC 194 - Group Tutorial (5)

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s): JRLC 91 or JRLC 105 recommended. Students submit petition to sponsoring agency.

JRLC 194F - Group Tutorial (2)

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s): JRLC 91 or JRLC 105 recommended. Students submit petition to sponsoring agency.

JRLC 199 - Tutorial (5)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division John R. Lewis College members.

JRLC 199F - Tutorial (2)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division John R. Lewis College members.

JWST - JEWISH STUDIES

Lower-Division

JWST 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

JWST 185N - The Holocaust in a Digital World (5)

Explores how digital tools change the way we know about the Holocaust by (1) critically understanding and

analyzing digital representations of the Holocaust and (2) using and developing digital skills to engage with stories about the Holocaust.

Prerequisite: Enrollment is restricted to Jewish studies and history majors and minors during first-pass enrollment; open to all students at the start of second-pass enrollment.

JWST 195A - Thesis Research (5)

Devoted to independent research under the guidance of a primary thesis adviser. Students are expected to meet with their thesis adviser every two weeks to report on research progress and receive advice and criticism.

Enrollment restricted to junior and senior Jewish studies majors. Students submit petition to sponsoring agency.

JWST 195B - Thesis Writing (5)

Devoted to independent writing under the guidance of the primary and secondary thesis faculty advisers. Completed theses must be a minimum of 40 pages in length. Student are required to meet regular with their faculty advisers and to submit at least two drafts for detailed criticism. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to junior and senior Jewish studies majors.

JWST 199 - Tutorial (5)

Students submit petition to sponsoring agency.

JWST 199F - Tutorial (2)

Students submit petition to sponsoring agency.

KRSG - KRESGE COLLEGE

Lower-Division

KRSG 1 - Academic Literacy and Ethos: Power and Representation (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Texts in varied media reflect individuals' and communities' struggles to represent, constitute, and empower themselves in the United States.

Prerequisite: Enrollment is restricted to first-year college members.

KRSG 1A - Introduction to University Life and Learning (1)

KRSG 1A explores opportunities, expectations, and responsibilities in university life. Topics include: academic planning; general education requirements; majors and minors; campus policy; and preparation for Kresge's core course: Power Representation. Students

gain familiarity with resources for health, well-being, time management, academic success, cultivating just communities, sexual harassment and violence prevention, reflection on UCSC's principles of community, and an introduction to the living and learning tradition of KRSK College. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year Kresge College students.

KRSK 1T - Introduction to Research Universities and the Liberal Arts (1)

Orientation to and exploration of principles of liberal arts, and learning at research universities. Topics include: academic planning for upper-division coursework; enrollment processes at UCSC; understanding pathways to degree completion (and the major and general-education coursework required in those pathways). Students also learn about UCSC's principles of community, and engage in preliminary reflection on reading and critical thinking. This course is for entering transfer students. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to transfer students.

KRSK 2 - Power and Representation in Media (3)

Introduction to media representations and their consequences for individuals and communities. Assignments emphasize dialogic and collaborative processes of critical reflection on media materials. Materials in a variety of media address struggles for representation, justice, and agency--especially relative to race, gender, citizenship/documentation, and communities of diaspora--in terms of media frameworks and the dialogues they foment.

KRSK 3 - Campus Natural History Practicum (2)

Develop practical skills and knowledge in naturalist observation. Acquire an overview of the field of natural history, particularly applied to the UCSC campus. Document an evolving and multidimensional personal experience of natural spaces, including, but not limited to, wilderness. (Formerly KRSK 18.)

KRSK 12A - Service Learning (3)

Students find a volunteer position with the instructor's assistance and perform community service in non-profit organizations, schools, unions, or local government agencies. Students meet weekly, keep a journal, and write a social action witnessing report of their experience.

Prerequisite: Enrollment is restricted to college members.

KRSK 12B - Service Learning (2)

Students find a volunteer position with the instructor's assistance and perform community service in non-profit

organizations, schools, unions, or local government agencies. Students meet weekly, keep a journal, and write a social action witnessing report of their experience.

Prerequisite: Enrollment is restricted to college members.

KRSK 12C - Service Learning: Introduction to National Service/Introduction to Grant Writing (3)

A fast-paced and academically rigorous exercise in four main sections. First and foremost, participants must locate and support a community-service site for three hours each week. Each student's service commitment requires the student to attend class regularly and share community-service experience with classmates. Students are introduced to the basic requirements of a variety of national service agencies including AmeriCorp, the Peace Corp, City Year, Teach for America, and City Service. Students are required to do community-service work with a member of one of these agencies locally for four hours during the quarter. The last major section of this course teaches students the basics of grant writing and research.

Prerequisite: Enrollment is restricted to college members.

KRSK 15A - The Writer as Witness (3)

Students are involved in a community service project to produce a portfolio of social-action writing that situates the writer as witness in the community.

Prerequisite: Enrollment is restricted to college members.

KRSK 15B - The Writer as Witness (2)

Students are involved in a community-service project to produce a portfolio of social-action writing that situates the writer as witness in the community.

Prerequisite: Enrollment is restricted to college members.

KRSK 16 - The Rise of Capitalism and Its Consequences (5)

Explores the rise and consequences of capitalism. How has capitalism affected how humans understand and act in the world? How do oppressions along lines of race, gender, sexuality, and nation intersect with capitalism? Is resistance desirable and/or possible?

Prerequisite: Enrollment is restricted to Kresge, Cowell, or Crown honors students.

KRSK 24 - Imagining Utopias (3)

Explores possible futures by studying several utopian visions, projects, and manifestos. Students imagine a future by writing a manifesto and other creative non-fiction pieces that embrace a utopian imagination.

Prerequisite: Enrollment is restricted to college members.

KRSG 25 - Successful Transfer to the Research University (2)

Provides community college transfers, during their first year at UC Santa Cruz, with an understanding of the workings of a research university with emphasis on advanced academic expectations, creating purposeful education and career goals, and navigating opportunities and challenges. Guides refinement of goals, development of an action plan to meet desired academic, career and civic-oriented outcomes, and encourages developing essential and enriching relationships to enrich UC Santa Cruz experience.

Prerequisite: Enrollment is restricted to first-quarter transfer students.

KRSG 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and PRTR 26 or STEV 26.

Prerequisite: Enrollment is restricted to first-year Kresge and Porter College members.

KRSG 45 - Achieving Consensus in Diverse Communities (5)

Defines consensus in terms of inclusive decision-making and explores depth-psychology approaches to facilitating social agreement in culturally diverse settings. Readings include Totem and Taboo, Diversity Calling, and selected articles related to issues of cultural literacy. Recommended for, but not limited to, social science majors.

Prerequisite: Enrollment is restricted to Kresge College and Oakes College affiliates or by permission of the instructor.

KRSG 51 - City on a Hill Press Practicum in Production (2)

Students work collaboratively on City on a Hill Press, the student-run, campus newspaper of record, gaining practice in news production. Students engage in analysis and critical reflection regarding both the form and content of news, and its critical relationship to a healthy democracy. Course outcomes include the development of media literacy, and experience addressing issues such as intent, fairness, accuracy, and impact. Areas of focus include, but are not limited to, graphic design, illustration, photojournalism, visual composition, copy editing, fact-checking, and media literacy. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is

by permission of the instructor in consultation with City on a Hill Press co-editors-in-chief.

KRSG 52 - City on a Hill Press Practicum in Reporting and Editing (5)

Students work collaboratively on City on a Hill Press, the student-run, campus newspaper of record, gaining practice in investigative journalism and news editing. Students engage in analysis and critical reflection regarding both the form and content of news, and its critical relationship to a healthy democracy. Course outcomes include the development of media literacy, and experience addressing issues such as intent, fairness, accuracy, and impact. Areas of focus include, but are not limited to, story production, story assignment and management, and staff editorial composition. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is by permission of the instructor, in consultation with City on a Hill Press co-editors-in-chief.

KRSG 60C - Prison Narratives (3)

Survey of narratives of prison experience, supporting inquiry into the role of prisons in U.S. society. Addresses themes including, but not limited to, prison abolition, re-entry, the school-to-prison pipeline, capital punishment, sentencing of minors, and political prisoners. Emphasis on voices of the imprisoned, and their advocates. Students engage in collaborative projects throughout the class, and learn effective strategies for group work and interpersonal communication.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to college members.

KRSG 60F - Writer's Read (2)

Students attend weekly creative writing readings by fiction writers and poets, read excerpts from the writers' works, participate in question and answer sessions, and write short, creative and/or analytical responses to the readings and writings.

Prerequisite: Enrollment is restricted to Kresge and Porter college members.

KRSG 62 - Transformative Action (5)

Introduces key skills for effective transformation agents including: creativity and innovation; transformative communication; servant leadership; optimism and resilience, risk taking, initiative; luck; failure; and relationship building. Students create their own portfolio and commit to weekly civic engagement projects.

KRSG 62A - Transformative Action (2)

Addresses the most effective methods of social change. Examines principles and strategies of transformative action and case studies of leaders solving world

problems. Empowers students to be innovators in real-life community projects. Integrates nonviolence, psychology, sustainability, and social justice.

KRSG 62B - Transformative Action Seminar (2)

For students who enrolled in the winter quarter Transformative Action course, to further investigate, research, and refine their Big Idea. Opportunity given to deepen and integrate Transformative Action principles into projects. Enrollment by instructor permission only.

KRSG 63 - Kresge Garden Cooperative (2)

Hands-on practice with basic ecological horticulture skills through work at the Kresge Garden, including soil cultivation. Enrollment by instructor approval through application (available in the Kresge College office). Enrollment limited to college members.

KRSG 64 - Tools for World Changers (2)

Develops life skills that support you and help you support others. Implement effective methods for personal productivity (managing your to-dos, calendar, and inbox), interpersonal communication, meeting facilitation, event hosting, collaboration, and regenerative community design.

KRSG 65A - Power and Representation: Food and Community (2)

Explores core themes of power and representation through the mediums of food, nature awareness, community, personal empowerment and sustainable living. Students will develop meaningful final projects in collaboration with Kresge Food Co-op, Kresge Garden Co-op, Kresge World Cafe, and projects of their own design.

KRSG 65F - Kresge Lab: Photography (2)

A course of practical guidance in developing skills and creative approaches in photography; also a group setting for critique and feedback. Students do in-class and out-of-class assignments in photography and development, discuss examples of photographic art in various communities and subgenera, and apply principles to their own work in a final portfolio.

KRSG 65M - Kresge Lab: Text, Music, and Performance (2)

Students pursue collaborative or individual projects in the relationship between text, music, and performance, in pairs or groups. Areas explored include practical introductions to prosody and poetics, musical forms, text-setting, and theories of performance and reception.

KRSG 65W - Kresge Lab: Creative Writing (2)

A course of guidance and exercises to assist in developing independent writing projects, and a group setting for critique and feedback. Students do in-class and out-of-class writing assignments; read and discuss texts; and work to develop a final project.

KRSG 67 - Transformative Justice Seminar (3)

Examines the principles and processes of restorative justice juxtaposed to current practices in the judicial and educational systems of contemporary society. Students study leading restorative justice practices and their implication for individual and community transformation. Students learn to facilitate the restorative justice process restorative circles, and have the opportunity to practice them in real time. Enrollment is by instructor consent and is restricted to frosh, sophomores, and juniors.

KRSG 68 - Transformative Communication (2)

Based on Nonviolent Communication (NVC), this experiential course offers skills in intra- and interpersonal conflict transformation by aligning with core values; understanding what motivates self and others; cultivating compassion, even under difficult circumstances; and bringing greater peace into our world.

KRSG 69 - Practical Application of Restorative Practices (2)

This second seminar supports students in deepening and fine-tuning their Restorative Circle facilitation along with exploring the question What are the components of a restorative life? Students participate in the Kresge College Restorative Justice Initiative, and, during the fall quarter, offer Restorative Circles to student groups in conflict.

Prerequisite: Prerequisite(s): KRSG 67. Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 71 - The World Cafe: The Art of Hosting Conversations That Matter (2)

Examines the principles, practices, and art of hosting conversations derived from the work of Juanita Brown, David Isaacs, and the World Cafe community. Students gain experience with group facilitation, meeting design, strategic questioning, harvesting collective intelligence, graphic recording, intergenerational collaboration, and participatory action-research.

KRSG 72 - Collaborative Learning: Transitioning to Sustainability and Justice (2)

Collaborative learning in service of transitioning from an industrial growth society to a participatory, democratic, and sustainable society. Students engage with ongoing sustainability and justice projects and develop leadership skills in personal productivity, project management, communications, and facilitation. (Formerly Collaborative Learning: The Great Turning.)

KRSG 73 - Collaborative Learning: Sustainable Communities (2)

Collaborative learning in service of building thriving, just, and sustainable communities locally and globally. Students engage with ongoing sustainability and justice projects and develop skills in leadership, personal

productivity, project management, communications, and facilitation.

KRSG 74 - Collaborative Learning: Permaculture Skills (2)

Collaborative learning in service of fostering community resilience in response to environmental and social crisis. Students engage with ongoing sustainability and justice projects and develop advanced skills in leadership, personal productivity, project management, communications, and facilitation.

KRSG 75 - Sustainable Food Systems (5)

Introduces students to fundamental food-system issues and opportunities. Topics include: hunger, environmental sustainability, race and gender, food and agricultural policy, local food systems, gardening and farming models, social movements, and approaches for analysis and change.

KRSG 76 - Social Documentary Photography (5)

History of social documentary photography with its practice. Includes analysis of historical and contemporary images from social documentary work; camera, darkroom, and digital skill development; an individual student documentary project; and collective project discussion.

Prerequisite: Enrollment is restricted to Kresge College members.

KRSG 77 - Food Memoir (2)

Workshop in writing memoir that connects to issues of multiculturalism, gender, and environment. Designed to hone skills in creative writing through stories that students will unify into a larger memoir.

Prerequisite: Enrollment is restricted to Kresge and College Eight members or by permission of instructor.

KRSG 78 - Social and Environmental Justice Activism and the Right Livelihood Award Foundation (2)

Introduces contemporary activism on environmentalism and human rights, emphasizing the work of Laureates of the Right Livelihood Award (known internationally as the Alternative Nobel Prize) and the Right Livelihood College, whose North American campus is Kresge College.

KRSG 85S - Critical Writing Practicum: Subject and System (5)

Writing practicum on the philosophy of social systems and their implications for power. Students investigate social epistemology and ontology—the "how do we know" and "what do we mean" questions—in relation to texts on social systems and their subjects. Questions addressed may concern what systems in society enact "systemic" racism, or other systemic bias; how our knowledge and views of society may privilege some systems and structures over others. Students consider

these concepts and questions as broad starting points for weekly reading responses, and 2-3 longer explorations of analytical texts, with a concentration on research-driven non-fiction writing.

Prerequisite: Enrollment restricted to students in the College Scholars Program.

KRSG 90C - Collaborative Approaches to Research (5)

Critical engagement of current research methodology in the humanities and arts. Coursework consists primarily of a collaborative research project that requires each student to synthesize information and sources in topics both familiar and unfamiliar. The specific methodologies presented vary by instructor across two to three disciplines, possibly including literature, history, the arts, and cultural studies. Enrollment is restricted to first-year Challenge Program participants from Stevenson College, Merrill College, Porter College, and Kresge College.

KRSG 99 - Tutorial (5)

A program of directed study arranged between a first-year or sophomore student and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 99F - Independent Study (2)

A program of directed study arranged between a student and a Kresge faculty member. Class time is less proportional to credit given. Students submit petition to sponsoring agency.

KRSG 99G - Independent Study (3)

A program of directed study arranged between a student and a Kresge faculty member. Students submit petition to sponsoring agency.

Upper-Division

KRSG 100 - University Learning with Intention and Purpose (2)

Students learn practical ways of maximizing the resources of a public education and research institution. Students collaborate across disciplines, broaden impacts of higher learning, and develop strategies for effective interaction with faculty and the broader professional communities to which they aspire.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 102 - Internship Course: Services for Transfer And Reentry Students (2)

Students learn models for increased accessibility and efficacy in higher education, and prepare to lead through those models within transfer student- and reentry student-focused communities. Engage in dialogue about university policy, identify structural barriers faced by minoritized and other disadvantaged communities when pursuing higher education, and

collaboratively design projects to address them. Implement and lead civic-engagement activities and reflect on personal experience and knowledge to meet student-defined goals. With additional guidance from the STARS director and STARS staff, interns create plans and help to implement projects that reflect the learning of the course.

KRSG 105 - STARS Intensive Internship Curriculum (5)

Students learn models for increased accessibility and efficacy in higher education, and implement leadership through those models within transfer student- and reentry student-focused communities. Engage in dialogue about university policy, identify structural barriers faced by minoritized and other disadvantaged communities when pursuing higher education, and collaboratively design projects to address them. Implement and lead civic-engagement activities and reflect on personal experience and knowledge to meet student-defined goals. With additional guidance from the STARS director and STARS staff, interns create plans and implement projects that reflect the learning of the course.

KRSG 161 - Permaculture and Whole Systems Design (5)

Focuses on concepts, principles, and practices of permaculture and whole systems design. Permaculture education is transdisciplinary and provides practical experience with design, ecological horticulture, regional planning, natural building, architecture, appropriate technology, aquaponics, animal husbandry, ecopsychology, and community resilience. Enrollment by application.

KRSG 171 - Kresge Challenge Seminar (5)

For first-year students, by invitation only. This class is part of the Challenge Program which provides high-achieving students with the opportunity to participate in a rigorous program emphasizing individual attention and dynamic interaction with UCSC faculty and academically motivated peers in classes, social settings, and collaborative research projects. Enrollment restricted to Kresge, Merrill, and Stevenson students enrolled in the College Challenge Programs.

KRSG 172 - Collaborative Learning: The Great Turning (5)

Collaborative learning in service of transitioning from industrial growth society to a life-sustaining society. Students deepen their connection with nature, themselves, and community through guest lectures, intergenerational dialogue to discover collective and wise action, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 173 - Collaborative Learning: Sustainable

Communities (5)

Collaborative learning in service of building thriving, just, and sustainable communities locally and globally. Learn about Ecovillages and reclaiming the commons while also discovering collective and wise action through guest lectures, intergenerational dialogue, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 174 - Collaborative Learning: Permaculture Skills (5)

Collaborative learning in service of fostering community resilience in response to peak oil. Practice hands-on skills with permaculture and transition towns while also discovering collective and wise action through guest lectures, intergenerational dialogue, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under Kresge faculty supervision. (See KRSG 42.) Prerequisite(s): upper-division standing in Kresge, a proposal supported by a Kresge faculty member willing to supervise, and college approval.

KRSG 193 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a Kresge faculty supervisor. To be used primarily by upper-division students doing part-time, off-campus study. Prerequisite(s): approval of student's adviser and the college.

KRSG 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 195 - Senior Thesis (5)

Senior thesis or project for student doing individual major program. May be repeated twice for credit. Prerequisite(s): permission of sponsoring committee and college approval.

KRSG 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which Kresge faculty supervision is not in person (e.g., supervision is by correspondence.) Prerequisite(s): approval of the student's faculty sponsor and college approval.

KRSG 199 - Tutorial (5)

A program of individual study arranged between an upper-division student and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 199F - Tutorial (2)

Tutorial

LAAD - LANGUAGES**Lower-Division****LAAD 99 - Tutorial (5)**

Students submit petition to sponsoring agency.

LAAD 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division**LAAD 199 - Tutorial (5)**

Students submit petition to sponsoring agency.

LAAD 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

LAAD 210 - Oral Communication in the U.S. Classroom: Strategies for International T.A.s (2)

Seminar for international graduate students who speak English as a second or foreign language. Focuses on oral competency and serves to qualify students as graduate teaching assistants in UCSC classrooms or laboratories.

Prerequisite: Enrollment is restricted to international graduate students; language assessment administered by the Graduate Division.

LALS - LATIN AMERICAN AND LATINO STUDIES**Lower-Division**

LALS 1 - Introduction to Latin American and Latino Studies (5)

Interdisciplinary introduction presenting the elements for studying Latin American politics and economics, culture, and society as well as the dynamics of Latino communities in the U.S. Special attention paid to issues of colonialism, human rights, U.S. foreign policy toward Latin America, racism, capitalist globalization, migration, to emerging political and economic shifts in the Americas, and to new local and transnational efforts for social change on the part of Latin America's peoples and Latinos in the U.S.

LALS 5 - Introduction to Human Rights and Social Justice (5)

Introduces human rights as a way to study social justice. Students gain an understanding of interdisciplinary approaches to human rights as a theory, legally, and as a basis for global social movements.

LALS 15 - Truth, Justice, and Statistics (5)

Provides statistical methodological training and skills through the examination of social and cultural manifestations of truth as a tool to serve social justice efforts for Latinx and other minoritized students in the education setting.

LALS 20 - Latino Politics (5)

Offers a domestic (U.S.) and transnational approach to Latino politics, focusing on the five largest Latino groups: Mexicans, Puerto Ricans, Cubans, Salvadorans, and Guatemalans. Issues addressed include Latino electoral participation, Latino public opinion, migrant political incorporation, and transnationalism among others.

LALS 30 - Social Movements in Latin America (5)

Examines contemporary social movements in Latin America, especially those that arose from popular response to different forms of social exclusion and to authoritarian political systems. Explores a variety of popular movements, their successes and setbacks, including rural and urban uprisings, native nations and their descendants, women, labor, human rights, and transnational movements.

LALS 32 - Citizens, Denizens, Aliens (5)

Explores theories and practices of citizenship with a focus on how institutions, such as the immigration apparatus, school, and prison, produce and shape inclusion, marginalization, exclusion, and mobility and how social actors envision and enact home and belonging.

LALS 40 - Latinos and Labor (5)

Explores the historical, social, economic, and political dynamics of inequality, stratification, and segmentation that shape the occupational pathways and workplace conditions of Latinos in the United States. Students learn about the structures, policies, and ideologies that influence Latinos' working lives as well as how individuals experience their work in a variety of sectors.

LALS 45 - Intersections of Race, Class, and Gender (5)

Introduces theories of race, class, and gender which shape understandings about racial/ethnic issues in the United States. With particular attention to the experiences of U.S. racial/ethnic groups, including Latinas/os, African Americans, Asian Americans, and Native Americans, this course draws from interdisciplinary research to address how race, class, and gender are also crosscutting dynamics.

LALS 50 - Transnational Feminist Organizing in the Americas (5)

Explores key aspects of transnational feminist organizing in the Americas, including transnational feminist theories and feminist activism in Latin America and the Caribbean. Discusses how women from throughout the Americas region organize politically and socially across gender, race, ethnicity, sexuality, and nationality.

LALS 55 - AIDS Across the Americas (5)

Compares the response to AIDS in the United States and Latin America, with special attention to migration, human rights, activism, stigma, gender, and sexuality. Students develop a conceptual foundation to conduct a people-centered approach and cultural analysis of AIDS.

LALS 56 - The Right to Health (5)

Over the 20th century, Latin American countries experimented with the challenge of ensuring the right to health. Many of their approaches were inspired by Latin American Social Medicine, a social scientific field whose contributions remain, to this day, under-recognized in traditional public health. This course introduces the field of Latin American Social Medicine and its struggles to affirm health as a fundamental human right. Through a range of case studies, students examine how unequal social contexts and power relations shape collective health, the politics of care, and everyday experiences of illness and well-being.

LALS 60 - Latin American Childhoods (5)

Introduces research on childhood in contemporary Latin America. Explores discourses about Latin American children, the regional institutions shaping children's lives, and how children experience and negotiate these larger social forces.

LALS 65 - Religion and Revolution in Latin America (5)

Examines the religious beliefs and practices surrounding the revolutionary movements for social change in Latin America with a particular focus on liberation theology.

LALS 70 - Cinema and Social Change in Cuba (5)

Examines selected feature-length films and documentaries produced after the Revolution of 1959 as a venue to study social change in Cuba. Cinema is used as artifact to document and critique social change. Topics include: the role of art and artist in Revolution, literacy campaign, changing gender relations, dissident sexualities, racial politics, and others.

LALS 75 - Art and Social Change in Latin America: Diego Rivera (5)

Explores the works of Diego Rivera, other Mexican muralists, and the Latin American cultural movements

that developed to address relevant social and political issues.

LALS 79 - Hip Hop History/Historia Hip Hop (5)

Exploration of key themes in Latin American history through the medium of hip hop. Students analyze prevalent historical patterns that speak to shared experiences across the Americas. Course content is divided into weekly modules that move thematically through topics including struggles for social and political citizenship, structural mechanisms of exclusion, and anti-imperialist activism. Also includes reading primary historical documents and engaging in textual analysis of both archival and contemporary texts. Readings equip students to critically interpret elements of hip-hop culture from contemporary Latin America and the Caribbean including MCing, graffiti, and hip hop as the production of knowledge.

LALS 79S - Hip Hop Historia (5)

Taught in Spanish. Exploration of key themes in Latin American history through the medium of hip hop. Students analyze prevalent historical patterns that speak to shared experiences across the Americas. Course content is divided into weekly modules that move thematically through topics including struggles for social and political citizenship, structural mechanisms of exclusion, and anti-imperialist activism. Also includes reading primary historical documents and engaging in textual analysis of both archival and contemporary texts. Readings equip students to critically interpret elements of hip-hop culture from contemporary Latin America and the Caribbean including MCing, graffiti, and hip hop as the production of knowledge.

LALS 80D - Political Change in Mexico (5)

Reviews broad trends in contemporary Mexican politics against the backdrop of long-term historical, social, and economic change throughout the 20th century, analyzing how power is both wielded from above and created from below. The course covers national politics, grassroots movements for social change and democratization, environmental challenges, indigenous movements, the media, and the politics of immigration and North American integration.

LALS 80F - Latinos in the U.S.: A Comparative Perspective (5)

Analyzes the Latino experience in the U.S. with a special focus on strategies for economic and social empowerment. Stresses the multiplicity of the U.S. Latino community, drawing comparative lessons from Cuban-American, Puerto Rican, Chicano/Mexicano, and Central American patterns of economic participation and political mobilization.

LALS 80H - Comparative Latina/o Histories (5)

Designed to survey recent works in the field of Latina and Latino histories, with particular emphasis on

historiographical approaches and topics in the field. Readings are chosen to expose a selection of the varied histories and cultures of Latina/os in the U.S., and focus primarily on Mexicans, Puerto Ricans, and Cubans.

LALS 80J - Race, Nation, and War (5)

Evaluates the relationship between processes of racial formation, war, and nationalism in Latin America. Case studies range from the wars of independence to more recent forms of transnational violence. Students engage historical and anthropological perspectives and critiques of modernity.

LALS 80P - Environment and Society in Latin America (5)

Examines the implications of environmental degradation and resource extraction for economic growth and social inequality in Latin America. Course focuses on the connections between race, ethnicity, power, poverty, and environmental problems.

LALS 80S - Sexualities and Genders in Latin American and Latina/o Studies (5)

Introduction to issues and themes surrounding sexualities and genders within Latin American and Latina/o studies. Provides background in the basic theoretical and historical frameworks of gender and its relationship to sexuality. In addition to cross-border perspectives, course also examines how gender and sexuality are structured and experienced through other social categories.

LALS 80X - Central American Peoples and Cultures (5)

Examines contemporary societies and peoples of Central America considering how, in recent decades, media, history, war, cultural production, and migration have shaped Guatemala, Honduras, El Salvador, Nicaragua, and Costa Rica both as individual nations and as a region.

LALS 90 - Contemporary Brazil (5)

Introduces issues affecting contemporary Brazilian society and culture, such as the legacy of slavery and persisting social, racial, and gender inequities. Analyses of how different representations of Brazil sustain distinctive national projects, which, in turn, attribute specific meanings to blackness, whiteness, masculinity, femininity, and upper- and lower-class identities.

LALS 94X - Mother Earth, Capitalism, and Crises (5)

With a focus on the Americas, this course introduces students into the debates about the causes and solutions to the twinned crisis of global climate change and rising inequality.

LALS 95 - Undergraduate Research Seminar (2)

Seminar for undergraduates participating in the Cultivamos Excelencia program supporting the development of students as researchers and active

participants in academic communities; including lectures on disciplinary methods by participating faculty, work-in-progress sessions for mentors and student researchers, and workshops on formulating research questions, developing a research plan, writing a research paper, and professional development. Enrollment is by instructor permission.

Upper-Division

LALS 100 - Concepts and Theories in Latin American and Latina/o Studies (5)

Interdisciplinary exploration of transnational migrations; social inequalities; collective action and social movements; and cultural productions, products, or imaginaries. Examines how transnational migration and hemispheric integration are transforming Latin American studies and Chicana/o-Latina/o studies. Explores the influence of neoliberalism and globalization, especially the intersection of critical analysis and social-justice praxis. Completion of course 1 highly recommended.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

LALS 100A - Social Science Analytics (5)

Introduces methods and analytic approach of social science research within the interdisciplinary field of LALS, with an emphasis on research oriented toward the pursuit of social change and social justice. Course focuses on the process of research itself: writing good surveys, being able to conduct an interview, presenting data in a compelling way, and creating a critical literature review. Students also learn the overall process of designing a research project, and practice a variety of research techniques used in both academic and community-based research. Class introduces students to diverse examples of LALS activist research.

Prerequisite: Prerequisite(s): LALS 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors or by permission.

LALS 100B - Cultural Theory in the Americas (5)

Focuses on transnational, regional, and local features of Latina/o and Latin American cultural production and artistic expression: how culture is shaped by historical, social, and political forces; how cultural and artistic practices shape the social world; and how culture is produced in an interconnected, postindustrial, and globalized economy.

Prerequisite: Prerequisite(s): LALS 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 100L - Social Science Analytics Lab (1)

Course provides hands-on training in skills for empirical social science research, including writing good research questions, conducting surveys and interviews, and analyzing quantitative and qualitative data.

Prerequisite: Prerequisite(s): Concurrent enrollment in LALS 100A is required.

LALS 112 - Immigration and Assimilation (5)

Examines immigration to U.S. from colonial era to present with special emphasis on issues of citizenship, social identities, and social membership.

LALS 115 - Mexico-United States Migration (5)

Overview of Mexico-United States migration in historical and contemporary context. Focuses on Mexican experiences of racialization, deportability, second-class citizenship, and transnationalism--the cross-border networks, institutions, activities, loyalties, and identities by which Mexican migrants orchestrate their lives across international borders.

Prerequisite: Enrollment is restricted to sophomores, juniors and seniors.

LALS 122 - Media and Nationalism (5)

Evaluates the links between media and the production of national identities in Latin America. Focuses on theories of nationalism, media, and globalization to examine the production of national histories and representations.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 124 - Brazilian Cinema (5)

Surveys films by and/or about women from Brazil, drawing a picture of contemporary Brazilian cinema through the angle of gender in its articulation with sexuality, race, class, ethnicity, national identity, and other key concepts, while offering a visual and critical introduction to Brazilian culture.

LALS 126 - Digit@l Americ@s/Digit@l Latin@s (5)

Examines how social media reconfigures daily lives, cultures, and economies and explores how recent leaps in communication technologies breed digital divides and new forms of activism.

LALS 127 - Genero, Nacion Y Modernidad En El Cine (5)

Taught in Spanish. Examines the relationship between cinema, gender, the nation, and modernity. Focusing on films by key women filmmakers in Latino and Latin America, the seminar examines their engagement with identity, cultural imaginaries, coloniality, sexuality, and gender.

Prerequisite: Enrollment is restricted to Latin American and Latino studies majors, minors and combined majors.

LALS 128 - Latino Media in the U.S (5)

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role that media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor.

LALS 129 - America Latina: Cine, Dictadura y Memoria (5)

Taught in Spanish. Analyzes and compares the rise of authoritarian regimes throughout Latin America in the 20th century through selected films and documentaries. Themes include U.S. foreign policy toward the region, ethnic cleansing, neoliberalism, and memory/resistance/reconciliation through artistic representations.

LALS 129S - Memoria en Las Americas (5)

Taught in Spanish. Examines the ways memories have been created, protected, organized, and suppressed in Latin America, focusing specifically on the cultural technologies involved. Addresses the following questions: What do we remember and why? Who gets to remember? Who decides what is remembered? What does memory mean for our understanding of ourselves and the places we live? The purpose of this course is to provide students with intellectual tools to read against the grain of what becomes legitimized as official and hegemonic knowledge.

LALS 130 - Expresiones cuirs de Genero y Sexualidad en el cine Latinoamericano (5)

Examines cinematic manifestations of dissident sexualities, as well as dissident expressions of gender and family in Latin American culture. Taught in Spanish.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 131 - Latino Literatures: Assimilation and Assimilability (5)

Explores assimilation and assimilability in the United States, especially as related to the education and languages of Latinos, via literary forms, such as the memoir, novel, essay, short fiction, film, and/or poetry. (Meets the methods requirement in Latin America and Latino studies.)

LALS 133 - Latina/o Art and Representation (5)

Focus on art forms and visual representations of Latina/os in the United States. Emphasis on visual art created by artists associated with the Chicano/o

movement and the Central American diaspora. Topics include cultural identity, murals, public art, and fine art.

LALS 135 - El Salvador: Expresiones Culturales (5)

Course taught in Spanish. Focuses on El Salvador, with attention to cultural expressions and representations, literature, historical perspectives, and contemporary societies.

LALS 136 - Tourism, Culture, and Identity (5)

Interdisciplinary study of tourism in Latin America and its interconnections with culture, power, and identity. Examines contemporary trends of tourism (ethnic tourism, diaspora tourism, sex tourism, and favela tours) and explores how regional, national, and transnational identities shape and are shaped by tourism.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 137 - Speculative Fiction and Chicanafuturism (5)

Explores the intersection of race, gender, science, technology, the environment, and the future in speculative fiction by and about Latinxs, migrants, and people of color.

LALS 143 - Race and Ethnicity (5)

Race and ethnicity have been--and continue to be--powerful forces shaping the U.S. experience. This course examines a range of conceptual approaches and monographic studies grounded in the history of the U.S. The readings provide various criteria for studying and understanding these phenomena. The course problematizes race by asking what the readings tell us about race-making and the reproduction of racial ideologies in specific historical contexts. Similarly, ethnicity is treated as a historically specific social construct. (Meets the methods requirement in Latin America and Latino studies.)

LALS 143J - Global Political Economy (5)

Analyzes the global, social, economic, and political forces that shape transnational, national, and regional societal formations and consequently the entire environment for social change. Examines the evolution of revolutionary struggle and its origins within and impact upon the evolving capitalist system.

LALS 144 - Mexicana/Chicana Histories (5)

Explores current historical and theoretical writings on the lived experiences of Chicanas and Mexicana women in U.S. history. Themes include domination/resistance politics, (re)presentations, contestation, social reproduction, identity and difference. Meets the methods requirement in Latin America and Latino studies.

LALS 145 - Grassroots Social Change in Latin America

(5)

Focuses on the analysis of collective action by underrepresented groups in Latin America. Concepts and issues include political participation and impact, gender, ethnicity and race, class, the environment, religion, non-governmental organizations, and social capital.

Prerequisite: Prerequisite(s): any two Latin American and Latino studies courses or permission of instructor; open to graduate students.

LALS 147 - Latin American Identity: The Struggle for Authenticity (5)

Nineteenth-century Latin America has been described as "countries in search for nationhood." Intellectual elites sought to create that sense of identity for their new countries while struggling to appear simultaneously modern and "authentic." This course examines 19th-century Latin American history starting with wars of independence and ending with the growing threat of imperialism from the United States. Course focuses on the emerging concepts of nation and identity and the ways in which women, marginalized people, and racialized people resisted or participated in these new constructions.

LALS 149 - Whiteness in Latin America (5)

Challenges the racial hierarchy of knowledge production by making whiteness into a central object of study and scrutinizing the power that stems from its alleged invisibility. Studies whiteness in three specific Latin American countries and vis-a-vis their respective dominant national discourses: Mexico and its narratives of mestizaje, Brazil and the myth of racial democracy, and Argentina and its discourses of Europeaness. Also examines how whiteness and its "Others" (i.e. blackness, indigeneity, and Asianness) have been imagined, embodied, avoided, and embraced in these three Latin American countries.

LALS 150 - Afro-Latinos/as: Social, Cultural, and Political Dimensions (5)

Explores the lives of African descendants in the Americas, including the Caribbean. Students learn about the settlement patterns of Afro-Latinos/as and Afro-Latin Americans in the region and the ways in which African descendants negotiate their multiple identities and broaden racial frameworks in the United States and Latin America.

LALS 151 - Race & Mobility (5)

Focuses on the intersection between mobility and race, examining both how mobility is racially informed and how differential mobilities inform the construction of racial identities, the production of racial processes, and the representation of racialized spaces. Examining different facets of mobility—movement, meaning, and practice—course topics include: the mutual constitution between mobility and racial identities (blackness,

whiteness, Latinidad, and indigeneity); white control over the mobility of "others;" bodily movements (dancing, walking) as sites of resistance and policing; prototypical whiteness and the surveillance of non-white mobile bodies border crossing; and the intersections between racial mobility politics and gender and class dynamics.

LALS 152 - Consumer Cultures Between the Americas (5)

Examines the circuits of media, commodities, and migration connecting the Americas in an age of globalization. Issues of states, transnational markets, social relations, and cultural representations addressed. Relationship between consumption, nationalism, and globalization is considered critically.

LALS 154 - Juventud in Latin America (5)

Introduces students to the study of youth in Latin America through discussions about theoretical approaches to youth in Latin America. Students examine the challenges, obstacles, and experiences of exclusion faced by young people in the region and learn about Latin American youth through a variety of topics, including poverty, education, culture, social movements, and COVID-19.

LALS 155 - Latin American and Latino Youth Movements (5)

Examines the histories, structures, and practices of Latin American and Latino youth movements. Analyzes the patterns, themes, and differences of social movements using primary documents. Addresses the dynamics of age, generation, race, ethnicity, and nation. Uses youth activism to explore questions relevant to the study of contemporary social movements in the Americas.

LALS 156 - Human Rights and Transitional Justice in the Americas (5)

Provides students with an introduction to the emerging scholarly field of transitional justice. Examines transitional justice in a broad sense and through elected case studies.

Prerequisite: Prerequisite(s): LALS 1. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 157 - Revoluciones Sociales (5)

Taught in Spanish. Examines major social upheavals in Latin America since 1900, exploring revolution as a distinctive form of social conflict and change. Analyzes political, economic, social, and cultural conditions that gave rise to, and linked, revolutions across the Americas.

LALS 158 - Latin American Political Economy (5)

Explores and applies basic tools of Latin American political economy to map the evolution of the region's

main patterns of economic growth and accompanying social structures across past centuries. Reviews the effects of neoliberal capitalist globalization on contemporary Latin America, resistance to destructive consequences, and the nature of emerging alternatives.

LALS 163 - The Amazon: Cultures and Perspectives (5)

Examines the peoples and cultures of lowland South America, particularly the historical, economic, and environmental processes that have shaped the Amazonian region. Students acquire tools to critically approach traditional representations of Amazonian cultures and understand their relevance to global issues.

LALS 165 - Contemporary Peru (5)

Explores contemporary issues facing Peru by addressing the formation of the state and the country's troubled history with political and state violence. Students learn about Peru's multicultural/racial population and about ongoing conflicts and hopes for the country today.

LALS 168 - Inter-American Solidarities (5)

Examines the history of various forms of connection between people, governments, cultures, and social movements across the Americas. From military intervention to transnational anti-imperialist agendas to contemporary artistic collaboration, many forms of foreign relations have shaped the American hemisphere. (Formerly Inter-American Relations.)

LALS 169 - South America: History, Society, and Culture (5)

Examines the southernmost region of South America, commonly referred to as the Southern Cone, exploring the historical trajectories of Argentina, Chile, Paraguay, Uruguay, and southern Brazil, from independence through the end of the 20th century.

LALS 170 - Indigenous Struggles in the Americas (5)

Focuses on the way Natives of First Peoples have interacted voluntarily and involuntarily with nonindigenous cultures. Examines their perspectives, thoughts, frustrations, and successes. Touches on land issues and examines the way current indigenous cultures of Latin America face and adapt to social change. Focuses mainly on the Andes, lowland Amazon, Mesoamerica, and other areas.

LALS 171 - Brazil in Black and White (5)

Taught in Portuguese. Examines blackness and whiteness in Brazil through the lens of the intersectionality of race, gender, and class identities. Topics include: national narratives of racial democracy, racism, black activism, and the emerging studies of whiteness in Brazil.

LALS 172 - Visualizing Human Rights (5)

Explores how visual artists take up the subject of human rights in response to urgent challenges facing Latina/o and Latin American communities across the Americas. Examines the imprint of film and media arts reshaping human-rights discourse. Considers persistent themes in Latina/o representation, including colonialism and state terrorism; self-representation and the rights of collectives (racial, ethnic, and sexual groups); social and economic rights. (Meets the methods requirement in Latin America and Latino studies.)

LALS 175 - Migration, Gender, and Health (5)

Through an interdisciplinary, cross-border approach, examines complex nature of Latino health in relation to migration and how women and men experience health problems differently. Examines how health problems are created by economic and social conditions, how migrants experience access to care, and how agencies can design culturally sensitive programs.

LALS 178 - Gender, Transnationalism, and Globalization (5)

Focuses on the impact of globalization and transnationalism on gender relations in the Americas. Examines gender and power in the context of neoliberalism, modernity, the nation, social movements, and activism. Explores local and transnational constructions of gender, and the intersection of gender with race, ethnicity, class, and sexuality.

LALS 180 - Borders: Real and Imagined (5)

Situates The Border historically and within the context of U.S. imperialism. Examines the formalization of political borders, methods of enforcement, and intra-group conflicts. Examines the varied experiences of colonialism and immigration between Mexicans, Puerto Ricans, Native Americans, and Cubans. Explores how the tools of The Border and Borderlands are being used to untangle the roles of race prejudice and sexual and gender discrimination. (Meets the methods requirement in Latin America and Latino studies.)

LALS 184A - Fair Trade at a Global Crossroads: Environment & Culture in Central Veracruz (5)

Taught in Central Veracruz, Mexico. This interdisciplinary field course teaches respectful participant observation and journaling, principles of regional studies, and concepts of fair trade in economies of agriculture, cultural production and tourism, through a guided study of one of the world's global crossroads.

LALS 184B - Promotor Strategies in the 21st Century: Education for Community Development (5)

Taught in Veracruz, Mexico. In this field practicum course, students work in small team placements with grassroots organizations in Central Veracruz. Through participant observation, interview, and collaborative work, students research Latin American techniques to

promote dialogue and regional participation in problem-solving, justice, and sustainability.

LALS 186 - Field Research Methods (5)

Introduction to field research methods that consider theory, methodological challenges, and epistemology in conducting research. Explains the research process, including designing research questions, interview instruments, concepts maps, and methods of data collection, and data analysis. (Meets the methods requirement in Latin America and Latino studies.)

Prerequisite: Prerequisite(s): LALS 100; and LALS 100A or LALS 100W. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors and Sociology majors.

LALS 187F - Human Rights Investigations Lab (2)

Weekly seminar with an applied lab where students are trained in the fundamentals of social media literacy skills and analysis, gain an understanding of the context for socio-political conflicts in the Americas region, and consider the ethics of engaging in human rights media research using open source. Students learn how to locate, verify, and analyze digital media for human rights cases using open source investigation tools. Various assignments focus on the region of the Americas. Students prepare and produce human rights social media reports. Enrollment is by permission of the instructor.

LALS 187L - Human Rights Investigations Lab (5)

Weekly seminar with an applied lab where students are trained in the fundamentals of social media literacy skills and analysis, gain an understanding of the context for socio-political conflicts in the Americas region, and consider the ethics of engaging in human rights media research using open source. Students will learn how to locate, verify, and analyze digital media for human rights cases using open source investigation tools. Various assignments focus on the region of the Americas. Students prepare and produce human rights social media reports. Enrollment is by permission of the instructor.

LALS 190 - Internship (5)

Internships with campus or community organizations sponsored and evaluated by a Latin American and Latino studies faculty member. Students write an analytical paper or produce another major work agreed upon by student, faculty supervisor, and internship sponsor; sponsor must also provide review of experience. Students submit petition to sponsoring agency.

LALS 190F - Internship (2)

Internships with campus or community organizations sponsored and evaluated by a faculty member from Latin American and Latino studies. Students write a short (8-page) descriptive paper or produce another

work agreed upon by student and faculty supervisor. Students submit petition to sponsoring agency.

LALS 194A - Immigrant Storytelling (5)

Examines first-person narratives by migrants, paying close attention to storytelling as a strategy for fomenting cultural, social, and political change. In addition to reading literary and visual texts, student complete a final project based on original research.

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment is restricted to junior and senior Latin American and Latino studies majors and combined majors.

LALS 194B - Global Migration and Displacement (5)

Examines the global history of migrating people, things, and ideas. Focuses primarily on case studies of mass migration and displacement in 19th and 20th centuries. Students analyze processes of migration in the Americas within a broader global context.

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment is restricted to junior and senior Latin American and Latino studies majors and combined majors.

LALS 194C - Criminalizing the Poor (5)

Examines neoliberal discourses related to poverty that have become more critical of the poor over time, including reforms to social welfare, criminal justice, and immigration, and the ways in which the poor struggle to survive and contest neoliberalism.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors and minors; and combined majors with global economics, sociology, literature, and politics.

LALS 194E - Unfree Migrations (5)

Examines forced migrations to and within the Americas prior to the 20th century, with a focus on African and indigenous slave trades, indentured servitude, convict labor, and contract labor. Students address the implications and memories of those migrations today.

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment is restricted to junior and senior Latin American and Latino studies majors and combined majors.

LALS 194F - Digital Investigations and Human Rights Witnessing (5)

Explores the emerging field of digital investigations and the concept of human rights witnessing. Within the context of the impact of social media and digital technologies, course explores how ethics, power, and social inequalities affect everyday life in the digital

realm, including its use to share stories of injustice and the ways access to social media and other technology is a reflection of societal inequalities. In what ways has the digital divide become more evident due to the COVID-19 pandemic? And finally, in what ways does repeatedly viewing traumatic posts online affect our well-being?

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment is restricted to junior and senior Latin American and Latino studies majors and combined majors. Crosslisted as: Enrollment is restricted to junior and senior college members.

LALS 194G - Chile: Social and Political Change (5)

Taught in Spanish. Analysis of Chilean politics and society from the election of Salvador Allende in 1970 to the present. Particular emphasis is given to understanding the different forces, internal as well as external, that broke the Chilean tradition of democratic rule in 1973, and to the current configuration.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194H - Central America and the United States (5)

This senior seminar focuses on the connections between Central America and the United States. Covers Central American history, the political and economic relations between the isthmus and the United States, and Central American media and literature. (Formerly Central American Political Relations with the U.S.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194L - Senior Seminar Research Development Lab (2)

Provides hands-on guidance in the research and communication skills related to the LALS 194 Senior Seminar.

Prerequisite: Prerequisite(s): Concurrent enrollment in one of the LALS 194 series. Enrollment is restricted to senior Latin American and Latino studies majors and combined majors.

LALS 194M - Twentieth-Century Revolutions (5)

Treatment of 20th-century Latin American revolutions from Zapata to the Zapatistas. Focuses on the causes and consequences of revolutions rather than on their narrative histories.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194Q - Globalization in the Americas (5)

Introduces multiple dimensions of globalization by reviewing key theories and frameworks in order to understand development, social inequalities, trade agreements, multilateral institutions, and the future of globalization studies.

Prerequisite: Enrollment is restricted to junior, and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194R - Violencia Cotidiana en las Americas (5)

Senior seminar taught in Spanish. Engages a critical study of violence, social relations, and everyday life in contemporary Latin America. Focuses on the relationship between narratives and acts of violence, and the constitution and social effects of these representations. Requires proficiency in Spanish (written and spoken), and advanced reading knowledge of Spanish.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194T - Youth and Citizenship (5)

Explores multiple and contested meanings of youth and citizenship; how youth, civic, and political identities are imagined, produced and negotiated in social and cultural locations; and how different versions of Latina/o youth citizenship are promoted and articulated by social and political institutions.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194U - Political Violence in Mexico (5)

Focuses on rural and urban case studies of state repression in post-revolutionary Mexico. Examines how political violence was a preferred method of governance by Mexico's autocratic rulers throughout the 20th century.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 194V - Comparative Migration Histories in the Americas (5)

Traces major historical patterns of migration and related processes in the Americas over the past two centuries. Covers the social, cultural, political, and economic factors that drive and shape the movements of people and considers the ways migration has impacted the sending, transit, and receiving societies. Over the quarter, students come to understand major historical forces of migration that inform our contemporary world, including citizenship, urbanization, identity formations, globalization, and neoliberalism.

Prerequisite: Enrollment is restricted to seniors.

LALS 194X - Extractivism and Socio-Environmental Conflicts in the Americas (5)

Explores, in-depth, how local communities, transnational capital, and state participate in conflicts anchored in extractive sectors, for example, mining, agro-exports, and so on. Through digital-based, case-study research, students identify and explore the logics of action, strategic interests, and the rhetoric of the principal protagonists in socio-ecological conflicts.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 195B - Senior Project (5)

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency.

LALS 195C - Senior Project (5)

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency.

LALS 198 - Field Study (5)

Off-campus study in Latin America, the Caribbean, or nonlocal Spanish-speaking community in the U.S. Nature of proposed study/project to be discussed with sponsoring instructor(s) before undertaking field study; credit toward major (maximum of three courses per quarter) conferred upon completion of all stipulated requirements. Students submit petition to sponsoring agency.

LALS 198F - Independent Field Study (2)

Individual studies undertaken off-campus. Students submit petition to sponsoring agency.

LALS 199 - Tutorial (5)

Supervised directed reading; weekly or biweekly meetings with instructor. Final paper or examination required. Students submit petition to sponsoring agency.

LALS 199F - Tutorial (2)

Supervised research and writing of an expanded paper, completed in conjunction with requisite writing for an upper-division course taken for credit in the major. Students submit petition to sponsoring agency.

Graduate**LALS 200 - Bridging Latin American and Latina/o Studies (5)**

Provides historical and analytical foundations for the inter/transdisciplinary and transnational project of bridging the fields of Latin American and Latino studies (area and ethnic studies). Explores social, cultural, economic, and political changes connecting Latin America and U.S. Latina/o communities. Traces the intellectual genealogy of these efforts and how they contribute to each other. Introduces students to LALS' four substantive themes: (1) Transnationalisms,

Migrations, and Displacement; (2) Intersectionality, Identities, and Inequalities; (3) Collective Action, Social Movements, and Social Change; and (4) Culture, Power, and Knowledge. Core requirement for students pursuing the Designated Emphasis in Latin American and Latino studies.

Prerequisite: Enrollment is restricted to graduate students.

LALS 200A - Power and Structure in the Américas (5)

Examines historical processes and contemporary social, cultural, and political structures in the Américas. Explores power as a mesh that interweaves relations of exploitation/domination/conflict aimed at controlling different dimensions of social existence. Places particular emphasis on the nature of capitalist development in the Américas, colonialism, imperialism/anti-imperialism, nationalism/transnationalism/plurinationalism, and neoliberalism. Builds a contextual foundation for conceptual inquiry in the department's four substantive themes. (Formerly Power and Society.)

Prerequisite: Enrollment is restricted to graduate students.

LALS 200B - Cultures and Subjectivities in the Américas (5)

Introduces theoretical frameworks that explore the relationships between culture, power, and subjectivities. Emphasizes developing interdisciplinary, interpretive, and analytic skills and engages foundational critical approaches including queer theory, border theory, subaltern studies, intersectionality, feminisms, and critical race theory. (Formerly Theories of Culture in the Americas.)

Prerequisite: Enrollment is restricted to graduate students.

LALS 201 - Research in Practice (5)

Problematizes the construction of research approaches in the interdisciplinary field of Latin American and Latino studies, and showcases particular approaches in the social sciences and humanities so students may engage in innovative, transnational research. (Formerly Research in Praxis: Epistemology, Ontology, and Ethics.)

Prerequisite: Enrollment is restricted to graduate students.

LALS 202 - Latin/o American Spaces and Modernity (5)

Students engage and discuss texts that examine the relationship between space, narratives, and ideas of the modern nation, along with critical studies that highlight the social effects of imaginaries and representations.

Prerequisite: Enrollment is restricted to graduate students.

LALS 203 - Latin American Social Movements (5)

Grounds students in the social science literature on Latin American social movements, integrating anthropological, sociological, and political science approaches to the field.

Prerequisite: Enrollment is restricted to graduate students.

LALS 204 - Migration, Borders, and Borderlands (5)

Explores concepts and approaches related to migration; the multiple types of borders that migrants transcend--geopolitical, social, cultural, or interpersonal; and borderland formations constructed in relation to bodies in motion.

Prerequisite: Enrollment is restricted to graduate students.

LALS 205 - Comparison as Method (5)

Brings together comparative studies of physical and social mobility with a focus on race, migration, and citizenship. Both an articulation and study of comparison, course is organized around three components: comparative borders; comparative migration; and comparative ethnic studies. The questions animating it include: What happens when different histories, places, and peoples are compared? How and why do scholars in the humanities and humanistic social sciences compare? What are the strengths and challenges of a comparative approach? (Formerly offered as Comparative Mobilities.)

Prerequisite: Enrollment is restricted to graduate students.

LALS 206 - Queer Cuba (5)

Seminar that engages social, political, and cultural histories of homosexuality in Cuba, focusing on LGBT ostracism and activism after 1959, with particular attention to the social and economic impact of the developments of the USSR on Cuba's LGBT population.

Prerequisite: Enrollment is restricted to graduate students.

LALS 207 - Youth Cultures, Global Capitalism, and Social Change (5)

Introduces intellectual histories of youth studies scholarship in the context of Latin American and Latino studies; explores young people's lived experiences of racialized capitalism and globalization; and addresses various forms of youth resistance and the relationship between youth cultures, politics, and social change.

Prerequisite: Enrollment is restricted graduate students.

LALS 208 - Politics of Childhood and Youth (5)

Explores how narratives about children, teens, youth, and students are imbued with political significance, and

the ways young people are actively engaged in political practices. Considers how representations and lived experiences of youth can serve to reproduce and/or challenge inequalities.

Prerequisite: Enrollment is restricted to graduate students.

LALS 210 - Latina Feminisms: Theory and Practice (5)

Through an interdisciplinary approach, explores Latina feminist social theory and scholarly practice—especially in representation and interpretation of Latina experiences. Examining key texts at different historical junctures, charts how Latinas of varied ethnic, class, sexual, or racialized social locations have constructed oppositional and/or relational theories and alternative epistemologies or political scholarly interventions and, in the process, have problematized borders, identities, cultural expressions, and coalitions.

Prerequisite: Enrollment is restricted to graduate students.

LALS 211 - Paradigms of Race/Color, Sexuality, and Culture in Latin America (5)

Explores foundational texts by Latin American intellectuals that have served to construct and sustain continental, regional, national, and transnational cartographies of identities and the search for lo americano. Examines race/color, sexuality, and culture by tracing their narrative and conceptual (trans)formations in the region and its diaspora. Most texts are read in the original language of publication.

Prerequisite: Enrollment is restricted to graduate students.

LALS 212 - Latina/o Ethnographic Practice (5)

Explores the social construction of Latino cultures in their varied regional, national-ethnic, and gendered contexts. Examines how culture, as a dynamic process constructed with a historical context of hierarchical relations of group power, is interrelated to the structural subordination of Latinos. Focuses on how power relations create a context for the creation of specific Latino cultural expressions and processes.

Prerequisite: Enrollment is restricted to graduate students.

LALS 215 - Latina Cultural Studies: Culture, Power, and Coloniality (5)

Examines the theories and practices informing the field of Latina cultural studies in the Americas. For students pursuing the Designated Emphasis in Latin American and Latino studies and students with interest in theories of coloniality of power, decolonialism, intercultural and transnational feminist methodologies.

Prerequisite: Enrollment is restricted to graduate students.

LALS 220 - Transnational Civil Society: Limits and Possibilities (5)

Analyzes social, civic, and political actors that come together across borders to constitute transnational civil society, drawing from political sociology, political economy, comparative politics, and anthropology to address collective identity formation, collective action, institutional impacts, and political cultures.

Prerequisite: Enrollment is restricted to graduate students.

LALS 225 - Race in the Americas (5)

Considers historical moments in the development of race in the Americas to understand how race is given meaning and actualized through practices, beliefs, and behaviors. Interrogates theories and racial dynamics in the 19th through 21st centuries to reveal interconnections with constructions of gender and nation.

Prerequisite: Enrollment is restricted to graduate students.

LALS 235 - Sexuality and Migration (5)

Approaches the nexus of sexuality and migration to examine contemporary theories of citizenship, security, violence, and power. Drawing on case studies that center experiences at, around, and across diverse borders throughout the Americas, the course takes an intersectional approach to understand: how migration is embedded in sexual identities and practices; and how sexuality, alongside race, class, and gender, influence who migrates and under what circumstances. Examining how researchers have approached sensitive questions of sexuality, students emerge better prepared to develop future research in the broader thematic fields of transnationalism, migration, and displacement.

Prerequisite: Enrollment is restricted to graduate students.

LALS 240 - Culture and Politics of Human Rights (5)

Examines cultural, philosophical, and political foundations for human rights and provides students with critical grounding in the major theoretical debates over conceptualizations of human rights in the Americas. Addresses the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating gender rights, collective rights, and social and economic rights within international human rights framework.

Prerequisite: Enrollment is restricted to graduate students.

LALS 242 - Globalization, Transnationalism, and Gender in the Americas (5)

Explores how globalization, transnationalism, and the social construction of gender are interrelated,

contingent, and subject to human agency and resistance. Examines particular configurations of globalization, transnationalism, and gender through the Américas and their implications for race, space, work, social movements, migration, and construction of collective memory.

Prerequisite: Enrollment is restricted to graduate students.

LALS 244 - Digital Mapping and Human Geographies (5)

Explores the utility of geographical information systems (GIS) for social science research. This course has three components: critical discussions of spatial analysis in published research, training in GIS software, and the application of digital mapping to students' research projects.

Prerequisite: Enrollment is restricted to graduate students.

LALS 245 - Epistemologies of the South (5)

Examines efforts by intellectuals from the Global South, mainly Latin America, to cast off the political, cultural, and epistemological notions imposed by European colonialism and preserved today through the practices of Western/Eurocentric knowledge, to forge their own epistemologies of the South.

Prerequisite: Enrollment is restricted to graduate students.

LALS 258 - Critical Cultural Political Economy (5)

Explores how the divide between cultural studies and political economy can be resolved through a post-disciplinary approach which is attentive to how semiotic and material practices co-constitute contemporary capitalism and an ever-changing set of strategies attempting to manage its multiple contradictions.

Prerequisite: Enrollment is restricted to graduate students, or by permission of the instructor.

LALS 292 - LALS Graduate Colloquium (2)

Required for all LALS graduate students in residence, colloquium includes a mix of activities aimed at supporting the development of graduate students as teachers, researchers, and active participants in academic communities. Includes lectures by distinguished speakers, work-in-progress sessions for both faculty and graduate student research, pedagogical theory and practice seminars, and professional development workshops.

Prerequisite: Enrollment is restricted to graduate students.

LALS 297A - Independent Study (5)

Students submit a reading course proposal to a department faculty member who supervises

independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 297B - Independent Study (10)

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 297C - Independent Study (15)

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 299A - Thesis Research (5)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LALS 299B - Thesis Research (10)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LALS 299C - Thesis Research (15)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LATN - LATIN

Lower-Division

LATN 1 - Elementary Latin (5)

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only.

LATN 2 - Elementary Latin (5)

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature.

Prerequisite: Prerequisite(s): LATN 1.

LATN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

LATN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

LGST - LEGAL STUDIES

Lower-Division

LGST 10 - Introduction to Legal Process (5)

Introduction to U.S. and comparative legal institutions and practices. Examines diverse areas of law from torts to civil rights to international human rights. Why is America portrayed as having an activist legal culture; why is law used to decide so many questions from presidential elections to auto accidents; can law resolve disputes that, historically, have led to war and violence; is the legal system fair and/or effective, and, if so, for whom and under what conditions?

Upper-Division

LGST 108 - Gender, Sexuality, and Law (5)

Analysis of legal issues related to gender, sexuality, and sexual orientation. Introduction to the key areas of gender and sexuality regulated by law and critical analysis of how law and policy should and do treat these issues.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior legal studies majors during first and second pass enrollment only.

LGST 109 - Legal Theory (5)

Offers systematic exploration of alternative conceptions of the nature of law, including positivism, natural law, formalism, realism, pragmatism, and theories of justice. Additional focus on the nature of law; relation of law and morality, rights and other legal concepts; and philosophical debates such as critical legal studies and critical race theory.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment only.

LGST 111B - Civil Liberties (5)

Explores the status of American civil liberties as provided by the Bill of Rights. Particular attention will be given to issues of concern relating to the aftermath of 9/11, including issues relating to detainees, freedom of information requests, wiretapping authority, watch lists, profiling, and creation of a domestic intelligence agency.

Prerequisite: Enrollment is restricted to legal studies and politics majors during first- and second-pass enrollment only.

LGST 111C - Issues in Constitutional Law (5)

Examines variety of topics in constitutional law that are not covered in LGST 111A and LGST 111B. Focuses primarily on Supreme Court decisions and common-law debates.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 113 - Gay Rights and the Law (5)

Examines relevant court cases as well as local, state, and federal laws that define boundaries for legal recognition of sexual orientation and personal sexuality. Explores legal assumptions behind current and historical cases defining personal sexuality and sexual orientation and considers the social and political impetus in each era that drove the courts and legislatures to make such decisions.

LGST 114 - Jews, Anti-Semitism, and the American Legal System (5)

Explores how Jews have influenced and been impacted by the American legal system. Students explore significant cases, debates, and trends in the law as it relates to Jewish identity, religious freedom, and conceptions of justice.

Prerequisite: Enrollment is restricted to legal studies and Jewish studies majors during first and second pass enrollment.

LGST 115 - Law and the Holocaust (5)

Examines the Nazi philosophy of law, and how it was used to pervert Germany's legal system in order to discriminate against, ostracize, dehumanize, and ultimately eliminate certain classes of human beings, and the role of international law in rectifying the damage. Enrollment restricted to legal studies majors during priority enrollment only.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 116 - Comparative Law (5)

Explores how countries organize their societies through legal rules. Particular attention is given to constitutional design, differences between common and civil law systems, changes brought about by the European Union, and the convergence of legal norms globally.

Prerequisite: Enrollment is restricted to legal studies and politics majors during first and second pass enrollment.

LGST 117 - Sports, Law, and Politics (5)

Investigates the relationship between sports, law, and politics, focusing on racism, colonialism, post-colonialism, and globalization.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 118 - Law and Literature (5)

Explores variety of texts including novels, short stories, and essays as a source for reflection about the nature of law and legal practice. Readings include such writers as Herman Melville, Harper Lee, Richard Wright, Arthur Miller, Nadine Gordimer, and James Alan McPherson, among others.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 125 - History of the U.S. Penal Culture (5)

Explores the history and theory of U.S. state punishment from its 17th-century beginnings to the present and notes evolving models of criminal deviance, focusing on how punishment systems legitimate particular models of criminal deviance, crime, and its correction.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 130 - Inequality and Law (5)

Explores the complex relationship between race and the law in American society. Included subjects are critical race theory, civil rights and voting rights law, issues of the criminal justice system, intersections with issues of class and gender, and the social construction of race through law and legal decisions. (Formerly Race and the Law.)

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 131 - Wildlife, Wilderness, and the Law (5)

Introduction to wildlife, wilderness, and natural resources law, policy, and management. Examines rules governing resource allocation and use including discussion of fundamental legal concepts. Explores laws and management policies affecting wildlife and wilderness, including their origins and impacts. Examines how conflicts over natural resources are being negotiated today.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior legal studies majors during first and second pass enrollment.

LGST 133 - Law of Democracy (5)

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 135 - Native Peoples Law (5)

Explores the legal relationship between native peoples and the state. Examines the development of that relationship and several of the key legal issues currently confronting native peoples as they attempt to redress the injustices of the past.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 136 - Federal Indian Law and International Comparative Indigenous Peoples' Law (5)

Indian law refers to the body of law dealing with the status of Indian tribes, their inherent powers of self-government, their special relationship to the federal government, and the actual or potential conflicts of governmental power. Primary objective will be to address tribal reassertion of aboriginal sovereignty over culture and land in the context of increasing world recognition of indigenous rights.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 137 - International Environmental Law and Policy (5)

International environmental law (IEL) endeavors to control pollution and depletion of natural resources within a framework of sustainable development and is formally a branch of public international law—a body of law created by nation states for nation states, to govern problems between nation states. Examines landmark developments of IEL since 1972 within a historical continuum to better understand their strengths and weaknesses.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 139 - War Crimes (5)

Explores complex international human rights/humanitarian law issues surrounding genocide and other mass violence, beginning with the Nuremberg trials following World War II up to recent atrocities in Rwanda, Bosnia, and elsewhere. Covers basic legal framework of human rights law, examines specific situations on a case by case basis, and discusses what options the international community, the nations themselves, and individuals have in the wake of such catastrophes.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 146 - Philosophy of Law (5)

Introduction to topics in the philosophy of law. Begins by discussing some famously difficult legal cases. These motivate students to consider more generally how to theorize about law and legality. Course ends by examining a handful of modern legal issues from a philosophical perspective. Course asks students to

formulate and defend their positions on classic and contemporary legal debates and provides them tools from moral and legal philosophy with which to work.

LGST 148 - Cites, Urban Planning, and the Law (5)

Explores how local land use and planning objectives are defined and determined by federal, state, and (most importantly) local law. Focuses on California, and on California municipal law issues. Housing, transportation, water supply, regional government, environmental protection, natural resource protection, urban sprawl, and growth management issues are addressed as students learn how federal, state, and local laws relate to city urban planning problems.

LGST 150 - Children and the Law (5)

Explores the legal rights of children. Topics may include juvenile justice, gang offenses, free speech and Internet censorship, religious rights, child custody and support, adoption, foster care, abuse and sexual harassment, special needs, public benefits, and medical care.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 152 - Courts and Litigation (5)

A study of the role of courts in society and the uses of litigation to address and deflect social problems. Focus is on recent developments in American litigation, but comparative materials may be considered.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 153 - Immigration, Citizenship, and Law (5)

Explores U.S. laws and policies regarding immigration and citizenship from historical and contemporary perspectives. Includes studying landmark court cases, key statutes and regulations governing immigration and citizenship, and scholarly treatments in order to critically examine historical developments and contemporary debates.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 154 - The Legal Profession (5)

Lawyers stand between the legal system and those who are affected by it. Examines this relationship descriptively and normatively, and from the point of view of sociological theory. Concentrates on the U.S. profession, with some comparative material.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 155 - Topics in American Legal History: Making of American Constitutionalism (5)

Explores some aspects of early American constitutional thought, particularly immediately preceding the

American Revolution situating early colonial constitutional thought within some of the larger themes and controversies of the 17th-century English constitutionalism, then considering some aspects of American constitutional thought in the founding period against the background of the colonial experience.

Prerequisite(s): permission of instructor: selection based on the ability to do very advanced work. Enrollment restricted to legal studies majors during first and second pass enrollment.

LGST 156 - Administrative Law and Challenges of Regulation (5)

The rise of the regulatory state brings with it a host of questions regarding the exercise of state power and separation of powers. Takes up some of these questions; in particular, questions about administrative agencies and their relationship to the judiciary, the legislature and private individuals and groups. (Formerly Administrative Jurisprudence.)

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 157 - Political Jurisprudence (5)

Explores some themes in legal and political theory, especially on the relationship of theories of justice, law, and ethics.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 158 - Law and Politics of Memory (5)

Examines why we choose to memorialize some aspects of our history, but not others. What impact do those choices have on our contemporary politics and society? How may memorials help create a stronger democracy?

LGST 159 - Property and the Law (5)

Begins with an examination of the concept of property, then covers how different cultures characterize property and determine ownership and the laws and policies that define property in modern society. Topics include theories of property law, common property, property and natural resources, zoning, regulatory takings, and intellectual and cultural property

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 161 - Intellectual Property (5)

Advanced study of the concepts, practices, and history of intellectual property. Topically, it is a study of how, when, and why you can own something like an idea, a story, a mathematical algorithm, a business process, or an arrangement of cells. Course is organized around different kinds of things one might own: artistic creation and representation (copyright), scientific discovery and invention (patents), and business processes and secrets (trademark and trade secrets). Studies different intellectual property regimes and the

philosophical and moral issues underlying claims to intellectual property.

LGST 173 - Disability, Law, & Politics (5)

Introduction to how individuals, societies, and states answer fundamental questions about disability, including what is or is not a disability, what causes disability, and what the proper responses to the existence of disabilities are.

LGST 185 - Legal Studies Internship/Field Seminar: Experiences in Law, Policy, and Society (5)

A practicum seminar for students seeking field experience in law- and policy-making settings. Designed to be combined with an internship; provides structured class meetings and work, including weekly field notes and a final paper.

Prerequisite: Prerequisite(s): LGST 10. Enrollment is restricted to sophomores, juniors, and seniors.

LGST 188A - Introduction to the Legal Profession and Legal Aid Work (2)

Offers a basic introduction to key aspects of the Legal Profession, generally, as well as an introduction to the specific area of the profession known as Legal Aid -- the system and services through which under-served communities gain access to legal services. Course covers key elements of the legal profession and legal aid work, offering practical information and training on topics such as professional responsibility, ethics, confidentiality, interviewing skills, record keeping, communication, and working with diverse clients. It is particularly designed as a preparation or companion course for law-related internships and field student through courses such as OAKS 188B / LGST 188B (3 credits), OAKS 199, or LGST 185 Internship (5 credits). Enrollment by permission of the instructor.

LGST 193 - Field Study (5)

Field research performed off-campus, under the supervision of a member of the legal studies faculty.

LGST 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

LGST 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

LGST 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three

quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

LGST 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

LGST 196 - Senior Capstone (5)

Examines related legal topics from an interdisciplinary perspective. Each focuses broadly on the relationship between law as a distinct system and law as an attempt to achieve justice, which requires that law remain open to claims of political morality generally. To what extent are legal norms internal to a separate system called law and to what extent are claims of political right in general relevant to question of what law is?

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior legal studies majors.

LGST 198 - Independent Field Study (5)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

LGST 198F - Independent Field Study (2)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

LGST 199 - Tutorial (5)

A student normally approaches a faculty member and proposes a LGST 199 course on a subject he or she has chosen. Students submit petition to sponsoring agency.

LGST 199F - Tutorial (2)

A student normally approaches a faculty member and proposes a LGST 199 course on a subject he or she has chosen. Students submit petition to sponsoring agency.

LING - LINGUISTICS

Lower-Division

LING 50 - Introduction to Linguistics (5)

An introduction to the major areas, problems, and techniques of modern linguistics.

LING 53 - Semantics I (5)

Introduction to the logical foundations of natural language semantics. Logical and semantic relations,

simple set theory, logical representations (propositional and predicate calculi, modal and tense logics) and their interpretations. A basic literacy course in the language of logical representation.

LING 80C - Language, Society, and Culture (5)

The study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects.

LING 80D - Language and Mind (5)

Examines how the properties of human languages can be used to understand how the mind works and to what extent language use and experience can affect how we think. Topics covered include: human language vs. other forms of animal communication, language deficits and impairments, how language experience shapes perception, the nature of language acquisition, and the extent to which cross-linguistic variation affects other kinds of cognition. The course also provides historical context of the development of modern language science, with a critical overview of Noam Chomsky's linguistics.

LING 80K - Invented Languages, from Elvish to Esperanto (5)

Considers invented languages, including Elvish and Klingon, as well as lesser-known ones that tackle ethical, social, or cognitive concerns. Students learn tools from contemporary linguistics to analyze language structures and understand how they relate to creator intentions.

LING 80M - Language and Indigeneity in Mesoamerica (5)

Explores indigenous experiences in Mesoamerica, focusing on the role of language in the formation of indigenous identities, both historically and in contemporary society. Also considers the linguistic correlates of inequalities experienced by indigenous communities since European contact. Students learn about some of the unique features of Mesoamerican indigenous languages, but no prior experience with linguistics is presumed.

LING 80S - The Science of Language: An Introduction to Linguistics for Non-Majors (5)

A general overview of the major areas, problems, and techniques of modern linguistics. This course is not suitable for majors in the Linguistics Department.

LING 80V - Structure of the English Vocabulary (5)

A systematic study of the elements of English words: besides the practical goal of vocabulary consolidation and expansion, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language.

LING 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

LING 100 - Phonetics I (5)

Provides a comprehensive introduction to the sounds of human language. Involves a detailed examination of the human vocal tract, the mechanics of phonetic transcription within the system of the International Phonetic Alphabet (IPA), and the essentials of phonology, particularly how to do phonemic analysis of any language.

LING 101 - Phonology I (5)

Introduction to how sounds pattern in grammars-why they vary, how they combine, etc. Emphasis is on developing theories to explain the patterns. Topics include distinctive feature theory, phonemic analysis, autosegmental phonology, and principles of syllabification and stress.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and GE Composition requirements and LING 100.

LING 102 - Phonology II (5)

Advanced phonological theory. Topics include markedness; underspecification theories; advanced topics in feature geometry, syllable theory, and stress theory; and optimality theory. Readings include published articles. Emphasis on theory construction and argumentation based on data.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 103 - Phonology III (5)

Advanced topics in phonology, with an emphasis on reading both classic and contemporary research articles and book chapters. Prerequisite(s): LING 102 and enrollment by interview.

LING 105 - Morphology (5)

Study of the principles of word formation: derivation, inflection, and compounding; cross-linguistic study of morphological processes, morphological investigation and analysis.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 108 - Poetry and Language (5)

An introduction to the linguistic aspects of poetry, e.g., rhyme, meter, and larger-scale organization of poetic form. The emphasis is on English poetry, complemented by brief sketches of other poetic traditions.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 111 - Syntactic Structures (5)

Provides a basic introduction to the methods and results of generative grammar. It simultaneously provides an overview of the major syntactic constructions of English.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LING 112 - Syntax I (5)

An introduction to syntactic investigation, developed through the study of central aspects of English syntax. A major purpose is to introduce students to the study of language as an empirical science.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LING 113 - Syntax II (5)

Further aspects of English syntax; universal and language-particular constraints on syntactic structures and rules. Further developments and extensions of generative theory.

Prerequisite: Prerequisite(s): LING 53, and LING 111 or LING 112.

LING 114A - Syntax III (5)

Advanced topics in syntax. Prerequisite(s): LING 113, satisfaction of the Entry Level Writing and Composition requirements and permission of instructor.

LING 114B - Readings in Linguistics (5)

Introduces reading the primary literature in a sub-discipline of linguistics. Topics vary by instructor interest and readings will vary as a result. Emphasis is on how to read technically difficult works, evaluate arguments, and appreciate competing views. Coursework includes readings, presentations, and short response papers. Enrollment is by permission of the instructor. Students should have completed appropriate upper-division courses in the relevant sub-disciplines; see instructor for recommendations. (Formerly offered as Readings in Syntax.)

LING 114C - Topics in Linguistics (5)

Advanced undergraduate course devoted to a topic in linguistics. Topics and linguistics sub-disciplines covered vary with instructor interest. Coursework includes problem sets, readings, presentations, and a term paper. Enrollment by permission of instructor. Students should have completed appropriate upper-division courses in the relevant sub-disciplines; see instructor for recommendations. (Formerly offered as Topics in Syntax.)

LING 116 - Semantics II (5)

Major issues in natural language semantics: nature of lexical entries, thematic relations, propositional representation or logical form; relation between semantic interpretation and syntactic representations, quantification and scope relations, reference and presupposition, coreference and anaphoric relations.

Prerequisite: Prerequisite(s): LING 53, and LING 111 or LING 112.

LING 117 - Pragmatics (5)

Covers topics central in the study of pragmatics, the interpretation of language use. Topics include conversational implicature, speech acts and discourse understanding, and social deixis.

Prerequisite: Prerequisite(s): LING 53 and LING 101; and LING 111 or LING 112.

LING 118 - Semantics III (5)

Uses the tools learned in LING 53 and LING 116 (Semantics I and Semantics II), giving students the opportunity to explore important topics with heavy emphasis placed on reading primary-source literature. Readings form the basis for weekly lectures and the discussion section. Prerequisite(s): LING 116. Enrollment is by permission of instructor.

LING 120 - Structure of English (5)

Survey of grammatical structure of English and terminology of grammatical description. Covers phonological, morphological, and syntactic structure of English and contrasts it with other languages.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 124 - Language Typology (5)

Introduces the branch of linguistics whose goal is to describe and explain the structural diversity of the world's languages. Focuses on what is known about variation in particular domains (e.g., syllable structure, word order, evidentiality), and how it might be explained.

Prerequisite: Prerequisite(s): LING 111 or LING 112, and LING 101.

LING 125 - Foundations of Linguistic Theory (5)

Survey of some of the history and foundational assumptions of generative grammar; also looks at some of the influence of generative linguistic theorizing on disciplines outside linguistics, notably psychology and philosophy.

Prerequisite: Prerequisite(s): LING 113 or LING 116.

LING 127 - History of Linguistics (5)

Topics in the history of linguistics, with a special focus on the 20th century.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 131 - Spanglish: Language and Identities through Contact (5)

In this synchronous online class, students investigate Spanglish as a linguistic and cultural phenomenon. Students learn linguistic tools to describe, analyze, and destigmatize Spanglish, and explore the ways that it is used to establish identity. Additionally, students compare Spanglish to ways of communicating in other bilingual contexts.

LING 132 - California Englishes (5)

Examines varieties of California Englishes and the features that compose these varieties. Through this examination, course also tries to better understand how social categories such as race, gender, sexuality, age, and class relate to the linguistic variation found in California English varieties. Course also seeks to explain how linguistic features acquire social meaning, and how these features are adopted in the construction of identity.

Prerequisite: Prerequisite(s): LING 50.

LING 133 - Language OnLine (LOL): Communication in the Digital Era (5)

In the age of social media, much of communication happens online. Despite claims to the contrary, the internet has not destroyed language; rather, language is thriving in new and vibrant ways online. This course uses the tools of linguistics to explore how the internet (with acronyms, emojis, and memes) has affected language use and how properties of language continue to shape online communication technologies. Topics covered include: whether emojis are language, what makes a spicy meme, how communities form online, and how online linguistic behaviors aid in the spread of misinformation.

LING 135 - Language and Racialization (5)

Many of us are probably aware that people of different ethnic or racial backgrounds may speak differently, but most of us probably do not know that all varieties of English are equally "grammatical." And while some of us are probably aware of the fact that racial and ethnic categories are "constructed," most of us have probably not considered the ways in which language use figures in the construction of ethnic and/or racial identity. Course introduces a number of racialized linguistic varieties and their intersections with other identity categories (gender, sexuality, socio-economic class), as well as emergent new scholarship on language and racialization.

Prerequisite: Prerequisite(s): Ling 50.

LING 140 - Language Change (5)

Methods and problems in the study of change in linguistic systems. Reconstruction of proto-languages;

the comparative method. Theories of change and implications for the theory of grammar.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 141 - Ellipsis (5)

Introduction to and survey of the ellipsis in natural language, including the typology of ellipsis processes, cross-linguistic uniformity and variation in ellipsis, and theoretical approaches and issues.

Prerequisite: Prerequisite(s): LING 53 and LING 101; and LING 111 or LING 112.

LING 144 - Computational Methods for Linguists (5)

Introduction to computational methods for linguists with little background in computer programming. Possible topics include: regular expressions, annotation, databases, and search. Students learn contemporary techniques in team-based programming and annotation.

Prerequisite: Prerequisite(s): LING 50, LING 53, and either LING 111 or LING 112. Enrollment is restricted to linguistics and language studies majors.

LING 145 - Native Languages of North America (5)

Selective survey of the indigenous languages of North America, including a formal/structural component and an historical/social component. Topics include typological properties of these languages, current status, and revitalization efforts.

Prerequisite: Prerequisite(s): LING 101, and either LING 111 or LING 112.

LING 147 - Quantitative Methods in Linguistics (5)

Introduces quantitative methods for linguistics. Focuses on categorical data and continuous data, and using R. Students learn the basics of probability, statistics, and experimental design, and use R to apply them to linguistic data sets.

Prerequisite: Prerequisite(s): LING 53 and LING 101, and either LING 111 or LING 112.

LING 151 - Phonetics II (5)

Hands-on introduction to instrumental phonetic analysis, phonetic analysis using experimental methods. Emphasis is on the acoustics and perception of speech. (Formerly Phonetic Analysis.)

Prerequisite: Prerequisite(s): LING 100.

LING 152 - Applied Phonetics (5)

Examines areas in which phonetic analysis and experimentation are used in practice. Emphasizes problem-solving, experiments, and analytical tasks.

Prerequisite: Prerequisite(s): LING 151.

LING 154 - Language and Social Identity (5)

Introduction to sociolinguistics exploring the relationship between language and such social parameters as social status, ethnicity, race, gender, etc., including the role of language differences in the creation of social stereotypes. Emphasis on gathering, examining, and reporting data.

Prerequisite: Prerequisite(s): LING 101, and either LING 111 or LING 112.

LING 155 - Language and Cognition (5)

Introduces and examines some of the foundational assumptions, practices, and methods of generative grammar in comparison to those of other areas of cognitive science, notably psychology and philosophy.

Prerequisite: Prerequisite(s): LING 111 or LING 112; and LING 53 and LING 101.

LING 160 - Language Engineering (5)

Addresses a particular problem in language engineering, chosen for its practical and theoretical interest and its tractability. The entire course focuses on a team project to design a solution to the problem. Permission of instructor required.

LING 164 - Linguistics for Engineers (5)

Introduction to computational linguistics for engineers with a focus on providing background and skills in linguistics. Students are expected to already have programming skills and basic computer science. Knowledge of shell scripting or a scripting language suggested.

Prerequisite: Prerequisite(s): CSE 10 and CSE 14, or permission of instructor.

LING 171 - Psycholinguistics I (5)

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Students cannot receive credit for this course and LING 257. (Formerly LING 157, Psycholinguistics and Linguistic Theory.)

Prerequisite: Prerequisite(s): LING 50.

LING 172 - Psycholinguistics II (5)

Advanced topics in psycholinguistics and experimental linguistics, contemporary memory models, computational models of comprehension and production, and neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques. (Formerly LING 158, Advanced Psycholinguistics.)

Prerequisite: Prerequisite(s): LING 171.

LING 180 - Structure of a Particular Language (5)

Topics in the phonology, morphology, syntax, or semantics of a language that is the research interest of the instructor. The language investigated changes with each offering of the course.

Prerequisite: Prerequisite(s): LING 101; and LING 111 or LING 112.

LING 181 - Structure of Romance Languages (5)

Discusses topics in the phonology, syntax, and semantics of Romance languages, with emphasis left to the discretion of the instructor. Students read original research articles and pursue empirical investigation of Romance languages by collecting data from scholarly publications, fieldwork, and/or corpus analysis. Some knowledge of Italian, French, or Spanish is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 182 - Structure of Spanish (5)

The phonology and syntax of Spanish, studied from a modern linguistic perspective. Some knowledge of Spanish is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 183 - Structure of French (5)

The phonology, morphology, and syntax aspects of French. Some knowledge of French is helpful.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 185 - Structure of Russian (5)

The phonology, morphology, and syntax of Russian. Some knowledge of Russian is helpful.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 186 - Structure of German (5)

Phonological, morphological, and syntactic aspects of the structure of the German language. Some knowledge of German is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 187 - Structure of Japanese (5)

The phonology, morphology, and syntax of Japanese.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 188 - Structure of Chinese Languages (5)

Introduces the syntax and semantics of Chinese Languages (particularly Cantonese and Mandarin), especially those aspects that are typologically different

from Indo-European languages like English. Students learn to appreciate typological differences in natural languages and develop skills to analyze them. Course involves a global classroom component: throughout the quarter students meet and work with students from another institute in an international location to explore language differences.

Prerequisite: Prerequisite(s): LING 101; and LING 111 or LING 112.

LING 189 - Structure of Arabic (5)

The phonology, morphology, and syntax of Arabic. (Mainly modern standard, but also some regional dialects.) No knowledge of Arabic is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 190 - Senior Research (2)

Students produce a research paper or other significant project to satisfy the capstone requirement. Prerequisite(s): LING 101, and either LING 111 or LING 112. Concurrent enrollment in a specified upper-division course is required. Enrollment is by permission of the instructor and is restricted to senior linguistics and language studies majors.

LING 193 - Field Study (5)

Students submit petition to sponsoring agency.

LING 195 - Senior Thesis (5)

Deadline for submission of thesis proposal is one year in advance of proposed completion. Students submit petition to sponsoring agency.

LING 198 - Independent Field Study (5)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision by correspondence). Preparation and approval must be completed by the fifth day of instruction of any given quarter. Students submit petition to sponsoring agency.

LING 199 - Tutorial (5)

Students submit petition to sponsoring agency.

LING 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

LING 211 - Phonology A (5)

First part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in

faithfulness and correspondence; segmental and suprasegmental processes.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 212 - Phonology B (5)

Second part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes.

Prerequisite: Prerequisite(s): LING 211. Enrollment is restricted to graduate students or by permission of instructor.

LING 214 - Phonetics (5)

Introduction to phonetic theory concentrating on acoustic phonetics and speech perception along with common experimental methods, the role of phonetic principles in explaining phonological patterns and markedness.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 216 - Phonology Proseminar (5)

One or more topics in phonological theory. Topics vary from year to year, covering literature and current research in phonology.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students or by permission of instructor.

LING 219 - Phonology Seminar (5)

Advanced topics in phonology drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students or by permission of instructor.

LING 219G - Phonology Seminar (3)

Advanced topics in phonology drawn from the current research interests of the instructor. Three-credit version of LING 219. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students.

LING 221 - Syntax A (5)

Introduction to syntactic theory. Phrase structure; subcategorization; lexical entries; passive; infinitival constructions.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 222 - Syntax B (5)

Continuation of Syntax A. The syntax of unbounded dependencies, including constituent questions, relative clauses, clefts, topicalization. Constraints on extraction; unbounded versus successive cyclic movement; the licensing of gaps.

Prerequisite: Prerequisite(s): LING 221. Enrollment is restricted to graduate students or by permission of instructor.

LING 226 - Proseminar in Syntax (5)

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 226G - Proseminar in Syntax (3)

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives. Three-credit version of LING 226. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 229 - Syntax Seminar (5)

Advanced topics in syntax drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students or by permission of instructor.

LING 229G - Syntax Seminar (3)

Advanced topics in syntax drawn from the current research interests of the instructor. Three-credit version of LING 229. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 231 - Semantics A (5)

Introduction to linguistic semantics: nature of lexical entries, thematic relations, representation of logical form; relation between semantic interpretation and syntactic representation, quantification and scope relations, reference and presupposition.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 232 - Semantics B (5)

Model-theoretic semantics for natural language. Truth-conditional, compositional semantics. Various logical ontologies and their application to natural language

categories. Dynamic interpretation of discourse and anaphoric relations. Treatment of illocutionary force.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students or by permission of instructor.

LING 236 - Proseminar in Semantics (5)

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students or by permission of instructor.

LING 236G - Semantics Proseminar (3)

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics. Three-credit version of LING 236. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students, or by consent of instructor.

LING 239 - Semantics Seminar (5)

Advanced topics in semantics drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 232. Enrollment is restricted to graduate students or by permission of instructor.

LING 239G - Semantics Seminar (3)

Advanced topics in semantics drawn from the current research interests of the instructor. Three-credit version of LING 239. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 232. Enrollment is restricted to graduate students.

LING 240 - The Pedagogy of Linguistics (1)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of linguistics specifically. Under the supervision of a faculty member, coordinated by a graduate student with substantial experience as a teaching assistant.

Prerequisite: Enrollment is restricted to graduate students.

LING 244 - Computational Methods for Linguists (5)

Practical introduction to computational methods for linguists. Topics covered: database development; indexing and search; morphological and syntactic parsing; and modern annotation methodologies. Students concurrently learn Python and JavaScript. No background in programming is required.

Prerequisite: Enrollment is restricted to graduate students, or by consent of the instructor.

LING 248 - Topics in Computational Methods and Models (5)

Seminar in computational approaches in linguistics and the language sciences with topics drawn from the current interests of the instructor.

Prerequisite: Prerequisite(s): LING 221 and LING 231. Enrollment is restricted to linguistics graduate students.

LING 249 - Morphology Seminar (5)

Presents theoretical and descriptive issues, particularly those raised by the framework of distributed morphology and its current competitors. Course work consists of readings, squibs, and a term paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 249G - Morphology Seminar (3)

Presents theoretical and descriptive issues, particularly those raised by the framework of distributed morphology and its current competitors. Coursework consists of readings and squibs. Three-credit version of LING 249. Does not require a final paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 257 - Psycholinguistics and Linguistic Theory (5)

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Students cannot receive credit for this course and LING 157 or LING 257G

Prerequisite: Enrollment is restricted to graduate students.

LING 258 - Advanced Psycholinguistics (5)

Advanced topics in psycholinguistics and experimental linguistics. Contemporary memory models. Computational models of comprehension and production. Neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques. Graduate students have separate evaluation criteria. Students cannot receive credit for this course and LING 258G.

Prerequisite: Prerequisite(s): LING 257. Enrollment is restricted to graduate students.

LING 258G - Advanced Psycholinguistics (3)

Advanced topics in psycholinguistics and experimental linguistics. Contemporary memory models. Computational models of comprehension and

production. Neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students apply advanced analytical techniques. Graduate students have separate evaluation criteria. Three-credit version of LING 258. Does not require a final paper. Students cannot receive credit for this course and LING 258.

Prerequisite: Prerequisite(s): LING 257. Enrollment is restricted to graduate students.

LING 259 - Phonetics Seminar (5)

Advanced topics in acoustic and articulatory phonetics.

Prerequisite: Prerequisite(s): LING 214. Enrollment is restricted to graduate students.

LING 259G - Phonetics Seminar (3)

Advanced topics in acoustic and articulatory phonetics. Three-credit version of LING 259. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 214. Enrollment is restricted to graduate students.

LING 279 - Research Seminar in Psycholinguistics (5)

Contemporary research in psycholinguistic theory models, and methods. Topics vary with research interests of faculty and graduate students.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 280 - Proseminar in Experimental Linguistics (5)

Examines experimental design and analysis for gathering linguistic data; the advantages and disadvantages of major response measures, including reaction times; interaction with extra-grammatical factors; and statistics on categorical and continuous measures. Students present results in research papers. Students cannot receive credit for this course and course 280G.

Prerequisite: Enrollment is restricted to graduate students.

LING 280A - Linguistic Investigation (5)

Methods of primary linguistic investigation. Close study of one language typologically different from English. Data analysis and elicitation techniques.

Prerequisite: Enrollment is restricted to graduate students.

LING 280B - Linguistic Investigation (5)

Linguistic Investigation

Prerequisite: Enrollment is restricted to graduate students.

LING 280G - Proseminar in Experimental Linguistics (3)

Examines experimental design and analysis for gathering linguistic data: the advantages and disadvantages of major response measures, including reaction times; interaction with extra-grammatical factors; and statistics on categorical and continuous measures. Three-credit version of LING 280. Does not require a final paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 282 - Field Methods (5)

Exploration of a language previously unfamiliar to students through elicitation from a native speaker. Discussion of elicitation techniques. Students investigate selected aspects of the language in depth. Enrollment is restricted to graduate students; enrollment is by instructor permission only.

LING 290 - Research Seminar (5)

A research seminar for undergraduate and graduate students to develop the skills of the profession. Critical reading, reviewing, teaching, presentation, and writing. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students or by permission of instructor.

LING 295 - Directed Reading (5)

Directed reading which does not involve a term paper. Enrollment is restricted to graduate students or by permission of instructor.

LING 296 - Linguistics Colloquium (2)

Independent graduate-level activities and assignments relating to professionalism; organizing and attending colloquium and conferences; participation in discussion at such events; and preparation of commentaries on academic papers. Students submit petition to sponsoring agency. Enrollment is restricted to linguistics graduate students.

LING 297A - Independent Study (5)

Enrollment restricted to graduate standing or consent of instructor.

LING 297B - Independent Study (10)

Enrollment restricted to graduate standing or consent of instructor.

LING 297C - Independent Study (15)

Enrollment restricted to graduate standing or consent of instructor.

LING 297F - Independent Study (2)

Two-credit independent study. Enrollment restricted to graduate students, or by consent of instructor.

LING 299A - Thesis Research (5)**LING 299B - Thesis Research (10)****LING 299C - Thesis Research (15)****LIT - LITERATURE****Lower-Division****LIT 1 - Literary Interpretation (5)**

Close reading and analysis of literary texts, including representative examples of several different genres and periods. An introduction to practical criticism required of all literature majors; should be completed prior to upper-division work in literature.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to first-year students and sophomores, or literature and proposed literature majors and literature minors.

LIT 61C - Devils, Dervishes, and Bawdy Tales from Baghdad to Canterbury: The Story within the Story (5)

A story within a story, the frame tale is a playful and enduring literary genre. Focuses on frame tales of the global middle ages, tracing their movement from the Indian subcontinent to the British Isles. Readings include selections from Fables of Bidpai, The Arabian Nights, Libro de Buen Amor, and The Canterbury Tales. (Formerly The Frame Tale.)

LIT 61F - Introduction to Reading Fiction (5)

Close reading of short stories and some novels with the aim of developing critical methods for the analysis and interpretation of prose fiction. Topics include character, plot, narrative structure, and the poetics of prose. The course topic changes; please see the Class Search for the current topic.

LIT 61H - Reading the Movies (5)

Introduces techniques for the close reading of film (shot-by-shot analysis, etc.), with particular attention to what makes film different from other media. Films studied will cohere around a specific theme, geography, or genre, like film noir. (Formerly Introduction to Film Analysis.)

LIT 61J - Introduction to Jewish Literature and Culture (5)

Surveys 3,000 years of Jewish literature and culture. Themes include origins of the Jews in the ancient world; formation and persistence of the Jewish diaspora; coherence and diversity of Jewish experience; Jewish narrative and textual traditions; interaction between Jews and other cultures; tensions between tradition and modernity.

LIT 61K - Introduction to the Fairy Tale (5)

Introduces the fairy tale as a genre, including historical, cultural, and political contexts; relation to identity, performance, transnationalism; contemporary transformations of tales and their expression in other media (e.g., film, art, theater); and current scholarship.

LIT 61L - True Stories: Memoir (5)

Historical overview of the genre from Augustine to contemporary experiments in memoir. Student write weekly creative-critical responses and a final creative-critical paper.

LIT 61M - Approaches to Classical Myth (5)

Introduction to Greek myths, including selected ancient texts and visual artifacts, historical and cultural context of their creation and reception, modern theoretical approaches such as structuralism and psychoanalysis, and interpretations in various media.

LIT 61N - Introduction to Children's Literature (5)

Introduction to children's literature as a literary genre, including historical, cultural, and political considerations of the genre's relationship to gender, race, sexuality, nationalism, colonialism, and popular culture through primary texts, secondary criticism, and other media (e.g., film, illustration, comics).

LIT 61P - Introduction to Reading Poetry (5)

An introduction to selected modes and forms of poetry with an emphasis on close textual analysis. Examples will be taken from different historical periods and poetic traditions. Course topic changes; please see the Class Search for the current topic.

LIT 61R - Race in Literature (5)

An investigation into the various uses and abuses of race in literature. Course topic changes; see the Class Search for current topic.

LIT 61S - Sacred Texts (5)

Studies religious texts held sacred by different cultures and communities around the world, concentrating primarily on their literary dimensions. Course topic changes; please see the Class Search for current topic.

LIT 61T - Travel Narratives (5)

Travel narratives may be of many types: odysseys of self-discovery, adventures in nature, or journeys to exotic lands off the beaten track. This course examines travelers' accounts drawn from periods ranging from the Middle Ages to the contemporary.

LIT 61U - Introduction to Speculative Fiction (5)

Examines speculative and science fiction (SF) texts to develop critical methods for the analysis and interpretation of SF as a critique of science, technology, and culture. Themes include encounters across species;

novelty and change; expanded concepts of life; and the role of technology in human development.

LIT 61W - Writing and Research Methods (5)

Intensive training in the practice of literary analysis and the writing of polished research papers. Topics include manuscript sources, variant editions, reading techniques, publication technologies, web research. Workshop format. Strongly recommended for majors and/or transfer students who have completed LIT 1 or its equivalent.

LIT 61X - Tragedy: Learning Through Suffering (5)

Reading representative Greek tragedies with attention to history, form, and content. Course examines how Greek tragedy responds to the fact of human mortality, i.e., to the myriad and culturally specific ways in which characters in tragedy accept, evade, or deny death.

LIT 61Y - Arthurian Romance (5)

Reading of selected Arthurian romances in verse and prose from the French, Welsh, and English traditions.

LIT 61Z - Introduccion a generos literarios de Espana y America Latina (5)

Speaking, reading, and writing proficiency in Spanish required. The study of poetry, drama, and prose in Spain and Latin America.

LIT 80B - Monsters and Literature (5)

Every age has the monsters it needs. From medieval marvels to GMO chimeras, monsters serve as figures of a culture's deepest fears, anxieties, and hidden desires. This course takes a multidisciplinary, transhistorical approach to the problems and promises of monsters, and introduces monster theory.

LIT 80D - Literary Traditions of India (5)

Introduces the fundamental questions of interpretation and cultural analysis through engagement with varying literary and cultural traditions of the Indian subcontinent since antiquity. Emphasis is on language, communicative media, literary form, memory, transmission, interpretive approaches, and translation. The course topics change; please see the Class Search for the current topic.

LIT 80E - Animals and Literature (5)

Examines the copresence in literary works (fiction and non-fiction prose and poetry) of nonhuman and human animals from antiquity to the present across a variety of cultures.

LIT 80H - The Politics of Fashion (5)

Surveys the politics of fashion, focusing on how style has shaped ideology, culture, power, revolution, resistance, and a variety of identities, including nation, race, ethnicity, gender, sexuality, and class.

LIT 80I - Topics in American Culture (5)

A history of one or more cultural genres in written, visual, and/or musical forms. Course topic changes; please see the Class Search for the current topic.

LIT 80K - Topics in Medical Humanities (5)

Medical Humanities designate an interdisciplinary field of humanities (literature, philosophy, ethics, history, and religion) concerned with application to medical education and practice. The humanities provide insight into the human condition, suffering, personhood, and our responsibility to each other; and offer a historical perspective on medical practice.

LIT 80L - The Holocaust: The Destruction of European Jewry (5)

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film.

LIT 80M - China in the Post-Reform Period (5)

Speaking, reading, and writing proficiency in Mandarin Chinese required. Lectures, discussions, writing assignments, and all readings in Chinese. An investigation of Chinese culture, society, and politics in the post-1978 period through literature, film, critical essays, and internet media. Topics include labor, gender, generational divisions, family, urban life, social media, nationalism.

LIT 80N - Latino Expressions in the U.S (5)

An introduction to Latino literature and culture in the U.S. A study of the creative expressions of Chicanos/as, Nuyoricans, Cuban Americans, and other Latin Americans in the U.S.

LIT 80O - Love, Anarchy, Revolution (5)

Considers love, anarchy, and revolution as three modes of liberation. Concentrating on the contemporary period, with explorations of philosophy, literature, film, popular culture, political movements and manifestos, and personal or collective experience, this course considers these variant, but overlapping, scenes of the dialectics of liberation.

LIT 80Q - Jane the Virgin: Latinx Readers and (Latin) American Literature (5)

What does a telenovela spoof about a virgin Latinx mother and aspiring romance novelist have to do with literature? Course explores Jane the Virgin as a commentary on the tastes, identities, and politics of 21st-century Latinx readers and writers.

LIT 80T - Literature and Magic (5)

Explores the history of magic in relation to the written word. Concerns include the gendering of magic; interconnections among Judaic, Arabic, and Christian

worlds; magic in the age of rationalism; and the recent popular fascination with magic.

LIT 80U - Introduction to Contemplative Reading (5)

Combines contemplative practice, including meditative practice, with close reading of literary works to provide students with a more precise ability to interpret and respond to texts, both literary and non-literary. Works include poetry, imaginative prose, and essays.

LIT 80V - Literature and History (5)

Examines literature's relationship to the past and to the experience of history. Course topic changes; please see the Class Search for current topic.

LIT 80W - Captive Minds: The Literature of Pre-modern Slavery (5)

Examines the literary production of slave societies by looking at the literatures of several pre-modern slave societies; also develops a cultural-historical narrative that explains the origins of genocidal forms of plantation slavery in the Americas by tracing their origins back to Greece and Rome.

LIT 80X - Global Narratives (5)

A survey of global narratives, with a focus on the novel over several centuries, traditions, languages, and cultures.

LIT 80Y - Harry Potter (5)

From The Sorcerer's Stone to The Deathly Hallows, this course approaches the Harry Potter books and films from a variety of critical angles, using the analytical tools of literary and cultural studies to shed new light on this dizzying phenomenon.

LIT 80Z - Introduction to Shakespeare (5)

Study of representative plays. No previous experience with Shakespeare is assumed.

LIT 81A - Homer's Odyssey (5)

Introduction to Homer's Odyssey, its hero, and its world. An epic tale of a man who abandons his family to fight in the Trojan War, then returns two decades later, the Odyssey was a profound influence on the culture of ancient Greece and Rome, and continues to shape our self-understanding today.

LIT 81B - Literature and Photography (5)

Explores the close relationship between photography and literature, from the origins of photography to 19th-century realism and the contemporary photographic novel, interpreting photographs and literature to study how these fields influence each other and how their forms of representation relate.

LIT 81C - The Novels of Toni Morrison (5)

Examines novels by Toni Morrison, including The Bluest Eye, Song of Solomon, Sula, and Jazz, as sites of

discontent and transformation, while also considering literary techniques such as form, voice, metaphor, and narrative structure. Includes discussion of Morrison's ideas about the intersection of race and sexuality, blackness as a shifting signifier, the role of the artist in society, and uses of literature for re-imagining the relationships between history, culture, and individuality.

LIT 81D - The Prophet and the Qur'an (5)

Introduction to the life of the Prophet Muhammad as a literary text and as a primary hermeneutic framework for understanding the Qur'an, including its relationship to a deep narrative prophetic tradition shared with other Abrahamic traditions.

LIT 81E - Social Media and Society (5)

Introduction to social media's evolving impact on society. How are social media changing communication, politics, identity, privacy, and what we believe? Materials include critical texts and real-world case studies, as well as films and short fiction.

LIT 81F - Ghosts of Slavery, 1960-80s/2000-20s (5)

Why does the history of slavery reappear at certain moments in literary and popular culture? Course focuses on the 1960s and the 2000s, when slavery was frequently featured in popular and academic history, fiction, film, and television, in both imaginative and documentary forms.

LIT 81G - The Good Life (5)

Do current social, political, and psychological conditions make it more difficult to live a good life? Drawing on the broad tradition of critical theory and utopian imaginings, the course aims to give practical and theoretical guidance toward achieving a good life.

LIT 81H - Literature and Pandemic: The World at the End of the World (5)

Surveys some of the most famous accounts and representations of historical and fictional pandemics in the history of literature, mostly from the Western tradition. Students read excerpts from works by Thucydides, Lucretius, Boccaccio, Manzoni, Poe, Camus, London, and Elkhadem. Conversation centers on the question of how Western literature have attempted to both document and investigate the destruction of human society, but also to recreate it.

LIT 81I - Engineering California (5)

Online course using literary and artistic texts to investigate the history and engineering of California, and to imagine a virtual, material, and cultural infrastructure for California's future. Course begins and ends with the Internet, and includes topics such as cyberspace, the Gold Rush, Spanish/Mexican missions, wartime development, and early cybernetics.

LIT 87 - Introduction to Literary Topics (2)

Introduces topics in literature. The course topic changes; please see the Class Search for the current topic.

LIT 90 - Introduction to Creative Writing (5)

Introduction to the crafts and techniques of poetry, fiction, and creative non-fiction, identifying and exploring traditional and non-traditional literary forms and genres while working on individual creative writing projects. An author reading and two workshop sections per week.

Prerequisite: Prerequisite: satisfaction of the Entry Level Writing requirement. Enrollment is restricted to first-year students, sophomores, and juniors.

LIT 90X - Introduccion a la Escritura Creativa/Introduction to Creative Writing (5)

Speaking, reading, and writing proficiency in Spanish is required. Explores creative writing from a bilingual (Spanish-English) perspective, and considers bilingualism in the literary arts (como el ejercicio de una identidad), as a way of thinking and a way of being, as a creative lens (el pensamiento de frontera), as a framework, as a border (que quiere ser cruzada).

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing requirement. Enrollment is restricted to first-year, sophomore, and junior students.

LIT 91A - Intermediate Fiction/Prose Writing (5)

An intermediate-level course in fiction designed for prospective applicants to the creative writing concentration.

LIT 91B - Intermediate Poetry Writing (5)

An intermediate-level course in poetry designed for prospective applicants to the creative writing concentration.

LIT 99A - Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 99B - Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English language required. Students submit petition to sponsoring agency.

LIT 99C - Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

LIT 101 - Theory and Interpretation (5)

Contemporary approaches to literary and cultural theory, with emphasis on how theoretical perspectives advance and broaden the reading of literary texts. Introduction to important new theoretical developments and their antecedents. Literature majors should complete this course as early as possible. Course topic changes; see the Class Search for the current topic.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to literature and proposed literature majors and literature minors.

LIT 102 - Translation Theory (5)

Promotes the understanding of translation and its role in redefining meanings across epochs and cultures, in establishing common norms, and in advancing mutual intelligibility; but also providing encounters with absolute alterity. Actual translations are used as case studies.

Prerequisite: Prerequisite(s): one year of college-level, non-English language study or the equivalent reading ability in a non-English language.

LIT 110A - The Traditional British Canon, Part I (5)

The constitution of the canon of English literature from Chaucer to Cowper. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 110B - The Traditional British Canon, Part II (5)

Explores poetry and prose from 1800 to 1950 through extensive reading in the Romantics, Victorians, Moderns, articulating the connections among them, and connecting their work to key social, political, scientific, and technological moments defining these eras. Critical approach designations: Canons, Histories. Distribution requirement: Poetry.

LIT 110C - The Traditional U.S. Canon: Beginnings to 1900 (5)

Major works from the colonial and early national periods to 1900, with attention to their social and cultural context. Critical approach designations: Canons, Histories.

LIT 110D - The Traditional U.S. Canon, 1900 to the Present (5)

Major works from 1900 to the present, with attention to their social and cultural context. Critical approach designation: Canons, Histories.

LIT 111B - Geoffrey Chaucer (5)

Close study of Chaucer's poetry, with some attention to relevant cultural, philosophical, and historical issues in the context of the late medieval period. Particular

emphasis on *The Canterbury Tales*. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 111D - William Shakespeare (5)

Study of representative works by William Shakespeare. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Canons, Media. Distribution requirements: Poetry, Pre-1750.

LIT 111E - Edmund Spenser (5)

Studies in Spenser's major poetry: *Faerie Queene*, Book I; *Epithalamion*; *Mutabilitie Cantos*. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 112A - Jane Austen (5)

Representative Austen novels within political, historical, and cultural context; considers form and genre, nationalism, feminist, postcolonial, and other critical readings. Examines poetry and other writings that illuminate cultural issues of the period, as well as film and other adaptations of Austen's novels. Critical approach designations: Canons, Histories.

LIT 112C - Charles Dickens (5)

Study of representative work by Charles Dickens. Critical approach designations: Canons, Histories.

LIT 112E - Bob Dylan as Poet: From Folk Hero to Electric Messiah (5)

Focuses primarily on the poetry and poetics of Dylan's by now substantial canon of works--early, middle, and late. Stresses poetic syntax, various lyric genres, surrealist imagery, and narrative tactics used, as well as the more socially expansive dynamics of how Dylan forged his prophetic/visionary imagination.

LIT 112G - William Faulkner (5)

A survey of Faulkner's early fiction; focus on development of theme and technique. Also considers Faulkner as a Southern historian, stressing the relationship between personal and regional experience in time. Critical approach designations: Canons, Geographies.

LIT 112I - Kafka in Translation (5)

An intensive study of the works of Franz Kafka, with reference to the literary, social, and historical context in which his work emerged. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Geographies.

LIT 112K - Herman Melville (5)

Study of representative work by Herman Melville, including novels and short stories. Critical approach designations: Canons, Histories.

LIT 112M - Twain (5)

A chronological survey of Twain's major works, with an emphasis on the development of style and content. Among other works, *The Innocents Abroad*, *Roughing It*, *Life on the Mississippi*, and *Huckleberry Finn* are considered. Critical approach designations: Canons, Power and Subjectivities.

LIT 112P - Gwendolyn Brooks (5)

An examination of the major works of Gwendolyn Brooks, the first African American to win the Pulitzer Prize (in 1950), with particular attention to questions of race, gender, and class as modes through which to consider questions of form and content. Critical approach designations: Canons, Power and Subjectivities. Distribution requirement: Poetry.

LIT 114A - Orlando Furioso (5)

Reading the 46-canto Italian Renaissance adventure poem of Ludovico Ariosto, the most popular book of its century and a classic of humanist literature, students consider literary tradition, Renaissance humanism, and how entertainment literature may articulate moral and political criticism. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 114B - Don Quixote de la Mancha (5)

A close study of Books I and II of the Cervantes novel together with an examination of some of the criticism on this work written in English throughout the centuries. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 114C - Dante's Divine Comedy (5)

Reading of the Inferno, the Purgatorio, and selected canti of the Paradiso, along with selections from Dante's lyrics and from medieval Italian and French poetry. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 114D - Goethe's Faust (5)

An intensive study of Goethe's Faust, Parts I and II. All works are read in English. Critical approach designations: Canons, Histories. Distribution requirement: Poetry.

LIT 114E - One Way Ticket to Hell ... and Back: Exploring Dante's Inferno (5)

Focuses on the Inferno, the first cantica of Dante Alighieri's Divine Comedy. Examines different uses of metamorphosis in Dante's representation of Hell, including the relationship between the ancient idea of human metamorphosis and Dante's representation of the Christian contrappasso (retribution), and the medieval concept of imago Dei (in God's likeness). Critical approach designations: Canons, Power and Subjectivities. Distribution requirements: Poetry, Pre-1750.

LIT 114F - Finding Dante: A Reader's Guide to Getting Out of Hell (5)

An epic poem about a journey of self-discovery, Dante's Comedy challenges all assumptions about literary genres, styles, and the meaning of narrative and of life. Course covers Purgatory and Paradise. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 116B - Encountering Antiquity (5)

Introduces selected modes and forms of poetry with emphasis on close textual analysis. Considers uses of Greek and Roman antiquity in English/Anglo-American poetic practice from early to post-modernity by historicizing the reproduction of antiquity through poetic forms. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 116C - Ancient Myth/Modern Poetics (5)

Reading of Greek and Roman texts (in English translation) which utilize mythic material juxtaposed with later poems written in response to them. Readings from Homer, Sappho, Greek drama, Petrarch, modern poets; discussion of concepts of myth, strategies of response. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 116F - Knights, Ladies, and Werewolves: Medieval French Literature in Translation (5)

Medieval French literature appeared rather suddenly in the the age of castles, Crusades, knights, and chivalry, and spawned a remarkable array of genres: epic, romance, lyric, *lais*, *saint's lives*, *fabliaux* (bawdy tales), drama, histories, and more. This course provides a sampling of the variety of this rich tradition. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 116G - Victorian Monsters (5)

Through an examination of monsters in literature, course explores anxieties, fears, and ideals of Victorian society, paying close attention to issues of gender, sexuality, class, race, empire, scientific, and technology. Critical approach designations: Canons, Histories.

LIT 116I - Philosophy in India (5)

Investigates various facets of premodern Indian thought. Emphasis of the course rotates and may fall upon metaphysics, epistemology, ontology, ethics, hermeneutics, or basic categories of Indian traditions (dharma, karma, samsara, moksha, etc.). Critical approach designations: Canons, Genres. Distribution requirement: Pre-1750.

LIT 117A - Old Iranian Literature (5)

The pre-Islamic literature of Iran is one of the world's richest literary traditions, and forms part of the Indo-European poetic heritage. Course offers an overview of and introduction to indigenous Iranian literary

traditions. The course topic changes; see the Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 118A - Hebrew Bible (5)

Introduction to textual, source, redaction, historical, and literary criticism of individual books of the Hebrew Bible and to exegesis as science and ideology. Covers texts and iconography of neighboring mythological traditions (Mesopotamian, Ugaritic, Egyptian, Greek) when appropriate. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 120A - Topics in Poetry (5)

Close reading--critical and creative--of poetry. Examines how poets teach, through their writing, to radically attend to reading. The course topics changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120B - Poetry of the 17th Century (5)

Readings in the works of Donne, Jonson, Herbert, Herrick, Marvell, and others. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 120C - Victorian Poetry (5)

A reading of the major Victorian poets from Tennyson to early Yeats. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120D - Nineteenth-Century American Poetry (5)

The major figures and important movements from Poe to Emerson through Whitman and Dickinson. Critical approach designations: Canons, Genres. Distribution requirement: Poetry.

LIT 120E - Early- to Mid-20th-Century American Poetry (5)

Poets include Emily Dickinson, Walt Whitman, H.D. (Hilda Doolittle), William Carlos Williams, Marianne Moore, Wallace Stevens, Langston Hughes, T.S. Eliot, and others, with attention to leading movements and critical issues. Critical approach designations: Canons, Genres. Distribution requirement: Poetry.

LIT 120F - Topics in Modern Poetry (5)

Survey of modern poetry; includes a variety of poetic forms. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120H - American Poetry Since World War II (5)

Major poets since World War II, with attention to leading movements and critical issues. The course topic changes; please see the Class Search for the current

topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120J - Contemporary American Poetry (5)

Surveys contemporary poetry with attention to race, sex, and gender; includes a variety of poetic forms. Course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 121A - The Heroic Epic (5)

A survey and analysis of primary epic: Gilgamesh, the Iliad, the Odyssey, and Exodus. Distribution requirement: Poetry, Pre-1750.

LIT 121D - Medieval Epic (5)

Medieval reworkings of stories and motifs drawn from the barbarian or Germanic tradition including Beowulf, The Song of Roland, Nibelungenlied, Snorri Sturlason: King Harald's Saga from Heimskringla, and Njal's Saga. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 121G - The Idea of Poetry (5)

Focus is on the theories of rhetoric and poetry written between 1580 and 1620. Texts include English, Italian, French, and Spanish works. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 121H - Classical Poetics in Elizabethan Verse (5)

An introduction to Elizabethan poetry and poetics, with emphasis on shorter lyrics (sonnets, ballads, etc.), pastoral, erotic epyllia, devotional poetry, etc. Examines various Classical and Continental strains of influence at play in the production of English verse in the later 16th century, including Classical rhetoric, Ovidian mythology, and Petrarchanism. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 121J - Medieval Romance (5)

A study of representative texts from the 12th through the 15th centuries. Questions of subjectivity, sexuality, and history in romance narratives are addressed. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 121K - Radical Moderns/Poetry International (5)

Focuses on a generation of early 20th-century poets from Asia, Latin America, the Middle East, and beyond. Studying their poetic output through the lens of modernism and other genres, students discover a truly global moment in literature/politics. Critical approach designations: Genres, Power and Subjectivities. Distribution requirements: Global, Poetry.

LIT 121L - Green Ache: Ecopoetics, Race, and Material

(5)

Examines ecopoetics as theory, politic, and field of discourse. Focuses on literary and artistic production across a variety of texts that explore the role of race and representation, including literary theory, film, and visual art. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 121M - Blue and Brown: Race, Gender, and Blackness (5)

Examines Blackness as race, identity, politic, field, and discourse. Exploration guided by poetry, narrative fiction, video, film, music, and the daily news. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 121N - RAGE: Race and Performance (5)

Explores race, gender, and form in an interrogation of rage, and how it functions across an array of works by writers and artists in how they render rage's effects and configurations through poetry, prose, and performance. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 121O - Body Theories and Embodied Poetics in Contemporary American Poetry (5)

Course investigates the body as a site of political and theoretical significance in contemporary American poetry. Considers how and when corporeal poetics succeed (and fail) at capturing elusive and/or precarious subjectivities of race, sex, gender, grief, and violence. Critical approach designations: Genres, Media. Distribution requirement: Poetry.

LIT 121Q - Queer Lyrics: A History of LGBTQ Poetry in the United States (5)

Considers theories of sexuality and the lyric side-by-side, through readings, lectures, class discussions, and writing assignments. Questions of language, community, and self-hood inform discussions of a wide range of poets. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 123C - History of the Essay: From Seneca to Solnit (5)

Chronologically charts the essay's arc from the age of antiquity to the contemporary period. Considers how the genre has changed through time with attention to its form, language, and content.

LIT 124A - Masters of Modernist Short Fiction (5)

Acquaints students with the main stylistic features of modernism through the close reading of short stories. Critical approach designations: Genres, Histories.

LIT 124B - The Contemporary Latin American Short

Story (5)

An exploration of the genres, forms, and history of the Latin American short story. Focus includes contemporary women writers and writers of color from throughout Latin America in dialogue with the Latin American short story tradition. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 125A - Ancient Novel (5)

Roman prose fiction--the ancient novel and texts from other genres--in relation to the history of the novel. Critical approach designations: Genres, Histories. Distribution requirements: Pre-1750.

LIT 125B - Studies in the English Novel (5)

From the 18th to the 20th century. The course topic changes; please see the Class Search for the current topic. Critical approach designations: Genres, Geographies.

LIT 125C - Great French Novels (5)

Provides an introduction to important French novels of the nineteenth and twentieth centuries. All works are read in English. Critical approach designations: Genres, Geographies.

LIT 125D - Modern and Contemporary German Literature (5)

Selected readings from the novel and novella in modern and contemporary German literature. All works are read in English. Course topic changes; please see the Class Search for the current topic. (Modern German Fiction.)

LIT 125H - Modern Arabic Novel (5)

Examines the literary and cultural production of the modern Arab world, with an emphasis on the novel since the 1950s. Includes discussion of film, poetry, and mass culture. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 125I - What is the Novel? (5)

A survey of global narratives, focusing on the novel over several centuries, traditions, languages, and cultures. Examines the novel as a particular genre of literary expression; also examines its formative relationship with historical, social, cultural, and political processes. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 125J - French Science Fiction (5)

Considers several French literary and cinematic examples of contemplating the present through the future—and the past—that paint a shifting picture of how time makes us human. Course also examines the French novel as it has developed in conversation with scientific thought since the late-19th century. All works

are read in English. Critical approach designations: Genres, Geographies.

LIT 126A - International Cyberpunk (5)

Cyberpunk, considered a subgenre within science fiction, has achieved international prominence and presents interesting interpretative challenges. Course examines some issues as manifested in representative texts. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 126F - Speculative Fiction As Cultural Theory and Practice (5)

Readings of contemporary and historical speculative fiction, including examination of representational practices, technologies, and politics that emerge from and/or circumscribe their interrelations. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories.

LIT 126G - Science Fiction and the Sublime: Science, Technology, and Subjectivity (5)

Studies the sublime encounter in works of science fiction literature and film. Lyotard defined the sublime as the "presentation of the unrepresentable." By examining what and who constitutes the sublime, we can explore relationships among fundamental concepts like knowing, being, and embodiment. Critical approach designations: Genres, Media.

LIT 127D - Travel Writing (5)

Examines the genre of travel writing and the critical and cultural issues it engages. Critical approach designations: Genres, Geographies. Distribution requirements: Global.

LIT 130A - Ancient Literature in Cross-Cultural Perspective (5)

Comparative approaches to the study of ancient literature and culture. Topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global, Pre-1750.

LIT 130B - Travel Writing and Intercultural Relations in the Middle Ages (5)

Provides a historically-based and theoretically-informed introduction to medieval and early modern European contacts with other cultures. Readings include fourth through 17th-century writings about travel, discovery, and conquest in Asia, Africa, and America. Critical approach designations: Geographies, Histories. Distribution requirement: Global, Pre-1750.

LIT 130D - The Global Middle Ages (5)

Examination of texts from the global Middle Ages in a range of world cultures and traditions, with attention to their historical and social contexts. Course topic changes; please see the Class Search for the current

topic. Satisfies the Global and Pre- and Early Modern distribution requirements.

LIT 131A - Problems (5)

Considers a range of phenomena from a critical world perspective: subject formation; human activity on a global scale; questions that demand a worlded answer. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 131B - Space/Time (5)

The world as understood through spatial and temporal divisions: regions, nations, empires, periods in a worlded perspective. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 131C - Worldings (5)

How to think about the world as a whole: representations, networks, systems, taxonomies, versions of globalization. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 131D - Literature in a Global Context (5)

Comparative examination of fiction in the modern world and of fictional responses to social change and crisis. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirements: Global.

LIT 132A - Germany in War and Peace (5)

Study of selected texts reflecting German society at war or in that ambiguous state called peace. Attention is given to the place of literature in German cultural life and its special role in the formation of national identity. Critical approach designations: Geographies, Power and Subjectivities.

LIT 133D - Topics in the Literatures and Cultures of Southern Asia (5)

Provides in-depth analysis of literary and cultural phenomena of southern Asia. The course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 133E - Contemporary Chinese Society, Culture, and Politics (5)

Focuses on contemporary China: society, politics, culture, and the economy. Critical approach designations: Geographies, Histories. Distribution requirement: Global. (Formerly Topics in Asian Modernism.)

LIT 133F - Pacific Rim Discourse (5)

Examines the rise of the idea of the Pacific Rim: its historical background, ideological assumptions, and various forms of its cultural manifestations. Critical approach designations: Geographies, Histories. Distribution requirements: Global.

LIT 133G - The Nuclear Pacific (5)

Examines a range of cultural representations, literature, and films that chart the transnational history and representational legacy of uranium and nuclear power. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 133H - Haunted by the Forgotten War: Literature and Film of the Korean War (5)

The Korean War has the dubious distinction of being known as the Forgotten War in a U.S. context. Course examines novels, short stories, film, popular visual narratives, and historical accounts of the Korean War and its often-circuitous legacies.

LIT 133I - Global Japan: Literatures of the Japanese Diaspora (5)

Examines the fiction of ethnic Japanese writers who are located outside of Japan. How do these writers situate themselves vis-a-vis Japan and the countries in which they were born or reside? How does their status as outsiders enable them to view Japan's social problems and colonial history? Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 134A - Caribbean Literature (5)

A study of major writing from the English-speaking Caribbean, with attention to the historical and cultural context out of which it arises and to which it responds. Critical approach designations: Canons, Geographies. Distribution requirement: Global.

LIT 135A - Topics in African Literature (5)

Thematic and stylistic linkages: classical texts, oral traditions, and modern developments in African literature. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 135E - The Historical Imaginary (5)

A survey of historical literature in the Americas that examines fictional attempts to re-imagine New World histories. Readings focus on secret or mangled histories, the legacies of slavery and colonialism, gendered critiques of national histories, and U.S. imperialism. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 135F - Empire and After in the Anglophone Novel (5)

Examines fiction written in English, 1883 to 1948, in order to consider the complex relations--complicit,

resistant, both--between literary and imperialist discourses. Likely novelists for study are Schreiner, Haggard, Conrad, Kipling, Forster, Hilton, Paton. Critical approach designations: Genres, Geographies.

LIT 135G - Postcolonial Writing (5)

Introduces students to a selection of postcolonial theory and texts. Critical approach designations: Geographies, Power and Subjectivities.

LIT 135H - African Futurisms (5)

Explores expressions of African futurism in a range of creative media--novels, short stories, and films--and analyzes them in conversation with theoretical texts. Recognizes African cultural producers and theorists as central to conversations about anti-colonialism, revolution, futurity, and the nonhuman and beyond human. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 136B - Beat Literature and the World (5)

Explores the sources and context of Beat writing, emphasizing the Beats' intense interest in and engagement with the world at large. Includes works by major and minor Beat writers. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Poetry.

LIT 137A - Global Cities (5)

Examines cities as social spaces and as local spaces in the global economy and global imaginary. Focus is interdisciplinary, including literature, film, cultural studies, history, and sociology. Topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories Distribution requirement: Global.

LIT 137C - Imagining Paris (5)

Examines ways in which Paris, France, a mecca of literature and art for the last two centuries, has spurred imagination, and has itself been the product of global imagination. Exploration of landmarks, monuments, and iconic aspects of Parisian culture via literary and artistic imaginings. Critical approach designations: Geographies, Media.

LIT 138A - Culture and Nation (5)

Course explores the role of literature and culture in the production of national communities. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 138B - Regions in American Literature (5)

Examines development of regional writing in the U.S. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 138C - Modern Turkish Literature (5)

Explores the formation of modern Turkish literature from the late-Ottoman tale to the postmodern novel. Introduces key critical concepts/debates (orientalism, canon formation, belatedness/modernization, national allegory) used in the study of non-Western literatures. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 139A - Topics in American Literature and Culture (5)

Studies in American literature and culture, with attention to historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 139B - Los Angeles Circa 1992 (5)

In response to the acquittal of white police who brutally beat black motorist Rodney King, thousands of people took to the street. This course examines cultural narratives that arose in the lead-up to and aftermath of the 1992 L.A. uprising. Critical approach designations: Geographies, Power and Subjectivities.

LIT 141A - Early Mediterranean Cultures (5)

Examination of representations of medieval and early modern Mediterranean history. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Pre-1750.

LIT 141B - Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E (5)

Survey of writing and culture from the 10th century B.C.E. through the sixth century C.E., focusing on poetry, philosophical and historical writing, supernatural fiction, Buddhist/Taoist texts in contexts of fragmentation, empire building, dynastic collapse, rebellion, eremitism, and courtly society. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 141C - Classical Chinese Culture and Literature, Sixth Century through 16th Century (5)

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 141D - Classical Arabic Literature and Islamic Civilization (5)

Examines the development of classical Arabic literature in historical context, including the appearance and importance of major genres and their broad relationship to the social and cultural history of the Arab-Islamic

world. Distribution requirements: Global, Pre-1750. (Formerly Arab-Islamic Literatures I: 500-1200.)

LIT 141E - Arab-Islamic Literatures II: 1200-1900 (5)

Examines the evolution of Arabic and Islamic literatures and cultures through the late-Medieval and early-modern periods. These periods produce much of the body of literature and texts that survive today, and is profoundly influential. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Pre-1750.

LIT 141G - Granada: The Moor's Last Sigh and the Muslim's Frontier: The City in the Mediterranean Imagination (6)

Traces the development of Granada from its first rise to prominence as Muslim city in the Tā'ifa Period (11th century) through its transformation into a Christian city in early modern Spain. Special emphasis is placed on its role as a point of contact between Spain and North Africa (or the Latin West and the Muslim Mediterranean more broadly) and the city's privileged position in the social and literary imaginaries of Muslims, Christians, and Jews, as a place of memory and intercultural contact. Distribution requirement(s): Pre-1750.

LIT 144A - Continental Renaissance (5)

Introductory survey of great prose writings of the continental Renaissance in their cultural and historical contexts. Authors include: Machiavelli, Castiglione, Erasmus, Rabelais, Montaigne, and Cervantes. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750.

LIT 145A - Colonial American Literatures (5)

Surveys representations of the Euro-Amerindian encounter in the pre-national period. Readings include collective stories of indigenous peoples, European captivity narratives, reflections about spirituality and religion, poems, and a contemporary novel. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 146A - Studies in Romanticism (5)

A survey of major Romantic themes and authors between 1780 and 1820. Explores relationships to pre-Romantic and post-Romantic authors. The main goal is to achieve familiarity with a wide range of individual poems in the general context of Romanticism. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 146B - Victorian Literature (5)

British Victorian literature (1830-1901) featuring representative texts and authors. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Geographies, Histories.

LIT 146C - Victorian Prose (5)

Victorian prophecy, Victorian criticism: an examination of some major writings of 19th-century nonfiction prose by Carlyle, Mill, Ruskin, Newman, Arnold, Pater, and Wilde, with a glance at the social context and the minor fictional forms of the era. Critical approach designations: Genres, Histories.

LIT 146D - Nineteenth-Century American Fiction (5)

Examination of selected fiction written between the end of the 18th century and the Civil War, with attention to historical and cultural as well as literary issues. Critical approach designations: Canons, Histories.

LIT 146F - The Dissenting Tradition in America (5)

Antislavery writing of the 19th century profoundly shaped a resistant strain in American writing. By reading speeches, essays, and life writing along with more traditionally literary work, students examine what gives language the power to move people and to change the world. Critical approach designations: Histories, Power and Subjectivities.

LIT 146G - Queer(y)ing Victorian Literature (5)

Examines mid- to late-19th-century English representations of non-normative gender and sexuality in popular culture. Considers how these figures in fiction conform to or resist established perceptions of gender, sexuality, race, and empire. Critical approach designations: Histories, Power and Subjectivities.

LIT 147A - Twain, Slavery, and the Literary Imagination (5)

Using Mark Twain's later writings and other literary/non-literary materials, explores responses to popular and legal discourse on blood, race, sex, resurgence of racism, and imperialism. Critical approach designations: Histories, Power and Subjectivities.

LIT 149A - Behind the Berlin Wall (5)

Examines cultural life in the German Democratic Republic between 1946 and 1992 through films from the state-owned DEFA film studios. Topics include: socialist realism and international modernism in cinema; the representation of collective labor; the status of women; youth culture; and the texture of everyday life and consumer culture in socialism. Critical approach designations: Histories, Media.

LIT 149B - Contemporary American Literature (5)

A selective examination of major writings since World War II, with attention to literary issues and historical context. Critical approach designation: Geographies, Histories.

LIT 149C - The 1960s (5)

An interdisciplinary study of the cultural and social movements of the 1960s. Critical approach

designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 149D - Topics in Modern Literature (5)

Study of 19th- and/or 20th-century literature, with attention to its literary and historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories.

LIT 149E - Modern Fiction and Poetry (5)

Survey of modern fiction and poetry. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 149F - Contemporary Mexican Narrative (5)

Examines 20th and 21st century Mexican literature, with attention to literary critical issues as they relate to cultural, historical, and political contexts. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 149G - War in Contemporary American Culture (5)

Considers the treatment of war in American literature since World War II. Close attention paid to both literary form and historical context. Also provides perspectives on, and critical tools for thinking about, contemporary armed conflict. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 149H - The Future (5)

Examines modes of thinking and imagining the future throughout human history, and considers the fate of the future today. Topics include apocalyptic religion, utopia and dystopia, progress, revolution, finance, and everyday life. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 149I - Contemporary Medievalisms (5)

Explores contemporary representations of medieval cultures by considering questions of historical memory, limits of adaptation, and the power of satire. Critical approach designations: Geographies, Histories.

LIT 149J - The Good Life (5)

The social, affective, and psychic structures of our neoliberal era make it difficult to live a good life. Drawing on the broad tradition of critical theory and utopian imaginings, the course aims to give practical and theoretical guidance toward achieving a good life.

LIT 150D - The Power of Writing: Books and Libraries 600-1500 (5)

Surveys the history of the book in the West from ca. 600-1500. Concentrates on the medieval illuminated manuscript and the first years of printing, and focuses on the relationship between text and image. Critical

approach designations: Histories, Media. Distribution requirements: Pre-1750.

LIT 150E - Letters, Literature: A Correspondence Course (5)

Examines the form and function of the letter in literature from antiquity to the contemporary moment. Considers all writing, from the most expressly public to the most seemingly private, as a form of correspondence, and we will contribute our own letters, in both creative and critical modes, in an effort to expand our capacities for critical analysis of texts. Critical approach designations: Genres, Media.

LIT 151B - The Phenomenon of Tragedy (5)

Examines the theory of tragedy from Aristotle to Nietzsche, while inviting students to read and discuss classic dramatic pieces to which the label tragedy was applied. Relies on student presentations and contributions, and teaches skills both in handling theory and in practical literary criticism. Critical approach designations: Genres, Media. Distribution requirement: Pre-1750.

LIT 151G - English Drama: 1576-1642 (5)

Study of representative plays. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Media. Distribution requirement: Pre-1750.

LIT 151K - Gender, Race, and Disability in American Drama (5)

An investigation of how American playwrights represent and criticize the concepts of gender, race and disability. Analysis of the genre of drama as a contact zone of gender, race, and disability by studying how American playwrights have critically responded to historical and social alienation, sexism, racism, and ableism in their works about "disabled" bodies. Students cannot receive credit for this course and CRES 114. Critical approach designations: Media, Power and Subjectivities.

LIT 151L - Theater in India (5)

Historical introduction to the theatrical forms and dramatic performance styles that have characterized the Indian tradition at different times and places. Critical approach designations: Canons, Media. Distribution requirements: Global, Pre-1750.

LIT 154B - Literature and the Arts (5)

Literature and art challenge, collaborate with, and use each other as inspiration. Course examines the boundaries of and connections between literature and art; focuses on the relationship between self-expression, identity, and politics in art and literature. Critical approach designations: Media, Power and Subjectivities.

LIT 154C - Hip Hop Hi Art (5)

Explores the U.S. born and now global phenomenon hip hop as poetic discourse, and analytical frame by examining questions of race, gender, and sexuality via analysis of rap lyrics, music, visual art, video, film, and performance. Satisfies the Poetry distribution requirement.

LIT 155A - Cinema and Subjectivity (5)

An examination of the ways in which the technological and institutional practices of cinema construct modes of modern and contemporary subjectivity. Course topic changes; please see the Class Search for current topic. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 155C - New German Cinema (5)

Surveys the work of Fassbinder, Kluge, Herzog, Schlöndorff, von Trotta, Reitz, Straub, Sanders-Brahms, and others. Major themes include post-fascism and the problems of history, the burden of memory, mass culture, gender, social class, and migration in postwar Germany. Critical approach designations: Geographies, Media.

LIT 155D - Italian Cinema and Literature (5)

Explores the rich history of Italian cinema. Special attention is given to the links between literacy and visual narratives, Italian films and Italian novels, autobiographies, and short stories on which the films are based. Critical approach designations: Geographies, Media.

LIT 155E - Cinema and Social Change in Latin America (5)

Surveys selected Latin American and Latino feature and documentary films. Course topic changes; please see the Class Search for current topic. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 155H - The Horror Film (5)

Shifting definitions of horror in the movies from the late silent period to the present through close analysis of representative films and critical texts. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Media.

LIT 155J - The Films of John Carpenter (5)

Study of development and central themes of preeminent genre director of the post-Hollywood era, concentrating on central core of major works in horror/science fiction genres from Halloween to In the Mouth of Madness, with attention to the comedies and action films. Critical approach designations: Genres, Media.

LIT 155L - Vampire Film (5)

Examines development and central themes of vampire film from the silent era to the present. Critical approach designations: Genres, Media.

LIT 155N - Cinema in India (5)

Examines cinema in India from the silent era to the contemporary production of Bollywood films. Attention is given to the rise of the culture industry in urban centers such as Mumbai, and the dialectical relationship between socio-political change and cultural form. Critical approach designations: Geographies, Media. Distribution requirement: Global.

LIT 155O - Women In/As Horror: Critical Approaches to the Horror Film (5)

What does horror film have to say about women? In treating horror film as text, students gain the necessary tools to read these movies as narrative; students also identify how race, class, gender, and genre function to create complex and challenging texts. Critical approach designations: Media, Power and Subjectivities.

LIT 156A - The Gothic Imagination in Fiction, Film, and Theory (5)

Readings include theoretical essays by Freud and Lacan and such fictions as *The Monk*, *Frankenstein*, *Dracula*, *Maus*, *The Yellow Wallpaper*, and *Beloved*. Films change each year. Critical approach designations: Histories, Media.

LIT 156E - Mapping Fictions: Geocritical Approaches to Cultural Studies (5)

Studies how literature maps the world and in what ways our experiences of the world are informed by literary maps. Critical approach designations: Geographies, Media. Distribution requirement: Global.

LIT 157A - Modern Ancient Drama (5)

The study of 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, Graham, Pasolini, Breuer, and von Trier, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

LIT 157C - Representations of Hamlet (5)

Examination of Shakespeare's *Hamlet* from various perspectives, including as a literary and historical object, and as a mirror of socio-political concerns. Readings include both precursors to Shakespeare and modern adaptations and revisions of the *Hamlet* story. Critical approach designations: Canons, Media. Distribution requirements: Pre-1750.

LIT 157E - Greek Drama/Modern Film (5)

A reading of ancient Greek plays along with contemporary films similar to them in theme, form, and

effect. Students discuss different definitions of tragedy; genre as a critical tool; and similarities and difference between the media of literature, drama, and film. Critical approach designations: Genres, Media. Distribution requirement: Pre-1750.

LIT 160C - Cruelty: Enjoying the Pain of Others (5)

Cruelty is the unmotivated infliction of pain on someone else. This course investigates the notion of cruelty cultures raised by Claude Levi-Strauss through the literatures of ancient Rome and 15th-16th century Mexico as well as contemporary world literature. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Global, Pre-1750.

LIT 160E - Theorizing Race and Comics (5)

Examines comics' origins in the United States' legacies of racial caricature and political cartoons about slavery, Asian exclusion, yellow journalism, and imperial expansion. Analyses of graphic novel's 20th-century evolution around human-rights violations and post-atrocity representational strategies around race, nationalism and minority status. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 160F - Topics in Cultural Studies (5)

Investigates the ways in which cultural texts--literary, aesthetic, visual, performative, and a variety of popular forms--create and transform individual experiences, everyday life, social relations, and power. Course topic changes; see the Class Search for the current topic. Critical approach designations: Media, Power and Subjectivities.

LIT 160G - Topics in Literary Theory (5)

Examination of major issues in contemporary theory, with emphasis on key concepts. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Power and Subjectivities.

LIT 160I - Race, Militarism, and Empire in Asia and the Pacific (5)

Theoretical and historical inquiry into the relationship between race, militarism, and empire; a comparative examination of the Japanese and U.S. empires in the Asia-Pacific region; and a consideration of how liberal ideologies around race were wielded as a tool of imperial governance. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 160J - Exile, Diaspora, Migration (5)

Analyzes how the figure of the refugee, migrant, and other travelling communities are produced, engaged and represented in literary texts, cultural texts, and theories. Course materials include fiction, memoir, essay, legal tracts, and film. Critical approach designations:

Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 160K - Race, Labor, and Migration (5)

Examines racialized labor from the mid-19th century to the present, including the racial protest novel as a cultural form. Investigates race, gender, and citizenship as technologies used to regulate labor and to circumscribe labor's power. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 160L - Literature and Philosophy (5)

Provides critical insight into the complex dynamics that define our historical moment through an investigation of literary and philosophical treatments. Readings include novels, plays, philosophical essays, and political commentary. The course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Power and Subjectivities.

LIT 160M - The War on Terror (5)

Investigates the logic of U.S. imperialism, with a specific focus on the War on Terror. Includes texts in critical race and ethnic studies, history, and literature, and a diverse range of media; novels, poetry, film, graphic literature, and music. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 160N - John Brown: Prophet or Fanatic? (5)

John Brown was a 19th-century advocate of the use of armed insurrection to overthrow the institution of U.S. slavery. Why has a man dismissed as a fanatic been taken up as the subject of novels, biographies, popular songs, films, and even internet memes for the past 160 years? Course explores this question through readings in literature, history, and theory. Critical approach designations: Histories, Power and Subjectivities.

LIT 160Q - (Gender)Queer Theories (5)

Examines theory and practice of (gender) queer- and trans-ness in the present historical moment. Drawing primarily on critical theory from trans and queer studies, alongside literary texts and popular culture, the course introduces intellectual and affective resources for navigating questions about gender non-normativity. Critical approach designations: Histories, Power and Subjectivities.

LIT 160R - Gangsters, Bandits and Rogues: The Image of the Outlaw from the Middle Ages to the Present (5)

Is the outlaw a revolutionary defender of the people? Or a pillager of the defenseless poor? A social outcast or a folk hero? This course explores the ambivalences and ambiguities of "the outlaw" in popular, literary, and historiographic representation. Distribution requirements: Pre-1750.

LIT 160S - Cultures of Socialism (5)

Emphasizes socialism as an important aspect of modernity. Beginning with an overview of the left avant-gardes of the early 20th century, students look at the debates about the political implications of realism, modernism, and socialist realism.

LIT 161A - African American Literature (5)

Examination of African American writing and cultural representations, with attention to the historical, cultural, and general literary contexts out of which they emerged and upon which they commented. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 161B - African American Women Writers (5)

Explores the cultural, aesthetic, political, and feminist issues in select works by African American women. Through close analysis of the works, students develop an understanding of the intersections that race, gender, and class play in the literary imaginations of these writers. Critical approach designations: Histories, Power and Subjectivities.

LIT 162A - Asian American Literature (5)

Examination of Asian American literary works (fiction, poetry, dramatic essays) in the context of the historical presence of Asian Americans in the United States since the 1850s. Emphasis on comparison of select works from ethnic Asian writings. Critical approach designations: Geographies, Power and Subjectivities.

LIT 162B - Literature of the Asian Diaspora (5)

Study of literature of the Asian diaspora, attempting to discover and define a growing body of contemporary writing under this rubric, including immigrant/migrant histories, memories of exile and refuge, as well as the fiction of imagined homelands. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 162C - So Many Little Lives: Representations of Trauma in Asian American Literature (5)

Explores representations of trauma in contemporary Asian American literature. Critical approach designations: Geographies, Power and Subjectivities.

LIT 163A - American Indian Literature (5)

Explores works of fiction, creative non-fiction, drama, and poetry written by American Indians. Focuses on historical and political issues within the text as well as on formal and thematic structures. Critical approach designations: Histories, Power and Subjectivities.

LIT 164A - Jewish Travel Narratives (5)

Exploration of the idea of the Diaspora as a moving condition, and of the multi-dimensional character of global Jewish culture, covering authors who traveled

across the Jewish world from medieval times to the present. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 164B - Hebrew Poetry (5)

Hebrew poetry-Biblical, medieval, modern-explores cultural and literary issues central to our contemporary world. Texts and discussion focus on Jewish and Israeli literary traditions. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 164C - Global Jewish Writing (5)

Comparative analysis of modern Jewish writers from Western and non-Western diasporas. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 164D - Jewish Diaspora, Ethnicity, and Urban Life (5)

Focuses on modern Jewish diaspora, ethnicity, and urban life. Critical approach designations: Geographies, Power and Subjectivities.

LIT 164G - Literature and the Holocaust (5)

Reading and analysis of fiction and poetry, focusing on Holocaust literature as a problem in critical theory, cultural studies, and literary history. Though most of the works are read in translation, some knowledge of European languages is helpful. Critical approach designations: Histories, Power and Subjectivities.

LIT 164H - Jewish Writers and the European City (5)

Interrogates the master narrative of a specific European city and discusses the ways in which Jewish life and Jewish actions helped to shape that story and were shaped by it. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities.

LIT 164J - Jewish Writers and the American City (5)

An examination of some major Jewish writers and their responses to the American city. Major writers: Henry Roth, Saul Bellow, Bernard Malamud, J. Kaplan, Philip Roth. A look at Yiddish and other minority writers, and including sociological and historical materials on the American city. The course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 164K - Jewish Comedy (5)

Examines literary, theatrical, cinematic, and televised representations of Jewish culture, focusing on the ways in which Jews have negotiated the transition to modernity via comedy and humor. Critical approach designations: Media, Power and Subjectivities.

LIT 165A - Chicano/Mexicano Geographies (5)

Considers the historical, current, and future directions of Chicano/a literary culture within the context of the long-standing exchanges of culture and politics across the U.S.-Mexican border and the challenges of globalization. Includes novels, essays, and films. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 165B - Latino Fictions of the Americas (5)

Writers in the U.S., Latin America, and the Caribbean have been drawn repeatedly to the theme of intercultural conflict as they recall the traumatic history of the hemisphere. Examining fiction, poetry, and film expands the horizons of American literature. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global. (Formerly Latin/o American Fiction.)

LIT 165C - Mesoamerican Indigenous/Indigenista Literature (5)

Analyzes literature about and by indigenous peoples in Mesoamerica: traces the construction of racialized categories of identity, such as indio and mestizo in Mesoamerican cultures and examines how they interact with definitions of the human that dominate in the West. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 166A - Representations of Gender in Medieval Literature (5)

Examination of the portrayal of gender roles and interactions. Particular stress on erotic experience and the courtly tradition: Ovid, Andreas Capellanus, Marie de France, Chretien de Troyes, The Romance of the Rose, Dante, Chaucer, Christine de Pizan. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Poetry, Pre-1750.

LIT 166B - Early Modern Representations of Gender (5)

Explores representation of gender in early modern literature, with attention to contemporary aesthetic, cultural, and theoretical contexts. Texts include drama, poetry, and prose. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 166C - Early Modern Italian Women Writers (5)

In early modern Italy several factors converged to foster a boom in women's writing and publication. Course addresses the context and content of these writings, dealing with key theoretical and historical issues surrounding women's entry into authorship in Europe. Knowledge of Italian not required. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 166E - Women's Literature (5)

Works by women from the 18th century to the present, with special attention to the relationship of literature to history, psychology, and aesthetics. Course topic changes; please see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 167B - Monsters and Humans (5)

Focuses on the historical development of what we broadly consider to be the human body from its Humanist instantiations in early modern Europe as seen through its alleged opposite: the monstrous body. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 167C - Metamorphoses: Pre/Post Modern Transformations (5)

Examines transformations between god, human, and animal from ancient literature to medieval, renaissance, modern, and postmodern (especially science) fiction and poetry. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Poetry, Pre-1750.

LIT 167E - The Vampire in Literature and Popular Culture (5)

Traces the vampire's appearance in different historical moments, cultural contexts, genres, and media to interrogate its place in the shifting cultural politics of gender and sexuality, as well as in relation to race, ethnicity, class, and other identity positions. Critical approach designations: Media, Power and Subjectivities.

LIT 167F - Animals and Literature (5)

Examines the disruptive presences of nonhuman animals and nonanimal aliens as they appear in a variety of narrative forms: prose fiction, non-fiction, and poetry. Organized around central themes relating to the presence of animals in literature, including representation, difference, desire, and subjectivity. Critical approach designations: Histories, Power and Subjectivities.

LIT 167G - Reading the Weather: Literature and Global Climate Change (5)

An overview of climate change and its representations in literary and filmic texts. Asks how climate fiction and non-fiction narratives of climate change can help us to confront issues of environmental justice, inequalities of race and class, vulnerability, land rights, and refugeehood. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 167H - Disability in Transnational Asian American

Studies (5)

Investigates U.S. imperialism in the Asia-Pacific region by focusing on race and disability; examines how disabled subjects have responded to historical and social alienation. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 167I - The Environmental Humanities (5)

Explores how literary works and other cultural products have represented and defined relationships among the living and nonliving in the environment. Topics include the history of ideas about the nature/culture divide, the interconnectedness of life and non-life, and sustainability and reciprocity in ecological crisis.

LIT 167J - Exhibiting Monsters (5)

Monsters have long been an integral part of popular culture, reflecting anxieties, desires, and imaginative possibilities across time and space. This course focuses on how students and scholars of monster studies can frame our scholarly explorations of monsters' historical and cultural popularity for a specifically popular audience: how do we transform our monster studies research into public exhibitions about monsters? This in-person, research-based course is simultaneously an introduction to monster studies and an introduction to public humanities work. Specific objects of study for this course rotate.

LIT 168A - The Culture of Islamic Law (5)

Investigates the nature of Islamic law as a set of textual and interpretive practices that change over time and is fully enmeshed with Arabic culture, as well as its representation and role in literature as a force, standard, and context. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 168B - Islamic Law and Society (5)

Introduction to Islamic Law and its development as a set of discursive practices and institutional formations, from its origins to its transformation by modern state systems. Focuses on development of legal theory as textual interpretation and translation into social practice. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 169A - White Flow(n): Race, Gender, and Material (5)

Examines the question of whiteness as race, identity, politic, and field of discourse, focusing on cultural literary and artistic production from the 1990s that brought about the field of critical white studies. Includes prose, poetry, literary theory, film, and visual art. Critical approach designations: Genres, Power and Subjectivities.

LIT 179A - Advanced Writing: Fiction (5)

Intensive work in writing fiction. Critical approach designation: Genres.

Prerequisite: Enrollment is restricted to creative writing literature majors.

LIT 179B - Advanced Writing: Poetry (5)

Intensive work in writing poetry. Critical approach designation: Genres.

Prerequisite: Enrollment is restricted to creative writing literature majors.

LIT 179C - Methods and Materials (5)

Focuses on a particular process or subject used in the production of a literary text. Course is intended to work as a bridge between invention and scholarship. Course topic changes; please see the Class Search for current topic.

LIT 181A - Biblical Hebrew, Part 1 (5)

Grammatical study interspersed with narrative excerpts from the Hebrew Bible. Recommended: previous study of a second language up to the advanced level. Critical approach designations: Canons, Histories. Distribution requirements: Global, Pre-1750.

LIT 181B - Biblical Hebrew, Part 2 (5)

Continuation of grammatical study interspersed with poetic texts from the Hebrew Bible. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry, Pre-1750. Together, Biblical Hebrew 1 and Hebrew 2 fulfill the language prerequisites for LIT 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181A or the equivalent.

LIT 181C - Coptic (5)

Intensive introduction to fundamentals of classical Coptic grammar (Sahidic dialect) designed to move rapidly into reading of primary texts. Readings include The Martyrdom of S. Coluthus, Gospel of Thomas, and the Gnostic treatise Thunder: Perfect Mind. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 181D - Reading Egyptian Hieroglyphs, Part 1 (5)

Introduction to Egyptian hieroglyphs as a graphic, conceptual, and communicative system. Covers the basic elements of classical Egyptian grammar, drawing primarily on inscriptions from extant Egyptian monuments. Students read one prose and one poetical text from the Middle Kingdom. Critical approach designations: Geographies, Media. Distribution requirement: Global, Pre-1750. Strongly recommended: two years previous study of a foreign language at the college level or the equivalent.

LIT 181E - Reading Egyptian Hieroglyphs, Part 2 (5)

Advanced Middle Egyptian grammar (two weeks). Close reading of the Tale of Sinuhe in Middle Egyptian, selected hymns and love poetry from the New Kingdom. Critical approach designations: Genres, Geographies. Distribution requirement: Global, Poetry, Pre-1750. Together, LIT 181D and LIT 181E, Egyptian Hieroglyphs 1 and 2, fulfill the language prerequisites for LIT 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181D.

LIT 181F - Reading Egyptian Hieroglyphs, Part 3 (5)

Close reading of the Tale of Sinuhe in Middle Egyptian. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry, Pre-1750.

Prerequisite: Prerequisite(s): LIT 181E.

LIT 181G - Sanskrit, Part 1 (5)

Systematic introduction to the grammar, syntax, and usage of Classical Sanskrit, to the oral dimensions of the language, and to the Sanskrit literary tradition. Critical approach designations: Canons, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 181H - Sanskrit, Part 2 (5)

Continued study of the grammar, syntax, and usage of Classical Sanskrit, and the Sanskrit literary tradition. Students read the entire Bhagavad-Gita, including key sections in the original Sanskrit. Critical approach designations: Canons, Geographies. Distribution requirements: Global, Poetry, Pre-1750. Together, LIT 181G and LIT 181H, Sanskrit Parts 1 and 2, fulfill the language prerequisites for Literature 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181G.

LIT 182A - Le Moyen Age (5)

Speaking, reading, and writing proficiency in French required. Study of 12th- and 13th-century texts, with attention to problems of history and social change. In modern translations with selected readings in Old French or Provençal. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 182E - Etudes de Poésie (5)

Speaking, reading, and writing proficiency in French required. Emphasizes the close study of a limited number of poetic texts in terms of their linguistic, stylistic, and rhetorical devices. Course topic changes; please see Class Search for current topic. Critical approach designations: Genres, Geographies. Distribution requirement: Poetry.

LIT 182F - Le théâtre (5)

Speaking, reading, and writing proficiency in French required. Studies in French drama and theories of theatricality. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Media.

LIT 182H - Auteur et culture (5)

Speaking, reading, and writing proficiency in French required. Designed to provide an in-depth study of a given author's literary oeuvre and its cultural context. Course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories.

LIT 182I - Littérature d'expression française hors de France (5)

Speaking, reading, and writing proficiency in French required. A study of texts written in French-speaking cultures: Belgium, Canada, Africa, the Caribbean. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 182J - Theorie (5)

Speaking, reading, and writing proficiency in French required. A discussion of recent developments in French literary theory. Critical approach designations: Canons, Geographies.

LIT 182K - Textes et contextes (5)

Speaking, reading, and writing proficiency in French required. Examines implications of social and political change in terms of literary theory and practice. Places equal emphasis on literary and other kinds of cultural texts: historical, political, and cinematic. Course topic changes; please see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 182L - Science-Fiction Française (5)

Speaking, reading, and writing proficiency in French required. Course considers several French literary and cinematic examples of contemplating the present through the future and the past. Learn how reading across different cultural contexts can blur the distinction between "science" and "fiction"; how to read fictional texts alongside the films they inspire; and how to produce more effective essays and presentations in French. Critical approach designations: Genres, Media.

LIT 183A - Einführung in der deutschen Literatur (5)

Speaking, reading, and writing proficiency in German required. Wide reading of works representing the major authors, periods, and genres of German literature. Critical approach designations: Canons, Geographies.

LIT 183B - Themen in deutscher Literatur und Kultur (5)

Speaking, reading, and writing proficiency in German required. Course studies German literature and culture,

with attention to historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 183D - Die deutsche Romantik (5)

Speaking, reading, and writing proficiency in German required. A study of the emergence and development of German Romanticism. Central concerns are the Romantics' attitude toward the role of the imagination in literature and their attempts to revitalize myth and folklore in their works. Authors read include Tieck, Novalis, Hoffmann, Eichendorff, and Heine. Critical approach designations: Genres, Histories.

LIT 183F - Die deutsche Novelle (5)

Speaking, reading, and writing proficiency in German required. A study of Novellen of the major 19th-century German authors. Critical approach designations: Canons, Genres.

LIT 183G - Deutsche Komödie (5)

Speaking, reading, and writing proficiency in German required. A study of a series of comic works by authors writing in German. In addition to discussing the texts in depth, we also look at theories of humor and laughter developed by thinkers such as Freud, Schopenhauer, and Bergson. Critical approach designations: Canons, Media.

LIT 183H - Das deutsche Drama (5)

Speaking, reading, and writing proficiency in German required. Selected readings of major German dramatists; attention given to various movements in theater. Critical approach designations: Canons, Media.

LIT 183I - Deutscher Film: Geschichte, Kultur, Gesellschaft (5)

Speaking, reading, and writing proficiency in German required. Course plots the thematic and formal trajectories of cinema in the German Democratic Republic between 1946 and 1992 to examine the key stress lines of socialist culture in East Germany. Critical approach designations: Histories, Media. (Formerly German Cinema: History, Culture, and Society.)

LIT 183K - Moderne deutsche Literatur und Film (5)

Speaking, reading, and writing proficiency in German required. Discusses a range of modern and contemporary German texts, including poetry, drama, and film. Critical approach designations: Geographies, Media.

LIT 183M - Moderne deutsche Fiktion (5)

Speaking, reading, and writing proficiency in German required. Selected readings from the novel and novella in 20th-century German literature. Critical approach designations: Genres, Geographies.

LIT 183N - Modern Deutsche Lyrik (5)

Speaking, reading, and writing proficiency in German required. Intensive analysis of selected poems is complemented by broader reading in certain authors and periods. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 183P - Fremdenangst: Ausländerfeindlichkeit in der deutschen Literatur und Kultur (5)

Speaking, reading, and writing proficiency in German required. Considers recent violence against immigrants and asylum-seekers in Germany, and moves on to examine images of people perceived as foreign or alien in German literature and culture from early times to the present. Critical approach designations: Genres, Power and Subjectivities.

LIT 184A - Introduction to Greek Literature (5)

Reading proficiency in Ancient Greek required. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 184B - Greek Drama (5)

Reading proficiency in Ancient Greek required. Course topic changes; see the Class Search for current topic. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184C - Greek Poetry (5)

Reading proficiency in Ancient Greek required. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184D - Prose Authors (5)

Reading proficiency in Ancient Greek required. Course topic changes; see Class Search for the current topic. Critical approach designations: Canons, Genres. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184E - Special Topics in Greek Literature (5)

Reading proficiency in Ancient Greek required. Readings in selected ancient Greek texts. Course topic changes; see the Class Search for current topic. Focus is on translation and interpretation; requirements normally include translation exams and interpretive essays. Critical approach designations: Canons, Genres. Distribution requirements: Global, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 185B - Letteratura e cultura italiana (5)

Speaking, reading, and writing proficiency in Italian required. In-depth examination of a topic in Italian literary and cultural studies. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 185H - L'Opera italiana (5)

Speaking, reading, and writing proficiency in Italian required. Explores Italian opera as dramatic and spectacular cross-cultural phenomenon beginning in 1590s Florence through the 19th and 20th centuries. Attention to opera's function as a medium of cultural translation and political critique. Critical approach designations: Genres, Media. Prerequisite(s): Two years of university study of Italian language, or equivalent proficiency.

LIT 185I - Teatro italiano (5)

Speaking, reading, and writing proficiency in Italian required. Survey of Italian theater from its beginnings in medieval ritual through the development of Renaissance staged comedy and the commedia dell'arte, pastoral and tragicomedy, opera, melodrama, and 20th-century avant-garde and political theater. Critical approach designations: Genres, Media.

LIT 185J - Poesia moderna (5)

Speaking, reading, and writing proficiency in Italian required. Study of development of the Italian lyric from romanticism to present, with close stylistic and thematic analyses of works of Leopardi, D'Annunzio, Ungaretti, Quasimodo, Pavese, and Montale. Critical approach designations: Canons, Genres. Distribution requirement: Poetry.

LIT 185L - La novella italiana (5)

Speaking, reading, and writing proficiency in Italian required. Surveys short fiction in Italian, from bawdy medieval novellas to folk tales edited in the 19th century, to psychological and character studies. Focuses on the formal properties that distinguish short fiction from romances and novels and the social functions these writings can perform. Critical approach designations: Genres, Geographies.

LIT 185M - Fascismo e resistenza (5)

Speaking, reading, and writing proficiency in Italian required. The relationship between literature and Italian fascism is explored, including the rise and myths of fascism, critique and censorship, the persecution of minorities, the Resistance, the role of the intellectual. Authors include Borgese, Vittorini, Bassani, Pavese. Critical approach designations: Histories, Power and Subjectivities.

LIT 185N - Le donne nell'Italia moderna (5)

Speaking, reading, and writing proficiency in Italian required. Explores the specificity of Italian women's

writing and studies their literary activities in historical and social context. Readings include Italian feminist and some history as well as literary texts. Critical approach designations: Geographies, Power and Subjectivities.

LIT 185O - "I need a hero:" Ariosto's (Un)Epic Renaissance (5)

Speaking, reading, and writing proficiency in Italian required. In this course, we will study the Italian Renaissance adventure poem by Ludovico Ariosto, *Orlando Furioso* (1532) and we will use it to penetrate the cultural, spiritual, and political tensions that marked the passage from pre- to early-modernity in the West. Distribution requirements: Poetry, Pre-1750.

LIT 185P - Boccaccio: Decameron (5)

Speaking, reading, and writing proficiency in Italian required. Critical study of *The Decameron*. Critical approach designation: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 185Q - Dante: *Divina Commedia* (5)

Speaking, reading, and writing proficiency in Italian required. Reading of the *Inferno*, the *Purgatorio*, and selected *canti* of the *Paradiso*, along with selections from Dante's lyrics and from medieval Italian and French poetry. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 185S - Petrarca (5)

Speaking, reading, and writing proficiency in Italian required. The transition from medieval to Renaissance modes of poetry in the works of Francesco Petrarca. Readings in the *Rime Sparse*, the *Trionfi*, and the prose works. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 185Z - Italian Studies Writing in the Discipline (1)

Concurrent enrollment in an approved upper-division course in Italian literature, history of art and visual culture, or history satisfies the Disciplinary Communication requirement in Italian studies. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. Enrollment restricted to Italian studies majors and by permission of instructor.

LIT 186A - Introduction to Latin Literature (5)

Reading proficiency in Latin required. Course topic changes; see Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 186B - Roman Poetry (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 186C - Prose Authors (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 186D - Special Topics in Latin Literature (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 188A - *Literatura medieval* (5)

Speaking, reading, and writing proficiency in Spanish required. Focuses on Spanish medieval literature, broadly covering the 12th to the 15th centuries. Examines and contextualizes literary genres developed in this period. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750. (Formerly Medieval Spanish Literature.)

LIT 188B - *Literatura peninsular: de los orígenes al siglo XVIII* (5)

Speaking, reading, and writing proficiency in Spanish required. A critical study of several representative texts from the early period of Spanish literature in their sociohistorical context. Included among the readings are *El Poema del Cid*, the *Romancero*, *La Celestina*, *Lazarillo de Tormes*, and a Golden Age play. Critical approach designations: Geographies, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 188E - *Teatro del Siglo de Oro español* (5)

Speaking, reading, and writing proficiency in Spanish required. Studies in Spanish Golden Age theater. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

LIT 188F - *Cuentos del Siglo de Oro español* (5)

Speaking, reading, and writing proficiency in Spanish required. Focuses on the prose in the Renaissance period and the different genres that flourished before the creation of Cervantes' *Don Quixote*. Chosen texts constitute an amalgam of Renaissance ideology, and provide examples of 16th-century literature, including the picaresque novel, pastoral novel, the Byzantine novel, and the chivalresque novel. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188G - *Literaturay vida en Don Quijote y otros*

textos cervantinos (5)

Speaking, reading, and writing proficiency in Spanish required. A close reading of the works of Cervantes, with particular attention to *Don Quijote*, in an attempt to discover how these works reflect the conflictive period in which the author lived. Also looks closely at the Cervantine view of the relationship of literature to life, as manifested in the works under study. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 188H - Erotismo y Mística (5)

Speaking, reading, and writing proficiency in Spanish required. Examines the connections between erotic literature and mystical literature through poetic representations of sublime where Eros and Thanatos meet. As symbolisms of mystical and erotic experiences fuse and confuse each other, we are able to establish connections between Sufi, Hindi, and Judeo-Christian mystical poetry. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188I - La novela picaresca (5)

Speaking, reading, and writing proficiency in Spanish required. The picaresque novel of 16th-century Spain considers the fictive environment as reality in order to introduce its protagonist as a rebel against social dominion. The picaresque novel is the only literary genre comparable to what is now called literature of social protest. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188L - Literatura de la guerra civil española (5)

Speaking, reading, and writing proficiency in Spanish required. Examines literature related to the period of the Spanish Civil War (1936-39) and the Franco years (1939-75). Includes works by Spanish writers in exile during this period; also examines literary texts written prior to the outbreak of the war. Critical approach designations: Histories, Power and Subjectivities.

LIT 188M - Literatura peninsular: siglos XIX y XX (5)

Speaking, reading, and writing proficiency in Spanish required. A critical study of several representative texts from this period of Spanish literature. Critical approach designations: Geographies, Histories.

LIT 188R - Humanidades Ambientales (5)

Considers salient aspects of environmental aesthetics and ecological thinking in Latin America in a variety of genres including memoir, children's literature, graphic literature, documentary film, and visual arts. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 188Z - Literatura de España (5)

Speaking, reading, and writing proficiency in Spanish required. Examines works by Spanish authors with attention to historical and cultural as well as literary

issues. Course topic changes, see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 189A - De la conquista a Sor Juana (5)

Speaking, reading, and writing proficiency in Spanish required. A study of Hispanic American and Peninsular literatures from the chronicles of the conquest through the 17th century. Readings deal with transformations in both the idea of empire and the rights of the conquered. Includes the works of Colon, Cortes, El Inca Garcilaso de la Vega, Sor Juana Ines de la Cruz, and others. Critical approach designations: Canons, Histories. Distribution requirements: Global, Pre-1750.

LIT 189B - El Siglo XIX en America Latina: cultura, política y sociedad (5)

Speaking, reading, and writing proficiency in Spanish required. Follows the literary manifestations of the growing consciousness of the Latin American writer: discovery of native themes, comparative analysis of Spanish American and Peninsular European models, search for a new language literally and figuratively. Relates historical events with literary movements. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189C - Introducción a Spanish Studies (5)

Speaking, reading, and writing proficiency in Spanish is required. Explores the social, cultural, economic, and political changes that connect Latin America, Spain, and the United States Latina/o communities. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or permission of instructor.

LIT 189D - Sor Juana Ines de la Cruz (5)

Speaking, reading, and writing proficiency in Spanish required. An in-depth examination of the life and work of Sor Juana Ines de la Cruz, a 17th-century nun, poet, playwright, and woman of genius and intellectual prowess whose ideas and accomplishments were ahead of her time. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 189E - Cuba (5)

Speaking, reading, and writing proficiency in Spanish required. Examines Cuban literature and culture, with attention to historical context. Course topic changes: please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189F - Literaturas Latinas en los Estados Unidos: en inglés, español y Spanglish (5)

Speaking, reading, and writing proficiency in Spanish required. Spanish-based, English/bilingual inclusive overview of Latino/a writing in the U.S. Critical

approach designations: Genres, Geographies.
Distribution requirement: Global.

LIT 189G - Cine y Literatura (5)

Speaking, reading, and writing proficiency in Spanish required. Analysis and interpretation of Spanish-language films derived from literary works by Latin American and Spanish authors. Topic changes; see the Class Search for current topic. Critical approach designations: Genres, Media. Distribution requirement: Global.

LIT 189H - La Globalizacion en/del Cine Latin/o Americano (5)

Speaking, reading, and writing proficiency in Spanish required. Examines globalization of Latin/o American cinema as a cultural industry. Classical issues of cultural politics and political economy are revisited from the viewpoint of current global processes. Also provides access to the representation of different aspects of globalization in Latin/o American cinema. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 189I - Literatura e indigeneidad (5)

Speaking, reading, and writing proficiency in Spanish required. Course examines the history, representation, and politics of Indigeneity and Indigenous literature in Latin America by analyzing novels, short stories, transcribed oral tradition, film, and radio. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189K - El ensayo latinoamericano (5)

Speaking, reading, and writing proficiency in Spanish required. A study of the essay in Spanish America from Sarmiento to the present, concentrating on problems of national or cultural identity. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189L - Poesía latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Poets from modernismo to the present in Spanish America. Studies how this poetry attempts to define Latin America, its past, its present history, and its vision for the future. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry.

LIT 189M - Prosa contemporánea hispanoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Examines contemporary Spanish American prose. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 189N - Latinoamericano testimonio (5)

Speaking, reading, and writing proficiency in Spanish required. Contemporary non-fiction testimonial literature of Latin America. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 189O - El Cuento Hispanoamericano: Variedades estéticas de la literatura breve en América Latina (5)

Speaking, reading, and writing proficiency in Spanish required. Explores various aesthetics of the Latin American short story including fantastic, detective, metaliterary, social critique, historical, and philosophical writings. Critical approach designations: Canons, Genres. Distribution requirement: Global.

LIT 189P - Las mujeres en la literatura latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Literary and sociological writings by and about women in Latin America-in Hispanic, indigenous, and African-Latino communities; in rural and urban settings; in historical and contemporary periods. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189Q - Ficción y marginalidad (5)

Speaking, reading, and writing proficiency in Spanish required. Marginalized perspectives take center stage in this course that studies ways Latin American/Latino authors textually contest dominant representations and realities, opening symbolic spaces for emergent historical subjects who gain agency and authority by re/presenting unmapped terrains. Texts include chronicles, testimonios, writings of the self, and novels. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189R - La Novela de la Dictadura (5)

Speaking, reading, and writing proficiency in Spanish required. An analysis of novels which focus on the theme of dictators and the rhetoric of dictatorships in Latin America. Texts are studied as literary manifestations of particular historical and political periods. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 189S - La cultura popular en la narrativa latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Explores short stories and novels that have been greatly influenced by popular culture, not only in theme, but also by appropriation of popular forms of language and modes of representation. Includes works by authors from Mexico, Argentina, Cuba, and Colombia. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 189T - Historia de la lectura y los lectores: Recepción y consumo cultural en el mundo Latino

Americano (5)

Speaking, reading, and writing proficiency in Spanish required. Explores historical readers and reading practices in at least three different formations: colonial, national-popular, and transnational. Proposes a historical-theoretical reconstruction of the place of reading and readers at key moments in the history of culture in Latin America. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 189U - Modernidad y literatura: El Boom de la novela latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Explores the relationships between literature and mass culture, modernization, and globalization through the study of the so-called Boom of Latin American narrative. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 189V - Andean Indigenismo (5)

An introduction to the indigenista movement in Peru, Bolivia, Ecuador, and Paraguay, and to the literary and ideological debates surrounding it. Authors include Mariategui, Gonzalez Prada, Arguedas, Icaza, Alegria, and Vallejo. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189X - Estudios mediaticos (5)

Investigates film, radio, video games, new media, and other newly emergent forms of cultural production in the Spanish-speaking world. Topics may include the historical study of media, media-focused analysis of literary texts, and new media translation. The course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Media.

LIT 189Z - Literatura de Chile (5)

Speaking, reading, and writing proficiency in Spanish required. Focusing on narrative and poetry in Chile and their transformations during the 20th century, course examines the relationships between literature, nation, and representation. Critical approach designations: Canons, Histories. Distribution requirement: Global.

LIT 190A - Topics in Pre- and Early Modern Studies (5)

Examination of individual authors or critical problems in ancient, medieval, or early modern/Renaissance literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirements: Pre-1750, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190F - Studies in Poetry (5)

Studies in English-language poetry. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190I - Individual Authors (5)

Intensive examination of works by individual authors. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190J - Studies in English Language Literature (5)

Studies of selected authors or issues in English language literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior Literature majors.

LIT 190K - Studies in U.S. Literature (5)

Intensive examination of issues in U.S. literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190L - Topics in World Literature and Cultural Studies (5)

Course topic changes; see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Global, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190N - Studies in 19th-Century British Literature (5)

Study of selected authors or issues in 19th-century British literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190O - Studies in Slavery, Race, and Nation in the Americas (5)

Compares literatures and histories of slavery, abolitionism, and nationalism in 19th-century Cuba and

the U.S. Readings include slave narratives and antislavery novels. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Global, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190T - Topics in Modern Literary Studies (5)

Selected authors or issues in modern literary and cultural studies. Course topic changes; see the Class Search for current topic. Critical approach designation: Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190U - Topics in Theory (5)

Advanced work in theory (e.g., cultural, ideological, literary, social). Course topic changes; see the Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors and minors.

LIT 190V - Fiction Senior Seminar (5)

Satisfies the Creative Writing Literature concentration; also satisfies the senior seminar distribution requirement. Critical approach designation: Media. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior creative writing literature majors.

LIT 190W - Poetry Senior Seminar (5)

Satisfies the Creative Writing Literature concentration; also satisfies the senior seminar distribution requirement. Critical approach designation: Media. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior creative writing literature majors.

LIT 190X - Temas de la literatura y cultura espanolas y latinoamericanas (5)

Speaking, reading, and writing proficiency in Spanish is required. Examines authors or issues in Spanish and Latin American literature and cultures. Course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar. Spanish studies majors may use this course to satisfy the Spanish studies senior exit requirement.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190Y - Topics in Jewish Literature and Culture (5)

Study of selected authors or issues related to modern Jewish literature and culture. Topic changes; please see

the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Senior Seminar. Jewish Studies majors may use this course to satisfy the Jewish Studies senior exit requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and LIT 101 (for literature majors). Enrollment is restricted to senior literature and Jewish studies majors.

LIT 190Z - Topics in German Literature and Culture (5)

Study of selected authors or issues related to German literature and culture. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar. German studies majors may use this course to satisfy the German studies senior exit requirement.

Prerequisite: Prerequisite(s): LIT 101 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior German studies and literature majors.

LIT 191 - Methodologies of Teaching (3)

This three-credit course provides students with the theoretical and practical knowledge to help others become more careful, sensitive, and sophisticated readers of complex texts. Enrollment by permission of the instructor.

LIT 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See LIT 42.)

LIT 195A - Senior Essay (5)

Study of literature in English or English translation. Satisfies the Literature major senior exit distribution requirement. Students submit petition to sponsoring agency. Prerequisite(s): LIT 101. Enrollment is restricted to seniors.

LIT 195B - Senior Essay (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Satisfies the Literature major senior exit distribution requirement. Students submit petition to sponsoring agency. Prerequisite(s): LIT 101. Enrollment is restricted to seniors.

LIT 195C - Senior Essay (5)

Satisfies the Creative Writing senior exit distribution requirement. Prerequisite(s): LIT 101. Students submit petition to sponsoring agency. Enrollment restricted to senior creative writing literature majors.

LIT 198A - Group Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 198B - Group Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English language required. Students submit petition to sponsoring agency.

LIT 198C - Group Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 199A - Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 199B - Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English language required. Students submit petition to sponsoring agency.

LIT 199C - Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

LIT 200 - Proseminar (5)

The proseminar provides a common experience for entering students, facilitates exchange of ideas and approaches to literary and extra-literary texts, critical issues, and theoretical problems. It focuses on broad aspects of the history of theory and criticism, on the students' critical writing, and on aspects of professional development.

Prerequisite: Enrollment is restricted to graduate students.

LIT 201 - The Pedagogy of Literature (2)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of literature specifically. Coordinated by a graduate student who has had substantial experience as a teaching assistant, under the supervision of a faculty member.

Prerequisite: Enrollment is restricted to graduate students.

LIT 202 - Colloquium (2)

Student receives credit for attending a designated number of freestanding lectures, colloquia, symposia, or conferences during the term and reports orally, or in writing, to instructor. Enrollment restricted to graduate students.

LIT 204 - Readings in Literature (2)

Focuses on selected texts or authors in literature and/or theory. Students meet with instructor to discuss readings and deepen their knowledge on a particular author, critic, theorist, or text.

Prerequisite: Enrollment is restricted to graduate students.

LIT 205 - Writing and Publication Practicum (2)

Introduces the methods and practice of dissertation writing and publication in literature. Workshop format. Meets one hour per week.

Prerequisite: Enrollment is restricted to graduate students.

LIT 206 - Critical Writing Practicum (5)

Reinforces writing and revision skills in the discipline of literary and cultural criticism and theory, covering various genres of writing in the profession. Designed for students preparing for QE or dissertation work. Workshop structure.

Prerequisite: Enrollment is restricted to graduate students.

LIT 221 - Canons (5)

Considers literary canon formation through the lens of neglected or lost works by authors otherwise considered peripheral because of their language, cultural tradition, or regional affiliation.

Prerequisite: Enrollment restricted to graduate students.

LIT 222 - Topics in English Language Literature (5)

Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 223 - Periods and Movements (5)

Examines a particular historical period or literary movement. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 224 - Transnational Literatures (5)

Investigation of English language literature which transcends national boundaries. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230A - Topics in Theory (5)

Explores issues arising in both the modern practice of criticism and in writings on the theory of criticism.

Course topic changes; please see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230B - Narrative Theory (5)

A survey of 20th-century narratology, emphasizing structuralist and poststructuralist theories of narrative.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230C - Feminist Theories/Historical Perspectives (5)

A critical examination of feminist and related theories (queer, critical race, post-humanist) and criticism in historical and culturally specific contexts.

Prerequisite: Enrollment is restricted to graduate students.

LIT 231A - Studies in Literary and Cultural History (5)

Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 237A - Modernism (5)

Focuses on modernism and the intellectual and social forces which help illuminate that period. Considers concepts by which the innovative tendencies in 20th-century modernist literature and arts have been theorized and periodized, including high and late modernism, avant-garde and experimental, and the concept of global modernisms.

Prerequisite: Enrollment is restricted to graduate students.

LIT 240G - History and Tragedy (5)

Examines history, tragedy, and early science as ways of representing human experience in the Western canon. Topics include truth claims and questions of evidence, the nature of historical events, and tragedy as a political medium.

Prerequisite: Enrollment is restricted to graduate students.

LIT 243A - Studies in Early Modernity (5)

In-depth examination of a topic in Early Modern Studies. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 243B - Early Modern Colonial Encounters (5)

This course will examine primary texts and interpretations, both fictional and archival, of the encounter between western Europe and non-European

populations affected by European expansion from the 15th through the 18th centuries.

Prerequisite: Enrollment is restricted to graduate students.

LIT 246 - Individual Authors (5)

Focuses on work of a single author in literary historical and/or historical context. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 250 - Theory and Methods (5)

Global theories of history and cultural production. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 251 - Topics in Cultural Studies (5)

The course topic changes; see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 254 - Religion and Post-Secular (5)

An introduction to religion studies theory with emphasis on areas pertinent to literary and cultural studies and structured around the idea of the sacred text as scripture, as performed ritually and legally in society, and as problematized by post-colonial perspectives.

Prerequisite: Enrollment is restricted to graduate students.

LIT 279A - Methods and Materials (5)

A combined seminar and creative-writing workshop with a concentrated focus on a particular problem, aspect, or genre of poetry or prose writing. Includes reading and analysis of selected texts with critical responses and creative writing. Explores the productive interaction between various practices of scholarship and creative invention. The course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 279B - Writing Studio (5)

In this graduate-level, multi-genre course, students develop their own creative projects of publishable quality under the guidance of the instructor.

Prerequisite: Enrollment is restricted to graduate students in the creative/critical concentration or by permission of the instructor.

LIT 282A - Studies in Literary Genres (5)

An in-depth examination of one genre of French literature. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282B - Studies in Literary and Cultural History (5)

In-depth examination of one period of French literature. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282C - Texts and Contexts (5)

The implications of social and political change examined in terms of literary theory and practice. Equal emphasis placed on literary and other kinds of cultural texts: historical, political, cinematic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282D - Topics in Theory (5)

Prerequisite: Enrollment is restricted to graduate students.

LIT 282F - French Literature Outside France (5)

A study of texts written in French-speaking cultures: Belgium, Canada, Africa, the Caribbean.

Prerequisite: Enrollment is restricted to graduate students.

LIT 283A - Deutsche Literatur und Kultur (5)

Examination of topics within German literature. Course topic changes; see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 285H - Studies in Italian Literature and Culture (5)

Reading proficiency in Italian is required. Close examination of a topic in Italian literature and culture. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288C - Don Quijote (5)

Concentrates on the study and analysis of Miguel de Cervantes' major work *Don Quijote*, with a three-part structure: life and literature in *Don Quijote*; Cervantes-the father of the modern novel; and madness and ingenio in *Don Quijote*.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288F - Writing and Re-Writing of the Conquest and Colonial Period in Spanish America (5)

Study of 1) the writings (chronicles, memoirs, diaries, letters) comprising European and indigenous accounts of the encounter and indigenous, criolla, and mestiza writings during the colony; and 2) the re-writings of these events in contemporary post-colonial novels.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288M - Cuba (5)

Course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288O - The Conquest through the Eyes of Contemporary Writers (5)

Analyzes contemporary writers who fictionalize the phenomenon of the conquest of the Americas. These authors, who combine chronicles, biographies, and accounts with fiction, offer an imaginative way to view history.

LIT 288P - The Avant Garde in Latin America (5)

Emerging from a Europe in crisis, this 20th-century avant-garde movement opened a space in Latin/o American literature for the emergence of a post-western aesthetic exploring a cultural identity in difference. A deconstruction of vanguardismo, lo real maravilloso, lo fantástico, lo mítico-antropológico, and realismo mágico.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288S - Citiscapes (5)

Theories of space/place poetics and politics, and the literary and visual re-presentations of urban spaces in Latin/o America. Questions of identity and location in modernist poetics, and the ways difference (gender, ethnicity, and sexuality) inhabit and imagine the post-modern lettered city.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288U - Spain in the Eyes/Camera of Pedro Almodovar (5)

Contemporary Spain through the camera of Pedro Almodovar from transgressive enthusiasm, experimentation, and cultural disobedience of the 1980s to more universal themes of human nature and borderline experiences in the pursuit of love, relationships, beauty, and art.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288W - Becoming European (5)

Course considers the process of globalization as it has affected Spain in the last ten years. Through the study of a variety of cultural texts, it explores the challenges presented to national identity and the emergence of new subjectivities and collective identities.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288Y - Teoria Critica en America Latina (5)

Overview of contemporary theoretical issues in Latin American cultural critique. Course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288Z - Literatura y sociedad (5)

Analyzes the relationship between Latin American cultural products and their cultural, economic, and political contexts. The course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 291F - Advising (2)

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess, and monitor academic progress and to evaluate coursework as necessary. May be used to develop general bibliography of background reading and trajectory of study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 293 - Independent Study: Creative Writing (5)

Individual study with a professor in the creative/critical concentration. Written work is required. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with teaching of undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295A - Directed Reading (5)

Study of literature in English or English translation. Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295B - Directed Reading (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-

English language required. Directed reading which does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295C - Directed Reading (5)

Study of creative writing. Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296A - Special Student Seminar (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296B - Special Student Seminar (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Directed reading which does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296C - Special Student Seminar (5)

Study of creative writing. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 297A - Independent Study (5)

LIT 297B - Independent Study (10)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 297F - Independent Study (2)

Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 299A - Thesis Research (5)

Thesis Research

LIT 299B - Thesis Research (10)

Thesis Research

MATH - MATHEMATICS

Lower-Division

MATH 2 - College Algebra for Calculus (5)

Operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs;

conic sections; mathematical models; sequences and series.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher. Students may not enroll in or receive credit for MATH 2 after receiving credit with a 'C' or better in AM 3, MATH 3, AM 11A, MATH 11A, MATH 19A, MATH 20A or equivalents.

MATH 2S - College Algebra for Calculus (2)

This two-credit, stretch course offers students two quarters to master material covered in MATH 2: operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series. After successful completion of this course in the first quarter, students enroll in MATH 2 the following quarter to complete the sequence and earn an additional 5 credits.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher.

MATH 2T - Preparatory Math: Tutorial (2)

Independent study of algebra and modern mathematics using adaptive learning software. Instruction emphasizes clear mathematical communication and reasoning when working with sets, equations, functions, and graphs. Drop in labs, online forums, and readings provide opportunities for further learning and exploration.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher.

MATH 3 - Precalculus (5)

Inverse functions and graphs; exponential and logarithmic functions, their graphs, and use in mathematical models of the real world; rates of change; trigonometry, trigonometric functions, and their graphs; and geometric series. Students cannot receive credit for both MATH 3 and AM 3.

Prerequisite: Prerequisite(s): MATH 2 or mathematics placement (MP) score of 200 or higher. Students may not enroll in or receive credit for MATH 3 after receiving credit with a 'C' or better in AM 11A, MATH 11A, MATH 19A, MATH 20A or equivalents.

MATH 4 - Mathematics of Choice and Argument (5)

Techniques of analyzing and creating quantitative arguments. Application of probability theory to questions in justice, medicine, and economics. Analysis and avoidance of statistical bias. Understanding the application and limitations of quantitative techniques.

Prerequisite: Prerequisite(s): MATH 2, or mathematics placement (MP) score of 200 or higher, or AP Calculus AB examination score of 3 or higher.

MATH 11A - Calculus with Applications (5)

A modern course stressing conceptual understanding, relevance, and problem solving. The derivative of polynomial, exponential, and trigonometric functions of a single variable is developed and applied to a wide range of problems involving graphing, approximation, and optimization. Students cannot receive credit for both this course and MATH 19A, or AM 11A, or AM 15A, or ECON 11A.

Prerequisite: Prerequisite(s): MATH 3 or AM 3; or mathematics placement (MP) score of 300 or higher; or AP Calculus AB exam score of 3 or higher.

MATH 11B - Calculus with Applications (5)

Starting with the fundamental theorem of calculus and related techniques, the integral of functions of a single variable is developed and applied to problems in geometry, probability, physics, and differential equations. Polynomial approximations, Taylor series, and their applications conclude the course. Students cannot receive credit for this course and MATH 19B, or AM 11B, or AM 15B, or ECON 11B.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or AM 15A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher.

MATH 19A - Calculus for Science, Engineering, and Mathematics (5)

The limit of a function, calculating limits, continuity, tangents, velocities, and other instantaneous rates of change. Derivatives, the chain rule, implicit differentiation, higher derivatives. Exponential functions, inverse functions, and their derivatives. The mean value theorem, monotonic functions, concavity, and points of inflection. Applied maximum and minimum problems. Students cannot receive credit for both this course and MATH 11A, or AM 11A, or AM 15A, or ECON 11A.

Prerequisite: Prerequisite(s): MATH 3; or mathematics placement (MP) score of 400 or higher; or AP Calculus AB exam score of 3 or higher.

MATH 19B - Calculus for Science, Engineering, and Mathematics (5)

The definite integral and the fundamental theorem of calculus. Areas, volumes. Integration by parts, trigonometric substitution, and partial fractions methods. Improper integrals. Sequences, series, absolute convergence and convergence tests. Power series, Taylor and Maclaurin series. Students cannot receive credit for both this course and MATH 11B, or AM 11B, or AM 15B, or ECON 11B.

Prerequisite: Prerequisite(s): MATH 19A or MATH 20A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher.

MATH 20A - Honors Calculus (5)

Methods of proof, number systems, binomial and geometric sums. Sequences, limits, continuity, and the definite integral. The derivatives of the elementary functions, the fundamental theorem of calculus, and the main theorems of differential calculus.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 500 higher; or AP Calculus AB examination score of 4 or 5; or BC examination of 3 or higher; or IB Mathematics Higher Level examination score of 5 or higher.

MATH 20B - Honors Calculus (5)

Orbital mechanics, techniques of integration, and separable differential equations. Taylor expansions and error estimates, the Gaussian integral, Gamma function and Stirling's formula. Series and power series, numerous applications to physics.

Prerequisite: Prerequisite(s): MATH 20A.

MATH 21 - Linear Algebra (5)

Systems of linear equations matrices, determinants. Introduces abstract vector spaces, linear transformation, inner products, the geometry of Euclidean space, and eigenvalues. Students cannot receive credit for this course and AM 10.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 11A or AM 15A.

MATH 22 - Introduction to Calculus of Several Variables (5)

Functions of several variables. Continuity and partial derivatives. The chain rule, gradient and directional derivative. Maxima and minima, including Lagrange multipliers. The double and triple integral and change of variables. Surface area and volumes. Applications from biology, chemistry, earth sciences, engineering, and physics. Students cannot receive credit for this course and MATH 23A.

Prerequisite: Prerequisite(s): MATH 11B or MATH 19B or MATH 20B or AM 15B or AP calculus BC exam score of 4 or 5.

MATH 23A - Vector Calculus (5)

Vectors in n-dimensional Euclidean space. The inner and cross products. The derivative of functions from n-dimensional to m-dimensional Euclidean space is studied as a linear transformation having matrix representation. Paths in 3-dimensions, arc length, vector differential calculus, Taylor's theorem in several variables, extrema of real-valued functions, constrained extrema and Lagrange multipliers, the implicit function theorem, some applications. Students cannot receive credit for this course and MATH 22 or AM 30.

Prerequisite: Prerequisite(s): MATH 19B or MATH 20B or AP calculus BC exam score of 4 or 5.

MATH 23B - Vector Calculus (5)

Double integral, changing the order of integration. Triple integrals, maps of the plane, change of variables theorem, improper double integrals. Path integrals, line integrals, parametrized surfaces, area of a surface, surface integrals. Green's theorem, Stokes' theorem, conservative fields, Gauss' theorem. Applications to physics and differential equations, differential forms.

Prerequisite: Prerequisite(s): MATH 23A.

MATH 24 - Ordinary Differential Equations (5)

First and second order ordinary differential equations, with emphasis on the linear case. Methods of integrating factors, undetermined coefficients, variation of parameters, power series, numerical computation. Students cannot receive credit for this course and AM 20.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; MATH 21 is recommended as preparation.

MATH 99 - Tutorial (5)**MATH 99F - Tutorial (2)****Upper-Division****MATH 100 - Introduction to Proof and Problem Solving (5)**

Students learn the basic concepts and ideas necessary for upper-division mathematics and techniques of mathematical proof. Introduction to sets, relations, elementary mathematical logic, proof by contradiction, mathematical induction, and counting arguments.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; MATH 11A or MATH 19A or MATH 20A; and MATH 21 or AM 10 or AMS 10A.

MATH 101 - Mathematical Problem Solving (5)

Students learn the strategies, tactics, skills and tools that mathematicians use when faced with a novel (new) problem. These include generalization, specialization, the optimization, invariance, symmetry, Dirichlet's box principle among others in the context of solving problems from number theory, geometry, calculus, combinatorics, probability, algebra, analysis, and graph theory.

Prerequisite: Prerequisite(s): MATH 21 and MATH 100.

MATH 103A - Complex Analysis (5)

Complex numbers, analytic and harmonic functions, complex integration, the Cauchy integral formula, Laurent series, singularities and residues, conformal mappings.

Prerequisite: Prerequisite(s): MATH 23B; and either MATH 100 or CSE 101.

MATH 103B - Complex Analysis II (2)

Conformal mappings, the Riemann mapping theorem, Mobius transformations, Fourier series, Fourier and Laplace transforms, applications, and other topics as time permits.

Prerequisite: Prerequisite(s): MATH 103A.

MATH 105A - Real Analysis (5)

The basic concepts of one-variable calculus are treated rigorously. Set theory, the real number system, numerical sequences and series, continuity, differentiation.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23B and either MATH 100 or CSE 101.

MATH 105B - Real Analysis (5)

Metric spaces, differentiation and integration of functions. The Riemann-Stieltjes integral. Sequences and series of functions.

Prerequisite: Prerequisite(s): MATH 105A.

MATH 105C - Real Analysis (5)

The Stone-Weierstrass theorem, Fourier series, differentiation and integration of functions of several variables.

Prerequisite: Prerequisite(s): MATH 105B.

MATH 106 - Systems of Ordinary Differential Equations (5)

Linear systems, exponentials of operators, existence and uniqueness, stability of equilibria, periodic attractors, and applications.

Prerequisite: Prerequisite(s): MATH 21 or AM 10; and either MATH 24 or AM 20; and either MATH 100 or CSE 101.

MATH 107 - Partial Differential Equations (5)

Topics covered include first and second order linear partial differential equations, the heat equation, the wave equation, Laplace's equation, separation of variables, eigenvalue problems, Green's functions, Fourier series, special functions including Bessel and Legendre functions, distributions and transforms.

Prerequisite: Prerequisite(s): MATH 21 or AM 10; and MATH 24 or AM 20; and either MATH 100 or CSE 101; MATH 106 is recommended as preparation.

MATH 110 - Introduction to Number Theory (5)

Prime numbers, unique factorization, congruences with applications (e.g., to magic squares). Rational and irrational numbers. Continued fractions. Introduction to Diophantine equations. An introduction to some of the ideas and outstanding problems of modern mathematics.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101.

MATH 111A - Algebra (5)

Group theory including the Sylow theorem, the structure of abelian groups, and permutation groups. Students cannot receive credit for this course and MATH 111T.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 111B - Algebra (5)

Introduction to rings and fields including polynomial rings, factorization, the classical geometric constructions, and Galois theory.

Prerequisite: Prerequisite(s): MATH 111A.

MATH 111T - Algebra (5)

Introduction to groups, rings and fields; integers and polynomial rings; divisibility and factorization; homomorphisms and quotients; roots and permutation groups; and plane symmetry groups. Also includes an introduction to algebraic numbers, constructible numbers, and Galois theory. Focuses on topics most relevant to future K-12 teachers. Students cannot receive credit for this course and MATH 111A.

Prerequisite: Prerequisite(s): MATH 100.

MATH 114 - Introduction to Financial Mathematics (5)

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Ito's formula. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio; Black-Scholes pricing of European options. Dividends. Implied volatility. American options as free boundary problems.

Prerequisite: Corequisite(s): STAT 131 or CSE 107.

MATH 115 - Graph Theory (5)

Graph theory, trees, vertex and edge colorings, Hamilton cycles, Eulerian circuits, decompositions into isomorphic subgraphs, extremal problems, cages, Ramsey theory, Cayley's spanning tree formula, planar graphs, Euler's formula, crossing numbers, thickness, splitting numbers, magic graphs, graceful trees, rotations, and genus of graphs.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 116 - Combinatorics (5)

Based on induction and elementary counting techniques: counting subsets, partitions, and permutations; recurrence relations and generating functions; the principle of inclusion and exclusion;

Polya enumeration; Ramsey theory or enumerative geometry.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101. Enrollment is restricted to sophomores juniors, and seniors. Familiarity with basic group theory is recommended.

MATH 117 - Advanced Linear Algebra (5)

Review of abstract vector spaces. Dual spaces, bilinear forms, and the associated geometry. Normal forms of linear mappings. Introduction to tensor products and exterior algebras.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 118 - Advanced Number Theory (5)

Topics include divisibility and congruences, arithmetical functions, quadratic residues and quadratic reciprocity, quadratic forms and representations of numbers as sums of squares, Diophantine approximation and transcendence theory, quadratic fields. Additional topics as time permits.

Prerequisite: Prerequisite(s): MATH 110 or MATH 111A.

MATH 120 - Coding Theory (5)

An introduction to mathematical theory of coding. Construction and properties of various codes, such as cyclic, quadratic residue, linear, Hamming, and Golay codes; weight enumerators; connections with modern algebra and combinatorics.

Prerequisite: Prerequisite(s): MATH 21.

MATH 121A - Differential Geometry (5)

Topics include Euclidean space, tangent vectors, directional derivatives, curves and differential forms in space, mappings. Curves, the Frenet formulas, covariant derivatives, frame fields, the structural equations. The classification of space curves up to rigid motions. Vector fields and differentiable forms on surfaces; the shape operator. Gaussian and mean curvature. The theorem Egregium; global classification of surfaces in three space by curvature.

Prerequisite: Prerequisite(s): MATH 21 and MATH 23B and either MATH 100 or CSE 101. MATH 105A strongly recommended.

MATH 121B - Differential Geometry and Topology (5)

Examples of surfaces of constant curvature, surfaces of revolutions, minimal surfaces. Abstract manifolds; integration theory; Riemannian manifolds. Total curvature and geodesics; the Euler characteristic, the Gauss-Bonnet theorem. Length-minimizing properties of geodesics, complete surfaces, curvature and conjugate points covering surfaces. Surfaces of constant curvature; the theorems of Bonnet and Hadamard.

Prerequisite: Prerequisite(s): MATH 121A.

MATH 124 - Introduction to Topology (5)

Topics include introduction to point set topology (topological spaces, continuous maps, connectedness, compactness), homotopy relation, definition and calculation of fundamental groups and homology groups, Euler characteristic, classification of orientable and nonorientable surfaces, degree of maps, and Lefschetz fixed-point theorem.

Prerequisite: Prerequisite(s): MATH 100; MATH 111A recommended.

MATH 128A - Classical Geometry: Euclidean and Non-Euclidean (5)

Euclidean, projective, spherical, and hyperbolic (non-Euclidean) geometries. Begins with the thirteen books of Euclid. Surveys the other geometries. Attention paid to constructions and visual intuition as well as logical foundations. Rigid motions and projective transformations covered.

Prerequisite: Prerequisite(s): either MATH 100 or CSE 101.

MATH 128B - Classical Geometry: Projective (5)

Theorems of Desargue, Pascal, and Pappus; projectivities; homogeneous and affine coordinates; conics; relation to perspective drawing and some history.

Prerequisite: Prerequisite(s): MATH 21.

MATH 129 - Algebraic Geometry (5)

Algebraic geometry of affine and projective curves, including conics and elliptic curves; Bezout's theorem; coordinate rings and Hilbert's Nullstellensatz; affine and projective varieties; and regular and singular varieties. Other topics, such as blow-ups and algebraic surfaces as time permits.

Prerequisite: Prerequisite(s): MATH 21 and MATH 100.

MATH 130 - Celestial Mechanics (5)

Solves the two-body (or Kepler) problem, then moves onto the N-body problem where there are many open problems. Includes central force laws; orbital elements; conservation of linear momentum, energy, and angular momentum; the Lagrange-Jacobi formula; Sundman's theorem for total collision; virial theorem; the three-body problem; Jacobi coordinates; solutions of Euler and of Lagrange; and restricted three-body problem.

Prerequisite: Prerequisite(s): MATH 19A and 19B; and MATH 23A or PHYS 5A or PHYS 6A; MATH 21 and MATH 24 strongly recommended.

MATH 134 - Cryptography (5)

Introduces different methods in cryptography (shift cipher, affine cipher, Vigenere cipher, Hill cipher, RSA cipher, ElGamal cipher, knapsack cipher). The necessary material from number theory and probability theory is developed in the course. Common methods to attack ciphers discussed.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101; MATH 110 is recommended as preparation.

MATH 140 - Industrial Mathematics (5)

Students learn skills needed for solving problems found in industry. Course follows a problem-based approach, discovering the theory needed for solving problems, as well as description skills. Students collaborate to solve industry-driven problems. Reports and presentations are expected to demonstrate the solution of problems.

Examples include: Applied Graph Theory, Ramsey Theory, Game Theory, Markov Chains, Information Theory, Coding Theory, and Applied Number Theory.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101.

MATH 145 - Introductory Chaos Theory (5)

The Lorenz and Rossler attractors, measures of chaos, attractor reconstruction, and applications from the sciences. Students cannot receive credit for this course and AM 114.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; MATH 21; MATH 100 or CSE 101. Concurrent enrollment in MATH 145L is required.

MATH 145L - Introductory Chaos Laboratory (1)

Laboratory sequence illustrating topics covered in MATH 145. One three-hour session per week in microcomputer laboratory.

Prerequisite: Concurrent enrollment in MATH 145 is required.

MATH 148 - Numerical Analysis (5)

A survey of the basic numerical methods which are used to solve scientific problems, including mathematical analysis and computing assignments. Some prior experience with Matlab (or similar) is helpful but not required. Some typical topics are: computer arithmetic; Newton's method for non-linear equations; linear algebra; interpolation and approximation; numerical differentiation and integration; numerical solutions of systems of ordinary differential equations and some partial differential equations; convergence and error bounds. Students cannot receive credit for this course and AM 147.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; and MATH 21 or AM 10; and MATH 24 or AM 20; and MATH 105A or MATH 152 or CSE 101. Concurrent enrollment in MATH 148L is required.

MATH 148L - Numerical Analysis Laboratory (1)

Laboratory sequence illustrating topics covered in course 148. One three-hour session per week in the computer laboratory.

Prerequisite: Concurrent enrollment in MATH 148 is required.

MATH 152 - Programming for Mathematics (5)

Introduces programming in Python with applications to advanced mathematics. Students apply data structures and algorithms to topics such as numerical approximation, number theory, linear algebra, and combinatorics. No programming experience is necessary, but a strong mathematics background is required.

Prerequisite: Prerequisite(s): MATH 100.

MATH 160 - Mathematical Logic I (5)

Propositional and predicate calculus. Resolution, completeness, compactness, and Lowenheim-Skolem theorem. Recursive functions, Godel incompleteness theorem. Undecidable theories. Hilbert's 10th problem.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101.

MATH 161 - Mathematical Logic II (5)

Naive set theory and its limitations (Russell's paradox); construction of numbers as sets; cardinal and ordinal numbers; cardinal and ordinal arithmetic; transfinite induction; axiom systems for set theory, with particular emphasis on the axiom of choice and the regularity axiom and their consequences (such as, the Banach-Tarski paradox); continuum hypothesis.

Prerequisite: Prerequisite(s): MATH 100 or equivalent, or by permission of instructor.

MATH 181 - History of Mathematics (5)

A survey from a historical point of view of various developments in mathematics. Specific topics and periods to vary yearly.

Prerequisite: Prerequisite(s): MATH 19B or MATH 20B. MATH 100 is strongly recommended for preparation.

MATH 192 - Dir Stu Teach (5)**MATH 194 - Senior Seminar (5)**

Designed to expose the student to topics not normally covered in the standard courses. The format varies from year to year. In recent years each student has written a paper and presented a lecture on it to the class.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; MATH 103A or MATH 105A or MATH 110 or MATH 111A or MATH 111T or MATH 117. Enrollment priority is given to seniors; juniors may request permission from the undergraduate vice chair.

MATH 195 - Senior Thesis (5)

Students research a mathematical topic under the guidance of a faculty sponsor and write a senior thesis demonstrating knowledge of the material.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency.

MATH 199 - Tutorial (5)

Students submit petition to sponsoring agency.

MATH 199F - Tutorial (2)

Tutorial

Graduate**MATH 200 - Algebra I (5)**

Group theory: subgroups, cosets, normal subgroups, homomorphisms, isomorphisms, quotient groups, free groups, generators and relations, group actions on a set. Sylow theorems, semidirect products, simple groups, nilpotent groups, and solvable groups. Ring theory: Chinese remainder theorem, prime ideals, localization. Euclidean domains, PIDs, UFDs, polynomial rings. Prerequisite(s): MATH 111A and MATH 117 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 201 - Algebra II (5)

Vector spaces, linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, bilinear forms, quadratic forms, real symmetric forms and real symmetric matrices, orthogonal transformations and orthogonal matrices, Euclidean space, Hermitian forms and Hermitian matrices, Hermitian spaces, unitary transformations and unitary matrices, skewsymmetric forms, tensor products of vector spaces, tensor algebras, symmetric algebras, exterior algebras, Clifford algebras and spin groups.

Prerequisite: Prerequisite(s): MATH 200 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 202 - Algebra III (5)

Module theory: Submodules, quotient modules, module homomorphisms, generators of modules, direct sums, free modules, torsion modules, modules over PIDs, and applications to rational and Jordan canonical forms. Field theory: field extensions, algebraic and transcendental extensions, splitting fields, algebraic closures, separable and normal extensions, the Galois theory, finite fields, Galois theory of polynomials.

Prerequisite: Prerequisite(s): MATH 201 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 203 - Algebra IV (5)

Topics include tensor product of modules over rings, projective modules and injective modules, Jacobson radical, Wedderburns' theorem, category theory, Noetherian rings, Artinian rings, affine varieties, projective varieties, Hilbert's Nullstellensatz, prime spectrum, Zariski topology, discrete valuation rings, and Dedekind domains.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. Enrollment is restricted to graduate students.

MATH 204 - Analysis I (5)

Completeness and compactness for real line; sequences and infinite series of functions; Fourier series; calculus on Euclidean space and the implicit function theorem; metric spaces and the contracting mapping theorem; the Arzela-Ascoli theorem; basics of general topological spaces; the Baire category theorem; Urysohn's lemma; and Tychonoff's theorem.

Prerequisite: Prerequisite(s): MATH 105A and MATH 105B are recommended as preparation. Enrollment is restricted to graduate students.

MATH 205 - Analysis II (5)

Lebesgue measure theory, abstract measure theory, measurable functions, integration, space of absolutely integrable functions, dominated convergence theorem, convergence in measure, Riesz representation theorem, product measure and Fubini's theorem. L^p spaces, derivative of a measure, the Radon-Nikodym theorem, and the fundamental theorem of calculus.

Prerequisite: Prerequisite(s): MATH 204. Enrollment is restricted to graduate students.

MATH 206 - Analysis III (5)

Banach spaces, Hahn-Banach theorem, uniform boundedness theorem, the open mapping and closed graph theorems, weak and weak* topology, the Banach-Alaoglu theorem, Hilbert spaces, self-adjoint operators, compact operators, spectral theory, Fredholm operators, spaces of distributions and the Fourier transform, and Sobolev spaces.

Prerequisite: Prerequisite(s): MATH 204 and MATH 205 recommended as preparation. Enrollment is restricted to graduate students.

MATH 207 - Complex Analysis (5)

Holomorphic and harmonic functions, Cauchy's integral theorem, the maximum principle and its consequences, conformal mapping, analytic continuation, the Riemann mapping theorem.

Prerequisite: Prerequisite(s): MATH 103 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 208 - Manifolds I (5)

Definition of manifolds; the tangent bundle; the inverse function theorem and the implicit function theorem; transversality; Sard's theorem and the Whitney embedding theorem; vector fields, flows, and the Lie bracket; Frobenius's theorem. MATH 204 recommended for preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 209 - Manifolds II (5)

Tensor algebra. Differential forms and associated formalism of pullback, wedge product, exterior derivative, Stokes theorem, integration. Cartan's formula for Lie derivative. Cohomology via differential forms. The Poincaré lemma and the Mayer-Vietoris sequence. Theorems of deRham and Hodge.

Prerequisite: Prerequisite(s): MATH 208. MATH 201 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 210 - Manifolds III (5)

The fundamental group, covering space theory and van Kampen's theorem (with a discussion of free and amalgamated products of groups), CW complexes, higher homotopy groups, cellular and singular cohomology, the Eilenberg-Steenrod axioms, computational tools including Mayer-Vietoris, cup products, Poincaré duality, the Lefschetz fixed point theorem, the exact homotopy sequence of a fibration and the Hurewicz isomorphism theorem, and remarks on characteristic classes.

Prerequisite: Prerequisite(s): MATH 208 and MATH 209 recommended as preparation. Enrollment is restricted to graduate students.

MATH 211 - Algebraic Topology (5)

Continuation of MATH 210. Topics include theory of characteristic classes of vector bundles, cobordism theory, and homotopy theory.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202 recommended as preparation. Enrollment is restricted to graduate students.

MATH 212 - Differential Geometry (5)

Principal bundles, associated bundles and vector bundles, connections and curvature on principal and vector bundles. More advanced topics include: introduction to cohomology, the Chern-Weil construction and characteristic classes, the Gauss-Bonnet theorem or Hodge theory, eigenvalue estimates for Beltrami Laplacian, and comparison theorems in Riemannian geometry.

Prerequisite: Prerequisite(s): MATH 208. Enrollment is restricted to graduate students.

MATH 213A - Partial Differential Equations I (5)

First of the two PDE courses covering basically Part I in Evans' book; *Partial Differential Equations*; which includes transport equations; Laplace equations; heat equations; wave equations; characteristics of nonlinear first-order PDE; Hamilton-Jacobi equations; conservation laws; some methods for solving equations in closed form; and the Cauchy-Kovalevskaya theorem.

Prerequisite: MATH 106 and MATH 107 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 213B - Partial Differential Equations II (5)

Second course of the PDE series covering basically most of Part II in Evans' book and some topics in nonlinear PDE including Sobolev spaces, Sobolev inequalities, existence, regularity and a priori estimates of solutions to second order elliptic PDE, parabolic equations, hyperbolic equations and systems of conservation laws, and calculus of variations and its applications to PDE.

Prerequisite: Prerequisite(s): MATH 106, MATH 107, and MATH 213A are recommended as preparation. Enrollment is restricted to graduate students.

MATH 214 - Theory of Finite Groups (5)

Nilpotent groups, solvable groups, Hall subgroups, the Frattini subgroup, the Fitting subgroup, the Schur-Zassenhaus theorem, fusion in p -subgroups, the transfer map, Frobenius theorem on normal p -complements.

Prerequisite: Prerequisite(s): MATH 200 and MATH 201 recommended as preparation. Enrollment is restricted to graduate students.

MATH 215 - Operator Theory (5)

Operators on Banach spaces and Hilbert spaces. The spectral theorem. Compact and Fredholm operators. Other special classes of operators.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, MATH 206, and MATH 207 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 216 - Advanced Analysis (5)

Topics include: the Lebesgue set, the Marcinkiewicz interpolation theorem, singular integrals, the Calderon-Zygmund theorem, Hardy Littlewood-Sobolev theorem, pseudodifferential operators, compensated compactness, concentration compactness, and applications to PDE.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, and MATH 206 recommended as preparation. Enrollment is restricted to graduate students.

MATH 217 - Advanced Elliptic Partial Differential

Equations (5)

Topics include elliptic equations, existence of weak solutions, the Lax-Milgram theorem, interior and boundary regularity, maximum principles, the Harnack inequality, eigenvalues for symmetric and non-symmetric elliptic operators, calculus of variations (first variation: Euler-Lagrange equations, second variation: existence of minimizers). Other topics covered as time permits.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, and MATH 206 recommended as preparation. Enrollment is restricted to graduate students.

MATH 218 - Advanced Parabolic and Hyperbolic Partial Differential Equations (5)

Topics include: linear evolution equations, second order parabolic equations, maximum principles, second order hyperbolic equations, propagation of singularities, hyperbolic systems of first order, semigroup theory, systems of conservation laws, Riemann problem, simple waves, rarefaction waves, shock waves, Riemann invariants, and entropy criteria. Other topics covered as time permits.

Prerequisite: Prerequisite(s): MATH 205 and MATH 206. Enrollment is restricted to graduate students.

MATH 219 - Nonlinear Functional Analysis (5)

Topological methods in nonlinear partial differential equations, including degree theory, bifurcation theory, and monotonicity. Topics also include variational methods in the solution of nonlinear partial differential equations.

Prerequisite: Enrollment is restricted to graduate students.

MATH 220A - Representation Theory I (5)

Lie groups and Lie algebras, and their finite dimensional representations.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. MATH 225A and MATH 227 recommended as preparation. Enrollment is restricted to graduate students.

MATH 220B - Representation Theory II (5)

Lie groups and Lie algebras, and their finite dimensional representations.

Prerequisite: Prerequisite(s): MATH 220A. Enrollment is restricted to graduate students.

MATH 222A - Algebraic Number Theory (5)

Topics include algebraic integers, completions, different and discriminant, cyclotomic fields, parallelotopes, the ideal function, ideles and adeles, elementary properties of zeta functions and L-series, local class field theory, global class field theory.

MATH 200, MATH 201, and MATH 202 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 222B - Algebraic Number Theory (5)

Topics include geometric methods in number theory, finiteness theorems, analogues of Riemann-Roch for algebraic fields (after A. Weil), inverse Galois problem (Belyi theorem) and consequences.

Prerequisite: Enrollment is restricted to graduate students.

MATH 223A - Algebraic Geometry I (5)

Topics include examples of algebraic varieties, elements of commutative algebra, local properties of algebraic varieties, line bundles and sheaf cohomology, theory of algebraic curves. Weekly problem solving. MATH 200, MATH 201, MATH 202, and MATH 208 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 223B - Algebraic Geometry II (5)

A continuation of course 223A. Topics include theory of schemes and sheaf cohomology, formulation of the Riemann-Roch theorem, birational maps, theory of surfaces. Weekly problem solving. MATH 223A is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 225A - Lie Algebras (5)

Basic concepts of Lie algebras. Engel's theorem, Lie's theorem, Weyl's theorem are proved. Root space decomposition for semi-simple algebras, root systems and the classification theorem for semi-simple algebras over the complex numbers. Isomorphism and conjugacy theorems.

Prerequisite: Prerequisite(s): MATH 201 and MATH 202 recommended as preparation. Enrollment is restricted to graduate students.

MATH 225B - Infinite Dimensional Lie Algebras (5)

Finite dimensional semi-simple Lie algebras: PBW theorem, generators and relations, highest weight representations, Weyl character formula. Infinite dimensional Lie algebras: Heisenberg algebras, Virasoro algebras, loop algebras, affine Kac-Moody algebras, vertex operator representations.

Prerequisite: Prerequisite(s): MATH 225A. Enrollment is restricted to graduate students.

MATH 226A - Infinite Dimensional Lie Algebras and

Quantum Field Theory I (5)

Introduction to the infinite-dimensional Lie algebras that arise in modern mathematics and mathematical physics: Heisenberg and Virasoro algebras, representations of the Heisenberg algebra, Verma modules over the Virasoro algebra, the Kac determinant formula, and unitary and discrete series representations.

Prerequisite: Enrollment is restricted to graduate students.

MATH 226B - Infinite Dimensional Lie Algebras and Quantum Field Theory II (5)

Continuation of MATH 226A: Kac-Moody and affine Lie algebras and their representations, integrable modules, representations via vertex operators, modular invariance of characters, and introduction to vertex operator algebras.

Prerequisite: Enrollment is restricted to graduate students.

MATH 227 - Lie Groups (5)

Lie groups and algebras, the exponential map, the adjoint action, Lie's three theorems, Lie subgroups, the maximal torus theorem, the Weyl group, some topology of Lie groups, some representation theory: Schur's Lemma, the Peter-Weyl theorem, roots, weights, classification of Lie groups, the classical groups.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 204, and MATH 208. Enrollment is restricted to graduate students.

MATH 228 - Lie Incidence Geometries (5)

Linear incidence geometry is introduced. Linear and classical groups are reviewed, and geometries associated with projective and polar spaces are introduced. Characterizations are obtained.

Prerequisite: Enrollment is restricted to graduate students.

MATH 229 - Kac-Moody Algebras (5)

Theory of Kac-Moody algebras and their representations. The Weil-Kac character formula. Emphasis on representations of affine superalgebras by vertex operators. Connections to combinatorics, PDE, the monster group. The Virasoro algebra.

Prerequisite: Enrollment is restricted to graduate students.

MATH 232 - Morse Theory (5)

Classical Morse Theory. The fundamental theorems relating critical points to the topology of a manifold are treated in detail. The Bott Periodicity Theorem. A specialized course offered once every few years.

Prerequisite: Prerequisite(s): MATH 208, MATH 209, MATH 210, MATH 211, and MATH 212

recommended as preparation. Enrollment is restricted to graduate students.

MATH 233 - Random Matrix Theory (5)

Classical matrix ensembles; Wigner semi-circle law; method of moments. Gaussian ensembles. Method of orthogonal polynomials; Gaudin lemma. Distribution functions for spacings and largest eigenvalue. Asymptotics and Riemann-Hilbert problem. Painleve theory and the Tracy-Widom distribution. Selberg's Integral. Matrix ensembles related to classical groups; symmetric functions theory. Averages of characteristic polynomials. Fundamentals of free probability theory. Overview of connections with physics, combinatorics, and number theory.

Prerequisite: Prerequisite(s): MATH 103, MATH 204, and MATH 205; MATH 117 recommended as preparation. Enrollment is restricted to graduate students.

MATH 234 - Riemann Surfaces (5)

Riemann surfaces, conformal maps, harmonic forms, holomorphic forms, the Riemann-Roch theorem, the theory of moduli.

Prerequisite: Enrollment is restricted to graduate students.

MATH 235 - Dynamical Systems Theory (5)

An introduction to the qualitative theory of systems of ordinary differential equations. Structural stability, critical elements, stable manifolds, generic properties, bifurcations of generic arcs.

Prerequisite: Prerequisite(s): MATH 203 and MATH 208. Enrollment is restricted to graduate students.

MATH 238 - Elliptic Functions and Modular Forms (5)

The course, aimed at second-year graduate students, will cover the basic facts about elliptic functions and modular forms. The goal is to provide the student with foundations suitable for further work in advanced number theory, in conformal field theory, and in the theory of Riemann surfaces.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 202, and either MATH 207 or MATH 103A are recommended as preparation. Enrollment is restricted to graduate students.

MATH 239 - Homological Algebra (5)

Homology and cohomology theories have proven to be powerful tools in many fields (topology, geometry, number theory, algebra). Independent of the field, these theories use the common language of homological algebra. The aim of this course is to acquaint the participants with basic concepts of category theory and homological algebra, as follows: chain complexes, homology, homotopy, several (co)homology theories (topological spaces, manifolds, groups, algebras, Lie

groups), projective and injective resolutions, derived functors (Ext and Tor). Depending on time, spectral sequences or derived categories may also be treated. MATH 200 and MATH 202 strongly recommended.

Prerequisite: Enrollment is restricted to graduate students.

MATH 240A - Representations of Finite Groups I (5)

Introduces ordinary representation theory of finite groups (over the complex numbers). Main topics are characters, orthogonality relations, character tables, induction and restriction, Frobenius reciprocity, Mackey's formula, Clifford theory, Schur indicator, Schur index, Artin's and Brauer's induction theorems. Recommended: successful completion of MATH 200-MATH 202.

Prerequisite: Enrollment is restricted to graduate students.

MATH 240B - Representations of Finite Groups II (5)

Introduces modular representation theory of finite groups (over a field of positive characteristic). Main topics are Grothendieck groups, Brauer characters, Brauer character table, projective covers, Brauer-Cartan triangle, relative projectivity, vertices, sources, Green correspondence, Green's indecomposability theorem. Recommended completion of MATH 200-MATH 203 and MATH 240A.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 202, MATH 203, and MATH 240A recommended. Enrollment is restricted to graduate students.

MATH 246 - Representations of Algebras (5)

Material includes associative algebras and their modules; projective and injective modules; projective covers; injective hulls; Krull-Schmidt Theorem; Cartan matrix; semisimple algebras and modules; radical, simple algebras; symmetric algebras; quivers and their representations; Morita Theory; and basic algebras.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. Enrollment is restricted to graduate students.

MATH 248 - Symplectic Geometry (5)

Basic definitions. Darboux theorem. Basic examples: cotangent bundles, Kähler manifolds and co-adjoint orbits. Normal form theorems. Hamiltonian group actions, moment maps. Reduction by symmetry groups. Atiyah-Guillemin-Sternberg convexity. Introduction to Floer homological methods. Relations with other geometries including contact, Poisson, and Kähler geometry.

Prerequisite: Prerequisite(s): MATH 204; MATH 208 and MATH 209 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 249A - Mechanics I (5)

Covers symplectic geometry and classical Hamiltonian dynamics. Some of the key subjects are the Darboux theorem, Poisson brackets, Hamiltonian and Lagrangian systems, Legendre transformations, variational principles, Hamilton-Jacobi theory, geodesic equations, and an introduction to Poisson geometry. MATH 208 and MATH 209 are recommended as preparation.

Prerequisite: MATH 208 and MATH 209 recommended as preparation. Enrollment is restricted to graduate students.

MATH 249B - Mechanics II (5)

Hamiltonian dynamics with symmetry. Key topics center around the momentum map and the theory of reduction in both the symplectic and Poisson context. Applications are taken from geometry, rigid body dynamics, and continuum mechanics. MATH 249A is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 249C - Mechanics III (5)

Introduces students to active research topics tailored according to the interests of the students. Possible subjects are complete integrability and Kac-Moody Lie algebras; Smale's topological program and bifurcation theory; KAM theory, stability and chaos; relativity; quantization. MATH 249B is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 252 - Fluid Mechanics (5)

First covers a basic introduction to fluid dynamics equations and then focuses on different aspects of the solutions to the Navier-Stokes equations.

Prerequisite: Prerequisite(s): MATH 106 and MATH 107 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 254 - Geometric Analysis (5)

Introduction to some basics in geometric analysis through the discussions of two fundamental problems in geometry: the resolution of the Yamabe problem and the study of harmonic maps. The analytic aspects of these problems include Sobolev spaces, best constants in Sobolev inequalities, and regularity and a priori estimates of systems of elliptic PDE.

Prerequisite: MATH 204, MATH 205, MATH 209, MATH 212, and MATH 213A recommended as preparation. Enrollment is restricted to graduate students.

MATH 256 - Algebraic Curves (5)

Introduction to compact Riemann surfaces and algebraic geometry via an in-depth study of complex algebraic curves.

Prerequisite: MATH 200, MATH 201, MATH 202, MATH 203, MATH 204, and MATH 207 are recommended as preparation. Enrollment is restricted to graduate mathematics and physics students.

MATH 260 - Combinatorics (5)

Combinatorial mathematics, including summation methods, binomial coefficients, combinatorial sequences (Fibonacci, Stirling, Eulerian, harmonic, Bernoulli numbers), generating functions and their uses, Bernoulli processes and other topics in discrete probability. Oriented toward problem solving applications. Applications to statistical physics and computer science.

Prerequisite: Enrollment is restricted to graduate students.

MATH 264 - Inverse Problems and Integral Geometry (5)

Concepts of inverse problem and ill-posedness on the Hilbert scale. Approaches to inversion, regularization and implementation. In Euclidean geometry: Radon transform; X-ray transform; attenuated X-ray transform (Novikov's inversion formula); weighted transforms. Same topics in different geometric contexts: homogeneous spaces, manifolds with boundary. Non-linear problems: boundary rigidity, lens rigidity, inverse problems for connections. MATH 148, MATH 204, MATH 205, MATH 206, and MATH 208, are recommended for preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 280 - Topics in Analysis (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 281 - Topics in Algebra (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 282 - Topics in Geometry (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 283 - Topics in Combinatorial Theory (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 284 - Topics in Dynamics (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 285 - Topics in Partial Differential Equations (5)

Topics such as derivation of the Navier-Stokes equations. Examples of flows including water waves, vortex motion, and boundary layers. Introductory functional analysis of the Navier-Stokes equation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 286 - Topics in Number Theory (5)

Topics in number theory, selected by instructor. Possibilities include modular and automorphic forms, elliptic curves, algebraic number theory, local fields, the trace formula. May also cover related areas of arithmetic algebraic geometry, harmonic analysis, and representation theory. Courses 200, 201, 202, and 205 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 287 - Topics in Topology (5)

Topics in topology, selected by the instructor. Possibilities include generalized (co)homology theory including K-theory, group actions on manifolds, equivariant and orbifold cohomology theory.

Prerequisite: Enrollment is restricted to graduate students.

MATH 288A - Pedagogy of Mathematics (2)

Prepares graduate students to become successful Teaching Assistants in mathematics courses. Topics include class management, assessment creation, evaluation and grading, student interaction, introduction to teaching and learning strategies, innovation in education, use of technology, and best practices that promote diversity and inclusion.

Prerequisite: Enrollment is restricted to graduate students.

MATH 288B - Pedagogy of Mathematics (2)

Prepares graduate students to become successful Graduate Student Instructors in mathematics. Topics include class management, assessment creation, evaluation and grading, student interaction, introduction to teaching and learning strategies, innovation in education, use of technology, and best practices that promote diversity and inclusion.

Prerequisite: Enrollment is restricted to graduate students.

MATH 292 - Seminar (0)

A weekly seminar attended by faculty, graduate students, and upper-division undergraduate students. All graduate students are expected to attend.

Prerequisite: Enrollment is restricted to graduate students.

MATH 296 - Special Student Seminar (5)

Students and staff studying in an area where there is no specific course offering at that time.

Prerequisite: Enrollment is restricted to graduate students.

MATH 297A - Independent Study (5)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 297B - Independent Study (10)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 297C - Independent Study (15)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 298 - Master's Thesis Research (5)

Enrollment restricted to graduate students.

MATH 299A - Thesis Research (5)

Enrollment restricted to graduate students.

MATH 299B - Thesis Research (10)

Enrollment restricted to graduate students.

MATH 299C - Thesis Research (15)

Enrollment restricted to graduate students.

MERR - MERRILL COLLEGE

Lower-Division

MERR 1 - Academic Literacy and Ethos: Reading Ourselves, Reading the World (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Engages students in Merrill's intellectual tradition of investigating social change and social justice.

Prerequisite: Enrollment is restricted to first-year college members.

MERR 1A - Introduction to University Life and Learning (1)

Orientation to and exploration of the nature of the liberal arts, and of learning at research universities. Topics include: academic planning for upper-division coursework; enrollment processes; and understanding pathways to degree completion; UCSC resources that

support health and well-being strategies for academic success; the cultivation of just communities; the prevention of sexual harassment and violence; campus conduct policies; awareness of risks associated with drug and/or alcohol use; and an introduction to traditions of community-engaged learning, ground-breaking research, and interdisciplinary thinking that define a UC Santa Cruz degree. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year Merrill College students.

MERR 5 - WORD: Writing Originating from Reading and Discussion. (2)

Designed to provide students with practice using critical reading strategies with a variety of academic texts and genres and is graded Pass/No Pass only. Enrollment is restricted to frosh students and by permission of the instructor.

MERR 31F - Agency, Dialogue, Action: Fostering Critical Engagement (2)

What exactly does it mean to have agency, what do we do with agency? Course examines theories of agency, in education and elsewhere, and engages students in opportunities to enact and examine effective approaches. Understanding that spaces of social collaboration are also learning environments, students investigate how different models of student engagement promote agency ultimately leading to investigating how we can utilize our agency to effect change and how dialogue plays an integral role in this process. Also explores effective practices for fostering and implementing agency and communication, and the theories from which these practices emerge. Enrollment is by permission and is restricted to students who are a member of a SOMeCA organization. (Formerly MERR 31.)

MERR 32F - Mindful Collaboration: Cultivating Radical Exchange (2)

Collaboration can be challenging, particularly in a society in which there is an emphasis on individualism and competitiveness. Compromise, for example, can be experienced or interpreted as personal sacrifice rather than fertile ground for possibility. Solving many of the world's most significant issues (climate change, economic instability, pandemic, etc.) will require collective effort and this will challenge us to create new ways of being and thinking. Through classroom discussions, journal reflections, and experiential exercises, students investigate models of collaboration, how social inequities can challenge collaborative work, the importance of common purpose, practices that support respectful and inclusive deliberation, and student organizations as sites of collaboration. Enrollment is by permission and is restricted to students who are a member of a SOMeCA organization.

MERR 33F - Transformative Leadership and Social

Change (2)

Examines current state of constant division and dissent to look for solutions to society's largest problems and examples of leadership that exhibit the compassion, openness, and skills needed to reach inclusive and genuine consensus that students can learn from in becoming effective and transformative leaders. Students challenge their own assumptions regarding leadership and explore and assess different means through which they can be leaders who facilitate change with more than just their own ideas in mind. Through both class discussions and interactive practices, students explore ways of strengthening interpersonal relationships, developing shared frameworks, and creating a collective consensus that supports sustainable and inclusive change. Enrollment is by permission and is restricted to students who are a member of a SOMeCA organization.

MERR 34F - Careers in STEM (2)

Provides students with information, tools, and strategies to embark on STEM career exploration and preparation, including strategies for addressing challenges and opportunities related to diversity within STEM career fields. Students explore their career values, network with guest speakers in STEM fields (alumni, faculty, postdocs, graduate students, career coaches, and hiring managers), and prepare and create career-related documents (resumes, cover letters, networking plans). Enrollment is restricted to sophomore and junior STEM majors and proposed STEM majors, and by instructor permission. Students in the EOP program are given priority.

Prerequisite: Enrollment is restricted to sophomore and junior STEM majors and intended STEM majors, and by instructor permission. Students in the EOP program are given priority.

MERR 35A - Pathways to Graduate School Phase 1 (2)

Guides students in utilizing relevant and timely information, tools, and strategies to embark on the path to graduate school exploration and preparation, including strategies for addressing challenges and opportunities related to diversity within graduate education. Students explore their values and motivations for pursuing graduate school, network with guest speakers (current graduate students, faculty members, graduate school admissions professionals); and prepare to continue their development as scholars and researchers in order to deliver outstanding graduate school application materials (personal statements, CV/resumes, letters of recommendation requests). Through these course activities, students cultivate their scholarly identity and sense of self-efficacy as future graduate students. Enrollment is restricted to sophomores and juniors in the Arts, Humanities, and Social Sciences divisions and by instructor permission. Students in the EOP program are given priority.

MERR 35B - Pathways to Graduate School-Phase 2 (3)

Guides students via a strengths-based approach in utilizing the information, resources, support, and self-determination they identified in MERR 35A, Pathways to Graduate School-Phase 1, to navigate the graduate school application process and submit for admission to respective graduate programs and/or other competitive opportunities.

MERR 40 - Deafness & Sign Language (5)

Explores what we can learn about the human mind and brain by studying sensory loss and language in a different sensory modality. Topics include visual and spatial thinking, brain organization, compensating for sensory loss, and the nature of human language.

MERR 41 - Pandemic Case Studies: Principles in Public Health (5)

Examines the coronavirus pandemic using public health principles to gain better understanding of its causes, pathways, and social dynamics. Students compare and contrast the current pandemic with historical pandemic events using case study analysis and the application of public health concepts, in order to understand the coronavirus pandemic within a broader perspective of health, society, and human behavior.

MERR 50F - Merrill Alumni Careers in Public Service (2)

Course focuses on careers in public service--why choose one, how to prepare for one. (Formerly MERR 50.)

Prerequisite: Enrollment is restricted to college members.

MERR 60 - Fake News: Its History and Why We Need Critical Media Literacy (5)

Teaches students how to take skillful possession of their power as citizens by participating in community focused news literacy service learning projects. Recently, debates about fake news in entertainment, politics, and news media have centered on the threat American citizens' waning news literacy skills pose to the democratic process. Course develops those skills, focusing on critical thinking, the history of fake news and journalism, differences between journalism and fake news, news and propaganda, news and opinion, bias and fairness, assertion and verification, and evidence and inference. Integrates coursework into collaborative community engagement projects that seek to advance the community's news literacy skills.

MERR 85B - Merrill Classroom Connection Field Study (3)

Supervised hands-on experience assisting in local K-12 school classrooms. Students attend UCSC class meetings, complete relevant readings in educational theory, and present a final assignment. This course

requires more hours than MERR 85C and involves travel to Pescadero twice per week.

Prerequisite: Priority enrollment restricted to Merrill College members.

MERR 85C - Merrill Classroom Connection Field Study (2)

Supervised hands-on experience assisting in local K-12 school classrooms. Students also attend UCSC course meetings, complete relevant readings in educational theory, and present a final assignment. Please see <http://merrill.ucsc.edu/academics/programs-and-courses/classroom-connection/index.html> for conditions that must be met prior to placement at local schools.

Prerequisite: Priority enrollment is restricted to Merrill College members.

MERR 90 - Theory and Practice of Field Study (5)

Course provides an opportunity for lower-division students to learn about Santa Cruz, Calif., its contemporary history, culture, and politics through classroom theoretical learning integrated with individual field studies. Course also examines social change, qualitative research, and community organizing.

Prerequisite: Enrollment is restricted to College Scholar Students.

MERR 90F - Merrill Field Study Practicum (2)

Offers Merrill students an opportunity for practical field study experience with preparation and support for practical skill development and critical reflection on service-learning experience.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior college members.

MERR 90S - Theory and Practice of Field Study (2)

Students spend 10 hours a week on an internship they choose, with the support of the instructor, working with a local organization. Includes class lectures and discussions of readings.

MERR 93 - Field Study (5)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser and provost required.

MERR 93F - Field Study (2)

Provides for individual program of study sponsored by the college and performed off campus. Approval of instructor required.

MERR 93G - Field Study (3)

Provides for individual programs of study sponsored by the college and performed off campus. Approval of instructor required.

MERR 98F - Independent Study (2)

Independent Study

MERR 99 - Tutorial (5)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

MERR 99F - Tutorial (2)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

Upper-Division

MERR 120 - Personal Empowerment (5)

Intensive course on individual goal-oriented behavior, commonly called problem solving. Focus on purpose, goals, meaning, emotions, languages, model-building, reality, thinking, logic, creativity, the steps of problem solving, common blocks, and techniques of unblocking. Meet with instructor prior to advance enrollment; priority given to upper-level students.

MERR 180 - Research Skills for College and Beyond (2)

Focuses on exploration/development of skills for planning, study habits, research, networking, and communication skills for college, graduate and professional school, and beyond. Primary focus is on writing, public speaking, and academic and professional research.

Prerequisite: Enrollment is restricted to junior and senior college members.

MERR 183F - Focus on Africa (2)

Equips students with the skills and background necessary to be informed observers and chroniclers of current affairs on the African continent.

MERR 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See MERR 42.) Students submit petition to sponsoring agency, supported by faculty member willing to supervise.

MERR 193 - Field Study (5)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 193F - Field Study (2)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 193G - Field Study (3)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty member.

MERR 195 - Senior Research Project (5)

Students submit petition to sponsoring agency.

MERR 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. This may be a multiple-term course extending over two or three quarters; in this case the grade and evaluation submitted for the final quarter apply to all previous quarters. Petitions may be obtained at the Merrill College Office. Approval of student's adviser, certification of adequate preparation, and approval by the Merrill Provost required.

MERR 198F - Independent Study (2)

Independent Study

MERR 199 - Tutorial (5)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

METX - MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY

Lower-Division

METX 80E - Aquatic Toxicology (5)

An introduction to the sources, cycling, and impacts of toxicants in aquatic systems, including acid rain, ground water, fresh water rivers and lakes, estuaries, and the ocean. Emphasis is on the properties of toxic chemicals that influence their biogeochemical cycles and factors that influence their toxicity to aquatic organisms and humans.

Upper-Division

METX 100 - Introduction to Microbiology (5)

Introduces the biology of microorganisms (bacteria, archaea, viruses, fungi, and unicellular eukaryotes), with an emphasis on bacteria. Topics include microbial cell structure and function, physiology, metabolism, genetics, and diversity. Also considers the role of

microbes in human health, the environment, biotechnology, and food production. Students cannot receive credit for both this course and METX 119.

Prerequisite: Prerequisite(s): BIOL 20A.

METX 101 - Sources and Fates of Pollutants (5)

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments, including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis placed on susceptibility and effects of toxicants across organ systems, toxicokinetic and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and METX 201.

METX 102 - Cell and Molecular Toxicology (5)

Emphases of biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Designed for advanced undergraduates. Students cannot receive credit for this course and METX 202. (Formerly Cellular and Organismal Toxicology.)

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B or equivalent; BIOL 100 and BIOC 110 recommended. Enrollment restricted to juniors and seniors.

METX 115 - Environmental Health Science (5)

Addresses challenges related to environmental health, their impact on the health of biological structures, and humans as active elements in the process of environmental degradation, and as passive elements as well. Students discuss events as case studies of environmental health that contributed to environmental protection, and disease control and prevention. Course involves collaborative endeavor in which students develop a group assignment throughout the 10 weeks of the course that is evaluated at the end of the course.

Prerequisite: Prerequisite(s): BIOL 20A or ENVS 23 or BIOL 89.

METX 119L - Microbiology Laboratory (5)

An introduction to the principles and practices of laboratory microbiology, with a substantial presentation of optical microscopy.

Prerequisite: Prerequisites: Satisfaction of Entry Level Writing and Composition requirements; and one course from the following: BIOL 20L, or BIOL 101L, or BIOL 102L; and previous or concurrent enrollment in METX 100 or METX 119. Enrollment is restricted to declared

Biochemistry and Molecular Biology; Biology B.S.; Molecular, Cell and Developmental Biology, and Neuroscience majors. Other majors may enroll by permission of the instructor. Students cannot enroll in METX 119L after receiving credit with a 'C' or better in BIOL 100L, BIOL 103L, BIOL 105L, BIOL 106L, BIOL 108L, BIOL 109L, BIOL 115L, BIOL 120L, BIOL 121L, BIOL 129L, and BIOL 186L.

METX 125 - Practicing Safe Science (2)

Introduces research safety principles and practices. Instructors and guest experts discuss research hazards and control measures. Students explore the safe use of research methods and materials via hands-on and outside exercises. Issues include compliance with hazardous waste and other environmental safety regulations.

METX 135 - Functional Anatomy (5)

A rigorous systems-based course in anatomy. Lectures provide an overview of functional anatomy at all levels from the systems to the tissues. Provides a mechanistic understanding of the structures of the body as a foundation for human-health oriented studies.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B. Concurrent enrollment in METX 135L is required. Enrollment restricted to biological sciences majors and affiliated majors and biology minors.

METX 135C - Cadaver Dissection Laboratory (2)

Dissection of a human cadaver under the direction of an anatomy instructor.

Prerequisite: Prerequisite(s): METX 135 and METX 135L, or ANTH 102A.

METX 135L - Functional Anatomy Lab (3)

Complements lecture course 135. Emphasizes nomenclature and recognition; includes the embryology and histology of bones, muscles, and internal organs, and the interactions between the systems of the body.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B. The class is geared toward students in the biological sciences majors and affiliated majors and biology minors, but open to other majors. Concurrent enrollment in METX 135 is required.

METX 140 - Molecular Biology and Microbial Genetics (5)

Introduces students to the field of molecular biology and microbial genetics. Covers the following topics: molecular mechanisms of DNA replication, transcription, translation, regulatory systems controlling replication, transcription, and translation; basic genetic principles with an emphasis on bacterial genetics; molecular biology and microbial genetics approaches used to understand the molecular mechanisms of interaction of microorganisms with their surroundings and other organisms; and experimental methods

employing molecular biology and molecular genetics and biotechnology applications which have arisen from discoveries of bacterial mechanisms.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A.

METX 150 - Introduction to Research and Experimental Design (5)

Lecture-based course for advanced undergraduates actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes basic lab skills, including laboratory safety and handling of laboratory equipment; experimental design; scientific record keeping; and literature searching, review, and management.

METX 195 - Senior Thesis (5)

An individually supervised course, with emphasis on independent research culminating in a senior thesis.

METX 195F - Senior Thesis (2)

An individually supervised course with emphasis on independent research culminating in a senior thesis.

METX 198 - Independent Study (5)

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the coursework off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit.

METX 198F - Independent Study (2)

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the coursework off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit.

METX 199 - Tutorial (5)

Reading, discussion, written reports, and laboratory research on selected topics.

METX 199F - Tutorial (2)

Reading, discussion, written reports, and laboratory research on selected topics.

Graduate

METX 200 - Interdisciplinary Approaches in Environmental Toxicology (5)

Introduction to interdisciplinary, case-based approaches to problem-solving. Demonstrates how important, current problems in environmental and human health have been addressed and solved. Presents assigned problems that integrate the different organization levels (environmental, molecular/cellular, organismal/public health) inherent to environmental and human health.

Students work in collaborative teams to analyze each problem and create a proposal for a research plan/solution. This course must be taken for a letter grade.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates may enroll by permission of the instructor.

METX 200B - Graduate Research Project Development (2)

Presents a framework for scientific writing related to developing a thesis research proposal in a topical area of microbiology and/or environmental toxicology.

METX 201 - Sources and Fates of Pollutants (5)

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis will be placed on the susceptibility and effects of toxicants across organ systems, toxicokinetics and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and METX 101.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduate science majors may enroll with permission of instructor.

METX 202 - Cell and Molecular Toxicology (5)

Emphasizes biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Students cannot receive credit for this course and METX 102 or BIOL 122.

Prerequisite: Enrollment is restricted to graduate students.

METX 203 - Cellular and Molecular Toxicology (5)

Presents in-depth cellular and molecular principles of environmental toxicology. These include modes of action and cellular and molecular targets of toxicants, as well as mechanisms of cellular and molecular responses to toxicants and their detoxification. State-of-the-art biological methodologies and approaches to identify and study cellular targets of toxicants. Designed to provide students with a broad and deep understanding of the biological aspects of toxicology at both cellular and molecular levels, and the skills to approach emerging challenges in the field.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 205 - Scientific Grant Writing (5)

Provides fundamental training of graduate students in the scientific method; experimental design; ethics in science; grant proposal and scientific writing; and data presentation and scientific speaking. Students are evaluated on class participation, performance, and a written NIH/NSF-style research proposal. (Formerly Scientific Skills, Ethics, and Writing.)

Prerequisite: Enrollment restricted to graduate students. Advanced undergraduates may enroll with permission of the instructor.

METX 206A - Advanced Microbiology (5)

Focuses on aspects of bacterial molecular biology. Covers four main areas: (1) metabolism-catabolism, anabolism, building-block precursors; (2) transcription/signal transduction; (3) replication/plasmid biology/division; (4) translation/protein processing/secretion/cell structure. Strong focus on experimental techniques and approaches used in molecular biology, and on model bacteria, such as *Escherichia coli* and *Bacillus subtilis*.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates may enroll with permission of instructor.

METX 210 - Molecular and Cellular Basis of Bacterial Pathogenesis (5)

Focuses on the molecular basis of bacterial pathogenesis with specific emphasis on gene expression, regulation, and ecology and evolution.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor.

METX 215 - Antibiotics: Actions and Resistance (3)

Critical review of scientific literature covering genetic and physiological mechanisms conferring resistance to antibiotics and their spread in the population. Format based on structured discussion of selected topics and original research proposal.

Prerequisite: Prerequisite(s): METX 206A or METX 119, or by permission of the instructor. Enrollment is restricted to graduate students.

METX 238 - Pathogenesis: Molecular Mechanisms of Disease (5)

Provides an overview of the mammalian innate immune response and the role of inflammation in disease. Also, presents how both environmental stressors and microbial pathogens impact inflammation.

Prerequisite: Enrollment is restricted to graduate students.

METX 240 - Molecular Biology of Prokaryotes (5)

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology.

Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and METX 140.

METX 245A - Scientific Communication in Microbiology and Environmental Toxicology A (5)

Introduces multiple forms of scientific presentation and communication to graduate students. Students learn to craft and deliver multiple types of written and visual communications, including formal and informal modes, on a topic developed as part of the class.

Prerequisite: Prerequisite(s): METX 200. Enrollment is restricted to graduate students.

METX 245B - Scientific Communication in Microbiology and Environmental Toxicology B (5)

Continuation of METX 245A. Students develop and refine a capstone in-depth report in a written form and as an oral presentation.

Prerequisite: Prerequisite(s): METX 245A. Enrollment is restricted to graduate students.

METX 250 - Environmental Microbiology (5)

How microbes interact with their environments. Topics include anaerobic metabolism; biotransformation of toxic metals and organic pollutants; geomicrobiology; life in extreme environments; water quality. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor.

Prerequisite: Enrollment is restricted to graduate students.

METX 281A - Topics in Environmental Toxicology (5)

Selected topics in environmental toxicology. Topics vary from year to year.

Prerequisite: Enrollment is restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission.

METX 281C - Topics in Environmental Microbiology (2)

Seminar and discussion focusing on mechanism of microbial transformation of metals. Participants present results from their research projects in a seminar format. Relevant journal articles presented and discussed.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 281J - Mechanisms of Virulence and Resistance to Infectious Disease (2)

Research seminar focusing on the mechanisms underlying host resistance or susceptibility to infectious diseases, and virulence strategies utilized by bacterial pathogens. Participants are required to present results from their own research and relevant journal articles.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission.

METX 281M - Topics in Molecular Toxicology (2)

Seminar and discussion on the mechanisms of toxicity in DNA alkylating agents. Participants present results from their research, and relevant journal articles are discussed.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with instructor's permission.

METX 281O - Topics in Bacterial Pathogenesis (2)

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcer-causing bacterium *Helicobacter pylori*. Participants are required to present results from their own research and relevant journal articles.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

METX 281P - Origins and Applications of Human Gut Microbial Symbiosis (2)

Research seminar focusing on how beneficial and harmful bacterial species living in the human intestine compete with one another for nutrients in food, and how our immune systems influence the outcomes of these competitions. Emphasis is placed on the evolution of relationships between organisms. Discussion will include genetic, biochemical, bioinformatic, and immunological methods for advancing knowledge about the impacts of microbes on host health. Participants are required to present results from their own research, analyze current literature, and develop future aims for their studies. All lab members of the Patnode Lab are required to take this course.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission.

METX 281R - Topics in Genome-Environment Interactions (2)

Intensive research seminar focusing on the effects of exposure to environmental agents and multigenerational

epigenetic inheritance of disease. Participants are required to present results from their own research and relevant journal articles.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission.

METX 281S - Cellular and Organismal Responses to Toxicants (2)

Intensive research seminar on the concepts, theory, and techniques in deriving physiologically based pharmacokinetic models of toxin exposure, metabolism, and efficacy of therapeutic treatment in mammalian models of human metal toxicity.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

METX 281V - Topics in Bacterial Pathogenesis and Innate Immunity (2)

Focuses on the interplay between the human gut bacterial pathogen *Yersinia pseudotuberculosis* and the innate immune system of the host. Participants are required to present the goals, results, and conclusions from their own research. Participation in the general discussion during others' presentations is also required.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates performing research under the supervision of the instructor may enroll with instructor's permission.

METX 281Y - Biofilms: Processes and Regulation (2)

Intensive seminar series focusing on the most current work on genes and the processes that regulate biofilm development dynamics as well as on the recent developments on visualization of biofilms. Presentation and discussion based.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission.

METX 282 - Current Approaches to Molecular Pathogenesis (2)

Graduate level seminar focusing on the mechanisms by which bacterial pathogens cause disease. Specific topics include basic concepts of virulence and virulence factors, virulence factor regulation, toxins, and interactions of pathogens with mammalian cells and organs. Discussions focus on several key pathogens, including *Helicobacter pylori*, *Vibrio cholerae*, *Salmonella typhimurium*, and *Listeria monocytogenes*.

METX 290 - Proseminar (5)

Special topics offered from time to time by faculty, visiting professors, or staff members.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 290A - Epidemiology and Risk Assessment (5)

Approaches different techniques of biological monitoring and the exposure and effect of biomarkers related to occupational and environmental exposure to chemicals. Available methods for risk assessment and identification of protective exposure limits also considered.

METX 292 - Introductory Graduate Seminar (0)

Weekly seminars by academic and research faculty on their areas of special interest. Students write weekly abstracts on articles covered by the seminars. This course can be taken for Satisfactory/Unsatisfactory credit only.

Prerequisite: Enrollment is restricted to graduate students.

METX 297A - Independent Study (5)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 297B - Independent Study (10)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 297C - Independent Study (15)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

METX 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

METX 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

MUSC - MUSIC

Lower-Division

MUSC 1C - University Concert Choir (2)

A study of selected works for mixed chorus, with emphasis on masterworks for chorus and orchestra, culminating in one or more public concerts. Familiarity with basic music notation recommended. Admission by audition with conductor prior to first class meeting.

MUSC 2 - University Orchestra (2)

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting.

MUSC 3 - Large Jazz Ensemble (2)

Instruction in performance in large jazz ensembles with written arrangements. Prepares a specific repertory for public performance. Admission by audition with conductor prior to first class meeting.

MUSC 5A - West Javanese Gamelan Ensemble: Beginning (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation.

MUSC 5B - West Javanese Gamelan Ensemble: Intermediate (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting.

MUSC 5C - West Javanese Gamelan Ensemble: Advanced (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting.

MUSC 6 - Classical Guitar Ensemble (2)

Study of selected repertoire and instruction in performance for classical guitar ensemble. Ensembles for guitar and other instruments will prepare works for public performances both on and off campus. All students enrolled in individual guitar lessons are expected to enroll. Students of other instruments or voice may also audition. Some additional rehearsal time, individually and with the group, is required. Admission by audition with instructor prior to first class meeting.

MUSC 7 - Music, Mind, Evolution, Language (5)

An interdisciplinary examination of various topics and issues in music, featuring an array of guest speakers. Part of the spring quarter Arts Division Dean's Lecture Series.

MUSC 8A - Beginning Balinese Gamelan (2)

Instruction in Balinese gamelan. Utilizes pitched percussion instruments to learn highly ornate and complex pieces through rote learning; students are not required to read music. Focuses on traditional repertoire and basic gamelan techniques for public performance. Enrollment by permission of the instructor at the first class meeting.

MUSC 8B - Advanced Balinese Gamelan (2)

Instruction in Balinese gamelan. Utilizes pitched percussion instruments to learn highly ornate and complex pieces through rote learning; students are not required to read music. Focuses on advanced traditional and contemporary repertoire for public performance.

Prerequisite: Prerequisite(s): MUSC 8A.

MUSC 9 - Wind Ensemble (2)

A study of selected advanced-level works for wind ensemble, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting.

MUSC 10 - Central Asian Ensemble (2)

Performing ensemble focusing on the vernacular and art musics of the Eurasian continent, with emphasis on Central Asia. (Formerly Eurasian Ensemble.)

MUSC 11A - Introduction to Western Classical Music (5)

A study of significant works of classical music from Gregorian chant to the present day in relation to the historical periods they represent. Emphasizes the listening experience and awareness of musical style and structure. Illustrated lectures and directed listening.

MUSC 11B - Introduction to Jazz (5)

Designed to provide students with thorough and comprehensive background in history and roots of jazz as a musical style from its African roots to the present. Essential jazz styles and traditions are discussed through lectures, required listening, readings, lecture demonstrations, and film presentations.

MUSC 11D - Introduction to World Music (5)

Covers topics reflecting distinctive features of selected world music cultures. Introduces content, scope, and method of ethnomusicology. Focuses on understanding the musical styles, performance practices, and cultural functions of these musical traditions. Incorporates live class performance of selected music.

MUSC 12 - Mariachi Ensemble (2)

Focuses on the stylistic practice of mariachi music of Mexico. Centralizes efforts learning dance music as the son jalisciense, as well as popular singing genres that include the huapango, canción ranchera, corridos, and boleros. Students must have previous experience with music performance and applicable instruments.

MUSC 12B - Mexican Folklorico Music and Dance (2)

Instruction in the aesthetic, cultural, and historical dimensions of Mexican Folklorico dance and music. Brings together a dance ensemble and a music ensemble. Enrollment is by permission of the instructor.

MUSC 13 - Beginning Theory & Musicianship I (5)

Fundamentals of sound production notation in music. Emphasis on the development of the ear and rhythmic skills. Course involves significant participation through in-class performance.

MUSC 14 - Beginning Theory & Musicianship II (5)

Students learn basic elements of musical language: rhythms, meters, scales, intervals, and chords. All of these elements are studied both singly and in their interrelationships within musical compositions. The study of structural elements of music incorporates both theoretical and practical aspects of learning, including written, keyboard, singing, and aural exercises. Prerequisite(s): MUSC 13, or placement via the Theory Placement Exam. Enrollment is by permission of the instructor.

MUSC 15 - Preparatory Musicianship (5)

Basic studies in musicianship related to Western European notation and literature. Students with prior training in music notation develop literacy in basic tonal melody and harmony. Skills include dictation and sight-reading. Simple composition and analysis exercises accompany the training. Enrollment by placement examination and permission of instructor.

MUSC 16 - Theoretical Foundations of Music (5)

Explores the physics and socio-historical foundations of music so that students are effectively equipped to undertake further culturally informed study in music theory. No prior formal music education is required for this class, though students should have some experience singing or playing an instrument.

MUSC 30A - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Species counterpoint and fundamentals of tonal harmony. Analysis of literature from the Middle Ages and Renaissance. Ear-training, taught in smaller sections, emphasizes recognition of triad and dominant-seventh inversions, dictation of diatonic melodies, and aural analysis of simple diatonic interval and chord progressions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite: admission by core curriculum placement examination.

MUSC 30B - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Diatonic harmony and fundamentals of chromatic harmony and musical form, with an emphasis on early 18th-century styles. Ear-training, taught in smaller sections, emphasizes recognition of triad and seventh-chord qualities and inversions, dictation of moderately complex melodies and multi-voice chorales, and aural analysis of chord progressions including secondary functions. Most of the ear-training materials consist of homophonic and polyphonic examples from music

literature performed live in class. Prerequisite(s): MUSC 30A; instructor determination at first class meeting.

MUSC 30C - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Chromatic harmony and large forms, with emphasis on late 18th- and early 19th-century styles. Ear-training, taught in smaller sections, emphasizes melodic and multi-voice dictation, as well as aural analysis of chord progressions, with materials including digressions, modulations, and advanced chromatic idioms. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite(s): MUSC 30B; instructor determination at first class meeting.

MUSC 51 - Vocal Repertoire Class (2)

The study and performance of vocal repertoire from 1400 to the present, including solo song, oratorio, opera, ensemble music. Emphasis is given to the development of effective performance skills, culminating in public performance. Attend first class meeting; concurrent enrollment in individual voice lessons with instructor of this course is required.

MUSC 52 - Guitar Repertoire and Performance (2)

Designed to give guitar students who are pursuing the music major and minor, a weekly performance opportunity. Student performers receive feedback and constructive criticism from the instructors and from their peers. The instructors also offer insight and tips on choosing repertoire, performance anxiety and solutions, and historical and cultural context of the composers and music performed in the class. Enrollment by permission of instructor.

MUSC 53A - Beginning Ghanaian Ensemble (2)

Students learn to perform music that originates primarily from Ghana, West Africa as well as be introduced to the variety of different musical styles present in Ghana through guided viewing of multimedia and discussion of culture as a living, evolving entity. Uses a variety of instruments including drums, bells, rattles, clappers, and hands. Classes consist primarily of hands-on instruction and singing. In-class learning supplemented with audio and video clips and articles posted on Canvas. Repertoire each quarter varies at the discretion of the instructor.

MUSC 54 - North Indian Music Workshop (2)

A course covering the music of North India taught using the oral traditions of Indian music. For beginners as well as more experienced students, this course is well suited for instrumentalists and vocalists. Interview; instructor determination at first class meeting.

MUSC 55 - Rhythms of North India (2)

Introduces students to the richness of North Indian rhythms. Includes hands-on exploration of the language of rhythm that is specific to learning the tabla.

MUSC 55A - Intermediate Rhythms of North India (2)

Covers learning to vocalize and play tabla bols. Also works on perfecting the technique of playing the various drum sounds on the tabla, pakhavaj or the dholak. Fundamental rhythmic exercises are focused on learning and improving playing technique and concentrate on compositions, such as a theka, theka prakar, kaida, rela, and tihai. Much of class time is spent on "hands-on" performance interspersed with short instructional bursts to improve each student's level of playability. Lab hours allotted as per student's practice needs.

Prerequisite: Prerequisite(s): MUSC 55, or by permission of instructor.

MUSC 56 - Collaborative Music-Making for Beginners (2)

An active, hands-on introduction to music where no previous musical experience is needed. Using pitched and non-pitched percussion, students are placed into small groups where they create and perform new pieces. Within this framework, students learn about scales, modes, rhythmic structures and form.

MUSC 57 - Survey of Jazz Guitar Styles (2)

Provides a selective historical and technical survey of jazz guitar. In addition to short lectures that provide historical context, students will also learn the basic building blocks of accompaniment and soloing in a variety of styles. Enrollment by permission of instructor.

MUSC 58 - Songwriting Craft and Practice (5)

Explores the craft of songwriting through listening, analysis, performance, and songwriting assignments. Students are exposed to a variety of writing styles from diverse musical backgrounds such as pop, rock, folk, jazz, avant-garde, classical, and world music. Students gain the ability to analyze a song's form, its textual rhythmic scheme, mood, and performative aspects. Students also compose, record, and perform song samples demonstrating their understanding and creative approach to the concepts discussed in class.

MUSC 59 - Introductory Keyboard Skills (2)

Introductory instruction in piano technique, staff notation, and music theory. Includes group and individual performance experience. A minimum of six hours per week individual practice required. Appropriate for students with little/no piano experience. Students are billed a materials fee of \$100. Enrollment is by permission of the instructor. Students audition to determine their skill level.

MUSC 60 - Fundamental Keyboard Skills (2)

Elementary instruction in piano technique, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Curriculum is coordinated with keyboard requirements of MUSC 30A. Concurrent enrollment in MUSC 30A is required. Students are billed a course fee of \$150. Prerequisite(s): Instructor determination at first class meeting. (Formerly Group Instruction in Piano.)

MUSC 61 - Individual Lessons: Half Hour (2)

One-half hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee of \$350. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 62 - Individual Lessons: One Hour (3)

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee of \$650. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 63 - Group Instrumental and Vocal Lessons (2)

Elementary group instruction in instrumental (excluding piano) or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Students are billed a course fee of \$100. Admission by audition with the instructor prior to first class meeting.

MUSC 73 - Music and the Ocean (3)

Studio course designed to explore relationships between music, sound, and the ocean. Students learn from a broad selection of music from oceanic and western cultures, deep listening techniques, and scientific research on underwater sound and apply it to their own music making. Students also explore connections between electronic music making and environmental sound research, including an introduction to listening techniques, recording, editing and analysis, composition and installation. Open to performers, composers, and theorists, as well as those from other disciplines, who want to expand their knowledge and practice in an experimental environment. Course ends with an online performance/presentation of new student work.

MUSC 74 - Spontaneous Composition/Improvisation I

(5)

Introduction to the basics of jazz improvisation, including theory, harmony, rhythm, improvisation techniques, aesthetics and idiomatic devices. Exposure to jazz repertoire through in-class performances of swing, blues, modal and Latin styles. Admission is by audition with instructor at first class meeting.

MUSC 75 - Jazz Theory I (5)

Studies in the modes, scales, chord alternations and extensions, chord voicings, chord progressions, and forms that underlie jazz improvisation, composition, and arranging in a variety of styles. (Formerly Beginning Improvisational Theory.)

MUSC 77 - Raga Jazz: Application of Indian Music to Western Instruments (5)

North India has some of the most melodic, and rhythmically complex musical forms in the world. Jazz, rock, pop and classical musicians are increasingly studying Indian music to give themselves an edge in today's musical landscape. The purpose of this class is to provide all musicians with a theoretical and practical performance approach using the knowledge of the North Indian music system. The goal is to enhance the melodic and rhythmic sensibilities and to open new doors to boost creativity and give a unique slant to composing and playing music.

MUSC 80A - Music of the Silk Road (5)

Exploration of the commonalities between music cultures found along ancient trade routes through Asia.

MUSC 80B - Music of Asia (5)

Introduces basic concepts of ethnomusicology; instructs students in the development of listening and analytical skills; and explores selected musical areas of East Asia, Southeast Asia, and South Asia.

MUSC 80C - History, Literature, and Technology of Electronic Music (5)

This survey of electronic music from previous centuries to the present studies the works and aesthetics of important composers, acoustics, musical perception, the effects of technological innovation on cultural evolution, and the development of synthesizers and computer music.

MUSC 80E - Race and American Music (5)

Survey of American music and its dynamic formation through cultural constructions of racial difference. Students hear music as contentious signals of identity, power, and transgressions, contextualized by wide-ranging testimony on racial difference, ethnicity, gender, sexuality, and musical practice.

MUSC 80F - Music in Latin American Culture: Regional

Traditions (5)

In-depth study of select music cultures of Mexico, Central America, and Caribbean, Brazil, Chile, Argentina, Colombia, and Peru. Characteristic regional genres, ensembles, instruments, and music rituals. Case studies by ethnomusicologists with expertise in specific regional musics. Also Latin American Nueva Canción, women's musics, and overarching themes in Latin American music, as a whole. Offered on a rotational basis with other non-Western courses in the 80 series.

MUSC 80G - American Musical Theater (5)

Surveys American musicals from operetta through rock musicals with a historical approach focusing on selected examples from the literature. Music reading or musical experience helpful but not required.

MUSC 80H - The Hollywood Musical (5)

Introductory study of the Hollywood music film, exploring the theory of film sound, the musical genre, and representative works from the 1920s to the present. Students expected to view about two films each week, read assigned section of texts, and contribute to class discussions.

MUSC 80I - Music of Modern Israel (5)

Historical, musicological, and anthropological study of the many (and often conflicting) worlds brought together by Israeli popular and art music: Jewish and Arabic traditions, Western ideals, and modern beats.

MUSC 80J - American Folk Music (5)

Surveys American folk music, both instrumental and vocal, by region and period. Approach is primarily through listening. Previous musical experience helpful, but not required.

MUSC 80K - Sound in Art, Science, and the Environment (5)

Study the role of sound in artistic creation and scientific research related to the environment. Topics include: environmental sound monitoring, increasing environmental awareness, social activism, discovery of sound phenomena, knowledge of audio tools and techniques, sound and environmental problem-solving.

MUSC 80L - Artificial Intelligence and Music (5)

An introduction to basic concepts in music and artificial intelligence, and to algorithmic composition (composition by a set of explicit instructions, often using the computer). Other topics include basic introductions to related concepts in linguistics, mathematics, neural nets, pattern matching, genetic algorithms, fuzzy logic, and interactive systems. Previous experience in one or more of these topics is helpful but not required. Students produce a project based on one of the models presented in class.

MUSC 80M - Film Music (5)

A survey of film music including a discussion of current trends and film composers. Techniques and styles of film music are explored through lectures, required listenings, readings, and viewing of relevant films. A musical background, including the ability to read music, is helpful but not necessary.

MUSC 80N - Music of the Grateful Dead (5)

In-depth exploration of the music of the Grateful Dead. Contextual study of the sociology and history of the late 1960s psychedelic movement supplies background for study of the music as the band evolved through time.

MUSC 80O - Music, Politics, and Protest (5)

Examination of relationship between music, politics, and protest in the U.S. in the 20th century, with focus on how music commented upon and reflected different eras in American cultural and political life.

MUSC 80P - Popular Music in the United States (5)

Introduces music and cultural studies, surveys popular music in the United States from 18th-century minstrelsy to 21st-century social media consumer-producers. Emphasizes narratives of race, complicated by ethnicity, gender, and class, informing ways of valuing music, and its capacity for social representation. (Formerly Music 11C, Introduction to American Popular Music.)

MUSC 80Q - A Survey of African Music (5)

Traces the various stylistic musical areas throughout the African continent and explores the development of traditional African music from antiquity into the 20th century.

MUSC 80R - Music in the Digital Age (5)

A survey of how the Internet has influenced how music is made, transmitted, and consumed. Students discuss the history and ethics of file sharing and open source software, telematics and methods of music-making via the Internet, virtual communities, and social media. Students explore these topics through research and creative projects. (Formerly Music and the World Wide Web.)

MUSC 80S - Women in Music (5)

An exploration of the sociological position of women as composers and performers in Western and non-Western musics, with a focus on both ethnographic and historical sources.

MUSC 80T - Mizrah: Jewish Music in the Lands of Islam (5)

A survey of the musical traditions of the Jews of North Africa and the Middle East. Based on the Maqamat, the Arabic musical modes, Jewish music flourished under Islamic rule, encompassing the fields of sacred, popular, and art music.

MUSC 80V - The Music of the Beatles (5)

The most significant group in the history of popular music, the Beatles spanned the gamut of styles from hard-edged R & B to sophisticated art-rock. This course explores their work in detail, in its own terms, and in the historical/cultural/technological contexts. Students cannot receive credit for both this course and MUSC 180V in the same quarter. MUSC 11C is recommended but not required as preparation.

MUSC 80W - Music Business (5)

Explores the many facets of the music industry: history, technology, economics, sociology, and legislation. Provides both a broad understanding of the industry and a pragmatic survey of available career paths. Students cannot receive credit for both this course and MUSC 180W in the same quarter.

MUSC 80X - Music of India (5)

A survey course in Hindustani (North Indian) and Karnatak (South Indian) music covering the Raga (modal system) and Tala (metric system) as they have developed in the two traditions. Consideration is given to the historical development of the music, from Vedic chanting to the modern Raga system; social functions of the music throughout history; and instrumental and vocal forms with an emphasis on listening.

MUSC 80Y - Music, Anti-Semitism, and the Holocaust (5)

The musical legacy of the Holocaust: music and anti-Semitism in the 19th century; morality, collaboration, and composing in the Third Reich; music in the ghettos and concentration camps; impact on post-war music; second-generation composers' trauma; music in Holocaust films.

MUSC 80Z - Laptop Music (5)

Basic digital audio editing and mixing; related concepts in the physics of sound, psychoacoustics, and the digital representation and computer control of audio. Musical notation of musical pulse, meter, and rhythm, and sonic realization via MIDI (musical instrument digital interface). Using their own computers, students complete projects involving recording and spectral analysis, creative editing and mixing of existing recordings, composition of polyphonic drum rhythms, and constructing a collaborative sonic environment.

MUSC 81A - Survey of Rap and Hip Hop Music (5)

Involves examination, evaluation, performance, and discussion of rap music and its relationship to hop culture. Looks at three primary areas: historical periods of rap, aspects of performance practice, and lyrical content related to issues in contemporary society. Students engage in listening exercises, performances and presentations, and discuss the placement of rap in an academic setting. No prior musical knowledge is required.

MUSC 81C - Global Popular Music (5)

This cultural study of global popular musics explores musical sounds, practices, and discourse via an examination of the development of the category world music. It explores how music and mass media engage broader issues around globalization, ethnic, national, and transnational identities; popular resistance; censorship; and cultural hegemony.

MUSC 81E - Music and Resilience in Latin America (5)

Introduces the role of music and musical practices in social movements, cultural changes, and activism in the 20th and 21st centuries in Latin America and Latina/o communities in the United States and other parts of the world where Latin American cultures are vibrant. Case studies covered in class demonstrate how actions occur within social, political, economical, and environmental spheres that impact the formation of identities, the negotiation around human rights, and the well-being of communities.

MUSC 81G - A Cultural History of the Guitar (5)

Surveys the history of the guitar—one of the world's most popular, adaptable, and ubiquitous instruments—by tracing its organological development in the late Renaissance and analyzing representative historical moments of widespread cultural relevance through a technological lens.

MUSC 81H - The Golden Age of Hip Hop (3)

During the Golden Age Era of Hip Hop (late 1980s to mid-1990s) there was a creative explosion of musical representation in rap/hip hop music. Beginning after the commercial success of Run DMC in 1986, class focus continues until the deaths of Tupac Shakur (1996) and the Notorious B.I.G. (1997). In between these points some of the most influential and controversial figures in hip hop history emerge.

MUSC 81I - Music of Indonesia (5)

Explores the wealth of musical culture from throughout the Indonesian archipelago, including islands such as Bali, Java, Sumatra, and Lombok. Students learn about traditional, popular, and contemporary musics from these islands and examine their historical, cultural, and religious interconnections. Major themes include global music theory, cultural identity, religious identity, and cultural exchange. This course also features a lab element in which students have the chance to get hands-on experience learning to play the music of Indonesia using the university's diverse collection of Balinese and Javanese instruments.

MUSC 81J - Jazz Mirror of Global Interconnection (5)

Examines global cultural history through the primary lens of jazz music evolution from its traditional African source through the nexus of the primary elements of sound. Students use music to examine and explore the

intersections between many global cultural developments.

MUSC 81L - Music in Animated Film (5)

Introduces a selective survey of music in animated film (Disney, Pixar and DreamWorks), both instrumental and vocal, highlighting the representative works from the 1930s to the present. Through listening and viewing, students explore the use and role of music in animated film.

MUSC 81M - Chicano/Latino Music in the United States (5)

Examines the process of music making and how it is tied to the notion of space, place, identity and ethnicity, focusing on musical styles, genres, forms, and repertoires in Chicana/o and Latina/o communities in the United States.

MUSC 81P - History of Jewish Music (5)

Survey of the diverse and rich musical traditions of Jewish music in the diaspora from biblical times to the present. Examines the historical, social, and anthropological aspects of the different communities from sacred music through art and popular songs. (Formerly course 80P.)

MUSC 81R - The 1970s: A Decade in Rock (3)

Rock in the 1970s topped music charts while expanding far beyond the radio single. Many 70s artists, such as Elton John, Led Zeppelin, and Pink Floyd, continue to enjoy widespread popularity today. Music 81R engages with key albums and artists from the 1970s and provides students with opportunities to cultivate analytical listening skills and examine this decade in rock, its roots, and its biases. Through weekly discussion assignments culminating in a final album review project, students develop the creative practice of rock music criticism.

MUSC 81S - Music and Science Fiction (3)

Examines the historical and cultural role of music in science fiction literature, film, and television, asking students to question how music is used to convey the strange and unfamiliar and to further think critically about why music is able to do so. Also covers science fiction in opera, symphonic music, and popular music, highlighting the musical elements that comprise the sounds of science fiction.

MUSC 81T - Fundamentals of Music Technology (2)

A practical introduction to the tools and techniques used for live sound reinforcement and studio recording. Hands-on demonstrations of different microphones, speakers, hardware and software processors, analog and digital systems.

MUSC 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Admission requires approval of department.

MUSC 99 - Tutorial (5)

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency.

MUSC 99F - Tutorial (2)

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency.

Upper-Division**MUSC 101A - History of Western Art Music (Medieval, Renaissance, and Baroque) (5)**

First quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Medieval, Renaissance, Baroque. Formerly History of Western Art Music.

Prerequisite: Prerequisite(s): MUSC 30A and satisfaction of the Entry Level Writing and Composition requirements.

MUSC 101B - History of Western Art Music (5)

Second quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Baroque, Classical, Romantic.

Prerequisite: Prerequisite(s): MUSC 30B and satisfaction of the Entry Level Writing and Composition requirements, or by instructor permission.

MUSC 101C - History of Western Art Music (5)

Third quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Romantic, 20th Century.

Prerequisite: Prerequisite(s): MUSC 30C and satisfaction of the Entry Level Writing and Composition requirements, or by permission of instructor.

MUSC 102 - University Orchestra (2)

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Enrollment restricted to juniors and seniors.

MUSC 103 - University Concert Choir (2)

A study of selected works for orchestra, culminating in one or more public concerts. Prerequisite(s): admission by audition with conductor prior to first class meeting.

MUSC 105A - Music of the United States (5)

Traces major developments in the history of American music since the Revolutionary Era, focusing on what makes music in the United States unique. Material drawn from classical, popular, religious, jazz, and avant-garde traditions.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to music majors, or by permission of the instructor.

MUSC 105C - Folk and Traditional Music in California (5)

A comparative study of the folk and traditional musical productions of five different cultural communities found in California, through a body of media that intersects history, sociology, anthropology, ethnomusicology, and more.

Prerequisite: Prerequisite(s): MUSC 30A and satisfaction of the Entry Level Writing and Composition requirements, or by permission of instructor.

MUSC 105E - Early Keyboard Music (5)

Survey of four centuries of early keyboard music, including representative genres, instruments, composers, and compositions from the late-Gothic to the Classical period. Harpsichord, virginal, organ and fortepiano works studied through scores, recordings, and live performance. Social context, instrument tuning and representative performance practices will coordinate each unit.

Prerequisite: Prerequisite(s): MUSC 101A or MUSC 101B or MUSC 101C. Enrollment is restricted to junior and senior music majors.

MUSC 105I - Improvisation and Collaborative Practices in the 20th Century (5)

Study of music repertoires and performance practices based on improvisation and collaborative approaches to real-time composition in the areas of jazz and other new music.

Prerequisite: Prerequisite(s): MUSC 30A or by permission of instructor.

MUSC 105M - Solo Song: from Monophony to Monody (5)

Traces the changing landscape of the secular solo song from the earliest notated examples of the troubadours through the explosion of monody in print at the beginning of the 17th century.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and MUSC 30A and MUSC 101A, or by permission of instructor.

MUSC 105O - Opera from Peri to Pergolesi (5)

Traces the development of opera from its origins in the late 16th century through the works of the early 18th century. Explores all aspects of this multimedia genre, with significant research and writing components.

Prerequisite: Prerequisite(s): MUSC 30C and MUSC 101A, or by permission of the instructor.

MUSC 105P - The Piano (5)

Research-based survey of the history of the piano and related keyboard instruments. Topics include instrument mechanics, design, and tuning; important players and innovators in piano technique; repertoire written for piano in classical, jazz, vernacular, and experimental traditions and performance practices, including improvisation; the socioeconomics of the piano industry; the piano's use as a pedagogical tool.

Prerequisite(s): MUSC 30A and consent of instructor.

MUSC 105Q - The String Quartet from Haydn to the Present (5)

Traces the development of the string quartet from its origins in the mid-18th Century through the works of the mid-late 20th Century. Emphasis is on listening and analysis with significant research and writing component. (Formerly The String Quartet from Haydn to Shostakovich.)

Prerequisite: Prerequisite(s): MUSC 30A and satisfaction of the Entry Level Writing and Composition requirements, or by permission of instructor.

MUSC 105R - History of Russian Music (5)

Focuses on Russian music in its historical development from the Middle Ages to the 20th century. Class lectures, as well as listening and reading materials, draw together different musical strata. All musical events viewed in their cultural, historical, and social contexts.

Prerequisite: Prerequisite(s): MUSC 30A or by permission of instructor.

MUSC 105T - Tuning and Acoustics Through Monophony, Heterophony, and Polyphony (5)

Explores tuning and acoustics across various cultures throughout music history. Surveying foundational tuning theories developed in ancient Greece, the course follows tuning developments up to the modern era with a focus on how these theories are manifest in the acoustics of instrument building. Categorizations specific to instruments and instrument building (chordophone, aerophone, idiophone, etc.) are outlined in relationship to their historical acoustic and tuning practices. Additionally, the categorizations of

monophony, heterophony, and polyphony are applied to the various cultures of music that is surveyed, informing the ensuing considerations pertaining to tuning, acoustics, and instrument building.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and MUSC 30A, or by permission of instructor.

MUSC 111B - Seminar in Jazz Analysis (5)

Analytic exploration of the evolution of jazz in America. The process involves independent listening, analysis, transcription, weekly seminar discussions, and oral presentation to students in MUSC 11B.

Prerequisite: Prerequisite(s): MUSC 30A and MUSC 11B.

MUSC 120 - Seminar in Music Composition (5)

Instruction in individual composition offered in the context of a group; composition in traditional large and small forms. Counts as one of two choices for a capstone course.

Prerequisite: Prerequisite(s): MUSC 30B or by permission of instructor.

MUSC 121 - Orchestration (5)

A study of the nature of each instrument of the orchestra. Scoring for various small instrumental combinations, culminating in a transcription for full orchestra.

Prerequisite: Prerequisite(s): MUSC 30C.

MUSC 122 - Conducting (2)

The development of basic conducting techniques, including understanding and demonstration of the conductor's posture, best practices of dynamics, left hand usage, mixed meter, and breath.

Prerequisite: Prerequisite(s): MUSC 130 or by permission of the instructor.

MUSC 123 - Electronic Sound Synthesis (5)

Introduction to electronic music studio techniques, relevant electroacoustical studies, and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with an analog synthesizer; mixing, equalization, multitrack recording equipment, and other sound processing. Application form available at department office during last two weeks of the previous quarter. Preference given to music majors, students in the film/video major, and those with substantial musical experience. Prerequisite(s): instructor determination via application; MUSC 80C or MUSC 30A placement.

MUSC 124 - Intermediate Electronic Sound Synthesis (5)

Composition with the use of small computers in the electronic music studio. Techniques covered include

hybrid synthesis, digital synthesis, and MIDI-controlled systems. No programming is involved, but basic computer literacy is helpful.

Prerequisite: Prerequisite(s): MUSC 123.

MUSC 125 - Advanced Electronic Sound Synthesis (5)

Continuing study in the electronic music studio, with concentration on compositional development. Includes advanced applications of skills developed in MUSC 123 and MUSC 124, expansion of background knowledge and relevant electroacoustical studies.

Prerequisite: Prerequisite(s): MUSC 124.

MUSC 129 - Live Electroacoustic Music Ensemble (2)

Explores the live performance practice of electroacoustic music, including historical repertoire, improvisation, and compositions by participants. All manner of electronic audio resources are applied to real-time performance. Participants need a basic proficiency in electronic audio and computer tools. Enrollment is restricted to juniors, seniors, and graduate students. Enrollments is by permission of the instructor at first class meeting.

MUSC 130 - Harmony and Form in 19th-Century and Early 20th-Century Music (5)

Analysis, theory, musicianship, and aural skills associated with advanced tonal music. Study of chromaticism, larger forms, and other features of 19th-Century and early 20th-Century music.

Prerequisite: Prerequisite(s): MUSC 30C and Piano Proficiency Exam.

MUSC 150A - Music Analysis for Performers (5)

A study of homophonic forms in tonal music. Architectonic, thematic, harmonic, and hermeneutic analyses of instrumental and vocal compositions in their historical context. Deliberations of various interpretational solutions and comparative analyses of historical and modern performances.

Prerequisite: Prerequisite(s): MUSC 30C or permission of instructor.

MUSC 150B - Music Analysis and Composition (5)

A course designed to synthesize the analysis and the composition of musical works. Tonal and post-tonal music compositions analyzed, including harmonic, rhythmic, and formal structure analysis. Works discussed include J.S. Bach (and related music by Johannes Brahms, John Adams, Benjamin Britten, Krzysztof Penderecki); Claude Debussy and Bela Bartok; Arnold Schoenberg (and Anton Webern); Olivier Messiaen (and Karlheinz Stockhausen, Pierre Boulez, Elliot Carter).

Prerequisite: Prerequisite(s): MUSC 120.

MUSC 150C - Special Topics in Music Theory: Tonal

Counterpoint (5)

Tonal counterpoint modeled on the music of J.S. Bach. Imitative and non-imitative forms including binary dance, invention, canon, and fugue. Discussion and analytical application of generalized intervallic and harmonic models. Development of related keyboard, singing, and aural skills, including dictation in two and three voices.

Prerequisite: Prerequisite(s): MUSC 130.

MUSC 150D - Special Topics in Theory: Southeast Asia (5)

Explores the relationship between music theory and culture as it introduces students to a range of musical styles throughout Southeast Asia, with a slight focus on the gamelan music of Indonesia. Students also learn about traditional and popular musics from Korea, China, India, and Vietnam, as well as examine the interconnections and relationships between music from different locations. Major themes include global music theory, cultural identity, authenticity, exoticism, fetishism, nationalism, class dynamics, and cultural exchange.

Prerequisite: Prerequisite(s): MUSC 30A, or by permission of instructor.

MUSC 150I - Special Topics in Music Theory: Hindustani Music (5)

In-depth introduction into the music, culture, and theory of Hindustani music.

Prerequisite: Prerequisite(s): MUSC 54 or MUSC 55.

MUSC 150N - Noise, Music, Politics (5)

How has noise become a resource for musicians, artists, and activists? Noise can be negative, disruptive, painful, annoying, or it can be transgressive, liberating, rebellious, and a critical expression of resistance. Noise can take on many forms: metaphorical, silent, visual, dissonant, literary, quiet or loud. Course focuses on modernist and postmodernist techniques and discourses, traversing many practices from how noise and silence have been used as weapons, to experimental art music, punk rock, death metal, Japanoise, improvised music, and electronic glitch amongst others in order to trace how noise has been harnessed as a tool for disruption.

Prerequisite: Prerequisite(s): MUSC 30A, or by permission of instructor.

MUSC 150P - Special Topics in Music Theory: 20th-Century Popular Song (5)

Analysis and composition in two 20th-century popular song genres. Part one (of two) is drawn from 1930s swing or Tin-Pan-Alley standards. Part two varies according to instructor and may include genres outside the United States.

Prerequisite: Prerequisite(s): MUSC 30C or permission of instructor.

MUSC 150R - Field Recording: Mapping and Composing Sound, Identity, and Place (5)

This practice-based class explores the art of field recording and the aesthetic, social, political, and ethical questions it engages. Through critical reading, listening, discussion, recording, and creative projects, investigates how sound interacts with nature, urban spaces, objects, people, and networks. Uses sound as our lens in order to gain a stronger appreciation of its presence in our environments and how we create, interpret, and interact with them.

MUSC 150S - Focus on Spontaneous Composition (5)

Examines both music and musical composition, and the characteristics they share with science, mathematics, and the natural world. Written for upper-division and graduate courses, the course text shows that music is part of an interdisciplinary collection of artistic modes of expression, and that these modes can be better understood in the context of what students observe in the real world. Thinking about music, through a variety of angles, students aim to understand that creativity is a vehicle through which to explore the evolution and interconnectedness of music as well as other phenomena in our universe.

Prerequisite: Prerequisite(s): MUSC 30A or by permission of instructor.

MUSC 150T - Post Tonal Analysis (5)

Examines the analytic and compositional techniques associated with selected post tonal styles including the linear, harmonic, rhythmic, and textural elements of music by composers, such as Schoenberg, Stravinsky, Bartok, Debussy, Messiaen, Carter, Cage, and Reich. Students attend weekly keyboard/ear-training laboratories.

Prerequisite: Prerequisite(s): MUSC 130.

MUSC 150X - Theoretical Practices of American Music (5)

Examines theoretical practices and compositional methods of 20th-Century American composers including Charles Ives, Henry Cowell, Ruth Crawford, Johanna Beyer, Harry Partch, Conlon Nancarrow, John Cage, James Tenney, Kenneth Gaburo, George Russell, and Ornette Coleman.

Prerequisite: Prerequisite(s): MUSC 30A, MUSC 30B, and MUSC 30C. Enrollment is restricted to music majors.

MUSC 158 - South African Music Ensemble (2)

Introduces music and performance practice from South Africa. Covers a selection of repertoire in many languages and many traditions, with strong emphasis on vocal music. Enrollment is by permission of the

instructor. Students must audition for the class in order to provide information about their skill level.

MUSC 159A - Opera Workshop (2)

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting.

MUSC 160 - University Opera Theater (5)

A production workshop, culminating in one or more staged performances of an entire opera or selected scenes from the operatic repertory. Admission by audition with instructor prior to first class meeting; auditions usually take place in fall quarter.

MUSC 161 - Individual Lessons: One Hour (3)

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee of \$650. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 161A - Individual Lessons: Half Hour (2)

One-half hour of individual instrumental or vocal instruction, intended for upper-division students. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 161B - Group Instrumental & Vocal Lessons (2)

Group instruction in instrumental or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Intended for upper-division students. Admission by audition with the instructor prior to first class meeting.

MUSC 162 - Advanced Individual Lessons: One Hour (5)

One hour of individual instruction for advanced students. Study of repertory, technique, and performance practice. A minimum of 18 hours per week of individual practice and at least one 30-minute recital are required. May be taken three times for credit. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee of \$650. Admission by juried audition.

MUSC 163 - Early Music Ensemble (2)

A study of selected works for varied early music instrumental and vocal resources, culminating in one or more public concerts. Individual lessons are recommended in conjunction with consort work. Recommended for students who have instrumental or vocal competence and music literacy. Admission by audition with instructor prior to first class meeting.

MUSC 164 - Jazz Ensembles (2)

Instruction in combo performance and techniques of the jazz idiom. The class forms several ensembles that prepare a specific repertory for public performance. Admission by audition with instructor prior to first class meeting.

MUSC 165 - Chamber Music Workshop (2)

A study of selected works for various small combinations of instruments, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting.

MUSC 166 - Chamber Singers (2)

The study of selected works for small vocal ensemble from the 15th through 20th centuries, with performances on and off campus throughout the academic year. Students must have demonstrated vocal and music reading skills. Admission by audition with instructor prior to first class meeting.

MUSC 167 - Workshop in Electronic Music (2)

Continuing studio work in electronic music. Students carry out individual projects, meeting in weekly seminar to share problems and discoveries. Relevant advanced topics are covered, including new developments in the art.

Prerequisite: Prerequisite(s): MUSC 124.

MUSC 167R - Recording Workshop (2)

Seminar in modern studio recording. Students learn aspects of recording from pre-production through mastering and distribution. Weekly recording sessions give students hands-on experience in running recording sessions and working with musicians. Admission by interview with instructor prior to first class meeting. Enrollment is restricted to music majors.

MUSC 168 - Experimental Music Ensemble (2)

A study of selected works for various small combinations of instruments and voice, culminating in one or more public concerts. Admission by audition with instructor. Contact instructor prior to first class meeting.

MUSC 174 - Intermediate Spontaneous Composition and Improvisation (5)

Through performance, composition, analysis, and transcription course gives students an opportunity to

expand and enrich their skills in applying musical knowledge to the application of spontaneous composition over a range of jazz styles, including older standards and more contemporary tunes. (Formerly Intermediate Jazz Improvisation.)

Prerequisite: Prerequisite(s): MUSC 74 or MUSC 75 or two quarters of MUSC 3.

MUSC 175 - Jazz Theory II (5)

Through transcription, analysis, and performance of jazz standards, composition, arranging, improvisation, and spontaneous creation explored. Students write a series of improvisations, short compositions, and arrangements throughout the course.

Prerequisite: Prerequisites: MUSC 74 or MUSC 75 or two quarters of MUSC 3.

MUSC 180A - Studies in World Musics: Asia and the Pacific (5)

In-depth ethnomusicological studies of selected music cultures of East Asia, Southeast Asia, and the Pacific. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research.

Prerequisite: Prerequisite(s): Enrollment is restricted to music majors and music graduate students. Students may also enroll with permission of instructor.

MUSC 180B - Studies in World Musics: Africa and the Americas (5)

In-depth ethnomusicological studies of selected music cultures of sub-Saharan Africa and South and North America, including Native America. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research.

Prerequisite: Prerequisite(s): MUSC 30A and satisfaction of the Entry Level Writing and Composition requirements, or by permission of instructor. Concurrent enrollment in a non-Western performing ensemble is strongly recommended. Anthropology majors may enroll with permission of instructor.

MUSC 180C - Studies in World Musics: Central Asia (5)

In-depth, ethnomusicologically oriented course on select music cultures in Central Asia. Compares theoretical, historical, and cultural aspects of music and culture from Uzbekistan, Tajikistan, Afghanistan, Kyrgyzstan, Kazakhstan, the Xinjiang region of China, Mongolia, and Tuva.

Prerequisite: Prerequisite(s): Enrollment is restricted to music majors and music graduate students. Students may also enroll with permission of instructor.

MUSC 180D - Music of Insular Southeast Asia (5)

Comparative studies of selected music cultures focusing on the cosmology, music rituals, and organology of varied cultures in Malaysia, Indonesia, Papua New Guinea, and the Philippines. Introduction to ethnomusicology field research and transcription, and hands-on ensemble workshops.

Prerequisite: Prerequisite(s): MUSC 30A; concurrent enrollment in MUSC 5B, MUSC 5C, or MUSC 8. Enrollment is restricted to music majors. Anthropology majors may enroll with permission of instructor.

MUSC 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing and a proposal supported by a music faculty member willing to supervise required.

MUSC 195A - Senior Thesis (5)

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency.

MUSC 195B - Senior Thesis (5)

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency.

MUSC 196A - Senior Recital Preparation (without individual lessons) (5)

Prerequisite(s): juried audition or approved composition portfolio. Students submit petition to sponsoring agency.

MUSC 196B - Senior Recital Preparation (with individual lessons) (5)

Students are billed a course fee of \$650. Prerequisite(s): juried audition.

MUSC 199 - Tutorial (5)

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency.

MUSC 199F - Tutorial (2)

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency.

Graduate**MUSC 200 - Introduction to Research Methods (5)**

Practical introduction to graduate study in music focusing on research methods, music sources and bibliography, techniques of scholarly writing, and critical readings in the discipline. Culminates in a public oral presentation on the model of a professional conference paper.

MUSC 201 - History of Music Theory from the Greeks Through Rameau (5)

Study and analysis of pre-tonal and tonal music from the Greeks through the 18th century. Course combines a history of theory with analyses that utilize contemporaneous theoretical concepts.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 202 - Tonal and Posttonal Analysis (5)

Encompasses various forms of linear analysis, set theory, and selected topics in current analytical practice.

MUSC 203A - Performance Practice in the Middle Ages (5)

A study of performance practices in medieval music from Gregorian chant to the 14th century. History of instruments and notation. Rhythmic interpretations of chant and a study of improvised practices in organum. Editing and performance of representative works. Offered on a rotational basis with other courses in the 203 series.

MUSC 203B - Performance Practice in the Renaissance (5)

A study of performance practices in Renaissance music, including concepts of mode, musica ficta, ornamentation, text underlay, tempo, and articulation. Basic principles of white notation and a brief history of instruments. Transcription, editing, and performance of a Renaissance work. Offered on a rotational basis with other courses in the 203 series.

MUSC 203C - Performance Practice in the Baroque (5)

An examination of historically informed performance practice techniques in Baroque music, with attention to aspects of ornamentation, articulation, figured bass realization, dance choreography, rhythm and tempo, and organology. In-class performances and editing of source materials are included. Offered on a rotational basis with other courses in the 203 series.

MUSC 203D - Performance Practice in the Classic Period (5)

Issues in performance practice focusing on selected topics and styles from the time of C.P.E. Bach through Haydn. Development of selected genres and ensembles, sources and editing, and interpretation and

improvisation. Offered on a rotational basis with other courses in the 203 series.

MUSC 203E - Performance Practice in the Romantic Period (5)

Interpretation of music from Beethoven to Scriabin through examinations of both the musical texts (form, genre, harmony, texture, orchestration, etc.) and the period performance practices. Topics range from interpretative analyses of selected compositions to critical assessments of modern as well as documented 19th- and early 20th-century performances. Offered on a rotational basis with other courses in the 203 series.

MUSC 203F - Performance Practice in the 20th Century (5)

Projects in analysis, notational studies, extended instrumental techniques, and the aesthetics and performance practices associated with composers from Debussy to the present. Reading and listening focuses on the writings and performances of the composers themselves and upon interpretive writings by informed performers of 20th-century music. Offered on a rotational basis with other courses in the 203 series.

MUSC 203G - Concepts, Issues, and the Practice of Ethnomusicology (5)

Ethnomusicological field methodology; vocal and instrumental performance practices as related to the ethnomusicological endeavor. Specific topics: philosophical paradigms, historical overview, and definitional issues of ethnomusicology; field research concepts and procedures; studies in instrumental and vocal performance practices of diverse cultures; selected writings of Charles Seeger; transcription and analysis issues; studies in micromusics. Offered on a rotational basis with other courses in the 203 series.

MUSC 203H - Area Studies in Performance Practice (5)

Intensive examination of the vocal and instrumental performance practices of living musical traditions of Indonesia, Latin America, or other regions. Topics may incorporate soloistic and ensemble traditions, secular and sacred traditions. Research rubrics include tuning, tone quality, performance posture and rhetoric, and improvisational and fixed patterns, as dictated by regional norms. May be repeated for credit in a different area. Offered on a rotational basis with other courses in the 203 series.

MUSC 204 - Pedagogy of Music (2)

Provides graduate students with an opportunity to reflect on and practice a wide variety of pedagogical skills necessary to teach post-secondary music in a number of settings, including rehearsals, lectures, sections, and labs. These skills may include lesson planning, inclusive teaching, active learning, assessment, evaluation, teaching with technology, syllabus design, teaching statement writing, and lesson

facilitation. Pedagogical skills modeled through a series of facilitated activities.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 204W - Graduate Writing Workshop (2)

Focuses on the mechanics of academic writing (including grammar and syntax) with a focus on styles specific to writing about music. Topics covered will include writing music criticism, developing ethnographic descriptions of musical events (i.e., "thick description"), crafting written descriptions of musical sound, and academic writing for general audiences. Students also utilize the workshop to develop large-scale writing projects specific to their course of study (such as preparatory qualifying exam essays, composition program notes, dissertation and thesis chapters, conference papers, etc.).

Prerequisite: Enrollment is restricted to graduate students.

MUSC 205A - Conceptual Foundations in Western Music Analysis (2)

Focused analysis of selected works from the Western classical music repertoire. Emphasis is on aural and analytical skills, the modal and tonal foundations of Western music, and the evolution of form and expression.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 205B - Conceptual Foundations in World Music (2)

A broad survey of traditional and vernacular musical practices from around the world with an emphasis on aural analysis and critical listening skills.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206A - World Music Composition (5)

Studies in the history, structure, and cultural function of music from cultures as diverse as Global African, central European, Korean, Latin American, Indonesian, and Indian traditions. Examines ways in which composers such as Bartok, Anthony Braxton, Chou Wen-Chung, Lou Harrison, and Takemitsu sought and integrated such influences. Students choose to write critical and analytic essays on musics exhibiting diverse cultural influences, or to compose music that takes a vernacular or non-European music as a model for a compositional/improvisational approach.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206B - Computer-Assisted Composition (5)

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary

idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206D - Music Perception and Cognition (5)

Investigations in the psychology of musical listening and awareness. Topics include time and rhythm perception, auditory scene analysis, pattern recognition, and theories of linguistics applied to harmony, melody, and form in the music of diverse cultures. Explores applications of the cognitive sciences to music transcription, analysis, composition, interpretation, and performance practice. Students apply existing knowledge in the cognitive sciences to a developing creative or analytical project, or develop and conduct new experiments.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206E - Experimental Sound Practices (5)

Examines different sonic practices, challenging culturally pre-formed definitions of music (and how music is experienced). Students familiarize themselves with critical theoretical writings on modern and postmodern theories and sound studies and by studying closely the work of various sound artists and composers. Questions posed include: What were the conditions and attitudes that have sparked and shaped experimental attitudes? How has the development of audio technologies changed how we listen and create sound-based work? What propels someone to experimentation? What are the social and cultural implications of experimental work? How do you experiment in your work?

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206I - Negotiating the Musical Work (5)

Explores the ontology of music and relevant topics. Weekly readings in addition to guest speaker(s) and workshops. Everyone is expected to read and digest as much as possible ALL of the assigned readings.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 219 - Techniques in Composition (5)

Short compositional exercises incorporating diverse contemporary techniques with emphasis on problem solving and development of compositional skills. Exercises focus on particular strategies for organizing and coordinating aspects of pitch, rhythm, timbre, and

other musical dimensions, depending on interests of instructor and students.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 220 - Graduate Seminar in Music Composition (5)

Instruction in individual composition offered in the context of a group; composition in large forms of the 20th century with emphasis on techniques since 1950. May be taken by upper-division undergraduates for credit. Interview with instructor at first class meeting.

Prerequisite: Prerequisite(s): MUSC 219.

MUSC 228 - Techniques of Modernity and Aesthetic Formations (5)

Explores the transformations and aesthetic possibilities of the digital age through a study of perceptual shifts of the past, from orality to literacy, gift to commodity, pre-colonial to colonial, pre-modern to modern, and the technological revolutions that accompanied these shifts.

Prerequisite: Enrollment is restricted to graduate students; upper-division undergraduates may enroll with permission of instructor.

MUSC 252 - Current Issues Colloquium (0)

An interactive colloquium featuring presentations by faculty, graduate students, and visiting scholars on research projects in composition, musicology / ethnomusicology, and performance practice, followed by focused discussion.

Prerequisite: Enrollment is restricted to graduate students. Undergraduate students may enroll with permission of instructor.

MUSC 253A - Historical Perspectives in Musicology and Ethnomusicology (5)

Explores trends in musical scholarship in the 20th and 21st centuries, focusing on broad questions and modes of inquiry within historical musicology and ethnomusicology.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 253B - Rhythm, Time, and Form (5)

Traditional and experimental rhythmic and temporal systems representing diverse cultures, with emphasis on unmeasured, divisive, additive, and multilayer practices in cultural context. Students examine rhythmic composition, improvisation, and rubato performance in selected cultures, including rhythmic notation and transcription systems.

Prerequisite: Prerequisite(s): MUSC 200 or the equivalent, or consent of instructor. Enrollment is restricted to graduate students.

MUSC 253C - Music and Discourse (5)

Addresses both song and musical performance as modes of discourse. For song: musical and textual phrase and verse structures and their interrelationships. For musical performances: musical performance as rhetoric and emblem.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 253D - Issues in the Ethnography of Music (5)

Explores ethnography—the description of culture—as it relates to musicology and ethnomusicology, particularly where culture and cultural production are historically dynamic and geographically porous. Examines music with sensitivity to such complexities of context, and the disciplinary points of reference from which cultural difference is calculated. Considers the ideological imprint of methodology on cultural analysis: how to study an unfamiliar music in a way that transcends the measure of difference from the familiar, and, conversely, how to conduct an objective study of a familiar music.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254C - Performativity and Music (5)

Performance can describe activities in the arts, humanities, and social sciences. Recognizing the mappings of this concept, this course examines selected performances and performative behavior through theoretical and critical lenses. Emphasis is on investigating the act and practice of musical performance in multicultural context, and on analyzing scholarly writing as performative discourse.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254D - Organology and Acoustics (5)

Comprehensive study of musical instruments including, but not limited to, physical and engineering concepts; theory and methods of description, analysis, systematic, and cultural classifications; physiology and performance techniques; cultural significance; anthropomorphic and zoomorphic symbolism; ritual usage; and more. Previous enrollment in introductory ethnomusicology course (e.g., MUSC 11D) helpful, but not required. Enrollment by interview only, except music M.A. and Ph.D. students. Enrollment restricted to junior and senior music majors, electronic music minors, anthropology majors, or physics majors, and graduate students.

MUSC 254E - Asian Resonances in 20th-Century American and European Music (5)

Explores the influence of Asian musics on Western composers from Debussy to Britten to American experimentalists such as Harrison, Cage, Riley, and Rudyard. Questions of cultural appropriation and

originality are addressed through specific examples and critical readings.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254F - Beethoven (5)

Examines the life and work of composer Ludwig van Beethoven (1770-1827). In addition to a close study of his biography and musical compositions, course considers the role of historiography and reception history in the development of his "heroic" status and Romantic cultivation of the "cult of genius." Also critically examines issues having to do with canon construction, positivist research vs. "new musicology," and how Beethoven has been used for political purposes and in popular culture.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254J - Jazz Historiography (5)

Introduces the ways jazz history has been conceptualized, evaluated, and transmitted. Examines the social, intellectual, and cultural formations that have influenced this historiography. Considers the interdisciplinary project of new jazz studies in relation to established and alternative historical narratives.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254K - Music, Gender, and Sexuality (5)

Seminar focuses on musicological and ethnomusicological work incorporating feminist and queer theories published since the late 1980s. Cross-cultural approach to the examination of music, gender, and sexuality, drawing examples from both Western and non-Western traditions.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254L - John Cage: Innovation, Collaboration, and Performance Technologies (5)

In-depth examination of John Cage's interdisciplinary work, his pioneering activity in live electronic technology, and his influence in current multimedia creativity. Approximately one-half of the seminary is devoted to student research and creative projects and reflect Cage's legacy.

Prerequisite: Enrollment is restricted to juniors, seniors, and graduate students. Upper-division undergraduates may enroll with permission of instructor.

MUSC 254M - Music in San Francisco, 1850-1950 (5)

Explores San Francisco's musical life during the city's first century, including opera, symphony, Chinese music, musical theater, and other genres. Considerable emphasis on music and society, including issues of race.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254N - Cruising the Postcolony (5)

Drawing on Jose Esteban Munoz's suggestion that queer politics is most radical when it is looking to the possibilities of the future rather than the pragmatics of the present, this course interrogates the radical vision of postcolonial and queer music-making.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254O - Historiography of American Music (5)

Covers the period in United States history between the Revolutionary Era and the Civil War (approximately 1770-1865). Examines historical and contemporary writings about music in the United States, its composers, musicians, musical institutions, economics, and performance practices.

Prerequisite: Prerequisite(s): MUSC 200 or equivalent. Enrollment is restricted to graduate students.

MUSC 254R - Research Design and Grant Writing for Music Scholars (5)

Dissertation research grant applications and their attenuating dissertation proposals represent the first time most graduate students think through the theoretical issues and strategic planning of a major project and convince others within and outside their field of its academic validity. This seminar (primarily for Ph.D. and D.M.A. students in their 2nd, 3rd, or 4th year who are applying for grants to support doctoral research) provides guidance on topics about dissertation research, professional development, and grant applications.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254X - Minimalism (5)

Through a close study of both primary sources and secondary literature, this graduate seminar examines characteristics of minimalism in music across a broad range of historical eras, geographical settings, and stylistic contexts, as well as in related arts (visual art/sculpture; theater design and production; poetry and literature; dance, etc.). Students engage in original research, resulting in scholarly presentations and written papers.

MUSC 261 - Graduate Applied Instruction (3)

One hour of individual instrumental or vocal instruction for graduate students. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Students are billed a course fee of \$650. Admission by audition with the instructor prior to first class meeting.

MUSC 265 - Graduate Ensemble Participation (2)

Participation by graduate students in ensembles. Enrollment limit appropriate to the size of each ensemble. Admission by audition with the instructor prior to first class meeting.

MUSC 267 - Workshop in Computer Music and Visualization (2)

Graduate-level techniques and procedures of computer music composition and visualization. Practical experience in the UCSC electronic music studio with computer composition systems and software, including visualization and interactive performance systems. Extensive exploration of music and interactive graphic programs such as Max/MSP/Jitter. Enrollment is by permission of instructor; appropriate graduate experience required. Enrollment is restricted to graduate students.

MUSC 295 - Directed Reading (5)

Directed reading, which does not involve a term paper. May be repeated once for credit. Students submit petition to sponsoring agency.

MUSC 297 - Independent Study (5)

Independent study, creative work, or research for graduate students who have not yet begun work on their thesis. Students submit petition to sponsoring agency.

MUSC 297F - Independent Study (2)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

MUSC 298 - Graduate Recital (5)

A public performance in the student's primary area of interest, related to the thesis or dissertation project, under the supervision of a faculty member. Students submit petition to sponsoring agency.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 299 - Thesis Research (5)

A thesis consisting of a substantive and original creative or scholarly work, related to the graduate recital, under the supervision of a faculty member. Students submit petition to sponsoring agency.

NLP-NATURAL LANGUAGE PROCESSING

Graduate

NLP 201 - Natural Language Processing I (5)

The first course in a series covering the core concepts and algorithms for the theory and practice of natural language processing (NLP), the creation of computer

programs that can understand, generate, and learn natural language.

Prerequisite: Enrollment is restricted to natural language processing graduate students, and computer science and engineering doctoral students by permission of instructor.

NLP 202 - Natural Language Processing II (5)

This is the second course in a series covering the core concepts and algorithms for the theory and practice of natural language processing (NLP)—the creation of computer programs that can understand, generate, and learn natural language.

Prerequisite: Prerequisite(s): NLP 201. Enrollment is restricted to natural language processing graduate students.

NLP 203 - Natural Language Processing III (5)

Third and final course in a series covering the core concepts and algorithms for the theory and practice of natural language processing (NLP)—the creation of computer programs that can understand, generate, and learn natural language.

Prerequisite: Prerequisite(s): NLP 201 and NLP 202.

NLP 220 - Data Science and Machine Learning Fundamentals (5)

Covers a broad set of tools and core skills required for working with Natural Language Data. Covers core traditional machine learning methods such as classification methods using Naive Bayes, SVMs, Linear regression and Support Vector Regression, as well as the use of Pytorch and other programming frameworks commonly used in the field. Also includes methods used for collecting, merging, cleaning, structuring and analyzing the properties of large and heterogeneous datasets of natural language, in order to address questions and support applications relying on those data. Course covers working with existing corpora as well as the challenges in collecting new corpora. (Formerly Data Collection, Wrangling and Crowdsourcing.)

Prerequisite: Enrollment is restricted to natural language processing graduate students. .

NLP 243 - Deep Learning for Natural Language Processing (5)

Introduction to machine learning models and algorithms for natural language processing (NLP) including deep learning approaches. Targeted at professional master's degree students, course focuses on applications and current use of these methods in industry. Topics include: an introduction to standard neural network learning methods such as feed-forward neural networks; recurrent neural networks; convolutional neural networks; and encoder-decoder models with applications to natural language processing problems such as utterance classification and sequence tagging.

(Formerly Machine Learning for Natural Language Processing.)

Prerequisite: Enrollment is restricted to natural language processing graduate students.

NLP 244 - Advanced Machine Learning for Natural Language Processing (5)

Covers advanced deep machine learning models and algorithms for Natural Language Processing, such as transformers, pre-trained large language models, contextual embeddings, multi-modal embeddings, multi-task learning, and reinforcement learning. Provides both theoretical and intuitive understanding of NLP learning models.

Prerequisite: Prerequisite(s): NLP 243 or CSE 244B. Enrollment is restricted to natural language processing graduate students and computer science and engineering doctoral students, or by permission of instructor.

NLP 245 - Conversational Agents (5)

Reviews recent work on conversational AI systems for task-oriented, informational, and social conversations with machines. Students read and review theoretical and technical papers from journals and conference proceedings, present paper summaries, and engage in discussions. A research project is required.

Prerequisite: Prerequisite(s): NLP 201 and NLP 243 or CSE 244B. Enrollment is restricted to natural language processing graduate students and computer science and engineering doctoral students, or by permission of instructor.

NLP 255 - Topics in Applied Natural Language Processing (5)

Gives students a solid foundation in a specific application area of natural language processing, by learning about the theories, methods, tools, and techniques typically used in this area. The application area varies each quarter, with expected topics to include Information Extraction, Question Answering, Natural Language Generation, Sentiment Analysis, and others. Students learn about the state of the art and open challenges, and have the opportunity to explore and experiment with both standard algorithms and new emerging approaches.

Prerequisite: Prerequisite(s): NLP 201 and NLP 202 and NLP 220 and NLP 244 and either NLP 243 or CSE 244B. Enrollment is restricted to natural language processing graduate students and computer science and engineering Ph.D. students, or by permission of the instructor.

NLP 267 - Machine Translation (5)

Machine Translation systems can instantly translate between any pair of over eighty human languages such as German to English or French to Russian. Modern translation systems learn to translate by reading millions of words of already translated text. This course

covers the models and algorithms used by such systems and explains how they are able to automatically translate one human language to another. The course covers fundamental building blocks using concepts from linguistics, statistical and deep machine learning, algorithms, and data structures. It provides insight into the challenges associated with machine translation and introduces novel approaches that might lead to better machine translation systems.

Prerequisite: Prerequisite: NLP 201 and NLP 243 or CSE 244B. Concurrent or previous enrollment in NLP 202. Enrollment restricted to natural language processing graduate students and computer science and engineering Ph.D. students, or by permission of the instructor.

NLP 270 - Linguistic Models of Syntax and Semantics for Computer Scientists (5)

Provides an introduction to theoretical linguistics for natural language processing, focusing on morphology, syntax, semantics, and pragmatics, and on training students in linguistic description, representation, and argumentation. Students learn to describe common features underlying natural languages and to manipulate several syntactic and semantic representations.

Prerequisite: Enrollment is restricted to natural language processing graduate students and computer science and engineering Ph.D. students, or by permission of instructor.

NLP 271A - Capstone I: Recent Research in NLP (5)

The first in a sequence of three capstone courses providing hands-on practice of key NLP concepts and skills and experience working in a team project setting. Provides students with tools for project management and working in a team. Explores multiple possible projects, and methods for presenting projects, and investigates what makes a good project proposal, and how to evaluate and understand the strengths and weaknesses of project proposals. (Formerly Capstone I: Natural Language Processing.)

Prerequisite: Prerequisite(s): NLP 201 and NLP 220. Enrollment is restricted to natural language processing graduate students.

NLP 271B - Capstone II: Natural Language Processing (10)

The second capstone course providing hands-on practice of key NLP concepts and skills and experience working in a team project setting. Provides students with tools for project management and working in a team. Allows students to refine and define several possible projects, present them for feedback, produce initial implementations of key modules and assess them, and complete the capstone project, which includes testing and assessing the quality of the final implementation, writing the final project report, poster creation, video and oral presentation of the project as a team.

Prerequisite: Prerequisite(s): NLP 202 and NLP 271A. Enrollment is restricted to natural language processing graduate students.

NLP 280 - Seminar in Natural Language Processing (2)

Weekly seminar course covering current research and advanced development in all areas of Natural Language Processing. The seminar is based on invited talks by guest speakers from industry research and advanced development working in the area of Natural Language Processing. Students attend talks given by speakers in a weekly seminar series and participate in discussions after the talks. This class can be taken for Satisfactory/Unsatisfactory credit only.

Prerequisite: Enrollment is restricted to natural language processing graduate students and computer science and engineering doctoral students. Others may enroll by permission of instructor.

OAKS - OAKES COLLEGE

Lower-Division

OAKS 1 - Academic Literacy and Ethos: Communicating Diversity for a Just Society (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. The Oakes core course considers the intersections between reading, personal and social identities, and social justice.

Prerequisite: Enrollment is restricted to first-year college members.

OAKS 1A - Introduction to University Life and Learning (1)

Orientation to and exploration of the nature of the liberal arts, and of learning at research universities. Topics include: academic planning for upper-division coursework; enrollment processes; and understanding pathways to degree completion; UCSC resources that support health and well-being strategies for academic success; the cultivation of just communities; the prevention of sexual harassment and violence; campus conduct policies; awareness of risks associated with drug and/or alcohol use; and an introduction to traditions of community-engaged learning, ground-breaking research, and interdisciplinary thinking that define a UC Santa Cruz degree. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year Oakes College students.

OAKS 3L - Precalculus Academy Lab (2)

Students use worksheets designed to help them solve problems by thinking critically, and participate in answering project-based questions relevant to the

themes of their college core courses. Prerequisite(s): Mathematics 2 or placement (MP) score of 200 or higher. Concurrent enrollment in Mathematics 3 is required. Enrollment is by permission of the instructor.

OAKS 10 - Academic Success (2)

Provides opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources explored. Enrollment by permission of college adviser.

OAKS 11 - Foundation of Leadership (3)

Teaches leadership skills to create effective teams, and motivates individuals to communicate effectively with teammates with different styles. Enrollment is restricted to first-year and sophomore college members and by permission of instructor.

OAKS 26 - Navigating the University From a Black Critical Lens (2)

Explores critical engagement in education within the U.S. research university context. Introduces sociohistorical perspectives on how new students (fresh and transfer) can navigate the opportunities and challenges of the institution's academic life from a critical race and decolonial theoretical lens. Provides strategies to define goals, develop an action-oriented plan toward academic, career, and civic-oriented outcomes, and examine and build students' own social and cultural capital.

OAKS 30 - Thesis Writing and Editing (2)

Substantial writing and revision for a piece of writing relevant to a student's field. Focuses on academic research, documentation, editing, and revision. Enrollment restricted to junior and senior college members. Enrollment by permission of instructor.

OAKS 46 - Multiracial Visibility Project (5)

The purpose of the class is to bring visibility to multiracial and multicultural populations on college campuses. Students explore readings and other course content to understand the experiences of multiracial people. They explore different ways to advocate for multiracial people who may not have space or a voice in research or in popular cultural outlets (e.g., mainstream media). The goal is to raise awareness of multiracial people by elevating multiracial students' voices and experiences.

Prerequisite: Enrollment is restricted to Oakes College affiliates.

OAKS 47 - Building an Inner Sanctuary (2)

Through experiential methodologies of self-leadership and mind-body practices, this course encourages students to discover and flex those internal resources which enhance resilience, foster psycho-emotional and

community-building skills, and affirm their cultural dignity. Enrollment is by application and permission of the instructor. First-pass enrollment is restricted to Oakes students. Second-pass enrollment open to all students.

Prerequisite: First-pass enrollment is restricted to Oakes students. Second-pass enrollment is open to all students.

OAKS 48 - Slugs Speak: Our Stories, Our Selves (2)

Students learn about the power of story to make change through this Storytelling for Justice project. Students practice developing personal life stories, learn to create and facilitate community space, and participate in a community storytelling event focused on intersectional identities.

Prerequisite: Enrollment is restricted to Oakes College affiliates or by instructor permission.

OAKS 60 - Oakes Literary Journal: Further Reflections on a Diverse Society (2)

For publication in an Oakes College literary journal, students significantly refine an essay from the fall quarter Oakes College core course. Course work includes consideration of a substantive text that engages core course themes and promotes the focus of the essay.

Prerequisite: Prerequisite(s): OAKS 80A or OAKS 80B. Enrollment is restricted to first-year students.

OAKS 67 - The Politics of Food: Labor and Social Justice (2)

Engages the themes of Oakes College (respect for diversity and social justice) and the interests of UCSC's Center for Agroecology and Sustainable Food Systems. Topics include the racial politics of food, farm labor, organic farming, and activism.

Prerequisite: Prerequisite(s): OAKS 1. Enrollment is restricted to Oakes College affiliates.

OAKS 70 - Diverse Voices in Contemporary American Women's Poetry (2)

Students examine issues in the work of contemporary American women poets representing a range of cultural, sexual, socioeconomic, and ideological identities. Discussion focuses on theories of poetics as well as poetry analysis and interpretation within the context of social and cultural identity. Students create a portfolio of their own poetry in response to weekly prompts.

Prerequisite: Enrollment restricted to Oakes College members.

OAKS 72 - Building the Strength to Love and Dream: Oakes Oral History Project (5)

Students study the founding and development of Oakes College through oral history. Students immerse themselves in thorough background research and build skills necessary to conduct oral histories with previous Oakes affiliates, revising pieces suitable for publication.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to College members; other students may contact the instructor for a permission code.

OAKS 73B - Oakes College Mentoring: Service Learning Practicum (2)

Mentors introduce first-year students to campus resources, provide them with academic support, share academic successes and difficulties, and offer guidance on college adjustment. Enrollment is restricted to College members. Please apply to be a mentor or a mentee online on the Oakes College Mentoring website.

OAKS 75 - Oakes Student Development and Leadership Theory (2)

Overview of theories, methods, applications, skills, and special topics focusing on college student development and leadership. Uses a variety of learning modes including lecture, discussion, case studies, small group interaction, and presentations. Interview only: see Oakes coordinator for residential education during spring enrollment period. Enrollment restricted to Oakes College members.

OAKS 76 - Social Geography and Justice in Santa Cruz (5)

Explores how social identities, life practices, and power are reflected and shaped by the spaces and places we live in. Combines local history and contemporary research with placements in the community focusing on justice for children, youth, and families; topics vary by year and seek to build on the understanding and community relationships advanced through winter quarter research.

Prerequisite: Prerequisite(s): Oakes core course. Restricted to Oakes College members; others by permission of instructor.

OAKS 80H - Rainbow Theater Cultural Studies (5)

Introduction to multicultural theater and multicultural plays that aims to bring cultural awareness to all students interested in theater discipline. Students are required to read and critically analyze contemporary plays of color with emphasis on race and culture in contemporary American society.

OAKS 93 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by lower-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost.

OAKS 94F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency.

OAKS 95 - Directed Reading (5)

Directed reading on selected topics in literature. Students submit petition to sponsoring agency.

OAKS 99 - Tutorial (5)

Individual study for lower-division students directed by a fellow of Oakes. Students submit petition to sponsoring agency.

OAKS 99F - Independent Study (2)

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

Upper-Division

OAKS 130 - Writing Resistance: Creative Writing Workshop (5)

Engages diasporic and people of color (POC) writers whose work inspires social justice. Through course materials and creative exercises, students examine and break down the roadblocks that create silence. Focuses on the craft of writing, and revision and performance to create socially relevant and powerful words through community engagement.

OAKS 134 - Diasporic Central Americans (5)

Engages literature and culture from multiple generations of diasporic Central Americans in the U.S. whose work inspires conversations on politics and identity. Through course materials and oral history projects, examines the (in)visibility of this emergent Latinx group. Focus on oral history, aesthetics, poetics, and projects of representation.

OAKS 150 - Queer History and Theory in the United States (5)

Gives students a broad overview of the historical and social construction of queer identities in the United States. Through assigned readings and archival research, students contribute to the project of documenting queer history in the present. Students also examine how queer theory addresses the meanings that U.S. politics and culture have placed on sexual orientation over time.

Prerequisite: Enrollment is restricted to junior and senior Oakes College members.

OAKS 151A - Corre la Voz: Community Literacies and Power Seminar (2)

Required seminar for first-quarter students in the Corre la Voz program. Examines theories, curriculum design, and teaching methods that emphasize social connection, leadership, verbal enrichment, multi-modal literacies, and community empowerment. Taken concurrently with field study. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Co-requisite(s): course 151B. Enrollment is by interview

only and successful application to the Corre la Voz program. (Formerly Corre la Voz: Community Literacies and Power.)

OAKS 151B - Community Literacies Field Study (3)

Field study for Corre la Voz interns. Intensive on-site training and participation in team teaching of dual-language (Spanish English) students (4th-5th grade). Literacies include social-emotional, expressive (artistic/dramatic), collaborative problem-solving, academic, and use of digital tools as well as traditional tools. Enrollment by interview only, and successful application to the Corre la Voz program. Concurrent enrollment in OAKS 151A is required during the first quarter after which OAKS 151B may be repeated by itself.

OAKS 152 - Transformative Literacies (5)

Combines a seminar on critical inquiry into different theories and practices of transformative literacy work with community-service placement or a creative project to assist a local organization in its mission communicating internally and externally.

Prerequisite: Prerequisite(s): Enrollment is restricted to Oakes College members. Other students may enroll by permission of the instructor.

OAKS 153 - Community Mapping (5)

Students study the theories and methods of community mapping, and work in research teams to design and conduct social-research projects. Emphasizes research questions that focus on assets and capacities, as well as on participatory-action research for justice.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to Oakes College members and community studies majors.

OAKS 155 - Research for Social Justice: Special Topics (5)

Examines how social science research informs advocacy and advances social justice issues. Students analyze quantitative and qualitative data and use evidence-based findings to create a final advocacy project. Students will strengthen skills for developing research questions, interpreting qualitative and quantitative data, articulating research findings, and effectively communicating research for advocacy and public outreach. Relevant for students interested in careers in advocacy, policy, and nonprofit work.

Prerequisite: Enrollment is restricted to Oakes College affiliates during first-pass enrollment; open to all students at the start of second-pass enrollment.

OAKS 160 - Cuir Américas (5)

Advanced seminar on the politics of knowledge production and translation in queer theory across the Américas, considering the meaning and construction of

queer/cuir in three languages. Students develop bibliographies of academic and activist work addressing the lives of queer/trans people throughout the Spanish- and Portuguese-speaking Américas, including U.S. Latinx communities. Examines gaps in translation in this field, and students practice translation of work specific to sexual minority communities based on their language training and proficiency. Class works from the language and community expertise of students in the course inspired by bilingual poetics. Final projects produce a translation of a significant article or chapter-length work in queer theory from Spanish, Portuguese, or English to another one of these languages.

Prerequisite: Prerequisites: SPAN 6, SPHS 6, or PORT 65B; or submission of a writing sample in either Spanish or Portuguese for instructor approval. Course requires language and composition proficiency in Spanish or Portuguese. Crosslisted as: Prerequisites: SPAN 6, SPHS 6, or PORT 65B; or submission of a writing sample in either Spanish or Portuguese for instructor approval. Course requires language and composition proficiency in Spanish or Portuguese.

OAKS 167 - Food Systems: Culture, Social Justice, Sustainability (5)

Examines the complexities of food systems with special attention to labor practices, food access, and food production. Students consider the nature of culture in advancing problematic notions of food options and sustainability. A service-learning project is required.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior Oakes students. Non-Oakes affiliated students may email instructor for a permission code.

OAKS 185 - Tracing Health (5)

Firsthand experience with the global pandemic of COVID-19. Students train as certified contact tracers in partnership with the Public Health Institute's Tracing Health Program and work as bilingual contact tracers as part of the field study. Teaches essential skills in helping members of marginalized communities stay safe and prevent further spread of SARS-COV-2. Trainings emphasize public health protocols and cultural/linguistic competency in promoting positive health behaviors related to COVID-19. Introduces students to theories of public health, health disparities, and effective strategies for community-based health interventions. Students must be bilingual and culturally competent in English and Spanish, Mandarin, Cantonese, Tagalog, or an indigenous language of Mexico or Central America. Interview required for acceptance in the class. Contact oakscara@ucsc.edu for instructions on applying.

OAKS 188B - Legal Field Practice: Professional Skills and Ethics (3)

Offers placement, standards, and support during on-site experiential training in professional skills and ethics for students working in the legal field or with legal information to empower under-served communities.

Previous or concurrent enrollment in LGST 188A or OAKS 188A and by permission of instructor.

OAKS 189 - Building Websites for Social Change (2)

In this fast-paced course, students learn to build an interactive, user-centered websites that serve the needs of a social justice organization. First half of the course involves learning the basics of Wordpress design, meeting with stakeholders, and helping them articulate their objectives and target audiences. Second half focuses on teamwork as students work with content to develop a Wordpress site and a short user guide for our partners. Lab-based, hands-on course with minimal homework requirements.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements. Oakes College affiliates have preference; other students email instructor for permission.

OAKS 192 - Directed Student Teaching (5)

Teaching a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Oakes; a proposal supported by a faculty member willing to supervise.

OAKS 193 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. If taking two or more such courses in any one quarter, must obtain approval of academic adviser.

OAKS 195 - Senior Thesis (5)

Senior thesis related to college-sponsored individual majors. Students submit petition to sponsoring agency. Sponsoring faculty must be member of individual major committee.

OAKS 198 - Independent Field Study (5)

College-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, and approval by provost.

OAKS 199 - Tutorial (5)

Individual study for junior and senior members of Oakes College directed by a fellow of Oakes. Students submit petition to sponsoring agency.

OAKS 199F - Tutorial (2)

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

OCEA - OCEAN SCIENCES

Lower-Division

OCEA 1 - The Oceans (5)

An interdisciplinary introduction to oceanography focusing on biological, chemical, geological, and physical processes. Covers topics such as origins and structure of planet Earth and its oceans, co-evolution of Earth and life, plate tectonics, liquid water and the hydrologic and hydrothermal cycles, salinity and elemental cycles, ocean circulation, primary production and nutrient cycles, plankton and nekton, life on the sea floor, near shore and estuarine communities, future environmental problems our oceans face. Students may also enroll in and receive credit for EART 1.

OCEA 80A - Life in the Sea (5)

The ecology of plants and animals in oceans and coastal areas. Consideration of life in various marine habitats, including the open ocean, rocky shores, estuaries, and the sea. Includes field trips. High school biology and chemistry courses are recommended prior to taking this course.

OCEA 80B - Our Changing Planet (5)

Interdisciplinary scientific perspective on Earth system, focusing on human impacts on global environment. Introduces concepts of Earth system science and explores topics such as global warming, ozone depletion, pollution, deforestation, and future climate change. Prerequisite(s): high school chemistry course recommended.

OCEA 90 - Fundamentals of Climate (5)

Quantitative introduction to climate comprising five modules: atmosphere-ocean circulation, atmospheric teleconnections, El-Nino Southern Oscillation, the Pacific Decadal Oscillation, and global warming. Hands-on statistical methods are applied to real-world observations to develop a quantitative understanding of climate.

Upper-Division

OCEA 100 - Physical Oceanography (5)

Introduces physical aspects of the ocean including both descriptive representations of ocean properties and dynamical processes that govern ocean circulation. Topics include measurement methods, the equation of state, the equations of motion, geostrophy, atmospheric forcing, Ekman transport, gyre circulation, western boundary currents, the global circulation, and surface gravity waves.

Prerequisite: Prerequisite(s): MATH 11B or equivalent; and PHYS 6B; and ESCI 100A or EART 110A.

OCEA 101 - The Marine Environment (5)

An introduction to the marine environment stressing the interaction of physical, chemical, geological, and biological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor.

Prerequisite: Prerequisite(s): CHEM 1C and MATH 11B or MATH 19B. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor.

OCEA 102 - Oceans and Climate: Past, Present, and Future (5)

An introduction to Earth's environment, particularly its oceanic and climatic components. Emphasizes interactions between chemical, physical, biological, and geological processes, and fundamentals of past, present, and future global environmental change. Provides backgrounds for specialized courses in oceanic or climatic change.

Prerequisite: Prerequisite(s): CHEM 1C.

OCEA 111 - Climate Dynamics (5)

Applies fundamental physical principles to the atmosphere, cryosphere, and land surface to interpret their observed properties. Interactions between the different components of the climate system, and their role in shaping Earth's climate, are also examined.

Prerequisite: Prerequisite(s): MATH 11B or equivalent; PHYS 6B; and ESCI 100A or EART 110A.

OCEA 118 - Marine Microbial Ecology (5)

The study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions, and flows of material and energy in marine food webs. Students cannot receive credit for this course and Ocean Sciences 218.

Prerequisite: Prerequisite(s): BIOE 20C or BIOE 21C, and CHEM 1C.

OCEA 120 - Aquatic Chemistry: Principles and Applications (5)

An integrated study of the chemical behavior of natural waters with an emphasis on both principles and applications. Topics include chemical equilibrium, kinetics, acids/bases, oxidation/reduction, complexation, solid dissolution and precipitation, and reactions on solid surfaces.

Prerequisite: Prerequisite(s): CHEM 108B or CHEM 112C.

OCEA 121 - Aqueous Geochemistry (5)

Explores the geochemistry of the water-solid interface in the environment. Topics include: the composition of natural particles in the environment; the use of chemical equilibria and kinetics to assess the reactivity at the particle-water interface; and applications to environmental and oceanographic problems.

Prerequisite: Prerequisite(s): CHEM 1C, or previous or concurrent enrollment in EART 110A. Enrollment is restricted to juniors, seniors, and graduate students.

OCEA 122 - Chemical Oceanography (5)

Provides a chemical description of the sea. Emphasizes the chemical interactions of the ocean with the biosphere, atmosphere, and lithosphere. Topics include biochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Students may not receive credit for this course and OCEA 220.

Prerequisite: Prerequisite(s): CHEM 1C; a previous course in ocean sciences is also recommended. Enrollment is restricted to juniors and seniors.

OCEA 124 - Aquatic Organic Geochemistry (5)

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 224.

Prerequisite: Prerequisite(s): basic college chemistry (Chemistry 1B, 1C); at least one quarter of college level organic chemistry required (e.g., Chemistry 7).

OCEA 130 - Biological Oceanography (5)

Biological description of the sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students cannot receive credit for this course and Ocean Sciences 230.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to juniors (with instructor approval), and seniors.

OCEA 150 - Field and Laboratory Methods in Coastal and Aquatic Science (5)

Students become familiar with some of the core measurement and sampling techniques routinely employed by working aquatic scientists. In keeping with the multi-disciplinary nature of aquatic science,

these techniques and measurements include those taken from biology, geology, chemistry and physics. The overarching goal of is having students become deeply familiar with a field site and observing it over an extended period of time while working collaboratively to accomplish all the measurements. The field component of the work is conducted at UCSC's Younger Lagoon Research Reserve, located adjacent to the Long Marine Lab on the coastal campus. Taught in conjunction with OCEA 250; students cannot receive credit for this course and OCEA 250.

Prerequisite: Prerequisite(s): CHEM 1C, and PHYS 5B or PHYS 6B, and MATH 11B or MATH 19B, and ESCI 30 or BIOE 20C. Crosslisted as: Prerequisite(s): CHEM 1C, and PHYS 5B or PHYS 6B, and MATH 11B or MATH 19B, and ESCI 30 or BIOE 20C.

OCEA 158 - The Ecology and Conservation of Marine Birds and Mammals (5)

The systematics, physiology, ecology, behavior, and conservation of marine birds and mammals, with emphasis on the fauna and issues of the Monterey Bay area. Lectures are complemented by laboratory and field sessions. Lab topics include taxonomy and comparative morphology. Field exercises are designed to promote development of observation and identification skills. Field trips enable students to observe unique local species in their native habitats and learn current research techniques.

Prerequisite: Prerequisite(s): OCEA 80A, BIOE 20C, or permission of instructor.

OCEA 199 - Tutorial (5)

Students submit petition to sponsoring agency.

Graduate

OCEA 200 - Physical Oceanography (5)

Introduces the physics of the ocean. Topics include physical properties of seawater, atmospheric forcing, Ekman dynamics, Sverdrup dynamics, the wind-driven ocean circulation, ocean mixing, water masses, the meridional overturning circulation, surface gravity waves, Rossby waves, Kelvin waves, and ocean tides. Designed for beginning graduate students in ocean sciences and upper-division science majors. Calculus and physics recommended as preparation.

OCEA 201 - Advanced Physical Oceanography (5)

Covers advanced topics and physical principles as they relate to the ocean circulation. Designed as a follow-on class for OCEA 200, Physical Oceanography, and topics covered include: the dynamics of the subtropical gyres; potential vorticity dynamics; ventilated thermocline theory; the abyssal circulation; barotropic and baroclinic instability; and ocean eddies. Students use simple computer models to explore these important topics further, and review seminal papers.

Prerequisite: Prerequisite(s): OCEA 200, or a graduate geophysical fluid dynamics course or equivalent (e.g. EART 272/OCEA 272, AM 217, AM 227), or by instructor consent. Enrollment is restricted to graduate students.

OCEA 211 - Climate Dynamics (5)

Introduction to the dynamics of the Earth climate system. Topics: climate system components, the global energy balance, radiative transfer, the hydrological cycle, general circulations of the atmosphere and ocean, El Nino, the North Atlantic Oscillation, and the Pacific Decadal Oscillation.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll by permission of instructor. Previous courses in calculus and ocean sciences or earth sciences are recommended.

OCEA 213 - Biogeochemical Cycles (5)

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time.

Prerequisite: Enrollment is restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant discipline are recommended.

OCEA 215 - Predicting the Atmosphere, Ocean, and Climate (5)

Introduction to the theory and practice of operational prediction in meteorology, oceanography, and climate. Topics: observations and estimation theory, dynamic adjustment and initialization, estimation theory, data assimilation, forecast verification, predictability, ocean state estimation, seasonal forecasting.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with instructor approval. OCEA 200, OCEA 260, EART 272, or equivalents are recommended.

OCEA 218 - Marine Microbial Ecology (5)

Recent developments in the study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions and flows of material and energy in marine food webs. Exams and research paper required. Students cannot receive credit for this course and OCEA 118 and BIOL 171. BIOL 20C and CHEM 1C recommended.

OCEA 220 - Chemical Oceanography (5)

A chemical description of the sea; emphasis on the chemical interactions of the oceans with the biosphere, atmosphere, and lithosphere. Topics include

biogeochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Course designed for graduate students; available to upper-division science majors. Students may not receive credit for this course and OCEA 122.

OCEA 224 - Aquatic Organic Geochemistry (5)

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and OCEA 124.

OCEA 230 - Biological Oceanography (5)

Biological description of the sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students cannot receive credit for this course and OCEA 130.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to graduate students.

OCEA 241 - Dynamics of Marine Ecosystems (5)

Covers physical-biogeochemical interactions in the ocean on marine ecosystems, with a special focus on the California Current region. Lectures introduce fundamental processes occurring at local, regional, and basin scales, and describe their complex interplay.

Prerequisite: Enrollment is restricted to graduate students.

OCEA 250 - Field and Laboratory Methods in Coastal and Aquatic Science (5)

Students become familiar with core measurement and sampling techniques and multi-disciplinary nature of aquatic sciences routinely employed by working aquatic scientists in the fields of biology, geology, chemistry and physics. Overarching goal of class is having students become deeply familiar with a field site and observing it over an extended period of time while working collaboratively to accomplish all the measurements. The field component of the work is conducted at UCSC's Younger Lagoon Research Reserve, located adjacent to the Long Marine Lab on the coastal campus. Taught in conjunction with OCEA 150 and ESCI 150. Students cannot receive credit for this course and OCEA 150/ESCI 150.

Prerequisite: Enrollment is restricted to graduate students.

OCEA 260 - Introductory Data Analysis in the Ocean and Earth Sciences (5)

Introduces data analysis methods regularly encountered within the ocean and earth sciences. Topics include: error propagation, least squares analysis, data interpolation methods, empirical orthogonal functions, and Monte Carlo methods applied to problems drawn from oceanographic and earth sciences datasets. Introduces and uses a high-level computing and visualization package, MATLAB. Student project consists of analysis of the student's own dataset.

Prerequisite: Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment is restricted to graduate students; undergraduates with permission of instructor.

OCEA 267 - Applied Environmental Time Series Analysis (5)

Course takes an empirical approach to quantify and explain changes in the Earth system over time. Students learn how to analyze time-series data and answer questions about environmental change and variability. Students acquire the theoretical basis of the statistical approaches, gain experience interpreting and discussing the results, and debate the methods chosen resulting in a critical understanding of the underlying assumptions and limitations of the methods discussed. This is a hands-on class and utilizes a suite of observational datasets and outputs from Earth system models. Students cannot receive credit for this course and ESCI 167.

Prerequisite: Prerequisite(s): Students are expected to know R, Matlab or Python and have statistics background. Please contact the instructor before enrolling if you are unsure. Enrollment is restricted to graduate students.

OCEA 280 - Marine Geology (5)

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; and introduction to paleoceanography. Students cannot receive credit for this course and EART102.

Prerequisite: Enrollment is restricted to graduate students.

OCEA 285 - Past Climate Change (5)

Reviews the fundamentals of climate dynamics and explores how Earth's environment is a product of the interaction of its components. Uses examples of climate change from historical and geologic records, and from predictions of the future. Recommended for junior, senior, and graduate students in the sciences.

OCEA 286 - Introduction to Ocean Modeling (5)

Fundamental concepts and ideas that underpin numerical modeling of the ocean. Topics include numerical methods and solutions of partial differential equations (PDEs), ocean circulation, wave dynamics, ocean ecosystem model, and MATLAB programming.

Prerequisite: Enrollment is restricted to graduate students, or seniors by permission of instructor.

OCEA 290A - Topics in Chemical Oceanography (5)

A weekly seminar series covering recent developments in chemical oceanography. Different topics and approaches will be stressed from year to year.

OCEA 290B - Topics in Biological Oceanography (5)

Explores different problems of special interest in biological oceanography. Different topics and approaches will be stressed from year to year.

OCEA 290C - Topics in Marine Geochemistry (5)

Selected topics in geochemistry. Discussion of theoretical models, different approaches, and recent research. Topics vary from year to year.

OCEA 290D - Topics in Marine Microbiology (5)

A weekly seminar series covering topics in environmental microbiology. Topics vary from year to year, and will include research in ecology, methodology, biochemistry and physiology of bacteria. Emphasis on the role of bacteria in biogeochemical cycling from microzone to global scales, with particular focus in marine systems.

OCEA 290E - Topics in Climatic and Oceanic Change (5)

Weekly seminar series covering recent developments in climatic and oceanic change. Different topics and approaches stressed from year to year. Prerequisite(s): interview with instructor prior to first class meeting.

OCEA 290G - Topics in Physical Oceanography (5)

Weekly seminar series covering topics in physical oceanography as well as biological-physical interactions in the oceans. Different topics and approaches stressed from year to year.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

OCEA 290H - Topics in Ocean Optics (5)

Examines recent developments and application of bio-optics to the marine environment, including theory, instrumentation, and remote sensing. Different topics and approaches emphasized from year to year.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to

graduate students; senior undergraduates with permission of instructor.

OCEA 290J - Topics in Marine Organic Geochemistry (5)

Examines recent developments in uses of organic geochemistry to trace oceanographic and biogeochemical processes. Focuses on introduction to organic biomarkers, current literature, and evolving applications. Different topics and approaches emphasized from year to year.

Prerequisite: Prerequisite(s): previous course in ocean sciences and organic chemistry are recommended. Enrollment is restricted to graduate students; upper-division undergraduates with instructor's permission.

OCEA 292 - Seminar (0)

Weekly seminar on various topics attended by faculty, graduate, and upper-division undergraduate students.

OCEA 296 - Teaching in Ocean Sciences (2)

For new and/or relatively inexperienced graduate students in pedagogy of ocean sciences. Role and responsibilities of teaching in ocean sciences described and developed. Includes discussions about effective teaching methods; hands-on issues for work in the laboratory; university expectations; and regulations regarding teaching, organizational strategies, time management, and working with instructors and staff.

Prerequisite: Prerequisite(s): graduate standing or permission of instructor. Enrollment is restricted to graduate students.

OCEA 297A - Independent Study (5)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 297B - Independent Study (10)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 297C - Independent Study (15)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

OCEA 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

OCEA 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

PBS - PHYSICAL BIOLOGICAL SCIENCES

Upper-Division

PBS 101 - Cal Teach: Pedagogy for Learning Assistants (2)

Supports and prepares learning assistants (LAs) for success in active classrooms. Helps LAs integrate learning theory and effective practices to facilitate thinking and learning when students work in small groups on conceptual problems. Prerequisite(s): Successful completion of the course or equivalent in which the student will serve as an LA. Concurrent participation as an LA for a University STEM course is required. Enrollment is by application via the online form and a follow-up interview for selected applicants

PBS 102A - Cal Teach: Advanced Pedagogy for Learning Assistants (1)

Advanced learning assistants (LAs) continue to explore learning theory and practical strategies for engaging students in thinking and learning. Prerequisite(s): PBS 101. Enrollment is by application and by permission of instructor and is restricted to sophomores, juniors, and seniors.

PBS 102B - Cal Teach: Advanced Pedagogy for Learning Assistants (2)

Advanced learning assistants (LAs) explore learning theory and practical strategies for engaging students in thinking and learning. Returning LAs in this course take on an advanced project involving one or more of the following: mentoring of new LAs, data collecting, research into teaching/learning, and/or the development of learning activities. Prerequisite(s): PBS 101. Enrollment is by permission following application and is restricted to sophomores, juniors, and seniors.

PBS 182 - ACE Program Service Learning (2)

Students participate in training and development to co-facilitate collaborative learning in ACE active learning sessions and final exam review sessions. Students are role models for students pursuing science- and math-intensive majors. Prerequisite(s): Prior participation in ACE; good academic standing; no non-passing grades in prior quarter. Enrollment is restricted to sophomores, juniors, and seniors.

PERS - PERSIAN

Lower-Division

PERS 1 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for

students with no previous study of Persian as well as heritage speakers.

PERS 2 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Persian as well as heritage speakers.

Prerequisite: Prerequisite(s): PERS 1 or comparable proficiency.

PERS 3 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Persian as well as heritage speakers.

Prerequisite: Prerequisite(s): PERS 2 or comparable proficiency.

PHIL - PHILOSOPHY

Lower-Division

PHIL 7 - Elementary Logic (5)

Introduction to the critical tools and elementary formal methods for evaluating arguments with an emphasis on sentential logic and its applications. Students may not receive credit for this course and PHIL 9.

PHIL 8 - Information and Illusion (5)

Introduces critical tools for assessing and assimilating information. Topics include echo chambers, misleading statistics, the Bias Blind Spot, degrees of confidence, epistemic injustice, polarization; credibility and distrust; epistemic blame; base rates, relativism, p-values, and biased samples. Readings are drawn from philosophy, social psychology, behavioral economics, and statistics. (Formerly Reason, Logic, and the Idols of Thought.)

PHIL 9 - Introductory Symbolic Logic (5)

A first course in symbolic deductive logic. Major topics include (but are not limited to) the study of systems of sentential logic and predicate logic, including formal deduction, semantics, and translation from natural to symbolic languages. Formerly Introduction to Logic.

PHIL 11 - Introduction to Philosophy (5)

An introduction to the main areas of philosophy through critical reflection on and analysis of both classical and contemporary texts. Focuses on central and enduring problems in philosophy such as skepticism about the external world, the mind-body problem, and the nature of morality.

PHIL 12 - Philosophy and Film (2)

Explores the philosophy of film through the viewing and discussion of several philosophically interesting films. Examines both the aesthetics of film and a variety of philosophical issues that particular films raise.

PHIL 13 - Eastern Philosophy (5)

Covers perspectives of Eastern philosophy; specifically, Hinduism, Jainism, Buddhism, Daoism, and Confucianism. Includes views concerning the nature of ultimate reality, personal identity, morality, the afterlife, god(s), and the problem of evil.

PHIL 15 - Technology, Knowledge, and Human Life (2)

Provides a clearer understanding of what technology is how it relates to knowledge and human life. Students read and discuss texts by Plato, Aristotle, Husserl, and Heidegger.

PHIL 17 - Feminist Philosophy (5)

Introduction to feminist philosophy. The topics may include (but are not limited to) oppression, normalization, discrimination, objectification, misogyny, androcentrism, patriarchy, the sex-gender distinction, sexed embodiment, gendered labor, and the relationships between sexism, racism, homophobia, and transphobia.

PHIL 22 - Introduction to Ethical Theory (5)

A consideration of ethical issues and theories focusing on the foundation of moral value and the principles governing character and behavior. Designed to extend and develop the student's abilities in philosophical reasoning about ethics.

PHIL 23 - Philosophy of Cognitive Science (5)

Explores the philosophical issues that arise in cognitive science, particularly issues concerning the nature of minds. Students consider the idea that the mind is a digital computer, then analyze alternatives, such as connectionism and dynamics.

PHIL 24 - Introduction to Ethics: Contemporary Moral Issues (5)

An examination of the conceptual and moral issues that arise in connection with a variety of specific ethical issues. Topics vary according to the interests of the instructor, but among those commonly discussed are: abortion, war and violence, euthanasia, world hunger, human rights, and animal rights. The readings are typically drawn from recent philosophical articles on these topics, but earlier sources (important in the history of philosophy) can be considered as well.

PHIL 26 - Existentialism and After (5)

A survey of recent movements in European thought, such as phenomenology, existentialism, hermeneutics, critical theory, continental feminism, and poststructuralism, with some attention to their 19th-

century precursors. Selections from major philosophical treatises are supplemented with literary works.

PHIL 27 - Business Ethics (5)

Examination of the ethical issues that arise in connection with a variety of specific business contexts. Common topics include: advertising, environmental harm, employee-employer relationships, finance, capitalism, market failure, government regulation, work-life balance, and consumer rights.

PHIL 28 - Environmental Ethics (5)

This course is an introduction to the moral issues raised by our interactions with nonhuman animals and with the rest of the natural environment. The course will relate traditional moral theories to contemporary literature on the ethics of nature conservation and environmental protection. The course is intended as a first course in philosophy as well as a first course in ethics; therefore, questions concerning the nature of philosophical inquiry and the ways in which philosophical inquiry is different from inquiries conducted within other disciplines will also be addressed.

PHIL 30S - Introductory Topics in Value Theory (5)

Examines some aspect of the nature of goodness or value. Topics vary each quarter and may include themes in aesthetics, ethics, and social and political philosophy.

PHIL 31S - Introductory Topics in Metaphysics and Epistemology (5)

Examines the nature of knowledge and the fundamental structure and nature of reality. Topics vary each quarter and may include nominalism, metaphysical realism, and the ontological analysis of concrete particulars, problems of modality and persistence through time, the problem of other minds, the nature of justification and knowledge, skepticism of the external world, the nature and limits of human rationality, and the problem of induction.

PHIL 32S - Introductory Topics in the Philosophy of Mind (5)

Examines the nature of mind. Topics vary each quarter and may include the relation between mind and matter, the nature of consciousness, artificial intelligence, animal consciousness and intelligence, and the relation between thought and language.

PHIL 33S - Introductory Topics in the Philosophy of Science (5)

Examines the nature of science. Topics vary each quarter and may include realism, instrumentalism, confirmation, explanation, space and time, and rational decision making.

PHIL 34S - Introductory Topics in the Philosophy of

Language (5)

Examines the nature of language. Topics vary each quarter and may include theories of meaning, representation, reference and truth.

PHIL 35S - Introductory Topics in the History of Philosophy (5)

Examines historical philosophical texts. Topics vary each quarter and focus on some major philosophical period, figure, or work in the history of philosophy.

PHIL 36S - Introductory Topics in Philosophy and Contemporary Culture (5)

Examines aesthetic, ethical, and/or political aspects of contemporary culture. Topics vary each quarter and may include the philosophy of film, music and other genres of popular culture and may consider issues such as authenticity, rebellion, identity, and politics.

PHIL 80C - Philosophy of Sex and Love (5)

What is the nature of love? Is marriage a means of social control? Does pornography empower or oppress women? How is gender constructed? This course provides a systematic investigation of the development of Western philosophical perspectives on gender and sexuality from Ancient Greece to the 21st century. Topics include love, marriage, sexual perversion, promiscuity and monogamy, pornography, feminism, and sexual morality. Aims to promote critical reflection with regard to the ethical, political, and social implications for contemporary society.

PHIL 80E - Latin American Philosophy (5)

Is there a general school of philosophy endemic to Latin America? Would it have to appeal to quintessential Western philosophical questions regarding knowledge, values, and reality? If not, why not, and would it then still count as philosophy? What difference do ethnic and national diversity, as well as strong political and social inequality, make to the development of philosophical questions and frameworks? Course explores a variety of historically situated Latin American thinkers who investigate ethnic identity, gender, and socio-political inequality and liberation, and historical memory, and who have also made important contributions to mainstream analytical and continental philosophy.

PHIL 80M - Science and Society (5)

Focuses on the urgent ethical and political issues raised by data science and society, building on consideration of foundational issues in moral philosophy and a technical understanding of advances in machine learning. Topics include: algorithmic bias and discrimination, predictive policing, self-driving cars, consent to data collection, surveillance and privacy rights, democracy and free speech online, attentional modification, technology and disability, and the singularity. Each unit pairs readings from philosophical and legal scholarship with case studies documented in

scientific articles, news stories, and podcasts. (Formerly Philosophical Foundations of Science Studies.)

PHIL 80S - The Nature of Science (5)

A survey of what philosophers have said about the nature of science and scientific change. Emphasis is placed on whether science is best characterized as the gradual accumulation of truth or whether truth is irrelevant to scientific change.

PHIL 99 - Tutorial (5)**Upper-Division****PHIL 100A - Ancient Greek Philosophy (5)**

Survey of ancient Greek philosophy of the Classical and Hellenistic periods. Begins with Socrates and the pre-Socratics, then undertakes an intensive study of Plato and Aristotle. Course then surveys the main developments that follow: Epicureanism, Stoicism, and Skepticism.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 100B - The Rationalists (5)

A study of the historical background and the present relevance of Descartes, Spinoza, and Leibniz.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 100C - The Empiricists (5)

A critical study (based on original texts) of Locke, Berkeley, and especially Hume on the nature of knowledge, perception, causation, morality, religion, and political society.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 106 - Kant (5)

Intensive study of Kant's philosophy, particularly his epistemology and metaphysics developed in his Critique of Pure Reason.

Prerequisite: Prerequisite(s): PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 107 - Nineteenth-Century Philosophy (5)

A study of some European philosophers of the 19th century, with particular attention to Hegel, Schopenhauer, and Nietzsche. (Formerly course 108.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 108 - Phenomenology (5)

Introduction to phenomenology, either through a survey of philosophical positions grouped under phenomenology or through a study of the writings of one or more philosophers of the phenomenological tradition. Topics may include the nature of consciousness, agency, subjectivity, and intersubjectivity.

Prerequisite: Prerequisite(s): PHIL 9; PHIL 11 or PHIL 22 or PHIL 24; PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 110 - Existentialism (5)

Introduction to the background and main themes of existentialist philosophy. Readings may include texts from authors such as Soren Kierkegaard, Friedrich Nietzsche, Jean-Paul Sartre, Simone de Beauvoir, Frantz Fanon, Albert Camus, Martin Heidegger, Emil Cioran, Gabriel Marcel, Laurie Paul, and so on. What these philosophers have had to say concerning the issue of selfhood, self-making and self-choosing, and its relation to the meaning or truth of human existence is the central topic of the course. Themes may include freedom, responsibility, anxiety, authenticity, bad faith, the meaning of life, absurdity.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 111 - Continental Philosophy (5)

Study of recent work in continental philosophy. Topics vary.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 112 - American Philosophy (5)

Study of classical American philosophers, specifically Emerson, Peirce, James, and Dewey, with emphasis on their views of metaphysics, epistemology, ethics, and philosophy of religion. Some attention is also paid to recent pragmatic tendencies in American philosophy.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or

BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 113 - The History of Analytic Philosophy (5)

Examination of the beginnings and development of analytic philosophy, with primary interest in the reformulation of traditional philosophical problems beginning with Frege. Other figures studied include, but are not limited to, Russell, Carnap, Wittgenstein, Quine, and Sellars.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 114 - Probability and Confirmation (5)

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 214.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 116 - Logic, Sets, and Functions (5)

Introduction to basic set theory, recursive definitions, and mathematical induction. Provides a bridge between course 9 and courses 117 and 119. Strong emphasis on proving theorems and constructing proofs, both formal proofs and proofs in the customary, informal style used by mathematicians.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11, PHIL 22, PHIL 23, PHIL 24, PHIL 80E, BME 80G/PHIL 80G, PHIL 80M, PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 117 - Non-Classical Logic (5)

Investigations of non-classical logic. Studies several non-classical logics, such as various modal logics, multi-valued logics, and relevance logics. Investigates meta-theoretic results for each logic studied.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 118 - Stoic Ethics (5)

Surveys Stoic Ethics in the Hellenistic and Roman Periods, attending both to the theoretical writings of early Stoa (e.g., Zeno and Chrysippus) as well as to the therapeutic and protreptic writings of later figures (e.g., Seneca and Epictetus).

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or

BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 119 - Intermediate Logic (5)

Detailed treatment of the semantics of first order logic and formal computability. Completeness, undecidability of first order logic and Lowenheim-Skolem results also proven. Nature and formal limits of computability and introduction to incompleteness also investigated. Students cannot receive credit for this course and course 219.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 121 - Epistemology (5)

A sustained look at central problems in epistemology. Topics might include the problem of other minds, the nature of justification and knowledge, skepticism of the external world, the nature and limits of human rationality, the problem of induction. (Formerly Knowledge and Rationality.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 122 - Metaphysics (5)

Survey of contemporary analytic metaphysics. Topics may include nominalism, metaphysical realism, and the ontological analysis of concrete particulars, including problems of modality and persistence through time.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 123 - Philosophy of Language (5)

Current theories of the nature and preconditions of language, the nature of meaning, and the nature of truth.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 124 - Other Minds (5)

An examination of the traditional philosophical problem of other minds and related contemporary scientific issues concerning what it is to encounter a mind that is not one's own and is relevantly unlike one's own.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 125 - Philosophy of Science (5)

An examination of various topics that arise in thinking about science. Different philosophical problems, such as realism, instrumentalism, confirmation, explanation, space and time, and rational decision making are extensively discussed and criticized.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 126 - Philosophy of Social Sciences (5)

Examines philosophical concerns regarding the methods and assumptions of the social sciences. For example, must the methods of the social sciences differ in some important ways from those used by the natural sciences? Another issue concerns problems arising from studying groups where the very notion of rationality appears to vary from culture to culture or over historical periods.

Prerequisite: Prerequisite(s): PHIL 9; one from course PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 127 - Philosophy of Biology (5)

Can developmental processes be reduced to gene expression? Does the history of life exhibit trends (e.g. increasing complexity)? How are we to understand key concepts such as fitness, species, adaptation, and gene? Is there such a thing as human nature? Course surveys these and other core philosophical topics in the biological sciences.

Prerequisite: Prerequisite(s): PHIL 9; PHIL 11 or PHIL 22 or PHIL 24; PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 133 - Philosophy of Mind (5)

Focuses on philosophical questions concerning the nature of mind. Central topics include the relation between mind and matter, and the nature of consciousness. Other topics typically explored include: artificial intelligence; animal consciousness and intelligence; and the relation between thought and language.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 135 - Philosophy of Psychology (5)

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science or neuroscience. Can there be a science of the mind? Could machines be conscious? Do animals have minds?

How did the mind evolve? These and a host of related questions form the subject matter of this course.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C. Enrollment is restricted to sophomores, juniors, and seniors.

PHIL 140 - History of Ethics (5)

A careful study of any one or a number of selected primary texts in the history of moral philosophy, with some emphasis on the relation to contemporary issues.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 142 - Advanced Ethics (5)

An examination of central issues in ethical theory including the nature of and justification for the moral point of view, the place of reason in ethics, the status of moral principles, and the nature of moral experience.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 143 - Applied Ethics: Ethics Bowl (5)

Intensive application of ethics through Ethics Bowl-style debate. Cases change annually. Students develop oral advocacy skills and are given the opportunity to compete for a position on the extracurricular Ethics Bowl team.

PHIL 144 - Topics in Social and Political Philosophy (5)

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Formerly Social and Political Philosophy.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 147 - Topics in Feminist Philosophy (5)

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 148 - The Holocaust and Philosophy (5)

By using the historiography of the Holocaust as a case study, examines the epistemology and ontology of historical knowledge, i.e., how the past is known, and what about it there is to know.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C. Enrollment is restricted to juniors and seniors.

PHIL 152 - Aesthetics (5)

Problems about form, meaning, and interpretation in art, as found in major aesthetic theories from the philosophical tradition, and also in a variety of encounters between recent philosophy and the arts.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 153 - Philosophy of Race (5)

Topics include conceptual-analytical and political-social issues. Selected topics may include: the ontology of race; race as real or constructed; scientific understandings of race; race and identity; and color-blind versus color-sensitive theories of justice and political policy.

Prerequisite: Prerequisite(s): PHIL 9; one from course PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or BME 80G/PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 190 - Senior Seminar (5)

Special topics. Format varies each quarter. Prerequisite(s): PHIL 9; and two from PHIL 100A, PHIL 100B, and PHIL 100C. Enrollment restricted to senior philosophy majors and by permission of the instructor.

PHIL 195A - Senior Essay (5)

Preparation of senior essay (approximately 25 pages) during one quarter. Students submit petition to sponsoring agency.

PHIL 195B - Senior Essay (5)

Under exceptional circumstances, a second senior essay continuing the work of the first essay is permitted but only when the first senior essay has been completed. Students submit petition to sponsoring agency.

PHIL 199 - Tutorial (5)

PHIL 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

PHIL 202 - Topics in Ancient Greek Philosophy (5)

Topics will vary each quarter and will focus on some major ancient Greek philosophical figure or work.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 203 - Autism (5)

Explores autism and its implications for various fields of inquiry, especially philosophy. Previous familiarity with autism is not presupposed. Some background in philosophy of mind, cognitive science, and psychology recommended.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 213 - Origins of Analytic Philosophy (5)

Analytic philosophy remains the dominant philosophical style worldwide. As a style of philosophy, analytic philosophy places emphasis on logical form and on the use of logical structure as the key element for evaluating the normative status (the logical merits) of a specific position. The history of analytic philosophy remains key since core debates turn on the status of logic as a supposedly value-neutral tool. This impacts philosophical understanding regarding logic, mathematics, and the relation of these areas to the natural and social sciences.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 214 - Probability and Confirmation (5)

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and PHIL 114.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 222 - Metaphysics (5)

Advanced introduction to topics in 20th century and contemporary analytic metaphysics. Divided into five main parts dealing, respectively, with issues about the nature of existence, properties, time, change and persistence, and material constitution.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 224 - Philosophy of Language (5)

Advanced introduction to issues in the philosophy of language—primarily concerning the nature of reference, meaning, and truth. Works from such 20th-century figures as Russell, Wittgenstein, Kripke, Lewis, and Putnam discussed. Topics include what it is for a sign

or a bit of language to be meaningful, or for it to identify or represent something; what it is for a statement to be truthful; what it is to be a language; and how reference works when attributed to beliefs.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 231 - Epistemology (5)

May focus on topics such as naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, memory, and virtue epistemology.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 232 - Advanced Topics in Value Theory (5)

Considers topics central to philosophical questions about value: ethics, normativity, practical reason, relativism, skepticism, responsibility, motivation, emotion, and so forth. In some instances, the investigation will proceed through influential historical figures, ancient to modern.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 233 - Seminar in Philosophy of Mind (5)

A study of one or more topics in contemporary philosophy of mind.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 235 - Philosophy of Psychology (5)

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science or neuroscience. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course.

Prerequisite: Prerequisite(s): One course in philosophy, psychology, or linguistics. Enrollment is restricted to graduate students.

PHIL 237 - Making Up the Mind (5)

How does the mind come to be a thing which science can study? Readings focus on how diagnostic categories, for example, multiple personality disorder, attain scientific cachet and what issues surround the medicalization of the mind.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 239 - Philosophy of Religion (5)

Investigation of various topics in philosophy of religion.

Prerequisite: Enrollment is restricted to philosophy graduate students or by permission of instructor.

PHIL 246 - Ethics, Nature, and Natural Selection (5)

Explores the role, if any, that Darwinian theory and evolutionary biology should have on ethical theory. Topics range from classic work, including Darwin and classic expositors, to influential contemporary work on natural selection, in light of the best philosophical literature.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 270 - Research Seminar (5)

A research seminar to develop the skills of the profession with special focus on critical reading, constructing feedback, and philosophical research and writing. Enrollment is restricted to third-year Ph.D. students, and students must complete it by the end of their third year.

Prerequisite: Enrollment is restricted to philosophy graduate students. Other students may enroll with instructor permission.

PHIL 280 - Graduate Colloquia Course (2)

This colloquia series sponsors speakers each quarter. Students must attend all colloquia and are encouraged to form discussion groups after each lecture.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 281 - The Pedagogy of Philosophy (2)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of philosophy specially, under the supervision of a faculty member.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290A - Philosophy of History (5)

Examines issues that arise with respect to constructing histories. Inter alia, these include: the traditional philosophy of history (e.g., Hegel and Marx); modes of explanation (including narrative); the reality of the past; and underdetermination in history.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290C - Advanced Topics in Ethics (5)

Topics vary but the course focuses on major questions in contemporary ethical theory, or figures influential on contemporary moral philosophy. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as the epistemological and motivational role of emotions in ethical theory.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290F - Topics in Philosophy of Biology (5)

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course is designed to give seniors and graduate students an overview of many of the diverse topics currently under discussion in modern philosophy of biology and provide a foundation for further research, regardless of previous experience with the biological sciences.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290H - Environmental Ethics (5)

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290J - Advanced Topics in the History of Ethics (5)

Careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290K - Philosophical Matters of Scientific Practice (5)

Considers the relevance of philosophical matters to the practice of science. Using quantum physics as a case study, explores historical and contemporary perspectives on issues such as those raised by the Schrodinger cat paradox, Bell's inequalities, and quantum erasers.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290O - Majors Figures in the History of Philosophy (5)

Focuses on philosophical writings and significance of a single major figure in the history of philosophy, ancient, medieval, or modern.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290P - Major Figures in Contemporary Philosophy

(5)

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290Q - Philosophy of Mathematics (5)

Introduction to the problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? We will examine the historical background to contemporary debates and the positions which have been taken within them.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290S - Topics in the Philosophy of Science (5)

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290W - History of Consciousness (5)

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings are from Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates.

PHIL 295 - Directed Reading (5)

Directed reading which does not involve a term paper.

PHIL 295F - Readings in Philosophy (2)

Focuses on selected philosophical areas and/or specific philosophers. Students meet with the instructor to discuss readings and deepen their knowledge on a particular subject. Enrollment restricted to graduate students.

PHIL 296 - Special Student Seminar (5)

A seminar for graduate students arranged between students and a faculty member. Students submit petition to sponsoring agency.

PHIL 297 - Independent Study (5)

Students submit petition to sponsoring agency.

PHIL 297F - Independent Study (2)

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students.

PHIL 299 - Thesis Research (5)

Enrollment restricted to students who have advanced to candidacy.

PHYE - PHYSICAL EDUCATION

Lower-Division

PHYE 5A - Aquatics: Non-Swimmer Swimming Level I (0)

Coeducational. Water exploration and primary skills development. Course is designed to teach only non-swimmers how to swim. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting.

PHYE 5B - Aquatics: Swimming Level I (0)

Coeducational. Primary skills development. Course is designed to teach "non-swimmers" how to swim better. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting.

PHYE 5C - Aquatics: Swimming Level II (0)

Coeducational. Stroke readiness and development. Course is for those who have completed Swimming Level I or who can swim freestyle and demonstrate elementary backstroke. Skills to be learned are underwater swimming, turns, improvement of freestyle and elementary backstroke, beginning side stroke, backstroke, breaststroke, diving, personal safety skills, and basic rescue techniques. Prerequisite(s): instructor determines skill level at first class meeting, which involves passing Swimming Level I course or demonstrating equivalent skills.

PHYE 5E - Aquatics: Lifeguard Training (LT) (0)

Red Cross certified lifeguard training. Provides the necessary minimum skills training to qualify as a non-surf lifeguard. Certification includes CPR Pro, AED, PDT, D2, ADMIN, and Title 22 First Aid. Candidates must successfully pass final skill tests and a written final exam with 80 percent score. Prerequisite(s): must have ability to swim 500 yards in ten minutes, tread water for one minute, strong swimming skills in free, back, breast, side, and elementary backstroke; must purchase Red Cross LT textbook.

PHYE 5G - Aquatics: Swimming/Conditioning (0)

Open to all students who wish to explore swimming as a conditioning and fitness exercise. Students should know three competitive strokes, and should be able to swim fifteen minutes without stopping. Short health and fitness lectures precede some classes. Prerequisite(s): instructor determination at first class meeting.

PHYE 5R - Aquatics: Basic Scuba Diving (0)

Coeducational. Sections geared toward the successful completion of NAUI Scuba Diver Certification. The course is divided into three parts: lecture, pool lab, and open water experience. Four open water training dives are offered. Emphasis is on training for open water scuba diving, using the beach as a base of operation. Prerequisite(s): pass swimming skills tests and medical clearance. It is strongly recommended that students enroll in PHE 5S.

PHYE 5S - Aquatics: Advanced Scuba Diving (0)

Coeducational. Sections are offered to facilitate the development of the basic scuba diver's open water techniques. A minimum of six open water experiences is offered. Course is geared toward successful completion of NAUI Advanced Scuba Diver Certification. Prerequisite(s): PHE 5R or pass swimming skills test and medical clearance.

PHYE 5T - Scuba Rescue Diving (0)

Coeducational. Course geared toward the successful completion of NAUI Rescue Diver Certification. Course consists of lectures, pool laboratory, and open-water experience. Emphasis is on training divers to manage risks and effectively handle limited in-water problems. Prerequisite(s): Scuba certification and medical clearance.

PHYE 9B - Boating: Beginning Dinghy Sailing (0)

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course. Prerequisite(s): swimming ability.

PHYE 9C - Boating: Intermediate Dinghy Sailing (0)

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat.

Prerequisite: Prerequisite(s): PHE 9B or equivalent skills.

PHYE 9D - Boating: Advanced Dinghy Sailing (0)

Coeducational. For students interested in high-performance dinghy sailing. Learn to sail solo in the Olympic-class Laser or fly the spinnaker on the RS Vision. Includes special techniques used in racing conditions. Wetsuits are required.

Prerequisite: Prerequisite(s): PHE 9C or equivalent skills.

PHYE 9H - Boating: Basic Rowing (0)

Coeducational. Course designed to cover types of rowing boats, nomenclature, fundamental skills, and specific safety and rescue aspects related to the activity. Students will row singly as well as in groups using 15-foot to 22-foot rowing dories. Prerequisite(s): swimming ability.

PHYE 9J - Boating: Intermediate Rowing (0)

Coeducational intermediate course designed to cover more advanced rowing techniques and the skills needed for safe open water rowing. Prerequisite(s): basic rowing or permission of instructor.

Prerequisite: Prerequisite(s): successful completion of PHE 9H or equivalent skills.

PHYE 9K - Boating: Ocean Kayaking (0)

Co-educational course that teaches novice kayakers the skills to safely use UCSC kayaks in Monterey Bay. Topics include: basic paddling strokes and maneuvers; self and assisted deep-water rescues; beach launching; landing through surf; and marine hazards and navigation.

PHYE 9S - Boating: Beginning Keelboat Sailing (0)

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used.

Prerequisite: Prerequisite(s): PHE 9C or equivalent skills.

PHYE 9T - Boating: Intermediate Keelboat Sailing (0)

Coeducational. Further development and refinement of boat-handling techniques, including advanced maneuvering, anchoring, and racing with an introduction to the use of spinnakers.

Prerequisite: Prerequisite(s): PHYE 9S.

PHYE 9X - Boating: Advanced Keelboat Sailing (0)

Coeducational. Designed for the experienced sailor who desires to bareboat larger vessels in the future. Focus is on managing boat systems, navigation, anchoring and passage-making on a 34-foot sailboat. Prerequisite(s): successful completion of PHYE 9T and 40 or more hours of keelboat usage. Enrollment is by instructor approval only.

PHYE 15B - Court Sports: Basketball (0)

Coeducational. Introductory course providing instruction in fundamentals, offensive and defensive strategies, rules, and conditioning designed primarily for beginning and intermediate level players.

PHYE 15N - Court Sports: Tennis (0)

Coeducational. Introductory course introducing the basics of forehand, backhand, and serve and introduces the volley, overhead, and lob.

PHYE 15S - Court Sports: Sand Volleyball (0)

Coeducational. Introductory course offered for students who desire to learn and improve the basic skills, as well as to understand the rules.

PHYE 15T - Court Sports: Volleyball (0)

Coeducational. Introductory course for students who desire to learn and improve the basic skills, as well as to understand the rules.

PHYE 20A - Dance: Ballet (0)

Coeducational. Introductory course with emphasis on principles of movement, style, and execution of ballet technique.

PHYE 20C - Dance: Jazz (0)

Coeducational. Introductory course of jazz dance emphasizing basic technique, styling, rhythm, and isolations.

PHYE 20D - Dance: Modern (0)

Coeducational. Introductory course with an emphasis on basic techniques and building phrases of movement.

PHYE 25A - Fencing: Epee (0)

Coeducational. Basic instruction in the techniques, strategy, and general methodology of modern fencing. Emphasis on épée fencing as a development from the traditional French and Italian dueling sword styles as they have evolved to form the modern electrical game.

PHYE 28K - Field Sports: Soccer (0)

Coeducational. Sections are offered in field soccer and indoor soccer. Instruction in the basic techniques, tactics, laws of the game, and injury prevention for players of all levels. Prerequisite(s): determination at first class meeting.

PHYE 30J - Fitness Activities: Strength Training (0)

Coeducational. Introduction to safe and effective methods of weight training and other personal conditioning activities. Topics covered include proper weight-training techniques, care of body and equipment, and elementary exercise physiology.

PHYE 30L - Fitness Activities: Yoga Exercises (0)

Coeducational. Offered at beginning levels of a variety of yoga exercises.

PHYE 43A - Martial Arts: Aikido I (0)

Coeducational. Introductory-level course in nonviolent, noncompetitive Japanese martial art emphasizing mind-body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual.

PHYE 43B - Martial Arts: Aikido II (0)

Coeducational. Intermediate-level course in nonviolent, noncompetitive Japanese martial art emphasizing mind-body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual.

Graduate

PHYE 209B - Boating: Graduate Beginning Dinghy Sailing (0)

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course.

Prerequisite: Prerequisite(s): swimming ability. Enrollment is restricted to graduate students.

PHYE 209C - Boating: Graduate Intermediate Dinghy Sailing (0)

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat.

Prerequisite: Prerequisite(s): PHYE 9B or PHYE 209B, or equivalent skills; and swimming ability. Enrollment is restricted to graduate students.

PHYE 209S - Boating: Grad Student Beginning Keelboat Sailing (0)

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used.

Prerequisite: Prerequisite(s): PHYE 9C or PHYE 209C. Enrollment is restricted to graduate students.

PHYS - PHYSICS

Lower-Division

PHYS 1A - Physics for Everyone (5)

Explores some of the great topics in classical and modern physics, including relativity, and the connections to a broad range of inquiry, from daily life to cosmology. Math, mainly algebra, is used in a way that is completely accessible to everyone. No previous knowledge of physics is necessary.

PHYS 1B - Physics for Everyone (5)

Explores some of the great topics in classical and modern physics, including thermal physics, quantum mechanics, and the constituents of matter, and their connections to a broad range of inquiry, from daily life to particle physics and cosmology. Probabilistic evidence, backgrounds, statistical fluctuations and systematic uncertainties, discovery significance, what we infer, and what can go wrong, are illustrated in some depth. Math is used in a way that is completely accessible to everyone. No previous knowledge of physics or statistics is necessary.

PHYS 2 - The Physicist's Toolbox (2)

Prepares students for success in subsequent classes in physics and astrophysics, course is designed for students majoring or considering majoring in physics, applied physics, or astrophysics, but is open to all. Course includes overview of physics and astrophysics, and their major tools: experiment, theory, observation, and computation. Provides conceptual overview of the top-level theoretical approaches includes classical mechanics, quantum mechanics, and statistical mechanics. Also reviews problem-solving skills for work in subsequent classes, including the physicist's approach to calculus, working intuitively with graphs, solving simultaneous equations, and understanding equations conceptually. Examines the educational path to different physics careers and physics as a collaborative discipline and effective methods for group work as well as individual study.

PHYS 5A - Introduction to Physics I (5)

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations.

Prerequisite: Prerequisite(s): MATH 19A or MATH 20A; concurrent enrollment in PHYS 5L is required.

PHYS 5B - Introduction to Physics II (5)

A continuation of PHYS 5A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L and MATH 19A or MATH 20A; concurrent enrollment in PHYS 5M is required. Corequisite: MATH 19B or MATH 20B.

PHYS 5C - Introduction to Physics III (5)

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L and MATH 19B or MATH 20B. Concurrent enrollment in PHYS 5N is required.

PHYS 5D - Introduction to Physics IV (5)

Introduces temperature, heat, thermal conductivity, diffusion, ideal gases, laws of thermodynamics, heat engines, and kinetic theory. Introduces the special theory of relativity and the equivalence principle. Includes the photoelectric effect, the Compton effect, matter waves, atomic spectra, and the Bohr model.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L, or PHYS 6A and PHYS 6L; and PHYS 5B or PHYS 6B; and MATH 19B or MATH 20B.

PHYS 5L - Introduction to Physics I Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 5A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): concurrent enrollment in PHYS 5A is required.

PHYS 5M - Introduction to Physics II Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 5B. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L; concurrent enrollment in PHYS 5B is required.

PHYS 5N - Introduction to Physics Laboratory III (1)

Laboratory sequence illustrating topics covered in PHYS 5C. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L. Concurrent enrollment in PHYS 5C is required.

PHYS 6A - Introductory Physics I (5)

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 15A. Concurrent enrollment in PHYS 6L is required.

PHYS 6B - Introductory Physics II (5)

A continuation of PHYS 6A. Geometric optics; statics and dynamics of fluids; introduction to thermodynamics, including temperature, heat, thermal conductivity, and molecular motion; wave motion in matter, including sound waves.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L or PHYS 6A and PHYS 6L; and MATH 11B or MATH 19B or MATH 20B or AM 15B.

PHYS 6C - Introductory Physics III (5)

Introduction to electricity and magnetism. Elementary circuits; Maxwell's equations; electromagnetic radiation; interference and polarization of light.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L or PHYS 6A and PHYS 6L, and MATH 11B or MATH 19B or MATH 20B or AM 15B.

PHYS 6L - Introductory Physics I Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 6A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in PHYS 6A or PHYS 7A is required.

PHYS 6M - Introductory Physics II Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 6B. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 5A, PHYS 6A, or PHYS 7A; and PHYS 5L, PHYS 6L or PHYS 7L; and previous or concurrent enrollment in PHYS 6B.

PHYS 6N - Introductory Physics III Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 6C. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 6A and PHYS 6L or PHYS 5A and PHYS 5L; previous or concurrent enrollment in PHYS 6C; PHYS 6B and PHYS 6M are recommended.

PHYS 7A - Elementary Physics I (5)

Examines elementary mechanics, including vectors, kinematics, Newton's laws, work and energy, conservation of momentum and energy, fluid motion, and temperature and heat.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 15A. Concurrent enrollment in PHYS 6L or PHYS 7L is required.

PHYS 7B - Elementary Physics II (5)

Examines elementary wave motion, light polarization, reflection and refraction; elementary electricity, including electric charge, Coulomb's Law, and electric field and potential; electrostatic energy, currents, conductors, resistance, and Ohm's Law; and magnetic fields, inductors, and circuits.

Prerequisite: Prerequisite(s): PHYS 7A, and MATH 11B, or MATH 19B, or MATH 20B, or AM 15B.

PHYS 7L - Elementary Physics Laboratory (1)

Laboratory sequence illustrating topics covered in PHYS 7A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): Concurrent enrollment in PHYS 7A is required.

PHYS 11 - The Physicist in Industry (2)

One two-hour meeting per week. Subjects include roles of the physicist in industry, the business environment in a technical company, economic considerations, job hunting, and discussions with physicists with industrial experience. Enrollment by permission of instructor.

Priority given to applied physics upper-division students; other majors if space available.

PHYS 80A - Elementary Physics of Energy (5)

The physics of energy developed in a course accessible to non-science majors as well as science majors. Fundamental principles and elementary calculations, at the level of basic algebra, developed and applied to the understanding of the physics of energy. Topics include fossil fuels, renewable energy, solar cells and waste energy, waste-energy recovery, nuclear power, and global greenhouse effects. (Formerly offered as PHYS 2.)

PHYS 80U - Physics and Psychophysics of Music (5)

Fundamental theory of vibration, sound waves, sound propagation, diffraction, and interference. Free, coupled, and driven oscillations. Resonance phenomena and modes of oscillation. Fourier's theorem. Anatomy and psychophysics of the ear. Musical scales and intervals. Nature of plucked and bowed strings; guitar, violin, piano. Woodwind and brass instruments. Architectural acoustics. High school algebra and basic knowledge of musical notation recommended.

PHYS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

PHYS 102 - Modern Physics (5)

Topics in quantum physics including the Schrodinger equation; angular momentum and spin; the Pauli exclusion principle; and quantum statistics. Applications in multi-electron atoms and molecules, and in solid-state, nuclear, and particle physics.

Prerequisite: Prerequisite(s): PHYS 5A, PHYS 5L, PHYS 5B, PHYS 5M, PHYS 5C, PHYS 5N and PHYS 5D; or PHYS 6A, PHYS 6L, PHYS 6B, PHYS 6M, PHYS 6C, PHYS 6N, and PHYS 5D; or equivalent.

PHYS 105 - Mechanics (5)

Particle dynamics in one, two, and three dimensions. Conservation laws. Small oscillations, Fourier series and Fourier integral solutions. Phase diagrams and nonlinear motions, Lagrange's equations, and Hamiltonian dynamics.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L; and PHYS 116A or MATH 21 plus MATH 24. Concurrent enrollment in PHYS 116C or MATH 107 is required.

PHYS 110A - Electricity, Magnetism, and Optics (5)

Examines electrostatics, including the electric field, potential, solutions to Laplace's and Poisson's equations, and work and energy; electricity in matter (conductors, dielectrics); magnetostatics, including the magnetic field and vector potential, Ampere's and Faraday's laws; magnetism in matter; and Maxwell's equations.

Prerequisite: Prerequisite(s): PHYS 5C; and PHYS 116A or MATH 21 and MATH 24; and PHYS 116C or MATH 107.

PHYS 110B - Electricity, Magnetism, and Optics (5)

Examines electromagnetic waves, including absorption and dispersion, reflection and transmission, and wave guides; conservation laws and gauge invariance; time-dependent vector and scalar potentials and application to radiation of charges and antennae; and electrodynamics and relativity.

Prerequisite: Prerequisite(s): PHYS 110A; and PHYS 116C or MATH 107.

PHYS 112 - Thermodynamics and Statistical Mechanics (5)

Consequences of the first and second laws of thermodynamics, elementary statistical mechanics, thermodynamics of irreversible processes.

Prerequisite: Prerequisite(s): PHYS 5D and MATH 23B. Concurrent enrollment in PHYS 102 is required.

PHYS 115 - Computational Physics (5)

This course applies efficient numerical methods to the solutions of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students apply a high-level programming language, such as Python, to the solution of physical problems and develop appropriate error and stability estimates.

Prerequisite: Prerequisite(s): PHYS 102 and PHYS 105; and PHYS 116A or MATH 21 and MATH 24; and PHYS 116C or MATH 107, or equivalent. Basic programming experience in Python or similar language.

PHYS 116A - Mathematical Methods in Physics (5)

Infinite series, topics in linear algebra including vector spaces, matrices and determinants, systems of linear equations, eigenvalue problems and matrix diagonalization, tensor algebra, and ordinary differential equations.

Prerequisite: Prerequisite(s): MATH 23A.

PHYS 116C - Mathematical Methods in Physics (5)

Fourier series and transforms, Dirac-delta function, Green's functions, series solutions of ordinary equations, Legendre polynomials, Bessel functions, sets of orthogonal functions, and partial differential equations.

Prerequisite: Prerequisite(s): PHYS 116A or MATH 21 and MATH 24; and MATH 23A and MATH 23B.

PHYS 116D - Mathematical Methods in Physics (5)

Complex functions, complex analysis, asymptotic series and expansions, special functions defined by integrals, and probability and statistics. (Formerly offered as PHYS 116B.)

Prerequisite: Prerequisite(s): PHYS 116A or MATH 21 and MATH 24; and PHYS 116C.

PHYS 120 - Polymer Physics (5)

Statistical properties polymers; scaling behavior, fractal dimensions; random walks, self avoidance; single chains and concentrated solutions; dynamics and topological effects in melts; polymer networks; sol-gel transitions; polymer blends; application to biological systems; computer simulations will demonstrate much of the above. Students cannot receive credit for this course and PHYS 240.

Prerequisite: Prerequisite(s): PHYS 112.

PHYS 129 - Particle Physics and Astrophysics (5)

The standard model of particle physics; physics beyond the standard model; neutrino physics; the early universe; dark matter and dark energy; selected topics in general relativistic cosmology and high-energy

astrophysics. (Formerly Nuclear and Particle Astrophysics.)

Prerequisite: Prerequisite(s): PHYS 5D, PHYS 102, and MATH 23B; and PHYS 116A or MATH 21. Students with equivalent coursework may contact instructor for permission to enroll.

PHYS 133 - Intermediate Laboratory (5)

Demonstration of phenomena of classical and modern physics. Development of a familiarity with experimental methods. Special experimental projects may be undertaken by students in this laboratory.

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 5D and one from CSE 5J, or CSE 14, or CSE 20, or ASTR 119, or by permission of the instructor. Enrollment is restricted to physics, applied physics, physics (astrophysics), and science education majors and physics minors.

PHYS 134 - Physics Advanced Laboratory (5)

Individual experimental investigations of basic phenomena in atomic, nuclear, and solid state physics.

Prerequisite: Prerequisite(s): PHYS 133 and PHYS 102.

PHYS 135 - Astrophysics Advanced Laboratory (5)

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: PHYS 135A in fall and PHYS 135B in winter, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 133 and at least one astronomy course. Enrollment is restricted to physics (astrophysics) majors. Intended primarily for juniors and seniors majoring or minoring in astrophysics.

PHYS 135A - Astrophysics Advanced Laboratory (3)

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course PHYS 135 in fall, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 133 and at least one astronomy course. Enrollment is restricted to physics (astrophysics) majors.

PHYS 135B - Astrophysics Advanced Laboratory (2)

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term PHYS 135 in fall, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 135A. Enrollment is restricted to physics (astrophysics) majors.

PHYS 137 - Advanced Optics Laboratory (5)

Application of advanced optical techniques to the study of problems in astrophysics, physics, chemistry, biology, and engineering. Techniques include interferometry, Fourier optics, adaptive optics, optical tweezers, photon correlation spectroscopy, optical pumping, laser spectroscopy, and more.

Prerequisite: Prerequisite(s): PHYS 102 or ECE 102; and PHYS 133 or by permission of instructor.

PHYS 139A - Quantum Mechanics I (5)

Basic principles and mathematical techniques of nonrelativistic quantum mechanics: Schrodinger equation and Dirac notation; one-dimensional systems, including the free particle and harmonic oscillator; three-dimensional problems with spherical symmetry; angular momentum; hydrogen atom; spin; identical particles and degenerate gases.

Prerequisite: Prerequisite(s): PHYS 102; and PHYS 116A or MATH 21 and MATH 24; and PHYS 116C or MATH 107.

PHYS 139B - Quantum Mechanics II (5)

Approximation methods in nonrelativistic quantum mechanics: time-independent perturbation theory (non-degenerate and degenerate) and addition of angular momenta; variational methods; the WKB approximation; time-dependent perturbation theory and radiation theory; scattering theory.

Prerequisite: Prerequisite(s): PHYS 102; and PHYS 116A or MATH 21 and MATH 24; and PHYS 116C or MATH 107; and PHYS 139A.

PHYS 150 - Quantum Computing (5)

Review of linear algebra. Includes basic concepts in quantum mechanics including quantum states, measurements, operators, entanglement, entanglement entropy, "no cloning" theorem, and density matrices; classical gates, reversible computing, and quantum gates; several quantum algorithms including Deutsch's algorithm, Simon's algorithm, Shor's algorithm, and the Grover algorithm; quantum error correction; and quantum key distribution and teleportation.

Prerequisite: Prerequisite(s): PHYS 116A or MATH 21 or AM 10. Enrollment is restricted to juniors and seniors.

PHYS 152 - Physics and Machine Learning (5)

Review of select topics in statistical physics including information theory, entropy, coupled systems, phase transitions, and symmetry breaking. Introduction to multivariate algorithms, with an emphasis on their foundations in statistical physics and classical mechanics. Notebooks, data preparation, cross-

validation, supervised and unsupervised learning. Practical considerations for training and optimizing neural networks and related tools. (Formerly offered as Neural Networks, Statistical Physics and Computing.)

Prerequisite: Prerequisite(s): PHYS 105 and PHYS 112; and CSE 20 or ASTR 119 or PHYS 115 or prior programming experience with permission of instructor.

PHYS 156 - Applications of Quantum Materials (5)

Quantum mechanics in solid-state materials plays a fundamental role in the development of quantum computation and sustainable technologies, as well as the search for fundamental physics beyond the Standard Model. This course introduces the quantum physics of semiconductors and low-dimensional materials (such as graphene), with emphasis on applications to transistors for logic operations, p-n junctions for photovoltaic cells and particle detection, as well as quantum dots for qubits. (Formerly Applications of Solid State Physics.)

Prerequisite: Prerequisite(s): PHYS 102 or CHEM 163A.

PHYS 157 - Frontier of Quantum Materials (5)

The fundamentals of quantum materials are revamped by incorporating the geometric Berry phase and the topology of quantum wave functions. The traditional solid-state phenomena of superconductivity and magnetism are taught from a cutting-edge topological perspective, to understand phenomena such as the quantum Hall effect and emergent Majorana fermions. Applications of topological quantum materials range from spintronics to quantum information and computation. (Formerly offered as PHYS 155, Solid State Physics.)

Prerequisite: Prerequisite(s): PHYS 112 and PHYS 139A; students with equivalent coursework may contact instructor for permission to enroll.

PHYS 160 - Practical Electronics (5)

Provides a practical knowledge of analog electronics that experimentalists generally need in research, including basic circuits with bipolar and field-effect transistors, op-amps, comparators, oscillators, and voltage regulators. It assumes no previous knowledge of electronics but includes twice-weekly lectures with some homework assignments, including small circuit simulations done using PSpice. However, with the aid of the instructor and teaching assistant, the students are expected to learn mainly through the construction, debugging, and analysis of small electronics projects.

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 5N or PHYS 6C and PHYS 6N.

PHYS 171 - General Relativity, Black Holes, and Cosmology (5)

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for

cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments.

Prerequisite: Prerequisite(s): PHYS 105, PHYS 110A, and PHYS 110B; and PHYS 116A or MATH 21 and MATH 24.

PHYS 180 - Biophysics (5)

Physical principles and techniques used in biology: X-ray diffraction; nuclear magnetic resonance; statistics, kinetics, and thermodynamics of macromolecules; viscosity and diffusion; DNA/RNA pairing; electrophoresis; physics of enzymes; biological energy conversion; optical tweezers.

Prerequisite: Prerequisite(s): PHYS 112; students who have a biochemistry background may contact instructor for permission. Restricted to juniors and seniors.

PHYS 182 - Scientific Communication for Physicists (5)

Develops the writing skills necessary to prepare professional publications: how to structure a physics article; write for a specific audience with clarity, precision, and concision; and deliver a short informal presentation. Additionally, students become familiar with the peer review process and the ethics of the publication process.

Prerequisite: Prerequisite(s): PHYS 133 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors in physics, astrophysics, applied physics, or physics education.

PHYS 191 - Teaching Practicum (5)

Designed to provide upper-division undergraduates with an opportunity to work with students in lower division courses, leading discussions, reading and marking submissions, and assisting in the planning and teaching of a course. Prerequisite(s): excellent performance in major courses; instructor approval required; enrollment restricted to senior physics majors.

PHYS 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See PHYS 42.) Prerequisite(s): upper-division standing; submission of a proposal supported by a faculty member willing to supervise.

PHYS 195A - Senior Thesis I (5)

Independent research for seniors conducted under the supervision of a faculty mentor. Students develop a written research proposal, thesis outline, and introductory material. Prerequisite(s): Entry Level Writing and Composition requirements. Enrollment is restricted to senior applied physics, physics, and physics (astrophysics) majors.

PHYS 195B - Senior Thesis II (5)

Independent research for seniors conducted under the supervision of a faculty mentor. Students prepare an oral presentation of their results, and they submit a written senior thesis on their research topic.

Prerequisite(s): Entry Level Writing and Composition requirements. Enrollment is restricted to senior applied physics, physics, and physics (astrophysics) majors.

PHYS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

PHYS 199F - Tutorial (2)

Tutorial

Graduate**PHYS 202 - Introduction to Teaching in Physics (1)**

A practical introduction to working as a teaching assistant for undergraduate classes in physics, including both teaching laboratories and running discussion sections. The training includes topics in classroom climate and inclusivity, active learning, motivating students, office hours, information technology, grading, communication with the instructor, and handling difficult situations. Students engaged in teaching in the same quarter are encouraged to apply the lessons in their classes and return with feedback to be discussed. Required course for first year graduate students.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 205 - Introduction to Research in Physics (2)

Introduction to current research opportunities at UCSC for graduate students. Topics include: elementary particle physics, condensed matter and solid state physics, high energy astrophysics, biophysics, and cosmology. Selected topics related to career development may also be included.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

PHYS 210 - Classical Mechanics and Thermal Physics (5)

Generalized coordinates, Lagrange and Hamiltonian mechanics, Poisson Brackets, Classical field theory, other advanced topics in classical dynamics. Introduction to thermodynamics, thermodynamic potentials and Legendre transforms, entropy, distribution functions. (Formerly Classical Mechanics.)

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 212 - Electromagnetism I (5)

Examines electrostatics and magnetostatics, boundary value problems, multipole expansion, dielectric and magnetic materials, time-varying electromagnetic

fields, Maxwell's equations, conservation laws, and plane electromagnetic waves and wave propagation.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 214 - Electromagnetism II (5)

Electromagnetic waves; waves in dispersive media; waveguides and cavities; complete development of special relativity with applications; Lorentz covariant formulation of Maxwell's equations; radiating systems; scattering and diffraction; advanced topics in radiation theory and optics.

Prerequisite: Prerequisite(s): PHYS 212. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 215 - Introduction to Non-Relativistic Quantum Mechanics (5)

Mathematic introduction; fundamental postulates; time evolution operator, including the Heisenberg and Schrodinger pictures; simple harmonic oscillator and coherent states; one-dimensional scattering theory, including S-matrix resonant phenomena; two-state systems, including magnetic resonance; symmetries, including rotation group, spin, and the Wigner-Eckart theorem; rotationally invariant problems, including the hydrogen atom; gauge invariance, including Landau levels; introduction to path integral.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 216 - Advanced Topics in Non-Relativistic Quantum Mechanics (5)

Approximate methods: time-independent perturbation theory, variational principle, time-dependent perturbation theory; three-dimensional scattering theory; identical particles; permutation symmetry and exchange degeneracy, anti-symmetric and symmetric states; many-body systems and self-consistent fields: variational calculations; second quantized formalism, including Fock spaces/number representation, field operators and Green functions; applications: electron gas; quantization of the electromagnetic field and interaction of radiation with matter: absorption, emission, scattering, photoelectric effect, and lifetimes.

Prerequisite: Prerequisite(s): PHYS 215. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 217 - Quantum Field Theory I (5)

Lorentz invariance in quantum theory, Dirac and Klein-Gordon equations, the relativistic hydrogen atom, Green functions and canonical approach to field theory, quantum electrodynamics, Feynman diagrams for scattering processes, symmetries and Ward identities. Students learn to perform calculations of scattering and decay of particles in field theory.

Prerequisite: Prerequisite(s): PHYS 216 or exception by permission of the instructor. Enrollment is restricted to graduate students or by permission of the instructor.

PHYS 218 - Quantum Field Theory II (5)

Path integral approach to quantum field theory. Theory of renormalization and the renormalization group, introduction to gauge theories and spontaneously broken field theories. Applications to the standard model of strong, weak, and electromagnetic interactions.

Prerequisite: Prerequisite(s): PHYS 217. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 219 - Statistical Physics (5)

The basic laws of thermodynamics, entropy, thermodynamic potentials, kinetic theory of gases, quantum and classical statistical mechanics, virial expansion, linear response theory. Applications in condensed matter physics.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 220 - Theory of Many-Body Physics (5)

Finite temperature Green functions, Feynman diagrams, Dyson equation, linked cluster theorem, Kubo formula for electrical conductivity, electron gas, random phase approximation, Fermi surfaces, Landau fermi liquid theory, electron phonon coupling, Migdal's theorem, superconductivity.

Prerequisite: Prerequisite(s): PHYS 216 and PHYS 219. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 221A - Introduction to Particle Physics I (5)

First quarter of a two-quarter graduate level introduction to particle physics, including the following topics: discrete symmetries, quark model, particle classification, masses and magnetic moments, passage of radiation through matter, detector technology, accelerator physics, Feynman calculus, and electron-positron annihilation.

Prerequisite: Prerequisite(s): PHYS 217 or concurrent enrollment. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 221B - Introduction to Particle Physics II (5)

Second quarter of a two-quarter graduate level introduction to particle physics, including the following topics: nucleon structure, weak interactions and the Standard Model, neutrino oscillation, quantum chromodynamics, CP violation, and a tour of the Stanford Linear Accelerator Center.

Prerequisite: Prerequisite(s): PHYS 221A; PHYS 217 or concurrent enrollment. Enrollment is restricted to

graduate students only, except by permission of instructor.

PHYS 222 - Quantum Field Theory III (5)

Focuses on the theoretical underpinnings of the standard model, including the spontaneous symmetry breaking, the renormalization group, the operator product expansion, and precision tests of the Standard Model.

Prerequisite: Prerequisite(s): PHYS 218 and PHYS 221B. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 224 - Particle Astrophysics and Cosmology (5)

Particle physics and cosmology of the very early universe: thermodynamics and thermal history; out-of-equilibrium phenomena (e.g., WIMPs freeze-out, neutrino cosmology, Big Bang nucleosynthesis, recombination); baryogenesis; inflation; topological defects. High-energy astrophysical processes: overview of cosmic ray and gamma ray astrophysics; radiative and inelastic processes; astroparticle acceleration mechanisms; magnetic fields and cosmic ray transport; radiation-energy density of the universe; ultrahigh-energy cosmic rays; dark-matter models; and detection techniques.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 226 - General Relativity (5)

Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 231 - Introduction to Condensed Matter Physics (5)

Crystal structures, reciprocal lattice, crystal bonding, phonons (including specific heat), band theory of electrons, free electron model, electron-electron and electron-phonon interactions, transport theory.

Prerequisite: Prerequisite(s): PHYS 216 or equivalent course or by permission of the instructor. Enrollment is restricted to graduate students only, or by permission of instructor.

PHYS 232 - Condensed Matter Physics (5)

Magnetism (para, ferro, anti-ferro, ferri), spin waves, superconductivity, introduction to semiconductors.

Prerequisite: Prerequisite(s): PHYS 231. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 233 - Advanced Condensed Matter Physics (5)

A special topics course which includes areas of current interest in condensed matter physics. Possible topics include superconductivity, phase transitions, renormalization group, disordered systems, surface phenomena, magnetic resonance, and spectroscopy.

Prerequisite: Prerequisite(s): PHYS 231. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 234 - Soft Condensed Matter Physics (5)

A selection of topics from: liquid crystals, biological systems, renormalization group and critical phenomena, stochastic processes, Langevin and Fokker Planck equations, hydrodynamic theories, granular materials, glasses, quasicrystals.

Prerequisite: Prerequisite(s): PHYS 219 and PHYS 232. Enrollment is restricted to graduate students.

PHYS 240 - Polymer Physics (5)

Statistical properties polymers. Scaling behavior, fractal dimensions. Random walks, self avoidance. Single chains and concentrated solutions. Dynamics and topological effects in melts. Polymer networks. Sol-gel transitions. Polymer blends. Application to biological systems. Computer simulations demonstrating much of the above. Students cannot receive credit for this course and PHYS 120.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 242 - Computational Physics (5)

This course will apply efficient numerical methods to the solution of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language such as Mathematica to the solution of physical problems and will develop appropriate error and stability estimates.

Prerequisite: Prerequisite(s): basic programming experience in C or Fortran. No previous experience with Mathematica is required. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 251 - Group Theory and Modern Physics (5)

Finite and continuous groups, group representation theory, the symmetric group and Young tableaux, Lie groups and Lie algebras, irreducible representations of Lie algebras by tensor methods, unitary groups in particle physics, Dynkin diagrams, Lorentz and Poincaré groups.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 290 - Special Topics (5)

A series of lectures on various topics of current interest in physics at UC Santa Cruz.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 291A - Cosmology (2)

Intensive research seminar on cosmology and related topics in astrophysics: nature of dark matter; origin of cosmological inhomogeneities and other initial conditions of the big bang; origin and evolution of galaxies and large scale structure in the universe.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 291B - X-rays and Magnetism (2)

Research seminar on x-ray studies of the properties and behavior of magnetic materials. Topics include: the underlying physical interactions, experimental techniques, and selected examples from current research. This course includes a visit to the Advanced Light Source in Berkeley.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291C - Developments in Theoretical Particle Physics (2)

Seminar on the current literature of elementary particle physics, ranging from strong and weak interaction phenomenology to Higgs physics, supersymmetry, and superstring theory. Students may present their own research results.

Prerequisite: Prerequisite(s): PHYS 218. Enrollment is restricted to graduate students.

PHYS 291D - Experimental High-Energy Collider Physics (2)

Seminar on current results in experimental high-energy particle physics. Topics follow recently published results, including design of experiments, development of particle detector technology, and experimental results from new particle searches, quantum chromodynamics, and properties of heavy flavor quarks.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291E - Applied Physics (2)

Intensive research seminar on applied physics and related topics in materials science, including semiconductor devices, optoelectronics, molecular electronics, magnetic materials, nanotechnology, biosensors, and medical physics. Students may present their own research results.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291F - Experimental High-Energy and Particle Astrophysics Seminar (2)

Survey of current research in experimental high-energy and particle astrophysics. Recent observations and development in instrumentation for x-rays, gamma rays, and neutrinos, and evidence for dark matter and other new particles. Students lead discussion of recent papers.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291G - Condensed Matter Physics Research Seminar (2)

Weekly seminar series covering topics of current interest in condensed matter physics. Local and external speakers discuss their work.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 292 - Seminar (0)

Weekly seminar attended by faculty and graduate students. Directed at all physics graduate students who have not taken and passed the qualifying examination for the Ph.D. program.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 292F - Seminar (2)

Seminar

PHYS 297A - Independent Study (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 297B - Independent Study (10)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 297C - Independent Study (15)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 298 - Theoretical and Experimental Research Project (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299A - Thesis Research (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299B - Thesis Research (10)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299C - Thesis Research (15)

Enrollment restricted to graduate students only, except by permission of instructor.

POLI - POLITICS

Lower-Division

POLI 1 - Politics: Power, Principle, Process, and Policy (5)

Systematic introduction to the nature of politics and government, organized around the dynamic relationship between power, principle, and process in democratic politics. Provides historic and contemporary overview; explores the interactions among government, laws, and societies at the national and international levels.

POLI 3 - Keywords: Concepts in Politics (5)

Introduces key concepts in political discourse and key debates generated by contested terms such as powers, ideology, and multiculturalism. Students read from canonical texts, feminist scholarship, historical materials, and contemporary cultural and postmodernist writings.

POLI 4 - Citizenship and Action (5)

What does a citizen do? What kind of citizen activity is appropriate to democratic aspirations? Course uses political theory to answer these questions as they relate to current and historical events, primarily in the North American context. Draws on texts ranging from Aristotle, Locke, Thoreau, Ellison, and Ranciere, as well as present-day debates, to bear on the relationship of citizen action and identity.

POLI 17 - U.S. and the World Economy (5)

Explores intellectual and empirical trends shaping the U.S. relationship with the global economy. Traces debates about liberalism and interventionism, surveys post-war American foreign economic policy and discusses varieties of capitalism emerging around the world.

POLI 20 - American Politics (5)

Introduces the study of politics through an analysis of the United States political system and processes. Topics vary, but may include political institutions, public policies, parties and electoral politics, and social forces.

POLI 21 - Governing the Golden State (5)

Introduces key principles for understanding state politics in California and how power is mobilized for transformative change. Analyzes distinctive features of California's political development and culture in the governance of enduring social problems and policy dilemmas.

POLI 45 - Music and Politics in Contemporary Society

(5)

Introduces music to the study of politics. Considers the fields of music and identity; music and social movements; and theories of music, art, and revolution.

POLI 46 - Africa in Global Perspective (5)

Explores interdisciplinary methods, theories, and practices involved in producing and reproducing knowledges about Africa and the West within global politics. Examines ideas of international relations, international political economy, development, military structures, cultural formations, and the state through the critical use of film, literature, and scholarly texts.

POLI 60 - Comparative Politics (5)

Introduces the study of politics through the analysis of national political systems within or across regions from the developing world to post-industrial nations. Typical topics include: authoritarian and democratic regimes; state institutions and capacity; parties and electoral systems; public policies; social movements; ethnic conflict; and globalization.

POLI 61 - Politics of Social Policy (5)

Introduces social policy around the world. Some countries provide free and good-quality health and education, as well as a minimum income to all citizens. Others, instead, provide meager benefits to few citizens.

POLI 65 - Introduction to International Relations (5)

Surveys major theories of international relations including realism, liberal institutionalism, constructivism, and newer approaches focused on problems of asymmetric warfare. Examines problems such as nuclear proliferation, international terrorism, global trade conflict, climate change, and humanitarian intervention.

POLI 70 - Global Politics (5)

Can common global interest prevail against particular sovereign desires? Surveys selected contemporary issues in global politics such as wars of intervention, ethnic conflict, globalization, global environmental protection, and some of the different ways in which they are understood and explained.

Upper-Division

POLI 100 - Politics Writing-Intensive Seminar (5)

Focuses on methods and approaches to writing effective and persuasive argumentative essays as a core component of the study of politics. Topics vary by instructor, and consider central concepts and issues in political life. The course material is explored as a means through which to develop basic and advanced skills in writing, as well as in argumentation, analysis, and critical engagement with readings through seminar-style discussions.

POLI 101 - Introduction to Research Methods (5)

Overview of research methods and data analytic techniques used in politics. Through hands-on learning, students critically evaluate social research reports, conduct investigations, describe data, assess statistical relationships, and test hypotheses. Prepares students to conduct the in-depth research required in upper-division courses.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior politics majors during first and second pass enrollment.

POLI 102 - Doing Research (5)

Introduction to conceptualizing and executing qualitative research in the social sciences. Qualitative methods are non-statistical modes of social inquiry, including case studies, interviews, and archival research. Research methods cannot be done in a passive way. Really understanding methodology requires Doing Research.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 103 - Feminist Interventions (5)

Situates ongoing debates around feminist theory and practice within the context of political theory, the role of the state, and the position of women in contemporary (predominantly Western) society. Engages with classical political theory, second wave feminism, and the role of the state on matters pertaining to pornography and prostitution.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 105A - Ancient Political Thought (5)

Explores tensions between reason and revelation, justice and democracy, and freedom and empire through close readings of ancient texts. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 105B - Early Modern Political Thought (5)

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 105C - Modern Political Thought (5)

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, Fanon, and Weber.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 105D - Contemporary Political Theory: Modernity and its Discontents (5)

Examines the condition of modernity as it is understood, dwelled upon, and critiqued by political theorists since the second half of the 20th century. Explores how the modern condition was viewed by Euro-American thinkers, who saw themselves as its originators and heirs, as well as Chinese, Indian, Arab, and African thinkers for whom European modernity was an inescapable, if not an insurmountable, imposition to be engaged, transformed, and critiqued. (Formerly Late-20th Century Political Thought.)

POLI 108 - Revolt, Rebellion, Revolution (5)

Examines revolt, rebellion, and revolution as ideas in political theory, and as prisms through which we can analyze historical events. Introduces works of political theory (historical and contemporary), and looks at historical events considered to be revolts and/or revolutions.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 110 - Law and Social Issues (5)

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment only.

POLI 111A - Constitutional Law (5)

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only.

POLI 113 - Feminism and the Body (5)

Introduces the literature on the history of the body. Explores the multiple ways in which the body, in the West, has been the site of cultural and political inscription from the Middle Ages to the 19th century. Topics may include: pornography, criminality, sexuality, art, race, and medicine.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 114 - Thinking Green: Politics, Philosophies, and Practices of Sustainability (5)

A course on the political and philosophical sources of ecological and social sustainability and how they affect and deflect the design, implementation, and practices of sustainability. Asks whether they offer a realistic alternative to liberalism and other political and economic ideologies and practices.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 115 - Foundations of Political Economy (5)

Examines how ideas about labor, rights, exchange, capital, consumption, the state, production, poverty, luxury, morality, procreation, and markets were woven in political-economic discourse from 1690-1936. Readings include Locke, Mandeville, Smith, Malthus, Mill, Hegel, Marx, Lenin, and Veblen. Particular focus given to theoretical origins of and justifications for poverty and implications of economic interdependence for politics.

Prerequisite: Prerequisite(s): POLI 105B, POLI 105C, or POLI 120C. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 117 - Manufactured Truth and Narratives of Power (5)

Introduction to techniques used to produce power, notably by manufacturing and distorting truth from overt propaganda to public relations or advertising. Each week will focus on one conceptual apparatus used to frame reality, its related techniques and strategies as well as its economic, social or political objectives. Frameworks will include bureaucratic rationality, totalitarian propaganda, colonial mythology, state euphemism, "democratic" story-telling, conspiracy theories, branding, and green-washing. Enrollment by permission of instructor.

POLI 118 - Critical Political Thought and Critical Theory (5)

Course uses a multidisciplinary approach to the study of politics through significant contemporary authors and approaches in critical theory. Topics include: democracy action, violence, subjectivity, identity,

power and resistance, the body, political economy, and post-colonialism. (Formerly Topics in Contemporary Political and Critical Theory.)

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 120A - Congress, President, and the Court in American Politics (5)

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 120B - Society and Democracy in American Political Development (5)

Examines the role of social forces in the development of the American democratic processes and in the changing relationship between citizen and state. Course materials address the ideas, the social tensions, and the economic pressures bearing on social movements, interest groups, and political parties.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 120C - State and Capitalism in American Political Development (5)

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 121 - Racism & Justice in America (5)

Examines racism as a logic of governance in American politics and traces racial reasoning in transcendent notions of "justice" in the U.S. from the nation's founding into the 21st century. (Formerly offered as Race & Justice in America.)

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 122 - Politics, Labor, and Markets (5)

Examines political and social dimensions of recent transformations in the U.S. labor market. Includes classical and contemporary theoretical debates over the nature and functions of work under capitalism. Focuses on shifts in the organization and character of work in a globalizing economy. Addresses recent trends in low-

wage and contingent work, job mobility and security, and work/family relations. Includes attention to the roles and responses of business, labor, and government.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined major during first and second pass enrollment.

POLI 124 - Economic Inequality in America (5)

Examines the sources and implications of economic inequality in the United States. Explores theories of social class and its intersections with race and gender inequalities. Focuses on the role of politics and public policies in diminishing and/or exacerbating income and wealth inequalities.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 125 - Political Organizations in American Politics (5)

Introduces the literature on interest groups and attempts to answer the question: Do such groups promote or hinder American democracy? Class readings and lectures review and assess the participation of interest groups in the electoral process and in Congress, the executive branch, and the courts.

POLI 127 - Parties and Partisanship in American Politics (5)

Explores several important topics in the study of parties and partisanship in American politics; for example, the development of the party system, parties as organizations, parties in government, parties in the electorate, polarization, partisan identification, and state-level variation.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 128 - American Elections and Voting Behavior (5)

Introduces key concepts pertaining to voting, elections, and political behavior in the United States. Several topics are covered, such as campaigns, electoral institutions, reform, political participation (including but not limited to voting), presidential and congressional elections, partisan identification, and polling.

Prerequisite: Enrollment is restricted to politics majors and Latin America and Latino studies/politics combined majors during first and second pass enrollment.

POLI 129 - Policies and Politics of American Defense (5)

Examines the evolution of the policy and politics of American national security, from the Cold War to the present. Content of military policy explored with analytic focus on formation of policy and interactions between military policies and domestic policies.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 132 - California Water Law and Policy (5)

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future.

POLI 134 - Congress: Representation and Legislation (5)

Examines the United States Congress and the nature of the representative and legislative processes. Topics include: districting and elections; bicameralism; party organization; institutional and behavioral influences on legislative action; and the efficacy of Congress as a legislative body. Focuses on the contemporary Congress with comparisons to other legislative and representative institutions.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 135 - Immigration Policy and Debate in the U.S. (5)

Course charts the history of immigration policy and debate in the U.S., highlighting the ways economic, social, and geopolitical factors influenced the processes and outcomes of immigration debate and policy making. Focuses on interaction between society and state in formulation and implementation of immigration policy, and the ways policy outcomes may differ from expectations.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 136 - Applied Public Policy (5)

Focuses on the application of theory to practice by creating an opportunity for students to explore and analyze the connections between federal, state, and local policies and their impacts on day-to-day programs in the Santa Cruz community and region.

Prerequisite: Enrollment is restricted to junior and senior politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 136F - Applied Public Policy Internship (2)

This internship in governmental, public policy, and advocacy organizations and leaders in the Santa Cruz area requires a minimum of 50 hours with an assigned field study organization, a field journal, and limited classroom work.

Prerequisite: Prerequisite(s): POLI 136. Enrollment is restricted to politics and Latin America and Latino studies majors.

POLI 140A - European Politics (5)

Explores the political and economic systems of advanced industrialized societies. In addition to specific comparisons between the countries of western Europe and the United States, covers important themes and challenges, including immigration, globalization, and the crisis of the welfare state.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 140C - Latin American Politics (5)

Overview of major approaches to the study of Latin American politics. Introductory survey of historical and contemporary democratic populist, authoritarian, and revolutionary regimes. Special attention is given to region's recent transitions toward democratic rule, market-based economic models, and decentralized governance. Evaluates institutional arrangements (including presidentialism, electoral rules and party systems), as well as a variety of social movements and strategies of resistance among subaltern social groups and classes.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 140D - Politics of East Asia (5)

Explores the political development of East Asia's primary democracies: Japan, South Korea, and Taiwan. Examines the historical origins of these states, the process through which they emerged from authoritarian roots, and topics such as protest, corruption, and women's political roles.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 140E - Middle East Politics (5)

Covers different aspects of the evolution of the contemporary Arab nationalist state. The Arab world has weathered a series of revolutions, military coups, civil wars and liberalization attempts during the past six decades. Before the 2010-2011 uprisings, the region was mistakenly labeled as the home of "failed" and "rogue" states and understood to be the only region in which genuine democratic change was absent. Course shows that popular legitimacy and political ambitions have not always been lacking in the region, focusing primarily on Egypt, Syria, Tunisia and Algeria to emphasize the changes and continuities in the multiple constructions of state power in the Arab world since decolonization.

POLI 141 - Politics of China (5)

Introduces themes of Chinese politics from 1949 to present, including: the establishment and substantial dismantling of socialism; movements and upheavals, such as the Cultural Revolution and 1989; and issues, such as Hong Kong and Tibet. Surveys current institutions, leaders, and policies.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 142 - Russian Politics (5)

Historical-political survey of Russia within the U.S.S.R. is followed by examination of the 1991 revolution, the attempt to recover a national identity and establish a unified Russian state. Highlighted in this course are cultural and political factors central to the Russian experience: personalistic modes of political organization, a remote and corrupt state apparatus, collectivist forms of thought and self-defense.

POLI 143 - Comparative Post-Communist Politics (5)

Comparative study of revolutionary transformations of East European, Soviet, and former Soviet nations to post-Communist political orders. Focus on reemergence of political society, social and economic problems of transition, and maintenance of many cultural norms and authority patterns associated with previous regime.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 144 - Andean Politics (5)

Examines similar political trends in four Andean countries: Bolivia, Colombia, Ecuador, and Peru. Trends include mobilization of indigenous populations, breakdown of traditional party systems, and reconstruction efforts in post-conflict environments. Students who have taken prior courses in Latin American politics, including POLI 140C, will be best prepared for this course.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 146 - The Politics of Africa (5)

Comparative study of contemporary sub-Saharan African states. Selected issues and countries. Internal and external political institutions and processes are studied in order to learn about politics in contemporary Black Africa and to learn more about the nature of politics through the focus on the particular issues and questions raised by the African context.

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 147 - The Politics of Territorial Conflict (5)

Examines the phenomenon of territorial conflict within countries. Focuses on territorial cleavages that occur when minority groups are geographically concentrated within particular territories, and emphasizes attempts to accommodate these cleavages through measure like autonomy, federalism, and decentralization.

POLI 148 - Social Movements (5)

Overview of social movements by analysis of specific theories and examples. Course connects the study of theories and movements to larger political processes. Topics may include: New Social Movement theory; gender and social movement; democratic, historical, transnational, global and/or local social movements.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 149 - Democratic Transitions (5)

Explores democratization processes from a variety of historical and geographical perspectives. Examines the role of foreign influences, economic development, civil society, elites, and institutions in the transition and consolidation of democratic systems.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics majors during first and second pass enrollment.

POLI 151 - Politics of Law (5)

Uncovers the important debates in politics and law around the functions of courts, litigation, and rights--and the political nature of law itself. Course is interdisciplinary, and draws from literature in political science, law, and sociology.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 152 - Middle East Politics (5)

Investigates the evolution of the Arab nationalist state, from decolonization to the uprisings of 2010-2011. Examines the changes and continuities in Middle Eastern politics over the past 60 years by focusing on questions of violence, political economy, and culture.

Prerequisite: Prerequisite(s): POLI 60 or POLI 65 or POLI 70. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 153 - Urban Politics (5)

Provides an introduction to issues and challenges facing cities in the U.S. and abroad, as well as the policy remedies available to government and the private sector. The first part of the course provides the foundations to the study of urban politics by examining core questions in local government institutions and urban coalitions. The second part of the course examines urban policies in a variety of areas, such as growth, redevelopment, housing, and poverty.

POLI 154 - The Philippines and the World (5)

Introduces students to the histories, societies, and politics of the Philippines. Surveys major historical

eras, and treats topics such as the state, revolts and revolution, labor, religion, the environment, martial law.

POLI 160A - Theories of International and World Politics (5)

Examination of analytical perspectives on international and world politics, international and global political economy, war and conflict, corporations and civil society. Explores theoretical tools and applications, recurring patterns of global conflict and cooperation, the nexus between domestic politics, foreign policy and international and world politics. This is not a current events course.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160B - International Law (5)

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include state and non-state actors and sovereignty, treaties, the use of force, and human rights.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160C - Security, Conflict, Violence, War (5)

Genesis and theories of conflict and war and their avoidance (past, present, future). Relationship between foreign policy and intra- and interstate conflict and violence. National security and the security dilemma. Non-violent conflict as a normal part of politics; violent conflict as anti-political; transformation of conflict into social and interstate violence. Interrelationships among conduct of war, attainment of political objectives, and the end of hostilities. Civil and ethnic wars. Political economy of violence and war.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160D - International Political Economy (5)

Introduction to the politics of international economic relations. Examines the history of the international political economy, the theories that seek to explain it, and contemporary issues such as trade policy, globalization, and the financial crisis.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 161 - The Rise of China (5)

Explores China's rising international power and the implications thereof. Special emphasis on China's interactions with the United States and related issues (Korea, Taiwan, the South China Sea). Also addresses China's dealings with South Asia, Southeast Asia, Africa, Japan, international organizations, and more. (Formerly Foreign Relations of China.)

Prerequisite: Enrollment is restricted to politics and politics/Latin America and Latino studies combined majors during first and second pass enrollment.

POLI 163 - U.S. Foreign Policy (5)

Provides overview of U.S. foreign policy formulation: considers how U.S. political culture shapes foreign policy; examines governmental actors involved: the president, executive branch agencies, and Congress; then considers non-governmental actors: the media, interest groups, and public opinion.

Prerequisite: Enrollment is restricted to politics and politics/Latin American and Latino studies combined majors during first and second pass enrollment.

POLI 165 - Global Organization (5)

Addresses whether and how global organizations are changing the international system. Examines multilateral institutions, regional organizations, and nonstate actors. Overriding aim is to discern whether these global organizations are affecting the purported primacy of the state.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 166 - Politics of Migration (5)

Examines the magnitude and the political, economic, cultural, environmental, and social impact of today's movement of millions of people within and amongst states.

Prerequisite: Enrollment is restricted to politics majors and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 167 - Politics of International Trade (5)

Examines key issues in international trade, including the distribution of gains, fair trading practices, and preferential trade agreements. Focuses on the political dimensions of trade, the rules of the international trade system, and conflicts within countries that international trade generates.

Prerequisite: Enrollment is restricted to politics, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 168 - Topics in International Relations and Global Politics (5)

Examines contemporary issues in international relations, global politics, and global political economy through theoretical and applied frameworks, program assessment, sectoral and structure analysis, and across levels of analysis.

Prerequisite: Prior enrollment in POLI 160A is recommended, but not required. Enrollment is restricted to politics and Latin American and Latino

studies/politics combined majors during first and second pass enrollment.

POLI 169 - Politics of Development (5)

Introduces the politics of development. Examines the theories, history, and economics of development. Analyzes several contemporary issues. Readings include contemporary writings in the field and classical works on theoretical approaches.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 172 - Liberalism, the State, and the War on Terror (5)

Examines the relation between the liberal State and perceived challenges to State sovereignty posed by transnational terrorism. How does terrorism as both a symbol and empirical phenomenon fit within the horizon of liberal ideology? What claim to sovereignty does the State make in the face of acts of terror? What political logic is required in/for a War on Terror? Students may not take both course 72 and this course for credit in the major.

Prerequisite: Enrollment is restricted to politics and politics/Latin America and Latino studies majors during first and second pass enrollment.

POLI 174 - Global Political Ecology (5)

Explores the global dimensions of complex environmental issues such as climate change, biodiversity, deforestation, and fisheries: how they are produced, how they manifest, and how they are governed in response.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 175 - Human Rights (5)

Embraces an interdisciplinary approach to the study of human rights. Captures the malleable nature of human rights and the contours of its dual role as both law and discourse.

Prerequisite: Enrollment is restricted to politics and legal studies majors during first and second pass enrollment. Prior coursework in International Law (POLI 160B / LGST 160B) is recommended.

POLI 176 - Politics, Security, Energy & the Environment Along the Mighty Mekong (5)

Explores the issues and challenges facing the five Southeast Asian countries that line the shores of the Mekong River: Laos, Cambodia, Myanmar, Thailand, and Vietnam. Examines the importance of the health of the Mekong to the lives of 70 million who depend on its flowing waters and how exploitation of the river and

how its tributaries pose real and tangible opportunities as well as threats across a broad and diverse geography.

POLI 182 - The Power to Punish (5)

Interrogates the presuppositions of punishment as legitimate state power. Decentering crime as punishment's conceptual predicate, wider analysis of the penal state's social-scientific, jurisprudential, and philosophical foundations force us to ask: What is punishment? Why punish? How, and whom, to punish?

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 184 - Shariah and Political Thinking: Law and Politics in Modern Islamic Thought (5)

What defines just political rule in Islam? How do modern Muslim thinkers conceive the role of Islamic normative guidelines (Shariah) in the context of secular modern nation-states? Course surveys how major trends in modern Islamic thought try to answer this question.

Prerequisite: Enrollment is restricted to politics majors during the first and second pass enrollment.

POLI 185 - Political Psychology (5)

Provides a broad introduction to the growing interdisciplinary field of political psychology. Focuses on and critically analyzes classic and contemporary psychological perspectives, primarily through original sources. Draws upon theoretical ideas and experimental results to understand political actors, events, and processes.

Prerequisite: Enrollment is restricted to politics and combined politics and Latin America and Latino studies majors during first and second pass enrollment.

POLI 186 - Global Health Politics (5)

Examines the politics surrounding both global health problems and policy responses. Traces the evolving interrelationships between these problems and policies from colonial health to the impacts of austerity on postcolonial health systems to today's globally targeted responses.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics majors during first and second pass enrollment.

POLI 187 - Decolonial Global Health: A View from the Middle East and Africa (5)

Examines global health from a decolonial perspective. Investigates the health challenges and related policies and programs that have emerged in the wake of colonization, state building, economic dependency, western-centered knowledge production, and postcolonial nationalism. Focused on case studies from Africa and the Middle East, the course decenters western models of healthcare, enabling students to think critically about the diverse contexts and transnational

dynamics that have shaped both global health emergencies and the emergence of global health as a field.

POLI 189 - Pandemics, Politics, and Global and Community Health (5)

Examines the lessons for global and community health that are emerging from our experiences of COVID. These experiences have been characterized by vast variations in exposure and vulnerability as well as wide variations in response and resilience. All these variations teach us much about inequalities in global and community health, but they also highlight new opportunities for addressing injustice and restoring health as a shared human right. By treating the pandemic this way as portal for the re-imagination and remaking of global and community health, the course focuses on moving systematically from evidence about disease, its inequalities, and policy responses to ideas about improving health outcomes both locally and globally.

POLI 189B - Global & Community Health Policy in Practice (5)

Examines how to strengthen health systems by developing and practicing lessons from global health policy studies to compare, contrast, and communicate opportunities for community health worker integration and intervention. The key politics questions running through the course concern whether and how community health work can be integrated with the policies and practices of global health agencies, national health programs, public health administration, and public health systems more generally, including "health in all policies" approaches to local government.

POLI 190A - The Manufacture of Consent (5)

Explores diverse strategies to generate popular consent developed by actors and groups aiming to promote their understanding of the world and acquire political power since the beginning of the 20th century. Traces a genealogy of political communication from the birth of marketing and propaganda to the advent of a public sphere shaped by infotainment and big data. In so doing, it reflects on the impact of increasingly sophisticated forms of political communication and advertising on the public's trust. Course also introduces different notions that serve to explain the current state of public debates in liberal representative regimes (manufacture of consent, cultural hegemony, public sphere, simulacrum, etc.).

POLI 190B - Humanity, Sovereignty, and War (5)

Examines how enmity, the state, and war serve as limits for political conceptions of who we are, tensions between commitments to diversity and to peace, and liberal and humanitarian efforts to address these tensions. Students examine works written prior to the liberal period (Hobbes), in response to it (Hegel and Schmitt) and finally a 20th-century liberal revival

(Rawls), and discuss rights, conscience, political obligation, war, and the state.

Prerequisite: Prerequisite(s): two of the following: POLI 103, POLI 105A, POLI 105B, POLI 105C, POLI 105D, POLI 107, POLI 109, or POLI 115. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190C - Postcolonial Visions of Liberation (5)

How do postcolonial thinkers conceive of freedom and equality in the wake of a colonialism that irreversibly reshaped their modes of life? Course closely reads central works of postcolonial theory to examine how they address this question. (Formerly Humanitarian Action in World Politics.)

Prerequisite: Enrollment is restricted to senior politics and politics/Latin American and Latino studies combined majors.

POLI 190D - Early Anarchist and Socialist Thought (5)

Studies in 19th- and early 20th-century anarchist and socialist thought. Themes covered include property, labor, marriage, and the state. Readings drawn from Bakunin, Goldman, Fourier, Kropotkin, Perkins-Gilman, Proudhon, and Stirner.

Prerequisite: Prerequisite(s): two of the following: POLI 103, POLI 105A, POLI 105B, POLI 105C, POLI 105D, POLI 109, or POLI 115; or by permission of instructor. Enrollment is restricted to senior politics majors.

POLI 190E - Transitions (5)

Explores the role of new media in political protest; whether and how new media technologies such as social networking, text messaging, Twitter, and YouTube have changed the way opposition movements develop.

Prerequisite: Enrollment is restricted to senior politics and Latin America and Latino studies/politics combined majors.

POLI 190F - Topics in Urban Governance (5)

Cities are at the frontlines of complex global issues including climate change, international terrorism, and transnational migration. Course situates cities in the dynamics of world politics, and explores the possibilities and prospects of global urban/global governance in the 21st Century.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190G - Issues in International Law (5)

Explores theory and reality of international law; how it determines or governs or modifies policies of government. Emphasis on contemporary political and economic forces and international law in nuclear age,

competing areas for new law, law of seas, human rights, new international economic issues, the environment.

Prerequisite: Enrollment is restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors.

POLI 190H - The Substance of Democracy (5)

What is democracy? How can we identify it? How do we understand and identify political participation? What are the factors behind it? What role does protest have in democratic politics? These and similar questions are addressed in this course that focuses on topics of democratic politics in the United States and abroad.

Prerequisite: Enrollment is restricted to senior politics and combined politics/Latin American and Latino studies majors.

POLI 190J - Politics and Inequality (5)

Considers causes and consequences of inequality in modern societies. Emphasizes empirical analysis of contemporary forms of class, racial, and gender inequality and examination of normative theories of distributive justice. Major restrictions lifted during open enrollment.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190L - Poverty Politics (5)

Examines theoretical, historical, and contemporary sources of poverty policies in the United States. Explores competing theories of the causes of poverty and the consequences of social provision. Focuses on successive historical reform efforts and contemporary dilemmas of race and urban poverty, gender and family poverty, work, and the politics of welfare reform.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190M - Politics in American States (5)

State governments affect the lives of Americans every day. This course examines an array of issues pertaining to state politics, such as the foundations of American federalism, institutional organization, elections, political parties, direct democracy, and policy-making.

Prerequisite: Prerequisite(s): One of the following: POLI 20, POLI 21, POLI 120A, POLI 120B, POLI 120C, POLI 122, POLI 124, POLI 127, POLI 128, or POLI 132; or by permission of instructor. Enrollment is restricted to senior politics and combined politics/Latin America and Latino studies majors.

POLI 190N - Problems and Solutions in U.S. Politics (5)

Examines problems and potential solutions to issues in U.S. politics, such as presidential power, partisan polarization, money in elections, foreign and security

policy, civil rights and liberties, and taxation and spending.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190O - Constitutional Meanings and Movements (5)

Explores how civic groups and social movements have confronted and shaped constitutional rights, equality, and power. Examines a range of U.S. movements from the 18th Century to the 21st Century-era of Marriage Equality, Tea Party, and Dreamer movements. (Formerly Constitutional Meanings and Movements: Exploring the Ideas, Laws, and Politics in Social Change.)

POLI 190P - Race: History of a Concept (5)

Examines how we came, by the late 19th century, to classify humanity into racial categories. In an effort to trace emergence of this very modern phenomenon, explores historical shifts that informed Europe's representation of cultural difference from the writings of ancient Greeks to the social Darwinism of 19th-century Britain.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190Q - Theorizing Modernity (5)

Introduces central categories and material implications that underwrite discourses on modernity since the late 18th century. Students read across the disciplines in fields such as political theory, postcolonialism, history, science studies, anthropology, and feminist criticism.

Prerequisite: Prerequisite(s): any two of the following courses: POLI 105A, POLI 105B, POLI 105C, POLI 105D. Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 190R - Comparative Law and Society (5)

Interdisciplinary investigation into functions of law across political, historical, and cultural contexts. Examines the international and comparative turn in public law scholarship and the role of law-based strategies in state building. Reviews literature in law, political science and legal anthropology.

Prerequisite: Prerequisite(s): POLI 160B. Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190T - Governance and Conflict in East Asia (5)

Students read recent books on East Asian countries that engage the long-standing themes of state power and societal resistance.

Prerequisite: Prerequisite(s): POLI 141 or POLI 161 or POLI 109, or by permission of instructor. Enrollment is restricted to senior politics majors.

POLI 190V - States in the Global South (5)

Focuses on the causes and consequences of state capacity in the global south, asking why states are much stronger in some countries than others and how their relative strength affects important substantive outcomes, including democracy, development, and security. (Formerly Problems in Latin American Politics.)

Prerequisite: Enrollment is restricted to juniors and seniors politics majors.

POLI 190W - Topics in Latin American Politics (5)

Examines how Latin American governments function and what major challenges countries in the region are facing. Focuses on democracy, economic development, gender and indigenous politics, social policies, poverty, and inequality.

Prerequisite: Enrollment is restricted to senior politics majors.

POLI 190X - American Empire (5)

Examines the U.S. as a political empire, an imperial project, rather than—or in addition to being—a constitutional republic. Analyzes selected episodes in national and global expansion from the founding to the present, with an emphasis on the politics of empire and its relationship to American democracy and constitutionalism.

POLI 190Z - International Security (5)

Examination of selected issues, controversies, and theories relevant to security between and among nations. Topics vary, but may include: war, peace, nuclear proliferation, arms control, military and foreign policies, alternative conceptions of security.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors .

POLI 193 - Field Study in Politics (5)

Individual studies undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency.

POLI 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency.

POLI 194F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor.

Various topics to be announced before each quarter. Students submit petition to sponsoring agency.

POLI 195A - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 195B - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 195C - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 198 - Independent Field Study (5)

Individual studies undertaken off-campus for which faculty supervision is not in person (e.g. supervision is by correspondence). Students submit petition to sponsoring agency.

POLI 198F - Independent Field Study (2)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

POLI 199 - Tutorial (5)

A student normally approaches a member of the staff and proposes to take a POLI 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency.

POLI 199F - Tutorial (2)

A student normally approaches a member of the faculty and proposes to take a POLI 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency.

Graduate

POLI 200A - Political and Social Thought Core Seminar (5)

Draws on history of political thought, contemporary social and critical theory, and the contributions of legal and institutional analysis of various kinds to engage in critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong; to transform our understanding of these practices; to see their contingent conditions; and to

articulate possibilities of governing ourselves differently.

Prerequisite: Enrollment is restricted to graduate students.

POLI 200B - Social Forces and Political Change Core Seminar (5)

Concerns transformation of social forces into political ones. Focuses on formation, articulation, mobilization, and organization of political interests and identities, their mutual interaction, and their effects on state structures and practices and vice versa. Major themes are 1) social bases of political action: class, gender, race, and other determinants of social division and political identity and 2) relevant forms of political agency and action, including development of political consciousness and representation of interests and identities in the public sphere.

Prerequisite: Enrollment is restricted to graduate students.

POLI 200C - States and Political Institutions Core Seminar (5)

Introduces study of political institutions as instruments of collective decision making and action. Explores alternative theoretical approaches to development of political institutions, state and political economy, and security dilemmas.

Prerequisite: Enrollment is restricted to graduate students.

POLI 200D - Political Economy Core Seminar (5)

Introduction to the theories and methodologies of political economy. Focuses on the relationship between states and markets and considers the politics of economic choices and institutions germane to both national and global political institutions. Addresses origins and development of markets and capitalism; historical evolution of states and their economies; relationship between labor, capital, production, and consumption; regulation of production; macroeconomics and management of economies; and issues of national and global social welfare.

Prerequisite: Enrollment is restricted to graduate students.

POLI 201 - Logics of Inquiry (5)

Investigates approaches to study of politics and to enterprise of social science in general. Works from positivist, interpretive, historical, and critical approaches provide examples held up to critical and epistemological reflection.

Prerequisite: Enrollment is restricted to graduate students.

POLI 202 - Fundamentals of Political Research (5)

Gives students practical tools to transform research questions into viable and well-crafted research designs. Introduces conceptual development, various forms of data, and rules for case selection. The goal is to train students in a range of specific methods, including interviewing, ethnography, and archival work.

Prerequisite: Enrollment is restricted to graduate students.

POLI 203 - Making of the Modern (5)

Introduces, at the graduate level, some of the central conceptual categories and material implications that underwrite the world of the modern. Explores concepts including the individual, historicism, contract, and objectivity.

Prerequisite: Enrollment is restricted to graduate students.

POLI 204 - Bodies in History (5)

The human body has been productive of a wide range of varied and competing discourses. Among the themes covered are sexuality, hygiene, the grotesque, and criminality.

Prerequisite: Enrollment is restricted to graduate students.

POLI 205 - Critical Perspectives on Classical Political Economy (5)

Explores seminal works in classical political economy, particularly its consolidation at the moment that industrial society emerged from commercial society, as demonstrated in the writings of Bernard Mandeville, Adam Smith, and Thomas Malthus.

Prerequisite: Enrollment is restricted to graduate students.

POLI 206 - Power and Pleasure (5)

Graduate seminar exploring connections between the body politic and human bodies, particularly as they relate to the sensory dimension of political and personal experience. The myriad ways these connections have been drawn, from antiquity to the present, belie the aspiration of philosophy to organize political life around reason. These connections also offer us ways in to consider the materiality of social life, and commercial life in particular, generating perspectives on capitalism and late modernity. Engagements with these materials also provide opportunities to explore the relationship between sensual materialism and affect theory.

Prerequisite: Enrollment is restricted to graduate students.

POLI 207 - Political Economies of Affect (5)

Explores the potential in philosophical precursors to recent affect theory, alongside classical political economy and its critics, to develop an alternative epistemology for political economy. Readings include: Aristotle, Spinoza, Deleuze, Hume, Negri, Hardt, Smith, Bergson, and Marx.

Prerequisite: Enrollment is restricted to graduate students.

POLI 208 - Race (5)

Considers the subject of race and racism from a political and historical perspective appealing to literatures from history, anthropology, science, and literary studies.

Prerequisite: Enrollment is restricted to graduate students.

POLI 209 - Radical Political Thought (5)

Focuses on early 19th- through early 20th-century socialist and anarchist thought, excluding Marx. Theorists studied include Saint-Simon, Fourier, Proudhon, Stirner, Bakunin, Kropotkin, Perkins Gilman, and Goldman. Some secondary literature and related contemporary theory is also treated.

Prerequisite: Enrollment is restricted to graduate students.

POLI 210 - Problems of Democracy in Comparative Perspective (5)

Democracy is an essential political concept, and a fundamentally contested one. Since the 1980s, scholars of comparative politics have attempted to explain why and when countries transition from authoritarianism to democratic institutions. However, regime change at the national level only sets the stage, leaving deeper questions about what democracy means in practice--how it plays out (or is undermined) throughout the state and at subnational levels; whom it includes and excludes; what options it opens; and what possibilities it forecloses. Such questions relate debates about the potential and the limitations of democracy in general.

Prerequisite: Enrollment is restricted to graduate students.

POLI 211 - Making and Unmaking Sovereignty (5)

Focuses on questions of sovereignty. Of what does sovereignty consist? How is it secured, proclaimed, and perpetuated? How is it insecure, contingent, and subject to contestation? How is the idea of individual sovereignty related to the idea of the sovereignty of the state? Our aim is less to answer these questions definitively than to explore them and understand how theorists (historical and contemporary) have explored them, and how different historical episodes illuminate them.

Prerequisite: Enrollment is restricted to graduate students.

POLI 213 - Who Governs the Globe? Exploring Agency and Authority in Contemporary World Politics (5)

Addresses the role of non- and sub-state actors in global governance. Explores the concept of agency in world politics, and the conditions under which these actors acquire global agency in contemporary world politics. Introduces various theoretical perspectives with which to identify and evaluate agency, with a focus on alternative sources of authority, identity, and power.

Prerequisite: Enrollment is restricted to graduate students.

POLI 214 - Thinking Green: Politics, Ethics, Political Economy (5)

Green political thought, philosophy, debates, and practices; history of ecological thought and comparative study of competing ideas and proposals. Critical examination of neo-liberal environmentalism.

Prerequisite: Enrollment is restricted to graduate students.

POLI 218 - Law and/Vs. Justice: The Rule of Law and Problems of (In)Justice (5)

Explores major debates on the role and rule of law in society, with attention to efforts to use law to seek justice or respond to injustice. This includes engaging in three overlapping sets of conversations: What is law—its sources and functions—and how, where, and on whom does it operate? What is the "rule of law"—what is it for and whom does/can it serve and how? What are different ways that people and groups grapple with or respond to the role of law in injustice—including "the Nazi problem," "the slavery problem," the colonialism/imperialism problem, the Jim Crow/apartheid problem, etc—and what are the possibilities, challenges, and limits? Theoretical perspectives on the sources/origins and role of law in society will be considered as well as case studies and concrete examples that show how this tool is applied to particular challenges.

Prerequisite: Enrollment is restricted to graduate students.

POLI 222 - Conflict and Change in American Politics and Policy (5)

Explores the dynamic and contested interaction between politics and policy in the U.S. context, through examining the historical development of key contemporary policy debates and political conflicts. Introduces recent scholarship, drawing on history, sociology, and political economy that has challenged traditional behaviorist approaches to understanding American politics and policy development.

Prerequisite: Enrollment is restricted to graduate students.

POLI 223 - Topics in American Political Development (5)

Explores several important topics that have emerged from the renewed interest in political development, and are visible within its scholarship in American Political Development; for example, state-building, institutional change, representation, culture, participation, political identity, and economic and social transformations.

Prerequisite: Enrollment is restricted to graduate students.

POLI 232 - United States Political History (5)

Covers several important themes and sets of readings from the literature on American political development. Topics include the origins and development of American political institutions, the evolution of democratic mechanisms, the rise and fall of social movements, and debates about the sources of policy regimes and political change, including the role of war.

Prerequisite: Enrollment is restricted to graduate students.

POLI 241 - Foundations and Frontiers in Comparative Politics (5)

Overview of the major theoretical approaches to the study of comparative politics. This includes diverse literatures such as institutions and political economy, authoritarianism and democracy, and civil society and social movements. Case material is drawn from Latin America, Africa, Europe, North America, Asia and the Pacific.

Prerequisite: Enrollment is restricted to graduate students.

POLI 243 - Comparative Methods (5)

Introduces the comparative method in social science. Trains students in the use of this method by examining how scholars have used it to compare across national governments, subnational units, public policies, organizations, social movements, and transnational collective action.

Prerequisite: Enrollment is restricted to graduate students.

POLI 245 - Latin American Politics (5)

Surveys the Latin American political literature by studying: 1) critical moments in political development (e.g., state formation, democratization); 2) important political institutions (e.g., presidentialism, party, and electoral systems); and 3) influential political actors (e.g., unions, business associations, social movements).

Prerequisite: Enrollment is restricted to graduate students.

POLI 247 - Comparative Urban Politics (5)

Focuses on local government structures and the relationships with other levels of government. Examines institutions and administration; urban political economy (fiscal strain, poverty, inequality, and the efforts to attract economic investment); political machines; race and ethnicity.

Prerequisite: Enrollment is restricted to graduate students.

POLI 249 - Politics of Protest (5)

Explores topics related to protest and political participation from theoretical and empirical perspectives.

Prerequisite: Enrollment is restricted to graduate students.

POLI 255 - Comparative Anti-Colonialisms (5)

Political thought of anti-colonial movements in comparative, historical perspective, including 18th- to 20th-Century European colonies of America and Asia. Focuses both on the contemporary political thought of these movements as well as on historiographical approaches of secondary literature.

Prerequisite: Enrollment is restricted to graduate students.

POLI 257 - Women Interpret Islam (5)

Examines how prominent female Muslim thinkers have interpreted the Islamic tradition since the early 20th century. It surveys how thinkers who belonged to different intellectual traditions (liberal, Marxist, Islamist, feminist, etc.) engaged Islamic exegetical, legal, philosophical, theological and mystical traditions to find answers to the questions raised by their historical and sociopolitical contexts. These questions included: What is/are the Islamic understanding(s) of the purpose of individual and collective lives? What does freewill mean in Islam, and what is its relationship to responsibility towards oneself and one's community? Is there an Islamic notion of justice, and how does it relate to the way justice is defined by other intellectual traditions? What are the legitimate ways of exercising social and political authority to establish the Islamic vision(s) of the good life? How is establishing that vision related to the notion of jihad (striving in the path of God)? What implications does that vision, and its concomitant notions of justice and freewill, have on developing an Islamic understanding of the relationship between different genders, classes, and human groups?

Prerequisite: Enrollment is restricted to graduate students.

POLI 261 - Key Issues in Contemporary Chinese Politics (5)

Addresses topics ranging from the core institutions of the party-state to local politics, economic governance,

and state-society interactions in multiple realms. Considers China in its own terms while evaluating the relevance of theoretical concepts from various fields in the social sciences. Aims to identify opportunities for new research projects.

Prerequisite: Enrollment is restricted to graduate students.

POLI 270 - Advanced Topics in Global Environmental Governance: Agency Beyond the State (5)

Explores if, how, and under what conditions agency and power are diffusing away from the state to non-state actors such as, NGOs/civil society, corporations, and international organizations.

Prerequisite: Enrollment is restricted to graduate students.

POLI 271 - Global Politics and Geo-Politics (5)

Explores global politics in relation to geo-political formations that are developing in concert with contemporary crises in capitalist globalization, but which are also shaped by a wide range of intersecting racial, sexual, environmental, national, and neocolonial politics as well.

Prerequisite: Enrollment is restricted to graduate students.

POLI 272 - Critical Interventions in IR Theory and Global Political Economy (5)

Seminar examines selections from the canonical literature in international relations theory and global political economy through a number of critical lenses, including constructivist, feminist, historical materialist, and subaltern approaches.

Prerequisite: Enrollment is restricted to graduate students.

POLI 275 - Contemporary Capitalism (5)

Examines genesis of new institutions within the force of social ties and networks. Studies how social and organizational relationships achieve individual or group goals in political and economic life, and influence institutional design. Considers when and what ties contribute to governance and economic performance, and when informal and formal organizations constitute an obstacle.

Prerequisite: Enrollment is restricted to graduate students.

POLI 291 - Teaching Assistant Seminar (2)

Two-hour weekly seminar required of teaching assistants in which pedagogic and substantive issues will be considered. The experience of performing teaching assistant duties constitutes subject matter for discussion. Students submit petition to sponsoring agency.

POLI 292 - Professional Development (2)

Primarily for first- and second-year graduate students. Students learn the norms and expectations of graduate school and a variety of professional roles. Students develop a plan for their graduate career and for establishing a professional network of mentors and peer audiences for their work.

Prerequisite: Enrollment is restricted to graduate students.

POLI 293 - Field Study (5)

Individual study undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency.

POLI 295A - Research Colloquium (2)

Weekly venue for Ph.D. students to present current research, exchange information on sources and resources, discuss and critique epistemologies and methods, and to formulate topics for QE field statements and the dissertation. There are no assigned readings. May be repeated for credit twice.

Prerequisite: Enrollment is restricted to graduate students.

POLI 295B - Advanced Research Seminar (5)

Weekly seminar for Ph.D. students in which to develop and write extended research papers on selected topics, to present current work, to discuss methods, data sources, and fieldwork, and to receive critiques and assessments from fellow students. May be repeated for credit twice.

Prerequisite: Enrollment is restricted to graduate students.

POLI 297A - Indep Study (5)

A student approaches a member of the staff and proposes to take POLI 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 297B - Indep Study (10)

A student approaches a member of the staff and proposes to take POLI 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 297C - Indep Study (15)

A student approaches a member of the staff and proposes to take POLI 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that

includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 299A - Thesis Research (5)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

POLI 299B - Thesis Research (10)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

POLI 299C - Thesis Research (15)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

PORT - PORTUGUESE

Lower-Division

PORT 1 - First-Year Portuguese (5)

Introduces first-year Portuguese language instruction and requires no previous study of Portuguese. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

PORT 2 - First-Year Portuguese (5)

Introduces first-year Portuguese language instruction. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

Prerequisite: Prerequisite(s): PORT 1 or by placement exam.

PORT 3 - First-Year Portuguese (5)

Course completes first-year Portuguese language instruction. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

Prerequisite: Prerequisite(s): PORT 2 or by placement exam.

PORT 65A - Accelerated Intermediate Portuguese (5)

A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other culturally authentic materials.

Prerequisite: Prerequisite(s): PORT 3 or by consent of instructor.

PORT 65B - Accelerated Intermediate Portuguese (5)

Sequential to PORT 65A, completes second-year accelerated instruction. A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other culturally authentic materials.

Prerequisite: Prerequisite(s): PORT 65A, or by consent of instructor.

PORT 80 - Voices from the Portuguese-Speaking World: Portugal, Brazil and Africa (5)

Examines key literary texts and films of the Portuguese-speaking world (Brazil, Portugal, and Africa), and the strategies they use to portray notions of national identity, which were transformed and enriched by transnational contact. Taught in English.

PORT 99 - Tutorial (5)

Students submit petition to sponsoring agency.

PORT 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

PORT 199 - Tutorial (5)

Students submit petition to sponsoring agency.

PORT 199F - Tutorial (2)

Students submit petition to sponsoring agency.

PRTR - PORTER COLLEGE

Lower-Division

PRTR 1 - Academic Literacy and Ethos: Arts of Reading (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Engages Porter's intellectual tradition of investigating the contribution the arts and humanities make to a good life, a just society, and a flourishing world.

Prerequisite: Enrollment is restricted to first-year college members.

PRTR 1A - Introduction to University Life and Learning (1)

PRTR 1A explores opportunities, expectations, and responsibilities in university life. Topics include: academic planning; general education

requirements; majors and minors; campus policy; and preparation for Porter's core course: Re/reading Race. Students gain familiarity with resources for health, well-being, time management, academic success, cultivating just communities, sexual harassment and violence prevention, reflection on UCSC's principles of community, and an introduction to the living and learning tradition of Porter College. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year Porter College students.

PRTR 2 - Reading Films for Truth (5)

Building on the foundational skills, habits of mind, and interpretive proficiencies developed in Academic Literacy and Ethos: Arts of Reading (PRTR 1), students will explore the ways in which feature-length narrative and documentary films have approached the representation of truth.

Prerequisite: Prerequisite(s): PRTR 1 or permission of instructor.

PRTR 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and KRSR 26 or STEV 26.

Prerequisite: Enrollment is restricted to first-year Porter and Kresge College members.

PRTR 35M - The Mockumentary Film (5)

Mockumentaries such as *Waiting for Guffman*, *This is Spinal Tap*, and *Woody Allen's Zelig* grow out of the documentary tradition; but instead of claiming to represent real-world phenomena, they blatantly distort. Ten mockumentaries and their documentary correlates are studied. (Formerly course 80J.)

PRTR 37L - Introduction to Laser Cutting, 3D Printing, and Vacuum Forming (2)

Design functional objects, sculpture, and other digitally inspired forms in a variety of 2D (Illustrator) and 3D applications (Cinema 4D, Ketch UP, or AutoCAD), then produce those models as physical objects with a variety of rapid-prototyping methods including laser cutting, 3D printing, and vacuum forming.

Prerequisite: Enrollment is restricted to college members.

PRTR 41I - Improvisation (5)

Theory and practice of improvisation in the performing arts with an emphasis on acting improvisation techniques. Readings and films develop a theoretical

and historical understanding of spontaneous invention on stage. Students attend area theater improvisational performances.

PRTR 41S - Solo Performance Works in the Theater (2)

Explores solo performance works made for the theater. While all course texts fall within the narrative tradition, some center on performers' lives, others on socio-political issues. Course participants screen video recordings of live performances in class., ultimately creating their own brief solo performances.

Prerequisite: Enrollment is restricted to college members.

PRTR 41W - Playwriting Workshop (2)

Explores different aspects of written drama: scene and character development, plot, dialogue, monologues, soliloquies, stage direction, setting, and structure. Excerpts of late 20th-century plays serve as the basis for class discussion.

Prerequisite: Enrollment is restricted to college members.

PRTR 47K - Korean Music and Culture (2)

Introduction to the farmers band tradition. Theory and practice of drumming are emphasized, resulting in a group performance.

PRTR 47S - Sound Art (2)

Several composers and performers of contemporary art music discuss the processes by which works are conceived in imagination, transcribed in notation, and realized in sound. After a brief introduction to contemporary music aesthetics, students attend a series of related presentations, seminars, and concerts.

Prerequisite: Enrollment is restricted to college members.

PRTR 51A - The Artist's Novel (2)

A cross-cultural survey of the *kunstlerroman*, or artist's novel, from its origins in late 18th-century Germany to contemporary Latin America and the United States, this course explores how this genre understands artistic development and the role of artists in society.

Prerequisite: Enrollment is restricted to college members or by permission of instructor.

PRTR 61 - Seminar in Arts (2)

Theoretical and historical aspects of the arts from one culture or world area are explored through seminar discussion, library research, and film/video presentations.

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61B - Handmade Books (2)

This workshop teaches the history and construction of handmade books as a mode of personal and/or political expression leading to an exhibition of student work.

Prerequisite: Enrollment is restricted to college members or by permission of the instructor.

PRTR 61J - Jewish Personal Narratives on Film (2)

Considers Jewish-American filmmakers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives.

Prerequisite: Enrollment is restricted to college members.

PRTR 61N - Personal Narratives in Theater and Film (2)

Considers filmmakers and monologue performers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives.

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61O - Documenting Oral History (5)

Students learn basic techniques of interview and camera work to document on film oral histories collected from community elders. Students develop their skills in writing, theater, visual art, music, or film to reinterpret oral histories as artwork.

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61Q - Queering the Arts (2)

Exploration of the arts as a way to understand and experience how queerness has been expressed, repressed, denigrated, and celebrated in visual arts, music, film, poetry, and dance.

Prerequisite: Enrollment is restricted to college members.

PRTR 63F - Fractals, Chaos Theory, and the Arts (2)

A consideration of chaos theory and fractal geometry as applied by 20th-century artists in all media. All necessary math and computer skills are covered. Students complete essays or art projects.

Prerequisite: Enrollment is restricted to college members.

PRTR 63W - Ways of Knowing (5)

Creativity in different disciplines is developed via different ways of knowing. Musical, visual, scientific, and spatial literacy demand understanding which is not primarily logocentric. Explores how practitioners of arts and science develop their work and conceptualize its execution.

Prerequisite: Enrollment is restricted to college members.

PRTR 71A - Awakening Compassion: Transforming Our Relationship to Self and the World (2)

Develops the qualities of compassion and kindness toward oneself and others. Combining contemporary scientific research, mindfulness training, and traditional contemplative practices, this course supports students in the cultivation of a more discerning, thoughtful, and compassionate life.

PRTR 90A - Aesthetics and Politics: Spanish Civil War (5)

Addresses questions of aesthetics and politics through a critical and practical examination of some artistic, literary, and broadly cultural developments proper to the political left during the Spanish Revolution and Civil War (1934-1939). Enrollment is restricted to first-year, Challenge Program participants from Stevenson College, Merrill College, Porter College, and Kresge College.

PRTR 90B - Art and Politics After Google (5)

Addresses questions of aesthetics and politics through a critical and practical examination of some artistic, literary, and broadly cultural developments proper to the history of the Internet (1990s to the present).

Prerequisite: Enrollment is restricted to participants in the first-year scholars program.

PRTR 93 - Field Study (5)

Field Study

PRTR 95A - Arts Education in the Community (5)

Organized in small teams, participants engage with students from public elementary classrooms to develop fully-staged group performance projects by end of term. Students are guided by instructor's models of teaching techniques, designed to stimulate the imagination, and by diverse readings.

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 99 - Tutorial (5)

Various topics to be arranged. Students submit petition to sponsoring agency.

PRTR 99F - Tutorial (2)

Various topics to be arranged. Students submit petition to sponsoring agency.

Upper-Division**PRTR 131C - Curatorial Practice (2)**

Offers the opportunity to participate in programming interdisciplinary curatorial praxis, arts events,

exhibitions, performances, lectures, and film screenings. Students are exposed to UCSC alumni and faculty members' research through visiting class lectures. Students learn basic protocol for arts programming and critical arts writing, and are required to create their own participatory curatorial project at Porter College.

Prerequisite: Enrollment is restricted to Porter College members.

PRTR 131P - What is Photography? History, Politics, and Critique of Photographic Representation (5)

We live in a world permeated with photographic images, but do we really notice photographs? Do we understand how they work and what they mean? Do we know how to read them? Now that our phones and cameras have merged, we might also say that we live in a world that is forever inviting, imploring us to take photos; we might say we live in a world in which it is almost impossible not to take photos. Are we all photographers now? Do we choose to take photographs or has photography, in a sense, chosen us?

PRTR 135W - Women and the Silent Screen: An Interactive history (5)

Students learn about women's engagement with early movie culture, conduct their own historical research, and collaborate on building a web site that brings this knowledge to a public audience.

Prerequisite: Enrollment is restricted to college members.

PRTR 141C - Shakespeare's Clown Characters (5)

This performance-based course explores Shakespeare's clowns, jesters, and fools (the characters as well as the performers who originated them). Examines the comic traditions from which Shakespeare drew his inspiration, and considers how Shakespeare's work continues to influence contemporary comedy practices. No experience with Shakespeare or performance is necessary.

Prerequisite: Enrollment is restricted to college members.

PRTR 141L - Long Form Improvisation (5)

Focuses on long-form (acting) improvisation, building participants' knowledge and skills through practical and theoretical readings, by viewing relevant performances, and by improvising in class and in small groups outside class. Participants perform in a final public showing.

Prerequisite: PRTR 411 or equivalent college-level experience or coursework.

PRTR 141W - Improvisation Workshop (5)

For practitioners of acting improvisation, this course deepens participants' knowledge and skills through practical and theoretical readings, by viewing

performances, and by improvising in class and in small groups outside class. Participants perform in a final public showing.

Prerequisite: Prerequisite(s): PRTR 411 or equivalent college-level experience or coursework.

PRTR 147O - Opera Workshop/Music Practicum (2)

Rehearsal of the principal vocal parts of an opera in preparation for a full production. Consideration of the dramatic aspects of each role and the interrelationships of the characters.

PRTR 147P - Advanced Music Practicum (2)

The practice of music in a particular area of the world at an advanced level. Students learn the music of one world area or culture over the quarter and study the associated cultural background. Enrollment limited.

PRTR 151A - Yaa Gyasi and Contemporary African Diasporic Literature (5)

Ghanaian American novelist Yaa Gyasi, a major emerging figure in U.S. literature, is read alongside African American writers such as Toni Morrison and African Diasporic writers including Chimamanda Ngozi Adichie and Teju Cole to consider her work as a bridge between African American and African Diasporic literary traditions.

PRTR 151F - Writing the Future: Science Fiction (5)

Investigates how science fiction's utopic and/or dystopic projections give insights about equality, democracy, justice, and difference at the same time they register contemporary anxieties about community, kinship, war, viruses, genetic engineering, robotics, surveillance, and environmental degradation.

PRTR 151N - Tommy Orange and the New Native Renaissance (5)

Major figures in the New Native Renaissance (Tommy Orange, Terese Mailhot, and Billy-Ray Belcourt) are read to discover the contours of this new movement of indigenous literature. Course explores a wide range of new Native genres (memoir, poetry, short stories, and novels), but the central text is Tommy Orange's "There There," which critics have hailed as a central text in the revival of Native American letters.

PRTR 151P - Building the Poem: Process, Form, and the Embodied Text (5)

Investigates form as it guides poetic utterance. Students complete texts to fit forms including broadsides, pamphlets, and books. Composition is guided by production methods, from holographic texts to letterpress and digital composition.

Prerequisite: Enrollment is restricted to college members.

PRTR 151S - Introduction to Shakespeare (5)

Introduces Shakespeare's works, focusing on representative examples drawn from the range of genres in which he wrote; poetry, comedy, history, tragedy, and tragicomedy.

PRTR 161B - Handmade Books (5)

Teaches the construction and history of handmade books as artistic expression. Coursework covers a variety of structures, the analysis of book content, and the integration of design and concept. Covers the generation of content; explorations in typography; and folded, glued, and stitched structures.

PRTR 170A - Animal People: Vegans, Ethics, and Pop Culture (5)

Examines perceptions of vegans, critically questioning an array of negative stereotypes commonly associated with vegans and veganism. Also examines problems in mainstream veganism, such as white privilege, single-issue optics, consumerism, and perfectionism. Considers stigmas used to negate urgent planetary issues, such as animal ethics and animal exploitation, the impact of factory farming and animal agriculture on global climate change, and environmental racism and food apartheid. Students learn principles and practices of non-violent communication, build a theoretical vocabulary, develop their ability to understand and assess arguments, deepen their analytical skills and critical thinking abilities, and enhance their interpretative skills through writing assignments.

PRTR 171N - Nature in Indigenous American Culture (5)

Explores indigenous American relationships with other-than-human nature. Studies prehistoric through contemporary beliefs and practices. Emphasis on North America but may also include attention to Central or South American cultures' relationships with nature. Features films, writings, and artwork by indigenous American people.

Prerequisite: Prerequisite(s): Entry level writing and composition requirements.

PRTR 175A - Imagination (5)

Examines contemporary perspectives on the theme of imagination. Course readings include philosophical treatments of imagination, Indigenous imaginative cultural formations, and Black radical imaginations for socio-spatial liberation. Addresses the following questions: To what extent is imagination tied to our particular position, culture, and time period? What are some ways to expand our imaginations and when are these approaches limited? And how can imagination help us advance radical social change? Explores imagination as an inherently cross-cultural topic and teaches students to present, analyze, and critically discuss philosophical and sociological arguments about imagination. Students cannot receive credit for this

course and PHIL 136B, STEV 136/PHIL 136C, or COWL 175A/PHIL 136A.

PRTR 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.)

PRTR 193 - Field Study (5)

Field Study

PRTR 193J - The Literary Journal: Process to Product (5)

Provides a combination of theoretical background and hands-on experience in literary magazine editing and publishing. Students collaborate to produce a special Santa Cruz issue of Stone Soup, the for kids, by kids journal founded at Porter College. Enrollment is by permission of the instructor. Enrollment is restricted to sophomore, junior, and senior Porter college members majoring in art; art and design: games and playable media; art history; the history of art and visual culture; literature; or film and digital media.

PRTR 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty instructor.

PRTR 198 - Ind Field Study (5)

Ind Field Study

PRTR 199 - Tutorial (5)

Tutorial

PRTR 199F - Tutorial (2)

Individual projects carried out under the supervision of a Porter faculty member. Students submit petition to sponsoring agency.

PSYC - PSYCHOLOGY

Lower-Division

PSYC 1 - Introduction to Psychology (5)

Introduces prospective majors to the scientific study of behavior and mental processes and also provides an overview for non-majors. Emphasizes social, cognitive, developmental, and personality psychology and their interrelations.

PSYC 2 - Introduction to Psychological Statistics (5)

An introduction to elementary statistical principles and techniques relevant to psychological research. Topics covered include basic parametric and nonparametric statistics, analysis of variance, and simple factorial designs. This course is prerequisite to PSYC 181.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20; and AM 3 or AM 6 or MATH 3 or MATH 4 or MATH 11A

or satisfactory placement score on math placement exam or CEEB Advanced Placement Calculus AB exam.

PSYC 10 - Introduction to Developmental Psychology (5)

Addresses psychological development from conception through adolescence. Provides an overview of developmental psychology.

Prerequisite: Prerequisite(s): PSYC 1; and AM 3, or AM 6, or MATH 3 or a higher level Mathematics course (MATH 4, MATH 11A, or MATH 19A), or mathematics placement (MP) score of 300 or higher, or AP Calculus AB exam score of 3 or higher; and PSYC 2 or STAT 5 or STAT 7 and STAT 7L.

PSYC 20 - Cognition: Fundamental Theories (5)

Introduces basic concepts in cognitive psychology with a focus on theoretical explanations of cognitive functioning. Topics include perception, attention, memory, concepts, language, visual cognition, executive functions, and reasoning processes. (Formerly course 20A.)

PSYC 40 - Introduction to Social Psychology (5)

An analysis of contemporary research in social psychology and of what that research can teach us about the world we live in. Problems of conformity, propaganda, prejudice, attraction, and aggression. Focuses on a person's relationship with other people, how he or she influences them and is influenced by them.

PSYC 60 - Introduction to Personality Psychology (5)

An overview of major personality theories from Freud to the modern day, and an introduction to contemporary research on personality development and assessment.

Prerequisite: Prerequisite(s): PSYC 1.

Upper-Division

PSYC 100 - Research Methods in Psychology (7)

An introduction to research methods used to investigate human psychology. Course emphasizes critical thinking, designing and conducting research, analyzing and interpreting data, and writing a professional research report.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; AM 3 or AM 6, or MATH 3 or higher level Mathematics course (MATH 4, MATH 11A, or AM 11A/ECON 11A), or mathematics placement (MP) score of 300 or higher, or AP Calculus AB exam score of 3 or higher; and PSYC 2, or STAT 5, or STAT 7 and STAT 7L.

PSYC 101 - Topics in Developmental Psychology (5)

These topics, offered at different times by different instructors, examine selected topics in developmental psychology.

PSYC 102 - Adolescent Development: Adolescence into Young Adulthood (5)

Focuses on individual and relational development from early adolescence into emerging adulthood. Emphasis on the mutual influences of family relationships and adolescent development, and on the interface of family, peer group, and school experience in cultural contexts.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 103 - Adult Development and Aging (5)

Overview of the cultural, societal, biological, interpersonal, and cognitive processes of adult development and aging. Class discusses how each of these contexts and processes promotes stability and change as adults experience adulthood, reflect on their lives, and prepare for death.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 104 - Development in Infancy (5)

Focuses on psychological development in infancy. Presents research on perceptual, cognitive, and social-emotional development during the first two years of life.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 105 - Children's Thinking (5)

Cognition in children from infancy through adolescence. Basic and current research on children's understanding of the social and physical world. Focus on major theoretical perspectives: especially Piaget's constructivist approach and sociocultural approach.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 106 - Social and Emotional Development (5)

An examination of contemporary theory and research on social and emotional development from infancy through childhood.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 107 - Gender and Development (5)

Examines the developmental psychology of gender in childhood and adolescence.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. Enrollment is restricted to psychology majors.

PSYC 108 - Educational Psychology (5)

An overview of psychological theories and principles applied to formal and informal educational settings. Topics include: learning, motivation, cultural diversity, individual differences, and assessment. Students complete a research project.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 112 - Moral Development (5)

How and why do children develop into moral beings? This course covers key theories and empirical research about the cognitive, emotional, and behavioral aspects of moral development, including psychoanalytic, behaviorist, constructivist, nativist, and evolutionary approaches.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 114 - Human Development as a Cultural Process (5)

Examines interdisciplinary theory, research, and methods of studying the cultural basis of human development, and variations and similarities in human lives and practices in the United States and worldwide cultural communities.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 115 - Lifespan Developmental Psychopathology (5)

Examines theory and research on developmental psychopathology. Emphasizes the origin and longitudinal course of disordered behavior. Explores the processes underlying continuity and change in patterns of adaptation and age-related changes in manifestations of disorders.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 116 - Communication Technologies, Culture, and Human Development (5)

What is the role of Information Communication Technologies (ICTs) in human development and sociocultural change? Offers insights into how human cultures are changing with the proliferation of ICTs by examining how ICTs are incorporated into cognitive, social, and identity development in late childhood through adulthood.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118A - Children and War (5)

Examines the development and behavioral ecology of children affected by war. Discusses refugee children, displaced children, abandoned children, orphaned children, children living in protracted conflict, and child soldiers. Reviews child protection strategies and psychosocial intervention for war-affected children.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118B - Children in Extreme Circumstances (5)

Reviews child survival in life-threatening contexts. Examines the lives of street children, institutionalized children, orphans, children in extreme poverty, enslaved children, war-affected children, abandoned children, and children whose parents have HIV/AIDS and other life-threatening illnesses.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118C - Theory of Mind (5)

Reviews recent research on how children come to understand the human mind, such as desire, belief, goals, and intention. Also discusses the implications of this research on typically and atypically developing children.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. Enrollment is restricted to psychology majors.

PSYC 119A - Development as a Sociocultural Process (5)

Examines theory and research in sociocultural approaches to how people (especially children) learn and develop through participating in activities of their communities with other people. Emphasizes the organization of social interactions and learning opportunities, especially in communities in the Americas where schooling has not historically been prevalent. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing, Composition requirements; PSYC 100, or ANTH 1 or ANTH 2, or EDUC 92A, or EDUC 92B, or EDUC 92C, or LALS 1, or SOCY 1. Enrollment is restricted to seniors or by permission.

PSYC 119D - Cultural Perspectives on Adolescent Development (5)

Examines cultural influences on adolescence from diverse cultural, ethnic, and socioeconomic communities from the perspective of current interdisciplinary theories and research. Topics include: identity development; changes from early adolescence to adulthood; links among family, school, peer, and community experiences; programs for youth; and implications of bridging research, social policy, and community practice. Includes research practicum. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors or permission of instructor.

PSYC 119E - The World of Babies (5)

Focuses on how infants learn about intuitive physics, naive psychology, and shared culture. Also discusses how cultural communities shape infants' learning.

Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119F - Language Development (5)

An introduction to language development in young children. Explores current theory and research in language development; and focuses on the preschool years. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements, PSYC 10 and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119H - Children, Research, and Policy (5)

Explores ways that research in developmental psychology can be used to address real-world problems facing children. With an analytical focus on evidence and generalizability, we will investigate research-policy connections in topics of popular interest (e.g., child custody, poverty). Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement (Formerly Developmental Psychology Research and Real World Problems)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 119I - Special Topics in Narrative Development (5)

Examines a special topic of current interest in developmental psychology centering on the features of self-identity that develop in the context of telling stories of individual and/or shared experiences, such as self-defining memories or family stories. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC 100; Enrollment is restricted to senior psychology majors. PSYC 60 recommended.

PSYC 119K - Emotional Development (5)

Covers classic and contemporary work on the nature and development of human emotions. Both theoretical perspectives and empirical research are discussed. Major topics include: emotion-cognition interplay, the measurement of emotion, universality and cultural variability, and emotional communication. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119L - The Development and Psychology of Cheating and Dishonesty (5)

Cheating and dishonesty occur in most human activities: academic assignments, sports, and politics. Most people have cheated or acted dishonestly at some point, even if they are honest most of the time. Why do humans sometimes decide to cheat or be dishonest? And how do we develop this tendency? This class covers developmental, cognitive, and social psychological perspectives on cheating, dishonesty, and integrity. Course covers classic research from the past century, as well as contemporary work and real-life cases. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119M - Identity Development in Social and Cultural Contexts (5)

Senior seminar that focuses on identity development in adolescence and young adulthood. Discusses theory and research on the development of personal and social identities and the sociocultural contexts in which these personal and social identities are negotiated. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100; PSYC 102 strongly recommended. Enrollment is restricted to senior psychology majors or by permission of instructor.

PSYC 119P - Children and Technology (5)

Covers current research and theory related to children and technology. Topics include: how children learn to use new technologies; how technology use impacts children's thinking; computer gaming and aggression; and how children's social relationships are influenced by technology. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 1, PSYC 10 and PSYC 100; and satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119Q - Perspectives on Autism (5)

Explores multiple perspectives on autism, highlighting those of autistic scholars, disability studies scholars, and philosophers. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10, PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119R - How to Combat Social Bias in Children (5)

Engages students in current theories and research in developmental psychology that aim to better understand and ultimately eradicate social bias starting in early childhood. Course starts with foundational theories and methods in studying children's social biases and then considers different approaches to address social bias in children. Also educates students to critically assess research and to creatively think about new solutions to combat social bias in our society. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119S - The Developmental Psychology of Love (5)

Drawing upon key theoretical and empirical findings from across psychology's subfields, this course explores how the experience and expression of love evolves across the life course and how the unique contributions of both partners to relationship dynamics contour relationship trajectories. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100; satisfaction of entry-level writing and composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119T - Media Contexts of Adolescent and Young Adult Development (5)

Focuses on the role of media in adolescents' and young adults' identity development, friendships, and peer relationships. Topics include: globalization; physical/body image; friendships and peer acceptance; and educational and career goals. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, PSYC 10 and PSYC 100. PSYC 102 is recommended. Enrollment is restricted to senior psychology majors.

PSYC 120 - Visual and Spatial Cognition (5)

Focuses on high-level perception and visual, spatial, and other sensorimotor representations as elements of human cognition. Topics include imagery, visual attention, mental models, spatial language, the body schema, near-body space, and brain organization for representing space.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to cognitive science and psychology majors.

PSYC 120D - Deafness and Sign Language (5)

Explores what we can learn about human cognition by studying sensory loss and language in a different sensory modality. Topics include brain organization, sensory compensation, working memory, visual cognition, and psycholinguistics.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20 or PSYC 20A, and PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 121 - Perception (5)

Introduces the study of human perception. Topics include: the structure and function of the human eye and early visual cortex, perception of motion, color, and objects; recognition of faces; and audition, sensory integration, and synesthesia.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 20. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 122 - The Science of Learning (5)

Academic success often entails managing and mastering multiple courses covering a variety of topics, each with their own unique requirements. However, what study methods are effective versus ineffective, and why? For example, is learning based on the amount of time a student spends studying? Is highlighting an effective method of learning? Is it better to study by reviewing notes or testing oneself? How will you know if a study tip you read on the internet will really help you learn? Course poses questions about studying and discuss the answers that have been uncovered through scientific research on human memory.

Prerequisite: Prerequisite(s): PSYC 20 or PSYC 122; and PSYC 100.

PSYC 123 - Cognitive Neuroscience (5)

An examination of the physiological mechanisms of psychological processes, including sensory systems, motor systems, control systems, and memory and learning. Principles of nervous system organization are discussed at each level.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 124 - Psychology of Reading (5)

Focuses on the cognitive processes that underlie reading in adults. Additional topics include different writing systems, learning to read, and reading deficits. Recommended for upper-division students.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 125 - The Psychology of Language (5)

An analysis of human communication as a function of psychological, linguistic, and social factors. Focuses on language comprehension and production, including the processing of sounds, words, syntax, semantics, pragmatics, and dialogue.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 126 - Conversations (5)

Explores how conversations work and how speakers accomplish their goals in an interaction. Topics include conversational structure, turn-taking, politeness, and the functions and use of collateral signals, among others. Collateral signals include pauses in speech, words like um, uh, you know, and like, and processes, such as how words and utterances are produced. (Formerly PSYC 139G.)

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 129 - Human Learning and Memory (5)

Examines basic theories, models, methods, and research findings in human memory. Both traditional and nontraditional topics are covered.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 130 - Deception, Brain, and Behavior (5)

Focuses on behavioral and brain manifestations of deception. Topics include developmental changes that allow us to understand and to use deception, physical implications of lying expressed in the face, voice, posture, and brain activity. Also covers mechanical or behavioral techniques used in deceptive behavior, whether in the form of overt behavior or brain activity.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 20 or any upper-division cognitive course. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 130D - Evolutionary Psychology (5)

Introduction to how evolutionary principles can help us understand origins of the human mind. Covers evolutionary approaches to cognitive, social, and developmental psychology with emphasis on how cognition has been shaped by natural selection.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 133 - Bilingualism from a Cognitive Perspective (5)

Provides in-depth discussion of bilingualism from a cognitive perspective. Psycholinguistic researchers who study bilingualism are interested in questions such as

how to measure bilingualism, how the brain acquires more than one language, how bilinguals organize and manage two (or more) languages in one brain, and the consequences of the bilingual experience on cognition. Students are introduced to current research that investigates these topics as well as current controversies in the literature that are yet unresolved.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 138 - Computer Programming for the Cognitive Sciences (5)

Offers a practical introduction to computer programming for psychology and cognitive science students. Students learn simple and effective techniques for collecting, parsing, and analyzing behavioral data from behavioral experiments. Students create programs to present visual stimuli, collect keyboard responses, and then write response time and accuracy to datafiles on disk. Students then write new programs to extract information from the datafiles, perform statistical analysis, and present summaries of the findings. Students learn to use the Python programming language for cross-platform application development. No previous programming experience is necessary.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20, and PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 138M - Introduction to Matlab Programming for the Cognitive Sciences (5)

Matlab is a powerful and widely used programming language to design stimuli, collect behavioral data, conduct statistical analyses, and visualize results. This course provides students with basic tools to use Matlab in a range of cognitive science applications. The course includes in-class coding, weekly assignments, and a term project in which students write a program to analyze, collect, or visualize a dataset or model a cognitive phenomenon. No previous programming experience is required. Topics include modeling of cognitive and neural processes and principal components analysis.

Prerequisite: Prerequisite(s): PSYC 20 and PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 139B - Consciousness (5)

Provides a psychological study of human consciousness. Aim is to explore the following questions: What is consciousness? Where does consciousness come from? What functions does consciousness have in everyday cognition? How do we best scientifically study consciousness? These issues are examined from the perspective of contemporary research in cognitive science. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology, philosophy, anthropology, linguistics, and cognitive science majors.

PSYC 139D - Modeling Human Performance (5)

Hands-on experience using computational modeling to understand human cognitive-task performance by comparing simulated and human data. Satisfies senior seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, cognitive science, computer science, and computer engineering majors, or by permission of instructor. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; PSYC 100, and at least one of the following: PSYC 121, PSYC 123, PSYC 128, PSYC 129, PSYC 132, PSYC 138; or CSE 5J, CSE 11, CSE 14, CSE 103, CSE 140.

PSYC 139G - Eye-tracking: A Window into Cognition (5)

Examines eye-tracking as a valuable research method to study cognition. Research using this method has established that eye movements are closely linked to ongoing cognitive processes in the human brain. Course covers the use of this technique in research on reading, language comprehension, scene perception, visual search, infant cognition, and other areas of cognitive science. Students read and review journal articles, participate in class discussions, and analyze publicly available eye movement data for a final report due at the end of the quarter. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 20, PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139H - Weird Science (5)

Explores the relationship between science and pseudoscience from a cognitive psychological perspective, including discussion of collection and selection of data, statistical assessment of data, cognitive illusions, memory distortions, reasoning, and decision-making. Also highlights the dissemination of scientific knowledge. Satisfies seminar requirement. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139J - Forgetting (5)

Explores forgetting as an essential and adaptive process in human memory. Topics include: intentional and unintentional forms of forgetting; the (re)constructive nature of memory; and cases of extreme remembering. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139K - Face Recognition (5)

To navigate our social world, we need to extract a wealth of information from faces, including identity, expression, gaze, age, and gender. This seminar reviews current topics in face-recognition research, from cognitive, neuroscience, developmental, social, and computational perspectives. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC 1 or PSYC 20; and PSYC 100. Enrollment is restricted to senior cognitive science, neuroscience, and psychology majors.

PSYC 139L - Illusions (5)

Illusions arise when our perception differs from reality. In this course, students investigate the mechanisms of visual, auditory, and proprioceptive illusions as an approach to understand the capacities and limitations of our perceptual system. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139N - Diversity in Cognitive Psychology (5)

Lists of influential contributors to cognitive psychology insufficiently represent the influence of more diverse, non-traditional scientists. This course profiles the life and work of women and minority scientists who've made well-documented contributions to cognitive psychology, as well as those who've received less recognition. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 1 and PSYC 100, and PSYC 20 or PSYC 105; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior cognitive science or psychology majors.

PSYC 139P - Natural and Artificial Intelligence (5)

Introduces one approach used in artificial intelligence: deep learning. This approach is inspired by the architecture and processing of real neural networks. Students learn about the algorithms developed and their applications in simulating intelligence. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements, and PSYC 20, and PSYC 100, and either PSYC 121 or PSYC 123. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139Q - Analogy and Transfer (5)

Examines the cognitive processes involved in analogical reasoning (understanding one example, object, problem, or event in terms of another better-understood one) and the transfer of knowledge (applying knowledge from one situation to another). Although discussion includes analogical reasoning and transfer in "genius" or exceptionally creative moments, students primarily focus on all the ways in which the same cognitive processes of analogy and transfer support day-to-day learning, thinking, reasoning, and problem-solving. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139R - Social Frames of Memory (5)

Remembering is an activity that we often do with others, and shared representations of the past bind us to one another as couples, families, and nations. Remembering is a fundamentally social process. Topics include extended cognitive systems, conversational remembering, family reminiscence, how social networks shape how and what we remember, cognitive content biases supporting collective convergence, and the psychology of collective memory. This includes social representations of history and their biases, cultural tools for thought, intergenerational transmission, and collective future thought. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. PSYC 129 recommended. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139S - Brain Waves and Cognition (5)

Provides an overview of the study of brain waves and cognition, also known as human electrophysiology (EEG). Explores how this approach can be used to study major topics in cognitive psychology research.

The course prioritizes the development of scientific reasoning and writing skills. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement. Prerequisite(s): PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139T - Memory, Metacognition, and Education (5)

Academic success often entails managing and mastering multiple courses covering a variety of topics, each with their own unique requirements. However, what study methods are effective versus ineffective, and why? For example, is learning based on the amount of time a student spends studying? Is highlighting an effective method of learning? Is it better to study by reviewing notes or testing oneself? How will you know if a study tip you read on the internet will really help you learn? Course poses questions about studying and discusses the answers that have been uncovered through scientific research on human memory. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 140B - African American Psychology (5)

Incorporates historical and conceptual foundations; issues of social psychology; individual and developmental processes; and adjustment and clinical issues. Readings expose students to attributes of African American culture that have an impact on the psychology of African Americans as well as methodological issues relevant to key psychological topics.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140F - Mind, Society, and Culture (5)

Introduces how social, cultural, and historical contexts shape psychological experiences, including self-concept, perception, emotion, health, and behavior. Draws from theories and research in psychology, sociology, and anthropology to highlight cultural variations in national populations (e.g., North Americans, East Asians) and multicultural populations within the United States (e.g., working-class Americans, African Americans, Mexican Americans, Native Americans).

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140G - Women's Lives in Context (5)

Examines gender as a psychological and social factor that influences women's experiences in different contexts. Cuts across other areas of psychology by taking a women-centered approach. Emphasis also placed on understanding how intersections between gender, race and ethnicity, sexual orientation,

socioeconomic status, etc., impact women's psychological well-being.

Prerequisite: Prerequisite(s): PSYC 100, or SOCY 3A. Enrollment is restricted to junior and senior psychology and sociology majors.

PSYC 140H - Sexual Identity and Society (5)

Addresses sexual and gender identity diversity in social, historical, and political context. Highlights current social justice issues and cultural ideologies related to sexual and gender identity diversity. Discusses social and scientific activism for sexual liberation; gay and lesbian identities and communities; sexuality beyond binaries and categories (e.g., bisexuality, pansexuality); asexuality; kink/fetish; transgender identities and sexualities; sexual fluidity and heteroflexibility; and queer sexual ethics and politics.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140L - Women's Bodies and Psychological Well-Being (5)

Examines how women's bodily experiences (e.g., sexual objectification, violence, menarche, sexual health) are uniquely tied to their subordinate status and impacts their psychological well-being. Theories of gender inequality will address how social control directed at women's bodies through power relations embedded in societal institutions contributes to women's marginalized status. Enrollment restricted to junior and senior psychology, sociology, feminist studies, and community studies majors.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC 100, or SOCY 3A, or FMST 100. Enrollment restricted to junior and senior psychology, sociology, feminist studies, and community studies majors.

PSYC 140M - Legitimizing (In)Equality: Attitudes, Beliefs, and Social Policy (5)

Drawing on research in social psychology, political psychology, and critical policy studies, course examines how beliefs legitimize inequality, influence intergroup relations, and inform policy attitudes. Both hierarchy-enhancing and hierarchy-attenuating beliefs are reviewed.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted psychology, community studies, legal studies, politics, and sociology students.

PSYC 140Q - Social Psychology of Gender (5)

Considers individual, interpersonal, and cultural influences on gender similarities and differences in thinking, motivation, and behavior. Emphasizes factors related to power and status inequalities between women and men.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140T - Psychology of Trauma (5)

Overview of psychological theory and research on trauma and traumatic stress, including responses to childhood trauma (especially sexual abuse), combat, and natural disasters. Variety of theoretical frameworks presented, including developmental, cognitive, neuropsychological, clinical, and social/contextual.

Prerequisite: Prerequisite(s): PSYC 100 or permission of instructor.

PSYC 141 - Privacy and Surveillance (5)

Survey of theory and research on privacy and surveillance. Topics include: the functions of privacy; threats to privacy in multiple domains; the psychological impact of surveillance; historical and cultural differences in privacy and surveillance practices; and the relationship between privacy, surveillance, and social justice.

Prerequisite: Prerequisite(s): PSYC 100, or by permission of the instructor.

PSYC 142 - Psychology of Oppression and Liberation (5)

Provides theoretical frameworks for understanding interlocking systems of oppression from the perspective of the oppressed as well as the oppressor nationally and internationally. Goes beyond mainstream (traditional) psychology and emphasizes critical psychological perspectives that include micro- and macro-level theories of oppression; importance of ideology in oppressive systems; and theories of social change and liberation across contexts.

Prerequisite: Prerequisite(s): PSYC 100 or feminist studies, sociology, community studies, or politics majors.

PSYC 144 - Latinx Psychology (5)

Offers an overview of psychological frameworks and interdisciplinary research for understanding Latinx populations, behaviors, identities, and values systems related to their mental health. Examines socio-cultural contexts, best research practices, and culturally responsive strategies for working with Latinx communities.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 145 - Social Influence (5)

An advanced course for upper-division undergraduates interested in the study of the persuasion process. The course investigates common influence tactics and how those tactics are used in various settings.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 145D - Social Psychology of Autocracy and Democracy (5)

Humans are the only animal capable of living in both authoritarian and democratic regimes. Course explores

the nature of these forms of social relationships with a goal of promoting democracy. Topics include: obedience to authority, conformity, self-justification, propaganda, power, and conflict resolution.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 146 - The Social Context (5)

A systematic analysis of the social and contextual determinants of human behavior, with special attention given to concepts of situational control, social comparison, role and attribution theories, as well as the macrodeterminants of behavior: cultural, historical, and sociopolitical context.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 147A - Psychology and Law (5)

Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 40 is highly recommended prior to taking this course. Enrollment is restricted to psychology, pre-psychology, and legal studies majors.

PSYC 147B - Psychology and Law (5)

Continuing discussion of current and future relationships between law and psychology and to contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including crime causation, the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment.

Prerequisite: Prerequisite(s): PSYC 147A.

PSYC 148 - Stereotyping, Prejudice, and Racism (5)

Introduction to and analysis of the social psychology of stereotyping, prejudice, and racism in the United States. Examines how individuals both perpetuate and experience these phenomena, through the lens of race as a system of privilege and disadvantage.

Prerequisite: Prerequisite(s): PSYC 100. Crosslisted as: Enrollment is restricted to declared Critical Race and Ethnic Studies majors and Black Studies minors.

PSYC 149 - Community Psychology: Transforming Communities (5)

Introduces community psychology, a discipline that blends social psychology, sociology, and anthropology. Topics include levels of analysis, ecologies, prevention, intervention, feminisms, empowerment, sense of community, coalition building, and social justice and action.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to juniors and seniors.

PSYC 153 - The Psychology of Poverty and Social Class (5)

Examines how social class shapes attitudes, beliefs, and behaviors. Emphasis is placed on structural barriers and their impact on the well-being of low-income groups. Strategies for reducing classist discrimination, improving interclass relations, and strengthening social policy are discussed.

Prerequisite: Prerequisite(s): PSYC 100, or anthropology, community studies, economics, legal studies, politics, sociology, or feminist studies majors.

PSYC 155 - Social-Community Psychology in Practice (5)

This service-learning course requires time in the classroom and the field. Students gain a deep understanding of social justice paradigms, community-based collaborative research, ethics, field-based research, reflexivity, and socio-cultural development modes. Prerequisite(s): PSYC 3 or PSYC 100; PSYC 149 and PSYC 182 are recommended prior to taking this course. Admission by application and interview only.

PSYC 159A - Sexual Identity (5)

Considers the experience of lesbian, gay, bisexual, and transgender individuals from a psychological perspective. Reviews theory and research on compulsive heterosexuality, heterosexism and homophobia, culture and sexual-identity diversity, issues of history and community of LGBT individuals, and perspectives on sex, gender, and sexuality from queer theory. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159D - Psychology of Sexual Aggression (5)

An overview of psychological theory and research related to sexual aggression, focusing on both perpetration and victimization. Includes a discussion of the social construction of masculinity and femininity, media representations of sexual violence, and alternative (non-aggressive) visions of sexuality. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology or feminist studies majors or permission of instructor.

PSYC 159E - Peace Psychology (5)

Is war inevitable? What is peace? Is it more than the absence of violence? Explore how psychology—the study of human behavior—can help to decrease violence and enhance cooperation at multiple levels including the personal, interpersonal, community, and international arenas. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159H - Community-Based Interventions (5)

Topics include: what makes a successful intervention; what happens before the formal intervention begins; the ethics involved with interventions; different methods for assessing interventions; and different praxis models. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement. A service component is involved.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159I - Psychology of Immigration (5)

Provides an overview of the social and cultural psychological study of immigrants in the United States. Examines the migration/immigration process; immigrants' social identities; schooling of immigrant youth; and impact of policy on the well-being of immigrants. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159J - Social Psychology of Social Justice (5)

Why do some situations seem fair and others unfair? Are all people concerned with justice or are some scoundrels? This course looks at the principles of distributive, procedural, and retributive justice and at real world applications of theories. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159N - Psychology of Mentoring (5)

Looks at the psychological studies of mentoring. Examines empirical studies and connects those to lived experience. Critical inquiry is stressed. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159P - Race, Ethnicity, and Environmental Inequality (5)

Examines racially and ethnically marginalized and dominant conceptions of the environment throughout U.S. history. Also explores events and policies revealing how human behavior shapes and is shaped by environmental inequality, and strategies for achieving environmental justice. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159R - Achievement Disparities: A Social Psychological Perspective (5)

In this interactive seminar, we draw on research and theories in social and cultural psychology to examine persisting disparities in education and achievement for varying social groups (e.g., race/ethnicity, gender, social class) and to identify intervention strategies for reducing these disparities. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159S - Queer Intimacies (5)

Examines the science of relationship diversity through the lens of social psychology. Reviews popular and psychological literature on same-sex relationships, polyamory/consensual non-monogamy, kink/fetish/BDSM relationships, chosen families, asexuality, and transgender intimacy. Concludes with discussion of the impact of queer intimacies on heterosexuality. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159X - Psychology of Social Activism (5)

Covers social-psychological scholarship relevant to social justice activism that receives limited academic attention in conventional psychology. The seminar aims at understanding how knowledge gained in action-oriented research can be applied to social change. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 165 - Systems of Psychotherapy (5)

A review of the major methods of psychotherapy most currently practiced, including ethical standards and dilemmas, and client-therapist-system variables affecting efficacy.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 or PSYC 170 recommended.

PSYC 166 - Personality Assessment (5)

How do we really know a person? Provides experience assessing such individual differences as intimacy motivation, dominance, creativity, and well-being. Students construct their own personality test and learn to evaluate the kinds of self-report, observational, projective, and interview techniques used in organizational and clinical contexts.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 highly recommended as preparation.

PSYC 167 - Clinical Psychology (5)

Serves as an in-depth introduction to the field of clinical psychology. Covers issues of clinical assessment, interviewing, testing, and a range of therapeutic modalities.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 170 is recommended as preparation. Enrollment is restricted to psychology majors.

PSYC 168 - The Study of Dreams (5)

An overview of dream studies by several major theorists and researchers of the 20th century, including Freud, Jung, and Hall. An emphasis on studies that reveal cognitive conceptions and personal concerns through quantitative and qualitative analyses of sets of dreams from individuals and groups. Other topics covered more briefly include dream recall, children and dreams, and the role of dreams within cultures.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 169 - Community Mental Health (CMH) (5)

How can we improve mental health? Examines theory, method, and efficacy research of outreach, prevention, and intervention methods with various mental health populations in community settings (e.g., victims of sexual violence, new immigrants, those with severe mental illness, children in foster care). Presents characteristics of successful CMH agencies and programs and how to develop one's own agency or intervention model.

Prerequisite: Prerequisite(s): PSYC 100. PSYC 60 or PSYC 170 recommended.

PSYC 170 - Psychopathology (5)

Survey of theory, research, and intervention in human psychopathology. Covers psychological, biological, developmental, and socio-cultural approaches. (Formerly offered as Abnormal Psychology.)

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 highly recommended as preparation.

PSYC 171 - Childhood Psychopathology (5)

A critical and intensive exploration of a wide variety of specific disorders within their biological, developmental, and social contexts. Concepts of psychopathology in childhood, major and minor diagnostic systems, and a variety of theories of etiology are explored. General intervention strategies and a wide range of specific psychotherapy systems for treatment are closely examined and demonstrated.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. PSYC 170 strongly recommended.

PSYC 172 - Health Psychology (5)

Course examines the psychological aspects of health, illness and healing. Focuses primarily on etiology, treatment and prevention; specific topics include stress and the immune response, social support, compliance, health beliefs, and the healing relationship. (Formerly course 140C.)

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 175 - Personality, Relationships, and Emotions (5)

Explores the reciprocal development of personalities and emotions/emotion regulation in the context of close relationships.

Prerequisite: Prerequisite(s): PSYC 100. PSYC 10 and PSYC 60 recommended as preparation.

PSYC 178 - Nutritional Psychology (5)

Explores the interactive relationship between nutrition and mental health. Includes a review of the research on the impact of different components of nutrition (e.g., protein, minerals, sugar) on the function of the brain, the nervous system, and the endocrine (hormone) system, and how that translates into changes in mood and cognitive capacity. Also explores the psychological factors that influence food choice and eating behaviors in the context of cultural beliefs and pressures.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 170 is recommended as preparation. Enrollment is restricted to psychology majors.

PSYC 179A - Theories of Moral Psychology (5)

A seminar course with focus on theories of moral development from the psychoanalytic, social learning, cognitive-developmental, and humanistic perspectives. Students confront and discuss moral dilemmas from the four perspectives, working toward their own individual

theories of pro-social behavior. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement. Prerequisite(s): essay required on a moral issue or dilemma relevant to the student's life.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 179D - Psychological Interpretation (5)

Seminar explores analytic, Jungian, and object-relations interpretive systems in-depth, using qualitative research methods on film, music, literature, and art, as well as psychological measures such as TAT, dream, and interview protocols. Interprets psyche of author, audience, and engendering culture. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and PSYC 60 or PSYC 165; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 179E - Psychology of Emotion (5)

Our emotions influence nearly everything we do—from how we perceive the world to how we connect with other people. The scientific study of emotion, or affective science, investigates how emotions shape our lives. What purpose do emotions serve? How do we regulate them? How do they color cognitive processes like memory? Course considers emotions from several levels of analysis, including their evolutionary basis, their associated physiological responses, and the behaviors they motivate. Students gain a scientifically informed understanding of daily emotions and insight into how scientists study them. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior cognitive science and psychology majors.

PSYC 179F - The Path to a Science of Dreaming (5)

Focuses on the methods and empirical findings that led gradually to development of a neurocognitive theory of dreaming between 1953 and 2016. Emphasis is on the difficulties of adapting methods useful in studying waking thought to the study of dreaming, the counterintuitive nature of many of the findings, the importance of replicating new results, and the general lessons about the nature of science that can be drawn from this particular scientific odyssey. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition

requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 179G - Child, Youth, and Family Assistance in the Community (5)

Allows students in psychology field study to conduct senior capstone projects on topics related to their service learning (field study). The seminar is devoted to creating projects related to community systems that address the needs of at-risk child, youth, and families. Students in the seminar should be pre-enrolled in PSYC 193. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 181 - Psychological Data Analysis (5)

Intermediate statistical methods widely used in psychology (e.g., ANOVA, ANCOVA, multiple-comparisons, bivariate correlation, multiple regression, repeated-measures), corresponding SPSS or R programs, and elements of measurement theory.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 182 - Qualitative Research Methods (5)

Designed to equip students with the ability to evaluate, conceive, and carry out psychological research. A variety of techniques (interpretive, phenomenological analysis, grounded theory and narrative inquiry) are examined and experienced. Students carry out research projects.

Prerequisite: Prerequisite: PSYC 100.

PSYC 183 - History and Systems of Psychology (5)

An overview of the history of psychology. Examines issues of paradigm and philosophy of science. Reviews central paradigms in the history of the discipline. Assumes a critical-historical approach, linking scientific knowledge produced to prevailing societal beliefs about mind and behavior.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar (PSYC 42) under faculty supervision. Available only to upper-division or graduate students. Students submit petition to sponsoring agency.

PSYC 193 - Field Study (5)

Series designed to provide advanced psychology undergraduates the opportunity to apply what they have learned in the classroom to direct experience in a community agency. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students'

academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience. A two-quarter commitment. Applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): PSYC 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193A - Developmental Field Study (5)

Work in a community-based setting while completing self-directed academic work focused in the developmental area under the guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): PSYC 3 or PSYC 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193B - Cognitive Field Study (5)

Work in a community-based setting while completing self-directed academic work focused in the cognitive area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): PSYC 3 or PSYC 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193C - Social Field Study (5)

Work in community-based setting while completing self-directed academic work focused in the social area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): PSYC 3 or PSYC 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193D - Clinical/Personality Field Study (5)

Work in community-based setting while completing self-directed academic work focused in clinical or personality area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): PSYC 3 or PSYC 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193I - International Field Study (10)

Designed to provide advanced psychology undergraduates the opportunity to apply what they have learned in the classroom to direct experience in a community agency abroad. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students' academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience.

Applications due two quarters in advance to the Psychology Field Study Office.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to junior and senior psychology and cognitive science majors.

PSYC 194A - Research Internship in Developmental Psychology (5)

Provides students with intensive experience conducting current research in developmental psychology. Students submit petition to sponsoring agency. (Formerly Advanced Developmental Research.)

PSYC 194B - Research Internship in Cognitive Psychology (5)

Provides students with intensive experience conducting current research in cognitive psychology. Students submit petition to sponsoring agency. (Formerly Advanced Cognitive Research.)

PSYC 194C - Research Internship in Social Psychology (5)

Provides students with intensive experience conducting current research in social psychology. Students submit petition to sponsoring agency. (Formerly Advanced Social Research.)

PSYC 194D - Research Internship Clinical Psychology (5)

Provides students with intensive experience conducting current research in clinical psychology. Students submit petition to sponsoring agency.

PSYC 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed

research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 198 - Independent Field Study (5)

Provides psychology majors with the opportunity to apply what has been learned in the classroom to direct experience in a community agency outside the local community. Students earn academic credit by working as interns at a variety of psychological settings, where they are trained and supervised by a professional on site. Faculty also supervise the students' field study, providing guidance and help integrating psychological theories with their hands-on experience. Two-quarter commitment required. Admission requires completion of lower-division psychology major requirements; students submit petition to sponsoring agency. Applications are due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors.

PSYC 199 - Tutorial (5)

Individual directed study for upper-division undergraduates. Students must file a petition with the Psychology Office the quarter in which they would like to take the tutorial. Petitions may be obtained in the Psychology Department Office.

PSYC 199F - Tutorial (2)

Specialized study with individual faculty as psychology peer advisors. May not be applied toward major requirements. Students submit petition to sponsoring agency. Application and interview required during the previous quarter. Enrollment restricted to junior and senior psychology majors.

PSYC 199G - Tutorial (3)

Specialized study with individual faculty. May not be applied toward major requirements. Students submit petition to sponsoring agency.

Graduate

PSYC 201 - Teaching in Psychology (5)

Provides graduate students with practical teaching skills in the areas of developing and stating a general philosophy of teaching, course design, writing a course syllabus, assessment techniques, evaluation procedures, effective teaching strategies, and media use.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 202M - Introduction to Matlab (5)

Introduces the programming language Matlab, focusing on its data analysis, visualization, stimulus presentation, and data-collection tools. Students develop Matlab skills by completing weekly assignments and a term project. No previous programming experience is required.

Prerequisite: Prerequisite(s): PSYC 204 or by permission of the instructor. Enrollment is restricted to psychology graduate students.

PSYC 202R - Introduction to R (5)

Teaches students how to use the statistical programming language and environment R to load, analyze, simulate, and visualize data. Assumes a basic understanding of descriptive and inferential statistics, but no prior experience with programming.

Prerequisite: Enrollment is restricted to psychology graduate students, or by permission of the instructor.

PSYC 204 - Quantitative Data Analysis (5)

Intermediate statistical methods widely used in psychology (e.g., ANOVA, ANCOVA, multiple comparisons, repeated-measures) and corresponding SPSS or R programs.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 205 - Categorical Data Analysis (5)

Application of statistical methods for analyzing binomial and multinomial response variables in survey and experimental designs. Topics include hypothesis testing, confidence intervals, assessing effect size, sample size requirements, and an introduction to logistic regression models. Data analysis applications use SAS, SPSS, and R.

Prerequisite: Prerequisite(s): PSYC 204 or by permission of the instructor. Enrollment is restricted to graduate students.

PSYC 210 - The Experimental Method in Social Psychology (5)

Explores the philosophy and practice of the experimental method in social psychology.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 211A - Proseminar: Social Justice and the Individual (5)

Provides an introduction to social psychology, focusing on various individual-level social justice topics, including the self, social comparison, individual and collective identity, social historical and social structural determinants of behavior and various policy and social change-related issues.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor.

PSYC 211B - Social Justice, Society, and Policy (5)

Provides an introduction to social psychology, focusing on empirical and theoretical developments related to social justice and group and intergroup dynamics. Topics include: prejudice and discrimination, power, collective action, and psychology's relationship to social policy.

Prerequisite: Enrollment is restricted to psychology graduate students. Undergraduates planning graduate work in social psychology may enroll with permission of instructor.

PSYC 211C - Communicating in Social Psychology (3)

Supports first-year social psychology graduate students in completing their first-year projects. Involves discussion of research methods, but the primary emphasis is on writing and presenting the APA-style report. Includes writing exercises as well as practice talks on the presentations that students give in colloquium. Because this is a workshop tailored specifically to each student, over the course of the quarter we will work collaboratively to discuss each others' work, read each others' drafts, and establish a challenging and supportive context for thinking, writing, and presenting. First- and second-year projects required to be reported in two ways: a manuscript approved and signed by the first (adviser) and second readers, and a presentation of the project in the colloquium.

Prerequisite: Enrollment is restricted to social psychology first-year graduate students, or by permission of instructor.

PSYC 213 - Special Topics in Social Psychology (5)

Focuses on particular issues of theoretical and practical importance in social psychology. Topics vary from year to year and often concentrate on issues of social justice, social identity, intergroup relations, and social policy.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 214A - Multivariate Techniques for Psychology

(5)

Introduces multiple regression, analysis of covariance, and random coefficient models. Both methodological and statistical aspects of data analysis are discussed. Practical problems of estimating and testing in general linear models are addressed. Students gain experience in carrying out and interpreting analysis using SPSS and R.

Prerequisite: Prerequisite(s): PSYC 204. Enrollment is restricted to graduate students.

PSYC 214B - Advanced Multivariate Techniques for Psychology (5)

Introduces factor analysis and structural equation modeling (SEM). Develop skills in defining, estimating, testing, and critiquing models. Topics include the rationale of SEM, model identification, goodness of fit, and estimation. Learn how to use relevant software packages (R, SAS, LISREL, EQS, or AMOS) to conduct exploratory and confirmatory factor analyses and latent variable path analyses.

Prerequisite: Prerequisite(s): PSYC 214A.

PSYC 215 - Production and Comprehension of Spontaneous Communication (5)

Seminar on spontaneous communication. Typical topics include discourse markers (including historical origins, cross-linguistic borrowing, second-language learning, children's acquisition), enquoting devices, backchannels, and spontaneous written communication.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 220 - Special Topics in Human Memory (5)

Topics announced when offered. Seminars involve discussion and critical evaluation of current, historical, and interdisciplinary readings relevant to topic. Emphasis on development of research ideas.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 221 - Visual Perception (5)

Seminar to study human perception, its methodology, and driving issues as illustrated by selected research topics (e.g., adaptation to unusual sensory environments). Where possible, parallels with other areas of psychology are drawn.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 222 - Topics in Lexical Organization (5)

The recognition of words is a critical step in natural language processing. Discusses a range of contemporary issues related to the representation of a word and the access of this information from the

perspective of psychology, linguistics, and artificial intelligence.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates who have completed PSYC 124 may enroll with permission of instructor.

PSYC 224A - Proseminar: Cognitive I (5)

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 224B - Proseminar: Cognitive II (5)

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 224C - Proseminar: Cognitive III (5)

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 225A - Introduction to Developmental Research I (3)

Examines the rationale and techniques of research in developmental psychology. Topics include theories and paradigms in developmental psychology; translating theoretical ideas into researchable hypotheses; diversity issues in sampling; and conducting ethical research. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters.

Prerequisite: Enrollment is restricted to psychology graduate students or with instructor's permission.

PSYC 225B - Introduction to Developmental Research II (3)

Examines the rationale and techniques of research in developmental psychology. Topics include selecting appropriate research designs; measurement and statistical approaches for research problems; issues of validity; and communicating research findings. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters.

Prerequisite: Prerequisite(s): PSYC 225A. Enrollment is restricted to psychology graduate students or with instructor's permission.

PSYC 225C - Introduction to Developmental Research

III (5)

Focuses on drawing reasonable conclusions from research findings by working on students' first-year research projects and critiques of existing research.

Prerequisite: Prerequisite(s): PSYC 225A and PSYC 225B. Enrollment is restricted to developmental psychology graduate students or by permission of the instructor.

PSYC 227 - Contemporary Issues in Psychology of Language (5)

Special topics in thought and language are examined from the perspectives of cognitive science. Particular attention given to embodied experience and higher-order cognition.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 230 - Research in Cognitive Psychology Seminar (5)

Colloquium series to study and critique research in cognitive psychology and cognitive science.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 231 - Research in Social Psychology Seminar (5)

Seminar to study, critique, and develop research in social psychology.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 232 - Evolution of Cognition (5)

Explores current research on evolution of human cognition, drawing on findings from other species and from the archaeological record. Topics include language, working memory, episodic memory, numerical abilities, and social cognition.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 235 - Infant Development in Contexts (5)

Seminar on how contextual factors influence the development in infancy, especially on cognitive domains. Discusses at least four types of contextual factors: cultural, experiential, event, and interpersonal contexts.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 242 - Research in Developmental Psychology Seminar (5)

Seminar to study, critique, and develop research in developmental psychology.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 244A - Proseminar I: Cognitive and Language Development (5)

Explores major theories and research in the fields of cognitive development and language development. Begins with classic theorists, such as Piaget and Vygotsky, and proceeds to theories and research on topics of current interest.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 244B - Proseminar II: Social and Personality Development (5)

An examination of contemporary theory and research on social and personality development across the lifespan.

Prerequisite: Enrollment restricted to graduate students.

PSYC 246 - Cultural Diversity in Human Development (5)

Examines cultural influences in development from the perspective of current theories and empirical research in developmental psychology and related fields (including social psychology, anthropology, sociology, history, education, and social policy). Focuses on understanding development in diverse cultural, ethnic, and socioeconomic communities by examining the interplay of social, cultural, institutional, and psychological processes.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 247 - Special Topics in Developmental Psychology (5)

Focuses on particular issues of theoretical importance in developmental psychology. Topics vary from year to year. Particular issues in language, culture, cognitive, social, and personality development may be covered.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 248 - Survey Methods (5)

Practicum to give students hands-on experience with survey methods by conducting their own survey on the topic of their choice. Course requires the survey to be conducted off campus at a local agency or program chosen by student with approval of instructor.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 249 - Field Methodologies and Social Ethnography (5)

Designed to train graduate students in applied field methods. Emphasis is on gaining knowledge and

experience with actual field methods, by conducting social ethnography in the community. Field research in community placements required.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 250 - Prejudice and Social Relations (5)

Examines the ways in which the various branches of psychology have approached the issue of prejudice. Attention paid to the assumptions underlying each approach and their relation to core psychological ideas such as the self and emotion.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 251 - Feminist Theory and Social Psychology (5)

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 252 - Special Topics in Cognitive Psychology (5)

Focuses on particular issues in cognitive psychology. Topics vary from year to year. Particular issues in language, memory, perception, cognitive modeling, cognitive neuroscience, and more are covered.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 253 - Theory and Research in Intergroup Relations (5)

Examines, compares, and contrasts a variety of theories in intergroup relations while examining relevant empirical research. The relevance of both theory and research findings to contemporary social issues is explored.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates considering graduate work in social psychology are encouraged to enroll with permission of instructor.

PSYC 254 - Psychology of Gender (5)

Course reviews recent theory, research, and applications in the psychology of gender. Developmental, social-psychological, cultural, and feminist approaches are emphasized.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 255 - Qualitative Inquiry in Psychology (5)

A broad survey of qualitative inquiry in psychology. Presents epistemologies; reviews ethnography, interpretative-phenomenological analysis, grounded

theory, interviewing and narrative analysis, discourse analysis, focus groups, thematic analysis, content analysis, intuitive inquiry; discusses disciplinary guidelines for reporting and reviewing qualitative research.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 256 - Psychology of Social Class and Economic Justice (5)

Course examines the social psychological antecedents, correlates, and consequences of economic inequality in contemporary U.S. society. The impact of social class on attitudes, beliefs, and behaviors is assessed. Strategies for reducing classist discrimination, improving interclass relations, and strengthening social policy are discussed.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 261 - Participatory Action Research (5)

Participatory Action Research (PAR) is a theoretical standpoint and collaborative methodology that is designed to ensure that those affected by the research project have a voice in that project. Topics include philosophies of science; defining and evaluating PAR; ethics; and reflexivity.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 264 - Transnational Feminism, Development, and Psychology (5)

A transnational feminist lens examines international development as linked to broader ideologies that transform gender relations and enhance women's empowerment. A social-psychology framework brings theoretical and practical import to the issues and examines how research can contribute to social justice and women's human rights.

Prerequisite: Enrollment is restricted to graduate psychology students, or by permission of instructor.

PSYC 290B - Advanced Developmental Research and Writing (2)

Tailored to graduate students' interests among topics involving research and scholarship in sociocultural approaches to development, methods for research design, data collection, coding, and analysis, and preparing and reviewing grant proposals and journal manuscripts. Multiple-term course; students receive 6 credits in the third quarter of attendance; the performance evaluation and grade submitted for the final quarter applies to all three quarters.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 290C - Professional Development (5)

Designed to aid advanced psychology graduate students with development of competence in professional activities (e.g., preparing a vita, making job and conference presentations, submitting and reviewing manuscripts and grant proposals, professional communication, career decisions).

Prerequisite: Enrollment is restricted to advanced psychology graduate students.

PSYC 290E - Grant Writing for Psychologists (5)

Discusses how to write and put together a grant proposal for psychological research, culminating in a completed proposal.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 293 - Field Study (5)

Student-designed and student-conducted research carried out in field settings.

PSYC 297A - Independent Study (5)

Independent study and research under faculty supervision.

PSYC 297B - Independent Study (10)

Independent study and research under faculty supervision.

PSYC 297C - Independent Study (15)

Independent study and research under faculty supervision.

PSYC 297F - Independent Study (2)

Independent study and research under faculty supervision. Enrollment is restricted to graduate students.

PSYC 299A - Thesis Research (5)

PSYC 299B - Thesis Research (10)

PSYC 299C - Thesis Research (15)

PUNJ - PUNJABI

Lower-Division

PUNJ 1 - First-Year Punjabi (5)

Provides students with an introductory knowledge of Punjabi language and Gurmukhi script. Develops skills in reading, writing, speaking, and listening. Also focuses on vocabulary and grammar with the goal of engaging in conversation in real-life situations.

PUNJ 2 - First-Year Punjabi (5)

Students enhance their skills in reading, writing, speaking and listening. Students are given systematic lessons on Punjabi grammar, vocabulary, and the social use of the language in different situations.

Prerequisite: Prerequisite(s): PUNJ 1 or placement by interview with instructor.

PUNJ 3 - First-Year Punjabi (5)

Designed to continue building and strengthening students' skills in reading, writing, speaking and listening of modern Punjabi. In addition to new vocabulary, students are introduced to Punjabi idioms, proverbs, modern/medieval poetry, letter writing, and more elaborate compositions.

Prerequisite: Prerequisite(s): PUNJ 2 or by consent of the instructor.

RUSS - RUSSIAN**Lower-Division****RUSS 94 - Group Tutorial (5)**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

RUSS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

RUSS 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division**RUSS 194 - Group Tutorial (5)**

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

RUSS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

RUSS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

SCIC - SCIENCE COMMUNICATION**Upper-Division****SCIC 100 - Science Communication for Scientists (5)**

Teaches students to communicate effectively about science with the public. Students formulate research questions, identify and interview appropriate expert

sources, integrate material into engaging works of creative nonfiction using techniques such as structure, description and voice, and work with peers and the instructor to analyze and improve their work. Focuses on writing as the primary vehicle for creative nonfiction expression about science across mediums. Taught in conjunction with SCIC 200. Students cannot receive credit for this course and SCIC 200. Enrollment is restricted to sophomores, juniors, and seniors and subject to interview with the instructor to confirm level of scientific training and writing experience. Contact the instructor to arrange the interview.

SCIC 104B - Field Sketching in Color (5)

Covers field-adapted color illustration techniques including watercolor, colored pencil, inkwash, and mixed media. Field trips to various natural environments provide opportunities to sketch plants, mammals, birds, insects, landscapes, and other subject matter. In addition to in-class assignments, students produce a field sketchbook and a final project. Appropriate for students with demonstrated interest in science illustration through previous course work in science and art or through extracurricular activity in the field or a strong desire to learn the skills of the field. Enrollment process differs for Summer Session.

SCIC 106A - Introduction to Natural Science Illustration (5)

Introduction to graphite, pen and ink, coquille, and scratchboard, along with training in essential skills for creating accurate and dynamic scientific illustrations. Attention to the demands of the printing process along with basics of proportion, perspective, and composition. Appropriate for students with a demonstrated interest in science illustration through previous course work in science and art, or through extracurricular activity in the field, or a strong desire to learn the skills of the field.

SCIC 160 - Introduction to Science Writing (5)

A rigorous examination and practice of the skills involved in writing articles about science, health, technology, and the environment for the general public. Covers the essential elements of news writing and explanatory journalism, including developing a story idea, interviewing scientists, fact checking, composition, and editing of multiple drafts about scientific research.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and C1, C2 requirements. Enrollment is restricted to junior and senior physical and biological sciences majors.

SCIC 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SCIC 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

SCIC 200 - Introduction to Science Communication for Scientists (5)

Instructs science students in communicating about their work with the non-scientist public, including written, visual, and audio forms of communication. Enrollment is restricted to graduate students in science and engineering studies. Enrollment is by interview with the instructor to confirm level of scientific training and writing experience. Taught in conjunction with SCIC 100. Students cannot receive credit for this course and SCIC 100.

SCIC 201A - Reporting and Writing Science News (5)

A survey of the conventions of newspaper journalism and the special application of those conventions to scientific and technological subjects.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201B - The Science Feature (5)

A survey of selected feature articles in the current national science magazines, with attention to strategy, level of complexity, explanation technique, and style. Writing assignments include a publishable feature article.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201C - Profile and Essay Writing (5)

A survey of science and nature profiles and essays. Purpose, content, form, and style are considered. Writing assignments include original profiles and essays on current issues in science, technology, and society.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201D - Policy and Investigative Reporting (5)

Rigorous examination of techniques for reporting topics where science and technology meet public policy and society. Covers essential skills of investigative reporting, including obtaining documents through Public Records Act requests, using online reporting resources, and writing about ethical and legal issues.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201E - Multimedia Science News (5)

Introduces web-media tools for reporting science stories and enhancing coverage for broad audiences, including video packages, narrated slideshows, podcasts, blogs,

and still photography. Laboratory sections address skills for handling equipment and online editing.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 202 - Writing and Editing Workshop (5)

Theory and practice of writing and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at non-technical readers.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 297 - Independent Study (5)

A media internship is completed with faculty tutorial assistance, to satisfy a need for the student when a regular course is not available. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 297B - Independent Study (10)

Independent Study

SOCD - SOCIAL DOCUMENTATION

Graduate

SOCD 200 - Approaches to Social Documentation (5)

Comprehensive review and analysis of documentary strategies aimed at societal critique and social change, evaluating changes in argument, evidence, and process over development of the discipline.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 201A - Introduction to Documentary Field Production and Editing (5)

Designed to provide supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards and innovations within the field of social documentation, documentary subjects, location production, and/or the work of individual professional documentarians.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 201B - Advanced Documentary Field Production and Editing (5)

Intensive directing and producing course that covers conceptualization, research, treatment and proposal writing, interview technique, camera, editing, production, and distribution.

Prerequisite: Enrollment is restricted to social documentation graduate students. Open to qualified undergraduates with permission of instructor.

SOCD 201C - Project Planning for the Social Documentary (5)

Workshop seminar in project planning focusing on the form and content of the documentary project; research and preproduction; technical, financial, and logistical plans; and coordination with subjects and resources.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 202 - Multiple-Platform Social Documentary Production (5)

Introduction to social documentary genres including video, photography, new media and other mediums, which addresses social-scientific research and methodology in the context of these processes.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 203 - Documentary Research Methods and Social Science Representation (5)

Designed to acquaint students with how social science research represents social reality and how social documentarians represent social reality. Designed to encourage comparison among different modes of social science research and between social science and different modes of social documentation representations of social life.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 204 - Ethnographic Writing and Social Documentation (5)

Graduate-level advanced seminar explores ways that seeing, hearing, and knowing are influenced by culture, power, race, and other factors. Readings emphasize how documentary subjects are constituted and known, addressing questions of epistemology, social constructivism, objectivity, and method.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 292 - Special Topics (2)

Provides supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards, artistic strategies, and innovations within the field of social documentation, documentary subjects, and/or work of individual professional documentarians.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 293 - Studies and Practice for Social

Documentation, Filmmaking, and New Media (5)

This thematic, graduate-level, hybrid, production/critical studies course provides opportunities to learn specific technical skills while engaging in the analysis and critical interpretations of cinema, social documentary, animation, art, television, and new media. Technical topics may include animation; motion graphics; interactive web media; and installation, editing, cinematography, and sound.

Prerequisite: Enrollment is restricted to graduate students in social documentation. Graduate students from other programs may enroll by permission of the instructor.

SOCD 294A - Production/Analysis/Editing (5)

Workshop seminar oriented toward actual fieldwork, production, and preparation for editing of the thesis project in the student's chosen genre. Techniques of collection and recording, analysis, preparation, and editing taught.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 294B - Production/Analysis/Editing (5)

Workshop seminar oriented toward the editing and creative assemblage of the thesis project in the student's chosen genre. Techniques of preparation, exhibition, and editing taught.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 294C - Production/Analysis/Editing (5)

Social documentation students in the final phase of completing their master's thesis receive guidance in shaping their projects, receive feedback, and are taught key elements of structure and narrative at a time when the demand for clarity and social documentation exposition is crucial.

Prerequisite: Prerequisite(s): SOCD 294A and SOCD 294B. Enrollment is restricted to social documentation graduate students.

SOCD 295 - Project Completion (5)

Individualized study for second-year graduate students working on and completing their final projects. Limited to students enrolled in the social documentation program during their final quarter of study.

SOCD 297 - Independent Study (5)

Study either related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Students submit petition to sponsoring agency.

SOCD 297F - Independent Study (2)

Students submit petition to course-sponsoring agency. Enrollment restricted to graduate students.

SOCY - SOCIOLOGY

Lower-Division

SOCY 1 - Introduction to Sociology (5)

A systematic study of social groups ranging in size from small to social institutions to entire societies. Organized around the themes of social interaction, social inequality, and social change. Fulfills lower-division major requirement.

SOCY 3A - The Evaluation of Evidence (5)

Introduces students to major types of data and data analysis used in sociology. Designed to give students a foundation in understanding social science research articles, reports, and media reports used in political and policy debates. Topics include: general principles of research design, measurement, inductive and deductive modes of reasoning, experimental design, field work and ethnographic design, and reading and understanding basic quantitative forms of data and analysis.

Prerequisite: Enrollment is restricted to majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 3B - Statistical Methods (5)

Introduces basic quantitative data analysis found in sociological research and policy reports. Topics include: inferential statistics, such as probability distributions, sampling, and testing; and descriptive statistics, such as measures of association, bivariate, and multivariate analysis. (Formerly course 103A.)

Prerequisite: Enrollment is restricted to majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 10 - Issues and Problems in American Society (5)

Exploration of nature, structure, and functionings of American society. Explores the following: social institutions and economic structure; the successes, failures, and intractabilities of institutions; general and distinctive features of American society; specific problems such as race, sex, and other inequalities; urban-rural differences. Fulfills lower-division major requirement.

SOCY 15 - World Society (5)

Introduction to comparative and historical sociology. Focuses on the global integration of human society. Examines social changes such as industrialization, globalization, colonial rule, and the rise of Islamic fundamentalism. Uses social theory (including ideas from Marx, Weber, and Adam Smith) to explore the making of institutions like the nation-state, the World Trade Organization, the World Bank, and the

International Monetary Fund. Fulfills lower-division major requirement.

SOCY 30A - Introduction to Global Information and Social Enterprise Studies (5)

The first class in a three-quarter sequence that prepares students for designing social justice and sustainability projects using social-enterprise methodologies to transfer information and communications technologies (ICT) to community and non-governmental organizations. Tuesday's class topics include globalization, info-exclusion, social justice, information revolution, global civil-society networks, social entrepreneurship, and organizational assessment. Thursday's technical laboratory teaches students to develop practical ICT skills for working solidarity with community organizations in areas such as web design, graphic design, and digital networking.

SOCY 99 - Tutorial (5)

Directed reading and research. Petitions may be obtained from the Sociology Department Office. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency.

Upper-Division

SOCY 105A - Classical Social Theory (5)

This intensive survey course examines the intellectual origins of the sociological tradition, focusing on changing conceptions of social order, social change, and the trends observed in the development of Western civilization in the modern era. Readings are all taken from original texts and include many of the classical works in social theory with special emphasis on the ideas of Marx, Weber, and Durkheim, which constitute the core of the discipline. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 105B - Contemporary Social Theory (5)

Surveys major theoretical perspectives currently available in the discipline including functionalism, symbolic interactionism, ethnomethodology, conflict theory, critical theory, neo-Marxism, and feminist theory.

Prerequisite: Prerequisite(s): SOCY 105A and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 107A - Designing ICT Projects for Social Enterprise (5)

Covers designing doable ICT-based projects to support the goals of community and NGOs. Topics include: social entrepreneurship/enterprise case studies; step-by-step project design; integrating social and technical solutions; project management. Technical topics include: Internet resources; advanced web/database design; computer networks/maintenance.

Prerequisite(s): SOCY 30A and by permission of instructor. (Formerly SOCY 30B.)

SOCY 107B - Project Implementation and Grant Writing for Social Entrepreneurs (3)

Covers conversion of ICT project into a fundable grant proposal for social justice, integration of social activism, entrepreneurship and justice, and implementation of project. Topics include: funders, proposal design, field methods, project assessment, innovative ICT applications, action research methods. (Formerly course 30C.)

Prerequisite: Prerequisite(s): SOCY 107A or SOCY 30B.

SOCY 107F - Digital Social Enterprise and Project Management (2)

Provides Everett Program Fellows with hands-on experience, working in teams, running a digital social enterprise and managing technology-linked projects implemented with student teams. Fellows work closely with faculty and staff of the Everett Program for Technology and Social change, managing and implementing all aspects of the program, including fundraising and financial administration, project planning and development, maintaining communication with community partners, and mentoring younger students in the project in their own technology learning and project implementation activities. Prerequisite(s): SOCY 30A, SOCY 107A, and SOCY 107B. Enrollment is by permission of the instructor.

SOCY 111 - Family and Society (5)

Focuses on the interaction between family and society by considering the historical and social influences on family life and by examining how the family unit affects the social world. Readings draw on theory, history, and ethnographic materials.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 113C - Topics in Civic Engagement (2)

Explores the historical origins of contemporary civic polarization through the decades of political, cultural, technological, and legal changes that have resulted in our current combative political environment.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 114 - Sports and Society (5)

Explores the interconnections between sports and society using sociological theories and methods. Topics include class, race, and gender; mass media and popular culture; political economy; education and socialization; leisure patterns (participants and spectators); globalization and cross-national comparisons.

SOCY 115 - Introduction to Sound Studies (5)

Explores the interdisciplinary field of Sound Studies. Surveys the work of social scientists, media scholars, philosophers and others to better understand the role of sound in society. Lectures are presented in an audio-only format with a variety of listening activities and supplemental videos. By the end of the course, students will have a working understanding of the field of Sound Studies and a completed final project of their own design.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15. Enrollment is restricted to juniors and seniors.

SOCY 116 - Communication, Media, and Culture (5)

Examines media institutions, communication technologies, and their related cultural expressions. Focuses on specific ways the media—including media studies and criticism—operates as social and cultural factor. Contemporary theory or equivalent in related fields recommended.

Prerequisite: Prerequisite(s): SOCY 105A and SOCY 105B. Enrollment is restricted to junior and senior majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 117E - Migrant Europe (5)

Introduction to questions of immigration, nationalism, and racism in contemporary Europe. Addresses colonial roots of migration to Europe; patterns of immigration and responses to immigrants across different European regions; and political movements led by immigrants and other people of color.

Prerequisite: Prerequisite(s): SOCY 1, or SOCY 10 or SOCY 15 or CRES 10 or LGST 10; or by permission of the instructor.

SOCY 117M - Immigration Enforcement and Deportations (5)

The intensification of immigration enforcement in the United States and the associated rise of mass deportations have reached the lives of millions of immigrants and local communities. Course covers the context, determinants, and consequences of enforcement and deportation practices.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or LALS 1. Enrollment restricted to sophomores, juniors, and seniors.

SOCY 118 - Popular Music, Social Practices, and Cultural Politics (5)

Considers the role of popular music as a site of contemporary social practices and cultural politics. Examines the institutional organization and production of popular music, its cultural meanings, and its social uses by different communities and social formations. Also examines popular music as a vehicle through which major cultural and political debates about identity, sexuality, community, and politics are staged and performed.

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B. Enrollment is restricted to juniors and seniors.

SOCY 119 - Sociology of Knowledge (5)

If people define things as real, they are real in their consequences, quipped W.I. Thomas. Surveys sociological theories about where and how knowledge comes from, and the politics of knowledge, with reference to contemporary debates surrounding issues, such as climate change, genetics, and inequality.

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B, or by permission of the instructor.

SOCY 120 - Gender, Race/Ethnicity, Sexuality and Cultural Politics (5)

Focuses on the role feminist discourses play in cultural politics emphasizing sex, sexuality, and sex work as related to gender, race, and class. Examines the relationship between academic and popular feminisms. Interrogates post-feminism, third-wave feminism, and generational differences in feminisms. Formerly Gender, Sexuality, and Cultural Politics.)

Prerequisite: Prerequisite(s): SOCY 126 recommended. Enrollment is restricted to junior and senior sociology, critical race and ethnic studies, feminist studies, global information and enterprise, and Latin America/sociology majors, proposed majors, and minors.

SOCY 121 - Sociology of Health and Medicine (5)

Analysis of the current health care crises and exploration of the social relationships and formal organizations which constitute the medical institution. Study of the political, economic, and cultural factors which affect the recognition, distribution, and response to illness.

Prerequisite: Enrollment is restricted to junior and senior majors and minors in biochemistry; biological sciences; community studies; critical race and ethnic studies; sociology; the Latin American studies/sociology combined majors; and proposed sociology majors.

SOCY 121G - Genomics and Society (5)

Teaches critical skills for analyzing the co-production of genomics and society. Examines issues at stake as

societies across the world increasingly turn to genomic data to cure disease, solve crimes, regulate immigration, revitalize economies, and answer age-old questions about who we are.

Prerequisite: Prerequisite(s): SOCY 10 and SOCY 105B, or by permission of the instructor. Enrollment is restricted to juniors and seniors.

SOCY 122 - The Sociology of Law (5)

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law.

Prerequisite: Enrollment is restricted to majors and minors in legal studies, sociology, Latin American/sociology combined, and global information and social enterprise.

SOCY 123 - Global and Transnational Perspectives in Science and Technology Studies (5)

Examines transnational dimensions of science, technology, and medicine, with special attention to knowledge production, scientific practices, and therapeutics outside of North America and Western Europe. Students develop a conceptual foundation to analyze the global scale and impacts of scientific research.

Prerequisite: Enrollment is restricted to junior and senior sociology, anthropology, biology B.A., biotechnology, history, legal studies, politics, biochemistry and microbiology, community studies, critical race and ethnic studies, feminist studies, and Latin American and Latino studies/sociology combined majors; and GISES minors.

SOCY 124 - Visual Sociology (5)

Learn to critically consume documentary, ethnographic film, photojournalism, and the genre of realism as these methods are increasingly used to describe the social world. Addresses theoretical, methodological, practical, and ethical issues of creating visual media. Optional media lab teaches students how to create visual products as well.

Prerequisite: Prerequisite(s): Enrollment is restricted to juniors and seniors.

SOCY 125 - Society and Nature (5)

A healthy society requires a stable and sustainable relationship between society and nature. Covering past, present, and future, the course covers environmental history of the U.S., the variety and extent of environmental problems today, and explores their likely development in our lifetimes.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, global information and enterprise, and Latin American studies/sociology combined.

SOCY 126 - Sex and Sexuality as Social Practice and Representation (5)

Explores social and cultural aspects of human sexuality and reproduction, including how and why meanings and behaviors are contested. Analyzes sexuality and reproduction as forms of social and political control as well as cultural expression and self-determination.

Prerequisite: Enrollment is restricted to junior and senior sociology, critical race and ethnic studies, feminist studies, Latin American/sociology combined, and global information and social enterprise majors, proposed majors, and minors.

SOCY 127 - Drugs in Society (5)

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course.

Prerequisite: Enrollment is restricted to majors and minors in legal studies, sociology, Latin American/sociology combined, and global information and social enterprise.

SOCY 127P - Sociology of Drugs, Botanicals and Pharmaceuticals (5)

Engages the social, historical, and economic trajectories of the drugs, illicit and licit, botanical and pharmaceutical within U.S. society. Through an examination of case studies, and other texts of encounter, explores how international, state, and local actors mediate as interlocutors between globalized interests, local knowledges, and the molecules we have increasingly come to know, ingest, and incorporate.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or CRES 10; or by permission of the instructor. Enrollment restricted to junior and senior sociology, biology, biotechnology, biochemistry and molecular biology, community studies, critical race and ethnic studies, Latin American/sociology combined, and global information and social enterprise majors, proposed majors, and minors.

SOCY 128 - Law and Politics in Contemporary Japan and East Asian Societies (5)

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor

during World War II, and Haydon legislation that allows war victims to sue the Japanese government and corporations in California.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128A - Research Methods in Legal Studies and Critical Criminology (5)

Introduces survey research methods including problem formulation, research design, instrument construction, data collection, codification, data processing, computer analyses, and report writing. The greater emphasis is placed on statistical analyses and questionnaire constructions.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 128C - Social History of Democracy, Anarchism, and Indigenism (5)

Provided an overview of socio-political theories and thoughts from Athenian Direct Democracy in 500 BC, to Classical Liberalism, Social Contract, Libertarian Socialism, Anarcho-Syndicalism, Neo-Liberalism, Anarcho-Primitism, and lastly Indigenism in relation to the revival of indigenous knowledge, the Mother Earth law, and the restoration of the nature's rights as espoused by many governments in the Third World today.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, or SOCY 15. Enrollment restricted to sophomore, junior, and senior sociology, critical race and ethnic studies, community studies, legal studies, Latin American/sociology combined, and GISES majors, proposed majors, and minors.

SOCY 128I - Race and Law (5)

An introduction to comparative and historical analyses of the relation between race and law in the U.S. Emphasis on examinations of continuous colonial policies and structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Formerly Race and Justice)

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128J - The World Jury on Trial (5)

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others.

American jury contrasted with other forms of lay participation in the legal process.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128M - International Law and Global Justice (5)

Examines war crimes, crimes against humanity, and the evolution and role of the International Criminal Court (ICC). Examines the evolution of the concept of international law, the rationale for its birth and existence, roots of international conflicts and genocides, possible remedies available to victims, mechanisms for the creation and enforcement of international legal order, as well as the role of colonialism, migration, poverty, race/ethnic conflicts, gender, and international corporations in creating and maintaining conflicts and wars.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 129 - Popular Culture and Cultural Studies (5)

Examines the hidden politics of popular pleasure, studying the workings of domination and transgression in popular culture and everyday life. Explores not only media representations but cultural practices as well. Examines both cultural production and consumption. Considers how hegemonic discourses render the politics of resistance invisible.

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B. Enrollment is restricted to junior and senior majors and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 130 - Sociology of Food (5)

Following food from mouth to dirt, explores the politics, economy, and culture of eating, feeding, buying, selling, and growing food. Topics cover both the political economy of the food system as well as how body and nature are contested categories at either end of this system.

Prerequisite: Enrollment is restricted to juniors and seniors. Enrollment is restricted to sociology majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 131 - Media, Marketing, and Culture (5)

Explores relationship between modern forms of cultural production and the economy and society in which they emerge. Course reads, screens, and discusses variety of

the cultural texts: from the historical and theoretical to the commercial, popular, and counter-cultural.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, community studies, and Latin American studies/sociology combined.

SOCY 132 - Sociology of Science and Technology (5)

Reviews social and cultural perspectives on science and technology, including functionalist, Marxist, Kuhnian, social constructionist, ethnographic, interactionist, anthropological, historical, feminist, and cultural studies perspectives. Topics include sociology of knowledge, science as a social problem, lab studies, representations, practice, controversies, and biomedical knowledge and work.

Prerequisite: Enrollment is restricted to junior and senior majors/minors in sociology; biology; biochemistry; community studies; critical race/ethnic studies; global information/social enterprise; Latin American studies/sociology combined; proposed sociology majors.

SOCY 133 - Currents in African American Cultural Politics (5)

Takes as its subject, the dialogues, debates, conceptions, and strategies of self representation produced by blacks in the U.S. and Atlantic world in the twentieth and twenty-first centuries. These issues are examined through the insights of feminist theory, cultural studies, media studies, sociology, and African American studies.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 134 - Television and the Nation (5)

The role of American network television in the production of the post-war American national imagination is our focus. Our approach will explore issues of media power, especially television's industrial apparatus, its network structure, its strategies of representation in relationship to the construction of the image of the nation, and the meaning of citizens, consumers, and audiences.

Prerequisite: Enrollment is restricted to junior and senior majors and minors in sociology, Latin America and Latino studies/sociology combined, global information and social enterprise studies, history, literature, and film and digital media.

SOCY 135 - Healing Justice (5)

This experiential course explores the theoretical foundations, history, and future of healing justice as a framework using an embodied approach. Healing justice has shaped wide-ranging fields, from grassroots organizing and holistic health, to grant-making, and education. While the framework informs a dynamic

movement, healing justice is grounded in consistent commitments like collective healing; centering Black, indigenous and people of color knowledges; and more that guide this course. Grounded in somatic or embodied inquiry, students engage various materials—from academic articles to poetry—using some of the restorative practices that are central to healing justice work.

Prerequisite: Prerequisite(s): SOCY 105A and SOCY 105B, or by permission of the instructor.

SOCY 136 - Social Psychology (5)

Major theories and concepts in sociological study of social psychology. Topics include identity and social interaction, deviance, sociology of emotions, social narratives, and the social construction of reality.

Prerequisite: Enrollment is restricted to junior and senior sociology and Latin American studies/sociology majors and proposed majors, and sociology and global information and social enterprise minors.

SOCY 137 - Deviance and Conformity (5)

Why certain social acts are considered threatening and how individuals or groups become stigmatized. Sociological analysis of the institutions and processes of social control and the experience of becoming deviant and living with a stigmatized identity. Introductory course in sociology recommended.

Prerequisite: Enrollment is restricted to junior and senior sociology majors, minors, and proposed majors, global information and social enterprise studies minors, and Latin American and Latino studies/sociology combined majors and proposed majors.

SOCY 139 - Field Research Methods (5)

Research practicum which examines methods and problems of qualitative field research both through examining literature published in this tradition and by carrying out directed field exercises. Students also design and carry out their own research project.

Prerequisite: Prerequisite(s): SOCY 3A.

SOCY 139D - Critical Digital Methods (5)

Introduces critical digital methods to examine ethical and epistemological concerns with Big Data, archives and digital collections, organizational records, mobile ethnographies, social media, and crowd-sourced data. Students use open-source text mining and data-visualization programs.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, or SOCY 15; and SOCY 3A. Enrollment is restricted to junior and senior sociology, Latin American and Latino studies/sociology, and global information and social enterprise majors, proposed majors, and minors.

SOCY 139G - Introduction to Geographic Information

Systems (GIS) (5)

Introduces Geographic Information Systems (GIS) including methods to analyze geographic data and create maps. Students learn software, such as Google Map APIs and Bing Maps APIs, and focus on the ArcGIS mapping software. A course in statistics is recommended as preparation.

Prerequisite: Enrollment restricted to junior and senior anthropology, environmental studies, sociology, Latin American and Latino studies/sociology combined, and GISES majors, proposed majors, and minors; other majors by permission of instructor.

SOCY 139T - Community-Engaged Research Practicum (5)

Covers the theories and methods associated with community-based and participatory action research. Students review relevant scholarship then engage in a collective field research project in collaboration with a community organization. Themes, collaborations, and research projects vary. Enrollment is by permission of the instructor.

SOCY 140 - Social Psychology of Power (5)

This course uses historical, sociological, and social psychological materials to introduce students to issues concerning class and power, religion and power, minorities and power, women and power, the rise of the New Right, and the successes and failures of the Left.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, SOCY 15, or PSYC 40. Enrollment is restricted to juniors and seniors.

SOCY 141 - Social Welfare (5)

Familiarizes students with the major social welfare programs and policies in the U.S., exploring changes in conceptualizations of social welfare, and offering a critical perspective on the present-day welfare state.

Prerequisite: Prerequisite(s): Two courses chosen from SOCY 1, SOCY 10, and SOCY 15. Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 142 - Language and Social Interaction (5)

Concerns the routine and taken-for-granted activities that make up our interactions with one another, consisting in large part—but not exclusively—of verbal exchanges. Emphasis on the socially situated character of communication, whether intimacy between two people or dominance of a group.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, language studies, linguistics, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 143 - Black Botanical Medicine in the Americas (5)

How have plants been part of Black-led community health and healing in the Americas? How has this botanical knowledge been central to material and discursive geographies of blackness; to how blackness is lived; and to how blackness is constructed in health narratives, policy, and movements? In addition to learning about Black botanical knowledge in North and Latin America (African-American and Afro-Latinx), students analyze their own social locations; interrogate assumptions about local and traditional plant knowledge; and encounter broad understandings of health that include environmental, economic, and spiritual dimensions. Students engage with academic texts, news stories, art, and creative writing.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or CRES 10 or CRES 68 or POLI/ANTH/BIOL 89, or by instructor permission. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 145 - Sociology of Masculinities (5)

Examines conflicting views on the development and state of modern masculinity as adaptation, transitional phase, or pathology. Did men lose the gender war? Do boys need rescuing? What are common and divergent social experiences of men within race, class, gender, culture, era? An introductory sociology course recommended.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, psychology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 146 - Introduction to Population Health (5)

Why do people live longer today than they did 50 years ago? What drives differences in health between neighborhoods or nations? This course introduces students to questions and concepts central to the study of population health—an interdisciplinary field based in demography, sociology, and epidemiology. It examines the policy implications and limitations of research on population health. Students practice evaluating evidence, translating big-picture concepts into measurable variables, and working with data.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 147 - Health in a Changing America (5)

What about America is making Americans sick? In this interdisciplinary course, students consider the changing social context of health in the United States and the social and political commitments necessary to protect health as a human right. Students analyze current challenges at the intersection of structural racism, political values, and health, and examine the ways that

framing health as personal versus public responsibility is consequential for social policy. Using case studies, students envision a human rights-based response to these and other health challenges. Enrollment is restricted to sophomores, juniors, and seniors.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 148 - Educational Inequality (5)

Examines educational inequality in the United States, focusing on contemporary debates and issues, especially in the California context. Covers schooling from preschool to higher education, and examines educational inequality from a system, setting, and individual-level perspective.

Prerequisite: Prerequisite(s): SOCY 3A and SOCY 3B, or by instructor permission. Enrollment restricted to junior, senior majors, proposed majors, and minors in sociology, education, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 149 - Sex and Gender (5)

Modern analyses of sexuality and gender show personal life closely linked to large-scale social structures: power relations, economic processes, structures of emotion. Explores these links, examining questions of bodily difference, femininity and masculinity, structures of inequality, the state in sexual politics, and the global re-making of gender in modern history. Recommended as background: any lower-division sociology course.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 150 - Sociology of Death and Dying (5)

Explores contemporary, historical, cross-cultural and interdisciplinary perspectives on the social psychology of death and dying. Cultural norms and institutional contexts are studied, along with the individual experience, and the ways in which our perspectives on death and dying influence our experiences of life and living.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 152 - Body and Society (5)

Critically examines the place of the human body in contemporary society. Focuses on the social and cultural construction of bodies, including how they are gendered, racialized, sexualized, politicized, represented, colonized, contained, controlled, and inscribed. Discusses relationship between embodiment, lived experiences, and social action. Focuses on body politics in Western society and culture, especially the United States.

Prerequisite: Enrollment is restricted to junior and senior majors and minors and proposed majors and minors in sociology, global information and enterprise, and Latin American studies/sociology combined.

SOCY 153 - Sociology of Emotions (5)

Examines sociological approaches to the understanding of emotions and the application of these approaches to work, learning, interpersonal relationships, health and illness, sports, and other aspects of everyday life.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 155 - Political Consciousness (5)

Explores the relationship between consciousness, ideology, and political behaviors from voting to rebellion. Special attention is given to the lived experience and the identity interests that complicate the nexus of class position and political ideology. An introductory sociology course is recommended as preparation.

SOCY 156 - U.S. Latinx Identities: Centers and Margins (5)

Explores historical and contemporary constructions of Latinx identities and experiences in U.S. Particular emphasis placed on transcultural social contexts, racial formations, and intersections with other identities including sexuality and gender. (Formerly U.S. Latina/o Identities: Centers and Margins).

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and enterprise, Latin American studies, and Latin American studies/sociology combined.

SOCY 157 - Sexualities and Society (5)

Explores controversies in the sociology of sexuality. Focuses on tensions and disagreements that characterize debates over sex and society, and attempts to identify political and theoretical issues at stake in these debates.

Prerequisite: Enrollment is restricted to sophomore, junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 158 - Politics of Sex Work and Erotic Labor (5)

Examines sex work in an historical and cultural context, considering how it has changed over time. Considers the relationship of pornography, exotic dance, and selling sex on the Internet to racialization, queer politics, globalization, and tourism. Employs theories and methods of cultural studies in rethinking historical debates on sex work.

Prerequisite: Prerequisite(s): SOCY 120 and SOCY 126. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 163 - Global Corporations and National States (5)

Examines the nature and development of the capitalist world system since 1945. Emphasis is on the power of multinational corporations as managers of the world system and the response of states: role of multilateral agencies such as the World Bank, International Monetary Fund, United Nations.

Prerequisite: Prerequisite(s): SOCY 15. Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 164 - Capitalism and Its Critics (5)

Through comparative analysis of texts by several social theorists, explores the rise and consequences of capitalism. How has capitalism affected how humans understand and act in the world? How do oppressions along the lines of race, gender, sexuality, and nations intersect with capitalism? Is resistance desirable and/or possible?

Prerequisite: Enrollment is restricted to junior and senior sociology, global information and enterprise, and combined Latin American and Latin Studies/sociology majors, proposed majors, and minors, or by instructor permission.

SOCY 164T - Marx and Marxist Theory (5)

Along with studying Marx's anatomy of capitalist society, this course also explores the work of Marxist theorists from the early 20th century through the contemporary moment.

Prerequisite: Prerequisite(s): SOCY 105A or consent of instructor.

SOCY 166 - Economics for Non-Economists (5)

Fosters economic literacy among students who are not economics majors but are interested in the political and social ramifications of economic change. Emphasizes economic institutions and policy and is taught by case-study method, which requires active student participation.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 167 - Development and Underdevelopment (5)

Examines contemporary debates about development in the Third World: alternative meanings of development, recent work on the impact of colonial rule, how some economies have industrialized, ideas about agrarian

change, and recent research on paths out of poverty. Students work in pairs to examine a development in one country since World War II. SOCY 15 recommended.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, anthropology, politics, global economics, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 168 - Social Justice (5)

Explores sociological approaches to the quest for--and the realization of--social justice. Examines a range of approaches to such ongoing challenges as racism, sexism, gendered discrimination, classism, poverty, violence, militarism, environmental devastation, ableism, and ageism using non-fiction literature and biographical anthologies.

SOCY 169 - Social Inequality (5)

A survey of theories and systems of social stratification focusing on such phenomena as race, class, power, and prestige.

Prerequisite: Enrollment is restricted to junior and senior sociology and Latin American studies/sociology combined majors.

SOCY 170 - Ethnicity and Race (5)

Examines the enduring and changing status of ethnic and racialized minority groups in the United States, such as Latina/os, African Americans, Asian Americans, indigenous peoples within the U.S., as intersecting, historically situated, and dynamically produced categories of social identity and organization. (Formerly Ethnic and Status Groups.)

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or CRES 10.

SOCY 170P - The Political Economy of Race (5)

Explores the enduring racial and economic legacies of slavery and colonialism in relation to contemporary social problems, with an emphasis on segregation, policing, the prison industrial complex, immigration, and borders.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or CRES 10, or by permission of the instructor.

SOCY 171 - Exploring Global Inequality (5)

Seminar focusing on readings of key texts and recent research papers on several dimensions of global inequality (material, health, gender, cultural, migration) to find innovative ways of understanding the connections among different dimensions of inequality and of visualizing inequality in digital media. Students prepare visual presentations on contemporary social inequalities suitable for an online (for example, <http://ucatlas.ucsc.edu/>) or print atlas.

Prerequisite: Enrollment is restricted to seniors.

SOCY 172 - Sociology of Social Movements (5)

Through readings on social movements that span the 20th century, course examines the causes of popular mobilizations, their potential for rapid social change, and the theories developed to understand and explain their role in modern social life.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 173 - Water (5)

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water.

Prerequisite: Enrollment is restricted to junior and senior sociology majors, and proposed majors, and minors in sociology, environmental studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 173X - Water and Sanitation Justice (5)

In the global North and South, inequalities in water and sanitation are issues of justice as much as income. One billion people worldwide lack safe water, 2.5 billion lack basic sanitation. Course explores: North-South comparison, water governance, human rights, poverty, climate justice, irrigation, and more.

SOCY 176 - Women and Work (5)

Examines the history of women and work; women's current conditions of work and political, economic, and social factors affecting these conditions; means by which women may shape working conditions including contributing leadership, developing policies, building unity, and creating alliances.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 176A - Work and Inequality (5)

Addresses how work is organized and shapes life changes. Covers: the history of paid work; the impact of technology; race/class/gender at work; professional and service work; work and family; collective responses to work; and challenges of work in a globalizing economy.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and

social enterprise, and Latin American studies/sociology combined majors.

SOCY 177 - Urban Sociology (5)

Historical and contemporary examination of urban life including community, race, geography, urban and suburban cultures and lifestyles, stratification, housing, crime, economic and environmental issues, demographic changes, and global urbanization.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177A - Latinos/as and the American Global City (5)

Examines roles of emerging Latino/a majorities in urban centers across the U.S. Explores the Latinization of U.S. cities and various factors affecting the life chances of Latinos/as including, but not limited to, immigration, segregation, social movements, and other forms of political participation.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, Latin American and latino studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177E - Eco-Metropolis: Research Seminar in Urban and Environmental Studies (5)

Explores the intersection of cities and the environment through the emerging field of urban environmental studies. Focuses on varied and often contested efforts at urban sustainability in recent history. Draws on literatures in environmental history, environmental and urban sociology, geography, political ecology, and cultural studies.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177G - Global Cities (5)

Explores how global cities have facilitated increasing integration of the diverse cultures and economies of the world. Using historical, sociological, and comparative methods, analyzes how these spaces both enable and constrain transnational flows of capital, labor, information, and culture.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 178 - Sociology of Social Problems (5)

Views problems in society not as given but as social constructs. Examines the ways in which conditions in society become identified and defined as problems and consequences that follow from such a process.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 178T - Special Topics in Sociology (5)

Taught on a rolling basis by faculty members with each offering varying by instructor. Topics are announced by the department.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 178Z - Disability and Society (5)

An in-depth exploration of Disability Studies, an interdisciplinary field of research that seeks to question and critique dominant Western understandings of disability and to advance discussions around issues of intersectionality, equality, inclusionary politics of access, and social justice.

SOCY 179 - Nature, Poverty, and Progress: Dilemmas of Development and Environment (5)

Concerns about environmental change, including global warming, threats to the ozone layer, and industrial pollution, raise questions about Third World development. Simple views of the relation between society and nature, such as blaming population growth, industrialization, or poor people, seem to preclude higher living standards. Uses debates and case studies to explore more subtle and optimistic views of social-natural relations.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in environmental studies, sociology, global information and social enterprise, and Latin American studies/sociology combined majors. SOCY 15 recommended.

SOCY 180 - Social Movements of the 1960s (5)

Examines the roots, development, and political outcomes of black civil rights organizations during the Sixties. Explores social and structural forces, mobilization of black communities, strategies and tactics used, nature of the relationships between various civil rights organizations, unity and disunity among organizations, leadership gains, and impact on race relations in the U.S.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 184 - Hunger and Famine (5)

Why do famines happen? Why are some hungry and some over-fed? Recent advances in the understanding of food crises and chronic undernutrition are the focus of this course.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 185 - Environmental Inequality (5)

Modern society not only assaults nature, it does so in ways that reproduce existing social inequalities. This course reviews three types of contemporary environmental inequality (environmental racism, displacement, and privilege), and the processes that produced them, with a focus on industrialization, urbanization, and the rise of capitalism in Europe and the United States.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, environmental studies, and Latin American studies/sociology combined.

SOCY 187 - Feminist Theory (5)

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Considers various deconstructive challenges to second wave feminism based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly.

Prerequisite: Prerequisite(s): SOCY 1 or FMST 1. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 188A - Social Change in the Global Economy (5)

Explores local dimensions of globalization, focusing on experiencing more global divisions of labor in both industrialized and developing countries. Themes include: economic integration and dislocation; new forms of governance; globalizing consumption and culture; gender; and popular resistance.

Prerequisite: Prerequisite(s): SOCY 15. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 193 - Field Study (5)

Provides for (department-sponsored) individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (as opposed to SOCY 198 where faculty supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of

instruction. Students submit petition to sponsoring agency.

SOCY 193F - Field Study (2)

Provides for department-sponsored individual field study in the vicinity of campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency.

SOCY 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SOCY 194F - Group Tutorial (2)

Small group study of a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SOCY 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Students submit petition to sponsoring agency.

SOCY 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Students submit petition to sponsoring agency.

SOCY 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Completion of course 195C (completion of the thesis) satisfies the W general education requirement. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency.

SOCY 196G - Project Practicum: Global Information and Social Enterprise (5)

Project practicum and evaluation are required for completion of major or minor in global information and social enterprise studies (GISES). Projects require approval in advance by the director of GISES. Completed projects must be uploaded electronically on the website or archive of the Everett Program.

Prerequisite: Prerequisite(s): SOCY 107B or SOCY 30C.

SOCY 196S - Senior Seminar (5)

Small seminars that focus on advanced topics in sociology. The pedagogical aims vary but these seminars often emphasize at least one of the following: close textual analysis, critical and analytical thinking, active learning, field research, advanced research methods, or advanced theory. Topics vary yearly; consult current course listings. Enrollment by application with selection based on appropriate background and by consent of instructor. Satisfies senior comprehensive requirement. Restricted to senior sociology majors.

SOCY 198 - Independent Field Study (5)

Provides for (department-sponsored) individual study program off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency.

SOCY 199 - Tutorial (5)

Advanced directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency.

SOCY 199F - Tutorial (2)

Advanced directed readings and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency.

Graduate**SOCY 201 - The Making of Classical Theory (5)**

Examines the establishment of theory in the discipline of sociology. Introduces students to close readings and analysis of a core selection of social theory. Problematises the construction, maintenance, and reproduction of a theoretical canon in sociology.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 202 - Contemporary Sociological Theory (5)

Intensive survey of major tendencies in modern social thought, including functionalism, symbolic interactionism, ethnomethodology, critical theory, structuralism, phenomenology, neo-Marxism, and feminist theory.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 203 - Sociological Methods (5)

Approaches methods as a series of conscious and strategic choices for doing various kinds of research. Introduces students to the epistemological questions of method in social sciences; to key issues in technique,

particularly control, reliability, and validity; and to good examples of social research.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 204 - Methods of Quantitative Analysis (5)

Students are provided with intuitive explanation of fundamental concepts in statistics and learn how to use statistics to answer sociological questions. Experience and guidance in using computers to efficiently analyze data are provided.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 205 - Field Research Methods (5)

Gives students first-hand experience doing fieldwork with an emphasis on participant observation and some interviewing. Students submit weekly field notes and a final project analysis. At seminar meetings, field experiences and relevant literature are examined.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 206 - Comparative Historical Methods (5)

Overview of research strategies and methods used in historical and social sciences. Students read works exemplifying a variety of analytical approaches. Written assignments cultivate critical skills, weighing of tradeoffs inherent in all methodological choices, and elaboration of hypothetical research designs.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 208 - Writing Practicum (5)

Writing intensive course designed to facilitate the completion of the master's thesis, oral field statement, or the dissertation in sociology. The seminar is convened by a faculty member in conjunction with students and their adviser or appropriate committee chair. Students are expected to produce and present drafts of work completed in the seminar.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 209 - The Analysis of Cultural Forms (5)

Examines material and symbolic forms such as media products, cultural artifacts, language, nonverbal communication and social practices using discourse, textual, content, interpretive, and conversation analyses as well as ethnography and different channels of communication. Theoretically, relies on cultural studies, communication studies, cultural sociology, film studies, and ethnomethodology.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 220 - Global Transformation: Macrosociological Perspectives (5)

Classical concepts and contemporary approaches in macrosociology, the study of large-scale, long term social change. Readings drawn primarily from the Marxian and Weberian traditions (new institutionalism, varieties of neo-Marxism, environmental history, state centrism) as they focus on agrarian and industrial structures and commodity chains; household, village, and neighborhood organization; social movements and revolutions; culture, ideology, and consciousness; policy analysis; comparative urban, national, and civilizational development.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 222 - Political Sociology (5)

A survey of major works and themes in the relationship of politics and society, with primary emphasis on the compatibilities and contradictions of pluralist, elite, and class perspectives on the state.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 223 - Sociology of the Environment (5)

Advanced treatment of the dominant ideas of nature and the environment in the West and their relationship to the development of Western capitalism. Leading Western theories of environmental crisis and their relation with ideologies of environmentalism and environmental movements.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 224 - Globalization: Theories and Social Movements (5)

Examines the structures, processes, and movements associated with globalization processes. Reviews political economy theories, cultural theories systems, state industrial policies, and popular responses to globalization. Also assesses contribution of resistance movements informed by class, ethno-nationalism, religion, or gender.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 225 - Political Economy for Sociologists (5)

Examines rudiments of historical materialism in light of advances in cultural and ecological Marxism. Basic categories of Marxist political economy. Thematic focus on the first and second contradictions of capitalism in world economy today.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 227 - Learning from Environmental Historians (5)

Looks at several major themes in the sociology of the environment and asks how the works of environmental history address those themes. Includes reflections on how history as a method interrogates social questions. Possible themes include: sustainability; social justice; universalism vs. particularity; city and country; and social movements.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 229 - Work and Labor Markets in the New Economy (5)

Focuses on the interaction of work restructuring and existing race/class/gender inequalities. Themes include: the labor process and theories of consent; labor market segmentation; job and occupational segregation; information technologies, flexible work, and post-industrialism; flexible employment relations; and low-wage service and labor markets.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 230 - Theory and Method in the Sociology of Marx (5)

Examines theoretical and methodological implications of Marxist theory for empirical social research. Analyzes how historians and social scientists apply Marxist method in explaining society, social change, globalization, culture, and late capitalism. Goal is to assist students to employ Marxist theory and method creatively in their research projects.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 240 - Inequality and Identity (5)

Explores recent theoretical and empirical studies of race, class, gender, and sexuality with an emphasis on the production of identities and their relationship to processes and structures of power in a postcolonial context.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 241 - Cross-National and Cross-Cultural Research (5)

Seminar examining theoretical and methodological issues in doing cross-national and cross-cultural research. In addition to a consideration of different research paradigms and approaches, representative works from each comparative tradition are examined.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 242 - Feminist Research Seminar (5)

Provides scholarly support to students doing feminist research. Examines issues concerning conceptualization of feminism and feminist research. Explores relation of feminist research to intersections of gender, class, and race; to the self; to power; and to transformative social praxis. Students present and are given assistance with their work, as well as listen to, read, and assist with the work of others.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 244 - Race and Ethnicity (5)

A critical survey of the theoretical issues of persistence and change, public policy, and recent empirical studies in the field of race and ethnic relations. Readings introduce comparative race relations and a historical background of major theoretical paradigms in the field which purport to explain race and ethnic relations in general and race relations in America specifically.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 245 - Feminist Theory (5)

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Explores the decentering of universalist feminist theories and asks what constitutes feminist theory after gender has been decentered. Considers various deconstructive challenges to second-wave feminist theory based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 246 - Class, Culture, and Movement (5)

Analyzes impact of ethnicity, gender, and religion on the class situation of laboring people in a globalized economy by intensive reading and critique of classic studies, explaining how social movements reflect combinations of social relations and cultural practices.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 247 - Race and Class (5)

Introduces the student to the recent literature on race and class. Covers several different theoretical perspectives including internal colonialism, labor market segmentation theories, racial formation, and neo-gramscian cultural analyses. In addition to study of theory, also compares theoretical perspectives to the historical experience of minority groups, in particular, blacks, Hispanics, and Asians.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 249 - Feminisms and Cultural Politics (5)

Focuses on the role feminist discourses play in contemporary cultural politics with the main focus on the politics of sex, sexuality, and sex work. Begins with considerations of (mis)representations of feminisms in popular cultures; considers the relationship between academic and popular feminisms; and interrogates the meaning of terms *post-feminism* and *third-wave feminism*.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 250 - Course Design and Grant-Writing Seminar (5)

A professional training seminar devoted to the philosophical, conceptual, and practical issues of course design, pedagogy, and grant writing. Topics covered: institutional contexts; curriculum (including syllabi, course content, assignments, evaluation); pedagogy; teaching as work/labor process; grant writing; budgets.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 252 - Symbolic Interactionism and Sociology of Emotions (5)

Examines classic and contemporary theories and concepts that play a major role in sociological studies of identity, symbolic and social interaction, and the sociology of emotions. Examines how cultural forms, rules, and rituals define, structure, and mediate emotions and how identities are situated within social institutions.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 253 - Race, Crime, and Justice (5)

Covers empirical research on "race, crime, and justice" from multiple methodological and theoretical traditions in social science research. The course draws on historical examples of slavery, state violence, and crimes against humanity across the globe. Also covers research on the entanglement of race and crime in the United States, both historically and today.

Prerequisite: Enrollment is restricted graduate students.

SOCY 255 - Engaging Cultural Studies (5)

Examines feminist and ethnic studies production, appropriation, and transformation of cultural studies theories and methodologies. Considers the utility of various theoretical apparatuses and methodological strategies employed in the interdisciplinary site that combines feminist, ethnic, and cultural studies.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 256 - Urban Sociology (5)

Introduction to core writings and key theoretical paradigms in urban sociology. Examines the history and contemporary conditions of cities in the U.S. and the urban experience. Urbanization, suburbanization, community, social inequality, urban politics, relationship between the built environment and human behavior.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 257 - Colonialism, International Law, and Global Justice (5)

Examines colonialism, war crimes, crimes against humanity, and legal remedies, and the role of the International Criminal Court (ICC); traces the history of colonial expansionism, starting from the Roman Empire to the present American imperial dominance in global politics.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 258 - Global Lay Justice Systems and Direct Democracy (5)

Introduces historical analysis of lay justice participation. Examines global exploration of the use of lay judge institutions in citizen's movements and the assumption that juries are a derivative institution of democratic ideals. Focuses on corporate media creation of anti-jury sentiment.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 259 - Space and the Politics of Difference (5)

Brings together the fields of sociology and geography to explore the complex and multiple ways of thinking together space and social difference. Course texts examine the co-constitution of space with bodies, subjectivities, and social formations.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 260 - Culture, Knowledge, Power (5)

An introduction to theoretical approaches and exemplary studies of culture, knowledge, and power which critically interrogate the relationship between cultural formations and the production, circulation, and meaning of knowledges, materials, artifacts, and symbolic forms. Explores the concrete ways that power is organized and operates through different forms and sites, how it interpolates with other forms of power, and examines knowledges and culture as specific forms of power and sites of political struggle.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 261 - Sociology of Knowledge (5)

Explores three main issues: the social determination of knowledge, including natural science; the character of intellectual labor and intellectuals as a social group; the role of organized knowledge and knowledge industries in contemporary social change. Texts examined include class-based theories (Lukacs, Mannheim, Gramsci), feminist standpoint analysis (Smith, Harding, etc.), and theories of postmodern culture (Lyotard, Harvey, etc.).

Prerequisite: Enrollment is restricted to graduate students.

SOCY 262 - Cultural Practice and Everyday Life (5)

Examines contemporary debates about the role of mass produced expressive symbols in modern industrial societies, and the circumstances of cultural production for its impact on the creation, organization, and use of cultural artifacts. Concern with the use and experience of popular symbols for the ways that their use involves the creation of meanings and the role of such meanings in the social organization of society.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 263 - Cultural Politics of Difference (5)

Considers the cultural turn and the turn to difference in understanding relations of power and struggles over representation in studies of race, media, and culture. Examines national identity, difference, subjectivity, and authenticity, especially as they bear on quests to create new identifications, alignments, and efforts to protect existing identities.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 264 - Science, Technology, and Medicine (5)

Explores social and cultural perspectives on science, technology, and medicine. Analyzes theoretical approaches that open up black boxes of scientific and biomedical knowledge, including the politics of bodies, objects, and health/illness. Links are made to medical sociology.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 268A - Science and Justice: Experiments in Collaboration (5)

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment is by permission of instructor. Enrollment is restricted to graduate students.

SOCY 268B - Science and Justice Research Seminar (5)

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this

training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): SOCY 268A, BME 268A, FMST 268A, or ANTH 267A. Enrollment is restricted to graduate students and by permission of the instructor.

SOCY 282 - Social Policy Research (5)

Policy research. Covers a variety of theoretical perspectives found in policy studies. Surveys various methodological approaches used in policy research. Theories and methods linked to research agendas on the various phases of the policy life cycle. Students are required to design a research proposal.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 290 - Advanced Topics in Sociological Analysis (5)

The topics to be analyzed each year vary with the instructor but focus upon a specific research area. Enrollment restricted to graduate students by consent of the instructor.

SOCY 293 - Going on the Job Market (5)

A seminar devoted to the practical problems of securing a job as a professional sociologist. Topics covered: researching colleges, universities, and public and private organizations that employ sociologists; designing a curriculum vitae; writing an application letter; preparing a job talk; handling questions during the interview process; the etiquette of visiting (and its aftermath); finding out about them; and the terms of employment: what is negotiable and what is not.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 294 - Writing for Social Scientists (5)

Seminar on the genres of social science writing, and the problems of starting and finishing a publishable thesis, book, or article. For advanced graduate students working on the composition of their dissertations and journal articles.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 295 - The Pedagogy of Sociology (2)

Graduate students develop, enhance, or deepen their pedagogical knowledge and skills in the field of sociology and other social sciences.

Prerequisite: Enrollment is restricted to sociology graduate students at all stages of their graduate careers.

SOCY 297 - Independent Study (5)

Students submit petition to sponsoring agency.

SOCY 299 - Thesis Research (5)

Students submit petition to sponsoring agency.

SPAN - SPANISH

Lower-Division

SPAN 1 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week.

Prerequisite: Prerequisite(s): Placement into Spanish 1 via the online Spanish Placement Examination.

SPAN 2 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week.

Prerequisite: Prerequisite(s): SPAN 1 or placement into Spanish 2 via the online Spanish Placement Examination.

SPAN 3 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week.

Prerequisite: Prerequisite(s): SPAN 2 or placement into SPAN 3 via the online Spanish Placement Examination.

SPAN 4 - Second-Year Spanish (5)

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various sociopolitical and cultural issues in the Spanish-speaking world. Classes are conducted in Spanish.

Prerequisite: Prerequisite(s): SPAN 1B or SPAN 3 or placement into SPAN 4 via the online Spanish Placement Examination.

SPAN 5 - Second-Year Spanish (5)

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various socio-political and cultural issues in the Spanish-speaking world. Classes are conducted in Spanish.

Prerequisite: Prerequisite(s): SPAN 4 or placement into SPAN 5 via the online Spanish Placement Examination.

SPAN 5M - Medical Spanish (5)

Students learn medical vocabulary, useful expressions, suitable grammatical structures, and cultural background to be able to interact with Spanish-speaking patients and doctors. Medical Spanish fulfills language requirement for Human Biology majors.

Prerequisite: Prerequisite(s): SPAN 4; or SPHS 4, or SPHS 5, or SPHS 6; or placement into SPAN 5 or SPHS 4 via the online Spanish Placement Examination. Enrollment is restricted to human biology majors.

SPAN 6 - Second-Year Spanish (5)

Increases oral and written proficiency using authentic reading materials which focus on such topics as social class, ethnicity, education, religion, economic, and political developments in the Spanish-speaking world.

Prerequisite: Prerequisite(s): SPAN 5 or SPAN 5M or placement into SPAN 6 via the online Spanish Placement Examination.

SPAN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPAN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

SPAN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

SPAN 114 - Advanced Conversation and Composition (5)

Advanced conversation and composition based on extensive readings in the humanities and social sciences. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; SPAN 6, or SPHS 6, or by instructor consent.

SPAN 140 - Sounds of Spanish (5)

Examines the sound system of Spanish, compares the English and Spanish systems of pronunciation, and teaches the phonetic/phonological variation across dialects of Spanish.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6; and LING 50.

SPAN 141 - Advanced Spanish Grammar (5)

This practical course builds upon students' existing knowledge of Spanish grammar. Introducing linguistic framework, some analysis tools, and intensive practice, it aims at fostering students' reflection about Spanish grammar, consolidating their knowledge of the system of rules underlying it, and improving their grammatical accuracy.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or equivalent proficiency.

SPAN 142 - El mundo de las palabras. Spanish Morphology and Lexicon (5)

Deals with topics related to processes of word formation in Spanish, extending to some issues related to the syntax and morphology of set phrases as well as topics related to lexicon. One of the goals is to widen students' knowledge of Spanish vocabulary.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or equivalent proficiency. Enrollment is restricted to Spanish studies majors and minors.

SPAN 150 - Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics (5)

Taught in Spanish. Students learn the major properties of the Spanish language from a linguistics perspective. Topics covered include: phonetics/phonology, morphology, and syntax.

Prerequisite: Prerequisite(s): LING 50; and SPAN 6 or SPHS 6 or equivalent Spanish proficiency.

SPAN 151 - Topics in Hispanic Linguistics: Varieties of Spanish (5)

Taught in Spanish. Explores the linguistic variety of the Spanish language in the Iberian Peninsula, the former Spanish colonies, and the Americas from a descriptive, synchronic perspective. Issues of languages in contact, variation in speech communities, and bilingualism are also introduced.

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 152 - Topics in Hispanic Linguistics: Spanish in the U.S. (5)

Taught in Spanish. Serves as a linguistic introduction to the varieties of Spanish that are currently spoken in the United States. Some central topics include: code-switching, language maintenance, and language contact phenomena.

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 153 - Topics in Hispanic Linguistics: Spanish as a Second Language (5)

Taught in Spanish. Examines the Spanish language as it is acquired and used by non-native speakers. Provides

an overview of language-teaching methodologies and in-depth treatment of areas of Spanish grammar/lexicon that are generally problematic for English-speaking learners.

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 154 - Topics in Hispanic Linguistics: Spanish Pragmatics (5)

Explores how Spanish is used in context by speakers to achieve particular meanings and to realize various speech acts (e.g., requests, apologies, etc.) in socially appropriate ways. Pragmatic variation across the Spanish-speaking world is examined in depth.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6; and SPAN 150. Enrollment is restricted to juniors and seniors majoring in Spanish studies, language studies or linguistics.

SPAN 155 - Topics in Hispanic Linguistics: Language Contact in the Spanish Speaking World (5)

Explores language contact in the Spanish-speaking world from a linguistic and a sociocultural perspective. Analyzes contact-induced change in Spanish and in the languages with which Spanish is in contact. Students also discuss social identity, linguistic attitudes and ideologies, and language maintenance and revitalization. Prerequisite(s): Spanish 150.

Prerequisite: Prerequisite(s): Spanish 150.

SPAN 156A - The Language of Latin America Cinema (5)

Explores Latin American culture through its cinematic art. Students are exposed to and participate in discussion, analysis, and commentary on important social, historical, and political issues presented in the films. Provides a greater understanding of Latin America, and works toward advanced communicative proficiency and comprehension of linguistic variations in countries such as Cuba, Argentina, México, Bolivia, Chile, and others.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into SPAN 156A via the online Spanish Placement Examination.

SPAN 156E - Spanish Culture (5)

A broad survey of Spanish cultural topics, including history, politics, religions, art forms, music, and films. It is based on extensive conversations, discussion, and composition. Particular emphasis is placed on key changes that have occurred during the 20th century in Spain. Classes conducted through commentary on texts read (or viewed), oral presentations, and debate. Recommended for students preparing to go to Spain with EAP.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into SPAN 156E via the online Spanish Placement Examination.

SPAN 156F - El Humor en Español (5)

Topic-oriented language course on sociopolitical and historical issues as seen through humor in different genres and media. Topics include Mafalda and Condorito (comic strips), Rius (collage of comic strips, photographs and original documents), Continflas and Almodovar (cinema), El Teatro Campesino (theater), Ana L., Vega (literature), Les Luthiers (song and music). Course deals with written and oral discourse pertaining to the following Spanish language varieties: Rio de la Plata, Mexican, Caribbean, U.S., and Peninsular. Intensive writing and speaking in Spanish.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into SPAN 156F via the online Spanish Placement Examination.

SPAN 156J - Contemporary Central America (5)

Introduces Central American cultures, including an overview of historical, political, and socioeconomic development, and cultural products, such as literature, film, and visual arts. Emphasis placed on the forces that shaped contemporary Central America, cultural and ethnic diversity, identity, revolutionary processes, diaspora, and building democracy in post-civil conflict societies. Draws attention to the linguistic features of Central American variations of Spanish. The class is conducted in Spanish with high expectations to enhance oral and written proficiency through writing assignments, research tasks, group presentations, analysis, discussion, and debate.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into Spanish 156J via the online Spanish Placement Examination.

SPAN 156K - Spanish Discourse Analysis (5)

Focuses on the main linguistic approaches that have discourse (i.e. pieces of talk larger than a sentence) as their main object of study. Reviews the theoretical foundations of each approach and the main tools used, with special attention to those studies developed about Spanish in all its varieties.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6, and LING 50.

SPAN 156L - Society and Sustainability in Latin America (5)

Explores environmental issues in Latin America and their impact on contemporary society. Topics relate to indigenous communities, the management of natural resources, and include a Reacting to the Past role-playing game, "Negotiating a Rainforest's Ransom: Ecuador 2007-2013."

Prerequisite: Prerequisite(s): Span 6 or SPHS 6 or equivalent Spanish proficiency.

SPAN 156M - Mexico and the Southwest (5)

An interdisciplinary survey of the cultural history of the Mexican people in both Mexico and the U.S. Southwest. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. May be counted toward fulfillment of upper-division major requirements for Latin American and Latino studies and language studies.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or equivalent Spanish proficiency.

SPAN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPAN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SPAN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

SPHS - SPANISH FOR HERITAGE SPEAKERS

Lower-Division

SPHS 4 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills (listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on the United States, Mexico, and Spain. Students need to use the self-placement questionnaire posted on the Languages and Applied Linguistics web page. The Spanish Placement Exam can be taken but it is not required.

SPHS 5 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills (listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on Central America and the Caribbean.

Prerequisite: Prerequisite(s): SPHS 4 or by consent of program coordinator.

SPHS 6 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills

(listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on South America.

Prerequisite: Prerequisite(s): SPHS 5.

SPHS 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPHS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

SPHS 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

SPHS 115 - El ensayo lectura, analisis y redaccion (5)

Centers on three areas: essay reading, essay analysis and interpretation, and essay writing. Student read representative essays by Latin American writers, analyze their discourse structure, and apply the lessons learned to their own writing.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; SPAN 6 or SPHS 6. Enrollment restricted to sophomore, junior, and senior Spanish studies majors.

SPHS 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor.

SPHS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SPHS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

STAT - STATISTICS

Lower-Division

STAT 5 - Statistics (5)

Introduction to statistical methods/reasoning, including descriptive methods, data-gathering (experimental design and sample surveys), probability, interval estimation, significance tests, one- and two-sample problems, categorical data analysis, correlation and regression. Emphasis on applications to the natural and social sciences. Students cannot receive credit for this course if they have already received credit for STAT 7. (Formerly AMS 5.)

STAT 7 - Statistical Methods for the Biological,

Environmental, and Health Sciences (5)

Case-study-based introduction to statistical methods as practiced in the biological, environmental, and health sciences. Descriptive methods, experimental design, probability, interval estimation, hypothesis testing, one- and two-sample problems, power and sample size calculations, simple correlation and simple linear regression, one-way analysis of variance, categorical data analysis. (Formerly AMS 7.)

Prerequisite: Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), or AM 3 or AM 6 or AM 11A or AM 15A or MATH 3 or MATH 11A or MATH 19A. Concurrent enrollment in STAT 7L is required.

STAT 7L - Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory (2)

Computer-based laboratory course in which students gain hands-on experience in analysis of data sets arising from statistical problem-solving in the biological, environmental, and health sciences. Descriptive methods, interval estimation, hypothesis testing, one- and two-sample problems, correlation and regression, one-way analysis of variance, categorical data analysis. (Formerly AMS 7L.)

Prerequisite: Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), AM 3 or AM 6 or AM 11A or AM 15A or MATH 3 or MATH 11A or MATH 19A. Concurrent enrollment in STAT 7 is required.

STAT 17 - Statistical Methods for Business and Economics (5)

Introduction to statistical methods as practiced in business and economics. Topics include descriptive methods, probability, random variables, expected values, sampling, estimation, confidence intervals, hypothesis testing, one- and two-sample problems, power and sample size calculations, correlation, and simple linear regression. Prerequisite(s): concurrent enrollment in STAT 17L; and score of 300 or higher on the mathematics placement examination (MPE), or AM 3 or AM 11A or MATH 3 or MATH 11A. Completion of MATH 19A is strongly recommended.

Prerequisite: Prerequisite(s): Score of 300 or higher on the mathematics placement examination (MPE), or AM 3 or AM 11A or MATH 3 or MATH 11A. Completion of MATH 19A is strongly recommended. Concurrent enrollment in STAT 17L is required.

STAT 17L - Statistical Methods for Business and Economics Laboratory (2)

Overview and basic training in statistical programs used in the economics major. Introduces students to basic data analysis workflow. A workflow of data analysis is a process for managing all aspects of data analysis. Planning, documenting, and organizing work; cleaning the data; creating, renaming, and verifying variables;

creating summary statistics; and archiving what has been done are all integral parts of students' data analysis. This is an online asynchronous lab, with synchronous office hours/question and answer sessions. Prerequisites: concurrent enrollment in STAT 17; and score of 300 or higher on (MPE), or AM 3 or AM 11A. MATH 3 or MATH 11A strongly recommended. See Economics Department to petition for exceptions to concurrent enrollment restriction.

Prerequisite: Prerequisite(s): concurrent enrollment in STAT 17; and score of 300 or higher on the mathematics placement examination (MPE), or AM 3 or AM 11A. MATH 3 or MATH 11A strongly recommended. See economics department to petition for exceptions to this concurrent enrollment restriction.

STAT 80A - Gambling and Gaming (5)

Games of chance and strategy motivated early developments in probability, statistics, and decision theory. Course uses popular games to introduce students to these concepts, which underpin recent scientific developments in economics, genetics, ecology, and physics. (Formerly AMS 80A.)

STAT 80B - Data Visualization (5)

Introduces the use of complex-data graphical representations to extract information from data. Topics include: summary statistics, boxplots, histograms, dotplots, scatterplots, bubble plots, and map-creation, as well as visualization of trees and hierarchies, networks and graphs, and text. (Formerly AMS 80B.)

Upper-Division

STAT 108 - Linear Regression (5)

Covers simple linear regression, multiple regression, and analysis of variance models. Students learn to use the software package R to perform the analysis, and to construct a clear technical report on their analysis, readable by either scientists or nontechnical audiences. (Formerly AMS 156.)

Prerequisite: Prerequisite(s): STAT 132 and satisfaction of the Entry Level Writing and Composition requirements.

STAT 131 - Introduction to Probability Theory (5)

Introduction to probability theory and its applications. Combinatorial analysis, axioms of probability and independence, random variables (discrete and continuous), joint probability distributions, properties of expectation, Central Limit Theorem, Law of Large Numbers, Markov chains. Students cannot receive credit for this course and STAT 203 and CMPE 107. (Formerly AMS 131.)

Prerequisite: Prerequisite(s): AM 11B or ECON 11B or MATH 11B or MATH 19B or MATH 20B.

STAT 132 - Classical and Bayesian Inference (5)

Introduction to statistical inference at a calculus-based level: maximum likelihood estimation, sufficient statistics, distributions of estimators, confidence intervals, hypothesis testing, and Bayesian inference. (Formerly AMS 132.)

Prerequisite: Prerequisite(s): STAT 131 or CSE 107.

STAT 198 - Independent Study or Research (5)

Students submit petition to sponsoring agency.

STAT 198F - Independent Study or Research (2)

Students submit petition to sponsoring agency.

Graduate

STAT 200 - Research and Teaching in Statistics (3)

Focuses on basic teaching techniques for teaching assistants, including responsibilities and rights, leading discussion or lab sessions, presentation techniques, maintaining class records, and grading. Examines research and professional training, including use of library, technical writing, giving seminar and conference talks, and ethical issues in science and engineering.

Prerequisite: Enrollment is restricted to graduate students.

STAT 202 - Linear Models in SAS (5)

Case study-based course teaches statistical linear modeling using the SAS software package. Teaches generalized linear models; linear regression; analysis of variance/covariance; analysis of data with random effects and repeated measures. (Formerly AMS 202.)

Prerequisite: Prerequisite(s): STAT 108 or STAT 208, or permission of instructor. Enrollment is restricted to graduate students.

STAT 203 - Introduction to Probability Theory (5)

Introduces probability theory and its applications. Requires a multivariate calculus background, but has no measure theoretic content. Topics include: combinatorial analysis; axioms of probability; random variables (discrete and continuous); joint probability distributions; expectation and higher moments; central limit theorem; law of large numbers; and Markov chains. Students cannot receive credit for this course and STAT 131 or CMPE 107. (Formerly AMS 203.)

Prerequisite: Enrollment is restricted to graduate students, or by permission of the instructor.

STAT 204 - Introduction to Statistical Data Analysis (5)

Presents tools for exploratory data analysis (EDA) and statistical modeling in R. Topics include numerical and graphical tools for EDA, linear and logistic regression, ANOVA, PCA, and tools for acquiring and storing

large data. No R knowledge is required. Enrollment is restricted to graduate students and by permission of instructor. (Formerly AMS 204.)

Prerequisite: Enrollment restricted to graduate students.

STAT 205 - Introduction to Classical Statistical Learning (5)

Introduction to classical statistical inference. Topic include: random variables and distributions; types of convergence; central limit theorems; maximum likelihood estimation; Newton-Raphson, Fisher scoring, Expectation-Maximization, and stochastic gradient algorithms; confidence intervals; hypothesis testing; ridge regression, lasso, and elastic net.

Prerequisite: Prerequisite(s): STAT 203. Enrollment is restricted to graduate students.

STAT 205B - Intermediate Classical Inference (5)

Statistical inference from a frequentist point of view. Properties of random samples; convergence concepts applied to point estimators; principles of statistical inference; obtaining and evaluating point estimators with particular attention to maximum likelihood estimates and their properties; obtaining and evaluating interval estimators; and hypothesis testing methods and their properties. (Formerly AMS 205B.)

Prerequisite: Prerequisite(s): STAT 203 or equivalent. Enrollment is restricted to graduate students.

STAT 206 - Applied Bayesian Statistics (5)

Introduces Bayesian statistical modeling from a practitioner's perspective. Covers basic concepts (e.g., prior-posterior updating, Bayes factors, conjugacy, hierarchical modeling, shrinkage, etc.), computational tools (Markov chain Monte Carlo, Laplace approximations), and Bayesian inference for some specific models widely used in the literature (linear and generalized linear mixed models). (Formerly AMS 206.)

Prerequisite: Prerequisite(s): STAT 131 or STAT 203, or by permission of the instructor. Enrollment is restricted to graduate students.

STAT 206B - Intermediate Bayesian Inference (5)

Bayesian statistical methods for inference and prediction including: estimation; model selection and prediction; exchangeability; prior, likelihood, posterior, and predictive distributions; coherence and calibration; conjugate analysis; Markov Chain Monte Carlo methods for simulation-based computation; hierarchical modeling; Bayesian model diagnostics, model selection, and sensitivity analysis. (Formerly AMS 206B.)

Prerequisite: Prerequisite(s): STAT 203. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

STAT 207 - Intermediate Bayesian Statistical Modeling

(5)

Hierarchical modeling, linear models (regression and analysis of variance) from the Bayesian point of view, intermediate Markov chain Monte Carlo methods, generalized linear models, multivariate models, mixture models, hidden Markov models. (Formerly AMS 207.)

Prerequisite: Prerequisite(s): STAT 206 or STAT 206B; enrollment is restricted to graduate students or by permission of instructor.

STAT 208 - Linear Statistical Models (5)

Theory, methods, and applications of linear statistical models. Review of simple correlation and simple linear regression. Multiple and partial correlation and multiple linear regression. Analysis of variance and covariance. Linear model diagnostics and model selection. Case studies drawn from natural, social, and medical sciences. STAT 205 strongly recommended as a prerequisite. Undergraduates are encouraged to take this class with permission of instructor. (Formerly AMS 256.)

Prerequisite: Prerequisite(s): course STAT 205B or permission of instructor. Enrollment is restricted to graduate students.

STAT 209 - Generalized Linear Models (5)

Theory, methods, and applications of generalized linear statistical models; review of linear models; binomial models for binary responses (including logistical regression and probit models); log-linear models for categorical data analysis; and Poisson models for count data. Case studies drawn from social, engineering, and life sciences. (Formerly AMS 274.)

Prerequisite: Prerequisite(s): STAT 205B or STAT 208. Enrollment is restricted to graduate students.

STAT 222 - Bayesian Nonparametric Methods (5)

Theory, methods, and applications of Bayesian nonparametric modeling. Prior probability models for spaces of functions. Dirichlet processes. Polya trees. Nonparametric mixtures. Models for regression, survival analysis, categorical data analysis, and spatial statistics. Examples drawn from social, engineering, and life sciences. (Formerly AMS 241.)

Prerequisite: Prerequisite(s): STAT 207. Enrollment is restricted to graduate students.

STAT 223 - Time Series Analysis (5)

Graduate level introductory course on time series data and models in the time and frequency domains: descriptive time series methods; the periodogram; basic theory of stationary processes; linear filters; spectral analysis; time series analysis for repeated measurements; ARIMA models; introduction to Bayesian spectral analysis; Bayesian learning, forecasting, and smoothing; introduction to Bayesian Dynamic Linear Models (DLMs); DLM mathematical

structure; DLMs for trends and seasonal patterns; and autoregression and time series regression models. (Formerly AMS 223.)

Prerequisite: Prerequisite(s): STAT 206B, or by permission of instructor. Enrollment is restricted to graduate students.

STAT 224 - Bayesian Survival Analysis and Clinical Design (5)

Introduction to Bayesian statistical methods for survival analysis and clinical trial design: parametric and semiparametric models for survival data, frailty models, cure rate models, the design of clinical studies in phase I/II/III. (Formerly AMS 276.)

Prerequisite: Prerequisite(s): STAT 207 or by permission of instructor. Enrollment is restricted to graduate students.

STAT 225 - Multivariate Statistical Methods (5)

Introduction to statistical methods for analyzing data sets in which two or more variables play the role of outcome or response. Descriptive methods for multivariate data. Matrix algebra and random vectors. The multivariate normal distribution. Likelihood and Bayesian inferences about multivariate mean vectors. Analysis of covariance structure: principle components, factor analysis. Discriminant, classification and cluster analysis. (Formerly AMS 225.)

Prerequisite: Prerequisite(s): STAT 206 or STAT 206B, or by permission of instructor. Enrollment is restricted to graduate students.

STAT 226 - Spatial Statistics (5)

Introduction to the analysis of spatial data: theory of correlation structures and variograms; kriging and Gaussian processes; Markov random fields; fitting models to data; computational techniques; frequentist and Bayesian approaches. (Formerly AMS 245.)

Prerequisite: Prerequisite(s): STAT 207. Enrollment is restricted to graduate students.

STAT 227 - Statistical Learning and High Dimensional Data Analysis (5)

Introductions to statistical learning, modeling, and inference with complex, large, and high-dimensional data. Topics include supervised and unsupervised learning, model selection, dimension reduction, matrix factorization, latent variable models, graphical models, interpretability and causality. Applications in health, social sciences, and engineering.

Prerequisite: Prerequisite(s): STAT 207. STAT 205 is recommended. Enrollment is restricted to graduate students.

STAT 229 - Advanced Bayesian Computation (5)

Teaches some advanced techniques in Bayesian Computation. Topics include Hamiltonian Monte Carlo;

slice sampling; sequential Monte Carlo; assumed density filtering; expectation propagation; stochastic gradient descent; approximate Markov chain Monte Carlo; variational inference; and stochastic variational inference. (Formerly AMS 268.)

Prerequisite: Prerequisite(s): STAT 207, or by permission of the instructor. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

STAT 243 - Stochastic Processes (5)

Includes probabilistic and statistical analysis of random processes, continuous-time Markov chains, hidden Markov models, point processes, Markov random fields, spatial and spatio-temporal processes, and statistical modeling and inference in stochastic processes. Applications to a variety of fields. (Formerly AMS 263.)

Prerequisite: Prerequisite(s): STAT 205B or STAT 246, or by permission of instructor.

STAT 244 - Bayesian Decision Theory (5)

Explores conceptual and theoretical bases of statistical decision making under uncertainty. Focuses on axiomatic foundations of expected utility, elicitation of subjective probabilities and utilities, and the value of information and modern computational methods for decision problems. (Formerly AMS 221.)

Prerequisite: Prerequisite(s): STAT 206. Enrollment is restricted to graduate students.

STAT 246 - Probability Theory with Markov Chains (5)

Introduction to probability theory: probability spaces, expectation as Lebesgue integral, characteristic functions, modes of convergence, conditional probability and expectation, discrete-state Markov chains, stationary distributions, limit theorems, ergodic theorem, continuous-state Markov chains, applications to Markov chain Monte Carlo methods. (Formerly AMS 261.)

Prerequisite: Prerequisite(s): STAT 205B or by permission of instructor. Enrollment is restricted to graduate students.

STAT 266A - Data Visualization and Statistical Programming in R (3)

Introduces students to data visualization and statistical programming techniques using the R language. Covers the basics of the language, descriptive statistics, visual analytics, and applied linear regression. Enrollment is by permission of the instructor. (Formerly Applied Math and Statistics 266A and Computer Science 266A.)

STAT 266B - Advanced Statistical Programming in R (3)

Teaches students already familiar with the R language advanced tools such as interactive graphics, interfacing with low-level languages, package construction,

debugging, profiling, and parallel computation. (Formerly Applied Math and Statistics 266B and Computer Science 266B.)

Prerequisite: Prerequisite(s): STAT 266A or CSE 266A.

STAT 266C - Introduction to Data Wrangling (3)

Introduces students to concepts and tools associated with data collection, curation, manipulation, and cleaning including an introduction to relational databases and SQL, regular expressions, API usage, and web scraping using Python. (Formerly Applied Math and Statistics 266C and Computer Science 266C.)

Prerequisite: Prerequisite(s): STAT 266A or CSE 266A.

STAT 280B - Seminars in Statistics (2)

Weekly seminar series covering topics of current research in statistics.

Prerequisite: Enrollment is restricted to graduate students.

STAT 280D - Seminar in Bayesian Statistical Methodology (2)

Weekly seminar/discussion group on Bayesian statistical methods, covering both analytical and computational approaches. Participants present research progress and finding in semiformal discussions. Students must present their own research on a regular basis. (Formerly AMS 280D.)

Prerequisite: Enrollment is restricted to graduate students.

STAT 285 - Seminar in Career Skills (2)

Seminar in career skills for applied mathematicians and statisticians. Learn about professional activities such as the publication process, grant proposals, and the job market.

Prerequisite: Enrollment is restricted to graduate students, typically within two years of their expected Ph.D. completion date.

STAT 291 - Advanced Topics in Bayesian Statistics (3)

Advanced study of research topics in the theory, methods, or applications of Bayesian statistics. The specific subject depends on the instructor. Enrollment is restricted to graduate students and by permission of instructor. (Formerly AMS 291.)

STAT 296 - Masters Project (2)

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297F - Independent Study (2)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 299A - Thesis Research (5)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STAT 299B - Thesis Research (10)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STAT 299C - Thesis Research (15)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STEV - STEVENSON COLLEGE

Lower-Division

STEV 1 - Academic Literacy and Ethos: Self and Society (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Examines the roots of modern society using diverse religious texts and major classical and modern philosophical works.

Prerequisite: Enrollment is restricted to first-year college members.

STEV 1A - Introduction to University Life and Learning (1)

Orientation to and an exploration of the nature of the liberal arts, and of learning at research universities. Topics include: academic planning for upper-division coursework; enrollment processes; and understanding

pathways to degree completion; UCSC resources that support health and well-being; strategies for academic success; the cultivation of just communities; the prevention of sexual harassment and violence; campus conduct policies; awareness of risks associated with drug and/or alcohol use; and an introduction to traditions of community-engaged learning, ground-breaking research, and interdisciplinary thinking that define a UC Santa Cruz degree. This course can be taken for Pass/No Pass grading only.

Prerequisite: Enrollment is restricted to entering first-year Stevenson College students.

STEV 2 - Self and Society 2 (5)

Winter quarter of Stevenson's core course continues development of analytical writing, critical reading, and effective speaking in exploring conflicts inherent in modern society. Investigates themes of colonization, race, gender, class, and cultural conflict. (Formerly course 81A.)

Prerequisite: Enrollment is restricted to first-year and sophomore college members.

STEV 10 - Skills for College and Beyond (2)

Applications of practical skills for effective, meaningful study in the context of a full, busy life. Topics include learning styles, time management, test preparation, and life balance. Specific techniques for efficient reading comprehension, note-taking, memorization, and self-assessment are introduced. Enrollment restricted to college members and by permission of instructor.

STEV 16 - Stevenson Community Garden (2)

Hands-on course in ecological horticulture at the Stevenson garden. Students grow the Stevenson community through gardening and projects focused on building a healthy and regenerative local-foods culture. Enrollment by interview only. Enrollment restricted to Stevenson College members.

STEV 21 - Citizens and Nations: Self and Society in the 19th Century (2)

A reading seminar focusing on a set of key texts. Examines how the political and industrial revolutions of the 19th century fundamentally transformed the relationships between individuals and their respective societies.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 22 - Self and Society in Classical Social Theory (2)

Reading seminar focusing on a set of key texts from classical social theory. Explores the transition from traditional to modern societies. Authors addressed may include Locke, Rousseau, de Tocqueville, Marx, Weber, and Durkheim.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and PRTR 26 or KRSG 26.

Prerequisite: Enrollment is restricted to first-year students.

STEV 27 - Service Learning (2)

This online course frames and supports the service-learning experiences of students engaged in field placements both here in Santa Cruz and in their home communities. Students approach social challenges thematically (e.g., homelessness, environmentalism, domestic violence, etc.) and consider how different disciplines might engage these issues. They consider how our community partners conceptualize and address social issues and how these conceptions connect, or fail to connect, with academic approaches,

STEV 30 - Thesis Writing and Editing (2)

Identifies and examines the assumptions, expectations, and formats of writing in students' fields, with the goal of beginning—or continuing—academic research.

Prerequisite(s): satisfaction of the Composition requirement. Enrollment restricted to junior and senior college members and by permission of instructor.

STEV 33 - Self and Society Examined Through Ethical Dilemmas (2)

Examines ethical dilemmas in contemporary topics, such as the status of moral principles during warfare; animal rights and the ethics of eating meat; privacy in the age of the Internet; imprisonment and rehabilitation; legal and illegal immigration; same-sex marriage; and health care.

STEV 35 - Everyday Ethics for College Life (2)

Exploration of and reflection on everyday values and virtues such as integrity, open-mindedness, honesty, and community. Objectives include learning how to think about moral dilemmas and how to begin drafting one's own code of ethics.

Prerequisite: Enrollment is restricted to college members.

STEV 37 - Critical Thinking and Skepticism (5)

Focuses on the acquisition and application of critical thinking skills and examines skeptical perspectives on a variety of issues. Topics include rationality, fallacies, cognitive biases, religion and the paranormal, media

biases, and the costs and benefits of arguing with people.

STEV 41 - Spirituality in a Modern World (2)

Investigates scientific and pragmatic perspectives on spirituality from William James to Fritjof Capra. Explores spirituality in Western and Eastern traditions from Martin Buber to Pema Chodron. Students analyze, support, and articulate their spiritual positions in a culminating paper.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 43 - Comparative Nationalisms in Historical Perspective (5)

From the white nationalist demonstrations in the USA to Brexit and the resurgence of populist movements in India and Europe, nationalism is resurgent worldwide. In this course, students conduct research into a current nationalist movement of their choice.

Prerequisite: Enrollment restricted to students in the College Scholars Program.

STEV 50A - Stevenson Alumni Careers in Law (2)

Connecting Stevenson students with alumni who provide practical advice for careers in law. Topics covered include the variety of career possibilities in law, preparing for law school, internships, networking, applying for jobs, and interviewing.

Prerequisite: Enrollment is restricted to College members.

STEV 50B - Stevenson Alumni Careers in Science and Technology (2)

Connecting Stevenson students with alumni who provide practical advice for careers in science and technology. Topics covered include internships, graduate school, networking, applying for jobs, interviewing, and adapting to a rapidly changing job market.

Prerequisite: Enrollment is restricted to College members.

STEV 80F - Academic Success in the College Core Course (3)

Provides support for reading, understanding, and engaging with difficult Core texts; models and facilitates college-level discussion; provides instruction in collaborative processes; encourages community-building with the college; and helps acclimate students to university culture. Enrollment is restricted to first-year Stevenson students who have been placed in the Multilingual Curriculum.

STEV 80G - Self and Society Through Film (5)

Uses feature films and documentaries to address and discuss perspectives of self and society. Films include Star Wars, The Hunger Games, and The Matrix.

STEV 80H - Rainbow Theater: An Introduction to Multicultural Theater (5)

Introduction to Asian American, Chicano/Latino, and African American plays through reading of major authors, discussion of social and historical context of their work, and development of a production of a one-act play from each cultural group. In-depth examination of key historical context of these three cultural groups. Video presentations followed by class discussion. Enrollment by audition.

STEV 80T - Self and Society for Transfer Students (5)

Condensed version of Stevenson's core course for transfer students. Develops analytical writing, critical reading, and effective speaking by considering influential philosophical works while exploring cultural conflicts in modern society. Themes include imperialism, racism, and class conflict.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to college members.

STEV 96 - Theory and Practice of Peer-Guided Learning for Tutors and Learning Assistants (2)

Provides first-time tutors and supplemental-instruction learning assistants with the theoretical background and practical interactive teaching and learning strategies essential for planning, implementing, and evaluating effective peer-guided learning.

STEV 99 - Tutorial (5)

Tutorial

Upper-Division**STEV 120 - Self and Society: Teaching Practicum (5)**

In pairs, students facilitate one seminar section of STEV 2, attend lectures, and meet with faculty for mentoring and guidance through the teaching process. Students are responsible for designing and executing lesson plans, creating assignments, and for evaluating student work. Prerequisite(s): STEV 80 or STEV 1, and STEV 81 or STEV 2. Admission to the program by application and subsequent interview. Applications are available each fall in early October from the college office and interviews are conducted in early November. Qualifications include, but are not limited to, excellent performance in the core courses, good academic standing, leadership experience, genuine passion for teaching, and caring for fellow students. Strong candidates will be skilled in time management, organization, communication, and judgment.

STEV 136 - Imagination (5)

Examines contemporary perspectives on the theme of imagination. Course readings include philosophical treatments of imagination, Indigenous imaginative cultural formations, and Black radical imaginations for socio-spatial liberation. Addresses the following questions: To what extent is imagination tied to our particular position, culture, and time period? What are some ways to expand our imaginations and when are these approaches limited? And how can imagination help us advance radical social change? Explores imagination as an inherently cross-cultural topic and teaches students to present, analyze, and critically discuss philosophical and sociological arguments about imagination. Students cannot receive credit for this course and PHIL 136C, PRTR 175A / PHIL 136B, or COWL 175A/PHIL 136A.

STEV 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision (see course 42). Prerequisite(s): upper-division standing and a proposal supported by a faculty member willing to supervise.

STEV 193 - Field Study (5)

Provides for individual programs of study, sponsored by the college and performed off-campus. This course may be counted for up to three courses of credit in any quarter. Prerequisite(s): approval of student's adviser and the academic preceptor, and, in the case of full-time study, the board of studies supervising the major.

STEV 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty instructor. Enrollment restricted to members of Stevenson College. Enrollment limited to 12.

STEV 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Course designed for members of Stevenson College. Students submit petition to sponsoring agency. Enrollment limited to 10.

STEV 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, approval by the academic preceptor.

STEV 198F - Independent Field Study (2)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be take for credit in any

one quarter. Students submit petition to sponsoring agency. Requires approval of the student's adviser and academic preceptor

STEV 199 - Tutorial (5)

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency.

STEV 199F - Tutorial (2)

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency.

THEA - THEATER ARTS

Lower-Division

THEA 7 - The Arts Dean's Lecture Series on the Art of Change with Lyle Troxell of Netflix (2)

Course features a distinguished roster of guest speakers of arts practitioners and educators who provide illuminating insights and personal stories on the artistic character that can shape a creative life dedicated to social change. Speakers cover a lively range of topics, ranging from the importance of habits of heart and mind that can transform "some thing" into something "original" to the ways the arts create productive change. Taught by Lyle Troxell, host of the WeAreNetflix Podcast. (Formerly Arts Dean's Lecture Series on Creative Entrepreneurship.)

THEA 8 - Introduction to Iranian Theatre (2)

Introduces Iranian theater covering Ta'zieh religious performance, Ruhuzi improvised drama, Naghali storytelling, and modern efforts in national and diasporic theaters fusing indigenous and western styles. No prior knowledge of Iran is required and readings are in English.

THEA 10 - Introduction to Theater Design and Technology (5)

Addresses imagination and creativity. Using the framework of theater production, students explore the process of translating a script into a performance. Topics include visual literacy, creative problem solving, establishing effective working teams, tear sheets, storyboarding, drawing, sound and color theory. This course is a prerequisite for all upper-division design courses.

THEA 12 - Stage Management (5)

Designed to acquaint students with the complexities of staging productions from the audition process to final performance. Directing, lighting, scenic production, sound, cueing, and personnel management are aspects that will be touched upon in class.

THEA 14 - Drawing (5)

A fundamental course in drawing from still life, the figure, and in the landscape. The approach is from the tonal and volumetric aspects of the object. Color is introduced as the course progresses. Instruction fashioned to the individual needs of the student. The inexperienced are welcomed as well as the experienced.

THEA 15 - Special Topics in Textiles (5)

Introduces varied techniques in textile manipulation to create scenic and costume-design properties including drapery, upholstery, masks, bags, and millinery. Students learn basic sewing and surface-design methods, such as knitting, screen-printing, painting/dyeing, and distressing.

THEA 17 - Costume Construction (5)

The process of interpreting a costume designer's sketch into a finished theatrical costume. Some techniques included are dyeing, fabric selection, draping, flat pattern drafting, pattern manipulation, adaptation, fitting, and alteration. Using various techniques, students make basic pattern pieces and learn to modify them to create costumes.

THEA 18 - Drafting for Theatrical Production (5)

An examination of the fundamentals of drafting scale drawings for production, including floor plans, elevations, sections, working drawings, dimensions, layout, and lettering. Students learn isometric drawing, perspective, and rendering techniques.

THEA 18C - Drafting-Computer Aided (5)

In-depth exploration of computer-aided drafting, specifically the programs Vectorworks, Spotlight, and Renderworks. Topics include: the user interface, ground plan, section and detail views, paper space vs. working space, tool palettes, USITT drafting standards, layers, line weights, objects, classes, library annotations, importing rasters, and 3D modeling. Students required to do weekly projects such as ground plans, lighting plots, perspectives, and detail drawings, as well as turn in a major final project, and complete a mid-term, final, and quizzes.

Prerequisite: Enrollment is restricted to theater arts majors.

THEA 19 - Design Studio: Lighting Studio A (5)

An introduction to the theory and practice of lighting design with attention to the practical skills and creative approaches to lighting performance pieces; the technical side of lighting design via demonstrations, lectures, and labs. Students complete projects evolving and executing concepts for lighting chosen pieces.

Prerequisite: Prerequisite(s): THEA 10.

THEA 20 - Introductory Studies in Acting (5)

Introduction to basic acting skills and the problems of performance. Concentrates on expanding a range of expression and ability to respond to and analyze dramatic text. Designed for students with little or no experience in acting.

THEA 21 - Acting Studio I: Psychological Realism (5)

Explores the fundamentals from the work of Konstantin Stanislavski as developed at the Moscow Art Theater to the works of his and our contemporary playwrights. Specifically, students apply those techniques of action, physical score, given circumstances, subtext, interior monologue, goals, and objectives, throughline, superobjective, and emotional recall to works of Henrik Ibsen, Anton Chekov, and relevant American realists, such as Sam Shepard, August Wilson, etc. Designed for students focused on acting as an academic or professional discipline. Admission by audition at first class meeting (see the department office or theater.ucsc.edu for more information). (Formerly course 21A, Acting Studio 1A: Psychological Realism.)

THEA 22 - Indonesian Dance and Drama (5)

Students learn the basic movement repertoire of the specific characters of the Indonesian dance-drama/puppetry tradition over the quarter with explication of how these types operate in their own cultural context. Course culminates in an open showing of scene work.

THEA 23 - Voice for the Actor (5)

Introduces using the spoken voice effectively and powerfully on stage and off. Physical release, alignment, breath, resonance, and articulation are explored. Students gain an understanding of how the voice relates to the self, the body, and breath and become more aware of tensions and habits that may impede vocal and speech use.

THEA 24 - Movement for Performers (5)

Students develop awareness and extension of personal movement repertoire through observation, movement experience, and exploration.

THEA 25 - Understanding Shakespeare (5)

Emphasizes key theoretical and practical modes of dramaturgy in order to research, analyze, and interpret the dramatic works and performances of Shakespeare within historical and contemporary contexts.

THEA 30 - Introduction to Dance Theory and Technique (5)

Intensive instruction in developing the dancer's mind/body, with introduction to movement theory and practice.

THEA 31A - Dance Studio I: Asian or Asian Diasporic**Practice (5)**

Introduces Asian or Asian diasporic dance practice through physical training and theoretical engagement. Focuses on basic techniques of performance practice and critical engagement with aesthetic, cultural, and/or historical context.

THEA 31B - Dance Studio I: Ballet (5)

Introduces classical ballet as a form of ethnic dance. Focus on combining basic training in ballet technique with academic studies to achieve a synthesis in the understanding of dance as a performing arts practice in diverse socio-cultural and historical contexts. Emphasis on simple phrasing and articulation into more complex material requiring richer dynamic range. Attention to the anatomical principles that governs ballet mechanics.

THEA 31C - Dance Studio I: Contemporary Dance Theory and Technique (5)

Intensive instruction in contemporary dance technique. Combining movement theory and practice, students will develop basic knowledge of anatomical function (somatics) and a foundational embodiment of contemporary dance technique.

Prerequisite: Prerequisite(s): THEA 30.

THEA 31E - The Dance Experience (2)

Introduction to contemporary dance theory and practice. Focus on basic dance technique, range of styles, and aesthetic points of view of historically significant contemporary dance choreographers in America and worldwide.

THEA 33C - Dance Studio I (5)

Intensive instruction in developing the dancer's physical instrument. Intended for students who have a previous fundamental knowledge of the basics of classic dance, combined with movement theory.

Prerequisite: Prerequisite(s): THEA 30.

THEA 36 - Introduction to Dance Composition (5)

Introduces dance improvisation and choreographic practice. Observation and recognition of personal movement patterns and discovering new sources for creative material.

THEA 37 - African Dance (5)

A griot (musician-entertainer from western Africa) from Burkina Faso teaches The African Journey, which emphasizes dance as combined in Africa, including singing, history, oral tradition, and storytelling.

THEA 38 - Dance on Film (2)

Introduces dance on film, examining such topics as narrative storytelling in dance films (documentary and fiction); cinematic strategies for representing the

kinesthetic; and dance film as a unique and distinct art form.

THEA 40 - Introduction to Directing (5)

An overview of the analytical and creative processes that inform the director's work. Close examination of texts, concepts, and selected directors and directorial choices.

THEA 41 - Fundamentals of Directing (5)

An experience designed to develop an active and creative vision leading to a concept that takes an audience on a memorable journey with lives that are created on the stage. Students direct a monologue, a dual scene, and a final project which represents the collaborative nature of the art of directing. Topics include blocking techniques, history of directing, how to work with designers, rehearsal techniques, and strategies for actor coaching.

THEA 50 - Fundamentals of Theater Production (2)

Work is on various aspects of theatrical production, including scenery, lighting, costumes, sound, stage management, and video documentation. Satisfies the department's technical experience requirement.

THEA 52 - Basic Stagecraft (5)

Provides introduction to technical theater and basic stagecraft. Course examines two-dimensional and three-dimensional scenery, scenic engineering, the physical theater, stage and scene shop equipment, project organization and process, technical theater graphics, materials, and theatrical construction techniques.

Prerequisite: Prerequisite(s): THEA 10.

THEA 55A - Workshop in Performance: Barnstorm (5)

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 150 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information.

THEA 55B - Workshop in Performance: Barnstorm Lab (2)

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 50 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information.

THEA 61A - Ancient and Medieval Drama (5)

Ancient enmities; horrific acts of parricide; monumental errors; suffering and contrition. This course examines the enormous appeal of the ancient Greek tragic and comic visions from their inception through their enthusiastic adaptation by the Romans and on into the Middle Ages. For comparison purposes, Greek and

Roman dramas are studied back-to-back with the contemporary non-Western dramatic forms of Noh and ancient Sanskrit drama.

THEA 61B - Drama from the Renaissance to the Modern Age (5)

Examines major trends in European drama from the rediscovery of ancient Greek and Roman drama in the early 17th century to the late 19th century. Examines major trends in European drama from the discovery of ancient Greek and Roman drama in the early 17th century to the late 19th century. These trends include neo-classical drama, the rise of middle-class drama, social realism, romanticism, early naturalism, and the well-made play. These trends are compared with the parallel developments of the non-Western forms of Japanese Kabuki and Javanese Wayang.

THEA 61C - The Birth of the Modern: Drama and Performance After the Renaissance (5)

Examines dramatic and theatrical works that sprang into being in the wake of the European Renaissance. Follows the ways modern artists have dramatized their questions, struggles, beliefs, and despair in the face of world wars, cultural fragmentation, unprecedented prosperity, and new technologies.

THEA 64 - Shakespeare and Adaptation in Text and Performance (5)

Juxtaposes Shakespeare's plays with sources Shakespeare may have adapted and adaptations that his works, in turn, have spawned. Explores Renaissance stage and printing practices and the processes of adapting for page and stage.

THEA 80A - Introduction to African American Theater (5)

Surveys African American theater from late-19th-century to contemporary 21st-century playwrights and examines dramatic narratives to trace creation, evolution, and development of African American cultural identity formation in American theater.

THEA 80B - Rock 'n' Roll Design (5)

Examination of the genesis, history, and development of technical theater practices used in large arena rock shows. Topics will include the development of rigging practices used in arenas, touring logistics, lighting instrumentation and aesthetics of rock shows, and the nature, practice, and approach of sound in these venues.

THEA 80C - Monsters (5)

Examines the operation of monsters in plays from Ancient Greece to today, inquiring as to why these powerful cultural tools for the expression of social tension show no sign of diminishing despite our ostensible advance into scientific rationalism.

THEA 80D - Commercial Design 1900 to Present (5)

History of 20th-century commercial design for the theater through the eyes of the Western consumer.

THEA 80H - Hamlet Conundrums (5)

Offered online, the course explores major issues of interpretation of Shakespeare's classic play, which has occupied the minds of audiences, directors, designers, performers, and critics during its 400-year history. In doing this, it offers a sense of history of people's preoccupations with and thoughts about the play. Students taking this class are expected to complete the course during the quarter for which they are enrolled. All students enrolled in this course should visit elsinore.ucsc.edu and write to elsinore@ucsc.edu.

THEA 80K - Shakespeare 4every1 (5)

Introduces all students, regardless of experience, to the plays and theater of Shakespeare, and directly addresses linked relevance to contemporary 21st century American culture.

THEA 80L - Muppet Magic: Jim Henson's Art (5)

The artistic and social impact of the Muppets on American puppetry, children's television, and Hollywood film is explored through viewings, guest lectures, and analysis. Henson's legacy in artistic innovation, mainstreaming of puppet theater for adult audiences, and establishment of puppetry in media and marketing are also explored.

THEA 80M - Chicano/a Teatro (5)

Introduction to Teatro Chicano/a with examination of how cultural diversity plays a role in theater. Through lectures, films, and workshop exercises, reflect upon the process of Teatro Chicano. Students write their own acts, improvise, and perform in class.

THEA 80N - Walt Disney (5)

An examination of Walt Disney's creation of the American vision of family entertainment. Particular attention will be paid to the classic animated feature films of Walt Disney and to the way this Disney invention has been preserved and developed since his death. We will also look at the live action films, theme parks, and other Disney creations.

THEA 80P - Pixar - Story Matters (5)

Emphasizes script development by exploring dramatic writings from ancient to contemporary theater, then focusing on Pixar screenplays with their universal themes and compelling characters. Film analysis of Pixar movies delves into animation history, fairytale, psychology, and popular culture.

THEA 80Q - Introduction to Queer Theater (5)

Examines the history of the queer perspective in dramatic literature, from the Greeks to Marlowe and Shakespeare through the calcification of homosexuality

in the era of Freud, then traces theater stewardship by gay and lesbian artists from within the closet and without.

THEA 80R - Bollywood Dance and Culture in India and Indian Diaspora (5)

Bollywood is the largest film industry in the world. Students learn several fundamental footsteps, eye, hand and body movements, to perform Bollywood dance. They also learn various traditions of Indian classical, folk, and Bollywood dance terms.

THEA 80S - Theater Arts Education and the Community (5)

This course is designed to develop ways in which we can direct our interest in the arts into concrete and successful community projects. Although the emphasis will be on developing skills to work within K-12 classrooms, other community projects will be discussed and designed.

THEA 80T - Flashmob! Mass Performance in the Information Age (5)

Flashmobs represent a new social configuration using information technology. Course covers the history of experiments in art and technology and the role of mass performance in society. Students consider the socio-cultural ramifications of flashmobs and participate in them.

THEA 80U - Everybody Dance Now! (5)

Examines dance as a primary mode of human communication and expression. Through readings and the viewing of recorded and live performances, students compare and contrast dance traditions of the world.

THEA 80V - The Circus in American Culture (5)

Circus arts from their shamanic roots to contemporary practice will be analyzed in a historical, aesthetic, and creative dimension. Lecture, discussion, and demonstrations will explore the theory and practice of American circus arts. In section, students will explore basic circus skills from clowning to tumbling to exhibition of freaks.

THEA 80X - The Performance of Story in Theater and Film (5)

An examination of the theory and practice of theater and film, comparing and contrasting works that have been adapted from one genre to another. Lecture, film and video viewing and discussion of materialist, psychoanalytic, and feminist approaches will be shared.

THEA 80Y - American Musical Theater (5)

The history of American musical theater, from its roots to today, is studied through scripts, scores, and film. Major composers and lyricists' work is shown, discussed, and analyzed.

THEA 80Z - Indian Dance (5)

Study of Indian classical dance through embodied training and theoretical engagement. Training in the foundational elements of abstract rhythmic dance, including drum syllables and associated steps, and introduction to abhinaya (storytelling).

THEA 99 - Tutorial (5)

Students must file their petitions for this course with the department office by the end of the fifth day of instruction in the quarter in which they would like to take the tutorial. Prerequisite(s): petition required, approved by instructor and department.

Upper-Division**THEA 100A - Asian Theater/Dance and Global Impacts (5)**

Overview of selected theater/dance performance genres of India, Indonesia, China, Korea, and Japan with attention to how cultural, political, and social flows have impacted contemporary performance in Asia and beyond. Lectures supplemented by workshops.

THEA 100B - Black Theater USA (5)

Spanning slavery, emancipation, reconstruction, the great depression, civil rights, and the black power/black arts movements, course explores African American drama from literary, historical, and biographical perspectives in lecture/discussions, film excerpts, dramatizations, and visits from award-winning guests.

THEA 100C - Courts, Courtesans, Shamans, and Clowns: Asian Drama (5)

Asian court and popular performance are traced. Sanskrit drama is contrasted with Indian epic recitation, medium, and courtesan dance. Gender specialization is noted in Indonesian courts using Indian and local legends in dance, mask/puppetry, and clowning. Buddhist and Confucian impulses in Chinese theater and early Korean and Japanese mask and puppetry are introduced. Students are evaluated on participation, tests, writing, and a performance project.

THEA 100W - Black/African Diasporic World Theater (5)

Examines major black African diasporic playwrights and theater. Focuses on the historical, cultural, and literary contexts that gave rise to the works of dramatists such as Ama Ata Aidoo, Derek Walcott, Wole Soyinke, Aime Cesaire, Debbie Green Tucker, and Paul Boakye.

THEA 103 - Design Concept Development (5)

Students develop an advanced design project related to theatrical production, apparel or housewares, marketing collateral, packaging or product development, or any related fields. Students address research and development, materials sourcing, budgeting,

fabrication, and portfolio-quality presentation materials. Prerequisite(s): THEA 10; or two courses from ART 10D, ART 10E, and ART 10F. Enrollment is by permission of the instructor. THEA 106 is recommended as preparation.

THEA 104 - Multimedia Authoring (5)

Introduces students to basic tools for the creation of multimedia digital projects. Special attention is given to the integration of video, sound, graphics, text and virtual reality and to the creation and execution of strategies for interaction between users and the projects themselves. With this in mind, students design and create computer puzzles and games.

THEA 106 - Digital Illustration (5)

Introduces digital rendering techniques using the Adobe Creative Suite. Using Adobe Creative Suite, students solve design problems. Enrollment by permission of the instructor.

THEA 108 - Theater and Interaction Design (5)

Investigates interactive media including computer games, virtual reality, and participatory theater to inform design practice. Examines Aristotle's Poetics with some modernist excursions. Also examines the various values embedded in works--artistic, civic, spiritual, and political.

Prerequisite: Enrollment is restricted to juniors and seniors.

THEA 113 - The History of Design for Theater (5)

The development of scenic design from the Greek period to the present. Concentration is on the changing styles of set design in relation to the changing attitudes toward dramatic literature, art, and theater architecture.

THEA 114 - Sound Design and Engineering for the Theater (5)

Mixing theory with practice, this course covers everything from script analysis and sound-design paperwork to how to use the software and hardware needed to bring a sound design to reality.

Prerequisite: Prerequisite(s): THEA 10.

THEA 115A - Design Studio: Scenic Design (5)

Advanced work in principles and theory of scenic design.

Prerequisite: Prerequisite(s): THEA 10.

THEA 115B - Design Studio: Scenic Design B (5)

Advanced theory and practice of theatrical set design.

Prerequisite: Prerequisite(s): THEA 115.

THEA 116A - History of Clothing and Costume (5)

Survey of clothing and theatrical costumes; emphasis on dress of the audience and actor in historical periods of theatrical activity. Students are billed a materials fee.

THEA 117 - Design Studio: Costume (5)

Students learn advanced principles and theory of costume design, and apply these toward a large project for theatrical/film production or for character design for animation and gaming.

THEA 117A - Advanced Costume Construction (5)

Advanced principles in costume construction, including tailoring, advanced pattern drafting, and draping techniques. Focuses on translating modern techniques into historical garment construction. Teaches how to study artifacts and do primary research to unlock the past.

Prerequisite: Prerequisite(s): THEA 17.

THEA 118 - Design Studio: Scene Painting (5)

Emphasis on techniques used in painting scenery for the theater.

Prerequisite: Prerequisite(s): THEA 10.

THEA 119 - Design Studio: Lighting Studio B (5)

The theory and practice of lighting design with emphasis on practical application. Light plots, electricity, optics, design, and manipulation of lighting for the theater and related performance events are investigated. The student explores mechanics and aesthetics with hands-on experience.

Prerequisite: Prerequisite(s): THEA 19.

THEA 120 - Voice and Movement for Performers (5)

Intensive work on the voice and body involving breathing, relaxation, and an understanding of anatomy as it pertains to voice and movement. Awareness and extension of personal vocal and movement repertoire through observation, experience, and exploration. Active preparation for performance (emphasizing Shakespeare) with work on phonetics and scansion and integration of physical technique.

THEA 121 - Acting Studio II: Shakespeare (5)

This acting studio centers around Shakespeare and specific techniques used in performing his plays. Continues concentrated work on basic acting skills and textual analysis through scene study. Courses 21 and 23 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information). (Formerly Acting Studio II.)

THEA 122 - Indian Performance: Rama, Siva, Krishna

(5)

Study of the classical theater and dance of India, with attention to performance practice, aesthetic theory, relationship to religious practice devoted to Rama, Siva, and Krishna, political implications and intercultural experimentation.

THEA 123 - Acting and Shakespeare (5)

Challenges of performing Shakespearean and Renaissance plays are explored through confronting the acting problems they pose. Attention to verse scansion, character analysis, and textual meaning. Strategies for enacting scenes and monologues are tested in class presentations.

THEA 124 - Movement for Performers (5)

Awareness and extension of personal movement repertoire, through observation, movement experience, and exploration.

THEA 126 - Acting Studio III (5)

Individual work on acting skills and problems, with emphasis on individual interpretation and scene work with other students. THEA 21 and THEA 124 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information).

THEA 126M - The Meisner Technique: A Practical Exploration (5)

An intensive immersion into the teaching techniques and actor-training originated by Sanford Meisner. Presents exercises and projects utilizing improvisation, physical activities, and, finally, memorized text. THEA 21 and THEA 124 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information).

THEA 128 - Choreographic Workshop (2)

Intensive upper-division choreographic workshop that begins from the key motifs of historical dance to develop original work. Dancers made available to the student choreographers. Concurrent enrollment in THEA 139 is required.

THEA 131A - Dance Studio II: Asian or Asian Diasporic Practice (5)

Continues the study of an Asian or Asian diasporic dance theory and practice. Focuses on intermediate dance technique, refinement of performance expression, and creative ownership of material, alongside critical engagement with aesthetic, cultural, and/or historical context.

Prerequisite: Prerequisite(s): THEA 31A or permission of instructor.

THEA 131B - Dance Studio II: Ballet (5)

Continued study of classical ballet theory and practice with progressions in barre, center, and across the floor exercises. Focus on contemporary ballet and critical dance studies. Emphasis on musicality, strength and coordination, and refinement in epaulement in adagio and allegro sequences. Attention to body alignment and maintaining the kinetic integrity of the body while moving through space.

Prerequisite: Prerequisite(s): THEA 31B or by permission.

THEA 131C - Dance Studio II: Advanced Contemporary Forms and Practices (5)

Continued study of contemporary dance theory and practice. Focus on intermediate dance technique, individual and group movement invention, choreographic voice, and theatrical applications.

THEA 131X - Advanced Contemporary Forms and Practices Within a Global Dance Context (6)

Global Seminar exploring movement and choreographic practices, situating students' personal experiences within their counterparts from around the world. Students travel to Paris and Lyon to participate in an international dance festival. Students co-create an original work prior to the departure date to be presented at the festival. Students lead a peer-to-peer class via movement practices, choreography, or improvisation. This course immerses dancers into advanced levels of contemporary dance practice, continuing the exploration that began in THEA 31C and 131C into more nuance, greater perceptual skills, and deeper access to dynamic range of motion.

THEA 135 - Choreography I (5)

Students explore sources for movement; gain expressivity in a wide range of movement elements; work in ensemble and solos; and explore the use of scores to develop collaborative skills.

Prerequisite: Prerequisite(s): THEA 36 or by permission of the instructor.

THEA 136 - Choreography II (5)

Advanced study, exploration, and analysis of choreographic form and content. Solo, duet, and group work are created with a focus on developing the creative process, interpreting styles and trends, and knowledge of compositional devices and generative movement practices. Enrollment by permission of instructor.

THEA 137 - Studies in Performance (Dance) (5)

Studies in dance, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. May be repeated for credit with consent of instructor. Admission by audition

held late winter quarter; see department office for more information.

THEA 137A - Studies in Performance (Dance): Asian (5)

Studies in Asian or Asian diasporic dance theory and practice, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers.

Prerequisite: Prerequisite(s): THEA 31A or by permission of the instructor. Concurrent enrollment in THEA 131A is required.

THEA 139 - Random: With a Purpose (5)

Participation in a student-choreographed and directed dance concert under faculty supervision. Rehearsals culminate in public performances. Auditions to be held on the first day of class.

THEA 141 - Play Direction Studio I (5)

Basic studio exploration through scene problems and exercises of the development of directing principles. Intensive work on the director's pre-rehearsal work from text selection, analysis, and casting. Audition at first class. (Formerly Future Stages.)

THEA 142 - Play Direction Studio II (5)

Intensive studio exploration of the art and craft of directing. Primary focus on text analysis, collaboration with designers, developing a point of view and visual/auditory language for the play, staging techniques, and communication techniques with actors.

Prerequisite: Prerequisite(s): THEA 40, or THEA 141, or permission of instructor.

THEA 145R - From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century (5)

This acting studio is an introduction to the skills needed in the performance of rhythmic and rhyming texts. Explores the similarities and differences in the use of rhythm and rhyme between Shakespeare and the contemporary playwright Lin-Manuel Miranda. No acting experience or audition is needed to enroll.

THEA 151 - Studies in Performance (Drama) (5)

Studies in theater, taken in connection with participation in a Theater Arts Department sponsored production. Enrollment is limited to those persons chosen to take part in a particular production. Admission by audition; audition schedule to be announced at first class meeting.

THEA 151A - Studies in Performance: African American Theater Arts Troupe (5)

Studies in drama; emphasis on African American theater taken in connection with participation in a theater arts sponsored production. Enrollment by

audition only, and limited to those persons chosen to take part in a particular production.

THEA 151I - Studies in Performance: Indonesian Dance and Drama (5)

Studies in drama; emphasis on Indonesian theater taken in connection with participation in a theater arts sponsored production. Enrollment by audition only, and limited to those persons chosen to take part in a particular production.

THEA 152 - Advanced Stagecraft (5)

Exploration of stage technology from the scene shop's perspective. Conversion of scenic designs to construction drawings. Pursuit of scenic-engineering and construction techniques using steel, wood, and other materials. Training on use of stage machinery: rigging, flying, wagons, tracking, and propulsion.

Prerequisite: Prerequisite(s): THEA 52.

THEA 154 - Shakespeare Santa Cruz: Writing in Response to the Bard (5)

Uses writing to respond to Shakespeare Santa Cruz's summer productions. Requires frequent assignments, such as reviews, interviews, performance notes, comparisons of productions, background pieces, and reflective essays. Students regularly revise work in response to instructor and peer feedback.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements.

THEA 155 - Shakespeare to Go (5)

A process-oriented investigation of Shakespeare consisting of work which may culminate in a final production. Requires a two-quarter commitment (winter and spring) with credit given in winter and touring in spring. Contact theater@ucsc.edu for details. Admission by audition at first class meeting (see department office or theater.ucsc.edu for more information). (Formerly Workshop Experiments in Performance.)

THEA 157 - Playwriting (5)

Students are given the opportunity to write their own scripts and refine them as the result of class discussion and scenework with actors. Work is on specific problems involving such elements as the structuring of a plot or the development of character.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

THEA 158 - Chautauqua Workshop (5)

Advanced course that provides directors, writers, and performers with an opportunity to develop new works in performance. Students enrolling in this course as playwrights are selected on basis of submissions turned in the previous quarter. Students taking the course as

directors are required to obtain consent of the instructor. Other students may enroll as usual.

THEA 159 - Advanced Playwriting (5)

A study, through practice, of the constituent elements in the construction of a drama. Students concentrate, in particular, on the organization of complex plots, the expression of character through conflict, and maximizing the emotional impact of dramatic situations.

Prerequisite: Prerequisite(s): THEA 157 or equivalent, satisfaction of the Entry Level Writing and Composition requirements.

THEA 160 - Dramatic Theories (5)

An examination of the theories of acting and directing from the 19th century to our own time, starting with the classic theater and concentrating on the 20th-century debate centered in Stanislavski and Brecht, Grotowski, and Robert Wilson. This course must be taken prior to student's senior year; required for course 185.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

THEA 161A - Irish Theater (5)

Examines the idea of a National Theater in Ireland from its beginnings in the founding of the National Literary Society in 1892 to the current vitality of the contemporary Irish Theater.

THEA 161C - Theater and Drama of the Renaissance (5)

Examines selected plays from the Renaissance (1580-1680, Italy, Spain, England, and France) from a theatrical viewpoint. Covers Renaissance theater buildings and related critical materials. (Formerly The Theater and Drama of Renaissance Europe.)

THEA 161D - Asian Theater: An Anthropological Approach (5)

Art serves simultaneously to educate its audience to the group's traditional values and to test new ideas. Indian, Indonesian, and Japanese forms are studied in relation to their cultural context. Through videotapes, lecture demonstrations, performances, and scenework, students explore the forms.

THEA 161E - Mass Performance (5)

Explores the phenomenon of mass performance--when thousand of people perform the same thing at the same time. From political festivals, such as those of the French Revolution, to flash mobs, and covering the 19th century craze of mass gymnastics as well as Olympic opening ceremonies, the course analyzes the ideas and techniques behind mass performance. Students sharpen their critical skills in analyzing performance by working with texts, videos, live performance, and archives.

THEA 161H - Shakespeare In Asia (5)

Shakespeare takes life in Asian reinterpretations that revivify languishing genres, duck political censorship, and explore new theatrical worlds. Indian, Japanese, Chinese, and Southeast Asian Shakespeares (1868 to the present) are introduced via lecture, critical reading, videos, and scene work.

THEA 161M - Sexuality, Gender, Drama, and Performance (5)

Exploration and analysis of the interrelationships between gender, sexuality, and performance on stage and on the page. Topics include gender and homosexuality in the history of performance and dramatic literature, drag, queer Shakespeare, closet drama, same-sex performance conditions (e.g., Greece) vs. dual-gendered (e.g., Restoration England). Combines study of theoretical texts and script with analysis and practice.

THEA 161P - Theater in the Chicano Power Movement (5)

Covers the rise of Teatro Chicano as a cultural-political force within the 1960's Chicano Power Movement starting with founding playwright Luis Valdez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez.

THEA 161Q - Queer Theatrics: Representations and Sensibilities (5)

An examination of the idea, form, and significance of queer/gay sensibility and representation in the English-speaking theater from the Renaissance to the present.

THEA 161R - Theater of American Cultures (5)

Interrelationship of ethnicity and the rise of significant American theater groups including the black theater movement, Chicano Teatro, and Asian American theater will be shared via lecture, viewing, and discussion.

THEA 161S - American Drama: Politics and Theater (5)

The dream of group theater, a long-term partnership of actors, directors, and playwrights, has fueled extraordinary and exciting change in the 20th-century American theater theory and practice. We examine ten exemplary manifestations of this dream.

THEA 161T - Women in Theater (5)

Explores female playwrights from textual, historical, and multicultural perspectives. Progresses from Trifles (1916) through the Harlem Renaissance, Broadway's Lillian Hellman, and today's post-feminist theatrical explosion in lectures, films, dramatizations, and award-winning playwrights' visits.

THEA 161U - Performance of Story in Theater and Film

(5)

Examination of theory and practice of theater and film comparing and contrasting works having been adapted from one genre to another. Lecture, film, and video viewing. Discussions of materialist, psychoanalytic, and feminist approaches shared. Students cannot receive credit for this course and THEA 80X.

THEA 161X - Experimental Performance (5)

Investigates the world of experimental performance, sharpening critical skills in reading texts, videos, live performance, and archives. The focus will be on modes of performance that broke with their contemporary norms, including dance, theater, puppetry, and other gatherings.

THEA 161Y - Modern Ancient Drama (5)

Studies 20th- and 21st-century productions and adaptations of ancient Greek and Roman drama in theater, dance, music, and film, including Stravinsky, Graham, Pasolini, and Taymor. Discusses artists' goals, the sociopolitical context, ideas of authenticity and audience response.

THEA 163A - Shakespeare (5)

Focuses on selected plays of Shakespeare. Explores the range and variety of interpretations of the plays, both in critical writings and in performance. Also studies other writings and graphic art created on the subjects and themes of the plays.

THEA 163E - Chekhov and His Impact (5)

Delves into the work of Chekhov and the Moscow Art Theater. Stanislavski's acting techniques are related to the scripts through scene work. The impact on later Russian innovators, especially Meyerhold, and on the American theater is considered.

THEA 163G - Special Studies in Playwrights: Artaud (5)

Antonin Artaud through three critical lenses: influence on modern and contemporary theater, subject and site of psychoanalytic and social criticism, and theater practitioner. Exercises cultural, historical, and analytic approaches to his work. Prerequisite: THEA 160 recommended.

THEA 163H - Henrik Ibsen and His Impact: Ghosts of the Future (5)

Examines representative texts of Ibsen's work: early plays, realistic middle plays, and late plays. The cultural/historical context of Ibsen's oeuvre is considered as well as its impact, through contemporary translations and productions, on subsequent theater theory and practice.

THEA 163K - Special Studies in Playwrights: Euripides (5)

Examines the works of the classical Athenian tragedian Euripides. The class undertakes a thorough

consideration of the playwright's plays in cultural, historical, theatrical, and literary context.

Prerequisite: Prerequisite(s): THEA 61A or permission of the instructor.

THEA 164 - Issues in Dance History and Theory (5)

A research seminar. Topics range from critical dance cultures, cognitive dance studies, problems in dance aesthetics, criticism, or theory to particular movements, periods, or the work of a choreographer. Discussions may be supplemented by a movement practice component.

THEA 165 - Dance Modernism (5)

An overview of 20th-century dance within the perspective of modernism. Topics may include romanticism, natural dance, Orientalism, Ausdruckstanz, U.S. modern dance and neo-classicism, chance procedure, postmodernism, the avant-garde commodity marketplace, and critical dance cultures. Discussions may be supplemented by a movement practice component.

THEA 166 - Ballet: A History (5)

Chronological critical and historical overview of ballet as a form of ethnic dance from its European origins to the present. Focus is on development of form in Americas and Asia as it crossed with other socio-culturally constructed categories such as race, gender, class, and sexual orientation. Discussions may be supplemented by a movement practice component.

THEA 167 - Africanist Aesthetics: Live Dialogues in the Americas and Africa (5)

Examines the transnational currents in expressive culture and the performing arts among the peoples of Africa and Latin America, and Latinos and African Americans in the United States.

THEA 185 - Senior Seminar (5)

A required seminar for majors involving readings and discussions of important texts in dance, design, and drama.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; THEA 160.

THEA 190 - Group Projects (5)

Prerequisite(s): petition required, approved by instructor and department.

THEA 192 - Directed Student Teaching (5)

Teaching a lower-division seminar under faculty supervision. (See THEA 42 and THEA 45). Petition required, approved by instructor and department.

THEA 193 - Proseminar (5)

Exposes students to an aspect of the theory or practice of theater arts. Visiting scholars share their area of expertise in lectures to a small group of students.

THEA 193F - Proseminar (2)

Exposes students to an aspect of the theory or practice of theater arts. Visiting lecturers share their area of expertise in lectures to a small group of students.

THEA 198 - Independent Field Study (5)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department.

THEA 198F - Independent Field Study (2)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department.

THEA 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

THEA 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

Graduate

THEA 251 - Graduate Student Production (5)

Participation by a graduate student in a departmental production of a play, dance concert, or other performance event under supervision of the Instructor-of-Record. Rehearsals culminate in public performance. Enrollment is restricted to graduate students and determined by audition with the instructor and in consultation with the director of graduate studies.

THEA 290A - Research Methods for Performance and Practice (5)

Introduces the emergent professional artist-scholar into the discipline of what is called practice-as/practice-based/practice-led research in performance and new media. Explores the rationales, conceptual frameworks, and perils that underpin research based on the researcher's own creative endeavors, and that enable the researcher to place their own practice within larger

artistic and theoretical paradigms in a written document. (Formerly offered as Text Analysis.)

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 290B - Practice of Theory (5)

Contextualizes major movement in performance. Students are exposed to a wide range of historical and visual material pertinent to the creation of theater and dance. A final paper is required. (Formerly offered as Performance Histories.)

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 290C - Performance Analysis (5)

Examines the production approaches of a range of performance practitioners, production companies, and performance traditions. Includes exercises in analysis and reconstruction of performance. A final reconstruction project is required.

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 291 - Field Study (5)

Student-designed and conducted research carried out in field settings. A brief prospectus must be filed with the department office before undertaking the research, and a brief final report of activities must be filed upon return. Course intended for students with graduate standing in theater arts. Petition required, approved by instructor and department.

THEA 292 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Course intended for graduate students in theater arts. Petition required, approved by instructor and department.

THEA 293 - Performance Research Project (10)

Internship with a professional theater company in the student's area of emphasis. This work will have a significant academic component supervised and assessed by a theater arts faculty member during the quarter it is taken. Enrollment restricted to graduate students.

THEA 294 - Future Stages (5)

Working in an experimental theater with access to new performance technologies, course explores how cross-media practice can expand on basic theatrical relationships in new and culturally relevant ways.

Prerequisite: Enrollment is restricted to graduate students.

THEA 295 - Group Critique (5)

Peer review and constructive assessment of works in progress. Students are required to give individual

presentations to the group at least once a quarter. Educational objectives are to develop the ability to articulate themes and ideas in student's body of work; to strengthen critical skills in making, evaluating, and discussing theater art; to explore the role of the audience in context and criticism; and to investigate the ways artists construct, use, and maintain support communities.

Prerequisite: Enrollment is restricted to graduate students.

THEA 297 - Independent Study (5)

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department.

THEA 297F - Independent Study/Graduate (2)

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. Enrollment restricted to graduate students in theater arts.

THEA 299 - Capstone Thesis (5)

Involves participation in a major collaborative performance project (either faculty-directed or graduate student-directed with faculty supervision) or a research project group. Includes a written thesis, though the length will vary depending upon the student's particular emphasis.

Prerequisite: Enrollment is restricted to graduate students.

TIM-TECHNOLOGY INFORMATION MANAGEMENT

Lower-Division

TIM 50 - Business Information Systems (5)

Addresses the use of information systems (IS) within a business enterprise. Subjects include computer hardware and software concepts, system design and implementation, telecommunications, data management, transaction-based systems, management information systems, and the use of IS to compete. Intended for technology and information management and business management economics majors. (Formerly CSE 50.)

TIM 58 - Systems Analysis and Design (5)

Students learn how information technology is used to deal with business requirements and/or solve business problems. Provides an understanding of structured computer systems analysis and design methodologies and techniques and their application to business information systems. Intended for technology and

information management and business management economics majors. (Formerly CSE 58.)

Prerequisite: Prerequisite(s): TIM 50.

TIM 80C - Starting a New Technology Company (5)

Focuses on the creation and management of technology start-ups and small companies, using case studies and team projects as the basis for learning and applying the course materials. (Formerly CSE 80C.)

Upper-Division

TIM 147 - Introduction to Data Mining for Business (5)

Introduces concepts, approaches, tools, methods for extracting useful knowledge and business value from data for business applications. Covers predictive models, descriptive models, model fitting, model overfitting, complexity, visualization, text mining, association mining, analytical thinking. Other topics may include social network mining, data science and business strategy. Students cannot receive credit for this course and CSE 145.

Prerequisite: Prerequisite(s): CSE 20 and CSE 30; and CSE 16; and MATH 22 or MATH 23A or AM 30; and STAT 5, or STAT 7 and 7L; and AM 10 or MATH 21; and AM 20 or MATH 24.

TIM 150 - Optimization for Management (5)

Introduction to optimization theory, numerical algorithms, and applications focused on operations research topics. The course content includes: linear programming, integer programming, non-linear programming, and an introduction to relevant simulations.

Prerequisite: Prerequisite(s): AM 10 or MATH 21, and AM 30 or MATH 22 or MATH 23A.

TIM 170 - Management of Technology Seminar (2)

Uses weekly talks by leading industry practitioners and university researchers to provide in-depth exposure to the management of technology. Topics covered include product development, operations, strategy, finance, and marketing for technologies such as software and information systems. (Formerly CSE 170.)

TIM 172A - Introduction to Management of Technology I (5)

Addresses strategic, engineering, marketing, and financial processes and tools for the management, development, and commercialization of high-tech products. Declared TIM majors must concurrently enroll in TIM 172P to fulfill the capstone series. (Formerly CSE 171A.)

Prerequisite: Prerequisite(s): MATH 19B or MATH 11B or AM 11B or ECON 11B.

TIM 172B - Introduction to Management of Technology

II (5)

Addresses the development and application of processes and tools for the management, design, optimization, and operation of supply chain networks for high-tech products. Declared TIM majors must concurrently enroll in TIM 172Q to fulfill the capstone series. (Formerly CSE 171B.)

Prerequisite: Prerequisite(s): TIM 172A.

TIM 172P - Management of Technology Project I (3)

First of a two-course project sequence in which students apply the knowledge and skills gained in TIM 172A to complete the first part of a major quarter-long comprehensive team project in the management of technology. In this course, taken concurrently with TIM 172A, the team project focus is on the management, design, and commercialization of a new product within a high-tech company. TIM 172A and TIM 172P together form the first part of the required management of technology comprehensive requirement for the TIM B.S. major.

Prerequisite: Prerequisite(s): concurrent enrollment in TIM 172A. Enrollment is restricted to Technology and Information (TIM) majors.

TIM 172Q - Management of Technology Project II (3)

Second of a two-course project sequence in which students apply the knowledge and skills gained in TIM 172B to complete the second part of a major comprehensive team project in the management of technology. In this course, taken concurrently with TIM 172B, the team project focus is on the supply chain management for the new product developed in TIM 172P. TIM 172B and TIM 172Q together form the second part of the required management of technology comprehensive requirement for the TIM B.S. major.

Prerequisite: Prerequisite(s): TIM 172A and TIM 172P. Concurrent enrollment in TIM 172B is required.

TIM 173 - Financial Engineering and Management in High Technology Firms (5)

Addresses methods and tools for financing technology development and projects. Includes approaches for coordinating finance and accounting with strategy and operations of firms; discounted cash-flow analysis; activity-based costing; financial planning; and elements of financial account and investment science. (CSE 173.)

Prerequisite: Prerequisite(s): ECON 113 or STAT 131 or CSE 107 or by instructor permission.

TIM 175 - Business Strategy and Information Systems (5)

Analysis of effective use of information systems within a business enterprise, with emphasis on gaining a competitive advantage. Integration of information systems with business strategy, financial justification, personnel, and organizational considerations are

highlighted. Intended for technology and information management majors or senior engineering majors who have a business interest. (Formerly CSE 175.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and TIM 50 or permission of instructor.

TIM 193 - Field Study (5)

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Technology and Information Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and oral presentation. Students submit petition to sponsoring agency.

TIM 193F - Field Study (2)

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Technology and Information Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and oral presentation. Cannot normally be repeated for credit. Students submit petition to sponsoring agency.

TIM 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

TIM 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

TIM 195 - Senior Thesis Research (5)

Intended for majors. Students submit petition to sponsoring agency.

TIM 195F - Senior Thesis Research (2)

Intended for majors. Students submit petition to sponsoring agency.

TIM 198 - Individual Study or Research (5)

Intended for majors. Students submit petition to sponsoring agency.

TIM 198F - Individual Study or Research (2)

Intended for majors. Students submit petition to sponsoring agency.

TIM 199 - Individual Study or Research (5)

Individual directed study for upper-division undergraduates. Enrollment is restricted to senior

technology and information management majors. Students submit petition to sponsoring agency.

UCDC - UCDC

Upper-Division

UCDC 100 - UCDC Prep (Remote) (1)

Prepares and orients students to participate in UCDC the next quarter. Guides them through all the required steps needed to search out internships of interest, prepare application materials, hone interview skills, choose and be prepared for UCDC courses, and get the most out of their internships. Also informs students about the support services and other programming the UCDC program offers to ensure successful experiences in the program. Enrollment is by permission and is restricted to students accepted into the UCDC program for the following term. This course can be taken for Pass/No Pass grading only.

UCDC 194A - UCDC Internship Research Seminar (5)

Weekly seminar that focuses on the production of a major research paper or equivalent scholarly undertaking connected to an internship in Washington, D.C., government, non-profit, or private institution. Seminar stresses institutional analysis, the development of bibliographic expertise in the use of Washington-based resources, and participant-observer skills. Required for and enrollment is restricted to students participating in the UCDC Program.

UCDC 194B - UCDC Internship (7)

A 30- to 36-hour-per-week internship in a Washington, D.C., government, non-profit, or private institution. Required for and enrollment is restricted to UCDC program participants.

UCDC 199 - Tutorial (5)

A program of directed study arranged with a Social Sciences Division faculty member. Enrollment is restricted to participants in the UCDC program.

UCDC 199F - Tutorial (2)

A program of directed study arranged with participating faculty. Class time is proportionally less than a 5-credit course. Enrollment is restricted to participants in the UCDC program.

WRIT - WRITING

Lower-Division

WRIT 1 - Introduction to Composition (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on genre, rhetorical situation, revision, editing, and making connections between texts and one's own perspective.

Prerequisite: Prerequisite(s): College 1 and WRIT 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual Students (AWPE-MLS) score of 6; or College 1 and course selection via Directed Self-Placement.

WRIT 1E - Introduction to Composition (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on genre, rhetorical situation, revision, editing, and making connections between texts and one's own perspective. Designed to support multilingual learners.

Prerequisite: Prerequisite(s): College 1 and WRIT 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual Students (AWPE-MLS) score of 6; or College 1 and course selection via Directed Self-Placement.

WRIT 2 - Rhetoric and Inquiry (5)

Provides declarative knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts.

Prerequisite: Prerequisite(s): College 1 and satisfaction of the Entry Level Writing; or College 80A, 80D, or 80F and satisfaction of the C1 requirement. Enrollment is restricted to frosh, sophomore and junior students.

WRIT 2GS - WRIT 2GS Rhetoric & Inquiry, Global Seminar (6)

Provides declarative knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts. Taught as a Global Seminar in Ireland.

Prerequisite: Prerequisite(s): College 1 and satisfaction of the Entry Level Writing; or College 80A, 80D, or 80F and satisfaction of the C1 requirement. Enrollment is restricted to frosh, sophomore and junior students.

WRIT 2H - Rhetoric and Inquiry, Honors (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts. Designed for advanced students.

Prerequisite: Prerequisite(s): College 1 and satisfaction of the Entry Level Writing Requirement. Enrollment is restricted to College Scholars or by instructor permission.

WRIT 11A - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for

academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 11B - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 11C - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 23 - Grammar and Rhetoric: Language for Writing (5)

Builds on writing skills gained in previous writing courses; focuses on effective language use in academic writing. Students reinforce their written English proficiency by reading, studying, practicing, and writing structures and patterns of written English.

Prerequisite: Enrollment is restricted to fourth-quarter students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor.

WRIT 25 - Writing About Place (5)

Students explore the UCSC discourse community including classroom culture, then widen their lens to include the larger Santa Cruz community. Writing moves beyond the paragraph level to include oral communication and presentation skills.

Prerequisite: Prerequisite(s): AWPE-MLS score of 2 or 3; or course selection via Directed Self-Placement.

WRIT 26 - Writing About Language (5)

Students explore language acquisition and how to best optimize their own language learning by engaging in a primary research project. Through the research project, students learn to use academic discourse conventions in their own writing.

Prerequisite: Prerequisite(s): WRIT 25, AWPE-MLS score of 4 or 5, or course selection via Directed Self-Placement.

WRIT 30 - Genre Study: STEM (2)

Engages students in an examination of the textual practices and products (genres) through which knowledge in science, technology, engineering, and mathematics (STEM) fields is created, documented, and disseminated. Enrollment is by interview only and restricted to Summer Academy, first-year participants.

WRIT 64 - Newswriting Workshop (5)

Introduction to the basic techniques of newswriting, including practice in leads, formats, and different kinds of news reporting. Emphasis on developing skills in research, interviewing, and shaping stories. Includes an examination of the contemporary media.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, instructor determination at first class meeting.

WRIT 70 - Communication and Rhetoric: An Introduction (5)

This course introduces the field of contemporary communication studies, locating its roots in rhetoric and showing how key concepts play out in mass media and other settings as well as in everyday life.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing requirement.

WRIT 93 - Field Study (5)

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of the Entry Level Writing requirement; certification of adequate preparation; approval of Writing Program.

WRIT 93F - Field Study (2)

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 99 - Tutorial (5)

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

WRIT 99F - Tutorial (2)

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

Upper-Division

WRIT 101 - Introduction to the History, Theory, and Practice of Rhetoric (5)

A survey of classical and contemporary ideas about rhetoric which explores, practically and theoretically, the best means of persuasion in any situation whatsoever and will consider the nature of human discourse in diverse areas of knowledge.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 102 - The Rhetoric of the Social Sciences (5)

Develops rhetorical facility in disciplinary writing for upper-division social science majors. Requires critical and disciplinary reading, writing in modes appropriate to social science disciplines, and a substantial research or critical paper within the student's own discipline.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 104 - Writing in the Arts (5)

A writing course focusing on the purposes and composition of various genres of writing about and in the performing arts, visual arts, and music such as reviews, program and exhibit notes, journal and magazine articles, grant proposals, and press releases.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 106 - Public Speaking (5)

Students learn strategies to write, analyze, and deliver effective speeches of various kinds as well as professional presentations using PowerPoint and other visuals.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 107 - Technical and Business Writing: An Overview (5)

An exploration of the conventions and formats of business and technical writing. Coursework involves writing effective resumes, proposals, letters, end-user manuals, and the fundamentals of Web site design.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 108 - Electronic Communication (5)

An introduction to the evolving conventions of effective Web site design as well as collaborative writing. Coursework includes evaluation of Web site content and structure and creation of hypertext.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 109 - Argument and Practical Reasoning (5)

An investigation of contemporary persuasive discourse with special attention to the elements and forms of argument, the nature of evidence, questions of validity and probability, and the workings of rhetorical reasoning. Emphasizes the analysis of arguments rather than their construction.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 110A - Writing in the Professions (5)

Study of writing required in the selected professions, including law, politics, and government. Considers the rhetoric of each discipline and relevant texts. Includes lectures from visiting professionals and a series of writing assignments based on reading and research. Topic may vary from year to year, focusing on the rhetoric of other professional divisions: medicine, engineering, economics, and so forth.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 120 - Editing English Prose (5)

This course offers extended, detailed instruction in editing one's own and other people's prose for accuracy, clarity, appropriateness, and effectiveness. It provides some history of theories of style and stylistic analysis, and instruction in prose variation according to social context.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 159 - Grammar for Tutors and Teachers (3)

English grammar from a pedagogical perspective, emphasizing structures, patterns, and conventions of written English that commonly challenge basic writers. Students learn strategies for helping multilingual and other writers improve their writing skills by increasing their awareness of grammar.

Prerequisite: Prerequisite(s): WRIT 169, or by instructor permission.

WRIT 161 - Academic Writing and Research Methods (5)

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. WRIT 161 includes sections for re-entry women, transfer students, and students in the EOP Faculty Mentor Program. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Students should contact the instructor for enrollment information.

WRIT 163 - Advanced Workshop in Expository Writing

(5)

A composition course for students who, having mastered basic writing skills, wish to concentrate on increasing their effectiveness as rhetoricians, prose stylists, and editors. Assignments include writing and revising essays, responding to other students' work, and reading published essays.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 166D - Minorities in Journalism (5)

Focuses on the minority press and how it has shaped journalism in the U.S. as well as viewing how the media has dealt with this segment of our society.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and consent of instructor.

WRIT 166J - Online Journalism (5)

A course in using electronic sources to report articles for publication and in publishing journalistic pieces online. Prerequisite(s): WRIT 64 or journalism experience; instructor determination at first class meeting.

WRIT 166N - The Rhetoric of Radio (5)

Examines the theory and practice of radio. Students explore how the formats of radio create its meaning, and investigate radio's place in the landscape of the media, particularly in the U.S. and Mexico.

Prerequisite(s): satisfaction of the Entry level Writing and Composition requirements and consent of instructor.

WRIT 169 - Theory and Practice of Tutoring Writing (3)

An introduction to theory and research on the composing process and practical strategies for teaching writing, especially in tutorial situations. Recommended for writing assistants. Prerequisite(s): C requirement and enrollment by permission of the instructor

WRIT 180 - Seminar in Editing and Publishing (5)

Newswriting seminar for *City on a Hill* editors and writers. Weekly sessions evaluate newspaper in depth, including writing, reporting, and issues in journalism ranging from ethics to legal questions. Prerequisite(s): instructor determination at first class meeting; open only to editors, interns, and writers at City on a Hill Press.

WRIT 189 - Methods of Teaching Writing (5)

Supervised by a writing instructor, each student attends a weekly seminar on teaching writing and either assists in a class or serves as a facilitator of a small writing group in a course at UCSC or a public school. Students submit petition to sponsoring agency.

WRIT 191A - Internship in Writing (5)

Regular writing for newspaper or magazine. Students submit petition to sponsoring agency.

WRIT 191B - Internship in Editing (5)

Work in an editorial position involving critique and guidance of reporters. Students submit petition to sponsoring agency.

WRIT 191C - Internship in Publishing (5)

All phases of work for a publishing house, from manuscript reading to editorial. Students submit petition to sponsoring agency.

WRIT 191D - Internship in Broadcasting (5)

Writing, editing, scheduling, and/or broadcast work for television or radio. Students submit petition to sponsoring agency.

WRIT 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See WRIT 42.) Students submit petition to sponsoring agency.

WRIT 193 - Field Study (5)

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency.

WRIT 193F - Field Study (2)

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 194 - Group Tutorial (5)

A writing, editing, or publishing project undertaken by a small group of students under the direct supervision of a writing instructor. Students submit petition to sponsoring agency.

WRIT 195 - Senior Thesis (5)

Individual work on a thesis for any campus major or individual major. Faculty in the Writing Program help students on all phases of work, from selection and focus to development of bibliographies, research techniques, revision, and editing. Students submit petition to sponsoring agency.

WRIT 196 - Developing and Editing Field**Documentation (2)**

Helps students transform field documentation into fully developed, professional projects. Employs a weekly production schedule and teaches principles of rhetoric as a means of effectively selecting and arranging documentary materials. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review documentary materials.

WRIT 198 - Independent Field Study (5)

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency.

WRIT 198F - Independent Field Study (2)

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 199 - Tutorial (5)

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

WRIT 199F - Tutorial (2)

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

Graduate

WRIT 202 - Writing and Learning Seminar (3)

Strategies for teaching assistants to help undergraduates become better learners and writers in disciplinary courses. Topics include using writing to improve reading and thinking, analysis of assignments, avoiding plagiarism, responding to and evaluating papers, ESL writers, peer response, and technological aids.

Prerequisite: Enrollment is restricted to graduate students.

WRIT 203 - Teaching Writing (5)

Prepares graduate students to teach first-year composition at UCSC and elsewhere. Development of a syllabus, teaching strategy, and class plans based on study of composition and rhetorical theories, research on students' writing development, and effective writing pedagogies.

Prerequisite: Enrollment is restricted to graduate students.

YIDD - YIDDISH

Lower-Division

YIDD 1 - First-Year Yiddish (5)

Introduces the Yiddish language. Students learn to speak and to ask others in Yiddish about themselves and about common situations (the classroom, work, family), and learn to read and write simple Yiddish texts.

YIDD 2 - First-Year Yiddish (5)

Follows YIDD 1, expanding vocabulary to include the weather, physical health and sickness, holidays, clothing, etc., and increasing student ability for self-expression using different tenses and grammatical cases.

Prerequisite: Prerequisite(s): YIDD 1 or by consent of instructor.

YIDD 3 - First-Year Yiddish (5)

Follows YIDD 2, expanding vocabulary to include food, travel, and academic life, with an emphasis on the expression of feelings and opinions, agreement and disagreement, making use of all tenses and all grammatical cases.

Prerequisite: Prerequisite(s): YIDD 2 or by permission of the instructor.

YIDD 99F - Tutorial (2)

Students submit petition to sponsoring agency.

UNDERGRADUATE INFORMATION

In this section:

Undergraduate Admission (p. 1280)

Undergraduate Expenses (p. 1285)

Undergraduate Academic Program (p. 1290)

The Colleges and Student Life (p. 1315)

UNDERGRADUATE ADMISSION

In this section:

Admission Procedures (p. 1280)

Admission as a Transfer Student (p. 1282)

Admission of U.S. Students from Outside California (p. 1283)

Admission of International Students (p. 1283)

Readmission (p. 1283)

Admission to Special Categories (p. 1284)

Nondiscrimination, Harassment, and Affirmative Action Policies (p. 1284)

Undergraduate admission to the University of California is based on multiple academic factors, as well as on personal achievements. The university has minimum admission qualifications, which are the same for each of the UC campuses, but when the number of minimally qualified applicants exceeds a campus's capacity for admission, additional faculty-approved selection criteria are applied.

If you are considering applying to UC Santa Cruz, the Office of Undergraduate Admissions wants to help you learn more about the campus, its distinctive educational programs, and its selection process for both first-year and transfer applicants. For more information, see Undergraduate Admissions.

The University of California, Santa Cruz encourages applications from a diverse range of students, including applicants coming from low socioeconomic backgrounds, first-generation students, students with disabilities, current members of the military, military veterans, and non-traditionally aged students. In addition, the campus welcomes students from throughout the U.S. and the world.

Admission by Exception. Admission by Exception is granted to a very small percentage of applicants who do not meet UC requirements. Such factors as academic accomplishments in light of a person's life experiences and/or special circumstances, socioeconomic background, special talents and/or achievements, contributions to the community, and the applicant's answers to the Personal Insight Questions are taken into consideration.

Campus Safety. UC Santa Cruz campus crime statistics can be viewed in the annual Clery Report, available at the UC Santa Cruz Police Department website.

Graduation rates. The following graduation-rate information is listed in compliance with the 1990 Title I: Federal Right-to-Know Act, Section 103. Fifty-two percent of the students who entered as first-year students in 2013 graduated in four years; 71 percent of those who entered in 2012 graduated in five years; and 77 percent of those who entered in 2011 graduated in six years. These graduation rates are well above the national averages. Among the most recent entering cohorts, those who entered as first-year students took an average of 4.4 years to graduate, and students transferring to UCSC as juniors averaged 2.5 years.

In accord with the Education Amendments of 1976, Section 493A, more detailed information regarding retention is available at the Institutional Research website.

Admission Procedure

The University of California Application for Undergraduate Admission and Scholarships becomes available beginning August 1 for the following academic year. Students may access applications online.

In addition, the Undergraduate Admissions website includes a wealth of information for prospective UC Santa Cruz students about undergraduate education, admission, financial aid, and various topics of interest.

APPLICATION FILING PERIODS

Applications for the fall quarter must be submitted during the filing period of Oct. 1 through Nov. 30, and applications for winter quarter admission are accepted only for junior transfer students in certain majors. Check the Office of Undergraduate Admissions in mid-June to see details on winter quarter admission. UCSC does not accept applications for spring quarter admission.

APPLICATION FEES

The application fee is \$70 (\$80 for international nonimmigrant applicants) to apply to one campus of the University of California. For each additional campus you select, you must pay an extra \$70 fee (\$80 for international nonimmigrant applicants). These fees are subject to change and are not refundable. The online application includes payment instructions.

FEE WAIVERS

The University of California will waive application fees for up to four campuses for certain students who otherwise would be unable to apply for admission. To qualify for the fee waiver, you must meet specific requirements related to your family income and size. The fee waiver is for U.S. citizens and permanent residents only. We encourage students who qualify for a fee waiver to take full advantage of the fee waiver by applying to the maximum of four UC campuses.

Students who qualify for fee waivers and who select more than four campuses must pay \$70 for each additional choice. Methods of obtaining fee waivers are listed below.

An online fee waiver form is available to applicants when they apply. The application automatically determines if you are eligible for the fee waiver as soon as it is complete.

High school students: Use the College Board fee waiver. It is available from your school counselor.

EOPS community college students: If you are enrolled in Extended Opportunity Programs and Services (EOPS) at a California community college, obtain a fee waiver authorization from the EOPS Office.

ADMISSION AS A FIRST-YEAR STUDENT (FRESHMAN)

The university considers you a freshman applicant if you have graduated from high school and have not enrolled in a regular session at any college or university. If you attend a summer session immediately after graduating from high school, you are still a freshman applicant.

The admission and selection process to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a freshman. Students are encouraged to achieve well beyond the minimum qualifications to enhance their chances for selection.

Using a comprehensive review process comprising 13 faculty-approved criteria, each application is thoroughly reviewed to determine the full spectrum of a student's academic and personal achievements, viewed in the context of their opportunities.

Information regarding the admission and selection process for UC Santa Cruz can be accessed on the Undergraduate Admissions website. This site provides information on the minimum qualifications for the University of California for both residents and nonresidents of California, including international students (see also Admission of Students from Outside California and Admission of International Students).

HIGH SCHOOL PREPARATION FOR UNIVERSITY WORK

Carefully planned high school coursework provides you with the best preparation for your undergraduate university studies, and allows for advanced preparation for your chosen field of study. Most important, students who master certain basic knowledge and skills in high school substantially increase their chances of success at the university. (Requirements for transfer students are explained in the Admission as a Transfer Student section.)

The basic foundation of UC qualifications is the completion of college preparatory courses required for admission (see “a–g” Subject Requirements below). However, you should take courses beyond the minimum levels in reading, writing, and

mathematics in order to be adequately prepared for basic university courses that you may be expected to take freshman year.

A well-prepared student will have mastered the equivalent of four years of English composition and literature with a focus on expository writing; four years of mathematics, including a precalculus course in the senior year; two to three years of a language other than English; two to three years of laboratory science; two or more years of history and social sciences; and one or more years of visual or performing arts.

You should also give careful thought to the general field of study, and perhaps the specific major, you want to pursue at the university. By making this decision in advance, you can plan to take additional courses in high school related to the field.

SUBJECT REQUIREMENTS

The “a–g” subject requirements are described in detail on the UC Office of the President website.

1. History/social science—two years required.
2. English—four years required.
3. Mathematics—three years required, four years recommended.
4. Laboratory science—two years required, three years recommended.
5. Language other than English—two years required, three years recommended.
6. Visual and performing arts discipline (VPA)—one year required.
7. College preparatory electives—one year required.

Senior-Year (12th-Grade) Program. The senior year should be used to prepare you for your first year at the university and should include honors and advanced courses, as well as courses that will strengthen overall preparation. A challenging, successfully completed senior-year program is a natural bridge between high school and university coursework in the intended major. A strong senior program is one of the selection criteria used at UC Santa Cruz.

HIGH SCHOOL PROFICIENCY EXAMINATION

While the University of California expects all freshman applicants to have graduated from high school/secondary school, in lieu of the regular high school diploma (or its equivalent), the university will accept the following:

- Certificate of Proficiency, awarded by the State Board of Education upon successful completion of the California High School Proficiency Examination (CHSPE).
- General Educational Development (GED) Certificate

- Proficiency tests from other states and other countries

TRANSFER CREDIT

Transfer credit may be granted to a freshman applicant for acceptable college courses taken while still in high school if an official transcript is received from the college where the coursework was completed.

Transfer credit is granted for specified College Board Advanced Placement Examinations completed with a score of 3, 4, or 5 and for specified International Baccalaureate Higher Level Exams completed with a score of 5, 6, or 7. A score of 30 or higher on the International Baccalaureate Diploma is also awarded transfer credit.

Transfer credit is granted for specified GCE and Hong Kong A-Level Examinations.

Students should be advised that college courses taken before or after attending UCSC may duplicate AP, IB, and/or A-Level Examinations. Additionally, exams may duplicate each other (for example, an AP or IB exam in the same subject area). If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, UCSC awards credit only once.

Admission as a Transfer Student

The University of California defines a transfer applicant as a student who has been a registered student in a college or university, or in college-level extension classes following high school graduation. Summer session attended immediately following high school graduation is excluded in this determination. If you are a transfer applicant, you cannot disregard your college record and apply for admission as a freshman.

The admission and selection process for transfers to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a transfer student. It is expected that students will have completed the lower-division courses required by their intended major prior to transfer. See Screening Major Selection Criteria for an annual listing of all majors that require specific courses/grades prior to transfer to UCSC.

Transfer applicants are thoroughly reviewed to determine their full spectrum of academic and personal achievements, including transfer coursework completed for their intended major. UCSC uses faculty-approved criteria to determine which transfer students will be selected for admission. UC Santa Cruz gives the highest priority to junior-level transfer students coming from California community colleges.

Information regarding the admission and selection process for UC Santa Cruz can be accessed at the Undergraduate Admissions website. This site provides information on the

minimum qualifications for the University of California for students in California, in other states, and outside the U.S.

UC SANTA CRUZ TRANSFER ADMISSION GUARANTEE (TAG) PROGRAM

UC Santa Cruz's TAG (Transfer Admission Guarantee) Program is designed for California community college transfer students at the junior level. The benefits of participating in UCSC TAG include informational mailings and invitations to events. All California community colleges participate in the UC Santa Cruz TAG program.

The UC TAG application must be submitted online between September 1 and September 30 for the following fall quarter. UCSC accepts transfer admission agreements for fall quarter only.

Further information may be found at Transfer Admission Guarantee (TAG) Program.

UC TRANSFER ADMISSION PLANNER (TAP)

The UC Transfer Admission Planner is an online tool designed to help prospective UC students transferring from California community colleges track and plan their coursework, including those students who are seeking a Transfer Admission Guarantee (TAG) with one of the participating UC campuses.

Further information may be found at UC Transfer Admission Planner.

CREDIT FOR COURSES TAKEN ELSEWHERE

The university gives unit credit to transfer students for courses they have completed at other accredited colleges and universities, including courses taken at recognized institutions outside of the U.S. To be accepted for credit, your courses must be comparable to those offered at the university, as determined by the UC Santa Cruz Undergraduate Admissions Office. The UC Santa Cruz department sponsoring your major decides which transfer courses may be used to satisfy major requirements.

A total of 70 semester units (105 quarter units) of lower-division credit toward a university degree may be earned at other colleges/universities. Only subject credit will be granted for courses taken in excess of that cap. Please note that credit from another University of California campus is exempt from this limitation.

Applicants will not be considered for admission if they have completed 90 semester units (135 quarter units) or more of UC-transferable upper-division and lower-division combined credit. If students have earned all of their credits as lower-division credits, they are not affected by this limit. All

coursework completed at California community colleges is considered lower division. Advanced Placement (AP) or International Baccalaureate Higher Level (IBH) credit is permitted to exceed the 90-semester unit maximum by the number of AP or IBH units granted.

Opportunities to take courses at UC Santa Cruz as a nonmatriculated student are available through Summer Session, Concurrent Enrollment through UC Extension, and Intersegmental Cross-Enrollment.

UC SANTA CRUZ TRANSFER SERVICES

The Office of Undergraduate Admissions provides information to all students who wish to transfer to UC Santa Cruz. For prospective transfer students and their families, Undergraduate Admissions offers Transfer Information Sessions. Transfer Information Sessions are small-group meetings in which an adviser presents information about transfer admissions and transfer-related student services. Please note that pre-evaluations of transcripts are not available as part of the sessions. These sessions are designed for students who have not yet applied to UCSC. Students and their families may make reservations at the Transfer Information Sessions web page.

Student-led guided tours take place year-round and also require advance reservations. Please see the Undergraduate Admissions website to make a reservation.

In addition, UC Santa Cruz Admissions counselors visit many community colleges in California. Check with your counseling department or transfer center to determine whether a UCSC counselor will be visiting your community college.

UC SANTA CRUZ OFFICE OF ADMISSIONS TRANSFER PREPARATION PROGRAM (TPP)

The UC Santa Cruz Transfer Preparation Program (TPP) supports prospective transfer students from California community colleges and assists them in enrolling at UC Santa Cruz, as well as at other campuses. TPP Admissions representatives work most closely with students who are attending one of the 13 community colleges in the region to plan a successful transfer program, but will assist any California community college student who has questions.

The Transfer Preparation Program also collaborates with programs and initiatives that strengthen the transfer process and support individual students in making a successful transition to a four-year institution.

Further information may be found at the Transfer Preparation Program web page.

Admission of U.S. Students from Outside

California

UC Santa Cruz welcomes students from across the U.S. to enhance our vibrant campus community. Out-of-state applicants must meet the same admission qualifications as California students, but with a higher GPA. Detailed information for UC Santa Cruz is provided at our Out-of-State Students website. Information for all 10 general campuses of the University of California can be viewed at University of California Admissions.

Students who are not California residents are assessed nonresident tuition in addition to educational and registration fees. Residency for fee purposes is determined after admission based on documentation provided in a Statement of Legal Residency. See California Residence for Tuition Purposes.

Admission of International Students

The University of California welcomes students from countries throughout the world to enhance our vibrant campus community. The academic credentials of applicants from other countries are evaluated by Undergraduate Admissions specialists in accordance with UC faculty-approved regulations governing admission.

UC Santa Cruz accepts applications from international students for the fall quarter, and students should begin application inquiries a year before the quarter of desired enrollment. Openings for the winter quarter may be limited. If you are interested in applying for winter, check with the Office of Undergraduate Admissions.

If your native language is not English, you must certify proficiency in English. Further information is available on the Office of Undergraduate Admissions website.

A financial certificate and official academic records will be required if you are admitted to the university. Generally, nonimmigrant students must provide documentation that sufficient funds will be available to cover nonresident tuition, educational fees, and living expenses. The university does not offer need-based financial assistance to international students.

For information about services for international students, see the International Student & Scholar Services website.

Readmission

If you are an undergraduate who wants to return to UC Santa Cruz after an absence of a portion of a quarter or more, you must file an Application for Readmission. The application form is available online at the colleges readmission website. The completed application should be filed with the Office of Undergraduate Admissions during the appropriate period:

Quarter of Attendance	Application Filing Period
Fall quarter	January 1–March 31 (by *May 31 for late applications)
Winter quarter	July 1–September 30
Spring Quarter	October 1–December 31
Summer Quarter	April 1–May 31

* Approval during the extended filing period is subject to the discretion of the college. *Applicants filing for fall readmission during the extended filing period between April 1 and May 31 may not be approved. Those who are approved will have a late enrollment appointment. Class selection and availability may be limited. To ensure timely processing and enrollment opportunities, we strongly recommend all fall readmission applications be filed by March 31.*

There is a \$70 filing fee, which is nonrefundable and nontransferable. The filing fee will be billed to your student account; you are responsible for this fee even if you do not return to UCSC.

If during your absence you attended another UC campus, an official transcript must be submitted to the Office of Undergraduate Admissions before your application will be sent to your college for approval. If you attended another collegiate institution, your UC Santa Cruz college may require a transcript. If you left for health reasons, clearance from the Cowell Student Health Center is required. You must pay all outstanding bills owed to the university before you will be permitted to register.

Admission to Special Categories

Admission to either of the categories described below is at the sole discretion of UC Santa Cruz, and only when enrollment allows. Students seeking their first undergraduate degrees have priority over students who have already earned an undergraduate degree. For information on applying for admission in the categories described below, please contact the Office of Undergraduate Admissions.

SECOND BACHELOR'S DEGREE

If your educational goals have changed substantially since receiving your bachelor's degree, you may be eligible to pursue a second undergraduate degree at UC Santa Cruz. Applications from students interested in pursuing a second baccalaureate program will be considered as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

You must meet regular university admission qualifications, and your experience or previous scholarship record must show potential for academic success in your proposed area of study. Additional selection criteria will be applied, and

admission is subject to approval by the appropriate department.

For a second degree, you must fulfill major and residence requirements, as well as UC systemwide requirements in American History and Institutions and the Entry Level Writing Requirement. You must enroll for at least three quarters and are usually restricted to six quarters total.

LIMITED STATUS

If you have already completed an undergraduate degree and you have a particular reason to take specific undergraduate university classes, you may be eligible to enroll in a non-degree program as a limited-status student. Applications from students interested in limited-status enrollment are permitted as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

Your proposed program of study must either prepare you for graduate or professional school or satisfy some definite educational need or interest. Participants generally enroll full-time for a specified period that does not exceed three quarters. You must meet regular university admission qualifications, and your experience or previous academic record must show potential for success in your proposed program. Additional selection criteria will be applied, and admission is subject to approval by the appropriate department.

Nondiscrimination, Harassment, and Affirmative Action Policies

The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression, pregnancy¹, physical or mental disability, medical condition (cancer related or genetic characteristics), genetic information, ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services². The university also prohibits sexual harassment.

This nondiscrimination policy covers admission, access, and treatment in university programs and activities.

Inquiries regarding the university's student-related nondiscrimination policies may be directed to the Dean of Students office, or email deanofstudents@ucsc.edu.

Inquiries regarding the university's affirmative action, equal employment opportunity, nondiscrimination, and harassment policies as they relate to student employment may be directed to the Equity and Equal Protection (EEP) Office, (831) 459-2462, or by emailing equity@ucsc.edu. You can also make a report to EEP using the online reporting form [here](#).

Inquiries regarding the UC Policy on Sexual Violence and Sexual Harassment, reports of Title IX violations, needs related to pregnancy and lactation, and requests for safety and

supportive measures may be directed to Title IX Office by calling (831) 459-2462, or by emailing titleix@ucsc.edu. You can also make a Title IX report using the online reporting form [here](#).

Student inquiries regarding disability or disability accommodations may be addressed to the Disability Resource Center, (831) 459-2089; or email drc@ucsc.edu.

Students with disabilities who are unable to resolve accommodation or discrimination concerns may contact the campus ADA compliance officer by phone, (831) 459-5087, or email roagarci@ucsc.edu.

¹**Pregnancy** includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

²**Service in the uniformed services** includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

UNDERGRADUATE EXPENSES

In this section:

Expenses

In determining the cost of attending UC Santa Cruz each quarter, students should consider both required fees and personal expenses. The figures below are provided to help you draw up a realistic personal budget. If you then conclude you will need financial assistance in order to attend UCSC, you should read the Financial Aid section below. Fees and additional financial information for graduate students appear in the Graduate Studies section. Tuition, fees, and other charges are subject to change without notice by the UC Regents. For the most current fee information, check Undergraduate Student Fees.

Required Fees

Required fees are due and payable before the start of each quarter. At the beginning of each quarter, you will need sufficient funds to cover tuition and fees, housing, books and supplies, and UC student health insurance (waivable). For many financial aid recipients who are enrolled at least half time, tuition and fees on the student account are paid automatically with approved student aid funds.

The Student Services Fee funds student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well being of students; social and cultural activities and programs; services related to campus life; and educational and career support.

Tuition helps support student financial aid and related programs; administration; libraries; operation and maintenance of facilities; the university's operating budget; and all costs related to instruction, including faculty salaries.

Santa Cruz Campus Fees help support a wide range of student services, including college and campuswide student government, extracurricular programs and recreation facilities, campus child care, community and public service projects, Educational Opportunity Programs and scholarships, and free-fare use of the local transit systems. Campus fees paid by graduate students are provided at Student Fees.

In addition, all students, including international students, are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides the primary care services for the plan while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is available at the Health Center website or at the Student Health Insurance Office, (831) 459-2389.

Waivers from the mandatory health insurance premium are available if you can show that your private insurance provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver are listed in the Schedule of Classes.

Some courses charge an additional **Course Materials Fee**. These fees recover the cost of materials, supplies, equipment, and support services not covered by the normal instructional budget. The fees are reviewed and approved annually by the Miscellaneous and Course Materials Fee Advisory Committee. The list of specific courses charging fees in 2019–20 is available in the quarterly Schedule of Classes and on the web at Course Fees.

Nonresident Tuition

If you are a resident of a state other than California or of another country, you must also pay nonresident tuition, the nonresident educational fee, and other required fees (university registration and Santa Cruz campus fees). The criteria for residency appear in California Residence and Nonresident Supplemental Tuition.

Non-U.S. citizens note: Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

Undergraduate Budget 2021-2022

Undergraduate Budget, 2021-22				
	California Residents		Nonresidents	
Students Living On Campus	One Quarter	F-W-S Quarters	One Quarter	F-W-S Quarters
Required Tuition and Fees				
Student Services Fee **	\$376.00	\$1128.00	\$376.00	\$1128.00
Tuition	3,814.0	11,442.	13,732.	41,196.

** (a)	0	00	00	00
Campus Based Fees	500.07	1,500.21	500.07	1500.21
USHIP Health Insurance (waivable) (see above)	986.00	2,958.00	986.00	2,958.00
Subtotal	\$5,676.07	\$17,028.21	\$15,594.07	\$46,782.21
Estimated Personal Expenses (b)				
Room and board	\$5,821.00	\$17,463.00	\$5,821.00	\$17,463.00
Books and supplies	381.00	1,143.00	381.00	1,143.00
Personal Expenses	512.00	1,536.00	512.00	1,536.00
Transportation	266.00	798.00	266.00	798.00
Subtotal	6,980.00	20,940.00	6,980.00	20,940.00
Total Budget	\$12,656.07	\$37,968.21	\$22,574.07	\$67,722.21
**Subject to change based on state appropriation and UC Board of Regent's approval				
a) Undergraduates who are unable to maintain a full-time program of study because of employment responsibilities, family obligations, or health problems may be eligible for a 50 percent reduction in tuition. One quarter at \$1,907; two quarters at \$3,814.				
b) Estimated personal expenses for students living off campus total \$6,386 per quarter or \$19,158 for three quarters. Estimated personal expenses for students living with family total \$4,067 per quarter or \$12,201 for three quarters.				

Late Fees

You may be assessed late fees if you fail to make university payments or enroll by the specified deadlines. Late fee amounts of \$50 each are assessed for a late registration payment and/or late enrollment, \$25 for a late housing payment, and \$25 for miscellaneous fees. Deadlines are published in the Schedule of Classes, and they appear on the Statement of Account.

Estimated Personal Expenses

The figures given for estimated personal expenses are for a single undergraduate living on campus. Expenses will be higher for married students, students with children, and graduate students. The information is as current and as realistic as possible; however, expenses for students vary in accordance with lifestyles, priorities, and obligations.

Room and board (in college residences). Rates for room and board in the college residence halls depend on the type of accommodation and meal plan. The current rates may be found on the campus Housing Office website. The room and board amount in the Undergraduate Budget table above is the average cost for an on-campus student with the average meal plan and additional Flexi Dollars.

Personal Expenses. This budget item covers a broad range of expenses including clothing, laundry, personal grooming, recreation, and health maintenance. It also covers minimum expenses for modest travel to visit family.

Rates are paid quarterly. The rate ranges listed above do not cover periods of academic recess, nor does the budget above. Housing charges are normally payable at the beginning of each quarter. However, students may arrange with the Campus Housing Office to pay monthly.

More detailed information on room and board expenses for the individual colleges is available in the Undergraduate Housing Rates brochure distributed as part of the admission process or available from the Campus Housing Office, 104 Hahn Student Services Building, (831) 459-2394.

Fee Reversal

Students who cancel their registration before the first day of instruction in a given quarter are refunded all required fees minus a \$10 service charge. New undergraduate students who cancel their registration before the first day of instruction are entitled to a refund of all required fees except the nonrefundable \$250 undergraduate Statement of Intent to Register (SIR) Deposit (applied toward the registration fees).

Once the quarter has begun, students must petition for withdrawal. The percentage of fees refunded is determined by the effective date of the withdrawal, according to the schedule below. A student is not eligible for university services after the effective date of withdrawal.

A student entering the armed forces before the sixth week of the quarter is entitled to a full refund of the Student Services Fee—provided no course credit is received.

More detailed information on withdrawal and refund procedures is included in the quarterly Schedule of Classes and The Navigator, both online at the Registrar's website, and in the Graduate Student Handbook. Information on refunds of room and board charges is contained in the campus housing contract, provided to all applicants for on-campus housing. For more information on how withdrawing affects your financial aid, refer to the Financial Aid and Scholarship Office website at Financial Aid and Scholarships website.

Schedules of Refunds	
All Continuing and Readmitted Students and New Students Not Receiving Federal Financial Aid	
Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-18	50
19-35	25
36 and over	0
New Students Who Receive Federal Financial Aid and Withdraw during Their First Academic Term	
Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-14	80
15-21	70
22-28	60
29-35	50
36-42	40
43 and over	0
<p>* For new students, the Undergraduate Statement of Intent to Register (SIR) deposit that is paid will apply towards the University Registration Fees (Student Services Fee/ Tuition/ Non Resident Tuition/ Campus Fees). The SIR Deposit is non refundable. If the University Registration Fees are reduced/reversed, the SIR Deposit funds are forfeit. The schedule of refunds applies to the balance of fees. Percentages listed (days 1–35 or days 1–42) should be applied individually to Nonresident Tuition, the Educational Fee, the University Registration Fee, and Santa Cruz campus fees. The Health Insurance Fee is nonrefundable.</p>	

Deferred Payment Plan

The Tuition Deferred Payment Plan (TDPP) is a plan provided by Student Business Services (SBS) that will allow you to break your Registration fees (Student Services Fee/Tuition/Non-Resident Tuition/Campus Fees) for the term into 3 monthly installments. Review Details about the Plan for more information.

Financial Aid

The university maintains a robust financial aid program of grants, scholarships, loans, and part-time employment for undergraduate students who require financial assistance. The Financial Aid and Scholarships Office administers these

resources to help bridge the gap between the cost of education and what parents and students can reasonably contribute.

If you are a dependent student, the contribution expected from you and your parents is determined through an analysis of your family's financial strength, considering such variables as income, number of dependents, living expenses, and savings and investments (excluding your primary residence). Federal, state, and university policies and procedures are applied. The same analysis is used for married and independent students with the exception of parent information. The federal definition of an "independent student" is used to determine your dependency when you complete the Free Application for Federal Student Aid (FAFSA).

The UC Blue and Gold Opportunity Plan is a Financial Aid Initiative that ensures that undergraduate California residents whose families earn a total income less than \$80,000, meet application deadlines, and who demonstrate enough financial need are guaranteed to receive gift aid from all sources to cover UC systemwide tuition and fees. Qualified students must be in their first four years of attendance (first two for transfer students).

No student will receive more scholarship and grant support than the calculated financial need. All sources of scholarship and grant awards (federal, state, institutional, and private sources, including outside agency scholarships) will count toward covering fees and meeting the Blue and Gold Opportunity Plan commitment. The majority of students who meet the income eligibility standard receive much more grant and scholarship funding than the plan covers.

In addition to the minimum funding under the Blue and Gold Opportunity Plan, undergraduates with sufficient financial need will receive additional grant support to help defray other educational expenses (e.g., books, living expenses, and transportation).

Application Deadlines

The Free Application for Federal Student Aid (FAFSA) may be submitted online at the Federal Student Aid website on or after Oct. 1 of the year prior to the academic year you wish to receive aid (e.g., Oct. 1, 2020, for applicants for fall 2021). Students who are ineligible to complete the FAFSA, but who meet AB 540 criteria, may be eligible to file the Dream Application. Submit a financial aid application each year before the priority deadline of March 2 to be eligible for all types of aid.

Students admitted for fall quarter will receive an estimated financial aid award in April.

The Financial Aid and Scholarships Office may require additional documentation from applicants. These applicants will be sent an email instructing them to login to MyUCSC and view their "To Do List," where required documents are requested (e.g., copies of student and parent tax returns or other forms). These documents must be received by the deadline on the "To Do List" for a student to be considered for all sources of aid administered by UC Santa Cruz. The deadline is June 2.

Conditional awards for admitted students may change as a result of the review of documentation.

Applicants who submit verification documents after the deadlines will be considered for aid based on availability.

Students admitted for winter quarter must have submitted a FAFSA by their admission notification date. Items requested on your MyUCSC “To Do List” must be submitted by December 2. Award notifications will be made as soon as possible after you are admitted/readmitted and all requested financial aid documents are received.

Types of Aid

If you apply for financial aid and meet the application deadlines, you are considered for all types of aid described below. Based on your financial need, your financial aid package may include a combination of grants, scholarships, loans, and work opportunities.

Grants

- **UC Santa Cruz Grants** are awarded to students based on financial need.
- **Cal Grant A & B** (eligible California residents) are awarded by the California Student Aid Commission to California residents who meet eligibility requirements and who demonstrate financial need and academic achievement. In addition to submitting a FAFSA or Dream Application*, first time applicants must also complete and submit the Cal Grant GPA Verification Form no later than March 2. Cal Grant A and B awards pay Tuition and Student Services Fees at UC.
- **Middle-Class Scholarship Grants** are provided by the California Student Aid Commission to eligible California resident students with total family incomes under \$184,000 and net assets less than \$184,000. Grants are awarded on a sliding scale with a cap of 40 percent of systemwide tuition, after considering other forms of grant aid.
- **Federal Pell Grants** are offered to eligible undergraduate students who demonstrate significant financial need based on the expected family contribution (EFC). Awards are variable depending upon the EFC; the maximum Pell Grant for 2020-21 is \$6,395.
- **Federal Supplemental Educational Opportunity Grants** are awarded to undergraduate students who demonstrate significant financial need. These grants supplement the UC Santa Cruz Grant program. Students must meet application deadlines to be considered. The maximum award is \$4,000.

Scholarships

- **UC Santa Cruz Scholarships** range from \$250 to \$10,000 per year. (The average award is about \$1,500.) Funding comes from private donors, alumni, and the

university. Entering UCSC students are considered for scholarships based on responses to scholarship questions on the UC Application for Undergraduate Admission. Your application essay will serve as your scholarship essay. Selected students are notified throughout the academic year. All continuing students are automatically considered for scholarships based on various factors including cumulative GPA.

- **Regents Scholarships** are the most prestigious merit scholarships awarded to undergraduates. Freshman Regent Scholars receive a total of \$20,000 paid over four years. New junior transfers and continuing students selected in the junior year receive the Regents Scholarship for a total of \$10,000 paid over two years. The scholarship amount varies for continuing students based on the year in college and year appointed.
- **Other Scholarships:** Some campus scholarships are restricted to students from particular geographic areas or family backgrounds, or are limited to students in particular majors, classes, or colleges. The donors have different reasons for giving, and their varied interests are reflected in the wide range of scholarships available. Merit and restricted scholarship awards range up to \$5,000.

Need-Based Loans

- **University Loans** are offered to first-year undergraduate students. Repayment begins nine months after a student falls below half time enrollment or graduates from the university. During repayment, the interest rate accrues at 5 percent annually.
- **Federal Direct Subsidized Student Loans** are funded by the federal government and can be borrowed up to the federal limits based on student status (please see Direct Loan Limit Chart below). Students pay an origination fee, which is deducted from the total accepted amount of the loan. Repayment begins six months after a student falls below half time enrollment. Interest rates and loan fees are updated annually and are hosted by Federal Student Aid.
- **CA Dream Loans** are provided to eligible undocumented AB 540 to help cover the cost of attending UC. The CA Dream loan program is funded by the state and UC, and aims to close that gap and provide eligible students with the opportunity to borrow student loans to help pay for their education. Repayment begins nine months after a student falls below half-time enrollment or graduates from the university. During repayment, the interest rate accrues at 5 percent annually.

Non-Need-Based Loans

The following loans are available to both undergraduate and graduate students:

- **Federal Direct Unsubsidized Student Loans** are funded by the federal government and can be borrowed

up to the federal limits based on student status (please see Direct Loan Limit Chart below). Unsubsidized loans are offered to students who do not demonstrate financial need or who have exhausted all need based aid. Interest accrues on unsubsidized loans from the date the loan is disbursed. The student pays an origination fee which is deducted from the total accepted amount of the loan. Students may begin repaying principal and interest on Federal Direct Unsubsidized Student Loans immediately, pay only interest immediately, or defer both principal and interest until they are no longer enrolled in school at least half time.

- Federal Direct Parent Loans for Undergraduate Students (PLUS).** Parents of dependent students can apply for a PLUS loan and may borrow up to the full cost of attendance as defined by the UCSC Financial Aid and Scholarships Office. Applicants must pass a modest credit check through the Department of Education for the loan to be approved. Repayment begins six months after a student falls below half time enrollment. Interest rates and loan fees are updated annually and are hosted by Federal Student Aid. Loan repayments begin 60 days after the last disbursement for the academic year (the last disbursement is typically the first day of spring quarter). Parents do have the option to defer payment, similar to the student's ability to defer on their Federal Direct loan above. See your loan servicer for more information.

Annual and Lifetime Federal Direct Student Loan Limits			
	Subsidized Loans	Unsubsidized Loans	Combined Subsidized and Unsubsidized Loans
Dependent Students			
Freshman	\$3,500	\$2,000	\$5,500
Sophomores	\$4,500	\$2,000	\$6,500
Juniors and Seniors	\$5,500	\$2,000	\$7,500
Lifetime Loan Limits	\$23,000	\$31,000	
Independent Students¹			
Freshman	\$3,500	\$6,000	\$9,500
Sophomores	\$4,500	\$6,000	\$10,500
Juniors and Seniors	\$5,500	\$7,000	\$12,500

Lifetime Loan Limits	\$23,000	\$57,000	
Graduate Students	N/A	\$20,500	\$20,500
Lifetime Loan Limits		\$138,500	
¹ Refers to students who answered "yes" to any dependency status question on the FAFSA. These loan limits also apply to dependent undergraduate students whose parents were denied a PLUS loan due to adverse credit history.			

Other Loans

The University of California develops and publishes lists of private lenders who offer the most favorable terms for UC borrowers. Lender lists may be found on UCSC's Financial Aid and Scholarships website under Private Loans and are also available at www.elmselect.com.

Federal Work-Study

Federal Work-Study gives students who demonstrate financial need the opportunity to work part-time to earn money to help cover expenses while enrolled at UC Santa Cruz.

Some on-campus and community jobs are posted online at the Career Center website. Not all campus jobs are posted with the Career Center. Another way to locate on-campus jobs is through networking. Examples include talking to students, staff, and faculty at your college, in your dorm and dining hall, and in the academic departments. The Career Center can help you with résumé writing and job-search strategies. Jobs are competitive, and this award does not guarantee a position.

Loan Forgiveness Programs

The federal government will forgive all or part of a student loan under certain circumstances. Examples of these include performing volunteer work or military service and practicing medicine in certain communities. For a summary of such exemptions, visit the Federal Student Aid website.

More Information

For more information about applying for financial aid, rights and responsibilities, and document deadlines contact the Financial Aid and Scholarships Office at (831) 459-2963 or visit us at 205 Hahn Student Services Building.

Veterans Benefit Services

The VA School Certifying Official (SCO) in the Office of the Registrar is responsible for administering the federal and state Department of Veterans Affairs (VA) educational benefits programs at UC Santa Cruz for students who as veterans,

veterans' dependents, active duty, or reservists receive education benefits. Students should contact the Veterans Benefit Services office as soon as they receive notification of admission to UCSC to ensure timely processing of their benefit claims.

The Veterans Benefit Services staff assists with the California Department of Veterans Affairs' college fee-waiver program for dependents of veterans who have service-connected disabilities or who have died from service-related causes. Students classified a California resident for UC tuition may apply for the college fee-waiver program at their County Veterans Services Office. Claims for fee waivers should be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the VA's processing of an original or reopened service-connected disability compensation claim. A copy of the initial denial letter and Disability Rating from the VA is required to document such circumstances. The Cal Vet Fee Waiver may only be applied to Summer Session fees if you are a continuing UC student. Note that an application of veterans benefits may impact financial aid eligibility.

UCSC will not prevent enrollment, assess late registration fees, require alternate or additional funding, or deny access to campus resources available for students using VA Education Chapter 33 (Post-9/11 GI Bill®) or Chapter 31 (Vocational Rehabilitation) benefits while payment is pending from the VA (up to 90 days). To qualify, provide a Certificate of Eligibility or an eBenefits GI Bill® Statement of Benefits and all required VA forms needed to certify enrollment by the first day of class. For more information please see the Veterans Benefits and Transition Act of 2018, section 103. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA).

Veterans Benefit Services is located at 190 Hahn Student Services Building. For more information, visit the Veterans Benefit Services website, call (831) 459-2709, (831) 459-3459, or (831) 459-2910, or email vets_benefits@ucsc.edu.

Veteran Resource Center (VRC) is a STARS program for military affiliates returning to school or transferring to UC Santa Cruz. In this peer mentor program, military affiliates will meet each other and receive assistance as they navigate admission and transition into university life. Ongoing personal and academic support and outreach to prospective students are also offered. The Veterans Resource Center is located at Kresge College right inside the entrance, off the main parking lot. Contact the VRC staff at **(831) 459-1520**, or send an email to vets@ucsc.edu, or visit the STARS website.

UNDERGRADUATE ACADEMIC PROGRAM

In this section:

Planning Your Academic Program

Students who enter as frosh are expected to graduate in four years. To do so, you must pass an average of 45 credits per year, to reach a total of 180 credits, the minimum total credits for graduation. Transfer students generally enter with 90-105 credits, and may need more than two years to complete all requirements, depending on their major.

Undergraduate courses are classified as lower division or upper division. Lower-division courses (numbered 1–99) are designed for first-year and sophomore students but may be taken by more advanced students. Upper-division courses (numbered 100–199) are designed for junior and senior students, but may be open to first-year and sophomore students who have sufficient background, or instructor support.

Graduate courses (numbered 200–299) are generally restricted to graduate students. Some undergraduates may enroll in select graduate courses if they can show the instructor that they have completed sufficient preparation for the subject matter of the course.

Here is what to expect during four years at Santa Cruz:

Students who are admitted as frosh complete their orientation course, college core course, and satisfy the Entry Level Writing Requirement during their first year. They also begin taking foundation courses for potential majors, along with general education requirements. Your advisors can help you plan a program that fulfills graduation requirements while meeting your educational goals (see Advising: From Course Selection to Careers).

If you are exploring majors you may intentionally explore different fields of study during your first two years at Santa Cruz by taking foundation courses that will help you both identify whether a major is a good fit for you and will satisfy prerequisites for declaring the major (called "major qualification requirements").

Students who enter as frosh or sophomores are required to declare a major before enrolling in the equivalent of their third year. Students who enter as junior transfers are required to declare their major in their second quarter at UC Santa Cruz. This means that students should be certain they start taking major qualification courses as soon as possible. The program statements in this catalog indicate for each major whether it is important to begin taking classes right away. Transfer students should complete any lower-division requirements for their intended major that are offered at their current campus, and should ensure they have completed any major preparation requirements for admission. Some students may also find it helpful to complete courses that fulfill general education requirements.

During your junior and senior years at UC Santa Cruz, you will concentrate on the upper-division and comprehensive requirements for your major, as well as completing your general education requirements. If you entered UCSC without

having fulfilled the requirement in American history and institutions, you will also need to do so before you graduate.

Graduation Requirements

To qualify for a bachelor's degree, you must meet the following conditions:

- Earn a minimum of 180 credits (courses confer credits with a grade of pass or D minus or better)
- Satisfy the university requirements in American history and institutions and in Entry Level Writing (English composition)
- Satisfy each of the campus general education requirements with a course grade of Pass, C (2.0 grade point average), or better
- Satisfy requirement of your UC Santa Cruz college
- Complete an approved major program, including its comprehensive requirement, with grades of Pass, C (2.0 GPA), or better in all courses satisfying major requirements. **Some majors require letter grades higher than C to qualify to declare the major.**
- Have an overall GPA of at least 2.0 in all letter-graded courses taken at UCSC and other University of California campuses
- Have no more than 25 percent of your UCSC credits graded on a Pass/No Pass basis. This includes any credits completed in the Education Abroad Program or at another UC campus in an intercampus exchange program. Departments may require that some or all courses used to satisfy the major must be taken for a letter grade.
- Meet the UCSC senior residence requirement

UC Santa Cruz students are responsible for selecting courses necessary to fulfill graduation requirements and prepare for advanced study or a career. It is essential that you consult regularly with academic advisors about course selection.

Transfer students may be able to use some of the courses they completed at other schools to help meet the 180-credit requirement. (Semester-system credits can be multiplied by 1.5 to derive equivalent quarter-system credit.) The Office of Admissions determines which courses are transferable.

University Requirements

UC Santa Cruz administers three requirements from the University of California: (1) American history and institutions, (2) Entry level writing, and (3) UCSC senior residence.

American History and Institutions

Every candidate for a bachelor's degree must demonstrate knowledge of American history and institutions. Fulfill this requirement in one of the following ways:*

- Achieving a score of 550 or higher on the SAT Subject Examination in U.S. History
- Achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in U.S. History, or by achieving a score of 5, 6, or 7 on the IBH History of the Americas Examination
- Completing a college-level course in U.S. history and institutions
- Certification of completion of the requirement on a transcript from an accredited California institution of higher education
- Completing an acceptable history or government course in high school that satisfies the subject requirement for admission to the university, described in Subject Requirements.

A list of courses that fulfill the American History and Institutions requirement, as well as information for satisfying this requirement outside UCSC, is available [here](#). Students may also search for AH&I courses from California Community Colleges via ASSIST.org's transfer articulation agreements.

Entry Level Writing Requirement

Every candidate for a bachelor's degree must demonstrate an acceptable level of ability in English composition. Prior to enrollment in your fourth quarter, you must fulfill the Entry Level Writing Requirement in one of the following ways:

Test Scores and Credits

- 30 or better on the ACT, English Language Arts; or
- 30 or better on the ACT, Combined English/Writing (last administered June 2015); or
- 680 or better on the SAT, Evidenced-Based Reading and Writing*; or
- 680 or better on the SAT Reasoning Test, Writing (last administered January 2016); or
- 3 or above on either Advanced Placement Examination in English; or
- 5 or above on an International Baccalaureate Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam); or
- 6 or above on an International Baccalaureate Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam); or
- 5 or above on an International Baccalaureate Higher Level English A: Language and Literature exam; or
- 6 or above on an International Baccalaureate Standard Level English A: Language and Literature exam.

Transfer work

The Entry Level Writing Requirement (ELWR) can also be met by earning a grade of C or higher in an acceptable English composition course offered by a college or university.

Satisfying ELWR at UC Santa Cruz

Incoming students who have not satisfied ELWR via test or transfer credits will follow a directed self-placement process to enroll in an appropriate writing course at UCSC: WRIT 25, WRIT 26, WRIT 1, or WRIT 1E. Courses are offered in sequence depending on placement. Students who successfully pass WRIT 1 or WRIT 1E will satisfy Entry Level Writing. For additional information on ELWR, please see the Writing Program website.

* All students who enter UCSC as frosh in 2020 or after must demonstrate their command of the English language by satisfying the ELWR before enrolling in their fourth quarter. However, students placed into Writing 25 have until the end of their fourth quarter of enrollment to satisfy the ELWR.

For additional information on fulfilling UCSC's writing requirements, see the Writing Department's program statement.

Senior Residence

Senior Residence

Every candidate for a bachelor's degree must be registered at UCSC for a minimum of three quarters. In addition, of the final 45 quarter credits, 35 must be in regular courses of instruction taken as a registered student at UCSC (including during the summer session).

The credit requirement for residence is applied differently to students participating in one or more of the off-campus study programs approved by the Academic Senate or the division. Participating students may satisfy the requirement in either of two ways:

1. Complete 35 of their final 45 credits before leaving the Santa Cruz campus to participate in one or more off-campus approved study programs. In this scenario, students do not have to return to Santa Cruz for any additional coursework after they have finished the program(s).
2. Complete 35 of their last 90 credits at the Santa Cruz campus, with a minimum of 10 credits completed at UCSC after their return from the approved off-campus study program(s).

A student who takes courses outside UCSC, e.g., at community college, may choose at the time of graduation to have only some of the credits completed outside counted toward the 180-credit graduation requirement in order to meet the residency requirement. Subject credit will still be given for lower-division courses and courses at other campuses of the University of California that are not counted toward the graduation requirement. This will not require a petition, and the credit will be reduced by the Office of the Registrar, in consultation with department or college advisors, or the Admissions Office, as needed.

Open campus / Concurrent Enrollment: For students who have been admitted and matriculated at UC Santa Cruz, but who have not yet graduated, the grades earned in Open Campus/ Concurrent Enrollment courses taken after their first matriculation at UCSC appear on the student's UC Santa Cruz transcript, are notated as Open Campus courses, count toward University of California and UC Santa Cruz Grade Point Average (GPA), and count toward senior residency requirements.

General Education Requirements

UC Santa Cruz's General Education (GE) requirements are meant to accomplish several goals:

- Provide students with a base of knowledge and skills that future learning can build on.
- Expose students to a broad range of disciplines and methodologies, to better prepare them for a world of complex problems and rapid changes.
- Enhance the abilities of students to approach problems in appropriately analytical ways.
- Prepare students to function as responsible and informed participants in civic life, considering pressing societal issues (such as the environment, the economy) productively and from a variety of perspectives.

Each area has a general education code, and only courses with that code satisfy the requirement. Codes appear in the course descriptions in this catalog and in the "General Education" field on the MyUCSC Class Search page.

Reference: Complete List of Courses That Fulfill General Education Requirements by Course Title

Students should review the requirements for their proposed or declared major(s) to ascertain whether some of their general education requirements will be fulfilled by completing their major.

General Education Requirements		
Category	General Education Code	Number of Required Credits
Cross-Cultural Analysis	CC	5
Ethnicity and Race	ER	5
Interpreting Arts and Media	IM	5
Mathematical and Formal Reasoning	MF	5
Scientific Inquiry	SI	5

Statistical Reasoning	SR	5
Textual Analysis	TA	5
Perspectives (choose one from the following three categories) Environmental Awareness Human Behavior Technology and Society	PE-E PE-H PE-T	5
Practice (choose one from the following three categories) Collaborative Endeavor Creative Process Service Learning	PR-E PR-C PR-S	2
Composition	C	5
Disciplinary Communication	DC	5*
*Students satisfy the Disciplinary Communication (DC) requirement by completing one to three upper-division courses required for their major, totaling a minimum of five credits. The DC requirement must be completed at UCSC —transfer and EAP courses do not apply to this requirement.		

Cross-Cultural Analysis

CC code: one 5-credit course or equivalent. Courses that carry the CC GE designation aim to prepare students for a globalizing world, with increased interaction and integration among peoples, economies, and governments. These courses aim to encourage a broader and deeper understanding of cultures and societies outside the United States. Such courses might provide an in-depth examination of one culture, or one aspect of such culture (for example, art, music, history, language). Alternatively, these courses might aim to help students develop skills of cross-cultural comparison and analysis. A third option is courses that explore topics that are inherently cross-cultural such as international relations or the processes of economic globalization. Whatever the approach, these courses all aim to help students develop the openness and critical perspective necessary for cross-cultural understanding. Although themes of privilege and oppression are centrally relevant to the history and current experience of many cultures, such themes are not required to be addressed in cross-cultural awareness courses.

Ethnicity and Race

ER code: one 5-credit course or equivalent. Courses that carry the ER GE designation prepare students for a state and a world that are increasingly multiethnic and multiracial. Beyond familiarizing students with the culture and/or history of one or more ethnic or racial groups, these courses also aim to develop theoretical and practical understanding of questions such as (but not limited to):

1. how categories of ethnicity and race are constructed
2. the role that ethnicity and race can play in identity formation
3. how ethnicity and race have historically been used to justify forms of enforced inequality
4. contributions of people of various ethnicities to society and to political change

Whatever the approach, these courses are particularly concerned with how ethnicity and race may intersect with other categories such as gender, class, or sexual orientation, to shape self-understanding and patterns of human interaction. While such courses may often adopt an historical perspective on the issues they consider, they will provide a critical perspective on race/ethnicity relevant to the present.

Interpreting Arts and Media

IM code: one 5-credit course or equivalent. Courses that carry the IM GE designation explore the complex ways in which information of all kinds is represented by visual, auditory, or kinesthetic means, or through performance. Contemporary life bombards us with visual and auditory media, often in the form of advertising or advocacy. These courses build an in-depth understanding of one or more forms of artistic media: that is, media in which non-textual materials play primary roles. They offer skills in the practice, analysis, interpretation, and/or history of one or more of these media, as well as the ability to analyze the means by which these media encode and convey information.

Mathematical and Formal Reasoning

MF code: one 5-credit course or equivalent. Courses that carry the MF GE designation emphasize university-level mathematics, computer programming, formal logic, or other material that stresses formal reasoning, formal model building, or the application of formal systems. These courses generally focus on one of the following:

1. mathematical reasoning and proof
2. formal logic
3. computer programming
4. other formal systems (e.g., generative grammars, economic models, formal music theory)

Whichever particular approach is used, these classes aim to teach students to think with rigor and precision, using formal or mathematical models to teach the value of logical reasoning and dispassionate analysis.

Scientific Inquiry

SI code: one 5-credit course or equivalent. Courses that carry the SI GE designation teach students about the essential role of observation, hypothesis, experimentation and measurement in the physical, social, life, or technological sciences. Students should acquire key concepts, facts, and theories relevant to the scientific method. By the end of the course they should be able to articulate an understanding of the value of scientific thinking in relation to issues of societal importance. Such courses would allow students to acquire key concepts, facts, and theories relevant to the:

1. physical scientific method
2. social science aspect
3. life sciences
4. technological method

Statistical Reasoning

SR code: one 5-credit course or equivalent. Courses that carry the SR GE designation focus on developing skills in approaching quantitative data and statistical reasoning. These courses help students interpret quantitative claims and make judgments in situations of statistical uncertainty. Such courses might include topics such as:

1. ways of presenting and misrepresenting data
2. statistical inference
3. experimental design and data analysis

Textual Analysis and Interpretation

TA code: one 5-credit course or equivalent. Courses that carry the TA GE designation have as their primary methodology the interpretation or analysis of texts. The aim of these courses is to develop higher-order reading skills and to train students how to read attentively, to think critically and analytically, to produce and evaluate interpretations, to assess evidence, and to deploy it effectively in their own work. These abilities are not only necessary for academic success, but also for full participation in civic life at every level. Textual analysis is the examination of **how and whether** a piece of writing or speaking achieves its aims, whether these are rhetorical and persuasive or aesthetic. Such courses should pay substantial attention not only to what information a poem, political speech, or scientific essay conveys, but to how it goes about doing so (by mobilizing particular metaphors, through plain speaking, via flowery language, by calling on scientific authority, or other mechanism). Please note that close reading leading to summary does not on its own constitute textual analysis.

Perspectives (one 5-credit course or equivalent from any one of the three following categories)

Perspectives: Environmental Awareness (PE-E code). Courses that carry the PE-E GE designation teach students about the complexity of particular ecosystems and/or people's interactions with nature so that students will better understand the environmental issues and trade-offs that are likely to arise in their lifetimes. The interactions between people and the Earth's environment are subtle, complex, and influenced by a variety of natural, scientific, economic, cultural, and political factors. Courses deal with one or more of the following topics:

1. The study of particular ecosystems or environments
2. Natural forces, processes, and their effect on ecosystems
3. Climates, climate models, and climate change
4. Evolution and adaptation to the environment
5. Bio-diversity and/or the robustness of nature and its feedback mechanisms
6. How cultures relate to their natural environments
7. Human efforts to create, preserve, and modify environments
8. Management of natural resources (such as fossil fuels, forests, and fisheries)
9. Issues of sustainability (such as sustainable agriculture or renewable energy)
10. Pollution and its effect on ecosystems
11. Ecological impacts of non-native species and other ecological disasters

Perspectives: Human Behavior (PE-H code). Courses that carry the PE-H GE designation help students to prepare for a world in which many of the most pressing challenges (such as genocide, environmental degradation, poverty) are impacted by human thoughts, decisions, or practices. As well, they provide a kind of "owner's manual" for students to assist them in understanding themselves, their roles (for example, parent, partner, leader), and their social groups (family, workplace, neighborhood, nation). These courses impart specific knowledge about some aspect of individual human behavior or the operation of human groups. As well, they are likely to provide an introduction to one or more specific methodologies, such as ethnography, longitudinal analysis, or experimentation. A central aim, however, is to help students appreciate that better solutions to problems (whether global or personal) can often be found by incorporating information about how humans think, feel, and act.

Perspectives: Technology and Society (PE-T code). Courses that carry the PE-T GE designation focus on understanding technological advances, how they are

developed, and their impacts on society. Imparting a basic understanding of the dynamic technological society in which we live is an essential goal of academic institutions. The study of technology helps satisfy the need of society for knowledgeable people able to understand, participate, and guide the rapid technological advances that play such a vital role in our world.

Practice (one minimum 2-credit course from any of the three following categories)

Practice: Collaborative Endeavor (PR-E code). Courses that carry the PR-E GE designation teach students strategies and techniques for working effectively in groups to produce a finished product. For example, students might learn specialized practical information, such as how to use change-management software to monitor and manage changes initiated by multiple group members. Alternatively, they might learn basic information about leadership, teamwork, and group functioning, which they can incorporate into their own group process. What is common to all courses that carry the PR-E general education requirement is that some instruction regarding the process of collaboration is provided in addition to instruction specific to the academic discipline and the products being produced. In other words, assigning group work is not sufficient; explicit instruction in techniques of collaboration is required.

Practice: Creative Process (PR-C code). Courses that carry the PR-C GE designation teach creative process and techniques in a context of individual or collaborative participation in the arts, including creative writing. For creative writing, students will publish an informal group collection or individual dossier of their successful writings. Courses may combine theory and experiment in the creation of a new artwork, or new interpretation(s) of an existing artwork. Creative Process courses include studies in individual or group creativity or improvisation, and/or ensemble rehearsal and performance. Students who elect to satisfy this requirement will take at least two credits of individual or group creative work; however, the requirement may be satisfied within courses of greater than two credits. Where appropriate, sponsoring units may require a sequence of two or three 2-credit courses with the PR-C designation assigned to the final quarter. For sequences culminating in a semi-professional public performance, an audition at which students demonstrate aptitude and a foundation of skills will be required.

Practice: Service Learning (PR-S code). Courses that carry the PR-S GE designation provide supervised learning experiences where students reflect on, communicate, and integrate principles and theories from the classroom in real-world settings. Service learning provides students with an opportunity to integrate their academic coursework with community involvement. Students gain valuable practical skills while giving back to the community.

Composition

The general education writing requirements at UCSC consist of the Entry-Level Writing Requirement (ELWR), and Composition (C). Successful completion of College 1 and ELWR are prerequisites for students' enrollment in the C course (Writing 2). Students must successfully complete Writing 2 before the seventh quarter of enrollment.

Disciplinary Communication (DC) Requirement

The goal of this requirement is to ensure that students acquire the skills in writing and other forms of communication appropriate for their discipline. As such, the DC is automatically fulfilled by the completion of major requirements. Students satisfy the DC requirement by completing between one and three upper-division courses required for their major, totaling a minimum of 5 credits. The DC requirement must be taken at UCSC. Any exceptions or substitutions to the Disciplinary Communication requirement must be approved by the Committee on Courses of Instruction.

Disciplinary Communication requirements from 2019 onward are compiled here.

College Requirements

You must fulfill the requirements of your college in addition to those of your major and of the university. Each college has established a core course, which all first-year students are required to complete. Students admitted as transfer students are exempt from the core course requirement but may take the course at their option on a space-available basis. College requirements are outlined below.

COLLEGE NINE

- CLNI 1, Academic Literacy and Ethos: International and Global Perspectives, fall quarter

COLLEGE TEN

- JRLC 1, Academic Literacy and Ethos: Social Justice and Community, fall quarter

COWELL

- COWL 1, Academic Literacy and Ethos: Imagining Justice, fall quarter

CROWN

- CRWN 1, Academic Literacy and Ethos: Ethical and Societal Implications of Emerging Technologies, fall quarter

KRESGE

- KRS1, Academic Literacy and Ethos: Power and Representation, fall quarter

MERRILL

- MERR 1, Academic Literacy and Ethos: Reading Ourselves, Reading the World, fall quarter

OAKES

- OAKS 1, Academic Literacy and Ethos: Communicating Diversity for a Just Society, fall quarter

PORTER

- PRTR 1, Academic Literacy and Ethos: Arts of Reading, fall quarter

RACHEL CARSON COLLEGE

- CRSN 1, Academic Literacy and Ethos: Environment & Society, fall quarter.

STEVENSON

- STEV 1, Academic Literacy and Ethos: Self and Society, fall quarter

and

- STEV 2, Self and Society 2, winter quarter

Advanced Placement and International Baccalaureate Examinations

The university grants credit for College Board Advanced Placement (AP) Examinations on which a student scores 3, 4, or 5 and for International Baccalaureate Higher Level (IBH) Examinations on which a student scores 5, 6, or 7. The university does not grant credit for IB standard or subsidiary level exams.

Students who complete the IB diploma with a score of 30 or above will be awarded six quarter credits toward their UC degree, in addition to the credits earned for individual Higher Level exams (usually 24 quarter/16 semester credits). Students who receive IB certificates with scores of 5, 6 or 7 on Higher Level exams will receive 8 quarter credits.

Designated examinations are awarded elective credits which may be applied to UC graduation requirements for specific subjects and/or for general education/breadth requirements, as determined by each campus. Students who enter the UC with IB credit do not have to declare a major earlier than other students, nor are they required to graduate earlier.

Please see the Exam tables listed below for reference. Students should be aware that AP, IB, and college-level

courses will not be granted duplicate credit. In these cases, the university will award credit for only one.

2022-2023 Advanced Placement Exams (AP) and International Baccalaureate Higher Level Exams (IBH) Table

The current AP-IBH chart can also be found at the Admissions website.

The archive of previous year's AP-IBH charts can be found here.

Credit for Transfer Students

General Education for Transfers

Transfer students may apply courses taken at other institutions toward lower-division general education requirements. The disciplinary communication course(s) (DC code) must be taken at UCSC.

If you are currently attending one of the California community colleges, see the ASSIST website, consult with the UC Santa Cruz Office of Admissions, or consult your current counselor to determine which college courses satisfy UCSC general education requirements.

Transfer students who have satisfied the general education or breadth requirements of another UC campus prior to transfer will be considered to have completed the UCSC general education requirements, with the exception of the DC requirement. Completion of the Intersegmental General Education Transfer Curriculum (IGETC) prior to enrollment at UCSC will also be accepted in lieu of the campus general education requirements, with the exception of the DC requirement. Students will need to request a Letter of Reciprocity from their former UC campus in order to have their general education requirements satisfied by completion of requirements at that campus.

Intersegmental General Education Transfer Curriculum (IGETC)

The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses that prospective California community college transfer students may complete to satisfy the lower-division breadth/general education requirements at any University of California or California State University (CSU) campus (see the IGETC table below). This curriculum is the result of an agreement by the University of California, the California State University, and the California community colleges, aimed at simplifying the transfer process for community college students. The IGETC is intended exclusively for California community college transfers and is not an option for continuing UCSC students (including students who transferred to UCSC without having completed a full or partial IGETC before their first quarter) or for students transferring from four-year colleges or universities.

Official certification for IGETC can only be obtained through a student's community college. Once the official certification is received, students who complete the IGETC prior to transfer are not required to satisfy the UCSC lower-division

general education requirements. For students who are partially certified, meaning that they are only missing one or two courses for complete certification, you will be contacted by the Office of Admissions only after the official partial certification is received. Courses used to satisfy IGETC must be completed with a grade of C (2.0) or better. A grade of Credit or Pass may be used if the community college's policy states that it is equivalent to a grade of C (2.0) or better.

IGETC is not recommended for majors that require extensive course preparation, such as any major in the Jack Baskin School of Engineering or the Division of Physical and Biological Sciences.

You may not return to your previous institution to complete IGETC after entering a degree program at UC Santa Cruz. If you do not complete IGETC or partial IGETC prior to beginning at UC Santa Cruz, you are required to complete the UC Santa Cruz general education requirements.

IGETC Subject and Unit/Credit Requirements		
Subject Area	Courses Required	Units/Credits Required
1. English Communication One course in English composition and one course in critical thinking/English composition. (Students transferring to CSU must take an additional course in oral communication.)	2 courses	6 semester units or 8-10 quarter credits
2. Mathematical Concepts and Quantitative Reasoning Three courses with at least one from the arts and one from the humanities.	1 course	3 semester units or 4-5 quarter credits
3. Arts and Humanities Three courses with at least one from the arts and one from the humanities.	3 courses	9 semester units or 12-15 quarter credits
4. Social and Behavioral Sciences Three courses from at least two disciplines or an interdisciplinary sequence.	3 courses	9 semester units or 12-15 quarter credits
5. Physical and Biological Sciences One physical science course and one biological science course, at least one of which includes a laboratory.	2 courses	7-9 semester units or 9-12 quarter credits

6. Language Other Than English Proficiency equivalent to two years of high school in the same language. (Not required of students transferring to CSU.)	Proficiency	Proficiency
Total	11 courses	34 semester units or 45-57 quarter credits

Major Requirements and Course Prerequisites for Transfer Students

Students who believe they have taken courses at other institutions that satisfy major requirements or UCSC course prerequisites should review ASSIST.org for existing transfer articulation agreements from California Community Colleges. If they have additional questions for courses from other institutions, they should contact their major advisor for review.

Major and Minor Requirements

To qualify for a bachelor's degree at UCSC, you must complete the minimum requirements for a major program, as well as satisfy university, campus, and college requirements.

At UCSC, you have the option of pursuing a single major, a double major, or a combined major. The minimum requirements for an established major program are set by the sponsoring department. (If you are a transfer student, the department will determine which of your transferable courses may be used to satisfy major requirements.) The major involves substantial work in the discipline and requires no fewer than 40 upper-division or graduate credits. Only courses in which you earn a grade of Pass, C (2.0 GPA), or better satisfy major or minor requirements.

Additional Majors or Minors

To complete multiple majors and minors, you must fulfill all of the requirements for all majors and minors declared, including the comprehensive requirement for each major. In general, a single thesis may not be used for more than one major. You may count courses for more than one major or minor, as long as each major includes 40 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor, and each minor includes at least 25 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor.

The diploma of a student who has completed a double major in history and music, for example, would read "Bachelor of Arts with Majors in History and Music."

Declaring a Major

The field of interest you indicate on your application to the University of California, Santa Cruz, does not automatically

place you in a major. You are advised to declare your major as soon as possible. Students who enter as lower-division students are required to declare a major before enrolling in the equivalent of their third year.* You will not be allowed to enroll in classes for the equivalent of your third year until you have declared a major. Junior transfer students must declare a major during their second quarter at UC Santa Cruz by the deadline printed in the Academic and Administrative Calendar.

Be sure you are aware of all the necessary criteria for qualifying for the major. Petition to declare a major as soon as you complete major qualification requirements, or reach your declaration deadline quarter, whichever comes first..

Determine the requirements for possible majors as soon as possible. Certain majors require substantial preparation, with many interlocking course sequences and qualifying grades in major foundation courses. If you intend to pursue such a major, start work toward it early in your undergraduate career, and review your progress toward qualification regularly. (Review majors that interest you in the Academic Programs section of the catalog). Academic advisors can offer assistance in selecting courses appropriate to your individual needs.

***Note:** This is the year you would become a junior given normal progress to degree. For example, if you transfer to UCSC as a beginning sophomore, it is your second year here.

Comprehensive Requirement

Every major at UCSC includes a senior exit requirement designed to integrate the knowledge and skills learned throughout the curriculum. This capstone requirement may be a senior thesis, senior seminar, comprehensive examination, or some other integrative experience. Choices for satisfying this requirement are specified with the requirements for each major.

Minor Programs

See Fields of Study for undergraduate minors currently offered at UC Santa Cruz. Completion of a minor is optional. If you wish, you may complete more than one minor.

The sponsoring department establishes the course requirements for a minor. The minor involves substantial work in the discipline and requires no fewer than 25 upper-division or graduate credits. The minor appears on your official transcript but not on your diploma.

Combined Major

A combined major allows you to complete a course of study involving two disciplines offered as regular programs at UC Santa Cruz.

Examples of combined majors include environmental studies/economics and Latin American and Latino studies/politics. A combined major is designed by faculty representatives from both disciplines. In general, fewer courses are required than for a double major, and students

complete the comprehensive requirements as specified for each combined major. Combined majors currently available are listed in the footnotes in the Fields of Study.

The diploma of a student who has completed a combined major in environmental studies and economics, for example, would read “Bachelor of Arts with a Major in Environmental Studies/Economics.”

Individual Major

Academically strong students have the option of developing an individual major. Individual majors must be vetted and approved by the Committee on Educational Policy (CEP), and must be distinct from any approved major program or possible combination of major programs. Regular deadlines to declare the major also apply to individual majors; students should declare their individual major by the end of their sophomore year.

Because the process of developing and proposing an individual major requires rigorous planning, and approval is not guaranteed, students are advised to pursue an existing major plan until a proposal has been submitted and approved by CEP. Make an appointment with your college academic advisor or preceptor as soon as possible if you are considering this option.

Forming an individual major can be challenging, since three faculty members in the discipline(s) must agree to serve on a committee to supervise the major, and the major must be approved by the Committee on Educational Policy. Guidelines, policies, and forms for individual majors can be found on the Academic Senate website: Individual Major Guidelines and Information, and in Academic Senate Regulation 10.4.5.

Individual majors must include at least 10 courses (50 credits), of which at least eight (40 credits) must be upper-division. No more than two of the required courses may be independent study courses. Students who cannot meet their original study plan for the major must consult with the committee chair, and in some cases, the Committee on Educational Policy, for approval of any changes. All students who complete an individual major are awarded a bachelor of arts.

Catalog Rights

Effective for all undergraduates who entered in fall quarter 1993 or after, students may follow the degree requirements from either the University of California, Santa Cruz General Catalog published at the time of entering UC Santa Cruz or subsequent catalog(s). Students need not follow a catalog in its entirety but may elect to follow different catalog years for their college requirements, university and general education requirements, requirements of their major(s), and requirements of any minor(s).

Catalog year will initially be set for the first year of enrollment at UCSC. Students may elect to follow requirements from other catalog year(s) when petitioning to declare their major, or by talking with their advisors.. All

requirements for graduation outlined in the catalog(s) selected must be met before graduation. Changing catalog year(s) is done by contacting your major advisor (for major or minor requirements) or your college advisor (for college, university, and general education requirements).

Students transferring from other collegiate institutions may elect to meet as graduation requirements one of the following:

- those in effect at the time of transfer to UCSC;
- those subsequently established; or
- those in effect when the student entered a previous collegiate institution, provided that entry was not more than three years prior to the time of transfer to UCSC.

Students who seek readmission to UC Santa Cruz after a break in attendance greater than two years (six fall, winter, or spring quarters) must adhere to the graduation requirements in effect at the time of readmission or those subsequently established.

Although general education requirements are determined by catalog year, the specific courses that satisfy a particular GE requirement can change from year to year. The Office of the Registrar annually publishes an updated list of courses that satisfy each GE requirement (except Disciplinary Communication). Since the GE status of a course may change, to fulfill a GE requirement, a student must take the course in a year in which its GE status is recognized.

The courses that satisfy the Disciplinary Communication GE requirement for each major are published in each year's General Catalog. Students should consult the General Catalog for the year in which they plan to take their DC course(s) to find out the courses that are needed.

Students who entered prior to 1993 should see an advisor. Their catalog year(s) for graduation, whether the year they entered UCSC or subsequent year(s), will be decided at the discretion of their major department and/or their college.

Institutional Responsibility

Undergraduate students who have made significant progress toward a degree in a specific major can assume that a degree will be granted if they meet all catalog degree requirements and maintain continuous enrollment and progress.

Should UCSC find it necessary to discontinue a specific major, every effort will be made to allow currently enrolled majors to complete their degrees within a reasonable period of time. This may include (1) movement to a similar or related degree track; (2) substitution of requirements; (3) development of an individual major proposal; or (4) completion of courses at another University of California campus through the Intercampus Visitor Program. Students with questions concerning this policy should contact their major and college advising offices.

In all cases, any financial obligations are the responsibility of the individual student involved.

Evaluating Academic Performance

UC Santa Cruz has one of the more comprehensive systems for evaluating students' academic performance of any research university in the United States. The evaluation system consists of two major components: the assignment of a final grade in the course and an optional evaluation of your performance.

Evaluations

Undergraduate evaluations are at the option of the faculty. In each course for which you receive a grade of D or better (or P) an evaluation of your academic performance may be submitted. An evaluation may:

- Describe the strengths and weaknesses of your performance in the various areas of class activity (discussion, laboratory work, term papers, examinations)
- Assess your general understanding of the course content
- Recognize additional or particularly outstanding work

Evaluations may be used at UC Santa Cruz in academic advising, reviewing scholarship applications, and awarding Honors in the major. Evaluations are a permanent part of your academic record. All students may request transcripts either with or without evaluations.

Grades

At the end of each course, you will receive one of the following grade notations:

A excellent

B good

C fair

D poor

F fail

P passing

NP not passing

I incomplete

IP in progress

W withdrawal

The grades of A, B, C, and D may be modified by a plus (+) or a minus (-). You will not receive credit for graduation in any course in which you receive a final grade of F or NP. The grades I and IP are temporary grades used in special circumstances. The final notation W indicates that you officially withdrew from the course before completing it.

Grade Points

Grade points are assigned to a letter grade as follows:

4.0 = A+

4.0 = A

3.7 = A-

3.3 = B+

3.0 = B

2.7 = B-

2.3 = C+

2.0 = C

1.7 = C-

1.3 = D+

1.0 = D

0.7 = D-

0.0 = F

The grades P and NP are not included in calculating your GPA and so are not assigned grade points. Courses in which the interim grades I and IP are assigned earn no grade points or credit until the interim grade is replaced by a final letter grade.

Grade Point Average (GPA)

Undergraduates have a UC Santa Cruz cumulative grade point average calculated from UCSC courses, courses taken through the Education Abroad Program, and courses taken at another UC campus as part of the Intercampus Visitor Program.

A grade point average is determined by dividing the number of grade points earned by the number of credits attempted for a letter grade. In calculating your UCSC GPA, the interim grades IP and I are not included in the computation because you do not earn those credits until they are replaced with a final grade. (However, when checking for your progress towards satisfying the 2.0 UC GPA requirement for graduation, these interim grades are included and counted as courses with grade F [or NP]).

If you repeat a course in which you have received a C-, D+, D, D-, or F, only the last grade recorded shall be computed in your GPA for the first 15 credits of repeated work. After the 15 credit maximum is reached, the GPA will be based on all grades assigned and total credits attempted.

Undergraduates who entered UC Santa Cruz for the first time in or after fall 1997 and before fall 2001 have a UCSC cumulative grade point average only if they have elected letter grades in at least two-thirds of the cumulative credits attempted. Undergraduates who entered UCSC prior to fall 1997 cannot have an official UCSC grade point average calculated.

Pass/No Pass Option

Students in good academic standing may request to take specific courses on a Pass/No Pass basis. Students receive a P (Pass) for work that is performed at C level or better. Work performed at below a C level receives a notation of NP on the student's transcript, and no academic credit is awarded for the course. Requests for Pass/No Pass grading must be submitted and confirmed by the Grade Option deadline printed in the Academic and Administrative Calendar. If you request P/NP grading in a course and you are later placed on academic probation, your P/NP grading request will be canceled.

No more than 25 percent of the UCSC credits applied toward graduation may be graded on a Pass/No Pass basis.* This includes any credits completed in the Education Abroad Program or on another UC campus in an intercampus exchange program, but does not include transfer work from community colleges or other institutions. Students must be careful about the use of the Pass/No Pass option. Some courses may only be taken Pass/No Pass, and therefore count against the 25 percent Pass/No Pass limit. Several majors require all or most major requirements to be taken for a letter grade; read the major requirements section carefully before using the Pass/No Pass option for any course in a major you are considering.

* Exceptions granted for 2019-2021 courses due to special circumstances: P grades earned in quarters in which remote instruction was the primary means of instruction due to emergency circumstances (spring 2020, summer 2020, fall 2020, winter 2021, spring 2021, summer 2021), and/or P grades given to replace missing grades during fall 2019 or winter 2020 when a letter grade was requested, will not be included in the calculation of the 25 percent maximum P grades allowed for graduation.

Incomplete

The notation I may be assigned, at the discretion of the faculty teaching the course, when your work for a course is of passing quality but for which some specific required work has not been completed. You must make arrangements with the instructor before the end of the course in order to receive an Incomplete. To remove the Incomplete, you must submit the remaining coursework and file a petition by the deadline printed in the Academic and Administrative Calendar (generally the end of the following quarter). If you do not meet the deadline, the Incomplete lapses to a No Pass or an F, depending on the grading option selected at the beginning of the quarter.

Grade changes (except for I as above) are allowed only to correct clerical or calculation errors by the instructor and must be submitted to the Office of the Registrar by the instructor in charge of the course within one year of the close of the quarter for which the original grade was submitted.

Student Responsibility

Students are responsible for using the Academic Information Systems (AIS) to set and confirm choices for grading options

and for ensuring timely completion of all requirements. Students view their schedule at MyUCSC.

Course Loads

The usual course load for UC Santa Cruz undergraduates is 15 to 19 credits, most often as three 5-credit courses and associated laboratories and sections. After instruction begins, students with a UCSC GPA of 3.0 may enroll in up to 22 credits without special approval and may seek approval for higher loads from their college advising office. Students in their first quarter or with a lower GPA must seek approval from their college advising office for enrollment in more than 19 credits.

College approval is required to carry fewer than 15 credits unless the student is enrolled in the University Part-time Program.

Academic Progress

Academic progress is a measure of the completion of courses with a D- or better, or Pass. Colleges monitor academic progress to ensure you are progressing toward your degree, which must be earned within 15 quarters of enrollment (five years).

Minimum progress is based on length of time at University of California, Santa Cruz. You are required to make minimum progress toward your degree by maintaining total earned credits equal to or greater than the cumulative total of (a) 35 credits for the first academic year of full time enrollment, (b) 72 credits for the first two academic years of full-time enrollment (c) 36 credits for each additional year of full-time enrollment, and (d) four-fifths of the credits attempted in part-time enrollment. Credit transferred from other institutions upon enrollment at the UC Santa Cruz, is not included in minimum progress calculations.

If you do not maintain minimum progress, your college may require you to take higher course loads, complete Summer Session courses, or make other adjustments to your study plan.

A separate financial aid satisfactory academic progress policy (FASAP) defines the GPA and progress requirements for remaining eligible to receive financial aid. Information can be found on the Undergraduate Academic Progress and Financial Aid Information website.

Academic Standing

Academic standing is a measure of performance in completed courses. You must maintain a 2.0 UCSC GPA in order to remain in good academic standing.

If your UCSC term or cumulative GPA falls below 2.0 at the end of any term, you will be placed on academic probation for the next term. You will need to work with your college and major advisors to determine the best way to return to good academic standing. Be sure to take full advantage of the many learning support services available at UCSC.

If your UCSC GPA for any term falls below 1.5, or if you are on academic probation and your cumulative GPA at the end of a term is below 2.0, you are also subject to disqualification. This means that your enrollment at UCSC may be barred for a specific period of time, or you may be disqualified indefinitely from attending the University of California. In many cases, a specific study plan can be developed with your college that will enable you to remain enrolled at UCSC.

For students who entered UCSC prior to fall 2001, academic standing and progress are calculated differently. Contact your college office or see The Navigator for more information.

Financial aid's satisfactory academic progress policy (FASAP) is separate from the Academic Standing policy, and defines additional GPA and progress requirements for remaining eligible to receive financial aid. Information can be found on the Undergraduate Academic Progress and Financial Aid Information website.

Maximum Credits and Years

Students are expected to complete their degree objective(s) within four years, with maximum enrollment limits of at most 225 credits and five academic years (Advanced Placement and International Baccalaureate units are not counted). Upper-division transfer students are expected to complete their degree objective(s) within at most 135 UCSC credits and three academic years.

Colleges may make exceptions to the credit maximum for students in certain cases. Such exceptions are conditional on maintaining academic standing, minimal progress, and progress toward the degree objective(s).

Students in danger of exceeding the credit limit or the five-year or three-year limit may be required to modify their degree objective, such as by completing a major without a minor or double major, or completing a related major with fewer course requirements.

Repeating Courses

Undergraduates may repeat courses in which they earn a C-, D+, D, D-, F, No Pass, or W. For an undergraduate to repeat a course more than once requires approval of the student's college. A grade of W counts as an attempt. Courses in which a C-, D+, D, D-, or F is earned may not be repeated on a Pass/No Pass basis. Courses in which a grade of No Pass is earned may be repeated on the same basis or for a letter grade. For the first 15 credits of repeated courses, the original grade is excluded from the GPA, and only the grade from the repetition is used. After the 15-credit maximum is reached, all grades are included in the GPA. However, credit is not awarded more than once for the same course. The grade assigned each time the course is taken will be permanently recorded on the official transcript.

Academic Integrity

The university is dedicated to the unhindered pursuit of knowledge and its free expression. It is essential that faculty and students pursue their academic work with the utmost

integrity. This means that all academic work produced by an individual is the result of the sole effort of that individual and acknowledges the contributions of others explicitly. It is the responsibility of students and faculty to be absolutely clear about what constitutes plagiarism, cheating, or other violations of academic integrity. Violations of academic integrity by students result in both academic sanctions (e.g., failing the course) and disciplinary sanctions (e.g., suspension or dismissal). Consult the campus's undergraduate academic misconduct policy for more information.

Undergraduate Honors

UC Santa Cruz awards several honors for outstanding academic achievement.

Dean's Honors

Students will be eligible for quarterly Dean's Honors if they have earned a minimum of 15 units that quarter, of which at least 10 are graded, with a term grade point average (GPA) equal or higher than that required for University Honors at graduation in their group* for the current academic year. The notation "Dean's Honors" will appear on the transcript.

***Note:** GPA thresholds for Baskin Engineering majors are calculated separately from those of majors in all other divisions.

Honors at Graduation

Honors at graduation are awarded by the university and by the separate majors based on a review of their graduates' academic records. In general, honors are limited to 15 percent of the graduating class. University Honors are based on the cumulative UC GPA. Faculty review of major honors may involve additional criteria.

University Honors

To be considered for University Honors at graduation, students must have completed 70 or more credits at the University of California and have attained in their group* a UC GPA that places them in the rankings as follows: Summa Cum Laude, top 2 percent; Magna Cum Laude, next 3 percent; Cum Laude, next 10 percent. Each year and for each group, the registrar will calculate the GPA thresholds required for these levels of University Honors, based on the GPAs of recent graduates. The notation "University Honors" will appear on the diploma and transcript.

*** Note:** GPA thresholds for Baskin Engineering majors are calculated separately from those of majors in all other divisions.

Honors in the Major

At graduation, the department sponsoring a student's major program may confer Honors or Highest Honors in the major. This notation appears on the transcript as well as on the diploma. In general, no more than 15 percent of the graduation class in a major will be awarded Honors at graduation.

Deadlines

To ensure consideration for honors in the major, students should apply to graduate by the Registrar's deadline.

Any student who has a reportable disciplinary sanction for a violation of academic integrity policies may be ineligible for any honors designation, at the discretion of the agency that awards the designation.

Undergraduate Honors Opportunities

College Scholars Program

The UC Santa Cruz College Scholars Program offers a congenial and stimulating academic home for a select group of well-prepared students at UC Santa Cruz. College Scholars can expect to challenge themselves academically, find other students who are similarly motivated, and explore undergraduate research. This enriched program of study includes special courses, seminars, colloquia, and other events during each quarter of the academic year. College Scholars participate in demanding, small-scale, and research-oriented courses that catalyze creative thinking and offer a springboard to other undergraduate research opportunities.

Admission to the Fall Start cohort of the College Scholars Program is by invitation. A select group of University of California, Santa Cruz, applicants offered admission to the university will be invited to join the program, based on their record of academic achievement.

Honor Societies

Many UC Santa Cruz students are members of departmental, professional, local, and national honor societies whose goals are to recognize and improve scholastic standing in an area of interest. Among these are Phi Beta Kappa, the oldest national society that advances scholarship and recognizes excellence in the liberal arts and sciences; Tau Beta Pi, the engineering honor society that recognizes students of distinguished scholarship, exemplary character, and dedication to service; and Psi Chi, which encourages, stimulates, and maintains excellence in scholarship, and advances the science of psychology.

Awards and Scholarships

UC Santa Cruz has a variety of scholarship and award opportunities that are designed to reward, encourage, and assist students in pursuing academic excellence and leadership roles. Students can find such opportunities through their colleges, departments, divisions, and various external agencies.

UCSC provides support for students for a variety of prestigious scholarships and awards such as the Karl S. Pister Leadership Opportunity Award, Deans' and Chancellor's Awards, Steck Foundation Award, Koret Undergraduate Research Awards, Boren Scholarship, Donald A. Strauss Scholarship, Fulbright U.S. Student Program, Scholarship, Marshall Scholarship, and Rhodes Scholarship.

Transcripts

Academic records are maintained by the Office of the Registrar, which will issue an official transcript only on your authorized request.

For information on ordering transcripts, please refer to Registrar's Registrar's transcripts website.

If you have outstanding financial obligations to the university, a hold may be placed on your transcript. Students may access their unofficial transcript on MyUCSC.

Transcripts for UCSC Extension courses should be requested from UCSC Extension Records, 3175 Bowers Ave., Santa Clara, CA 95054-3003, (408) 861-3700.

Privacy of Records

UCSC students are informed annually of the federal Family Educational Rights and Privacy Act (FERPA) and its provisions. This act, which the institution follows, was designed to protect the privacy of education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Educational Rights and Privacy Act Office concerning alleged failures by the institution to comply with the act.

UCSC policy explains in detail the procedures to be used by the institution for compliance with the provisions of the act. FERPA guidelines are available at Privacy of Student Records. The full text of the University of California policies applying to the Disclosure of Information from Student Records is online:
registrar.ucsc.edu/records/disclosure/index.html.

Questions concerning the Family Educational Rights and Privacy Act may be referred to the Office of the Registrar, 190 Hahn Student Services Building.

Advising: From Course Selection to Careers

Academic Advising

Academic advising at UC Santa Cruz aims to partner with students to identify and pursue paths to graduation that support their educational goals and post graduation plans, and thereby make meaningful change for themselves, their families, and communities. The core of UCSC's advising system is housed in the colleges and academic programs and is supplemented by advising and support services throughout the campus.

College academic advisors (some of whom are called "academic preceptors") are generalist professional advisors who focus on orientation to the university, pre-major advising, academic success, and campuswide requirements such as general education and university requirements. Each college has an advising team that can provide you with individual and group advising and can refer you to resources and educational opportunities. You remain affiliated with your college advisors throughout your undergraduate career.

Professional advisors in UCSC's academic programs

(sometimes called "major advisors") focus on areas related to a student's major or minor. Major advisors can help you understand declaration and major requirements, and can assist you in planning a program of study. They can help you identify enrichment opportunities within the major and refer you to appropriate faculty advisors. Faculty advisors may serve as mentors in your field, recommending courses and helping you refine your educational goals. For transfer students and for students in many majors (such as those in the physical and biological sciences, engineering, and the arts), it is important to review information provided by major advisors prior to your first quarter on campus.

For help in assessing career interests and exploring and choosing career options, contact the Career Center. The staff also can assist you with choosing a major, résumé preparation, interviewing skills, applying for an internship, and job-search strategies.

If you plan to go on to graduate school, consult with faculty in your major. Faculty advisors are the best people to ask about the quality of graduate programs in your field of interest. In addition, the Career Center offers advising and workshops on applying to graduate school.

If you intend to pursue graduate study in a field not offered as a major at UCSC, you can often prepare for your intended program through one of the campus's regular majors. You must plan your studies carefully, however, and advising will be especially important. The Career Center has information that will help prepare you for graduate and professional programs. The following are some fields in which UCSC alumni have pursued graduate study and successful careers:

- Business
- Conservation
- Film
- Finance
- Guidance and counseling
- Health fields
- High-tech industry
- Human resources
- Industrial and labor relations
- International relations
- Law
- Marketing
- Museum administration
- Public administration
- Urban planning

The Career Center includes advisors with specialized expertise in preparing for careers in medicine or another health-related field (including dentistry, nursing, nutrition, occupational therapy, optometry, osteopathic medicine, pharmacology, physical therapy, public health, and veterinary medicine), and in preparing for careers in law.

A number of programs provide additional academic and comprehensive support services to students with specific needs. Educational Opportunity Programs (EOP), Services for Transfer and Re-Entry Students (STARS), and the Disability Resource Center are described below. Counseling on personal and family issues is available through Counseling and Psychological Services. If you need assistance that is not listed in this section, check with your college advisors.

Your first step in accessing advising at UCSC is to complete the online Slug Orientation courses.

Orientation

All new UC Santa Cruz students who enter in a fall quarter are expected to participate in an online "Slug Orientation" course, for which they earn 1 credit upon passing. This orientation course begins the process of academic advising and provides a comprehensive introduction to all aspects of UCSC. After participating in online orientation, students may choose and enroll in classes for their first term.

Summer Orientation is held over the course of the summer and includes separate programs for first-year and transfer students. Orientation is mandatory for all students, and is a gateway to enrolling in the first quarter's classes.

Fall Welcome Week, scheduled approximately five days prior to the beginning of fall quarter, is the next step in the orientation and advising process for new students entering fall quarter. It provides students with an opportunity to settle into life at UCSC, take advantage of important services, and continue their academic advising. Questions about Summer Orientation and fall Welcome Week can be directed to the Office of Campus Orientation Programs at (831) 459-5468, or via email to orientation@ucsc.edu. Information is also available at Campus Orientation.

International Orientation is required for all international students regardless of residency status. The mandatory International Orientation program eases students' transition to university life and introduces students to a research university's academic expectations, UC level writing norms, campus resources, and the UCSC and Santa Cruz communities. International Orientation is scheduled prior to Welcome Week and the beginning of fall quarter. For more information, please visit the International Orientation website.

Career Success

UC Santa Cruz graduates find success in many different career fields. Their superior education is the foundation for this success. The staff at Career Success will help you link your educational experience to the world of work. The center provides a variety of employment and career-development

services to help students obtain rewarding and successful careers.

Both undergraduate and graduate students are encouraged to visit the Career Center often throughout their time on campus. The first step is to meet with a career advisor to begin developing a focused career plan. Simply sign up online for an advising appointment through SlugQuest on the Career Center website. Advisors assist students in selecting majors, finding internships and part-time jobs, applying to graduate school, conducting a job search, and much more. Workshops offered by the Career Center include: Finding and Applying to Internships; Résumé and Cover Letter Writing; Applying to Graduate and Professional School; and special workshops on specific majors or career fields. Check out the Career Planning Guide for additional career development activities suggested for students from first year through senior year.

Your college experience is likely to include a part-time job or internship in your area of interest. An internship is one of the best ways to gain practical work experience in your area of interest. The Career Center has hundreds of opportunities available. Off-campus and on-campus employment opportunities (both work-study and non-work-study) are posted on the Career Center's website.

The Career Center's website contains a wealth of material on career exploration, graduate and professional schools, job search, career fields, internships, and employers. One of the most exciting online resources is the Career Advice Network, which helps students connect with alumni in their field of interest who have a desire to assist other Slugs.

UC Santa Cruz students and alumni looking for full-time career opportunities need look no further than SlugQuest—an online site that lists job openings targeted to UCSC graduates. You may connect to SlugQuest on the Career Center website. Another way to obtain a career position is to participate in the On-Campus Interview Program. Recruiters visit campus every fall, winter, and spring to interview and hire students. The Career Center website has a list of participating companies.

The Career Center sponsors several major events every academic year. The Graduate and Professional School Fair brings representatives from the nation's top universities to campus to share information about their advanced-degree programs. Job and internship fairs, which bring hiring companies to campus, take place multiple times each year. Students looking for a job or internship will want to arrive prepared with a great résumé. Other events include the Multicultural Career Conference, which brings students and alumni together to develop mentor relationships and explore careers.

The Career Center—located at the Bay Tree Building, Room 305, in Quarry Plaza—can be reached at (831) 459-4420. Office hours are 8 a.m. to 5 p.m.

Educational Opportunity Programs (EOP)

The Educational Opportunity Programs (EOP) provide a variety of academic and personal support designed to improve the retention and academic success of first-generation low-

income and educationally disadvantaged college students. EOP helps ensure that these students successfully complete their undergraduate education and acquire the skills to prepare for graduate and professional school, as well as for future leadership roles. EOP offers the following programs:

Advising Programs and Services

EOP Advising programs and services are designed to facilitate personal growth and development with the goal of achieving academic and social integration, academic achievement, and exposure to opportunities beyond the baccalaureate degree. These programs and services include:

- Advising and counseling
- Personal counseling
- Referrals to resources, programs, and opportunities
- Peer advising

Bridge Program

The Bridge Program is a first-year experience program that supports and guides students in their transition from high school to university. Participants are first-generation college students who may come from low-income backgrounds and under-resourced California high schools. The program is designed to prepare students for the academic rigors of the university by providing them with the tools and resources necessary to achieve academic excellence in their first year and throughout their undergraduate career.

Support Services for AB540 Students

AB540 Student Services provides a broad range of support services designed to address the needs of AB540 students. These services address the gaps that AB540 students face within the university and enhance student achievement. Services provided to students include mentoring, community-building events and programs, personal advising, and student-based support.

Textbook Lending Program

This program is designed to assist students in obtaining required textbooks that they would not be able to purchase on their own due to cost. To receive textbook assistance, students must demonstrate financial hardship and must have exhausted all other forms of financial aid available to them. This includes all forms of loans (subsidized and unsubsidized).

Pre-Graduate Programs

EOP also sponsors two pre-graduate programs designed to increase the placement of EOP students in professional and doctoral programs and to encourage the pursuit of academic careers.

- **The Graduate Information Program (GIP)** supports students seeking to pursue graduate and professional school education. Services include graduate and

professional school advising; graduate school application and internship-related workshops; graduate school resource library and website; website to conferences and forums

- **Pathways to Research (P2R)** exposes undergraduate students to research opportunities and research-based graduate programs. With the assistance of their graduate mentor, participating students determine their short-term goals for the quarter and long-term goals for the school year related to exploration of and involvement in research. Students engage in bi-weekly meetings with their mentor to report on progress and plan next steps to reach their goals. P2R is a two-quarter commitment (Winter and Spring). Mentees will receive a \$300 stipend upon successful completion of the program.

For information about any of these programs, please call the EOP office at (831) 459-2296 or visit eop.ucsc.edu.

MARC and IMSD Programs

The Division of Physical and Biological Sciences sponsors two National Institutes of Health grant programs: the Maximizing Access to Research Careers (MARC) Program and the Initiative for Maximizing Student Development (IMSD) Program. Though separately funded, the projects share a similar mandate: to increase the number of well-prepared, under-represented, ethnic-minority, and disadvantaged-background students who are admitted to graduate or professional schools in biomedical sciences. The program seeks students from groups that have traditionally been denied equal access to educational opportunities in the science professions.

UCSC students should apply in their sophomore year or as juniors staying a 5th year. Both programs require a two-year commitment. In addition, a student should be in the process of completing specific introductory courses in biology, chemistry, and mathematics because the program begins in the summer. The MARC and IMSD programs aim to introduce students to program faculty, their research, and laboratory research techniques. After students successfully complete the summer program, they have the opportunity to work in a faculty lab for the following academic year. Financial compensation is available for laboratory research and participation in the summer program.

MARC and IMSD are housed under the STEM Diversity Programs and run in conjunction with UC LEADS and CAMP. The STEM Diversity Programs also work with other offices to help make the most of campus resources and provide practical assistance with the graduate school admission process. Additionally, the staff maintains an information file on summer enrichment programs (which can provide you with vital research experience), conferences, professional development workshops, journal clubs, and seminar courses. Students admitted to the program are supported by a well-equipped student office, which provides additional academic support and a convenient place for students to meet.

For further information, contact the STEM Diversity Programs office to learn more about eligibility requirements and visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu.

Academic Excellence Program (ACE)

ACE is a nationally recognized academic support program that is designed to increase the diversity of students who earn bachelor's degrees in science, technology, engineering, and mathematics (STEM). ACE offers active-learning problem solving sessions for selected mathematics and science courses.

The sessions provide a structured setting where students teach and learn from each other. An ACE session leader, who has an academic background in the subject, facilitates the problem solving sessions. Undergraduate co-leaders/peer mentors assist, bringing the student-to-teacher ratio to approximately 12:1. In addition to attending their ACE problem-solving sessions, students meet weekly with their peer mentor, who shares study strategies as well as opportunities for undergraduate teaching and research internships. ACE session leaders offer weekly office hours, as well as examination review sessions and academic and career planning. ACE students join a community of STEM scholars who are dedicated to academic excellence and success.

Applications are accepted quarterly for the upcoming term. Enrollment in ACE is limited and priority is given to EOP students who are planning to pursue a STEM major. For more information, visit the ACE website.

Multicultural Engineering Program (MEP)

Also known as the MESA Engineering Program, MEP is the university-level component of Mathematics, Engineering, Science Achievement (MESA), a statewide program of the University of California Office of the President. At UC Santa Cruz, MEP is supported by the Baskin School of Engineering. Its goal is to promote the retention and graduation of a diverse population of students, especially those from groups that remain the most underrepresented in engineering studies.

MEP provides academic and personal support for engineering students who are first-generation college students, are the first in the family to pursue engineering or computer science studies, or are from a low-income (limited financial resources) or educationally disadvantaged background. MEP's academic learning community supplements students' undergraduate experience and encourages them to continue their education by attending graduate school. MEP has a strong support system and engages students' full participation in a variety of services and activities. These include academic advising, personal counseling, tutorial services, drop-in assistance, individual and small-group study, study-skills workshops, peer-support networks, community-building activities, scholarships, and an engineering Summer Bridge program for a select group of entering first-year students.

MEP's well-equipped study center and computer lab provides 24-hour access to computer workstations, printer, textbooks,

individual lockers, and a place for students to gather and study. Students who have participated in pre-university service programs (e.g., Early Academic Outreach, Upward Bound, MESA, Talent Search, Puente, DEEP, Smith Scholastic Society) are encouraged to apply to MEP.

For further information, call (831) 459-2868, visit the MEP website, or drop by the School of Engineering Undergraduate Affairs Office, 231 Baskin Engineering Building.

Services for Transfer and Re-entry Students (STARS)

Services for Transfer and Re-entry Students (STARS) offers a broad range of personal and academic support services for all transfer and re-entry students (undergraduates 25 years and older, graduate students 29 years and older), students who are parents regardless of age, and military veterans. These services include admissions information; orientations for new students; academic seminar courses; study skills workshops; tutorial services; informal academic advising; drop-in assistance; social, recreational, and cultural programs; scholarships; newsletters; and study centers with computer workstations. STARS also acts as a clearinghouse for information about campus and community resources for UCSC's large transfer and re-entry student populations.

STARS is located at Kresge College, on the floor above the College Office. All current and prospective transfer and re-entry students are invited to visit.

Veterans Education Team Support (VETS) is a STARS program for veterans returning to school. In this peer mentor program, veterans meet each other and receive assistance as they navigate admission and transition into university life. Ongoing personal and academic support and outreach to prospective students are also offered.

Renaissance Scholars Program, which helps current and former foster youths pursue their educational goals, is affiliated with STARS.

The Osher Lifelong Learning Institute at UCSC, a UC/community organization dedicated to continuing education, is also under the STARS umbrella. The organization hosts monthly meetings with university faculty, offers courses taught primarily by emeriti faculty, and coordinates a wide variety of peer-led interest groups.

The Retirees and Emeriti Center, located at STARS, provides a resource for faculty and staff of UC Santa Cruz as they transition to and engage in retirement.

For further information regarding all the STARS programs, call (831) 459-2552. For current programs and activities, visit the STARS website.

Disability Resource Center (DRC)

The campus accommodates students with disabilities and welcomes their attendance at UCSC. The Disability Resource Center (DRC) provides services such as disability-related advising, authorization for testing accommodations,

conversion of print materials into alternative formats (audio, electronic, Braille), adaptive equipment loans, notetakers, sign language interpreters, real-time captioning services and referrals to appropriate campus or community resources.

The Disability Resource Center is located at 125 Hahn Student Services Building and can be reached by phone at (831) 459-2089, or via email at drc@ucsc.edu. More information is available on the Disability Resource Center website.

Campus access for people with mobility impairments.

Visit the campus Americans with Disabilities Act website for more information about accessibility maps, vehicles equipped with wheelchair lifts that can transport students throughout campus, and permits for accessible or medical parking spaces that are adjacent to all campus buildings. Most buildings on campus have wheelchair-accessible ramps, modified rest rooms, and other facilities. If necessary, classes are rescheduled to meet accessibility needs.

Questions and concerns can be directed as follows:

- Education/program accessibility should be addressed to the director of the Disability Resource Center, at (831) 459-2089 (voice).
- Facility or transportation access should be directed to Facilities Access Coordinator (831) 459-3759 (voice).
- Computing access to the campus should be directed to IT Accessibility Coordinator (831) 459-2410.
- Accommodating job applicants or current employees with disabilities should be directed to (Disability Management Coordinator, Benefits Office (831) 459-4602 or Assistant Director for EEO, Office for Diversity, Equity, and Inclusion (831) 459-3676.

ROTC and Military Affairs

UC Santa Cruz Air Force ROTC

Students interested in participating in the Air Force Reserve Officer Training Corps (AFROTC) have the option of attending AFROTC classes at San José State University while taking other academic classes at UC Santa Cruz.

San José State University supports a wing of AFROTC with cadets from San José State University, Santa Clara University, Stanford University, UC Santa Cruz, and many local community colleges. The Air Force ROTC program is designed to provide instruction in leadership, management, and national security studies along with military education and training. This prepares the cadet for assignment to positions of responsibility and importance in the modern Air Force. Instruction is conducted on and off campus. This program offers all eligible students the opportunity to obtain an officer's commission in the United States Air Force while earning their college degrees.

Program Overview

Our faculty brings a wealth of experience and diversity to the program. Instructors are Active Duty Air Force officers from various career areas and provide students with a first-rate academic education and military training experience. Each faculty member also acts as a student advisor to guide students through the program and help them reach the goal of an officer's commission in the United States Air Force.

College students wishing to commission as an Air Force officer through ROTC may enroll in a three-, or four-year program. Students attend Air Force ROTC classes along with other college courses and receive elective academic credit. AFROTC courses are sequenced by subject area for specific and logical reasons. Please see <http://www.sjsu.edu/afrotc/> for course information. After successfully completing all requirements, the cadets are commissioned as Air Force officers.

For information on the Air Force ROTC program, contact the Department of Aerospace Studies, AFROTC Det 045, One Washington Square, Industrial Studies Building, Room 214, San Jose State University, San Jose, CA, 95192-0051. Phone: (408) 924-2960. Email afrotc@sjsu.edu or visit the website: <http://www.sjsu.edu/afrotc/>. Students may call or inquire about program prerequisites, scholarship availability, and class schedules at the Department of Aerospace Studies.

UC Santa Cruz Army ROTC

The Army ROTC (Reserve Officers' Training Corps) is one of the best leadership courses in the country and can be part of your college curriculum. UC Santa Cruz students have the opportunity to take ROTC courses with cadets from other local campuses including Santa Clara University, Stanford, and San Jose State University. Cadets from UC Santa Cruz have flexible options to meet ROTC class requirements such as local classes on campus, shuttles to Santa Clara University, or by virtual attendance of classes at Santa Clara University through the Army's online meeting application. During classes, leadership labs, physical training, and field training exercises, Army ROTC students will learn firsthand what it takes to lead others, motivate groups and conduct missions as an officer in the Army. Upon graduation from Army ROTC, students will earn the bar of a second lieutenant and be commissioned into the Active Army, Army Reserve or Army National Guard.

Army ROTC at Santa Clara University is a program that fosters the development of cadets' academic, athletic, professional, and mental strengths. Students attend class and physical training for three hours each week, along with a Wednesday lab session that features hands-on instruction regarding Army operations and leadership situations. This program is ideally designed as a four-year process. Cadets spend their first two years familiarizing themselves with the Army, and in their third year they are expected to perform and improve as leaders in preparation for a summer leadership development camp at Ft. Knox, Kentucky. The fourth and final year of Army ROTC introduces cadets to the responsibilities of military staff, teaching them to plan, train,

lead, and develop their junior cadets in preparation for their commission. A typical four-year education with Santa Clara University ROTC comes with a service obligation of four years in the Army.

Army ROTC also gives cadets the opportunity to gain further Army experience by earning appointments to Army training schools where they will parachute from airplanes or rappel from helicopters. In addition, cadets are allowed a single quarter of study abroad, as well as the opportunity to participate in Army-funded immersion trips to dozens of countries across the globe in the summer months.

Cadets who graduate from the program will compete for active duty and reserve positions across the Army. Active officers have a full-time position and serve for a minimum of four years. Reserve officers serve for eight years part-time in either the National Guard or Army Reserve.

For more information about ROTC opportunities and scholarships contact Mario Morales by email at memorales@scu.edu or by phone at 408-554-6840, or visit the Army ROTC website at <http://www.scu.edu/rotc/>.

For more information regarding Army ROTC please visit the Army ROTC website at <http://www.goarmy.com/rotc.html>.

Undergraduate Research

At the best research universities, professors bring knowledge and creativity from their cutting-edge research into the classroom, integrating the canon of the discipline with its future directions. UC Santa Cruz takes this further with a special tradition of undergraduate research outside the classroom. UC Santa Cruz, its departments, and faculty offer undergraduates many ways to get involved in research and creative activities. These opportunities develop advanced skills and insights and provide an early introduction to the nature of graduate studies. Research projects can help students launch careers, secure admissions to top graduate schools, and truly make an impact on society.

Many majors incorporate research into their senior comprehensive requirement, with options or requirements of a senior thesis, capstone project, or other creative endeavor based on students' individual research. Other opportunities for undergraduates include structured internships or research programs, joining ongoing faculty research or creative projects, or developing their own projects under faculty supervision. The following sections discuss a sampling of UCSC's international education, field-study, and exchange programs, which enable students to deeply enrich their undergraduate experience and education as they learn by doing. For additional information, see Undergraduate Research Opportunities.

UC LEADS

After being selected as UC LEADS Scholars, students begin a two-year program of scientific research and graduate school preparation guided by individual faculty mentors and program staff. Scholars are provided with an excellent opportunity to explore their discipline, experience a research environment,

and improve their opportunities for future study in their chosen field. Each scholar is mentored by a member of the UC faculty who assists the student in designing a plan of research and enrichment activities tailored to his or her individual interests and academic goals. Scholars attend the annual statewide symposium, as well as are sponsored to participate in another STEM conference of their choice each year.

The UC LEADS program is headquartered in the STEM Diversity Programs office, along with MARC, IMSD and CAMP. To learn more about eligibility requirements and the UC LEADS program, visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu.

California Alliance for Minority Participation (CAMP)

CAMP is a statewide initiative that aims to support and retain underrepresented undergraduates to achieve their degrees in the biological sciences, physical sciences, mathematics, and engineering.

By integrating research and undergraduate education, CAMP creates a cohesive set of experiences that fully prepares undergraduates for graduate studies. CAMP motivates participants through cooperative learning, internships, faculty mentored research, and travel to professional conferences.

The CAMP program is headquartered in the STEM Diversity Programs office along with MARC, IMSD and UC LEADS. To learn more about eligibility requirements and the CAMP program, visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu.

Koret Undergraduate Research

The Koret Scholars Program provides funding for a variety of undergraduate research projects and experiences, and supports scholarships for undergraduate research projects with faculty and graduate student mentors. Each year, 50 or more undergraduates pursue research and share their experiences at the Koret Undergraduate Research Slam during Student Achievement Week.

Global Engagement

Global Engagement promotes international cooperation in teaching, research, and other fields of mutual interest with the development of formal partnership and affiliation between UC Santa Cruz and universities, foreign government agencies, and non-profit organizations abroad. Global Engagement oversees Global Learning, International Scholar and Student Services (ISSS), Global Programming, and Global Initiatives.

For further information, contact Global Engagement, 103 Classroom Unit Building, (831) 459-2858, email: global@ucsc.edu.

Global Learning

Through academic coursework, internships, and experiential learning, UCSC Global Learning aims to:

- provide students the opportunity to graduate with global experience;
- promote an internationalized campus that cultivates an understanding of our diverse global community; and
- encourage students to study, explore and engage with other cultures—to broaden their perspective and involvement in the world.

UC Santa Cruz students have many opportunities to study abroad or away. UC Santa Cruz Global Learning programs include:

- **UCSC Global Seminars:** UCSC courses taught by UCSC faculty abroad in the summer, coordinated by UCSC Global Learning.
- **UCSC Exchanges:** Immersion programs at institutions abroad, coordinated by UCSC Global Learning.
- **UCSC Global Internships:** Explore career goals, expand your professional network, and gain work experience either abroad or virtually, coordinated by UCSC Global Learning.
- **UCSC-APRU Virtual Student Exchange:** Enroll in one online academic course offered by a participating APRU member institution, as a complement to a full-time course load at UCSC.
- **UCSC Global Classrooms:** Collaborative online international learning while enrolled in an existing UCSC course, integrating project-based learning in collaboration with a classroom at a partner institution.

UC Santa Cruz students can also explore other UC and non-UC study abroad or away options, including:

- **UCDC:** Academic internship program in Washington DC, coordinated by a central UC systemwide office for all 9 undergraduate campuses
- **UC Education Abroad Program (UCEAP):** UC study abroad provider for all UC campuses.
- **Other UC Study Abroad:** Varying types of study abroad and away programs, coordinated by other UC campuses' study abroad offices
- **Independent Programs:** Varying types of study abroad and away programs, coordinated by organizations outside of the UC system.

UC Santa Cruz Global Learning is available to assist UCSC students with program selection, application process, and academic planning. Students are encouraged to explore their options and plan for a global learning experience early in their UCSC career. Visit the UCSC Global Learning website to get started.

International Scholar and Student Services

The International Scholar and Student Services (ISSS) office provides immigration advising and advocacy as well as cultural and academic programming for UCSC's growing global community. ISSS assists students, scholars, researchers, and faculty members in maintaining their legal status while in the United States, serving as UCSC's official liaison to U.S. government agencies related to immigration matters. ISSS serves more than 1,000 international clients and their accompanying family members who come to the campus each year.

Global Programming

Global Programming designs and facilitates orientation programs, events, and activities, for international undergraduates, graduate students, and scholars to foster increased intercultural learning, to build community, and to support cultural adjustment. Global Programming supports the study abroad team by assisting with pre-departure orientations and re-entry programming for study abroad students, administers a mentorship program for first-year international students that serves as leadership development for the mentors, and offers international/intercultural events open to all, such as programming during International Education Week.

Global Initiatives

Global Initiatives manages and tracks UCSC's growing portfolio of international partnerships and works with UCSC faculty and academic departments as well as institutions abroad to identify potential partnerships and develop agreements that support student and faculty international mobility, research, and recruitment. Working across the division and with academic and support units throughout campus, Global Initiatives also facilitates implementation of a variety of new and special programs led by the division, and provides communications planning and data analysis in support these initiatives.

Support for Graduate Study and Research Abroad

The Division of Global Engagement administers the application process for the Prestigious International Postgraduate Scholarships (PIPS) described below. Most of these awards require a campus endorsement before the applications can be forwarded to the final levels of competition.

To help students prepare competitive applications, the assistant director for Sponsored Student Programs, offers individual advising and occasional workshops on selecting recommenders, preparing compelling personal statements, interviewing, and developing project proposals or proposed programs of study.

Advance preparation for these awards is essential. Eligible candidates should arrange an advising appointment with the assistant director early in the process.

Scholarship Types

- Fulbright Program
- Rhodes Scholarship
- Marshall Fellowship
- Schwarzman Scholars Program

Field and Exchange Programs

UCDC Program at the UC Washington Center

The UCDC Program supervises and supports students who pursue a quarter of academic study and internship work in the nation's capital. Internship placements are geared toward student interests, including but not limited to government and public policy, science and the environment, education and the arts, advocacy and nonprofit organizations, law, and business and finance. Students live in the UC Washington Center with students from other UC campuses, which provides an intellectual and social community throughout the quarter.

The program is open through an application process to juniors and seniors (occasionally sophomores) **in all majors**. Students enroll for fall, winter, or spring quarter, earn 12 to 17 course credits, complete an internship, and continue to be registered as full-time students. Applicant selection is based on academic record, a written statement, letters of recommendation, and in some cases a personal interview. Financial-aid eligibility is maintained.

Interested students with strong academic records are encouraged to apply. For further information, visit the UCDC website.

Intercampus Visitor Program

UCSC students may take advantage of educational opportunities at other campuses of the University of California through the Intercampus Visitor Program. This program enables you to take courses not available at Santa Cruz, to participate in special programs, or to study with distinguished faculty at other campuses.

To qualify for participation in this program, you must be in good standing after completing at least three quarters in residence at Santa Cruz. Each host campus establishes its own criteria for accepting students from other campuses as visitors. You must also have the approval of your college. Consult with your department about how courses taken at the host campus may apply to your major requirements.

Applications are available at the Intercampus Visitor Program website. Additional information is available from the special programs coordinator in the Office of the Registrar, (831) 459-4412. The application form contains a great deal of useful

information about the program and how and when to file; please read it carefully. A nonrefundable application fee of \$70 is due when the application is filed.

Cross-Campus or Simultaneous Enrollment with Other University of California Campuses

During fall, winter, and spring quarters, undergraduate students enrolled at UCSC may enroll, without formal admission and without payment of additional university fees, in courses at another UC campus on a space-available basis at the discretion of the appropriate campus authorities on both campuses. Simultaneous enrollment refers to UC courses not offered through UC Online. Additional information about online UC courses is available through UC Online. During summer, students are welcome to take classes through UCSC or through other UC campuses' Summer Sessions. Students pay per-credit tuition for their courses.

Currently registered students must meet all of the following requirements to be eligible to enroll in one class through the Cross-Campus and Simultaneous Enrollment Programs: completion of a minimum of 12 credits at UCSC as a matriculated student, be in good academic standing, and demonstrate appropriate academic preparation as determined by the host campus. Full-time students must be enrolled in at least ten credits at UCSC. University Part-Time students must be enrolled in at least five credits at UCSC and may enroll in up to ten credits total.

Information about Cross-Campus Enrollment is available through UC Online. Applications for Simultaneous Enrollment are available at the Office of the Registrar, 190 Hahn Student Services Building or online. For more information, call (831) 459-4412 or email registrar@ucsc.edu, or visit the website at Simultaneous Enrollment.

Part-Time Program

If you are unable to attend the university full-time because of family obligations, employment responsibilities, or a medical condition, or you are in your final quarter before graduation, you may qualify for the Part-Time Program. This program enables students to pursue a bachelor's degree part-time in any major offered at UC Santa Cruz. To participate, undergraduate students must file a Part-Time Program application by the appropriate deadline. Full-time students normally take three 5-credit courses per quarter; part-time students may enroll in a maximum of 10 credits.

Students approved for enrollment on a part-time basis pay the same fee as full-time students but pay only one-half of the tuition. Part-time nonresidents pay one-half of nonresident tuition. Financial aid awards may be affected by enrolling part-time. Students who use the part-time fee reduction may not also use the UC employee reduction. Part-Time Program applications are submitted online to the Office of the Registrar. For more information, call (831) 459-4412, or email registrar@ucsc.edu. More information is available on the Part-Time Program website.

Domestic Exchange Programs

UCSC has exchange programs with the University of New Hampshire (UNH) and the University of New Mexico (UNM). UNH is located near the New Hampshire seacoast in the picturesque colonial town of Durham, a little more than an hour from Boston, Massachusetts. UNM is located in Albuquerque, a city of approximately half a million population, situated on the banks of the Rio Grande. Both schools give students the opportunity for an educational experience in an entirely different environment.

While enrolled in the exchange program, students maintain their status at UCSC, and they are expected to return to complete their studies following enrollment at UNH or UNM. Both universities are on the semester system and students may participate in one semester or the entire academic year.

Participants are selected from among students who are in good academic standing. Successful applicants will be expected to confirm their participation at the beginning of spring quarter. Each department of study determines the applicability of UNH and UNM courses toward requirements for the major. Letter grades earned while at UNH and UNM will not be calculated into the UCSC GPA or the UC GPA. Further information is available from the exchange program coordinator in the Office of the Registrar, by phone at (831) 459-4412, and at the Domestic Exchange Programs website.

Intersegmental Cross-Enrollment

This program permits a student who is currently enrolled in a California community college or a California State University campus and who meets certain eligibility criteria to enroll in one undergraduate course at UCSC each term, on a space-available basis. A student is qualified to participate in this program if he or she meets the following requirements:

- has completed at least one term at the home campus as a matriculated student and is enrolled in at least 6 credits at the home campus during the term in which he or she seeks to cross-enroll;
- has a grade point average of 2.0 for work completed;
- has paid tuition or fees required by the home campus for the academic term in which he or she seeks to cross-enroll;
- has appropriate academic preparation as determined by the host campus, consistent with the standard applied to currently enrolled students;
- is a California resident for tuition purposes at the home campus; and
- has not previously been admitted to and registered at UCSC.

Applications are available online. The application form contains a great deal of useful information about the program and how and when to file. Please read it carefully.

Field Programs and Internships

Many UC Santa Cruz students complement their major programs with field experience or internships, which also provide opportunities to become involved in public service activities in the local community and throughout the world. Most of the field programs described below are open to students in a range of majors, although some are restricted to students pursuing a designated area of study. Students in all majors may apply for internships sponsored by the Career Center.

In addition to the off-campus placements provided by the programs described below, independent field study opportunities are available through some UCSC colleges and departments.

Chancellor's Undergraduate Internship Program (CUIP)

The Chancellor's Undergraduate Internship Program (CUIP) provides on-campus internships in programs and departments throughout UC Santa Cruz. Interns work with a mentor to develop personal and professional skills and take a leading role in producing projects. A two-unit leadership seminar class is required for fall, winter, and spring quarters. A scholarship of \$8,200 is paid toward the intern's registration fees for the academic year.

Community Studies Field-Study Program

Community Studies is the oldest interdisciplinary undergraduate degree program at UCSC. Its hallmarks are a focus on social justice and a distinctive pedagogy that integrates classroom learning and an extended six-month field study. Not only is full-time field study a requirement of the major, it is the centerpiece of a core curriculum through which students prepare for, then immerse themselves in a setting where they participate in and analyze the social justice work of an organization. Upon return from field study, students integrate topical and experiential learning in a capstone project (usually a senior essay) that uses their field notes as a key source for analysis.

With the guidance of faculty and staff advisors, community studies students choose field placements related to one of the program's areas of focus in economic justice and health justice. Placements have included community health clinics, women's and feminist organizations, immigrant-rights centers, media and policy advocacy organizations, homeless resource and support groups, sustainable development projects, queer and transgender organizations, neighborhood or workers' collectives, civil rights groups, community food security programs, legal clinics, community-based cultural organizations, programs for seniors, tenant or labor unions, HIV/AIDS advocacy groups, harm reduction programs, government agencies and the offices of elected officials, and many other organizations committed to working for social justice. As political, economic, cultural and technological landscapes shift, so do the needs and opportunities for social justice organizing. Throughout its history Community Studies

has been noteworthy for being attuned and responsive to innovative in field-study opportunities in a changing world.

The practical experience gained from the six-month field study, combined with their topical learning, provides graduates with many choices. About half go on to graduate or professional study in education, urban studies, public health, public administration, social work, planning, law, policy studies, medicine, nursing, or academic disciplines like sociology, anthropology, and politics. Others enter the work world directly, in many cases continuing with non-profit agencies like those in which they did their field study. Community Studies graduates are social entrepreneurs, community organizers, program directors, public officials, teachers, therapists, librarians, social workers, news directors, union officials, labor organizers, forest management consultants, reporters, youth workers, and artists. According to a recent alumni survey, almost 100 alumni have founded nonprofit social justice organizations, and many more have served on nonprofit boards and/or in executive director positions.

The field study program is open to Community Studies majors only. The entire major usually takes two years to complete. For more information, see the Community Studies website.

Economics Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work. The field-study program places students in internships under the supervision of a faculty sponsor and a professional in the workplace. Students can select from a wide variety of field placements such as accounting firms, community nonprofits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply and prepare for field study a quarter in advance. Acceptance into the field-study program is determined by academic standing, class level, and successful completion of Economics 100A, 100B, and 113 (see Economics courses). Students may earn a maximum of 10 credits and complete up to two quarters in a field placement.

Along with the training and supervision by a professional in the workplace, students receive guidance from a faculty sponsor who directs their academic project. Completion of this project and the job supervisor's evaluation of performance earn the student credit. Economics Field Study (Economics 193 or 198, see Economics courses) does not satisfy an upper-division requirement for the major and is available on a passing/not passing (P/NP) basis only.

Further information is available from the Economics Field Study Office, 402 Engineering 2 Bldg.; by phone at (831) 459-5028; or by email at econintern@ucsc.edu.

Environmental Studies Field and Internship Program

Open to all UCSC students, the Environmental Studies Field and Internship Program is an integral academic component of the environmental studies major, and it augments the research

and professional development of undergraduate students (see Environmental Studies). Interns are placed, individually and in groups, in both on-campus and off-campus agencies, where their work often results in publications and resource documents, and in many cases serves as the primary basis for policy formation within a particular agency or organization. Placements have included research for small businesses; learning all aspects of running an organic farm; writing policy documents for state agencies, nongovernmental organizations, and planning departments; assignments as natural history interpretive guides for state and national parks; and apprentice positions with consultants, architects, solar-energy designers, agroecologists, and teachers. Student intern placements are also obtainable working with coffee growers, teachers, and agricultural specialists in Costa Rica, Nicaragua, El Salvador, and Mexico.

Part- and full-time placements are available, and students may receive two to 15 course credits for their work. Each student's placement is supervised by a team of supporters: a faculty advisor, field sponsor, and the internship coordinator. Students spend 12 to 15 hours each week on their assignments for every 5 credits they receive.

Internships and fieldwork are designed to complement a student's coursework and are available for both lower- and upper-division credit. Often, the internship leads to a summer job or employment after graduation. Qualified environmental studies majors may undertake a senior internship to fulfill the department's comprehensive requirement. In addition, internships provide a fieldwork component for some environmental studies courses. Undergraduates are also afforded ample opportunities to intern on faculty and graduate-student research projects.

Further information is available from the Environmental Studies Field and Internship Program Office, 491 Interdisciplinary Sciences Building, (831) 459-2104, email: ckrohn@ucsc.edu. More information is available at envs.ucsc.edu/internships.

The Everett Program (formerly the Global Information Internship Program)

The Everett Program is focused on connecting the university to community partners on a global scale. It supports social change using the tools of technology, social entrepreneurship, and research.

The Everett Program recruits highly motivated and innovative students who are committed to developing social enterprises and contributing to social justice and environmental sustainability movements at the global and local levels. The program consists of three quarters of rigorous classes, practical technology labs, and project labs. It empowers students to focus their passion for social change by teaching them how to research, plan, design, fund, implement, and evaluate projects in collaboration with community change agents, using information and communication tools. Students are supported and encouraged to participate in outside-of-class trainings, competitions, outside grants, and opportunities to connect with the Everett alumni network.

Everett-sponsored students have worked with Muslim feminists in Malaysia, coffee farmer co-ops in Central America, democracy-advocating NGOs in Ghana, and aspiring high school students in Watsonville. For more information, see www.everettprogram.org. As managers of the program, past students who have become Everett Fellows also facilitate peer-to-peer technology and project labs throughout the year. These focus on training students in valuable skills such as participatory mapping, website and graphic design, digital video storytelling, social media campaigns, and robotic programming. The Everett Program's year-long series is interdisciplinary and counts as an upper-division elective for several social science majors. It also serves as a foundation for the major and minor in global information and social enterprise studies (GISES), which is sponsored by the Department of Sociology. For more information on the GISES and Intensive Sociology major and minor, please see Sociology Department Majors and Minors.

Fieldwork in Education Programs

The M.A. in Education/California SB 2042 Preliminary Teacher Credential program provides students with necessary credential preparation for K–12 teaching in the California public schools. Preparation is offered for the Multiple Subject Preliminary credential (typically Grades K–6), and the Single Subject Preliminary credential (typically Grades 7–12) in the following subject areas: English, math, social science, and science. Credential students may also pursue a Bilingual Authorization in Spanish. Students pursuing the Education M.A./California Preliminary Credential must complete a three-quarter student teaching course sequence. Student teaching placements are restricted to enrolled students. The student-teaching sequence consists of five courses: Education 200, 201, 202A, 202B, and 202C. Fall and winter quarters of the sequence involve part-time placements in public schools in Santa Cruz County, Monterey County, and Santa Clara County. Spring quarter is a full-time experience in which student teachers take over full responsibility for the daily instructional program of the classroom in which they are placed. Substantial fieldwork in K–12 classrooms is also incorporated in other courses required for the teaching credential.

The minor in education is an undergraduate program in which students explore the history of educational thought and philosophy; the politics and economics of education, learning theory, and pedagogy; and issues of cultural and linguistic diversity related to schooling. As a part of the six-course minor sequence, students engage in field study in local schools through Education 180, Introduction to Teaching.

For more information, contact the Education Department, 1280 McHenry Library Building, (831) 459-4102, or education@ucsc.edu.

Health Sciences Internship Program

A requirement of the Human Biology major, the Health Sciences Internship Program offers students a unique opportunity for personal growth and professional development. Paired with a professional mentor, students

spend one quarter interning in a health-related setting. Placement opportunities cover a broad range, from individual physicians to community clinics and hospitals, hospices, non-profits, and public health agencies. The Health Sciences Internship coordinator works with students to prepare them for their internship and maintains a list of appropriate placements. Junior and senior human biology majors only are eligible to apply. Applications are due two quarters in advance. For further information, contact the Health Sciences Internship Coordinator at hsintern@ucsc.edu.

Latin American and Latino Studies Field-Study and Internship Opportunities

All Latin American and Latino Studies majors are strongly encouraged to undertake either (1) a field study in Latin America, the Caribbean, or a Latino/a community in the U.S.; or (2) formal academic study abroad through the UC Education Abroad Program (UCEAP). These paths are the best ways to improve language skills, explore the nature and direction of specific academic and career interests in relation to Latin American and Latino studies, and deepen cross-cultural understanding and relationships based on personal experience.

Field studies comprise independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. Students can do full-time field study for one quarter for full academic credit, part-time field study scheduled in conjunction with formal coursework at UCSC, or field study as an extension of the UC Education Abroad Program (UCEAP). Projects vary widely, but students who want to develop a field-study proposal are expected to prepare for it by acquiring fluency in the appropriate language, prior cross-cultural experience, and upper-division coursework on the region and/or topic that is to be the focus of the study.

Students who wish to pursue a full-time field study are advised to speak with their faculty advisor to assess their eligibility and preparation, as well as to receive needed guidance, ideally a quarter or two in advance.

Many of the students who have done full-time field study have developed a senior thesis based on that work. Students who pursue a part-time field study are highly encouraged to discuss their plan with their faculty advisor as well.

Local opportunities for internships and field study in Latino/a communities on California's Central Coast are numerous. Credit for up to three upper-division courses may be applied toward the major from field study; however, course credit from field study and study abroad combined may not exceed three upper-division courses. Students should check the Latin American and Latino Studies Department website for further information regarding the field-study process and course credit. A listing of local field-study programs and petition forms are available at the LALS Department office, 32 Merrill Academic Building.

For more information, contact the LALS office at lalsadvising@ucsc.edu.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to integrate what they have learned in the classroom with direct service to a community agency. Each year, more than 200 students develop new skills and clarify personal and professional goals by working as interns in schools, criminal justice programs, and mental health and other social service agencies, where they are supervised by a professional within that organization. Psychology faculty members sponsor field-study students, helping them to synthesize their intern experience with psychology coursework and guiding them through an academic project.

Junior and senior psychology majors in good academic standing are eligible to apply for this competitive program.

There is a minimum commitment of two quarters.

Interested students should attend an information meeting, held every quarter, for a general overview and application. The schedule for each quarter is posted at the start of instruction. For more information, visit the Psychology Field Study Program website.

University of California Center Sacramento

The University of California Center Sacramento offers students a chance to spend a quarter fully immersed in legislative and/or community service programs in the state capital. Students intern a minimum of 24 hours per week in the Assembly, Senate, Governor's Office, and with state agencies and nonprofit organizations. They also enroll in related courses taught at the UC Sacramento Center one block from the Capitol Building. Students live with other UC campus participants in a living and learning community. This opportunity is available to students from any major and is open to undergraduate and graduate students. For information, see the UCSC Career Center website.

The University of California Center Sacramento offers students a chance to spend a quarter fully immersed in legislative and/or community service programs in the state capital. Students intern a minimum of 24 hours per week in the Assembly, Senate, Governor's Office, and with state agencies and nonprofit organizations. They also enroll in related courses taught at the UC Sacramento Center one block from the Capitol Building. Students live with other UC campus participants in a living and learning community. This opportunity is available to students from any major and is open to undergraduate and graduate students. For information, see the UCSC Career Center website.

Summer Session Courses and Programs

University of California, Santa Cruz, Summer Session offers UCSC students a chance to accelerate progress toward their degrees and welcomes visitors from other colleges and universities as well as members of the community (including high school juniors and seniors). A broad range of 250 courses are taught by UCSC faculty, lecturers, and graduate students. Often significantly smaller in size than during the fall, winter, and spring quarters, Summer Session classes include major requirements and qualifying courses, lower-

and upper-division courses, general education courses, and online courses. Most are five weeks long. Students may enroll in multiple classes in one or all of the sessions, with a maximum of 30 credits total.

Tutoring, advising, and other academic and personal support is available, as are on-campus housing and dining, OPERS fitness center and outdoor recreation, campus employment, and more. Many course restrictions are lifted in summer, giving students new opportunities. Special summer-only programs include the Summer Edge for new fall admits and the renowned one-week Dickens Universe. Please visit summer.ucsc.edu for courses and details or email summer@ucsc.edu.

UCSC Silicon Valley Extension

In April 2016, UCSC Extension opened its doors to the UC Santa Cruz Silicon Valley Campus. Located at 3175 Bowers Avenue in Santa Clara, the Silicon Valley Campus is a beautiful new facility outfitted with the latest educational technologies just a stone's throw from the Santa Clara Square. UC Santa Cruz undergraduates and graduate students, as well as community members seeking continuing education, have their choice of certificate programs in more than 40 disciplines and services designed to meet the needs of Silicon Valley and greater Bay Area.

UCSC Extension provides professional training that reflects the academic rigor of the University of California and the hands-on, roll-up-your-sleeves practicality of Silicon Valley culture. Developed with guidance from key industry leaders and academic experts, UCSC Extension's certificate programs match the demands of a wide range of industries, including engineering, business, education, bioscience, and environmental safety. The Silicon Valley Campus is also home to the University of California Scout program, graduate programs affiliated with UCSC's Baskin School of Engineering, and an English language school designed to equip English language learners with the skills necessary to accelerate learning or take the next step in their careers.

Extension's career-oriented programs cover the latest best practices, tools, and technologies in engineering and technology, business and management, applied and natural sciences, and education. While most certificates can be completed within one year, coursework is graded and substantial, typically involving lectures, readings, presentations, and final projects or examinations.

Extension also has a robust international department, English language program, and Optional Training Program (OPT), and offers F1 visa guidance and internship opportunities.

Regularly enrolled UCSC students may obtain degree credit for Extension courses numbered 1–299. Lower division courses are numbered 1–099, upper division offerings are 100–199, and graduate-level courses are 200–299. Upon submission of the Extension transcript to the Office of Admissions, the course credit may be applied toward a bachelor's degree at UCSC. Many Extension courses are recognized for graduate degree credit by other universities.

(acceptance of course credit is based upon approval by the accepting university).

Students can study in a few different ways: in classrooms or labs at our Silicon Valley location; online, via our dynamic learning platform; and in hybrid courses, which offer a combination of classroom meetings and online learning. Many courses have both online and classroom sections available each quarter to ensure that students with commutes, jobs, and family obligations can find courses that fit their schedules.

Visit UCSC Extension or call (408) 861-3700 to enroll or to learn more about courses and programs.

Open Campus/Concurrent Enrollment

Concurrent Enrollment Through Extension is a cooperative arrangement between UC Santa Cruz and UCSC Silicon Valley Extension that enables members of the public to enroll in one or two regular UCSC undergraduate or graduate courses per quarter for credit. The program is administered by UCSC Silicon Valley Extension, and course credit granted appears on a UCSC Silicon Valley Extension transcript. Participants must meet certain criteria outlined in the Concurrent Enrollment application. An application fee is charged for each quarter of enrollment in addition to course fees. A first-time application fee of \$110 applies.

Concurrent Enrollment through Extension may be used as a path toward a part-time or full-time degree program or as a way of studying subjects of personal or occupational interest. Credit earned through this program may be used toward degree requirements, when applicable, if participants subsequently seek admission to the university and are accepted.

Financial aid is not available to participants in the Concurrent Enrollment program.

For further information and to obtain an application packet, contact UCSC Silicon Valley Extension, 3175 Bowers Ave., Santa Clara, CA 95054, (408) 450-4920, or email opencampus@ucsc.edu.

THE COLLEGES AND STUDENT LIFE

In this section:

The Colleges

About UCSC's Colleges

UC Santa Cruz combines the resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. Each college is a vibrant living/learning community supported by enrichment courses, advising and academic support, and faculty and staff who organize student activities and sponsor events to enhance the intellectual and social life of the campus. The colleges are committed to fostering a nurturing

and academically thriving environment for students of all backgrounds. Each college strives to promote the attributes of a diverse and multicultural community in its own unique way.

In order of founding, the colleges are Cowell, Stevenson, Crown, Merrill, Porter, Kresge, Oakes, Rachel Carson College, College Nine, and John R. Lewis College. Self-contained and architecturally distinct, each college is a relatively small community of 30 to 110 faculty members and between 1,500 and 1,800 students, about half of whom live on campus. Each college has its own housing, as well as academic, social, and educational programming, and each is an integral part of the larger campus. The colleges have their own academic emphases and cultural traditions, although each seeks faculty and students from a variety of disciplines to foster broad intellectual interests. The colleges play a primary role in academic advising and are the center of student life. Students graduate from their college. At the same time, all university academic programs, resources, and student services are open to students of every college.

All undergraduate students are affiliated with one of our 10 colleges, their home within the larger university. During the process of accepting the offer of admission, entering students are asked to list several colleges in order of preference; whenever possible, students are assigned to one of their preferred colleges. The information students need to rank their college preferences can come from a variety of sources—personal acquaintance, a campus visit, literature available from the colleges, campus websites, and the descriptions in this section of the catalog. Students also have the option to indicate “no preference,” meaning they will be fine with any of our 10 colleges, and the Admissions Office will assign those students to one of the colleges.

Similarities and Differences

The colleges are small-scale residential communities, each providing an academically and socially supportive environment and offering special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience.

Each college provides academic advising as well as academic and general campus orientations to help you plan your academic program. College academic preceptors and advisers provide advice on general academic matters outside a student's major, including general education, choosing a major, and strategies for academic success. Psychological and personal counseling is also available in each college. The faculty, or fellows, of each college come from a variety of academic disciplines; many faculty have their offices in the colleges.

Each college offers a distinctive academic College 1 course for entering frosh. The required course provides a significant bridge between academic and residential life, since all frosh, regardless of major, will be in the course, and most will be in residence as well. The colleges also offer selected courses in their area of interdisciplinary emphasis and host events and speakers that enhance this focus.

Architecturally distinct, each college was planned by a different architect who was encouraged to convey the distinct personality of that college through the design of its buildings and their placement in the natural environment. The particular style of housing varies among the colleges, ranging from residence halls, with a mix of shared and private rooms, to apartment-style housing, where students live together in small groups and may do some of their own cooking. Each college's residential program is a team effort. Live-in student and professional staff members provide orientation and support services, organize activities and events, provide referral information about academic or personal concerns, and assist with roommate problems.

Changing Colleges

Most students develop friendships and intellectual attachments within their affiliated college, and remain members of that college throughout their undergraduate years. Some students find that changing academic interests draw them to a different college. During specified filing periods, students may request a change of college with the approval of both college administrations.

Cowell College

Cowell College inaugurated the Santa Cruz campus when it opened with a pioneer class of 600 students in 1965. The founding faculty shaped an educational program that challenged and enriched students through wide-ranging inquiry and disciplined study. Today, Cowell has more than 1,500 affiliated students and over 90 faculty fellows. Its motto—The Pursuit of Truth in the Company of Friends—expresses a continuing commitment to create a serious academic environment within a humane and broadly inclusive community. The college is named for the S. H. Cowell Foundation, which endowed the college at its founding.

ACADEMIC EMPHASES

The academic theme of the college encourages students to pursue their general and disciplinary study with attention to the values of a liberal arts education: understanding one's individual perspectives by exploration of one's historical background and world context. Students affiliated with the college pursue majors from all departments on campus.

Additional information about Cowell College academics, including Core Course requirements and other academic programs, is available [here](#).

COLLEGE COMMUNITY AND FACILITIES

UC Santa Cruz combines the resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. Each college is a vibrant living/learning community supported by enrichment courses, advising and academic support, and faculty and staff who organize student activities and sponsor events to enhance the intellectual and social life of the

campus. The colleges are committed to fostering a nurturing and academically thriving environment for students of all backgrounds. Each college strives to promote the attributes of a diverse and multicultural community in its own unique way.

Arranged around the college's central courtyard are the dining hall, the Page Smith Library, the Mary Holmes Fireside lounge, the Cowell Coffee Shop: For the Peoples (a basic needs café), and conference room and classrooms. The Cowell Press, where students can learn the fine technique of hand-operated letterpress printing, is not far away, attached to the Cowell Provost House. Also nearby is the Eloise Pickard Smith Gallery, including the Ann Dizikes Annex.

Community life is enlivened by many scheduled and impromptu intellectual, cultural, and social events.

The Cowell Senate meets weekly to discuss campus issues and student government. The Senate advises the college on the allocation of funds for student activities and programs. Members of the Senate are selected each year by lot, but any student may become a voting member by steady attendance at meetings. The college's student groups, staff, and faculty work together to create a supportive community for students from all ethnic groups, all religious traditions, and all sexual orientations and to increase awareness of the many dimensions of diversity in the community.

For more information on the college, see the Cowell College website or call (831) 459-2253.

COWELL FELLOWS AND STAFF

Cowell College faculty fellows are listed on the college's faculty directory.

College staff are listed on the college's staff page.

Stevenson College

Stevenson College is named after former statesman and U.S. Ambassador to the United Nations Adlai E. Stevenson. Our faculty, students, and staff take pride in intellectual critical inquiry, academic and civic leadership.

Stevenson College has a long-standing reputation for excellence in liberal education. The college strives to provide an academically, culturally, and socially supportive environment for all its members, fostering social responsibility and academic achievement. Stevenson alumni can be found in legal, political, educational, engineering, medical, computer and information sciences, business, and public administration careers, among others.

The college's faculty and staff offer professional and personal service for the diverse needs of students. Faculty and staff assist students in all areas of their academic and social experience at Stevenson College, and are committed to instilling respect for the diverse backgrounds of Stevenson students.

ACADEMIC EMPHASES

The faculty at Stevenson, drawn from a variety of disciplines in the social sciences, humanities, and physical and biological sciences, share a common concern for the study of social processes that shape modern society and determine the quality of our individual lives throughout various global regions and periods of world history.

Additional information about the Stevenson College academics, including Core Course requirements and other academic programs, is available [here](#).

COLLEGE COMMUNITY PROGRAMS

- College Nights
- Stevenson Student Council
- Social and Multicultural Programs/Activities
- Cultural Arts and Diversity Rainbow Theater
- Stevenson College Undergraduate Research Apprenticeship Program

The Stevenson Student Council meets weekly. This group is responsible for allocating college membership fees to student activities. The council also serves as a forum for the discussion of college and campus-wide issues and appoints student representatives to college and campus-wide committees. Students have a wide variety of opportunities to engage with interactive and meaningful programs and activities outside the classroom.

Facilities

- Eight small residence halls, three of which are themed houses:
- LGBTQIA+
- Diversity and Social Justice House
- The Rosa Parks African American Theme House (R. PAATH)
- Three apartment buildings
- Stevenson Coffee House
- Wagstaff Fireside Lounge
- Writers' Center
- Stevenson Library
- Stevenson Event Center
- Silverman Conference Room

- Recreation Room
- Stevenson Garden
- Stevenson Music Practice Rooms

Stevenson has a wide variety of facilities and activities to appeal to many tastes. The college, designed by San Francisco architect Joseph Esherick, has won many architectural awards. The buildings are situated amid redwood trees and sprawling lawns, and the main quad overlooks Monterey Bay. Stevenson is situated close to the campus bookstore, restaurants, McHenry Library, gym, and pool. There are eight small residence houses at the college providing a choice of single-gender or mixed-gender floors; each house accommodates about 90 undergraduates. The apartments provide space for continuing students. Nearby are a picnic area, playing fields, and a garden. Stevenson is also the home of the Rosa Parks African American Theme Housing (R.PAATH), which is a student-initiated living-learning space for students whose interests span historical, present-day, and future experiences of predominantly African American, Black, and Caribbean peoples.

The Stevenson Coffee House, which has become the gathering place in the college, is a friendly and inviting spot to enjoy lunch or an espresso and pastry—indoors or out on the patio. It is the scene of lively conversation, occasional musical entertainment, and chess matches. Adjoining the Coffee House is the recreation room, with Ping-Pong, a pool table, and televisions. This area is also the site of much socializing and spontaneous group activity.

In contrast, the Stevenson Library is a striking building designed for quiet reading and study. The Wagstaff Fireside Lounge, a retreat for relaxed discussion, is also used for recitals, special lectures, meetings, and residence house activities. Art exhibits (both student and professional) are on display throughout the year in the lounge, library, and coffee house.

For more information on the college, see the Stevenson College website or call (831) 459-4930.

STEVENSON COLLEGE FELLOWS AND STAFF

Stevenson College faculty fellows are listed on the college's faculty directory.

Stevenson College staff are listed on the college's staff page.

Crown College

Crown College seeks to provide our students with a living and learning environment in which they can positively develop intellectually and socially. Crown is traditionally viewed as the “science college,” and the majority of our affiliated faculty fellows teach in the STEM (Science, Technology, Engineering, and Math) fields. However, half of our students major in the social sciences, arts, and humanities.

Crown is located on a hilltop surrounded by a redwood forest. The core buildings consist of an administration office, dining commons, lounge spaces, study spaces, faculty offices, and classrooms built around a large patio and central fountain. The award-winning architecture with its white walls and high-pitched tiled roofs suggests a hillside Mediterranean village. The college’s residential facilities house approximately 800 students. The facilities at Crown College were built through a partnership of public funds and a gift from the Crown Zellerbach Foundation.

ACADEMIC EMPHASES

From the time of its founding in 1967, issues pertaining to the role of science and technology in society have been a focus of special interest at Crown College. We approach these issues from an interdisciplinary perspective that recognizes the influence of social and cultural factors on the scientific enterprise, as well as the ways in which science and technology influence our society. Complementing its focus on science and technology, Crown also supports innovation and experiential learning through classes and funding opportunities.

CRWN 1, Academic Literacy and Ethos: Ethical and Social Implications of Emerging Technologies

Offered fall quarter

Crown College’s entering frosh enroll in our core course, CRWN 1, which explores the theme, Ethical and Societal Implications of Emerging Technologies. Students work individually, in small groups of four to five students, and in sections of 25 to 30 students, thereby modeling and embracing the diversity found across campus. CRWN 1 looks at how technologies transform our society, the agents driving technological development and what the generalized adoption of emerging technologies is leading to. CRWN 1 also explores the ethical dilemmas involved and what we can do as responsible citizens to address the challenges facing our society. Deeper goals of this course include fostering a sense of belonging, and ensuring that our students achieve college-level reading, critical thinking, and effective communication skills.

A central component of the course is a group research project, in which students study the impact of a technology of their choice, while learning strategies for effective group work. The core course is enhanced through our plenary series, which gives students opportunities to meet intellectual leaders and

hear them speak in the intimacy of the provost’s house. We also organize a science fiction short story contest, and students are encouraged to attend and/or present at Crown’s Social Fiction Conference and have the opportunity to enact a play connected to the impact of technology by taking a drama class offered in winter.

Other Academic Programs

Crown has programs that support innovation, the cultivation of transferable skills, and experiential learning. On the innovation front, Crown offers entrepreneurship and social entrepreneurship classes, supports the Student Creativity and Entrepreneurial Empowerment club, and Crown facilitates interested students to access to incubator space and funding opportunities through its partnership with the Center for Innovation and Entrepreneurial Development. Crown also offers a Sci Fi class and sponsors a Sci Fi short story contest. To support transferable skills, Crown offers classes in broadcasting, in digital storytelling, in podcasting, and in computer modelling of human behavior or biological systems. Finally, Crown promotes experiential learning by providing funding to support student class or research projects as well as internships in Crown’s Center for Applied Ethics and Values and in our GetVirtual project

<https://news.ucsc.edu/2020/05/getvirtual.html> .

Crown is one of the colleges hosting the College Scholars Program, which provides a congenial and challenging academic home for a select group of well-prepared students at UC Santa Cruz. This enriched program of study includes special courses, seminars, colloquia, and other events in the fall of the sophomore year. Admission to the College Scholars Program can be by invitation during the admissions process based on high school academic performance (early entry) or in winter of the freshman year based on academic potential shown during the first quarter at UCSC (late entry).

College Advising

Crown Advising is located in the Crown Administration Building and is staffed by the college assistant, professional academic advisers, and peer advisers. Crown Advising offers drop-in advising and appointment advising (phone or in person) every weekday in fall, winter, and spring terms. Summer advising is by appointment only (phone or in person). To schedule an appointment, students should use Slug Success (<https://ucsc.campus.eab.com>) For quick questions or completion of most forms, students are encouraged to email crownadvising@ucsc.edu. Please visit our website for the most up to date information about adviser availability.

crownadvising@ucsc.edu

Phone: 831-450-2665

CROWN FELLOWS AND STAFF

Crown College faculty fellows are listed [on the college's faculty directory](#). Crown College Core faculty instructors are listed on the college’s Core Course Faculty page: [Core Course](#)

[Faculty page](#). Crown College staff are listed [on the college's staff page](#).

Additional information about Crown College academics, including Core Course requirements and other academic programs, is available [here](#).

COLLEGE COMMUNITY AND FACILITIES

Crown sponsors a wide variety of co-curricular events spanning cultural, educational, and social areas of interest. One popular series is the Science/Public Affairs Tables, informal dinners at the Provost House offering students an opportunity to socialize with a faculty member outside the classroom and learn about their research interests.

Students become involved in Crown life by both initiating and participating in a wide range of activities. Social activities vary each year according to the interests of students. Typical events include College Nights, themed dinners with special menus and entertainment that are open only to the Crown community; dances, including the Glow Dance and the Crown/Merrill Semi-Formal; and study breaks and stress relievers. Unique to Crown, and a collaboration between student and academic life, the Social Fiction Conference examines issues of social justice in the ever-changing context of science fiction, fantasy, gaming, and anime.

Outdoor activities organized by the student senate, the College Programs Office, or residential staff range from whale watching on the Monterey Bay to visiting the Exploratorium in San Francisco, and from backpacking to stargazing.

Crown Student Senate (CSS), the elected student government at Crown, holds open weekly meetings to determine funding allocations for student activities and to discuss issues of concern to students and the college. CSS also sponsors events to entertain, including the very popular Casino Night.

At Crown College, we believe that the experience of living in our on-campus residence halls and apartments offers students not only support for their academic experiences, but also unique opportunities for learning about the concept of community. When college students feel connected to a community during their studies, they experience a smoother transition to university life, greater academic success, and higher satisfaction with their college experience. The Crown Residential Education team understands community not as a product we can deliver to our students, but as an experience that they are responsible for creating for and with each other. Even so, we do not ask our students to undertake this weighty task on their own. The Residential Education team partners with students, striving to be “good companions” on their journey by facilitating experiences that help them to cultivate and apply the knowledge, skills, and abilities needed to create, participate in, and lead caring and socially just communities.

Crown offers two types of residential facilities: residence halls and apartments. Eight traditional residence halls each house approximately 80 students in single and triple rooms in

a coed environment (single-gender bedrooms with all gender bathrooms) or on a few all-female floors. For students interested in living and learning in a special-interest environment, Crown provides the Gaming House, Outdoor Pursuits House, and College Scholars and Science Learning Communities.

The college also has apartments for approximately 270 continuing students. Like the residence halls, the apartments are built on a small scale. Each three-story building has two or three apartments per floor that house four to six students in a combination of single, double, and triple rooms and include a kitchen, living room, dining room, bathroom, and outside deck.

Other facilities in the college include the Crown Library study space; a computer laboratory with Mac workstations, which provides students with access to several kinds of systems and an array of applications and instructional software selected to support academic coursework; the Fireside Lounge with a piano and a television; and the Music Practice Room. The Crown-Merrill Community Room, with a television, pool table, foosball, and ping-pong table, provides an informal place to study or just visit with friends. Dining facilities boast continuous dining and Banana Joe’s take-out and quick mart.

For general information, call the College Office at (831) 459-2665 or visit the Crown College website. For residential information, call the Housing and Residential Education Office at (831) 459-5689.

Merrill College

Merrill College seeks to expand its students’ awareness of their own heritage and of the diversity of cultures around the world, past and present. Merrill faculty specialize in a number of different areas of study, concentrating especially on social theory, international affairs, and social change, and from a variety of disciplinary perspectives including history, the social sciences, literature, and foreign language study. The college makes a special effort to be a home for students from different cultural backgrounds and for international students; it presents unique opportunities to those who value multicultural perspectives.

Merrill houses the departments of Politics, Legal Studies, and Latin American and Latino Studies. It also hosts KZSC, the campus radio station; the Research Center for Americas (RCA); UCSC’s Cantú Queer Center; the student-run Pottery Co-op (the only one of its kind at UCSC); and the Ming Ong Computer Center.

ACADEMIC EMPHASIS

The Merrill College ethos is “cultural identities and global consciousness.” This pairing signals the college’s commitment to drawing on the “funds of knowledge” brought by individual college members to the community of scholars, and a corresponding commitment to understanding these identities within a larger global context.

Additional information about Merrill College academics, including Core Course requirements and other academic programs, is available here.

COLLEGE COMMUNITY AND FACILITIES

At Merrill College, we believe that the experience of living in our on-campus residence halls and apartments offers students not only support for their academic experiences, but also unique opportunities for learning about the concept of community. When college students feel connected to a community during their studies, they experience a smoother transition to university life, greater academic success, and higher satisfaction with their college experience. The Merrill Residential Education team understands community not as a product we can deliver to our students, but an experience that they are responsible for creating for and with each other. Even so, we do not ask our students to undertake this weighty task on their own. The Residential Education team aims to partner with students, serving as good companions on their journey by facilitating experiences that help them to cultivate and apply the knowledge, skills, and abilities needed to create, participate in, and lead caring and socially just communities.

The Merrill Programs and Leadership Office (MPLO) and Merrill Student Government (MSG) create space for student voices and experiences that lead to personal and academic growth and development.

Located on a hilltop between UCSC's famed Chadwick Garden and Santa Cruz's Pogonip parkland, Merrill's recently renovated, award-winning buildings thread upward through the edge of a redwood forest. Four residence halls house approximately 600 students in two high-rise structures and two smaller buildings. There are all-female floors and trans-inclusive housing options among Merrill residence halls; the remainder offer a coed environment (single-gender bedrooms with all-gender bathrooms).

Glass curtain walls provide views from the A & B Buildings of the reconstructed college center. Merrill's plaza and central lawn make excellent use of the ample sunshine and provide common space for students living in the residence halls and other housing options.

The apartments, located a short distance from the central area of the college, house approximately 200 continuing Merrill students. Grouped amid winding pathways and redwood trees, these three-story buildings have two or three apartments per floor. Each apartment houses four to six students in a combination of single, double, and triple rooms, and comes fully equipped with a kitchen and a bathroom, a large living area, and an outside deck. Residents of the apartment complex share a large community room, two laundry rooms, and plenty of outdoor space.

Facilities at Merrill include the Cultural Center, where large events (including dances) take place; the Baobab Lounge, which provides study space, informal gathering space, a piano, and a television; and Casa Latina and Merrill Academic Success (MAS), which provide Merrill students

with quiet places to study. Finally, at the student-run pottery co-op, students can throw, fire, and glaze their pieces in the workshop space.

The physical facilities of Merrill College were provided through a partnership of public funds and gifts from the Charles E. Merrill Trust and the family of Ming Ong, a student in the 1980s.

For more information, visit the Merrill College website or call (831) 459-2144. For residential information, call the Housing and Residential Education Office at (831) 459-5689.

MERRILL COLLEGE FELLOWS AND STAFF

Merrill College faculty fellows are listed on the college's faculty directory.

Merrill College staff are listed on the college's staff page.

Porter College

Porter College was founded in 1969 as the fifth of UC Santa Cruz's residential colleges and was later renamed in honor of a generous grant from the Porter-Sesnon family. Its mission is to foster achievement in all areas of study. Porter is especially dedicated to achievement in the arts, believing that creative inquiry is an essential part of a rigorous and broad-minded education, a flourishing society, and a happy life.

ACADEMIC EMPHASES

The Porter campus is the administrative home of the Arts Division and the History of Art and Visual Culture Department, but Porter College faculty fellows hail from every academic division on campus and from many non-academic professions. All of them share the philosophy of education that the college's curriculum embodies: first, discover how to learn; then, learn by doing; and finally, let your learning make a difference in the world.

The Porter College curriculum encourages students to explore unusual topics and provocative ideas, to test and revise hypotheses about the meaning of their experiences, to learn from the failures that are an inevitable part of new learning and discovery, and to assume responsibility for the decisions they make in their studies.

Additional information about Porter College academics, including College 1 Course requirements and other academic programs, is available here.

COLLEGE COMMUNITY AND FACILITIES

The traditional residence halls and apartments play an important role in bringing the college community together. Students are encouraged to spend their beginning years in residence in the college, where housing is available for 1,300 students. The residence halls are divided into smaller units or

“halls,” with from 35 to 40 students sharing a wing and restroom facilities. Theme or hall options include Single Gender, LGBTQIA+, Gaming, Film and Digital Media, and Substance-Free (just to name a few). The six-person apartments are reserved for upper-division students.

Porter College is also home to the Transfer Community. The majority of on-campus incoming transfer students reside at Porter regardless of their college affiliation. Special programs are designed to help new transfer students adapt to life at UCSC.

In addition to traditional classrooms, Porter has many specialized facilities, such as student art galleries, a study center, and a dining hall that converts to a theater and programming space. Porter College also features a MakerSpace Co-op, dedicated to promoting Porter’s creativity, building community, and providing a constructive positive outlet. Additionally, the MakerSpace has tools and materials available to use for personal crafting projects or even class assignments. The Arts Instructional Computing Laboratories, located at Porter College, consist of two high-end labs oriented toward the arts.

Porter provides many opportunities for relaxation and recreation to balance the intellectual demands of a university education. The Residential Life and Activities Office staff organize formal and informal events, including open-mic nights, dances, craft activities, and the mural painting program.

Many students and faculty perform or exhibit their work at Porter. The Sesnon Gallery, the Porter/Kresge Dining Hall, the Porter Quad, and the faculty gallery host a wide range of artistic, cultural, and academic events each year.

For more information, call (831) 459-2273 or visit the Porter College website.

PORTER COLLEGE FELLOWS AND STAFF

Porter College faculty fellows are listed on the college’s faculty directory.

Porter College staff are listed on the college’s staff page.

Kresge College

ACADEMIC EMPHASES

Kresge’s academic life is centered on the integration of living and learning in a community that values self-determination, consensus-building, intellectual freedom, sustainability, and justice. These principles take shape in a curriculum that emphasizes participatory learning, hands-on experience, and conscientious academic inquiry that transcends the walls of traditional classrooms. Ranging from media studies to food justice, writers’ workshops to natural history, and journalism to service learning, Kresge’s courses offer varied ways for Kresge students to fulfill GE requirements while broadening

their educational experience in the company of dedicated and imaginative faculty.

Additional information about Kresge College academics, including Core Course requirements and other academic programs, is available here.

RESIDENTIAL LIFE

Beginning in 2023, Kresge will house first-year students in newly built residence halls. The Kresge apartments will be reserved for upper-division students. Distinctively designed, the apartments at Kresge Proper are configured for six to nine people. Kitchen and living areas look out onto the street, with other rooms facing the surrounding redwood forest. J and K Buildings’ three-person apartments are reserved for continuing upper-division students. These two-bedroom apartments have a kitchen and combination dining and living area.

Kresge is home to the Writers House, a living/learning community for students interested in creative writing and journalism (regardless of major), and the Ecovillage, a community for students who want to actively create a new world based on cooperation and sustainable living.

The Residential Life and College Programs staff at Kresge work to bring students of similar interests together academically and socially by designing fun and unique programs based on student interest. Programs that focus on celebrating the diversity of the residential community, and on enhancing academic success through music events, art and food-centered events are common.

COMMUNITY LIFE

A wide variety of events and activities shape community life at Kresge. Lectures, workshops, dances, and concerts are a regular part of student life at the college. The nature and tenor of these events are a reflection of the diverse interests of students and staff, who are committed to fostering voice, space, and opportunity for all community members.

Students actively shape the college community through participation in Kresge Parliament, an openly structured student organization responsible for voting the allocation of all college membership fees in support of activities and events. Parliament and Town Meetings also serve as a forum for the discussion of college and campus-wide issues with college staff and faculty. Additionally, students can get involved in the Food Co-op, or the Kresge Garden.

TRANSFER STUDENTS

In recognition of the wealth of diversity that transfer students bring to the community—in terms of culture and experience—Kresge is the home of the STARS program

(Services for Transfer and Re-entry Students). This is a staffed facility where students can gather to relax, socialize, hold meetings, and obtain campus information and resource support in a central location regardless of college affiliation. The resource center offers workshops, social evenings, and special events tailored to meet the needs of transfer students. STARS also offers special advising workshops and two- and three-credit courses designed to help transfers in the process of entering the university and moving forward in their careers.

FACILITIES

At the entrance to the college is the restful Piazzetta, with a beautiful, architecturally designed fountain, and the Kresge Garden, the largest student-run garden on campus. Leading off from the Piazzetta are STARS, the Seminar Room with a kitchen, the Commuter Lounge, and a student lounge equipped with television and DVD player. In addition to STARS, as a unique facility on the campus, the Commuter Lounge is a place for off-campus students who want to use a kitchen, shower, or lockers while on campus. Kresge's Photo Lab Co-op is above the Piazzetta and offers 24-hour accessibility to darkroom equipment. The college includes a study center with soaring ceilings and walls of glass overlooking the forest, which also houses a writing center, a computer lab equipped with PCs for student use, and a student-run Food Co-op, where organic produce is sold and working memberships are available.

Kresge College is undergoing a four year redevelopment project. As a part of the first construction phase three new residence halls for first-year students and a large academic building with a 600-seat lecture hall are being constructed. Later in the project renovation of the Kresge Proper apartments, which will house upper-division students and a new Kresge Town Hall, will begin. More details and updates about the Kresge Project can be found on the Kresge web page.

For more information, call (831) 459-2071 or visit the Kresge College website.

KRESGE COLLEGE FELLOWS AND FACULTY

Kresge College faculty fellows are listed on the college's faculty directory.

Kresge College staff are listed on the college's staff page.

Oakes College

Oakes was founded in 1972 to provide high-quality education to students from diverse cultural and social backgrounds. Students, staff, and faculty associated with the college believe that learning takes place not only in the classroom, but also in residential settings. For that reason, they work hard to create a multicultural community whose members strive to achieve ambitious goals—including equal access to educational

opportunity and freedom from oppression—while simultaneously affirming and celebrating their distinctive cultural backgrounds.

ACADEMIC EMPHASES

As a result of their experience at Oakes College, students will cultivate equity and justice. This is what drives Oakes College. The broad learning outcomes are for Oakes students to understand the self, community, systemic oppression, and action for change.

The Oakes College faculty represents a wealth of expertise from the natural sciences to the humanities, and we are proud to have some of the top scholars in the world among our faculty fellows. Our students major in nearly every discipline at UCSC—from economics and computer science, to theater arts and Latin American and Latino studies—and they are well supported by the depth and breadth of the Oakes College faculty and the extensive knowledge of our advising team. Oakes graduates have gone on to successful careers in fields such as medicine, law, education, medical research, and community service. Oakes Academic programs include a Community-based Action, Research, and Advocacy (CARA) program, and the Oakes Science Community, led by our scientist in residence at Biko House.

Additional information about Oakes College academics, including Core Course requirements and other academic programs, is available here.

COLLEGE COMMUNITY AND FACILITIES

Oakes College, located on the west side of the UCSC campus, commands a sweeping view of Monterey Bay. Students may choose between apartment and residence hall living. The residence halls have attractive courtyards, and views of the ocean and the city of Santa Cruz. Students can also share an apartment-style living space, which includes a common living area and small kitchen. Full-time coordinators for residential education and neighborhood assistants help residents develop cooperative ways of living together. As one student put it, "Oakes is a community where people of many different backgrounds, interests, and goals form a friendly neighborhood. We share our cultures and adapt to the different lifestyles of our neighbors." The residential program is designed to assist all students in integrating their academic and social lives. The residential staff host activities sponsored through its wellness, academic success, leadership, and social justice and diversity committees.

The college staff seek to nurture and sustain a community in which mutual respect, understanding, and concern for others are the norm. Within that atmosphere of community expectations, students are also supported and encouraged to find room for their own creative personal expression.

The other facilities at Oakes further support the special programs of the college and provide recreational opportunities for the students. College facilities include the Learning

Center, a multipurpose room for lectures, movies, and small theater productions; a college study center that is a quiet space for individual study, and a dining facility shared with Rachel Carson College. Adjacent to the Oakes Café is the Guzman Room, a social and group study space. Students and staff have worked together to create the Oakes Garden, which gives Oakes affiliates an opportunity to connect with each other and the earth to support sustainability and food security. Oakes is also home to the Underdome, a small outdoor basketball court great for friendly three-on-three competition. Additional recreational facilities located close to the college include tennis courts, a large recreational field, and an indoor basketball court. Oakes is named after Roscoe and Margaret Oakes in recognition of their generous philanthropy through the San Francisco Foundation.

For further information, call (831) 459-2558 or visit the Oakes College website.

OAKES COLLEGE FELLOWS AND STAFF

Oakes College faculty fellows are listed on the college's faculty directory.

Oakes College staff are listed on the college's staff page.

Rachel Carson College

Rachel Carson College is dedicated to environment and society, and the college has organized a vigorous intellectual life around this theme. The college examines environmental issues from multiple perspectives, through the social and natural sciences, engineering, public policy, and science and technology studies. Rachel Carson College offers students a sense of community and opportunities to augment academic work with a wide range of extracurricular activities. These include events such as Earth Week, sustainability internships, and a minor in sustainability studies.

Rachel Carson College students major in nearly every discipline offered at UCSC, while sharing a strong commitment to environmental stewardship. We teach our students and graduates to become environmentally aware green citizens, with the capacity to evaluate sustainability policies and strategies and with the skills needed for hands-on engagement in the many projects and activities that will be required to ensure the future of the planet and human civilization.

ACADEMIC EMPHASES

Rachel Carson College's academic classes focus on the theme of environment and society. The college sponsors a number of educational initiatives and courses aimed at furthering its theme and mission, as well as programs offering experiential learning for students.

Additional information about Rachel Carson College academics, including Core Course requirements and other academic programs, is available here.

COLLEGE COMMUNITY AND FACILITIES

Rachel Carson College is located on a sunny, terraced hillside on the west side of the UCSC campus, offering a spectacular view of Monterey Bay and the coastline as well as the redwood-covered hills. The college is designed to encourage interaction among resident and commuter students, with outdoor spaces for relaxing and informal opportunities to socialize. These include small residence hall patios, grass quadrangles, and a large plaza—the heart of the college—where pedestrian traffic converges. Adjacent to the college are recreational facilities that include the West Field House, tennis courts, basketball and sand volleyball courts, and playing fields. The Theater Arts and Music Centers, McHenry Library, and Porter and Oakes Colleges are a short walk from the college. Other parts of the university are easily accessible by foot, bicycle or frequent shuttle buses.

Rachel Carson College's facilities include an academic building that accommodates the college and faculty offices, the Sociology Department, associated research centers, classrooms, and a computer lab with printers. Approximately 500 students live in the college's community of two- and three-story residence halls, which provide single, double, and triple rooms as well as suites. The residence halls include laundry facilities and lobbies that serve as living rooms—favorite places where residents gather to relax, watch television, and catch up on the news of the day. A number of these are themed residences that focus on special programming related to the respective theme. Another 300 students are housed in Rachel Carson College's two-, three-, and four-bedroom apartments.

The college's residential staff includes both coordinators for residential education, who are full-time live-in professionals, and undergraduate resident assistants. The residential staff plans a variety of educational and recreational events, including community barbecues, outdoor movies, and student-initiated events that celebrate the diversity of our community. More intimate gatherings include study breaks, coffee talks, and potlucks. The residential staff is available to ease the transition to college life, making the college a comfortable new home for our residents.

The Student Commons building contains the Student Life Office, the office of Rachel Carson College's college programs coordinator, the office of the Student Environmental Center, and a large

meeting room for student use. A study center is located across the plaza. The Rachel Carson College Café is a favorite haven and gathering place for students, faculty, staff, and other members of the campus community.

In conjunction with the student government and student organizations, the Rachel Carson College Student Programs Office plans social, multicultural, and educational events for the college community. Weekly programs including open mics, music, art shows, and guest speakers accommodate the diverse spectra of cultural and artistic interests of the students. College Night, a quarterly cultural event, provides an opportunity for students to learn about a variety of cultures

through entertainment, education, and delicious cuisine. In addition, the Student Programs Office works closely with the Student Environmental Center to bring programs that educate and build long-lasting networks, which aim to address the environmental issues affecting our world today.

Above all, Rachel Carson College seeks to create a community of inclusion, in which each person is encouraged to share and explore beliefs, worldviews, values, and ideas in an atmosphere of mutual support and trust.

For more information, contact the college at (831) 459-2361, email carsonhousing@ucsc.edu, or visit the the Rachel Carson College website.

RACHEL CARSON COLLEGE FELLOWS AND STAFF

Rachel Carson College faculty fellows are listed on the college's faculty directory.

Rachel Carson College staff are listed on the college's staff page.

College Nine

ACADEMIC EMPHASES

College Nine's theme of International and Global Perspectives emphasizes the causes and consequences of our increasingly interconnected world where responses to threats like climate change and COVID-19 require large-scale collective action. Our academic and co-curricular programs analyze economic and cultural globalization, immigration, ethnic conflict, genocide, and human rights, among other issues. Students interested in these issues either as their major focus or as part of their general education are invited to join the College Nine community.

Additional information about College Nine academics, including Core Course requirements and other academic programs, is available here.

COLLEGE COMMUNITY

Founded in 2000, College Nine is one of the newest colleges at UCSC. College Nine creates an integrated living and learning environment through engaging academic and extracurricular programs focusing on the theme of International and Global Perspectives. Student leaders, faculty, and staff collaborate to develop an array of programs exploring the many aspects of the college's theme. Some of the programs include faculty presentations, guest speakers, conferences, debates, films, courses, arts events, and interactive workshops. These programs unite community members in an atmosphere of mutual respect, in which important contemporary and controversial issues are discussed.

College Nights

College Nights are community programs that feature a special dinner menu, entertainment, educational displays, and activities that relate to the college theme of International and Global Perspectives. College Nights provide an opportunity to gather as a community several times a year to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability; music and dance from around the world; and popular culture. College Nights are held in the Dining Commons and are open to all College Nine students.

Student Government

The College Nine Student Senate serves as the student government for College Nine and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campuswide student governance board. The Senate appoints representatives to campus and college committees, provides monetary support to student organizations, hosts community programs, and consults with college administration on policies development.

International Living Center

The International Living Center (ILC) at College Nine offers a unique living environment fostering understanding, cooperation, and friendship among upper-division students from different nations, cultures, and backgrounds. With a portion of the residents joining the community as domestic students from the United States, and the other portion of students joining from various countries around the world the ILC truly embodies the College Nine theme of international global perspectives. ILC students reside in the Colleges Nine and Ten Apartments as they live together and learn from one another in this culturally immersive experience. Based out of the International Living Center, the International Affairs Group (IAG) offers all Colleges Nine and Ten community members the opportunity to engage in lively discussions about important current international issues with one another through guest speakers, film, literature, media, and personal experience.

iFloor

The iFloor is a combination of international first-year students and U.S. first-year students who apply to live in this intentional intercultural community housed within the College Nine residence halls. This unique community offers residents opportunities to make meaningful, lifelong friendships and connections that extend beyond borders.

Co-curricular Programs and Opportunities

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group cooperation and build the key skills employers have identified that they want the work force to have in the 21st century. There are many opportunities at College Nine for student involvement.

These include the following groups as well as many other programs, activities, and clubs.

(H)ACER

The (H)ACER Program at Colleges Nine and Ten integrates experiential learning with community engaged research opportunities to train undergraduate students in community-engagement and envision themselves as knowledge producers. Students can participate in anywhere from one-day critical service learning experiences to yearlong research apprenticeships. In collaboration with our community partners, students engage in projects that address pressing issues such as social, economic, educational, and environmental injustice through an approach that pushes against deficit and damage-centered frameworks and honors the knowledge of community members.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led conference featuring keynote speakers, multiple workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit practicalactivism.ucsc.edu for more information.

Community Garden

The Community Garden Club meets weekly to discuss sustainability issues, integrate the themes of our colleges into the garden design and practice, and work together on soil preparation, planting, and harvesting. Members of the Garden Club learn about opportunities to work with our sister garden at Calabasas Elementary School in Watsonville. The Community Garden Club raises grant funding to support four staff positions to sustain the garden and run the Garden Club.

Intercultural Community Weekend

This two-day retreat provides international and U.S. students from diverse backgrounds the opportunity to explore various components of intercultural communication. Through a series of structured exercises and small-group discussions, students share perspectives on intercultural issues, values orientation, and cross-cultural communication. The goal of the workshop is to build community and friendship between international and U.S. students as well as to increase students' understanding of the complexity of communicating across cultures.

PHYSICAL SURROUNDINGS

College Nine is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of campus. One of the campus's Instructional Computing Labs is conveniently located in the Social Sciences 1 Building. A nature preserve

serves as College Nine's "backyard." College Nine students have immediate access to hiking, running, and mountain bike trails in the adjacent forest.

Residence halls offer approximately 600 single and triple bedrooms. These fully furnished residence halls include adjacent student study spaces, recreational areas, and WiFi. In addition, there is a state-of-the-art dining hall with an adjoining multipurpose room and recreation lounge for both College Nine and John R. Lewis College.

College Nine and John R. Lewis College also house approximately 400 upper-division students in apartments, with single, double, and triple bedrooms. All apartments have full kitchens, living rooms, bathrooms, and WiFi. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, email 910capc@ucsc.edu, or visit the College Nine website.

COLLEGE NINE FELLOWS AND STAFF

College Nine faculty fellows are listed on the college's faculty directory.

College Nine staff are listed on the college's staff page.

John R. Lewis College

ACADEMIC EMPHASES

John R. Lewis College's theme of Social Justice and Community addresses a range of social, political, and economic inequalities--from racism and xenophobia to incarceration and educational inequity--and their impacts on society. In particular, our academic and co-curricular programs consider the injustices that many people confront in their lives, and situate them in historical, political, and structural contexts, informing possible pathways for resistance and change. John R. Lewis College provides students with opportunities to make their own positive contributions to social change through community involvement and/or scholarly research.

Additional information about John R. Lewis College academics, including Core Course requirements and other academic programs, is available [here](#).

COLLEGE COMMUNITY

College Ten, the newest college at UC Santa Cruz was founded in 2002. On May 6, 2022, it was dedicated as John R. Lewis College, a naming that was made possible by the generosity of anonymous donors who are inspired by the life and legacy of the Civil Rights Leader and member of Congress. John R. Lewis College creates an integrated living-and-learning environment through engaging academic and extracurricular programs focusing on the theme of Social Justice and Community. Student leaders, faculty, and staff

collaborate to develop an array of programs exploring the many aspects of social justice. Some of the programs include faculty presentations, guest speakers, debates, films, arts events, courses, and interactive workshops. These programs unite community members in an atmosphere of mutual respect, in which contemporary and controversial issues are discussed.

College Nights

College Nights are community programs that feature a special dinner menu, entertainment, educational displays, and activities that relate to the college theme of Social Justice and Community. College Nights provide an opportunity to gather as a community several times a year to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability; music and dance from around the world; and popular culture. College Nights are held in the Dining Commons and open to all John R. Lewis College students.

Student Government

The John R. Lewis College Student Senate serves as the student government for John R. Lewis College and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campuswide governance board. The Senate appoints representatives to campus and college committees, provides monetary support to student organizations, hosts community programs, and consults with college administration on policies development.

Rumi's Field

Named after a renowned peace-seeking Sufi poet, Rumi's Field offers an opportunity for students who wish to learn, live, and interact using the skills of Nonviolent Communication (NVC) and exploring social justice through the lens of nonviolence. Nonviolent Communication strengthens one's ability to inspire empathy from others and respond compassionately even under difficult circumstances. This community of John R. Lewis College first-year and continuing students offers the opportunity to engage in dialog and resolve conflict using NVC consciousness as a tool for personal and societal transformation.

Co-curricular Programs and Opportunities

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group cooperation and build the key skills employers have identified that they want the work force to have in the 21st century. There are many opportunities at John R. Lewis College for student involvement. These include the following groups as well as many other programs, activities, and clubs.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led conference featuring keynote speakers, multiple

workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff and the local community. Visit practicalactivism.ucsc.edu for more information.

(H)ACER

The (H)ACER Program at Colleges Nine and Ten integrates experiential learning with community-engaged research opportunities to train undergraduate students in community engagement and envision themselves as knowledge producers. Students can participate in anywhere from one-day critical service learning experiences to yearlong research apprenticeships. In collaboration with our community partners, students engage in projects that address pressing issues such as social, economic, educational, and environmental injustice through an approach that pushes against deficit and damage-centered frameworks and honors the knowledge of community members.

Multicultural Community Weekend

This two-day retreat provides students from diverse backgrounds the opportunity to explore aspects of social justice, diversity, and community through a series of exercises and discussions. Participants explore issues impacting our individual identities (e.g., race, class, gender, sexual orientation, ability, religion); increase their understanding of the complexities of communicating across diverse experiences and backgrounds; build communication skills; and share in celebrating and deconstructing the diversity of our community. Students apply for this opportunity in the fall.

Terry Freitas Café

Located at John R. Lewis College, the Terry Freitas Café is a student-run lounge with a long legacy as a favorite gathering place among students. It is open daily for performances, music, and social interaction. Café student baristas serve coffee and various snacks for a small donation. The café is named after former UCSC student Terry Freitas, who dedicated his life to making the world a more socially just place.

Community Garden

The Community Garden Club meets weekly to discuss sustainability issues, integrate the themes of our colleges into the garden design and practice, and work together on soil preparation, planting, and harvesting. Members of the Garden Club learn about opportunities to work with our sister garden at Calabasas Elementary School in Watsonville. The Community Garden Club raises grant funding to support four staff positions to sustain the garden and run the Garden Club.

PHYSICAL SURROUNDINGS

John R. Lewis College is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of

campus. One of the campus's Instructional Computing Labs is conveniently located in Social Sciences 1. A nature preserve serves as John R. Lewis College's "backyard." John R. Lewis College students have immediate access to hiking, running, and mountain bike trails in the adjacent forest.

Residence halls offer approximately 600 single and triple bedrooms. These fully furnished residence halls include student study spaces, recreational areas, and WiFi. In addition, there is a state-of-the-art dining hall with an adjoining recreational lounge and Terry Freitas Café, a coffee lounge for both Colleges Nine and Ten. Colleges Ten and Nine also house approximately 400 upper-division students in apartments, with single, double, and triple bedrooms. All apartments have full kitchens, living rooms, bathrooms, and WiFi. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, email 910capc@ucsc.edu, or visit the John R. Lewis College website.

JOHN R. LEWIS COLLEGE FELLOWS AND STAFF

John R. Lewis College faculty fellows are listed on the college's faculty directory.

John R. Lewis College staff are listed on the college's staff page.

(In Progress) Student Life

Campus life is all about learning, discussion, and debate; meeting people from diverse backgrounds; making new and lasting friendships; attending cultural celebrations and artistic and musical performances; and getting involved with student organizations and clubs. UCSC provides a wealth of opportunity for personal growth within the context of a rich and meaningful academic experience. Students live, study, and socialize with others from their college as well as with students from the other colleges. UCSC's colleges (see The Colleges) and various campus units provide a wide range of student services to respond to individual needs, interests, and levels of personal development. In addition, students can take advantage of the campus's stunning natural setting, the friendly and engaging local community, and easy access to the Monterey and San Francisco Bay areas.

Santa Cruz Community

Located on the northern tip of Monterey Bay, Santa Cruz is famous for its Mediterranean climate, forested state parks, and miles of scenic beaches. Recreational opportunities abound—hiking through redwood forests, bicycling along mountain roads, and surfing, sailing, and scuba diving. The Santa Cruz Mountains are minutes away; the majestic Sierra Nevada is a four-hour drive to the east.

The metropolitan centers of the San Francisco Bay Area are easily accessible. By car, Berkeley and San Francisco are less than two hours from campus. San José, Monterey, and Carmel are one hour away.

The city of Santa Cruz, with a population of about 65,000, was originally founded as a Spanish mission. Santa Cruz is a small community with cosmopolitan appeal and a strong awareness of environmental and political issues.

Housing

At UC Santa Cruz, students are housed in small-scale residential communities, which provide close-knit living environments within the larger university. Each community provides an academically and socially supportive environment and offers special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience. A space in university housing is guaranteed to all new undergraduate students entering in the fall quarter who submit all forms and required fees by stated deadlines.

After accepting the UC Santa Cruz offer of admission, all undergraduate students become affiliated with one of our 10 colleges. Once affiliated with a college, all students are sent information about the housing options available, and instructions for completing the online housing application/contract process. The housing options available to you will differ depending on whether you are a freshman or a transfer student—though all students have access to campus dining facilities. Housing application periods open in mid-May for new freshmen and mid-June for new transfers entering in the fall.

College Residences

The colleges differ in academic focus, environment, location, architecture, and programs offered. However, all 10 colleges are dynamic, engaging learning communities that offer opportunities for students to help build and shape their experiences.

Freshmen are generally assigned to live in residence halls at their college. Residence hall floors are typically shared by 15 to 50 students and have common bathrooms. Students can request to live in a mixed-gender (students of any gender live on the same floor or apartment, though bedrooms are single-gender) or single-gender (students of a single gender live on the same floor or apartment) area. Room assignments allowing transgender and gender-nonconforming students and their allies to live together in the same room regardless of gender or legal gender are also available by request. Apartments, typically shared by four to seven students, have common living/dining rooms, kitchens, and bathrooms, and a combination of shared and private bedrooms. Each community provides accessible housing for students with disabilities. Incoming transfer students reside at the Transfer Community, or the University Town Center, regardless of college affiliation.

A variety of theme-housing options are available for those who are interested. Based on academic pursuits, hobbies,

individual backgrounds, and lifestyle preferences, these options serve to complement a student's experience in residence.

Each college's residential program is a team effort. Live-in student and professional staff members provide orientation and support services, organize activities and events, provide referral information about academic or personal concerns, and assist with roommate problems.

All students living in campus residence halls (including the transfer community) have a meal plan included in their housing contract. Meal plans are optional for apartment residents. Students with meal plans may use their student ID cards to access any of the dining halls on campus and to purchase menu items at UCSC Dining-operated cafes, coffee bars, and markets. More information on the colleges, including videos, can be found here and at the Housing website.

Redwood Grove

Located on the west side of campus, the Redwood Grove apartments are an extension of the transfer community at Porter College, and provide an apartment living environment for a limited number of incoming transfer students who are age 23 or older at the time they apply for housing. Each apartment has private and shared bedrooms, a living room, kitchen, dining room, and bathroom. Information is available at Redwood Grove and by email at redwoodgrove@ucsc.edu.

The Village

Located in the Lower Quarry, The Village is a unique community for continuing students. Each of the 17 houses features nine single bedrooms, three bathrooms, and a kitchenette. A meal plan is optional. A manager's apartment, office, laundry facility, community kitchen, and community lounge are located on site. Information is available at The Village and by email at village@ucsc.edu.

University Town Center

The University Town Center, located at the corner of Pacific and Cathcart in downtown Santa Cruz, houses continuing and transfer students in two- and three-person studio apartments. A meal plan is optional. Information is available at UTC and by email at utc@ucsc.edu.

Family Student Housing

Family Student Housing has apartments for students and their families. Students must reside with at least one eligible family member on a permanent, full-time basis. Eligible family members include children, a spouse or adult partner, a parent, or a sibling. The apartments are unfurnished, and each has two bedrooms, a bathroom, a small study, a combined living/dining area, and a kitchen. Several apartments are accessible to people with mobility impairments. Also, see information on child care and youth programs, below. Information is available at Family Student Housing, and by email at fsh@ucsc.edu.

Camper Park

A 42-space Camper Park is located on the north side of campus and includes university-owned single-occupant recreational vehicles that are rented to students. The park includes a community building with restrooms, showers and laundry facilities, and a lounge/study room. Information is available at Camper Park and by email at camperpark@ucsc.edu.

Graduate Student Housing

Conveniently located adjacent to "Science Hill," home to many of UCSC's main academic facilities, each apartment offers four single bedrooms, a living room, kitchen, dining room, and bathroom. Ground floor apartments have decks, while upper apartments have private balconies. Information is available at grad housing and by email at gradhsg@ucsc.edu.

Campus Housing Office

The Housing Office is responsible for the application and contract records for all single students living in campus residence halls and apartments, The Village, University Town Center, and Graduate Student Housing. Advisers are available on a drop-in basis to assist students with any questions regarding housing contract policies and procedures, housing and dining charges, payment plan options, meal plans, and more.

Location: 104 Hahn Student Services Building (8 a.m. to 5 p.m., Monday through Friday). Information is available at housing and by email at housing@ucsc.edu.

Community Rentals Office

Students interested in finding their own accommodations in the off-campus community are encouraged to use the resources available through the UCSC Community Rentals Office. Community Rentals maintains online rental listings to assist students in locating rental housing and serves as an information and advising resource.

Location: 104 Hahn Student Services (8 a.m. to 5 p.m., Monday through Friday). Information is available at community rentals and by email at communityrentals@ucsc.edu.

Athletics and Recreation

Athletics & Recreation provides a variety of interesting programs, activities, and developmental opportunities in which all students from any background or skill level are invited to participate. The department strives to develop skills and habits related to fitness and wellness that last a lifetime for students to enjoy athletic and recreational activity.

You can obtain further information about the programs described below from Athletics and Recreation located at the East Field House, (831) 459-2531. Visit the Athletics & Recreation websites at goslugsg.com or recreation.ucsc.edu.

Athletics and Recreation Courses

Athletics and Recreation offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With these experiences, students are more equipped to make important choices leading to healthy lifestyles.

Regularly scheduled courses, which carry no academic credit but are recorded on your transcript, are available in a broad range of physical activities (see Athletics and Recreation). Many classes are small, and all offer expert instruction and welcoming environments. While many of the courses are for students at the beginning level, some are designed for the more advanced student.

Subjects offered include swimming, scuba, sailing, rowing, kayaking, basketball, tennis, volleyball, ballet, jazz dance, modern dance, fencing, soccer, strength training, yoga, aikido, and more. See the Athletics and Recreation website for more information.

Intramural Sports

Intramural Sports offers a wide variety of traditional and niche recreational sports opportunities designed to encourage participation for all enrolled students to play together on campus. The program prides itself on sportsmanship, inclusion, community, and fun.

Intramural Sports are structured for all skill levels and are conducted in a safe, supervised environment. You do not need to be an experienced athlete to play! **Intramural Sports are open to all UC Santa Cruz students and staff/faculty with current memberships.** Intramural Sports are a fun way to play, meet friends, learn new sports, and relieve the stress of daily routines. Most activities allow you to select the days and times you play, as well as the people on your team. Check out the Intramural Sports website to learn how and when to register.

Sport Clubs

UC Santa Cruz Sport Clubs are student-driven and student-managed organizations that strive for skill building in leadership, problem-solving, collaboration, and financial management. These organizations participate in a variety of active-lifestyle activities that compete with other university club organizations. Sport Clubs also hosts recreational clubs for those less inclined for competition. Please visit the Sport Clubs website to see learn more about Sport Clubs at UC Santa Cruz.

Intercollegiate Athletics

UC Santa Cruz offers the only National Collegiate Athletic Association (NCAA) Division III program in the University of California system. As a Division III member, the program offers no scholarships or grants in aid that are based on athletic ability. UC Santa Cruz sponsors the following intercollegiate sports: men's and women's basketball, soccer, swimming and diving, tennis, volleyball, cross country, track, and women's golf. For schedules, rosters, and more

information on Athletics at UC Santa Cruz please visit goslugs.com.

Adventure Rec

The Adventure Rec program within the Athletics & Recreation department is designed to provide the UC Santa Cruz community with an opportunity to develop skills, have fun, be challenged, and make healthy social connections through outdoor, recreational, and hands-on learning experiences. Adventure Rec offers a wide range of programs that provide opportunities for beginners as well as more experienced participants. Students can expect well-organized activities as well as informal experiential learning led by Adventure Rec UC Santa Cruz professional staff and student leaders. Much like the rest of the Athletics & Recreation department, student leaders make up the foundation of the Adventure Rec, bringing experience and enthusiasm to all that participate.

Athletics & Recreation also offers outdoor equipment rental. From surfboards to wetsuits, tents to sleeping bags, UC Santa Cruz has all the high-quality backpacking and camping gear a student could need. Students interested in planning their own outings should contact the Adventure Rec staff for assistance or sign up for one of the available adventure preparation program offerings. Adventure Rec also offers a free, weekly drop-in bicycle maintenance program. Please visit the Adventure Rec website for more information.

Sammy Slug

The Banana Slug, a bright yellow, indigenous gastropod found in the redwood forest on campus and around Santa Cruz County, has not always been the official mascot for UC Santa Cruz. In fact, the University didn't initially have formal, organized, and campus-supported athletics for enrolled students when founded in 1965. By 1980, students had made it clear there was a sincere desire for more organized and University-supported participation in intercollegiate competition. That is when UC Santa Cruz became an institutional member within DIII of the NCAA.

Institutional membership with the NCAA requires an official team name, yet for the first 15 years of its existence, the University did not have one. Chancellor Robert L. Sinsheimer gathered a focus of student-athletes and from that, made a decision to name the University's new mascot: the Sea Lions. The new name was soon challenged by a grassroots effort by students on campus, which led to publicity in local and national media as more UC Santa Cruz students campaigned to officially become the Banana Slugs. Even after a Sea Lion was painted on the West Field House hardwood, students continued to cheer and chant for the Banana Slugs. Bronze statues of sea lions in the heart of campus were vandalized with yellow paint and antenna glued to the top of the sea lion heads to transform them into Banana Slugs. After years of relentless effort and stalemate a student-led, campus referendum was organized in 1986 to decide the UC Santa Cruz mascot once and for all. The vote was overwhelmingly in favor of the Banana Slugs and the rest is history.

Be on the look out this fall to participate in the #EvolveSammy campaign and help campus decide how Sammy Slug evolves into the next era!

Facilities

UC Santa Cruz Athletics & Recreation hosts a variety of facility spaces for students, faculty/staff, and community to participate in athletic and recreational activities. The East Field House (EFH) complex is one of the most popular areas of campus with over half of the student population visiting the complex at least once during the year. There you will find our 50m pool, six tennis courts, multiple dance studios, indoor and outdoor basketball courts, two sand courts, nine acres of recreational field space, an outdoor strength-training and cardiovascular-fitness installation, a ½ mile jogging path, one natural grass competition surface, and a 6,500 square foot fitness center complete with cardio and strength training equipment as well as incredible vistas of the Monterey Bay. The EFH complex is also home to our personal training and group fitness classes offered by the Athletics & Recreation FitLife program. More information is available on the FitLife website. More information is available on the FitLife website.

The West Field House is home to our basketball and volleyball teams and is a great place to enjoy the Banana Slugs compete against Coast to Coast Athletic Conference members or other NCAA DIII opponents. There are also 6 tennis courts, 2 sand courts, outdoor basketball, and a smaller recreational field space for students to enjoy within the Rachel Carson College area of campus.

UC Santa Cruz Athletics & Recreation also leases additional facility spaces for students in Santa Cruz, including Kaiser Permanente Arena downtown for select basketball and volleyball games (visit goslugs.com for game schedules) and the Santa Cruz Harbor. The UC Santa Cruz Community Boating Center is located on FF Dock at the Santa Cruz Small Craft Harbor. Our Boating Center is home to Physical Education courses, a community boating club, and our competitive Sailing Club which operates as a Sport Clubs student organization. Summer sailing courses are also available for those interested. Boating courses are offered for dinghies, 24'–32' keel boats, sea kayaks, and rowing shells. Please visit the Boating Center website for more information.

Sustainable Living Center Programs

The Friends of the Community Agroecology Network (FoCAN) is a student led-organization that celebrates cultural identities, works on transborder community initiatives centered on justice in the agro-food system, food sovereignty, solidarity and just solidarity economies. We form part of an international network with small-scale farmers and rural youth to sustain rural livelihoods. FoCAN members work with UC Santa Cruz students, Community Agroecology Network (CAN) and UCSC staff members in community outreach, educational material development, promotion of fair trade/solidarity economies principles, food sovereignty

workshop planning, event coordination, and international youth network collaborations. FoCAN participates in CAN's AgroEco Coffee, a solidarity supply network, and CAN's Youth Network, Red Internacional de Agroecología Comunitaria (RIAC), along with several youth organizations in Mexico and Nicaragua. For more information see: <http://focan.weebly.com> and www.canunite.org, or contact agroeco@canunite.org.

FoCAN facilitates hands-on learning activities that engage students with all aspects of a sustainable food system—from growing organic food that supports local communities to conscious consumerism on a global level.

Student-Run Cooperatives

Bike Co-op

The Bike Co-op is student owned and operated, run cooperatively, and nonprofit. Whether you need to purchase a bike, repair a bike, or want to learn, the co-op can accommodate your needs. People are encouraged to attend meetings, learn more about cooperatives, and get involved. The Bike Co-op will reopen for the fall 2021 quarter. It is located at the Redwood Building, next to the Student Union.

Transportation and Parking Services (TAPS)

Transportation and Parking Services (TAPS) provides and manages access to the UC Santa Cruz campus, with a focus on sustainable transportation modes. By providing alternatives to bringing a car to campus, TAPS helps reduce the demand for on-campus parking, reduce greenhouse gas emissions, and mitigate the impacts of travel on the surrounding community. These efforts support the UC Carbon Neutrality Initiative and the Campus Sustainability Plan, and are one of the reasons that UC Santa Cruz regularly ranks as one of the “greenest” colleges in the nation.

To support these efforts, parking for undergraduate students is either prohibited or extremely limited. Freshman and sophomore students who live on campus are generally not eligible to purchase parking permits. All commuting students and juniors and seniors who live on campus may apply for a permit; however, due to the limited number of parking spaces on campus, there is no guarantee of actually being able to purchase one. Historically, permits have sold out before the start of fall quarter, and have only been available through an appeals process for the remainder of the academic year. (Those students, including residential freshman and sophomores, with a documentable need for a parking permit, such as job or family responsibilities, or health-related needs, may use the appeal process to request a permit.)

Off-campus parking options are also extremely limited, and typically sold out before classes begin in fall quarter. If you will be living on campus, and are not eligible to purchase an on-campus parking permit, you should not expect to be able to park your vehicle anywhere nearby.

Gift cards, raffles, and other prizes are some of the rewards possible for using a sustainable transportation choice. Sign up at Cruz511.org and download the Commute Tracker app to log your trips.

For additional information, visit the TAPS website.

Transportation Options

Campus Transit: On-campus shuttles and Disability Van Service are provided fare-free through the Student Transit Fee. TAPS shuttles operate on campus from approx. 7:30 a.m. to 11:30 p.m. Monday through Friday, and from 6:00 p.m. to 11:30 p.m. on weekends.

METRO Buses: Santa Cruz Metropolitan Transit District (METRO) is the transit bus service provider for Santa Cruz County. METRO operates more than 25 bus routes throughout the county, including five routes to and from the residential UC Santa Cruz campus, and one route between the residential UCSC campus and the Coastal Science Campus (CSC) during fall, winter, and spring quarters. UCSC students can ride METRO fare-free throughout the county by showing a student ID card with a current quarter validation sticker.

Bike Program: TAPS offers a variety of programs, including over 3,500 bike-rack spaces, bike "fix-it" stations, bike lockers, helmet/light giveaways and morning bike shuttles that run from CVS Pharmacy on Mission Street to campus. Popular bike services include the Bike Library, which lends bikes for free on a quarterly basis, e-bike workshops, free bike maintenance clinics, and free bike skills classes. Visit slugbikelife.org for upcoming bike events and programs.

Car Sharing: Zipcar is a membership-based car share program that allows students 18 and over to rent cars on campus on an hourly or daily basis. Use fees start at \$5.50 per hour and include all vehicle fees, gas, insurance, mileage, and reserved parking on campus. Members have access 24 hours per day to a variety of vehicles both on campus and at nearby Santa Cruz locations. For detailed information, visit the campus Zipcar website.

Carpool Ridematching: Cruz511 offers a county-wide ridematching program that spans from San Francisco to Santa Cruz. Download the Commute Tracker mobile app to start finding carpool buddies. Even if you don't have a car, you can post the ride you need. If you have a car, you can share your trip with others and save on costs. You can list your regular commute to campus or your one-time trip needs through Cruz511.

Walking: UC Santa Cruz is one of the most beautiful campuses in the world, and the best way to experience it is on foot! Walking is the single most sustainable means of getting around (and often the most direct way, as well) so be sure to bring a pair of sturdy walking shoes. A walking map of the campus is provided to all new students.

Long-Distance Train/Bus Service and

Airports: Northbound Amtrak is available from the San Jose Diridon Station, which can be accessed by the Hwy 17 bus.

Southbound Amtrak service is available from San Jose or Salinas.

The nearest airport is in San Jose, approximately 35 miles from Santa Cruz. The San Francisco Airport is about 70 miles from campus. Both airports are accessible by taking the Highway 17 Express bus that runs between Santa Cruz and San Jose, including a stop at the San Jose Diridon Station, where connections to Amtrak and other local and regional transit services are available. Commercial van and limousine services are also available.

Student Health Services

UC Santa Cruz Student Health Services is a full-service medical facility offering a complex integration of primary care, counseling and psychiatric services to students on the UCSC campus. This includes a primary care clinic, same day clinic, counseling, psychiatry, high complexity laboratory, radiology, pharmacy, optometry, billing and insurance as well as other administrative functions. Student Health Services also encompasses the Student Health Outreach Program (SHOP), and Campus Advocacy, Resources and Education (CARE). UCSC Student Health Services strives to create a caring and supportive environment to assist students in improving their physical and emotional well-being to aid in their academic success. For hours by department and location, visit the locations and hours section of our website.

Student Health Center

The Student Health Center is the medical branch of Student Health Services. We offer in-person and telehealth appointments to all registered students and services are provided by board-certified physicians, nurse practitioners and physician assistants. SHC provides health care focused on the particular needs of students such as nutritional counseling, x-ray, lab, STI testing, optometry, and pharmacy. Students can be seen by appointment or, in cases of illness or injury, on the same day at the Same Day Clinic. The Health Center is open weekdays during the regular academic year. In case of emergencies, either during the day or after normal operating hours, please call 911.

Counseling and Psychological Services (CAPS)

Counseling and Psychological Services (CAPS) offers a range of professional services to undergraduate and graduate students seeking help with personal concerns. Counseling services are available for any registered UCSC student and are confidential. There is no out-of-pocket fee for CAPS services, and you don't need UC SHIP or CruzCare to be seen at CAPS. We provide assistance for students with academic and personal stress, relationship and family issues, drug and alcohol problems, psychological problems, and crisis situations. Psychiatry services include diagnostic evaluations or prescribing of medication in certain situations. Depending on a student's needs, a student may be provided with brief individual or couples counseling, group counseling, psychiatric services, crisis intervention, case management services, or a referral for open-ended or long-term therapy off

campus. CAPS also provides the Let's Talk Drop-in Program, educational workshops on mental health topics and online therapy and resources. Information provided to any CAPS professional staff member is confidential within Student Health Services and cannot be released without a student's permission except in specific circumstances involving risk and safety. All services are aimed at helping students gain greater personal effectiveness and academic success. Professional staff members are available at various locations on campus, including the Student Health Services building and the colleges. Emergency on-site crisis services and after hours crisis services are also available.

Staff members are available to provide consultation to staff, faculty, individuals, or family members for assistance in helping students in distress. Counseling psychologists can also provide training and programs on a variety of mental health topics, stress and coping skills, multicultural issues, and organizational development.

For more information visit the Counseling and Psychological Services website or call (831) 459-2628.

Student Health Insurance

To ensure that emergencies and other health care costs do not interfere with a student's education, all University of California students are mandated by the University of California Board of Regents to have health insurance. A comprehensive and affordable program specifically designed for students is available through the university via the University of California Student Health Insurance Plan (UC SHIP). All students are automatically enrolled in UC SHIP and billed quarterly through their student account, unless they choose to waive this coverage by providing proof of suitable insurance annually by the specified deadlines. For detailed information regarding insurance coverage and the waiver process, view the Billing and Insurance Information section on the Student Health Center website. The Student Health Center only accepts UC SHIP, not any other health insurance plans.

If you want to use your own insurance and use Student Health Services on campus without paying high fees, consider CruzCare. CruzCare is inexpensive pre-paid access to SHS (it's not an insurance plan). With CruzCare, visits to the Student Health Center for some acute illness or acute injury do not generate a charge. There are no charges for some lab tests or x-rays done at the Student Health Center. Learn more about CruzCare.

Immunization and Tuberculosis Screening Requirements

UC-wide, all incoming UC students, (frosh, graduate, transfer, and returning) **are required** to obtain specific vaccines and tuberculosis (TB) screening **before coming to campus**. Immunization information and the TB Risk screening form must be submitted through Health e-Messenger.

Failure to complete this process will result in an enrollment hold and will affect the ability to register for future classes. For more information about UCSC Student Health Services

and the UC-wide immunization requirements, please visit the Student Health Center website.

Student Health Outreach and Promotion (SHOP)

SHOP is UCSC's destination for information, conversation, and self-exploration around health and wellness in a safe, non-judgmental environment. SHOP provides opportunities for students to explore and enhance their health and wellness as they pursue their academic goals. SHOP offers information, education, resources, and support on issues related to alcohol and other drugs, sexual and reproductive health, mental health and wellness, college life balance and other concerns relevant to college students. All UCSC students are welcome and encouraged to drop in and speak with SHOP's professional and student staff. SHOP offers a robust peer education program - by students for students. Students can get involved with SHOP by becoming peer educators.

Alcohol and Other Drug (AOD) Education

Student Health Outreach and Promotion (SHOP) empowers students to reduce risks related to substance use/misuse. Students can meet with staff confidentially to discuss their personal AOD use, discuss concerns about friends or family members, obtain educational materials, participate in workshops, and access resources and a support center for students in recovery. SHOP Health Educators provide formal and informal sessions and workshops for students, college residential staff, and other campus groups. For information call (831) 459-1417 or visit the SHOP website. NOTE: In January 2014, UC Santa Cruz implemented a campuswide smoke and tobacco-free policy.

- Sexually Transmitted Infection (STI) Prevention
- SHOP offers many resources for promoting sexual health, including:
 - The Condom Co-Op, selling safer sex supplies at reduced cost.
 - The Birth Control Patrol—make an appointment with a peer to choose a contraceptive option.
 - Workshops, activities, and events.
 - Sexual health questions? Speak to a SHOP staff person.

SHOP is located at the Student Health Center. For more information, visit the SHOP website, call (831) 459-3772, or email shop@ucsc.edu.

Campus Advocacy, Resources and Education (CARE)

Campus Advocacy, Resources and Education (CARE) provides support, advocacy, resources, and violence prevention education to the UC Santa Cruz community. We respond to the needs of students, staff, and faculty impacted by sexual assault, dating/domestic violence, and stalking by

providing confidential advocacy services. CARE services are survivor-centered and trauma-informed.

To request an appointment with a confidential CARE Advocate, email care@ucsc.edu or call 831-502-CARE (2273).

CARE also works collaboratively with students, faculty, and staff to educate the campus community about the vital role that each of us has in preventing violence and creating a culture of consent and respect. We supervise a peer prevention education program for students covering topics including:

- How to support survivors
- Reporting options
- Healthy communication and relationships
- Bystander intervention skills
- Media literacy

CARE is located at 223 Oakes Rd, Academic Building, Room 221. Find us online at CARE, follow us on Facebook and Instagram, or sign up for our newsletter.

Clinical Laboratory

The UC Santa Cruz Student Health Services Laboratory provides a variety of testing and phlebotomy services. We provide over 25 in-house tests and phlebotomy services for send-out laboratory tests. Our team is caring and compassionate about their work and look forward to helping our student body.

We have a robust self-directed (SD) testing program. The most utilized tests are tests on our Sexually Transmitted Infection (STI) test menu. We offer students the ability to order their own STI tests (self-directed) and report results for most tests directly to the student through Health e-Messenger. In addition to STIs, we have a SD wellness panel to help students maintain optimal health.

We are open Monday through Friday, visit the locations and hours section of our website. Limited appointments are available, as well as walk-in service. We are located on the bottom floor of the Student Health Center.

Resource Centers

African American Resource and Cultural Center (AARCC)

The African American Resource and Cultural Center (AARCC) develops and fosters co-curricular initiatives that promote academic success, leadership training, student development, and social engagement centered around the African, Black, and Caribbean (ABC) experience. Since the center's inception in 1991, the program's primary mission has

been to serve as a key resource to acclimate ABC students to general campus life and academic culture. In addition, the program provides advocacy and support to ABC students in helping to monitor students' academic progress and subsequent achievement of their educational goals. AARCC works closely with overall campus outreach efforts to enhance the recruitment and retention of students who self-identify within the African diaspora.

AARCC works directly with numerous (student) organizations, which include, but are not limited to, National Society of Black Engineers (NSBE), Black Student Union (BSU), African American Theater Arts Troupe (AATAT), African Student Union (ASU), Black Men's Alliance (BMA), Destination Higher Education (DHE), Rainbow Theatre, Rosa Parks African American Theme House (R.PAATH), Delta Sigma Theta Sorority (DST), Black And Queer Questioning (BLAQQ), Black Campus Ministries (BCM), and UMOJA.

AARCC works collaboratively with various campus units/departments and in the surrounding community to enhance cultural and ethnic diversity initiatives on the UCSC campus. AARCC is located on the third floor of the Bay Tree Building in Quarry Plaza, and is open Monday through Friday from 10 a.m. to 5 p.m. For more information, call (831) 459-3207, email aarcc@ucsc.edu, or visit the AARCC website.

American Indian Resource Center (AIRC)

The American Indian Resource Center (AIRC) works in collaboration with other resource centers, faculty, staff, students, and organizations such as the Student Alliance of North American Indians (SANAI), the University of California American Indian Counselors/Recruiters Association, the Amah Mutsun Tribal Band of California Indians, as well as the indigenous tribal community leaders of the region to develop co-curricular programming, cultural activities, and events that assist public understanding of native peoples. Invested in creating a campus climate that supports all students, the center provides leadership development, internship opportunities, mentoring, and personal and academic advising. The AIRC is located on the third floor of the Bay Tree Building in Quarry Plaza. For more information, call (831) 459-2881, email airc@ucsc.edu, or visit the AIRC website.

Asian American/Pacific Islander Resource Center (AA/PIRC)

The Asian American/Pacific Islander Resource Center (AA/PIRC) co-creates engagement with students who identify as part of the Asian American, Pacific Islander, & Southwest Asian & North African (AA/PI/SWANA) diaspora at UC Santa Cruz; exploring the complexities of their holistic experiences, and individual and collective identities. AA/PIRC's engagement includes leadership and holistic development, along with educational opportunities with, for, and in support of AA/PI/SWANA communities.

AA/PIRC envisions AA/PI/SWANA communities to be affirmed and empowered in their identities. We imagine individual and collective healing, wholeness, and liberation

from oppression, both within and expansive of their existences in relation with UC Santa Cruz.

Chicanx Latinx Resource Center (El Centro)

The Chicanx Latinx Resource Center (El Centro) is a hub of organized activities and resources that support Chicana/o/x and Latina/o/x student transition, retention, and academic advancement at the university. Through collaborative efforts with campus partners, students can participate in a host of activities that encourage intellectual growth, leadership development, preparation for graduate or professional school, and career options. El Centro encourages and supports student and community development through cultural and educational programming.

Annual programs include the following: Bienvenida—New Student Welcome Program; Día de los Muertos; Pachanga; Nuestras Raíces; dialogue on academic, social, cultural, and personal issues that affect Chicanx and Latinx communities; and a weekly online newsletter; CHISME E-News. El Centro offers student internships that support leadership-skills development, while students help to organize events and activities for the community. For more information or to schedule an appointment, call (831) 459-5806 or email elcentro@ucsc.edu, or visit El Centro.

Lionel Cantú Queer Resource Center

The Cantú Queer Resource Center at UC Santa Cruz provides an open, inclusive, intersectional, and welcoming space, promotes education about all genders and sexualities, and empowers self and communal explorations of sexual and gender diversities. We serve as a resource to LGBTQIA students and the wider campus community by providing opportunities for leadership, personal development, advocacy, community, and academic exploration grounded in queer and trans experiences. Through our programs and services we seek to eliminate heterosexism, bi-phobia, trans-phobia, queer-phobia, and and other forms of gender-identity oppression while also lifting up queer and trans resilience on and off campus. We strive to develop an atmosphere of acceptance, celebration, and well-being from which the campus community can fulfill the academic mission of the university.

Besides the Cantú Queer Center, there are two queer spaces on campus tucked within McHenry Library: the GLBTI Reading Room on the 4th Floor, and the Gloria Anzaldua Reading Room on the 3rd Floor. Both spaces have beautiful displays that will make you feel at home. You can drop by and use these rooms if they are available or reserve them for individual or group use.

The Cantú Queer Resource Center website provides an overview and contact information.

Womxn's Center

The Womxn's Center is devoted to helping students maximize their academic and personal success at UC Santa Cruz. The

center is a student-run resource center that creates and sponsors student-oriented programs, workshops, writing collectives, film screenings, and discussions throughout the academic year. Topics addressed include womxn's leadership and empowerment, gender and sexuality, race and culture, health and wellness, reproductive rights, advocacy to end sexual violence, and much more. Center staff are available as a resource for on- or off-campus referrals and informal advising.

All students are encouraged to get involved in the center's annual events, which include Sister Solidarity: Womxn's Heritage Month, Take Back The Night, and more. Other opportunities for involvement include volunteering and work-study paid internships. The center is the ideal space to study, take a break from classes, check out a book from the lending library, and connect with the womxn's community.

The Womxn's Center is located at the Cardiff House, an historic farmhouse near the Carriage House in the lower campus. Center hours are Monday through Friday, 9:00 a.m. to 5:00 p.m. For more information, please contact (831) 459-2072, email women@ucsc.edu, or visit the Women's Center website.

The Student Union

The Student Union is a student-governed facility where students can study, take a break and lounge, meet friends, play pool, use computers, or watch television. Located in the Quarry Plaza across from the Bay Tree Bookstore, the Student Union complements college facilities by providing a centrally located place for social, recreational, and educational gatherings for all students and members of the campus community.

The Student Union is also home to the campuswide student governing body (Student Union Assembly) and to student organizations, the Bike Co-op, Engaging Education, and Student Organization Advising and Resources (SOAR).

The Union is open Monday through Thursday 9 a.m. to 9 p.m., Friday 9 a.m. to 6 p.m. The Union is closed holidays and quarter breaks. For more information, call (831) 459-3167.

Student Activities

Campuswide Student Activities: SOMeCA

SOMeCA brings together three dynamic areas of campuswide student engagement: Student Organization Advising and Resources (SOAR), Student Media, and Cultural Arts and Diversity. The organizations and programs of SOMeCA offer students a place of self-discovery. SOMeCA's professional and experienced staff offers mentorship, leadership training, organizational development advising, and project management to all students. Visit the SOMeCA website for more information.

Student Organization Advising and

Resources (SOAR)

UCSC offers the student body over 180 student-initiated organizations including academic, cultural, environmental, political, professional, religious, service, and Greek-letter organizations. Students who are actively involved in a student organization gain valuable and transformative leadership skills ranging from conflict mediation to project planning.

Student organizations create a number of events from general body meetings to well-established major scale programming. For example, student leaders host high school students to encourage and support their entrance into college. Others produce major campuswide events to raise funds for cancer research and local community nonprofits. Performing arts organizations perform at conferences and competitions across the country. Student leaders gain real-world experience grounded in the knowledge, values, and skills necessary for navigating the global workplace and engage in dynamic civic participation.

Student organization membership is open to all UCSC students. Learn more at the Student Organization Advising and Resources (SOAR) office. Contact SOAR at (831) 459-2934, email soar@ucsc.edu, or visit the SOAR website. SOAR is located on the second floor of the Student Union. (During COVID-19 restrictions, please visit our website to check for accessibility.)

Student Media

Student Media at UC Santa Cruz include print publications and broadcast organizations. Every year, hundreds of students enrich their educational experience through internships, academic credit, fellowships, and employment opportunities with media organizations.

The award-winning student newspaper of record, *City on a Hill Press*, covers campus and local news, sports, music, and offers art reviews and commentary. *Fish Rap Live!* provides an alternative forum for free expression of ideas, humorous coverage of local and campus events, and personal journalism. TWANAS, the Communities of Color and Native American Students Press Collective, publishes a news magazine that broadens awareness of perspectives of color in the campus community. Other campus magazines include the critical film journal, *EyeCandy*; *Leviathan Jewish Journal*; *Scientific Slug*, which blends coverage of research on campus with science-focused art and poetry; *Fruitcake*, which looks at life through the lens of graphics and cartoons; the philosophy journal, *Kalopsia*; and *Gaia*, which focuses on environmental issues. Annual literary journals include *Chinquapin*, *Red Wheelbarrow*, *ALAY*, and *Matchbox*.

Artistic, narrative, experimental, documentary, news, and public-service film and video are produced by broadcast organizations, including the Film Production Coalition, On the Spot, Slugworks Animation, Banana Slug Network, and others. Students from all disciplines are encouraged to participate.

To contact student media organizations, call the Student Media Center at (831) 459-2840 or SCTV at (831) 459-5360.

Visit the Student Media website for links to print, radio, and broadcast organizations.

Cultural Arts and Diversity (CAD)

Cultural Arts and Diversity (CAD) strives to enhance the cultural climate of UCSC and its surrounding community by celebrating diversity. CAD fosters the spirit of unity between cultures by providing students with outlets for the creative talents of various cultures through theater, lectures, presentations, and productions. By promoting access to resources and services that support these endeavors, CAD strives to provide cultural awareness and diversity, build collaborative partnerships and community outreach, enhance retention and recruitment efforts, and provide opportunities for leadership and educational development. The Cultural Arts and Diversity Center promotes the following programs:

- African American Theater Arts Troupe
- Rainbow Theater
- Rainbow/African American Theater Arts Troupe Outreach
- Classes offered through Theater Arts and Stevenson College

Contact the CAD Office at (831) 459-1861 or visit the CAD website.

UC Santa Cruz and Systemwide Student Governance

UC Santa Cruz offers a wide variety of opportunities to participate in university governance at the college, campus, systemwide, and national levels. Regardless of what level you choose, participating in student government provides a wonderful opportunity to practice leadership skills, meet others who share your interests, and learn a great deal about yourself and the university.

Student Union Assembly

The Student Union Assembly (SUA) is the undergraduate advocacy organization and the official student voice of UC Santa Cruz. It comprises three representatives from each college government; six elected officers (president, vice president of External Affairs, vice president of Internal Affairs, vice president of Academic Affairs, vice president of Diversity and Inclusion, and vice president of Student Life and Student Advocate); and one appointed representative from each of the following student organizations that represent historically underrepresented people within the UC system: African/Black Student Alliance; Asian Pacific Islander Student Alliance; Queer Student Union; Movimiento Estudiantil Chicano/a de Aztlán; Student Alliance of North American Indians; and Ethnic Student Organization Council. The SUA also provides paid part-time internship opportunities for students. These internships include, but are not limited to, field organizers, treasurers, outreach and publicity, and strategy and planning.

The SUA conducts open meetings every Tuesday at 8 p.m. throughout the academic year. Students interested in advocacy, activism, and politics, as well as those concerned with their own and their friends' lives, are invited to get involved. The assembly operates via issue-specific campaigns and around general campus concerns. In the past, the SUA has formed campaigns around fighting fee hikes, defending affirmative action, saving financial aid on a national and state level, striving for reasonable campus growth, and reforming UC Regents' procedures. Current issues include fighting to make a UC education affordable, fighting to stop balancing budgets on the backs of students, fighting for the rights of UC workers, and working with community groups because UCSC students are also Santa Cruz residents. The SUA also works with the UC Student Association and the United States Student Association on systemwide, statewide, and national issues. For more information, visit the SUA website.

Systemwide Student Government: UCSA

The UC Student Association (UCSA) is the statewide association of graduate and undergraduate student governments from the 10 UC campuses. UCSA is the officially recognized voice of the students to the UC Board of Regents, various UC administrative offices, and the UC Office of the President. Issues covered by UCSA include UC fees and financial aid, comprehensive admissions policies, and academic policies, as well as broader issues of social responsibility such as environmental concerns and civil rights.

The SUA office provides grassroots membership and support for the two main UCSA offices in Oakland and Sacramento. The campus office organizes students to run the grassroots campaigns that are adopted each summer during the UCSA Congress. At this session, delegates from the 10 UC campuses come together and choose the critical issues to be worked on for the next year. Issues in the past have included voter registration drives, letter-writing campaigns on particular UC issues, and increases in financial aid. UCSA provides a thorough introduction to UC politics and student representation. Students may also serve on systemwide committees through UCSA and gain a wide knowledge of the entire UC system through their service.

Two officers help to coordinate UCSA activities on our campus. The Student Union Assembly vice president of external affairs (VPE) is the official representative to the UCSA Board of Directors. This position has voting rights for UCSC, is the primary contact regarding all UCSA issues, and coordinates all lobbying of UCSA and local, state, and federal governments on behalf of UCSC students. The organizing director (OD) coordinates with the VPE to effectively run the grassroots campaigns that are sponsored by UCSA each year. These positions are elected for one-year terms during spring quarter every year.

The Student Union Assembly's VPE may be contacted at suavpe@ucsc.edu.

College Student Governments

Each college has its own student government, encouraging students to participate in program development and implementation, as well as determining where college membership fees should be allocated. Student governments give students a voice at the college and with the campuswide student government. Like the colleges themselves, each college governing body has its own character, structure, and meeting times and dates. For information, contact the programs coordinator at your college.

The Graduate Student Association (GSA)

The Graduate Student Association (GSA) advocates for graduate student interests with regard to tuition and fees, health insurance, transportation, housing, graduate student well-being, support for marginalized grad students, and other important issues. The GSA ensures graduate student representation on campus committees and works with the campus and UC administration to implement GSA Council goals. The GSA also works with state- and UC-wide bodies to represent the UCSC graduate community beyond our campus. The GSA awards research and travel grants to graduate students in order to provide funding for professional development, cover the cost of supplies, subscriptions, and books needed for research, and to assist with funding travel for conferences, research, and workshops. The GSA also organizes and co-sponsors events for graduate students, including international grads and grads from historically marginalized communities.

The GSA is funded by student fees and operated by an Executive Board. Representatives from departments that offer graduate degrees make up the GSA Council. The Council meets three times per quarter to strategize around and discuss issues that impact graduate students. For more information, contact the GSA website or email gsainfo@ucsc.edu.

Student Representation on Campuswide Committees

Serving on a campus advisory committee is a recognized channel for student involvement in the university's decision-making processes. Advisory committees composed of faculty, staff, and student representatives are established to develop and recommend policies on a wide range of topics. Each year the Student Committee on Committees (composed of one student appointed by each college and chaired by the Vice President of Internal Affairs of the Student Union Assembly) nominates more than 100 students to serve on over 50 administrative and Academic Senate committees. For information about the selection process, see the Student Union Assembly website or email gsainfo@ucsc.edu.

Community Service Opportunities

Community service is a vital part of the university's mission. It is possible for individual students, as well as campuswide student organizations, to develop service projects that link the university with the broader Santa Cruz community. With the financial support of the campus' Community Service Project

funding, students have aided local groups such as Students Toward Achievement in Writing Success, the Strange Queer Youth Conference, and the Walnut Avenue Women's Center.

The Student Volunteer Center, located in the Dean of Students Office at Hahn Student Services, connects students with local volunteer opportunities based on skills and interest. Volunteer opportunities range from aiding youth and elderly to addressing homelessness and environmental issues. The Student Volunteer Center also sponsors events for the campus community where students can volunteer their time.

For more information about service opportunities, see the Student Volunteer Center website, call (831) 459-3363, or email volunteer@ucsc.edu.

Campus Cultural Programs

Throughout the year, UCSC offers frequent and varied cultural opportunities. Students, faculty, and staff may participate as audience members, performers, or behind-the-scenes support crew. The considerable range of offerings includes art exhibits, lectures, films, concerts, recitals, and dance and drama presentations. Programs vary from single performances to weeklong cultural celebrations. The colleges host a number of events, and the departments frequently engage speakers of particular academic interest to address the campus community or present lecture-demonstrations.

The Arts Division serves as a gateway to the entire university, presenting high-quality research and work by faculty, students, and guest artists. Art exhibitions, film screenings, digital arts presentations, music recitals, as well as theater, dance, and music presentations, are offered in conjunction with the academic programs. The Arts Division also offers regular public lectures and colloquia to introduce audiences to professional practitioners and scholars in the traditional and digital arts.

In addition to attending Arts Division activities, UCSC students are invited to participate in a wide variety of division activities that are open to all UCSC students. Join an Indonesian gamelan ensemble, sing in the UCSC Concert Choir, play in the UCSC Orchestra, or audition for a theater or dance production.

For up-to-date information about cultural offerings from the Arts Division, contact the Arts Division Events Office at (831) 459-2787 and visit online at arts.ucsc.edu and on Facebook.

Bay Tree Bookstore

UCSC's Bay Tree Bookstore is located in the Quarry Plaza complex in the center of campus, at the intersection of Hagar Drive and Steinhart Way. The bookstore serves as the campus resource for UCSC course materials, including new and used course books and customized faculty publications; general reading and reference books; a wide variety of school and personal supplies (including computers and computer supplies); and many other items such as residence hall living needs, small appliances, backpacks, UCSC emblematic apparel, art supplies, posters, gifts, greeting cards, testing

supplies, and academic regalia. Services include online reservations for course materials, textbook rentals, student debit accounts, special ordering of books, book buyback services, fax services, passport processing, and limited check cashing. The bookstore also houses the campus's convenience store (the Express Store), Student ID Card Services, and a self-service postal kiosk. For more information, call (831) 459-4544, or see the Bay Tree Bookstore website.

Child Care and Early Education Services

Child Care and Early Education Services offers programs for children of students currently enrolled in classes at UCSC. Our center is located on campus near the West Entrance in Family Student Housing. Free or low-cost tuition rates are available for students who meet the eligibility requirements for subsidized care (please see the Eligibility for State Funding Chart at child care). All meals are included in the program (breakfast, lunch, and afternoon snack).

Our programs are dedicated to providing the highest quality developmental care possible in a secure, homelike environment characterized by warmth, affection, and support. Our curriculum stresses the importance of meeting children's needs in all areas of development: social, emotional, physical, cognitive and creative. Our program emphasizes nature-based outdoor learning incorporating the beautiful UCSC campus environment, garden activities, outdoor curriculum, all supporting a S.T.E.M. curriculum.

Programs are open to all children without regard to religion, color, ethnicity, gender, and physical or mental ability. All of our centers are located in the Family Student Housing Complex. Each center is open most days during the academic year from September through June, and some programs are open through the summer. The center is closed during administrative and university holidays, and staff development days. All of the child care spaces are provided for children of student families only. The majority of the spaces are reserved for students who meet the qualifications for subsidized care. Fee-for-service spaces at a below market rate may be available for student families whose income exceeds state-subsidy requirements.

Information about programs, fees, and applications is available at child care and at the Early Education Services Office in the Community Building at Family Student Housing; at (831) 459-2967, or by email at earlyeducation@ucsc.edu.

Infant Center

The Infant Center will reopen fall 2022. It serves children ages 11 to 24 months with small group in a nurturing environment with developmentally appropriate curriculum to engage early learning. The hours of operation are 7:30 a.m. - 5:30 p.m. during the academic year and 8:30 a.m. - 5:00 p.m. during summer months.

Toddler Center

The Toddler Center serves children ages 18 to 36 months. Small groups, low child-to-adult ratios, outdoor curriculum

and primary caregivers ensure consistent and nurturing care. Hours of operation are 7:30 a.m.-5:30 p.m. during the academic year, and 8:30 a.m.-5:00 p.m. during summer months.

Preschool Center

The Preschool Center serves children from three years of age until they enter Transitional Kindergarten. The classroom provides small groups with low child-to-adult ratios, and an environment that supports a stimulating and rich curriculum that helps prepare children for kindergarten. The hours of operation are 7:30 a.m. to 5:30 p.m. during summer months.

School Age Center

The School Age Program provides an after-school recreation program for children during the academic year. The program provides developmentally appropriate arts and crafts, life skills and sports activities, occasional community outings and quiet time for homework. The hours of operation are 12:30 p.m. to 5:30 p.m. for Kindergarteners; and 2:30 p.m. to 5:30 p.m. on Mondays, Tuesdays, Thursdays, and Fridays for 2nd through 4th graders. On Wednesdays (public school minimum days), care is available from 12:30 p.m. to 5:30 p.m. for all school-age children. Extended care is available on a sign-up basis on some Santa Cruz City Schools closure days (University closure days excluded).

UC Santa Cruz Alumni

From the moment you step on campus you become part of the UC Santa Cruz community. From student to alumni, you are a Banana slug for life!

The UC Santa Cruz Alumni community is a dynamic, innovative, successful, philanthropic, and world-changing network of individuals spread around the world. With the graduating class of 2021, the UCSC alumni network grew to 140,000 Banana Slugs. When you graduate and join our dynamic, change-making alumni network, it will be even stronger.

There are more than 2 million University of California alumni making amazing impacts around the globe as leaders and contributors in their communities. UCSC alumni are advocates, volunteers, supporters, friends, and ambassadors for their alma mater, supporting current students like you.

Get to know your UCSC alumni community. They are here to support you on your journey. They've been where you are and know how to help. Visit the alumni.ucsc.edu website and learn more now while you are a student. The sooner you make these lifelong connections, the more opportunities will open up for you.

When you graduate from UC Santa Cruz, you will have abundant opportunities to stay involved in the UCSC community through career and social networking, mentoring students, enjoying events, and sharing out of your success by volunteering and giving. Alumni stay connected through online alumni networks, regional groups, social media, and signature events like Alumni Week, reunions, and more.

UC Santa Cruz alumni are on a mission to support UC Santa Cruz, build robust connections between students and alumni, connect alumni where their passions are, and strengthen the alumni network throughout the UC Santa Cruz community. The alumni network supports students and alumni through the many pivotal moments in life.

UC Santa Cruz Alumni promotes excellence through scholarships and awards each year, including the Alumni Association Scholarship, College Service Award, Graduate Student Awards, and Leadership Service Awards. Alumni enrich the campus's intellectual life. UC Santa Cruz publications are filled with alumni success stories. You can read about many of our notable alumni at Alumni Profiles. We look forward to seeing your face among these profiles.

Get to know your alumni community and how we are here for you at the UC Santa Cruz Alumni website.

University Interfaith Council

Find your spiritual home at UC Santa Cruz. The University Interfaith Council (UIC) is comprised of 24 groups including Christian, Jewish, Muslim, etc. A full list of the council's member groups is below and online at www.ucscUIC.org, which can help get you connected with the group of your choice.

Member groups are: Sangha Shantivanam, Asian American Christian Fellowship, Chabad, Christian Challenge, Ekklesia, FEAST, IVCF Grad Christian Fellowship, High St. Comm, Hillel, International Students Inc., Newman Catholic, Muslim SA, Latter Day Saints, InterVarsity Christian Fellowship, Klesis, Kyrle, Lutheran, Muslims Student Assoc., Sikh, Soon Movement, Vintage Faith.

GRADUATE INFORMATION

In this section:

Graduate Admission (p. 1339)

Graduate Expenses (p. 1339)

Graduate Academic Program (p. 1341)

Campus Life (p. 1342)

UC Santa Cruz offers graduate study in more than 40 academic fields. Graduate programs encourage close working relationships between students and faculty to promote rapid learning and professional growth. Many graduate programs have interdisciplinary components, and students are encouraged to explore connections between fields as they acquire mastery in their areas of specialization.

There are extensive opportunities for graduate students to engage in significant independent study and research (see Resources for Learning and Research). Graduate students are also encouraged to obtain teaching experience, primarily as supervised teaching assistants. They are highly valued members of the UCSC community, contributing substantially to the research and teaching conducted on the campus.

GRADUATE ADMISSION

APPLICATION FOR GRADUATE STUDIES

Applications for admission to UC Santa Cruz graduate programs are available online. Applications for the upcoming academic year are available starting October 1 of the prior year.

Instructions and requirements for admission to UC Santa Cruz are posted on the Graduate Admissions website. Please read all instructions thoroughly.

Deadlines vary by program and are posted online.

Please contact the program you are applying to with questions about the application. If there are any problems with the online application, please email gradadm@ucsc.edu; technical questions or issues can go to gradapphelp@ucsc.edu.

GRADUATE EXPENSES

Fees and Expenses

Tuition, fees, and other charges are subject to change without notice by the Regents of the University of California. For current fee information, check registration fees and graduate student budgets. Some or all instruction for all or part of the Academic Year may be delivered remotely. Tuition and fees have been set regardless of the method of instruction and will not be refunded in the event instruction occurs remotely for

any part of the Academic Year. Figures for tuition and fees represent currently approved or proposed amounts and may not be final. Actual tuition and fees are subject to change by the University of California as determined to be necessary or appropriate. Final approved tuition and fee levels may differ from the amounts presented.

For information on fee refunds, see Finances.

Students should not plan to undertake graduate study without assured funding, since outside employment in the Santa Cruz community can be difficult to obtain.

Financial aid recipients should note that fellowship, grant, and loan checks or bank deposits in excess of university charges are refunded to students via direct deposit or check, but are not available to you until the first week of instruction each quarter.

The Student Services Fee supports student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well-being of students, social and cultural activities and programs, services related to campus life, and educational and career support.

Tuition helps support student financial aid and related programs; administration; libraries; operation and maintenance; the university's operating budget; and all costs related to instruction, including faculty salaries.

Campus-Based Fees help support a wide range of student services, including extracurricular programs, campus child care, community and public service projects, and free-fare use of the local transit systems.

In addition, all students are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides primary care services for the plan, while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is on the UCSC Student Health Insurance website, or contact (831) 459-2389.

Waivers from the mandatory insurance fee are available for students who can show that their outside plan provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver can be found on the Health Center website and in the Graduate Student Handbook.

NONRESIDENT TUITION

A resident of a state other than California or of another country must also pay nonresident tuition. See general criteria for residency elsewhere in this catalog.

Non-U.S. citizens note: Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

LATE FEES

Late fees may be assessed if a student fails to make university payments or enroll by the specified deadlines. Deadlines are published online in the Graduate Student Handbook and the Schedule of Classes, and they appear on the Statement of Account.

DEFERRED PAYMENT PLAN

See the information under undergraduate expenses.

Graduate Student Budget

Graduate Student Fees 2021-22

	One Quarter	F-W-S Quarters
Student Services Fee (formerly University Registration Fee)	\$376.00	\$1,128.00
Tuition (formerly Educational Fee)	\$3,814.00	\$11,442.00
Campus-Based Fees	\$441.70	\$1,325.10
GSHIP Health Insurance (waivable)	\$1,670.00	\$5,010.00
Total for California Residents	\$6,301.70	\$18,905.10
Nonresident Supplemental Tuition (a)	\$5,034.00	\$15,102.00
Total for Nonresidents of California	\$11,335.70	\$34,007.10

(a) A limited number of Nonresident Tuition Fellowships are available. Please refer to the Financial Support section.

The tuition and fees posted here are estimates based on currently approved amounts. These figures may not be final. Actual tuition, fees, and charges are subject to change by the Regents of the University of California and could be affected by increases or reductions in State funding, or other developments. Accordingly, final approved levels (and thus a student's final balance due) may differ from the amounts shown. For information on fee refunds, see Fees and Expenses.

Minimum annual expenses, including registration fees, for a single graduate student living on campus are estimated to be \$45,098.00 per academic year. Students should not plan to undertake graduate study without assured funding, since outside employment in the Santa Cruz community can be difficult to obtain. An estimated sample student budget for the 2021-22 academic year is provided below. Non-California

residents should add \$15,102 in nonresident tuition and fees to the total.

Graduate Student Budget, 2021-22

Fees	\$18,905.10
Books and supplies	\$645.00
Room and board (on or off campus) (a)	\$21,495.00
Transportation (b)	\$1,773.00
Personal	\$2,280.00
Total	\$45,098.10

a) Estimated room and board for graduate students living with family is \$5,835.

b) Expenses of owning a car and parking on campus are not included here. For parking fees, see Transportation and Parking Services.

c) Some graduate programs are also assessed a professional fee.

Financial Support

The University of California, Santa Cruz, makes a strong effort to provide financial support to all graduate students who make normal progress in their program of studies. Certain kinds of support are awarded on the basis of academic merit, and others are granted on the basis of need. Students are encouraged to apply for both kinds of assistance by submitting the Free Application for Federal Student Aid (FAFSA). This form must be submitted after October 1 prior to the academic year for which you are requesting aid. The FAFSA may be filled out online and filed electronically at the FAFSA website. Applications for student loans for each academic year will be accepted until April of that academic year. More detailed information about the application process and loans can be found at Financial Aid. Students may also visit the Financial Aid and Scholarships Office, 205 Hahn Student Services Building, or call (831) 459-2963.

Beginning in fall 2020, UC Santa Cruz will be offering new and continuing doctoral and MFA students support packages of 5 years (2 for MFA) with a minimum level of support equivalent to a 50% teaching assistantship. In total, this program will bring support for eligible doctoral and MFA students—stipend, fees, tuition, GSHIP, etc.—up to approximately \$43,000 annually.

FELLOWSHIPS, ASSISTANTSHIPS, GRANTS

Students who received **Cal Grant A or B** as undergraduates within the last 15 months may request a one-year extension from the California Student Aid Commission to attend a teacher credential program. Renewal of these awards requires the student to submit the FAFSA by March 2nd. In addition,

the student must submit a Request for Teaching Program Benefits Form (Form G-44) to the California Student Aid Commission.

The federal **Teacher Education Assistance for College and Higher Education (TEACH) Grant Program** provides grants to students who intend to teach in a high-need field in a public/private elementary or secondary school that serves students from low-income families. The program at UCSC is for M.A. Education students. In exchange for receiving this grant, you must sign an Agreement to Serve and complete online counseling. This grant converts to a loan with retroactive interest if the Service Agreement is not fulfilled. More information and a fact sheet can be found at the Federal Student Aid TEACH Grants website.

Teaching Assistantships are offered by academic departments. Departments may decide to assign assistantships to students outside of the department. Opportunities are shared among departments and students should inquire with their graduate department adviser about applying for assistantships. Salary information is posted online by the Academic Personnel Office.

Graduate Student Researcher Internships are assigned by faculty and sponsoring campus agencies. Students should inquire with faculty about GSR opportunities. Salary scales (steps) vary by department/division. Salary information is posted online by the Academic Personnel Office.

STUDENT LOANS

Graduate students can qualify for federal student loans by completing the FAFSA. Graduate students are eligible for Unsubsidized and Graduate PLUS loan programs. For additional information, see the UCSC Financial Aid and Scholarships website.

LOAN FORGIVENESS PROGRAMS

The federal government will forgive all or part of a student loan under certain circumstances. This can include performing volunteer work or military service, or practicing medicine in certain communities. For a summary of such exemptions, visit the Federal Student Aid website.

GRADUATE ACADEMIC PROGRAM

Degrees and Programs

UC Santa Cruz offers graduate programs leading toward the following degrees: master's of arts, master's of sciences, master's of fine arts, doctor of musical arts, and doctor of philosophy. See our full list of programs and read about each program's application requirements.

Administration

At UC Santa Cruz, individual graduate programs are directed by the academic departments. Overall policy is determined by the Graduate Council, and coordination and record keeping for matters common to all graduate students—such as admission applications, fellowships, and advancement to candidacy—are the responsibility of the Division of Graduate Studies. The dean of graduate studies is the chief administrative officer. Graduate policies and other information can be found online in the Graduate Student Handbook.

Catalog Rights

Students matriculating in a given graduate program will select the UCSC General Catalog they will follow to meet their requirements; either the catalog published the year they enter the program, or any subsequent catalog published prior to the year they are awarded the degree sought. Students who seek readmission after a break in attendance of more than two years (six regular quarters) must adhere to the graduation requirements in effect at the time of readmission or to those subsequently established for all portions of the degree requirements not already fulfilled. The readmitting program will determine which degree requirements remain to be fulfilled. A student must follow the chosen catalog in its entirety, including both the individual degree program and general university requirements. General university requirements may be found in the Graduate Student Handbook.

Evaluation of Performance

All graduate students in graduate or undergraduate courses will be graded Satisfactory (S), Unsatisfactory (U), or Incomplete (I). Graduate students also have the option of receiving a letter grade of A, B, C, D, or F in most courses. The grades of A or B shall be awarded for satisfactory work. Grades of C or D will not satisfy any course requirement for a graduate degree at UCSC. A graduate program has the option of requiring letter grades or S/U grades for any graduate course offered by that program.

Under the grading options, you will receive Satisfactory/Unsatisfactory unless you elect the letter grade option (A, B, C, D, F). The choice is yours at the time of enrollment and can be changed up to the end of the third week of instruction for the quarter.

Graduate students are not eligible to file Credit by Examination, Credit by Petition or to receive a "no record" notation. All notations including those of C, D, F, or Unsatisfactory will be listed on the permanent record.

Graduate student performance may also be evaluated according to the Narrative Evaluation System. Evaluations

may be used by academic advisers and become part of the student's official academic record. Read the FAQs for Students: Evaluations for an explanation of the narrative process.

Please also refer to the statement on Academic Integrity; Appendix F, Graduate Student–Faculty Adviser Relationship Guidelines; and Appendix O, Official University Policy on Academic Integrity for Graduate Students, published in the Student Policies and Regulations Handbook.

Duplication of Higher Degrees

It is the policy of UC Santa Cruz campus to prohibit the pursuit of duplicate advanced degrees. However, applicants may petition the graduate dean for an exception to this policy if the degree sought is in a field of study distinctly different from the field in which the original advanced degree was attained.

In order for a student who already holds the doctorate to be admitted or readmitted to work toward a second Ph.D.—or toward an academic master's degree—each of the following conditions must be met:

- The applicant must petition the graduate dean in writing prior to the application deadline for the program in question.
- The department sponsoring the program to which admission is sought must support the applicant's petition.
- The department must present the graduate dean with a clear and complete outline of the program required for the degree sought, and must explain the intellectual separateness of the proposed program from that completed by the applicant in attaining the earlier degree.
- The graduate dean will review all materials submitted and decide whether or not to admit the applicant, consulting with the Graduate Council when appropriate.

Admission to a professional master's program after a Ph.D., or to an academic master's program after a professional doctorate, is not subject to these restrictions.

Transfer of Credit

UC Santa Cruz does not automatically grant credit for graduate-level work undertaken at other universities. Each department determines credit transferability on an individual basis.

CAMPUS LIFE

Diversity-Enhancement Programs

The Eugene Cota-Robles Fellowship and the Dissertation-Year Fellowship are part of the University of California's Academic Career Development Program.

The Eugene Cota-Robles Fellowship is a merit-based diversity-enhancement program that provides financial support for students from diverse backgrounds to pursue and successfully complete a graduate degree. This fellowship is awarded to entering doctoral students who have overcome significant obstacles to achieve a baccalaureate-level degree, and whose economic, educational, or social background contributes to intellectual diversity of the graduate student population. Departments identify applicants from among their pool of admissions applications. Applicants should refer to the information under Financial Support in the application to gain a better understanding of this fellowship. Fellowship recipients must be U.S. citizens or permanent residents.

The Dissertation-Year Fellowship is available to continuing students who are advanced to candidacy. Enrolled students are assisted through formal and informal group orientations, individual advice about academic matters, financial aid, postdoctoral opportunities, and the provision of information about career planning, health care, and housing.

Departments nominate applicants for this fellowship from among their qualified students. For information, see the Division of Graduate Studies website.

Student Life

The campus offers a variety of programs to enhance the quality of student life, all of which are available to graduate students. These include child care, sports and recreation, health services, cultural events, transportation services, and the UCSC Women's Center. See undergraduate Student Life for information on these services and a description of the local community. See Disability Resource Center for services available to students with disabilities.

Graduate Student Association

The Graduate Student Association (GSA) is an organization of all graduate students at UCSC.

The GSA advocates for graduate student interests with regard to tuition and fees, health insurance, transportation, housing, graduate student well-being, support for marginalized grad students, and other important issues. The GSA ensures graduate student representation on campus committees and works with the campus and UC administration to implement GSA goals. The GSA also works with statewide and UC-wide bodies to represent the UCSC graduate community beyond our campus.

The GSA awards research and travel grants to graduate students and also organizes and co-sponsors events for graduate students, including international graduate students and grads from historically marginalized communities.

The GSA is funded by student fees and operated by an executive board. Graduate students elect representatives from departments which offer graduate degrees to participate on the GSA Council. The council meets three times per quarter to strategize around and discuss issues that impact graduate students. For more information, contact the GSA website or email gsainfo@ucsc.edu.

Graduate Student Commons

Located in the Quarry Plaza, the Graduate Student Commons (GSC) serves the needs and interests of graduate students at UCSC. The GSC is open 24 hours a day and is accessible by student ID card.

The Graduate Student Commons offers a wide range of professional development workshops, health and wellness, and social activities each quarter to support graduate students at UCSC. Visit the Graduate Student Commons website to learn about upcoming programming.

Housing

As at all UC campuses, finding housing may be a challenge. Students who wish to reside on campus should submit their application as soon as possible. Likewise, students who wish to live off campus should start looking at available rentals as soon as possible.

On-campus Graduate Student Housing is available for 82 graduate students. Visit the Grad Housing website, or email gradhsg@ucsc.edu.

Students with families may apply to live in Family Student Housing, a complex of two-bedroom unfurnished apartments. Refer to the Family Student Housing website, or email fsh@ucsc.edu.

To assist students in locating living accommodations in the surrounding communities, the Community Rentals Office maintains a list of available rentals.

Global Engagement

The Division of Global Engagement facilitates the exchange of people, ideas, and knowledge to support and promote the internationalization of the teaching, learning, and research at UC Santa Cruz. Within Global Engagement are the units of Global Learning, International Student and Scholar Services (ISSS), Global Programming, and Global Initiatives. For further information, contact Global Engagement: 103 Classroom Unit Building, (831) 459-2858, email: global@ucsc.edu.

International Student Scholar Services

International Student and Scholar Services (ISSS) provides immigration advising and advocacy as well as cultural and academic programming for UCSC's growing global community. ISSS assists students, scholars, researchers, and faculty members in maintaining their legal status while in the United States, serving as UCSC's official liaison to U.S. government agencies related to immigration matters. For information, see the ISSS website.

Fulbright Grants for Graduate Study and Research Abroad

The Global Engagement Office facilitates the Fulbright annual awards competition for the Graduate Study and Research Abroad Program for currently enrolled UCSC students. For more information, see the Global Engagement Office website.

Study Abroad

UCSC Study Abroad offers undergraduate and graduate students the opportunity to study through the University of California Education Abroad Program (UCEAP) as part of their regular UCSC academic program, with more than 400 programs in more than 40 countries. UCEAP serves students at all UC campuses. Study Abroad also assists students participating in study-abroad opportunities through UCSC directly, through other UC campuses, and through privately sponsored organizations. Study Abroad seeks to bring these programs within reach of all students.

University Library

The UC Santa Cruz University Library supports the research and learning needs of the campus community from two locations: McHenry Library at the center of campus, and the Science and Engineering Library on “Science Hill.” The Library is a second home for many students, providing space for individual quiet study as well as reservable group study spaces. Each library’s Information Commons offers computer workstations, scanners, and printers as well as circulating laptop and Chromebook computers. McHenry Library hosts the Global Village Café, a perfect place to recharge during marathon study sessions.

The University Library provides access to a wide variety of scholarly resources. Access to eBooks, eJournals, and streaming media is available on campus and off, the latter via the campus’s Virtual Private Network. While the majority of the Library’s print materials are housed in open stacks and accessible to all faculty, students, and staff, the campus community also has access to millions of other books and journals through shared licensing and the Interlibrary Loan service.

The Reserves service lends copies of assigned class readings and media on a short-term basis so that all students can access the course materials they need to succeed.

Special Collections acquires and manages rare book and primary source collections that are accessible to students,

faculty, and the general public. Holdings include a significant book collection including an unusually large number of artists’ books, fine press, and early printing, as well as over 500 archival collections, with particular strengths in 20th century photography, literature, art, music, and astronomy.

The David Kirk Digital Scholarship Commons (DSC) at McHenry Library provides access to new work spaces and high-end computer software. The DSC invites all members of the UCSC community to build digital and web-based projects, collaborate on research, and experiment with innovative tools and methods.

Other important collections and services include:

- The Digital Collections website contains a growing treasury of digitized photographs, maps, artwork, oral history transcripts, and sound recordings, as well as “born digital” materials, focusing on the most rare and unique collections.
- The Video Game Lab at the Science and Engineering Library provides access to more than 2,000 games and 30 gaming consoles as well as books to support game design and studies.
- The Ask-A-Librarian service provides expert in-person and online research assistance.

For more information, see the University Library website.

Natural Reserve System (NRS)

The University of California administers 39 natural reserves throughout the state. UC Santa Cruz has responsibility for four—the Landels-Hill Big Creek Reserve, Fort Ord Natural Reserve, Año Nuevo Island, and Younger Lagoon Natural Reserve—in addition to UCSC’s own Campus Natural Reserve. The purpose of the NRS is to establish and maintain, for teaching and research, a system of natural areas that encompass diverse and undisturbed examples of California’s terrain, both aquatic and terrestrial. The reserves are open to all qualified individuals and institutions for scholarly work concerned with the natural environment. Such work usually deals with ecological topics or experimental studies in a natural setting.

At UCSC, the reserves play an important role in supporting experiential learning (course support, internships, and research support) for undergraduate students interested in the ecological, physical, and environmental sciences. The close proximity of two of the reserves (Campus Reserve and Younger Lagoon) makes it possible for faculty and students to walk out the classroom door and into a living laboratory and outdoor classroom. These two reserves serve over 3,500 students, dozens of courses across multiple disciplines, and 150 undergraduate internships each year.

Information about the reserves is available at the UC Santa Cruz Natural Reserves website. Information about the UC system’s NRS holdings and management is available at the University of California Natural Reserve System website. You may also contact the UCSC Natural Reserve director, c/o Environmental Studies Department, 467 Natural Sciences 2

Building, at (831) 459-4867, or by email at ghdayton@ucsc.edu.

Computing Facilities and Technology Services

INFORMATION TECHNOLOGY SERVICES (ITS)

Information Technology Services (ITS) at UCSC provides a broad spectrum of IT-related resources, services, and support to students, faculty, and staff in the areas of computing, network, telephones, media services, information systems security, web, email, and instructional technology.

ITS operates the campus network, which interconnects computers, workstations, instructional computing labs, and computer-equipped classrooms with each other and the Internet. In addition, wireless access is available across campus. ITS also provides the campus with technical services and computer support through the ITS Support Center.

PURCHASING A COMPUTER?

If you are planning on buying a new computer, UCSC recommends purchasing a laptop with both wired and wireless network capability. The campus supports both PC and Mac computers. An excellent source for purchasing computers and computer products is the campus Bay Tree Bookstore, (831) 459-2082. Through university-negotiated contracts, pricing is almost always below outside market prices.

UCSC ACCOUNT (CRUZID) AND EMAIL

All students, faculty, and staff have a UCSC account called CruzID and a UCSC email account powered by Google. Your CruzID is part of your email address, e.g., cruzid@ucsc.edu. All official UC and UCSC communication is emailed to the @ucsc.edu address. In addition to email, CruzID gives individuals access to many campus systems and applications. More information is available at UCSC Email Services.

RESIDENTIAL NETWORK

ITS provides in-room Internet access (called ResNet) to students living on campus. Network services are available to undergraduate and graduate students living in university housing (except for the Camper Park). For assistance with network connections, contact ResNet at resnet@ucsc.edu or call (831) 459-HELP (4357).

COMPUTING LABS FOR DROP-IN USE AND ACADEMIC CLASSES

ITS manages 12 computer labs throughout the campus. These labs have more than 300 computers available for students to use that include PC, Mac, and Sun workstations. Wireless access is available in all labs. More extensive lab information,

including hardware and software specifications and hours of operation, is available at the Computer Labs page.

ACADEMIC COURSE MATERIALS ON THE WEB

Canvas is the campus online course-management system used to create sophisticated web-based course materials to supplement, but not replace, classroom instruction. Canvas uses a web browser as the interface for the course.

Faculty using Canvas can incorporate a wide variety of tools in their course site, such as a course calendar, student conferencing system, electronic mail, group projects with student-created web pages, and quizzes. Outside of class time, students can use Canvas to view course materials, participate in web-based class discussions, collaborate on student group projects, and take quizzes.

DISABILITY ACCOMMODATIONS FOR INSTRUCTION

UCSC computing labs have common adaptive technologies—such as enlarged type for students with low vision and Dvorak keyboards for students with repetitive strain injuries. If you have a disability and require adaptive or assistive technology to use lab computers, library facilities, or other campus services, please contact the Disability Resource Center (DRC) so that they can coordinate services for you. You can also reach the DRC at (831) 459-2089 (voice), or (831) 459-4806 (TTY).

ITS SUPPORT CENTER FOR TECHNICAL AND COMPUTER HELP

The ITS Support Center is open to all students, staff, and faculty and provides general computer help, assistance with CruzID accounts and email, and other technical-support needs. The Support Center is located at 54 Kerr Hall and is open Monday through Friday from 8 a.m. to 5 p.m.

COMPUTING POLICIES

Individuals using UCSC computing services must comply with the University of California, state, and federal policies and laws. These policies define how ITS will approach security, how faculty, staff, and students are to approach security, and how certain situations will be handled.

Baskin Engineering

Baskin Engineering is known for rigorous engineering research with a focus on engineering for social good. From data science, to life and health and cyber-physical systems,

Baskin Engineering is shaped around the opportunities and challenges of the 21st century. Much of our research takes place in collaborative interdisciplinary centers and institutes, outfitted with modern equipment and instrumentation, and providing opportunities for graduate and undergraduate students to work side by side with world-class engineering faculty.

Facilities and resources include class 100 clean rooms, nanofabrication equipment, modern microscopy facilities, ultrafast optics and single particle spectroscopy labs, an immersive virtual reality CAVE lab, modern gaming equipment, and one of the most advanced stem cell research facilities in the western United States.

Humanities Division

RESEARCH PROGRAMS

The Humanities Institute at UC Santa Cruz is a hub for academic research, cross-discipline collaboration, and public engagement. We incubate ideas and foster innovation by funding projects, centers, and research clusters that enable faculty and students to work on some of the biggest problems of our day.

The Institute is a source, resource, and force for humanities-based inquiry and engagement with world events. We're passionate about expanding the field of humanities scholarship with digital tools and an interdisciplinary focus. And we believe strongly that the core subjects of the humanities—philosophy, history, language and literature—should be accessible to everyone. That's why we're committed to engaging with the broadest community possible—from first-generation undergraduate students, to local residents, to anyone interested in compelling ideas and making sense of this increasingly complex world.

As part of the University of California system, the Institute is able to leverage the resources of the finest public university system in the world. Part of what makes the UC system of universities great—and what makes us different from so many universities around the globe—is the central role of the humanities in our educational experience, not only in the curriculum, but also in the vibrant intellectual life of our campuses. Here at UC Santa Cruz, we possess an especially rich tradition of innovation, creativity, and collaboration in the humanities.

Centers include:

Center for Cultural Studies

Center for Jewish Studies

Center for Public Philosophy

Center for the Study of Pacific War Memories

Center for World History

Dickens Project

Digital Humanities Initiative

Gail Project

Language of Conservation Project

Linguistics Research Center

Morton Marcus Poetry Reading

Nido de Lenguas

Shakespeare Workshop

Sikh and Punjabi Studies

Undergraduate students in the humanities actively participate in the work and the activities of the centers and projects above. In addition, The Humanities Institute gives out 10 research fellowships annually to undergraduate students working on humanities projects. The students' work is showcased at the annual divisional award ceremony in the spring quarter.

CALIFORNIA RESIDENCE AND NONRESIDENT SUPPLEMENTAL TUITION

RESIDENCY INFORMATION FOR TUITION PURPOSES

The Residence Policy and Guidelines is the main source of residency information and is utilized by the campus residence deputy to make determinations regarding residency. Read the full text of the Residency Policy and Guidelines.

If you do not meet the University of California requirements for residence for tuition purposes on the residence determination date for each term in which you propose to attend the university, you must pay a Nonresident Supplemental Tuition in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter.

STATEMENT OF LEGAL RESIDENCE

New undergraduate and graduate students and returning students with an absence of two or more terms must submit a Statement of Legal Residence (SLR). This form is used to determine the fees that will be assessed. Students who do not submit the SLR will be classified as a Nonresident and will be assessed the Nonresident Supplemental Tuition.

PETITIONING FOR CHANGE OF CLASSIFICATION

Continuing students must submit a Petition for Change of Legal Residence Status to the residency deputy by the filing deadline. Late petitions will not be accepted.

TIME LIMITATION ON PROVIDING DOCUMENTATION

If additional documentation is required for residence classification but is not readily accessible, you will have until

the third week of instruction of the applicable term to provide it. Failure to meet this deadline will result in your file being closed and your status remaining as a nonresident.

INCORRECT CLASSIFICATION

If you are incorrectly classified as a resident, your classification will be corrected and you will be required to pay all nonresident tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

INQUIRIES AND APPEALS

Inquiries

All inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, reg-residency@ucsc.edu, or to the Residence Analyst, University of California Office of the General Counsel, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200, or email residency.appeal@ucop.edu.

Appeals

Students denied resident status may file an appeal to the Office of the General Counsel. Appeals must be filed within 30 days of notification of the campus residence deputy's decision.

Instructions and Application to Appeal a Nonresident Classification

RESIDENCY DISCLAIMER

This is only a summary of the UC Residence Regulations and is not a complete explanation of the policy regarding residence classification. Changes may be made to the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the residence specialist within 30 days of notification of the residence deputy's final decision.

No other University of California personnel are authorized to provide information regarding residence requirements.

PRIVACY NOTICE

All of the information requested on the Statement of Legal Residence form is required [established by Regents Policy 3105 as set forth in the UC Residence Policy and Guidelines] for determining whether or not you are a legal resident for tuition purposes. You have the right to inspect university

records containing the residence information requested on this form. The records are maintained by the Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077.

POLICIES

In this section:

UC Santa Cruz Police Department

UC Santa Cruz Police Department officers are duly sworn peace officers under section 830.2(b) of the California Penal Code. The officers are armed and possess the same authority and responsibility, by law, as those in municipal police departments. Officers patrol the campus 24 hours a day, 365 days a year, on foot, bicycle, motorcycle, or by car. They enforce the law, arrest violators, investigate and suppress crime, investigate traffic and bicycle accidents, and provide a full range of services to the community. For more information about the UC Santa Cruz Police Department, please visit police.ucsc.edu.

Reporting Procedures

It is important that all crimes, emergencies, and/or suspicious, disturbing, or threatening behaviors occurring on campus be immediately reported to the Police Department to ensure that appropriate action can be taken. Emergencies requiring police, fire, or medical aid can be reported in person or by dialing 911 from any campus phone, cell phone, or landline phone. Emergencies can also be reported by using one of the "Blue Light" emergency phones or elevator phones located throughout the campus. If there is a fire and no telephone is available, activate one of the fire alarm manual pull stations located throughout campus buildings.

Individuals may also report in person at the UC Santa Cruz Police Department located at the base of the campus near the main entrance. Activities or incidents occurring outside of the UC Santa Cruz jurisdiction should be reported immediately to the agency having jurisdiction for the location where the incident occurred. If an individual is uncertain which agency should take the report, UC Santa Cruz Police can help determine which one is appropriate and refer the individual to that agency.

Phone Numbers To Call

- **9-1-1 for any emergency situation with serious threat to life or property.**
- **(831) 459-2345.** If unable to call 9-1-1 from the phone being used for any **emergency** situation with serious threat to life or property.
- **(831) 459-4980:** Telecommunications Device for the Deaf, 24 hours.
- **(831) 459-2231:** Ext 1. Non-emergency calls for assistance.

- **(831) 459-2100:** Community Safety Program Dispatch Line, 7 p.m. to 3 a.m. nightly.
- **(831) 459-3TIP or (831) 459-3847:** Anonymous Tip Line.

Lost and Found

The UC Santa Cruz Police Department provides a lost and found service. Only items valued at approximately \$300 or more are accepted, and are kept for 90 days. Exceptions are made for found wallets, cash, driver licenses or identification cards, bank cards, and keys. To drop off a found item or to inquire about a lost item, please visit the Police Department or call (831) 459-2231.

Community Safety Program

Community Safety Officers (CSOs) are employees of the Residential Life Program within the Housing Division and work in conjunction with the UC Santa Cruz Police, Santa Cruz City Fire, and the administration of university residential communities (both on- and off-campus) to ensure a safe and secure living environment for all residents.

CSOs work in teams and are trained to assist police and fire departments with emergency response, first aid, CPR, and disaster response, across campus and in all residential communities. They carry radios linked to the UC Santa Cruz Police Dispatch Center and are visible in the communities at night from 7 p.m. to 3 a.m. CSOs may be contacted through the UC Santa Cruz Police Dispatch Center at (831) 459-2100.

Jeanne Clery Disclosure of Campus Security and Campus Crime Statistics Act

Choosing a postsecondary institution is a major decision for students and their families. Along with academic, financial and geographic considerations, the issue of campus safety is a vital concern. In 1990, Congress enacted the Crime Awareness and Campus Security Act of 1990, which amended the Higher Education Act of 1965 (HEA). This act required all postsecondary institutions participating in HEA's Title IV student financial assistance programs to disclose campus crime statistics and security information. The act was amended in 1992, 1998, and 2000. The 1998 amendments renamed the law the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act in memory of a student who was slain in her dorm room in 1986. It is generally referred to as the Clery Act. More information about the Clery Act can be found at: Clery Center.

Campus Security Authorities

Although UC Santa Cruz has a police department, victims of crime may be more inclined to report to someone other than the police. For this reason the Clery Act requires all institutions to collect crime reports from a variety of individuals and organizations that the Clery Act refers to as Campus Security Authorities (CSA). A CSA is an official of the university who has significant responsibility for student and campus activities. They are usually found in departments

responsible for, but not limited to, student and campus activities, the police department, community safety programs, student conduct/judicial affairs, housing, athletics, or human resources. This designation also includes any other individual who has been specified by UC Santa Cruz to receive reports of offenses.

CSAs are responsible for immediately reporting crimes and incidents that occur on the UC Santa Cruz campus or affiliated property to the UC Santa Cruz Police Department. More information about CSA responsibility is located at UCSC's Jeanne Clery Campus Security Act webpage.

Annual Campus Security and Fire Safety Report

On October 1 of each year, an email notification is sent to all enrolled students and to academic and staff personnel, providing the website to access the **Campus Security and Fire Safety Report**. This report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by UC Santa Cruz; and on public property within, or immediately adjacent to and accessible from, the campus.

The report also includes information on fire protection systems, fire prevention policies, as well as institutional policies concerning other safety and security matters. You can obtain a copy of this report by contacting the UC Santa Cruz Police Department, 1156 High Street, Santa Cruz, CA 95064, (831) 459-2231, or at the Police Department website.

The UC Santa Cruz Police Department submits the annual crime and fire statistics published in this report to the Department of Education. The statistical information gathered by the Department of Education is available to the public through the Department of Education website.

Consequences for Non-Compliance with the Clery Act

Possible consequences for an institution's non-compliance with the Clery Act include:

- A suspension or limiting of the institutions Title IV funding;
- The Department of Education may issue a civil fine up to \$35,000 per violation;
- The institution may suffer reputational loss due to negative media attention;
- Failure to comply with the Clery Act can be used in various litigation matters.

Increased Safety Measures and Safeguards

Pursuant to California Education Code section 67380, each UC campus is required to provide information regarding special safeguards that have been established for particular facilities or activities in the preceding 18 months to increase

safety, and any changes in safety precautions expected to be made during the future 24 months.

The following programs or safeguards have been or will be instituted:

- Increased safety education and training, including Community Response to Workplace Violence and Active Shooter Incidents;
- Environmental Health and Safety safeguards and improvements;
- Increased VHF radio and WiFi coverage on the campus;
- Implementation of new tools for navigating the campus.

Night Safety Escort Service Suspended Indefinitely

Please note that the Night Safety Escort Service managed by the UC Santa Cruz Police Department to provide students with a safe and reliable means of transportation on campus has been suspended indefinitely. The department encourages community members to continue using existing transportation services, including the Metro bus and campus shuttles. For safety, it also encourages individuals to walk in groups.

Tools for Navigating the UC Santa Cruz Campus

The Wayfinding Workgroup seeks to improve the tools available for navigating the campus. Over the past 18 months, it has worked on improving temporary signage, recommended improvements to the campus entrance, and developed a pilot project in the Science Hill area. Over the next two years, the group's tasks include writing a campus policy on signage and developing outreach to inform campus constituents about the best ways to direct people to specific locations.

The campus is also in the process of developing a Master Pedestrian Plan to promote walking as the most sustainable way to traverse the campus. The final plan will include an assessment of existing conditions, including gaps in the pedestrian infrastructure, and a plan to create a more pedestrian-friendly campus.

In a parallel effort, Transportation and Parking Services (TAPS) is revising the information posted at each transit stop, including an overall map of the campus, and an enlarged map of the half-mile radius surrounding each stop. TAPS has also launched a bus tracking system app (developed in conjunction with the campus Computer Science Department) that allows riders to see each active campus shuttle in real time on a campus map.

Drug-Free Schools and Communities Act

In compliance with the federal Drug-Free Schools and Communities Act, UC Santa Cruz annually notifies students,

faculty, and staff of policies, procedures, and potential consequences related to unlawful possession, use, or distribution of drugs and alcohol on campus. This notice is distributed to students through the colleges and the Graduate Studies Division, and to faculty and staff via email. The university also conducts a biannual review of programs related to drugs and alcohol to determine effectiveness, implement changes, and ensure that disciplinary sanctions are consistently enforced. This review is coordinated by the Dean of Students Office. For information, email deanofstudents@ucsc.edu.

Smoking on Campus Policy

The University of California is smoke and tobacco-free at all campus locations. The use of marijuana is prohibited under federal regulations. Use of all forms of tobacco, including smokeless tobacco products and unregulated nicotine products (e.g. "e-cigarettes"), is strictly prohibited within the boundaries of university-controlled properties, including parking lots. Assistance to students, faculty, and staff to overcome addiction to tobacco, nicotine, or marijuana products is also available through the UC health and benefits plans, Faculty/Staff Wellness Programs, Student Health Center, Faculty Staff Assistance Programs (FSAP), and Counseling Center. For more detailed information about the policy, help quitting, and other resources, see the UCSC Smoke and Tobacco-Free website.

Graduate Student–Faculty Adviser Relationship Guidelines

The University of California, Santa Cruz, expects professional, fair, and frequent communication between graduate students and their advisers. Open communication and mutual respect should be the foundation of the relationship between a graduate student and faculty adviser. The graduate adviser and the graduate student should discuss their student-adviser relationship early, and clearly communicate mutual and agreeable expectations from the beginning. Regular interactions, especially face-to-face meetings, are essential in ensuring that expectations and goals are met.

In an optimal learning environment, the faculty adviser should provide timely and constructive feedback on performance and expectations; timely and sufficient warning of inadequate performance; appropriate recognition of a student's intellectual contributions; and academic and professional advice on all stages of the graduate career. The graduate student should be an active participant in seeking advice and getting feedback on progress, keeping the faculty adviser informed of plans, progress, and obstacles, and contributing during regular progress assessments. The faculty adviser and the student each have the duty and responsibility to initiate meetings as necessary to foster and protect the success of the relationship.

Professionalism and fairness should guide the graduate student–faculty adviser relationship. Graduate students and faculty should avoid relationships that conflict with their particular roles and responsibilities. Faculty advisers and

graduate students are bound by policies that prohibit discrimination and harassment. Graduate students may be entitled to accommodations under the Americans with Disabilities Act. (See Appendix E: Policies and Regulations and Nondiscrimination and Affirmative Action Policies.) When concerns and conflicts arise, they should be raised and attended to professionally, honestly, and promptly. Retaliation and discrimination against students for raising concerns are prohibited.

If something happens that upsets the faculty adviser–graduate student relationship and cannot be resolved either by direct or indirect discussion, a graduate student can seek assistance from a trusted faculty member, the dean of graduate studies, the graduate director, the department chair, conflict resolution, counseling and psychological services, and/or the Title IX Office. Graduate students may request confidentiality. Many departments have developed processes to address a range of potential concerns. For information about grievance and appeal procedures, see Appendix E: Policies and Regulations and Nondiscrimination and Affirmative Action Policies. For a description of additional informal and formal grievance and appeal processes available to UCSC graduate students, please refer to the Graduate Student Handbook.

Student Conduct and Community Standards

A comprehensive list of student policies and codes of conduct is available online: Student Policies and Regulations Handbook. The Student Policies and Regulations Handbook is also available in alternate formats from the Student Conduct and Community Standards Office.

The Student Conduct and Community Standards Office is responsible for the adjudication of nonacademic student and student organization misconduct for UCSC. In this capacity, Student Conduct and Community Standards administers the Code of Student Conduct in accordance with Section 100.00 of the Student Policies and Regulations Handbook. Allegations of misconduct may be brought by students, faculty, staff, police, visitors to the campus, and members of the community. Incident reports may be made by submitting a report at the Conduct and Community Standards webpage.

The Student Conduct and Community Standards Office is located in 245 Hahn Student Services and can be reached by phone at (831) 459-1738, by fax at 459-3188, or via email at conduct@ucsc.edu. During remote instruction in-person meetings and fax use will be suspended; all services provided remotely by phone by calling (831) 459-4446 or (831) 459-4446, or by email at counduct@ucsc.edu.

Nondiscrimination and Affirmative Action Policies

In this section:

Student-related matters

Employment-related matters

Sexual harassment and sexual violence/Title IX

Student-Related Matters

The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression, pregnancy*, physical, mental health or cognitive disability, medical condition (cancer-related or genetic characteristics), genetic information, ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services. The university also prohibits sexual harassment.

This nondiscrimination policy covers admission, access, and treatment in university programs and activities.

Inquiries regarding the university's student-related nondiscrimination policies may be directed to Conduct and Community Standards, (831) 459-1738, or email conduct@ucsc.edu.

Inquiries regarding the university's affirmative action, equal employment opportunity, and nondiscrimination policies as they relate to student employment may be directed to Sonjé Dayries, JD at the Office for Diversity, Equity, and Inclusion: 831-459-2686 or email or email sdayries@ucsc.edu.

Inquiries regarding the UC Policy on Sexual Violence and Sexual Harassment and UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment and/or any other violations of Title IX (sex/gender discrimination; harassment or discrimination based on sexual orientation, gender identity, gender expression, or pregnancy) may be directed to Title IX Officer Isabel Dees, (831) 459-2462, or email idees@ucsc.edu.

Student inquiries regarding disability or disability accommodations may be addressed to the Disability Resource Center, (831) 459-2089; or email drc@ucsc.edu.

Students with disabilities who are unable to resolve accommodation or discrimination concerns may contact the campus ADA compliance officer by phone, Rosa Garcia, by phone, (831) 459-5087, or email roagarci@ucsc.edu.

*Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

Employment-Related Matters

The University of California is committed to providing a workplace free of discrimination and harassment. The university prohibits discrimination against any person employed; seeking employment; or applying for or engaged in a paid or unpaid internship or training program leading to employment with the University of California. In addition, the university prohibits harassment of an employee, applicant, paid or unpaid intern, volunteer, person participating in a program leading to employment, or person providing services pursuant to a contract. The university undertakes affirmative action, consistent with its obligations as a federal contractor. The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without

regard to race, color, religion, sex, national origin, disability, age or protected veteran status.

The university prohibits discrimination against any person employed; seeking employment; or applying for or engaged in a paid or unpaid internship or training program leading to employment with the University of California on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, gender transition status, pregnancy¹, physical, mental health or cognitive disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services², including protected veterans. This policy applies to all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation.

In addition, the university prohibits harassment based on the above protected characteristics of an employee, applicant, paid or unpaid intern, volunteer, person participating in a program leading to employment, or person providing services pursuant to a contract.

If the harassment is sexual in nature, the university's Sexual Violence and Sexual Harassment (SVSH) policy will apply. Local SVSH resource information can be found at the UC Sexual Violence Prevention and Response website.

University policy prohibits retaliation for bringing a complaint of discrimination or harassment pursuant to this policy against any person employed; seeking employment; providing services pursuant to a contract; or applying for or engaged in a paid or unpaid internship, volunteer capacity, or training program leading to employment with the University of California. This policy also prohibits retaliation against a person who assists someone with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment.

While absolute confidentiality cannot be promised, those hearing and investigating discrimination and harassment complaints apply a strict business need-to-know standard when sharing or disclosing information as needed to conduct an investigation, to work toward a resolution, and as university policy, campus policy, and state or federal law dictate. We ask that all involved parties maintain an appropriate level of confidentiality.

UC Santa Cruz maintains comprehensive complaint processes to address discrimination and harassment concerns to ensure that appropriate confidentiality is maintained; that reporters and responding parties receive timely responses; that investigations are conducted in a timely fashion by impartial, qualified personnel; systems are in place for documenting and tracking progress; and that appropriate remedial actions and resolutions are offered.

University policy is intended to be consistent with the provisions of applicable state and federal laws.

Inquiries regarding the university's affirmative action, equal employment opportunity, and harassment and nondiscrimination policies for academic, staff and student employment may be directed to Sonjé Dayries, JD at the Office for Diversity, Equity, and Inclusion, 831-459-2686 or email sdayries@ucsc.edu.

NOTES:

1. **Pregnancy** includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.
2. **Service in the uniformed services** includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

Sexual Harassment and Sexual Violence Title IX

The University of California cherishes the free and open exchange of ideas and expansion of knowledge. Maintaining this freedom and openness requires objectivity, mutual trust, and confidence; it requires the absence of coercion, intimidation, or exploitation. The principal responsibility for maintaining these conditions must rest upon those members of the university community who exercise the greatest authority and leadership: faculty, managers, and supervisors.

The university has therefore instituted a number of measures designed to protect the campus community from sexual harassment and sexual violence. Students, faculty, and staff who would like information or a consultation about gender-based discrimination, sexual harassment, or sexual violence; would like to understand resources and reporting options; would like to file a formal complaint; would like to request a training session; and/or would like copies of the UC Policy on Sexual Violence and Sexual Harassment and/or the UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment may consult the Title IX Office website or contact Isabel Dees, Title IX Officer, at (831) 459-2462, or via email at idees@ucsc.edu. Individuals seeking additional resources and information regarding rights and reporting options for those impacted by sexual harassment and sexual violence may also consult the CARE website.

TEACHING AND ADMINISTRATIVE STAFF

2022-23 UCSC FACULTY

Faculty titles for 2022-23 were verified as of June 24, 2022, and subsequent changes may not be reflected in the following list. Please note that inclusion in this list is not a guarantee that the faculty member will be teaching throughout the 2022–23 academic year. In addition, some faculty listed here as emeriti may be recalled to teach courses.

The listing for most faculty members includes college membership, year of arrival at UC Santa Cruz, and academic title.

University of California and UC Santa Cruz Administration (p. 1388)

2022-23 UCSC FACULTY

Last Name	First Name	Title	Department
Abadi	Martin	Professor Emeritus	Computer Science and Engineering
Abbaszadeh	Shiva	Associate Professor	Electrical and Computer Engineering
Abraham	W Emmanuel	Professor Emeritus	Philosophy
Abrahamsen	Sara	Assistant Professor	Electrical and Computer Engineering
Abrams	Elizabeth	Teaching Professor (SrLSOE)	Writing Program
Abrams	Zsuzsi	Professor	Languages and Applied Linguistics
Adams	Robert	Professor Emeritus	Economics
Aguilera	Michelle	Assistant Professor	Education

Aguirre	Anthony	Professor	Physics
Aherne	Patrick	Professor Emeritus	Art
Ahuja	Neel	Professor	Critical Race & Ethnic Studies
Ahuja	Neel	Professor	Feminist Studies
Aissen	Judith	Professor Emeritus	Linguistics
Aizenman	Joshua	Professor Emeritus	Economics
Akeson	Mark	Professor Emeritus	Biomolecular Engineering
Akhtar	Nameera	Professor	Psychology
Aladro Font	Jorge	Professor	Literature
Aldhous	Peter	Lecturer Continuing	Science Communication
Alexandradinata	Aris	Assistant Professor	Physics
Alfaro-Córdoba	Marcela	Assistant Teaching Professor (LPSOE)	Statistics
Alinder	Jasmine	Professor	History
Alonzo	Suzanne	Professor	Ecology and Evolutionary Biology
Altice	Nathan	Associate Teaching Professor (LSOE)	Computational Media
Altmannshofer	Wolfgang	Associate Professor	Physics
Alvaro	Peter	Associate Professor	Computer Science and Engineering
Amengual	Mark	Associate Professor	Languages and Applied Linguistics
Amis	George	Professor	Literature

		Emeritus	
Amis	Margaret	Lecturer Continuing	Writing Program
Anand	Pranav	Professor	Linguistics
Anderson	Elliot	Associate Professor	Art
Anderson	Mark	Professor	Anthropology
Anderson	Roger	Professor Emeritus	Chemistry and Biochemistry
Anderson	Scott	Lecturer Continuing	Economics
Andrews	Frank	Professor Emeritus	Chemistry and Biochemistry
Andrews	Lawrence	Professor	Film and Digital Media
Angelo	Hillary	Associate Professor	Sociology
Anthony III	David H	Professor Emeritus	History
Aptheker	Bettina	Professor Emeritus	Feminist Studies
Archer	Cameron	Lecturer Continuing	Film and Digital Media
Archimedes	Sondra	Lecturer Continuing	Writing Program
Arden	Owen	Assistant Professor	Computer Science and Engineering
Ares	Manuel	Professor Emeritus	Molecular, Cell, and Developmental Biology
Argenal	Amy	Assistant Teaching Professor (LPSOE)	Sociology
Arondeka	Anjali	Professor	Feminist

r			Studies
Aronson	Elliot	Professor Emeritus	Psychology
Arredondo	Gabriela	Associate Professor	Latin American and Latino Studies
Arribere	Joshua	Assistant Professor	Molecular, Cell, and Developmental Biology
Arthur	Derede	Lecturer Continuing	Writing Program
Ash	Doris	Professor Emeritus	Education
Aso	Noriko	Associate Professor	History
Asphaug	Erik	Professor Emeritus	Earth & Planetary Sciences
Atanasoski	Neda	Professor	Critical Race & Ethnic Studies
Atanasoski	Neda	Professor	Feminist Studies
Auerbuch Stone	Victoria	Professor	Microbiology and Environmental Toxicology
Ayzner	Alexander	Associate Professor	Chemistry and Biochemistry
Azeb	Sophia	Assistant Professor	Critical Race & Ethnic Studies
Azmitia	Margarita	Professor	Psychology
Aznar	Ignacio	Associate Teaching Professor (LSOE) Emeritus	Languages and Applied Linguistics
Baden	Robert	Lecturer Continuing	Economics

Bailey	Delbert	Lecturer Continuin g	Computer Science and Engineerin g
Baker	Mark	Lecturer Continuin g	Oakes College
Baker	Mark	Lecturer Continuin g	Writing Program
Ball	Tamara	Lecturer Continuin g	Rachel Carson College
Balloffet	Lily	Associate Professor	Latin American and Latino Studies
Banks	Thomas	Professor Emeritus	Physics
Barad	Karen	Professor	Feminist Studies
Barahona	Byron	Lecturer Continuin g	Languages and Applied Linguistics
Bargu	Banu	Professor	History of Consciousn ess
Bartlett	Lora	Associate Professor	Education
Bassi	Karen	Professor Emeritus	Literature
Batalha	Natalie	Professor	Astronomy and Astrophysi cs
Bäuerle	Frank	Teaching Professor (SrLSOE)	Mathemati cs
Baumgart en	Murray	Professor Emeritus	Literature
Beal	Amy	Professor	Music
Beamer	Scott	Assistant Professor	Computer Science and Engineerin g
Beaulieu	Claudie	Associate Professor	Ocean Sciences

Beaumont	Elizabet h	Associate Professor	Politics
Beecher	Jonathan	Professor Emeritus	History
Belanger	David	Professor Emeritus	Physics
Bell	Dorian	Associate Professor	Literature
Beltran	Roxanne	Assistant Professor	Ecology and Evolutiona ry Biology
Benjamin	Ilan	Professor	Chemistry and Biochemist ry
Benner	Chris	Professor	Environme ntal Studies
Benner	Chris	Professor	Sociology
Bennett	Ryan	Associate Professor	Linguistics
Berman	Nathanie l	Lecturer Continuin g	Music
Berman	Phillip	Professor Emeritus	Biomolecul ar Engineerin g
Bernardi	Giacomo	Professor	Ecology and Evolutiona ry Biology
Bernick	David	Associate Teaching Professor (LSOE)	Biomolecul ar Engineerin g
Bertram	Eva	Associate Professor	Politics
Bettie	Julie	Associate Professor	Sociology
Bhalla	Needhi	Professor	Molecular, Cell, and Developme ntal Biology
Bhattacha rya	Nandini	Lecturer Continuin g	Mathemati cs
Biehl	Jody	Associate Teaching	Humanities Division

		Professor (LSOE)	
Biehl	Peter	Professor	Anthropology
Bierman	James	Professor Emeritus	Performance, Play and Design
Binder	Caitlin	Lecturer Continuing	Chemistry and Biochemistry
Birnbaum	Raoul	Professor Emeritus	History of Art and Visual Culture
Bittar	Josefina	Assistant Professor	Languages and Applied Linguistics
Bivens	Hunter	Associate Professor	Literature
Blackburn	Terry	Associate Professor	Earth & Planetary Sciences
Blumenthal	George	Professor Emeritus	Astronomy and Astrophysics
Bodenheimer	Peter	Professor Emeritus	Astronomy and Astrophysics
Boeger	Hanns	Professor	Molecular, Cell, and Developmental Biology
Bogomolni	Roberto	Professor Emeritus	Chemistry and Biochemistry
Bolte	Michael	Professor Emeritus	Astronomy and Astrophysics
Boltje	Robert	Professor	Mathematics
Bonam	Courtney	Assistant Professor	Psychology
Bonett	Douglas	Professor	Psychology
Bordigno	Guido	Associate	Molecular,

n		Teaching Professor (LSOE)	Cell, and Developmental Biology
Borrego	John	Professor Emeritus	Latin American and Latino Studies
Boudewyn	Megan	Assistant Professor	Psychology
Bowin	John	Associate Professor	Philosophy
Bowman	Barry	Professor Emeritus	Molecular, Cell, and Developmental Biology
Boyd	David	Assistant Professor	Molecular, Cell, and Developmental Biology
Brandt	Kirsten	Lecturer Continuing	Performance, Play and Design
Brandt	Scott	Professor	Computer Science and Engineering
Brandwajn	Alexandre	Professor Emeritus	Computer Science and Engineering
Braslau	Rebecca	Professor	Chemistry and Biochemistry
Brasoveanu	Adrian	Professor	Linguistics
Breakspear	Anthony	Lecturer Continuing	Writing Program
Breen	Benjamin	Associate Professor	History
Brenneis	Don	Professor Emeritus	Anthropology
Brenner	Gail	Lecturer Continuing	Writing Program
Bridges	Bud	Professor	Physics

		Emeritus	
Brodie	Jean	Professor Emeritus	Astronomy and Astrophysics
Brodsky	Emily	Professor	Earth & Planetary Sciences
Brooks	Angela	Associate Professor	Biomolecular Engineering
Brose	Margaret	Professor Emeritus	Literature
Brown	George	Professor Emeritus	Physics
Brown	Michael	Professor Emeritus	Politics
Bruland	Kenneth	Professor Emeritus	Ocean Sciences
Brummell	Nic	Professor	Applied Mathematics
Brundage	David	Professor	History
Bueno	Cláudio	Acting Assistant Professor	Art
Bullock	Heather	Professor	Psychology
Bulman	George	Associate Professor	Economics
Bunch	George	Professor	Education
Bundy	Kevin	Assistant Professor	Astronomy and Astrophysics
Burgin	Victor	Professor Emeritus	History of Consciousness
Burke	Edmund	Professor Emeritus	History
Burman-Hall	Linda	Professor Emeritus	Music
Burton-Carvajal	Julianne	Professor Emeritus	Literature
Bury	Jeffrey	Professor	Environmental Studies
Cailloux	Renée	Lecturer Continuum	Languages and

		g	Applied Linguistics
Caldwell	Lissa	Professor	Anthropology
Callanan	Maureen	Professor	Psychology
Calsoyas	Candace	Lecturer Continuum	Rachel Carson College
Camblin	Caren	Lecturer Continuum	Stevenson College
Cameron	Elisabeth	Professor	History of Art and Visual Culture
Cameron	Kenneth	Professor Emeritus	Earth & Planetary Sciences
Campbell	Elliott	Professor	Environmental Studies
Camps	Manel	Professor	Microbiology and Environmental Toxicology
Cardenas	Alvaro	Associate Professor	Computer Science and Engineering
cárdenas	micha	Associate Professor	Performance, Play and Design
Cardilla	Kim	Lecturer Continuum	Psychology
Carlstrom	Catherine	Lecturer Continuum	Cowell College
Carpenter	Susan	Associate Professor	Molecular, Cell, and Developmental Biology
Carr	Mark	Professor	Ecology and Evolutionary Biology
Carson	Ben	Associate Professor	Music
Carstensen	Elin	Assistant	Computational

ottir		Professor	onal Media
Carter	Sue	Professor	Physics
Casanova	Saskias	Assistant Professor	Psychology
Castillo	Pedro	Professor Emeritus	History
Castillo-Trelles	Carolina	Lecturer Continuing	Languages and Applied Linguistics
Cha	Mijin	Assistant Professor	Environmental Studies
Chamorro-Garcia	Raquel	Assistant Professor	Microbiology and Environmental Toxicology
Chan	Pak	Professor Emeritus	Electrical and Computer Engineering
Chan	Shelly	Associate Professor	History
Chatziafratis	Evangelos	Assistant Professor	Computer Science and Engineering
Check Hayden	Erika	Assistant Teaching Professor (LPSOE)	Science Communication
Chemers	Marty	Professor Emeritus	Psychology
Chemers	Michael	Professor	Performance, Play and Design
Chen	Bin	Professor	Molecular, Cell, and Developmental Biology
Chen	Chris	Associate Professor	Literature
Chen	Nancy	Professor	Anthropology
Chen	Shaowei	Professor	Chemistry and Biochemistry

Chen	Yihsu	Professor	Electrical and Computer Engineering
Cheng	Weixin	Professor	Environmental Studies
Cheung	Yin-Wong	Professor Emeritus	Economics
Childers	Geoffrey	Lecturer Continuing	Stevenson College
Childs	John	Professor Emeritus	Sociology
Christy	Alan	Associate Professor	History
Chuang	Patrick	Professor	Earth & Planetary Sciences
Chung	Sandy	Professor Emeritus	Linguistics
Cioc	Mark	Professor Emeritus	History
Clapham	Matthew	Professor	Earth & Planetary Sciences
Clifford	James	Professor Emeritus	History of Consciousness
Coe	Robert	Professor Emeritus	Earth & Planetary Sciences
Colquitt	Bradley	Assistant Professor	Molecular, Cell, and Developmental Biology
Comandur	Seshadri	Professor	Computer Science and Engineering
Connery	Chris	Professor	Literature
Contos	Paul	Lecturer Continuing	Music
Coonerty	Ryan	Lecturer Continuing	Legal Studies
Cooper	Catherin	Professor	Psychology

	e	Emeritus	
Cooperstein	Bruce	Professor	Mathematics
Cooppan	Vilashini	Professor	Literature
Cope	David	Professor Emeritus	Music
Corbett-Detig	Russell	Associate Professor	Biomolecular Engineering
Cortez	Valerie	Assistant Professor	Molecular, Cell, and Developmental Biology
Corzine	Keith	Professor	Electrical and Computer Engineering
Costa	Daniel	Professor	Ecology and Evolutionary Biology
Coulter	Steve	Lecturer Continuum	Writing Program
Coulter	William	Lecturer Continuum	Music
Covarrubias	Rebecca	Associate Professor	Psychology
Cowan	Michael	Professor Emeritus	American Studies
Crews	Phillip	Professor Emeritus	Chemistry and Biochemistry
Crichton	E.G.	Professor Emeritus	Art
Croll	Don	Professor	Ecology and Evolutionary Biology
Crosby	Faye	Professor Emeritus	Psychology
Cruz	Cindy	Professor Emeritus	Education
Curry	Robert	Professor Emeritus	Environmental Studies

Cuthbert	David Lee	Professor	Performance, Play and Design
Daehnke	Jon	Associate Professor	Anthropology
Dahl	Audun	Associate Professor	Psychology
Daifallah	Yasmee n	Assistant Professor	Politics
Daniel	Sharon	Professor	Film and Digital Media
Darke	A.M.	Associate Professor	Performance, Play and Design
Davidenko	Nicolas	Associate Professor	Psychology
Davis	Angela	Professor Emeritus	History of Consciousness
Davis	James	Professor	Computer Science and Engineering
Davis	Muriam	Associate Professor	History
Davis	William	Professor Emeritus	Ecology and Evolutionary Biology
de Alfaro	Luca	Professor	Computer Science and Engineering
De Lauretis	Teresa	Professor Emeritus	History of Consciousness
de Roock	Roberto	Assistant Professor	Education
Dean	Carolyn	Professor	History of Art and Visual Culture
Delaney	Peggy	Professor Emeritus	Ocean Sciences
Delgado	Grace Peña	Associate Professor	History
Demertzis	Ioannis	Assistant	Computer

		Professor	Science and Engineerin g
Demos	T. J.	Professor	History of Art and Visual Culture
Dent	Gina	Associate Professor	Feminist Studies
Derr	Jennifer	Associate Professor	History
Desa	Subhas	Teaching Professor (SrLSOE)	Baskin Engineerin g
Deutsch	Joshua	Professor	Physics
Deutsch	Nathanie l	Professor	History
Devecka	Martin	Associate Professor	Literature
Diaz	May	Professor Emeritus	Anthropolo gy
Díaz	María Elena	Associate Professor	History
Dillon	Lindsey	Assistant Professor	Sociology
Dine	Michael	Professor Emeritus	Physics
Dinishak	Janette	Associate Professor	Philosophy
Dobkin	Carlos	Professor	Economics
Domhoff	G. William	Professor Emeritus	Sociology
Domike	Reuben	Teaching Professor (SrLSOE)	Baskin Engineerin g
Donaldso n	Bryan	Professor	Languages and Applied Linguistics
Dong	Chongyi ng	Professor	Mathemati cs
Dooley	Michael	Professor Emeritus	Economics
Dorfan	David	Professor Emeritus	Physics
Doucet-Battle	James	Associate Professor	Sociology

Drake	Frank	Professor Emeritus	Astronomy and Astrophysi cs
Draper	David	Professor	Statistics
Du Puis	Melanie	Professor Emeritus	Sociology
Duane	Tim	Professor Emeritus	Environme ntal Studies
DuBois	Rebecca	Professor	Biomolecul ar Engineerin g
Dudley	Walter	Professor Emeritus	Music
Dunkin	Robin	Assistant Teaching Professor (LPSOE)	Ecology and Evolutiona ry Biology
Dunn	David	Professor Emeritus	Music
Eaton	Kent	Professor	Politics
Edmunds	Kate	Professor	Performanc e, Play and Design
Edwards	Chris	Professor	Ocean Sciences
Ehrhardt	Torsten	Professor	Mathemati cs
Einarsdott ir	Olof	Professor Emeritus	Chemistry and Biochemist ry
El Dessouky	Dina	Lecturer Continu ing	Writing Program
Elbaum	Bernard	Professor Emeritus	Economics
Elkaim	Gabriel	Professor	Electrical and Computer Engineerin g
Ellis	John	Professor Emeritus	Literature
Ellis	Jon	Associate Professor	Philosophy
Epps	Harland	Professor Emeritus	Astronomy and Astrophysi

			cs
Epstein	Barbara	Professor Emeritus	History of Consciousness
Erb	Joseph	Assistant Professor	Film and Digital Media
Erbig	Jeffrey	Associate Professor	Latin American and Latino Studies
Eroy-Reveles	Alegra	Associate Teaching Professor (LSOE)	Chemistry and Biochemistry
Errington	Shelly	Professor Emeritus	Anthropology
Eshraghian	Jason	Assistant Professor	Electrical and Computer Engineering
Evangelatos	Maria	Professor	History of Art and Visual Culture
Ezerova	Maria	Lecturer Continuing	Music
Faber	Sandra	Professor Emeritus	Astronomy and Astrophysics
Fairbairn	Madeleine	Associate Professor	Environmental Studies
Fairlie	Robert	Professor	Economics
Falcón	Sylvanna	Associate Professor	Latin American and Latino Studies
Farkas	Donka	Professor Emeritus	Linguistics
Farquhar	Dion	Lecturer Continuing	Crown College
Faulkner	John	Professor Emeritus	Astronomy and Astrophysics
Fehren-Schmitz	Lars	Professor	Anthropology

Feldheim	David	Professor	Molecular, Cell, and Developmental Biology
Feldl	Nicole	Associate Professor	Earth & Planetary Sciences
Feldman	Jerry	Professor Emeritus	Molecular, Cell, and Developmental Biology
Ferguson	Joel	Professor Emeritus	Computer Science and Engineering
Fernando	Mayanthi	Associate Professor	Anthropology
Fiechter	Jerome	Associate Professor	Ocean Sciences
Finkelstein	Sheldon (Shel)	Lecturer Continuing	Computer Science and Engineering
Finnegan	Noah	Professor	Earth & Planetary Sciences
Fischer	Arthur	Professor Emeritus	Mathematics
Fisher	Andrew	Professor	Earth & Planetary Sciences
Fitzsimmons	Margaret	Professor Emeritus	Environmental Studies
Flanagan	Cormac	Professor	Computer Science and Engineering
Flanigan	Jeffrey	Assistant Professor	Computer Science and Engineering
Flegal	Russ	Professor Emeritus	Microbiology and Environmental Toxicology

Foley	Mary (Kathy)	Professor Emeritus	Performance, Play and Design
Foley	Ryan	Assistant Professor	Astronomy and Astrophysics
Forbes	Angus	Associate Professor	Computational Media
Foreman	Doyle	Professor Emeritus	Art
Forsberg	Camilla	Professor	Biomolecular Engineering
Fortney	Jonathan	Professor	Astronomy and Astrophysics
Fox	Jonathan	Professor Emeritus	Latin American and Latino Studies
Fox	Laurel	Professor	Ecology and Evolutionary Biology
Fox	Renee	Assistant Professor	Literature
Fox Tree	Jean	Professor	Psychology
Frank	Dana	Professor Emeritus	History
Franko	Mark	Professor Emeritus	Performance, Play and Design
Freccero	Carla	Professor	Literature
Fregoso	Rosa-Linda	Professor Emeritus	Latin American and Latino Studies
Fremont	Daniel	Assistant Professor	Computer Science and Engineering
Friedlaender	Ari	Professor	Ocean Sciences
Friedlander	Benjamin	Professor Emeritus	Electrical and Computer Engineering

			g
Friedman	Daniel	Professor Emeritus	Economics
Fritsch	Gregory	Lecturer Continuing	Performance, Play and Design
Friz	Anna	Associate Professor	Film and Digital Media
Fujita	Sakae	Lecturer Continuing	Languages and Applied Linguistics
Fukshansky	Roman	Lecturer Continuing	Music
Fukurai	Hiroshi	Professor	Sociology
Fung	Kwok-Chiu	Professor	Economics
Gaitet	Pascale	Professor Emeritus	Literature
Gallagher	Patty	Professor	Performance, Play and Design
Galloway	Alison	Professor Emeritus	Anthropology
Galuszka	Frank	Professor Emeritus	Art
Gamel	Mary-Kay	Professor Emeritus	Literature
Garaud	Pascale	Professor	Applied Mathematics
Garcia-Luna-Aceves	JJ	Professor	Computer Science and Engineering
Garrick-Bethell	Ian	Professor	Earth & Planetary Sciences
Gaspari	George	Professor Emeritus	Physics
Gehring	Jackie	Associate Teaching Professor (LSOE)	Politics
Getoor	Lise	Professor	Computer Science and

			Engineering
Gianferrari	Filippo	Assistant Professor	Literature
Gibson	Greta	Professor Emeritus	Education
Gifford-Gonzalez	Diane	Professor Emeritus	Anthropology
Giges	Bob	Lecturer Continuing	Porter College
Gilbert	Gregory	Professor	Environmental Studies
Gill	James	Professor Emeritus	Earth & Planetary Sciences
Gillette	Kristen	Assistant Teaching Professor (LPSOE)	Performance, Play and Design
Gillman	Susan	Professor	Literature
Gilpin	Leilani	Assistant Professor	Computer Science and Engineering
Ginther	Amy Mihyang	Assistant Professor	Performance, Play and Design
Ginzburg	Viktor	Professor	Mathematics
Giuliano	Laura	Professor	Economics
Gjerde	Per	Professor Emeritus	Psychology
Glass	Ron	Professor	Education
Glatzmaier	Gary	Professor Emeritus	Earth & Planetary Sciences
Gliessman	Stephen	Professor Emeritus	Environmental Studies
Goff	Lynda	Professor Emeritus	Ecology and Evolutionary Biology
Goff	Robert	Professor Emeritus	Philosophy
Gomez	Marcella	Associate Professor	Applied Mathematics

Gómez-Rivas	Camilo	Associate Professor	Literature
Gong	Mia	Acting Assistant Professor	Linguistics
Gong	Qi	Professor	Applied Mathematics
Gonzalez	Jennifer	Professor	History of Art and Visual Culture
Gonzalez	Julie	Lecturer Continuing	Economics
González Pagani	Victoria	Teaching Professor (SrLSOE)	Languages and Applied Linguistics
Goodman	David	Professor Emeritus	Environmental Studies
Gordon	David	Associate Professor	Politics
Gordon	June	Professor Emeritus	Education
Gori	Stefania	Associate Professor	Physics
Gould	Debbie	Associate Professor	Sociology
Grabe	Shelly	Professor	Psychology
Gray	Herman	Professor Emeritus	Sociology
Green	Richard	Professor	Biomolecular Engineering
Greenberg	Miriam	Professor	Sociology
Greene	Jody	Professor	Literature
Greider	Carol	Professor	Molecular, Cell, and Developmental Biology
Grieson	Ron	Professor Emeritus	Economics
Griggs	Gary	Professor	Earth & Planetary Sciences

Gruesz	Kirsten	Professor	Literature
Gruhn	Ronnie	Professor Emeritus	Politics
Gu	Claire	Professor Emeritus	Electrical and Computer Engineering
Guevara	Daniel	Professor Emeritus	Philosophy
Guha Thakurta	Raja	Professor	Astronomy and Astrophysics
Gurun	Giulia	Assistant Teaching Professor (LPSOE)	Molecular, Cell, and Developmental Biology
Gustafson	Irene	Associate Professor	Film and Digital Media
Guthaus	Matthew	Professor	Computer Science and Engineering
Guthman	Julie	Professor	Sociology
Gutierrez	Kat	Assistant Professor	History
Gwyn	Melissa	Associate Professor	Art
H. Astua	M.	Lecturer Continuing	Writing Program
Haas	Lisbeth	Professor Emeritus	History
Haber	Howard	Professor Emeritus	Physics
Habicht Mauche	Judith	Professor Emeritus	Anthropology
Haddad	Brent	Professor	Environmental Studies
Hagen	Joy	Lecturer Continuing	Writing Program
Hain	Mathis	Associate Professor	Earth & Planetary Sciences
Halder	Abhishe	Assistant	Applied

	k	Professor	Mathematics
Hale	Galina	Professor	Economics
Halk	Erica	Lecturer Continuing	Writing Program
Hamel	Gildas	Teaching Professor (SrLSOE) Emeritus	History
Hamilton	Charles	Lecturer Continuing	Music
Hamilton	Roxi	Lecturer Continuing	Writing Program
Hammack	Phillip	Professor	Psychology
Hammond	Nicol	Assistant Professor	Music
Hance	Michael	Associate Professor	Physics
Haney	Craig	Professor	Psychology
Hankamer	Jorge	Professor Emeritus	Linguistics
Haraway	Donna	Professor Emeritus	History of Consciousness
Harding	Susan	Professor Emeritus	Anthropology
Harrington	David	Professor Emeritus	Psychology
Harrison	David	Assistant Teaching Professor (LPSOE)	Computer Science and Engineering
Hartzog	Grant	Professor	Molecular, Cell, and Developmental Biology
Hausman	Hannah	Assistant Professor	Psychology
Haussler	David	Professor	Biomolecular Engineering
Hauter	Ashwak	Assistant Professor	Anthropology

Hawthorne	Camilla	Associate Professor	Sociology
Hay	John	Professor Emeritus	History of Art and Visual Culture
Heady	Kristen	Lecturer Continuing	Ecology and Evolutionary Biology
Heald	Abigail	Lecturer Continuing	Literature
Heckman	Alma	Associate Professor	History
Hedrick	Charles	Professor	History
Helmbold	David	Professor Emeritus	Computer Science and Engineering
Helmer	Kimberly	Associate Teaching Professor (LSOE)	Writing Program
Hendricks	Dianne	Associate Teaching Professor (LSOE)	Biomolecular Engineering
Hendricks	Margo	Professor Emeritus	Literature
Hernández Garavito	Carla	Assistant Professor	Anthropology
Hershatte	Gail	Professor Emeritus	History
Hester	Karlton	Professor	Music
Hibbert-Jones	Dee	Professor	Art
Hilberg	Soleste	Assistant Teaching Professor (LPSOE)	Education
Hill	Joyce	Lecturer Continuing	Education
Hinck	Lindsay	Professor	Molecular, Cell, and Developmental Biology

Hinegardner	Ralph	Professor Emeritus	Ecology and Evolutionary Biology
Holl	Karen	Professor	Environmental Studies
Hollander	Eli	Professor Emeritus	Film and Digital Media
Holman	Ted	Professor	Chemistry and Biochemistry
Hong	Christine	Associate Professor	Critical Race & Ethnic Studies
Hong	Christine	Associate Professor	Literature
Honig	Emily	Professor Emeritus	History
Horne	Jennifer	Associate Professor	Film and Digital Media
Houghton	Edward	Professor Emeritus	Music
Hourigan	Jeremy	Professor	Earth & Planetary Sciences
Hoversten	Liv	Assistant Professor	Psychology
Hoy	David	Professor Emeritus	Philosophy
Hu	Chenyue	Assistant Professor	Economics
Hu	Liting	Assistant Professor	Computer Science and Engineering
Hu	Minghui	Associate Professor	History
Hughey	Richard	Professor	Biomolecular Engineering
Hughey	Richard	Professor	Computer Science and Engineering

Huh	Tae Myung	Assistant Professor	Electrical and Computer Engineering
Hull	Akasha	Professor Emeritus	Feminist Studies
Hunicke	Robin	Professor	Performance, Play and Design
Hunnicut	Fred	Professor Emeritus	Art
Hunter	Donna	Professor Emeritus	History of Art and Visual Culture
Hutchison	Michael	Professor Emeritus	Economics
Hwang	Hyesung Grace	Assistant Professor	Psychology
Hyun	Sangwon	Assistant Professor	Statistics
Ife	Fahima	Associate Professor	Critical Race & Ethnic Studies
Illingworth	Garth	Professor Emeritus	Astronomy and Astrophysics
Imara	Nia	Assistant Professor	Astronomy and Astrophysics
Irion	Robert	Teaching Professor (SrLSOE) Emeritus	Science Communication
Irvine	Erin	Lecturer Continuing	Music
Isbister	John	Professor Emeritus	Economics
Isbister	Katherine	Professor	Computational Media
Ito	Junko	Professor Emeritus	Linguistics
Jankiewicz	Kasia	Assistant Professor	Mathematics
Jansen	Virginia	Professor	History of

		Emeritus	Art and Visual Culture
Jeltema	Tesla	Associate Professor	Physics
Jensen-Clem	Rebecca	Assistant Professor	Astronomy and Astrophysics
Jibrin	Rekia Gina	Assistant Professor	Education
Jinnah	Sikina	Professor	Environmental Studies
John	Michael	Associate Teaching Professor (LSOE)	Computational Media
Johns	Janet	Lecturer Continuing	Education
Johnson	Robert	Professor	Physics
Johnston	Caitlin	Lecturer Continuing	Education
Johnstone	Timothy	Assistant Professor	Chemistry and Biochemistry
Jones	Burt	Professor Emeritus	Astronomy and Astrophysics
Jones	David Evan	Professor Emeritus	Music
Jones	Kate	Associate Professor	History
Jones	Kevin	Assistant Teaching Professor (LPSOE)	Economics
Jones	Naya	Assistant Professor	Sociology
Jonsson	Vanessa	Assistant Professor	Applied Mathematics
Jonsson	Vanessa	Assistant Professor	Biomolecular Engineering
Jordan	John	Professor	Literature

		Emeritus	
Josephson	Colleen	Assistant Professor	Electrical and Computer Engineering
Julien	Isaac	Acting Professor	Arts Division
Jullig	Richard	Lecturer Continuing	Computer Science and Engineering
Jurica	Melissa	Professor	Molecular, Cell, and Developmental Biology
Kamakaka	Rohinton	Professor	Molecular, Cell, and Developmental Biology
Kamehiro	Stacy	Associate Professor	History of Art and Visual Culture
Kamieniecki	Sheldon	Professor Emeritus	Environmental Studies
Kang	Juhee	Assistant Teaching Professor (LPSOE)	Sociology
Kang	Sung-Mo "Steve"	Professor Emeritus	Electrical and Computer Engineering
Kapuscinski	Anne	Professor	Environmental Studies
Karlic	Karolina	Associate Professor	Art
Karplus	Kevin	Professor Emeritus	Biomolecular Engineering
Kass	Jesse	Assistant Professor	Mathematics
Katznelson	Yonatan	Lecturer Continuing	Applied Mathematics
Katznelson	Yonatan	Lecturer	Statistics

n		Continuing	
Kawamoto	Alan	Professor	Psychology
Kay	Kathleen	Professor	Ecology and Evolutionary Biology
Kehler	Edward	Lecturer Continuing	History
Kehler	Edward	Lecturer Continuing	Stevenson College
Keilen	Sean	Professor	Literature
Keliiaa	Caitlin	Assistant Professor	Feminist Studies
Kelley	Al	Professor Emeritus	Mathematics
Kellogg	Doug	Professor	Molecular, Cell, and Developmental Biology
Kelly	Jennifer	Associate Professor	Critical Race & Ethnic Studies
Kelly	Jennifer	Associate Professor	Feminist Studies
Kenez	Peter	Professor Emeritus	History
Kerstiens	Geri	Assistant Teaching Professor (LPSOE)	Chemistry and Biochemistry
Kiesling	Bruce	Assistant Professor	Music
Kilpatrick	A. Marm	Professor	Ecology and Evolutionary Biology
Kim	Daniel	Assistant Professor	Biomolecular Engineering
Kim	Euseok	Assistant Professor	Molecular, Cell, and Developmental Biology

Kim	Gueyon	Assistant Professor	Economics
Kim	Hi Kyung	Professor	Music
Kim	L S	Associate Professor	Film and Digital Media
Kimmey	Jacqueline	Assistant Professor	Microbiology and Environmental Toxicology
King	Robin	Lecturer Continuing	Oakes College
King	Robin	Lecturer Continuing	Writing Program
Kinoshita	Sharon	Professor	Literature
Kissell	René	Assistant Professor	Education
Klahn	Norma	Professor Emeritus	Literature
Kletzer	Kenneth	Professor	Economics
Kletzer	Lori	Professor	Economics
Kliger	Dave	Professor Emeritus	Chemistry and Biochemistry
Knisely	Lindsay	Lecturer Continuing	Oakes College
Knisely	Lindsay	Lecturer Continuing	Writing Program
Knittle	Elise	Professor	Earth & Planetary Sciences
Kobayashi	Nobby	Professor	Electrical and Computer Engineering
Koch	Paul	Professor	Earth & Planetary Sciences
Kolaitis	Phokion	Professor Emeritus	Computer Science and Engineering

			g
Kolla	Alexandra	Assistant Professor	Computer Science and Engineering
Konopelski	Joseph	Professor Emeritus	Chemistry and Biochemistry
Koo	David	Professor Emeritus	Astronomy and Astrophysics
Kottas	Athanasios	Professor	Statistics
Kramer	Alejandro	Lecturer Continuing	Anthropology
Kreps	Anne	Associate Professor	History
Kroeker	Kristy	Professor	Ecology and Evolutionary Biology
Kudela	Raphe	Professor	Ocean Sciences
Kuper	Lindsey	Assistant Professor	Computer Science and Engineering
Kurniawan	Sri	Professor	Computational Media
Ladusaw	Bill	Professor Emeritus	Linguistics
Lain	Stephanie	Lecturer Continuing	Languages and Applied Linguistics
Lam	Phoebe	Associate Professor	Ocean Sciences
Lamborg	Carl	Associate Professor	Ocean Sciences
Landesman	Edward	Professor Emeritus	Mathematics
Lane	Ian	Associate Professor	Computer Science and Engineering

Langdale	Allan	Lecturer Continuing	History of Art and Visual Culture
Langhout	Regina	Professor	Psychology
Langridge	Ruth	Lecturer Continuing	Legal Studies
Laporte	Leo	Professor Emeritus	Earth & Planetary Sciences
Larive	Cynthia	Professor	Chemistry and Biochemistry
Lariviere	Ingrid Moody	Lecturer Continuing	Porter College
Lariviere	Ingrid Moody	Lecturer Continuing	Writing Program
Larkin	Bruce	Professor Emeritus	Politics
Larrabee	Tracy	Professor	Computer Science and Engineering
Lau	David	Lecturer Continuing	College Nine
Lau	Kimberly	Professor	Literature
Law	Jess H.K.	Assistant Professor	Linguistics
Lay	Thorne	Professor	Earth & Planetary Sciences
Lazzati	Natalia	Associate Professor	Economics
Leaños	John Jota	Professor	Film and Digital Media
Leaper	Campbell	Professor	Psychology
Leauthaud	Alexie	Associate Professor	Astronomy and Astrophysics
Leboeuf	Burney	Professor	Ecology

		Emeritus	and Evolutionary Biology
LeBrón	Marisol	Associate Professor	Critical Race & Ethnic Studies
LeBrón	Marisol	Associate Professor	Feminist Studies
Lederman	David	Professor	Physics
Lee	Cynthia Ling	Associate Professor	Performance, Play and Design
Lee	David	Assistant Professor	Computational Media
Lee	Dongwook	Professor	Applied Mathematics
Lee	Herbie	Professor	Statistics
Lee	Jeremy	Associate Teaching Professor (LSOE)	Molecular, Cell, and Developmental Biology
Lee	Jimin	Professor	Art
Lee	Juhee	Associate Professor	Statistics
Leicester	Marshall	Professor Emeritus	Literature
Leikin	Anatole	Professor Emeritus	Music
Leiva	Fernando	Professor	Latin American and Latino Studies
Leslie	Juliana	Lecturer Continuing	Kresge College
Letourneau	Deborah	Professor Emeritus	Environmental Studies
Leung	Michael	Associate Professor	Economics
Levine	Bruce	Professor Emeritus	History
Levinson	Robert	Professor Emeritus	Computer Science and Engineering

Levitow	Jon	Lecturer Continuing	Languages and Applied Linguistics
Lewis	Cynthia	Professor	Education
Lewis	Debra	Professor	Mathematics
Li	Jessie	Assistant Professor	Economics
Li	Yat	Professor	Chemistry and Biochemistry
Li	Zehang	Assistant Professor	Statistics
Limbrick	Peter	Professor	Film and Digital Media
Lin	Douglas	Professor Emeritus	Astronomy and Astrophysics
Lin	Longzhi	Associate Professor	Mathematics
Linger	Daniel	Professor Emeritus	Anthropology
Lipschutz	Ronnie	Professor Emeritus	Politics
Litz	Heiner	Assistant Professor	Computer Science and Engineering
Liu	Yang	Assistant Professor	Computer Science and Engineering
Livermon	Xavier	Associate Professor	Critical Race & Ethnic Studies
Locks	Norman	Professor Emeritus	Art
Lodha	Suresh	Professor	Computer Science and Engineering
Loeffler	Toby	Lecturer Continuing	Writing Program

		g	
Loerch	Sarah	Assistant Professor	Chemistry and Biochemistry
Loik	Michael	Professor	Environmental Studies
Lokey	Scott	Professor	Chemistry and Biochemistry
London	Rebecca	Associate Professor	Sociology

Revised: 7/25/22

2022-23 ADMINISTRATION

UNIVERSITY OF CALIFORNIA ADMINISTRATION

The governance of the university is entrusted, under the state constitution, to the Regents of the University of California. The Board of Regents is presently composed of 18 members who are appointed by the governor of California, subject to California State Senate confirmation; seven members who participate because of the offices they hold; and a student member appointed by the board.

The president of the university is the chief executive of the 10-campus system. He or she is appointed by the Regents and is directly responsible to them. Each of the 10 campuses of the university has a chancellor, its chief administrative officer, who is responsible for the organization and operation of the campus, including academic, student, and business affairs.

The Academic Senate, consisting of the faculty and certain administrative officers, determines the conditions for admission and degrees, subject to the approval of the Regents; authorizes and supervises courses and curricula; and advises the university administration on important matters such as appointments and promotions, budgets, student discipline, and administration of the library.

THE REGENTS

Ex Officio Regents

Gavin C. Newsom, Governor of California
 Eleni T. Kounalakis, Lieutenant Governor
 Anthony Rendon, Speaker of the Assembly
 Tony K. Thurmond, Superintendent of Public Instruction
 Michael V. Drake, M.D., President of the University
 Art Torres, President, Alumni Associations of the University of California
 Cheryl Lott, Vice Chair, Alumni Associations of the University of California

Appointed Regents

(Term expires on March 1 of year indicated)

Maria Anguiano (2029)
 Michael Cohen (2030)
 Gareth Elliott (2025)
 Howard "Peter" Guber (2029)
 Jose M. Hernandez (2033)
 Richard Leib (Vice Chair) (2026)
 Hadi Makarechian (2032)
 Eloy Ortiz Oakley (2024)
 Lark Park (2029)
 John A. Pérez (2024)
 Janet Reilly (2028)
 Richard Sherman (2025)
 Jonathan Sures (2032)

Student Regent

Alexis Atsilvsgi Zaragoza (2022-23) UC Berkeley

Officers of the Regents

Gavin C. Newsom, President of the Board
 John A. Perez, Chair of the Board
 Rich Lieb Vice Chair
 Charles F. Robinson, General Counsel and Vice President, Legal Affairs
 Anne Shaw, Secretary and Chief of Staff
 Jagdeep Singh Bachher, Vice President and Chief Investment Officer
 Alexander Bustamante, Senior Vice President and Chief Compliance Officer

UNIVERSITY OFFICERS

President

Michael V. Drake, M.D.

Executive Vice President—Chief Operating Officer

Rachael Nava

Provost and Executive Vice President—Academic Affairs

Michael T. Brown

Executive Vice President—Chief Financial Officer

Nathan Brostrom

Executive Vice President—UC Health

Carrie Byington

Senior Vice President—Ethics, Compliance, and Audit Services

Alexander Bustamonte

Senior Vice President—External Relations and Communications

Brent Colburn

Vice President—General Counsel

Charles F. Robinson

Vice President—Agriculture and Natural Resources

Glenda Humiston

Interim Vice President—Human Resources

Cheryl Lloyd

Vice President—Information Technology Services and Chief Information Officer

Van Williams

Vice President—Institutional Research and Academic Planning

Pamela Brown

Vice President—Investments and Chief Investment Officer

Jagdeep Singh Bachher

Vice President—National Laboratories

Craig Leasure

Vice President—Research and Innovation

Theresa Maldonado

Vice President—Student Affairs

Yvette Gullatt (Interim)

Vice President—Graduate, Undergraduate and Diversity Affairs

Yvette Gullatt

Vice Provost Academic Personnel and Programs

Susan Carlson

Associate Vice President—Federal Government Relations

Christopher Harrington

Associate Vice President—State Government Relations

Kieran Flaherty

CHANCELLORS

UC Berkeley

Carol T. Christ

UC Davis

Gary May

UC Irvine

Howard Gillman

UCLA

Gene D. Block

UC Merced

Juan S. Muñoz

Kim A. Wilcox

UC San Diego

Pradeep Khosla

UC San Francisco

Sam Hawgood

UC Santa Barbara

Henry T. Yang

UC Santa Cruz

Cynthia K. Larive

UC SANTA CRUZ ADMINISTRATION

Chancellor

Cynthia K. Larive

Campus Provost and Executive Vice Chancellor

Lori Kletzer

Associate Chancellor and Chief of Staff

Anna Finn

Chief Campus Counsel

Lorena Peñaloza

Assistant Vice Chancellor of the Office of Diversity, Equity, and Inclusion, and Interim Chief Diversity Officer

Judith Estrada

Associate Vice Chancellor for Equity and Equal Protection

Isabel Dees

Vacant

Vice Chancellor—Research

Byron Walker

Vice Chancellor—University Relations

Mark Delos Reyes Davis

Vice Chancellor, Budget and Planning

Kimberly Register

Vice Chancellor, Information Technology

Byron Walker

Vice Chancellor, Business and Administrative Services

Biju Kamaleswaran

Vice Provost—Academic Affairs

Herbie Lee

Interim Vice Provost and Dean—Graduate Studies

Quentin Williams

Vice Provost and Dean—Undergraduate Education and Global Engagement

Richard Hughey

Associate Vice Chancellor—Strategic Initiatives and Education Partnerships

Jennifer Baszile

University Librarian

M. Elizabeth Cowell

Interim Dean of Arts

Celine Parrenas

Dean of Social Sciences

Katharyne Mitchell

Dean of Engineering

Alexander Wolf

Dean of Physical and Biological Sciences

Paul Koch

Dean of Humanities

Jasmine Alinder

Dean of University Extension

P.K. Agarwal

Associate Vice Chancellor—Enrollment Management

Michelle Whittingham

Associate Vice Chancellor of Physical Planning, Development & Operations

Vacant

Assistant Vice Provost—Academic Personnel

Grace McClintock

Associate Vice Chancellor for Research and Strategic Initiatives

John MacMillen

Assistant Vice Chancellor for Research Administration

Kate Aja

Director, Office of Sponsored Projects

Deirdre Beach

Director, Office of Management of Intellectual Property

Jeff Jackson

Director, Office of Research Compliance

Laverne Estanol

Director, Research Integrity and Export Control

Lisa Coscarelli

Director, Research Business and Operations

Heather Bell

Assistant Vice Chancellor—Constituent and Donor Engagement
Meg Corman

THE UC SANTA CRUZ FOUNDATION

The UC Santa Cruz Foundation is a nonprofit, public benefit corporation formed in 1974 to promote greater understanding of UC Santa Cruz and to encourage and accept gifts in support of academic programs, scholarships, fellowships, and capital improvements.

For more information about the UC Santa Cruz Foundation and for a current list of the Board of Trustees and Officers, visit [UC Santa Cruz Foundation](http://UCSantaCruzFoundation.org).
