Course Substitutions: The School of Engineering Undergraduate Advising office may require that a Petition for Course Substitution be approved before credit for a course completed at another institution can be applied to any School of Engineering major requirement. The Undergraduate Advising staff can help determine if this petition process is necessary based on transcript information provided to them by the student. This petition is in addition to and separate from the transfer credit awarded by the university. Forms are available at the Undergraduate Advising office. Each petition must be accompanied by a course description, syllabus, and verification of the number of credits earned with a grade of C or better. To guarantee equivalency, departments may sometimes require a grade of B or better. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations.

Appeal Process

Appeal of negative decisions concerning School of Engineering admission will be evaluated by the academic program to which the student applied. Appeal letters must be submitted in writing to the Undergraduate Advising office within the time frame given in the letter of denial. Late appeals will not be considered. Letters of appeal should describe any extenuating circumstances that might affect the faculty's evaluation of the record.

Students whose petitions and appeals have been turned down may not reapply for the same major.

Letter Grade Policy

The School of Engineering strongly advises students to request letter grades in all foundation courses for all engineering concentrations. Many majors in the School of Engineering have additional restrictions on the use of the Pass/No Pass option. Foundation courses should not be taken Pass/No Pass because doing so may lower students' School of Engineering GPA and affect their admission into School of Engineering majors. Major grade requirements are as follows:

Bioenegineering major: All courses required for the major must be taken for a letter grade. Two lower-division exceptions are allowed.

Bioinformatics major: Same as campus requirements, but foundation courses should not be taken Pass/No Pass, since doing so may lower the declaration GPA needed for admission to the major.

Computer engineering major: All courses required for the major must be taken for a letter grade. Two lower-division exceptions are allowed.

Computer engineering minor: Same as campus requirements.

Computer science major and minor: All courses required for the major and minor must be taken for letter grades. Two lower-division exceptions are allowed.

Computer game design major and minor: All courses required for the major and minor must be taken for letter grades. Two lower-division exceptions are allowed.

Electrical engineering major: All courses required for the major must be taken for letter grades. Two lower-division exceptions are allowed (not to include Electrical Engineering 70).

Information systems management major: All courses required for the major must be taken for letter grades. Two lower-division exceptions are allowed (not to include Information Systems Management 50 or 58).

Statistics minor: same as campus requirements.

Note: for admission into any School of Engineering major, a grade of Pass is treated as a C, which may adversely affect your admission to the major.

Disqualification Policy

GPA Requirement

Your cumulative School of Engineering GPA is calculated from all School of Engineering and Physical and Biological Sciences courses attempted. Your term School of Engineering GPA is calculated from all School of Engineering and Physical and Biological Sciences courses you have taken in the previous quarter as a UCSC student.

If both your cumulative and term School of Engineering GPAs are 2.0 or greater, you are in good departmental standing. If either your cumulative or term GPAs are less than 2.0, you are on departmental probation. If you are on departmental probation and your cumulative School of Engineering GPA is below 2.0 at the beginning of the next quarter, you are subject to disqualification from the major. If your term School of Engineering GPA falls below 1.5 in any term, you are also subject to disqualification from the major. All students that are subject to disqualification are reviewed by their departmental faculty to determine whether to require the student to choose a different major or to be on departmental probation.

Ethics Requirement

Graduates of the Baskin School of Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available at www.ieee.org/about/whatis/code.html and www.acm.org/serving/se/code.htm. Students of the Baskin School of Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

Students found guilty of a single incident of academic dishonesty may, at the discretion of the department, be disqualified from the major. In addition, students may be subject to other possible university sanctions. A second incident of academic dishonesty will result in automatic disqualification from the major.

Additional Notes on Disqualification

Please note the Repeating Courses policy in the School of Engineering section of this catalog. Two failed attempts in a class will endanger your opportunity to continue in a School of Engineering major.

Bioinformatics, Computer Engineering, and Computer Science have additional disqualification criteria. Please see those sections of this catalog for details.

Repeating Courses

No School of Engineering course may be attempted more than twice without prior approval from the chair of the department offering the course. A class in which a W is given is counted as an attempt.

Courses Taken Elsewhere After Enrollment

It is the intent of the faculty of the Baskin School of Engineering that all degree requirements be completed at UCSC or prior to first enrollment at UCSC. Course substitutions, such as taking a course at another UC campus, in the Education Abroad Program, or at a community college, require approval prior to taking the class. Applications and procedures for pre-approval are obtained from and given to the School of Engineering Undergraduate Advising office. Articulation agreements do not apply to enrolled students. You must get pre-approval before taking a class at a community college.

When a student declares their major, minor, or proposed major in a School of Engineering program, the decision as to whether a course taken elsewhere is accepted for this School of Engineering major or minor is made by the major department at that point. (Note: There is no guarantee that a course will be applicable toward a School of Engineering major, minor, or proposed major even if the student has completed more advanced courses in that department.)

School-Wide Information and Policies

Computing Facilities

The Baskin School of Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec.

All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access the School of Engineering and the Information Technology

Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see http://its.ucsc.edu/.

Prerequisites

Because of the sequential nature of the School of Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly *Schedule of Classes*. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped. For example, to enroll in Computer Science 101, a prerequisite to many upper-division courses, the prerequisite courses that must be completed or in progress are Computer Science 12B (or 13H), Computer Engineering 16, Mathematics 19B, and one of the following: Mathematics 21, 22, 23A, 24, or Applied Mathematics and Statistics 27.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite should promptly consult with the School of Engineering's staff advisers. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See the Course Substitutions section under Admission to School of Engineering Majors.)

Permission Numbers

Students not meeting the regular prerequisite requirements for courses sponsored by the Baskin School of Engineering may petition the course instructor to receive a permission number to enroll. Students requesting a permission number must submit the form found at www.soe.ucsc.edu/advising/undergraduate/pdf/prereq_waiver.pdf to the instructor. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no instructor has been assigned to the course, please contact the Undergraduate Advising office for direction.

Materials Fee

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student will assemble into a project and keep. Please refer to the Baskin Engineering Lab Support web page for specific course material fee amounts: www.soe.ucsc.edu/administration/labs/.

Miscellaneous Fees

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information: www.soe.ucsc.edu/administration/labs/.

Michael S. Isaacson, Acting Dean

Professor Charles E. McDowell, Associate Dean of Undergraduate Affairs

Professor Darrell Long, Associate Dean for Graduate Studies and Research

Baskin School of Engineering

The Baskin School of Engineering has a high-technology focus incorporating programs and curricula that educate students to meet the changing demands of society and a high-technology global marketplace. The school offers a stimulating academic environment that provides a foundation for professional growth as well as a lifetime of learning. The Baskin School's programs and courses prepare students for the human aspects, as well as the technical challenges, of careers in engineering, computer science, and bioinformatics. The Baskin School of Engineering includes the Department of Applied Mathematics and Statistics, the Department of Biomolecular Engineering, Department of Computer Engineering, the Department of Computer Science, and the Department of Electrical Engineering. The Department of Technology and Information Management is awaiting approval.

Graduate Study

The Baskin School of Engineering offers 10 graduate programs designed to prepare students for advanced study and research in major areas of biomolecular, computer, and electrical engineering, as well as computer science and statistics and stochastic modeling:

- Bioinformatics M.S. and Ph.D.
- Computer engineering M.S. and Ph.D.
- Computer science M.S. and Ph.D.
- Electrical engineering M.S. and Ph.D.
- Statistics and stochastic modeling M.S. and Ph.D (graduate study is available; degrees await approval)

These programs are described in subsequent sections. The aim of these programs is to develop professionals who can address the complex scientific and technological problems of today and tomorrow.

Undergraduate Study

The School of Engineering offers 14 15 undergraduate degree programs. Students may choose from the following options:

Bioengineering B.S.

Bioinformatics B.S. or combined B.S./Graduate

Bioinformatics minor

Computer engineering B.S. or combined B.S./M.S.

Computer engineering minor

Computer science B.A. and B.S.

Computer science: computer game design B.S.

Computer science minor

Computer technology minor

Electrical engineering B.S.

<u>Information systems management</u> B.S.

Statistics minor

Also available is a <u>dual degree engineering program</u> that allows a student to obtain a B.A. in the social sciences, humanities, or arts from UCSC and a B.S. degree in engineering from UC Berkeley [excluding EECS] by attending UCSC for three years followed by UC Berkeley for two years.

Bioengineering. The bioengineering program prepares graduates for a rewarding career at the interfaces between engineering, medicine and biology. UCSC Bioengineering graduates will have a thorough grounding in the principles and practices of bioengineering and the scientific and mathematical principles upon which they are built: they will be prepared for further education (both formal and informal) and for productive employment in industry The program includes a broad range of courses in the sciences, engineering, ethics, and other topics, and is co-sponsored by the Departments of Biomolecular Engineering, Computer Engineering, Electrical Engineering, and Molecular, Cell & Developmental Biology.

Bioinformatics. The bioinformatics curriculum combines mathematics, the physical sciences, computer science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing and gene expression chips. The immense growth of biological information stored in

computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of mathematics, science, and engineering. The undergraduate bioinformatics degree program prepares students for graduate school or a career in the fast-paced pharmaceutical or biotechnology industries.

Computer Engineering. The computer engineering curriculum focuses on making digital systems that work. It overlaps with computer science on one end (software systems) and with electrical engineering on the other (digital hardware). The emphasis of our program is on design rather than analysis—on making things work, rather than on explaining the abstract theory of computation or electronics. The program's emphasis on problem solving provides both excellent training for future engineers and a strong foundation for graduate study. The computer engineering program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). The combined B.S./M.S. program provides an opportunity for outstanding undergraduates to begin advanced study and earn both degrees in five years.

Computer Science. The computer science curriculum has options that include topics in hardware and software, giving students a solid grounding in both theoretical and practical aspects of computer technology and computer usage. Students become proficient in many areas, with a good academic foundation for various careers in the software industry, as well as preparation for graduate school.

Computer Science: Computer Game Design. The computer game design curriculum is a four-year interdisciplinary program that focuses on the technical, dramatic, and artistic elements of computer games. The program provides a rigorous education in computer science, in concert with a broad introduction to those aspects of art, music, narrative, digital media, and computer engineering most relevant to games. An intensive year-long game design studio sequence permits students to create substantial video games as part of a multi-student team. Students receive proficiency in many aspects of computer science, a good academic foundation for careers in the computer game industry or information technology industry, or for the pursuit of graduate studies in computer science, or computer game design.

Computer Technology. The computer technology minor is intended for students outside the School of Engineering interested in exploring computer software and hardware. It is particularly recommended for students interested in the use of computer technology in another discipline or in K-12 teaching.

Electrical Engineering. The electrical engineering curriculum provides a balance of engineering science and design and allows students to specialize in both the traditional topics and the latest subjects in electrical engineering. Students may concentrate their electives in the areas of electronics and optics, communications, or signals and systems. The major is designed to attract motivated students who, upon graduation, will be sought by employers in the high-tech industry. The electrical engineering program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Information Systems Management. The information systems management (ISM) curriculum is multidisciplinary and focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology

(IT) solutions will be applied—through economics, business, and management of technology courses. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology.

Statistics. The statistics curriculum is an interdisciplinary program with formal training in the quantification of uncertainty. The minor is designed to give students statistical skills that they can use on applications in their primary major. MS students obtain preparation for careers in technical fields with strong quantitative components. PhD students obtain skills for original state-of-the-art research.

Dual Degree Engineering. The 3/2 program, a five-year program in association with UC Berkeley, enables students to receive two bachelor's degrees: a B.A. in a subject within the social sciences, humanities, or arts at UCSC, and a B.S. in engineering from the College of Engineering at Berkeley (excluding EECS). Many combinations of fields are possible, such as economics, environmental studies or philosophy with civil, mechanical, or industrial engineering.

Undergraduate Advising Office

The Baskin School of Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the Undergraduate Advising office. Students may obtain additional information and assistance on the School of Engineering web site: www.soe.ucsc.edu/advising/undergraduate/.

Admission to School of Engineering Majors

High School Preparation for Engineering Students

It is recommended that high school students intending to apply to a School of Engineering major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare students for these majors.

College Board Advanced Placement Credit

Prospective students are encouraged to take the College Entrance Examination Board (CEEB) Advanced Placement (AP) Examinations in computer science, mathematics, economics, chemistry, or biology, because an acceptable score on these examinations may satisfy both university and major degree requirements. Students must provide verification of exam scores to the School of Engineering Undergraduate Advising office and other course-sponsoring departments to be granted credit toward course prerequisites or degree requirements as follows:

Biology: a score of 3, 4, or 5 on the AP Biology exam can be substituted for Biology 3, *Concepts in Biology*, and exempt student from the biology placement exam. A score of 5, 6, or 7 on the IBH Biology exam can be substituted for Biology 3, *Concepts in Biology*, and exempt student from the biology placement exam.

Chemistry: a score of 4 5 on the AP Chemistry exam fulfills the prerequisite for enrollment in Chemistry 1B/M in lieu of the chemistry placement exam; a score of 5 satisfies Chemistry 1A Chemistry 1B, and Chemistry 1C. Chemistry 1M and Chemistry 1N are

still required but students may petition for credit for a lab waiver by presenting high school laboratory notebook/reports to the Chemistry Department for review.

Computer Science: a score of 4 or 5 on Exam A satisfies Computer Science 12A, *Introduction to Programming*, and the associated lab, Computer Science 12L; a score of 4 or 5 on Exam AB satisfies both Computer Science 12A, *Introduction to Programming*, and Computer Science 12B, *Introduction to Data Structures*, and the associated labs, Computer Science 12L, and Computer Science 12M. A score of 5 on the IBH Computer Science exam satisfies Computer Science 12A, *Introduction to Programming*, and the associated lab, Computer Science 12L; a score of 6 or 7 on the IBH Computer Science exam satisfies Computer Science 12A, *Introduction to Programming*, and Computer Science 12B, *Introduction to Data Structures*, and the associated labs, Computer Science 12L, and Computer Science 12M.

Economics: a score of 4 or 5 on the Microeconomics exam satisfies Economics 1, *Introductory Microeconomics*; a score of 4 or 5 on the Macroeconomics exam satisfies Economics 2, *Introductory Macroeconomics*.

Mathematics: a score of 4 or 5 on the Calculus AB exam satisfies Mathematics 19A, *Calculus for Science, Engineering, and Mathematics*, or Economics 11A, *Mathematical Methods for Economists*; a score of 4 or 5 on the Calculus BC exam satisfies both Mathematics 19A-B.

Students may check with the Office of Admissions for details about other AP examinations that also satisfy university requirements.

Admission as First-Year Students

There are two paths for students that start UCSC as freshmen to be accepted into an engineering major. The first is Direct Acceptance, in which highly qualified students are invited to declare an engineering major during the first quarter of matriculation. The second, and most common, path is to be admitted to UCSC, take and do well in the appropriate lower-division engineering courses, then apply to an engineering major. In this case, the student would apply to the engineering major in their sophomore, or possibly, junior year. These two options are explained more fully below as First-Year Direct Acceptance, and Current Students Acceptance.

First-Year Direct Acceptance to School of Engineering Majors

Students interested in declaring a School of Engineering major are encouraged to do so during their first year at UCSC. Some students may be admitted directly into their School of Engineering major of choice at the time they are admitted to UCSC. Students not directly admitted may still apply during their first year and their acceptance into their selected major will be based upon their School of Engineering GPA (described below), their high school grade point average, courses completed in mathematics and sciences, and scores on standardized tests.

First-year applicants to UCSC may apply for direct acceptance to a School of Engineering major by indicating the major as their first or second choice on the application. Applicants will be granted direct acceptance based on their high school grade point average, courses completed in mathematics and sciences, scores on standardized tests, and/or their personal statement.

To take advantage of direct acceptance, first-year students must declare the complete the declaration of major process in their first term at UCSC or forfeit their direct acceptance status.

Post First-Year Current Students Acceptance to Majors

Any student admitted to UCSC as a freshman lower-division student that has completed 3 or more quarters at UCSC can apply to declare a School of Engineering major upon completion (with a grade of C or better) of all the foundation courses for that major.

Application details can be found at http://www.soe.ucsc.edu/advising/undergraduate.

Applications can be found at

http://www.soe.ucsc.edu/advising/undergraduate/pdf/application_to_declare.pdf and are accepted only during the first seven days of each fall, winter, or spring quarter. For all School of Engineering majors, other than bioinformatics and computer engineering, approval is based upon the student's "declaration GPA" in the foundation courses taken at UCSC (see below). The course requirements for acceptance into bioinformatics and computer engineering can be found in the Bioinformatics and Computer Engineering sections of this catalog. Departmental acceptance decisions for all School of Engineering departments can be picked up at the Undergraduate Advising office seven calendar days after the application deadline. Students who have been accepted into the major are then cleared to declare the major.

School of Engineering GPA Calculation

The declaration GPA is calculated on grades received for all attempted foundation courses at UCSC. Students are advised not to request Pass/No Pass grading in any foundation courses since a grade of P is treated as a C for calculating the declaration GPA regardless of the content of the evaluation. No Pass and Withdraw grades are treated as an F.

All students who have a declaration GPA of 2.8 or better will be admitted to the requested major. Students with a declaration GPA below 2.8 may be admitted at the discretion of the department.

The declaration School of Engineering GPA is calculated on grades received for all attempted foundation courses at UCSCSchool of Engineering and Physical and Biological Sciences courses. Students are advised not to request Pass/No Pass grading in any School of Engineering or Division of Physical and Biological Sciences courses since a grade of P is treated as a C for calculating the School of Engineering GPA regardless of the content of the evaluation. No Pass grades are treated as an F. Although the campus GPA excludes the first 15 units of repeated courses from the GPA calculation, all attempts are included in the School of Engineering GPA calculation. The School of Engineering GPA is used in determining acceptance into School of Engineering majors and the School of Engineering disqualification process described later in this section.

Foundation Courses

The foundation courses for each School of Engineering major are as follows:

Bioinformatics: See Bioinformatics section.

Computer Engineering: See Computer Engineering section.

Computer Science: Computer Science 12A and 12B (or 13H); Computer Engineering 16; and Mathematics 19A-B, or 20A-B

Computer Game Design: Computer science 12A and 12B, Computer Engineering 16 or Mathematics 19A-B.

Electrical Engineering: Mathematics 19A-B; Applied Mathematics and Statistics 27; Physics 5A, 5B, and 5C

Information Systems Management: Computer Science 12A or 13H; Computer Engineering 16; Mathematics 19A-B (or Applied Mathematics and Statistics 11A and 11B or Economics 11A and 11B); Information Systems Management 50 (or Economics 1 and 2)

Declaration Process

After a student has been accepted into a School of Engineering major, the student should complete the declaration of major process. UCSC requires that students declare a major before earning 90 credits. Once a student has been accepted to an engineering major (see above), an appointment is made with their college to review general education requirements and to obtain a Declaration of Major form. Thereafter the student attends one of the declaration of major workshops offered each quarter by the Undergraduate Advising office (see www.soe.ucsc.edu/advising/undergraduate). The major declaration process includes the development of a study plan that allows the student to complete the degree without undue extension of enrollment. Students interested in more than one major should submit one petition listing both their major preferences.

Junior Transfer Acceptance to Majors

The School of Engineering strongly encourages applications from transfer students. Due to the prerequisite structure for upper-division courses, prospective transfer students should have completed as many of the lower-division requirements for the respective majors as possible to complete the degree within a reasonable time.

Students must plan carefully because many courses must be taken sequentially.

Transfer students should **not** follow the Intersegmental General Education Transfer Curriculum (IGETC) because it will not provide transfer students with enough mathematics and engineering courses to allow them to complete School of Engineering programs at UCSC in two years.

Students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from the School of Engineering must indicate a School of Engineering major as their first choice on their UC application. (Students may also indicate an alternative School of Engineering major as their second choice.)

Junior transfers who do not list a School of Engineering major on their application to UCSC will not be considered for admission to such majors after the first day of their first quarter on campus.

Acceptance into the major is based on the student's academic college record. Applicants are encouraged to take and excel in as many courses that are equivalent to the department's foundation courses as possible. For many School of Engineering majors, completion of a year of calculus (accepted as equivalent to Mathematics 19A-B), linear algebra, differential equations, a year of calculus-based physics courses (accepted as equivalent to Physics 5A, 5B, 5C), and two programming courses (accepted as equivalent to Computer Science 12A Computer Science 12B, or Computer Engineering 12/L) are strongly recommended. An applicant will be approved, conditionally approved, or declined. Only students who have completed most or all of the foundation courses will be approved or conditionally approved for the major.

Students who are approved for acceptance and who have course credit for all the foundation courses for their major must declare the major in their first term of enrollment at UCSC. The status of students who are approved for acceptance but who, upon review of their transcripts, are found not to have course credit for all the foundation courses for their major will be changed to conditionally approved.

Students who are conditionally approved must complete the remaining required foundation courses for their major in their first term at UCSC and declare the major at the beginning of the following term at UCSC. Conditionally approved students will be evaluated based upon their performance in the foundation courses attempted during their first term at UCSC. Students who are conditionally approved for the major should be prepared to declare an alternative major outside of the School of Engineering in case they are unsuccessful in their attempt to complete their remaining foundation courses.

Students whose petitions are denied may still be admitted to UCSC, but they may not reapply for acceptance to engineering major(s) for which they were originally considered.

Course Substitutions: The School of Engineering Undergraduate Advising office may require that a Petition for Course Substitution be approved before credit for a course completed at another institution can be applied to any School of Engineering major requirement. The Undergraduate Advising staff can help determine if this petition process is necessary based on transcript information provided to them by the student. This petition is in addition to and separate from the transfer credit awarded by the university. Forms are available at the Undergraduate Advising office. Each

petition must be accompanied by a course description, syllabus, and verification of the number of credits earned with a grade of C or better. To guarantee equivalency, departments may sometimes require a grade of B or better. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations.

Appeal Process

Appeal of negative decisions concerning School of Engineering admission will be evaluated by the academic program to which the student applied. Appeal letters must be submitted in writing to the Undergraduate Advising office within the time frame given in the letter of denial. Late appeals will not be considered. Letters of appeal should describe any extenuating circumstances that might affect the faculty's evaluation of the record.

Students whose petitions and appeals have been turned down may not reapply for the same major.

Letter Grade Policy

The School of Engineering strongly advises students to request letter grades in all foundation courses for all engineering concentrations. Many majors in the School of Engineering have additional restrictions on the use of the Pass/No Pass option. Foundation courses should not be taken Pass/No Pass because doing so may lower students' declaration School of Engineering GPA and affect their admission into School of Engineering majors. Major grade requirements are as follows:

Bioengineering major: All courses required for the major must be taken for a letter grade. Two lower-division exceptions are allowed.

Bioinformatics major: Same as campus requirements, but foundation courses should not be taken Pass/No Pass, since doing so may lower the declaration GPA needed for admission to the major.

Computer engineering major: All courses required for the major must be taken for a letter grade. Two lower-division exceptions are allowed.

Computer engineering minor: Same as campus requirements.

Computer science major and minor: All courses required for the major and minor must be taken for letter grades. Two lower-division exceptions are allowed.

Computer game design major and minor: All courses required for the major and minor must be taken for letter grades. Two lower-division exceptions are allowed.

Electrical engineering major: All courses required for the major must be taken for letter grades. Two lower-division exceptions are allowed (not to include Electrical Engineering 70).

Information systems management major: All courses required for the major must be taken for letter grades. Two lower-division exceptions are allowed (not to include Information Systems Management 50 or 58).

Statistics minor: same as campus requirements.

Note: for admission into any School of Engineering major, a grade of Pass is treated

as a C, which may adversely affect your admission to the major.

Disqualification Policy

GPA Requirement

Your cumulative School of Engineering GPA is calculated from all required and elective courses you have taken for your major School of Engineering and Physical and Biological Sciences courses attempted. Your term School of Engineering GPA is calculated from all required and elective courses School of Engineering and Physical and Biological Sciences courses you have taken for your major in the previous quarter as a UCSC student.

If both your cumulative and term School of Engineering GPAs are 2.0 or greater, you are in good departmental standing. If either your cumulative or term GPAs are less than 2.0, you are on departmental probation. If you are on departmental probation and your cumulative School of Engineering GPA is below 2.0 at the beginning of the next quarter, you are subject to disqualification from the major. If your term School of Engineering GPA falls below 1.5 in any term, you are also subject to disqualification from the major. All students that are subject to disqualification are reviewed by their departmental faculty to determine whether to require the student to choose a different major or to be on departmental probation.

Ethics Requirement

Graduates of the Baskin School of Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available at www.ieee.org/about/whatis/code.html and www.acm.org/serving/se/code.htm. Students of the Baskin School of Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

Students found guilty of a single incident of academic dishonesty may, at the discretion of the department, be disqualified from the major. In addition, students may be subject to other possible university sanctions. A second incident of academic dishonesty will result in automatic disqualification from the major.

Additional Notes on Disqualification

Please note the Repeating Courses policy in the School of Engineering section of this catalog. Two failed attempts in a class will endanger your opportunity to continue in a School of Engineering major.

Bioinformatics, Computer Engineering, and Computer Science have additional disqualification criteria. Please see those sections of this catalog for details.

Repeating Courses

Due to its impacted status and the need to identify students having difficulty in School of Engineering course may be attempted more than twice without prior approval from the chair of the department offering the course. A class in which a W is given is counted as an attempt.

Courses Taken Elsewhere After Enrollment

It is the intent of the faculty of the Baskin School of Engineering that all degree

requirements be completed at UCSC or prior to first enrollment at UCSC. Course substitutions, such as taking a course at another UC campus, in the Education Abroad Program, or at a community college, require approval prior to taking the class. Applications and procedures for pre-approval are obtained from and given to the School of Engineering Undergraduate Advising office.

Articulation agreements do not apply to enrolled students. You must get pre-approval before taking a class at a community college.

When a student declares their major, minor, or proposed major in a School of Engineering program, the decision as to whether a course taken elsewhere is accepted for this School of Engineering major or minor is made by the major department at that point. (Note: There is no guarantee that a course will be applicable toward a School of Engineering major, minor, or proposed major even if the student has completed more advanced courses in that department.)

School-Wide Information and Policies

Computing Facilities

The Baskin School of Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec.

All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access the School of Engineering and the Information Technology Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see http://its.ucsc.edu/.

Prerequisites

Because of the sequential nature of the School of Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly *Schedule of Classes*. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped.

For example, to enroll in Computer Science 101, a prerequisite to many upperdivision courses, the prerequisite courses that must be completed or in progress are Computer Science 12B (or 13H), Computer Engineering 16, Mathematics 19B, and one of the following: Mathematics 21, 22, 23A, 24, or Applied Mathematics and Statistics 27.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite should promptly consult with the School of Engineering's staff advisers. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See the Course Substitutions section under Admission to School of Engineering Majors.)

Permission Numbers

Students not meeting the regular prerequisite requirements for courses sponsored by the Baskin School of Engineering may petition the course instructor to receive a permission number to enroll. Students requesting a permission number must submit the form found at www.soe.ucsc.edu/advising/undergraduate/pdf/prereq_waiver.pdf to the instructor. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no instructor has been assigned to the course, please contact the Undergraduate Advising office for direction.

Materials Fee

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student will assemble into a project and keep. Please refer to the Baskin Engineering Lab Support web page for specific course material fee amounts: www.soe.ucsc.edu/administration/labs/.

Miscellaneous Fees

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information: www.soe.ucsc.edu/administration/labs/.

Program Description | Changes to 2006-08 Catalog Highlighted

Lower-Division Courses

50. Engineering Mechanics. W

An introduction to statics and engineering graphics, and their applications. Topics include equilibrium of two-dimensional and three-dimensional systems, work and potential energy, virtual work, orthographic projections and descriptive geometry, engineering drawing, computer graphics and modeling, and empirical equations. Prerequisite(s): Physics 5A/L or 6A/L, and concurrent enrollment in course 50L. *K. Groppi*

50L. Engineering Mechanics Laboratory (1 credit). W

Laboratory sequence illustrating topics covered in course 50. One two-hour laboratory session per week. Students are billed a materials fee. Prerequisite(s): Physics 5A/L or 6A/L, and concurrent enrollment in course 50. *K. Groppi*

Upper-Division Courses

280Z. Guest Seminar Series (1 credit). *

Distinguished speakers from industry, universities, and government discuss current developments in engineering. Emphasizes open research questions that may lead to collabrative work with faculty and graduate students. Enrollment restricted to graduate students. (FWS) The Staff

* Not offered in 2007-08

[Return to top.]

Entry-Level Writing Requirement (Formerly Subject A)

Every candidate for a bachelor's degree must demonstrate an acceptable level of ability in English composition. Before your fourth quarter of enrollment, you must fulfill this requirement in one of the following ways:

- By achieving a score of 680 or higher on the College Board SAT II: Subject Test in Writing
- By achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in English, or by achieving a score of 5, 6, or 7 on the IBH English Language A1 Examination
- By achieving a score of 8 or higher on the systemwide UC Analytical Writing Placement Examination
- By demonstrating an acceptable level of proficiency on UCSC's Writing Placement Examination, given several times during the year
- Prior to first enrollment at UC, by completing at another institution an acceptable college-level course of at least 4 quarter credits, or the equivalent, in English composition with a grade of C or better

California high school seniors who have been admitted to UCSC must take the systemwide UC Analytical Writing Placement Examination given in May, unless they have already satisfied the requirement.

Environmental Sciences and Policy

(There were no substantive changes to the Environmental Science and Policy Program Description from the General Catalog 2006-08.)

Program Description

UCSC offers a range of options for students to pursue environmental topics. The Environmental Studies Department offers an interdisciplinary B.A. program that emphasizes social sciences, conservation biology, and agroecology (see Environmental Studies). The Environmental Studies Department offers combined majors with the Departments of Biological Sciences, Earth Sciences, and Economics. The environmental studies/biology and environmental studies/Earth sciences combined majors increase the scientific training in disciplinary areas but are not intended to develop a student's core competence to a level equivalent to that attained with a major in the related science. The Chemistry and Earth Sciences Departments offer concentrations in environmental topics within their B.A. and B.S. degree programs. The environmental sciences concentrations are designed for students in the natural sciences who wish to pursue study of the environment. These develop a level of competency suitable for pursuing graduate work in these disciplinary areas or in graduate environmental programs (see descriptions in the appropriate sections: Chemistry; and Earth Sciences.

Environmental Studies

405 Interdisciplinary Sciences Building (831) 459-2634 http://envs.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The environmental studies major prepares students for meaningful lifetime engagement with the major environmental challenges facing society. A degree in environmental studies prepares students for increasingly diverse career opportunities in the private sector, at all levels of government, and in non-governmental organizations. UCSC environmental studies graduates hold leadership positions as legislative and policy analysts, environmental management officials, educators, restoration ecologists, conservation and field biologists, museum curators, business consultants, and political organizers. In addition, many graduates obtain professional, master's, or doctoral degrees in the country's top ecology programs, law schools, public policy schools, and related disciplines.

In addition to the environmental studies major, students can elect one of three combined majors: one with biology, one with Earth sciences, and one with economics.

Students pursue an interdisciplinary curriculum that combines course work in ecology and the social sciences. The fundamentals of environmental studies are offered through introductory courses on the ecological and political-economic aspects of environmental issues and through the core course, Environmental Studies 100/L, *Ecology and Society*. Upper-division areas of concentration have interdisciplinary curricula that draw on both ecology and the social sciences. The program emphasizes the integration of ecological knowledge with an understanding of social institutions and policies in ways that support the conservation of biodiversity, the practice of sustainable agriculture, and the careful management of other ecological and environmental systems. The faculty work on these issues at local, regional, and global levels. Current faculty research focuses on Costa Rica, Panama, Mexico, Malawi, China, India, the Middle East, California, and the Monterey Bay region.

As a complement to classroom instruction and research, many courses have field components. The Environmental Studies Field and Internship Program helps qualified students find placements with government and educational agencies, community organizations, and private firms. In addition, students are encouraged to participate in faculty-directed research on specific problems. Environmental studies courses complement most majors on campus, and students from other majors are encouraged to take courses that are relevant to their interests.

Requirements for the Major

Prerequisites for the Single Major

Continuing UCSC students are required to complete six prerequisite courses before taking Environmental Studies 100/L. Five of the prerequisite courses are preset and are listed below. See the course descriptions for more specific information.

Environmental Studies 23, *The Physical and Chemical Environment* . Offered in spring quarter.

Environmental Studies 24, General Ecology. Offered in fall and summer quarters.

Environmental Studies 25, Environmental Policy and Economics. Offered in winter and summer quarters

Applied Mathematics and Statistics 3, Precalculus for Science and Engineering

Mathematics 3 *Precalculus*, a score of 3 or higher on the College Board AP calculus exam, or equivalent. Check the catalog for the quarters offered.

Applied Math and Statistics 7/L, Statistical Methods for the Biological and Environmental Studies or Economics 113, Introduction to Econometrics. Check the catalog for the quarters offered and for prerequisite courses.

In addition, students choose one introductory course from the list that follows, covering national identities, culture, cultural diversity, social interactions, social change, or ethical issues:

Anthropology 2, Introduction to Cultural Anthropology

Sociology 1, Introduction to Sociology

Sociology 15, World Society

Philosophy 21, Wilderness Studies

Philosophy 22, Introduction to Ethical Theory

Philosophy 24, Introduction to Ethics: Contemporary Moral Issues

Philosophy 28, Environmental Ethics

Philosophy 80G, Bioethics in the 21st Century: Science, Business, and Society

Transfer Students

Students transferring to UCSC should fulfill the lower-division prerequisites for the major by completing equivalent courses, with a grade of C or better, at another recognized institution before transferring to UCSC. The prerequisite in the physical and chemical environment (course 23) may be satisfied by completing a college-level introductory chemistry course if no course equivalent to course 23 is available. Two courses-one in politics, one in economics-are required to satisfy the political economy and the environment (course 25) prerequisite. Courses 24 and 25 are offered during Summer Session at UCSC, and transfer students are encouraged to take them. If you are transferring, compare catalog descriptions, consult your current institution's adviser, and refer to the ASSIST web site, www.assist.org, to determine equivalency.

Upper-Division Requirements

Students are required to complete nine upper-division courses:

Environmental Studies 100/L, Ecology and Society seven upper-division electives senior comprehensive requirement (see below)

Comprehensive Requirement

The senior comprehensive may be satisfied by completing one of the courses listed below. Before enrolling in a senior thesis or senior internship option, students must formally apply to a faculty mentor by the last quarter of their junior year. These courses require careful planning and additional independent research. Students with advanced skills in one of the graduate focal areas can also take a graduate seminar (courses 210, 220, 230, or 240) by invitation from the instructor.

Environmental Studies 183B, Senior Internship

Environmental Studies 190, Capstone Course: Environmental Problem Solving

Environmental Studies 195A or 195B. Senior Thesis

Environmental Studies 196 (one course from the series), Senior Seminar

Major Disqualification Policy

The Environmental Studies Department considers courses 23, 24, 25, and 100/L to be the core of the program. Students who have failed two of these courses will be disqualified from the major and barred from enrollment in all upper-division environmental studies courses. Students who have failed the same course (of these four core courses) twice will likewise be barred from enrollment in all upper-division courses. Students who have failed course 100/L may be admitted to upper-division courses by exception only; they must present their case in writing to the department chair in order to be allowed to remain enrolled in any upper-division environmental studies courses in which they have advance enrolled. The department also reserves the right to disqualify from the major students who fail three or more upper-division environmental studies elective courses.

Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification within the appeal period by submitting a letter to the chair of the Environmental Studies Department. This appeal must be filed no later than 15 days from the date the disqualification notification was mailed, or the 10th day of classes

in the quarter of their disqualification, whichever is later. The department will subsequently notify the student, the college, and the Office of the Registrar of the decision no later than 15 days after the filing of the appeal.

Requirements for the Combined Majors

Environmental Studies/Biology

This course of study provides students with the basic tools of biological science and sufficient understanding of resource conservation, conservation biology, and concerns about environmental sustainability to apply these tools to environmental problems.

Prerequisites

Biology, chemistry and mathematics courses may require placement exams. See course descriptions for prerequisite information.

Biology 20A, 20B, and 20C

Environmental Studies 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15

Precalculus (Applied Mathematics and Statistics 3, Mathematics 3, or a score on the math placement exam or the College Board AP calculus exam sufficient to be placed into calculus)

Applied Mathematics and Statistics 7 and 7L

Chemistry 1A, 1B/M, and 1C/N

Two courses in physics or computer science, either Physics 7A/L and 7B/M or two courses from Computer Science 12A, 12B, 60G or 60N, 80B, and 80G.

Upper-Division Requirements

Students are required to complete nine upper-division courses and the comprehensive requirement listed below.

Environmental Studies 100/L

Biology 105

Biology 175, or Chemistry 108A/L and 108 B/M

Six upper-division courses, three in biology and three in environmental studies. One of the six must be a laboratory course, and one of the three environmental studies courses should be based in the social sciences.

These upper-division courses should be selected in pursuit of a coherent plan of study, such as agroecology-botany, conservation biology-zoology, resource management-ecology, environmental education-animal behavior, or environmental policy-marine studies, among others.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the following:

- for environmental studies, one of the options for environmental studies majors (see Comprehensive Requirement above);
- for biological sciences, one of the options for biology (see Comprehensive Requirement under Biological Sciences).

Declaration Process for the Environmental Studies/Biology Combined Major

Students must complete the following prerequisites before declaring the environmental studies/biology combined major: precalculus (Mathematics 3 or a score on the math placement exam sufficient to be placed into calculus), general chemistry (Chemistry 1A, 1B/M, and 1C/N), and introductory biology (Biology 20A, 20B, and 20C). See the Biological Sciences section of this catalog for more information.

Disqualification Policy for the Environmental Studies/Biology Combined Major

All environmental studies/biology combined majors are covered by the biology and environmental studies major disqualification policies, which limit the number of times a student may receive a No Pass, D, and/or F in the introductory biology sequence and the environmental studies core courses and still remain a combined major, and which also limit the number of times a student

may receive a No Pass, D, and/or F in upper-division biology and environmental studies courses. Students should refer to the Biological Sciences section and the Major Disqualification Policy section above for more information.

Environmental Studies/Earth Sciences

This course of study provides students with the basic tools of Earth sciences and environmental studies needed to address environmental problems.

Lower-Division Requirements

Applied Mathematics and Statistics 7 and 7L

Mathematics 11A-B (or 19A-B)

Chemistry 1A, 1B/M, and 1C/N

Physics 6A/L and 6B/M (or 5A/L and 5B/M)

Earth Sciences 20/L (or 5/L or 10/L)

Environmental Studies 24 and 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15.

Upper-Division Requirements

Earth Sciences 110A/L, 110B/M, or 110C/N

Environmental Studies 100/L

Three additional upper-division environmental studies courses, including at least one course based in the social sciences

Three additional upper-division Earth sciences courses

The upper-division courses should be selected in pursuit of a coherent plan of study, such as water policy-hydrology, restoration ecology-geochemistry, agroecology-soil physical processes, or environmental policy-climate change, among others, in consultation with faculty from both the Environmental Studies and Earth Sciences Departments.

Comprehensive Requirement

Students satisfy their senior comprehensive requirement in environmental studies or Earth sciences by completing one of the following:

Environmental Studies 190

A 196-series course

A 183B senior internship, concurrent enrollment in course 183 is required

Earth Sciences 188A-B

A senior thesis with faculty readers from both departments and enrollment in Environmental Studies 195A or 195B or Earth Sciences 195.

Environmental Studies/Economics

This major provides students with the basic tools of economic analysis and an understanding of the mechanics of resource production, conservation, and use, in both ecological and economic terms.

Lower-Division Requirements

Economics 1, 2, 11A, 11B

Environmental Studies 23, 24, 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15.

Upper-Division Requirements

Economics 100A

Economics 113

Environmental Studies 100/L

Six elective courses from the following, with at least three courses from each discipline:

Economics 100B, 120, 134, 140, 150, 152, 153, 160, 169, 170, 175, and 189

Environmental Studies 110, 115A, 120, 122, 123, 130A/L, 130B, 140, 141, 149, 151, 152, 156, 158, 160, 164, 165, and 172. One of the three environmental studies electives must be based in the natural sciences.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the following:

- for environmental studies, one of the options for environmental studies majors (see Comprehensive Requirement above);
- for economics, pass those portions of the economics comprehensive examination administered in Economics 100A and 113.

Graduate Program

Human societies rest on an ecological foundation and are sustained by ecosystem processes, biological diversity, and genetic resources. Current threats to this foundation imperil societies' well-being, challenging us to maintain the integrity, diversity, and resilience of existing ecological and agricultural systems and of the human societies that depend on them. Environmental problems are among the most serious of current issues. As these problems become more acute, the challenge of harmonizing societies' environmental practices and choices with ecological sustainability, economic necessity, social justice, democratic participation, and human well-being will require increasing numbers of people prepared to respond to both ecological and social problems. This poses a historic challenge to graduate training and requires increasing numbers of skilled professionals able to address complex social and ecological problems from an interdisciplinary viewpoint.

The program at UCSC draws from two areas of knowledge: ecology and social science. Our interests in ecology range from conservation biology (the maintenance of biodiversity in wild ecosystems, where we seek strong limits on human impacts on other species) to agroecology (where ecological knowledge is used to inform human management of nature for the production of natural products for human use in ways that are environmentally benign). Our interests in the social sciences bridge the dimension between environmental policy analysis (which looks for the best management strategies within the frame of existing social institutions and practices) and political economy of the environment (which examines the deeper social processes through which the institutions that structure our social and ecological agendas have been constructed). These all are historically independent fields and UCSC's program is one of the first to link them.

Graduates of the program are expected to be informed in all of these fields, to have deep intellectual strength in their area of specialty, and to have made substantial contributions toward the understanding of an environmental problem. We expect our doctoral students to be as skilled and intellectually rigorous within their research emphases as are students emerging from more traditional programs-but also to possess the knowledge needed to understand, analyze, and communicate in different but highly relevant fields of study. This expectation of intellectual breadth as well as disciplinary depth is a central goal of our doctoral program.

Given the strong interdisciplinary focus of the environmental studies Ph.D. program, study in other fields is encouraged. The environmental studies faculty have a wide range of research interests, and some are affiliated with other departments on campus. Students have the option of pursuing a "Parenthetical Notation," the equivalent of a graduate minor. These provide a framework for in-depth study in specialized fields in your area, and an opportunity for recognition of particular scholarly expertise. We currently have agreements with the Ecology and Evolutionary Biology, Latin American and Latino Studies, and Sociology Departments, and are pursuing agreements with others.

Requirements for the Ph.D. Degree

For admission to the program, students must have completed a bachelor's degree or equivalent in a related disciplinary field. Students with degrees in interdisciplinary fields such as environmental studies should have disciplinary course work equivalent to a double major or a master's degree in an appropriate field. Superior scholarship, capacity to carry out independent research, and commitment to disciplinary integration must be demonstrated in the statement of purpose, course work, GRE General Test score, and letters of recommendation. The GRE Subject Test (in a discipline of the student's choice) is strongly recommended. Other considerations for admission include grades, evaluations, publications, professional or extramural experience, and completion of more than one degree (second bachelor's or master's). In addition to the application materials, students should submit a substantial written project (undergraduate or

master's), where possible. Prospective students must also contact faculty directly to inquire about specific course requirements and sponsorship.

Doctoral training and the graduate curriculum in environmental studies are based on an integrative, problem-oriented pedagogy whose aim is to provide students with the analytical tools, research methods, and project design capabilities required to undertake interdisciplinary research. These skills are essential to all environmental studies graduate students, whether they pursue careers in the academy or other professional arenas.

The interdisciplinary nature of this core curriculum requires rigorous preparation at the undergraduate level. Students are expected to have completed at least one course in statistical analysis, an advanced upper-division course in ecology (genetics, evolutionary, biology), economics (either macro- or micro-), and a course in politics/political economy. Calculus is useful in many areas of the program and essential to independent work in some.

The graduate curriculum trains students in the methodological principles and practice of interdisciplinary research. In their first year, students are required to complete core courses 201A-B, and 201N, as well as the department's interdisciplinary research seminar 290 each quarter, 290L in fall and one other quarter, and attend lab group meetings (292). An upperdivision or graduate-level course in quantitative methods is required by the time the student takes the prequalifying exam. The course should provide training in research design and the selection of appropriate quantitative tools for research and analysis. Examples of appropriate courses for fulfilling this requirement are available from the graduate program coordinator. In the fall and winter quarters of the second year, students are required to take a minimum of two area specialization courses, at least one of which must be in the natural sciences (220 or 230), one course in the social sciences (210 or 240), and attend lab group meetings (292) as well as the department's interdisciplinary research seminar 290, and two quarters of 290L. Depending on the student's preparation, interests, and intentions, his or her adviser may suggest or require additional course work. In the third year of study, the research seminar, 290, is required each quarter, and one quarter of enrollment in 290L is strongly recommended.

By the end of winter quarter of their third year, students take exams designed to measure depth in their disciplinary and interdisciplinary areas of expertise; these areas are defined by the student and the examining committee. Also during the course of their third year, students prepare and present a dissertation research proposal and take an oral candidacy exam in which they defend the proposal and are examined on subjects related to their research area. In addition, before advancing to candidacy, students are required to serve as teaching assistants in undergraduate courses for two quarters unless they can demonstrate equivalent experience. If the venue of a student's research is in a non-English-speaking country, he or she must also pass a language exam testing reading and speaking competence in the language of that area before advancement to candidacy. A dissertation in environmental studies is expected to present an original contribution to the understanding of a significant environmental problem or issue. It should demonstrate a clear understanding of the relevant literature, careful and rigorous research design, and effective communication of the results within the context of their area of emphasis.

The typical duration of the doctoral program is five to six years.

We do not offer a terminal master's degree, except in the case of students who have passed the qualifying exam but do not complete the Ph.D. dissertation.

Environmental Studies

405 Interdisciplinary Sciences Building (831) 459-2634 http://envs.ucsc.edu

Program Description | Faculty | Course Descriptions

Program Description

The environmental studies major prepares students for meaningful lifetime engagement with the major environmental challenges facing society. A degree in environmental studies prepares students for increasingly diverse career opportunities in the private sector, at all levels of government, and in non-governmental organizations. UCSC environmental studies graduates hold leadership positions as legislative and policy analysts, environmental management officials, educators, restoration ecologists, conservation and field biologists, museum curators, business consultants, and political organizers. In addition, many graduates obtain professional, master's, or doctoral degrees in the country's top ecology programs, law schools, public policy schools, and related disciplines.

In addition to the environmental studies major, students can elect one of three combined majors: one with biology, one with Earth sciences, and one with economics.

Students pursue an interdisciplinary curriculum that combines course work in ecology and the social sciences. The fundamentals of environmental studies are offered through introductory courses on the ecological and political-economic aspects of environmental issues and through the core course, Environmental Studies 100/L, *Ecology and Society*. Upper-division areas of concentration have interdisciplinary curricula that draw on both ecology and the social sciences. The program emphasizes the integration of ecological knowledge with an understanding of social institutions and policies in ways that support the conservation of biodiversity, the practice of sustainable agriculture, and the careful management of other ecological and environmental systems. The faculty work on these issues at local, regional, and global levels. Current faculty research focuses on Costa Rica, Panama, Mexico, Malawi, China, India, the Middle East, California, and the Monterey Bay region.

As a complement to classroom instruction and research, many courses have field components. The Environmental Studies Field and Internship Program helps qualified students find placements with government and educational agencies, community organizations, and private firms. In addition, students are encouraged to participate in faculty-directed research on specific problems. Environmental studies courses complement most majors on campus, and students from other majors are encouraged to take courses that are relevant to their interests.

Requirements for the Major

Prerequisites for the Single Major

Continuing UCSC students are required to complete the following six prerequisite courses before taking Environmental Studies 100/L. The Five of the prerequisites courses

<u>are preset and</u> are listed below. See the <u>course descriptions</u> for more specific information.

Environmental Studies 23, *The Physical and Chemical Environment* . Offered in spring quarter.

Environmental Studies 24, *General Ecology*. Offered in fall and summer quarters.

Environmental Studies 25, *Political Economy and the Environment.*Environmental Policy and Economics. Offered in winter and summer quarters

Applied Mathematics and Statistics 3, *Precalculus for Science and Engineering*

Mathematics 3 *Precalculus*, a score of 3 or higher on the College Board AP calculus exam, or equivalent. Check the catalog for the quarters offered.

Applied Math and Statistics 7/L, *Statistical Methods for the Biological and Environmental Studies* or Economics 113, *Introduction to Econometrics*. Check the catalog for the quarters offered and for prerequisite courses.

One In addition, students choose one introductory course from the list that follows, covering national identities, culture, cultural diversity, social interactions, social change, or ethical issues:

Anthropology 2, Introduction to Cultural Anthropology

Sociology 1, Introduction to Sociology

Sociology 15, World Society

Philosophy 21, Wilderness Studies

Philosophy 22, *Introduction to Ethical Theory*

Philosophy 24, Introduction to Ethics: Contemporary Moral Issues

Philosophy 28, Environmental Ethics

Philosophy 80G, Bioethics in the 21st Century: Science, Business, and Society

Transfer Students

Students transferring to UCSC should fulfill the lower-division prerequisites for the major by completing equivalent courses, with a grade of C or better, at another recognized institution before transferring to UCSC. The prerequisite in the physical and chemical environment (course 23) may be satisfied by completing a college-level introductory chemistry course if no course equivalent to course 23 is available. Two courses-one in politics, one in economics-are required to satisfy the political economy and the environment (course 25) prerequisite. Courses 24 and 25 are offered during Summer Session at UCSC, and transfer students are encouraged to take them. If you are transferring, compare catalog descriptions, consult your current

institution's adviser, and refer to the ASSIST web site, www.assist.org, to determine equivalency.

Upper-Division Requirements

Students are required to complete nine upper-division courses:

Environmental Studies 100/L, Ecology and Society seven upper-division electives senior comprehensive requirement (see below)

Comprehensive Requirement

The senior comprehensive may be satisfied by completing one of the courses listed below. Before enrolling in a senior thesis or senior internship option, students must formally apply to a faculty mentor by the last quarter of their junior year. These courses require careful planning and additional independent research. Students with advanced skills in one of the graduate focal areas can also take a graduate seminar (courses 210, 220, 230, or 240) by invitation from the instructor.

Environmental Studies 183B, Senior Internship

Environmental Studies 190, Capstone Course: Environment and Culture Environmental Problem Solving

Environmental Studies 195A or 195B, Senior Thesis

Environmental Studies 196 (one course from the series), Senior Seminar

Major Disqualification Policy

The Environmental Studies Department considers courses 23, 24, 25, and 100/L to be the core of the program. Students who have failed two of these courses will be disqualified from the major and barred from enrollment in all upper-division environmental studies courses. Students who have failed the same course (of these four core courses) twice will likewise be barred from enrollment in all upper-division courses. Students who have failed course 100/L may be admitted to upper-division courses by exception only; they must present their case in writing to the department chair in order to be allowed to remain enrolled in any upper-division environmental studies courses in which they have advance enrolled. The department also reserves the right to disqualify from the major students who fail three or more upper-division environmental studies elective courses.

Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification within the appeal period by submitting a letter to the chair of the Environmental Studies Department. This appeal must be filed no later than 15 days from the date the disqualification notification was mailed, or the 10th day of classes in the quarter of their disqualification, whichever is later. The department will subsequently notify the student, the college, and the Office of the Registrar of the decision no later than 15 days after the filing of the appeal.

Requirements for the Combined Majors

Environmental Studies/Biology

This course of study provides students with the basic tools of biological science and sufficient understanding of resource conservation, conservation biology, and concerns about environmental sustainability to apply these tools to environmental problems.

Prerequisites

Biology, chemistry and mathematics courses may require placement exams. See course descriptions for prerequisite information.

Biology 20A, and 20B, and 20C

Environmental Studies 24 (or Biology 20C or 150)

Environmental Studies 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15

Precalculus (Applied Mathematics and Statistics 3, Mathematics 3, or a score on the math placement exam or the College Board AP calculus exam sufficient to be placed into calculus)

Applied Mathematics and Statistics 7 and 7L

Chemistry 1A, 1B/M, and 1C/N and 108A/L and 108B/M

Two courses in physics or computer science, either Physics 7A/L and 7B/M or two courses from Computer Science 12A, 12B, 60G or 60N, 80B, and 80G.

Upper-Division Requirements

Students are required to complete <u>eight_nine</u> upper-division courses and the comprehensive requirement listed below.

Environmental Studies 100/L

Biology 105

Biology 175, or Chemistry 108A/L and 108 B/M

Six upper-division courses, three in biology and three in environmental studies. One of the six must be a laboratory course, and one of the three environmental studies courses should be based in the social sciences.

These upper-division courses should be selected in pursuit of a coherent plan of study, such as agroecology-botany, conservation biology-zoology, resource management-ecology, environmental education-animal behavior, or environmental policy-marine studies, among others.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the following:

• for environmental studies, one of the options for environmental studies majors (see Comprehensive Requirement above);

• for biological sciences, one of the options for biology (see Comprehensive Requirement under Biological Sciences).

Declaration Process for the Environmental Studies/Biology Combined Major

Students must complete the following prerequisites before declaring the environmental studies/biology combined major: precalculus (Mathematics 3 or a score on the math placement exam sufficient to be placed into calculus), general chemistry (Chemistry 1A_1B/M, and 1C/N), organic chemistry (Chemistry 108A/L and 108B/M), and introductory biology with lab (Biology 20A, 20B, and 20L_20C). Biology 20C is not required for this combined major. See the Biological Sciences section of this catalog for more information.

Disqualification Policy for the Environmental Studies/Biology Combined Major

All environmental studies/biology combined majors are covered by the biology and environmental studies major disqualification policies, which limit the number of times a student may receive a No Pass, D, and/or F in the introductory biology sequence and the environmental studies core courses and still remain a combined major, and which also limit the number of times a student may receive a No Pass, D, and/or F in upper-division biology and environmental studies courses. Students should refer to the Biological Sciences section (page 148) and the Major Disqualification Policy section above for more information.

Environmental Studies/Earth Sciences

This course of study provides students with the basic tools of Earth sciences and environmental studies needed to address environmental problems.

Lower-Division Requirements

Applied Mathematics and Statistics 7 and 7L

Mathematics 11A-B (or 19A-B)

Chemistry 1A, 1B/M, and 1C/N

Physics 6A/L and 6B/M (or 5A/L and 5B/M)

Earth Sciences 20/L (or 5/L or 10/L)

Environmental Studies 24 and 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15.

Upper-Division Requirements

Earth Sciences 110A/L, 110B/M, or 110C/N

Environmental Studies 100/L

Three additional upper-division environmental studies courses, including at least one course based in the social sciences

Three additional upper-division Earth sciences courses

The upper-division courses should be selected in pursuit of a coherent plan of study, such as water policy-hydrology, restoration ecology-geochemistry, agroecology-soil physical processes, or environmental policy-climate change, among others, in consultation with faculty from both the Environmental Studies and Earth Sciences Departments.

Comprehensive Requirement

Students satisfy their senior comprehensive requirement in environmental studies or Earth sciences by completing one of the following:

Environmental Studies 190

A 196-series course

A 183B senior internship, concurrent enrollment in course 183 is required

Earth Sciences 188A-B

A senior thesis with faculty readers from both departments and enrollment in Environmental Studies 195A or 195B or Earth Sciences 195.

Environmental Studies/Economics

This major provides students with the basic tools of economic analysis and an understanding of the mechanics of resource production, conservation, and use, in both ecological and economic terms.

Lower-Division Requirements

Economics 1, 2, 11A, 11B

Environmental Studies 23, 24, 25

Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G or

Sociology 1 or 15.

Upper-Division Requirements

Economics 100A

Economics 113

Environmental Studies 100/L

Six elective courses from the following, with at least three courses from each discipline:

Economics 100B, 120, 134, 140, 150, 152, 153, 160, 169, 170, 175, and 189

Environmental Studies 110, 115A, 120, 122, 123, 130A/L, 130B, 140, 141, 149, 151, 152, 156, 158, 160, 164, 165, and 172. One of the three

environmental studies electives must be based in the natural sciences.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the following:

- for environmental studies, one of the options for environmental studies majors (see Comprehensive Requirement above);
- for economics, pass those portions of the economics comprehensive examination administered in Economics 100A and 113.

Graduate Program

Human societies rest on an ecological foundation and are sustained by ecosystem processes, biological diversity, and genetic resources. Current threats to this foundation imperil societies' well-being, challenging us to maintain the integrity, diversity, and resilience of existing ecological and agricultural systems and of the human societies that depend on them. Environmental problems are among the most serious of current issues. As these problems become more acute, the challenge of harmonizing societies' environmental practices and choices with ecological sustainability, economic necessity, social justice, democratic participation, and human well-being will require increasing numbers of people prepared to respond to both ecological and social problems. This poses a historic challenge to graduate training and requires increasing numbers of skilled professionals able to address complex social and ecological problems from an interdisciplinary viewpoint.

The program at UCSC draws from two areas of knowledge: ecology and social science. Our interests in ecology range from conservation biology (the maintenance of biodiversity in wild ecosystems, where we seek strong limits on human impacts on other species) to agroecology (where ecological knowledge is used to inform human management of nature for the production of natural products for human use in ways that are environmentally benign). Our interests in the social sciences bridge the dimension between environmental policy analysis (which looks for the best management strategies within the frame of existing social institutions and practices) and political economy of the environment (which examines the deeper social processes through which the institutions that structure our social and ecological agendas have been constructed). These all are historically independent fields and UCSC's program is one of the first to link them.

Graduates of the program are expected to be informed in all of these fields, to have deep intellectual strength in their area of specialty, and to have made substantial contributions toward the understanding of an environmental problem. We expect our doctoral students to be as skilled and intellectually rigorous within their research emphases as are students emerging from more traditional programs-but also to possess the knowledge needed to understand, analyze, and communicate in different but highly relevant fields of study. This expectation of intellectual breadth as well as disciplinary depth is a central goal of our doctoral program.

Given the strong interdisciplinary focus of the environmental studies Ph.D. program, study in other fields is encouraged. The environmental studies faculty have a wide range of research interests, and some are affiliated with other departments on campus. Students have the option of pursuing a "Parenthetical Notation," the equivalent of a graduate minor. These provide a framework for in-depth study in specialized fields in your area, and an opportunity for recognition of particular scholarly expertise. We currently have agreements with the Ecology and

Evolutionary Biology, Latin American and Latino Studies, and Sociology Departments, and are pursuing agreements with others.

Requirements for the Ph.D. Degree

For admission to the program, students must have completed a bachelor's degree or equivalent in a related disciplinary field. Students with degrees in interdisciplinary fields such as environmental studies should have disciplinary course work equivalent to a double major or a master's degree in an appropriate field. Superior scholarship, capacity to carry out independent research, and commitment to disciplinary integration must be demonstrated in the statement of purpose, course work, GRE General Test score, and letters of recommendation. The GRE Subject Test (in a discipline of the student's choice) is strongly recommended. Other considerations for admission include grades, evaluations, publications, professional or extramural experience, and completion of more than one degree (second bachelor's or master's). In addition to the application materials, students should submit a substantial written project (undergraduate or master's), where possible. Prospective students must also contact faculty directly to inquire about specific course requirements and sponsorship.

Doctoral training and the graduate curriculum in environmental studies are based on an integrative, problem-oriented pedagogy whose aim is to provide students with the analytical tools, research methods, and project design capabilities required to undertake interdisciplinary research. These skills are essential to all environmental studies graduate students, whether they pursue careers in the academy or other professional arenas.

The interdisciplinary nature of this core curriculum requires rigorous preparation at the undergraduate level. Students are expected to have completed at least one course in statistical analysis, an advanced upper-division course in ecology (genetics, evolutionary, biology), economics (either macro- or micro-), and a course in politics/political economy. Calculus is useful in many areas of the program and essential to independent work in some.

The graduate curriculum trains students in the methodological principles and practice of interdisciplinary research. In their first year, students are required to complete core courses 201A-B, and 201N, as well as the department's interdisciplinary research seminar 290 each quarter, 290L in fall and one other quarter, and attend lab group meetings (292). An upper-division or graduate-level course in quantitative methods is required by the time the student takes the prequalifying exam. The course should provide training in research design and the selection of appropriate quantitative tools for research and analysis. Examples of appropriate courses for fulfilling this requirement are available from the graduate program coordinator. In the fall and winter quarters of the second year, students are required to take a minimum of two area specialization courses, at least one of which must be in the natural sciences (220 or 230), one course in the social sciences (210 or 240), and attend lab group meetings (292) as well as the department's interdisciplinary research seminar 290, and two quarters of 290L. Depending on the student's preparation, interests, and intentions, his or her adviser may suggest or require additional course work. In the third year of study, the research seminar, 290, is required each quarter, and one quarter of enrollment in 290L is strongly recommended.

By the end of winter quarter of their third year, students take exams designed to measure depth in their disciplinary and interdisciplinary areas of expertise; these areas are defined by the student and the examining committee. Also during the course of their third year, students prepare and present a dissertation research proposal and take an oral candidacy exam in which they defend the proposal and are examined on subjects related to their research area. In addition, before advancing to candidacy, students are required to serve as teaching assistants in undergraduate courses for two quarters unless they can demonstrate equivalent experience. If the venue of a student's research is in a non-English-speaking country, he or she must also pass a language exam testing reading and speaking competence in the language of that area before advancement to candidacy. A dissertation in environmental studies is expected to present an original contribution to the understanding of a significant environmental problem or issue. It should demonstrate a clear understanding of the relevant literature, careful and rigorous research design, and effective communication of the results within the context of their area of emphasis.

The typical duration of the doctoral program is five to six years.

We do not offer a terminal master's degree, except in the case of students who have passed the qualifying exam but do not complete the Ph.D. dissertation.

Environmental Studies

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Robert R. Curry, Emeritus

Bryan H. Farrell, Emeritus

Margaret FitzSimmons

Social and spatial aspects of environmental change, the development and regulation of primarysector activities and the regional integration of environmental planning and resources management institutions in urban and rural settings

Gregory S. Gilbert

Disease ecology, conservation biology, tropical forest ecology, microbial ecology

Stephen R. Gliessman

Agroecology, sustainable agriculture, natural history, tropical land use and development, ecology and management of California vegetation

David Goodman, Emeritus

Karen D. Holl

Restoration ecology, conservation biology, landscape ecology

Deborah K. Letourneau

Agroecology, tropical biology, insect-plant interactions, biological control as an alternative to chemical pesticides

Paul L. Niebanck, Emeritus

James E. Pepper, Emeritus

Daniel M. Press

U.S. environmental politics and policy, social capital and democratic theory, industrial ecology, land and species conservation, regionalism

Alan R. Richards

Political economy, agricultural and economic development, economic history

Carol Shennan

Agroecology, ecosystem studies, agriculture-wetland interactions, participatory research, gender, and environmental issues

Michael E. Soulé, Emeritus

Associate Professor

Weixin Cheng

Soil ecology, agroecology, biogeochemistry, global change ecology

Gregory S. Gilbert

Disease ecology, conservation biology, tropical forest ecology, microbial ecology

Brent Haddad

Market-based regulation, property rights, economic institutions and the environment, California water institutions, renewable-resource electricity, greenhouse gas reduction

Michael E. Loik

Plant physiological ecology, climate change ecology, biometeorology, ecohydrology

S. Ravi Rajan

Environmental history and political ecology, risk and disaster studies, science and technology studies, North-South environmental conflicts, environmental social theory, environmental ethics

Assistant Professor

Jeffrey T. Bury

Political ecology; sustainable development; Latin American studies; international relations; institutional dimensions of natural resource conservation in the global south

Christopher C. Wilmers

Population and community ecology, conservation biology, ecological modeling

Erika Zavaleta

Ecology and evolutionary biology, biodiversity and global change, biological invasions, terrestrial plant and ecosystem ecology, ecological economics, human ecology, conservation

Acting Assistant Professor

Zdravka Tzankova

Preventing marine bio-invasions in the United States and Australia: science, politics, and institution in environmental decision-making

Lecturer

Brian K. Fulfrost

Academic Coordinator, Geographic Information Systems Laboratory; data management and analysis for natural and cultural resource management, environmental monitoring, environmental and social impact assessment and environmental policy studies

Margaret H. Fusari

Natural Reserve Coordinator, vertebrate biology and ecology, conservation, natural resource planning, natural reserve management

Andrew Schiffrin

Environmental assessment, transportation, watershed management

Giacomo Bernardi (Ecology and Evolutionary Biology)

Fish biology, phylogenetics, evolution

Michael K. Brown (Politics)

Inequality, race and African American politics, political economy, political development of welfare states, theories and methods of historical social science

Kenneth W. Bruland (Ocean Sciences)

Chemical oceanography, biogeochemistry of trace metals and radionuclides, aquatic chemistry, geochemistry

Edmund Burke III (History)

Islamic history, modern Middle East and North African history, French history, European imperialism, world history

Melissa L. Caldwell (Anthropology)

Poverty and welfare, religious development work, food, transnationalism, socialism and postsocialism, Russia, the former Soviet Union, and Eastern Europe

Mark Cioc (History)

German history, modern European history, environmental history

Daniel P. Costa (Ecology and Evolutionary Biology)

Physiological ecology of marine mammals and birds

Ben Crow (Sociology)

International development, sociology of water and markets, global inequality, South Asia and East Africa, political economy, and green enterprise

E. Melanie DuPuis (Sociology)

Economic sociology, sociology of consumption, sociology of development, political sociology, sociology of the environment, technological change, historical sociology, social theory, food and social chan

James Estes Ecology and Evolutionary Biology and (Ocean Sciences)

Marine sciences, community ecology

Andrew Fisher (Earth Sciences)

Hydrogeology, crustal studies, heat flow, modeling

Jonathan A. Fox (Latin American and Latino Studies)

Latin American and Latino politics, including issues of democratization, social movements, social and environmental policy, immigration, and public interest groups

Laurel R. Fox (Ecology and Evolutionary Biology)

Terrestrial population and community ecology, plant-animal interactions

Diane Gifford-Gonzalez (Anthropology)

Paleolithic and Neolithic Africa and Eurasia, colonial New Mexico, origins of food production, pastoralists, zooarchaeology, history of archaeology, interpretive theory, visual anthropology

James B. Gill (Earth Sciences)

Igneous petrology, geochemistry of island arcs

Gary B. Griggs (Earth Sciences)

Coastal processes, hazards and engineering

Daniel Guevara (Philosophy)

Kant, moral philosophy, moral psychology, environmental ethics, history of modern philosophy

Julie H. Guthman (Community Studies)

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

Donna J. Haraway (History of Consciousness and Feminist Studies)

Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

Ronnie D. Lipschutz (Politics)

International relations; international political economy; foreign policy; resource/environmental politics; global political networks; global civil society; film, fiction, and politics; technology and society; states of terror

Paul M. Lubeck (Sociology)

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

Charles L. (Leo) Ortiz (Ecology and Evolutionary Biology)

Physiology of marine mammals, physiological integration, physiology of secretion

Ingrid M. Parker (Ecology and Evolutionary Biology)

Plant ecology, pollination, plant-pathogen interactions, biological invasions

Manuel Pastor Jr., (Latin American and Latino Studies)

Urban poverty and regional development, Latinos in the urban U.S., environmental justice, macroeconomic stabilization in Latin America; distribution and growth in the developing world; Cuban economic reform; Mexican economic reform

Grant H. Pogson (Ecology and Evolutionary Biology)

Molecular population genetics, ecological genetics, marine invertebrates and fishes

Donald C. Potts (Ecology and Evolutionary Biology)

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

Hugh Raffles (Anthropology)

Nature, the non-human, intimacy, scale, taxonomy, writing, Brazilian Amazon

Peter T. Raimondi (Ecology and Evolutionary Biology)

Marine ecology, evolutionary ecology, experimental design, applied ecology

Mary W. Silver (Ocean Sciences)

Biological oceanography, marine plankton, midwater ecology

Lisa C. Sloan (Earth Sciences)

Paleoclimatology, climate change, Earth system science, surficial processes

Donald R. Smith (Environmental Toxicology)

Neurotoxicity, cellular and organismal responses to environmental toxins

Andrew Szasz (Sociology)

Environmental sociology (environmental movements, policy, environmental justice); theory

Dana Y. Takagi (Sociology)

Social inequality and identity, research methods, race relations, nationalism and social movements

Anna Tsing (Anthropology)

Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnoecologies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

Terrie M. Williams (Ecology and Evolutionary Biology)

Vertebrate locomotor and thermoregulatory physiology; marine biodiversity; comparative vertebrate energetics, exercise physiology

Patricia Zavella (Latin American and Latino Studies)

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexicana/o workers and U.S. capital

Environmental Studies

405 Interdisciplinary Sciences Building (831) 459-2634 http://envs.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

15. Natural History of the UCSC Campus (2 credits). S

Introduces students to the range of natural species and communities occurring on the UCSC campus. All class time is spent outside, and each week a different area of campus is visited. Course 24 is recommended. Enrollment limited to 21. *T. Haff*

23. The Physical and Chemical Environment. S

Introduces students to basic physical and chemical processes that govern the structure and function of ecosystems. Topics to be covered include climate and weather, soil types and their formation, and biogeochemical cycles. (General Education Code(s): IN.) *W. Cheng*

24. General Ecology. F

Covers principles of ecology including limits to species abundances, evolutionary ecology, population dynamics, community interactions and patterns, and ecosystem patterns and dynamics. (General Education Code(s): IN.) *J. Washburn*

25. Environmental Policy and Economics. W

Environmental policy issues are situated within historical developments in political and economic systems. Introduces some of the key concepts of politics and economics by way of examining the processes which have given rise to environmental issues, their social and political perception, and institutional responses. (General Education Code(s): IS.) *B. Haddad*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

80A. The Future of Rain Forests. S

A broad overview of both ecological and social aspects related to tropical rain forests drawing on case studies worldwide. Topics include the biology and distribution of rain forests, causes and effects of their destruction, and management options to facilitate their conservation. (General Education Code(s): T7-Natural Sciences or Social Sciences.) (S) The Staff

80B. The Ecological Forecast for Global Warming. F

A broad overview of the impacts of human activities on the global climate system. Topics include how climate affects the distribution of ecosystems, the influence of global climate change on biodiversity, ecosystem function, and consequences for the human enterprise. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *M. Loik*

83. Environmental Studies Internship. F,W,S

A supervised off-campus learning experience related to environmental problem solving. Focuses on initial experiences in applied work and specific skill development. Students may be placed individually or with a team in government agencies, private organizations, citizen action groups. May be repeated for credit. *The Staff*

84. Environmental Studies Internship (2 credits). F,W,S

Supervised learning experience designed to introduce environmental issues and problem solving. Places students with governmental and nongovernmental agencies, private organizations, schools, or in specialized apprenticeships. Two-unit internship intended to focus interest and to develop skills for more advanced work. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

91F. Community and Agroecology (2 credits). F,W,S

Interdisciplinary two-credit seminar designed to introduce students to concepts of community and agroecology in the context of sustainability. Course can serve as a gateway to or as a continuing basis for participation in PICA (Program in Community and Agroecology). Specific topics and readings change each quarter. Enrollment limited to 25. May be repeated for credit. *S. Gliessman*

93. Field Study. F,W,S

Supervised research or organized projects for lower-division students conducted off campus within regular commuting distance of the campus. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

93F. Field Study (2 credits). F,W,S

Provides for department-sponsored individual field study for lower-division students in the vicinity of the campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chairperson of Environmental Studies Department. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Provides for department-sponsored directed reading, supervised research, or organized project for lower-division students under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

100. Ecology and Society. F

Introduction to environmental issues in an interdisciplinary matrix. Focuses on three issues at the intersection of ecological questions and social institutions: agroecology and sustainable agriculture; population growth, economic growth, and environmental degradation; and biodiversity conservation and land management. Reviews the important roles of disciplinary abstraction and of the application of that knowledge to context-dependent explanation of environmental problems. Enrollment restricted to environmental studies, environmental studies/biology, environmental

studies/economics, and environmental studies/Earth sciences majors. Prerequisite(s): course 23 or Chemistry 1A or 1B; course 24 or Biology 20C; course 25; and Applied Mathematics and Statistics 7 and 7L. Concurrent enrollment in 100L is required. *E. Zavaleta, G. Gilbert, J. Bury*

100L. Ecology and Society Writing Laboratory (2 credits). F

Required writing lab accompanying course 100. Students are introduced to writing in different styles and for different audiences typical of the ecosystem-society interface. Course 100 writing assignments are developed, written, and revised in conjunction with the lab. W credit is granted only upon successful completion of course 100. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in 100 is required. Enrollment limited to 20. (General Education Code(s): W.) E. Zavaleta, G. Gilbert, J. Bury

104A. Introduction to Environmental Field Methods. *

A course in basic field skills including habitat description, behavior observation, specimen collection techniques, mapping and map interpretation, vegetation analysis, population sampling, microclimate measurement, soil and water sampling. Emphasis on use of the scientific method; experimental design, data handling, statistical analysis and presentation; and basic field methodologies. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 24 or 100 or Biology 20C, and Applied Math and Statistics 7 and 7L. Enrollment limited to 44. (General Education Code(s): W.) *The Staff*

105. Biology and Ecology of the Vertebrates. *

An introduction to the fundamentals of vertebrate biology and ecology including evolutionary history, basic anatomy and physiology, systematics, ecology and major specializations for locomotion, reproduction, homeostasis, energy balance, and thermoregulation. (Also offered as Biology 138. Students cannot receive credit for both courses.) Prerequisite(s): course 24, Biology 20C, or 150; basic biology is recommended. Concurrent enrollment in 105L is required. Enrollment restricted to environmental studies majors and combined majors. Enrollment limited to 50. *The Staff*

105L. Biology and Ecology of the Vertebrates Laboratory (2 credits). *

Covers the basics of vertebrate anatomy and taxonomy with emphasis on local species identification. Lab includes a weekly film series and two Saturday trips to the California Academy of Sciences. Concurrent enrollment in course 105 is required. (Also offered as Biology 138L. Students cannot receive credit for both courses.) Prerequisite(s): course 24, Biology 20C, or 150. Concurrent enrollment in course 105 is required. Enrollment restricted to environmental studies majors and combined majors. Enrollment limited to 12. *The Staff*

107A. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Concurrent enrollment in courses 107B and 107C required. Students are billed a materials fee. Enrollment limited to 24. Offered in alternate academic years. *S. Gliessman*

107B. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural

history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Concurrent enrollment in courses 107A and 107C required. Enrollment limited to 24. *The Staff*

107C. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Concurrent enrollment in courses 107A and 107B required. Enrollment limited to 24. *S. Gliessman*

108. General Entomology. *

Introduction to entomology including anatomy, physiology, systematics, evolution, behavior, and reproduction of the world's most diverse group of organisms. These topics are illustrated in several contexts, from the importance of insects as disease vectors to the historical and contemporary uses of insects by humans. Enrollment limited to 20. Offered in alternate academic years. *D. Letourneau*

108L. General Entomology Laboratory (3 credits). *

Laboratory sections are devoted to the identification of insects. Individual collections representing 15 orders, sight identification of 60 families, and use of taxonomic keys for positive designations required. Concurrent enrollment in course 108 is required. Enrollment limited to 10. Offered in alternate academic years. *D. Letourneau*

109A. Ecology and Conservation in Practice Supercourse: Ecological Field Methods. S

An intensive, on-site learning experience in terrestrial field ecology and conservation, using the University of California Natural Reserves. Students study advance concepts in ecology, conservation, and field methods for four weeks, then experience total immersion in field research at the UC Natural Reserves. Lectures, field experiments, and computer exercises familiarize students with research methods, study design, statistical approaches, and analytical tools for ecological research. Enrollment by application. Prerequisite(s): Biology 20A, 20B, 20C or Environmental Studies 23, 24, 100; and Applied Mathematics and Statistics 7 and 7L. Concurrent enrollment in Biology 165B-C-D or Environmental Studies 109B-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and Biology 141, 141L, Environmental Studies 104A or 196A. (Also offered as Biology 165A. Students cannot receive credit for both courses.) Enrollment limited to 25. *E. Zavaleta*, *D. Croll*

109B. Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory. S

Field-oriented course in ecological research. Combines overview of methodologies and approaches to field research with practical field studies. Students complete field projects in ecology and also learn the natural history of the flora and fauna of California. Students are billed a materials fee. Enrollment by application. Prerequisite(s): Entry Level Writing and Composition requirements; Biology 20A, 20B, 20C or Environmental Studies 23, 24, 100; and Applied Mathematics and Statistics 7 and 7L. Concurrent enrollment in Biology 165A-C-D or Environmental

Studies 109A-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and Biology 141, 141L, Environmental Studies 104A or 196A. (Also offered as Biology 165B. Students cannot receive credit for both courses.) Enrollment limited to 25. (General Education Code(s): W.) *E. Zavaleta, D. Croll*

109C. Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems. S

From lectures and discussion of terrestrial community and ecosystem ecology, students work individually or in small groups to present an idea for a project, review relevant literature, develop a research question/hypothesis, design and perform an experiment, collect and analyze data, and write a report. The instructor evaluates the feasibility of each student's project before it begins. Enrollment by application. Prerequisite(s): Biology 20A, 20B, 20C or Environmental Studies 23, 24, 100; and Applied Mathematics and Statistics 7 and 7L. Concurrent enrollment in Biology 165A-B-D or Environmental Studies 109A-B-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and Biology 141, 141L, Environmental Studies 104A or 196A. (Also offered as Biology 165C. Students cannot receive credit for both courses.) Enrollment limited to 25. *E. Zavaleta*, *D. Croll*

109D. Ecology and Conservation in Practice Supercourse: Conservation in Practice. S

Focuses on current issues in environmental and conservation biology and the emerging field methods used to address them. From field-oriented lectures about current issues in environmental and conservation biology, students pursue research project as individuals and small groups to develop hands-on experience with field skills in conservation research and resource management. Enrollment by application. Prerequisite(s): Biology 20A, 20B, 20C or Environmental Studies 23, 24, 100; and Applied Mathematics and Statistics 7 and 7L. Concurrent enrollment in Biology 165A-B-C or Environmental Studies 109A-B-C is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and Biology 141, 141L, Environmental Studies 104A or 196A. (Also offered as Biology 165D. Students cannot receive credit for both courses.) Enrollment limited to 25. *E. Zavaleta*, *D. Croll*

110. Institutions, the Environment, and Economic Systems. S

Debate about environmental policy is often couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on the functioning of the market system. Examines the assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy and political institutions. Prerequisite(s): course 100. (S) M. Fitzsimmons

115A. Geographic Information Systems and Environmental Applications. F Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 215A. Prerequisite(s): Applied Math and Statistics 5 or 7.

Enrollment restricted to environmental studies majors and the combined majors. Course 115L is required. A course in computer science, Earth sciences, mathematics, or geography is recommended. Enrollment limited to 40. *B. Fulfrost*

115L. Exercises in Geographic Information Systems (2 credits). F

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course 215L. Enrollment restricted to environmental studies majors and students majoring in the combined majors with biology, Earth sciences, and economics. Concurrent enrollment in course 115A required. *B. Fulfrost*

120. Conservation Biology. W

Biological principles and their application to conservation with emphasis on the loss of biodiversity. Prerequisite(s): course 24 or Biology 20C or Biology 150. A course in statistics is strongly recommended and calculus is recommended as additional preparation. Enrollment limited to 70. *C. Wilmers*

122. Tropical Ecology and Conservation. S

An introduction to the ecological processes, principles, and players of tropical ecosystems, and to conservation issues facing tropical American forests. We will look at how tropical ecosystems work, roles of humans in shaping them, and current conservation opportunities and dilemmas. Prerequisite(s): course 24 or Biology 20C or 150. A course in statistics and precalculus is recommended. *G. Gilbert*

123. Animal Ecology and Conservation. F

Introduction to study of animals, including how field study can be made scientifically rigorous. Reviews evolutionary relationship among vertebrates and their special adaptions. Students are exposed to principles in population and community ecology, biogeography, and behavioral and physiological ecology as they relate to vertebrates. Prerequisite(s): courses 24 and 100. Enrollment limited to 30. *The Staff*

129. Integrated Pest Management. S

Provides an extensive coverage of applied ecology, pest control technology, and the social, political, and economic factors regulating the ideologies and practice of pest management. Topics include agroecosystem design and population regulation of insects, weeds, vertebrates, and pathogens; field monitoring, chemical and biological control; economic thresholds, decision-making processes, and the role of agribusiness. Prerequisite(s): course 24 or Biology 20C or 150. A course in general entomology is recommended. *S. Swezey*

129L. Integrated Pest Management Laboratory (2 credits). S

Field trips and field exercises that demonstrate the practice of integrated pest management techniques. Individual and group projects provide hands-on experience with field sampling techniques, pest identification, recognition of biological control agents, experimental design, interview techniques, data interpretation and field report writing. Prerequisite(s): course 24 or Biology 20C or 150; concurrent enrollment in course 129. *S. Swezey*

130A. Agroecology and Sustainable Agriculture. F

Ecological concepts and principles are applied to the design and management of

sustainable agroecosystems. Alternatives for agriculture are discussed in terms of ecosystem structure and function. A weekly three-hour lab is required. Prerequisite(s): course 24 or Biology 20C or consent of instructor; concurrent enrollment in course 130L. Enrollment restricted to environmental studies and biology majors and students in the combined majors with Earth sciences, biology, and economics. *S. Gliessman*

130B. Principles of Sustainable Agriculture. W

Agricultural sustainability is examined as a complex set of interactions between ecological, social, and economic components of an agroecosystem. Case studies are drawn from issues facing current U.S. agriculture and a basis for formulating policy for change that ensures sustainability is developed. Prerequisite(s): Restricted to junior and senior majors in environmental studies and the combined majors with Earth sciences, biology, and economics; and to graduate students. *M. Fitzsimmons*

130L. Agroecology and Sustainable Agriculture Laboratory (2 credits). F

Laboratory and field exercises to train in the analysis of ecological processes in agricultural systems, with a focus on the quantification of ecological sustainability. Experimental design, analysis, and data interpretation are emphasized. Prerequisite(s): course 24 or Biology 20C; interview and concurrent enrollment in course 130A is required; bring class and work schedule to first class meeting. Enrollment restricted to environmental studies and biology majors and students in the combined majors with Earth sciences, biology, and economics. *S. Gliessman*

131. Insect Ecology. *

Advanced course in ecology featuring insect-plant interactions such as herbivory, pollination, and the effects of plants on insect population dynamics. Lectures emphasize current controversies in ecological theory and relate theory to application. Prerequisite(s): course 24 or Biology 20C, and Applied Mathematics and Statistics 7 and 7L. Enrollment limited to 20. Offered in alternate academic years. *D. Letourneau*

131L. Insect Ecology Laboratory (3 credits). *

Field and laboratory exercises are designed to test hypotheses or demonstrate principles in areas such as behavior, mutualism theory, community ecology, and agricultural ecology. Experimental design, analysis and interpretation of data are emphasized along with observational skills. Prerequisite(s): course 24 or Biology 20C; Applied Mathematics and Statistics 7 and 7L; concurrent enrollment in course 131. Enrollment limited to 10. Offered in alternate academic years. *D. Letourneau*

133. Agroecology Practicum. W

Lectures and demonstrations are combined with field applications to give students direct experience and knowledge of sustainable agriculture and horticulture practices and principles. UCSC Farm and Garden are the living laboratories for testing agroecological principles. Emphasis is placed on small-farm systems. Prerequisite(s): courses 130A and 130L. Enrollment restricted to majors in environmental studies and the combined majors with Earth sciences, biology and economics. Admission by interview only. Enrollment limited to 25. Offered in alternate academic years. *C. Shennan*

138. Field Ethnobotany. *

Lectures, laboratory, and fieldwork examine field botany from a human ecology perspective. Students have the opportunity to learn the skills of field botany and plant identification through the study of plants that are of major significance for human

cultures. The emphasis of field skills is on applications to sustainable management of natural resources. Concurrent enrollment in course 138L required. Enrollment limited to 40. Offered in alternate academic years. *S. Gliessman*

138L. Ethnobotany Laboratory (2 credits). *

Laboratory and field studies allow students to learn the taxonomy of important useful plant families, carry out field studies on local plant use and management practices, and investigate in detail home garden agroecosystems and model systems. Prerequisite(s): concurrent enrollment in course 138 required. Enrollment limited to 40. *S. Gliessman*

140. National Environmental Policy. W

An overview of all major federal environmental policy domains. Analyzes political, social, economic, and other forces influencing federal (and some state) public policy responses to land use, natural resources, pollution, and conservation dilemmas. Course 25 and/or Politics 20 strongly recommended as preparation. Enrollment restricted to junior and senior environmental studies majors and biology, Earth sciences, and economics combined majors. Enrollment limited to 75. *D. Press*

141. Natural Resource Economics. F

Application of economic analysis to natural resource policy and management. Topics include welfare economics, property rights and externalities, natural resource valuation, exhaustible and renewable resources, and sustainable development. Economics 1 is strongly recommended as preparation. Enrollment restricted to environmental studies majors and biology, Earth sciences, and economics combined majors. *A. Richards*

143. Sustainable Development: Economy, Policy, and Environment. W

Considers whether and how global poverty can be alleviated without irreparably damaging the environment. Examines interactions among population, economic growth, poverty, global consumption ethos, property rights systems, global economy, state capacity, and environmental damage. Scrutinizes impact of various developmental strategies adopted during the past 50 years on poverty, governance, and the environment. Prerequisite(s): course 100. Enrollment limited to 47. *J. Bury*

144. Blood and Oil: Natural Resources, Poverty, and Violence. W

Chronological and analytical examination of economics and politics of global oil use. The interactions of state policies, violent conflicts, and natural-resource use are stressed. Focus is on the Middle East, which contains two-thirds of all known petroleum reserves. Other examples of the nexus of conflict and natural-resource use are also considered. Enrollment limited to 50. *A. Richards*

148. Environmental Policy Implementation. S

Assessment of local, state, and federal environmental agency performance, with particular attention to regulatory development and compliance enforcement. Emphasis on successes and failures of both traditional environmental regulations and new policy approaches. Students examine various industry responses to environmental regulations, each case set in the context of overall business performance and sustainability. (Formerly *Environmental Management Systems*.) Prerequisite(s): course 100, and course 140, 141, 149, 151, or 165. Enrollment restricted to environmental studies and environmental studies combined majors. Enrollment limited to 40. *D. Morell*

149. Environmental Law and Policy. S

Surveys a wide range of topics in environmental law, including population control, state and federal jurisdiction, land and resources control, public land management, pollution control, and private rights and remedies. Students read a large number of judicial cases and other legal documents. (Also offered as Legal Studies 149. Students cannot receive credit for both courses.) Enrollment restricted to junior and senior environmental studies majors and biology, Earth sciences, and economics combined majors . Enrollment limited to 60. *The Staff*

151. Environmental Assessment. S

Introduction to California land use planning law and practice, and the theory, practice, and public policy aspects of environmental assessment, using the California Environmental Quality Act (CEQA) as a model. The National Environmental Policy Act (NEPA) and other environmental and planning legislation also considered. Covers elements of State law and regulations, environmental impact assessment requirements, and practical procedures for preparing and evaluating CEQA documents, with case studies that exemplify legal, regulatory and public policy and practice aspects of the assessment process. Prerequisite(s): course 100. Enrollment restricted to junior and senior environmental studies majors and biology, Earth sciences, and economics combined majors. *A. Schiffrin*

152. Science and Land Use Decisions. F

Technical and policy dimensions of major land use decisions will be assessed through a detailed case study. Technical review will stress geological constraints; policy review will stress the CEQA process. The initial case study will be the reuse of Ford Ord. One field trip is required. Prerequisite(s): one of courses 140, 149, 151 (recommended), 165 or Earth Sciences 20. *J. Gill*

153. Trade and the Environment. *

Focuses on international and regional institutional arrangements of free trade and their implications for environment and social well-being. Provides better understanding of environmental issues as elements of social processes. Enrollment restricted to all environmental studies majors. *The Staff*

156. Environmental Action through Writing. W

Guided practice in writing skills useful to environmental activists. Assignments emphasize thinking quickly, revising adeptly, researching resourcefully, and tempering powerful passions with careful arguments. Toward the development of effective individual voices, students read each other's drafts as well as the published work of established writers. Enrollment priority will be given to students who have not taken course 157. Prerequisite(s): course 100/L or concurrent enrollment, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to majors in environmental studies and the combined majors with Earth sciences, biology and economics. Enrollment limited to 28. (General Education Code(s): W.) *The Staff*

157. Writing in the Natural Sciences. *

Guided practice in writing effectively about science and natural history for a variety of audiences. Assignments emphasize reporting first-hand observations, explaining processes and phenomena, understanding scientific papers, and writing about scientific and technical subjects for a general audience. Enrollment priority will be given to students who have not taken course 156. Prerequisite(s): course 100/L or concurrent enrollment, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to majors in environmental studies and the combined majors with Earth sciences, biology, and economics. Enrollment limited to

158. Political Ecology and Social Change. *

The object is to provide a rigorous grounding in the method of political ecology and to demonstrate how this approach has been used in environmental analysis and problem solving by environmental social movements. Enrollment restricted to junior and senior majors in environmental studies and the combined majors in Earth sciences, biology, and economics. Enrollment limited to 20. *D. Goodman*

159. Nature Literature. *

Introduction to 19th- and 20th-century American writers who have influenced our understanding of humans' place in the natural world. Readings include original works as well as biographical and critical texts. Discussions, field trips, and writing assignments emphasize active learning. Prerequisite(s): course 100 and satisfaction of the Subject A and Composition requirements. Enrollment restricted to environmental studies, environmental studies/biology, environmental studies/earth sciences, and environmental studies/economics majors. Enrollment limited to 40. *S. Rabkin*

160. Restoration Ecology. F

A multidisciplinary overview of restoring degraded ecosystems. Among the topics addressed are linkages between ecological principles and restoration, planning and implementing restoration projects, evaluating restoration success, and case studies of restoration of specific ecosystem types. Participation in one work day is required. Prerequisite(s): course 23 or Chemistry 1A or 1B and course 24 or Biology 20C. Enrollment limited to 40. *K. Holl*

161A. Soils and Plant Nutrition. W

Provides fundamentals of soils and plant nutrition. The physical, biological, and chemical components of soils are investigated in relation to their ecological functions, fertility to plants, and sustainable management. Prerequisite(s): course 23 or Chemistry 1A or 1B. Enrollment limited to 35. *W. Cheng*

161L. Soils and Plant Nutrition Laboratory (2 credits). W

Practice analytical techniques for evaluation of physical, chemical, and biological properties of soils. Grow plants to observe some typical symptoms of plant nutrient deficiencies. Prerequisite(s): course 23 or Chemistry 1A or 1B. Concurrent enrollment in course 161A is required. Enrollment limited to 18. *W. Cheng*

162. Plant Physiological Ecology. *

Introduces the theory of plant interactions with the physical environment. Emphasizes influence of abiotic stresses on the recruitment, survival, growth, productivity, and reproduction of plants. Prior course work in ecology and/or plant physiology is recommended. Prerequisite(s): course 24 or Biology 20C, and Applied Mathematics and Statistics 7 and 7L. Enrollment limited to 24. *M. Loik*

162L. Plant Physiological Ecology Laboratory (2 credits). *

Introduces techniques for the study of plant interactions with the physical environment. Examines the role of stress on energy budgets, water relations, photosynthesis, and reproductive allocation. Emphasizes experimental design, field techniques, and instrumentation during field trips to local chaparral and grassland ecosystems. Prior course work in ecology and/or plant physiology is recommended. Prerequisite(s): course 24 or Biology 20C; and Applied Mathematics 7 and 7L. Enrollment limited to 24. *M. Loik*

163. Plant Disease Ecology. *

Introduction to ecological roles of plant diseases, including their importance in regulating plant population dynamics, community diversity, and system function in natural ecosystems; considerations of plant diseases in conservation ecology; and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 263. Prerequisite(s): course 24 or Biology 20C or 150. A statistics course is strongly recommended. *G. Gilbert*

163L. Plant Disease Ecology Lab (2 credits). *

Introduction to techniques for studying plant diseases, including detection, isolation, cultivation, and identification of important groups of plant pathogens, completing Koch's postulates; diseases assessment techniques; experimental manipulation of plant-pathogen systems; and basic epidemiological tools. One field trip required. Prerequisite(s): course 24 or Biology 20C or 150; concurrent enrollment in course 163 required. A statistics course strongly recommended. Enrollment limited to 24. *G. Gilbert*

165. Freshwater Issues and Policy. F

Concepts, vocabulary, and skills necessary to the analysis of freshwater issues are introduced from hydrology, ecology, law, economics, engineering, and other disciplines. The skills are then applied to case studies involving local, state, and international freshwater conflicts and crises. Prerequisite(s): courses 23 and 25. Enrollment restricted to environmental studies majors and biology, Earth sciences, and economics combined majors. *B. Haddad*

166. Agroecosystem Analysis and Watershed Management. S

Explores a range of approaches to examine agroecosystem function, watershed management, and concepts of sustainability. Uses a combination of lecture, demonstration, field work, and field trips to illustrate approaches to analysis of managed ecosystems behavior and the integration of biophysical and socio-political knowledge to aid in watershed management. Prerequisite(s): course 130A/L or 130B or 129 or 133 or 160 or 167. Enrollment restricted to junior and senior environmental studies/combined majors. A 2-unit concurrent internship is strongly recommended. Enrollment limited to 30. *C. Shennan*

167. Freshwater and Wetland Ecology. *

Field and lecture course teaches the physical and biological patterns and processes in freshwater and wetland systems, primarily focusing on Central Coast systems from headwaters to coastal marshes. Prerequisite(s): course 24 or Biology 20C and Chemistry 1A. Enrollment limited to 30. *The Staff*

167L. Freshwater and Wetland Ecology Lab (2 credits). *

Provides basic skills to assess chemical, biological, and physical characteristics of freshwater creeks, rivers, and wetlands. These skills are needed in environmental consulting, municipal agencies engaging in water management or impacts on water, and regulatory agencies. Relies on methods in geomorphology, biogeochemistry, hydrology, and field biology. Enrollment restricted to environmental studies, environmental studies/Earth sciences, environmental studies/biology, and environmental studies/economics majors. Concurrent enrollment in course 167 is required. Enrollment limited to 20. *The Staff*

168. Biogeochemistry and the Global Environment. *

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural

sustainability. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 268. Prerequisite(s): course 23 or Chemistry 1A or 1B or 1C. W. Cheng

172. Science, Policy, and the Environment. *

Introduces students to the dilemmas of science-based environmental policy and discusses their underlying philosophical underpinnings. Explores emergent alternatives, such as the precautionary principle and alternatives assessment, and examines the relationship between experts and the lay public in public controversies. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *S. Rajan*

173. An Introduction to World Environmental History. *

Introduces students to some of the central issues in world environmental history such as: human attitudes toward the natural environment; the role of human societies, their institutions and technologies in changing the face of the earth; and the historical impact of environmental and developmental policies on race, class, and gender differences in a variety of human communities across the world. Prerequisite(s): course 100. Enrollment limited to 30. *The Staff*

175. Biotechnology: Social and Environmental Dimensions. *

Surveys the rapid development of genetic engineering science and biotechnology-based industries and examines the economic, health, environmental, legal, and social justice dimensions of new biotechnology applications: genetic screening, cloning, transgenic animals and crops, genetically engineered food, and biodiversity prospecting. Readings, lectures, World Wide Web site reviews, student presentations, and papers will address controversial choices faced now by scientists, farmers, doctors, consumers, public officials, and global governance agencies. Prerequisite(s): course 25 strongly recommended. Enrollment limited to 30. *The Staff*

179. Environmental Interpretation. S

A field course in theory and practice of environmental interpretation in parks, museums, and school programs with special attention to local natural history and children. Students will work to define their own interpretive philosophy, skills, and style. Background in natural history and/or experience working with children recommended. Preference given to juniors. Prerequisite(s): course 100. Concurrent enrollment in course 184 required. Preference given to juniors. Enrollment limited to 18. *P. Holloran*

183. Environmental Studies Internship. F,W,S

A supervised off-campus learning experience related to environmental problem solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. Internship intended for environmental studies majors. Prerequisite(s): permission of instructor. Students submit petition to course sponsoring agency. May be repeated for credit. *The Staff*

183B. Senior Internship. F,W,S

Open to declared majors only, this course combines fieldwork at an off-campus agency and a comprehensive analytical paper produced for the agency. Equivalent to a thesis in terms of the depth and quality of the work expected, it is combined with a 5-credit internship. Concurrent enrollment in course 183 required. Students submit petition to sponsoring agency. Enrollment restricted to environmental studies majors

and the combined majors with Earth sciences, biology and economics. The Staff

184. Environmental Studies Internship (2 credits). F,W,S

A supervised learning experience related to environmental problem solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. This 2-credit internship focuses on specific skill development and must be connected to another internship, thesis, or course—except in rare circumstances for which students must petition. May be repeated for credit. *The Staff*

189. Environmental Studies Research Seminar (1 credit). F,W,S

Research seminars presented weekly throughout the year by environmental studies faculty, visiting scholars, and graduate students. Students discuss content and methodology of research presented following each seminar. Students write critiques of some seminars. May be repeated for credit. *E. Zavaleta*

190. Capstone Course: Environmental Problem Solving. W

A synthetic course that draws on the knowledge and skills students bring from other courses in the major. Focuses on written and oral individual and group projects in which students must take the initiative. Emphasizes developing skills critical for students in their future careers. (Formerly *Capstone Course: Environment and Culture.*) Prerequisite(s): course 100. Enrollment restricted to senior environmental studies majors and the combined majors with Earth sciences, biology, and economics. *S. Rajan*

191F. Community and Agroecology Seminar (2 credits). F,W,S

Interdisciplinary two-credit seminar designed for upper-division students who want to become involved in PICA (Program in Community and Agroecology) and to explore concepts of community and agroecology as they relate to sustainability. Also emphasizes development of leadership skills. Specific topics and readings change each quarter. Prerequisite(s): course 91F, 130A, 130B, 133, or equivalent experience. Enrollment limited to 25. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar. (See course 42.) Prerequisite(s): upper-division standing; permission of environmental studies faculty member and chairperson of department. *The Staff*

193. Field Study. F,W,S

Supervised research or organized projects relating to environmental problems, supplemented by guided individual study. May be repeated for credit with consent of the chairperson of environmental studies. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides for department-sponsored individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Teaching Environmental Studies. F,W,S

This provides an opportunity to participate in the preparation and teaching of introductory environmental studies courses. Students will have significant responsibility in leading discussion sections. Students submit petition to sponsoring

195A. Senior Research. F,W,S

An individually supervised course, with emphasis on independent research that either results in a thesis or project or is done in conjunction with a senior internship. In order to receive credit, students must turn in two bound copies of the final write-up. Satisfies the senior comprehensive requirement. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis Group. W

Students involved in group or individual research that results in a senior thesis or project or done in conjunction with an internship meet regularly with their faculty sponsor to discuss the progress of their work, to receive academic and technical guidance, and to critique one another's written work. To receive credit the student must submit two bound copies of the completed research and write-up. Satisfies the senior comprehensive requirement. Students must discuss details with faculty sponsor. Students submit petition to sponsoring agency. S. Gliessman

196A. Senior Seminar: Management of Protected Lands. S

Through selected readings, explores natural reserve and biodiversity management. Completion of an individual/team project related to University of California, Santa Cruz, natural reserves (campus, Younger Lagoon, Fort Ord). Project focus may be on reserve planning and policy, ecological diversity, design and management, or program development. Prerequisite(s): course 100 or permission of instructor. Enrollment restricted to senior environmental studies majors. Enrollment limited to 15. A. Richards

196B. Senior Seminar: Methods in Environmental Policy Analysis. *

Introduction to some of the tools in environmental policy analysis, ranging from quantitative techniques (drawing on economics and statistics) to cross-cutting, qualitative designs. Students perform policy analysis exercises throughout the quarter and evaluate normative dimensions of competing analytic techniques. Prerequisite(s): instructor determination based on student's academic background. Enrollment limited to 18. *The Staff*

196D. Senior Seminar: Risks, Values, and Choices. *

Advanced readings and research on environmental risk and public choice and policy. Builds on course 172 and explores the values and choices implicit in conventional risk assessment methodologies as well as those in emergent alternatives, such as the precautionary principle. Prerequisite(s): course 172 and interview to determine level of preparation and appropriateness of background. Enrollment restricted to senior and graduate environmental studies majors and Earth sciences, biology, and economics combined majors. Enrollment limited to 20. *S. Rajan*

196E. Senior Seminar: Advanced Agroecosystem Analysis. *

Explores a range of approaches to examine agroecosystem function and concepts of sustainability. The Center for Agroecology and Sustainable Food Systems farm and its surrounding habitat will be the major focus of independent or group field research, but off-site locations may also be studied. Students will learn field and analytical techniques, formulate a research project, design a data collection scheme, conduct research, and provide a written analysis and discussion of their results. Prerequisite(s): course 130A or 130B. Enrollment limited to 15. *C. Shennan*

196K. Senior Seminar: Sustainable Development in Developing Countries. *

Analyzes selected topics in policy issues surrounding sustainable development in developing countries. Theoretical issues/definitions of "sustainability" will be examined, and concrete cases of environmental and natural resource policy choices will be analyzed. Prerequisite(s): permission of instructor only with assessment of level and suitability of prior coursework. Enrollment limited to 20. A. Richards

196P. Senior Seminar: Regional Foodshed Research Practicum. S

This course involves supervised individual and group interdisciplinary research on ecological and social justice dimensions of food production and community food security in the Monterey Bay region. Students are expected to actively engage with regional actors, local agencies, and community programs. Prerequisite(s): interview to determine background and interest in doing advanced field research on local agrofood issues with assessment of quality of work in relevant courses. Enrollment limited to 15. May be repeated for credit. *D. Press*

196R. Senior Seminar: Advanced Research Topics in Applied Ecology. *

Faculty-facilitated research projects conducted within a central theme to satisfy the senior exit writing requirement. Themes have theoretical and applied components and encompass multiple disciplinary approaches. Examples include "Forest Ecology and Exploitation" and "Transgenic technologies: Science and Policy." Prerequisite(s): student must present theme-based research ideas in interview with instructor. Enrollment limited to 20. *D. Letourneau*

196S. Senior Seminar: Functions and Processes of Terrestrial Ecosystems. *
Students present an idea for a project, review relevant literature, develop a research question/hypothesis, design and execute an experiment, collect and analyze data, and write a report. The instructor evaluates the feasibility of each student's project initially. Prerequisite(s): permission of instructor only with assessment of level and suitability of prior coursework. Enrollment restricted to seniors. Enrollment limited to 15. W. Cheng

196V. Senior Seminar: Organic Agriculture Theory and Practice. *

Interdisciplinary research seminar examining scientific theory and practice of organic agriculture in both biological and social contexts. Research emphasis placed on ecology of organically-managed agroecosystems and the growing market and consumption of organic commodities. Prerequisite(s): course 129, or 130A or 133 or 161; interview to determine level of preparation and appropriateness of background. Enrollment restricted to senior environmental studies majors and the combined majors with biology, Earth sciences, and economics. Enrollment limited to 15. *S. Gliessman, S. Swezey*

198. Independent Field Study. F,W,S

Student's supervision is conducted by a regularly appointed officer of instruction by means other than usual supervision in person (e.g., by correspondence) or student is doing all or most of the course work off campus. Prerequisite(s): suitable preparation for fieldwork and facility and competence in subject matter area; students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual field study off campus for which faculty supervision is not in person but by correspondence. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Advanced directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chair of environmental studies. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Provides for department-sponsored directed reading, supervised research, or organized project under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201A. Keywords and Concepts. F

Two-quarter course introduces keywords and concepts that underlie interdisciplinary work in environmental studies through lectures, directed readings, and discussion. Modules include resonant concepts in ecology and society; ecology and evolution; environment and development; the global environment and society; agroecology and conservation biology; and public policy, economics, and law. Final grade for both courses assigned at the end of the second quarter. Enrollment restricted to graduate students. *M. Fitzsimmons, D. Letourneau*

201B. Keywords and Concepts. W

Two-quarter course introduces keywords and concepts that underlie interdisciplinary work in environmental studies through lectures, directed readings, and discussion. Modules include resonant concepts in ecology and society; ecology and evolution; environment and development; the global environment and society; agroecology and conservation biology; and public policy, economics, and law. Final grade for both courses assigned at the end of the second quarter. Enrollment restricted to graduate students. *The Staff, W. Cheng*

201M. Developing Research Proposals (2 credits). S

Offers graduate students the opportunity to become familiar with the research expertise of the faculty in the Environmental Studies department. Enrollment restricted to graduate students. *D. Press*

201N. Interdisciplinary Research Design in Environmental Studies (3 credits). S

Provides students with opportunities to learn research protocols, practices, and methods used in environmental studies. Combination of lectures, reading, practical exercises, and short projects used to explore how these methods can best be incorporated into interdisciplinary research designs. Enrollment restricted to graduate students. *G. Gilbert*

210. Political Ecological Thought and Environment. W

Provides an introduction to social scientific analyses of the relationships between capitalistic development and the environment in the late 20h century. It has a dual purpose: First, to develop a contemporary historical understanding and sensibility of how economic change, new institutional configurations, and world scale processes are shaping interactions with the environment. Second, to examine some recent political social theoretical perspectives on nature-society relations and radical environmental and social movements. Enrollment restricted to graduate students in environmental studies. *M. Fitzsimmons*

215A. Geographic Information Systems and Environmental Applications. F

Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 115A. Concurrent enrollment in course 215L is required. Enrollment restricted to environmental studies graduates students. Enrollment limited to 10. *B. Fulfrost*

215L. Exercises in Geographic Information Systems (2 credits). F

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course course 115L. Concurrent enrollment in course 215A is required. Enrollment restricted to environmental studies graduate students. Enrollment limited to 15. *B. Fulfrost*

220. Conservation Biology. F

The principles of conservation biology, including a review of the core disciplines of demography, population genetics, island biogeography, and community ecology and discussion of area and edge effects, population viability, and ecosystem issues related to the maintenance of biological diversity, especially in fragmented landscapes. Enrollment restricted to environmental studies graduate students. Enrollment limited to 20. *C. Wilmers*

230. Agroecology and Sustainable Agriculture. W

The application of ecological concepts and principles to the design and management of agricultural systems. The long-term goal of sustainable agroecosystems is examined in economic, social, and ecological contexts. Enrollment restricted to environmental studies graduate students. *S. Gliessman*

235. Social Theories of Nature. *

Intensive reading and discussion seminar on the treatment of nature in social theory. Focuses on major recent works which examine nature in social theory, in themselves, and in the context of the intellectual history of development of disciplinary discourses about nature. Students write critical reviews of assigned books and a research paper situating a particular book within its intellectual tradition. Prerequisite(s): interview with instructor to determine preparedness. Enrollment limited to 15. May be repeated for credit. *M. Fitzsimmons*

240. Public Policy and Conservation. *

Introduction to political and economic approaches to policy analysis, with particular reference to natural resource scarcity, property rights, and environmental conservation. Case studies apply economic and policy process concepts to the management of public lands, biodiversity, and renewable resources. Enrollment restricted to environmental studies graduate students. *D. Press*

247. Regional Approaches to Environmental Policy. *

A research seminar combining theoretical issues in democratic theory, political economy, and planning with emerging concepts of bioregionalism. The focus is on institutional, scientific, and political innovations in managing the environment. Students evaluate current and historical proposals to regionalize environmental

policy in the U.S. Enrollment restricted to environmental studies graduate students. Enrollment limited to 15. *The Staff*

263. Plant Disease Ecology. *

Introduction to ecological roles of plant diseases, including their importance in regulating plant populations dynamics, community diversity and system function in natural ecosystems, considerations of plant diseases in conservation ecology, and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 163. Prerequisite(s): one ecology course. Enrollment restricted to graduate students. *G. Gilbert*

268. Biogeochemistry and the Global Environment. *

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural sustainabilty. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 168. Enrollment restricted to environmental studies graduate students. Enrollment limited to 15. *W. Cheng*

271. Valuing the Environment. *

Intensive seminar examining the normative underpinnings of environmental values. Draws on tools from analytical, ethical, and political philosophy to develop normative arguments concerning environmental inequality and justice, environmental preservation, and risk evaluation. Involves team projects in which students develop cases on controversial contemporary issues such as biotechnology. Prerequisite(s): interview only. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *S. Rajan*

280. Advanced Topics in Environmental Studies. F

Intensive research seminar, including reading and critique of primary research literature and research in progress. Topics vary and are announced in advance; students should consult with faculty prior to enrolling. Enrollment by permission of instructor. Enrollment restricted to graduate students. May be repeated for credit. *J. Guthman*

281C. Advanced Readings in Risk and Public Policy. *

Advanced readings and research on environmental risk and public policy. Explores environmental decision making given the question of the burden of proof and scientific uncertainty and grapples, in an advanced manner, with emergent policy alternatives, such as the precautionary principle. Also offered as course 291C for 3 credits. Prerequisite(s): course 172 or equivalent work demonstrated by an interview. Enrollment restricted to graduate students. Enrollment limited to 10. *S. Rajan*

283. Environmental Studies Internship. F,W,S

Graduate level internship focuses on integrating interdisciplinary academic theory with practical, specialized experience in a professional setting. Course intended for environmental studies graduate students; students must complete paperwork and meet with coordinator prior to first day of instruction. *The Staff*

290. Interdisciplinary Research Seminar (2 credits). F,W,S

Research seminars presented weekly throughout the year by environmental studies and affiliated faculty, by visiting scholars, and by graduate students. Students discuss the content and methodology of research presented following each seminar. Enrollment restricted to graduate students. May be repeated for credit. *E. Zavaleta*

290L. Graduate Research Seminar (2 credits). F,W,S

Graduate student presentations of doctoral research proposals, dissertation work-in-progress, grant applications, and conference papers. This weekly laboratory meeting seeks to develop professional skills, teach constructive criticism, and foster effective discussion among peers. Enrollment restricted to graduate students. *B. Haddad, M. Loik*

291. Advanced Readings in Environmental Studies (3 credits). F,W,S

Focusing on a recently published volume or on a topic of current interest, this seminar requires a rigorous analysis of the principles and methods employed in the four core areas of the program: sustainable agriculture and agro-ecology; conservation biology; environmental policy analysis; and political economy. Enrollment restricted to graduate students. May be repeated for credit. *M. Fitzsimmons, D. Goodman*

291C. Advanced Readings in Risk and Public Policy (3 credits). *

Advanced readings and research on environmental risk and public policy. Explores environmental decision making given the question of the burden of proof and scientific uncertainty and grapples, in an advanced manner, with emergent policy alternatives, such as the precautionary principle. Also offered as course 281C for 5 credits. Prerequisite(s): course 172 or equivalent work demonstrated by an interview. Enrollment restricted to graduate students. Enrollment limited to 10. May be repeated for credit. *S. Rajan*

291D. Advanced Readings in Tropical Ecology, Agriculture, and Development (3 credits). *

Analyzes recent publications in ecology, conservation, agroecology, and development in tropical and subtropical regions, particularly Latin America. Discussions place special emphasis on integration across natural and social science disciplines to address issues of sustainability in tropical regions. Enrollment restricted to graduate students. *The Staff*

291M. Advanced Readings in Biogeochemistry (3 credits). *

Course consists of three parts: fundamental biogeochemistry of the Earth, global cycles of nutrient elements, and societal and scientific issues of global change. Class activities include (1) presentation of summary statements based on reading assignments; (2) discussion of theories, concepts, methodologies, and applications; (3) computer simulation and modeling of elemental cycles using STELLA; and (4) integration of scientific information on global change with social issues by writing. Enrollment restricted to graduate students. *W. Cheng*

291P. Advanced Readings in Environmental History and Anthropology (3 credits). *

Course of readings systematically surveying the theoretical contributions of the disciplines of environmental history, historical ecology, environmental anthropology, and geography. After an overview of the evolution of 20th-century thought on the relationship between environment and culture as seen through the lenses of these disciplines, explores emerging research hybrids and new research frontiers. Enrollment restricted to graduate students. *S. Rajan*

292. Topics in Research in Environmental Studies (2 credits). F,W,S

Seminar in which students give critically evaluated presentations regarding current research in environmental studies and issues in research design. Students should

consult with faculty prior to enrolling. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297F. Independent Study (2 credits). F,W,S

Independent study and research under faculty supervision. Intended to be taken in conjunction with a 5-credit course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

* Not offered in 2007-08

Faculty | Course Descriptions

(There were no substantive changes to the Environmental Toxicology Program Description from the General Catalog 2006-08.)

Program Description

The Environmental Toxicology Department sponsors both undergraduate and graduate courses in environmental toxicology, both within the department and through affiliated departments. The curriculum offers a strong foundation in fundamental and applied toxicology in order to provide the breadth and depth of perspective required for this interdisciplinary science. Research interests of students and faculty in environmental toxicology span the fields of biology, microbiology, chemistry, Earth sciences, ocean sciences, environmental studies, and human health.

Students are expected to combine rigorous academic training with development of sophisticated research skills needed to excel in the rapidly evolving field of environmental toxicology. By understanding (1) sources, transport, and fate of toxins and (2) their interactions with biological systems, students learn to critically assess the complex effects of toxins at the molecular, cellular, organismal, and ecosystem levels.

Graduate Programs

The graduate programs in environmental toxicology, M.S. and Ph.D., are designed to prepare students for careers in research, teaching, industry, and government. The primary criteria for admission to the programs are evidence of superior scholarship in the sciences and a demonstrated ability to conduct innovative research. Preparation in any of the basic natural sciences, computer science, and/or engineering disciplines equivalent to requirements for a bachelor's degree is required.

Students gain expertise in the broad field of environmental toxicology through in-depth research experiences and challenging courses. Research and training in the department focus on both aquatic and terrestrial systems and toxins that range from inorganic pollutants to bacterial pathogens. In the first years of study, both masters and doctoral students take environmental toxicology core courses, as well as other courses selected to strengthen the student's academic training. During this time, the students also commence original thesis research in the laboratory of their major professor.

To solve problems in environmental and organism health, students must understand how toxic substances and pathogens move through the environment, enter organisms and cause harm. As a result, cross-disciplinary training in subjects such as geochemistry, physiology, microbiology, bioinformatics and molecular biology is essential to equip students to tackle challenges in this field. The program includes training in microbial pathogens as toxic agents reasoning that an education in chemical toxins alone is too narrow. The department instructs through in-depth research experiences and courses that develop both a knowledge base and critical thinking abilities.

Students are taught to combine an understanding of the environmental chemistry and exposure routes of toxins with a comprehension of the organismal, cellular, and molecular mechanisms of intoxication. Students gain expertise in environmental toxicology in a dynamic, interactive atmosphere composed of graduate-level lecture and laboratory courses, in-depth seminar classes, and weekly seminar and research presentations. Because the department is diverse and interactive, students become familiar with disciplines ranging from environmental chemistry to molecular genetics to physiology. Collaborations among laboratories, within different departments

to develop expertise are actively supported in the program. Masters students typically finish in two years and Ph.D. students in four to six years.

More information on the requirements for the graduate programs may be obtained from the Division of Graduate Studies or the Environmental Toxicology Department office.

Undergraduate Program

While the Environmental Toxicology Department only awards graduate degrees, it does offer a select number of undergraduate courses to prepare and attract promising undergraduates for advanced studies in environmental toxicology or related disciplines. Students interested in environmental toxicology should major in a field such as biology; marine biology; molecular, cell, and developmental biology; biochemistry; chemistry; Earth sciences; or environmental studies while taking environmental toxicology electives.

In addition, the program provides unique opportunities for exceptional undergraduates to conduct research in environmental toxicology. These opportunities are limited to students who have demonstrated their potential in undergraduate courses in the basic sciences and environmental toxicology. With department approval, these undergraduates may also take graduate courses in environmental toxicology, with their course work applied toward a graduate degree in environmental toxicology if they are accepted into the program.

Sample Pathways

Pathways within the Environmental Toxicology graduate program focus on interdisciplinary approaches to addressing problems in environmental and public health. These pathways are distinguished from traditional disciplines in that interdisciplinary projects are encouraged through interactions with different faculty within the department and in related departments.

Environmental Transport and Fate

Research includes how organisms are exposed to metals, how these metals cause toxicity, and investigating the concentration, speciation, and isotopic composition of contaminant metals.

Microbiology

Microbiology provides research training on molecular genetic analysis of both non-pathogenic and pathogenic microbes. Students study host-pathogen interactions, ecology and evolution of pathogenic microorganisms, adaptation of pathogenic and non-pathogenic microorganisms to environmental stresses, and mechanisms of microbial biotransformation of pollutants and toxic metals.

Cellular and Organismal Toxicology

This pathway provides training in the biochemical, molecular, cellular and physiological processes that are impacted by exposures to such contaminants as toxic metals. Research includes exposure pathways and toxicity of contaminants and pathogens within humans, with emphasis on the molecular and cellular mechanisms underlying toxicity.

Program Requirements

The Environmental Toxicology student's courses are tailored to the individual, creating a graduate experience that combines essential background material with course work at the frontiers of science. The student, in conjunction with a faculty committee, chooses classes to complement the Ph.D. or master's thesis work that each student is performing. Students are encouraged to explore new areas and bring this expertise back to their thesis research.

Requirements for Ph.D. Students in the Environmental Toxicology Department

- 1. *Coursework*. Take and pass, with a grade of at least a B, two courses from the following: ETOX 201, 202, 203, 204, 210, and at least two additional approved graduate-level courses within ETOX or another department. Students must enroll in ETOX 292 each quarter. Additional coursework may be required, depending on the background of the student.
- 2. Literature Review. Under direction of the student's advisor, write a literature review of the current state of the field of the proposed dissertation research.
- 3. Departmental Seminar. Give a departmental seminar during the spring quarter of the second year presenting the student's proposed research.
- 4. *Ph.D. Qualifying Exam (Part I ETOX Internal)*. Part I of the Qualifying Examination consists of two portions: preparation and defense of an independent research proposal, and knowledge of material presented in the ETOX core courses taken by the student. The student must complete Part I no later than spring quarter of the second year.

- 5. *Ph.D. Qualifying Exam (Part II)*. Present and defend a dissertation research proposal to the student's Ph.D. Qualifying Exam (QE) Committee. The student must complete Part II no later than spring quarter of the third year.
- 6. Advancement to Candidacy. The student advances to candidacy after completing all coursework, completing the literature review, giving a Second Year Seminar and passing the Ph. D. Qualifying Examination Parts I and II.
- 7. Dissertation Defense. The student must submit their doctoral dissertation to the Dissertation Committee for tentative approval at least one month before presenting a formal, public doctoral research seminar.

Requirements for Master's Students in Environmental Toxicology

- 1. Coursework. Take and pass, with a grade of at least a B, two courses from the following: ETOX 201, 202, 203, 204, 210, and at least two additional approved graduate-level courses within ETOX or another department. Students must enroll in ETOX 292 each quarter. Additional coursework may be required, depending on the background of the student.
- 2. Literature Review. Under direction of the student's advisor, write a literature review of the current state of the field of the proposed master's research.
- 3. Departmental Seminar. Give a departmental seminar during the spring quarter of the second year presenting the student's master's research to date.
- 4. *Master's Comprehensive Exam.* The Comprehensive Examination tests knowledge of the material presented in the ETOX core courses taken by the student, as well as general knowledge related to the student's master's research.
- 5. Thesis. Students are required to submit a thesis for fulfillment of the degree requirements.

Environmental Toxicology

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Manel Camps, Assistant Professor

Molecular mechanisms of reactive DNA methylation toxicity

A. Russell Flegal, Professor

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

Karen Ottemann, Associate Professor

Environmental responses of pathogenic bacteria

Chad Saltikov, Assistant Professor

Microbial anaerobic respiratory processes that influence the biotransformation of pollutants in the environment

Donald R. Smith, Professor

Neurotoxicity, cellular and organismal responses to environmental toxins

Fitnat Yildiz, Associate Professor

Microbiology, molecular genetics, genomics; the mechanism of persistence of survival of Vibrio cholerae

Michael S. Connor, Adjunct Professor

(Executive Director, San Francisco Estuary Institute)

Marine environmental research and policy

Kenneth W. Bruland (Ocean Sciences)

Chemical oceanography, biogeochemistry of trace metals and radionuclides, aquatic chemistry, geochemistry

Donald Croll (Ecology and Evolutionary Biology)

Foraging ecology of marine birds and mammals, island conservation/ecology

Anthony L. Fink (Chemistry and Biochemistry)

Molecular basis of protein deposition diseases—for example, Parkinson's disease and amyloidoses; development of drugs to prevent protein deposition, protein folding, and aggregation; biophysical studies of protein structure

Andrew Fisher (Earth Sciences)

Hydrogeology, crustal studies, heat flow, modeling

Grant Hartzog (Molecular, Cell, and Developmental Biology)

Biochemistry, genetics, chromatin and transcriptional regulation

Lindsay Hinck (Molecular, Cell, and Developmental Biology)

Neurobiology, cell biology, development

Theodore Holman (Chemistry and Biochemistry)

Bioinorganic and biological chemistry

Douglas R. Kellogg (Molecular, Cell, and Developmental Biology)

Coordination of cell growth and cell division

Raphael Kudela (Ocean Sciences)

Ecological modeling and remote sensing, satellite oceanography, phytoplankton ecology and harmful algal blooms

Todd Lowe (Biomolecular Engineering)

Experimental and computation genomics, ncRNA gene finders, DNA microarrays to study the biology of Archaea

Marc Mangel (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

Pradip K. Mascharak (Chemistry and Biochemistry)

Bioinorganic chemistry, design of antitumor drugs, modeling of active sites of metalloenzymes, design of catalysts for hydrocarbon oxidation, studies on intermediates in non-heme oxygenase chemistry, design of NO-donors for photodynamic therapy

Matthew McCarthy (Ocean Sciences)

Organic geochemistry, marine organic geochemistry, global biogeochemical cycles

Glenn L. Millhauser (Chemistry and Biochemistry)

Electron spin resonance; nuclear magnetic resonance, melanocortin receptor signaling, agouti proteins, prions, peptide synthesis

Peter T. Raimondi (Ecology and Evolutionary Biology)

Marine ecology, evolutionary ecology, experimental design, applied ecology

Mary W. Silver (Ocean Sciences)

Biological oceanography, marine plankton, midwater ecology

Joshua Stuart (Biomolecular Engineering)

Computational functional genomics, comparative analysis of gene regulation, cross-species inference of gene networks, probabilistic graphical models

Jonathan Zehr (Ocean Sciences)

Aquatic microbial ecology, biological oceanography

Martha C. Zúñiga (Molecular, Cell, and Developmental Biology) Molecular, cellular, and developmental biology of the immune system

Program Description | Faculty

Lower-Division Courses

80E. Aquatic Toxicology. F

An introduction to the sources, cycling, and impacts of toxicants in aquatic systems, including acid rain, ground water, fresh water rivers and lakes, estuaries, and the ocean. Emphasis is on the properties of toxic chemicals that influence their biogeochemical cycles and factors that influence their toxicity to aquatic organisms and humans. (General Education Code(s): T2-Natural Sciences.) *A. Flegal*

Upper-Division Courses

101. Sources and Fates of Pollutants. F

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments, including environmental chemistry and biogeochemical cycles as well as exposure to pathways and uptake by organisms. Additional emphasis placed on susceptibility and effects of toxicants across organ systems, toxicokinetic and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 201. *A. Flegal*

102. Cellular and Organismal Toxicology. W

Emphases of biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Designed for advanced undergraduates. Students cannot receive credit for this course and course 202. (Also offered as Biology 122. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20A and 20B or equivalent; Biology 100, Biochemistry, and 110, Cell Biology, are recommended. Enrollment restricted to juniors and seniors. (W) The Staff

125. Practicing Safe Science (2 credits). W

Introduces research safety principles and practices. Instructors and guest experts discuss research hazards and control measures. Students explore the safe use of research methods and materials via hands-on and outside exercises. Issues include compliance with hazardous waste and other environmental safety regulations. *J. Schoonover*

138. Biology of Disease. W

Primary objective is to provide an understanding of disease processes in humans. Integrates normal physiology and pathophysiology with the molecular and

physiologic bases of diseases. Major emphasis on the physiological, molecular, and biochemical basis of diseases, with particular emphasis on the neuromuscular, cardiovascular, respiratory, renal, immune, and central nervous systems. Also addresses environmental risk factors in the etiology of diseases. Overviews provided, but covers selective topics considered most important in depth. (Also offered as Biology 118. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20A and 20B or equivalent and Biology 110. Biology 130 is recommended. Offered in alternate academic years. *D. Smith*

140. Molecular Biology of Prokaryotes. S

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 240. Prerequisite(s): Biology 119. *K. Ottemann*

144. Groundwater Contamination. S

Analyses of contemporary problems in groundwater contamination, based on current scientific understanding of contaminant transport in aquifers. Topics include both theoretical concepts and case studies. To be offered in alternate academic years. Prerequisite(s): Earth Science 110B. Offered in alternate academic years. *A. Flegal*

145. Medical Geology. S

An interdisciplinary analysis of natural geochemical processes that impact human health and of anthropogenic processes that exacerbate those impacts. Prerequisite(s): Chemistry 1A, 1B, 1C, 1M, and 1N. A. Flegal

150. Introduction to Research and Experimental Design. *

Lecture-based course for advanced undergraduates actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes basic lab skills, including laboratory safety and handling of laboratory equipment; experimental design; scientific record keeping; and literature searching, review, and management. *K. Ottemann, (FWS) The Staff*

151. Scientific Writing and Presentation. *

For advanced undergraduates who are actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes the collection, reduction, analysis, management, and interpretation of scientific data; the presentation of scientific data in written and oral formats; and further development of critical thinking. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *The Staff*

160. Coastal Environmental Toxicology and Policy (3 credits). S

Interdisciplinary analysis of the scientific basis and policy development to regulate and manage environmental pollutants in coastal waters. Focuses on case studies involving aspects of environmental toxicology and policy including environmental monitoring and regulatory programs; ecosystem restoration; and regulating the environmental impacts of coastal development. Enrollment restricted to sophomores, juniors, seniors, and graduate students. *A. Flegal, G. Griggs, M. Connor*

An individually supervised course, with emphasis on independent research culminating in a senior thesis. May be repeated for credit. *The Staff*

198. Independent Study. F,W,S

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the course work off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Reading, discussion, written reports, and laboratory research on selected topics. May be repeated for credit. *The Staff*

Graduate Courses

200. Interdisciplinary Approaches in Environmental Toxicology. F

Introduction to interdisciplinary, case-based approaches to problem-solving. Course demonstrates how important, current problems in environmental and human health have been addressed and solved. Assigned problems that integrate the different organization levels (environmental, molecular/cellular, organismal/public health) inherent to environmental and human health are presented. Students work in collaborative teams to analyze each problem and create a proposal for a research plan/solution. Enrollment restricted to graduate students. *F. Yildiz*

201. Sources and Fates of Pollutants. F

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis will be placed on the susceptibility and effects of toxicants across organ systems, toxicokinetics and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 101. Enrollment restricted to graduate students; qualified undergraduate science majors may enroll with permission of instructor. *A. Flegal*

202. Cellular and Organismal Toxicology. *

Emphasizes biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Students cannot receive credit for this course and Environmental Toxicology 102 or Biology 122. (Also offered as Biology 202. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *D. Smith*

203. Cellular and Molecular Toxicology. *

Presents in-depth cellular and molecular principles of environmental toxicology. These include modes of action and cellular and molecular targets of toxicants, as well as mechanisms of cellular and molecular responses to toxicants and their detoxification. State-of-the-art biological methodologies and approaches to identify and study cellular targets of toxicants. Designed to provide students with a broad and deep understanding of the biological aspects of toxicology at both cellular and molecular levels, and the skills to approach emerging challenges in the field.

Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. (FWS) The Staff

205. Scientific Skills, Ethics, and Writing. *

Course provides fundamental training of graduate students in the scientific method, experimental design, ethics in science, grant proposal and scientific writing, data presentation, and scientific speaking. Students are evaluated on class participation, performance, and a written NIH/NSF style research proposal. Enrollment restricted to graduate students. *The Staff*

210. Molecular and Cellular Basis of Bacterial Pathogenesis. S

Focuses on the molecular basis of bacterial pathogenesis with specific emphasis on gene expression, regulation, and ecology and evolution. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. Enrollment restricted to graduate students. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. *F. Yildiz*

215. Seminar in Advanced Prokaryotic Molecular Biology (2 credits). W

Seminar focuses on aspects of prokaryotic molecular biology. Specific topics include transcriptional regulation, translational regulations, DNA replication, secretion of proteins, transport of small molecules, bacterial differentiation, signal transduction, biofilm formation, and motility. Discussions focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Enrollment restricted to graduate students. *F. Yildiz, K. Ottemann*

240. Molecular Biology of Prokaryotes. S

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 140. *K. Ottemann*

281A. Topics in Environmental Toxicology. F,W,S

Selected topics in environmental toxicology. Topics vary from year to year. Enrollment restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission. May be repeated for credit. *The Staff*

281C. Topics in Environmental Microbiology (2 credits). F,W,S

Seminar and discussion focusing on mechanism of microbial transformation of metals. Participants present results from their research projects in a seminar format. Relevant journal articles presented and discussed. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *C. Saltikov*

281F. Topics in Aquatic Toxicology. F,W,S

Analyses of the sources and fates of aquatic pollutants. Discussions on processes at the air-water interface, within the water column, and in aquatic sediments. Topics vary from year to year. Enrollment restricted to graduate students; qualified upperdivision science majors may enroll with instructor's permission. May be repeated for credit. *A. Flegal*

2810. Topics in Bacterial Pathogenesis (2 credits). F,W,S

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcercausing bacterium *Helicobacter pylori*. Participants are required to present results from their own research and relevant journal articles. (Also offered as Biology 280O. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. *K. Ottemann*

281S. Cellular and Organismal Responses to Toxicants. F,W,S

Intensive research seminar on the concepts, theory, and techniques in deriving physiologically based pharmacokinetic models of toxin exposure, metabolism, and efficacy of therapeutic treatment in mammalian models of human metal toxicity. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. *D. Smith*

281Y. Biofilms: Processes and Regulation (2 credits). F,W,S

Intensive seminar series focusing on the most current work on genes and the processes that regulate biofilm development dynamics as well as on the recent developments on visualization of biofilms. Presentation and discussion based. Enrollment restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission. May be repeated for credit. *F. Yildiz*

282. Current Approaches to Molecular Pathogenesis (2 credits). *

Graduate level seminar focusing on the mechanisms by which bacterial pathogens cause disease. Specific topics include basic concepts of virulence and virulence factors, virulence factor regulation, toxins, and interactions of pathogens with mammalian cells and organs. Discussions focus on several key pathogens, including *Helicobacter pylori*, *Vibrio cholerae*, *Salmonella typhimuruim*, and *Listeria monocytogenes*. May be repeated for credit. *K. Ottemann*

290. Proseminar. F,W,S

Special topics offered from time to time by faculty, visiting professors, or staff members. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. May be repeated for credit. *The Staff*

290A. Epidemiology and Risk Assessment. *

Approaches different techniques of biological monitoring and the exposure and effect of biomarkers related to occupational and environmental exposure to chemicals. Available methods for risk assessment and identification of protective exposure limits also considered. (Formerly *Biological Impact of Chemical Exposures.*) The Staff

292. Introductory Graduate Seminar (no credit). F,W,S

Weekly seminars by academic and research faculty on their areas of special interest. Students write weekly abstracts on articles covered by the seminars. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *The Staff*

297. Independent Study. F,W,S

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

* Not offered in 2007-08

Ethnic Studies

231 Oakes College (831) 459-4658 http://humwww.ucsc.edu

(There were no substantive changes to the Ethnic Studies Program Description from the General Catalog 2006-08.)

Ethnic studies is not a separate undergraduate program of study at UCSC, but students with an interest in ethnic studies can find an extensive array of courses on the subject in the following departments: American studies, anthropology, community studies, education, feminist studies, film and digital media, economics, history, history of art and visual culture, history of consciousness, Latin American and Latino studies, literature, music, politics, psychology, sociology, and theater arts. Feminist studies offers two ethnic studies concentrations within their major: race, class, and ethnicity (within the U.S.) and nations and cultures (comparative, non-U.S.). The Community Studies Department and the Latin American and Latino Studies Department offer opportunities for fieldwork that extend ethnic studies outside the traditional classroom setting. See also the campus general education (E code) requirement. A list of U.S.-centered ethnic studies courses offered each quarter is published in the *Schedule of Classes*. In addition, a list of faculty for whom ethnic studies are a professional specialty is published on the UCSC catalog web site, http://reg.ucsc.edu/catalog/.

Feminist Studies

315 Humanities 1 (831) 459-4324 fmst@ucsc.edu

http://feministstudies.ucsc.edu/

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Feminist studies is an interdisciplinary field of analysis that investigates how relations of gender are embedded in social, political, and cultural formations. The undergraduate program in feminist studies provides students with a unique interdisciplinary and transnational perspective. The department emphasizes theories and practices derived from multiracial and multicultural contexts.

Feminist studies prepares undergraduates for a variety of careers. The B.A. degree in feminist studies, for example, provides excellent grounding for undergraduates who have career aspirations in law, health, public administration, community organizations, and social services. Students wishing to pursue doctoral work will also find that interdisciplinary training in feminist studies equips them with theoretical and methodological strengths in most disciplines and applied research fields. Specialists in feminist studies are employed as consultants in industry, higher education, and human resources. State and federal government agencies employ people who have special training in understanding gender relations. Educational institutions need specialists to develop and administer feminist studies programs, women's centers, and other institutional structures designed specifically to study and assist women.

Requirements for the Major

Feminist studies majors must complete 10 courses and a senior comprehensive exit requirement in the feminist studies program. Students must choose one of the following concentrations within the major: Culture, Power, and Representation; Law, Politics, and Social Change; Science, Technology, and Medicine; or Sexuality Studies. Courses appropriate for each concentration are listed in the Feminist Studies office at Humanities 1 and at http://feministstudies.ucsc.edu.

A proposal for an independent concentration will be approved only when a student presents a clear, coherent, and rigorous plan of study that does not fit the existing concentrations. Both the student's adviser and the Feminist Studies Department chair must approve a proposal for an independent concentration.

Required courses include course 1, *Introduction to Feminisms*; course 80 or another 80 course taught by feminist studies affiliated faculty; course 100, *Feminist Theories* (must be taken at UCSC); five courses in the concentration; two electives, both of which must be upper-division courses; and an exit (comprehensive) requirement course. One independent study (course 199) may count toward the concentration or toward the elective requirements. Either course 193 or 198 may be used to count toward the elective requirements.

Because feminist studies is an interdisciplinary major and lists courses taught by affiliate faculty in other departments, feminist studies majors must take a minimum of five courses at UCSC taught directly in the Feminist Studies Department, i.e., courses designated FMST, not including course 193, 198, or 199. Two EAP courses may count towards the major; three transfer courses may count towards the major; and the total combined number of EAP and transfer courses that may count towards the major is a maximum of three.

Exit requirement options include a senior thesis or a senior project (course 195) or a senior seminar (course 194) taught by core or affiliated faculty. Courses 1, 80, 100, and the composition (general education code C) requirement are prerequisites to course 195 and the senior seminars. A fourth option for fulfilling the exit requirement is to develop and teach a student-directed seminar. Only two student-directed seminars may be offered each year, and they must be approved by the feminist studies undergraduate program committee before being recommended for final course approval. Guidelines for completion of the exit requirement are available in the Feminist Studies office or online at http://feministstudies.ucsc.edu.

Transfer Students

Transfer students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Feminist studies advisers or the chair determine which courses from other institutions are transferable. Courses 1, 80, and 100 must be completed in the junior year so that the exit requirement may be completed in the senior year.

Graduate Studies

Graduate students may work toward a Ph.D. degree that notes a concentration in feminist studies on the graduation documents. The request must originate in the degree-granting department. The Anthropology, History, History of Consciousness, Literature, Politics, Psychology, and Sociology Departments participate in this parenthetical notation program with the Feminist Studies Department. Students in other departments wishing to pursue this option should consult with the chairs of their respective Ph.D. programs and the chair of feminist studies. A list, updated annually, of regularly offered, approved graduate courses is available in the Feminist Studies Department office.

The following are required for the notation:

- Committee composition. The student must have a designated graduate adviser from the feminist studies core or affiliated faculty who serves on the qualifying examination committee or in some other appropriate capacity.
- Writing. The student must prepare a significant piece of writing in the area of feminist studies. This writing must be a master's essay or a chapter of the doctoral dissertation.
- Course requirements. The student must take four graduate courses in feminist studies. The courses can be selected from among the graduate offerings of any UCSC department, as long as they are taught by core or affiliated feminist studies faculty.
- Teaching. The student must be a teaching assistant in at least one feminist studies course
 or teach a feminist studies course independently (designated FMST) in the regular
 curriculum or in Summer Session.

Feminist Studies

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Bettina Aptheker, Professor of Feminist Studies and History

Women's history, feminist oral history and memoir; feminist pedagogy; African-American women's history; queer studies; feminist Jewish studies; feminist critical race studies

Anjali Arondekar, Assistant Professor of Feminist Studies

South Asian studies, colonial historiography; feminist theories; queer theory; critical race studies; 19th-century interdisciplinary studies

Karen Barad, Professor of Feminist Studies

Physics, feminist philosophy, philosophy of science, cultural studies of science, and feminist theory

Gina Dent, Associate Professor of Feminist Studies, History of Consciousness, and Legal Studies

Africana literary and cultural studies, legal theory, popular culture

Margaret M. Downes-Baskin, Research Associate in Feminist Studies

Presidential leadership styles, elections and the media, women's political and corporate leadership style, intergenerational relations

Marge Frantz, Emerita, Lecturer in American Studies and Feminist Studies

Emily Honig, Professor of Feminist Studies and History

Gender, sexuality, and ethnicity in modern Chinese history; comparative labor history; Chicana history, nationalism, and sexuality in the Third World; oral history

Akasha Hull, Emerita, Professor of Feminist Studies and Literature

Felicity Schaeffer-Grabiel, Assistant Professor of Feminist Studies

Transnational feminism, migration, Latin American/Latino studies, chicana/o studies, Internet, technology and the body, sexuality, gender and globalization

Angela Y. Davis, Professor of History of Consciousness and Feminist Studies Feminism, African American studies, critical theory, popular music culture and social consciousness, philosophy of punishment (women's jails and prisons)

Carla Freccero, Professor of Literature, Feminist Studies, and History of Consciousness Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory, U.S. popular culture

Rosa Linda Fregoso, Professor of Latin American and Latino Studies, Film and Digital Media, and Feminist Studies

Cultural studies, transnational feminist theories, Chicana/o and Latina/o cinema, issues of human rights and gender violence

Jody Greene, Associate Professor of Literature and Feminist Studies Seventeenth- and 18th-century British and French literature and culture, pre- and early modern studies, early modern colonialisms, gay and lesbian cultural studies, gender studies, history of authorship, history of the book

Donna J. Haraway, Professor of History of Consciousness and Feminist Studies Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

Helene Moglen, Professor of Literature

The English novel; feminist, critical, cultural, and psychoanalytic theory; gender and genre in social and psychological contexts

Affiliated Faculty

Gabriela Arredondo, Assistant Professor of Latin American and Latino Studies U.S. social and cultural history; Chicana/o history; critical race and ethnicity theories; im/migration history; Latina/os in the U.S.; Chicana feminisms; "borderlands" studies, modern Mexico history

Karen Bassi, Associate Professor of Classics (Literature)

Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

Julie Bettie, Associate Professor of Sociology

Cultural studies, feminist studies, race/ethnic studies, identity, popular culture, critical ethnography, visual ethnography

Heather Bullock, Associate Professor of Psychology

Poverty and economic inequality, welfare policy, feminist psychology, discrimination

Julianne Burton-Carvajal, Professor of Literature

American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

Nancy N. Chen, Associate Professor of Anthropology

Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

Annette M. Clear, Assistant Professor of Politics

Comparative democratization, transnationalism, global politics, global organization, Southeast

Vilashini Cooppan, Assistant Professor of Literature

Postcolonial studies, comparative and world literature, literatures of slavery and diaspora, globalization studies, cultural theory of race and ethnicity

E. G. Crichton, Associate Professor of Art

Intermedia, electronic arts, photography, installation

Faye J. Crosby, Professor of Psychology

Gender; social identity; and social justice, especially affirmative action

Teresa de Lauretis, Professor of History of Consciousness

Semiotics, psychoanalysis, feminism, film theory, literary theory, queer studies

Dana Frank, Professor of History

U.S. social and economic history; women, labor, and working-class history; contemporary political economy

Pascale Gaitet, Professor of Literature and Language Studies

Nineteenth- and 20th-century French literature, sociolinguistics, political history, Celine, Genet

Mary-Kay Gamel, Professor of Classics and Comparative Literature

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Diane Gifford-Gonzalez, Professor of Anthropology

Paleolithic and Neolithic Africa and Eurasia, colonial New Mexico, origins of food production, pastoralists, zooarchaeology, history of archaeology, interpretive theory, visual anthropology

Susan Gillman, Professor of American Literature

Nineteenth-century American literature and culture; theories of culture, race, and gender; world literature and cultural studies

Jennifer A. González, Associate Professor of History of Art and Visual Culture

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public

and activist art in the U.S.

June Gordon, Associate Professor of Education

Urban education of working-class and ethnic minority students in East Asia, Britain, and the U.S. and related issues in teacher education

Herman Gray, Professor of Sociology

Cultural studies, media and television studies, black cultural politics, social theory

Irene Gustafson, Assistant Professor of Film and Digital Media

Producing across the boundaries between "theory" and "practice," non-fiction, gender and queer studies, production design

Lisbeth Haas, Associate Professor of History

U.S.-Mexico borderlands, Chicano and Native American history; visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

Amelie Hastie, Assistant Professor of Film and Digital Media

Film theory and history, feminist film and television studies, Chinese cinemas, issues of authorship, interdisciplinary approaches

Margo Hendricks, Associate Professor of Literature

Early modern English literature and culture; theories and discourses of race, gender, drama, and theory; women playwrights; pre- and early modern studies

Gail B. Hershatter, Professor of History

Modern Chinese social and cultural history; labor history; gender history; history of sexuality; feminist theory; history, memory, and nostalgia

Jocelyn Hoy, Lecturer in Philosophy

Feminist philosophy, 19th- and 20th-century continental philosophy

A. Yvette Huginnie, Assistant Professor of American Studies

Race and class relations within western American history, U.S. labor and immigration history, and comparative ethnic studies

Donna Hunter, Associate Professor of History of Art and Visual Culture

European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice, portraiture

Aida Hurtado, Professor of Psychology

Social identity, feminist theory, social psychology of education, survey methodology

Virginia Jansen, Professor of History of Art and Visual Culture

Medieval visual culture, urbanism, and secular building; Gothic architecture; campus planning and architecture

Stacy Kamehiro, Assistant Professor of History of Art and Visual Culture

Visual cultures of the Pacific, 19th-century Hawai'i, (inter)nationalism, culture contact; (post)colonialism

L. S. Kim, Assistant Professor of Film and Digital Media

Television history and theory, racial discourse, feminist criticism, Asian-American media production, industrial practices and social change in both mainstream Hollywood and alternative media

Norma Klahn, Professor of Literature

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

Lori G. Kletzer, Professor of Economics

Employment and wage determination, impact of globalization on the domestic labor market, industrial relations, government labor market policies, higher education and the labor market

Campbell Leaper, Professor of Psychology

Social construction and socialization of gender in childhood, adolescence, and adulthood; self-concept and social identity; language and social interaction; social relationships, gender bias in

the schools and academic achievement; images of gender in the media; perceptions and consequences of sexism

Carolyn Martin Shaw, Professor of Anthropology

African societies, colonial discourse, social theory, anthropology of women, sexuality Lourdes Martínez-Echazábal, Associate Professor of Latin American Literature Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

Jennie Lind McDade, Professor of Art

Drawing, painting

Leta E. Miller, Professor of Music

Renaissance and baroque music history and performance practices, 20th-century American music, modern and baroque flute, 16th-century chanson and madrigal, music and science, 18th-and 20th-century flute literature and performance styles, music of C.P.E. Bach and Lou Harrison

Margaret Morse, Professor of Film and Digital Media

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary and science fiction

Marcia Ochoa, Acting Assistant Professor of Community Studies

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, multimedia production, Latin American studies—Colombia and Venezuela, political philosophy, geography

Pamela Perry, Assistant Professor of Community Studies

Youth activism; racism and anti-racism, whiteness, educational inequalities; school integration; ethnographic documentary; racial and ethnic identities; cultural studies

Catherine Ramirez, Assistant Professor of American Studies

Chicana and U.S. Latino literature, culture, and history; gender studies and feminist theory; visual culture and style politics; cultural studies; popular and urban youth cultures; speculative fiction, Afrofuturism, and Chicanafuturism; science, technology, race, and gender; theories and methods of American studies

Jennifer E. Reardon, Assistant Professor of Sociology

Issues of social identity as influenced by the new sciences of genetics and genomics; intersection of the sociology of science and knowledge and the sociology of race, gender, and class

B. Ruby Rich, Assistant Professor of Community Studies

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

Pamela Ann Roby, Professor of Sociology

Sociology of learning, women and work, leadership and social change, sociology of emotions, feminist research, inequality and social policy

Lisa Rofel, Associate Professor of Anthropology

Critical theory, anthropology of modernity, popular/public culture, gender and sexuality, cultures of capitalism, postcolonial feminist anthropology, China

Gabriela Sandoval, Assistant Professor of Sociology

Race and ethnic studies, Latina/o and Chicana/o studies, stratification, urban and political sociology, and voting behavior

Vanita Seth, Assistant Professor of Politics

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

Deanna Shemek, Associate Professor of Literature

Italian literature and cultural history, Renaissance studies, early modern popular culture, narrative (early modern to contemporary), women's studies, literary theory

Mary W. Silver, Professor of Ocean Sciences

Biological oceanography, marine plankton, midwater ecology

Shelley Stamp, Associate Professor of Film and Digital Media

Film history, theory, and criticism; silent cinema; women's filmmaking; film censorship; histories of moviegoing; feminist approaches to cinema

Elizabeth Stephens, Associate Professor of Art

Intermedia, electronic art, sculpture, and performance art

Nancy Stoller, Professor of Community Studies

Race and gender aspects of health, the AIDS epidemic, community organizing, sexualities, and medicine in prisons

Neferti Tadiar, Associate Professor of History of Consciousness

Third World feminism, postcolonial theory, critical theories of race and racism, literary and social theory, cultural studies of the Asia Pacific region

Renee Tajima-Peña, Associate Professor of Community Studies

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

Avril Thorne, Professor of Psychology

Identity development through personal memory telling, development of meaning in adolescents' self-defining memory narratives, family storytelling and the development of a sense of self, narrative co-construction of identity and intimacy

Nina K. Treadwell, Assistant Professor of Music

Renaissance through early baroque music history and performance practices, early plucked-string instruments (theorbo, renaissance, and baroque guitar; renaissance lute), 16th- and 17th-century Italian theatrical music, gender studies, women and music, literary and critical theory

Anna Tsing, Professor of Anthropology

Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnoecologies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

Candace West, Professor of Sociology

Language and social interaction, sociology of gender, conversation analysis, microanalysis and medicine

Marilyn J. Westerkamp, Professor of History

British America, American revolution/early national U.S., U.S. religious history, early modern cultural and religious history, women/gender

Rob Wilson, Professor of Literature

Transnational and postcolonial literatures, especially as located in Asia/Pacific emergences as posited against American empire of globalization; cultural poetics of America; the sublime, Longinus to Hiroshima; mongrel poetics of experimental writing, especially poetry

Alice Yang Murray, Associate Professor of History

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

Patricia Zavella, Professor of Latin American and Latino Studies

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexicana/o workers and U.S. capital

Eileen Zurbriggen, Assistant Professor of Psychology

Connections between power and sex, sexual aggression and abuse, sexual decision making. Motivation, especially power and affiliation-intimacy motives. Information processing models of social and personality psychology

Lower-Division Courses

1. Introduction to Feminisms. F

Core course for feminist studies. Introduces a gendered analysis of philosophical, scientific, historical, economic, political, and cultural issues from feminist perspectives, emphasizing complexities of globalization, class, race, ethnicity, and sexuality. (General Education Code(s): IH.) *B. Aptheker*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

80C. Third World Feminisms. W

Introduces students to articulations of feminism in the Third World. Emphasizing ways in which the history (and contemporary practices) of colonialism have informed feminist theories and movements in the Third World, focuses on issues such as the globalization of work, the international division of sexual labor, reproductive rights, sexual identity, and race. (General Education Code(s): T5-Humanities and Arts or Social Sciences, E.) *E. Honig*

80F. Feminisms of/and the Global South. *

Explores feminist theories from domestic U.S. and global contexts in order to ask how interventions of women of color in the U.S. and of radical feminist movements in non-U.S. locations radically re-imagine feminist politics. Rather than focusing on feminist movements that represent different regions of the world, course examines feminist theory through multiple histories of colonialism, post-colonialism, and globalization. (General Education Code(s): T5-Humanities and Arts or Social Sciences, E.) *A. Arondekar*

80K. Feminism and Science. S

Considers the nature of scientific practice, the culture of science, and criteria for the responsible practice of science. Particular attention is given to feminist commitments to strengthening objectivity, increasing scientific literacy, and including ethical considerations in the practice of science. Enrollment limited to 80. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *K. Barad*

80S. Women in Music. F

An exploration of the sociological position of women as composers and performers in Western music history with a focus on specific figures from the Middle Ages to present. (Also offered as Music 80S. Students cannot receive credit for both courses.) Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *T. Merchant Henson*

80Y. Violence Against Women of Color. *

Examines violence against women of color and analyzes the relationship between sexual/domestic violence and institutional structures of violence. Explores the development of organizing strategies against violence. Issues covered may include: domestic/sexual violence, colonialism and violence, prisons/INS detention, police brutality, violence and the economy, religion/spirituality and violence, medical experimentation, reproductive rights, and militarism/border violence. Enrollment limited to 40. (General Education Code(s): T5-Humanities and Arts or Social Sciences, E.) *The Staff*

Upper-Division Courses

100. Feminist Theories. W

Core course for feminist studies. Serves as an introduction to thinking theoretically about issues of feminism within multiple contexts and intellectual traditions. Sustained discussion of gender and its critical connections to productions of race, class, and sexuality. Focus will change each year. Enrollment restricted to sophomores, juniors, and seniors. *A. Arondekar*

102. Feminist Critical Race Studies. *

Working from the perspective that race is a cultural invention and racism is a political, economic, and social relation, investigates how "race" is produced as a meaningful and powerful social category, examines the effects of racism as a social relation, and argues for the necessity of combining feminist and critical race studies. By considering different historical periods and places, aims to equip students with the tools necessary to critically examine the production and reproduction of race and racism in the U.S. Prerequisite(s): one course from feminist studies. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

103. Writing Women's Lives. *

Examines various ways of representing women's lives, including autobiography, oral history, community studies, fiction, etc. Particular attention to intersections of gender, race, ethnicity, class, and sexuality, to the ways in which individuals are situated in communities, and to the relationship between author and subject. *The Staff*

110. Women Writers of the African Diaspora. *

Advanced introduction to contemporary writings of black women in U.S., Africa, and the Caribbean, focusing on relationship between these different sites of production in context of struggles against colonialism and patriarchy. Organized around theme of perception, divided into three main parts: Part I treats texts directing our attention to different orders of perception; Part II includes three novels with psychological problems at their center; and Part III turns to issue of tradition and conflicts of contemporary black women in relation to gender, class, and nationality. Enrollment limited to 25. (General Education Code(s): E.) *G. Dent*

112. Women and the Law. W

Interdisciplinary approach to study of law in its relation to category "women" and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes

power relations in both public and intimate life. (Also offered as Politics 112. Students cannot receive credit for both courses.) Enrollment restricted to feminist studies, politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *G. Dent*

115. Gender, Sexuality, and Transnational Migration Across the Americas. W

Examines migration as a mode of inquiry into transnational practices across geographic locales and temporal zones. Analyzes migration in relation to the transnational formation of gender, race, and sexuality as well as processes of neocolonialism, the state, and globalization. Prerequisite(s): course 1, 1A, 1B, 100, or 145. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. (General Education Code(s): E.) *F. Schaeffer-Grabiel*

116. Ethnographies of Transnational Feminisms. *

Examines recent approaches to the ethonographic representation of transnationalism as both a conscious strategy for feminist alliance and as a condition of global political economy. Topics covered include feminist anthropology, non-governmental organizations, human and reproductive rights, and international peace movements. Prerequisite(s): course 1 or 80C. Enrollment limited to 30. *The Staff*

117. Gender and Africa. *

Considers both the research on gender in African studies and the role of gender in the production of the idea of Africa. Focuses attention through the humanities on the meaning-making of and about Africa in its global context. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): W, E.) *G. Dent*

120. Transnational Feminisms. F

Explores the emergence of transnational feminism through U.S. women of color and postcolonial feminism. Underscores the role of globalization, nationalism, and state formation in relation to feminist theorizing, activism, and labor across the Global South. In an attempt to understand the salience of inequalities, the course interrogates the continuation of feminist critique that is attentive to the war on terror, neocolonialism, and empire. Prerequisite(s): course 1, 1A, or 1B. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 40. (General Education Code(s): E.) *F. Schaeffer-Grabiel*

123. Feminism and Cultural Production. *

Explores relationship between feminism and culture. Topics will vary and include different forms of cultural production such as film and literature. Regional/national focus will also vary. Prerequisite(s): course 1, 1A, or 1B. Enrollment restricted to sophomores, juniors, and seniors. May be repeated for credit. (General Education Code(s): A, E.) *The Staff*

124. Technologies and Latinidad: Cyberspace and Beyond. *

Introduction to analyzing technology as it is produced through gender, race, class, and sexualized differences. Examines film and the Internet through the genealogy of these technologies in relation to U.S. nationalism, development, and empire, creating social communities and new identities, and the global production of labor. Examines interdisciplinary methods (ethnography, media analysis, cultural studies and, literary analysis) to broaden understanding of Latina/o subjectivity as historical construct mediated through various modes of visual production. Enrollment restricted to sophomore, junior, and senior feminist studies majors during priority enrollment

132. Gender and Postcoloniality. *

Postcolonial feminist studies. Explores how discourses of gender and sexuality shaped the policies and ideologies of the historical processes of colonialism, the civilizing mission, and anticolonial nationalism. Considers orientalism as a gendered discourse as well as colonial understandings of gender and sexuality in decolonialization. Explores Western media representations, literature, the law, and the place of gender in the current debate between cultural relativism and universalism. Provides an understanding of some key terms in postcolonial studies and an in-depth examination of the place of gender in these processes. Prerequisite(s): courses 80C or 80F and course 100 or permission of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

139. African American Women's History. *

Considers African American women as central to understanding of U.S. history, focusing on everyday survival, resistance, and movements for social change. Discussion of critical theories for historical research, gender, and race. Emphasis on biography, cultural history, and documentary and archival research. Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): E.) *B. Aptheker*

145. Racial and Gender Formations in the U.S. S

Introduces the defining issues surrounding racial and gender formations in the U.S. through an understanding of the term "women of color" as an emergent, dynamic, and socio-political phenomenon. Interrogates organizing practices around women of color across multiple sites: film and media, globalization, representation, sexuality, historiography, and war, to name a select few. (General Education Code(s): E.) *A. Arondekar*

150. Women's Culture. *

Philosophical, historical, and aesthetic implications of women's consciousness of social reality. Both the sexual division of labor and the subordination of women in society give rise to distinctive categories of thought. Course objectives: locate and consider these categories of thought as they are presented in women's expressive culture; redefine culture, beauty, and artistry from a feminist perspective; and propose a praxis for creating and transmitting culture. Prerequisite(s): course 1 or 80°C. Enrollment restricted to juniors and seniors. Recommended for students with a background in feminist studies, cultural, and/or ethnic studies. Enrollment limited to 20. *B. Aptheker*

151A. Chicana Feminism. *

Students are introduced to the writings of Chicana feminists to identify the gender issues that produce conflict and cooperation in their communities. The course also makes linkages to gender issues in other U.S. communities of color and Latin America. (Also offered as Psychology 157A. Students cannot receive credit for both courses.) Prerequisite(s): courses 1 or 80C or Psychology 3. (General Education Code(s): E.) *A. Hurtado*

151B. Advanced Topics in Chicana Feminism. *

Course is a continuation of course 151A which introduces students to the writings of Chicana feminists to identify the gender issues that cause conflict and cooperation in

their communities. The seminar format allows students an opportunity for extensive discussion. (Also offered as Psychology 157B. Students cannot receive credit for both courses.) Prerequisite(s): courses 1, 80C, 100, or 151A or Psychology 1, 40, or 157A, or consent of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 30. *A. Hurtado*

154. Revolutionary Tales: Women in Modern China. *

Focusing on autobiographical, fictitious, and filmatic narratives about the Chinese revolution, course explores the history of women in China during the 20th century: how their roles in the family structure and work force were affected by the social, economic, and political transformations that accompanied the Chinese revolution. Prerequisite(s): course 1 or 80C; a course in modern Chinese history is recommended as preparation. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 20. (General Education Code(s): E.) *E. Honig*

155. Women Workers in Transnational Context. *

Examines women's work in context of globalization, i.e., creation of a division of labor extending beyond national borders, beginning in 15th century and manifesting itself more recently with proliferation of factories owned by multinational corporations largely dependent on labor of women in third-world countries. Focus on contemporary issues placed in historical context. Prerequisite(s): course 80C and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): W, E.) *E. Honig*

158. Gender, Class, and Sex in Modern Shanghai. F

Examines issues of gender, class, and sex in modern urban Chinese history, with particular attention to how Shanghai's semi-colonial status inflected the articulations of gender identities, class formations, and issues of sexuality (particularly sexual labor). In addition to looking at treaty-port Shanghai, considers Shanghai during the Maoist period as well as in the context of the more contemporary economic reforms. (Also offered as History 140E. Students cannot receive credit for both courses.) Prerequisite(s): course 80C, History 80H, History 140C, or History 140D. Enrollment restricted to juniors and seniors. Enrollment limited to 25. (General Education Code(s): E.) *E. Honig*

168. Topics in Feminist Philosophy. S

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship. (Also offered as Philosophy 147. Students cannot receive credit for both courses.) *J. Hoy*

185. Psychoanalysis and Feminism. *

Introduction to Freudian and Lacanian theories of sexuality and the construction of the self as well as to feminist critiques and rewritings of those theories. An attempt is made to place psychoanalytic theory in socioeconomic, racial, and colonialist contexts. Appropriate prior work in theory is recommended as preparation. Enrollment restricted to juniors and seniors. Enrollment limited to 25. *H. Moglen*

189. Advanced Topics in Feminist Theory. *

Focus on a particular problem in feminist theory. Problems vary each year but might include theorizing the gendered subject, racializing gender, the meeting points of psychoanalysis and social-political analysis in theorizing gender, the relationship

between queer theory and feminist theory, postcolonial feminist theory. Prerequisite(s): course 100. Enrollment restricted to juniors, seniors, and graduate students. Enrollment limited to 20. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) *The Staff*

193. Field Study. F,W,S

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency. *The Staff*

193F. Field Study (2 credits). F,W,S

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency. *The Staff*

194. Senior Seminar.

Discussion classes providing a broad overview of some general "area of concentration." Discussion of assigned readings, focus on oral presentations, and a final 20- to 25-page paper. Satisfies the senior comprehensive requirement in feminist studies. Enrollment limited to 20.

194A. Feminist Jurisprudence. *

Approaches legal reasoning from a feminist and intersectional perspective with attention to structures and jurisdiction, case materials, and emerging international frameworks for gender justice. Designed to facilitate completion of a substantial research essay based in feminist legal philosophy. Instructor permission required to enroll. Prerequisite(s): course 112 or Politics 112. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *G. Dent*

194C. Topics in Gender and Globalization. *

Examines women's work in context of globalization, i.e., the creation of a division of labor that extends beyond national borders, a historical process that began with the rise of colonialism in the 15th century and has manifested itself more recently with the proliferation of factories owned by multinational corporations that depend largely on the labor of women in third world countries. Explores impact of globalization in contexts other than multinational factories, e.g., the impact of privatization of water on women's work. Topics vary. Prerequisite(s): courses 80C and 100. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. (General Education Code(s): E.) *E. Honig*

194D. Feminist Science Studies. *

Examines different feminist approaches to understanding the nature of scientific practices. Particular attention paid to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory practices. Considers the ways in which gender, race, and sexuality are constructed by science and how they influence both scientific practices and conceptions of science. Also examines the feminist commitment to taking social factors into account without forfeiting the notion of objectivity. Prerequisite(s): course 1 or 80C; and course 100. Enrollment restricted to senior feminist studies majors.

194E. History of Sexuality. *

Explores one of the central texts of dialogue and contestation in sexuality studies today: Michel Foucault's *The History of Sexuality*. Considers the epistemic challenges outlined in Foucault's early work and engages its instantiations in the proliferating scholarship on gender, sexuality, and critical race studies. Readings challenge the marginalization of empire in Foucault's work and demonstrate that a history of 19th-century European sexuality must also be a history of race. Interview with instructor required. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *A. Arondekar*

194F. Chicana/Latina Cultural Production. F

Traces the intersection between Chicana studies and Latin American studies through transnational forms of cultural production, imaginaries, and empowerment. Analysis of theories of cultural production and discussion of the political salience of culture as a site for resistance, critique, and creativity. Prerequisite(s): course 100. Enrollment restricted to seniors. Enrollment limited to 20. (General Education Code(s): E.) *F. Schaeffer-Grabiel*

194G. Images of Africa. *

Explores questions of colonialism, empire, race, gender, and geopolitics in the proliferating images—filmic, televisual, and media—of Africa in the United States. Facilitates the completion of a substantial research essay based on the study of popular culture. Enrollment restricted to seniors. Prerequisite(s): course 100; enrollment by permission of instructor. Enrollment limited to 20. *G. Dent*

194I. Feminist Oral History and Memoir. W

Designed to train students in oral history and memoir writing. Emphasizes the specialness of transgressive voices; race, class, and sexuality, women's silence, erasure, censorship, and marginalization are addressed. The politics of memory, narratives, storytelling, and editorial judgment are considered. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 1 or 80C; and course 100. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Aptheker*

194J. Advanced Feminist Philosophy. *

Focuses on issues in epistemology and ontology: the construction of knowledge and objectivity, rationality and emotions, subjectivity and personal identity, and the body and sexuality. (Also offered as Philosophy 190T. Students cannot receive credit for both courses.) Prerequisite(s): course 100 or 168. Enrollment limited to 20. *J. Hoy*

194L. Politics of Sexual Rights and Sexual Identity in the Third World. *

Focuses on issues related to the politics of sexual identity and sexual rights in the Third World. Explores ways in which sexual identity is articulated and defined; state attempts to control and legislate sexual identity and behavior; and the emergence of movements for gay and lesbian rights in Third World countries. Prerequisite(s): course 80C or

equivalent. Enrollment restricted to juniors and seniors. Enrollment limited to 20. *E. Honig*

194M. Empire and Sexuality. S

Explores the production of sexualities, sexual identification, and gender differentiation within multiple contexts of colonialism, decolonization, and emerging neo-colonial global formations. (Formerly course 118.) Prerequisite(s): course 100 or 145. Enrollment restricted to seniors majoring in feminist studies, and to graduate students. Enrollment limited to 20. (General Education Code(s): E.) *A. Arondekar*

195. Senior Thesis or Project. F,W,S

The senior thesis/project which satisfies the major requirement. Course is for independent research and writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; students submit petition to sponsoring agency. May be repeated for credit. (General Education Code(s): W.) *The Staff*

196. Feminist Methods of Teaching. F

Practicum for undergraduates assisting in the teaching of course 1, *Introduction to Feminisms*, to conduct sections and evaluate student papers. A weekly seminar considers issues relating to experiential and critical thinking, authority in the classroom, effective facilitation of group process, racial diversity, violence against women. Prerequisite(s): interview with instructor the quarter before course is offered and course 1 or 80C. Students must be upper-division and have a background in feminist studies and/or ethnic studies. Enrollment limited to 25. *B. Aptheker*

198. Independent Field Study. F,W,S

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. *The Staff*

Graduate Courses

201. Topics in Feminist Methodologies. *

Explores feminist theorizing across disciplinary and cultural contexts for both methodology (theories about the research process) and epistemology (theories of knowledge). Goal is to orient students toward changes in organization of knowledge and provide them with different feminist methodologies in their pursuit of both an "object" of study and an epistemology. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Arondekar*

203. Feminist Pedagogies. S

Examines feminist pedagogies as projects in transgressing traditional disciplinary boundaries. Examines historical examples of alternative pedagogies and contemporary models for creating communities dedicated to social justice. Designed to assist graduate students develop teaching strategies in multiple fields. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Aptheker*

205. Feminism, Nationalism, and Sexuality in the Third World. *

Focus on the historical construction and articulation of feminism in the Third World. Explores the relationship of feminist and nationalist movements, considering such questions as whether Third World women's political movements are necessarily "feminist," how these political movements define feminism, and the tensions between nationalisms and feminisms. Particular attention to issues of sexuality, the effects of colonial institutions and policies on sexual identities in Third World countries, the notions of womanhood and female sexualities articulated within nationalist ideologies and movements, the consequences of such constructions for women, and the formulation of sexual issues among feminists. Offered every two or three years. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Honig*

206. Feminism and Psychoanalytic Theory. *

After studying essays by Freud, Lacan, and Melanie Klein which have been central to the construction of feminist theory, considers the writings of such feminist theorists as Jessica Benjamin, Judith Butler, Julia Kristeva, Juliet Mitchell, Jaqueline Rose, Carolyn Steedman, and Maria Torok. Enrollment restricted to graduate students or seniors with permission of instructor, based on narrative evaluations and sample essays. Enrollment limited to 15. *H. Moglen*

207. Topics in Queer/Race Studies. *

Explores the interrelated epistemological frameworks of critical race studies and queer studies. Through the study of a range of philosophical, scientific, literary, and cinematic texts, course historicizes and theorizes discourses of race and sexuality. Enrollment restricted to graduate students. Enrollment limited to 15. A. Arondekar

211. Sexuality, Race, and Migration in the Americas. W

Analyzes the ways transnational processes intersect with changing notions of gender, sexuality, and race. Examines processes such as tourism, the Internet, capitalism, and labor spanning Brazil, the Dominican Republic, and the United States. Enrollment restricted to graduate students. Enrollment limited to 15. *F. Schaeffer-Grabiel*

212. Feminist Theory and the Law. *

Interrogation of the relationship between law and its instantiating gendered categories, supported by feminist, queer, Marxist, critical race, and postcolonial theories. Topics include hypostasization of legal categories, the contest between domestic and international human rights frameworks, overlapping civil and communal codes, cultural explanations in the law, the law as text and archive, testimony and legal subjectivity. (Also offered as History of Consciousness 212. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

214. Topics in Feminist Science Studies. F

Graduate seminar on feminist science studies. Topics will vary and may include: the joint consideration of science studies and poststructuralist theory; the relationship between discursive practices and material phenomena; and the relationship between ontology, epistemology, and ethics. Enrollment restricted to graduate students.

217. Gendering the "Wars on Terror". *

Focuses on questions of gender in the so-called "wars on terror" in Afghanistan and Iraq. Explores topics such as feminist responses to 9/11; the ways in which women's status has been invoked to justify U.S. interventions in both countries; issues of sexuality (and sexual abuse) in the context of war; articulations of feminism in Afghanistan and Iraq; and transnational feminist organizing in relation to these wars. Emphasizes feminist critiques of the "wars on terror," and the ways we, as feminist scholars, can contribute to these analyses. Course partly structured as a research workshop resulting in the production of a substantial research project. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Honig*

225A. Theories of Slavery. *

Explores philosophical, legal, and socio-historical analyses of slavery. Focus on Atlantic slavery and the production of race and gender formations, complemented by discussion on contemporary forms of slavery. Impact of historical slavery on prevailing discourses and institutions. (Also offered as History of Consciousness 205A. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

225B. Theories of Slavery. *

Writing-intensive course based on readings in History of Consciousness 205A and Feminist Studies 225A. (Also offered as History of Consciousness 205B. Students cannot receive credit for both courses.) Prerequisite(s): course 225A or History of Consciousness 205A. Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

232. Topics in Postcolonial Studies. *

Variable topics that could include postcolonial approaches to questions of epistemology and knowledge production, theories of nationalism and nation-state formation, subaltern historiography, analyses of modernization and developmental theory, postcolonial approaches to globalization, and transnationalism. Significant component of feminist contributions to these literatures. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

240. Culture and Politics of Human Rights. *

Examines the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating women's specificity within international human rights law. Focus on application of international and regional human rights conventions and new human rights standards. (Formerly *Feminism and the Culture and Politics of Human Rights.*) (Also offered as Latin American&Latino Studies 240. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *R. Fregoso*

251. Feminist Theory and Social Psychology. *

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion. (Also offered as Psychology 251. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *A. Hurtado*

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy. (Also offered as History of Consciousness 264. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. *The Staff*

* Not offered in 2007-08

Film and Digital Media

101 Communications Building (831) 459-3204 film@ucsc.edu http://film.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The film and digital media major at UCSC offers an integrated curriculum involving theory, criticism, and cultural analysis, as well as a production program in the aesthetics and techniques of film and digital media. This bachelor of arts degree program provides students with the critical skills, theoretical concepts, and historical knowledge necessary to conduct informed analysis of cinema, television, video art, and new media, along with the up-to-date technical knowledge, practical skills, and artistic contexts needed for the production of film, video, and digital media. The major provides a course of study that develops an understanding of moving image and digital media as essential tools of communication and artistic practice.

Students in the general film and digital media major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium, while studying the cultural impact of television and the rise of video and digital art in recent decades. The critical studies concentration is designed for film and digital media majors who have a special aptitude for and interest in the history and theory of film, television, video, and digital media. This rigorous program can help prepare undergraduates for graduate work in critical studies. Students in the highly selective production concentration are encouraged to demonstrate technical proficiency and creative vision in film and digital media production while also studying the histories and theories of these media.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based liberal arts perspective. The UCSC program is interdisciplinary, combining theory and practice in film, video, and digital media with study in other areas of the arts, humanities, and social sciences that help students understand the role these media play in society.

As the technologies of film and video have merged with digital computer-based moving images and interactive media, and as digital media continues to expand into everyday experience, students in the major are uniquely positioned to excel in these fields. Graduates of the UCSC film and digital media program have enjoyed considerable success both in the professional world and in gaining admission into top graduate schools in the field.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media lab; audio recording studio, sound stage with green screen; digital nonlinear editing rooms; video format conversion rooms; a computerized sound effects library; and student equipment checkout. Additionally, computer laboratories equipped for digital image manipulation, web authoring, and interactive interface design and viewing rooms are available. The critical studies facilities include classrooms equipped for high-end film, video, and data projection. The library holdings in film and video history, theory, and literature are complemented by a large collection of films, videos, laser disks, and DVDs, including a diverse range of international feature films, experimental film and video work, animation, silent films, and documentaries.

Some courses offered by the Film and Digital Media Department are restricted in enrollment; admission is based on completion of prerequisites and other specific written application requirements. Admission to advanced production courses is generally restricted to third- and fourth-year students and is based on the submission of a portfolio of work produced in the introductory production class (course 170B) and other production workshops.

Upper-division digital media and production studio courses require coursework to be completed on computers. The department recognizes that students often purchase a new computer on their arrival at the university during their freshman year. It is strongly suggested that students who plan to apply for the production concentration wait until their second or third year of studies before

making this investment. Delaying the purchase until this time allows a student to have the most up-to-date hardware and the fastest machine at the price they can afford at the moment they enter into the production concentration. Laptop computers are strongly encouraged for our production students, and laptop computers may become required in the near future. Instruction in and software for production courses are based on the Apple OS X platform. Compatibility with the department's operating system for instruction is strongly advised. Students are encouraged to consult with the department office or the web site for list of recommended computers, software packages, range of options, and prices.

Declaring the Film and Digital Media Pre-Major

Students who have completed one lower-division course (20A, 20B or 20C) with a grade of B- or better may declare the film and digital media pre-major. Pre-majors are expected to complete the requirements to declare the major by the end of their second year. Transfer students must declare the pre-major no later than their second quarter in residence.

Declaring the Film and Digital Media Major

Prior to declaring the film and digital media major, students must complete course 20A, and either 20B or 20C, with a grade of B- or better. Courses 20A, 20B, and 20C must be taken for a letter grade by students intending to major in film and digital media. Students who have met the B- grade minimum for declaration of the major, may choose to take course 20P as the third lower-division requirement.

20A The Film Experience

20B Introduction to Television Culture and Society

20C Introduction to Digital Media

20P Introduction to Production Technique

Students are encouraged to complete the lower-division courses early in their studies so that the petition to major status is accomplished no later than the first quarter of the junior year. Acceptance into the film and digital media major does not constitute acceptance into either the production concentration or the critical studies concentration. Transfer students should consult the Transfer Student section for instructions about declaring the major.

Students who feel that there were extenuating circumstances which prevented them from meeting the requirements for declaring the major may appeal their denial by submitting a letter to the Film and Digital Media Department. The appeal must be filed no later than 15 days after the denial notification was mailed or the 10th day of classes in the quarter of the denial, whichever is later. For further information regarding this process, contact the Film and Digital Media Department.

Program of Study

The general film and digital media major requires three lower-division and 10 upper-division courses in residence and satisfaction of the senior comprehensive requirement. Students must include among these 13 courses at least one upper-division 5-credit course that focuses on diversity (i.e., non-Western; underrepresented ethnicity, gender, or sexual orientation). A list of courses satisfying the department's diversity requirement is available at the department office. Students in the general film and digital media major may apply for admission to the critical studies concentration (see Critical Studies Concentration below) or to the highly selective and competitive production concentration (see Production Concentration below) within the major.

Lower-Division Requirements

Students must take the lower-division classes 20A, 20B, and 20C for a letter grade, and they must earn a B- or better in two of these three lower-division classes to petition for the major. A third lower-division course is required to satisfy major requirements.

20A The Film Experience, and two of the following three courses are required for all majors:

20B Introduction to Television Culture and Society

20C Introduction to Digital Media

20P Introduction to Production Technique (cannot be used to satisfy the B- grade minimum)

General Film and Digital Media Major

Students must complete the upper-division core curriculum by completing one course from each of the following five groups in film and digital media:

120 Introduction to Film Theory and Criticism

130 Silent Cinema or

132A International Cinema to 1960 or

132B International Cinema, 1960 to Present or

- 132C Gender and Global Cinema
- 134A American Film, 1930-60 or
- 134B American Film, 1960-Present
- 136A Experimental Film and Video or
- 136B History of Television or
- 136C Visual Culture and Technology: History of New Media
- 194A Film Theory Seminar or194B Electronic Media Theory Seminar or
- 194C New Media Theory Seminar or
- 194D Film History Seminar or
- 194E International Cinemas or 194F Film and the Other Arts: Music and Dance or
- 194G New(s) Media or
- 194S Senior Seminar: Special Topics

Five upper-division elective courses are to be chosen from the following:

- up to five additional upper-division history/critical studies courses in film and digital media;
- up to two upper-division courses in film and digital media production (170A, 170B, one from the 171 series, 172, 173, 175, 176, or 177, one from the 178 series);
- course 150 or 151;
- · up to two upper-division courses offered by other departments; course substitutions must be pre-approved by the faculty adviser.

Film and Digital Media Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the film and digital media major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Students who are interested in either the production concentration or the critical studies concentration should seriously consider Plan One to be better prepared for application to production studio classes or the critical studies concentration in their junior year.

Plan One			
Year	Fall	Winter	Spring
1st	college core gen ed Film 20A	low-div Fidm* req gen ed (declare pre-major)	low-div Fidm* req gen ed (declare major)

2nd	low-div Fidm* req gen ed (declare major)	Fidm* critical studies core gen ed	Fidm* critical studies core gen ed

^{*}film and digital media

Critical Studies Concentration

The critical studies concentration provides a more rigorous pathway through the film and digital media major and offers classes specifically reserved for seniors who have exceptional abilities. Students are eligible to apply for the critical studies concentration in spring quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Applicants must already be declared Film and Digital Media majors in good standing.

Students will be asked to submit the following application materials:

- · a completed application form
- a 1-page statement of purpose
- a sample essay
- · copies of narrative evaluations for all courses taken in Film and Digital Media

Application materials and instructions are available at the Film and Digital Media Department office. Student application materials are reviewed by a committee of film and digital media critical studies faculty. Admission to the Critical Studies Concentration will be granted to students who have overwhelmingly excellent evaluations, an outstanding writing sample, and a clear statement of

purpose. Students may reapply a second time if not accepted, but not later than the first quarter of their senior year.

Requirements for the Critical Studies Concentration

The critical studies concentration curriculum adds the following requirements to those already established for the film and digital media major. Students are required to take two upper-division electives, rather than the five electives currently required for the film and digital media major. FILM 190, an Advanced Critical Studies Seminar, replaces the current requirement for one of the FILM 194 seminars, and serves as an exit requirement in the major.

Students in the critical studies concentration complete the following required upper-division core curriculum (9 courses):

120 Introduction to Film Theory and Criticism 130 Silent Cinema or 132A International Cinema to 1960 or 132B International Cinema, 1960 to Present or 132C Gender and Global Cinema 134A American Film, 1930–60 or 134B American Film, 1960–Present 136A Experimental Film and Video or 136B History of Television or 136C Visual Culture and Technology: History of New Media 165A Film, Video and Gender or 165B Race on Screen or165C Lesbian, Gay and Queer Film and Video or 165D Asian Americans in Media 187 Advanced Topics in Television Studies or 189 Advanced Topics in Electronic and Digital Media Studies 190 Advanced Critical Studies Seminar 191 Critical Studies Thesis Preparation Seminar

Two upper-division elective courses are to be chosen from the following:

Student-Directed Seminar or

Senior Thesis

- up to two additional upper-division history/critical studies courses in film and digital media;
- one upper-division course in film and digital media production (150, 151, 170A, 170B, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series);
- one upper-division course offered by other departments; course substitutions must be preapproved by the faculty adviser.

Production Concentration

192

195

Admission to the production concentration is highly selective, based on promise and accomplishment shown in the student's work. After completing course 170B, students may apply to the production concentration by submitting works to a portfolio review conducted at the end of each quarter. These student works are reviewed by a committee of film and digital media production faculty. Application materials and instructions are available at the Film and Digital Media Department office. Students should note that production courses are in high demand and that faculty/student ratios and equipment resources limit the number of applicants accepted into the production concentration. Students may reapply a second time if not accepted.

Requirements for the Production Concentration

Students in the production concentration complete the following required upper-division core curriculum (six courses):

120 Introduction to Film Theory and Criticism 170B Fundamentals of Film and Video Production

two of the following production courses:

150 Screenwriting Film Directing 151 170A Fundamentals of Digital Media Production 171A Special Topics Workshop: Sound 171C Special Topics Workshop: Found Footage171D Social Information Spaces 172 Film and Video Studio 173 Narrative Workshop 175 Documentary Video Workshop 176 Experimental Video Workshop 177 Digital Media Workshop: Computer as Medium

178A Personal Computers in Film and Video

and two critical studies courses—one each from two of the three following groups:

- 130 Silent Cinema or
- 132A International Cinema to 1960 or
- 132B International Cinema, 1960 to Present or
- 132C Gender and Global Cinema
- 134A American Film, 1930-60 or
- 134B American Film, 1960–Present
- 136A Experimental Film and Video or
- 136B History of Television or
- 136C Visual Culture and Technology: History of New Media

and four upper-division elective courses from the following:

- up to two upper-division courses in film and digital media production (150, 151, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series);
- at least two upper-division film and digital media history/critical studies courses;
- up to two upper-division critical studies elective courses from another department; course substitutions must be pre-approved by the faculty adviser.

Comprehensive Requirement

All seniors in the general film and digital media major or in the production concentration may select one of three options to satisfy the campus exit requirement.

- Senior seminar: The senior seminars (courses in the 194 series) are restricted to majors in their senior year and are writing intensive. Students in the general major are required to complete one senior seminar. Students in the production concentration may complete the senior seminar to satisfy the senior exit requirement or as an elective.
- Senior thesis: With prior faculty approval, a student may elect to do a senior thesis (course 195). The student must contact a faculty member at least one quarter in advance to submit a proposal and to obtain faculty approval for a senior thesis. The proposal may involve writing a screenplay, expanding on a paper from a previously completed upper-division critical studies course in film and digital media, or writing an original paper in a particular area resulting in a work of substantial research.
- Senior project: A limited number of students in the production concentration may participate
 in the senior project (course 196A or 196B, or 197). Admission is by application, with review
 of previous works and evaluation of the proposed final project by film and digital media
 production faculty.

Seniors in the critical studies concentration must complete the following to satisfy the campus exit requirement: Course 190, Advanced Critical Studies Seminar

Transfer Students

All transfer students must enroll in at least one lower-division course (20A, 20B or 20C) during their first quarter in residence. Transfer students are encouraged to enroll in 20A during the Summer Session preceding their first quarter in residence. After completion of one lower-division course (20A, 20B or 20C) with a grade of B- or better, transfer students may declare the film and digital media pre-major.

All transfer students must earn a B- or higher in two 20-level courses (at least one must be taken at UCSC) to declare the major. Appeal procedures are the same as for non-transfer students. Three lower-division and 10 upper-division courses are required for completion of the major. With some lower-division preparation, transfer students should be able to complete the upper-division course work and the major within two years. As preparation, prospective transfer students are encouraged to fulfill at least one lower-division film and digital media major requirement (course 20 series) through UCSC Summer Session prior to their transfer. Transfer students must petition the department to have equivalent lower-division courses taken at their current institution count toward their UCSC major requirements provided they have earned a B- or higher in that course.

Students who have completed none of the lower-division major requirements prior to transfer to UCSC, students who are interested in graduating with a double major, and students who must finish general education requirements may need additional time to complete their studies.

Transfer students are strongly encouraged to speak with an academic adviser at the department office prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Honors

Honors in film and digital media are awarded to graduating seniors whose academic performance in

their major coursework is judged by a faculty committee to be consistently excellent to outstanding. Students must also do excellent work on their senior exit requirement. Both narrative evaluations and letter grades will be considered; to be considered for Honors, students must have at least a cumulative GPA of 3.5 or the relative equivalent in narrative evaluations, as determined by the faculty committee.

Minor Requirements

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines. Students earn a minor in film and digital media by completing eight courses: two lower-division courses as prerequisites for the minor and six upper-division courses including four from the core curriculum of the general major and two electives. There is no production component in the minor, nor is there a comprehensive requirement.

Lower-Division Requirements

Students must complete at least two lower-division courses prior to petitioning for the minor:

- 20A The Film Experience, and one of the following three courses:
- 20B Introduction to Television Culture and Society
- 20C Introduction to Digital Media
- 20P Introduction to Production Technique

Requirements for the Minor

Students in the minor must complete the upper-division core curriculum by completing one course from each of the following four categories in film and digital media:

- 120 Introduction to Film Theory Criticism
- 130 Silent Cinema or
- 132A International Cinema to 1960 or
- 132B International Cinema, 1960 to Present or
- 132C Gender and Global Cinema
- 134A American Film, 1930-60 or
- 134B American Film, 1960-Present
- 136A Experimental Film and Video or
- 136B History of Television or
- 136C Visual Culture and Technology: History of New Media

Two upper-division elective courses to be chosen from the following: Any two additional upper-division film and digital media history/critical studies courses other than production studio courses (170A through 178A, and 178B) that have not been used to satisfy the above core curriculum.

Film and Digital Media

101 Communications Building (831) 459-3204 film@ucsc.edu http://film.ucsc.edu

Program Description | Faculty | Course Descriptions

Program Description

The film and digital media major at UCSC offers an integrated curriculum involving theory, criticism, and cultural analysis, as well as a production program in the aesthetics and techniques of film and digital media. This bachelor of arts degree program provides students with the critical skills, theoretical concepts, and historical knowledge necessary to conduct informed analysis of cinema, television, video art, and new media, along with the up-to-date technical knowledge, practical skills, and artistic contexts needed for the production of film, video, and digital media. The major provides a course of study that develops an understanding of moving image and digital media as essential tools of communication and artistic practice.

Students in the general film and digital media major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium, while studying the cultural impact of television and the rise of video and digital art in recent decades. The critical studies concentration is designed for film and digital media majors who have a special aptitude for and interest in the history and theory of film, television, video, and digital media. This rigorous program can help prepare undergraduates for graduate work in critical studies. Students in the highly selective production concentration are encouraged to demonstrate technical proficiency and creative vision in film and digital media production while also studying the histories and theories of these media.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based liberal arts perspective. The UCSC program is interdisciplinary, combining theory and practice in film, video, and digital media with study in other areas of the arts, humanities, and social sciences that help students understand the role these media play in society.

As the technologies of film and video have merged with digital computer-based moving images and interactive media, and as digital media continues to expand into everyday experience, students in the major are uniquely positioned to excel in these fields. Graduates of the UCSC film and digital media program have enjoyed considerable success both in the professional world and in gaining admission into top graduate schools in the field.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media lab; audio recording studio, sound stage with green screen; digital nonlinear editing rooms; video format conversion rooms; a computerized sound effects library; and student equipment checkout. Additionally, computer laboratories equipped for digital image manipulation, web authoring, and interactive interface design and viewing rooms are available. The critical studies facilities include classrooms equipped for high-end film, video, and data projection. The library holdings in film and video

history, theory, and literature are complemented by a large collection of films, videos, laser disks, and DVDs, including a diverse range of international feature films, experimental film and video work, animation, silent films, and documentaries.

Some courses offered by the Film and Digital Media Department are restricted in enrollment; admission is based on completion of prerequisites and other specific written application requirements. Admission to advanced production courses is generally restricted to third- and fourth-year students and is based on the submission of a portfolio of work produced in the introductory production class (course 170B) and other production workshops.

Upper-division digital media and production studio courses require coursework to be completed on computers. The department recognizes that students often purchase a new computer on their arrival at the university during their freshman year. It is strongly suggested that students who plan to apply for the production concentration wait until their second or third year of studies before making this investment. Delaying the purchase until this time allows a student to have the most up-to-date hardware and the fastest machine at the price they can afford at the moment they enter into the production concentration. Laptop computers are strongly encouraged for our production students, and laptop computers may become required in the near future. Instruction in and software for production courses are based on the Apple OS X platform. Compatibility with the department's operating system for instruction is strongly advised. Students are encouraged to consult with the department office or the web site for list of recommended computers, software packages, range of options, and prices.

Declaring the Film and Digital Media Pre-Major

Students who have completed one lower-division course (20A, 20B or 20C) with a grade of B- or better may declare the film and digital media pre-major. Pre-majors are expected to complete the requirements to declare the major by the end of their second year. Transfer students must declare the pre-major no later than their second quarter in residence.

Declaring the Film and Digital Media Major

Prior to declaring the film and digital media major, students must complete course 20A, and either 20B or 20C, with a grade of B- or better. Courses 20A, 20B, and 20C must be taken for a letter grade by students intending to major in film and digital media. Students who have met the B- grade minimum for declaration of the major, may choose to take course 20P as the third lower-division requirement.

20A The Film Experience

20B Introduction to Television Culture and Society

20C Introduction to Digital Media

20P Introduction to Production Technique

Students are encouraged to complete the lower-division courses early in their studies so that the petition to major status is accomplished no later than the first quarter of the junior year. Acceptance into the film and digital media major does not constitute acceptance into either the production concentration or the critical studies concentration. Transfer students should consult the Transfer Student section for instructions about declaring the major.

Students who feel that there were extenuating circumstances which prevented them from meeting the requirements for declaring the major may appeal their denial by submitting a letter to the Film and Digital Media Department. The appeal must be filed

no later than 15 days after the denial notification was mailed or the 10th day of classes in the quarter of the denial, whichever is later. For further information regarding this process, contact the Film and Digital Media Department.

Program of Study

The general film and digital media major requires three lower-division and 10 upper-division courses in residence and satisfaction of the senior comprehensive requirement. Students must include among these 13 courses at least one upper-division 5-credit course that focuses on diversity (i.e., non-Western; underrepresented ethnicity, gender, or sexual orientation). A list of courses satisfying the department's diversity requirement is available at the department office. Students in the general film and digital media major may apply for admission to the new critical studies concentration (see Critical Studies Concentration below) or to the highly selective and competitive production concentration (see Production Concentration below) within the major.

Lower-Division Requirements

Students must take the lower-division classes 20A, 20B, and 20C for a letter grade, and they must earn a B- or better in two of these three lower-division classes to petition for the major. A third lower-division course is required to satisfy major requirements.

20A *The Film Experience*, and two of the following three courses are required for all majors:

20B Introduction to Television Culture and Society

20C Introduction to Digital Media

20P Introduction to Production Technique (cannot be used to satisfy the B- grade minimum)

General Film and Digital Media Major

Students must complete the upper-division core curriculum by completing one course from each of the following five groups in film and digital media:

120 Introduction to Film Theory and Criticism

130 Silent Cinema or

132A International Cinema to 1960 or

132B International Cinema, 1960 to Present or

132C Gender and Global Cinema

134A *American Film*, 1930–60 or

134B American Film, 1960–Present

136A Experimental Film and Video or

136B History of Television or

136C Visual Culture and Technology: History of New Media

194A Film Theory Seminar or

194B Electronic Media Theory Seminar or

194C New Media Theory Seminar or

194D Film History Seminar or

194E International Cinemas or

194F Film and the Other Arts: Music and Dance or

194G New(s) Media or

194S Senior Seminar: Special Topics

Five upper-division elective courses are to be chosen from the following:

- up to five additional upper-division history/critical studies courses in film and digital media;
- up to two upper-division courses in film and digital media production (170A, 170B, one from the 171 series, 172, 173, 175, 176, or 177, one from the 178 series);
- course 150 or 151;
- up to two upper-division courses offered by other departments; course substitutions must be pre-approved by the faculty adviser.

Film and Digital Media Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the film and digital media major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Students who are interested in either the production concentration or the critical studies concentration should seriously consider Plan One to be better prepared for application to production studio classes or the critical studies concentration in their junior year.

Plan One

2nd	low-div Fidm* req gen ed (declare major)	Fidm* critical studies core gen ed	Fidm* critical studies core gen ed					

^{*}film and digital media

Critical Studies Concentration

The critical studies concentration provides a more rigorous pathway through the film and digital media major and offers classes specifically reserved for seniors who have exceptional abilities. Students are eligible to apply for the critical studies concentration in spring quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Applicants must already be declared Film and Digital Media majors in good standing.

Students will be asked to submit the following application materials:

• a completed application form

- a 1-page statement of purpose
- a sample essay
- copies of narrative evaluations for all courses taken in Film and Digital Media

Application materials and instructions are available at the Film and Digital Media Department office. Student application materials are reviewed by a committee of film and digital media critical studies faculty. Admission to the Critical Studies Concentration will be granted to students who have overwhelmingly excellent evaluations, an outstanding writing sample, and a clear statement of purpose. Students may reapply a second time if not accepted, but not later than the first quarter of their senior year.

Requirements for the Critical Studies Concentration

The critical studies concentration curriculum adds the following requirements to those already established for the film and digital media major. Students are required to take two upper-division electives, rather than the five electives currently required for the film and digital media major. FILM 190, an Advanced Critical Studies Seminar, replaces the current requirement for one of the FILM 194 seminars, and serves as an exit requirement in the major.

Students in the critical studies concentration complete the following required upperdivision core curriculum (9 courses):

- 120 Introduction to Film Theory and Criticism
- 130 Silent Cinema or
- 132A International Cinema to 1960 or
- 132B International Cinema, 1960 to Present or
- 132C Gender and Global Cinema
- 134A American Film, 1930-60 or
- 134B American Film, 1960–Present
- 136A Experimental Film and Video or
- 136B History of Television or
- 136C Visual Culture and Technology: History of New Media
- 165A Film, Video and Gender or
- 165B Race on Screen or
- 165C Lesbian, Gay and Queer Film and Video or
- 165D Asian Americans in Media
- 187 Advanced Topics in Television Studies or
- 189 Advanced Topics in Electronic and Digital Media Studies
- 190 Advanced Critical Studies Seminar
- 191 Critical Studies Thesis Preparation Seminar
- 192 Student-Directed Seminar or
- 195 Senior Thesis

Two upper-division elective courses are to be chosen from the following:

- up to two additional upper-division history/critical studies courses in film and digital media;
- one upper-division course in film and digital media production (150, 151, 170A, 170B, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series);
- one upper-division course offered by other departments; course substitutions must be pre-approved by the faculty adviser.

Production Concentration

Admission to the production concentration is highly selective, based on promise and accomplishment shown in the student's work. After completing course 170B, students may apply to the production concentration by submitting works to a portfolio review conducted at the end of each quarter. These student works are reviewed by a committee of film and digital media production faculty. Application materials and instructions are available at the Film and Digital Media Department office. Students should note that production courses are in high demand and that faculty/student ratios and equipment resources limit the number of applicants accepted into the production concentration. Students may reapply a second time if not accepted.

Requirements for the Production Concentration

Students in the production concentration complete the following required upperdivision core curriculum (six courses):

```
120 Introduction to Film Theory and Criticism170B Fundamentals of Film and Video Production
```

two of the following production courses:

```
150 Screenwriting
```

151 Film Directing

170A Fundamentals of Digital Media Production

171A Special Topics Workshop: Sound

171C Special Topics Workshop: Found Footage

171D Social Information Spaces

172 Film and Video Studio

173 Narrative Workshop

175 Documentary Video Workshop

176 Experimental Video Workshop

177 Digital Media Workshop: Computer as Medium

178A Personal Computers in Film and Video

178B Advanced Personal Computers in Film and Video

and two critical studies courses—one each from two of the three following groups:

130 Silent Cinema or

132A International Cinema to 1960 or

132B International Cinema, 1960 to Present or

132C Gender and Global Cinema

134A *American Film*, 1930–60 or

134B American Film, 1960–Present

136A Experimental Film and Video or

136B History of Television or

136C Visual Culture and Technology: History of New Media

and four upper-division elective courses from the following:

- up to two upper-division courses in film and digital media production (150, 151, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series);
- at least two upper-division film and digital media history/critical studies courses;
- up to two upper-division critical studies elective courses from another department; course substitutions must be pre-approved by the faculty adviser.

Comprehensive Requirement

All seniors in the general film and digital media major or in the production concentration may select one of three options to satisfy the campus exit requirement.

- Senior seminar: The senior seminars (courses in the 194 series) are restricted to majors in their senior year and are writing intensive. Students in the general major are required to complete one senior seminar. Students in the production concentration may complete the senior seminar to satisfy the senior exit requirement or as an elective.
- Senior thesis: With prior faculty approval, a student may elect to do a senior thesis (course 195). The student must contact a faculty member at least one quarter in advance to submit a proposal and to obtain faculty approval for a senior thesis. The proposal may involve writing a screenplay, expanding on a paper from a previously completed upper-division critical studies course in film and digital media, or writing an original paper in a particular area resulting in a work of substantial research.
- Senior project: A limited number of students in the production concentration may participate in the senior project (course 196A or 196B, or 197). Admission is by application, with review of previous works and evaluation of the proposed final project by film and digital media production faculty.

Seniors in the critical studies concentration must complete the following to satisfy the campus exit requirement: Course 190, *Advanced Critical Studies Seminar*

Transfer Students

All transfer students must enroll in at least one lower-division course (20A, 20B or 20C) during their first quarter in residence. Transfer students are encouraged to enroll in 20A during the Summer Session preceding their first quarter in residence. After completion of one lower-division course (20A, 20B or 20C) with a grade of B- or better, transfer students may declare the film and digital media pre-major.

All transfer students must earn a B- or higher in two 20-level courses (at least one must be taken at UCSC) to declare the major. Appeal procedures are the same as for non-transfer students. Three lower-division and 10 upper-division courses are required for completion of the major. With some lower-division preparation, transfer students should be able to complete the upper-division course work and the major within two years. As preparation, prospective transfer students are encouraged to fulfill at least one lower-division film and digital media major requirement (course 20 series) through UCSC Summer Session prior to their transfer. Transfer students must petition the department to have equivalent lower-division courses taken at their current institution count toward their UCSC major requirements provided they have earned a B- or higher in that course.

Students who have completed none of the lower-division major requirements prior to transfer to UCSC, students who are interested in graduating with a double major, and students who must finish general education requirements may need additional time to complete their studies.

Transfer students are strongly encouraged to speak with an academic adviser at the department office prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Honors

Honors in film and digital media are awarded to graduating seniors whose academic performance in their major coursework is judged by a faculty committee to be consistently excellent to outstanding. Students must also do excellent work on their senior exit requirement. Both narrative evaluations and letter grades will be considered; to be considered for Honors, students must have at least a cumulative GPA of 3.5 or the relative equivalent in narrative evaluations, as determined by the faculty committee.

Minor Requirements

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines. Students earn a minor in film and digital media by completing eight courses: two lower-division courses as prerequisites for the minor and six upper-division courses including four from the core curriculum of the general major and two electives. There is no production component in the minor, nor is there a comprehensive requirement.

Lower-Division Requirements

Students must complete at least two lower-division courses prior to petitioning for the minor:

- 20A The Film Experience, and one of the following three courses:
- 20B Introduction to Television Culture and Society
- 20C Introduction to Digital Media
- 20P Introduction to Production Technique

Requirements for the Minor

Students in the minor must complete the upper-division core curriculum by completing one course from each of the following four categories in film and digital media:

- 120 Introduction to Film Theory Criticism
- 130 Silent Cinema or
- 132A International Cinema to 1960 or
- 132B International Cinema, 1960 to Present or
- 132C Gender and Global Cinema
- 134A *American Film*, 1930–60 or
- 134B American Film, 1960–Present
- 136A Experimental Film and Video or
- 136B History of Television or
- 136C Visual Culture and Technology: History of New Media

Two upper-division elective courses to be chosen from the following: Any two additional upper-division film and digital media history/critical studies courses other than production studio courses (170A through 178A, and 178B) that have not been used to satisfy the above core curriculum.

Film and Digital Media

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Eli E. Hollander

Film and video directing; ethnographic documentary directing, editing, cinematography, and videography; digital image generation; screenwriting

Charles L. Lord

Film and video directing and editing, video theory and history, video installation, screenwriting, documentary production

Margaret Morse

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary, science fiction, and silent comedy

Associate Professor

Lawrence Andrews

Film, video, installation and media art

Sharon Daniel

Community-based public art in information and communications environments, social and political aspects of information technology, community networks, participatory culture, digital inclusion, net art, human-computer interface design

Amelie Hastie

Film theory and history, feminist film and television studies, Chinese cinemas, issues of authorship, interdisciplinary approaches

Warren Sack

Software design and media theory

Shelley Stamp

Film history, theory, and criticism; silent cinema; women's filmmaking; film censorship; histories of moviegoing; feminist approaches to cinema

Assistant Professor

David Crane

Film and media theory, discourses on technology, digital culture, experimental media, critical and psychoanalytic theory

Irene Gustafson

Producing across the boundaries between "theory" and "practice," non-fiction, gender and queer studies, production design

L. S. Kim

Television history and theory, racial discourse, feminist criticism, Asian-American media production, industrial practices and social change in both mainstream Hollywood and alternative media

Peter Limbrick

International cinemas; intersections of race, gender, and sexuality; theories of globalization, transnationalism, and postcoloniality; queer theory

Gustavo Vazquez

Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

Yiman Wang

Film history and theory; border-crossing film remakes; silent cinema; translation theory and cinema; star study; Chinese language cinemas and documentary; East Asian cinemas; Internet culture

Professor

Julianne Burton-Carvajal, Literature

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

Teresa de Lauretis, History of Consciousness

Semiotics, psychoanalysis, feminism, film theory, literary theory, queer studies

Rosa Linda Fregoso, Latin American and Latino Studies

Cultural studies, transnational feminist theories, Chicana/o and Latina/o cinema, issues of human rights and gender violence

Herman S. Gray, Sociology

Cultural studies, media and television studies, black cultural politics, social theory

Donna J. Haraway, History of Consciousness and Feminist Studies

Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

B. Ruby Rich, Community Studies

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

Associate Professor

David S. Marriott, History of Consciousness

Literary theory, psychoanalysis, black cultural theory and philosophies of race, literary and visual cultures of modernism

Renee Tajima-Peña, Community Studies

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

20A. The Film Experience. F,S

An introduction to the basic elements, range, and diversity of cinematic representation and expression. Aesthetic, theoretical, and critical issues are explored in the context of class screenings and critical readings. Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IH, A.) *The Staff, P. Limbrick*

20B. Introduction to Television Culture and Society. W

Introduction to the basic forms of televisual presentation, including differing narrative structure from movies and situation comedies to soap opera, plus modes of direct discourse in news, advertising, sports, music, television, and other genres. Alternative forms and modes in electronic media, such as independent video art and documentary, public television, cable, and electronic networks are explored, with their potential for expressing cultural diversity set in relation to social, cultural, and political conditions. Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IH, A.) *The Staff*

20C. Introduction to Digital Media. S

Introduces fundamental features of digital media and examines the immense visual, social, and psychological impact of the "digital revolution" on our culture. Topics include the concepts and forms of the digital hypertext interface, Internet, and web, and the impact of digital media on conceptions of the self, body, identity, and community. Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IH, A.) *D. Crane*

20P. Introduction to Production Technique. F,W

Introduction to production process with emphasis on low-budget, independent film and video making. Explores conceptualization, planning, shooting, editing of documentary, personal essay, and feature narrative works. Emphasis on visualization and shooting style, and scriptwriting, but not hands-on editing. Open to students of varied backgrounds and goals. Students are billed a course fee. (General Education Code(s): A.) *The Staff, I. Gustafson*

42. Student-Directed Seminar. F,W,S

Seminars on selected topics taught by upper-division students under faculty supervision (see course 192). Students submit petition to sponsoring agency. *The Staff*

80A. Technothrillers. *

Examination of recent films classified as "thrillers" that approach technology (computers, robotics, biotech, the Internet, etc.) through suspense, anxiety, and paranoia. It will also address how technologically produced popular culture negotiates attitudes towards technological change. Students are billed a course fee. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *D. Crane*

80S. Special Topics in Film and Digital Media. F

Study of selected aspects of film, television, and/or digital media. Includes weekly screenings and historical/theoretical readings. May be repeated for credit. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *The Staff*

Upper-Division Courses

120. Introduction to Film Theory and Criticism. F

An introduction to classical and contemporary film theory and those theoretical paradigms and methods that have illuminated the media: formalism, realism, structuralism, semiotics, psychoanalysis, Marxism, feminism, and issues of identity and difference. Students are billed a course fee. Prerequisite(s): course 20A, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): W.) *A. Hastie*

130. Silent Cinema. W

Presents the development of silent film as a cultural form from the early period to the beginning of sound, addressing its historical evolution, technological development, aesthetic transformations, and varied cultural contexts. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. *S. Stamp*

132A. International Cinema to 1960. *

A survey of significant developments in narrative film outside Hollywood from the advent of sound technology to the late '50s. Differing inter/national contexts, theoretical movements, technological innovations, and major directors are studied. Students are billed a course fee. Usually offered alternate academic years. Prerequisite(s): course 20A . Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *P. Limbrick*

132B. International Cinema, 1960 to Present. W

A survey of significant developments in narrative film outside Hollywood from 1960 to the present. Major film movements and directors from around the world are studied. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *P. Limbrick*

132C. Gender and Global Cinema. S

Offers students historical and critical tools to investigate global film through the framework of gender. Focused in particular on contemporary film (from 1960 to present), the class is structured both chronologically and via national industries. Students cannot receive credit for this course and Latin American and Latino Studies

80I. Students are billed a course fee. Prerequisite(s): course 20A. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): E.) *Y. Wang*

134A. American Film, 1930–1960. *

A survey of American narrative cinema from 1930 to 1960. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. Offered in alternate academic years. *The Staff*

134B. American Film, 1960-Present. F

A survey of American narrative cinema from 1960 to the present. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. Offered in alternate academic years. *The Staff*

136A. Experimental Film and Video. W

A survey of various experimental styles and practices in film and video, addressing the historical developments of these media formats. The course situates experimental film and video work within the larger contexts of artistic traditions as well as networks of production and reception. Students are billed for a course fee. Prerequisite(s): course 20A . Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *D. Crane*

136B. History of Television. *

Survey of the historical development of broadcast television from its origins to the present day phenomena of cable, satellite, and electronic networks. Examination of major genres, forms, and modes of production and consumption within cultural, social, and economic contexts. Offered every other year, alternating with course 136A. Students are billed for a course fee. Prerequisite(s): course 20B. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *L. Kim*

136C. Visual Culture and Technology: History of New Media. *

Explores the relationship between technology and change and surveys the history of various technologies of visual culture from print to computer based imagery and the Internet. Students are billed a course fee. Prerequisite(s): course 20C. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. *M. Morse*

142. Beyond Cybernetics: Advanced Topics in New Media Technologies. *

Analysis of the effects of communication and information technologies on culture and cultural production through the study of systems and networks. Assignments may include papers, Internet presentations, development/participation in virtual communities, interactive multimedia. Emphasis on advanced critical and experimental approaches. Students are billed a course fee. Prerequisite(s): course 20C. Enrollment restricted to film and digital media majors. Enrollment limited to 40. S. Daniel, L. Andrews

150. Screenwriting. F

Problems in writing for film and television are explored through the writing of original material and analysis of existing works. Various film genres, conventions, and styles, both fictional and nonfictional, are examined. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Admission by application process which may begin prior to start of quarter; application materials generally available final week of preceding quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. May be repeated for credit. (General Education Code(s): W.) *E. Hollander*

151. Film Directing. S

Workshop that explores the director's involvement in film and video production. Topics will include the manipulation of time and space, continuity, script planning and blocking, and working with actors and crew. Students will participate in group and individual exercises in pre-production and scene direction. Prerequisite(s): courses 20A, 20P, and/or 170B are recommended. Admission by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Enrollment limited to 30. (General Education Code(s): A.) *G. Vazquez*

160. Film Genres. F,W,S

Concentrated study of films from one cinematic grouping with similar themes and narrative structures such as westerns, musicals, or science fiction, or a comparative study of different genres. History, theory, and criticism of the genre are covered. Students are billed a course fee. Prerequisite(s): course 132A, 132B, 132C, 134A or 134B. Enrollment restricted to film and digital media majors during priority enrollment; may be opened if space allows. May be repeated for credit. (General Education Code(s): A.) *The Staff, A. Hastie*

161. Documentary Film and Video. W

Explores the category of nonfiction through a historical and theoretical study of documentary in film and video. Addresses ethnographic film, Soviet and Griersonian documentary, cinema verité and/or other selected documentary texts and the issues of representation they raise. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Offered in alternate academic years. *M. Morse*

162. Film Authors. W,S

Intensive critical study of the work of one film auteur (director, screenwriter, actor, cinematographer). Themes, style, and structure are explored using various critical modes of analysis. Students are billed a course fee. Prerequisite(s): course 120. Enrollment restricted to film and digital media majors during priority enrollment; may be opened if space allows. May be repeated for credit. *The Staff, S. Stamp*

162A. Cinema and History: Film Author Satyajit Ray. *

Satyajit Ray is widely acclaimed as a master of world cinema. Course considers his work to examine "authorship" at multiple levels: the cultural, historical, social, and familial contexts and the relationship of his film to fiction, the politics and poetics of his vision, and its relationship to colonial, nationalist, and postcolonial India. Also studies the question of gender and the underclass. (Also offered as History 148. Students cannot receive credit for both courses.) (General Education Code(s): E.) *The*

165A. Film, Video, and Gender. *

A study of texts, theories, and issues of gender in film and/or video. Changing focus on one or more topics, including production and authorship, representation, reception, theories of identification, sexual preference, and related issues. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A or 20B. (General Education Code(s): A.) *I. Gustafson*

165B. Race on Screen. *

Review of historical and critical tools to interpret representations of race on cinematic, television, and computer screens. Class will consider the place of race in theoretical and historical scholarship and examine the debates about race produced within and across film and digital media. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A or 20B. (General Education Code(s): E.) *The Staff*

165C. Lesbian, Gay, and Queer Film and Video. W

An overview of homosexuality in American film. Explores a baseline Hollywood homophobia and the formal and historical attempts to change it. Recent independent queer film and video discussed. Topics include authorship, spectatorship, genre and genre reappropriation, historical gender constructs, the "art" film, mainstream vs. independent production, the relationship of film to popular music. Students are billed a course fee. Usually offered in alternate catalog years. *I. Gustafson*

165D. Asian Americans and Media. F

Examines media representations about, as well as by, Asian Americans. Using critical essays on film theory, racial studies, feminist criticism, and independent cinema, students develop the skills necessary to conduct critical analysis of Asian Americans in film and television. Students are billed a course fee. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *The Staff*

168. National Cinema and Culture. F,S

Study of a specific cinematic or other media tradition of a region, nation, language, diasporic collectivity or other unifying cultural entity. Not a survey, this course selects one focus or offers a comparative of cross-cultural framework. Students are billed a course fee. Prerequisite(s): course 130, 132A, 132B, or 132C. May be repeated for credit. *The Staff, P. Limbrick, Y. Wang*

170A. Introduction to Digital Media Production. W

Introduction to the conceptual and technical fundamentals of making digital media. Covers principles of digital image manipulation, basic web authoring, and interface design through projects that introduce production techniques and methods. Students are billed for a materials fee. Prerequisite(s): course 20C Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

170B. Fundamentals of Film and Video Production. F,W,S

An introduction to the art and craft of making films and videos. Covers principles of cinematography, videography, editing, production planning, and lighting involving both production and techniques and methods. Students are billed a materials fee. Prerequisite(s): course 20A or 20B and one other film/video and digital media critical studies or history course required. Completion of additional upper-division film and digital media critical studies or history courses improves students' ability to be admitted to this course. Admission by application and entrance essay. Application

process may begin prior to start of quarter; application materials generally available final week of preceding quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Enrollment limited to 25. (General Education Code(s): A.) *The Staff, E. Hollander, C. Lord, G. Vazquez*

171. Special Topics Workshops.

Study of selected aspects of film, video, and/or digital media production. The Staff

171A. Sound. W

The cinematic equation equals images plus sound. What are sound-specific properties? What is the relationship between sound and image? Examines these and other questions through the creation of audio and audiovisual pieces. Students are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *L. Andrews*

171C. Special Topics Workshop: Found Footage. S

Students will consider the practice of "recycling" images perhaps not intended by the original "owner" or "creator." In addition to assigned readings and technical workshops, students produce three video projects and give a presentation on a specific issue or artist/group. Prerequisite(s): course 170A or 170B; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *C. Lord*

171D. Social Information Spaces. S

Investigates how information spaces can be designed to be inhabited, socially navigable spaces. Emphasizes the social navigation of information spaces, a set of techniques and ideas from computer-supported cooperative works, human-computer interaction, and architecture. Prerequisite(s): course 170A; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *W. Sack*

171E. Structure of Hollywood. *

Examines current structure of American film industry tracing history of shifting

industrial practices. Who has power in Hollywood? How does the exercise of power affect the creative process? How does it change what we see? Enrollment restricted to film and digital media majors. *The Staff*

172. Film and Video Studio. F,S

Intermediate workshop in film and video production. Topics include cinematography, sound, and non-linear digital editing techniques. Each student is responsible for the completion of a short project utilizing 16mm film or video. Students must bear the cost of materials and are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to start of quarter; application materials generally available final week of preceding quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *G. Vazquez, L. Andrews*

Analysis of cinematic codes and narrative structure through digital video, Internet and interactive multimedia projects. Required readings address contemporary research in narratology and hyper-media, exploring the potential of digital technology to reconfigure the role of both author and audience. Students billed a course fee. Prerequisite(s): course 170A; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *G. Vazquez, L. Andrews*

175. Documentary Video Workshop. F

Workshop in documentary video production, development of critical standards, ethical issues, and technical methods. Each student is responsible for the completion of short documentaries from assignments. Students must bear the cost of materials and are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; applications will be considered on a space-available basis. Enrollment limited to 25. *E. Hollander*

176. Experimental Video Workshop. *

Introductory workshop in video production (non-narrative, experimental). Topics include a survey of non-narrative experimental video from a historical/theoretical perspective and an introduction to videography, fundamentals of video editing, and sound. Students complete several short projects and are billed a materials fee.

Students must bear the cost of all materials. Prerequisite(s): course 170B; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. (General Education Code(s): A.) *G. Vazquez*

177. Digital Media Workshop: Computer as Medium. F

Introduction to the computer as a medium as well as a tool. Students explore art practice within digital imaging and information and communications environments through projects, readings, and "screenings." Assignments may include designing virtual communities and /or interactive, multimedia web works. Students are billed a course fee. Prerequisite(s): course 170A; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 25. *S. Daniel*

178A. Personal Computers in Film and Video. W

Introduction to the specific applications of computers for film and video. By using computer-generated, enhanced and imported graphics, animation, text, sound, and moving video, students create still and time-based works in a computer environment. Prerequisite(s): course 170B; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to start of quarter; application materials generally available final week of preceding quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Students are billed a materials fee. Enrollment limited to 20. *L. Andrews*

178B. Advanced Personal Computers in Film and Video. *

Study of advanced computer tools in digital media, including exploration, creation, and manipulation of sound with the same level of complexity as required in composing the moving image. Students produce a final project that demonstrates skills learned. Prerequisite(s): course 170A; priority given to students who have been accepted into the production concentration. Admission is by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. *The Staff*

185. Special Topics in Film and Video.

Study of selected aspects of film and/or video history, theory, or criticism. Students are billed a course fee. *The Staff*

185D. Sound and Image in Theory and Criticism. *

Explores theories and critiques of sound in culture and analyzes sound in relation to media images in film, video, digital media, and music/image practices such as Vjaying. Voice, noise, and music are addressed (but not scores). Students are billed for a course fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *M. Morse*

185E. Chicana/o Cinema, Video. *

Examines emergence of Chicana/o cinema and video from a place of social displacement, resistance, and affirmation. Looks at Chicana/o representation and spectatorship as it pertains to ethnicity, class, gender, and the beginning of a new Chicana/o film aesthetic. Students are billed for a course fee. Prerequisite(s): course 20A. Enrollment limited to 60. (General Education Code(s): E.) *The Staff*

185R. The Film Remake. *

History and theory of the remake through case studies across cultural, gender, and genre boundaries. Examines changing cultural, social, stylistic, and technical values and explores notions of originality, repetition, homage, allusion, quotation, and intertextuality from Feuillade and Hitchcock to Raimi and Johnny To. Students are billed a materials fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors during priority enrollment; may be opened if space allows. *The Staff*

185S. Advanced Topics in Film Studies. *

Study of a selected aspect of film history, theory ,or criticism. Includes weekly screenings and historical/theoretical readings. Usually offered in alternate academic years with rotating topics. Students are billed a materials fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors. May be repeated for credit. *L. Kim*

185X. EyeCandy Seminar. W

Seminar and workshop on writing, producing, and publishing a journal. Students engage in assignments and exercises directly and indirectly related to the production of a web launch as well as a print copy of *EyeCandy*. Permission of instructor required based upon student's participation in *EyeCandy* in fall and winter quarters. Preference given to film and digital media majors and minors; others may apply based on qualifications and as space allows. Students are billed a materials fee. May be repeated for credit. *The Staff*

187. Advanced Topics in Television Studies. S

Study of a selected aspect of television history, television criticism, or national television. Includes weekly screenings and historical/theoretical readings. Usually offered in alternate academic years, with rotating topics. Students are billed a course fee. Prerequisite(s): course 136B. Enrollment restricted to junior and senior film and digital media majors during priority enrollment; may be opened if space allows. May be repeated for credit. *The Staff*

189. Advanced Topics in Digital and Electronic Media Studies. W

Study of a selected aspect of digital and/or electronic media history and criticism.

Topics can include virtual environments, electronic networks, video installations, computer games, and hyper-media. Usually offered in alternate academic years. Students are billed a course fee. Prerequisite(s): course 20C. Enrollment restricted to junior and senior film and digital media majors during priority enrollment; may be opened if space allows. May be repeated for credit. *S. Daniel*

190. Advanced Critical Studies Seminar. *

Intensive research and writing on a changing topic chosen to demonstrate critical mastery in a specific area of film and/or digital media studies. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors accepted into the critical studies concentration. Enrollment limited to 15. A. Hastie

191. Critical Studies Thesis Preparation Seminar. *

Intensive seminar prepares students for writing a critical studies thesis. Designed to be taken prior to enrolling in course 195, seminar guides students through the process of choosing a thesis topic, preparing a bibliography, and drafting a detailed outline. Prerequisite(s): course 190. Enrollment restricted to senior film and digital media majors accepted into the critical studies concentration. Enrollment limited to 15. *S. Stamp*

192. Directed Student Teaching. F,W,S

Teaching a lower-division course under faculty supervision (see course 42). Proposal supported by a faculty sponsor and department. *The Staff*

194A. Film Theory Seminar. F

Advanced senior seminar examining classical and contemporary film theory and those theoretical paradigms and methods that have illuminated the medium: formalism, realism, structuralism, semiology, psychoanalysis, Marxism, feminism, and phenomenology. Primary texts are read. Students are billed a course fee. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. A. Hastie

194B. Electronic Media Theory Seminar. *

Study of the major theoretical approaches to electronic media and their critical application to texts from television, independent video art and documentary, and electronic networks. Readings include a range of theoretical approaches selected from semiotic, ideological, feminist, cultural studies, reception theory, postmodernist, and other critical traditions. Students are billed a course fee. Prerequisite(s): courses 20B and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *D. Crane*

194C. New Media Theory Seminar. *

Study of theories of emerging genres of electronic culture, with emphasis on the discourse about computer-assisted and computer-generated forms of art and mass culture such as digital imagery, virtual environments, telematics, hyper- and multimedia, and electronic networks. Students are billed a course fee. Prerequisite(s): courses 20C and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *S. Daniel*

194D. Film History Seminar.

In-depth study of film history investigating developments in cinematic style, technological innovation, and industrial practice against the broad canvas of cultural history. Students will acquire the basic tools necessary to conduct informed film historical research. Students are billed a course fee. Prerequisite(s): course 120 and

either 130 or 134A or 134B. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *L. Kim*

194E. International Cinemas. S

In-depth study of the history and theory of international cinemas with changing topics such as globalism and resistance, postcolonial theory, international productions and querying race, the "national," and cinema. Students are billed a course fee. Prerequisite(s): course 120 and either 132A, 132B, or 132C. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. *P. Limbrick*

194F. Film and the Other Arts. *

Examines the use of artistic media within films and of films that thematically are about other media. What do other art forms allow for—in terms of the story, the film's meaning, the gaze, and the spectator? Students are billed a course fee. (Formerly *Film and the Other Arts: Music and Dance.*) Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. *L. Kim*

194G. New(s) Media. *

Addresses the role of new media technologies in the production, distribution, and reception of the news, especially international news. Examines software and network technologies as amplifying, filtering, extending, and countering the forces of media. Students are billed a course fee. Prerequisite(s): courses 20C and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. W. Sack

194S. Special Topics Seminar. F,W,S

Intensive research and writing on a changing topic chosen to demonstrate critical mastery in a specific area of film and digitial media studies, for example, film adaptations and their literary sources, documentary/reality shows, or networked new media texts. Students are billed a materials fee. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. May be repeated for credit. *The Staff, L. Kim, Y. Wang*

195. Senior Thesis/Project. F,W,S

An individually supervised course, with emphasis on independent research, to culminate in a senior thesis/project/production. Proposals should be submitted to adviser one quarter in advance. Petition required, approved by instructor and department; thesis petitions available in the department office. *The Staff*

196A. Senior Project in Film and Video Production. W,S

Students accomplish a range of production work including script development, casting, and rehearsing to shooting and postproduction work. Students are billed a materials fee. Admission by application during the preceding quarter. Students may apply a maximum of two times. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions. Enrollment limited to 18. *G. Vazquez, E. Hollander*

196B. Senior Project in Screenwriting. S

Students write a full-length (75–100 page) screenplay in this seminar while studying structural concepts and character development in selected films. Scheduling, outlining, pitching ideas, and critique are all part of the workshop format of the class. Prerequiste(s): satisfaction of the Entry Level Writing and Composition requirements; course 150 or another screenwriting course. Interview only: petition

required; special application should be submitted to adviser one quarter in advance; see department office for more information. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. (General Education Code(s): W.) *The Staff*

197. Senior Digital Media Workshop. *

Independent projects using the computer as a medium as well as a tool. Students will design and implement projects in digital imaging, information, and communications environments. Students' projects may include designing virtual communities, building collaborative networks, and/or interactive, multimedia web works. Students are billed a course fee. Admission by application during winter quarter. See department office for more information. Enrollment limited to 20. *The Staff*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

199. Tutorial. F.W.S

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

Graduate Courses

222. Critical Methodologies in Film and Television. S

Core course introduces graduate students to critical methodologies in media studies and offers sustained examination of theoretical approaches to media studies. Methodologies may include (but not limited to) contemporary theory (semiotic, psychoanalytic, ideological), cultural studies, intertextuality, feminist film, and television theory. Enrollment restricted to graduate students. Enrollment limited to 14. *A. Hastie*

283. New Media Art and Digital Culture. *

A study of new media art in the context of digital culture. Electronic, digital and online technology art are set in critical relation to discourse on history, aesthetics,

hypermedia, the interface, hacks, embodiment, robotics, artificial life and other topics. Students are billed a course fee. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Morse*

284. Film, Culture, and Modernity. *

Traces the rise of motion picture culture from the late 19th century through the end of the 1920s, looking at film's emerging visual and narrative grammar, its changing cultural status, and its engagement with shifting registers of class, ethnicity, gender, and sexuality. Enrollment restricted to graduate students. Enrollment limited to 15. *S. Stamp*

297. Independent Study. F,W,S

Either study related to a course being taken or a totally independent study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. May be repeated for credit. M. Morse, C. Lord, S. Stamp,

* Not offered in 2007-08

Language Program 239 Cowell College (831) 459-2054 http://language.ucsc.edu

Tittp://language.ucsc.cuu

Faculty | Course Descriptions

(There were no substantive changes to the French Program Description from the General Catalog 2006-08.)

Programs

Students interested in acquiring proficiency in French can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in language studies, a major in literature with an emphasis in French literature, or a major in global economics. An individual major in French and Francophone studies is also available to qualified students (see French faculty for details).

Lower-division courses 1-6 are taught entirely in French and prepare students for advanced study either on campus or abroad. They are designed to develop proficiency in aural comprehension, speaking, reading, and writing skills.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program .

Study Abroad

The UC Education Abroad Program offers both semester and one-year programs in many regions of France, including Bordeaux, Lyon, Grenoble, Toulouse, and Paris. With the approval of an adviser, some French courses taken abroad may be applied to major requirements. For more information on the program, see UC Education Abroad Program.

http://language.ucsc.edu

Program Description | Faculty

Lower-Division Courses

1. Instruction in the French Language. F,W,S

Introduction to French language and culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of French. *The Staff*

2. Instruction in the French Language. F,W,S

Further development of cultural competence and basic French language skills, both written and spoken. Students learn past tenses in this course. Prerequisite(s): course 1 or placement by interview. *The Staff*

3. Instruction in the French Language. F,W,S

Final quarter of first-year sequence. Students complete study of French language basics, including the future tense and the conditional and the subjunctive mood, while continuing to learn about French and Francophone cultures. Prerequisite(s): course 2 or placement by interview. *The Staff*

4. Intermediate French. F,W,S

First course in intermediate sequence. Students review and expand upon their previous study of the language through short literary readings, vocabulary building, grammar study, composition, and discussions. Prerequisite(s): course 3 or placement by interview. (General Education Code(s): IH.) *The Staff*

5. Intermediate French. F,W,S

Further development of intermediate-level oral and written skills through study of vocabulary and structures. Students also read and discuss a French or Francophone play. Prerequisite(s): course 4 or placement by interview. (General Education Code(s): IH.) *The Staff*

6. Intermediate French. F,W,S

Final course of intermediate sequence includes grammar study, vocabulary building, extensive writing, and discussion. Reading of a French or Francophone novel is an integral part of course. Prerequisite(s): course 5 or placement by interview. (General Education Code(s): IH.) *The Staff*

13F. Oral Fluency Through Cultural Study (2 credits). F,W,S

A course for any student beyond level 3, developing oral fluency through discussion of a variety of cultural topics. Listening comprehension and speaking are emphasized through exploration of situations common to France and Francophone countries. May be offered more than once per year. Prerequisite(s): course 3. Students not having had French 3 at UCSC need to speak to a UCSC French lecturer. May be repeated

for credit. The Staff

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

111. Stylistics. F

Intensive work in French composition with the aim of attaining grammatical correctness and excellence of expression. May be repeated for credit with consent of instructor. Prerequisite(s): course 6. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

125A. French Civilization: 19th Century. *

Survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 19th century. Prerequisite(s): course 6. *The Staff*

125B. French Civilization: 20th Century. S

A survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 20th century. Prerequisite(s): course 6. *The Staff*

136. La Francophonie. W

In-depth multidisciplinary study of one or more French-speaking regions of the world. Includes history, language, society, literature, and the arts. All course work will be done in French. Prerequisite(s): course 6 May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F.W.S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

German

Language Program 239 Cowell College (831) 459-2054 http://language.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the German Program Description from the General Catalog 2006-08.)

Programs

Students interested in acquiring proficiency in German can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, a major in German studies, a major in literature with an emphasis in German literature, or a major in global economics.

The sequence of lower-division courses 1–6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Another sequence of lower-division courses, equivalent to levels 1, 2, and 3, is courses 1A and 1B, offering accelerated German language instruction. Courses 1A and 1B are taught sequentially, winter and spring quarters. Instruction takes place almost exclusively in German.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program .

Study Abroad

The University of California maintains Education Abroad Program (EAP) centers in Göttingen, Potsdam, and Berlin, Germany. Students may spend a spring semester in Göttingen (beginning German language program or regular course study), a year in Göttingen (regular course study), a spring semester in Potsdam (intermediate German language and culture program), or a semester or year in Berlin (regular course study). Students selected for the year-long program in Göttingen may also elect to spend their second semester (the spring semester) in Berlin. Language requirements for admission to these programs range from little or no German required (beginning German program in Göttingen) to one year of college-level German required (intermediate German language and culture program in Potsdam) to two years of college-level German required (regular course study in Göttingen) to three years of college-level German required (regular course study in Berlin). The Potsdam program courses may also be used to fulfill the language requirement for the year-long program in Göttingen. Selected students may continue directly from the spring semester in Potsdam to the one-year program in Göttingen.

Academic and professional internship opportunities are also available to all EAP students in Germany.

Students may apply to any of these programs at any point in their student career. For the year-long programs, students generally apply in their sophomore year for a junior year abroad. As an exception, some students apply in their junior year for a senior year abroad; such students must sometimes spend an additional quarter at UCSC in order to satisfy all requirements for their major. Courses taken abroad can, with approval of an adviser, be applied to major requirements.

For more information on these programs, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Program Description | Faculty

Lower-Division Courses

1. Instruction in the German Language. F

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Elementary sequence (1-2-3) starts in fall quarter only. (An accelerated sequence, course 1A-1B, begins winter quarter.) Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. *The Staff*

1A. Intensive Elementary German. W

Accelerated instruction in elementary German language. Taken in conjunction with German 1B, the two courses are equivalent to levels 1-2-3. Accelerated pace allows a more rapid acquisition of reading, writing, listening, and speaking skills. *The Staff*

1B. Intensive Elementary German. S

Sequential to course 1A, completes the equivalent instruction offered through German 1-2-3. Prerequisite(s): course 1A or 2, or placement by interview. For students completing course 2, course 3 is preferable. *The Staff*

2. Instruction in the German Language. W

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Prerequisite(s): course 1 or 1A; or placement by examination. Students interested in a course who have not taken the prerequisites should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the German Language. S

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Prerequisite(s): course 2; or placement by examination. Students interested in a course who have not taken the prerequisites should meet with the instructor prior to the first class meeting. *The Staff*

4. Intermediate Studies in German Language. F

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for the exact quarter(s) of offering. Prerequisite(s): course 1B or 3; or placement by examination. Students interested in this course who have not

taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

5. Intermediate Studies in German Language. W

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for the exact quarter(s) of offering. Prerequisite(s): course 4; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

6. Intermediate Studies in German Language. S

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for the exact quarter(s) of offering. Prerequisite(s): course 5; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

119. German Media. W

Articles of current interest in German newspapers, news magazines, and World Wide Web sites are read and discussed. News videos from Germany are viewed and discussed also. Conducted entirely in German. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 5. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

German Studies

Department of History 201 Humanities (831) 459-2982 http://history.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty

Program Description

German studies is a transnational and transdisciplinary major that deals with the various German-speaking regions of central Europe. Whether one thinks of philosophy, music, art, education, religion, or political and social history, German culture has exercised a profound and often decisive influence on Europe. Some of the most important ideological debates in Western culture have arisen in the German-speaking area, and changes in German culture and society have sometimes had devastating effects on world history. Events and political developments of recent years-such as the unification of East and West Germany and the emergence of the German-speaking region of Europe as a major player in world affairs-have had important impacts.

A German studies major provides students with an intellectually diverse program-covering history, history of art and visual culture, literature, and philosophy-in which students and faculty come together in exciting and demanding pursuits.

Major Requirements

All students are required to take a total of 10 courses, including a minimum of three courses in German literature and two courses in German history. No more than two of the 10 required courses may be lower-division courses, and no more than two may come from the Germany in a European or World Context list. A minimum of five of the 10 required courses must be taught in German or principally through German-language texts. Language competency to level five is required in order to pursue a German studies major.

All students must complete a senior oral examination (given by two faculty members) as part of the requirements for the major.

German 5 is a prerequisite for all upper-division courses taught in German. Students are encouraged to take German 1-5 as early as possible in their academic program.

Regular consultation with a program faculty adviser is required.

It is strongly recommended that students spend time in residence in Germany through the University of California Education Abroad Program (EAP) to further enrich their program of study and ensure a command of the language. Students are allowed to transfer up to five courses taken at German universities toward the requirements for the major. However, the five core courses in German literature and history must be taken at UCSC.

Core Courses

German

119 German Media

German Literature

- 102 Introduction to German Literature
- 120 Fear of the Foreign: Xenophobia in German Literature and Culture
- 150 German Romanticism
- 155 German Drama
- 159 German Comedy
- 164 Modern German Fiction

History

172A German History

172B German Film, 1919-1945

History of Art and Visual Culture

136 German Art, 1905-1945

History of Consciousness

800 Hitler, National Socialism, and Religion 123 Culture in Crisis: Weimar Germany

Context Courses

History

70A Modern European History, 1500-1789
 70B Modern European History, 1789-1914
 70C Modern European History, 1914-Present

65A Medieval Europe, 300-1200

80W The Holocaust: The Destruction of European Jewry

183 Fascism and Resistance in Italy

History of Art and Visual Culture

164 Early Medieval and Romanesque Architecture

165B Gothic Beyond

190Q Portraiture: Europe and America, 1400-1990

Philosophy

106 Kant

108 19th-Century Philosophy

German Studies

Department of History 201 Humanities (831) 459-2982 http://history.ucsc.edu

Program Description | Faculty

Program Description

German studies is a transnational and transdisciplinary major that deals with the various German-speaking regions of central Europe. Whether one thinks of philosophy, music, art, education, religion, or political and social history, German culture has exercised a profound and often decisive influence on Europe. Some of the most important ideological debates in Western culture have arisen in the German-speaking area, and changes in German culture and society have sometimes had devastating effects on world history. Events and political developments of recent years-such as the unification of East and West Germany and the emergence of the German-speaking region of Europe as a major player in world affairs-have had important impacts.

A German studies major provides students with an intellectually diverse program-covering history, history of art and visual culture, literature, and philosophy-in which students and faculty come together in exciting and demanding pursuits.

Major Requirements

All students are required to take a total of 10 courses, including a minimum of three courses in German literature and two courses in German history. No more than two of the 10 required courses may be lower-division courses, and no more than two may come from the Germany in a European or World Context list. A minimum of five of the 10 required courses must be taught in German or principally through Germanlanguage texts. Language competency to level five is required in order to pursue a German studies major.

All students must complete a senior oral examination (given by two faculty members) as part of the requirements for the major.

<u>German 5</u> is a prerequisite for all upper-division courses taught in German. Students are encouraged to take <u>German 1-5</u> as early as possible in their academic program.

Regular consultation with a program faculty adviser is required.

It is strongly recommended that students spend time in residence in Germany through the University of California Education Abroad Program (EAP) to further enrich their program of study and ensure a command of the language. Students are allowed to transfer up to five courses taken at German universities toward the requirements for the major. However, the five core courses in German literature and history must be taken at UCSC.

Core Courses

German

119 German Media

German Literature

- 102 Introduction to German Literature
- 120 Fear of the Foreign: Xenophobia in German Literature and Culture
- 150 German Romanticism
- 155 German Drama
- 159 German Comedy
- 164 Modern German Fiction
- 167 Modern German Literature and Film

History

- 172A German History
- 172B German Film, 1919-1945

History of Art and Visual Culture

136 German Art, 1905-1945

History of Consciousness

800 Hitler, National Socialism, and Religion 123 Culture in Crisis: Weimar Germany

Context Courses

History

70A	Modern European History, 1500-1789
70B	Modern European History, 1789-1914
70C	Modern European History, 1914-Present
65A	Medieval Europe, 300-1200

DSA ililedievai Europe, 300-1200

80W The Holocaust: The Destruction of European Jewry

183 Fascism and Resistance in Italy

History of Art and Visual Culture

164 Early Medieval and Romanesque Architecture

165B Gothic Beyond

190Q Portraiture: Europe and America, 1400-1990

Philosophy

106 Kan

108 19th-Century Philosophy

Program Description

Faculty and Professional Interests

Program Faculty

Walter Campbell, Lecturer in German Language Language teaching, 18th- and 19th-century German literature, history of German

Mark Cioc, Professor of History German history, modern European history, environmental history

Judith Harris-Frisk, Lecturer in German Language

German language and cultural studies; German literature and intellectual history, 1750–present; turn-of-the-century Vienna and Weimar German; German issues of national identity and multiculturalism

Theo Honnef, Lecturer in German Literature

Donna Hunter, Associate Professor of History of Art and Visual Culture European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice, portraiture

Virginia Jansen, Emerita, History of Art and Visual Culture

Gary Lease, Professor of History of Consciousness

Theory and origins of religion, history of religions (Hellenistic mysteries, Christian origins, 19th-and 20th-century Germany, German Judaism), religion and political orders

Loisa Nygaard, Associate Professor of Literature

Eighteenth- and early 19th-century German literature; romanticism; aesthetics and politics of landscape; military theory

Program Faculty Advisers

Mark Cioc, Professor of History

Gary Lease, Professor of History of Consciousness

Loisa Nygaard, Associate Professor of German Literature

Hebrew

Language Program 239 Cowell College (831) 459-2054

http://language.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the Hebrew Program Description from the General Catalog 2006-08.)

Program Description

Students interested in acquiring proficiency in Hebrew can enroll in language courses from beginning to intermediate levels. In addition, credits from these courses may be counted toward the minor in Jewish studies. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture, history, and religion that have been expressed through the Hebrew language from antiquity until today. Some instruction takes place in Hebrew from the beginning level.

Program Description | Faculty

Lower-Division Courses

1. Instruction in the Hebrew Language. F

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Elementary sequence (1-2-3) begins in fall quarter only. *The Staff*

2. Instruction in the Hebrew Language. W

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Prerequisite(s): course 1. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the Hebrew Language. S

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Prerequisite(s): course 2. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

4. Intermediate Hebrew. F

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel. Prerequisite(s): course 3. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

5. Intermediate Hebrew. W

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel. Prerequisite(s): course 4. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

80. Introduction to Biblical Hebrew. W

Introduces students to the basic lexicon and grammatical structures of biblical Hebrew, with an emphasis on the development of a set of useful translation strategies. Throughout the course, students will be applying their emergent skills to translating a variety of biblical texts. (General Education Code(s): T4-Humanities

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

106. Israel's Struggle for Identity as Seen Through Israeli Cinema. S

Examines, through the medium of film, Israel's struggle for identity since its founding as a modern state. Taught in English with a weekly discussion section in Hebrew. Readings in English and Hebrew; writing, film analysis, cultural commentary, and other assignments in Hebrew. Students may not receive credit for this course and Languages 80F. Prerequisite(s): course 5 (or equivalent). May be repeated for credit. (General Education Code(s): E.) *T. Rossman-Benjamin*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Language Program
239 Cowell College
(831) 459-2054

http://language.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the Hindi Program Description from the General Catalog 2006-08.)

Program Description

Hindi and Urdu are the national languages of India and Pakistan. They are virtually identical in grammar and as spoken languages, but they differ substantially in vocabulary and use different writing systems. Students interested in acquiring proficiency in Hindi/Urdu can enroll in beginning and intermediate courses. The sequence of courses is aimed at enabling students to gain proficiency in listening, speaking, reading, and writing. Classes are taught in Hindi from the beginning level, with Urdu script offered as an elective.

Students may select an individual major in South Asian studies through their college. Further information can be found under South and Southeast Asian Studies.

Lower-Division Courses

1. Elementary Hindi. F

An in-depth introduction to modern Hindi including the Devanagari script. Through a combination of graded text, written assignments, audiovisual material and computer-based exercises, provides cultural insights and increases proficiency in understanding, speaking, reading and writing Hindi. Emphasis on spontaneous self-expression. *The Staff*

2. Elementary Hindi. W

An in-depth introduction to modern Hindi including the Devanagari script. Through a combination of graded text, written assignments, audiovisual material and computer-based exercises, provides cultural insights and increases proficiency in understanding, speaking, reading and writing Hindi. Emphasis on spontaneous self-expression. Prerequisite(s): course 1 or permission of instructor. *The Staff*

3. Elementary Hindi. S

An in-depth introduction to modern Hindi including the Devanagari script. Through a combination of graded text, written assignments, audiovisual material and computer-based exercises, provides cultural insights and increases proficiency in understanding, speaking, reading and writing Hindi. Emphasis on spontaneous self-expression. Prerequisite(s): course 2 or permission of instructor. *The Staff*

3A. Urdu Script (2 credits). S

Introduction to writing and reading Urdu script (a modified Perso-Arabic right-to-left script) through the medium of Devanagari script (a Sanskrit-based left-to-right script). Urdu and Hindi are grammatically equivalent languages that differ most noticeably in their writing systems. Prerequisite(s): course 2 or equivalent; knowledge of Devanagari script. Enrollment limited to 20. *The Staff*

4. Intermediate Hindi. F

Continuation and completion of in-depth introductory sequence in modern Hindi including Devanagari script. Through combination of graded text, written assignments, audiovisual material, and computer-based exercises, provides cultural insights and increases proficiency in understanding, speaking, reading, and writing Hindi. Emphasis on spontaneous self-expression. Prerequisite(s): course 3 or equivalent; familiarity with Devanagari script. Enrollment limited to 25. (General Education Code(s): IH.) *The Staff*

5. Intermediate Hindi. W

Readings in Devanagari of Hindi and Urdu prose and poetry. Introduction to variety of literary forms and styles aimed at developing cultural competence along with

language skills. Oral and written composition, coupled with video and web-based material, to develop communicative proficiency. Prerequisite(s): course 4. Enrollment limited to 25. (General Education Code(s): IH.) *The Staff*

6. Intermediate Hindi. S

Readings in Devanagari of Hindi and Urdu prose and poetry. Introduction to variety of literary forms and styles aimed at developing cultural competence along with language skills. Historical Studies

(There were no substantive changes to the Historical Studies Program Description from the General Catalog 2006-08.)

Program Description

Historical studies is not a separate interdisciplinary undergraduate program of study at UCSC, but two departments offer undergraduate majors based upon historical methods, including the interdisciplinary study of the past: the Department of History and the Department of History of Art and Visual Culture. One department, History of Consciousness, offers a highly respected interdisciplinary graduate program. In addition, UCSC offers an extensive array of major pathways and courses based on historical methods. Students can pursue historically oriented concentrations within majors in American studies, anthropology, economics, literature, philosophy, politics, sociology, and feminist studies.

History

201 Humanities (831) 459-2982 http://history.ucsc.edu/

Faculty | Course Descriptions

(There were no substantive changes to the History Program Description from the General Catalog 2006-08.)

Program Description

History is the attempt to understand the meanings of the human life experience, not generally and abstractly, but in terms of specific individuals, events, and circumstances. Consequently, of all academic pursuits, it is the one best equipped to help us locate phenomena in their specific contexts, whether we are concerned with political events, social changes, the production of art, the development of technologies, scientific discoveries, or life stories. In this sense, the study of history can also be an invaluable complement to any other major.

The history program at UCSC is designed to bring about an understanding of the ideas, experiences, and events that have shaped this country and the world at large. The program's main emphases are in social and cultural history, with additional strengths in intellectual and political history.

A degree in history opens up a wide range of career possibilities. Some careers fall within the historical profession, including teaching at the university, college, and high school levels and working in various areas of public and applied history, such as historic preservation, archives, libraries, and museums. For careers in fields as diverse as law, business, government, foreign service, publishing, journalism, and communications, a degree in history lays the foundation in research, analytic, and writing skills upon which later professional training can be built.

Requirements for the Major

A minimum of 12 courses is required for the major. The history major does not require an exam for entrance and does not limit the number of students accepted into the program. It is advisable to complete at least one introductory history course before declaring the major.

At UCSC, the history curriculum offers three broad, geographically defined regions of concentration:

- · The Americas and Africa
- Europe
- · Asia and the Islamic World

Course requirements. Each history major selects one of the three regions of concentration listed above. History majors who enter UCSC during fall 2002 or later are required to take at least one lower-division survey course within their chosen region of concentration. A list of the lower-division survey courses offered within each region is available from the history undergraduate adviser. Transfer students may be able to apply survey courses taken prior to entering UCSC towards this requirement. In consultation with the history undergraduate adviser and a faculty adviser, the student plans a program of study that will also fulfill the following distribution of courses:

- five courses in the region of concentration, one of which must be a lower-division survey course; three of the remaining courses must be upper-division;
- two courses from each of the remaining two regions of concentration;
- two upper-division history electives based in any of the regions of concentration;
- one senior comprehensive requirement (see below) based in the region of concentration.

Students may also choose to organize their course selections according to some general theme

of special interest to them. Faculty and staff advisers will assist students who choose this option.

In addition to all course work, history majors must complete a senior check in the first quarter of their senior year and an exit survey at the time they declare their intention to graduate. For details, see the undergraduate handbook.

Distribution requirements. Among the 12 courses required for the major, at least three courses must be set in periods prior to the year 1800, and one of these courses must be set before 600 A.D. Also, no more than four of the minimum 12 courses may be lower-division.

Interdisciplinary course work. The History Department encourages its majors to take upper-division courses in disciplines related to history, including sociology, literature, community studies, American studies, politics, Latin American and Latino studies, and others. Students who wish to substitute one or two such appropriate upper-division courses for history electives must meet with their history faculty adviser and complete a course substitution form (available at the History Department office and online). These courses are subject to the limitations described below under the "Transfer credits and substitutions" section and may not be applied toward a second major or a minor from another department.

Comprehensive requirement. The senior comprehensive requirement in area of concentration can be fulfilled by completing a senior seminar (one quarter: 190-series, 194-series, or 196-series) or a senior thesis (two quarters: courses 195A and 195B). Please consult the history undergraduate handbook, available at the department office, for a more detailed description of these courses.

Language recommendation. Proficiency in a foreign language is strongly recommended for all history students and is essential for those who plan to pursue graduate studies in history. Many Ph.D. programs in history require applicants to read one or two languages besides English. The University of California Education Abroad Program (EAP) is appropriate for history majors as a means to both enhance language skills and take history courses elsewhere.

UC Education Abroad Program. Subject to the limitations described below under "Transfer credits and substitutions," up to three courses in history completed through EAP may be applied toward major requirements. Consult the undergraduate handbook, and speak with the staff adviser for further details.

Transfer credits and substitutions. Students may apply up to three courses taken at another institution. A minimum of five regularly scheduled history courses plus the comprehensive requirement must be taken from members of the UCSC History faculty. Subject to the limits indicated in parentheses, a total of three courses from the following categories may also be applied to the history major:

Education Abroad Program (limit of 3) UCDC (limit of 2) UC in Sacramento (limit of 2) Related courses taken in another UCSC department (limit of 2) Independent and field studies (limit of 2)

Intensive Concentration

The intensive major in Mexican/Chicano history has been suspended. Students may consult Associate Professor Pedro Castillo (*pcastle@ucsc.edu*) or the department's undergraduate adviser to identify courses of interest in this subject area.

Requirements for the Minor

Students whose major area of interest is not history may nonetheless find that a minor in history makes an invaluable contribution to their studies. For the minor in history, eight history courses, four of which must be upper division, are required. There is no senior comprehensive requirement for the minor.

Graduate Program

The Ph.D. program in history at UCSC emphasizes an interdisciplinary and cross-cultural approach to historical studies. The History Department offers a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. The department only admits those highly motivated students who are most qualified to pursue advanced studies in history. The department also only admits those applicants who can best benefit from the specific strengths of our faculty.

Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

Research and Teaching

In preparing graduate students for research and teaching at the university level, the department offers training in four geographically and chronologically defined fields: U.S. history, European history since 1500, East Asian history since 1600, and world history since 1500. U.S., European, and East Asian history are defined as primary teaching fields; each graduate student is required to choose one. Students of U.S. history may incorporate Latin American history in their course work, while students of European history might include the history of European colonialism and imperialism. Every year the faculty in each field offer introductory readings seminars and, when possible, classes on more specific topics (see below for information about course offerings). Each graduate student also prepares a second teaching field different from the primary field and can choose from among U.S., European, East Asian, or world history. Students may also petition the graduate committee to prepare a secondary teaching field in African or Latin American history.

Research Clusters

The History Department has created a series of thematic research clusters to coordinate the training of graduate students in historical research. Each research cluster is composed of History Department faculty and graduate students as well as faculty outside the department who share broad scholarly interests. The clusters serve as a way to coordinate the research of faculty and graduate students whose work encompasses different geographic regions and chronological periods. Although the nature and number of the research clusters may change over time, the department currently offers two basic groupings: (1) colonialism, nationalism, and race; and (2) the history of gender.

The faculty of each cluster provide at least one research seminar every other year in addition to readings courses. All the affiliated graduate students must take at least one research seminar during their first two years; they are encouraged to take more than one.

Faculty and graduate students also participate in interdisciplinary forums outside the department. These include programs sponsored by The Chicano/Latino Research Center, the Pre- and Early Modern Studies Group, the Center for Cultural Studies, and the UCSC Institute for Humanities Research. Advanced graduate students may also have the opportunity to work in programs sponsored by the University of California Humanities Research Institute at UC Irvine. Finally, multi-campus groups in which students and faculty are involved include the Bay Area Seminar in Early American Studies, the Bay Area Pre- and Early Modern Studies Group, and the French Studies Group at Stanford.

Courses

Until they pass the qualifying exam and are formally advanced to candidacy for the Ph.D. degree, students must be in residence at UCSC and are expected to complete a minimum of 12 units each quarter to maintain normal academic progress. Completion of a minimum of 12 courses of 5 credit each (in addition to HIS 280A, 280B, and 280C) is required for advancement to candidacy. Courses taken are graduate seminars, independent study courses, and most upper-division undergraduate courses.

Students are required to take the following before advancing to candidacy:

- History 200 (year 1, fall quarter); History 201 (year 2, winter quarter); History 280A, 280B, 280C (year 1);
- one research seminar during the first four quarters: History 204A, 204B, or 204C;
- · second teaching field: two courses in American, European, East Asian or world history;
- · outside courses: two quarters of graduate course work outside the History Department;
- readings courses in the appropriate field: East Asia: History 230A, 230B, 230C; Europe: History 250A, 250B; U.S.: History 210A, 210B, 210C.

Foreign Language Requirement

No prior foreign language preparation is required for admission with a primary teaching field in U.S. history. Two to three years of college work, or its equivalent, in at least one foreign language is required for admission to the European program. Students who choose East Asian history as their primary teaching field will be required to have completed at least three years of college-level Chinese or Japanese prior to admission; more years are recommended. Depending upon the student's intended field of research, Japanese language study may also be required of China specialists as part of the graduate program of study.

Students with a primary teaching field in U.S. history are expected to demonstrate a reading competency in at least one foreign language prior to taking the Ph.D. qualifying exam. Students in all other teaching fields must demonstrate a reading competency in at least two foreign languages prior to taking the Ph.D. qualifying exam; competency in one of the languages must be demonstrated by the end of the sixth quarter of enrollment. Usually, competency will be demonstrated by passing a reading exam administered by a member of the History faculty. Students who believe that they have already demonstrated competency through previous course work or through their performance on a standardized test should petition the graduate director.

The M.A. degree is awarded to all Ph.D. students after two years in residence, successful completion of 12 courses of 5 units each, demonstrated competency in one foreign language (for those in primary teaching fields other than U.S. history), removal of all Incomplete notations (I) on record, and approval of a substantial essay of 25-30 pages.

The M.A. Essay

Students are required to produce a substantial research essay grounded in original research in primary historical documents. A successful essay will reflect a general understanding of the field of inquiry along with a critical grasp of the scholarship that currently defines the field; deep knowledge of the specific subject under investigation; the application of appropriate analytical models; and a well-supported interpretation of the materials explored. This essay could (but need not) be a segment of a larger project; but it must be a complete, self-contained essay in and of itself.

Students enroll in course 201, *Directed Research Colloquium*, the winter quarter of their second year. While taking course 201, students work intensively with a reader (who may or may not be their faculty adviser, but cannot be the 201 instructor) in the preparation, crafting, and revising of the essay. The final draft, accompanied by an evaluation from the reader, must be submitted to the Graduate Committee by the spring quarter deadline (usually mid-April). The deadline will be noted in the department's call for M.A. essays.

Qualifying Exam

The qualifying exam (QE) emphasizes field mastery, integration of material from different fields, and focused preparation for dissertation research. The QE is a three-hour meeting during which a student presents and discusses a dossier that has been submitted to the student's committee at least three weeks in advance. The exam is normally taken by the spring quarter of the third year, but no later than the end of the 10th quarter of residency. Prior to taking the QE, all Incomplete notations (I) must be cleared from the student's record. Additionally, the student must be registered the quarter the exam is taken.

The four exam fields are designed in consultation with the student's QE committee members. Students prepare for the exam through regularly offered courses and independent readings courses sponsored by the examiners. Students are required to take at least two courses in each of the four fields. The fields are as follows:

- *Primary Field of Concentration*. One of three fields: American history; European history 1500 to the present; East Asian history 1600 to the present.
- Research Field. Normally a subfield of the primary field with a focus on the student's specific area of research interests. This field is most closely connected to the student's work in a specific research cluster.
- Second Teaching Field. Chosen from the above list of primary fields, with the addition of world history, or, where appropriate, a comparative, thematic field such as gender, colonialism, etc.
- Outside Field. One field outside history, such as American studies, anthropology, literature, feminist studies, politics, sociology, or history of consciousness. Students select a field of topical, thematic, or methodological relevance to their dissertation. The student's faculty adviser must approve the outside field.

The four exam fields must be defined and preliminary reading lists (see below) filed with the department no later than the student's eighth quarter of residency.

A pass or fail will be given after the exam based on the student's knowledge and research preparation as demonstrated by his or her dossier. All areas must receive passing marks from all members of the committee. Immediately following the exam, the QE committee will complete and submit to the History Department the Report on Qualifying Examination form. If a student does not pass the QE the first time, they may retake only those sections not passed. No one will be permitted to take the QE more than twice.

Qualifying Exam Dossier Requirements

The QE dossier includes four parts, each of which should be prepared in consultation with the student's primary academic adviser and with the advice of the examiners. The exam will focus upon the dossier. All examiners, including the examiner from outside the department, will participate in all segments of the exam.

The dossier includes:

- 1. An essay (15-20 pages) reviewing the state of the scholarship in the student's primary field of concentration. This essay should reflect the student's general, broad competence in his or her field as well as a mastery of the theoretical issues and historiographic debates in four to five areas that represent their primary area of expertise. The essay may reflect the thematic focus of the student's chosen research cluster as well as work completed in an outside field (literature, anthropology, etc.).
- 2. One syllabus or, at most, two syllabi (the number to be decided in discussion with the

student's primary adviser) that demonstrates the student's preparation to teach across the breadth of their primary field at the introductory level. The syllabus should be annotated to show how each class session would be prepared: principal sources for lectures, principal questions for discussion, reasons for assigning particular readings, etc.

- 3. A syllabus (annotated in the same fashion as described in section #2 above) in the student's second teaching field, accompanied by a brief (three- to five-page) statement of principal issues. The exact content of these items will be decided in consultation with the examiner in the secondary teaching field.
- 4. A 10- to 15-page research prospectus that includes an evaluative survey of the literature relevant to the student's proposed research topic, a detailed discussion of the archival resources, and a consideration of the theoretical issues to be engaged.

NOTE:

- Although no specific segment of the dossier focuses upon the course work completed outside the History Department, it is expected that this work will be incorporated into different sections of the portfolio, particularly the research prospectus.
- Complete bibliographies must be appended to each piece of the QE dossier.

Dissertation

Students are required to prepare a dissertation prospectus within one year after the qualifying exam. Ideally, the prospectus will be completed by the end of the next quarter. The prospectus must be approved by the dissertation reading committee and placed on file with the department. The prospectus lays out, in reasonable detail, the direction of research the student intends to pursue for the dissertation. The prospectus includes the following information:

- Title page with signatory lines for the dissertation committee members and the graduate director
- Three- to four-page description of the overall argument of the project, including a discussion of the research base and the appropriate methodological/theoretical models
- · Two- to three-page outline, tracking the research and analysis chapter by chapter
- Substantive bibliography with complete citations

The dissertation represents an extensive, book-length project grounded in research in original historical documents. A successful dissertation will reflect a broad and deep understanding of the field of inquiry, a mastery of the scholarship that currently defines the field, detailed knowledge of the subject of study growing out of dedicated research, and the incorporation (and explicit rejection of) appropriate interpretive models.

M.A. in History (Terminal)

The Department of History offers an M.A. degree in history for those individuals who are interested in postgraduate work, but who are not planning to complete a Ph.D. It is a degree program that can fulfill in-service education requirements for current teachers as well as for future teachers earning a single-subject credential in social studies. Part-time enrollment is allowed.

Each student will be required to choose one of four areas of specialization (U.S., Europe, East Asia, world) and select one of two topical research areas-colonialism, nationalism, and transnational migration or history of gender. To complete the degree, each student must pass a total of 12 courses of 5 credits each and six courses of 2 credits each including courses 280A, 280B, and 280C. Students must also write an M.A. paper of 25-30 pages. For students specializing in Europe, U.S., and East Asia, the curriculum will be nearly identical to that taken by Ph.D. students in their first two years, except that there will be no language requirement. Those specializing in world history will take HIS 270A and 270B instead of the corresponding courses in other fields (courses 250A, 250B, and so on), but otherwise their curriculum will be the same as that of a typical incoming Ph.D. student.

Course Requirements

- History 200 (year 1, fall quarter); History 201 (year 2, winter quarter)
- One research seminar during the first four quarters: History 204A, 204B, or 204C
- Six courses of 2 credits each including History 280A, 280B, 280C (year 1)
- Seven electives of 5 credits each, two of which must be taken outside the History Department. Courses taken are graduate seminars, most upper-division undergraduate courses, and independent study courses.
- Two reading seminars in the area of specialization:

U.S.: History History 210A, 210B, 210C Europe: History 250A, 250B

World: History 270A, 270B

East Asia: History 230A, 230B; 230C, 242

The History Department does not normally provide financial support to students pursuing the

M.A. degree; however, students may apply for available teaching assistantships. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students must reapply for the Ph.D. program.

Further details about the graduate program are available from the Department of History web site: http://history.ucsc.edu.

History

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Jonathan F. Beecher

French history, European intellectual history, Russian intellectual history, utopian socialism

Robert F. Berkhofer Jr., Emeritus

Edmund Burke III

Islamic history, modern Middle East and North African history, French history, European imperialism, world history

Mark Cioc

German history, modern European history, environmental history

Dana Frank

U.S. social and economic history; women, labor, and working-class history; contemporary political economy; modern Central America

Charles W. Hedrick Jr.

Greek and Roman history, epigraphy, historiography, political theory

Gail B. Hershatter

Modern Chinese social and cultural history; labor history; gender history; history of sexuality; feminist theory; history, memory, and nostalgia

Peter Kenez

Russian history, Eastern Europe, 20th-century Europe, Soviet film

Noel Q. King, Emeritus

Bruce Levine, Emeritus

Richard Mather, Emeritus

Gary B. Miles, Emeritus

Buchanan Sharp

English history

David G. Sweet, Emeritus

Mark Traugott

Social and economic history, 19th-century France, French revolutions, European working class, historical methods, workers' autobiographies

Marilyn J. Westerkamp

British America, American revolution/early national U.S., U.S. religious history, early modern cultural and religious history, women/gender

Associate Professor

David Henry Anthony III

African and African American history, art, music, literature, and cinema; eastern and southern Africa; African languages; Indian Ocean world; African and African American linkages; Islamic civilization; African diaspora studies; world history

Dilip K. Basu

Modern South Asia, modern China, world history: colonial and post-colonial; film and visual culture

Pedro G. Castillo

Chicano/a history and culture; American social and urban history; race, class, and gender in California history, immigration history

Brian A. Catlos

Pre-modern Mediterranean; medieval Iberia and Europe and the Middle East; Christian-Muslim-Jewish relations, ethnicity, minorities, social, and economic theory; world history

Alan S. Christy

Early modern and modern Japan; history of social sciences, colonialism, nationalism

Maria Elena Diaz

Colonial Caribbean and Latin America; social and cultural history; ethnohistory; slavery, race, and gender

Lisbeth Haas

U.S.-Mexico borderlands, Chicano and Native American history; visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

Cynthia Polecritti

Medieval, Renaissance, and Modern Italy, Mediterrean urban and cultural history, ritual and popular devotion

Alice Yang Murray

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

Assistant Professor

Noriko Aso

Japanese social and cultural history, women's history, race and ethnicity, colonialism, nationalism, Korean history

Minghui Hu

Late Imperial China (1600-1900)

Catherine A. Jones

U.S. civil war and Reconstruction; slavery and emancipation; the American South; history of children; history of education; women and gender

Matthew D. O'Hara

Modern Latin America and Mexico; late colonial Latin America; religion, spirituality, and ritual; urban history; race, ethnicity, and identity; political culture

Assaf Yasur-Landau

Archeology of Israel, Bronze-Age Aegean, archeology of complex societies

Lecturer

Gildas Hamel

History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

Matthew Lasar

U.S. and international telecommunications; political, social, and economic history

Núria Silleras-Fernández

Medieval and early modern Iberia, Europe and the Mediterranean: women's history, queenship, politics, religion, society and culture

Bruce Thompson

European intellectual and cultural history, French history, American Jewish intellectual and cultural history, British and Irish history, history of cinema, history of espionage

Professor

Bettina Aptheker (Feminist Studies)

Women's history, feminist oral history and memoir; feminist pedagogy; African-American women's history; queer studies; feminist Jewish studies; feminist critical race studies

Raoul Birnbaum (History of Art and Visual Culture)

Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

Christopher Connery (Literature)

World literature and cultural studies, globalism and geographical thought, the 1960s, Marxism, pre-modern and modern Chinese cultural studies, cultural revolution

John Dizikes, Emeritus (American Studies)

Barbara L. Epstein (History of Consciousness)

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

John Hay (History of Art and Visual Culture)

Visual and conceptual representation in pre-modern China, especially landscape painting; Asian art history

Emily Honig (Feminist Studies)

Gender, sexuality, and ethnicity in modern Chinese history; comparative labor history; Chicana history, nationalism, and sexuality in the Third World; oral history

Virginia Jansen (History of Art and Visual Culture)

Medieval visual culture, urbanism, and secular building; Gothic architecture; campus planning and architecture

Sharon Kinoshita (Literature)

Intercultural relations in 12th- and 13th-century literature, Mediterranean studies, globalism, postcolonial theory, world literature and cultural studies

Gary L. Lease (History of Consciousness)

Theory and origins of religion, history of religions (Hellenistic mysteries, Christian origins, 19th-and 20th-century Germany, German Judaism), religion and political orders

Paul M. Lubeck (Sociology)

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

John P. Lynch (Literature), Emeritus

Judy Yung, Emerita (American Studies)

Associate Professor

David T. Brundage (Community Studies)

American working-class and immigration history, history of U.S. social movements, Irish history and politics

Bernard L. Elbaum (Economics)

Economic history

Paul Ortiz (Community Studies)

African Amúerican history, U.S. social and political history, social documentary, oral history, subaltern studies and theories of resistance, U.S. South, Latino studies, social movements, working-class history; history of farm labor, African diaspora

Daniel Selden (Literature)

Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Assistant Professor

Gabriela Arredondo (Latin American and Latino Studies) U.S. social and cultural history; Chicana/o history; critical race and ethnicity theories; im/migration history; Latina/os in the U.S.; Chicana feminisms; "borderlands" studies, modern Mexico history

History

201 Humanities (831) 459-2982 http://history.ucsc.edu/

Program Description | Faculty

Lower-Division Courses

1. Theories of History/Theories of Society. F

European social thought understands society to be the product of the historical process. Readings from early-modern natural law thinkers (Hobbes, Lock, Rousseau), 19th-century grand theorists (Tocqueville, Marx), and 20th-century social scientists (Weber, Braudel), explore the nature of this fertile connection. (General Education Code(s): IH.) *M. Traugott*

2A. The World to 1500.

Surveys the rise of complex societies: the formation of classical civilizations in Afroeurasia and the Americas, post-classical empires and cross-cultural exchange, technology and environmental change, the Mongol Empire, and oceanic voyages and the origins of the modern world. (General Education Code(s): IH.) *B. Catlos*

2B. The World Since 1500. S

Examines major world issues over the past 500 years. Topics include European expansion and colonialism, the Muslim empires, East Asia from Ming to Qing, the Americas, Africa, the scientific-technological revolution, decolonization, and modern environmental problems. Designed primarily for first- and second-year students, it provides a time frame for understanding events within a global framework. (General Education Code(s): IH.) *K. Simonton*

4. World History of Science. W

Searches for a common ground in which historians and scientists can communicate with each other from a global perspective, first situating the modern world in a long span of human history to reveal our time as a distinct stage of global development. Science and technology, the focus of this course, play a crucial role in the formation of the modern world. (General Education Code(s): IH.) *M. Hu*

5A. Early Muslim World. S

Surveys the history of Islam from Muhammad through the Abbasid Caliphate. Islam is approached as a religious, social, political, and cultural phenomenon. Special emphasis on understanding Islam in the context of contemporary developments in the Near East, Europe, Africa, and Central Asia. (General Education Code(s): IH, E.) *B. Catlos*

5B. Early Christianity: First to Fourth Century A.D.. W

Christianity from its origins as a Jewish messianic movement, its expansion in multiple forms in the Greco-Roman world, to its transformation into the major religion of the Roman and Byzantine empires. (General Education Code(s): IH.) *G. Hamel*

7. Archives and Public History.

Through readings on local history topics and bi-weekly field expeditions, students discover different types of archives and historical repositories, the diversity of sources that they contain, and the varied uses to which they can be put. Course also explores the range of career opportunities open to history majors (sometimes loosely grouped together under the rubric "public history"). Students are billed a materials fee. Enrollment restricted to freshmen and sophomores, or by permission of instructor. Enrollment limited to 35. *M. Traugott*

10A. United States History to 1877. F

A survey of the political, social, and cultural history of the U.S. from the founding of the North American colonies to 1877. Satisfies American History and Institutions Requirement. (General Education Code(s): IH.) *M. Westerkamp*

10B. United States History 1877 to Present. S

A survey of the political, social, and cultural history of the U.S. from 1877 to the present. Satisfies American History and Institutions Requirement. (General Education Code(s): IH.) *M. Lasar*

11A. Latin America: Colonial Period.

Introduces the social, cultural, economic, and political history of the New World through a close examination of the process of European "conquest" in the 16th century and its consequences for both native and settler peoples. Medieval and Renaissance European and African backgrounds; Inca, Maya, Aztec, plains, woodland, and tropical rainforest native American societies; processes of military and cultural conquest; epidemics and ecological changes; native resistance and the establishment of the fundamental institutions of colonial society. (General Education Code(s): IH.) *M. Diaz*

11B. Latin America: National Period. W

An introduction to the study of Latin American history from the Independence Wars in the early 19th century to the 20th century. Topics include changing economic models of development, U.S. role, rural and urban life, women, nationalisms, populism, revolution, the military in politics, and the problem of democracy. (Formerly *Latin American History: National Period*) (General Education Code(s): IH, E.) *M. O'Hara*

13. Introduction to American Religious Culture.

Introduction to the many communities found within the American religious landscape, balancing extraordinary diversity characterizing American pluralism against the dominant religious culture. Proceeds historically, engaging major problems and developments including utopianism, the rise of evangelicalism, religion and reform, manifest destiny, secularization and modernity, and the intersection of politics and religion. (General Education Code(s): IH.) *M. Westerkamp*

14. Race and Ethnicity in the U.S.

An introductory course on the racial/ethnic history of the U.S. Of central concern are issues of race, ethnicity, oppression, resistance, mass migrations, city life in urban America, and power and protest in modern America. Priority enrollment to freshmen and sophomores. (General Education Code(s): IH, E.) *P. Castillo*

30. The Making of Modern Africa. W

Examines the loss and reassumption of local and state autonomy in Africa during the 19th and 20th centuries. Delineates the modalities of the colonial state and society,

modes of resistance to alien occupation, and the deformation of social, class, and gender relations. (General Education Code(s): IH, E.) D. Anthony

40. The Making of Modern East Asia. F

A broad introductory survey of the political, social, economic, philosophical, and religious heritage of modern China, Japan, and Korea. Emphasis on the historical foundations of modern nationalism, the colonial experience, and revolutionary movements. (General Education Code(s): IH, E.) *A. Christy*

41. The Making of the Modern Middle East. W

History of the modern Middle East from 1800 to the present, with special reference to the 20th century and forces which have shaped the area. The impact of imperialism, nationalism, and revolution in the area, with particular attention to the history of four countries: Turkey, Iran, Egypt, Israel. (General Education Code(s): IH, E.) *E. Burke*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

43. Traditional India. F

A survey of the early histories of Indus Valley, Vedism, the epics, Buddhism, Jainism, with an exploration among original sources: archaeological, visual, ritual, literary, and epic texts. Thematic focus on communities, social systems, elite and popular cultures, and their mutual interaction. (Formerly *Histories of Traditional India*) (General Education Code(s): IH, E.) *D. Basu*

45. Japanese Pop Culture.

Introduction to Japanese popular culture from the Tokugawa era to the present. Pursues the role of mass media on Japanese society through analyses of popular movies, animation, comic books, music, and other artifacts in historical context. (General Education Code(s): E.) *N. Aso*

61. Approaches to Classical Myth. W

Introduction to Greek myths, including selected ancient texts and visual artifacts, historical and cultural context of their creation and reception, modern theoretical approaches such as structuralism and psychoanalysis, and interpretations in various media. (Also offered as Literature 61M. Students cannot receive credit for both courses.) (General Education Code(s): IH.) *K. Bassi*

62A. Classical World: Greece.

An overview of Greek history from the beginnings through the Hellenistic period, with emphasis on the Archaic and Classical periods (ca. 800 B.C. through 323 B.C.). (Formerly course 20A.) (General Education Code(s): IH.) *C. Hedrick*

62B. Classical World: Rome. F

A lecture course offering an overview of Roman history and civilization from the legendary founding of Rome in 753 B.C. to the collapse of the Roman Empire's central administration in the West in 476 A.D. (General Education Code(s): IH.) *C. Hedrick*

65A. Medieval Europe: 200–1000. W

A survey of Europe from the third through 10th centuries. Emphasizes cultural conflict and assimilation (Roman and Germanic, pagan and Christian, East and

West). Topics include the rise of Christianity, Germanic migrations, Byzantium and Islam, feudal society, the cult of saints and relics, Vikings, and gender roles. (General Education Code(s): IH.) *C. Polecritti*

65B. Europe, 1000–1500.

Broad overview of the principal social, political, economic and cultural developments in European history from 1000 to 1500. Primary focus is Western Europe: England, France, the Iberian Peninsula, the Holy Roman Empire, the Low Countries, and Italy. (General Education Code(s): IH.) *N. Silleras-Fernandez*

66. Amazons, Queens, Witches, and Saints: Medieval and Early Modern Women. S

Examines women's roles in the Middle Ages and early modern era, focusing principally on western Europe—a time when women participated widely in religious, economic, political, and even military spheres. Focuses on social conditions, gender roles, and the different ways women accessed and used power and authority. (General Education Code(s): IH.) *N. Silleras-Fernandez*

70A. Modern European History, 1500–1789. F

A survey of economic, social, and political history of Europe since the late 15th century: 1500–1789. A is not prerequisite to B, nor B to C. (Formerly *Modern European History.*) (General Education Code(s): IH.) *B. Sharp*

70B. Modern European History, 1789–1914. W

A survey of economic, social, and political history of Europe since the late 15th century: 1789–1914. A is not prerequisite to B, nor B to C. (Formerly *Modern European History.*) (General Education Code(s): IH.) *B. Thompson*

70C. Modern European History: 1914 to Present.

A survey of economic, social, and political history of Europe since the late 15th century: 1914—present. A is not prerequisite to B, nor B to C. (Formerly *Modern European History.*) (General Education Code(s): IH.) *B. Thompson*

74. Introduction to Modern Jewish History.

Examines major turning points in Jewish history from the 17th century through the 20th: the challenge of modernity, the rise of political anti-Semitism, the migration of European Jews to America, the nearly total destruction of European Jewry in the 20th century, and the origins and development of the conflict between Israel and its Arab neighbors. (General Education Code(s): E.) *B. Thompson*

75. Film and the Holocaust. S

Examines a series of distinguished documentary and feature films about the destruction of European Jewry. Each film is placed in its historical context, and wherever possible, the readings include the original documents on which films were based. Emphasis is placed on the strategies the filmmakers used to address the problem of representing genocide with succumbing to mere melodrama. (General Education Code(s): E.) *B. Thompson*

80H. Class, Gender, and Community in China, 1700–Present.

Examines gender, sexuality, and family across classes in late imperial China, and the transformation of all three by revolution (and vice versa). Concentrates throughout on gender as a category of historical analysis that has remained largely invisible in the construction of conventional Chinese history. (General Education Code(s): T4-Humanities and Arts, E.) *G. Hershatter*

80K. Spies: History and Culture of Espionage.

Examines the "golden age" of espionage during the 1930s, the Second World War, and the Cold War, emphasizing not only the origins and development of intelligence agencies but also images of spies in modern popular culture. (General Education Code(s): T4-Humanities and Arts.) *B. Thompson*

80M. Autobiographies and Social Life. W

Readings from life stories of "ordinary workers" reveal the changes shaping European societies in age of industrialization. Readings from English, French, German, and Russian autobiographies complement sources on 19th-century economic, political, and social development. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *M. Traugott*

80N. Topics in U.S. Women's History: Women at Work.

Focusing on women at work, uses women's films and excellent historical writings to examine how work has shaped conditions of womanhood, and how women from distinct backgrounds have encountered, defined, and given meaning to their labor. Engages students in reconceptualizing history while it introduces a century of vivid patterns of change in women's worlds of work. (General Education Code(s): T4-Humanities and Arts.) *L. Haas*

80W. The Holocaust: The Destruction of European Jewry. *

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film. (Also offered as Literature 80L. Students cannot receive credit for both courses.) (General Education Code(s): T4-Humanities and Arts, E.) *P. Kenez, M. Baumgarten*

80Y. World War II Memories in the U.S. and Japan. S

Examines how the meaning of such issues as war origins, war responsibility, the atomic bomb, reparations, and racism have been subjects of contention in postwar U.S. and Japan. Students explore the relations between history, memory, and contemporary politics. (General Education Code(s): T4-Humanities and Arts, E.) *A. Yang-Murray*

81. U.S. and Japanese World War II Films (2 credits).

Examines film portrayals of ideology, combat, atomic weapons, and war legacies in the U.S. and Japan. Students analyze propaganda, popular films, and documentaries made during and after the war. Complements course 80Y, but can be taken alone. *A. Yang-Murray, A. Christy*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

100. Historical Skills and Methods.

Designed to train students in the fundamental skills required for advanced historical research. Students read historical theory and learn the basics of historical analysis, research, and disciplinary writing. Recommended to majors but open to all interested students. *A. Christy*

101A. The Making of the Modern World, 1400–1750. S

Focuses on the transformation of many different societies of Asia, Africa, and the Americas from 1400 to 1750 through case histories and the comparative study of European colonial hegemony, labor systems, global economic exchange, missions, and warfare. (General Education Code(s): E.) *E. Burke*

101B. The Making of the Modern World, 1750–1950.

The history of the world from 1750. Focuses on the liberal project (the industrial and democratic revolutions) and its impact on the world—slavery and abolition, self-strengthening movements, race and class, imperialism, colonialism, and nationalism. (General Education Code(s): E.) *E. Burke*

102A. The Crusades, 1000-1300.

Examines history of Middle East from 1000–1300, in particular, Latin Crusade and colonization and Muslim response. Format chronological; topics such as acculturation, Holy War, and ethnicity examined through lectures and writing. *B. Catlos*

102C. The Mediterranean in the Modern Era, 1730–1930.

The cultural transformation of the Mediterranean region in comparative historical perspective from the rise of the Hapsburg and Ottoman empires to modern times. Topics include orientalism, political and economic transformations, social movements, cultural change, gender, colonialism, and imperialism. *E. Burke*

103. Medieval Spain, 600–1500.

History of the Iberian peninsula and Northwest Africa from the Visigoths to the establishment of Castilian hegemony. Political and economic history form the basis, with special attention paid to religio-social history, particularly the interrelation between the peninsula's ethno-confessional groups. Prerequisite(s): one history course; course 65A and/or course 65B recommended. *B. Catlos*

106A. Vietnam War Memories.

Compares memories and interpretations of war in Southeast Asia by diverse groups in France, America, and Vietnam. Topics include war origins, military strategies, propaganda, combat, civilians, media, activism, MIAs, refugees, mixed race children, memorials, textbooks, films, music, literature, and art. (General Education Code(s): E.) *A. Yang-Murray*

106B. Asian and Asian American History, 1941–Present. F

Analyzes immigration, race relations, war, gender ideology, family life, acculturation, political activism, interracial marriage, multiracial identity, and cultural representations between 1941 and the present. Emphasis on discussion, writing, research, and group presentations. (General Education Code(s): E.) *A. Yang-Murray*

108. Social Movements in Historical Perspective. W

Readings examine 18th- through 20th-century movements in Europe/America: e.g., John Law and South Sea bubble; 1848 revolution in France; U.S. civil rights movement; and Jonestown. Lectures focus on theoretical frameworks that social scientists use to account for social movement dynamics. *M. Traugott*

110A. Colonial America, 1500–1750. W

Explores the social, economic, cultural, and political development of British North America from the first European/Amerindian contacts in the late 16th century through the establishment of a provincial British colonial society. Course 110A is not a prerequisite to course 110B. (Formerly *Colonial and Revolutionary America*.)

Satisfies American History and Institutions Requirement. M. Westerkamp

110B. Revolutionary America, 1740-1815.

Explores the political, social, economic, and cultural development of British North America from the first stirrings of resistance to the establishment of the U.S. Course 110A is not a prerequisite to course 110B. (Formerly *Colonial and Revolutionary America*.) Satisfies American History and Institutions Requirement. *M. Westerkamp*

110D. The Civil War Era. F

Social, political, and economic history of the American Civil War and Reconstruction, focusing on the war's changing nature and significance, emancipation, and the postwar struggle over the future of the South and the nation. (Formerly course *The Second American Revolution: The Civil War and Reconstruction*.) *C. Jones*

110E. What Is a Nation? The U.S. from 1877 to 1914. F

History of the U.S. during what was perhaps its most socially turbulent era, the period right after Reconstruction to the First World War. What did it mean to be a nation in the post-Civil War era? How did a country that had only recently unified itself under one system of labor now resolve the question of national identity? Was America truly a nation by 1914? *M. Lasar*

110F. Crossroads for American Capitalism: The U.S., 1914 to 1945. S

Between the First and Second World Wars, American society accepted the need for a regulatory state to save capitalism from itself. Takes an in-depth look at many aspects of U.S. politics and culture during these years. *M. Lasar*

110G. The U.S. After the Second World War.

From the Good War to the Cold War, the Sixties to the New Right, and the Great Society era to Reaganomics, the post-1945 American experience has been one of extremes. This survey course looks for evidence of commonality in our time. *M. Lasar*

112. American Feminist Thought, 1750-1950.

Traces history of feminist thought in the United States from the 18th century Enlightenment to the mid-20th century. Focusing on questions of social identity, gender difference, and legal/political status, examines writings of philosophers, activists, novelists, and ordinary women that challenged religious, political, and scientific beliefs underlying gender inequality. *M. Westerkamp*

113C. Women and American Religious Culture.

Historical introduction to religious culture of U.S. as experienced and created by women. Explores religious ideas about women, the treatment of women by mainstream institutions and religio-social communities, and female religious leaders and followers. Takes an explicitly feminist analytical approach and uses a variety of "texts," including historical and literary scholarship, sacred texts, fiction, autobiography, material artifacts, visual art, and music. *M. Westerkamp*

115A. U.S. Labor History, Colonial Period to 1919. S

Explores the history of work, working-class people, and the labor movement in the U.S., with attention to race and gender dynamics as well as to the development of workers' organizations. Satisfies American History and Institutions Requirement. *D. Frank*

115B. U.S. Labor History, 1919 to the Present.

Explores the history of work, working-class people, and the labor movement in the U.S. in global perspective with attention to race and gender dynamics and political-economic changes. Satisfies American History and Institutions Requirement. *D. Frank*

117. Wired Nation: Broadcasting & Telecommunications in the US from the Telegraph to the Internet. W

Explores the history of telecommunications systems in the US starting with the telegraph, the telephone, wireless telegraph, radio, television and the Internet. Students learn about the development of these systems and the cultures that they foster. *M. Lasar*

119A. Sexuality in the 20th Century U.S.

Explores how sexuality has been constructed and experienced in the U.S. during the 20th century. Key moments in the history of sexuality are examined, and the how and why of changes in sex and sexuality are explored. Previous courses in U.S. history are recommended. *A. Lowgren*

121A. African American History to 1877.

A survey of pre-contact Africa, indigenous social structures, class relations, the encounter with Europe, forced migration, seasoning, resistance, Africa's gift to America, slavery and its opponents, industrialization, emigration vs. assimilation, stratification, Convention Movement, Black feminism, Civil War, and Reconstruction. (General Education Code(s): E.) *D. Anthony*

121B. African American History: 1877 to the Present.

A survey of the period from 1877 to present, highlighting Jim Crow, Militarism, Black feminism, WWI, New Negro, Garveyism, Harlem Renaissance, Black Radicalism, Pan Africanism, Depression, WWII, Desegregation Movement, Black Power, 1960s, Reaganism. Cultural and economic emphases. (General Education Code(s): E.) *D. Anthony*

123A. U.S. Immigration History, **1600–1877**.

Examines immigration and settlement patterns of early British immigrants to colonial North America; the large-scale immigration of the 19th Century that brought Irish, Italian, and German immigrants to the urban areas of the eastern U.S; and Chinese and Mexican immigrants who settled in the West and Southwest. K. Simonton

123B. U.S. Immigration History, 1800–1940.

Traces the history of immigration to the United States with emphasis on the 19th and early 20th centuries. Examines the causes and contexts of large-scale immigration; the similarities and differences in immigration and settlement patterns of different immigrant groups; how the process of immigration has been complicated by issues of race, ethnicity, gender, and class; and the ways in which U.S. immigration policy has influenced American's ideas of citizenship and freedom. (Formerly course 123). (General Education Code(s): E.) K. Simonton

125. California History.

Offers a comprehensive view of California history, beginning with a study of native societies, Spanish conquest, and the vast changes wrought by the U.S.-Mexican war and the gold rush. Ecological, social, cultural, and urban change to the present are traced. L. Haas

126. History of the Southwest: Colonial Period to 1920.

Examines the social organization of Spanish colonial, Mexican, and early American society in the Southwest. Themes include colonization, popular culture, religion, work, gender relationships, and immigration. (General Education Code(s): E.) *L. Haas*

127. Race and the American City.

History of racial and ethnic minorities in the American city in the 19th and 20th centuries. Examines the experiences of several non-white groups, with analyses of race, class, culture, gender, acculturation, and implications for social policy in the urban environment. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *P. Castillo*

128. Chicana/Chicano History. W

A survey course on the social history of the Mexican (Chicana/o) community and people in the U.S. through the 20th century. Themes include resistance, migration, labor, urbanization, culture and politics. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *P. Castillo*

128A. Chicana History: Gender, Work, Family. F

Creates understanding of the role Chicanas and Mexican-American women have played in U.S. society. Employing historical accounts, course covers the major themes of labor, feminism, sexuality, identity, and family. (General Education Code(s): E.) *C. Morales*

130. History of Modern Cuba. S

Covers from the Cuban sugar revolution (late 18th century) to the socialist revolution and its aftermath (1959–present). It is intended to be not only a modern history of Cuba but also a broader history of Latin America through the case of Cuba. (General Education Code(s): E.) *M. Diaz*

131. Women in Colonial Latin America.

Introduction to the social history of Latin America through a focus on the inflections of class and ethnicity on gender in this region. First six weeks focuses on the colonial period. The last three weeks covers the 19th and 20th centuries. (Formerly *Women in Latin America*.) (General Education Code(s): E.) *M. Diaz*

132. History of the Caribbean: Colonial Period. S

A study of the Caribbean from the conquest to the abolition of slavery in the 19th century. Focus on the Greater Antilles, particularly the Spanish Caribbean. Emphasis on economic and social issues such as colonialism and the role of sugar production, slavery, and race/ethnicity in these multicultural societies. (General Education Code(s): E.) *M. Diaz*

133. Inter-American Relations.

Covers Latin American relations with the U.S. through cultural, economic, and political history. Three historical pivots between the U.S. and Latin America—the war between Mexico and the U.S., the circumstances surrounding the "Spanish-American War," and U.S. intervention in Guatemala in the 1950s—discussed as exemplars of the complex and often disastrous relations between the two Americas. *The Staff*

134A. Colonial Mexico. S

Covers the social, cultural, economic, and political history of colonial Mexico (New

Spain). Special attention paid to colonial identity formation, religion, and labor systems. Begins by examining indigenous societies prior to the arrival of Europeans and concludes with Mexico's independence movement in the early 19th century. (Formerly *History of Mexico*, 1500–1850.) (General Education Code(s): E.) *M. Ohara*

134B. History of Mexico, 1850 to Present. *

Social, cultural, economic, and political history from the triumph of Liberalism to the present day, focusing on four key periods: the dictatorship of Porfirio Diaz (1900–1910), the armed phase of the Revolution (1910–1920), the consolidation of revolutionary programs and a "single-party democracy" (1920–1940), and the developmentalist counter-revolution since 1940. Provides background for understanding the Mexican diaspora to the U.S. (General Education Code(s): E.) *M. O'Hara*

137A. Africa to 1800. F

Introduction to history of Africa. Topics include states and "stateless" societies, culture, society and economy in the pre-modern era, stratification, oral traditions, long distance trade, the coming of Islam, and the evolution of the South Atlantic system and its social, political, and other consequences. Some background knowledge of Africa helpful. (General Education Code(s): E.) *D. Anthony*

137B. Africa from 1800 to the Present. W

How Africa lost its continental, regional, and local autonomy in the era of European imperialism. The components of European hegemony, Christian proselytization, comparative colonial strategies and structures, nationalism, decolonization and independence and the disengagement from neo-colonial patterns and the colonial legacy. Case studies from northern and subsaharan Africa. Some background knowledge of Africa helpful. (General Education Code(s): E.) *D. Anthony*

137C. African Cinema.

Historical study of modern African cinematography from the emergence of film as a tool of social control in the imperial and colonial periods to its theoretical and practical transformation by African cineastes in the post-independence era. Films and videos from northern, eastern, western, central/equatorial, and southern Africa viewed. Prerequisite(s): course 30 or 137A or 137B, or by permision of instructor. (General Education Code(s): E.) *D. Anthony*

140B. History of Qing China, 1644–1911. F

Introduces students to how Qing China arose, expanded, and struggled to enter the modern world. Focuses on what the Qing empire had in common with other agrarian empires across Eurasia, commercialization and communication networks, elite mobility and peasant revolts, political legitimacy of the alien rule, maintaining social order (such as merchants' control and gender segregation), massive population growth and internal migration, as well as its conflicts with the industrial West. *M. Hu*

140C. Revolutionary China 1895–1960.

Explores history of China from the late 19th century to the early years of the People's Republic, focusing on the end of imperial rule, the sources and development of revolution, and early attempts at at socialist transformation. (General Education Code(s): E.) *G. Hershatter*

140D. Recent Chinese History.

Explores history of China from establishment of the People's Republic of China to the present, focusing on competing strategies of socialist transformation, urban/rural relations, and the effects of the post-Mao economic reforms. (General Education Code(s): E.) *G. Hershatter*

140E. Gender, Class, and Sex in Modern Shanghai. F

Examines issues of gender, class, and sex in modern urban Chinese history, with particular attention to how Shanghai's semi-colonial status inflected the articulations of gender identities, class formations, and issues of sexuality (particularly sexual labor). In addition to looking at treaty-port Shanghai, considers Shanghai during the Maoist period as well as in the context of the more contemporary economic reforms. (Also offered as Feminist Studies 158. Students cannot receive credit for both courses.) Prerequisite(s): course 80H, 140C, 140D, or Feminist Studies 80C. Enrollment restricted to juniors and seniors. Enrollment limited to 25. (General Education Code(s): E.) *E. Honig*

141A. Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E. W

Survey of writing and culture from the 10th century B.C.E. through the sixth century C.E., focusing on poetry, philosophical and historical writing, supernatural fiction, Buddhist/Taoist texts in contexts of fragmentation, empire building, dynastic collapse, rebellion, eremitism, and courtly society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements. (Also offered as World Lit & Cultural Studies 135. Students cannot receive credit for both courses.) (General Education Code(s): E.) *C. Connery*

141B. Classical Chinese Culture and Literature, Sixth Century through 16th Century. S

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements. (Also offered as World Lit & Cultural Studies 136. Students cannot receive credit for both courses.) (General Education Code(s): E.) *C. Connery*

147A. History of Premodern India. W

A study of religions (Vaisnavism, Tantrism, Islam, Sikhism), art, literature, and social movements in their historical contexts from 1000 A.D. to 1800. (General Education Code(s): E.) *D. Basu*

147B. Political and Social History of Modern South Asia.

Social, political, and religious movements in the colonial and postcolonial contexts of the 19th and 20th centuries in modern and contemporary South Asia. (General Education Code(s): E.) *D. Basu*

148. Cinema and History: Film Author Satyajit Ray. *

Satyajit Ray is widely acclaimed as a master of world cinema. Course considers his work to examine "authorship" at multiple levels: the cultural, historical, social, and familial contexts and the relationship of his film to fiction, the politics and poetics of his vision, and its relationship to colonial, nationalist, and postcolonial India. Also studies the question of gender and the underclass. (Also offered as Film and Digital

Media 162A. Students cannot receive credit for both courses.) (General Education Code(s): E.) *D. Basu*

150A. Ancient Japan. S

Surveys the history of the peoples of the Japanese islands from prehistorical migrations through the 15th century. Emphases include examination of social structures, political formations, cultural production, and religion. *N. Aso*

150B. Tokugawa Japan. F

Surveys the history of the peoples of the Japanese islands from the middle of the 15th century to the middle of the 19th century. Focus is on the era of civil war, the formation of the early modern federated state, social structure, and cultural production. *A. Christy*

150C. Modern Japan. S

Surveys the history of the peoples of the modern Japanese nation from the Meiji Restoration to the present. Focuses on the formation of the modern state, empire, social movements, and cultural production. (General Education Code(s): E.) *A. Christy*

155. History of Modern Israel. W

The conflict between Israelis and Palestinians is one of the most intractable disputes in our troubled world. Course begins with a glimpse of Palestine in the late 19th and early 20th centuries, surveys the rise and fall of utopian Zionism, and pays especially close attention to the events of 1948 and 1967. (General Education Code(s): E.) *B. Thompson*

156. Introduction to the Archeology of Israel. F

Offers an archaeological survey that combines material culture from excavations with literary evidence from the Neolithic revolution through the formation of urban life in the 3rd millennium BCE to the Babylonian conquest of Jerusalem (586 BCE). *A. Yasur-Landau*

160A. Athenian Democracy.

Athenian democracy from foundation to the fourth century B.C., with emphasis on its practices and ideologies. Readings from ancient sources and modern theory. Topics to include foundations and development; Athenian concepts of freedom, equality, law, citizenship. Lectures and discussion. *C. Hedrick*

161B. Topics in Roman History.

Detailed consideration of some specific topic or period in Roman history, varying from year to year. Examples include Roman religion, Augustus and the Roman Empire, Julio-Claudian emperors and the principate, Roman slavery, and Christianity and Rome. Enrollment restricted to history and classical studies majors or permission of instructor. May be repeated for credit. *C. Hedrick*

163. A History of Sin. S

Ancient and modern conceptions of sin, and remedies offered for it. Course is not a theology of sin and redemption, but an invitation to reflect on ways sin and fault have been imagined and formulated. *G. Hamel*

164A. Late-Medieval Italy, c. 1200–1400.

Italy from the birth of the commune to the early Renaissance in Florence. Topics include urban life and social conflict, gender roles, St. Francis, the Black Death,

female mystics, Dante, Boccaccio, humanism, artistic developments from Giotto through Donatello. Requires viewing several films outside of class. *C. Polecritti*

164B. Renaissance Italy, c. 1400–1600. S

Italy from the Florentine Renaissance through the Reformation. Topics include social change and political consolidation, the rise of the papacy, court life, witch hunting, Machiavelli, artistic developments from Donatello through late Venetian Renaissance. Requires viewing several films outside of class. Course 164A recommended as preparation. *C. Polecritti*

167. Imperial Spain 1469–1716. S

Provides general survey of the history of Spain from Catholic Monarchs to the 18th century focusing on the union of the Crowns of Castile and Aragon, the idea of America, the rise and fall of the Spanish Empire, the Catholic Reformation and Enlightenment, and internal transformations of the Spanish economy and society. *N. Silleras-Fernandez*

168. Rise of the Dutch Republic.

Focuses on the origin of the Republic in the revolt against Spanish overlordship, and its political, social, and economic development in the 16th and 17th centuries. *B. Sharp*

170A. French History: Old Regime and Revolution.

French history from the Middle Ages through the Revolution. Focus on the rise and fall of "absolute" monarchy, the nature of Old Regime society, the causes and significance of the French Revolution. Attention to those who endured as well as to those who made events. *J. Beecher*

170B. French History: The 19th Century.

Social, political, and cultural history of France from the Revolution to WWI. Focus on the Revolutionary tradition, the Napoleonic myth, the transformation of Paris, and the integration of the peasantry into the national community. Readings include novels by Stendhal and Balzac. *J. Beecher*

171. Revolutions in France.

Examines the political/social upheaval in 1789, 1830, and 1848 in light of the sweeping changes brought to 19th-century France by those other great "revolutions" of the age, the democratic and the industrial. Students' written work focuses on the comparative analysis of revolution. (Formerly *Revolution in France*.) Offered in alternate academic years. *M. Traugott*

172A. German History. F

The development of German civilization, including philosophy and literature as well as politics and diplomacy in the nineteenth and twentieth centuries. *M. Cioc*

172B. German Film, 1919–1945.

Introduction to most important German films from 1919 to 1945. Course uses a combination of movies and documentaries to gain insight into political, economic, social, and cultural conditions of Weimar and Nazi Germany. *M. Cioc*

175A. Medieval Russia. W

Medieval Russia. P. Kenez

175B. Russian History. S

Imperial Russia. P. Kenez

175C. Russian History.

Twentieth-century Russia. P. Kenez

175D. History of Soviet Film.

Does not stress questions of aesthetics or technical aspects of film making, but the changing ideology inherent in Soviet films. The goal of examining cinema is to enrich our understanding of Soviet history. Readings include works of famous directors and theorists—Eisenstein, Vertov, Pudovkin, and Kuleshov—in addition to secondary works by Denise Youngblood, Richard Taylor, Josephine Woll, and Anna Lawton. *P. Kenez*

178A. European Intellectual History.

Study of European thought, literature, and art, 1680–1914. Focus on relation of ideas to their social and cultural context. Age of Enlightenment from Swift and Montesquieu to Rousseau and Goya. *J. Beecher*

178B. European Intellectual History.

Study of European thought, literature, and art, 1680–1914. Focus on relation of ideas to their social and cultural context. Nineteenth century; emphasis on romanticism and development of socialist and aesthetic critiques of industrial civilization. *J. Beecher*

178C. European Intellectual History, 1870–1970. F

Drawing on experiments in autobiography, the arts, and social theory, this course focuses on ideas and images of modernity in European culture. It also highlights the role of the intellectual as politically engaged or disillusioned witness in a violent century. Offered in alternate academic years. *B. Thompson*

178D. Russian Intellectual History.

Focus on the emergence in 19th-century Russia of a westernized intelligentsia; its effort both to assimilate western ideas and to define the destinies of Russia; the shaping of the Russian revolutionary movement. Readings in Dostoyevsky, Turgenev, Herzen, and representative Russian Slavophils, Populists, and Nihilists. *J. Beecher*

178E. Modern Jewish Intellectual History.

Surveys European Jewish intellectual history from the Enlightenment to the present. Major themes include emancipation and assimilation, the flowering of Yiddish literature, the rise of Zionism, new variations on the messianic idea, and Jewish contributions to the culture of urban modernism. Offered in alternate academic years. *B. Thompson*

180A. English History.

Emphasis on the interaction between social, economic, religious, and political developments. An attempt to place these phenomena in the context of the wider European and world scene. The period from 1485 to 1689. *B. Sharp*

180B. English History.

Considers how Britain became the pacemaker of modernity in the 18th and 19th centuries; how national, regional, class, and gender identities formed and altered; and how Britain coped with loss of global power in the 20th century. *B. Thompson*

183. Fascism and Resistance in Italy. F

Examines Italian politics, society, and culture from Unification to World War II, especially the Fascist regime. Interdisciplinary focus emphasizing history, literature, and film. *C. Polecritti*

185A. Conflict of Interest: War, Holocaust, and Industry in the Lodz Ghetto. Examines how Nazi war machine exploited Jewish slave labor in the Lodz ghetto industrial complex while a state apparatus systematically exterminated the workers. Includes a visit from a survivor of ghetto factories and graphics from ghetto workshops. Prerequisite(s): one upper-division history course. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *M. Thaler*

185B. Rethinking the Holocaust: Bioscience, Race Theory, and Genocide. F Traces the Nazi "Superstate" project from its origins at the conjunction of bioscientific theory and racialist ideology to its conclusion in the Holocaust, providing a historical perspective for social and political dilemmas raised by contemporary biomedical advances. (General Education Code(s): E.) *M. Thaler*

185D. Jewish Social Movements. *

Jewish social movements of the late 19th and 20th centuries, in Europe (Eastern and Western) and the U.S.: the confrontation between Hasidism and Haskahah, tensions between socialism and Zionism, between religiosity and secularism, the mutual influences among these tendencies. (Also offered as History of Consciousness 118. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *B. Epstein*

185E. The Historiography of the Holocaust. W

Offers a comprehensive historiography of the Holocaust, distinct from the narrowly focused perspectives generally presented in Holocaust studies, to familiarize students with the origins, evolution, and major developments in the Nazi genocide and its historical consequences. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *M. Thaler*

190. Advanced Research and Reading Seminars.

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

190A. Slavery and Race in Latin America. W

Covers comparative history of slavery in Latin America with questions of race in the colonial and national periods and key moments and debates in the historiography of slavery and its relation to ideologies of the past and the nations. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *M. Diaz*

190B. Race and the Nation in Latin America.

Focuses on the ways in which nation and race have been thought about in Latin America throughout the 19th and 20th centuries. These concepts were closely intertwined, albeit in differing and changing ways, since the wars of independence from Spain and Portugal (1810–1825). Compares the ways in which "black," "Indian," and "racially mixed" ("mulatto" or "mestizo") have been socially constructed, ideologized, and contended in different countries, including Brazil, the

Spanish-speaking Caribbean, Mexico, Peru, and Argentina. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *M. Diaz*

190C. Race, Class, and Gender in California History. S

The study of the social history of racial minorities and women in the historical development of California society. Emphasis on racial, class, and sexual conflict within the context of the history of California since 1848. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. Offered in alternate academic years. (General Education Code(s): W, E.) *P. Castillo*

190D. Tale of Two Cities. *

A comparative study of the social, economic, cultural, political, and geographical development of Los Angeles and Mexico City in the 20th century. Emphasis on the diverse peoples, changing physical environment and various images/interpretations of these two world cities. (Also offered as Latin American&Latino Studies 194P. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Castillo*

190E. Topics in Chicana/o History.

A seminar on the history of Chicanos/Mexicans in the United States, 1848 to the present. Topics include Chicana/o labor, family, social, urban, cultural, and political history. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Castillo*

190F. Research Seminar in the Americas.

Students learn how to conduct research and write history. Primary and secondary sources are extensively read. Research sources include a rich array of government documents, newspapers, memories and diaries, visual material and film. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors Enrollment limited to 20. (General Education Code(s): W.) *L. Haas*

190H. Myths and Models in (and of) American History.

We make a close reading of current and innovative work in U.S. history. We study how historians construct stories based upon models of the society, culture, and state, embracing certain political and moral ends which are plotted like other stories. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *L. Haas*

190I. California and the Borderlands.

Complete original research in California and borderlands history in this senior research seminar. Focus on selected problems and themes. Assignments and

discussions help students frame their research and edit their writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *L. Haas*

190K. Wired Planet: Readings on the Global History of Broadcasting and Telecommunications.

Locates common themes in the history of broadcasting and telecommunications throughout the world. Why do certain strategies for developing broadcasting and telecommunications systems succeed or fail? Why do some nations outstrip other nations of comparable development in the growth of their communications systems? Why do national or regional communication systems suddenly become more or less open—or more or less centralized? Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190N. Topics in African History. S

Examines contemporary crises in Africa: the new South Africa, refugees, HIV/AIDS, children of war, blood or conflict diamonds, civil war, and genocide in Rwanda. Seminar format where students will be prepared to undertake studies on specific subjects and two rounds of 15–20 page papers. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Anthony*

1900. African American Historiography.

Major themes in contemporary African American historiography on a topical basis. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Anthony*

190P. Early American Society and Culture.

Explores subjects and themes in the political, social, and cultural history of early U.S. history from the colonial period through 1850. Includes critical reading of current scholarship and research in primary texts. The focus of the course is the production of a research essay. Recommended for senior history majors. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Westerkamp*

190S. Women and Social Movements in the U.S. F

Examines history of women and social movements in the U.S., such as abolitionism, antilynching, Chinese and Jewish garment workers, Chicana farm labor activism, the American Indian Movement, the Ku Klux Klan, and the Civil Rights movement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *D. Frank*

190U. Power and Culture in the U.S. W

Readings seminar examines, from a historian's point of view, the debate as to what extent ordinary people exert influence over U.S. culture. Class examines historical monographs from a variety of race, class, and gender perspectives. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190V. The Corporation and Its Critics.

Studies transformation of the U.S. corporation from limited tool in hands of state government to the central organizational unit of capitalism and most important focus of American politics. Readings include influential histories of the corporation from Republic's early years through 1970s. Students debate impact of the corporation from Marxist, free market, and feminist perspectives. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190W. Who Controls Broadcasting?

Focuses on the social and political construction of major telecommunications and broadcasting systems in the U.S. including wireless, telephone, radio, television, and the Internet. Emphasis on reading and analyzing prominent scholarly and popular works on this subject. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

192. Directed Student Teaching.

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study.

To allow promising, well-qualified undergraduates to pursue directed programs of archival or archaeological study in the field under supervision of the UCSC history faculty, concentrating their work within a single given quarter. Students may take two or three courses concurrently. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Advanced Research and Reading Seminars.

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

194B. Okinawan History.

Examines the history of Okinawa with particular attention paid to the modern era. The goal is to give students a solid foundation in the historiography of major themes in the study of Okinawan society. (Formerly course 196X.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history, German studies, or classical studies majors. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

Examines through both primary and secondary sources such issues as work, sexuality, education, class, and ethnicity in relation to constructions of female gender in Japanese society over the past several centuries, particularly focusing on the modern era. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *N. Aso*

194G. China Since the Cultural Revolution: Histories of the Present.

Explores the rapid and often destabilizing shifts that have taken place in China since the late 1970s (the "reform era"), tracing the effects of China's earlier experiment with revolutionary socialism on the market-driven present. Examines how various meanings of reform are negotiated; changes in rural and urban environments; and class, gender, and ethnic differences. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *G. Hershatter*

194H. Gender, Family, and State in China: 1600-Present.

Explores gender, family, and state power in China from 1600 to present, examining gendered norms, education, political movements, revolutionary practice, sexuality and sex work, and state interventions in contemporary families. Responses to reading and a research paper required. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *G. Hershatter*

194M. Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600&Ndash;1900. S

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing, China; Samurai in Tokugawa, Japan; and Yangban in Joeson, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Hu*

194N. Comparative Studies in Modern Asian History. F

Seminar on cultural and social changes in Asia, mainly in the 19th and 20th centuries. Topics include colonial encounters, cities, narratives of ordinary persons, nationalism and identity, visual cultures, and Orientalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Basu*

194U. The Cold War and East Asia.

Considers through primary and secondary sources the events and aftermath of the Cold War in East Asia in terms of state formation, domestic and foreign policy, and protest movements in China, Taiwan, Korea, and Japan with reference to Vietnam. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *N. Aso*

194Y. Memories of WWII in the U.S. and Japan. S

Research seminar comparing U.S. and Japanese memories of World War II. Topics include war origins, total war, the atomic bomb, war responsibility, reparations, memorials, museums, and monuments. Primary work devoted to research in original texts and documents. Prerequisite(s): two upper-division history courses or permission of instructor; satisfaction of the Entry Level Writing and Composition requirements; course 80Y recommended. Enrollment limited to 20. (General Education Code(s): W, E.) A. Christy

195A. Thesis Research.

Prerequisite(s): petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration). *The Staff*

195B. Thesis Writing.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration). (General Education Code(s): W.) *The Staff*

196. Advanced Research and Reading Seminars.

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

196A. Is British History Possible?

An examination of the possibilities and problems of producing a history that is genuinely British: one that pays due attention to the histories of the four modern peoples or nations of the British archipelago. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Sharp*

196C. Modern Italian Culture. S

Developments in Italian culture and society from the postwar through the 1990s. Topics include north-south divisions, family and gender, cinema and modernity, urbanization, mafia, and terrorism. Prerequisite(s): course 164A or 164B or 183, or permission of instructor and one upper-division history course; and satisfaction of the Entry Level Writing Requirement. Enrollment limited to 20. (General Education Code(s): W.) *C. Polecritti*

196E. Modern Irish History. F

Aims to illuminate major themes and turning points of modern Irish history: the causes and consequences of the famine; the development of Irish nationalism; revolution, civil war, and partition; and the recent economic boom. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Thompson*

196G. Modern Germany and Europe.

A senior reading and research seminar that explores the major historiographic

debates in German history during the 19th and 20th centuries. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history and German studies majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Cioc*

196I. The French Revolution.

Students conduct original research on French Revolution of 1789 based on mix of primary and secondary courses. Classroom discussions focus on interpreting contemporary documents and addressing historiographical debates. Seminar format with significant written requirements. Presumes familiarity with the period. Prerequisite(s): course 70B or 170A or 171. Students who have taken course 70B must also have taken one upper-division history course. Enrollment restricted to history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Traugott*

196J. Autobiography and History. S

Students prepare research papers using a combination of primary and secondary sources. The former include autobiographies, diaries, or memoirs of historically relevant figures; the latter include chronologically and thematically appropriate works that help contextualize the lives of their subjects. Prerequisite(s): satisfaction of the Entry Level Writing requirement; Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Traugott*

196K. Studies in European Intellectual History.

Topics in European intellectual history from the French Revolution to World War I. Readings exemplifying approaches from history of ideas and intellectual biography to recent studies of rhetoric and political culture. Preparation and presentation of research paper. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *J. Beecher*

196N. Eastern European Jewish Social History.

Study of 19th- and 20th-century Eastern European and Russian Jewish social history. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history and German studies majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Kenez*

196O. Russian Revolution, 1917-1932.

Study of the major political, social, and intellectual conflicts and transformations of the period. Topics include February and October revolutions, Civil War, NEP, rise of Stalinism, and collectivization. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *P. Kenez*

196P. Hitler and Stalin. W

A discussion of 20th-century totalitarianism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history and German studies majors. Enrollment limited to 20. (General Education Code(s): W.)

196Q. Private Lives, Family Histories, and the Holocaust Experience.

Holocaust historiography has surveyed the broad landscape of genocide or focused narrowly on individual experience. Course examines the middle ground of family and its role in resistance during the destruction of communal existence and survival in the aftermath. Prerequisite(s): two upper-division history courses or permission of instructor. Enrollment restricted to junior and senior history, German studies, and classical studies majors. Enrollment limited to 20. (General Education Code(s): E.) *M. Thaler*

196R. Social World of Roman Palestine. S

Inquiry into the structures of Roman Palestine on the basis of parables from the synoptic Gospels, the Dead Sea Scrolls, Josephus, inscriptions, and archaeological discoveries. Physical, social, economic, and ideological conditions are researched in a sociological fashion. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses. Eenrollment restricted to junior and senior history and classical studies majors. Enrollment limited to 20. (General Education Code(s): W.) *G. Hamel*

196S. Special Topics in Ancient History. S

Seminar focuses on different topics in ancient history. In addition to assigned readings, the student is expected to do additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course will vary from year to year. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *C. Hedrick*

196U. Topics in Medieval History. W

Addresses contemporary and modern interpretations of the events relation to medieval history. Through critical discussion, assesses the values of various historical sources. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 32 or 103, and one upper-division history course, or by permission. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): W.) *N. Silleras-Fernandez*

196W. Women and Power from 1100 to 1600.

Analyzes relationship between women and power in the Late Middle Ages and the Early Modern, focusing principally on Latin Europe but including reflections on other Mediterranean areas. Examines women's social conditions, gender roles, and the different ways they accessed and used power and authority. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upperdivision history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *N. Silleras-Fernandez*

196Y. Saints and Holiness in Medieval Europe.

Examines popular religious belief and practice, including conversion, the cult of the saints, relics, pilgrimage, miracles and visions. Emphasis on Medieval Europe, but some attention also paid to modern patterns of devotion. Prerequisite(s): courses 65A, or 164A, or 164B. Students who have taken course 65A must also have taken one upper-division history course. Enrollment limited to 20. (General Education Code(s):

198. Independent Field Study.

Student's supervision is conducted by a regularly appointed officer of instruction by means other than the usual supervision in person (e.g., by correspondence) or student is doing all or most of the course work off campus. May be repeated for credit. *The Staff*

199. Tutorial.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits).

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Graduate Courses

200. Methods and Theories of History. F

An overview of theories, methods, and philosophies concerning the nature and production of history. Topics vary with instructor. Enrollment restricted to graduate history students and others by permission of instructor. Enrollment limited to 20. *M. Cioc*

201. Directed Research Colloquium. W

Having already prepared a bibliography and research prospectus in a graduate research seminar, students will undertake further research on their projects, write a 25–30 page research paper, and present their work to their fellow students. Prerequisite(s): history graduate research seminar. Enrollment restricted to graduate history students. Enrollment limited to 15. A. Yang-Murray

204A. History of Gender Research Seminar.

Introduction to theories and methods employed in gendered historical research. Readings are drawn from a range of chronological, national, and thematic fields and explore the intersection of gender analysis with such historical problems as the body and sexuality, modernity, colonialism, race and ethnicity, constructed space, and production/consumption. Enrollment restricted to graduate history majors. Enrollment limited to 15. *M. Westerkamp*

204B. Society and Culture Research Seminar.

A graduate course introducing students to research using primary historical materials to explore topics in society and cultural history from 1500 to the present. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Beecher*

204C. Colonialism, Nationalism and Race Research Seminar. S

Research seminar introducing theories and methods of the comparative histories of race, ethnicity, and nationalism. Enrollment limited to 15. M. O'Hara

210A. Readings in U.S. History. F

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: colonial and early national periods. Enrollment restricted to graduate history majors. Enrollment limited to 15. *M. Westerkamp*

210B. Readings in U.S. History. W

Introduction to major themes and controversies in the interpretation of U.S. history.

Readings cover both chronological eras and topical subjects, often in a comparative context: 19th century. Enrollment restricted to graduate history majors. Enrollment limited to 15. *C. Jones*

210C. Readings in U.S. History.

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: 20th century. Enrollment restricted to graduate history majors. Enrollment limited to 15. *D. Frank*

215A. Topics in American History: U.S. Labor and Working Class History. S Addresses topics in history of working people, the labor movement broadly defined, and political-economic change in the U.S. Topics include race, ethnic and gender dynamics, and U.S. labor and working-class history in global context. Enrollment limited to graduate students. Enrollment limited to 15. *D. Frank*

215B. Visions of Progress.

Explores the emergence of the welfare/regulatory state in the United States from the 1870s to World War I, examining different schools of historical thought about this period. Enrollment limited to 15. *M. Lasar*

215C. U.S. Immigration and Ethnic History.

Introduces key issues and debates in United States immigration and ethnic history. Topics include causes of immigration; constructions of race, gender and ethnicity; assimilation; transnationalism; and forces shaping immigration policy. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Brundage*

220. The Atlantic World, 1500-1800.

Explores the economic, social, and cultural history of early America in terms of its Atlantic connections and intersection with the cultures of early modern Europe, Africa, and Latin America. Builds upon previous work in early America and early modern Europe, challenging students both to work comparatively and to break out of traditional geographic models. (Formerly *Topics in American History: The Atlantic World 1500–1800.*) Enrollment restricted to graduate students. Enrollment limited to 15. *M. Westerkamp, M. Diaz*

225. Spanish Colonialism.

Reading-intensive graduate seminar with emphasis on theoretical and historiographical questions regarding the field of Spanish colonialism in the Americas. Students encouraged to engage in discussions of comparative colonialisms. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Diaz*

230A. Readings in Late Imperial China.

Survey of the major works on and historiographical controversies about Qing Dynasty (1644–1911) China. Enrollment restricted to graduate students. Enrollment limited to 20. *M. Hu*

230B. Engendering China.

Reading seminar on the history of Chinese gender, focusing on the Qing dynasty (1644–1911) to the present. Topics include marriage and family, sexuality, work, the gendered language of politics, and major reform movements. Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatter*

230C. Readings in 20th-Century China.

A survey of major Western-language works and historiographical controversies in Chinese history from 1900 to the present. Weekly readings emphasize particular social and political movements as well as long-term changes in urban and rural society. Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatter*

238A. Research Methods: China.

An introduction for graduate students to the use of major research tools and sources in Chinese history since 1600, with a focus on 20th-century materials. Students complete a series of bibliographical exercises and prepare a research prospectus. (Formerly course 228A.) Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatter*

238B. Research Methods: China.

Building on the research and bibliographic skills developed in course 228A, students develop a research topic and write a paper of 20–30 pages using primary sources as appropriate in English, Chinese, and/or Japanese. (Formerly course 228B.) Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatter*

242. Readings in Modern Japan.

A graduate course intended to give students a fundamental understanding of the major themes in the study of modern Japanese history. Central themes include modernity and modernization, colonialism, postwar recovery, gender, race, and nationalism. (Formerly course 210.) Enrollment restricted to graduate students. Enrollment limited to 15. A. Christy

244. Gender and Japanese History. W

Examines—through primary and secondary sources—constructions of gender (masculine, feminine, and transgender) in Japanese society over the past several centuries, focusing on the modern era. Enrollment restricted to graduate students. Enrollment limited to 15. *N. Aso*

250A. Readings in European Social and Cultural History. F

A readings seminar that introduces beginning graduate students to some of the major conceptual and methodological approaches to early modern European social and cultural history, 1400–1789. (Formerly course 205A.) Enrollment restricted to graduate students. Enrollment limited to 20. *B. Sharp*

250B. Readings in European Social and Cultural History.

A readings seminar that introduces beginning graduate students to some of the major problems in modern European social and cultural history, 1789 to the present. (Formerly course 205B.) Enrollment restricted to graduate students. Enrollment limited to 20. *P. Kenez*

256. Nationalism, Anti-Semitism, and Jewish Resistance in World War II. * Jewish resistance to Nazism during World War II, in Eastern Europe, and its historical context. Includes the pre-war rise in nationalism and anti-Semitism in Poland and Lithuania, Jewish integration in the Soviet Union, and the consequences for wartime resistance. (Also offered as History of Consciousness 243A. Students cannot receive credit for both courses.) Enrollment restricted to seniors and graduate students. Enrollment limited to 15. *B. Epstein*

A graduate introduction to world history, 1500–1750. Focuses on social and economic change in the societies of Asia, Africa, and the Americas through a comparative study of European imperial hegemony, labor systems, global economic exchange, and cultural interactions. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Burke*

270B. Patterns of World History, 1750–Present.

The history of the modern world, 1750–1990. Focuses on patterns of social and economic change attendant to the rise of the capitalist world market, European imperialism and indigenous self-strengthening movements, processes of cultural and economic globalization. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Burke*

280A. History Graduate Proseminar: Teaching Pedagogy (2 credits). F

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include TAships, designing course syllabi, pedagogy, teaching technologies, and teaching in different venues. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to graduate history majors. May be repeated for credit. *A. Yang-Murray*

280B. History Graduate Proseminar: Research Presentations and Grant Writing (2 credits). W

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include discussion of a research presentation, conference proposals and paper preparation, developing a research prospectus, grant applications, and publishing journal articles and the dissertation. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to history graduate students. May be repeated for credit. *B. Catlos*

280C. History Graduate Proseminar: Job Market (2 credits).

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include researching position; preparing a CV and the job-application letter; preparing for an interview; practice interview; preparing a job talk and/or teaching presentation; and practice job talk. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to graduate history majors. May be repeated for credit. *A. Yang-Murray*

283. Foreign Language Preparation (2 credits). F,W,S

Independent study course in which history graduate student reads selected texts to fulfill foreign language requirement. Student meets with instructor to discuss readings, deepening his knowledge of the foreign language. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

284. Qualifying Examination Preparation (2 credits). F,W,S

Independent study course designed to help students prepare for qualifying exams. Students meet on regular basis with one or more members of qualifying examination committee to monitor preparation for exam. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

285. Readings in Research Field (2 credits). F,W,S

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings and deepen their knowledge of a particular author or historical theory. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

286. Research Colloquium on Colonialism, Nationalism, and Race (2 credits). F,W,S

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of a particular cluster to discuss most important readings in the field. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

287. Research Colloquium on Gender (2 credits). F,W,S

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of this cluster to discuss most important readings in their field. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

288. Teaching Assistant Preparation (2 credits). F,W,S

Independent study designed to help history graduate students prepare to teach in an area of history outside their specialization. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

289. History Colloquium (2 credits). F,W,S

Independent study designed to foster departmental and cross-disciplinary participation in campus talks, colloquia, conferences, and events. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

290. Teaching World History at the College Level (2 credits). F,W,S

Two-unit independent study course designed to train students to teach the lower-division World History survey. Students attend two meetings plus a weekend World History forum. Enrollment restricted to graduate students. May be repeated for credit. *E. Burke*

297. Independent Study.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

299. Thesis Research.

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

History of Art and Visual Culture

D-201 Porter College (831) 459-4564 havc@ucsc.edu http://havc.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Visual culture, as a contemporary academic field evolving from the historical study of art, investigates the production, form, and reception of images past and present. It incorporates the painting, sculpture, and architecture conventionally defined by art history, but it extends throughout the fields of visual imagery beyond the cultural boundaries formerly drawn by academic tradition. The history of art and visual culture program at UCSC focuses its cultural and historical investigation across a wide variety of representations in the cultures of Africa, the Americas, Asia, Europe, and the Pacific Islands, from masks and mountains to mass media.

Students of visual culture at UC Santa Cruz encounter complex questions raised from a variety of viewpoints. Foremost among these are questions about the social, economic, religious, and psychological influences on those who produce visual images as well as on those who view them. Also considered is how images form beliefs and values, taking into account the issues of gender, sexuality, ethnicity, race, and class. Questions of theory and methodology are addressed throughout the range of courses, although some courses emphasize these more than others.

The history of art and visual culture curriculum guides students in acquiring skill in critical thinking about visual culture, leading to a B.A. degree. Each student majoring or minoring in visual culture devises an individual study plan with a faculty adviser. Courses are organized in four levels, with each level providing a progressively sophisticated study of materials and problems. The lower-division courses, numbered 1–99 and intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division courses, numbered 100–149, cover a broad range of issues in various aspects of world culture from earliest times to the present. Advanced courses, numbered 150–189, focus on selected fields, topics, and methods. The most advanced courses, numbered 190 and 191, are taught in seminar format.

Declaring the Major

Prospective majors must complete two of the lower-division 10-series courses in history of art and visual culture before declaring the major. All students considering this major should consult with the history of art and visual culture undergraduate adviser as soon as possible. Students must complete the worksheet for declaring the major in preparation for a meeting with a faculty adviser to finalize the Proposed Study Plan Declaration of Major/Minor petition form.

Lower-Division Requirements

Five courses, as follows:

- Three survey courses 10D, 10E, and either 10F or 10G
- · Two courses selected from the following:
 - · additional 10-series courses
 - 80-series courses
 - visual practice courses: Art 20–30, 70; Theater Arts 14, 18; SCIC 104A-B, 106A, 107, 110
 - transfer courses—a total of 9-10 quarter credits
 - Up to two upper-division history of art and visual culture courses may be substituted with prior approval of a faculty adviser.

Upper-Division Requirements

Ten 5-credit courses, as follows:

- Nine upper-division history of art and visual culture courses:
 - course 100A recommended during sophomore or junior year
 - courses 101-149: four courses recommended or other upper-division course(s)
 - courses 150-189: two courses required
 - courses 190–191: two courses required, one of which must satisfy the senior comprehensive requirement (see Comprehensive Requirement below)

In courses 100–191, a student must study with four different faculty members to ensure methodological and theoretical diversity as well as study visual cultures in two of historical eras and two cultural settings (refer to the course descriptions).

• 10th course: one upper-division course from another discipline, approved by a faculty adviser. The course taken outside of the History of Art and Visual Culture Department to fulfill the upper-division major requirement should complement a student's history of art and visual culture program focus. Courses from the following departments are especially relevant: American studies, anthropology, film and digital media, history, Latin American and Latino studies, literature, philosophy, sociology, theater arts, and feminist studies. Courses from other departments may be considered.

Comprehensive Requirement

One of the two seminars, 190–191, taken to meet the requirements for the major must be taken in the senior year to fulfill the senior comprehensive requirement. Within the context of an advanced seminar, this course provides supervised work culminating in the completion of a major coherent project that meets the standards of the senior level of achievement in the history of art and visual culture. Students whose performance is outstanding are eligible for Honors. Students taking the course for Pass/No Pass who do not pass will receive a fail (F).

Concentration in Religion and Visual Culture

This program is for students who wish to pursue the study of religion in conjunction with studies of visual culture. It consists of an individually planned sequence of courses, including a core set of lower-division courses (1–99), to provide grounding in issues, methods, and a general history of visual culture; upper-division courses (100–199) from within the department; and at least four upper-division courses from other departments that focus on the study of religion.

A student enters the concentration by proposing, in consultation with a faculty adviser, a sequence of upper-division courses to fulfill the Religion and Visual Culture requirements.

Ordinarily, students complete two lower-division courses in history of art and visual culture before declaring the major. The faculty adviser for the Religion and Visual Culture concentration is Raoul Birnbaum.

Requirements

Fourteen courses are required: three lower-division and seven upper-division courses from within the department and four relevant upper-division courses from other departments.

Lower-Division Courses

· Courses 10D, 10E, and either 10F or 10G

For students who have sufficient background, an upper-division history of art and visual culture course may be substituted with prior approval of a faculty adviser.

Upper-Division Courses

- Seven upper-division history of art and visual culture courses (course 100A, two numbered 101–149, two numbered 150–189, and two numbered 190 or 191).
- Four upper-division courses in the study of religion from programs on campus such as anthropology, history, literature, and philosophy. (A current list of courses on campus that focus on the study of religion is maintained by the History of Art and Visual Culture Department office.)
- One of the two history of art and visual culture seminars (courses 190 or 191) required for the concentration should be taken in the senior year specifically to fulfill the senior comprehensive requirement.

Double Majors

History of art and visual culture may be studied as part of a double major. A student must fulfill all of the requirements for both majors.

Minor Requirements

Nine courses, as follows:

- lower-division: three courses (10D, 10E, and either 10F or 10G);
- upper-division: six courses planned in consultation with a faculty adviser (one history of art and visual culture 80-series course may be substituted for one upper-division course).

Transfer Students

A student may transfer up to five art history courses toward the major, only two of which may be upper division. Upper-division transfer credit must be approved by the student's faculty adviser. Transfer students are invited to contact the History of Art and Visual Culture Department before enrolling at UCSC.

Study Abroad

The University of California's Education Abroad Program (EAP) operates in countries throughout the world and serves over 4,000 upper-division students from the 10 UC campuses annually. Students may receive transfer credit for a maximum of three upper-division art history courses taken through the EAP program. Credit for courses taken at other institutions is given only with permission of the student's adviser. It is strongly suggested that students consult with a faculty member about their course of study before going abroad to avoid any confusion about these transfer credits.

Careers

The preparation students receive from the B.A. in history of art and visual culture provides skills that can lead to successful careers in law, business, and social services, in addition to a more specific focus on museum curating, art restoration, studies in architecture, and studies in art history leading to a graduate degree.

Recommendations for Students Who Plan Graduate Study

There are many graduate programs of visual culture that lead to the M.A. and Ph.D. in fields such as art history, cultural history, semiotics, rhetoric, history of religions, comparative arts, theory and criticism of art, and so forth. Most graduate programs require a reading knowledge of one or two languages other than English. Students who are contemplating graduate study should consult with their adviser as early as possible in their undergraduate career.

Although history of art and visual culture is in the process of developing an interdisciplinary Ph.D. program in visual studies, the department does not anticipate matriculating the first class of students before fall 2009.

History of Art and Visual Culture

D-201 Porter College (831) 459-4564 havc@ucsc.edu http://havc.ucsc.edu

Program Description | Faculty | Course Descriptions

Program Description

Visual culture, as a contemporary academic field evolving from the historical study of art, investigates the production, form, and reception of images past and present. It incorporates the painting, sculpture, and architecture conventionally defined by art history, but it extends throughout the fields of visual imagery beyond the cultural boundaries formerly drawn by academic tradition. The history of art and visual culture program at UCSC focuses its cultural and historical investigation across a wide variety of representations in the cultures of Africa, the Americas, Asia, Europe, and the Pacific Islands, from masks and mountains to mass media.

Students of visual culture at UC Santa Cruz encounter complex questions raised from a variety of viewpoints. Foremost among these are questions about the social, economic, religious, and psychological influences on those who produce visual images as well as on those who view them. Also considered is how images form beliefs and values, taking into account the issues of gender, sexuality, ethnicity, race, and class. Questions of theory and methodology are addressed throughout the range of courses, although some courses emphasize these more than others.

The history of art and visual culture curriculum guides students in acquiring skill in critical thinking about visual culture, leading to a B.A. degree. Each student majoring or minoring in visual culture devises an individual study plan with a faculty adviser. Courses are organized in four levels, with each level providing a progressively sophisticated study of materials and problems. The lower-division courses, numbered 1–99 and intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division courses, numbered 100–149, cover a broad range of issues in various aspects of world culture from earliest times to the present. Advanced courses, numbered 150–189, focus on selected fields, topics, and methods. The most advanced courses, numbered 190 and 191, are taught in seminar format.

Declaring the Major

Prospective majors must complete two of the lower-division 10-series courses in history of art and visual culture before declaring the major. All students considering this major should consult with a member of the faculty the history of art and visual culture undergraduate adviser as soon as possible. Students must complete the worksheet for declaring the major in preparation for a meeting with a faculty adviser to finalize the Proposed Study Plan Declaration of Major/Minor petition form.

Lower-Division Requirements

Five courses, as follows:

- Three survey courses 10D, 10E, and either 10F or 10G
- Two courses selected from the following:
 - additional 10-series courses
 - 80-series courses
 - visual practice courses: Art 20–30, 70; Theater Arts 14, 18; SCIC 104A-B, 106A, 107, 110
 - transfer courses—a total of 9-10 quarter credits
 - Up to two upper-division history of art and visual culture courses may be substituted with prior approval of a faculty adviser

Upper-Division Requirements

Ten 5-credit courses, as follows:

- Nine upper-division history of art and visual culture courses:
 - course 100A recommended during sophomore or junior year
 - courses 101–149: four courses recommended or other upper-division course(s)
 - courses 150–189: two courses required
 - courses 190–191: two courses required, one of which must satisfy the senior comprehensive requirement (see Comprehensive Requirement below)

In courses 100–191, a student must study with four different faculty members to ensure methodological and theoretical diversity as well as study visual cultures in a variety of two historical eras and two cultural settings (refer to the course descriptions).

10th course: one upper-division course from another discipline, approved by a faculty adviser. The course taken outside of the History of Art and Visual Culture Department to fulfill the upper-division major requirement should complement a student's history of art and visual culture program focus. Courses from the following departments are especially relevant: American studies, anthropology, film and digital media, history, Latin American and Latino studies, literature, philosophy, sociology, theater arts, and feminist studies. Courses from other departments may be considered.

Comprehensive Requirement

One of the two seminars, 190–191, taken to meet the requirements for the major must be taken in the senior year to fulfill the senior comprehensive requirement. Within the context of an advanced seminar, this course provides supervised work culminating in the completion of a major coherent project that meets the standards of the senior level of achievement in the history of art and visual culture. Students whose performance is outstanding are eligible for Honors. Students taking the course for Pass/No Pass who do not pass will receive a fail (F).

Concentration in Religion and Visual Culture

This program is for students who wish to pursue the study of religion in conjunction with studies of visual culture. It consists of an individually planned sequence of courses, including a core set of lower-division courses (1–99), to provide grounding in issues, methods, and a general history of visual culture; upper-division courses (100–199) from within the department; and at least four upper-division courses from

other departments that focus on the study of religion.

A student enters the concentration by proposing, in consultation with a faculty adviser, a sequence of upper-division courses to fulfill the Religion and Visual Culture requirements. Ordinarily, students complete two lower-division courses in history of art and visual culture before declaring the major. The faculty adviser for the Religion and Visual Culture concentration is Raoul Birnbaum.

Requirements

Fourteen courses are required: <u>four three</u> lower-division and <u>six seven upper-division</u> courses from within the department and four relevant upper-division courses from other departments.

Lower-Division Courses

- Courses 10D, 10E, and either 10F or 10G
- One course selected from the following: additional 10-series courses, 80-series courses, or visual practice courses or (Art 20-30, or transfer courses totaling 9-10 quarter credits)

A lower-division course from another department or an upper-division history of art and visual culture course may be substituted with prior approval of a faculty adviser.

For students who have sufficient background, an upper-division history of art and visual culture course may be substituted with prior approval of a faculty adviser.

Upper-Division Courses

- Six Seven upper-division history of art and visual culture courses (course 100A, two numbered 101–149, two numbered 150–189, and one two in the senior year numbered 190 or 191).
- Four upper-division courses in the study of religion from programs on campus such as anthropology, history, literature, and philosophy. (A current list of courses on campus that focus on the study of religion is maintained by the History of Art and Visual Culture Department office.)
- Students must include at least two seminars in their program; at least one should be taken in the History of Art and Visual Culture Department in the senior year specifically to fulfill the senior comprehensive requirement. One of the two history of art and visual culture seminars (courses 190 or 191) required for the concentration should be taken in the senior year specifically to fulfill the senior comprehensive requirement.

Double Majors

History of art and visual culture may be studied as part of a double major. A student must fulfill all of the requirements for both majors.

Minor Requirements

Nine courses, as follows:

- lower-division: three courses (10D, 10E, and either 10F or 10G);
- upper-division: six courses planned in consultation with a faculty adviser (one history of art and visual culture 80-series course may be substituted for one upper-division course).

Transfer Students

A student may transfer up to five art history courses toward the major, only two of which may be upper division. Upper-division transfer credit must be approved by the

student's faculty adviser. Transfer students are invited to contact the History of Art and Visual Culture Department before enrolling at UCSC.

Study Abroad

The University of California's Education Abroad Program (EAP) operates in countries throughout the world and serves more than 750 4,000 upper-division students from the nine 10 UC campuses annually. Students may receive transfer credit for a maximum of three upper-division art history courses taken through the EAP program. Credit for courses taken at other institutions is given only with permission of the student's adviser. It is strongly suggested that students consult with a faculty member about their course of study before going abroad to avoid any confusion about these transfer credits.

Careers

The preparation students receive from the B.A. in history of art and visual culture provides skills that can lead to successful careers in law, business, and social services, in addition to a more specific focus on museum curating, art restoration, studies in architecture, and studies in art history leading to a graduate degree.

Recommendations for Students Who Plan Graduate Study

There are many graduate programs of visual culture that lead to the M.A. and Ph.D. in fields such as art history, cultural history, semiotics, rhetoric, history of religions, comparative arts, theory and criticism of art, and so forth. Most graduate programs require a reading knowledge of one or two languages other than English. Students who are contemplating graduate study should consult with their adviser as early as possible in their undergraduate career.

Although history of art and visual culture is in the process of developing an interdisciplinary Ph.D. program in visual studies, the department does not anticipate matriculating the first class of students before fall 2009.

History of Art and Visual Culture

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Harry Berger Jr., Emeritus

Raoul Birnbaum, Patricia and Rowland Rebele Chair in History of Art and Visual Culture Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

Carolyn S. Dean

Cultural histories of the native Americas and colonial Latin America

John Hay, Emeritus

Virginia Jansen, Emerita

Jasper A. Rose, Emeritus

Catherine M. Soussloff, University of California Presidential Chair

European cultural theory, aesthetics, and the historiography of art; performance studies; early modern Italian art; media history including film; Jewish identity and representation

Associate Professor

Martin A. Berger

American studies and visual studies; construction of gender and race

Elisabeth Cameron

Visual cultures of central Africa, issues of gender, post-colonialism, and iconoclasm

Jennifer A. González

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

Donna M. Hunter

European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice, portraiture

Assistant Professor

Maria Evangelatou

Medieval visual culture with emphasis on Byzantium and its periphery; manuscript illumination, Marian cult and iconography; ancient Greek and Roman visual culture; Islamic visual culture; gender studies

Stacy Kamehiro

Visual cultures of Oceania; internationalism; culture contact; colonial cultures; gender studies; museums and collecting

Lecturers

Janina Darling

Greek and Roman art; representations of women in the ancient world

Jeffery Lieber

History of architecture and urbanism with specialized research interests in Baroque and Neoclassical architecture in Italy and post-WWII architecture in the United States and Europe

Nick Morrissey

History of Indian art, Buddhist studies, Indology, Sanskrit and Tibetan studies, history of religions, Mahayana sutra literature and the nature of Mahayana Buddhism as religious movement

Soraya Murray

Contemporary art with emphasis in new media art and theory; African diaspora and globalization

Lisa Regan

Italian Renaissance art, with a focus on 16th-century court culture, gender issues, and the intersections of art and literature

Kirtana Thangavelu

Religion and visual culture in India and Asia

Professor

John Dizikes, Emeritus (American Studies)

Shelly Errington (Anthropology)

Globalization of folk art, visual and social semiotics, photography, film, the Internet and digital media, Southeast Asia, and Latin America

History of Art and Visual Culture

D-201 Porter College (831) 459-4564 havc@ucsc.edu http://havc.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

10. Introduction to Visual Culture.

An introduction to the history of art and visual culture. Need not be taken in sequence. *The Staff*

10D. Presence and Power in the Visual Cultures of Asia. F

An introduction to the art and architecture of East Asia, including China, India, Southeast Asia, and Japan. In order to achieve a fuller understanding of the arts of these countries a historical, cultural, and religious context is provided. (General Education Code(s): IH, A.) *The Staff*

10E. Africa, Oceania, and the Americas. W

A comparative study of the arts of selected cultures which developed outside the spheres of influence of the major European and Asian civilizations. Emphasis is on the function of the arts in these disparate geographic regions. Students cannot receive credit for this course and course 100E. (General Education Code(s): IH, A, E.) *E. Cameron, C. Dean, S. Kamehiro*

10F. The Nude in the Western Tradition. S

The human body without clothing in European and European-American art and visual culture from ancient Greece to the present day. Among the themes to be addressed: gender, youth and age, sexuality and sexual preference, fecundity and potency, erotic art and pornography, primitivism and the naked body of the non-European. (General Education Code(s): IH, A.) *D. Hunter*

10G. Europe. *

An introduction to the European tradition in visual culture, from antiquity to the present, but not in chronological order. All media, including the fine arts, architecture, film, video, and installation and performance work are incorporated. Presents the major visual regimes of representation while it probes the meanings and limits of Europe and the European tradition in the context of the visual. (General Education Code(s): IH, A.) *The Staff*

80A. Introduction to Architecture. F

Introduction to elements, technology, concepts, and semiotics of architecture in its buildings, functions, environments, societies, and history. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *The Staff*

80D. Museum Cultures: The Politics of Display. S

Explores the history of collecting and displaying art (museums, galleries, fairs) since the mid-19th century and the effect of institutional changes on aesthetic conventions.

Follows the history from the origins of museums and collections to contemporary critiques of institutional exclusion and misrepresentation. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *J. Gonzalez*

80E. Ancient Mediterranean Visual Cultures. *

The role that ancient art and visual culture play in constructing social identities, sustaining political agendas, and representing various cultural, ritual, and mythological practices in Mesopotamia, Egypt, Greece, and Rome, including the sociology of ancient cultures, mythology, religious studies, gender studies and history. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *J. Darling*

80F. Form and Feeling in Indian Art. *

Rasa is the juice of something, its essence or flavor. In the arts of India, the theory of rasa unites all media. Using rasa theory to examine Indian visual culture, this course looks at painting, sculpture, film, performance, and literature. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A, E.) *K. Thangavelu*

80G. Religion and Visual Culture in China. W

Introduction to the study of religious currents and practices in China and their visual expression. In addition to "religious art," topics include such pivotal matters as body concepts and practices, representations of the natural world, and logics of the built environment. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A, E.) *R. Birnbaum*

80K. Constructing Home, 1900-1960.

Examines ways in which architects in Europe and U.S. created not only modern houses but also blueprints for modern living. Focuses on issues of gender, domesticity, public versus private sphere, and mass housing versus single-family home. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *The Staff*

80M. Indigenous American Visual Culture. *

Selected aspects of art and architecture of the first peoples of the Americas, north, central, and south, from ca. 2000 B.C.E. to present. Societies to be considered may include Anasazi, Aztec, Inca, Northwest Coast, Maya, Navajo, Plains, and others. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A, E.) *C. Dean*

80N. Indian Art: Image and Ideology. *

Examination of the ways social, religious, and political patronage have affected the production and reception of art in the Indian subcontinent. The course is designed as a series of case studies from different periods of Indian history. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A, E.) *The Staff*

80S. Western Culture and the Human Visual Imagination. *

Survey of critical themes and theoretical topics central to historical situations and visual character of Western culture from Early Modern period to present. Addresses issues of particular concern to the visual tradition in Europe and the U.S.: the beginning and end of art, visual regimes of looking and seeing, the idea of the artist, the art market, media and technologies, the role of museums and other exhibition practices. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *C. Soussloff*

80T. Art of the Body in Oceania. F

Explores "art of the body," defined broadly, from various perspectives. Examines colonial representations of Oceanic bodies, self-representation through bodily adornment and display (including tattoo, scarification, body painting, ornament, and dress), and bodily metaphors in Oceanic visual cultures. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A, E.) *S. Kamehiro*

99. Tutorial. F,W,S

Supervised study for undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

100A. Methods in History of Art and Visual Culture. W

Introduction to major issues of method and critique in study of art and visual culture. Focuses on understanding disciplinary and critical modes of scholarly inquiry in the visual arts, including role of historical research. Emphasizes intensive reading, discussion, and writing. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior History of Art and Visual Culture majors. Enrollment limited to 18. (General Education Code(s): W,A.) *The Staff*

100E. Introduction to Visual Culture: Africa, Oceania, and the Americas. W

A comparative study of the arts of selected cultures which developed outside the spheres of influence of the major European and Asian civilizations. Emphasis on the function of the arts in these disparate geographic regions. Students cannot receive credit for this course and course 10E. Designed for selected students who need upper-division credit to complete certain majors; contact the History of Art and Visual Culture Office for information. (General Education Code(s): A, E.) *E. Cameron, C. Dean, S. Kamehiro*

105. Topics in Art History.

105E. Ritual in Asian Religious Art. *

Examination of interaction between image and ritual in Asian religious art. Case studies from different historical periods and geographical locations (e.g., China, Tibet, Japan, Indonesia, India). Examples include mandalas, ritual bronzes, tankas, sacred caves, temples, tea ceremonies, and calligraphy. (General Education Code(s): A, E.) *The Staff, K. Thangavelu*

105P. Visual Cultures of the Pacific Islands. *

Interdisciplinary course examines visual cultures of Australia, Melanesia, Micronesia, and Polynesia from the archaeological past through contemporary periods. (General Education Code(s): A, E.) *S. Kamehiro*

106. Topics in Visual Culture.

106A. Religious Traditions in Indian Art. W

Examines ways in which religious traditions are embedded in (or embodied within) art of the Indian sub-continent. Topics include Hindu temples; Jain art; Buddhist sacred narratives and cosmology; royal elite and popular patronage; and functions of icons. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 80. (General

Education Code(s): A, E.) K. Thangavelu

106B. Building the California Dream. *

From colonial architecture of Spanish missions to Daniel Libeskind's Jewish Cultural Center; Case Study Houses to Watts Tower; and Hearst Castle to Disneyland, students examine architecture, landscapes, cities, and spaces of California. (General Education Code(s): A.) *The Staff*

106D. Architecture as Visual Culture. *

Focusing on designers who have challenged the boundaries of architecture through the incorporation of and experimentation with diverse media, including drawing, photography, film, and new media, this course examines architecture as a critical paradigm for visual culture. (General Education Code(s): A.) *The Staff*

107. Topics in African Visual Culture.

107A. Central Africa. *

Examination of visual cultures of Central Africa within a historical sequence from the Sanga archaeological excavations to contemporary easel painting. Prerequisite(s): course 10E suggested. Enrollment restricted to sophomores, juniors and seniors (recommended). Enrollment limited to 90. (General Education Code(s): A, E.) *E. Cameron*

107B. West Africa. S

Explores visual cultures of West Africa through time (Nok to present). Attention paid to relationships between peoples and impact of European/Arab presence on visual cultures. Prerequisite(s): course 10E recommended. (General Education Code(s): A, E.) *E. Cameron*

110. Topics in Pre-Hispanic Visual Culture.

110A. Mexico. F

Art and architecture of selected pre-Hispanic cultures from the gulf coast, central, western, and southern Mexico including the Olmec, Zapotec, Toltec, Mixtec, Mexica (Aztec), and others. Offered in alternate academic years. (General Education Code(s): A.) *C. Dean*

110B. The Andes. *

The art of selected pre-hispanic cultures of Colombia, Ecuador, Peru, and Bolivia including the Nazca, Moche, Chimu, and Inca. (General Education Code(s): A.) *C. Dean*

114. Buddhist Visual Worlds. F

Introduction to the study of Buddhist visual traditions, from their beginnings to the present day. Case studies examined with careful attention to historical, social and cultural contexts; particular emphasis on the relation of visual traditions to Buddhist practices. Enrollment restricted to sophomore, junior, and senior students. (General Education Code(s): A.) *The Staff, R. Birnbaum*

115. Italian Renaissance: Representation and Institutions. W

Lives of Italian Renaissance people from birth to death, examining the nature and roles of the institutions which defined human existence in this period. Uses visual

arts both illustratively and to study how institutions fashioned their images through art and architecture. (General Education Code(s): A.) *The Staff*

120. The Arts in Japanese History.

120A. Early Japanese Temples. *

The construction and images, and the liturgical, political, and social functions of the principal Japanese temples surviving from the formative period of Japanese history, from approximately 500 to 1100 C.E. These temples are all prime historical and social sites in modern Japan. Most of them are mainly Buddhist, but the religious context of the course will be the general one of Japan during this period, including Shinto. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

121. The Arts in Chinese History.

121A. Early Chinese History.

Neolithic to the first extended age of imperial China (the Han Dynasty, 206 B.C.–220 A.D.). Themes, such as ritual and technology in the language of form, within a cultural and historical framework concluding in the age when representation of everyday life first became prominent. (General Education Code(s): A.) *The Staff*

121C. Later Chinese History.

The arts of China, from the second century A.D. to the 20th century. Architecture, sculpture, ceramics, calligraphy, and painting, setting these in contexts of social structure, political, and cultural values. Enrollment limited to 45. (General Education Code(s): A, E.) *The Staff*

121D. Twentieth-Century Chinese Art. *

Chinese art during the socially and politically tumultuous 20th century, a period when artists were challenged by an increased awareness of world art and the need to adapt to politically-motivated artistic constraints. General narrative history, leading artists, decisive moments, and poignant questions. (General Education Code(s): A, E.) *The Staff*

124. Contemporary Architecture, 1968–Present. S

Examination of practitioners, projects, issues, and theories in contemporary architecture from 1968 to the present. Topics include pop culture and architecture, deconstructivist architecture, and questions of place and identity in recent architecture. Enrollment limited to 90. (General Education Code(s): A.) *The Staff*

126. America in Art. *

Introduction to American visual arts: architecture, painting, photography, sculpture, and performance art, from the nineteenth through the twenty-first century. Explore social and political meanings of art and what art reveals about our nation's values and beliefs, in particular, gender and race. (General Education Code(s): A.) *M. Berger*

131. Media History and Theory. F

An introductory examination of the writing about the issue of "medium" and media theory in visual culture. Technologies, discourses, and practices from all periods that use the comparison of media as a major approach to understanding the problems of the visual are highlighted. New media, film, television, video, traditional arts are also

136. German Art, 1905–1945. F

Expressionism, agitprop, the Bauhaus, New Objectivity, attacks on modernism, National Socialist realism. Painting, sculpture, graphic art, and some architecture and film, studied in the context of political events from the eve of World War I to the end of World War II. (General Education Code(s): A.) *D. Hunter*

137. Impressionism to Pop Art: Art in Modern Culture. *

Critical reading of modernism as a high art tradition. Emphasis on context: culture of capitalism, shift in power from Europe to the U.S., role of gender and race, and the aesthetic as either apolitical refuge or site of disruption and critique. Third in a sequence of three courses on French art and its historical context; see courses 176 and 177. (General Education Code(s): A.) *D. Hunter, M. Berger*

138. Modern Architecture, 1880–1968. W

Developments in 19th- and 20th-century architecture, focusing on issues of modernity, technology, and industrialization, new building types, competitions, and urban growth as well as on major movements, buildings, and architects. (General Education Code(s): A.) *The Staff*

140. Surrealism to Postmodernism, Paris-New York. *

From Paris to New York, World War II to Vietnam, consumerism to conceptualism, an introduction to visual arts and theories of representation produced in the U.S. and Western Europe between 1930 and 1990, with attention to the social and political role of the art market, criticism, and censorship. (General Education Code(s): A.) *J. Gonzalez*.

140A. The Power of Images in the Roman World. *

Exploration of major visual media of the Roman Republic and Empire focusing on political and social ideology that examines the context of artistic products. Examines public monuments, domestic architecture, funerary vocabulary, and plebeian images as examples of the imagery of Roman culture. (General Education Code(s): A.) *J. Darling*

141. The Last Ten Years. *

Issues in recent visual art theory and practice are explored in light of contemporary exhibitions and publications. The course identifies themes and new media that have emerged or risen to prominence in museums and galleries over the past decade, nationally and internationally. (General Education Code(s): A.) *J. Gonzalez*

142. Activist Art since 1960. W

An examination of art produced for social change in the U.S. since 1960 focusing on five cases: the Vietnam war, Chicano civil rights, the women's movement, environmental protection, and AIDS activism. (General Education Code(s): A, E.) *J. Gonzalez*

149A. Histories of Photography. *

Introduction to the histories of photography and the critical debates around different photographic genres such as medical photography, art photography, and political photography. Students will develop a critical language in order to analyze photographs while considering the importance of social and institutional contexts. (General Education Code(s): A.) *J. Gonzalez*

150. Advanced Studies in Pre-Hispanic Visual Culture.

150A. The Maya. *

The art and architecture of the Maya of southern Mesoamerica from the first century C.E. to ca. 1500. Courses 10E, 80M, 100E or 110A recommended as preparation. Enrollment limited to 35. (General Education Code(s): A.) *C. Dean*

151. Topics in Colonial/Postcolonial Visual Culture.

151A. The Native in Colonial Spanish America. S

Indigenous contributions to colonial Spanish American visual culture including architecture, manuscripts, sculpture, painting, textiles, featherwork, and metallurgy. Focus on colonial Mexico, the Andes, and California. Enrollment limited to 35. (General Education Code(s): A, E.) *C. Dean*

153. History of the Book. *

History of book production and use in the West from antiquity to modern times. Development from roll to codex and from script to print. Emphasis on the relationship between text and image. Class conducted in Special Collections, McHenry. Exhibition as class project. Enrollment limited to 25. (General Education Code(s): A.) *E. Remak-Honnef*

154. Environments and Religion in China.

154A. Sacred Geography of China. *

An examination of the close relationship of religious traditions and the natural world in China, and its expression in visual representation. Particular emphasis on the ways in which competing groups sought to define or re-envision an understanding of the terrain. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A.) *R. Birnbaum*

154B. Architecture and Religion in China. *

An examination of the built environment—houses and palaces, shrines and temples, walls and gates, monuments and tombs, village and city plans—in relation to cosmological views and religious traditions. Special focus on the Chinese Buddhist monastery. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A.) *R. Birnbaum*

154C. Chinese Buddhist Monasteries. *

Consideration of Buddhist monasteries in China: as built environments set within architectural traditions; as centers for the realization of specific religious aims and practices, with distinctive visual programs to support those aims; and as nodes within social and economic landscapes. Enrollment limited to 35. (General Education Code(s): A.) *R. Birnbaum*

155. Constructing Lives in China: Biographies and Portraits. *

Consideration of biographies and portraits in China as representations of human types and individuals, and the use of these representations as models for constructing lives. Attention to historical and social contexts, early times to present. Special focus on Chinese Buddhist traditions. A previous course that focuses on traditional China

or Buddhist studies strongly recommended. Enrollment limited to 35. (General Education Code(s): A, E.) *R. Birnbaum*

156. Race and American Visual Arts. *

Investigation of the role played by visual arts in fashioning racial identities of European-Americans, African Americans, Native Americans, and Latinos in the United States. Enrollment limited to 35. (General Education Code(s): A, E.) *M. Berger*

159. Thematic Topics in Chinese Art.

159B. Chinese Landscape Painting. *

Examines the history and significance of the subjects most prominent in Chinese painting during the past one thousand years, focusing on the cultural factors that made landspace a fundamental value in the Chinese tradition and the methods whereby painters created pictorial equivalents. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

160. Storytelling in Asian Art. W

Combination of theoretical perspectives on narrative from literary criticism, rhetoric, folklore, and film theory with art historical focus on images (cave temples, stone reliefs on stupas, scrolls, dance-drama, etc.) from India, Pakistan, China, Japan, Cambodia, and Indonesia. Enrollment limited to 35. (General Education Code(s): A, E.) *K. Thangavelu*

161. Japanese Arts and Crafts. *

Examines premodern and modern developments in the production, dissemination, and use of Japanese arts and crafts. Includes a unit focusing on the tea ceremony as a key site for shaping craft aesthetics. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A, E.) *The Staff*

163. Early Medieval Visual Culture.

163A. Early Medieval Visual Culture: The Mediterranean. F

Visual culture from the late Roman Empire to the early Byzantine Empire. Imperial triumphal monuments, Roman, early Christian, and Jewish catacombs, frescoes, manuscripts, and mosaics. Enrollment restricted to sophomores, juniors, and seniors; other students should contact instructor. One quarter of a 10-series course or a course in ancient or medieval culture is recommended as preparation. Enrollment limited to 35. (General Education Code(s): A.) *M. Evangelatou*

168. High Renaissance. *

An investigation of the High Renaissance as a period and stylistic concept, using the major artists and monuments of the period 1480–1525 to discuss issues of theory, history, and art. Artists considered include Leonardo da Vinci, Michelangelo, and Raphael. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A.) *C. Soussloff*

169. Studies in 17th-Century Italian Art. *

Italian painting and sculpture of the 17th century in cultural and historical contexts, with special attention to figures such as Caravaggio, Carracci, Bernini, and Algardi, and places such as Bologna, Florence, Rome, Genoa, and Naples. Problems considered include the rise of the academies and connoisseurship, art theory,

patronage, and definitions of style. Enrollment limited to 35. May be repeated for credit. (General Education Code(s): A.) *C. Soussloff*

170. The Image of the Artist in History and Fiction. *

Examination of the representation of the visual artist in historical writing and contemporary fiction and film. Investigation of the models, structure, and language of the biography of the artist. Enrollment restricted to juniors and seniors; other students should contact instructor. Enrollment limited to 35. (General Education Code(s): A.) *C. Soussloff*

171. Methods and Historiography: Aesthetics and Historicism. *

Examination of the representation of the visual artist and art in German historical and philosophical writing from 1790 to World War II. Focus on critical readings of texts for the purpose of analyzing and contextualizing them, both historically and theoretically. Enrollment limited to 35. (General Education Code(s): A.) *C. Soussloff*

172. Jewish Identity and Visual Representation. *

An exploration of the theoretical and practical or experiential applications of Jewish identity in European visual representation. Brief background on pre-emancipation textual and cultural issues followed by study of the Jewish subject and Jewish subjectivities in modernity. Enrollment restricted to juniors and seniors. Enrollment limited to 35. (General Education Code(s): A, E.) *C. Soussloff*

173. Culture and Society in Early Modern Europe. *

Visual culture and representation explored through close study of texts, images, and institutions that register the fundamental theoretical and societal changes from the late Middle Ages through the 17th century. Readings in literature, drama, visual art, religion, science, philosophy, and politics. Enrollment limited to 40. May be repeated for credit. (General Education Code(s): A.) *C. Soussloff*

174B. Architecture as Collaboration: Shaping Modern Environments, 1910–1940. *

Critical examination of collaboration in projects and writings by selected architects. This course will consider disjunctions between actual practices and retrospective histories; questions of gender, sexuality, and creative processes; and relationships between architecture and the visual arts. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

174C. Constructing Memory and Place in Postwar Architecture. *

How have architects engaged memory and place in architectural projects and built landscapes since World War II? Examines memorializing, memory, and erasure of place in reconstruction of cities, creation of memorials, and design of buildings. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

175. Feminism and Aesthetics. *

Addresses the feminist critique of art history and visual culture; queries the viability of a feminist sensibility or politics in visual representation and reception. Approaches these topics through the problem of the representation of the "woman artist" and the feminine/feminist voice in cultural institutions and discourse. Enrollment limited to 35. (General Education Code(s): A.) *C. Soussloff*

176. Spectacular Power: Versailles, 1660–1989. *

The palace and grounds of Versailles as a representation of the French state since the

time of Louis XIV. Architecture, garden design, fountains, and fortifications; painting, sculpture, and court ceremony. The links between absolutism and the making of the "classic" French style are explored. First in a sequence of three courses on French art and its historical context; see courses 177 and 137. Enrollment limited to 35. (General Education Code(s): A.) *D. Hunter*

177. French Painting, 1780–1855. *

The art of David, Gros, Ingres, Gericault, Delacroix, the Barbizon School, and Courbet studied in relation to the changing status of the art and the political events from 1789 to 1848. Second in a series of three courses on French art and its historical context. See courses 176 and 137. Enrollment limited to 35. (General Education Code(s): A.) *D. Hunter*

178A. Victorian America. W

Examines how American writers and artists negotiated complexities of U.S. society during the 19th century. Emphasis on issues ranging from women's rights to laissez-faire capitalism, and from Reconstruction to manifest destiny. Considers how the era's cultural products provided artists, patrons, and audiences with metaphorical coping strategies to counteract what Victorians perceived to be the period's overwhelming social and political changes. Enrollment limited to 35. (General Education Code(s): A.) *M. Berger*

180. The Camera and the Body. *

Through the study of historical and contemporary visual texts (from ethnography and portraiture to advertising and erotica), this course explores how photographic images of the body, while masquerading as "natural," "self-evident," or "scientific," participate in highly coded sign systems that influence who looks at whom, how, when, and why. Enrollment limited to 35. (General Education Code(s): A.) *J. Gonzalez*.

181. Environments, Installations, and Sites. W

A study of conceptual and formal issues that have informed the production of temporary, site-specific art works since 1960. Works that seek to transform the role of the audience, to escape or remake museum and gallery spaces, to introduce environmental concerns, or to situate art in "the land" or in "the street" serve as a focus. Enrollment limited to 35. (General Education Code(s): A.) *J. Gonzalez*

182. Chicano/Chicana Art: 1970-Present. *

Taking the terms "Chicano" and "Chicana" as a critical framework, addresses cultural and conceptual themes in visual art production since 1970. Questions concerning aesthetics, identity, gender, and activism in painting, photography, murals, and installation art explored. (General Education Code(s): A, E.) *J. Gonzalez*

185. Topics in African Art.

185A. Royal Arts of Africa. *

Examination of the visual culture of selected African kingdoms, historical and contemporary. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A, E.) *E. Cameron*

185B. Gender. F

In Africa, relationships exist between gender and visual culture. Course examines where categories come from, differences in men's and

women's visual cultures, and how visual cultures teach, reinforce, and negotiate gender definitions. When are male/female boundaries crossed, and why? Enrollment limited to 35. (General Education Code(s): A, E.) *E. Cameron*

185C. African Architecture. *

Study of the built environment in Africa. Focusing in depth on 10 major architectural forms or sites, this course explores the diversity of architectural types and how gender, politics, religion, and culture shape and are shaped by architectural spaces. Enrollment limited to 35. (General Education Code(s): A, E.) *E. Cameron*

187A. Textile Traditions of Oceania. *

Investigates how textiles contribute to cultural fabric of Oceania. Explores women's roles in socioeconomic exchanges and cultural production; gender issues regarding production and function of Oceanic textiles; and history of processes, functions, and aesthetics. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Prior coursework related to Oceania recommended. Enrollment restricted to juniors and seniors or by permission of instructor. Enrollment limited to 25. (General Education Code(s): W, A, E.) *S. Kamehiro*

189. Special Topics in Art History.

189D. Modernity and Nationalism in the Arts in India. *

Deals with artistic responses to the forces of modernity, colonialism, industrialization and globalization in India during the 19th and 20th centuries. Addresses the complex and often painful climb toward reestablishing a truly Indian artistic identity. Enrollment limited to 35. (General Education Code(s): A, E.) *K. Thangavelu*

189N. Impressionism. *

Focusing on work of artists Monet, Degas, Morisot, Cassatt, Caillebotte, and others, course themes include development of a Parisian avantgarde, representing modernity, new art exhibition strategies, issues of gender in/and representation, and rise of landscape painting. Prerequisite(s): course 137 recommended. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

190. Seminars in Visual Culture.

190A. Theories in Architecture. F

How do we construct architecture in words? Which discourses do we use, and what do they tell us about how we understand architecture? How are technology and the techniques of architectural representation understood? Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

190B. The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S.

Focus on the histories of miraculous images of *La Virgen de Guadalupe de Extremadura* (Spain) and *La Virgen de Guadalupe de Tepeyac* (Mexico). The foundations and growth of the cult of the Mexican Guadalupe during the colonial period is examined along with the multivalent symbolism of her image. Considers contemporary

"appearances" of the Virgin of Guadalupe, from the miraculous images on a tree in central California and the compositions of Chicano artists, to mass-produced kitsch. This course can be taken for senior exit credit only be permission of the instructor. This course can be taken for senior exit credit only be permission of the instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A, E.) *C. Dean*

190C. Subalternatives: Representing Others. *

Explores how visual representation (in fine art, popular art, film, and television) encodes difference in selected cultural and historical contexts. Considers (post)colonial image-making both as a strategy of domination as well as resistance. This course can be taken for senior exit credit only by permission of the instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 22. (General Education Code(s): A, E.) *C. Dean*

190D. The World of the Lotus Sutra. . W

Close study of the principal text of East Asian Buddhism as a self-enclosed vision of reality, with careful consideration of the forms and functions of the world of visual and aural representation that it has inspired. Prerequisite(s): course 114. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190F. Mountains and Religion in China. *

Topical approach to the visual culture of mountains in Chinese history—encompassing both imaginative constructions and physical realities—especially in relation to religious practices. Considers examples and contexts in relation to such topics as pilgrimage, local and state religion, and individual or group retreat and reclusion. Interview only: a previous course on Chinese history or culture (in such departments as history of art and visual culture, history, literature, or anthropology) or permission of instructor; instructor determines if prerequisite is met. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190G. Word and Image in Chinese Culture. *

The Chinese tradition, from the earliest material evidence to the most recent, has persistently emphasized a close relationship between written language and pictorial image. This concern has appeared equally in artifactual and theoretical form. Its best known representation is in the association of calligraphy with painting. Course examines the evolution and meaning of that association. A knowledge of the Chinese language is not necessary. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

190H. Representing Cultural Narratives: Japanese Handscrolls. * Narrative handscrolls were one of the most characteristic and vivid productions of Japanese visual culture for over a thousand years. They were used to represent and re-represent almost every aspect of institutional and social history. Examines their cultural categories and historical development. This course can be taken for senior exit credit only by permission of the instructor. This course can be taken for senior

exit credit only by permission of the instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

190I. Huayan Visions. *

Explores the distinctive conceptual world of the Buddhist *Huayanjing* (*Avatamsaka-sutra*) and its expression in visual forms. This long text, composed in Sanskrit and later translated into Chinese, is a principal scripture of the international Mahayana Buddhist traditions of Asia. Prerequisite(s): course 114, an upper-division course in Buddhist studies is recommended, or permission of the instructor. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190M. History and Visual Culture. S

The literature on art and visual culture in the European tradition and the critiques that have emerged in postmodern theory, particularly as these pertain to the term and concept "history." Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A.) *C. Soussloff*

190N. The Philosophy of Art. *

This course will examine the ways in which the work of art appears in philosophical writings in the European tradition from Greek times to the present. The readings will be chosen for the ways in which the ideological and theoretical aspects of art are addressed by philosophy. Enrollment restricted to junior and senior history of art and visual culture, art, literature, history, philosophy, and politics majors. Can be taken for senior exit credit only by permission of instructor. Enrollment limited to 18. (General Education Code(s): A.) *C. Soussloff*

1900. Art and Culture Contact in Oceania. F

Examines impact of culture contact on Oceanic and Euro-American visual cultures in context of "discovery," colonialism, and "postcolonialism." Topics include 18th-century visual culture, colonial identities, primitivism, syncretism, impact of Christianity, contemporary art/market, media, tourism, transnationalism, and globalization. Prerequisite(s): prior course work related to Oceania recommended. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A, E.) *S. Kamehiro*

190P. Death and Patriotism: The Case of the French Revolution. *

What are the relations between the mortal body and politics in times of crisis? What purposes can death, or the threat of death, serve? Examines representations of executions, assassinations, and funerals during the French Revolution, with an emphasis on the Terror. Enrollment limited to 18. (General Education Code(s): A.) *D. Hunter*

190Q. Portraiture: Europe and America, 1400–1990. W

Western portraiture and self-portraiture at certain key moments (early modern Italy, 16th-century Germany, 17th-century Holland, France from the reign of Louis XIV to the Revolution, contemporary U.S.) are explored by reading 20th-century interpretations and some primary sources. This course can be taken for senior exit credit only by permission of the instructor. Enrollment limited to 18. (General

Education Code(s): A.) D. Hunter

190S. Semiotics and Visual Culture. *

How can visual culture be understood as the production, circulation, and recirculation of signs? This course offers a history of semiotics and its methodological application in the analysis of images in popular culture and within the discipline of art history. This course can be taken for senior exit credit only by permission of the instructor. Enrollment restricted to junior and senior students. Enrollment limited to 18. (General Education Code(s): A.) *J. Gonzalez*

190T. Feminist Theory and Art Production. *

A close reading of works of art and theoretical texts by feminists working from 1970 to the present. The course encourages debate around the past, present, and future relevance of feminist theories to visual cultural studies, paying particular attention to issues of cultural and ethnic difference. Enrollment limited to 18. (General Education Code(s): A.) *J. Gonzalez*

190U. Representations of Women in Indian Art. F

Deals with representations of the female divinity in Indian religious imagery, and of women in secular and courtly paintings. Also examines roles women play in the production of art in the Indian subcontinent. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A, E.) *K. Thangavelu*

190Y. Image and Gender. *

Examines what visual representations (feminine and masculine) reveal of gender in 19th- and 20th-century European and American culture; how images reflect norms of gender; and how we are conditioned to read images in gendered terms. Explores how femininity and masculinity were conceived during historical periods and how gender ideals changed in response to social, political, and economic pressures. Students encouraged to consider the fluid nature of 21st-century notions of ideal femininity and and masculinity and possible alternatives. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A.) *M. Berger*

191. Seminars in Art History.

191B. The Life/Sculpture of Gianlorenzo Bernini, Master of the Roman Baroque. *

Sculptures, performances, and art theory of Roman Baroque artist Gianlorenzo Bernini. Early modern sources on Bernini's life and recent art history used to assess issues in cultural theory: embodiment, performance/performativity, visual and textual genres, space/time in sculpture. Enrollment restricted to junior and senior majors in history of art and visual culture, art, literature, history, philosophy, politics, theater arts, and sociology. Enrollment limited to 18. (General Education Code(s): A.) *C. Soussloff*

191C. Iconoclasm. *

What happens when, to control an object, it is destroyed? Examines destruction of art as a way of ending the object's life cycle, as a device

of social tension/change, and as a colonial and post-colonial mechanism of religious/political control. Prerequisite(s): course 10E or permission of instructor. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A, E.) *E. Cameron*

191D. Spectacle, Ceremony, and Display in Medieval Pilgrimage and Contemporary Tourism. *

Medieval pilgrimage and contemporary tourism studied as social, cultural and economic phenomena with analogous structures. Examines some of the most significant medieval pilgrimage sites (Rome, Jerusalem, Santiago de Compostela) through contemporary literature on tourism. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

191F. Play and Ritual in African Visual Cultures. S

Compares how play and ritual construct worlds and regulate visual cultures—from dolls to "ritual" objects and performances. Attention given to areas where play and ritual overlap and the visual cultures that result. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A, E.) *E. Cameron*

191H. Chan Texts and Images. *

Examines selected issues in history of Chan (Zen) Buddhist traditions in China from medieval times to the present day. Concepts, methods, and visual expression of Chan practice situated through study of texts and visual materials. Prerequisite(s): course 114 or permission of instructor. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

1911. The Individual and Tradition in Chinese Painting of the 17th Century. *

Embracing the last great transition between imperial dynasties in China, the 17th century was a period of extraordinary creativity in Chinese painting. Both the proponents of traditional values and the seekers after viable individualism were equally vigorous and inventive. Much of their work still has a strong and immediate appeal to the eyes and minds of today. Explores both the working of this period and the nature of its continuing appeal. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

191P. Art and Identity in the Pacific: Creating and Challenging Ethnic and National Identities. *

Theoretical discussions and Pacific Basin case studies on 1) definitions of cultural, ethnic, and national identities; 2) relationship between art, museums, and construction of historical and cultural narratives; 3) ways "tradition" defined in art practices and used by groups to assert an identity in their present. Participants first develop a theoretical framework and vocabulary for analyzing artistic production in a variety of cultures. Through specific case studies, will explore how art, architecture, and museums actively contribute to define and challenge ethnic and national identities. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 18. (General Education

195. Senior Thesis. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

198. Independent Field Study. F,W,S

Independent field study away from the campus. Students submit petition to sponsoring agency. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Independent field study away from the campus. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study or research for graduate students. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

History of Consciousness

415 Humanities 1 (831) 459-2757

http://humwww.ucsc.edu/HistCon/

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

History of consciousness is an interdisciplinary graduate program centered in the humanities, with links to the social sciences, physical and biological sciences, and arts. It is concerned with forms of human expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

Over more than 30 years of existence, the history of consciousness program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are influential scholars at prominent universities, and dissertations have been published by major publishing houses and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

History of consciousness emphasizes a variety of topics in its seminars and research pursuits. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of consciousness has strong cooperative relations with associated faculty from other campus programs, scholars who offer seminars and participate in advising, qualifying exams, and thesis committees. Within the limits of seminar size and faculty time, cross-disciplinary work in graduate courses offered by other departments is encouraged. The formal list of associated faculty is a non-exhaustive indication of advising possibilities beyond the program's core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Institute for Humanities Research, the Institute of Advanced Feminist Research, and the Chicano/Latino Research Center, also provide venues for collaborative work.

Requirements

Students are required to enroll in a minimum of two courses per quarter until advancement to candidacy (normally achieved no later than the fourth year).

Incoming students are required to take a minimum of five history of consciousness graduate seminars during the first two years. In the first year, students are required to take the introductory seminar, course 203, Approaches to History of Consciousness. The remainder of the courses taken to fulfill university enrollment requirements may include not only history of consciousness seminars, but also independent study with specific faculty or graduate seminars offered in other departments.

Additional requirements for the Ph.D. vary with individual disciplinary and interdisciplinary needs and are determined in consultation with relevant faculty and the chair of the program.

Advancement to candidacy depends on the general quality of a student's work; demonstration of

proficiency in a foreign language relevant to the student's area of work, either by passing a written exam administered by the department or successfully completing a language course approved by the department; success in the qualifying exam; and proposal of an acceptable thesis topic. The qualifying exam is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The exam focuses on the student's research project and on the fields of scholarship it presupposes.

After advancement to candidacy, required by the end of the fourth year, students concentrate on the writing of the dissertation. The current normative time to degree limit of seven years means that a student usually has at least three years after advancement to candidacy for completion of the dissertation.

Students also have the option of doing advanced work in a traditional discipline and receiving a parenthetical degree notation of this specialization. In such cases, students must satisfy the appropriate department's criteria. Currently such degree notations may be negotiated with American studies, anthropology, literature, philosophy, sociology, and feminist studies. Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Applications

The deadline for applications to the History of Consciousness program is December 1, 2007. Admissions information and application materials are available online at *graddiv.ucsc.edu*. Applications are invited from students with backgrounds and interests in the humanities and social sciences and are especially encouraged from individuals with a clear idea of the project they wish to undertake. Strong preference is given to applicants working in areas for which the faculty resources in history of consciousness are appropriate and available. Graduate Record Examination (GRE) scores are required as is a writing sample of no more than 10 pages.

Admission is for the fall quarter only.

It is important to note that in light of California's elimination of affirmative action as an admissions criterion, the history of consciousness department reaffirms its commitment to the principles of affirmative action. These principles mean a commitment to diversity, equal opportunity, and outreach to underrepresented communities. Further, this commitment underlines our understanding that the very fabric and quality of our scholarship depends on the representation and interplay of diverse experience and perspectives. So defined, affirmative action is reflected in every aspect of the history of consciousness program, including scholarship, teaching, admissions, hiring, and the process of departmental governance.

Program Description | Faculty | Course Descriptions

Program Description

History of consciousness is an interdisciplinary graduate program centered in the humanities, with links to the social sciences, physical and biological sciences, and arts. It is concerned with forms of human expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

Over more than 30 years of existence, the history of consciousness program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are prolific influential scholars at prominent universities, and dissertations have been published by major publishing houses and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

History of consciousness does not have formal tracks. It emphasizes a variety of topics in its seminars and research pursuits. reflecting a concern for social, historical, and cultural theories. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of consciousness has strong cooperative relations with associated faculty from other campus programs, scholars who offer seminars and participate in advising, qualifying exams, and thesis committees. Within the limits of seminar size and faculty time, cross-disciplinary work in graduate courses offered by other departments is encouraged. The formal list of associated faculty is a non-exhaustive indication of advising possibilities beyond the program's core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Institute for Humanities Research, the Institute of Advanced Feminist Research, and the Chicano/Latino Research Center, also provide venues for collaborative work.

Students are required to enroll in a minimum of two courses per quarter until advancement to candidacy (normally achieved no later than the fourth year), after which they need enroll in only one course per quarter to qualify for full-time enrollment.

Incoming students are required to take a minimum of five history of consciousness graduate seminars during the first two years. In the first year, students are required to take the introductory seminar, course 203, Approaches to History of Consciousness. The remainder of the courses taken to fulfill university enrollment requirements may include not only history of consciousness seminars, but also independent study with specific faculty or graduate seminars offered in other departments.

Additional requirements for the Ph.D. vary with individual disciplinary and interdisciplinary needs and are determined in consultation with relevant faculty and the chair of the program.

Advancement to candidacy depends on the general quality of a student's work; demonstration of proficiency in a foreign language relevant to the student's area of work, either by passing a written exam administered by the department or successfully completing a language course approved by the department; success in the qualifying exam; and proposal of an acceptable thesis topic. The qualifying exam is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The exam focuses on the student's research project and on the fields of scholarship it presupposes.

The current normative time to degree limit of seven years means that a student usually has at least three years after advancement to candidacy for completion of the dissertation.

Students also have the option of doing advanced work in a traditional discipline and receiving a parenthetical degree notation of this specialization. In such cases, students must satisfy the appropriate department's criteria. Currently such degree notations may be negotiated with American studies, anthropology, literature, philosophy. sociology, and feminist studies. Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Applications

Admissions information and the links to complete an online application or download an application form are available at www.graddiv.ucsc.edu.

Information on sources of support is included in the application materials, which must be postmarked by December 1, 2006. Your completed application must be accompanied by a nonrefundable \$60 check, draft, or money order payable to UC Regents. Fee waivers are available for cases of hardship. Funds for waivers are very limited (international applicants are not eligible), but if you feel you qualify for a waiver, you should obtain a Request for Graduate Application Fee Waiver form from the Division of Graduate Studies, or online at www.graddiv.ucsc.edu/admissions/FeeWaiver_2006.pdf to submit with your application for admission.

The deadline for applications to the History of Consciousness program is December 1, 2007. Admissions information and application materials are available online at graddiv.ucsc.edu.

History of Consciousness

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Gopal Balakrishnan, Associate Professor of History of Consciousness Classics of political thought from Plato to Rousseau, early modern and modern European intellectual history, historical sociology, the history and future of capitalism, nationalism

James T. Clifford, Professor of History of Consciousness

History of anthropology, travel, and exoticism; transnational cultural studies, museum studies, indigenous studies

Angela Y. Davis, Professor of History of Consciousnessand Feminist Studies Feminism, African American studies, critical theory, popular music culture and social consciousness, philosophy of punishment (women's jails and prisons)

Teresa de Lauretis, Professor of History of Consciousness, Literature, and Film and Digital Media

Semiotics, psychoanalysis, feminism, film theory, literary theory, queer studies

Barbara L. Epstein, Professor of History of Consciousness

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

Donna J. Haraway, Professor of History of Consciousnessand Feminist Studies Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

Gary L. Lease, Professor of History of Consciousness

Theory and origins of religion, history of religions (Hellenistic mysteries, Christian origins, 19th-and 20th-century Germany, German Judaism), religion and political orders

David S. Marriott, Professor of History of Consciousness

Literary theory, psychoanalysis, black cultural theory and philosophies of race, literary and visual cultures of modernism

Victor Burgin, Professor Emeritus of History of Consciousness

Hayden White, Professor Emeritus of History of Consciousness

Extended Department Faculty

John Brown Childs, Professor of Sociology

Ethnic conflict and transcommunal cooperation; sociology of knowledge; African American, Native American, Latino interactions

Michael H. Cowan, Professor of American Studies

American cultural theory and history, history of American studies, symbolic expression in American life, urban cultural studies, American literary studies, studies in the institutional culture of higher education

Gina Dent, Associate Professor of Feminist Studies, History of Consciousness, and Legal Studies

Africana literary and cultural studies, legal theory, popular culture

Shelly Errington, Professor of Anthropology

Globalization of folk art, visual and social semiotics, photography, film, the Internet and digital media, Southeast Asia, and Latin America

Carla Freccero, Distinguished Professor of French Literature and Feminist Studies Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory,

Herman S. Gray, Professor of Sociology

Cultural studies, media and television studies, black cultural politics, social theory

Susan Harding, Professor of Anthropology

Culture, politics, narrative, gender, local/global studies, ethnographic writing, fundamentalism, Christianity, state-making, aging, America, and Spain

David C. Hoy, Professor of Philosophy

Kant, Hegel, Nietzsche, Heidegger, Derrida, Foucault, phenomenology, poststructuralism, and contemporary European philosophy

Robert L. Meister, Professor of Politics

Political and moral philosophy, law and social theory, Marxian theory, institutional analysis, antidiscrimination law

Helene Moglen, Professor of Literature and Feminist Studies; UC Presidential Chair The English novel; feminist, critical, cultural, and psychoanalytic theory; gender and genre in social and psychological contexts

Triloki Nath Pandey, Professor of Anthropology

Native peoples of North America, cultures of India, political anthropology, anthropological theories and comparisons

Andrew Szasz, Associate Professor of Sociology

Environmental sociology (environmental movements, policy, environmental justice); theory

Richard Terdiman, Professor of Literature

Nineteenth- and 20th-century French and European literature and culture, literary and cultural theory, contemporary critical theory, cultural globalization

Anna Tsing, Professor of Anthropology

Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnoecologies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

Judy Yung, Professor Emerita of American Studies

Patricia Zavella, Professor of Latin American and Latino Studies

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexicana/o workers and U.S. capital

History of Consciousness

415 Humanities 1 (831) 459-2757 http://humwww.ucsc.edu/HistCon/

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

80A. Culture and Ideology in the 20th Century. *

A survey of the principle ideological issues of the 20th century—attitudes toward sex, race, class, work, violence, and knowledge—viewed from the perspective of structuralist and semiological theories of culture. (General Education Code(s): T4-Humanities and Arts.) *A. Davis*

80B. Constructions of the Exotic. *

Analyzes ethnographic and auto-ethnographic representations of non-Western peoples. Films, video, ethnographies, novels, and journalism are considered, paying attention to specific histories of colonial and postcolonial contact which influence images of "culture" and "identity." (General Education Code(s): T4-Humanities and Arts.) *J. Clifford*

80E. Myth and Religion. F

A study of the nature of religion and myth as well as their interrelationship; the beginnings and functions of myth, its major themes in various cultures, its relationship to sacrifice and ritual, and its role in selected religions and cultures throughout the world. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts.) *The Staff, G. Lease*

80G. Sound, Modernity, and America. W

Introduces students to the role of sound within modernity, modern culture, and the nation. Uses an interdisciplinary approach to trace how sound is embedded in history, cultural practices, institutions, and technologies. Foregrounds the relationship between aurality, race, and modern culture. (General Education Code(s): T4-Humanities and Arts.) *G. Gallob*

80J. Social Movements in the U.S. *

Traces the history of social movements in the late 19th- and 20th-century U.S., including populism, labor, socialism, Communism, the New Left, civil rights, feminism. Looks at the relationship between cultures of protest and mainstream popular and political cultures. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *B. Epstein*

80L. Will the Real Jesus Please Stand Up?. W

Christianity claims but one Jesus at its foundation; the sources, however, reveal many Jesuses. Is there a "real" Jesus among the memories of the earliest Jesusites, or among the Jesus-types of Late Antiquity? Or only contradictory choices? (General Education Code(s): T4-Humanities and Arts.) *G. Lease*

80M. Imagining Popular Culture. *

Focuses on representations of race, class, and gender in contemporary popular culture images, particularly film and television. Attendance is required at both lectures and screenings. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

800. Hitler, National Socialism, and Religion. S

A critical evaluation of Hitler as a religious leader and his National Socialism as both a religious movement and an example of 20th-century political theology: a study of the relationship between religion and politics. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *G. Lease*

80Q. Science as Culture and Practice. *

Using tools from the analysis of social history, visual and material culture, narrative, and laboratory and field practices, introduces students to modern science, technology, and medicine studies. Examples come especially from 20th- and 21st-century life and human and information sciences. May be repeated for credit. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *D. Haraway*

80U. Modernity and Its Discontents. *

Offers an introduction to the idea of modernity from Kant to Freud, Niezsche to Fanon. (General Education Code(s): T4-Humanities and Arts.) *D. Marriott*

80X. Extreme Nature. W

Examines histories of extreme American landscapes, from Alaskan wilderness to nuclear test sites in Nevada. What constitutes wild landscapes? When did people begin to seek out harsh places, and with what motivations—adventure, refuge, sport, or spiritual quest? (General Education Code(s): T4-Humanities and Arts.) *L. Collins*

Upper-Division Courses

102. Philosophy and Poetics. F

Introduction to the relationship between philosophy and poetics in some major 19thand 20th-century poets and thinkers. Enrollment restricted to juniors and seniors. Enrollment limited to 30. *D. Marriott*

110. Political Ecologies of Scientific Practices. S

Discusses contemporary controversies in and about science and explores the entanglements of ethical and political concerns in the practice of science. A series of case studies (from environmental science and policies, biology, physics) introduces questions and methods of science studies. Enrollment restricted to juniors and seniors. Enrollment limited to 40. A. Schrader

111. States, War, Capitalism. W

Survey of seminal work on ancient origins of the state, diverse geo-political systems of war and diplomacy, and consequences of the formation of the world market on the evolution of geo-political systems up to and beyond the wars of today. Enrollment restricted to juniors and seniors. Enrollment limited to 35. *G. Balakrishnan*

115. Introductions to Transgender Studies. F

Introduces the breadth of topics and the seminal works that currently make up the interdisciplinary field called transgender studies. Explores how transgender studies attempt to reconfigure conceptions of (sexed) anatomy, sexuality, gender, body, embodiment, agency, identity, and subjectivity. Enrollment restricted to juniors and seniors. *T. Koths*

118. Jewish Social Movements. *

Jewish social movements of the late 19th and 20th centuries, in Europe (Eastern and Western) and the U.S.: the confrontation between Hasidism and Haskahah, tensions between socialism and Zionism, between religiosity and secularism, the mutual influences among these tendencies. (Also offered as History 185D. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *B. Epstein*

126. Film Fantasies. *

A focused study of cinema as a social technology for the production of public and private fantasies: how films contribute to shaping the image a culture has of itself and how film viewing may influence individual fantasies, values, and identities. Enrollment restricted to juniors and seniors. Enrollment limited to 80. *T. De Lauretis*

199. Tutorial. F,W,S

A program of individual study arranged between an undergraduate student and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

203. Approaches to History of Consciousness. F

An introduction to history of consciousness required of all incoming students. The seminar concentrates on theory, methods, and research techniques. Major interpretive approaches drawn from cultural and political analysis are discussed in their application to specific problems in the history of consciousness. Prerequisite(s): first-year standing in the program. See the department office for more information. *The Staff*

204A. Introduction to Cultural Studies. *

Classic texts from the British cultural studies tradition. Traces later developments in North America, Latin America, Australia, and elsewhere. Asks how class analysis has been complicated by work on race, ethnicity, gender, sexuality, and postcoloniality. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *J. Clifford*

204B. Introduction to Cultural Studies. *

Writing intensive course based on readings in course 204A. Prerequisite(s): course 204A. Enrollment restricted to graduate students. Enrollment limited to 20. *J. Clifford*

205A. Theories of Slavery. *

Explores philosophical, legal, and socio-historical analyses of slavery. Focus on Atlantic slavery and the production of race and gender formations, complemented by discussion on contemporary forms of slavery. Impact of historical slavery on prevailing discourses and institutions. (Also offered as Feminist Studies 225A. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

205B. Theories of Slavery. *

Writing-intensive course based on readings in History of Consciousness 205A and Feminist Studies 225A. (Also offered as Feminist Studies 225B. Students cannot receive credit for both courses.) Prerequisite(s): course 205A or Feminist Studies

207. Theory of the Text. *

An introduction to contemporary theories of textual interpretation: anthropological, linguistic, historical, literary, semiotic, and philosophical. Consideration of different kinds of texts and ways of reading them: from dream reports, folktales, and myths, through musical scores, monuments, rituals, games, and codes, to poems, novels, and political tracts. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *T. De Lauretis*

208A. Radical Critiques of Penality. *

Examines recent theories of imprisonment, focusing on the philosophical and criminological literature associated with scholarly and activist movements arguing for prison abolition. In considering the disarticulation of crime and punishment, race, class, and gender serve as principal analytical categories. Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

208B. Radical Critiques of Penality. *

Writing intensive course based on readings in course 208A. Prerequisite(s): course 208A. Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

209A. Women of Color: Feminist Theories and Practices. *

Examination of feminist consciousness in the indigenous and diasporic cultural histories of women of color. Analysis of "feminist moments" in these histories and their epistemological implications for the construction of feminist theories that take into account intersections of gender, ethnicity, class, and sexual orientation. Discussion of possible paradigmatic shifts in feminist theory. Enrollment restricted to graduate students. Enrollment limited to 15. A. Davis

209B. Women of Color: Feminist Theories and Practices. *

Writing intensive course based on readings in course 209A. Prerequisite(s): course 209A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

210A. Cultural and Historical Studies of Race and Ethnicity. F

Explores the historical construction of racial and ethnic categories in the Americas, especially the U.S., in interaction with gender, sexuality, class, and nationality. Intended to introduce current work by UCSC faculty and Bay Area scholars and to stimulate graduate student research projects, the course is organized by intensive reading around key questions, followed by presentations by invited scholars. Emphasizes research resources and methodologies. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

210B. Cultural and Historical Studies of Race and Ethnicity. W

Writing intensive course based on readings in course 210A. Prerequisite(s): course 210A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

211A. French Hegel. W

Introduces the "return to Hegel" in the work of some major 20th-century French thinkers. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

212. Feminist Theory and the Law. *

Interrogation of the relationship between law and its instantiating gendered categories, supported by feminist, queer, Marxist, critical race, and postcolonial

theories. Topics include hypostasization of legal categories, the contest between domestic and international human rights frameworks, overlapping civil and communal codes, cultural explanations in the law, the law as text and archive, testimony and legal subjectivity. (Also offered as Feminist Studies 212. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

213A. Representation. *

An introduction to contemporary theories including semiotics, psychoanalysis, poststructuralism, and the feminist critique of representation. Emphasis on questions of difference and the construction of the subject in culture. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *T. De Lauretis*

213B. Representation. *

Writing intensive course based on readings in course 213A. Prerequisite(s): course 213A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *T. De Lauretis*

214A. Studies in History, Religion, and Myth. *

Selected events, figures, and ideas from histories of religions: their sources, production, and functions. Emphasis on 19th- and 20th-century theories of religion, the problems of origin and institution, and the relationship between particular histories and their mythologies. Enrollment restricted to graduate standing. Enrollment limited to 15. May be repeated for credit. *G. Lease*

214B. Studies in History, Religion, and Myth. *

Writing intensive course based on readings in course 214A. Prerequisite(s): course 214A. Enrollment restricted to graduate standing. Enrollment limited to 15. May be repeated for credit. *G. Lease*

215A. Critical Theory in the Marxist Tradition. *

An introduction to classic texts of the Frankfurt School, focusing on works by Adorno, Horkheimer, Benjamin, and Marcuse. Explores their uses and critiques of Marxism, emphasizing questions of the relation between philosophy and history, theory and praxis, aesthetics and politics, and identifying issues relevant to contemporary debates around race, class, and gender. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Davis*

215B. Critical Theory in the Marxist Tradition. *

Writing intensive course based on readings in course 215A. Prerequisite(s): course 215A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Davis*

217A. Seminar: Topics in Feminist Theory. *

Studies in the theory and history of feminist consciousness; analysis of the main areas of a specifically feminist interest; determination of the theoretical bases for a distinctively feminist perspective on the principal problems of the life and human sciences; examination of relations of class, race, and gender in feminist theory and practice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

217B. Seminar: Topics in Feminist Theory. *

Writing intensive course based on readings in course 217A. Prerequisite(s): course

217A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

218A. Postcolonial Theory. *

Study of selected topics in postcolonial theory, including decolonizing critiques of Western knowledges and epistemologies, nationalism, gender and sexuality, cultural representations of neo-colonialism and imperialism, subalternity, history and historical transformation, and global relations of dominations. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

218B. Postcolonial Theory. *

Writing intensive course based on readings in course 218A. Prerequisite(s): course 218A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

219A. Psychoanalysis and Cultural Criticism. W

Readings in Freudian psychoanalytic theory from Freud and his contemporaries to the present, with emphasis on concepts (such as the unconscious, sexuality, fantasy, narcissism) that have informed recent cultural criticism around questions of social identity, subjectivity, marginality, and power. Enrollment restricted to graduate students. Enrollment limited to 15. *T. De Lauretis*

219B. Psychoanalysis and Cultural Criticism. S

Writing intensive course based on readings in course 219A. Prerequisite(s): course 219A. Enrollment restricted to graduate students. Enrollment limited to 15. *T. De Lauretis*

220A. Globalization and Cultural Process. *

Discusses theories of globalization and its cultural effects. How are cultural forms destroyed, imposed, appropriated, hybridized, translated, invented, and reinvented at local, national, regional, and transnational levels? Historical and ethnographic focus on tourist encounters, museums, nativisms, film/media performances, etc. Enrollment restricted to graduate students Enrollment limited to 20. May be repeated for credit. *J. Clifford*

220B. Globalization and Cultural Process. *

Writing intensive course based on readings in course 220A. Prerequisite(s): course 220A. Enrollment limited to 20. May be repeated for credit. *J. Clifford*

222A. Theories of Late Capitalism, Nationalism, and the Politics of Identity. F

Looks at the theoretical literature on what is variously called late capitalism/postindustrialism/postfordism, and in that context considers the rise of nationalism and identity politics in the latter part of the 20th century. The primary focus is on the U.S. and Western Europe, but questions of the globalization of capital and the transformation of relations between "the West" and "the Third World" are also considered. Written work for the course consists of weekly short papers. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Epstein*

222B. Theories of Late Capitalism, Nationalism, and the Politics of Identity. *

Writing intensive course based on readings in course 222A. Prerequisite(s): course 222A. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Epstein*

223. Recent European Philosophy. *

Seminar on recent developments in European philosophy, with particular attention to

German theorists such as Nietzsche, Heidegger, Gadamer, Horkheimer, Adorno, or Habermas. Theorists such as Sartre, Merleau-Ponty, Derrida, Foucault, Bourdieu, Levinas, Laclau, or Vattimo may be read as well. (Also offered as Philosophy 223. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. May be repeated for credit. *D. Hoy*

224. History of Consciousness. *

Examination of contemporary theories of consciousness in both analytic and continental traditions. Among those who deflate modern philosophy's preoccupation with consciousness are not only Dennett, Davidson, and Rorty, but also Heidegger, Foucault, and Derrida. Among those who argue for irreducibility of subjectivity are not only Searle, Nagel, and Chalmers, but also Sartre, Merleau-Ponty, and Levinas. Discussion of parallel readings from both philosophical perspectives. (Also offered as Philosophy 256. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 25. *D. Hoy*

225. The Politics of Affect. *

Point of departure is the question of the political, posed with respect to psychoanalysis. The underlying question is what the political does to psychoanalysis, but also what the unconscious does to the political. Enrollment restricted to graduate students. Enrollment limited to 15. D. Marriott

228. Fundamental Problems of Metapolitics. *

Focuses on seminal works of political thought: the first half devoted to ancient and modern classics; the second considering several major contemporary reflections. Aims to reconstruct and assess the claims regarding epistemic conditions and criteria of metapolitical judgment. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

229A. Aesthetics and Politics. *

Studies the connections between questions of aesthetics and politics, including questions of beauty, genre, pleasure, narrative form, structures of feeling and style, in literature, film and music, as these relate to the politics of class, race, gender, sexuality, and decolonization. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

232A. Third World Feminisms and Globalization. *

Studies third world feminist theories and struggles and their relations to globalization; topics include nationalism, development, transnational practices, identity politics, human rights, especially the ways in which Third World feminisms respond and contribute to political, economic, social, and cultural transformations. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

233A. Theories of Modernity and Postmodernity. *

Study of social and cultural theories of modernity and postmodernity; analysis of various conceptualizations of the modern and the postmodern and their relation to production, history, aesthetics, cultural identity, social struggle; texts from a variety of disciplines (literature, sociology, philosophy). Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

233B. Theories of Modernity and Postmodernity. *

Writing intensive course based on readings in course 233A. Prerequisite(s): course 233A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

234A. Social Movements in the 20th-Century U.S. *

The history of major social movements in the 20th-century U.S., including populism, labor, socialism and communism, civil rights, the women's movement, the antinuclear movement. Various theoretical perspectives on the rise and fall of social movements. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. May be repeated for credit. *B. Epstein*

234B. Social Movements in the 20th-Century U.S. W

Writing intensive course based on readings in course 234A. Prerequisite(s): course 234A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *B. Epstein*

235A. Theory of Religion. S

The difficulty of defining religion (universal essence vs. local/individual experience), of specifying its categorical boundaries, and of generating a theory based on more traditional disciplines (anthropomorphism, societal, psychic, transcendent, cognitive/ritual, historical/cultural/political). Enrollment restricted to graduate students. Enrollment limited to 15. *G. Lease*

235B. Theory of Religion. *

Writing intensive course based on readings in course 235A. Prerequisite(s): course 235A. Enrollment restricted to graduate students. Enrollment limited to 15. G. Lease

237A. Historical Materialism. F

Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are addressed. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

239A. The Dialectical Legacy. *

From Adorno to Zizek rediscoveries of Hegel have provided the impetus for some of the most innovative currents of 20th-century Marxism. Examines the philosophical and historical problems that Marx inherited from Hegel through close readings of their major works. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

239B. The Dialectical Legacy. *

From Adorno to Zizek rediscoveries of Hegel have provided the impetus for some of the most innovative currents of 20th-century Marxism. Examines the philosophical and historical problems that Marx inherited from Hegel through close readings of their major works. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

240. Basic Principles of University-Level Pedagogy (1 credit). F

Provides training for graduate students in university-level pedagogy in general. Under the supervision of the department chair, coordinated by a graduate student with substantial experience as a teaching assistant. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

242A. Violence and Phenomenology: Fanon/Hegel/Sartre. *

Study of the work and influence of Frantz Fanon from a range of viewpoints: existential, phenomenological, psychoanalytic, and political; a variety of genres: film, literature, case history, and critique; and a set of institutional histories: clinical,

cultural, and intellectual. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

242B. Violence and Phenomenology: Fanon/Hegel/Sartre. *

Writing intensive course based on readings in course 242A. Prerequisite: course 242A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

243A. Nationalism, Anti-Semitism, and Jewish Resistance in World War II. *

Jewish resistance to Nazism during World War II, in Eastern Europe, and its historical context. Includes the pre-war rise in nationalism and anti-Semitism in Poland and Lithuania, Jewish integration in the Soviet Union, and the consequences for wartime resistance. (Also offered as History 256. Students cannot receive credit for both courses.) Enrollment restricted to seniors and graduate students. Enrollment limited to 15. *B. Epstein*

247. Performance/Performativities. *

Performance acts and theories of performativity in visual culture from modernity to present. Major theoretical positions subtending the emergence of performances/performativities: subjectivity, identity, temporality, media, ritual, the event, the body and embodiment, collaboration, and politics. (Also offered as Digital Arts and New Media 247. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Qualified seniors accepted with permission of instructor. Enrollment limited to 15. *C. Soussloff*

250A. Foundations in Science Studies. *

Critical inquiry into topics in the history, sociology, anthropology, and philosophy of science and technology. Organized around the position that science is its practice, the seminar explores practices of representation, science studies and cultural studies, local/global tensions and networks, and the science question in feminism and antiracism. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

250B. Foundations in Science Studies. *

Writing intensive course based on readings in course 250A. Prerequisite(s): course 250A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

251A. Readings in Science Studies. W

Focus is on recent literature in social, cultural, and historical studies of science, medicine, and technology. This seminar familiarizes students with current scholarly debates, research networks, national traditions, international exchanges, conference proceedings, interdisciplinary projects, and publication sites. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Haraway*

251B. Readings in Science Studies. S

Second quarter of two-quarter course. Writing-intensive course based on the readings studied in course 251A. Prerequisite: course 251A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

252. Poststructuralism. S

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits. (Also offered as Philosophy 252.

Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

253A. Topics in Cultural Analysis. *

Advanced graduate seminar in which students do research on focused topics. Each quarter centered on single thematic area. Students read works of culture-theory and exemplary studies illustrating methodologies, problems, and current controversies. Prerequisite(s): minimum of second-year status in the history of consciousness program; instructor evaluates student's ability to participate. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Clifford*

256A. Theories of the Visual. *

Study of psychoanalytic theories of the visual including the emergence of psychoanalysis and cinema as parallel discourses and the mobilization of key psychoanalytic concepts—scopophilia, voyeurism, fetishism—in Freudian and Lacanian understandings of the gaze so central to film and photographic theory. Enrollment restricted to graduate students. *D. Marriott*

256B. Theories of the Visual. *

Writing intensive course based on readings in course 256A. Prerequisite: course 256A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

259A. Kant, Lacan, and the Ethics of Psychoanalysis. F

Offers an introduction to Jacques Lacan's "Return to Kant" and the response it provokes as a reading of sadism, politics, and ethics. Specific point of entry adopted for course is Lacan's seminar on "The Ethics of Psychoanalysis." Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

259B. Kant, Lacan, and the Ethics of Psychoanalysis. W

Writing-intensive course based on readings in course 259A. Prerequisite(s): course 259A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

260A. Film and the Visible. *

Study of selected topics in film theory, including the construction of vision and spectatorship; the relations of look, image, and narrative; the formative effects of classic, experimental, and independent cinema in contemporary visual culture; the feminist critique of representation; the role of cinema in the production of public and private fantasies, cultural memory, and identity. Enrollment restricted to graduate students. Enrollment limited to 15. *T. De Lauretis*

260B. Film and the Visible. *

Study of selected topics in film theory, including the construction of vision and spectatorship; the relations of look, image, and narrative; the formative effects of classic, experimental, and independent cinema in contemporary visual culture; the feminist critique of representation; the role of cinema in the production of public and private fantasies, cultural memory, and identity. Prerequisite(s): course 260A. Enrollment restricted to graduate students. Enrollment limited to 15. *T. De Lauretis*

260C. Film and the Visible. *

Writing intensive course based on readings in courses 260A and 260B. Prerequisite(s): course 260A or 260B. Enrollment restricted to graduate students. Enrollment limited to 15. *T. De Lauretis*

261. Modern Intellectural History. W

Survey of 19th- and 20th-century intellectual history that focuses on a cross-section of major works from Hegel to Levi-Strauss. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

264. The Idea of Africa. S

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy. (Also offered as Feminist Studies 264. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

291. Advising (2 credits). F,W,S

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess and monitor academic progress, and to evaluate course work as necessary. May be used to develop general bibliography of background reading and trajectory of study in preparation for the qualifying examination. May be repeated for credit. *The Staff*

292. Practicum in Composition.

A practicum in the genres of scholarly writing, for graduate students working on the *composition* of their qualifying essay or doctoral dissertation. Enrollment restricted to graduate students. Enrollment limited to 15. D. Haraway, J. Clifford, T. De Lauretis

293. Field Study. F,W,S

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return. May be repeated for credit. *The Staff*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

A seminar study group for graduate students focusing each quarter on various problems in the history of consciousness. A statement and evaluation of the work done in the course will be provided each quarter by the students who have participated in the course for that quarter, and reviewed by the responsible faculty. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. *The Staff*

298. Doctoral Colloquium. *

Under the supervision of a History of Consciousness faculty member, students

finishing their dissertation meet weekly or bi-weekly to read and discuss selected draft chapters, design difficulties and composition problems. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Prerequisite(s): advancement to candidacy. May be repeated for credit. The Staff

* Not offered in 2007-08

Historical Studies

(There were no substantive changes to the Historical Studies Program Description from the General Catalog 2006-08.)

Program Description

Historical studies is not a separate interdisciplinary undergraduate program of study at UCSC, but two departments offer undergraduate majors based upon historical methods, including the interdisciplinary study of the past: the Department of History and the Department of History of Art and Visual Culture. One department, History of Consciousness, offers a highly respected interdisciplinary graduate program. In addition, UCSC offers an extensive array of major pathways and courses based on historical methods. Students can pursue historically oriented concentrations within majors in American studies, anthropology, economics, literature, philosophy, politics, sociology, and feminist studies.

UCSC offers several discipline-based and interdisciplinary majors and minors within the humanities, and many majors in the social sciences and the arts integrate humanistic methods into the curriculum. Many majors in the humanities offer concentrations or pathways that allow students to pursue an individualized course of study. Finally, students have the option of pursuing an individual major within the rubric of humanities.

Programs of studies of the humanities leading to undergraduate majors or minors include: American studies, classical studies, East Asian Studies, German studies, history, Italian studies, Jewish studies, language studies, linguistics, literature, philosophy, Southeast Asian studies, and feminist studies. There are five graduate programs in the humanities: history, history of consciousness, linguistics, literature, and philosophy. Curricular offerings in several languages and instruction in writing complement and support both the graduate and undergraduate programs of

Information Systems Management

Baskin School of Engineering 335 Baskin Engineering Building (831) 459-2158

http://www.soe.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Information systems management (ISM) is a multi-disciplinary major that focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Today, it is widely accepted that managing information resources to optimize enterprise performance is as important as managing resources such as labor, capital, and raw materials. ISM supports the management of the processes of collection, manipulation, storage, distribution, and utilization of an organization's information resources as well as the use of these processes in the management of technology.

To develop information systems that address the needs of the organization—in areas such as engineering, manufacturing, finance, accounting, and marketing—ISM professionals must possess a solid mix of business and technical knowledge. They must be well versed in organizational structures, operations (including processes and the flows of data between processes), and the financial implications related to these factors. In addition, they must also be well versed in topics such as systems development tools and techniques, information architecture, networks, databases, telecommunications, and systems integration.

The essence of the ISM major at UCSC is the integration of the fundamental intellectual content of the computer science, engineering, and business management economics majors. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology. To accomplish these objectives, students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology (IT) solutions will be applied through economics, business, and management of technology courses.

To graduate with a B.S. in information systems management, students normally complete 19 required courses (with one laboratory, totaling 98 quarter credits) plus four elective courses (20 quarter credits) for the information systems management major program. Students may choose, through a set of electives, to focus in one of the three areas of information systems management: information systems management (ISM), management of technology (MOT), or a combination of both. To plan for completion of these course requirements within the normative time, students should consult with an adviser as early as possible. Honors students are likely to find the rigorous management and leadership elements of the new program of significant interest. Industrial interactions and projects are key features of this major.

Information Systems Management Policies

Admissions Policy

Admission to majors in the School of Engineering is selective. First-year applicants may receive direct admission at the time they apply to UCSC based on their high school record and test scores. Admission to the major after a student has entered UCSC is based on performance in all School of Engineering and Physical and Biological Sciences courses attempted at UCSC. Please refer to the School of Engineering section of the catalog for the full admissions policy. UCSC students that have completed 3 or more quarters at UCSC must complete the foundation courses before they can declare an Information Systems Management major. Please refer to the School of Engineering section of the catalog for the full admissions policy.

Foundation Courses: Computer Science 12A (or 13H); Computer Engineering 16 (or 16H); and

Mathematics 19A-B, or 20A-B or Economics 11A and 11B; Information Systems Management 50 (or Economics 1 and 2).

Disqualification and Satisfactory Progress in the Major

Please refer to the Engineering section of this catalog for the School of Engineering's major disqualification policy.

Letter Grade Policy

Information systems management requires letter grading for all courses applied toward the B.S. in information systems management, with the exception of two lower-division courses which students may elect to take Pass/No Pass (not to include course 50 or 58). This policy includes courses required for the information systems management major but sponsored by other departments.

Transfer Students

Articulation agreements with other California institutions are in place for some courses required for the ISM major; it is important for students to inquire whether specific courses meet the requirements of this major. Articulation information is available on ASSIST at www.assist.org. Courses taken at other institutions which emphasize applications of programming languages often do not count toward the ISM major at UCSC. Please refer to the School of Engineering section of the catalog for the policy regarding transfer students.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs. These policies include admission to the major, limits on the number of times courses can be attempted, and the need for UCSC students to obtain preapproval before taking courses elsewhere.

Preparation for the Major

The information systems management major is intended for students with an interest in both computer technology and business. It is recommended that students intending to declare this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Completion of business-oriented computer literacy and basic programming courses is of benefit to students entering this major. Completion of any economics and/or business-related courses in high school is also beneficial, but the faculty realizes that these courses may not be available at many high schools. Completion of comparable college courses at other institutions serves to strengthen the preparation of a student for the information systems management major.

Information Systems Management Major Requirements

In addition to completing UCSC general education requirements, students must complete 19 required courses (with one laboratory, totaling 97 quarter credits) plus four elective courses (20 quarter credits) for the information systems management major program. To plan for completion of these course requirements within the normative time, students should consult with a School of Engineering adviser as early as possible. These 23 courses include the following:

Required Courses (19 courses plus one laboratory)

Mathematics (three 5-credit courses)

19A-B, Calculus for Science, Engineering, and Mathematics; or Applied Mathematics and Statistics 11A and 11B, or Economics 11A and 11B, Mathematical Methods for Economists; and Applied Mathematics and Statistics 27/L, Mathematical Methods for Engineers/Laboratory

Economics (five required 5-credit courses)

- 1, Introductory Microeconomics: Resource Allocation and Market Structure
- 2, Introductory Macroeconomics: Aggregate Economic Activity

10A, Economics of Accounting

100A, Intermediate Microeconomics; or

100M, Intermediate Microeconomics Math Intensive

113, Introduction to Econometrics; or

Applied Mathematics and Statistics 113, Managerial Statistics

Computer Engineering (three 5-credit courses and a 2-credit lab)

12/L, Computer Systems and Assembly Language/ Laboratory

16, Applied Discrete Mathematics; or 16H, Honors Applied Discrete Mathematics 150, Introduction to Computer Networks

Computer Science (five 5-credit courses)

- 12A, Introduction to Programming
- 12B, Introduction to Data Structures
- 101, Algorithms and Abstract Data Types
- 115, Software Methodology
- 180, Database Systems I

Information Systems Management (three of the following 5-credit courses)

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 105, Management of Technology I
- 125, Management of Technology II
- 158, Business Strategy and Information Systems

For students who wish to specialize in information systems management, the following courses are recommended:

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 158, Business Strategy and Information Systems

It is also recommended that these students take courses 105 and 125 as electives.

For students who wish to specialize in the management of technology, the following courses are recommended:

- 50, Business Information Systems
- 105, Management of Technology I
- 125, Management of Technology II

It is also recommended that these students take course 158 as an elective.

For students interested in both information systems management and the management of technology, the following courses are recommended:

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 105, Management of Technology I

It is also recommended that these students take courses 125 and 158 as electives.

Elective Courses (four courses)

(two 5-credit School of Engineering courses)

Students select two upper-division School of Engineering electives on the basis of their particular interests. These electives may be any 5-credit upper-division School of Engineering courses, with the following limitations:

- 1. either Computer Engineering 153 or Electrical Engineering 153, but not both;
- 2. either Applied Mathematics and Statistics 131 or Computer Engineering 107, but not both:
- 3. independent and field-study courses (193, 195, 198, 199) require prior approval and support from the department to be used as an elective.

(two 5-credit Economics courses from the following list)

- 100B, Intermediate Macroeconomics
- 101, Managerial Economics
- 104, Is There Truth in Numbers:? The Role of Statistics in Economics
- 115, Introduction to Management Sciences
- 130, Money and Banking
- 131, International Financial Markets
- 133, Security Markets and Financial Institutions
- 135, Corporate Finance
- 136/L, Business Strategy/Laboratory
- 138, The Economics and Management of Technology and Innovation
- 139A, The Economics of Electronic Commerce
- 139B, E-Commerce Strategy
- 161, Marketing
- 164, Economics and the Telecommunications Industry

Optional Elective

An individual field study, Economics 193, is recommended but not required.

Information Systems Management Major Planners

The following are three sample academic plans for students to complete during their first two years as preparation for the information systems management major. Plan One A and B are suggested guidelines for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major.

Plan One A			
Year	Fall	Winter	Spring
1st	Econ 1	Econ 2	Ism 50
(frsh)	Cmps 10	Math 19A	Math 19B
2nd (soph)	Cmps 12A Econ 10A Cmpe 16 or 16H	Cmps 12B Ism 58	Cmpe 12/L AMS 27/L
Plan One B			
Year	Fall	Winter	Spring
1st (frsh)	Econ 10A Cmps 10	Econ 1 Econ 11A	Econ 2 Econ 11B
2nd (soph)	Cmps 12A Ism 50	Ism 58 Cmpe 16 or 16H	Cmps 12B Econ 100A AMS 27/L
Plan Two			
Year	Fall	Winter	Spring
1st (frsh)	Math 3	Econ 1	Ism 50 Econ 2
2nd (soph)	Cmps 10 Math 19A or Econ 11A	Ism 58 Math 19B or Econ 11B	Cmps 12B AMS 27/L Econ 10A

Comprehensive Requirement

Students complete two project-intensive courses, either the combination of Computer Science 115 and Information Systems Management 158 or the combination of Computer Science 115 and Information Systems Management 105, which constitute the comprehensive requirement for the information systems management major, based on the dual aspects of the program. Computer Science 115 addresses the technical side of the major, course 158 deals with the business and economics content, and course 105 deals with the integration of technology and business.

Computer Science 115, *Software Methodology*, is designed to validate students' technical capabilities. Working in teams, students are required to apply the technical knowledge they have gained by designing, programming, and testing a complete software application.

Information Systems Management 158, *Business Strategy and Information Systems*, requires that students understand and use a structured methodology to evaluate the competitive use of information systems within an enterprise. This is accomplished by researching and writing a comprehensive analytical term paper using a methodology taught as part of this course.

Information Systems Management 105, *Management of Technology I*, requires that students understand and apply structured methodologies for the development, management, and commercialization of technologies and products. Students will work in teams on a comprehensive term project in the development, commercialization, and management of technologies such as computers, networks, semiconductors, mechatronics, and biotechnology.

Articulation agreements with other California institutions are in place for some courses required for the ISM major; it is important for students to inquire whether specific courses meet the requirements of this major. Articulation information is available on ASSIST at www.assist.org. Courses taken at other institutions which emphasize applications of programming languages often do not count toward the ISM major at UCSC. Please refer to the School of Engineering section of the catalog for the policy regarding transfer students.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs. These policies include admission to the major, limits on the number of times courses can be attempted, and

the need for UCSC students to obtain pre-approval before taking courses elsewhere.

Preparation for the Major

The information systems management major is intended for students with an interest in both computer technology and business. It is recommended that students intending to declare this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Completion of business-oriented computer literacy and basic programming courses is of benefit to students entering this major. Completion of any economics and/or business-related courses in high school is also beneficial, but the faculty realizes that these courses may not be available at many high schools. Completion of comparable college courses at other institutions serves to strengthen the preparation of a student for the information systems management major.

Information Systems Management Major Requirements

In addition to completing UCSC general education requirements, students must complete 19 required courses (with one laboratory, totaling 97 quarter credits) plus four elective courses (20 quarter credits) for the information systems management major program. To plan for completion of these course requirements within the normative time, students should consult with a School of Engineering adviser as early as possible. These 23 courses include the following:

Required Courses (19 courses plus one laboratory)

Mathematics (three 5-credit courses)

19A-B, Calculus for Science, Engineering, and Mathematics; or Economics 11A and 11B, Mathematical Methods for Economists; and 21, Linear Algebra

19A-B, Calculus for Science, Engineering, and Mathematics; or Applied Mathematics and Statistics 11A and 11B, or Economics 11A and 11B, Mathematical Methods for Economists; and Applied Mathematics and Statistics 27/L, Mathematical Methods for Engineers/Laboratory

Economics (five required 5-credit courses)

1, Introductory Microeconomics: Resource Allocation and Market Structure

2, Introductory Macroeconomics: Aggregate Economic Activity

10A, Economics of Accounting

100A, Intermediate Microeconomics; or

100M, Intermediate Microeconomics Math Intensive

113, Introduction to Econometrics; or

Applied Mathematics and Statistics 113, Managerial Statistics

Computer Engineering (three 5-credit courses and a 2-credit lab)

12/L, Computer Systems and Assembly Language/Laboratory 16, Applied Discrete Mathematics; or 16H, Honors Applied Discrete Mathematics

150, Introduction to Computer Networks

Computer Science (five 5-credit courses)

- 12A, Introduction to Programming
- 12B, Introduction to Data Structures
- 101, Algorithms and Abstract Data Types
- 115, Software Methodology
- 180, Database Systems I

Information Systems Management (three of the following 5-credit courses)

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 105, Management of Technology I
- 125, Management of Technology II
- 158, Business Strategy and Information Systems

For students who wish to specialize in information systems management, the following courses are recommended:

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 158, Business Strategy and Information Systems

It is also recommended that these students take courses 105 and 125 as electives.

For students who wish to specialize in the management of technology, the following courses are recommended:

- 50, Business Information Systems
- 105, Management of Technology I
- 125, Management of Technology II

It is also recommended that these students take course 158 as an elective.

For students interested in both information systems management and the management of technology, the following courses are recommended:

- 50, Business Information Systems
- 58, Systems Analysis and Design
- 105, Management of Technology I

It is also recommended that these students take courses 125 and 158 as electives.

Elective Courses (four courses)

(two 5-credit School of Engineering courses)

Students select two upper-division School of Engineering electives on the basis of their particular interests. These electives may be any 5-credit upper-division School of Engineering courses, with the following limitations:

- 1. either Computer Engineering 153 or Electrical Engineering 153, but not both:
- 2. either Applied Mathematics and Statistics 131 or Computer Engineering 107, but not both;
- 3. independent and field-study courses (193, 195, 198, 199) require prior approval and support from the department to be used as an elective.

(two 5-credit Economics courses from the following list)

100B, Intermediate Macroeconomics

101, Managerial Economics

104, Is There Truth in Numbers:? The Role of Statistics in Economics

115, Introduction to Management Sciences

130, Money and Banking

131, International Financial Markets

133, Security Markets and Financial Institutions

135, Corporate Finance

136/L, Business Strategy/Laboratory

138, The Economics and Management of Technology and Innovation

139A, The Economics of Electronic Commerce

139B, *E-Commerce Strategy*

161, *Marketing*

164, Economics and the Telecommunications Industry

Optional Elective

An individual field study, Economics 193, is recommended but not required.

Information Systems Management Major Planners

The following are three sample academic plans for students to complete during their first two years as preparation for the information systems management major. Plan One A and B are suggested guidelines for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major.

Plan One A						
Year	Fall	Winter	Spring			
1st	Econ 1	Econ 2	Ism 50			
(frsh)	Cmps 10	Math 19A	Math 19B			
2nd	Cmps 12A	Cmps 12B	Cmpe 12/L			
(soph)	Econ 10A	Ism 58	Math 21 AMS 27/L			
	Cmpe 16 or 16H					
Plan On	Plan One B					
Year	Fall	Winter	Spring			
1st	Econ 10A	Econ 1	Econ 2			
(frsh)	Cmps 10	Econ 11A	Econ 11B			
2nd	Cmps 12A	Ism 58	Cmps 12B			
(soph)	Ism 50	Cmpe 16 or 16H	Econ 100A			
			Math 21 AMS 27/L			
Plan Tw	0					
Year	Fall	Winter	Spring			
1st	Math 3	Econ 1	Ism 50			
(frsh)			Econ 2			
2nd	Cmps 10	Ism 58	Cmps 12B			
(soph)	Math 19A or	Math 19B or	Math 21 AMS 27/L			
	Econ 11A	Econ 11B	Econ 10A			

Comprehensive Requirement

Students complete two project-intensive courses, either the combination of Computer Science 115 and Information Systems Management 158 or the combination of Computer Science 115 and Information Systems Management 105, which constitute the comprehensive requirement for the information systems management major, based on the dual aspects of the program. Computer Science 115 addresses the technical side of the major, course 158 deals with the business and economics content, and course 105 deals with the integration of technology and business.

Computer Science 115, *Software Methodology*, is designed to validate students' technical capabilities. Working in teams, students are required to apply the technical knowledge they have gained by designing, programming, and testing a complete software application.

Information Systems Management 158, *Business Strategy and Information Systems*, requires that students understand and use a structured methodology to evaluate the competitive use of information systems within an enterprise. This is accomplished by researching and writing a comprehensive analytical term paper using a methodology taught as part of this course.

Information Systems Management 105, *Management of Technology I*, requires that students understand and apply structured methodologies for the development, management, and commercialization of technologies and products. Students will work in teams on a comprehensive term project in the development, commercialization, and management of technologies such as computers, networks, semiconductors, mechatronics, and biotechnology.

Programs : Graduation

Information Systems Management

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Ramakrishna Akella

Information technology and systems, management of technology, new product introduction and development, enterprise and knowledge management, supply chain management and e-business, financial engineering

Patrick Mantey

Image systems, image processing, visualization, image and multimedia systems, digital signal processing, real-time control, management and leadership

Assistant Professor

John Musacchio

Control, analysis, and pricing of communications networks; applications of game theory in networking; wireless ad-hoc networks; and management of technology

Kevin Ross

Service engineering and management; resource allocation; operations research; pricing; scheduling; queueing theory; networks

Yi Zhang

Information retrieval, knowledge management, natural language processing, machine learning

Lecturer

Subhas Desa

Product development, supply chain management, management of technology, system dynamics and control

Magdalini Eirinaki

Data mining, web personalization, probability theory, database systems

Linda Werner

Software engineering, testing, usability engineering, educational and social issues

Professor

Martin M. Chemers (Psychology)

Leadership, team and organizational effectiveness, cultural and personality characteristics of leaders, college student adjustment and performance

Yin-Wong Cheung (Economics)

Econometrics, applied econometrics, exchange rate dynamics, financial price behavior, aggregate output dynamics

Daniel Friedman (Economics)

Microeconomic theory, experimental economics, evolution and learning, behavioral economics, financial markets

Michael Isaacson (Electrical Engineering)

Nano- and microfabrication technology and applications to biomedical and diagnostic devices, nanocharacterization of materials with emphasis on the development of microscopy tools, novel modes of imaging, electron and light optics

Robert A. Levinson (Computer Science)

Artificial intelligence, machine learning, heuristic search, associative pattern retrieval, hierarchical reinforcement learning, semantic networks

Darrell Long (Computer Science)

Storage systems, distributed computing systems, operating systems, mobile computing, performance evaluation, fault tolerance, computer security, multimedia, and video-on-demand systems

Marc Mangel (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

Charles E. McDowell (Computer Science)

Programming languages, parallel computing, and computer science education

Alex Pang (Computer Science)

Uncertainty visualization, tensor visualization, scientific visualization, collaboration software, virtual reality interfaces

Ira Pohl (Computer Science)

Artificial intelligence, programming languages, heuristic methods, educational and social issues, combinatorial algorithms

Nirvikar Singh (Economics)

Industrial organization, political economy, economic development, technology and innovation, South Asian immigrants in the U.S.

Joel Yellin (Physical and Biological Sciences, Natural Sciences, Environmental Science) Classical and quantum lattice dynamics, nonlinear waves; classical and quantum information theory; engineering, economics, and policy issues related to the Internet

Associate Professor

Luca De Alfaro (Computer Engineering)

Formal methods, game theory, embedded systems, software engineering

James Whitehead, Jr. (Computer Science)

Software engineering, software configuration management, web, hypertext, collaborative authoring, hypertext versioning, Internet information systems

Assistant Professor

William B. Dunbar (Computer Engineering)

Theory and application of feedback control, air traffic control, nanopore sensors, dynamics and control of biomolecules

Ravi Narasimhan (Electrical Engineering)

Wireless communication; multi-user communication theory; information theory; bioinformatics

[Return to top.]

Information Systems Management

Baskin School of Engineering 335 Baskin Engineering Building (831) 459-2158 http://www.soe.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

50. Business Information Systems. F,S

Addresses the use of information systems (IS) within a business enterprise. Subjects include computer hardware and software concepts, system design and implementation, telecommunications, data management, transaction-based systems, management information systems, and the use of IS to compete. Intended for information system management and business management economics majors. *K. Ross, J. Musacchio*

58. Systems Analysis and Design. W

Students learn how information technology is used to deal with business requirements and/or solve business problems. Provides an understanding of structured computer systems analysis and design methodologies and techniques and their application to business information systems. Intended for information systems management and business management economics majors. Prerequisite(s): course 50. Enrollment limited to 40. *Y. Zhang*

80A. Development, Management, and Commercialization of Technology. *

Addresses technological, strategic, marketing, and financial methods and analytical tools for the management of technology in an integrated manner that enables the cost effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. Students who receive credit for either course 105 or 205 cannot also receive credit for this course. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *R. Akella*

80B. Technology Value Chain Networks. *

Provides an introduction to the design and management of the value chain networks for high-technology enterprises. The value chain includes procurement, manufacturing, logistics, inventory, and distribution and marketing of products and services. Students who receive credit for either course 125 or 225 cannot also receive credit for this course. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *R. Akella*

80C. Starting a New Technology Company. S

Focuses on the creation and management of technology start-ups and small companies, using case studies and team projects as the basis for learning and applying the course materials. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *R. Akella*

94. Group Tutorial. F,W,S

A means for a small group of students to study a particular topic in consultation with

a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

94F. Group Tutorial (2 credits). F,W,S

A means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

101. Management of Technology Seminar (2 credits). F,W,S

Uses weekly talks by leading industry practitioners and university researchers to provide in-depth exposure to the management of technology. Topics covered include product development, operations, strategy, finance, and marketing for technologies such as software and information systems. May be repeated for credit. *S. Desa*

105. Management of Technology I. F

An in-depth examination of technological, strategic, marketing, and financial methods and analytical tools for the management of technology to enable cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. Students who receive credit for this course cannot also receive credit for course 80A; students who receive credit for course 205 cannot also receive credit for this course. Prerequisite(s): Mathematics 19B or 11B or Engineering 11B or Economics 11B. *S. Desa*

125. Management of Technology II. W

High-technology enterprises must understand and operate effectively within their technology-business value chains in order to maximize profitability. This course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. Students who receive credit for this course cannot also receive credit for course 80B; students who receive credit for course 225 cannot also receive credit for this course. Prerequisite(s): course 105. *R. Akella, S. Desa*

158. Business Strategy and Information Systems. S

Analysis of effective use of information systems within a business enterprise, with emphasis on gaining a competitive advantage. Integration of information systems with business strategy, financial justification, personnel, and organizational considerations are highlighted. Intended for information system management majors or senior engineering majors who have a business interest. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50 or permission of instructor. (General Education Code(s): W.) *K. Ross*

193. Field Study. F,W,S

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Information Systems Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and

oral presentation. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Information Systems Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and oral presentation. Cannot normally be repeated for credit. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195. Senior Thesis Research. F,W,S

Intended for majors. Students submit petition to sponsoring agency. The Staff

195F. Senior Thesis Research (2 credits). F,W,S

Intended for majors. Students submit petition to sponsoring agency. The Staff

198. Individual Study or Research. F,W,S

Intended for majors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Individual Study or Research (2 credits). F,W,S

Intended for majors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Individual Study or Research. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to senior information systems management majors. May be repeated for credit. *The Staff*

Graduate Courses

205. Management of Technology I. F

Addresses technological, strategic, marketing, financial methods, and analytical tools for management of technology in an integrated manner that enables the cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. Students cannot receive credit for this course and either course 80A or 105. Enrollment restricted to juniors, seniors, and graduate students. *R. Akella, S. Desa*

206. Optimization Theory and Applications.

A first graduate course in optimization with an emphasis on problems arising in management and engineering applications. Objectives are to become experts in problem formulation, comfortable with software for solving these problems, and familiar with analytical methods behind these solver technologies. Prerequisite(s): calculus and linear algebra. Enrollment restricted to graduate students. *K. Ross*

207. Random Process Models in Engineering. W

A first graduate course in stochastic process modeling and analysis with an emphasis on applications in technology management, information systems design, and engineering. Enrollment restricted to graduate students. Prerequisite: Computer Engineering 107 or other undergraduate probability course recommended. *J. Musacchio*

209. Knowledge Services and Data Analytics. F

Provides students with the systematic methodology and analytical tools to address the field of knowledge services in an integrated manner. Focuses on data, text, and business analytics. Includes training in the basic elements of stochastic optimization and other algorithmic approaches, such as stochastic dynamic programming, statistics, and machine learning. These methods enable corporate enterprises to acheive rapid, effective, and profitable optimization of knowledge-services management. Students are expected to have undergraduate preparation in probability and statistics. Undergraduates may enroll with instructor approval. Enrollment restricted to graduate students. Students are expected to have undergraduate preparation in probability and statistics. Undergraduates may enroll with instructor approval. *R. Akella*

211. E-Business Technology and Strategy. S

Surveys structure of modern information technology, the relation of that structure to structure of the industry that creates it, and the economic forces that drive the players in the industry. Building on these technological and economic concepts, studies how firms can craft a technology and business strategy to create and capture value in the information technology product and/or services sectors. Enrollment restricted to graduate students. *J. Musacchio*

225. Management of Technology II. *

High technology enterprises must understand and operate effectively within their technology-business value chains in order to maximize profitability. Course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. Students cannot receive credit for this course and either course 80B or 125. Prerequisite(s): course 205 or consent of instructor. Enrollment restricted to juniors, seniors, and graduate students. *R. Akella, S. Desa*

245. Data Mining. W

Covers the principles, algorithms, and applications of data mining, including mining sequential data, structured data, stream data, text data, spatiotemporal data, biomedical data, and other forms of complex data. Enrollment restricted to graduate students. *Y. Zhang, R. Akella*

250. Stochastic Optimization in Information Systems and Technology. W

First in a sequence of courses in information systems and technology management (ISTM). Provides systematic methodology and corresponding set of methods and analytical tools to address the field of ISTM in an integrated manner; provides required training in stochastic optimization and other algorithmic approaches, such as dynamic programming, to achieve business intelligence in corporate enterprises. Students should have solid background in the following: probability equivalent to statistics, stochastic methods, calculus, linear algebra, mathematical maturity,

stochastic processes, and optimization. Enrollment restricted to graduate students; undergraduates may enroll if they have completed Computer Engineering 107 or Applied Math 131 or have permission of instructor. Applied Math 203 and 205 and Computer Engineering 230 are recommended. *R. Akella*

251. Information Systems and Technology Management 2. S

Provides a systematic methodology and corresponding set of methods and analytical tools in stochastic and neuro-dynamic programming used for business intelligence in corporate enterprises and A1 and Maching learning research and applications in computer science, computer engineering, and electrical engineering and related to applied mathematics and statistics, business, management, and economics. Students should have solid background in probability equivalent to statistics, stochastic methods, calculus, mathematical maturity, stochastic processes and optimization, business intelligence and algorithms. Prerequisite(s): Computer Engineering 107 or Applied Mathmatics and Statistics 131 or permission of instructor. Enrollment restricted to graduate students. Applied Mathematics and Statistics 203, 205, 230, and course 250 recommended. *R. Akella*

260. Information Retrieval. S

Course covers major topics of information retrieval, including statistical characteristics of text, several important retrieval models, text clustering, text classification, text filtering, web analysis, information extraction, peer to peer research, distributed search, personalized search, and other related topics. Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. *Y. Zhang*

270. Service Engineering and Management. W

Introduction to service engineering and management, from the role of services in the global economy to analytical models in service operations management. This field is developing rapidly; the material covers the fundamental principles of services as well as recent research. Topics include designing efficient service networks, forecasting, resource allocation, and globalization. Enrollment restricted to graduate students. *K. Ross*

280A. Graduate Research Seminar (2 credits). *

Weekly seminar series in topics of current research in information systems and technology management. Enrollment by permission of instructor. Enrollment limited to 30. May be repeated for credit. *The Staff*

280I. Seminar on Information Retrieval and Knowledge Management (2 credits). F

Seminar series discussing advanced topics in information retrieval and knowledge management. Current research and literature are presented during each meeting. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *Y. Zhang*

280S. Seminar Topics (2 credits). W

Weekly seminar series of current research on a special topic in information systems and technology management. The theme of research presented throughout the course selected by the instructor. Topics may include, but are not limited to, knowledge planning, new product development and management of technology. Enrollment with permission of instructor. Enrollment limited to 30. May be repeated for credit. *P. Mantey*

297. Independent Study. F,W,S

Independent study under faculty supervision. Although course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Italian

Language Program 239 Cowell College (831) 459-2054

http://language.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, a major in literature with an emphasis in Italian literature a major in global economics, or a major in Italian studies.

The sequence of lower-division courses 1-6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Courses 1A and 1B offer lower-division intensive Italian language instruction equivalent to levels 1, 2, 3. The 1, 2, 3 sequence starts once a year in the fall quarter, while the 1A-1B sequence starts once a year in the winter quarter. Classes are taught in Italian from the beginning level.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The Office of International Education sponsors programs of study in Italy. For a list of current programs and requirements, visit their web site, http://oie.ucsc.edu.

Program Description | Faculty | Course Descriptions

Program Description

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in <u>language studies</u>, a major in <u>literature</u> with an <u>emphasis in Italian literature</u> a major in <u>global economics</u>, or a major in <u>Italian studies</u>.

The sequence of lower-division courses 1–6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Another sequence of lower-division courses, equivalent to levels 1, 2, and 3, is courses 1A and 1B, offering intensive Italian language instruction. Classes are taught in Italian from the beginning level. Courses 1A and 1B offer lower-division intensive Italian language instruction equivalent to levels 1, 2, 3. The 1, 2, 3 sequence starts once a year in the fall quarter, while the 1A-1B sequence starts once a year in the winter quarter. Classes are taught in Italian from the beginning level.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under <u>Language Program</u>.

Study Abroad

The UC Education Abroad Program (EAP) sponsors programs of study for one year in Bologna, Padua, and Trento and semester programs in Milano and Venice. Students applying to the year-long study centers in Italy must have completed through Italian 6 before the period of study begins. Generally, students apply in their sophomore year for a junior year abroad. As an exception, some students apply in their junior year for a senior year abroad; such students must sometimes spend an additional quarter at UCSC in order to satisfy all requirements for the major. Students may also spend a quarter or a semester in Siena, Italy. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

The Office of International Education sponsors programs of study in Italy. For a list of current programs and requirements, visit their web site, http://oie.ucsc.edu.

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Instruction in the Italian Language. F

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Elementary sequence (1-2-3) begins in fall quarter. *The Staff*

1A. Intensive Elementary Italian. W

Intensive instruction in elementary Italian language emphasizing oral fluency. Taken in conjunction with Italian 1B, the two courses are equivalent to levels 1-2-3. Accelerated pace allows a rapid mastery of grammar and syntax, giving the student a basic knowledge of Italian in only two quarters. *The Staff*

1B. Intensive Elementary Italian. S

Sequential to course 1A, completes the equivalent instruction offered through Italian 1-2-3. May not be taken by students who have completed Italian 1 or Italian 3. Open to students who have successfully completed either 1A or Italian 2; for students completing course 2, course 3 is preferable. *The Staff*

2. Instruction in the Italian Language. W

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 1; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the Italian Language. S

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 2; or placement by examination. *The Staff*

4. Intermediate Italian. F

Short stories, articles, films, and newsclips are used as the basis for studying intermediate-level conversation and composition. Laboratory assignments involve use of the World Wide Web, conversations with native speakers, films and video clips. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination. Prerequisite(s): course 1B or 3, or placement by examination. Enrollment limited to 25. (General Education Code(s): IH.) *The Staff*

5. Intermediate Italian. W

Reading of Italian short stories and a play are used as basis for further study and refinement of oral and written skills at the intermediate level. Particular emphasis is placed on oral/written discussion of abstract ideas and topics, and on the study of different language registers/contexts. Laboratory work is regularly assigned. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting and take the placement exam. Prerequisite(s): course 4 or placement by examination. Enrollment limited to 25. (General Education Code(s): IH.) *The Staff*

6. Intermediate-Advanced Italian. S

Reading of first novel in the language and weekly viewing of Italian films serve as basis for oral reports and discussions on various aspects of Italian culture and civilization. Weekly assignments, three essays, and a paper on topics derived from or related to the text. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination. Prerequisite(s): course 5 or placement by examination. Enrollment limited to 25. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

106. Italian Culture Through Film. W

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. While analyzing films by and about Italians, we develop an informed opinion on relevant issues in Italian studies. The course is taught in English with an enhancement section in Italian. The enhancement section meets once a week and is designed to give students who are already familiar with the language the opportunity to discuss the films in Italian and to read/view additional material in the language. Students cannot receive credit for this course and Languages 80D. Prerequisite(s): course 4. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Italian Studies

Department of Literature 303 Humanities 1 (831) 459-4778

Changes to 2006-08 Catalog Highlighted | Faculty

Program Description

Students interested in an interdisciplinary approach to Italian culture through the combined study of literature, history, politics, art history, music, and film may pursue a major or minor in Italian studies. The guidelines for the completion of the major may be obtained from Professor Deanna Shemek or Professor Margaret Brose. There are numerous opportunities for study in Italy through the UC Education Abroad Program (EAP), either for a year (Bologna, Milan, Padua) or for an intensive semester (Padua, Rome, Siena). The Italian studies program is administered by the Literature Department.

Major Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). In addition, students are required to take 10 courses (one course may be lower division), including a core unit of five courses to be taken at UCSC: three Italian literature courses, one course in Italian history, and one course in Italian art history. A course on Dante is required. A minimum of five courses must be taught principally in Italian or through Italian language texts read in the original. Five courses may be approved elective courses. One course may focus on Italy in a European or global context. One Italian literature course may be replaced by an Italian culture course. Up to five elective courses may be approved from UC EAP's yearlong study abroad in Italy. All students must complete a senior seminar course focused on Italian literature, history, or art history.

Minor Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). Students must also complete five upper-division courses in Italian studies: three Italian literature courses, one course in Italian history, and one course in Italian art history. A course on Dante is required. One Italian literature course may be replaced by an Italian culture course. Three of the five upper-division courses must be completed at UCSC; three must be taught principally in Italian. A maximum of two courses may be transferred from EAP.

Program Description | Faculty

Program Description

Students interested in an interdisciplinary approach to Italian culture through the combined study of literature, history, politics, art history, music, and film may pursue a major or minor in Italian studies. The guidelines for the completion of the major may be obtained from a member of the core program faculty Professor Deanna Shemek or Professor Margaret Brose. There are numerous opportunities for study in Italy through the UC Education Abroad Program (EAP), either for a year (Bologna, Milan, Padua , Trento) or for an intensive quarter or semester in (Padua, Rome, Siena). The Italian studies program is administered by the Literature Department.

Major Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). In addition, students are required to take a total of 10 courses (one course may be lower division), including a core unit of five courses to be taken at UCSC only: three Italian literature courses, one course in Italian history, and one course in Italian art history. Five courses may be approved elective courses. One A course on Dante is required. Up to two of the 10 required courses may be lower-division; up to two may focus on Italy in a European or global context. A minimum of five courses must be taught principally in Italian or through Italian language texts read in the original. Up to five courses may be approved as elective credit from U.C. EAP's year-long study abroad in Italy. Five courses may be approved elective courses. One course may focus on Italy in a European or global context. One Italian literature course may be replaced by an Italian culture course. Up to five elective courses may be approved from UC EAP's yearlong study abroad in Italy. All students must complete a senior seminar course focused on Italian literature, history, or art history.

Minor Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). Students must also complete an additional five course core units of three Italian literature courses. upper-division courses in Italian studies: three Italian literature courses, one course in Italian history, and one course in Italian art history. A course on Dante is required for the minor. One Italian literature course may be replaced by an Italian culture course. Three of the five upper-division core courses must be completed at UCSC; three must be taught principally in Italian. A maximum of two courses may be transferred from EAP.

Japanese

Language Program 239 Cowell College (831) 459-2054

http://language.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the Japanese Program Description from the General Catalog 2006-08.)

Program Description

Students interested in acquiring proficiency in Japanese can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, an East Asian studies minor, or a major in global economics.

The sequence of lower-division courses 1–6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Instruction takes place mostly in Japanese from the second half of the first quarter.

Campus Language Laboratories and Placement Exams

Information about these topics can be found at Language Program .

Study Abroad

The UC Education Abroad Program (EAP) has information on study in Japan. There are EAP centers in Yokohama, Tsuru, Kyoto, Tokyo, Sendai, Tsukuba, and Tohoku. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Language Program
239 Cowell College
(831) 459-2054
http://language.ucsc.edu

Program Description | Faculty

Lower-Division Courses

1. Instruction in the Japanese Language. F

Goal is to understand and apply basic rules of grammar and the sociolinguistic rules of the language needed to carry out various, simple tasks; to learn to read and write hiragana, katakana, and 40 kanji. *The Staff*

2. Instruction in the Japanese Language. W

Goal is to understand and apply additional rules of grammar and the sociolinguistic rules of the language needed to carry out various tasks; to develop skills in reading and writing, learn to read and write 70 additional kanji. Prerequisite(s): course 1; or placement by examination. *The Staff*

3. Instruction in the Japanese Language. S

Goal is to understand and apply additional rules of grammar and the sociolinguistic rules of the language needed to carry out various tasks; to further develop skills in reading and writing; to learn to read and write 70 additional kanji. Prerequisite(s): course 2; or placement by examination. *The Staff*

4. Intermediate Japanese. F

Goal is to understand and apply additional rules of grammar and the sociolinguistic rules of the language needed to carry out various tasks; to further develop skills in reading and writing; to learn to read and write 70 additional kanji. Prerequisite(s): course 3; or placement by examination. (General Education Code(s): IH.) *The Staff*

5. Intermediate Japanese. W

Goal is to develop grammatical, cultural and analytical skills, and vocabulary, necessary for reading Japanese texts in several genres. Prerequisite(s): course 4; or placement by examination. (General Education Code(s): IH.) *The Staff*

6. Intermediate Japanese. S

Goal is to develop grammatical, cultural and analytical skills, and vocabulary, necessary for reading Japanese texts in several genres. Prerequisite(s): course 5; or placement by examination. (General Education Code(s): IH.) *The Staff*

50. Preadvanced Japanese. F

Intensive work in Japanese grammar to strengthen grammatical correctness and excellence of expression. A comprehensive textbook and drill book cover a wide range of styles and topics. Course is prerequisite to upper-division Japanese language courses. Prerequisite(s): course 6. Students interested in this course who have not taken the prerequisite should meet with the instructor, preferably prior to the first class meeting. Enrollment limited to 20. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

104. Advanced Japanese. W

Readings on cultural/historical issues in contemporary Japanese short stories, essays, and poems. Focus on developing skills to write coherent essays and discuss them in a group situation. May be repeated for credit with consent of instructor. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 50. *The Staff*

105. Advanced Japanese. S

Readings in contemporary Japanese prose (fiction and nonfiction) with an emphasis on contextual understanding and stylistic appreciation. May be repeated for credit with consent of instructor. Prerequisite(s): course 50. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Jewish Studies

Department of History 201 Humanities 1 (831) 459-2982 http://history.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty

Program Description

The minor in Jewish studies introduces students to the study of modern Jewish cultures and to the range of disciplines that bear upon the field while supporting students' work in their own majors. This introduction to Jewish studies is helpful for students who plan to do graduate work in Jewish studies, whether through regular disciplines or in Jewish studies programs and also for students who plan to attend rabbinical schools or find work with Jewish communities. For others with an interest in Jewish topics but without such plans, a minor in Jewish studies offers intellectual enrichment and a focus within the student's chosen field.

The Jewish studies minor is designed to complement existing majors in the arts, humanities, physical and biological sciences, and social sciences. It is conceived as an interdisciplinary program, and students are urged to plan their program with a faculty adviser. There are significant library resources, including the Baumann Endowment for Classic Jewish Texts, the Neufeld-Levin Holocaust Materials, the Brose Fund for Visual Arts and Jewish Culture, and the Silverman collection of Sephardic materials.

This minor offers students the opportunity to gain knowledge and skills in a variety of contexts in various aspects of Jewish culture—with special reference (though not limited) to modern issues. It will help students prepare to move successfully into graduate programs in a variety of disciplines—especially in the humanities, social sciences, and preprofessional programs; and it will provide students with a grounding in materials fundamental to Western culture and liberal education, of value to majors in all divisions. In emphasizing modern aspects, this minor connects with a range of disciplines and programs on the UCSC campus that explore the meanings of modernity; at the same time, this minor will help students to develop analytical tools, strategic versatility, and critical literacy.

The Jewish studies minor is administered by the History Department.

Requirements for the Minor

- Three lower-division courses; two may be Hebrew language courses. Hebrew 1-3 are strongly recommended as is Literature 80A, Biblical Narratives. Students can petition to have upper-division courses substituted for the lower-division requirements.
- Two courses from the upper-division Jewish Studies core courses sequence. Refer to the Jewish Studies web site for a complete listing.
- · Three additional upper-division courses from the Jewish Studies curriculum. The 2007-08 curriculum is listed below.

Students, especially those who plan to continue their studies in graduate school, may wish to gain proficiency in Yiddish, German, or Spanish, depending on their area of interest. Students who participate in a UC Education Abroad Program (EAP) may petition to apply up to three courses from EAP toward the minor. Petition forms are available in the History Department office.

Journalism

Writing Program 166 Kresge College (831) 459-2431

http://humwww.ucsc.edu/writing/index.html

(There were no substantive changes to the Journalism Program Description from the General Catalog 2006-08.)

Program Description

Admission to the minor in journalism is suspended at present. The following conditions will apply if it is reinstated.

The Writing Program accepts students each quarter into the minor in journalism. The minor consists of a series of courses and internships that emphasize not just craft but critical analysis. The program immerses the student in studies of the rhetoric of nonfiction writing and of the significance of public discourse. It is designed to coordinate with a student's major in any field of study in which the practice of writing for newspaper and magazine publication might complement normal course work.

A full description of the minor, an explanation of application procedures, and a petition for admission into the program may be obtained at the Writing Program office (Kresge 166). Petitions are reviewed during the second week of each quarter; selection is based on course work and writing samples. Interested students are encouraged to get more details about the minor from the writing program office (166 Kresge College).

Course Requirements

- · Writing 64, Newswriting Workshop. All students must take this course (or its equivalent) before they are approved for the minor.
- Five upper-division courses in writing. At least three must be from the following: Writing 165, 166 (one or more courses in the series), and 167. The remaining two courses may include any upper-division creative writing course (see Literature), American Studies 105, Community Studies 144, Environmental Studies 156 (for environmental studies majors), Film and Digital Media 150, and Writing 101 (if not used as media criticism), 102, 103, 104, 107, 108, 109, 110A, 120, 161, 163, 169, and 195.
- · One course in media criticism (ordinarily Writing 167, but Sociology 116, Community Studies 80L, Writing 70, and 128 are accepted)
- One quarter of internship
- · A senior thesis or portfolio

Kresge College

College Office (831) 459-2071 http://www2.ucsc.edu/kresge

Program Description | Faculty

Lower-Division Courses

10. Academic Success (2 credits). *

Helps students develop study skills, writing skills, critical reading and thinking skills, test-taking strategies, strategies for stress reduction, and time-management skills. Students evaluated on attendance at class, attendance at individual meetings with instructor, and preparation of weekly assignments. Enrollment restricted to college members and by permission of college advisor. Enrollment limited to 18. *The Staff*

12A. Service Learning (3 credits). F,W

Students will find an independent field placement with the instructor's assistance, work in the placement, meet weekly, read appropriate texts, keep a journal, and write a final reflection on the experience. Enrollment restricted to college members. Enrollment limited to 20. May be repeated for credit. *The Staff, S. Cooper*

12B. Service Learning (2 credits). S

Students will begin or continue to work in the independent field placement they started the previous quarter, meet weekly, read appropriate texts, keep a journal, and write a final reflection on the experience. Enrollment restricted to college members. Enrollment limited to 20. May be repeated for credit. *S. Cooper*

30C. The Writing Life (3 credits). *

Studies challenges and rewards of writing careers students might pursue professionally (from technology to travel, screenwriting to grant writing, journalism to literary careers—depending on quarter taught). Course centers around series of visiting UC Santa Cruz alumni who talk about their writing lives. Enrollment restricted to college members. Enrollment limited to 18. May be repeated for credit. *F. Fatemi*

42. Student-Directed Seminar (no credit). F,W,S

Seminar taught by upper-division Kresge students under Kresge faculty supervision. (See course 192.) Students submit petition to sponsoring agency. *The Staff*

60A. Film and the Politics of Representation (2 credits). *

Introduces students to the study of film and focuses on the terminology and techniques, the broader political implications of film, and its impact on postmodern America. Prerequisite(s): satisfaction of the Entry Level Writing and C1 or C requirements. Enrollment restricted to college members. Enrollment limited to 20. *B. Faunce*

60B. Memoir/Autobiography Workshop (2 credits). *

Students read excerpts of memoirs, autobiographies, and semi-autobiographical short stories, and write sections of a memoir or autobiography and a final self-

reflection/evaluation on the course. Prerequisite(s): satisfaction of the Entry Level Writing and C1 or C requirements. Enrollment restricted to college members. Enrollment limited to 16. May be repeated for credit. *The Staff*

60C. Prison Narratives (3 credits). S

Seeks to ask hard questions about the role of the prison, its increasing use in our nation, and the use of torture by the U.S. government in Guantanamo, Abu ghraib, and other prisons. Readings include J. James's *Imprisoned Intellectuals*, Alexander Berkman's *Prison Memoirs of an Anachist*, and other writings by American prisoners. Eve Ensler's *What I Want My Words to Do to You* is shown. Course is primarily reading and discussion; students are asked to keep a reading journal and to write a critical/creative essay at the end of the quarter. (Formerly *Language of the Prison House.*) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to college members. Enrollment limited to 20. *S. Cooper*

60D. Literary Journalism (2 credits). S

Introduction to literary journalism, emphasizing contemporary issues in California. Students read and analyze articles that use creative strategies to grip readers, and develop their own narrative style by writing their own pieces. Prerequisite(s): satisfaction of the Entry Level Writing and C or C2 requirements. Enrollment restricted to college members. Enrollment limited to 20. *L. Lopez*

60F. Writer's Read (2 credits). S

Students attend weekly creative writing readings by fiction writers and poets, read excerpts from the writers' works, participate in question and answer sessions, and write short, creative and/or analytical responses to the readings and writings. Enrollment restricted to Kresge and Porter college members. Enrollment limited to 25. May be repeated for credit. *A. Brooks*

60G. Arts Journalism and Criticism: Writing About Contemporary Art and Popular Culture (3 credits). S

Focuses on issues in contemporary art and popular culture. Students write about music, film/video, and visual art. Class meets weekly to look at artists' work and to discuss readings. Weekly writing assignments and class discussions. Enrollment restricted to college members during priority enrollment. Enrollment limited to 22. *A. Brooks*

60H. Media Coverage of Major Events (3 credits). S

Examines how media coverage of major news events in the past half century varied from outlet to outlet as well as with time and perspective, and how that varied coverage affected events. Analyzes coverage that was particularly insightful, bizarre, visionary, exemplary, biased, or simply inadequate. Events examined range from the very broad to the very specific and include: the civil rights struggle, the Manson murders, the Union Carbide disaster, and the mass suicide in Jonestown. Enrollment restricted to college members during priority enrollment. Enrollment limited to 18. *P. Farrell*

60I. Juvenile Justice in the 21st Century (2 credits). *

Examines theoretical and practical aspects of the juvenile justice system in California, with the goal of providing an understanding of some of the major legal issues in dealing with child abuse, neglect, and delinquency. Provides basic tools for understanding legal research and writing; an overview of the field of juvenile justice; and practical firsthand exposure to the juvenile court system. Enrollment restricted to

college members during priority enrollment. Enrollment limited to 20. The Staff

60J. Journalism Workshop: Print and Radio. S

Introductory course in radio and print journalism, focusing on news analysis, reporting techniques, story construction, and the craft of writing. Students also work on voice development and public-speaking skills, as well as ethics and community context. Satisfaction of the Entry Level Writing and Composition requirements; students must submit a writing sample to the instructor. (Formerly College Eight 60.) Enrollment limited to 20. (S) The Staff

60M. Community Mural (3 credits). W

Through lecture, demonstrations, and hands-on projects, students develop the skills to successfully complete a mural. Generating the idea, completing the design, submitting a proposal, and painting a mural are covered. Enrollment restricted to college members. Enrollment limited to 15. *M. Niven*

61. Kresge College Student Leadership (2 credits). *

Holistic approach examining leadership as it relates to personal and institutional ethics, personal accountability, group dynamics, and the effects of culture on leadership. Enrollment restricted to college members. *The Staff*

80A. Introduction to University Discourse: Power and Representation. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical theory, film, art, fiction, non-fiction, and theater. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1.) *The Staff*

80B. Rhetoric and Inquiry: Power and Representation. F

Explores the intersections of investigations, interpretation, and persuasion, and hones strategies for writing and research. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical theory, film, art, fiction, non-fiction, and theater. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

80T. Power and Representation (Kresge Core Course for Transfer Students). F Explores the intersections of investigations, interpretation, and persuasion, and hones strategies for writing and research. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical

theory, film, art, fiction, non-fiction, and theater. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior college members. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, W.) *The Staff*

99. Tutorial. F,W,S

A program of directed study arranged between a freshperson or sophomore student and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Independent Study (2 credits). F,W,S

A program of directed study arranged between a student and a Kresge faculty member. Class time is less proportional to credit given. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under Kresge faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Kresge, a proposal supported by a Kresge faculty member willing to supervise, and college approval. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a Kresge faculty supervisor. To be used primarily by upper-division students doing part-time, off-campus study. Prerequiste(s): approval of student's adviser and the college. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

Senior thesis or project for student doing individual major program. May be repeated twice for credit. Prerequisite(s): permission of sponsoring committee and college approval. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which Kresge faculty supervision is not in person (e.g., supervision is by correspondence.) Prerequisite(s): approval of the student's faculty sponsor and college approval. *The Staff*

199. Tutorial. F,W,S

A program of individual study arranged between an upper-division student and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

* Not offered in 2007-08

Language Program

239 Cowell College (831) 459-2054 http://language.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Understanding how language works is a crucial part of comprehending human consciousness and communication. Language is an intellectual tool basic to all disciplines. In today's communities, multicultural and global, learning a second language is not a refinement but a necessity—the key to understanding and communicating with others near and far. The goal of the Language Program at UCSC is to allow students to achieve a substantial level of proficiency in languages other than English. Since such proficiency always includes cultural as well as linguistic comprehension, the program requires investigating the complex relationship between language and culture.

The Language Program offers rigorous language training by professional language instructors. Most courses are taught in the target language from the very beginning. In 2005–06, languages offered are Arabic, Chinese, French, German, Greek, Hebrew, Hindi, Italian, Japanese, Latin, Portuguese, Russian, Spanish, Spanish for Spanish speakers, and Urdu. Students with previous language preparation who wish to continue in that language take a placement examination to determine the course level appropriate for them. Each language's placement examination format is described in the quarterly *Schedule of Classes*, along with the time, date, and location of the examination.

Language learning at UCSC is supported by a variety of technologies. There is a campus language laboratory in the Media and Electronic Resource Center (MERC) at McHenry Library; the library also houses an abundance of print and audiovisual material in the languages taught at UCSC, including music recordings and videos. Television programs are received from countries around the world. Faculty in the Language Program are incorporating new technologies into their teaching on an ongoing basis, including computer software and web-based resources. In addition to language courses, the program offers upper-division courses exploring history, sociology, literature, art, film, and other manifestations of culture. All courses are taught in the target language.

Students of language interested in theater have the opportunity to participate in the annual International Playhouse, which every spring presents highly successful programs. To date, pieces have been performed in Chinese, French, German, Italian, Japanese, Latin, Portuguese, Russian, and Spanish.

Students are also encouraged to participate in foreign film series (e.g., Chinese, French, Italian, Portuguese, Russian, Spanish), international music festivals, and conferences on intercultural or international topics.

Students who wish to concentrate on language study can choose various majors. Students can major in language studies, which combines courses in language proficiency and culture with general and applied linguistics. The Literature Department offers courses in French, German, Spanish, Latin American, and Italian literature. The Literature Department encourages all students to study a second language and requires two upper-division courses in a non-English literature for the intensive literature major. The History Department encourages students of Asian, Latin American, European, and classical history to study a second language and provides a variety of opportunities to make use of language skills in their studies. Latin American and Latino Studies focuses on the Hispanic culture of the Americas and requires all majors to read, speak, and write Spanish or Portuguese. Other area studies majors involving language study include classical studies, German studies, Italian studies, East Asian studies (Chinese emphasis), and global economics, and health sciences.

Study abroad is an important component of language study at UCSC. Language students have various opportunities for studying abroad, including one-quarter programs in Siena, Italy, Japan (global economics taught in English), and Costa Rica (tropical biology taught in English); semester programs in Austria, Chile, Costa Rica, France, Germany, India, Italy, or Mexico; and

the yearlong UC Education Abroad Program, with centers in Brazil, Chile, China, Costa Rica, France, Germany, Italy, Japan, Mexico, Russia, Spain, and Taiwan.

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Chinese

David Keenan

Chinese language, fiction, and history

French

Angela Elsey

Francophonie, language variation, sociolinguistics, film, 19th-century French history and civilization

Greta Hutchison

Foreign language pedagogy, second language acquisition, medieval French literature, and 19th-century literature and art

Nora Megharbi

Second and foreign language acquisition, applied linguistics, pedagogical grammar, technology and multimedia, sociolinguistics, TA training, course supervision, business French, scientific French, francophone literature, translation

German

Walter Campbell

Language teaching, 18th- and 19th-century German literature, history of German

Judith Harris-Frisk

German language and cultural studies; German literature and intellectual history, 1750–present; turn-of-the-century Vienna and Weimar German; German issues of national identity and multiculturalism

Greek

Karen Bassi (Literature)

Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

Mary-Kay Gamel (Literature)

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Gildas Hamel

History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

Charles W. Hedrick Jr. (History)

Greek and Roman history, epigraphy, historiography, political theory

John P. Lynch (Literature), Emeritus

Daniel Selden (Literature)

Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Hebrew

Tammi Rossman-Benjamin

Hebrew language and culture, biblical Hebrew syntax and semantics, the Hebrew Bible, Jewish thought, psycholinguistics, second-language acquisition and bilingualism

Hindi

John Mock

Language pedagogy, Hindi and Urdu fiction, Urdu poetry, languages and cultures of Northern Pakistan and Afghanistan, orality and literacy, discourse analysis, areal linguistics

Italian

Giulia Centineo

Italian culture and civilization; history of Italian language; Italian linguistics, syntax, and semantics; language pedagogy

Tonia Prencipe

Business Italian, translation, Italian culture and civilization

Japanese

Sakae Fujita

Foreign language methodology, drama/theater/improvisation use in language learning, language and identity, foreign language literacy

Latin

Karen Bassi (Literature)

Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

Mary-Kay Gamel (Literature)

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Gildas Hamel

Latin, Greek, Hebrew; Bible; history of Judaism and Christianity; French

Charles W. Hedrick Jr. (History)

Greek and Roman history, epigraphy, historiography, political theory

John P. Lynch (Literature), Emeritus

Daniel Selden (Literature)

Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Portuguese

Ana Maria Seara

Portuguese language; literature, cinema, and music of Portuguese-speaking world; acquisition and teaching of foreign, second, and heritage languages

Russian

William Nickell

Leo Tolstoy, Russian cultural history, 1920s–1930s Soviet Russia, Russian Soviet film, Russian language and pedagogy

Spanish and Spanish for Spanish Speakers

Brenda Barceló

Medical Spanish, Latin American cutlure, Latin dance expressions, Spanish/English and English/Spanish translation and interpretation, Hispanic linguistics, Romance languages

Carlos Calierno

Latin American culture, history, literature, cinema, music, art, economics, and politics

Verónica Feliu

Latin American literature of the 20th century; Chilean feminisms, politics, and culture; Latin

American cultural studies; Spanish learning for both non-native and heritage speakers

María Victoria González-Pagani

Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

María Morris

Language learning styles and strategies, culture and technology in language training

Marta Navarro

Latin American literature, Mexican/Chicano culture, Latina/Chicana issues

Ariel A. Pérez

Language acquisition and teaching methodology, computer-assisted language learning, teaching language for proficiency, oral proficiency assessment; Latin American current affairs

Frank A. (Paco) Ramírez

Second-language acquisition, bilingual education, Siglo de Oro Theater, Peninsular medieval literature, Spanish-language film and theater for linguistic and cultural acquisition

Alvaro Romero-Marco

Spanish literature of the 19th- and 20th-centuries; film, cultural studies

Program Description | Faculty

Lower-Division Courses

80D. Italian Culture Through Cinema. W

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. While analyzing films by and about Italians, we develop an informed opinion on relevant issues in Italian culture and society. The course, to be taught in English, is organized thematically. Students cannot receive credit for this course and Italian 106. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80F. Israel's Struggle for Identity as Seen Through Israeli Cinema. S

Examines, through the medium of film, Israel's struggle for identity since its founding as a modern state. Topics include: Israel's relationship to the Jewish diaspora; the nature of Israel as a Jewish state; and the relationship between Israel and its Arab neighbors. Students may not receive credit for this course and Hebrew 106. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *The Staff*

*Not offered in 2007-08

Language Studies

Linguistics Department 241 Stevenson College (831) 459-4988 http://ling.ucsc.edu

Changes to 2006-08 Catalog Highlighted

Program Description

Language Studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with a thorough competence in one or more foreign languages and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. It is a demanding program that requires (1) acquisition of demonstrable competence in a language other than English, (2) a thorough grounding in linguistics, and (3) completion of a series of cultural context courses related to the language. Currently, majors may choose a concentration in Chinese, French, German, Modern Hebrew, Italian, Japanese, Russian, or Spanish. Interested students should contact the Linguistics Department office early in their college career to obtain essential information about requirements. Students are also encouraged to obtain a current copy of the Handbook of Undergraduate Programs in Linguistics and Language Studies (http://ling.ucsc.edu/undergraduate/handbook.php), which contains detailed information about the major.

A junior year abroad through the UC Education Abroad Program (EAP) in a country appropriate to the major language is recommended. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the undergraduate director or a designated adviser.

Requirements for the Language Studies Major

Early Declaration

It is important that prospective students declare the major as early as possible so that they can complete the advanced language, linguistics, and context requirements within an allowable period of enrollment.

Students who wish to include an EAP experience in their course of study will have to coordinate their choice of year abroad with the scheduling of UCSC courses. Transfer students who have not made significant progress with the language requirements before entering UCSC may find it difficult to include an EAP year before completion of graduation requirements.

Course Requirements

Language Studies majors must satisfy course requirements in languages, linguistics, and cultural context.

Language Component: Language Studies majors (in French, German, Italian, Russian, and Spanish) must achieve a level equivalent to six quarters in the language of concentration. One advanced language course after level 6 is also required. Note that language courses 4, 5, or 6 fulfill one of the introduction to humanities (IH) general education requirements. Majors in Chinese and Japanese must achieve a level equivalent to nine quarters of language study.

Six foundation courses in Linguistics and cultural context:

- Ling 50 Introduction to Linguistics: Sounds and Words
- Ling 52 Syntax 1 or Ling 55 Syntactic Structures
- Ling 53 Semantics 1
- Ling 101 Phonology 1
- two advanced linguistics courses

Five elective courses

- Linguistics courses: any upper-division course in Linguistics
- Cultural context courses in the major language: to be selected from a variety of disciplines including literature, history, politics, and art

Senior exit requirement: In their senior year, Language Studies majors must satisfy the senior exit requirement in one of two ways:

Option 1. Successful completion of a capstone course. Students may designate an appropriate upper-division course as their capstone course.

- In addition to fulfilling the normal requirements for the designated course, such students concurrently enroll in the Ling 190 Senior Research Series (two credits, enrollment limited to 10) with the same instructor, and produce a research paper or other significant project, normally related to their language of focus, to be filed with the department.
- Prior to enrolling in 190, Language Studies majors must have senior standing, achieved level 5 language competence, and must have completed Ling 52/55 Syntax I or Syntactic Structures, and 101 Phonology I.

Option 2. Senior thesis supervised by a faculty member.

- The proposal for a senior thesis or project must be submitted for departmental approval at least three quarters prior to the quarter of graduation.
- Students enroll in Ling 195 (Senior Thesis) or Ling 194 (Senior Project) with the approval of the faculty adviser. The senior thesis is an original investigation of the major language in some relevant way, such as the linguistic structure or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context.

Requirements for the Minor

The minor requires completion of two years (six quarters) of language study (or demonstration of an equivalent level of ability) and eight additional Linguistics and cultural context courses as follows:

- Ling 50 Introduction to Linguistics: Sounds and Words
- Ling 52 Syntax 1 or Ling 55 Syntactic Structures
- Ling 101 Phonology 1
- two advanced linguistics courses
- three elective/context courses (see handbook for details)

There is no senior exit requirement for the minor.

Language Studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with a thorough competence in one or more foreign languages and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. It is a demanding program that requires (1) acquisition of demonstrable competence in a language other than English, (2) a thorough grounding in linguistics, and (3) completion of a series of cultural context courses related to the language. Currently, majors may choose a concentration in Chinese, French, German, Modern Hebrew, Italian, Japanese, Russian, or Spanish. Interested students should contact the Linguistics Department office early in their college career to obtain essential information about requirements. Students are also encouraged to obtain a current copy of the *Handbook of Undergraduate Programs in Linguistics and Language Studies* (http://ling.ucsc.edu/undergraduate/handbook.php), which contains detailed information about the major.

A junior year abroad through the UC Education Abroad Program (EAP) in a country appropriate to the major language is recommended. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the language studies undergraduate director or a designated adviser.

Requirements for the Language Studies Major

Early Declaration

It is important that prospective students declare the major as early as possible so that they can complete the advanced language, linguistics, and context requirements within an allowable period of enrollment.

Students who wish to include an EAP experience in their course of study will have to coordinate their choice of year abroad with the scheduling of UCSC courses. Transfer students who have not made significant progress with the language requirements before entering UCSC may find it difficult to include an EAP year before completion of graduation requirements.

Course Requirements

Language Studies majors must satisfy course requirements in languages, linguistics, and cultural context.

Language Component: Language Studies majors (in French, German, Modern Hebew,

Italian, Russian, and Spanish) must achieve a level equivalent to six quarters in the language of concentration and take the equivalent of courses 1, 2, and 3 in a second language. One advanced language course after level 6 is also required. Note that language courses 4, 5, or 6 fulfill one of the introduction to humanities (IH) general education requirements. Majors in Chinese and Japanese must achieve a level equivalent to nine quarters of language study.

Eight Six foundation courses in Linguistics and cultural context:

- Ling 20 Introduction to Linguistics <u>50 Introduction to Linguistics</u>: Sounds and Words
- Ling 52 Syntax 1 or Ling 55 Syntactic Structures
- Ling 53 Semantics 1
- Ling 101 Phonology 1
- Ling 140 Language Change
- one course in language structure from the 180 series
- two cultural context courses in the major language (see the Handbook of Undergraduate
 Programs in Linguistics and Language Studies for details) two advanced linguistics courses

Four Five elective courses

- Linguistics courses: any upper-division course in Linguistics or an 80 level linguistics course
- Cultural context courses in the major language: to be selected from a variety of disciplines including literature, history, politics, and art

Senior exit requirement: In their senior year, Language Studies majors must satisfy the senior exit requirement in one of two ways:

Option 1. Successful completion of a capstone course. Students may designate an appropriate upper-division course as their capstone course.

- In addition to fulfilling the normal requirements for the designated course, such students concurrently enroll in the Ling 190 *Senior Research Series* (two credits, enrollment limited to 10) with the same instructor, and produce a research paper or other significant project, normally related to their language of focus, to be filed with the department.
- Prior to enrolling in 190, Language Studies majors must have senior standing, achieved level 5 language competence, and must have completed Ling 52/55 *Syntax I* or *Syntactic Structures*, and 101 *Phonology I*.

Option 2. Senior thesis or project supervised by a faculty member.

- The proposal for a senior thesis or project must be submitted for departmental approval at least two three quarters prior to the quarter of graduation.
- Students enroll in Ling 195 (*Senior Thesis*) or Ling 194 (*Senior Project*) with the approval of the faculty adviser.

The senior thesis is an original investigation of the major language in some relevant way, such as the linguistic structure or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context. Linguistic research projects might analyze some aspect of the phonology or syntax of the major language, analyze and compare dialects, or study new word formations found in the current press, among other possibilities.

Requirements for the Minor

The minor requires completion of two years (six quarters) of language study (or demonstration of an equivalent level of ability) and eight additional Linguistics and cultural context courses as follows:

- Ling 20 Introduction to Linguistics <u>50 Introduction to Linguistics</u>: <u>Sounds and Words</u>
- Ling 52 Syntax 1 or Ling 55 Syntactic Structures
- Ling 101 Phonology 1
- Ling 140 Language Change
- two advanced linguistics courses
- one course in language structure from the 180 series
- three elective/context courses (see handbook for details)

There is no senior exit requirement for the minor.

Latin American and Latino Studies

32 Merrill College (831) 459-4284 http://lals.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The Latin American and Latino Studies (LALS) Department prepares students for bilingual, and multicultural participation in a rapidly changing world. Both Latin America and U.S. Latino and Latina communities are being transformed by globalization; at the same time, deep historical legacies continue to be very present. The Latin American and Latino Studies Department integrates the study of Chicano/a and Latino/a communities in the U.S. with analysis of the histories, politics, cultures, and societies of Latin America and the Caribbean.

LALS courses deal with changing political, social, economic, and cultural realities, including immigration and transnational communities; gender, racial, sexual, and ethnic identities; social movements; diverse forms of cultural expression; ongoing political and economic restructuring in Latin America; and the challenges of political and economic empowerment for Latino/a communities in the U.S. To understand these processes, we draw from interdisciplinary perspectives that include the social sciences, the humanities, and the arts.

In addition to academic knowledge, LALS also provides opportunities for students to acquire practical, real-world skills. Through program-related internship and field-study experiences, students can acquire useful, pre-professional skills in any of the following key areas: community development/advocacy, public policy, education, journalism, media, performance, and research/writing, among others.

Latin American and Latino studies courses span a number of disciplines and are augmented by courses taught by participating faculty in various departments. A sample list appears at the end of the course descriptions. The Latin American and Latino Studies Department compiles a quarterly list of course offerings from across campus that count toward the major; this list appears on the department's web site.

Graduates of the LALS major have made careers in a wide variety of fields, including teaching, community organizing, community and government service, journalism and the media, environmental science, global economics, health care, legal services, library science, music, publishing, and research. Many have gone on to pursue advanced degrees in the U.S. or abroad in anthropology, bilingual education, communications, cultural studies, ecology, economics, geography, history, law, literature, media, public health, and sociology—to name a few.

Major Requirements

Three lower-division courses are required for the major:

- · Latin American and Latino Studies 10, Bridging Latin American and Latina/o Studies
- and two lower-division electives (select from courses listed below):

Latin American and Latino Studies

1, Introduction to Latin American and Latino Studies

80A, Peoples and Cultures of the Americas

80B, Social Movements in Latin America

80C, Power and Resistance in the Americas

80D, Political Change in Mexico

80F, Latinos in the U.S.A .: Comparative Perspectives

80H, Comparative Latina/o Histories

80N, Drug Wars in the Americas

80Q, Música Latina

80S, Sexualities and Genders in Latin American and Latina/o Studies

80T, Topics in Latin American and Latina/o Studies Cinema

80X, Central American Culture and Society

American Studies

80E, U.S. Radical and Ethnic Histories and Formations: Chicano/Latino American

Anthropology

801, Culture and Power in Latin America 80G, Barrio Popular Culture

Community Studies

80A, Chicanos and Social Change

Environmental Studies

80A, The Future of Rain Forests

History

11A, Introduction to the History of the Americas: Colonial Period 11B, Introduction to Latin American History: National Period

History of Art and Visual Culture

80M, Indigenous American Visual Culture

Spanish /Latin American/Latino Literature

60, Introduction to Literary Genres

Music

4 A and 4B, Latin American Ensembles (three quarters fulfill one lower-division elective)

80F, Music in Latin American Culture: Regional Traditions

Theater

80M, Chicano Teatro

Other courses numbered 1–80 on Latin American and/or Latino/a subjects may be substituted with approval in advance from the Latin American and Latino Studies Department.

Courses with similar content taken at other institutions may be substituted with approval from the Latin American and Latino Studies Department upon declaration of major.

Latin American and Latino Studies 10 must be taken at UCSC.

In addition, all majors must complete nine upper-division courses, including core courses, two of which are mandatory (no substitutions):

Latin American and Latino Studies

- 100A, Politics and Society: Concepts and Methods (no substitutions)
- 100B, Culture and Society: Culture in a Global Context (no substitutions)

The remaining seven electives must meet the following criteria:

- a cluster of three courses must be taken in one of the following areas of concentrations:
 African diasporas in the Americas; Chicano/a studies; cinema; gender studies; history;
 indigeneity; migration/immigration; politics/political economy/policy; popular culture and
 cultural studies; race and ethnicity; literature; and social movements. Courses may be
 taken in any department, as long as they fit into the cluster and appear on the LALS list
 of course offerings.
- at least one must concentrate on pre-twentieth-century topics
- at least one must center on Chicano/a-Latino/a issues
- · at least two must be taught in Spanish or Portuguese, one by an LALS associated faculty

Language Requirements

All Latin American and Latino Studies majors are expected to learn to speak, read, and write Spanish or Portuguese and to make use of these skills on a regular basis in their academic work.

Majors must take at least two upper-division courses taught in Spanish or Portuguese. Before taking upper-division course work taught in the language, students must demonstrate proficiency

in Spanish equivalent to the completion of Spanish 6 or 56, or Spanish for Spanish Speakers 63. Students who wish to pursue Portuguese may take the Portuguese 1A/1B or 60A/60B series. Students who have achieved fluency in Spanish or Portuguese through life experience may be exempt from this recommended preparatory course work. In addition to Latin American and Latino Studies and affiliated department course offerings, the required two upper-division courses taught in Spanish or Portuguese may be fulfilled through study abroad with prior approval by Latin American and Latino Studies. Students may also pursue internship or field study opportunities to satisfy one of the two required upper-division courses taught in Spanish or Portuguese; however, at least one of the two courses must be fulfilled in a classroom setting.

Field-Study and Internship Opportunities

A variety of field-study and internship opportunities can be arranged through the Latin American and Latino Studies (LALS) Department. Field studies are independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. You can do full-time field study for one quarter for full academic credit, a part-time field study scheduled in conjunction with formal course work at UCSC, or do field study as an extension of the Education Abroad Program (EAP). Projects vary widely, but students who want to develop a field-study proposal are expected to prepare for it by acquiring fluency in the appropriate language, prior cross-cultural experience, and upper-division course work on the region and/or topic that is to be the focus of the study. Students who wish to pursue a full-time field study are required to take the *Field Study Seminar* (LALS 196) and work with the field-study coordinators. Students who pursue a part-time field study are highly encouraged, but not required, to take the *Field Study Seminar*. Local field study can be arranged in Santa Cruz, Watsonville, and Salinas with agencies and organizations, schools, and newspapers and radio stations that serve Chicano/a-Latino/a communities.

While conducting field study for academic credit for the major, students are expected to be concurrently enrolled in an individual-studies course of between 5 and 15 units with a faculty adviser. Upon approval, this course work is applicable toward up to three upper-division course requirements for the LALS major. Students may also pursue a supplementary 2-unit, independent study through LALS. Petitions to enroll in an individual-studies course can be obtained at the LALS Department office. For more information, contact the field-study coordinators Professor John Borrego at (831) 459-4430 (borrego@ucsc.edu) or the LALS undergraduate adviser at (831) 459-2119 (lals@ucsc.edu).

Study Abroad

Students may apply to study at foreign universities through EAP. EAP offers opportunities for students to study at universities in Mexico City and Monterrey, Mexico; San José, Costa Rica; Santiago and Concepción, Chile; Rio de Janeiro, Brazil; and Madrid, Córdoba, Alcalá, Granada, and Barcelona in Spain. Sophomores, juniors, and seniors with two years of university-level Spanish may apply. In addition, during fall and spring quarters, the EAP Field Research Program (FRP) in Mexico is an experiential program geared toward juniors and seniors who want to explore the "real" Mexico outside the classroom and at the same time receive research training. EAP has research sites in states such as Jalisco, Yucatán, Oaxaca, or Michoacán (final site choice depends on the research topic). Application deadlines are generally several months to a year in advance of the program, so students should come to the office early to plan their study abroad programs. The department will approve courses for upper-division credit toward the major courses taken abroad which cover topics appropriate to the LALS curriculum. All credit for EAP classes transfers back to students' UCSC transcripts. Financial aid applies to all but summer programs and includes airfare and living costs. Before departure, students should present a proposed study plan for courses abroad to the department adviser for review. Credit for up to three EAP courses can be applied toward the major.

Senior Comprehensive Requirement

Every major must complete a senior exit requirement in order to graduate. The preparation and completion of this requirement is structured into the senior year. There are five options to choose from:

- good to excellent performance in a Latin American and Latino Studies senior seminar (194 series), including a final research paper.
- an extended research paper, 20–30 pages in length. This paper often builds on related course work and requires approval from the relevant faculty adviser before the end of the winter quarter of the senior year. Students must be enrolled in an independent-study tutorial to complete this paper;
- a senior thesis is generally between 40–60 pages and is the result of one or two quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (This can be done by petition to LALS, and with the approval of the faculty adviser.);
- a senior project can be either a creative project or a community-action project. Creative projects include web site design, video, performance, slide show, photo exhibit, or other media work. A short written analysis of the student's experience in conducting the project

- is required. Community-action projects often involve sustained research and/or activity conducted in a community organization or public interest group, usually stemming from an internship. A short written analysis of the connection between the student's activity and research and the project itself is required while enrolled in an independent study;
- the Student-Directed Seminar option is available to unusually qualified students only. It
 requires three quarters of preparation directed by a faculty adviser and approval by the
 Academic Senate Committee on Educational Policy. This option can be taken only by
 petition to LALS, and with the approval of the faculty adviser. Petition forms are available
 at the Latin American and Latino Studies office. More information about the course
 proposal and approval process and deadlines is available at http://lals.ucsc.edu.

Latin American and Latino Studies Major Planners

The following are two recommended academic plans for undertaking basic preparation for the Latin American and Latino studies major. Plan One is a guideline for students who commit to the major early in their academic career. Plan Two is for transfer students.

Plan One Entering Freshmen						
Year	Fall	Winter	Spring			
1st (frsh)	Span 1 Lals 10	Span 2 Lals	Span 3 80-series			
2nd (soph)	Span 4 or Spss 61 Lals upper-divison course	Span 5 or Spss 62 Lals upper-division course	Span 6 or 56 or Spss 63 Lals 100B			
(jr) Plan Two J	Lals 80-series	Lals 100A				
Year	Fall	Winter	Spring			
3rd (jr)	Span 4 or Spss Lals 10 Lals 80-series	Span 5 61 or Spss 62 Lals 100A Lals 80-series	Span 6 or 56 or Spss 63 Lals 100B Lals upper-div			
4th (sr)	Lals upper-div Lals upper-div Lals 194 (likely at least one)	Lals upper-div Lals upper-div	Lals upper-div Lals upper-div			

Combined Majors

The combined major options, requiring fewer courses than a double major, are established with the global economics, literature, politics, and sociology programs.

Latin American and Latino Studies/Global Economics

Students are required to take a total of 17 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/global economics, students complete a total of seven lower-division course requirements for both the Latin American and Latino studies and global economics majors. Students are assigned a faculty adviser from each discipline. Upper-division course requirements include Economics 100A, 100B, and 113; Latin American and Latino Studies 100A and 100B; and five additional elective courses, two from economics and three from Latin American and Latino studies. Two of the upper-division courses must be taught in Spanish (or Portuguese) and two to four (at least one quarter) must be courses of academic study abroad, internship, or field study in a Spanish- or Portuguese-speaking country. The comprehensive requirement is met by the completion of a senior thesis on a topic suitable to both global economics and Latin American and Latino studies, supervised by a faculty member from either department and read and approved by the student's advisers from both departments.

Latin American and Latino Studies/Literature

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. Students complete a total of three lower-division course requirements. One of the lower-division LALS classes must be LALS 10 (no substitutions); one of the lower-division classes must be LTSP60; and one is an elective from the LALS 80 series or a Literature 80 series course in a relevant area of study. For transfer students, a petition can be made to replace the other lower-division elective course with an appropriate course from another institution.

Upper-division requirements include four core courses, LALS 100A, 100B, LTSP102A, and LTSP102B; and six additional elective courses, three from Spanish Literature and three from LALS. At least four of the upper-division courses must be taught in Spanish or Portuguese (with at least one taught by LALS core or participating faculty), and at least one of the Literature courses must address theoretical concerns. Up to three relevant courses taken through study

abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by both departments. To complete the comprehensive requirement, students can write a senior thesis (by petition), enroll in an appropriate LALS Seminar (194 series), or enroll in an appropriate Literature Senior Seminar in the area of concentration. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments. Both departments must approve a study plan before the major can be declared.

Latin American and Latino Studies/Politics

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/politics, students complete three lower-division course requirements. One of the lower-division courses must be LALS 10 (no substitutions). For transfer students, a petition may be made to substitute the other lower-division courses (one Latin American and Latino studies elective, one course from Politics 1–79) with appropriate course work from another institution. The 10 upper-division courses include three core course requirements (Latin American and Latino Studies 100A and 100B, and Politics 100 and 140C), three courses from any Politics Department sequences (comparative, American, international, and theory), and four upper-division electives. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the politics/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. To complete the senior comprehensive requirement, students may take either a Politics (190) or Latin American and Latino Studies (194) senior seminar.

Latin American and Latino Studies/Sociology

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are four lower-division course requirements, two each from the sociology and Latin American and Latino studies majors. One of the lower-division LALS classes must be LALS 10 (no substitutions); transfer students may petition to replace the other lower-division class with an appropriate course from another institution. Upper-division requirements include six core courses: Latin American and Latino Studies 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino Studies. At least one of the Latin American and Latino Studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: (1) writing a senior thesis, (2) passing an appropriate Latin American and Latino Studies Senior Seminar (194 series), or (3) completing the sociology course option of two additional sociology upper-division cluster III courses. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

Minor Requirements

The minor in Latin American and Latino studies consists of seven courses, including two lower-division courses (LALS 10 and one other lower-division course) and five upper-division courses (including either Latin American and Latino Studies 100A or 100B and any other four upper-division courses that count towards the major). Knowledge of Spanish and/or Portuguese is highly recommended, but not required for the minor.

Graduate Studies

The Department of Latin American and Latino Studies offers a parenthetical notation in Latin American and Latino studies for Ph.D. students in anthropology, history, history of consciousness, literature, psychology, politics, sociology, and environmental studies. This concentration in Latin American and Latino studies provides graduate students with opportunities for interdisciplinary study with faculty from across the campus. Completion of the program will be listed on the graduate degree as a parenthetical notation. The request must originate in the degree-granting department. Students in other departments wishing to pursue a parenthetical notation in Latin American and Latino studies should consult with the chairs of their respective Ph.D. programs and of Latin American and Latino Studies. A list, updated annually, of regularly offered approved graduate courses is available in the Latin American and Latino Studies Department office and web site at http://lals.ucsc.edu. Graduate students are encouraged to complete the application to the parenthetical notation, available at the Latin American and Latino Studies Department, no later than their third year.

Requirements for the Notation

Committee Composition. The student must have a designated graduate adviser from among the Latin American and Latino studies core, participating, or affiliated faculty. This adviser will be in addition to the graduate adviser from the student's home department. The Latin American and Latino studies adviser must serve on the student's qualifying examination committee and/or on the student's dissertation committee.

Writing. The student must prepare a significant piece of writing in the area of Latin American and Latino studies. This writing may take the form of a substantial seminar paper, master's essay, or doctoral dissertation chapter.

Course requirements. The student must take five graduate courses in Latin American and Latino studies, including the required LALS 200 and LALS 297. The remainder can be selected from appropriate graduate offerings of any UCSC department, as long as they are taught by core, participating, or affiliated Latin American and Latino studies faculty.

Teaching. The student must serve as a teaching assistant in at least one Latin American and Latino studies course or teach a Latin American and Latino studies course independently in the regular curriculum or in Summer Session.

Courses. Graduate course work in Latin American and Latino studies is available both in the Latin American and Latino Studies Department and in other UCSC departments. Graduate courses to date in the Latin American and Latino Studies Department include

- · 200, Bridging Latin American and Latino Studies
- 210, Latina Feminisms: Theory and Practice
- 212, Latina/o Ethnographic Practice
- 215, Latina Cultural Studies; Transborder Feminist Imaginaries
- 220, Transnational Civil Society: Limits and Possibilities
- 240, The Culture and Politics of Human Rights
- 242, Globalization, Transnationalism, and Gender in the Americas
- 297, Independent Studies
- · 299, Thesis Research

Latin American and Latino Studies

32 Casa Latina, lower level Merrill College (831) 459-4284 http://lals.ucsc.edu

Program Description | Faculty | Course Descriptions

Program Description

The Latin American and Latino Studies (LALS) Department prepares students for bilingual, bicultural and multicultural participation in a rapidly changing world. Both Latin America and U.S. Latino and Latina communities are being transformed by globalization; at the same time, deep historical legacies continue to be very present. The Latin American and Latino Studies Department integrates the study of Chicano/a and Latino/a communities in the U.S. with analysis of the histories, politics, cultures, and societies of Latin America and the Caribbean.

LALS courses deal with changing political, social, economic, and cultural realities, including immigration and transnational communities; gender, racial, sexual, and ethnic identities; social movements; diverse forms of cultural expression; ongoing political and economic restructuring in Latin America; and the challenges of political and economic empowerment for Latino/a communities in the U.S. To understand these processes, we draw from interdisciplinary perspectives that include the social sciences, the humanities, and the arts.

In addition to academic knowledge, LALS also provides opportunities for students to acquire practical, real-world skills. Through program-related internship and field-study experiences, students can acquire useful, pre-professional skills in any of the following key areas: community development/advocacy, public policy, education, journalism, media, performance, and research/writing, among others.

Latin American and Latino studies courses span a number of disciplines and are augmented by courses taught by participating faculty in various departments. A sample list appears here. The Latin American and Latino Studies Department compiles a quarterly list of course offerings from across campus that count toward the major; this list appears on the department's web site.

Graduates of the LALS major have made careers in a wide variety of fields, including teaching, community organizing, community and government service, journalism and the media, environmental science, global economics, health care, legal services, library science, music, publishing, and research. Many have gone on to pursue advanced degrees in the U.S. or abroad in anthropology, bilingual education, communications, cultural studies, ecology, economics, geography, history, law, literature, media, public health, and sociology—to name a few.

Major Requirements

Three lower-division courses are required for the major:

- Latin American and Latino Studies † 10, Introduction to Bridging Latin American and Latina/o Studies
- and two lower-division electives (select from courses listed below):

Latin American and Latino Studies

1, Introduction to Latin American and Latino Studies

80A, Peoples and Cultures of the Americas

80B, Social Movements in Latin America

80C, Power and Resistance in the Americas

80D, Political Change in Mexico

80F, Latinos in the U.S.A .: Comparative Perspectives

80H, Comparative Latina/o Histories

80N, Drug Wars in the Americas

80Q, Música Latina

80S, Sexualities and Genders in Latin American and Latina/o Studies

80T, Topics in Latin American and Latina/o Studies Cinema

80X, Central American Culture and Society

American Studies

80E, U.S. Radical and Ethnic Histories and Formations: Chicano/Latino American

Anthropology

801, Culture and Power in Latin America 80G, Barrio Popular Culture

Community Studies

80A, Chicanos and Social Change

Environmental Studies

80A, The Future of Rain Forests

History

34A 11A, Introduction to the History of the Americas: Colonial Period 34B 11B, Introduction to Latin American History: National Period

History of Art and Visual Culture

80M, Indigenous American Visual Culture

Spanish /Latin American/Latino Literature

60, Introduction to Literary Genres

Music

4 A and 4B, *Latin American Ensembles* (three quarters fulfill one lower-division elective)

80F, Music in Latin American Culture: Regional Traditions

Theater

80M, Chicano Teatro

Other courses numbered 1–80 on Latin American and/or Latino/a subjects may be substituted with approval in advance from the Latin American and Latino Studies

Department.

Courses with similar content taken at other institutions may be substituted with approval from the Latin American and Latino Studies Department upon declaration of major.

Without exception, Latin American and Latino Studies + 10 must be taken at UCSC.

In addition, all majors must complete nine upper-division courses, including core courses, two of which are mandatory (no substitutions):

Latin American and Latino Studies

- 100A, *Politics and Society: Concepts and Methods* (no substitutions)
- 100B, Culture and Society: Culture in a Global Context (no substitutions)

The remaining seven electives must meet the following criteria:

- three must be within a specific cluster that is related to Latin American/Latino studies
 from within a single field (e.g., anthropology, Brazilian studies, cultural studies,
 economics, education, environmental studies, film and digital media, history, history of art
 and visual culture, literature, politics, psychology, sociology). These may or may not be
 Latin American and Latino studies courses.
- a cluster of three courses must be taken in one of the following areas of concentrations:
 African diasporas in the Americas; Chicano/a studies; cinema; gender studies; history; indigeneity; migration/immigration; politics/political economy/policy; popular culture and cultural studies; race and ethnicity; literature; and social movements. Courses may be taken in any department, as long as they fit into the cluster and appear on the LALS list of course offerings.
- at least one must concentrate on pre-twentieth-century topics
- at least one must center on Chicano/a-Latino/a issues
- at least two must be taught in Spanish or Portuguese, one by an LALS associated faculty

Language Requirements

All Latin American and Latino Studies majors are expected to learn to speak, read, and write Spanish or Portuguese and to make use of these skills on a regular basis in their academic work.

Majors must take at least two upper-division courses taught in Spanish or Portuguese. Before taking upper-division course work taught in the language, students must demonstrate proficiency in Spanish equivalent to the completion of Spanish 6 or 56, or Spanish for Spanish Speakers 63. Students who wish to pursue Portuguese may take the Portuguese 1A/1B or 60A/60B series. Students who have achieved fluency in Spanish or Portuguese through life experience may be exempt from this recommended preparatory course work. In addition to Latin American and Latino Studies and affiliated department course offerings, the required two upper-division courses taught in Spanish or Portuguese may be fulfilled through study abroad, field study, or internship opportunities. However, only one of the two upper-division courses taught in Spanish or Portuguese may be fulfilled through study abroad or intership. With prior approval by Latin American and Latino Studies. Students may also pursue internship or field study opportunities to satisfy one of the two required upper-division courses taught in Spanish or Portuguese: however, at least one of the two courses must be fulfilled in a classroom setting.

Field-Study and Internship Opportunities

A variety of field-study and internship opportunities can be arranged through the Latin American and Latino Studies (LALS) Department. Field studies are independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. You can do full-time field study for one quarter for full academic credit, as well as, a part-time field study scheduled in conjunction with formal course work at UCSC, or do field study as an extension of the Education Abroad Program (EAP). Projects vary widely, but students who want to develop a field-study proposal are expected to prepare for it by acquiring fluency in the appropriate language, prior cross-cultural experience, and upper-division course work on the region and/or topic that is to be the focus of the study. Students who wish to pursue a full-time field study are encouraged required to take the Field Study Seminar (LALS 196) and work with the field-study coordinators. Students who pursue a parttime field study are highly encouraged, but not required, to take the Field Study Seminar. Local field study can be arranged in Santa Cruz, Watsonville, and Salinas with agencies and organizations, schools, and newspapers and radio stations that serve Chicano/a-Latino/a communities.

While conducting field study for academic credit for the major, students are expected to be concurrently enrolled in an individual-studies course of between 5 and 15 units with a faculty adviser. Upon approval, this course work is applicable toward up to three upper-division course requirements for the LALS major. Students may also pursue a supplementary 2-unit, independent study through LALS. Petitions to enroll in an individual-studies course can be obtained at the LALS Department office. For more information, contact the field-study coordinators Professor John Borrego at (831) 459-4430 (borrego@ucsc.edu) or the LALS undergraduate adviser at (831) 459-2119 (lals@ucsc.edu).

Study Abroad

Students may apply to study at foreign universities through EAP. EAP offers opportunities for students to study at universities in Mexico City and Monterrey, Mexico; San José, Costa Rica; Santiago and Concepción. Chile; Rio de Janeiro, Brazil; and Madrid, Cádiz, Córdoba, Alcalá de Henares, Granada, and Barcelona in Spain. Sophomores, juniors, and seniors with two years of university-level Spanish may apply. In addition, during fall and spring quarters, the EAP Field Research Program (FRP) in Mexico, students take classes in Mexico City and undertake a two-month research project while gaining first-hand experience of life in Mexico. The FRP offers six sites for regional research: Guadalajara, Mérida, Monterrey, Morelia, Oaxaca, and Querétaro. Sophomores, juniors, and seniors may apply. Students may also take an intensive Spanish language program in Morelia, Mexico, during the summer; in Concepción, Chile, during the fall; or in Córdoba, Spain, during the fall or spring. Freshmen, sophomores, juniors, and seniors may apply. is an experiential program geared toward juniors and seniors who want to explore the "real" Mexico outside the classroom and at the same time receive research training. EAP has research sites in states such as Jalisco, Yucatán, Oaxaca, or Michoacán (final site choice depends on the research topic). Application deadlines are generally several months to a year in advance of the program, so students should come to the office early to plan their study abroad programs. The department will approve courses for upper-division credit toward the major courses taken abroad which cover topics appropriate to the LALS curriculum. All credit for EAP classes transfers back to students' UCSC transcripts. Financial aid applies to all but summer programs and includes airfare and living costs. Before departure, students should present a proposed study plan for courses abroad to the department adviser for review. The department will approve courses for upper-division credit toward the major courses taken abroad which cover topics appropriate to the LALS curriculum. Credit for up to three EAP courses can be applied toward the major.

Every major must complete a senior exit requirement in order to graduate. The preparation and completion of this requirement is structured into the senior year. There are five options to choose from:

- good to excellent performance in a Latin American and Latino Studies senior seminar (194 series), including a final research paper.
- an extended research paper, 20–30 pages in length. This paper often builds on related course work and requires approval from the relevant faculty adviser before the end of the winter quarter of the senior year. Students must be enrolled in an independent-study <u>tutorial</u> to complete this paper;
- a senior thesis is generally between 40–60 pages and is the result of one or two quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (This can be done by petition to LALS, and with the approval of the faculty adviser.);
- a senior project can be either a creative project or a community-action project. Creative projects include web site design, video, performance, slide show, photo exhibit, or other media work. A short written analysis of the student's experience in conducting the project is required. Community-action projects often involve sustained research and/or activity conducted in a community organization or public interest group, usually stemming from an internship. A short written analysis of the connection between the student's activity and research and the project itself is required while enrolled in an independent study;
- the Student-Directed Seminar option is available to unusually qualified students only. It requires three quarters of preparation directed by a faculty adviser and approval by the Academic Senate Committee on Educational Policy. This option can be taken only by petition to LALS, and with the approval of the faculty adviser. Petition forms are available at the Latin American and Latino Studies office. More information about the course proposal and approval process and deadlines is available at http://lals.ucsc.edu.

Latin American and Latino Studies Major Planners

The following are two recommended academic plans for undertaking basic preparation for the Latin American and Latino studies major. Plan One is a guideline for students who commit to the major early in their academic career. Plan Two is for transfer students.

Plan One Entering Freshmen						
Year	Fall	Winter	Spring			
1st	Span 1	Span 2	Span 3			
(frsh)	Lals + 10	Lals	80-series			
2nd	Span 4	Span 5	Span 6 or 56			
(soph)	or Spss 61	or Spss 62	or Spss 63			
	Lals upper-divison	Lals upper-division				
	course	course	Lals 80-series			
(jr)	Lals 100A	Lals 100B				
Plan Two Junior Transfers						
Year	Fall	Winter	Spring			
3rd	Span 4	Span 5	Span 6 or 56			
(jr)	or Spss	61 or Spss 62	or Spss 63			
	Lals + 10	Lals 100A	Lals 100B			
	Lals 80-series	Lals 80-series	Lals upper-div			

4th	Lals upper-div	Lals upper-div	Lals upper-div
(sr)	Lals upper-div	Lals upper-div	Lals upper-div
	Lals 194 (likely at		
	least one)		

Combined Majors

The combined major options, requiring fewer courses than a double major, are established with the <u>global economics</u>, <u>literature</u>, <u>politics</u>, and <u>sociology</u> programs.

Latin American and Latino Studies/Global Economics

Students are required to take a total of 17 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/global economics, students complete a total of seven lower-division course requirements for both the Latin American and Latino studies and global economics majors. Students are assigned a faculty adviser from each discipline. Upper-division course requirements include Economics 100A, 100B, and 113; Latin American and Latino Studies 100A and 100B; and five additional elective courses, two from economics and three from Latin American and Latino studies. Two of the upper-division courses must be taught in Spanish (or Portuguese) and two to four (at least one quarter) must be courses of academic work study abroad, internship, or field study abroad in a Spanish- or Portuguese-speaking country. The comprehensive requirement is met by the completion of a senior thesis on a topic suitable to both global economics and Latin American and Latino studies, supervised by a faculty member from either department and read and approved by the student's advisers from both departments.

Latin American and Latino Studies/Literature

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. Students complete a total of four three lower-division course requirements, two each from the Literature and LALS major. One of the lower-division LALS classes must be LALS + 10 (no substitutions); for transfer students, a petition can be made to replace the other lower-division class with an appropriate course from another institution. one of the lower-division classes must be LTSP60; and one is an elective from the LALS 80 series or a Literature 80 series course in a relevant area of study. For transfer students, a petition can be made to replace the other lower-division elective course (relevant Lit 80) with an appropriate course from another institution.

Upper-division requirements include four core courses, LALS 100A, 100B, LTSP102A, and LTSP102B; and six additional elective courses, three from Spanish Literature and three from LALS. At least four of the upper-division courses must be taught in Spanish or Portuguese (with at least one taught by LALS core or participating faculty), and at least one of the Literature courses must address theoretical concerns. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by both departments. To complete the comprehensive requirement, students can write a senior thesis (by petition), enroll in an appropriate LALS Seminar (194 series), or enroll in an appropriate Literature Senior Seminar in the area of concentration. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments. Both departments must approve a study plan before the major can be

declared.

Latin American and Latino Studies/Politics

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/politics, students complete three lower-division course requirements. One of the lower-division courses must be LALS + 10 (no substitutions). For transfer students, a petition may be made to substitute the other lower-division courses (one Latin American and Latino studies elective, one course from Politics 1–79) with appropriate course work from another institution. The 10 upper-division courses include three core course requirements (Latin American and Latino Studies 100A and 100B, and Politics 100 and 140C), three courses from any Politics Department sequences (comparative, American, international, and theory), and four upper-division electives. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the politics/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. To complete the senior comprehensive requirement, students may take either a Politics (190) or Latin American and Latino Studies (194) senior seminar.

Latin American and Latino Studies/Sociology

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are four lower-division course requirements, two each from the sociology and Latin American and Latino studies majors. One of the lower-division LALS classes must be LALS + 10 (no substitutions); transfer students may petition to replace the other lower-division class with an appropriate course from another institution. Upper-division requirements include six core courses: Latin American and Latino Studies 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino Studies. At least one of the Latin American and Latino Studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: (1) writing a senior thesis, (2) passing an appropriate Latin American and Latino Studies Senior Seminar (194 series), or (3) completing the sociology course option of two additional sociology upper-division cluster III courses. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

Minor Requirements

The minor in Latin American and Latino studies consists of seven courses, including two lower-division courses (LALS + 10 and one other lower-division course) and five upper-division courses (including either Latin American and Latino Studies 100A or 100B and any other four upper-division courses that count towards the major). Knowledge of Spanish and/or Portuguese is highly recommended, but not required for the minor.

The Department of Latin American and Latino Studies offers a parenthetical notation in Latin American and Latino studies for Ph.D. students in anthropology, history, history of consciousness, literature, psychology, politics, sociology, and environmental studies. This concentration in Latin American and Latino studies provides graduate students with opportunities for interdisciplinary study with faculty from across the campus. Completion of the program will be listed on the graduate degree as a parenthetical notation. The request must originate in the degree-granting department. Students in other departments wishing to pursue a parenthetical notation in Latin American and Latino studies should consult with the chairs of their respective Ph.D. programs and of Latin American and Latino Studies. A list, updated annually, of regularly offered approved graduate courses is available in the Latin American and Latino Studies Department office and web site at http://lals.ucsc.edu. Graduate students are encouraged to complete the application to the parenthetical notation, available at the Latin American and Latino Studies Department, no later than their third year.

Requirements for the Notation

Committee Composition. The student must have a designated graduate adviser from among the Latin American and Latino studies core, participating, or affiliated faculty. This adviser will be in addition to the graduate adviser from the student's home department. The Latin American and Latino studies adviser must serve on the student's qualifying examination committee and/or on the student's dissertation committee.

Writing. The student must prepare a significant piece of writing in the area of Latin American and Latino studies. This writing may take the form of a substantial seminar paper, master's essay, or doctoral dissertation chapter.

Course requirements. The student must take five graduate courses in Latin American and Latino studies, including the required LALS 200 and LALS 297. The remainder can be selected from appropriate graduate offerings of any UCSC department, as long as they are taught by core, participating, or affiliated Latin American and Latino studies faculty.

Teaching. The student must serve as a teaching assistant in at least one Latin American and Latino studies course or teach a Latin American and Latino studies course independently in the regular curriculum or in Summer Session.

Courses. Graduate course work in Latin American and Latino studies is available both in the Latin American and Latino Studies Department and in other UCSC departments. Graduate courses to date in the Latin American and Latino Studies Department include

- 200, Bridging Latin American and Latino Studies
- 210, Latina Feminisms: Theory and Practice
- 212, Latina/o Ethnographic Practice
- 215, Latina Cultural Studies: Transborder Feminist Imaginaries
- 220, Transnational Civil Society: Limits and Possibilities
- 240, The Culture and Politics of Human Rights
- 242, Globalization, Transnationalism, and Gender in the Americas
- 297, Independent Studies
- 299, Thesis Research

Additional Courses of Interest

Latin American and Latino Studies

Program Description | Course Descriptions

Faculty and Professional Interests

Core Faculty

Gabriela Arredondo, Associate Professor of Latin American and Latino Studies Latina/o studies; U.S. immigration history; U.S. social and cultural history; Chicana/o history; critical race and ethnicity theories; Chicana and Mexicana feminisms; "borderlands" studies; history of modern Mexico

John G. Borrego, Professor of Latin American and Latino Studies Global political economy, national development, urban and regional planning, community organizing, social change, ethnic minorities, Mexico and the Southwest

Guillermo Delgado, Lecturer of Latin American and Latino Studies Latin America; comparative indigeniety; indigenous property rights; religion, magic, and ritual; ecologies and peasantries; Quechua/Andean linguistics, mining; alternative/electronic journalism; anthropology in the developing world; interethnicity; urbanization; social movements; culture theory

Jonathan Fox, Professor of Latin American and Latino Studies Latin American and Latino politics, including issues of democratization, social movements, social and environmental policy, immigration, and public interest groups

Rosa Linda Fregoso, Professor of Latin American and Latino Studies Cultural studies, transnational feminist theories, Chicana/o and Latina/o cinema, human rights and gender violence

Walter L. Goldfrank, Professor of Latin American and Latino Studies and Sociology Social change, historical sociology, world systems, modern Mexico, Chile, social movements and revolution, development theories, policies and outcomes

Susanne Jonas, Lecturer of Latin American and Latino Studies Latin American immigration and Latino communities in the U.S., comparative Latin American politics, contemporary Central America, Central American binational organizing, U.S.-Latin American cross-border issues, U.S. foreign policy in Latin America, the Left in Latin America, comparative peace processes in Central America and worldwide

Manuel Pastor Jr., Professor of Latin American and Latino Studies
Urban poverty and regional development, Latinos in the urban U.S., environmental justice,
macroeconomic stabilization in Latin America; distribution and growth in the developing world;
Cuban economic reform; Mexican economic reform

Cecilia M. Rivas, Assistant Professor of Latin American and Latino Studies Salvadoran transnationalism; media (Internet, newspapers); migration; globalization; race, ethnicity, and gender; bilingualism; consumption; El Salvador; Central America

Patricia Zavella, Professor of Latin American and Latino Studies Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexicana/o workers and U.S. capital

Participating Faculty

Mark D. Anderson, Assistant Professor of Anthropology Racial formation, diaspora, nationalism, transnationalism, culture and power; Latin America, African diaspora

Julianne Burton-Carvajal, Professor of Literature

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

Jeffrey T. Bury, Assistant Professor of Environmental Studies

Political ecology; sustainable development; Latin American studies; international relations; institutional dimensions of natural resource conservation in the global south

Pedro G. Castillo, Associate Professor of History

Chicano/a history and culture; American social and urban history; race, class, and gender in California history, immigration history, Latina/os in the U.S.

Carolyn Dean, Professor of History of Art and Visual Culture

Cultural histories of the native Americas and colonial Latin America

Maria Elena Diaz, Associate Professor of History

Colonial Caribbean and Latin America; social and cultural history; ethnohistory; slavery, race, and gender

Kent H. Eaton, Associate Professor of Politics

Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

Lisbeth Haas, Associate Professor of History

U.S.-Mexico borderlands, Chicano and Native American history; visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

Norma Klahn, Professor of Literature

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

Alma R. Martinez, Assistant Professor of Theater Art s

Acting, directing, dramatic criticism, Chicano/a theater with a focus on El Teatro Campesino and Luis Valdez, contemporary Mexican and Latin American, popular/political theater, Latino/a images in films

Lourdes Martínez-Echazábal, Associate Professor of Latin American Literature Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

Olga Nájera-Ramírez, Professor of Anthropology

Folklore theory, ritual, festival, dance, greater Mexican culture, history and folklore, transnationalism, identity; expressive culture, ethnomusicology, bilingual communication, gender, history, and culture of Latin America, the U.S., and Mexico

Marcia Ochoa, Assistant Professor of Community Studies

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, multimedia production, Latin American studies—Colombia and Venezuela, political philosophy, geography

Matthew D. O'Hara, Assistant Professor of History

Modern Latin America and Mexico; late colonial Latin America; religion, spirituality, and ritual; urban history; race, ethnicity, and identity; political culture

Paul Ortiz, Assistant Professor of Community Studies

African American history, U.S. social and political history, social documentary, oral history, subaltern studies and theories of resistance, U.S. South, Latino studies, social movements, working-class history; history of farm labor, African diaspora

Juan Poblete, Associate Professor of Literature

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices Catherine Ramirez, Assistant Professor of American Studies

Chicana and U.S. Latino literature, culture, and history; gender studies and feminist theory; visual culture and style politics; cultural studies; popular and urban youth cultures; speculative fiction, Afrofuturism, and Chicanafuturism; science, technology, race, and gender; theories and methods of American studies

B. Ruby Rich, Assistant Professor of Community Studies

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin

American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

Felici Schaeffer-Grabiel, Assistant Professor of Feminist Studies

Transnational feminism, migration, Latin American/Latino studies, Chicana/o studies, Internet, technology and the body, sexuality, gender and globalization

Helen Shapiro, Associate Professor of Sociology

Political economy, Latin American economic history and development (with an emphasis on Brazil), industrial policy, the auto industry, the state and transnational corporations

Gustavo O. Vazquez, Assistant Professor of Film and Digital Media

Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

Affiliated Faculty

Jorge Aladro Font, Professor of Spanish Literature

Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

Dana Frank, Professor of History

U.S. social and economic history; women, labor, and working-class history; contemporary political economy; modern Central America

Gregory S. Gilbert, Associate Professor of Environmental Studies

Disease ecology, conservation biology, tropical forest ecology, microbial ecology

Stephen R. Gliessman, Alfred E. Heller Professor of Agroecology (Environmental Studies)

Agroecology, sustainable agriculture, natural history, tropical land use and development, ecology and management of California vegetation

María Victoria González-Pagani, Lecturer in Spanish Language

Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

David E. Goodman, Professor of Environmental Studies

Political economy of international environmental issues, global agri-food systems, technology, North-South relations and sustainable development, Brazilian economy and society

Kirsten Silva Gruesz, Associate Professor of Literature

Comparative Americas studies, Chicano/Latino literatures and cultures, 19th-century U.S. literature, poetry and translation, genre theory

Karen D. Holl, Pepper-Giberson, Professor, Environmental Studies

Restoration ecology, conservation biology, landscape ecology

Aida Hurtado, Professor of Psychology

Social identity, feminist theory, social psychology of education, survey methodology

Kenneth Kletzer, Professor of Economics

International economics, economic theory, economic development

Deborah Letourneau, Professor of Environmental Studies

Agroecology, tropical biology, insect-plant interactions, biological control as an alternative to chemical pesticides

Daniel T. Linger, Professor of Anthropology

Self and identity, politics, cultural theory, cities, violence, transnational experience, Brazil, Japan

Paul M. Lubeck, Professor of Sociology

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

Lucinda Pease-Alvarez, Associate Professor of Education

Language and literacy development, language-minority education, bilingualism, informal learning

Michael Rotkin, Lecturer in Community Studies

Marxist theory, capitalist system, community organizing, electoral politics, media, government programs, community power structure, institutional analysis, and affirmative action

John M. Schechter, Professor of Music

Cultural musicology; Ibero-American musics of South America; Quechua music culture; American Indian music and thought; music theory; music and ritual; music and discourse; transculturative music-making; Stravinsky; Founder, UCSC Latin American Ensembles (dir. 1986-2000)

Ana M. Seara, Lecturer, Portuguese Language

Portuguese language; literature, cinema, and music of Portuguese-speaking world; acquisition and teaching of foreign, second, and heritage languages

David G. Sweet, Professor Emeritus of History

Kip Telléz, Associate Professor of Education

Preparation of teachers for linguistic and cultural diversity, second language learning, studies of the school curriculum, educational assessment

Larry Trujillo, Lecturer in Community Studies

Chicana/o studies, ethnic studies, grassroots community organizations, prison-industrial complex, student development, Chicano music

Carter Wilson, Professor Emeritus of Community Studies

Karen Tei Yamashita, Associate Professor of Literature(Creative Writing) History and anthropology of Japanese immigration to Brazil, Asian American literature, modern fiction, playwriting

Latin American and Latino Studies

32 Merrill College (831) 459-4284 http://lals.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Introduction to Latin American and Latino Studies. F,W,S

Interdisciplinary introduction presenting the elements for studying Latin American culture, society, economics, and politics, as well as the dynamics of Latino communities in the U.S. Special attention paid to issues of race, gender, and class, to emerging political and economic shifts in the Americas, and to new local and transnational efforts for social change on the part of Latin America's peoples and Latinos in the U.S. (General Education Code(s): IS, E.) *The Staff*

10. Bridging Latin American and Latina/o Studies. F

Focuses on: transnational migrations; social inequalities; collective action and social movements; and cultural productions, products, or imaginaries. Examines how transnational migration and hemispheric integration are transforming Latin American studies and Chicana/o-Latina/o studies. Explores the influence of neoliberialism and globalization, especially the intersection of critical analysis and social-justice praxis. (General Education Code(s): E.) *P. Zavella*

42. Student-Directed Seminar.

Seminar taught by upper-division student under faculty supervision. Requires prior approval by Latin American and Latino Studies Department and two quarters (fall, winter) of supervised preparation prior to teaching in spring quarter. (See course 192). *The Staff*

80A. Peoples and Cultures of the Americas: Trends and Issues. *

Anthropological in approach, concentrates on how Latin America's image is constructed and studied today. Topics include geographies, nationalities, social classes, ethnicities, gender, ecologies, regions, cultural areas, folklore, revolutions, rural and urban societies. (General Education Code(s): T3-Social Sciences, E.) *G. Delgado*

80B. Social Movements in Latin America.

Examines contemporary social movements in Latin America, especially those that arose from popular response to different forms of social exclusion and to authoritarian political systems. Explores a variety of popular movements, their successes and setbacks, including rural and urban uprisings, native nations and their descendants, women, African descendants, labor, environmental and grassroots movements. Enrollment limited to 25. (General Education Code(s): T3-Social Sciences, E.) *The Staff*

80C. Power and Resistance in the Americas: Cross-Border Social Movements. W

Focuses on politics of power and resistance regarding major cross-border issues

facing Latin Americans and Latinos in the 21st century. Emphasizes migration and migrant organizing; neoliberal "free trade" and implications for labor; organizing by women's, indigenous, and ecological movements; and for democracy and human rights. Many specific cases drawn from binational Central American experiences. (General Education Code(s): T3-Social Sciences, E.) *G. Delgado*

80D. Political Change in Mexico. F

Reviews broad trends in contemporary Mexican politics against the backdrop of long-term historical, social, and economic change throughout the 20th century, analyzing how power is both wielded from above and created from below. The course covers national politics, grassroots movements for social change and democratization, environmental challenges, indigenous movements, the media, and the politics of immigration and North American integration. (General Education Code(s): T3-Social Sciences, E.) *J. Fox*

80F. Latinos in the U.S.: A Comparative Perspective. F

Analyzes the Latino experience in the U.S. with a special focus on strategies for economic and social empowerment. Stresses the multiplicity of the U.S. Latino community, drawing comparative lessons from Cuban-American, Puerto Rican, Chicano/Mexicano, and Central American patterns of economic participation and political mobilization. (General Education Code(s): T3-Social Sciences, E.) *L. Trujillo*

80H. Comparative Latina/o Histories. *

Designed to survey recent works in the field of Latina and Latino histories, with particular emphasis on historiographical approaches and topics in the field. Readings are chosen to expose a selection of the varied histories and cultures of Latina/os in the U.S., and focus primarily on Mexicans, Puerto Ricans, and Cubans. (General Education Code(s): T3-Social Sciences, E.) *G. Arredondo*

80M. Introduction to Mayan History and Literature. *

An introductory lecture and discussion course on literature and history of Mayan people of Mexico and Guatemala in the last 500 years; concentration also on representation of the Maya by westerners since the invasion of 1492. (General Education Code(s): T3-Social Sciences, E.) *G. Wilson*

80Q. Musica Latina. F

Surveys various musical forms and styles that have developed in Latin America and Latino communities in the U.S. Discusses concept of hybridity and grapples with this as a central issue in the evolution of Latin American/Latino music. Addresses migration of music, which not only contributes to its distribution but also to the evolvement of musical practices of forms, styles and genres across borders. (General Education Code(s): T3-Social Sciences, E.) *The Staff*

80S. Sexualities and Genders in Latin American and Latina/o Studies. S

Introduction to issues and themes surrounding sexualities and genders within Latin American and Latina/o studies. Background in the basic theoretical and historical frameworks of gender and its relationship to sexuality. In addition to cross-border perspectives, this course also examines how gender and sexuality are structured and experienced through other social categories. Enrollment limited to 70. (General Education Code(s): T3-Social Sciences, E.) *The Staff*

80T. Topics in LALS Cinema. S

Lower-division offering on a topic of particular cultural, historical or contemporary

interest in the field of Latin American and Latino/a cinema. Enrollment limited to 60. (General Education Code(s): T3-Social Sciences, E.) *The Staff, A. Seara*

80X. Central American Peoples and Cultures. *

Introduces histories and cultures of Central American societies. Focus is on the region's rich human mosaic—analyzing literature, poetry, music, and art in a broad historical context. (General Education Code(s): T5-Humanities and Arts or Social Sciences, E.) *The Staff*

81A. Mexican Folklorico Dance (2 credits). F

Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. Students taught choreographed dances from various regions of Mexico and also learn dance techniques (técnica) and stage make-up application. Additional workshops and lectures offered to supplement class. Open to all students; no previous experience required. (Also offered as Anthropology 81A. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): A.) O. Nájera-Ramírez

81B. Mexican Folklorico Dance (2 credits). W

Second course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. (Also offered as Anthropology 81B. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): A.) *O. Nájera Ramíirez*

81C. Mexican Folklorico Dance (2 credits). S

Third course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklorico dance. (Also offered as Anthropology 81C. Students cannot receive credit for both courses.) Prerequisite(s): course 81A or 81B. May be repeated for credit. (General Education Code(s): A.) O. Nájera-Ramírez

Upper-Division Courses

100A. Politics and Society: Concepts and Methods. W

Focuses on social science issues through the interdisciplinary analysis of power relations. Compares diverse analytical strategies, assesses contending explanations, and builds practical research skills in the field of Latin American and Latino Studies. Topics change yearly, but can include environmental justice, access to education, political participation, gender, and migration. Prerequisite(s): course 1 or 10. (General Education Code(s): E.) *P. Zavella, J. Fox*

100B. Culture and Society: Culture in a Global Context. S

Focuses on transnational, regional, and local features of Latina/o and Latin American cultural production and artistic expression: how culture is shaped by historical, social, and political forces; how cultural and artistic practices shape the social world; and how culture is produced in an interconnected, postindustrial, and globalized economy. Prerequisite(s): courses 1, 10 or History 11B. Enrollment restricted to Latin American and Latino studies majors, minors, and combined majors with global economics, sociology, literature, and politics. (General Education Code(s): E.) *R. Fregoso, G. Delgado*

101. Using Media. *

Hands-on survey of print, broadcast, audiovisual, and electronic media. Students complete and present a dozen different media production assignments as part of permanent portfolio. Assignments have Latino/Latin American focus. Peer critique of

media projects. Prerequisite(s): concurrent enrollment in course 101L. (General Education Code(s): E.) *The Staff, J. Burton-Carvajal*

101L. Using Media: Video Laboratory (2 credits). *

Trains students in the fundamentals of video preparation, production and post-production through Social Sciences Media Laboratory. Prerequisite(s): concurrent enrollment in course 101. *J. Burton-Carvajal*

111. The U.S.-Mexican Border Region. S

Global and national forces have transformed the 2,000 mile United States/Mexico border region into a site for world market factories. Analyzes how this transformation has affected workers and communities and systematically reviews subjective responses. (General Education Code(s): E.) *J. Borrego*

120. Cultures of the Sacred. S

Comprehensive seminar on notions of the sacred, dealing with the complexities of magic and religious themes in the Americas as seen from an anthropological perspective. Topics include both popular religion as well as non-Christian religious practices. Based on recent anthropological literature, as well as new developments concerning rituals related to the sacred (spiritualism, voodoo, santeria, magical curing, spirit possession, glossolalia, earth feeding, rituals of reciprocity). (General Education Code(s): E.) *G. Delgado*

121. Early California Cultures. *

Examines the cultural practices and expressions of four early California populations—indigenous, Spanish, Mexican/Californio, and immigrant Anglo-Americans—from 1770–1850—and how this led to formation of current cultural practices. *J. Burton-Carvajal*

123A. Cinema and Social Change: Feature Films. *

Intensive weekly sessions contextualize, view and analyze a dozen classical fictional films from Latin America (1960s-1990s). (General Education Code(s): E.) *J. Burton-Carvajal*

123B. Cinema and Social Change: Documentary Transformations. *

Surveys the range of documentary practices designed as catalysts for and interventions in processes of social change from the 1950s to the present, with particular emphasis on sociological and political filmmaking. (General Education Code(s): E.) *J. Burton-Carvajal*

125. Latinos in the Media. *

Introduces portrayals of Latinos in the U.S. media including magazines, film, and television. Covers the most recent social psychological research on media representations and implications for identity. (Also offered as Psychology 158. Students cannot receive credit for both courses.) Prerequisite(s): Psychology 3 or course 1. (General Education Code(s): E.) *The Staff*

126A. Global Capitalism and Community Restructuring. W

Examines how Watsonville (U.S.) and Irapuato (Mexico) are being restructured by national development, North American economic integration (NAFTA), and global capitalism. Explores the relentless penetration of market imperatives, their impact on the communities, and community response; costs/benefits of being abandoned by or being attractive to global capital; and how people are surviving—scrambling to find jobs, keeping families together, and engaging in binational strategies for survival.

Prerequisite(s): permission of instructor; concurrent enrollment in laboratory course 126B. Enrollment restricted to sophomores and juniors. Enrollment limited to 25. (General Education Code(s): IS, E.) *J. Borrego*

126B. Voices from the Watsonville Community. W

Weekly Wednesday evening seminar in Watsonville allows students to interact with local workers, organizers, immigration and citizenship NGO's, affordable housing non-profits, entrepreneurs, large commercial developers, county planners, city managers, PVUSD educators, health activists, politicians, commercial and organic farmers, food processing owners/plant managers, and environmentalists, in order to develop a deeper understanding of the past, present, and future of the community and the region. Class will present findings and interact with panel of community members on a Saturday morning during first weekend of spring quarter. Prerequisite(s): concurrent enrollment in course 126A. Enrollment restricted to sophomores and juniors. Enrollment limited to 25. (General Education Code(s): IS, E.) *J. Borrego*

127. Mexico and the Movies. *

Surveys a century of film production in Mexico, concentrating on major works by leading directors and emphasizing the two most popular forms—comedy and melodrama—in the context of constructions of national identity from 1931, the beginning of the sound era, to the present. Knowledge of Spanish highly recommended. (General Education Code(s): E.) *J. Burton-Carvajal*

128. Latino Media in the U.S. *

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role the media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor. (Also offered as Writing 128. Students cannot receive credit for both courses.) *The Staff*

129. Women Filmmakers: Latin American and Latina. *

Focuses on the work of a dozen major Latin American and Latina filmmakers from Argentina, Brazil, Venezuela, Mexico, and the U.S., including María Luisa Bemberg, María Navaro, Matilde Landeta, Lourdes Portillo, concentrating on films of the last two decades. (General Education Code(s): E.) *J. Burton-Carvajal, R. Fregoso*

140. Rural Mexico in Crisis. *

Focuses on political, social, and economic changes in rural Mexico from the 1910 revolution through the Zapatista rebellion. Emphasizes the interaction between the state, markets, and rural civil society, covering agricultural policy, agrarian reform and counter-reform, grassroots development efforts, local politics, and migration. (General Education Code(s): E.) *J. Fox*

141. Latino Communities and Economic Development. S

Examines the economic experiences of Latinas/os in the U.S. and underlying conditions of Latino workers, Hispanic businesses, and Latino community development. By examining their economic status, profiles Latino workers, the self-employed, and communities by region, cultural differences, age, gender, education, and immigrant make-up. Enrollment restricted to juniors and seniors. Enrollment limited to 35. (General Education Code(s): E.) *The Staff*

142A. Central America: Revolution, Intervention, and Social Change. S

Historical and contemporary overview of the region. More detailed focus on conditions generating popular and revolutionary movements in Nicaragua, El Salvador, and Guatemala during the 1980s; U.S. policy responses; and peace negotiation processes. Examines prospects for Central America in the 21st century including migration to the U.S. (General Education Code(s): E.) *S. Jonas*

142B. The Caribbean: Revolution, Intervention, and Social Change. *

Focuses on the political economy and recent/contemporary processes of social transformation in Cuba, Haiti, Dominican Republic, Puerto Rico, and English-speaking Caribbean countries; U.S. role in the region; Caribbean migrant communities in the U.S. (General Education Code(s): E.) *S. Jonas*

143. Race and Ethnicity. S

Race and ethnicity have been—and continue to be—powerful forces shaping the U.S. experience. This course examines a range of conceptual approaches and monographic studies grounded in the history of the U.S. The readings provide various criteria for studying and understanding these phenomena. The course problematizes "race" by asking what the readings tell us about "race-making" and the reproduction of racial ideologies in specific historical contexts. Similarly, "ethnicity" is treated as a historically specific social construct. (General Education Code(s): E.) *G. Arredondo*

143J. Global Political Economy. F

Analyzes the global, social, economic, and political forces that shape transnational, national, and regional societal formations and consequently the entire environment for social change. Examines the evolution of revolutionary struggle and its origins within and impact upon the evolving capitalist system. *J. Borrego*

144. Chicanas/Mexicanas in the U.S. *

Explores current historical and theoretical writings on the lived experiences of Chicanas and Mexicana women in U.S. history. Themes include domination/resistance politics, (re)presentations, contestation, social reproduction, identity and difference. (General Education Code(s): E.) *G. Arredondo*

145. Grassroots Social Change in Latin America. *

Focuses on the analysis of collective action by underrepresented groups in Latin America. Concepts and issues include political participation and impact, gender, ethnicity and race, class, the environment, religion, non-governmental organizations, and social capital. Prerequisite(s): any two Latin American and Latino studies courses or permission of instructor; open to graduate students. Enrollment limited to 25. (General Education Code(s): E.) *The Staff*

146. Urban Crisis in the Americas. *

Multidisciplinary course on the cities of Latin America and Latino barrios in the U.S. Examines how cities have been constituted spatially, economically, and culturally from the Pre-Columbian era to the present. (General Education Code(s): E.) *G. Delgado*

147. Land and Peasants in the Americas. *

Explores current trends of rural societies in Latin America. Places emphasis on the human experience of the peasantry. Concentrates on specific cases of rural migrations throughout the Americas. Land and environmental issues, peasant women's experiences, rural society and the future of the Latin American peasantry are discussed. Knowledge of Spanish recommended. Offered in alternate academic

148. Workers in the Americas. F

Current issues related to the experience of the Latin American and Latino working classes. Studies organized labor, resistance-literature, struggles for wages and political power, gender and labor, and labor autonomy. Offered in alternate academic years. (General Education Code(s): E.) *G. Delgado*

152. Media and Commodities Between the Americas. W

Examines the circuits of media, commodities, and migration connecting the Americas in an age of globalization. Issues of states, transnational markets, social relations, and cultural representations addressed. Relationship between consumption, nationalism, and globalization is considered critically. Enrollment limited to 35. (General Education Code(s): E.) *C.Rivas*

160. North American Integration: Post-NAFTA. *

Analyzes the multi-dimensional process of integration in North America via NAFTA. Covers issues of trade and investment flows between Canada, the U.S., and Mexico, including important legislative, scientific, technological, cultural, and political components, as well as social dislocations and political challenges associated with NAFTA. (General Education Code(s): E.) *J. Borrego, J. Fox*

161P. Theater in the "Chicano Power" Movement. *

Covers the rise of Teatro Chicano as a cultural–political force within the 1960's "Chicano Power" Movement starting with founding playwriter Luis Valez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez. (Also offered as Theater Arts 161P. Students cannot receive credit for both courses.) (General Education Code(s): A, E.) *The Staff*

162. U.S. Policy in the Americas. W

Studies U.S. policies toward Latin America and hemisphere-wide (primarily since WWII), including Cold War policies and interventions, U.S. response to the Cuban Revolution, the Alliance for Progress and counterinsurgency against revolutionary movements in the 1960s–1980s, crises in U.S. hegemony, NAFTA and other neoliberal free trade agreements, U.S. policies toward Latin American migrants, and increasingly difficult dilemmas for U.S. policy in the 21st century with the spread of leftist and populist governments and anti-neoliberal protests in Latin America. *S. Jonas*

164. Action-Research for Social Change, Environmental Quality: Lessons Learned from Latin America, U.S. F

Focuses on participatory action-research, which begins with the dual purpose of creating positive social/environmental change and contributing to scientific knowledge. Students develop specific skills, critical reflection and ability to synthesize different methods, popular knowledge, and strategies for changing policy. Introduces students to principles and practice of participatory action-research. Enrollment restricted to junior and senior Latin American and Latino studies majors and combined majors with economics, global economics, literature, politics, and sociology. Enrollment limited to 35. (General Education Code(s): E.) *The Staff*

166. Latino Families in Transition. *

Explores the complex nature of Latino families in the U.S., which like other American families are undergoing profound changes. Placing families within a

historical context of post-'60s social upheaval, such as feminism, migration, "reconstructed" or multiple-earner households, examines how family members adapt, resist, and/or construct alternative visions and practices of family life. Prerequisite(s): course 1. Enrollment limited to 40. (General Education Code(s): E.) *P. Zavella*

167. Amazonian Societies and the Environment. *

Overview of contemporary Amazonian societies and the environment from a historical perspective. Goes beyond the understanding of the impact of modern technology on the environment to focus on the Amazon as a long-term human construct. Enrollment limited to 25. (General Education Code(s): E.) *The Staff*

168. Economic History of Latin America. *

Sheds light on Latin America's contemporary social and economic developments by providing an appreciation of their historical roots. Focusing on the period from independence until WWII, evaluates contesting explanations for Latin America's relatively poor economic performance and divergent policy implications. Prerequisite(s): course 1. (General Education Code(s): E.) *H. Shapiro*

169. Latin American Industrialization in a Global Perspective: Past, Present, and Future. *

Analyzes the economic, political, and social aspects of the industrialization process in Latin America. Evaluates import substitution policies, the changing roles of the state and foreign and domestic capital, and the impact of recent trade liberalization. Compares Latin America's development with that of the East Asian newlyindustrialized countries (NICs) and looks at the implications of globalization. (General Education Code(s): E.) *H. Shapiro*

170. Indigenous Struggles in the Americas. *

Focuses on the way Natives of First Peoples have interacted voluntarily and involuntarily with nonindigenous cultures. Examines their perspectives, thoughts, frustrations, and successes. Touches on land issues and examines the way current indigenous cultures of Latin America face and adapt to social change. Focuses mainly on the Andes, lowland Amazon, Mesoamerica, and other areas. (General Education Code(s): E.) *G. Delgado*

171. Talleres de poesia. *

Taught in Spanish. Develops creative writing skills through reading, discussion, and a progression of hands-on group poetry writing sessions. (Formerly course 194W.) (General Education Code(s): A.) *The Staff*

173. Latin American Immigration to the U.S. F

Interdisciplinary examination of Latin American immigration to the U.S. Topics include history of U.S. as an immigrant nation, economic and political context for migration, immigration process/experience, U.S. immigration/refugee policies, anti-immigrant backlash today, issues facing Latino immigrant communities to the U.S., bi-national communities. (General Education Code(s): E.) S. Jonas

175. Migration, Gender, and Health. *

Through an interdisciplinary, cross-border approach, examines complex nature of Latino health in relation to migration and how women and men experience health problems differently. Examines how health problems are created by economic and social conditions migrants experience and how outreach agencies can design culturally sensitive programs. Prerequisite(s): course 100A. (General Education Code(s): E.) *P. Zavella*

176. Gender, the Nation, and Latina Cinema. F

Applies theories of transnational feminism, decolonization, and globalization to the study of Latina cinematic representation in the Americas. Focusing on Latina image making, course explores representations of race, sexuality, and the nation; citizenship, diaspora, and belonging; gender-based violence and racialized state violence; militarization, human rights, and global justice. (Formerly *Transnational Feminism in Cinema*.) (General Education Code(s): E.) *The Staff, R. Fregoso*

178. Gender, Transnationalism, and Globalization. F

Focusing on Latin America, examines ways relationship of gender and feminism to contemporary theories of transnationalism and globalization affect social understandings and formation of ideas about nation, national borders, boundaries, and social identities. Explores links between transnational and globalizing processes and emerging global civil society and transborder feminist solidarity movements in the Americas. Enrollment limited to 25. (General Education Code(s): E.) *The Staff, R. Fregoso*

179D. Mayan Society, Literature, and Thought. *

Intensive investigation of major aspects of the ethnography and literature of Mayan people since the Spanish Invasion. Concentration on forms of social life and meaning of discourses such as public performance in fiestas, joking, and tale-telling; and on individual biographic/autobiographic expression. Prerequisite(s): one of the following: course 80M, 100B, 142A, 147, 170, or History of Art and Visual Culture 150A. Enrollment limited to 25. (General Education Code(s): E.) *C. Wilson*

180. Borders: Real and Imagined. W

Situates "The Border" historically and within the context of U.S. imperialism. Examines the formalization of political "borders," methods of enforcement, and intra-group conflicts. Examines the varied experiences of colonialism and immigration between Mexicans, Puerto Ricans, Native Americans, and Cubans. Explores how the tools of "The Border" and "Borderlands" are being used to untangle the roles of race prejudice and sexual and gender discrimination. (General Education Code(s): E.) *G. Arredondo*

190. Internship. F,W,S

Internships with campus or community organizations sponsored and evaluated by a Latin American and Latino studies faculty member. Students write an analytical paper or produce another major work agreed upon by student, faculty supervisor, and internship sponsor; sponsor must also provide review of experience. Students submit petition to sponsoring agency. *The Staff*

190F. Internship (2 credits). F,W,S

Internships with campus or community organizations sponsored and evaluated by a faculty member from Latin American and Latino studies. Students write a short (8-page) descriptive paper or produce another work agreed upon by student and faculty supervisor. Students submit petition to sponsoring agency. *The Staff*

191. Latin American Studies Teaching Apprenticeship. F,W,S

Advanced students serve as facilitators for small discussion groups or aid in reading of papers related to Latin American Studies courses. Students are expected to read all course assignments and meet with instructors to discuss the teaching process. May not be counted toward major requirements. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching under faculty supervision of a lower-division course in Latin American and Latino studies, normally done by majors in the final quarter of study as the senior project. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study in local Spanish-speaking community. Students submit petition to sponsoring agency. *The Staff*

194B. Colombia: Sociedad y politica. *

Taught in Spanish. Overview of contemporary Colombian politics and society in historical and institutional context, with an interdisciplinary approach to the causes and consequences of political violence. Special focus on agrarian and ethnic conflict. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. *The Staff*

194C. Trabajo y empresa en América Latina. *

Taught in Spanish. An introduction to the conflict between the economic interests of the working class and the differing strategies of the several models of "development." Analyzes the methods of resistance of popular movements in their confrontation with entrepreneurial and transnational capital. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *G. Delgado*

194D. Hemispheric Dialogues: Bridging Latin American and Latina/o Studies. *

The rapid acceleration of North-South flows of people, resources, and ideas in the Americas has triggered a rethinking of both Latina/o studies and Latin American studies approaches. By bringing empirical materials and conceptual frameworks from Latin American studies to bear on Latina/o studies and vice versa, this advanced research seminar explores the interlocking social, cultural, economic, and political processes that connect Latin America and U.S. Latina/o communities. Prerequisite(s): course 100A or 100B. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

194E. Latino International Migration: Case Studies, Policy/Law, Transnational Practices. S

Seminar designed for students who already have basic understanding of migration and who want to pursue topic in greater depth. Gives an understanding of various methodological approaches to study of migration, taken from different disciplinary fields. Prerequisite(s): course 173 or permission of instructor. Enrollment restricted to senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *S. Jonas*

194G. Chile: Social and Political Change. S

Analysis of Chilean politics and society from the election of Salvador Allende in 1970 to the present. Particular emphasis is given to understanding the different forces, internal as well as external, that broke the Chilean tradition of democratic rule in 1973, and to the current configuration. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *W. Goldfrank*

194J. Movimientos sociales contemporáneos. W

Taught in Spanish. Provides students with an opportunity to critically analyze various

national/international impacts of Latino/Latin American social movements. Reviews pertinent social scientific literature and examines conclusions reached by their authors. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *G. Delgado*

194K. Drogas en la historia y la cultura de las Américas. S

Taught in Spanish. Studies the devastating effects drugs have on the Americas and the subcultures they (re)produce. Features critical readings on the impact of drugs in the Americas. Studies the origins of substances (tobacco, coca, marijuana), and looks at how they have been used through time before concentrating on the present. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *G. Delgado*

194L. Etnicidad, medio ambiente y desarrollo. *

Taught in Spanish. Interdisciplinary analysis of the interaction between ethnicity, tropical forests, and development policy in Latin America. Historical, anthropological, and sociological perspectives on natural resource rights and use, with a focus on Afro-Latin American and indigenous peoples. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

194M. Twentieth-Century Revolutions. W

Treatment of 20th-century Latin American revolutions from Zapata to the Zapatistas. Focuses on the causes and consequences of revolutions rather than on their narrative histories. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 20. (General Education Code(s): E.) *W. Goldfrank, G. Arredondo*

194N. Las izquierdas en América Latina: ayer, hoy y mañana. F

Taught in Spanish. Focuses on legacies of Latin America's popular and revolutionary movements since the 1960s, current transformations, and 21st-century prospects. Major emphasis on contemporary evaluations/debates about past movements and new perspectives. Also features a section on cross-border strategies, movements, and alliances for social justice. Enrollment restricted to junior and senior Latin American and Latino Studies majors, minors, combined or double majors. Enrollment limited to 20. (General Education Code(s): E.) *S. Jonas*

194P. Tale of Two Cities. *

A comparative study of the social, economic, cultural, political, and geographical development of Los Angeles and Mexico City in the 20th century. Emphasis on the diverse peoples, changing physical environment and various images/interpretations of these two world cities. (Also offered as History 190D. Students cannot receive credit for both courses.) Prerequisite(s): two upper-division history courses and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior Latin American and Latino studies and history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Castillo*

195A. Seminar in Research Methods and Writing. W

Provides training in essential research skills, including, topic definition, components of library/bibliographic and literature reviews, interview techniques, fieldwork; development of writing, revising, and editing skills; collective discussion of projects. Strongly recommended for students working on senior thesis, project, or expanded paper. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior LALS majors, minors,

combined, or double majors. Enrollment limited to 20. (General Education Code(s): W, E.) *S. Jonas*

195B. Senior Project. F,W,S

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195C. Senior Project. F,W,S

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency. *The Staff*

196. Field Study Seminar. S

Emphasizes ethnographic strategies of fieldwork. Primarily oriented to students interested in understanding the daily life of societies and cultures. Prepares students both to conduct fieldwork, and to process their fieldwork experience. Covers complexities related to the experience of "stepping out of" one's own culture. Prerequisite(s): concurrent enrollment in course 196L. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. *J. Borrego*

196L. Field Study Seminar Lab (2 credits). S

Media lab trains students in the use of electronic and photographic media for the acquisition of field data. Through lectures, demonstrations, hands-on field exercises and review of students' media exercises, students will learn the fundamentals of photography, video production, and audio recording in the field. Prerequisite(s): concurrent enrollment in course 196. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. *J. Borrego*

198. Field Study. F,W,S

Off-campus study in Latin America, the Caribbean, or nonlocal Spanish-speaking community in the U.S. Nature of proposed study/project to be discussed with sponsoring instructor(s) before undertaking field study; credit toward major (maximum of three courses per quarter) conferred upon completion of all stipulated requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Supervised directed reading; weekly or biweekly meetings with instructor. Final paper or examination required. Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Supervised research and writing of an expanded paper, completed in conjunction with requisite writing for an upper-division course taken for credit in the major. Students submit petition to sponsoring agency. *The Staff*

Graduate Courses

200. Bridging Latin American and Latina/o Studies. W

Explores social, cultural, economic, and political changes that connect Latin America and U.S. Latina/o communities. The objective of this interdisciplinary team-taught course is to bridge previously distinct research approaches of Latin American and Latina/o studies to better understand processes that link peoples and ideas across borders as well as help students to conceptually and methodologically identify and design new objects of study and revisit traditional approaches. Core requirement for

students pursuing the Parenthetical Notation in Latin American and Latino studies. Enrollment restricted to graduate students. *G. Arredondo*

210. Latina Feminisms: Theory and Practice. *

Through an interdisciplinary approach, explores Latina feminist social theory and scholarly practice—especially in representation and interpretation of Latina experiences. Examining key texts at different historical junctures, charts how Latinas of varied ethnic, class, sexual, or racialized social locations have constructed oppositional and/or relational theories and alternative epistemologies or political scholarly interventions and, in the process, have problematized borders, identities, cultural expressions, and coalitions. Enrollment restricted to graduate students. *P. Zavella*

212. Latina/o Ethnographic Practice. S

Interrogates the social construction of Latino cultures in their varied regional, national-ethnic, and gendered contexts. Assumes that culture is a dynamic process constructed within a context of hierarchical relations of group power, in which Latino groups have been structurally subordinated and socially oppressed. Focuses more on how power relations create a context for the creation of specific Latino cultural expressions and processes than on unraveling the structures of oppression. Enrollment restricted to graduate students. Enrollment limited to 25. *P. Zavella*

215. Latina Cultural Studies: Transborder Feminist Imaginaries. *

Interdisciplinary analysis of feminist theories that inform the field of Latina cultural studies in the Americas, with an emphasis on transnational and hemispheric dialogues. Designed for students pursuing the Parenthetical Notation in Latin American and Latino studies and those with interest in globality, transnational feminist theory, and critical race and postcolonial theories. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Fregoso*

220. Transnational Civil Society: Limits and Possibilities. F

Analyzes social, civic, and political actors that come together across borders to constitute transnational civil society, drawing from political sociology, political economy, comparative politics, and anthropology to address collective identity formation, collective action, institutional impacts, and political cultures. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Fox*

240. Culture and Politics of Human Rights. *

Examines the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating women's specificity within international human rights law. Focus on application of international and regional human rights conventions and new human rights standards. (Formerly *Feminism and the Culture and Politics of Human Rights.*) (Also offered as Feminist Studies 240. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *R. Fregoso*

242. Globalization, Transnationalism, and Gender in the Americas. *

Explores how globalization, transnationalism, and the social construction of gender are interrelated, contingent, and subject to human agency and resistance. Examines particular configurations of globalization, transnationalism, and gender though the Améicas and their implications for race, space, work, social movements, migration, and construction of collective memory. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Fregoso, P. Zavella*

297. Independent Study. F,W,S

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

* Not offered in 2007-08

Legal Studies

27 Merrill College (831) 459-2056 legalstudies@ucsc.edu

http://zzyx.ucsc.edu/Pol/legal.html

Faculty | Course Descriptions

(There were no substantive changes to the Legal Studies Program Description from the General Catalog 2006-08.)

Program Description

Legal studies is an interdisciplinary program offered under the auspices of the Politics Department. It is designed for students who wish to use the methods and perspectives of various academic disciplines to study legal issues and to use the conceptual framework of the law to illuminate empirical and theoretical concerns in the various disciplines. For example, a student might use approaches from psychology and philosophy to study the legal problem of punishment; or draw on doctrinal categories from public and private law to study the changing historical role of market and nonmarket relations within ongoing institutions; or use approaches from critical race theory and feminist studies to better understand matters of civil rights and privacy.

To complete the major, students are required to take courses in legal institutions, constitutional law, and international law, as well as take courses in each of three broad themes: legal theory and philosophy, the role of law in society, and legal institutions. Each of these themes is intentionally broadly defined. Within legal theory, students may take courses in legal jurisprudence, logic, and theories of crime and punishment; within law and society, courses range from feminism and race to psychology and economics; within public law and institutions, courses range from environmental law to human rights law to an introduction to litigation. Students are also expected to take an introductory course in philosophy as well as a senior writing seminar.

Legal studies is intended to appeal to students who wish to take a concentration of courses on the law from a variety of disciplinary and methodological perspectives. The major is not intended as a substitute or preparation for any part of a law school curriculum but rather as a full field of study within the liberal arts curriculum. As such, it is a good preparation for a variety of future activities. Students graduating in legal studies are particularly well qualified to pursue graduate work on legal topics in humanities and social science disciplines or to attend professional school in fields such as public policy, business administration, social work, and law. Students are also encouraged to participate in field work and law-related internships in the community, and to develop their own extensive independent research projects.

Declaring the major in legal studies is a three-step process: (1) attend a declaration orientation workshop; (2) meet with your faculty adviser; (3) meet with the legal studies undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose.

The legal studies program offers a minor degree as well as the major degree.

Requirements for the Major

Lower-Division Course Requirements - 2 courses

Legal Studies 10 Introduction to Legal Process

Philosophy 9, 22, or 24. All legal studies majors are required to take one of the three listed Philosophy courses. (See the Philosophy section in this catalog for course descriptions.)

Although these courses are not prerequisites for most upper-division courses, the faculty strongly recommend that students complete these lower-division requirements early in their program of study.

Upper-Division Course Requirements - 2 courses

Legal Studies 111A Constitutional Law or Legal Studies 111B Civil Liberties Legal Studies 174 International Law

Core course Requirements - 6 courses

Students are required to take six core courses, two in each of three concentrations: Theory, Public Law and Institutions, and Law and Society.

Theory

Feminist Interventions (Politics course) 103 105A Ancient Political Thought 105B Early Modern Political Thought105C Modern Political Thought 106 Marxism as a Method 107 Political Morality of Survivorship and Recovery 109 Orientalism (Politics course) 144 Social and Political Philosophy 146 Philosophy of Law 155 Topics in American Legal History 157 Political Jurisprudence

Public Law and Institutions

111A	Problems in Constitutional Law
111B	Civil Liberties
116	Comparative Law
120A	Congress, President, and the Court in American Politics
120C	State and Capitalism in American Political Development
128	Poverty and Public Policy
131	Wildlife, Wilderness, and the Law
132	California Water Law and Policy
133	Law of Democracy
136	Federal Indian Law and Tribal Sovereignty
137	International Environmental Law and Policy
139	War Crimes
149	Environmental Law and Policy
152	Courts and Litigation
155	Topics in American Legal History
156	Administrative Jurisprudence
159	Property and the Law
174	International Law

Law and Society		
107	Political Morality of Survivorship and Recovery	
110	Law and Social Issues	
112	Women and the Law (Politics)	
113	Gay Rights and the Law	
118	Political Anthropology	
120B	Society and Democracy in American Political Development	
120C	State and Capitalism in American Political Development	
126	Law and Politics in Contemporary Japan and East Asian Societies	
1261	Race and Criminal Justice	
127	Black Politics and Federal Social Policy	
138	Law and Literature	
142	Anthropology of Law	
147A	Psychology and Law	
147B	Psychology and Law	
150	Children and the Law	
154	The Legal Profession	
155	Topics in American Legal History	
160	Industrial Organization	
162	Legal Environment of Business	
169	Economic Analysis of the Law	
172	The Sociology of Law	
173	Law, Crime, and Social Justice	
180	Power, Politics, and Protest	
183	Women in the Economy	

Comprehensive Requirement - 1 course

Students can satisfy the comprehensive requirement in the legal studies major by successfully

completing one of the following:

195A, B, C, *Senior Thesis*. Completion of a senior thesis project of approximately 50 pages with a substantial research content, supervised by a legal studies faculty member with a second reader.

196 Senior Capstone. The capstone course is designed to provide an interdisciplinary integration of themes related to the study of law and includes a substantial writing requirement.

Requirements for the Minor

To complete a minor in legal studies, a student must take Legal Studies 10 and any five upperdivision legal studies core courses.

Legal Studies

27 Merrill College (831) 459-2056 legalstudies@ucsc.edu http://zzyx.ucsc.edu/Pol/legal.html

Program Description | Faculty

Lower-Division Courses

10. Introduction to Legal Process. F

Introduction to U.S. and comparative legal institutions and practices. Examines diverse areas of law from torts to civil rights to international human rights. Why is America portrayed as having an activist legal culture; why is law used to decide so many questions from presidential elections to auto accidents; can law resolve disputes that, historically, have led to war and violence; is the legal system fair and/or effective, and, if so, for whom and under what conditions? (General Education Code(s): IS.) *P. Frymer*

Upper-Division Courses

105A. Ancient Political Thought. W

Ancient political ideas in context of tension between democracy and empire, emergence of the psyche, and shift from oral to written culture. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine. (Also offered as Politics 105A. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *D. Mathiowetz*

105B. Early Modern Political Thought. F

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference. (Also offered as Politics 105B. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *V. Seth*

105C. Modern Political Thought. S

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, and Weber. (Also offered as Politics 105C. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *M. Thomas*

105D. Late 20th Century Political Thought. *

The politics of identity and recognition as the basis for institutional legitimacy and social struggles in the late 20th century. Conflicting views of Hegel's master-slave dialectic are used to relate, e.g., Sartre, Fanon, Bataille, Merleau-Ponty, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou to present-day concerns. (Also offered as Politics 105D. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *R. Meister*

106. Marxism as a Method. *

Examines Marx's use of his sources in political philosophy and political economy to develop a method for analyzing the variable ways in which social change is experienced as a basis for social action. Provides a similar analysis of contemporary materials. Contrasts and compares Marxian critiques of these materials and readings based on Nietzsche, psychonalysis, cultural studies, and rational choice materialsim. (Also offered as Politics 106. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *R. Meister*

107. After Evil: Political Morality of Survivorship and Recovery. *

What are the continuing relationships between victims, perpetrators, and beneficiaries of a past that is recognized as evil? Focus on contrast between the competing moral logics of struggle and reconciliation, and various rationales for allowing beneficiaries to keep their gains in order to bring closure to the past. Theoretical perspectives drawn from law, philosophy, theology, and psychoanalysis. (Also offered as Politics 107. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *R. Meister*

109. Legal Theory. *

Offers systematic exploration of alternative conceptions of the nature of law, including positivism, natural law, formalism, realism, pragmatism, and theories of justice. Additional focus on the nature of law; relation of law and morality, rights and other legal concepts; and philosophical debates such as critical legal studies and critical race theory. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

110. Law and Social Issues. *

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions. (Also offered as Politics 110. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

111A. Constitutional Law. W

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law. (Formerly *Problems in Constitutional Law.*) (Also offered as Politics 111A. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

111B. Civil Liberties. S

Explores the status of American civil liberties as provided by the Bill of Rights. Particular attention will be given to issues of concern relating to the aftermath of 9/11, including issues relating to detainees, freedom of information requests, wiretapping authority, watch lists, profiling, and creation of a domestic intelligence agency. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

113. Gay Rights and the Law. *

Examines relevant court cases as well as local, state, and federal laws that define

boundaries for legal recognition of sexual orientation and personal sexuality. Explores legal assumptions behind current and historical cases defining personal sexuality and sexual orientation and considers the social and political impetus in each era that drove the courts and legislatures to make such decisions. *The Staff*

114. Jews, Anti-Semitism, and the American Legal System. F

Explores how Jews have influenced and been impacted by the American legal system. Students explore significant cases, debates, and trends in the law as it relates to Jewish identity, religious freedom, and conceptions of justice. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

115. Law and the Holocaust. W

Examines the Nazi philosophy of law, and how it was used to pervert Germany's legal system in order to discriminate against, ostracize, dehumanize, and ultimately eliminate certain classes of human beings, and the role of international law in rectifying the damage. Enrollment restricted to legal studies majors during priority enrollment only. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

116. Comparative Law. *

Explores legal systems and legal rules around the world, for a better understanding of the factors that have shaped both legal growth and legal change. Particular attention given to differences between common and civil law systems, changes brought about by the European Union, and expansion of legal norms around the globe. (Also offered as Politics 116. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

118. Law and Literature. *

Explores variety of texts including novels, short stories, and essays as a source for reflection about the nature of law and legal practice. Readings include such writers as Herman Melville, Harper Lee, Richard Wright, Arthur Miller, Nadine Gordimer, and James Alan McPherson, among others. (Formerly course 138.) Enrollment restricted to legal studies majors during priority period. *The Staff*

119. Law and the Workplace. *

Examines both the rights that individuals have in the workplace and the rights they do not have. Most Americans are "at will" employees and have very few workplace protections. Examines the exceptions, focusing particularly on civil rights and labor law. Enrollment restricted to legal studies majors during priority enrollment. *P. Frymer*

120A. Congress, President, and the Court in American Politics. F

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities. (Also offered as Politics 120A. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. Satisfies American History and Institutions Requirement. *D. Wirls*

120B. Society and Democracy in American Political Development. S

Examines role of social forces (e.g., race, class, and gender) in development of the American democratic processes and in the changing relationship between citizen and state. Course materials address ideas, social tensions, and economic pressures bearing

on social movements, interest groups, and political parties. (Also offered as Politics 120B. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. Satisfies American History and Institutions Requirement. *The Staff*

120C. State and Capitalism in American Political Development. W

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies. (Also offered as Politics 120C. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. Satisfies American History and Institutions Requirement. *E. Bertram*

126. Law and Politics in Contemporary Japan and East Asian Societies. S

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue Japanese government and corporations in California. (Also offered as Sociology 128. Students cannot receive credit for both courses.) Enrollment limited to 30. *H. Fukurai*

126I. Race and Criminal Justice. F

An introduction to comparative and historical analyses of the relations between race and criminal justice in the U.S. Emphasis on examinations of structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Also offered as Sociology 128I. Students cannot receive credit for both courses.) (Also offered as Sociology 128I. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 120. *H. Fukurai*

127. Black Politics and Federal Social Policy. *

Examination of changes in the political and economic status of black Americans in the 20th century; particular focus on the role of national policies since 1933 and the significance of racism in 20th-century U.S. political development. (Also offered as Politics 127. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment. (General Education Code(s): E.) *M. Brown*

128. Poverty and Public Policy. *

Studies the causes, consequences, and governmental response to urban poverty in the U.S. Topics include how public policy, the macroeconomy, race, gender, discrimination, marriage, fertility, child support, and crime affect and are affected by urban poverty. Emphasizes class discussion and research. (Also offered as Economics 128. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; ECON 100A & 113 or consent of instructor. Enrollment restricted to economics, business management economics, global economics, legal studies, or economics combined major Enrollment limited to 35. (General Education Code(s): W, E.) *R. Fairlie, L. Kletzer*

130. Race and the Law. *

Explores the complex relationship between race and the law in American society. Included subjects are critical race theory, civil rights and voting rights law, issues of the criminal justice system, intersections with issues of class and gender, and the social construction of race through law and legal decisions. Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

131. Wildlife, Wilderness, and the Law. F

Introduction to wildlife, wilderness, and natural resources law, policy, and management. Examines rules governing resource allocation and use including discussion of fundamental legal concepts. Explores laws and management policies affecting wildlife and wilderness, including their origins and impacts. Examines how conflicts over natural resources are being negotiated today. Enrollment restricted to sophomore, junior, and senior legal studies majors during the priority period. *R. Langridge*

132. California Water Law and Policy. W

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future. (Also offered as Politics 132. Students cannot receive credit for both courses.) *R. Langridge*

133. Law of Democracy. W

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces. (Also offered as Politics 133. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

136. Federal Indian Law and International Comparative Indigenous Peoples' Law. *

Indian law refers to the body of law dealing with the status of Indian tribes, their inherent powers of self-government, their special relationship to the federal government, and the actual or potential conflicts of governmental power. Primary objective will be to address tribal reassertion of aboriginal sovereignty over culture and land in the context of increasing world recognition of indigenous rights. Enrollment restricted to legal studies majors during priority period. (General Education Code(s): E.) *The Staff*

137. International Environmental Law and Policy. *

International environmental law (IEL) endeavors to control pollution and depletion of natural resources within a framework of sustainable development and is formally a branch of public international law—a body of law created by nation states for nation states, to govern problems between nation states. Examines landmark developments of IEL since 1972 within a historical continuum to better understand their strengths and weaknesses. Enrollment restricted to legal studies majors during priority period. *The Staff*

138. Political Anthropology. F

The ideas, in selected non-Western societies, about the nature of power, order, social cohesion, and the political organization of these societies. (Also offered as Anthropology 138. Students cannot receive credit for both courses.) Offered in alternate academic years. *T. Pandey*

139. War Crimes. *

Explores complex international human rights/humanitarian law issues surrounding genocide and other mass violence, beginning with the Nuremberg trials following World War II up to recent atrocities in Rwanda, Bosnia, and elsewhere. Covers basic legal framework of human rights law, examines specific situations on a case by case basis, and discusses what options the international community, the nations themselves, and individuals have in the wake of such catastrophes. Enrollment restricted to legal studies majors during priority period. *The Staff*

142. Anthropology of Law. *

An ethnographically informed consideration of law, dispute management, and social control in a range of societies including the contemporary U.S. Topics include conflict management processes, theories of justice, legal discourse, and relations among local, national, and transnational legal systems. Will be offered in the 2008-09 academic year. (Also offered as Anthropology 142. Students cannot receive credit for both courses.) Enrollment restricted to anthropology and legal studies majors. *D. Brenneis*

144. Social and Political Philosophy. S

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Also offered as Philosophy 144. Students cannot receive credit for both courses.) Prerequisite(s): one course in philosophy. Offered in alternate academic years. *The Staff*

146. Philosophy of Law. W

Exploration of selected problems in jurisprudence: "legal reasoning" and social policy, rules and individual cases, the mental element in the law, punishment and responsibility, causation and fault, liberty and paternalism, etc. (Also offered as Philosophy 146. Students cannot receive credit for both courses.) *J. Neu*

147A. Psychology and Law. *

Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment. (Also offered as Psychology 147A. Students cannot receive credit for both courses.) Psychology 3 and 40 are recommended prior to taking this course. Enrollment restricted to psychology, prepsychology, and legal studies majors. *C. Haney*

147B. Psychology and Law. *

Continuing discussion of current and future relationships between law and psychology and to contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment. (Also offered as Psychology 147B. Students cannot receive credit for both courses.) Prerequisite(s): course 147A. *C. Haney*

149. Environmental Law and Policy. S

Surveys a wide range of topics in environmental law, including population control, state and federal jurisdiction, land and resources control, public land management, pollution control, and private rights and remedies. Students read a large number of

judicial cases and other legal documents. (Also offered as Environmental Studies 149. Students cannot receive credit for both courses.) Enrollment restricted to junior and senior legal studies majors. Enrollment limited to 60. *D. Kelso*

150. Children and the Law. *

Explores the legal rights of children. Topics may include juvenile justice, gang offenses, free speech and Internet censorship, religious rights, child custody and support, adoption, foster care, abuse and sexual harassment, special needs, public benefits, and medical care. Enrollment restricted to legal studies majors during priority period. *The Staff*

152. Courts and Litigation. *

A study of the role of courts in society and the uses of litigation to address and deflect social problems. Focus is on recent developments in American litigation, but comparative materials may be considered. Enrollment restricted to legal studies majors during priority period. *The Staff*

154. The Legal Profession. *

Lawyers stand between the legal system and those who are affected by it. Examines this relationship descriptively and normatively, and from the point of view of sociological theory. Concentrates on the U.S. profession, with some comparative material. Enrollment restricted to legal studies majors during priority period. *The Staff*

155. Topics in American Legal History: Making of American Constitutionalism.

*

Explores some aspects of early American constitutional thought, particularly immediately preceding the American Revolution situating early colonial constitutional thought within some of the larger themes and controversies of the 17th-century English constitutionalism, then considering some aspects of American constitutional thought in the founding period against the background of the colonial experience. Prerequisite(s): permission of instructor: selection based on the ability to do very advanced work. Enrollment restricted to legal studies majors during priority period. Enrollment limited to 20. *The Staff*

156. Administrative Jurisprudence. *

The rise of the regulatory state brings with it a host of questions regarding the exercise of state power and separation of powers. Takes up some of these questions; in particular, questions about administrative agencies and their relationship to the judiciary, the legislature and private individuals and groups. Enrollment restricted to legal studies majors during priority period. *The Staff*

157. Political Jurisprudence. F

Explores some themes in legal and political theory, especially on the relationship of theories of justice, law, and ethics. Enrollment restricted to legal studies majors during priority period. *The Staff*

159. Property and the Law. *

Beginning with an examination of the concept of property, the class covers how different cultures characterize property and determine "ownership" and the laws and policies that define property in modern society. Topics include theories of property law, common property, property and natural resources, zoning, regulatory takings, and property on the Internet. Enrollment restricted to legal studies majors during priority period. *R. Langridge*

160. Industrial Organization. F

The structure and conduct of American industry with strong emphasis on the role of government, regulation, anti-trust, etc. The evolution of present-day industrial structure. The problems of overall concentration of industry and of monopoly power of firms. Pricing, output decisions, profits, and waste. Approaches include case study, theory, and statistics. (Also offered as Economics 160A. Students cannot receive credit for both courses.) Prerequisite(s): Economics 100A or 100M. *The Staff*

162. Legal Environment of Business. F

A study of law and the legal process, emphasizing the nature and function of law within the U.S. federal system. Attention is given to the legal problems pertaining to contracts and related topics, business association, and the impact of law on business enterprise. (Also offered as Economics 162. Students cannot receive credit for both courses.) Prerequisite(s): Economics 100A. *R. Bosso*

169. Economic Analysis of the Law. W

The application of the theories and methods of neoclassical economics to the central institutions of the legal system, including the common law doctrines of negligence, contract, and property; bankruptcy and corporate law; and civil, criminal, and administrative procedure. (Also offered as Economics 169. Students cannot receive credit for both courses.) Prerequisite(s): Economics 100A or 100M or permission of instructor. *D. Wittman*

171. Law of War. *

Examines legal regulation of international violent conflict. Students examine development of normative standards within international law and creation of institutions to both adjudicate violations and regulate conduct. (Also offered as Politics 171. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

172. The Sociology of Law. S

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law. (Also offered as Sociology 122. Students cannot receive credit for both courses.) *C. Reinarman*

173. Law, Crime, and Social Justice. *

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation. (Also offered as Sociology 123. Students cannot receive credit for both courses.) *The Staff*

174. International Law. F

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include jurisdiction and sovereignty, treaties, use of force, commercial law, and human rights. (Also offered as Politics 173. Students cannot receive credit for both

courses.) Enrollment restricted to legal studies majors during priority enrollment period. *The Staff*

180. Power, Politics, and Protest. *

Examines the many ways in which organized groups engage in political protest against those whom they understand to dominate them. Course first establishes the framework for the discussion of power, politics, and protest and then examines a variety of forms taken by political protest worldwide. *T. Pandey*

183. Women in the Economy. W

Study of gender roles in economic life, past and present. Topics include occupational structure, human capital acquisition, income distribution, poverty, and wage differentials. The role of government in addressing economic gender differentials is examined. (Also offered as Economics 183. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; Economics 1, 2, and 100A; Economics 113 strongly recommended. (General Education Code(s): W.) *L. Kletzer*

193. Field Study. F,W,S

Field research performed off-campus, under the supervision of a member of the legal studies faculty. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

196. Senior Capstone. F,W

Examines related legal topics from an interdisciplinary perspective. Each focuses broadly on the relationship between law as a distinct system and law as an attempt to achieve justice, which requires that law remain open to claims of political morality generally. To what extent are legal norms internal to a separate system called "law" and to what extent are claims of political right in general relevant to question of what law is? Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior legal studies majors. (General Education Code(s): W.) *The Staff*

198. Independent Field Study. F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Linguistics

243 and 241 Stevenson College (831) 459-2905 (831) 459-4988 http://ling.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Linguistics is an exact and structured discipline. As the study of human language, it has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), and the natural sciences (biology, neuroscience, acoustics, computer science, computer engineering).

The central areas of linguistics proper investigate the knowledge that speakers of a language acquire about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics studies the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the ways in which these speech sounds pattern in the sound systems of particular languages. Morphology studies the way in which words are put together out of prefixes, roots, and suffixes. Pragmatics is the study of language use.

All faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include sociolinguistics, psycholinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, Linguistics and Language Studies, and a graduate program in theoretical linguistics. The Linguistics major leads to a B.A. degree in Linguistics; the Language Studies major leads to a B.A. degree in Language Studies (see Language Studies, page 302). The graduate program leads to the M.A. and Ph.D. degrees in Linguistics.

Requirements for the Linguistics Major

All students are required to complete the following 12 courses in Linguistics and related disciplines.

Seven foundation courses in Linguistics:

- · 50 Introduction to Linguistics: Sounds and Words
- 52 Syntax 1
- · 53 Semantics 1
- 101 *Phonology* 1
- 102 Phonology 2
- 113 Syntax 2
- 116 Semantics 2

Five upper-division elective courses in linguistics.

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. Such courses must be upper-division and clearly fit into a coherent program of study in linguistics.

Foreign language/mathematics competency requirement: Linguistics majors are required to demonstrate either foreign language or mathematics competency as follows:

 Foreign language competency: students must successfully complete six quarters of language study at UCSC (three quarters for Latin or Greek) or demonstrate an equivalent level of competence through a recognized language test or evidence of credit from another institution. Mathematics competency: Alternatively, students with a strong formal background can
choose to satisfy the mathematics competency requirement by demonstrating sufficient
preparation in mathematics for advanced formal work in linguistics. This requirement is
satisfied by passing two courses chosen from the following list: Mathematics 11A, 19A, or
21; Computer Science 12A; Computer Engineering 16; Economics 11A; or any course
which has one of these courses as a prerequisite.

Senior exit requirement: In their senior year, linguistics majors must satisfy the senior exit requirement in one of two ways:

Option 1: Successful completion of a capstone course. Students may designate an appropriate upper-division Linguistics course as their capstone course.

- In addition to fulfilling the normal requirements for the designated course, such students concurrently enroll in the Ling 190 Senior Research Series (two credits, enrollment limited to 10) with the same instructor, and produce a research paper, or other significant project, to be filed with the department.
- Prior to enrolling in 190, students must have senior standing, completed Ling 52
 Syntax I, and 101 Phonology I.

Option 2: Successful completion of a senior thesis supervised by a Linguistics faculty member.

- The proposal for a senior thesis must be submitted for departmental approval at least three guarters prior to the guarter of graduation.
- Students enroll in Ling 195 (Senior Thesis) or Ling 194 (Senior Project) with the same faculty adviser.

Concentrations within the Major

The major provides a strong background in the central subdisciplines of linguistics. Students who wish to pursue linguistic theory further are encouraged to take other upper-division linguistics courses and seek permission to enroll in the graduate sequences in phonology, syntax, or semantics.

Students may wish to take elective courses in other subdisciplines of linguistics.

Psycholinguistics focuses on the psychological mechanisms of language. Computational linguistics focuses on computational approaches to linguistic analysis and the linguistic analysis of computer languages. Applied linguistics focuses on bilingualism, second-language acquisition, and translation.

Students who wish to pursue these subdisciplines should consult the Department of Linguistics for lists of elective courses in these areas. Students may also focus on the grammar of one or more languages by taking the structure course in linguistics (180 series) and related courses in other disciplines. Linguistics majors with a language focus are also encouraged to consider academic study at foreign universities through the UCSC Education Abroad Program. Students preparing for careers in teaching should contact the Education Department office, 217 Social Sciences 1, (831) 459-2589, for information on the requirements for a California teaching credential.

Requirements for the Minor

To graduate with a minor in linguistics, students must complete eight linguistics courses.

- 50 Introduction to Linguistics: Sounds and Words
- 52 Syntax 1
- 53 Semantics 1
- 101 Phonology 1
- Four upper-division electives in linguistics

There is no senior exit requirement and no foreign language/mathematics competency requirement for the minor.

Courses

Courses numbered 80 are lower-division topical courses. They treat the phenomenon of language from a variety of perspectives:

- 80B Modern English Grammar. A modern non-prescriptive approach to English grammar.
- 80C Language, Society, and Culture. An exploration of ways in which language structure and use reflect societal distinctions and cultural practice.
- · 80D Language and Mind. A critical examination of the view of human language

- underpinning the research program initiated by Noam Chomsky and of its implications for theories of the human mind and brain.
- 80V Structure of the English Vocabulary. A systematic study of the elements of English words: their historical origins and their sound, meaning, spelling, and function.

These courses have no prerequisites. They are intended to serve as general education courses, and introduce the concepts of linguistics through their relation to other areas of general interest. Courses 50 *Introduction to Linguistics: Sounds and Words*, 52 *Syntax I*, 55 *Syntactic Structures*, and 53 *Semantics I* are "disciplinary introductions." These courses have no linguistics prerequisites and serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least one of these courses as a prerequisite.

Courses 101 Phonology I, 102 Phonology II, 113 Syntax II, and 116 Semantics II are the core upper-level courses in linguistic structure and are offered each year. The two phonology courses (101 and 102) provide an introduction to the study of the sound systems of languages. These courses use a problem-solving approach to developing understanding of phonological theory and phonological regularities in various languages. The intermediate syntax course (113) continues the development of syntactic theory begun in course 52, extending the range to more complex constructions and rules and introducing alternative theoretical approaches. The semantics course (116), which has as prerequisites course 53 Semantics I, and either course 52 Syntax I, or course 55 Syntactic Structures, addresses advanced problems in the analysis of meaning. Several upper-division elective courses are offered each year. For a list of these courses, contact the Linguistics Department.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the core course requirements for the major with excellent performance.

Preparation for the UCSC Master's Degree

Each year a number of UCSC students who have B.A. degrees in linguistics or language studies are admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult our web site (http://ling.ucsc.edu/); and see the Linguistics Department manager.

Graduate Program

The graduate program in linguistics at UCSC is a small, focused five-year program in linguistic theory leading to the degree of doctor of philosophy. The research interests of faculty and students draw on the framework of generative grammar, with a primary focus on theoretical syntax, semantics, and phonology; research and course strengths also include the structure of various languages, phonetics, morphology (theoretical and computational), mathematical foundations, and the philosophy of linguistics. The department admits approximately five new students to the doctoral program each year; more enter to receive a master's degree associated with the doctoral program. The master's degree can be completed in one or two years, depending on the student's previous background in linguistics.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers a range of current theories: principles and parameters theory, minimalism, phrase structure grammar, and optimality syntax. Work in phonology is pursued in various current frameworks, including optimality theory and dispersion theory. It ranges from prosodic theory and prosodic morphology to issues in segmental phonology, feature theory, and the phonetics-phonology relationship. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation.

The faculty have language expertise in a variety of languages, including Chamorro, German, Hungarian, Irish, Japanese, Latin, Rumanian, Russian, Spanish, Turkish, and Tzotzil.

From the beginning of their studies, students are engaged in original research and critical evaluation, since the aim of the program is to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation and core courses in linguistic theory. Subsequent course work emphasizes theoretical depth; it is increasingly centered around the doctoral student's own research, culminating in the presentation of a dissertation on some aspect of linguistic theory and analysis.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student

applying for admission to this program should, in any case, have a good foundation in at least one of the central fields of linguistic structure: phonology, morphology, syntax, or semantics. Students entering the program with a deficiency in one or more areas will make up the deficiency by taking appropriate undergraduate courses at UCSC during the first year of graduate study.

Requirements for the M.A.

Courses. A minimum of 45 credits of graduate-level work. This must include the core courses in phonology, syntax, and semantics. Electives are chosen from upper-division or graduate courses offered by linguistics and related disciplines, in addition to independent study with linguistics faculty.

Languages. Reading competence in one foreign language, to be demonstrated by examination. Research paper. Submission of a research paper in a core area of theoretical linguistics and approval of a committee of two faculty.

Requirements for the Ph.D.

Courses. A minimum of 60 credits of graduate-level work. This includes foundation sequences in phonology, syntax, and semantics.

Languages. Reading competence in one foreign language, to be demonstrated by examination.

Qualifying papers and examination. By the end of the third year, two research papers, one in phonology/morphology and one in syntax/semantics, are to be presented as part of the requirements for admission to candidacy. At this time, the prospective candidate is examined by the faculty on topics related to the student's major area of research, as part of the Qualifying Exam. The student is expected to defend a dissertation prospectus by the end of the fourth year.

Dissertation. The final requirement for the Ph.D. degree is the presentation of a dissertation representing a significant contribution in some central area of linguistic research.

Application and Admission

To apply, please consult the Department of Linguistics web site.

Program Description | Faculty | Course Descriptions

Program Description

Among the humanities, Linguistics is an exact and structured discipline. As the study of human language, it has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), and the natural sciences (biology, neuroscience, acoustics, computer science, computer engineering).

The central areas of linguistics proper investigate the knowledge that speakers of a language acquire about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics studies the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the ways in which these speech sounds pattern in the sound systems of particular languages. Morphology studies the way in which words are put together out of prefixes, roots, and suffixes. Pragmatics is the study of language use.

All faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include sociolinguistics, psycholinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, Linguistics and Language Studies, and a graduate program in theoretical linguistics. The Linguistics major leads to a B.A. degree in Linguistics; the Language Studies major leads to a B.A. degree in Language Studies (see Language Studies, page 302). The graduate program leads to the M.A. and Ph.D. degrees in Linguistics.

Requirements for the Linguistics Major

All students are required to complete the following 12 courses in Linguistics and related disciplines.

Eight Seven foundation courses in Linguistics:

- 20 50 Introduction to Linguistics: Sounds and Words
- 52 *Syntax* 1
- 53 Semantics 1
- 101 *Phonology* 1
- 102 Phonology 2
- 113 Syntax 2
- 116 *Semantics* 2

Four Five upper-division elective courses in linguistics. One of these upper-division linguistics courses may be substituted by a course from a related discipline or an 80-level linguistics course.

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. Such courses must be upper-division and clearly fit into a coherent program of study in linguistics.

Foreign language/mathematics competency requirement: Linguistics majors are required to demonstrate either foreign language or mathematics competency as follows:

- Foreign language competency: students must successfully complete six quarters of language study at UCSC (three quarters for Latin or Greek) or demonstrate an equivalent level of competence through a recognized language test or evidence of credit from another institution.
- Mathematics competency: Alternatively, students with a strong formal background can choose to satisfy the mathematics competency requirement by demonstrating sufficient preparation in mathematics for advanced formal work in linguistics. This requirement is satisfied by passing two courses chosen from the following list: Mathematics 11A, 19A, or 21; Computer Science 12A; Computer Engineering 16; Economics 11A; or any course which has one of these courses as a prerequisite.

Senior exit requirement: In their senior year, linguistics majors must satisfy the senior exit requirement in one of two ways:

Option 1: Successful completion of a capstone course. Students may designate an appropriate upper-division Linguistics course as their capstone course.

- In addition to fulfilling the normal requirements for the designated course, such students concurrently enroll in the Ling 190 *Senior Research Series* (two credits, enrollment limited to 10) with the same instructor, and produce a research paper, or other significant project, to be filed with the department.
- Prior to enrolling in 190, students must have senior standing, completed Ling 52
 Syntax I, and 101 Phonology I.

Option 2: Successful completion of a senior thesis or senior project supervised by a Linguistics faculty member.

- The proposal for a senior thesis or project must be submitted for departmental approval at least two three quarters prior to the quarter of graduation.
- Students enroll in Ling 195 (*Senior Thesis*) or Ling 194 (*Senior Project*) with the same faculty adviser.

Concentrations within the Major

The major provides a strong background in the central subdisciplines of linguistics. Students who wish to pursue linguistic theory further are

encouraged to take other upper-division linguistics courses and seek permission to enroll in the graduate sequences in phonology, syntax, or semantics.

Students may wish to take elective courses in other subdisciplines of linguistics.

Psycholinguistics focuses on the psychological mechanisms of language. Computational linguistics focuses on computational approaches to linguistic analysis and the linguistic analysis of computer languages. Applied linguistics focuses on bilingualism, second-language acquisition, and translation.

Students who wish to pursue these subdisciplines should consult the Department of Linguistics for lists of elective courses in these areas. Students may also focus on the grammar of one or more languages by taking the structure course in linguistics (180 series) and related courses in other disciplines. Linguistics majors with a language focus are also encouraged to consider academic study at foreign universities through the UCSC Education Abroad Program. Students preparing for careers in teaching should contact the Education Department office, 217 Social Sciences 1, (831) 459-2589, for information on the requirements for a California teaching credential.

Requirements for the Minor

To graduate with a minor in linguistics, students must complete eight linguistics courses.

- <u>20 50 Introduction to Linguistics: Sounds and Words</u>
- 52 Syntax 1
- 53 Semantics 1
- 101 *Phonology 1*
- Four upper-division electives in linguistics

There is no senior exit requirement and no foreign language/mathematics competency requirement for the minor.

Courses

Courses numbered 80 are lower-division topical courses. They treat the phenomenon of language from a variety of perspectives:

- 80B *Modern English Grammar*. A modern non-prescriptive approach to English grammar.
- 80C *Language, Society, and Culture*. An exploration of ways in which language structure and use reflect societal distinctions and cultural practice.
- 80D *Language and Mind*. A critical examination of the view of human language underpinning the research program initiated by Noam Chomsky and of its implications for theories of the human mind and brain.
- 80P The Sound of the World's Language. Practical training in hearing and recording sounds in a wide range of phonetic systems.
- 80V Structure of the English Vocabulary. A systematic study of

the elements of English words: their historical origins and their sound, meaning, spelling, and function.

These courses have no prerequisites. They are intended to serve as general education courses, and introduce the concepts of linguistics through their relation to other areas of general interest.

Courses 20 50 Introduction to Linguistics: Sounds and Words, 52 Syntax I, 55 Syntactic Structures, and 53 Semantics I are "disciplinary introductions." These courses have no linguistics prerequisites and serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least one of these courses as a prerequisite.

Courses 101 *Phonology I*, 102 *Phonology II*, 113 *Syntax II*, and 116 *Semantics II* are the core upper-level courses in linguistic structure and are offered each year. The two phonology courses (101 and 102) provide an introduction to the study of the sound systems of languages. These courses use a problem-solving approach to developing understanding of phonological theory and phonological regularities in various languages. The intermediate syntax course (113) continues the development of syntactic theory begun in course 52, extending the range to more complex constructions and rules and introducing alternative theoretical approaches. The semantics course (116), which has as prerequisites course 53 *Semantics I*, and either course 52 *Syntax I*, or course 55 *Syntactic Structures*, addresses advanced problems in the analysis of meaning.

Several upper-division elective courses are offered each year. For a list of these courses, contact the <u>Linguistics Department.</u>

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the core course requirements for the major with excellent performance.

Preparation for the UCSC Master's Degree

Each year a number of UCSC students who have B.A. degrees in linguistics or language studies are admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult our web site (http://ling.ucsc.edu/); and see the Linguistics Department manager.

Graduate Program

The graduate program in linguistics at UCSC is a small, focused fiveyear program in linguistic theory leading to the degree of doctor of philosophy. The research interests of faculty and students draw on the framework of generative grammar, with a primary focus on theoretical syntax, semantics, and phonology; research and course strengths also include the structure of various languages, phonetics, morphology (theoretical and computational), mathematical foundations, and the philosophy of linguistics. The department admits approximately five new students to the doctoral program each year; more enter to receive a master's degree associated with the doctoral program. The master's degree can be completed in one or two years, depending on the student's previous background in linguistics.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers a range of current theories: principles and parameters theory, minimalism, phrase structure grammar, and optimality syntax. Work in phonology is pursued in various current frameworks, including optimality theory and dispersion theory. It ranges from prosodic theory and prosodic morphology to issues in segmental phonology, feature theory, and the phonetics-phonology relationship. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation.

The faculty have language expertise in a variety of languages, including Chamorro, German, Hungarian, Irish, Japanese, Latin, Rumanian, Russian, Spanish, Turkish, and Tzotzil.

From the beginning of their studies, students are engaged in original research and critical evaluation, since the aim of the program is to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation and core courses in linguistic theory. Subsequent course work emphasizes theoretical depth; it is increasingly centered around the doctoral student's own research, culminating in the presentation of a dissertation on some aspect of linguistic theory and analysis.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student applying for admission to this program should, in any case, have a good foundation in at least one of the central fields of linguistic structure: phonology, morphology, syntax, or semantics. Students entering the program with a deficiency in one or more areas will make up the deficiency by taking appropriate undergraduate courses at UCSC during the first year of graduate study.

Requirements for the M.A.

Courses. A minimum of 45 credits of graduate-level work. This must include the core courses in phonology, syntax, and semantics. Electives are chosen from upper-division or graduate courses offered by linguistics and related disciplines, in addition to independent study with linguistics faculty.

Languages. Reading competence in one foreign language, to be

demonstrated by examination.

Research paper. Submission of a research paper in a core area of theoretical linguistics and approval of a committee of two faculty.

Requirements for the Ph.D.

Courses. A minimum of 60 credits of graduate-level work. This includes foundation sequences in phonology, syntax, and semantics and a course in mathematical foundations.

Languages. Reading competence in one foreign language, to be demonstrated by examination.

Qualifying papers and examination. By the end of the third year, two research papers, one in phonology/morphology and one in syntax/semantics, are to be presented as part of the requirements for admission to candidacy. At this time, the prospective candidate is examined by the faculty on topics related to the student's major area of research, as part of the Qualifying Exam. The student is expected to defend a dissertation prospectus by the end of the fourth year.

Dissertation. The final requirement for the Ph.D. degree is the presentation of a dissertation representing a significant contribution in some central area of linguistic research.

Application and Admission

To apply, please consult the Department of Linguistics web site.

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

50. Introduction to Linguistics: Sounds and Words. F,W,S

An introduction to the major areas, problems, and techniques of modern linguistics. (Formerly course 20, *Introduction to Linguistics*.) (General Education Code(s): IH.) *A. Mester*

52. Syntax I. F,W

An introduction to transformational syntax and syntactic investigation, developed through the study of central aspects of English syntax. A major purpose is to introduce students to the study of language as an empirical science. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): IH.) *J. Hankamer*, *J. McCloskey*

53. Semantics I. F,W

Introduction to the logical foundations of natural language semantics. Logical and semantic relations, simple set theory, logical representations (propositional and predicate calculi, modal and tense logics) and their interpretations. A basic literacy course in the language of logical representation. (General Education Code(s): IH.) *P. Anand, D. Farkas*

55. Syntactic Structures. S

Provides a basic introduction to the methods and results of transformational generative grammar. It simultaneously provides an overview of the major syntactic constructions of English. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): IH.) *J. Aissen*

80B. Modern English Grammar. *

Elementary introduction to modern standard English grammar, both formal and informal, both written and spoken. Stresses the importance of linguistic evidence in understanding grammatical correctness; offers a demystification and critique of older traditional grammar in the light of recent research. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80C. Language, Society, and Culture. S

The study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *J. McCloskey*

80D. Language and Mind: Chomsky's Program. *

A critical overview of the research program initiated by Noam Chomsky and its

implications for theories of the human mind and brain. (Also offered as Philosophy 80L. Students cannot receive credit for both courses.) (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *J. McCloskey*

80G. Introduction to Unix. S

Introduction to computing, the Internet, and the World Wide Web through the language of the Unix operating system. Oriented to the beginner, the course presupposes no previous acquaintance with any particular sort of computer. It covers the basic concepts of text editing and formatting, writing Web pages in basic HTML, and promotes a rigorous understanding of Unix commands and shell scripts. Views communication with a computer as a matter of learning a few simple though powerful languages. (Also offered as Computer Science 80G. Students cannot receive credit for both courses.) (General Education Code(s): T2-Natural Sciences.) *The Staff*

80V. Structure of the English Vocabulary. *

A systematic study of the elements of English words: besides the practical goal of vocabulary consolidation and expansion, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. The Staff

Upper-Division Courses

101. Phonology I. F,S

Introduction to how sounds pattern in grammars—why they vary, how they combine, etc. Emphasis is on developing theories to explain the patterns. Topics include distinctive feature theory, phonemic analysis, autosegmental phonology, and principles of syllabification and stress. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 20 or 51. (General Education Code(s): W.) *J. Ito*

102. Phonology II. W

Advanced phonological theory. Topics include markedness; underspecification theories; advanced topics in feature geometry, syllable theory, and stress theory; and optimality theory. Readings include published articles. Emphasis on theory construction and argumentation based on data. Prerequisite(s): course 101. A. Mester

105. Morphology. F

Study of the principles of word formation: derivation, inflection, and compounding; cross-linguistic study of morphological processes, morphological investigation and analysis. Prerequisite(s): course 52 or 55, and course 101. Offered in alternate academic years. *The Staff*

108. Poetry and Language. *

An introduction to the linguistic aspects of poetry, e.g., rhyme, meter, and larger-scale organization of poetic form. The emphasis is on English poetry, complemented by brief sketches of other poetic traditions. Students taking this course should have some basic knowledge of language structure (e.g., as provided by course 20). Offered in alternate academic years. *The Staff*

113. Syntax II. S

Further aspects of English syntax; universal and language-particular constraints on syntactic structures and rules. Further developments and extensions of transformational theory. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 52. (General Education Code(s): W.) *J. Aissen*

114. Syntax III. W

Advanced topics in syntax and semantics. Prerequisite(s): course 113 and satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *J. Hankamer*

116. Semantics II. W

Major issues in natural language semantics: nature of lexical entries, thematic relations, propositional representation or "logical form"; relation between semantic interpretation and syntactic representations, quantification and scope relations, reference and presupposition, coreference and anaphoric relations. Prerequisite(s): course 53, and either course 52 or 55. *P. Anand*

117. Pragmatics. S

Covers topics central in the study of pragmatics, the interpretation of language use. Topics include conversational implicature, speech acts and discourse understanding, and social deixis. Prerequisite(s): course 53. Offered in alternate academic years. *D. Farkas*

120. Structure of English. F

Survey of grammatical structure of English and terminology of grammatical description. Covers phonological, morphological, and syntactic structure of English and contrasts it with other languages. Prerequisite(s): course 52 or 55, and 101. *The Staff*

125. Foundations of Linguistic Theory. F

Survey of the history and foundational theoretical assumptions that define generative grammar. Examines influence of generative linguistic theorizing on disciplines outside linguistics, notably psychology and philoshopy. Prerequisite(s): course 52 or 55, and 53 and 101. *The Staff*

140. Language Change. *

Methods and problems in the study of change in linguistic systems. Reconstruction of proto-languages; the comparative method. Theories of change and implications for the theory of grammar. Prerequisite(s): course 101. *The Staff*

151. Phonetic Analysis. W

Introduction to instrumental phonetic analysis. Topics covered include sound waves; sources and acoustic properties of speech sounds; analysis of waveforms, pitch tracks, and spectrograms; perception of speech sounds; use of speech analysis software; experimental design; and phonetic explanations for phonological patterns. Prerequisite(s): course 20 or 51. *J. Padgett*

160. Language Engineering. S

Addresses a particular problem in language engineering, chosen for its practical and theoretical interest and its tractability. The entire course focuses on a team project to design a solution to the problem. Permission of instructor required. *B. Hockey*

181. Structure of Romance Languages. W

Examines the phonological and syntactic structures of Romance languages. Some knowledge of either Italian, French, or Spanish is also required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

182. Structure of Spanish. *

The phonology and syntax of Spanish, studied from a modern linguistic perspective. Some knowledge of Spanish is required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

183. Structure of French. *

The phonology, morphology, and syntactic aspects of French. Some knowledge of French is helpful. Prerequisite(s): course 55 or 52, and 101. *D. Farkas*

186. Structure of German. *

Phonological, morphological, and syntactic aspects of the structure of the German language. Some knowledge of German is required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

187. Structure of Japanese. *

The phonology, morphology, and syntax of Japanese. Some knowledge of Japanese is also required. Prerequisite(s): course 55 or 52, and 101. Offered in alternate academic years. *J. Ito*

190. Senior Research (2 credits). F,W,S

Students produce research paper or other significant project to satisfy the capstone requirement. Prerequisite(s): course 101, and either course 52 or 55. Concurrent enrollment in a specified upper division course is required. Enrollment restricted to senior linguistics and language studies majors. *The Staff*

193. Field Study. F,W,S

Students submit petition to sponsoring agency. *The Staff*

195. Senior Thesis. F,W,S

Deadline for submission of thesis proposal is one year in advance of proposed completion. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

197. Squib Writing. *

Students write one squib (one to ten pages) per week except for weeks three and seven, when they write two squibs. A selection of the squibs is presented in class; one or two will be rewritten. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior linguistics and language studies majors with an advanced understanding of linguistics. Enrollment limited to 15. (General Education Code(s): W.) *J. Hankamer*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision by correspondence). Preparation and approval must be completed by the fifth day of instruction of any given quarter. Students submit petition to sponsoring agency. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Graduate Courses

211. Phonology A. F

First part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Enrollment restricted to graduate standing or consent of instructor. *J. Padgett*

212. Phonology B. W

Second part of a three quarter introduction to phonology. Topics of sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Prerequisite(s): course 211. Enrollment restricted to graduate standing or consent of instructor. *J. Ito*

213. Phonology C. S

Third part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *A. Mester*

216. Phonology Proseminar. *

One or more topics in phonological theory. Topics vary from year to year, covering literature and current research in phonology. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. Padgett, J. Ito, A. Mester*

219. Phonology Seminar. F

Advanced topics in phonology drawn from the current research interests of the instructor. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. Ito*

221. Syntax A. F

Introduction to syntactic theory. Phrase structure; subcategorization; lexical entries; passive; infinitival constructions. Enrollment restricted to graduate standing or consent of instructor. *J. Hankamer*

222. Syntax B. W

Continuation of Syntax A. The syntax of unbounded dependencies, including constituent questions, relative clauses, clefts, topicalization. Constraints on extraction; unbounded versus successive cyclic movement; the licensing of gaps. Prerequisite(s): course 221. Enrollment restricted to graduate standing or consent of instructor. *J. Aissen*

223. Syntax C. *

Continuation of Syntax B. The syntax of anaphora. Topics vary from year to year,

and may include the following: coreference in antecedent-pronoun relations; reflexives and reciprocals; disjoint reference; bound-variable anaphora; ellipsis; semantic and pragmatic constraints on anaphora. Prerequisite(s): course 222. Enrollment restricted to graduate standing or consent of instructor. *J. Hankamer*

226. Proseminar in Syntax. *

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives. Prerequisite(s): course 222. *J. Aissen*

229. Syntax Seminar. S

Advanced topics in syntax drawn from the current research interests of the instructor. Prerequisite(s): course 222. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. Hankamer*, *J. McCloskey*

231. Semantics A. F

Introduction to linguistic semantics: nature of lexical entries, thematic relations, representation of logical form; relation between semantic interpretation and syntactic representation, quantification and scope relations, reference and presupposition. Enrollment restricted to graduate standing or consent of instructor. *P. Anand*

232. Semantics B. W

Model-theoretic semantics for natural language. Truth-conditional, compositional semantics. Various logical ontologies and their application to natural language categories. Dynamic interpretation of discourse and anaphoric relations. Treatment of illocutionary force. Prerequisite(s): course 231. Enrollment restricted to graduate standing or consent of instructor. *D. Farkas*

233. Semantics C. S

Third and final course in the graduate introduction to semantics, focusing on questions at the border between semantics and pragmatics. Concerns include: modality, conditionals, non-declarative meaning, and context and context structure viewed from a dynamic perspective. Prerequisite(s): course 232. Enrollment restricted to graduate students. *The Staff*

236. Proseminar in Semantics. *

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics. Prerequisite(s): course 231. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

239. Semantics Seminar. W

Advanced topics in semantics drawn from the current research interests of the instructor. Prerequisite(s): course 232. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *The Staff*

240. The Pedagogy of Linguistics (1 credit). W,S

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of linguistics specifically. Under the supervision of a faculty member, coordinated by a graduate student with substantial experience as a teaching assistant. May be repeated for credit. *The Staff*

265. Mathematical Foundations of Linguistics. *

A survey of the basic mathematical notions fundamental to the understanding of

work in theoretical syntax, semantics, and phonology. Topics covered include basic set theory, formal logic, boolean algebra, graph theory, and formal language theory. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

290. Research Seminar. W

A research seminar for undergraduate and graduate students to develop the skills of the profession. Critical reading, reviewing, teaching, presentation, and writing. Students submit petition to sponsoring agency. Enrollment restricted to graduate standing or consent of instructor. Enrollment limited to 10. *J. Padgett*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

296. Linguistics Colloquium (2 credits). F,W,S

Independent graduate-level activities and assignments relating to development of familiarity with professional activities in academic linguistics: organizing and attending colloquia and conferences, both on- and off-campus; participation in discussions at such events; and prepare commentaries on academic papers and other papers. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Enrollment restricted to graduate standing or consent of instructor. The Staff

299. Thesis Research. F,W,S

The Staff

Literature

303 Humanities 1 (831) 459-4778 http://literature.ucsc.edu/

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, rather than through separate departments of English, modern languages, and classics. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the major encompass traditional literary history and interpretation as well as cross-cultural inquiry and current theoretical debates.

The literature major does permit focused work in national literary traditions. Students may concentrate in English-language literatures; in French, German, or Italian; in Latin and/or Greek; or in Spanish/Latin American/Latino literatures. Alternatively, students may organize their studies by period. Students who choose pre- and early modern studies focus on early literary traditions from antiquity through the Middle Ages, the Renaissance, and the neo-classical period, while those engaged in modern literary studies concentrate on literature of the 18th, 19th, 20th, and 21st centuries. Three concentrations have a theoretical basis: critical theory, literature and film, and world literature and cultural studies. The world literature concentration is dedicated to non-Western literatures and literature in a global context. Finally, the Literature Department also offers a concentration in creative writing in which, in addition to studying literature, students work with faculty in upper-division workshops to improve their own creative writing skills.

Literature majors at UCSC are trained in critical reading, writing, and thinking, as well as in literary interpretation. These skills have wide applicability: they may lead to careers in other media such as film, theater, video, the visual arts, and electronic media; and they offer avenues into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and history of art and visual culture. Literature majors traditionally enter a wide variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels.

The Literature Department faculty strongly recommends that all students study a second language. Proficiency in more than one language vastly enhances understanding of any literature and of language arts in general. Graduate programs in literature and other humanities disciplines generally require competence in another language besides English.

Letter Grade Requirement

Letter grades are required for 75 percent of courses applied toward the literature major, including the Senior Seminar, which must be taken for a letter grade.

Literature Major Options

Students wishing to major in literature may choose either the standard literature major or the intensive literature major. The intensive literature major is recommended particularly for students who plan to continue their studies in graduate school. The requirements for the intensive major include the study of literature in two languages; proficiency in a second language is therefore required.

The Standard Literature Major

Thirteen courses are required: three lower-division and ten upper-division courses. One of the latter may be a Senior Seminar, which may be used to satisfy the campus comprehensive (exit) requirement. In exceptional cases, and with faculty permission, students may write a senior thesis to satisfy the exit requirement.

Students must successfully complete Literature 1, *Literary Interpretation*, or its equivalent prior to declaring the literature major or minor.

Lower-Division Courses

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division course work before beginning upper-division work.

Three lower-division courses are required:

- Literature 1, Literary Interpretation: close reading and analysis of literary texts
- one Literature 61-series course: categories, methodologies, and problems of literary study
- one Literature 80-series course: topical, thematic, and comparative studies of literary texts

Upper-Division Courses

Upper-division courses provide more detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries.

Ten upper-division courses are required:

- Literature 101, Theory and Interpretation: approaches to literary and cultural theories
- six upper-division courses in an area of concentration (described below)
- three upper-division electives in literature

Distribution requirements. Among the 10 upper-division courses, at least two must focus on literature written prior to the year 1750; one course must focus on non-Western literature or literature in a global perspective; and one course must focus on poetry. Some courses fulfill more than one of these distribution requirements. A list of annual course offerings indicating distribution codes for each course is available in the department office or on the Literature Department web page at http://literature.ucsc.edu.

With prior permission from a faculty adviser, one elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Intensive Literature Major

Fifteen courses are required: three lower-division and 12 upper-division courses. One of the upper-division courses may be a Senior Seminar, which may be used to satisfy the campus comprehensive (exit) requirement.

Lower-Division Courses

The same requirements apply as for the standard literature major. Students who choose the intensive literature major are required to achieve competence in a second-language literature. Upper-division literature course work may require completion of a lower-division language sequence or the equivalent.

Upper-Division Courses

The intensive major requires 12 upper-division courses. Distribution requirements for the intensive major are the same as those for the standard literature major. In addition, students must complete at least two courses in a second-language literature studied in the original language. As in the standard major, with prior permission from a faculty adviser, one elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Concentrations

The purpose of the upper-division area of concentration is to help students shape a coherent program of study. The department provides several defined concentrations, described below. For all concentrations except national/ transnational literatures, texts may be read in the original or in translation.

National/Transnational Literatures

These concentrations examine literature within the frameworks of particular languages or national and regional traditions. National/transnational concentrations require that texts be read in the original language.

- English-Language Literatures
- The study of American and British literature, as well as literatures of other Englishspeaking peoples around the world.

- French literature
- The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.
- · German literature
- The study of the literature, language, and cultural practices of the German-speaking areas of central Europe including Germany, Austria, and Switzerland.
- · Greek and Latin literatures
- The study of the literature, languages, and cultural practices of ancient Greece and Rome. Students may choose to concentrate in Greek or Latin or both.
- · Italian literature
- The study of Italian literature, language, and cultural practices from the Middle Ages to the present.
- Spanish/Latin American/Latino literatures
- The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Creative Writing

The Department of Literature offers a sequence of workshops from introductory through advanced levels in both poetry and fiction. Other activities available to interested students include participation in the production of literary journals on campus, attendance at readings by visiting writers, and use of a creative writing reading room.

Admission to this concentration is selective. Interested students are required to take one lower-division workshop at UCSC before applying to the creative writing concentration.

Students accepted into the concentration must complete three advanced writing workshops and a senior project (e.g., a group of stories, a significant portion of a novel, a collection of poems). To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office) and a thoughtful selection from their work (8–10 pages of poetry or fiction). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature. At that time, students should meet with their adviser to discuss plans for a senior project.

Pre- and Early Modern Studies

The interdisciplinary study of literatures and cultures from antiquity through the early eighteenth century, especially in Europe. This concentration includes the study of popular culture and everyday life as well as readings in masterpieces of classical, medieval, early modern (Renaissance), and neo-classical literature.

Critical Theory

The study of critical theory from antiquity to postmodernism. Exposure to models from literary and cultural studies, as well as other interdisciplinary fields, with special emphasis on how different theoretical models help us read better.

Literature and Film

The study of film from an interdisciplinary perspective, including its relationship to literature, imparting the critical techniques, theoretical concepts, and historical knowledge necessary to understand the theoretical underpinnings of literature and film, the cultural importance of film, and the mediation of contemporary society and art by cinematic and electronic images.

Modern Literary Studies

The study of literature of the eighteenth, nineteenth, twentieth, and twenty-first centuries. This concentration examines ways in which modernity in general and literary modernism and postmodernism in particular emerge and develop in different countries and cultures.

World Literature and Cultural Studies

The study of literature and cultural production both within a global context and within specific histories and economies. Courses move beyond the literary text to include nonverbal forms of representation such as social movements and everyday life practices.

Comprehensive Requirement

Seniors may select one of the following options to satisfy the campus exit requirement:

- Senior seminar. The senior seminar may be counted as one of the required upper-division courses. The senior seminar need not be in the student's area of concentration. Several senior seminars are offered each quarter; extensive writing is required in all seminars.
- Senior thesis. A student who wishes to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a

bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement. A student whose application has been approved may receive course credit toward the major for one independent study (course 195) in a literature concentration.

For students in the creative writing concentration, a creative writing project under the supervision of a faculty member (Literature/Creative Writing 194 or 195) is required. Students must successfully complete Literature 101 before taking any comprehensive requirement.

General Information

Creative writing courses. Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing 180, 183, 194, and 195 to satisfy major requirements.

Declaring the major. Students declare a major in literature by completing and submitting a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a literature major should consult with staff and/or faculty advisers as early as possible and declare the major before the end of their sophomore year. Transfer students are urged to declare the major in the first quarter at UCSC. Students must complete Literature 1 or its equivalent prior to declaring the major.

Double major. A student studying literature as part of a double major must fulfill all of the requirements for any concentration in the literature major in addition to all of the requirements in another major field. No course may be counted toward both majors.

The literature minor. The minor in literature comprises eight courses:

- three lower-division required courses (including Literature 1 or its equivalent; see major requirements above);
- Literature 101, Theory and Interpretation;
- four other upper-division literature courses.

Transfer credit. A student may petition to receive credit toward the lower-division requirements of the major for up to three courses taken at other institutions. An introduction to literature course may be used to satisfy the Literature 1 course requirement. Any other two literature courses may be applied toward the Literature 61 series and the Literature 80 series course requirements. Transfer of Credit petition forms are available in the Literature Department office.

Credit for repeated courses. Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UCSC General Catalog.

Advising. Faculty advisers are available in the Literature Department office throughout the week during each academic term; students may make appointments in advance to meet with them. Staff advisers are also available on a drop-in basis. Students are encouraged to consult with a faculty adviser once a quarter.

Senior checklist. Three quarters before anticipated graduation, all literature majors must complete a checklist in collaboration with a department adviser. The purpose of the checklist is to confirm progress toward graduation and the satisfaction of all major requirements. Completion and approval of a senior checklist are required for graduation.

Opportunities for study abroad. The University of California's Education Abroad Program (EAP) operates study centers in countries throughout the world, all associated with host institutions of high academic standing. EAP serves over 1500 upper-division students from the nine UC campuses every year. Students who participate in a UC Education Abroad Program study year may petition to apply up to three upper-division courses from EAP toward the literature major. Petition forms are available in the department office.

Latin American and Latino Studies and Literature combined major. The departments of Latin American and Latino Studies and Literature offer a combined major. See Latin American and Latino Studies for additional information.

The Graduate Programs

The Doctoral Program

The UCSC doctoral program offers an innovative multidisciplinary approach to literary studies under the auspices of the Department of Literature. While the program affords a coherent academic experience for all students, the final choice of programmatic emphasis and a trajectory of concerns is decided by each individual. Because the program is relatively small, students are able to work closely with faculty throughout their graduate careers and are encouraged to take advantage of the rich array of events, research clusters, and lectures offered on campus.

The doctoral program reflects wide-ranging faculty interests in American, Asia/Pacific, and New World studies; world literature and cultural studies; European literature from the classical to the early modern period (pre- and early modern studies); eighteenth-, nineteenth-, and twentieth-century literatures; gender and sexuality studies; post-colonial and emergent literatures; and textual studies. Students may elect to participate in cooperative programs between literature and feminist studies, Latin American and Latino studies, or American studies and receive a designated emphasis in the form of a parenthetical notation on their doctoral degree.

Among the areas that represent special strength in the department are contemporary American literature and poetics; Latin American/Latino literature; literatures of the Americas, a cross-border hemispheric perspective that envisions the Americas as an area of study; world literature and cultural studies, which treats literary, intellectual, and cultural production in globally historicized contexts; nineteenth-century studies; and pre- and early modern studies, where comparative and interdisciplinary work is encouraged and which includes classical literature and philosophy, medieval and Renaissance French, Italian, and English cultures and literatures (including visual culture), and Spanish Golden Age literature. Within all areas, faculty draw on cutting-edge critical practices such as feminism, race and gender studies, Marxism, postcolonial theory, psychoanalysis, queer theory, and cultural studies.

The program requires significant literary work in two languages. All students are required to complete a minimum of two courses, preferably three, in a second-language literature in which the reading is done in the original language. The second literature must serve as a component of the qualifying exam that certifies the student's readiness to begin writing the dissertation. Primary concentrations are available in English/American, French, and Spanish/Latin American/Latino literatures. Secondary concentrations are available in all of the above, plus German, Italian, Latin, and Greek, as well as other non-English literatures relevant to developing comparative frameworks and individual areas of concentration.

The common requirements are as follows:

- a one-quarter proseminar, Literature 200, to be taken in the first year;
- quarterly two-credit advising courses (independent studies);
- twelve courses leading to the definition of an area of concentration. At least two courses
 must be in a second-language literature; up to four may be from the offerings of other
 departments; up to three may be independent study courses; and one course must focus
 on pre-1750 literature and culture;
- teaching assistant training, administered as a course offered by the Literature Department;
- three quarters of supervised teaching experience;
- a three-week summer intensive language course or equivalent, administered by the Literature Department;
- a qualifying examination (with written and oral components);
- · a prospectus outlining and defining the dissertation project;
- · a dissertation.

A master's degree is conferred upon request to Ph.D. candidates who have completed the course work requirements for the doctorate. (The teaching assistant training and supervised teaching experience are not considered part of the course work requirements for the M.A.) In addition to completing the required course work, students must write a master's thesis under the supervision of a faculty adviser or successfully complete the Literature Ph.D. Qualifying Exam.

Applications and requirements for obtaining these notations are available at the respective program and department offices. More detailed information for prospective graduate students, including application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department web site: http://literature.ucsc.edu/.

The Master's Program

A separate master of arts degree program in literature is intended for students whose aim is to deepen and expand their literary/critical training and to proceed to a Ph.D. program at another institution. Priority for admission is given to students interested in underrepresented areas of study within the Literature Department's offerings, such as the non-English language literatures and, more broadly, critical theory.

The M.A. program requires students to complete the equivalent of nine seminars of graduate-level study in literature, including a written capstone requirement, the master's thesis. Requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

The common requirements are as follows:

- a one-quarter proseminar, Literature 200, to be taken in the first year;
- seven courses leading to the definition of an area of concentration. Up to two courses may be from the offerings of other departments, and one may be an independent study course:

• a thesis (written in conjunction with Literature 299, *Thesis Research*). Typically, a thesis will range in length from 30–35 pages, plus a bibliography.

The Literature Department does not normally provide financial support to students pursuing the M.A. degree; some teaching assistantships do become available. Admission to the M.A. program does not constitute admission to the Ph.D. program, and students may not automatically transfer into the Ph.D. program from the M.A. program; they must reapply. Further information and application materials are available from the Division of Graduate Studies: http://graddiv.ucsc.edu.

Program Description | Faculty | Course Descriptions

Program Description

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, rather than through separate departments of English, modern languages, and classics. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the major encompass traditional literary history and interpretation as well as crosscultural inquiry and current theoretical debates.

The literature major does permit focused work in national literary traditions. Students may concentrate in English-language literatures; in French, German, or Italian; in Latin and/or Greek; or in Spanish/Latin American/Latino literatures. Alternatively, students may organize their studies by period. Students who choose pre- and early modern studies focus on early literary traditions from antiquity through the Middle Ages, the Renaissance, and the neo-classical period, while those engaged in modern literary studies concentrate on literature of the 18th, 19th, 20th, and 21st centuries. Three concentrations have a theoretical basis: critical theory, literature and film, and world literature and literature concentration is dedicated to non-Western literatures and literature in a global context. Finally, the Literature Department also offers a concentration in creative writing in which, in addition to studying literature, students work with faculty in upper-division workshops to improve their own creative writing skills.

Literature majors at UCSC are trained in critical reading, writing, and thinking, as well as in literary interpretation. These skills have wide applicability: they may lead to careers in other media such as film, theater, video, the visual arts, and electronic media; and they offer avenues into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and history of art and visual culture. Literature majors traditionally enter a wide variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels.

The Literature Department faculty strongly recommends that all students study a second language. Proficiency in more than one language vastly enhances understanding of any literature and of language arts in general. Graduate programs in literature and other humanities disciplines generally require competence in another language besides English.

Letter Grade Requirement

Letter grades are required for 75 percent of courses applied toward the literature

major, including the Senior Seminar, which must be taken for a letter grade.

Literature Major Options

Students wishing to major in literature may choose either the standard literature major or the intensive literature major. The intensive literature major is recommended particularly for students who plan to continue their studies in graduate school. The requirements for the intensive major include the study of literature in two languages; proficiency in a second language is therefore required.

The Standard Literature Major

Thirteen courses are required: three lower-division and ten upper-division courses. One of the latter may be a Senior Seminar, which may be used to satisfy the campus comprehensive (exit) requirement. In exceptional cases, and with faculty permission, students may write a senior thesis to satisfy the exit requirement.

Students must successfully complete Literature 1, *Literary Interpretation*, or its equivalent prior to declaring the literature major or minor.

Lower-Division Courses

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division course work before beginning upper-division work.

Three lower-division courses are required:

- Literature 1, Literary Interpretation: close reading and analysis of literary texts
- one Literature 61-series course: categories, methodologies, and problems of literary study
- one Literature 80-series course: topical, thematic, and comparative studies of literary texts

Upper-Division Courses

Upper-division courses provide more detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries.

Ten upper-division courses are required:

- Literature 101, *Theory and Interpretation*: approaches to literary and cultural theories
- six upper-division courses in an area of concentration (described below)
- three upper-division electives in literature

Distribution requirements. Among the 10 upper-division courses, at least two must focus on literature written prior to the year 1750; one course must focus on non-Western literature or literature in a global perspective; and one course must focus on poetry. Some courses fulfill more than one of these distribution requirements. A list of annual course offerings indicating distribution codes for each course is available in the department office or on the Literature Department web page at http://literature.ucsc.edu.

With prior permission from a faculty adviser, one elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Intensive Literature Major

Fifteen courses are required: three lower-division and 12 upper-division courses. One of the upper-division courses may be a Senior Seminar, which may be used to satisfy the campus comprehensive (exit) requirement.

Lower-Division Courses

The same requirements apply as for the standard literature major. Students who choose the intensive literature major are required to achieve competence in a second-language literature. Upper-division literature course work may require completion of a lower-division language sequence or the equivalent.

Upper-Division Courses

The intensive major requires 12 upper-division courses. Distribution requirements for the intensive major are the same as those for the standard literature major. In addition, students must complete at least two courses in a second-language literature studied in the original language. As in the standard major, with prior permission from a faculty adviser, one elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Concentrations

The purpose of the upper-division area of concentration is to help students shape a coherent program of study. The department provides several defined concentrations, described below. For all concentrations except national/ transnational literatures, texts may be read in the original or in translation.

National/Transnational Literatures

These concentrations examine literature within the frameworks of particular languages or national and regional traditions. National/transnational concentrations require that texts be read in the original language.

- English-Language Literatures
- The study of American and British literature, as well as literatures of other English-speaking peoples around the world.
- French literature
- The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.
- German literature
- The study of the literature, language, and cultural practices of the Germanspeaking areas of central Europe including Germany, Austria, and Switzerland.
- Greek and Latin literatures
- The study of the literature, languages, and cultural practices of ancient Greece and Rome. Students may choose to concentrate in Greek or Latin or both.
- Italian literature
- The study of Italian literature, language, and cultural practices from the Middle Ages to the present.

- Spanish/Latin American/Latino literatures
- The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Creative Writing

The Department of Literature offers a sequence of workshops from introductory through advanced levels in both poetry and fiction. Other activities available to interested students include participation in the production of literary journals on campus, attendance at readings by visiting writers, and use of a creative writing reading room.

Admission to this concentration is selective. Interested students are required to take one lower-division workshop at UCSC before applying to the creative writing concentration.

Students accepted into the concentration must complete three advanced writing workshops and a senior project (e.g., a group of stories, a significant portion of a novel, a collection of poems). To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office) and a thoughtful selection from their work (8–10 pages of poetry or fiction). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature. At that time, students should meet with their adviser to discuss plans for a senior project.

Pre- and Early Modern Studies

The interdisciplinary study of literatures and cultures from antiquity through the early eighteenth century, especially in Europe. This concentration includes the study of popular culture and everyday life as well as readings in masterpieces of classical, medieval, early modern (Renaissance), and neo-classical literature.

Critical Theory

The study of critical theory from antiquity to postmodernism. Exposure to models from literary and cultural studies, as well as other interdisciplinary fields, with special emphasis on how different theoretical models help us read better.

Literature and Film

The study of film from an interdisciplinary perspective, including its relationship to literature, imparting the critical techniques, theoretical concepts, and historical knowledge necessary to understand the theoretical underpinnings of literature and film, the cultural importance of film, and the mediation of contemporary society and art by cinematic and electronic images.

Modern Literary Studies

The study of literature of the eighteenth, nineteenth, twentieth, and twenty-first centuries. This concentration examines ways in which modernity in general and literary modernism and postmodernism in particular emerge and develop in different countries and cultures.

World Literature and Cultural Studies

The study of literature and cultural production both within a global context and within specific histories and economies. Courses move beyond the literary text to include nonverbal forms of representation such as social movements and everyday life practices.

Comprehensive Requirement

Seniors may select one of the following options to satisfy the campus exit requirement:

- Senior seminar. The senior seminar may be counted as one of the required upper-division courses. The senior seminar need not be in the student's area of concentration. Several senior seminars are offered each quarter; extensive writing is required in all seminars.
- Senior thesis. A student who wishes to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement. A student whose application has been approved may receive course credit toward the major for one independent study (course 195) in a literature concentration.

For students in the creative writing concentration, a creative writing project under the supervision of a faculty member (Literature/Creative Writing 194 or 195) is required. Students must successfully complete Literature 101 before taking any comprehensive requirement.

General Information

Creative writing courses. Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing 180, 183, 191, 194, and 195 to satisfy major requirements.

Declaring the major. Students declare a major in literature by completing and submitting a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a literature major should consult with staff and/or faculty advisers as early as possible and declare the major before the end of their sophomore year. Transfer students are urged to declare the major in the first quarter at UCSC. Students must complete Literature 1 or its equivalent prior to declaring the major.

Double major. A student studying literature as part of a double major must fulfill all of the requirements for any concentration in the literature major in addition to all of the requirements in another major field. No course may be counted toward both majors.

The literature minor. The minor in literature comprises eight courses:

- three lower-division required courses (including Literature 1 or its equivalent; see major requirements above);
- Literature 101, Theory and Interpretation;
- four other upper-division literature courses.

Transfer credit. A student may petition to receive credit toward the lower-division

requirements of the major for up to three courses taken at other institutions. An introduction to literature course may be used to satisfy the Literature 1 course requirement. Any other two literature courses may be applied toward the Literature 61 series and the Literature 80 series course requirements. Transfer of Credit petition forms are available in the Literature Department office.

Credit for repeated courses. Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UCSC General Catalog.

Advising. Faculty advisers are available in the Literature Department office throughout the week during each academic term; students may make appointments in advance to meet with them. Staff advisers are also available on a drop-in basis. Students are encouraged to consult with a faculty adviser once a quarter.

Senior checklist. Three quarters before anticipated graduation, all literature majors must complete a checklist in collaboration with a department adviser. The purpose of the checklist is to confirm progress toward graduation and the satisfaction of all major requirements. Completion and approval of a senior checklist are required for graduation.

Opportunities for study abroad. The University of California's Education Abroad Program (EAP) operates study centers in countries throughout the world, all associated with host institutions of high academic standing. EAP serves over 1500 upper-division students from the nine UC campuses every year. Students who participate in a UC Education Abroad Program study year may petition to apply up to three upper-division courses from EAP toward the literature major. Petition forms are available in the department office.

Latin American and Latino Studies and Literature combined major. The departments of Latin American and Latino Studies and Literature offer a combined major. See <u>Latin American and Latino Studies</u> for additional information.

The Graduate Programs

The Doctoral Program

The UCSC doctoral program offers an innovative multidisciplinary approach to literary studies under the auspices of the Department of Literature. While the program affords a coherent academic experience for all students, the final choice of programmatic emphasis and a trajectory of concerns is decided by each individual. Because the program is relatively small, students are able to work closely with faculty throughout their graduate careers and are encouraged to take advantage of the rich array of events, research clusters, and lectures offered on campus.

The doctoral program reflects wide-ranging faculty interests in American, Asia/Pacific, and New World studies; world literature and cultural studies; European literature from the classical to the early modern period (pre- and early modern studies); eighteenth-, nineteenth-, and twentieth-century literatures; gender and sexuality studies; post-colonial and emergent literatures; and textual studies. Students may elect to participate in cooperative programs between literature and feminist studies, Latin American and Latino studies, or American studies and receive a designated emphasis in the form of a parenthetical notation on their doctoral degree.

Among the areas that represent special strength in the department are contemporary

American literature and poetics; Latin American/Latino literature; literatures of the Americas, a cross-border hemispheric perspective that envisions the Americas as an area of study; world literature and cultural studies, which treats literary, intellectual, and cultural production in globally historicized contexts; nineteenth-century studies; and pre- and early modern studies, where comparative and interdisciplinary work is encouraged and which includes classical literature and philosophy, medieval and Renaissance French, Italian, and English cultures and literatures (including visual culture), and Spanish Golden Age literature. Within all areas, faculty draw on cutting-edge critical practices such as feminism, race and gender studies, Marxism, postcolonial theory, psychoanalysis, queer theory, and cultural studies.

The program requires significant literary work in two languages. All students are required to complete a minimum of two courses, preferably three, in a second-language literature in which the reading is done in the original language. The second literature must serve as a component of the qualifying exam that certifies the student's readiness to begin writing the dissertation. Primary concentrations are available in English/American, French, and Spanish/Latin American/Latino literatures. Secondary concentrations are available in all of the above, plus German, Italian, Latin, and Greek, as well as other non-English literatures relevant to developing comparative frameworks and individual areas of concentration.

The common requirements are as follows:

- a one-quarter proseminar, Literature 200, to be taken in the first year;
- quarterly two-credit advising courses (independent studies);
- twelve courses leading to the definition of an area of concentration. At least two courses must be in a second-language literature; up to four may be from the offerings of other departments; up to three may be independent study courses; and one course must focus on pre-1750 literature and culture;
- teaching assistant training, administered as a course offered by the Literature Department;
- three quarters of supervised teaching experience;
- a three-week summer intensive language course or equivalent, administered by the Literature Department;
- a qualifying examination (with written and oral components);
- a prospectus outlining and defining the dissertation project;
- a dissertation.

A master's degree is conferred upon request to Ph.D. candidates who have completed the course work requirements for the doctorate. (The teaching assistant training and supervised teaching experience are not considered part of the course work requirements for the M.A.) In addition to completing the required course work, students must write a master's thesis under the supervision of a faculty adviser or successfully complete the Literature Ph.D. Qualifying Exam.

More detailed information for prospective graduate students, including application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department web site: http://literature.ucsc.edu/.

Graduate students in literature may obtain a parenthetical notation on their diploma that they have specialized in feminist studies, Latin American and Latino studies, and/or American studies. Applications and requirements for obtaining these parenthetical notations are available at the respective program and department offices. More detailed information for prospective graduate students, including application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department web site: http://literature.ucsc.edu/.

The Master's Program

A separate master of arts degree program in literature is intended for students whose aim is to deepen and expand their literary/critical training and to proceed to a Ph.D. program at another institution. Priority for admission is given to students interested in underrepresented areas of study within the Literature Department's offerings, such as the non-English language literatures and, more broadly, critical theory.

The M.A. program requires students to complete the equivalent of nine seminars of graduate-level study in literature, including a written capstone requirement, the master's thesis. Requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

The common requirements are as follows:

- a one-quarter proseminar, Literature 200, to be taken in the first year;
- seven courses leading to the definition of an area of concentration. Up to two
 courses may be from the offerings of other departments, and one may be an
 independent study course;
- a thesis (written in conjunction with Literature 299, *Thesis Research*). Typically, a thesis will range in length from 30–35 pages, plus a bibliography.

The Literature Department does not normally provide financial support to students pursuing the M.A. degree; some teaching assistantships do become available. Admission to the M.A. program does not constitute admission to the Ph.D. program, and students may not automatically transfer into the Ph.D. program from the M.A. program; they must reapply. Further information and application materials are available from the Division of Graduate Studies: http://graddiv.ucsc.edu.

Program Description | Course Descriptions

Faculty and Professional Interests

Professor

Jorge Aladro Font

Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

George T. Amis, Emeritus

Karen Bassi

Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

Murray Baumgarten

Dickens, Victorian literature and culture, the Bible, translation, modern Jewish writing, the Holocaust

Harry Berger Jr., Emeritus

Gabriel Berns, Emeritus

Margaret R. Brose

Italian literature, 19th- and 20th-century poetry and poetics, the novel, Romanticism, medieval literature, gender studies, autobiography

Julianne Burton-Carvajal

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

Christopher Connery

World literature and cultural studies, globalism and geographical thought, the 1960s, Marxism, pre-modern and modern Chinese cultural studies, cultural revolution

Robert M. Durling, Emeritus

John M. Ellis, Emeritus

Carla Freccero

Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory, U.S. popular culture

Pascale Gaitet

Nineteenth- and 20th-century French literature, sociolinquistics, political history, Celine, Genet

Mary-Kay Gamel

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Susan Gillman

Nineteenth-century American literature and culture; theories of culture, race, and gender; world literature and cultural studies

Wlad Godzich

Theory of literature, emergent literature, globalization and culture, European integration

James B. Hall, Emeritus

John O. Jordan

Dickens, Victorian literature and culture, the English novel, literature of South Africa, narrative theory

Sharon Kinoshita

Intercultural relations in 12th- and 13th-century literature, Mediterranean studies, globalism, postcolonial theory, world literature and cultural studies

Norma Klahn

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

H. M. Leicester Jr.

Psychoanalysis, poststructuralism, gender theories, theory of cultural change; cultural studies and popular culture: opera, film, American country music

John P. Lynch, Emeritus

Nathaniel E. Mackey

Twentieth-century American literature, Afro-American literature, creative writing

Tyrus Miller

Modernist, avant-garde, and postmodernist literature; the interrelations of the arts in the 20th century; aesthetics; cinema and film theory; the Frankfurt School; philosophy and social theory; contemporary poetry and language arts

Helene Moglen

The English novel; feminist, critical, cultural, and psychoanalytic theory; gender and genre in social and psychological contexts

Madeline Moore, Emerita

Marta Morello-Frosch, Emerita

Priscilla W. Shaw, Emerita

Deanna Shemek

Italian literature and cultural history, Renaissance studies, early modern popular culture, narrative (early modern to contemporary), women's studies, literary theory

Paul N. Skenazy, Emeritus

Greta Slobin, Emerita

S. Page Stegner, Emeritus

Richard Terdiman

Nineteenth- and 20th-century French and European literature and culture, literary and cultural theory, contemporary critical theory, cultural globalization

Thomas A. Vogler, Emeritus

Georges Van Den Abbeele

Early modern French philosophy, literature, and culture; Francophone literature; travel narrative and tourism studies; relations between philosophy and literature; poststructuralist and postmodernist critical theory; film and film theory; East-West literary relations; West Coast regional history and literature

Michael J. Warren, Emeritus

Rob Wilson

Transnational and postcolonial literatures, especially as located in Asia/Pacific emergences as posited against American empire of globalization; cultural poetics of America; the sublime, Longinus to Hiroshima; mongrel poetics of experimental writing, especially poetry

Associate Professor

Louis Chude-Sokei

Modern and contemporary African American literature, Caribbean and West African literatures, post-colonial literature and theory, modernism, black diaspora, cultural studies, popular culture

Vilashini Cooppan

Postcolonial studies, comparative and world literature, literatures of slavery and diaspora, globalization studies, cultural theory of race and ethnicity

Jody Greene

Seventeenth- and 18th-century British and French literature and culture, pre- and early modern studies, early modern colonialisms, gay and lesbian cultural studies, gender studies, history of authorship, history of the book

Kirsten Silva Gruesz

Comparative Americas studies, Chicano/Latino literatures and cultures, 19th-century U.S. literature, poetry and translation, genre theory

Margo Hendricks

Early modern English literature and culture; theories and discourses of race, gender, drama, and theory; women playwrights; pre- and early modern studies

Lourdes Martínez-Echazábal

Literature

Lower-Division Courses

1. Literary Interpretation. F,W,S

Close reading and analysis of literary texts, including representative examples of several different genres and periods. An introduction to practical criticism required of all literature majors; should be completed prior to upper-division work in literature. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to first-year students and sophomores, or literature and proposed literature majors and literature minors. (General Education Code(s): IH, W.) *P. Gaitet, S. Gillman, W. Jones*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

61. Introduction to Literary Genres.

The Staff

61F. Introduction to Reading Fiction. *

Close reading of short stories and some novels with the aim of developing critical methods for the analysis and interpretation of prose fiction. Topics include character, plot, narrative structure, and the poetics of prose. (General Education Code(s): IH.) *The Staff*

61H. Introduction to Film Analysis. S

Introduces techniques for the close reading of film, with particular attention to film form (shot-by-shot analysis), cinematic codes, narrative structure, and the ideological burdens of the basic cinematic apparatus. Case studies of select works by major directors from the Hollywood studio period. Topics for 2008: John Ford, Orson Welles, Alfred Hitchcock. (General Education Code(s): IH.) *D. Selden*

61M. Approaches to Classical Myth. W

Introduction to Greek myths, including selected ancient texts and visual artifacts, historical and cultural context of their creation and reception, modern theoretical approaches such as structuralism and psychoanalysis, and interpretations in various media. (Also offered as History 61. Students cannot receive credit for both courses.) (General Education Code(s): IH.) *K. Bassi*

61P. Introduction to Reading Poetry. *

An introduction to selected modes and forms of poetry with an emphasis on close textual analysis. Examples will be taken from different historical periods and poetic traditions.

61R. Race in Literature. F

An investigation into the various uses and abuses of "race" in 20th-century fiction. Authors may include Jean Rhys, Paul Bowles, Mark Twain, Russell Banks, Darius James, Joseph Conrad, Nella Larsen, LeRoi Jones/Amiri Baraka, Leslie Marmon Silko, and V.S. Naipaul. (General Education Code(s): IH, E.) *L. Chude-Sokei*

80. Topics in Literature.

The Staff

80A. Biblical Narratives. W

No book has so decisively influenced the development of the Western world as the Bible. Traces the Bible's influence on narrative, themes, and ideas in Western literature. Explores major Biblical stories and themes in a comparative context and traces their reappearance in Western literature and imaginative works. (General Education Code(s): T4-Humanities and Arts.) *R. Sherwin*

80L. The Holocaust: The Destruction of European Jewry. *

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film. (Also offered as History 80W. Students cannot receive credit for both courses.) (General Education Code(s): T4-Humanities and Arts, E.) *P. Kenez, M. Baumgarten*

80M. Romantic Fiction. S

A study of novels, short stories, and fairy tales by authors from America, England, France, and Germany. Readings include works by Poe, Hawthorne, Mary Shelley, Goethe, Hoffman, Rousseau, and Mérimée. (General Education Code(s): T4-Humanities and Arts.) *L. Nygaard*

80S. Aristotle's Poetics. *

Close reading and analysis of Aristotle's *Poetics*, with special attention to the subsequent fate and influence of the notions advanced in the book. (General Education Code(s): T4-Humanities and Arts.) *W. Godzich*

80X. Global Narratives. F

An introduction to works (novels, film, autobiography, travel literature) considered in relation to life in the modern world system. Topics and contexts include colonialism, postcolonialism, transnational capitalism, migrancy, diaspora, global cities, travel, and tourism. (General Education Code(s): T4-Humanities and Arts, E.) *V. Cooppan*

80Z. Introduction to Shakespeare. *

Study of representative plays. No previous experience with Shakespeare is assumed. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

88A. Terror and Philosophy (1 credit). W

Discussion of terror and terrorism from a philosophical perspective, with a focus on Juergen Habermas and Jacques Derrida. Enrollment restricted to first-year students. Enrollment limited to 15. *W. Godzich*

99. Tutorial. F,W,S

The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

101. Theory and Interpretation. F,W,S

Contemporary approaches to literary and cultural theory, with emphasis on how theoretical perspectives advance and broaden the reading of literary texts. Introduction to important new theoretical developments and their antecedents. Literature majors should complete this course as early as possible. Topics: (F) literary hermeneutics; (W) authorship; (S) post-humanism and the question of the animal. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to literature and proposed literature majors and literature minors. May be repeated for credit. (General Education Code(s): W.) W. Godzich, J. Greene, C. Freccero

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

200. Proseminar. F

The proseminar provides a common experience for entering students, facilitates exchange of ideas and approaches to literary and extra-literary texts, critical issues, and theoretical problems. It focuses on broad aspects of the history of theory and criticism, on the students' critical writing, and on aspects of professional development. Enrollment restricted to graduate students. *W. Godzich*

201. The Pedagogy of Literature (1 credit). F

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of literature specifically. Coordinated by a graduate student who has had substantial experience as a teaching assistant, under the supervision of a faculty member. Enrollment restricted to graduate students. May be repeated for credit. *H. Moglen*

202. Colloquium (2 credits). F,W,S

Student receives credit for attending designated number of freestanding lectures, colloquia, symposia, or conferences during the term and reports orally, or in writing, to instructor. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

204. Readings in Literature (2 credits). *

Focuses on selected texts or authors in literature and/or theory. Students meet with instructor to discuss readings and deepen their knowledge on a particular author, critic, theorist, or text. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

291F. Advising (2 credits). F,W,S

Independent study formalizing the advisee-advisor relationship. Regular meetings to plan, assess, and monitor academic progress and to evaluate course work as necessary. May be used to develop general bibliography of background reading and trajectory of study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

[Return to top.]

Creative Writing

Lower-Division Courses

10. Introduction to Creative Writing. F,W,S

Introduction to the crafts and techniques of poetry, fiction, and creative non-fiction,

identifying and exploring traditional and non-traditional literary forms and genres while working on individual creative writing projects. An author reading and two workshop section per week. Prerequisite: satisfaction of the Entry Level Writing requirement. Enrollment restricted to first-year students, sophomores, and juniors. May be repeated for credit. (General Education Code(s): A.) *The Staff*

52. Intermediate Fiction Writing. F,W,S

An intermediate-level course in fiction designed for prospective creative writing majors. Prerequisite(s): submission of writing at first class meeting. May be repeated for credit. (General Education Code(s): A.) (F,W) M. Sanders-Self, A. Brooks

53. Intermediate Poetry Writing. F,W,S

An intermediate-level course in poetry designed for prospective creative writing majors. Prerequisite(s): submission of writing at first class meeting. May be repeated for credit. (General Education Code(s): A.) (F,W,S) G. Young

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Upper-Division Courses

170. Methods and Materials. S

Focuses on a particular process or subject used in the production of a literary text. Course is intended to work as a bridge between invention and scholarship. Topic: Borderlands. Enrollment restricted to creative writing literature majors. May be repeated for credit. (General Education Code(s): A.) *R. Wilson*

180. Advanced Writing: Fiction. F,W,S

Intensive work in writing fiction. Satisfies the Creative Writing Literature concentration. Enrollment restricted to creative writing literature majors or permission of instructor. May be repeated for credit. (General Education Code(s): A.) (W) M. Perks, (FS) K. Yamashita

183. Advanced Writing: Poetry. F,W

Intensive work in writing poetry. Satisfies the Creative Writing Literature concentration. Enrollment restricted to creative writing literature majors or permission of instructor. May be repeated for credit. (General Education Code(s): A.) (F) N. Mackey, (W) G. Young

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) The Staff

194. Creative Project Seminar.

Seminar for students beginning work on their creative writing senior project. Led by a faculty member, the seminar helps prepare each student to complete the project. Attention is given to focusing of creative topics, review of work in progress, work rhythms, and revision. *The Staff*

194A. Poetry. S

Satisfies the Creative Writing Literature concentration. Prerequisite(s): Literature 101. Enrollment restricted to senior creative writing literature majors. *G. Young*

194B. Fiction. S

Satisfies the Creative Writing Literature concentration. Prerequisite(s): Literature 101. Enrollment restricted to senior creative writing literature majors. *K. Yamashita*

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. Students submit petition to sponsoring agency. The Staff

198. Group Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199. Tutorial. F,W,S

May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

English-Language Literatures

Upper-Division Courses

102. Canons.

102A. The Traditional British Canon, Part I. W

The constitution of the "canon" of English literature from Chaucer to Cowper. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *W. Jones*

102B. The Traditional British Canon, Part II. S

Explores poetry and prose from 1800 to 1950 through extensive reading in the Romantics, Victorians, Moderns, articulating the connections among them, connecting their work to key social, political, scientific, and technological moments defining these eras. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry distribution requirement. *The Staff*

102C. The Traditional U.S. Canon: Beginnings to 1900. *

Major works from the colonial and early national periods to 1900, with attention to their social and cultural context. Satisfies the English and Modern Literature concentrations. *K. Gruesz*

103. Periods and Movements.

103A. British Literature and Culture to 1740. F

Literature and society to 1740. Topic: friendship, family, and the household in early modern England. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern Studies distribution requirement. *C. Cady*

103I. The Harlem Renaissance. W

Examination of major writings of the Harlem Renaissance, with attention to cultural and historical background. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry distribution requirement. (General Education Code(s): E.) *N. Mackey*

103J. Contemporary American Literature. S

A selective examination of major writing since WWII, with attention to both literary issues and historical context. Satisfies the English and Modern

Literature concentrations. May be repeated for credit. The Staff

103K. American Literature: 1900 to WWII. W

Surveys American literature in and around the climate of "modernism." Beginning with texts written at the turn of the century, course ranges widely through the early to mid-20th century. Special attention will be given to works produced before and between World Wars, as well as to the various artistic, social and international movements characterizing that period. Satisfies the English and Modern Literature concentrations. *The Staff*

110. Prose.

110B. The 18th-Century English Novel. *

The 18th-century novel from Defoe to Austen. Satisfies the English and Preand Early Modern Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. *J. Greene*

110C. The 19th-Century English Novel. *

The 19th-century novel: Austen to Brontë. The Staff

110D. The 19th- and 20th-Century English Novel. S

The 19th- and 20th-century novel: Hardy to Joyce. Satisfies the English and Modern Literature concentrations. *The Staff*

110F. Nineteenth-Century American Fiction. S

Examination of selected fiction written between the end of the 18th century and the Civil War, with attention to historical and cultural as well as literary issues. Satisfies the English and Modern Literary Studies concentrations. *The Staff*

120. Poetry.

120A. Poetry of the 17th Century. *

Readings in the works of Donne, Jonson, Herbert, Herrick, Marvell, and others. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *The Staff*

120C. Nineteenth-Century American Poetry. F

The major figures and important movements from Poe to Emerson through Whitman and Dickinson. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry distribution requirement. *K. Gruesz*

120G. Open Field Poetry and Poetics. *

The theory and practice of a number of recent American poets associated with ideas of open form: Amiri Baraka, Robert Creeley, Edward Dorn, Robert Duncan, Robert Kelly, Denise Levertov, Charles Olson, Gary Snyder, and others. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry distribution requirement. *N. Mackey*

120J. The San Francisco Renaissance: Poetry and Community. *

Examines poetic regionalism, with particular attention to theories and practices coming out of the San Francisco Bay Area from 1945–65: opposition to war, alternative practices of publishing communities, and artistic collaborations and inter-related artistic and poetic communities. Satisfies the American, English, and Modern concentrations; also satisfies the Poetry

distribution requirement. The Staff

130. Drama.

130B. English Drama: 1576–1642. *

Study of representative plays. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. *The Staff*

130C. Introduction to American Drama. F

Examines drama in the United States. Issues such as race, sexuality, gender, class, and the art of drama are explored. Satisfies the English and Modern Lierature concentrations. May be repeated for credit. (General Education Code(s): E.) *M. Hendricks*

140. Visual Media/Popular Culture.

140C. The Films of John Carpenter. *

Study of development and central themes of preeminent genre director of the "post-Hollywood" era, concentrating on central core of major works in horror/science fiction genres from *Halloween* to *In the Mouth of Madness*, with attention to the comedies and action films. Satisfies the English, Literature and Film, and Modern Literature concentrations. *H. Leicester*

150. Ethnic Writing.

150A. Afro-American Literature. *

Examination of major Afro-American writing of the past 150 years, with attention to the historical, cultural, and general literary context out of which it emerged and upon which it commented. Satisfies the English and Modern Literature concentrations. (General Education Code(s): E.) *N. Mackey*

150B. Chicano Literature. *

An intensive examination of contemporary Chicano autobiography, narrative, poetry, and film. Satisfies the English and Modern Literature concentrations. (General Education Code(s): E.) *K. Gruesz*

150C. Asian American Literature. F

Examination of Asian American literary works (fiction, poetry, dramatic essays) in the context of the historical presence of Asian Americans in the United States from the 1850s. Emphasis on comparison of select works from ethnic Asian writings. Satisfies the English and Modern Literature concentrations. (General Education Code(s): E.) *K. Yamashita*

150F. African-American Women Writers. F

Explores the cultural, aesthetic, political, and feminist issues in select works by African-American women. Through close analysis of the works, students develop an understanding of the intersections that race, gender, and class play in the literary imaginations of these writers. Satisfies the English Language and Modern Literary Studies concentrations. (General Education Code(s): E.) *M. Hendricks*

155. Regional Writing.

155B. Regions in American Literature. *

Examines development of regional writing in the U.S. May be repeated for

155D. Studies in South African Literature. *

A survey of writing from South Africa since 1948, focusing on social and political themes. Authors include Paton, Gordimer, Mphahlele, Fugard, Ndebele, Head, Brutus, Coetzee, and others. Satisfies the English and Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *J. Jordan*

160. Transnational Writing.

160B. Empire and After in the British Novel. *

Examines fiction written in English, 1883–1948, in order to consider the complex relations—complicit, resistant, both—between literary and imperialist discourses. Likely novelists for study are Schreiner, Haggard, Conrad, Kipling, Forster, Hilton, Paton. Satisfies the English and Modern Literature concentrations. May be repeated for credit. *V. Cooppan*

160C. Postcolonial Writing. *

Introduces students to a selection of postcolonial theory and texts. May be repeated for credit. *The Staff*

160E. Caribbean Literature. *

A study of major writing from the English-speaking Caribbean, with attention to the historical and cultural context out of which it arises and to which it responds. Authors include Edward Kamau Brathwaite, Wilson Harris, George Lamming, Paule Marshall, V. S. Naipaul, Victor Reid, Jean Rhys, and Derek Walcott. Satisfies the English and Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *L. Chude-Sokei*

170. Individual Authors.

170A. Geoffrey Chaucer. S

Close study of Chaucer's poetry, with some attention to relevant cultural, philosophical, and historical issues in the context of the late medieval period. Particular emphasis on *The Canterbury Tales*. Satisfies the English and Preand Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *H. Leicester*

170B. Edmund Spenser. *

Studies in Spenser's major poetry: Faerie Queene, Book I; Epithalamion; Mutabilitie Cantos. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. The Staff

170C. William Shakespeare. S

Topic: Shakespeare and film. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. May be repeated for credit. *M. Hendricks*

170D. John Milton. *

Selected poetry and prose. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *M. Hendricks*

170F. Charles Dickens. W

Study of representative work by Charles Dickens. Satisfies the English and Modern Literary Studies concentrations. May be repeated for credit. *J. Jordan*

170S. Women Modernists: Virginia Woolf and Gertrude Stein. *

Focuses on two innovative modernist writers, Virginia Woolf and Gertrude Stein, in their artistic, cultural, and historical contexts. Satisfies the English and Modern Literary Studies concentrations. *T. Miller*

170U. The Lawrence Myth: D.H. and T.E. Lawrence. F

Considers the writing and mythos of D. H. Lawrence and T. E. Lawrence (Lawrence of Arabia) in the culture of Great Britain between 1910 and 1930. *T. Miller*

180. Topics.

180B. The Gothic Imagination in Fiction, Film, and Theory. F

Explores how the Gothic imagination constructs nightmare versions of bourgeois society, revealing cultural anxieties about the family, sexuality, religion, science, the self; and gender, socioeconomic, and racial identity. Readings include essays by Freud and Lacan and such fiction as *The Monk, Frankenstein, Dracula, Maus,* and *Beloved.* Films change each year, but may include *Alien* and *Sweetie.* Satisfies the English, Literature and Film, and Modern Literature concentrations. May be repeated for credit. *H. Moglen*

180C. Ralph Waldo Emerson and the Poetics of American Capitalism. *

Through close readings of essays, poems, and critical studies, examines how the vision of cultural poetics, strong selfhood, and will to national sublimity of Emerson represents the creative-destructive dynamics of American capitalism. Manifest destiny, imperial subjectivity, class, and globalization are issues. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry distribution requirement. *The Staff*

180H. Women's Literature. *

Works by women from the 18th century to the present, with special attention to the relationship of literature to history, psychology, and aesthetics. Satisfies the English and Modern Literature concentrations. *The Staff*

180J. Violent Women in 20th Century U.S. Literature and Popular Culture. S

Examines post-1990 U.S. popular cultural representations of violence by girls and women. *K. Kanagawa*

190. Senior Seminars.

190A. Individual Authors. *

Intensive examination of works by individual authors. Satisfies the English Literature concentration; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. *The Staff*

190C. Studies in 19th-Century British Literature. *

Study of selected authors or issues in 19th-century British literature. Satisfies the English and Modern Literature concentrations; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): course 101. Enrollment

restricted to senior literature majors. May be repeated for credit. J. Jordan

190D. New World Poetics. S

A study of a number of poets from the United States, Latin America, and the Caribbean, with particular attention to the ways in which the New World locale occasions a call to reorder society, perception, history, and poetic practice. Satisfies the English, and Modern Literature concentrations; also satisfies the Poetry and Senior Seminar distribution requirements. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. (General Education Code(s): E.) *N. Mackey*

190E. Studies in 20th-Century British Literature. W

Intensive study of selected authors or other issues in 20th-century British literature. Topic: Black Britain. Satisfies the English and Modern Literature concentrations; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. *V. Cooppan*

190F. Studies in U.S. Literature. F

Intensive examination of issues in U.S. literature. Topic: Regions and Writers in California. Satisfies the English and Modern Literature concentrations; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. *J. Burton-Carvajal*

190G. Black Pulp Fiction. *

Investigates the ways black writers in the 20th century have exploited and transformed genre fiction. Authors include George Schuyler, Octavia Butler, Samuel Delany, Steven Barnes, Jewelle Taylor Gomez, Rudolph Fisher, Chester Himes, Barbara Neely, Victor Headley, and others. Satisfies the English and Modern Literature concentrations; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. (General Education Code(s): E.) *L. Chude-Sokei*

190K. Studies in Poetry. W

Topic: classic English religious poetry (lyric and argumentative) in historical, theological, and experiential contexts. Selected metaphysical, Enlightenment, Romantic, and early Modern poetic responses. Satisfies the English and Modern concentrations; also satisfies the poetry and senior seminar distribution requirements. Prerequisite(s): literature 101. Enrollment restricted to senior literature majors. *R. Sherwin*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. Students submit petition to sponsoring agency. *The Staff*

195. Senior Essay. F,W,S

Students submit petition to sponsoring agency. Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

203. Periods and Movements. *

Examines a particular historical period of literary movement. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

260. Transnational Literatures. W

Investigation of English language literature which transcends national boundaries. Topic: Traveling Souths. Enrollment restricted to graduate students. May be repeated for credit. *K. Gruesz*

270. Individual Authors. *

Enrollment restricted to graduate students. May be repeated for credit. The Staff

280. Topics in English Language Literature. F,W

Topics: (F) African American experimental writing; (W) Libertinism and 17th-century English poetry; (S) neoclassical poetry and poetics. Enrollment restricted to graduate students. May be repeated for credit. *N. Mackey, J. Greene, H. Moglen*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with teaching of undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

German Literature

Upper-Division Courses

102. Introduction to German Literature. S

Wide reading of works representing the major authors, periods, and genres of German literature. Satisfies the German and Modern Literature concentrations. *T. Honnef*

120. Fear of the Foreign: Xenophobia in German Literature and Culture. F

Considers recent violence against immigrants and asylum-seekers in Germany, and moves on to examine images of people perceived as "foreign" or alien in German literature and culture from early times to the present. Satisfies the German and Modern Literature concentrations. *L. Nygaard*

150. German Romanticism. *

A study of the emergence and development of German Romanticism. Central concerns are the Romantics' attitude toward the role of the imagination in literature and their attempts to revitalize myth and folklore in their works. Authors read include Tieck, Novalis, Hoffmann, Eichendorff, and Heine. Satisfies the German and Modern Literature concentrations. *L. Nygaard*

159. German Comedy. *

A study of a series of comic works by authors writing in German. In addition to discussing the texts in depth, we also look at theories of humor and laughter developed by thinkers such as Freud, Schopenhauer, and Bergson. Satisfies the German and Modern concentrations. Offered in alternate academic years. *L. Nygaard*

164. Modern German Fiction. W

Selected readings from the novel and novella in 20th-century German literature. Satisfies the German and Modern Literature concentrations. *T. Honnef*

195. Senior Essay. F,W,S

Prerequisite: Literature 101. The Staff

198. Group Tutorial. F,W,S

May be repeated for credit. The Staff

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Italian Literature

Upper-Division Courses

102. Introduction to Italian Literature. F

A close reading of a small number of texts (lyric, dramatic, narrative) representing the major authors and periods of Italian literature, with intensive practice in spoken and written Italian. Satisfies the Italian and Modern Literature concentrations. *M. Brose*

130. Author and Contexts.

Designed to give an in-depth study of a given author's literary production and its cultural context. *The Staff*

130D. Dante's Divine Comedy. W

Reading of the *Inferno*, the *Purgatorio* and selected canti of the *Paradiso*, along with selections from Dante's lyrics and from medieval Italian and French poetry. Satisfies the Italian and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *M. Brose*

150. Studies in Italian Theater.

150C. Italian Theater. S

Survey of Italian theater from its beginnings in medieval ritual through the development of Renaissance staged comedy and the commedia dell'arte, pastoral and tragicomedy, opera, melodrama, and 20th-century avant-garde and political theater. Satisfies the Italian and Pre- and Early Modern Studies concentrations; also satisfies the Pre- and Early Modern Studies distribution requirement. Intended for students proficient in Italian. *D. Shemek*

160. Studies in the Italian Novel. *

A study of the development of the novel in Italy with attention to the cultural context. *The Staff*

165. Studies in Italian Literature and Culture. *

In-depth examination of a topic in Italian literary and cultural studies. Satisfies the Italian and Modern Literary Studies concentrations. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

[Return to top.]

Modern Literary Studies

Upper-Division Courses

102. Topics in Literary Theory.

102A. Literature and Theory. *

Introduction to major issues in contemporary theory, including psychoanalytic, semiotic, structuralist, post-structuralist, Marxist, feminist, and culture studies. Emphasis is on key concepts and issues rather than historical background. Satisfies the Critical Theory and Modern Literature concentrations. *The Staff*

125. Modern Cinema.

125D. Cinema and Social Change in Latin America. S

Surveys selected Latin American and Latino feature and documentary films from 1950 to the present. Topics include gender, sexuality, race and (trans)national identity, revolution, repression and resistance; migration, exile, and return. Satisfies the Literature and Film, Modern, and World Literature concentrations; also satisfies the Global Distribution requirement. (General Education Code(s): E.) *J. Burton-Carvajal*

125L. Films on the Border. *

Surveys a range of cinematic representations of the U.S.-Mexico border region from Hollywood, independent, Chicano/Latino, Mexican, and local sources. Studies the border in both concrete and symbolic registers. Satisfies the Literature and Film, Modern Literary Studies, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *J. Burton-Carvajal*

144. Modern Jewish Cultures.

Modernity transformed Jewish culture: we will explore the ways in which changed social, political, and economic conditions produced new gender roles; professional, personal, communal, and cultural experiences; and generated powerful fictions, autobiographies, films and poems. Among the writers we will read are Isaac Bashevis Singer, Rebecca

Goldstein, Saul Bellow, Martin Buber, Hannah Arendt, and S.Y. Agnon.

144A. Jewish Diaspora, Ethnicity, and Urban Life. *

Focuses on modern Jewish diaspora, ethnicity, and urban life. Satisfies the Modern Literature concentration. (General Education Code(s): E.) *The Staff*

144B. Modernity as Jewish Challenge and Catastrophe: The American Experience. *

Examines modernity as Jewish challenge and catastrophe, and focuses on the American experience. Satisfies the American, English, and Modern Literature concentrations. (General Education Code(s): E.) *B. Thompson*

144D. Jewish Writers and the American City. *

An examination of some major Jewish writers and their responses to the American city. Major writers: Henry Roth, Saul Bellow, Bernard Malamud, J. Kaplan, Philip Roth. A look at Yiddish and other minority writers, and including sociological and historical materials on the American city. Satisfies the English and Modern concentrations. (General Education Code(s): E.) *B. Thompson*

144H. Jewish Writers and the European City. S

Interrogates the master narrative of a specific European city and discusses the ways in which Jewish life and Jewish actions helped to shape that story and were shaped by it. Topic: London. Satisfies the Modern Literary Studies concentration. May be repeated for credit. *M. Baumgarten*

144J. Jewish Travel Narratives. *

Exploration of the idea of the Diaspora as a "moving" condition, and of the mutli-dimensional character of global Jewish culture, covering authors who traveled across the Jewish world from medieval times to the present. Satisfies the Modern Literary studies and Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. *M. Baumgarten*

144K. The Transnational Subject. F

Examines how alternative subjectivities are adopted in narratives structured around hidden national identities. Topic: Jewish-Russian literature. Readings focus on writers who have entered the canon of 20th-century Russian literature through this process, and on the historical background necessary for understanding it. Satisfies the Modern Literary Studies and World Literature concentrations; also satisfies the Global distribution requirement. *W. Nickell*

145. Special Topics in Modern Literature.

145A. Modern Poetry. *

A survey of modern poetry across cultures; includes a variety of poetic forms. Satisfies the Modern Literature concentration; also satisfies the Poetry distribution requirement. *R. Halpern*

145B. Modern Literature. *

Study of 19th- and/or 20th-century literature, with attention to its literary and historical context. Satisfies the Modern Literary Studies concentration. May be repeated for credit. *W. Godzich*

145C. Modern Fiction and Poetry. *

Survey of experimental fiction and poetry. In addition to reading literary texts,

course considers literary theories of reading and writing. Satisfies the Modern Literature concentration; also satisfies the Poetry distribution requirement. *The Staff*

145D. Introduction to Music Drama. F

Introduction to opera from Mozart to Berg. Close analysis of text setting, musical form, dramaturgy, and performance (singing/acting), with particular attention to politics, gender, subject-formation, and opera's constitutive role in the rise, as well as critique, of modern bourgeois culture. No previous training in music theory required, although some affinity for classical music desirable. Satisfies the Modern Literature concentration. *D. Selden*

145F. Animal Studies in Literature. S

Examines the disruptive presences of nonhuman animals and nonanimal aliens as they appear in a variety of narrative forms: prose fiction, non-fiction, and poetry. Organized around central themes relating to the presence of animals in literature, including representation, difference, desire, and subjectivity. Satisfies the Modern Literature concentration. *N. Hansen*

155. Russian Literature in Translation.

155A. Nineteenth-Century Russian Fiction in Translation. W

Masterpieces of poetry and prose from the Golden Age of Russian literature, from Pushkin to Chekhov. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. W. Nickell

155B. Russian Literature in Revolution. *

Survey of 20th-century Soviet literature, from the revolution to the death of Stalin. Readings include modernist and avant-garde texts of the 1920s and socialist realism. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (Formerly *Soviet Literature*.) *W. Nickell*

155E. Classic Russian Novels. S

Detailed literary analysis of novels by Gogol, Goncharov, Tolstoy, Dostoevsky, and Pasternak. Focus upon aesthetic devices of texts, as well as upon ethical and philosophical issues that inform them. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. *W. Nickell*

155I. The Literatures of Russian and African-American Soul. *

Views the literatures of slavery and emancipation in relation to cultural paradigms of soul, virtue, and "élan vital," with particular attention to the ways that Russian peasant and African-American cultures have been mined as sources of purity and vitality. W. Nickell

160. French Literature in Translation.

160G. Narratives of Girlhood. W

The study of narratives (fiction and memoir) representing developments of female characters from childhood to adolescence, with particular attention paid to modes of narration, relation of the self to social context, representation of authority, and familial interactions. Satisfies the Modern Literature concentration. *P. Gaitet*

167. German Authors in Translation.

167G. Goethe's Faust . *

An intensive study of Goethe's *Faust*, Parts I and II. All works are read in English. Satisfies the Modern Literature concentration; also satisfies the Poetry distribution requirement. *L. Nygaard*

168. German Literature in Translation.

168C. Modern German Fiction. F

Selected readings from the novel and novella in 20th-century German literature. All works are read in English. Satisfies the Modern Literature concentration. *T. Honnef*

168D. Germany in War and Peace. W

Study of selected texts reflecting German society at war or in that ambiguous state called "peace." Attention is given to the place of literature in German cultural life and its special role in the formation of national identity. Satisfies the Modern Literature concentration. *L. Nygaard*

170. Modern Italian Literature in Translation.

Readings in Italian literature and culture ranging from Romanticism to the post-modern. Emphasis on Italy's relation to modernity in terms of artistic innovation; politics and social life; family and gender relations; regional, national, and international identities. Topics vary from year to year. *The Staff*

170B. Modern Italian Novel. *

Surveys Italian novels of the 19th and 20th centuries. Satisfies the Modern Literature concentration. *D. Shemek*

180. Latin American Literature in Translation.

180B. The New Latin American Novel. F

Examination of contemporary narrative from Latin America. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (Formerly *The New Latin American Novel and Social Movements*.) (General Education Code(s): E.) *M. Morton*

187. Modern Literature

187D. The Man without Qualities (2 credits). F

A close reading of the English translation of Robert Musil's 1200-page unfinished novel *The Man without Qualities* as well as some of the 650 pages of the *Nachlass* (posthumous papers). Enrollment restricted to literature majors. Enrollment limited to 18. *W. Godzich*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors, focus is on topics of interest in modern literary studies. All students are required to complete an essay of significant length as part of the seminar course work. Prerequisite: Literature 101. May be repeated for credit. *The Staff*

190N. Topics in Modern Literary Studies. F,W,S

Selected authors or issues in modern literary and cultural studies. Topics: (F) texts and bodies; (W) aesthetics; (S) narrative theory. Satisfies the Modern Literature concentration; also satisfies the Senior Seminar distribution requirement. Enrollment restricted to senior literature majors. May be repeated for credit. *H. Leicester, W. Godzich, P. Gaitet, J.*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) The Staff

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. The Staff

198. Group Tutorial. F,W,S

May be repeated for credit. The Staff

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

221. Women Modernists. S

The study of selected experimental texts by early 20th-century British and American women writers. Enrollment restricted to graduate students. *T. Miller*

231. Studies in Literary and Cultural History. W,S

Topics: (W) landscape and ideology; (S) global Jewish writing; 18th- and 19th-century novel in France. Enrollment restricted to graduate students. May be repeated for credit. *L. Nygaard, M. Baumgarten, R. Terdiman*

270. Narrative Theory. F

A survey of 20th-century narratology, emphasizing structuralist and poststructuralist theories of narrative. Topic: detective fiction. Enrollment restricted to graduate students. May be repeated for credit. *J. Jordan*

280. Topics in Theory. W

Explores issues arising in both the modern practice of criticism and in writings on the theory of criticism. Topic: Latin/o American critical theory in/of globalization. Enrollment restricted to graduate students. May be repeated for credit. *J. Poblete*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduates students. May be repeated for credit. *The Staff*

[Return to top.]

Pre- and Early Modern Literature

Upper-Division Courses

102. Ancient Literature in Cross-Cultural Perspective. *

Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. Prerequisite(s): Greek Literature 100 or Latin Literature 100 or Literature 80A or permission of instructor. May be repeated for credit. *The Staff*

103. Lyric Traditions in Comparative Perspective. F

Close reading of Greek and Roman lyric poems, including major works by Sappho, Catullus, Pindar, and Horace. Special attention to poetics and aesthetics; to social, political, and economic contexts; to the influence of Greek and Roman lyric on later literatures; and to independent parallels seen in "lyric" forms from non-Western cultures. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Poetry and Pre- and Early Modern Studies distribution requirements. (Formerly *Latin Literature: Narrative and Lyric Traditions.*) *T Walsh*

107A. Reading Egyptian Hieroglyphs, Part 1. *

Introduction to Egyptian hieroglyphs as a graphic, conceptual, and communicative system. Covers the basic elements of classical Egyptian grammar, drawing primarily on inscriptions from extant Egyptian monuments. Students read one prose and one poetical text from the Middle Kingdom. Satisfies the Pre- and Early Modern Studies and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. Strongly recommended: two years previous study of a foreign language at the college level or the equivalent. *D. Selden*

107B. Reading Egyptian Hieroglyphs, Part 2. *

Advanced Middle Egyptian grammar (2 weeks). Close reading of the *Tale of Sinuhe* in Egyptian, selected hymns and love poetry from the New Kingdom. Satisfies the Pre- and Early Modern Studies and World Literature concentrations; also satisfies the Global, Pre- and Early Modern, and Poetry distribution requirements. Together, *Egyptian Hieroglyphs 1* and 2 fulfill the language requirements for the intensive major. Prerequisite(s): course 107A or permission of instructor. *D. Selden*

111. Monsters, Barbarians, and Women: Topics in Ancient Ethnography. *

Focus is on the construction of race and gender in ancient Greek culture. Literary, historical, philosophical, dramatic, and medical texts (Homer, Hesiod, Herodotus, Euripides, Hippocrates, Plato, Aristotle) as well as visual media (vase painting, sculpture) are studied. *The Staff*

115. The Heroic Epic. *

A survey and analysis of "primary" epic: *Gilgamesh*, the *Iliad*, the *Odyssey*, and *Exodus*. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *T. Walsh*

134. The Idea of Poetry. F

Focus is on the theories of rhetoric and poetry written between 1580 and 1620. Texts include English, Italian, French, and Spanish works. Satisfies the Pre- and Early Modern

Studies concentration; also satisfies the Poetry and Pre- and Early Modern Studies distribution requirements. Enrollment limited to 40. *W. Jones*

140. Satire. *

An introduction to satire as both an individual genre with a unique literary history, and as a discursive technique present in other literary genres. Students will investigate a range of satiric works from the classical, early modern, and modern periods. *The Staff*

143. Greek Drama/Modern Film. *

A reading of ancient Greek plays along with contemporary films similar to them in theme, form, and effect. Students discuss different definitions of tragedy; genre as a critical tool; and similarities and difference between the media of literature, drama, and film. Satisfies the Literature and FIlm and Pre- and Early Modern concentrations; also satisfies the Pre- and early Modern distribution requirement. *M. Gamel*

144. Pre- and Early Modern Jewish Cultures.

144A. Jewish Mysticism. *

Overview of literature of Jewish mysticism and Kabbalah from antiquity to the present. Focuses on primary texts including the Bible, Dead Sea Scrolls, Talmud, Midrash, Medieval/Spanish Kabbalah, Kabbalah of Safed, Sabbatianism, Hasidism, and contemporary authors. Satisifies the Pre- and Early Modern Studies and World Literature concentrations; also satisfies the Pre- and Early Modern Studies and Global Literature distribution requirements. *D. Selden*

144B. Hebrew Bible. *

Introduction to textual, source, redaction, historical, and literary criticism of individual books of the Hebrew Bible and to exegesis as science and ideology. Covers texts and iconography of neighboring mythological traditions (Mesopotamian, Ugaritic, Egyptian, Greek) when appropriate. Topic: Genesis. Satisfies the Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. May be repeated for credit. *The Staff*

144D. Translation, Midrash, Interpretation. W

Focuses on theory and practice of translation, and on Midrash, their interrelation and the ways in which they inflect our understanding of literary and cultural interpretation. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Pre- and Early Modern Studies distribution requirement. *The Staff*

183. Dante's Divine Comedy. W

Reading of the *Inferno*, the *Purgatorio*, and selected canti of the *Paradiso*, along with selections from Dante's lyrics and from medieval Italian and French poetry. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *M. Brose*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors, focus is on topics of interest in pre- and early modern studies. All students are required to complete an essay of significant length as part of the seminar course work. Prerequisite: Literature 101. May be repeated for credit. *The Staff*

Examination of individual authors or critical problems in ancient, medieval, or early modern/Renaissance literature. Topics: poetics, ancient and modern. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Pre- and Early Modern and Senior Seminar distribution requirements. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. *T. Walsh*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) The Staff

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. The Staff

198. Group Tutorial. F,W,S

May be repeated for credit. The Staff

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

201. Studies in Antiquity. *

An in-depth study of a topic in Mediterranean and Near Eastern antiquity. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

204. Studies in Early Modernity. F,S

In-depth examination of a topic in Early Modern Studies. Topics: (F) Humanism in the making: animals before/after Descartes; (S) Epistolarity. Enrollment restricted to graduate students. May be repeated for credit. *C. Freccero*, *D. Shemek*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Spanish/Latin Amer/Latino Literature

Lower-Division Courses

60. Introduction to Literary Genres. S

The study of poetry, drama, and prose in Spain and Latin America. (General Education Code(s): IH, E.) *N. Silleras-Fernandez*

Upper-Division Courses

100. Introduction to Spanish Literature.

100C. Medieval Spanish Literature. *

Focuses on Spanish medieval literature, broadly covering the 12th to the 15th centuries. Examines and contextualizes literary genres developed in this period. Satisfies the Pre- and Early Modern Studies and Spanish Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. *The Staff*

102. Introduction to Hispanic American Literature.

102A. From the Conquest to Sor Juana. S

A study of Hispanic American literature from the chronicles of the conquest through the 17th century. Readings deal with transformations in both the idea of empire and the rights of the conquered. Includes the works of Colón, Cortés, El Inca Garcilaso de la Vega, Sor Juana Inés de la Cruz, and others. Satisfies the Global, Pre- and Early Modern Studies and Spanish Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. *N. Klahn*

102B. Romanticism to Modernism. W

Follows the literary manifestations of the growing consciousness of the Latin American writer: discovery of native themes, imitation of European models, search for a "new language" literally and figuratively. Relates historical events with literary movements. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *L. Martínez-Echazábal*

130. Studies in Latin American Literary Genres.

130F. U.S. Latino/a Writing in Spanish/English and Spanglish. *

Spanish-based, English/bilingual inclusive overview of Latino/a writing in the U.S. Concepts of ethnic role model and antimodel analyzed by paying attention to figures of "bandidos," "assimilating minority," "dysfunctional youth," i.e., "gang member," etc. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement.

131. National Literatures of Latin America.

A study of the literary expression of a particular Latin American country or region, with texts representing a variety of authors, periods, and genres. *The Staff*

131A. Mexico. *

Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *N. Klahn*

134. Special Topics in Latin American Literature.

134H. African-Latin American Literature. *

By reading sociological, historical, and political writings dealing with race mixture, race relations and cultural/national identity in Latin America, delves into the ideology of *Mestizaje*, particularly African-Spanish and African-Portuguese, and its representation in visual and literary texts. Satisfies the Modern Literary Studies, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. Enrollment limited to 20. (General Education Code(s): E.) *L. Martínez-Echazábal*

134L. Historia de la lectura y los lectores: Recepción y consumo cultural en el mundo L. Americano. F

Explores historical readers and reading practices in at least three different formations: colonial, national-popular, and transnational. Proposes a historical-theoretical reconstruction of the place of reading and readers at key moments in the history of culture in Latin America. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *J. Poblete*

135. Latin American Cinema.

135A. Mexico through the Movies. F

Traces commercial and alternative filmmaking in Mexico from its origins to the present through the works of major directors (e.g. Luis Buñel, Emilio Fernández), with particular emphasis on the historical and actual function of film in Mexican culture. Topic: El otro cine de Mexico. Course satisfies the Literature and Film, Modern, Spanish/Latin American/Latino, and World Literature concentrations, and the Global distribution requirement. (Formerly course 134J.) (General Education Code(s): E.) *J. Burton-Carvajal*

135C. La Globalizacion en/del Cine Latin/o Americano. S

Examines globalization of Latin/o American cinema as a cultural industry. Classical issues of cultural politics and political economy are revisited from the viewpoint of current global processes. Also provides access to the representation of different aspects of globalization in Latin/o American cinema. Course satisfies the Literature and Film, Modern, Spanish/Latin American/Latino, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *J. Poblete*

135F. Cine y Literatura. *

Introduction to analysis and interpretation of major Spanish-language films derived from literary works by Latin American and Spanish authors. Explores mechanisms of representation and adaptation. *J. Burton-Carvajal*

150. Introduction to the Golden Age. W

An introduction to representative works of the main genres of the period by authors such as Garcilaso de la Vega, Luis de León, San Juan de la Cruz, Santa Teresa de Jesús, Lope de Vega, Francisco de Quevedo, and Calderón de la Barca, and to life in Spain during the 16th and 17th centuries. Satisfies the Pre- and Early Modern Studies and Spanish Literature concentrations; also satisfies the Pre- and Early Modern Studies distribution requirement. *N. Silleras-Fernandez*

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. The Staff

198. Group Tutorial. F,W,S

May be repeated for credit. The Staff

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

213. Latin American Film: Gender, Genre, Race, and Nation. *

Using selected feature films from Argentina, Cuba, and Mexico (1940–present), students develop expertise in the semiotics of the cinematic, historiography of "peripheral" national cinemas, genre theory, gender theory, and expressions of the national in both commercial and independent filmmaking. Reading knowledge of Spanish is desirable. Enrollment restricted to graduate students. *J. Burton-Carvajal*

216. Modernism and Postmodernism: The Debate in Latin America. S

Addresses the problematics of these concepts as they relate to literary and cultural production in Latin America. Topic for Spring 2008: poetics, politics and translation. Enrollment limited to 20. *N. Klahn*

226. Teoria Critica en America Latina. W

Overview of contemporary theoretical issues in Latin American cultural critique. Topic: theory in/of globalization. Enrollment restricted to graduate students. *J. Poblete*

230. Citiscapes. *

Theories of space/place poetics and politics, and the literary and visual re-presentations of urban spaces in Latin/o America. Questions of identity and location in modernist poetics, and the ways difference (gender, ethnicity, and sexuality) inhabit and imagine the post-modern lettered city. Enrollment restricted to graduate students. *N. Klahn*

231. National Literatures of Latin America.

231A. Cuba. F

Topic: the literature and culture of transnational period. Enrollment restricted to graduate students. *L. Martínez-Echazábal*

232. Procesos historicos, literatios, y culturales en el mundo hispánico.

232C. El mundo hispánico: De las vanguardias a la globalización. *
Study of literary and cultural "modernity" and "post-modernity" in Latin America within the literary paradigms of "vanguardismo" and "postvanguardismo," "boom" and "post-boom," and more recent neo-

regionalist and/or post-nationalist literary and cultural terrains. Enrollment restricted to graduate students. *J. Poblete*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Students Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

[Return to top.]

World Literature and Cultural Studies

Upper-Division Courses

104. Magic Divination Astrology. W

Cross-cultural study of magic, divination, and astronomical prognostication as rituals of power that both express and negotiate differences in gender, race, ethnicity, and class. Topic for 2008: the ancient Near East. Literature 101 or previous experience with critical theory strongly recommended. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Pre- and Early Modern and Global distribution requirements. May be repeated for credit. *D. Selden*

106. Literacy and the Coming of the Book. *

What difference in world history do books make? Topics in the history of literary institutions, including the production, distribution, and reception of printed works. The transition from manuscript to print. The history of reading. The end of the book? Satisfies the Critical Theory, Pre- and Early Modern Studies, and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirement. *J. Greene*

109. Topics in Cultural Studies. F

Studies in the theory of cultural studies. Topic: (F) literature and 19th-century imperialism. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. May be repeated for credit. (General Education Code(s): E.) *A. Balasopoulos*

114. Pacific Rim Discourse. *

Examines the rise of the idea of the Pacific Rim: its historical background, ideological assumptions, and various forms of its cultural manifestations. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *The Staff*

115A. Fiction in a Global Context. W

Comparative examination of fiction in the modern world and of fictional responses to social change and crisis. Topic for winter 2008: literature of the Caribbean disapora.

Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. May be repeated for credit. *L. Chude-Sokei*

117. History and Memory in the New World. W

Writers in the U.S., Latin America, and the Caribbean have been drawn repeatedly to the theme of intercultural conflict as they recall the traumatic history of the hemisphere. Examining fiction, poetry, and film expands the horizons of "American" literature. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *K. Gruesz*

123. The 1960s. *

An interdisciplinary study of the cultural and social movements of the 1960s. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *C. Connery*

124. Cultural Theory in Historical Perspective. W

Examination of representations of medieval and early modern Mediterranean history. Topic: the world(ing) of Marco Polo. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. May be repeated for credit. (General Education Code(s): E.) *S. Kinoshita*

135. Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E. \ensuremath{W}

Survey of writing and culture from the 10th century B.C.E. through the sixth century C.E., focusing on poetry, philosophical and historical writing, supernatural fiction, Buddhist/Taoist texts in contexts of fragmentation, empire building, dynastic collapse, rebellion, eremitism, and courtly society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements. (Also offered as History 141A. Students cannot receive credit for both courses.) (General Education Code(s): E.) *C. Connery*

136. Classical Chinese Culture and Literature, Sixth Century through 16th Century. S

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements. (Also offered as History 141B. Students cannot receive credit for both courses.) (General Education Code(s): E.) *C. Connery*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors; focus is on topics of interest in world literature and cultural studies. All students are required to complete an essay of significant length as part of the seminar course work. Prerequisite(s): Literature 101.

190A. Topics in World Literature and Cultural Studies. F,W,S

Topics: (F) Section 01: utopianism; Section 02: black writers and Africa; (S) medieval Mediterranean literature. Satisfies the Modern and World Literature concentrations; also satisfies the Global and Senior Seminar distribution requirements. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. (General Education Code(s): E.) A. Balasopoulos, L. Chude-Sokei, S. Kinoshita

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. The Staff

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. May be repeated for credit. The Staff

198. Group Tutorial. F,W,S

The Staff

199. Tutorial. F,W,S

May be repeated for credit. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

201. Theory and Methods. F,S

Global theories of history and cultural production. Topics: (F) comparative empire studies: pre-, post-, and beyond; (W) comparative literature, world literature, and the theory of the novel. Enrollment restricted to graduate students. May be repeated for credit. S. Gillman, V. Cooppan

209. Topics in Cultural Studies. S

Topic: geoimaginary California: transpacific, borderlands, north/south, and visionary configurations of San Francisco/Los Angeles/Honolulu. Enrollment restricted to graduate students. May be repeated for credit. *R. Wilson*

295. Directed Reading. F,W,S

Directed reading which does not require a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F.W.S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

* Not offered in 2007-08

Mathematics

194 Baskin Engineering (831) 459-2969 http://www.math.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, psychology, and sociology. Researchers in all these areas are constantly developing new and fascinating ways of applying mathematics. A strong mathematics background is prerequisite to advanced study in the physical and biological sciences and is often helpful in studying the social sciences.

The UCSC mathematics program offers a wide variety of undergraduate mathematics courses:

- Courses 2 and 3 do not require thorough preparation in mathematics at the high school level. However, students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Prospective freshmen are also encouraged to take the mathematics placement exam during their senior year of high school at a UCSC-scheduled exam. If they place into course 2 or 3, they should take those courses at UCSC during the summer, so they can begin the calculus series when they enter in the fall. Failure to begin the calculus series in the fall could delay progress in some majors.
- Lower-division courses with numbers in the range 11A-B through 30 (calculus, linear algebra, multivariable calculus, differential equations, and problem solving) prepare students for further study in mathematics, the physical and biological sciences, or quantitative areas of the social sciences. Science majors take a combination of these courses as part of their undergraduate studies.
- Upper-division courses, with numbers in the range 100-199, are intended for majors in
 mathematics and closely related disciplines. Some of these courses provide students with
 a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and
 number theory, whereas others introduce students to more specialized areas of
 mathematics. Calculus, linear algebra, multivariable calculus, and proof and problem
 solving are prerequisite to most of these advanced courses.

Within the major, there are three concentrations leading to the B.A. degree: pure mathematics, mathematics education, and computational mathematics. These programs are designed to give students a strong background for graduate study, for work in industry or government, or for teaching. Each concentration requires nine courses, one of which must be a senior thesis or senior seminar. Please read the pure mathematics, computational mathematics, and mathematics education descriptions below for specific information about course requirements. A minor in mathematics is also offered.

The mathematics program also provides an excellent liberal arts background from which to pursue a variety of career opportunities. UCSC graduates with degrees in mathematics hold teaching posts at all levels, as well as positions in law, civil service, insurance, software development, business, banking, actuarial science, and other professions where skills in logic, numerical analysis, and computing are required.

Requirements

Students who plan to take a mathematics course at UCSC must demonstrate sufficient preparation by their score on either the mathematics placement exam (MPE), the College Entrance Examination Board Advanced Placement (AP) calculus exam, the International Bacalaureate Higher Level Mathematics Exam, or by passing the appropriate prerequisite course.

UC Santa Cruz Mathematics Placement Exam

Mathematics placement exam scores are valid for one year. Students whose areas of study require precalculus or calculus courses are strongly advised to take the placement exam and the required courses early in their academic careers. The placement exam is given at the beginning of each quarter, weekly through the seventh week of each quarter, and at prospective-student orientations. Bring photo identification for entry into the placement exam.

If your MPE score is	May enroll in this course
12-19	2
20-30	3
31-39	11A*
40-45	19A
46 or higher	19A or 20A

^{*} Students who plan to major in computer engineering, computer science, electrical engineering, information systems management, mathematics, or physics and who receive a score in the range 31-39 on the MPE should take courses 3 and 19A-B rather than courses 11A-B.

College Board Advanced Placement Calculus Exams

Students who have received 4 credits for the College Entrance Examination Board Advanced Placement (AP) calculus exam should normally enroll in course 19B, and those with 8 credits should normally enroll in course 23A. However, students who received a score of 3 on the calculus AB or BC AP exam, should enroll in course 19A or 19B, respectively, to improve their knowledge of calculus before continuing their studies. Students who wish to challenge themselves, and who received a score of 4 or 5 on the AB or a score of 3, 4, or 5 on the BC exam may choose courses 20A and 20B, *Honors Calculus*. Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

If your AP AB score is 3 4 or 5	May enroll in this course 11A or 19A 20A or 11B or 19B
If your AP BC score is 3	May enroll in this course 11B or 19B, or 20A 20A or 22 or 23A

International Baccalaureate Higher Level Exam in Mathematics

Students who have received a score of 5, 6, or 7 on the International Baccalaureate (IB) Higher Level Exam in Mathematics may enroll in course 20A, *Honors Calculus;* 22, *Calculus of Several Variables;* or 23A, *Multivariable Calculus.* Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

Prerequisite Courses

Students who have passed course 2 may enroll in course 3. Students who have passed course 3 may enroll in course 11A or 19A. Students who have passed an articulated precalculus course at a college or university may enroll in course 11A or 19A, but they must verify eligibility of the course and course completion with the Mathematics Department staff.

Premajor Requirements

Premajor requirements for all concentrations in the major are courses 20A -B, *Honors Calculus*; or 19A-B, *Calculus for Science, Engineering, and Mathematics*; 21, *Linear Algebra*; and 23A-B, *Multivariable Calculus*. The mathematics education concentration has one additional premajor requirement, Applied Mathematics and Statistics (AMS) 5, *Statistics*. For some non-mathematics majors, courses 11A-B can be substituted for 19A-B, but they are not recommended for students planning to major in computer engineering, computer science, electrical engineering, information systems management, or physics. Although not considered a premajor requirement, course 100 is a prerequisite for most upper-division mathematics courses.

Major Requirements

Pure Mathematics

This concentration is intended for those who desire a comprehensive understanding of mathematics, including those considering going to graduate school in mathematics. Students are required to complete at least nine courses (with laboratories, if appropriate) from among those numbered 100 or higher; course 24 or AMS 27 (not both) and course 30 can also be counted toward fulfillment of the major requirements. Five of these courses must be 100, *Introduction to Proof and Problem Solving*; 103, *Complex Analysis*; 105A, *Real Analysis*; 111A, *Algebra*; and either 194, *Senior Seminar*, or 195, *Senior Thesis*. The remaining four courses are selected by the student from among courses 24 and 30 and mathematics courses numbered above 100.

A typical program for a pure mathematics major might include the following:

```
1st year 20A-B or 19A-B, 21, 23A
```

2nd year 23B, 24, 100, 103, 110 or AMS 131A

3rd year 105A-B, 111A-B, 110 or 124

4th year 117, 121A, 194

The first two years of a typical program for a pure mathematics major who begins mathematics studies with precalculus might include the following:

```
1st year 3, 19A-B
```

2nd year 21, 23A-B, 24, 100

Computational Mathematics

This concentration is intended to prepare students for technical careers in industry or government while providing a solid mathematical background. Students are required to complete a minimum of seven mathematics courses (with laboratories, if appropriate) as follows: 24, *Ordinary Differential Equations*; 100, *Introduction to Proof and Problem Solving*; 103, *Complex Analysis*, or 105A, *Real Analysis*; 110, *Introduction to Number Theory*; 111A, *Algebra*; or 145, *Introductory Chaos Theory*, or AMS 146, *Chaotic Dynamical Systems*, or AMS 147, *Computational Methods and Applications*; and either 194, *Senior Seminar*, or 195, *Senior Thesis*. In addition, students must complete two courses in computer engineering or computer science selected from the following:

Computer Engineering (CMPE) 107, 108, 153, 172, 177

Computer Science (CMPS) 101, 109, 112, 130

A typical program for a computational mathematics major might include the following:

```
1st year 19A-B, 23A, CMPS 12A and 12B
```

2nd year 21, 23B, 24, 100, 110, CMPE 16

3rd year 103; 105A; 145 or AMS 146, or 147; CMPS 101

4th year 106A, 111A, CMPE 107, 194

Mathematics Education

This concentration is intended to prepare students for teaching kindergarten through high school (K-12). In addition to the pre-major requirements (which for this track include AMS 5, Statistics), students are required to complete the following nine courses: 100, Introduction to Proof and Problem Solving; either 103, Complex Analysis, or 105A, Real Analysis; 110, Introduction to Number Theory; 111A, Algebra; 128A, Classical Geometry; AMS 131, Introduction to Probability Theory; 181, History of Math; 188, Supervised Teaching Experience; and either 194, Senior Seminar, or 195, Senior Thesis.

UCSC students can pursue a degree in mathematics while preparing to teach at the secondary level. In California, students seeking a single-subject credential (for secondary teaching) in mathematics are required to take the CSET series of exams (formerly The National Teachers Examination). By the time they begin student teaching in their credential program, candidates must have taken the CSET series. Contact the UCSC Education Department for details regarding teaching credentials.

A typical program for a mathematics education major might include the following:

```
1st year 19A-B, 23A
```

2nd year 21, 23B, 100, AMS 5

3rd year 110, 111A, 128A, 181, AMS 131

4th year 30, 103, 188, 194

Minor Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least seven courses, with course 100 required. The courses that may be counted toward fulfillment of the minor requirements are courses 21, 23B, course 24 or AMS 27 (not both), and those numbered 100 or higher. No senior seminar or thesis is required.

A typical mathematics minor program for a physics major might be:

1st year 19A-B, 23A

2nd year 21, 23B, 24, 100

3rd year 103, 105A, 106A, 111A 4th year 106B, 145 or AMS 146

Courses

Course 2, College Algebra for Calculus, is designed for students who do not meet the requirements for admission to course 3, Precalculus, and who need comprehensive and careful preparation for calculus. Course 2 emphasizes algebra, graphs, and functions. The prerequisite for course 2 is a minimum placement examination score of 12.

Course 3, *Precalculus*, is recommended for students who need some preparation in algebra and trigonometry prior to taking calculus. This course covers functions and their inverse, exponentials, logarithms, and trigonometry.

Courses 11A-B, *Calculus with Applications*, are intended for biology and Earth sciences majors. However, students in these majors who score 40 or more points on the Mathematics Placement Exam are strongly encouraged to take the 19A-B sequence, which is required for most upper-division mathematics courses. Laboratory sections are mandatory.

Courses 19A-B, *Calculus for Science, Engineering, and Mathematics,* are intended for chemistry, computer engineering, computer science, electrical engineering, information systems management, mathematics, and physics majors. Laboratory sections are mandatory.

Courses 20A-B, *Honors Calculus*, are intended for students who would enjoy delving particularly deeply into the foundational and theoretical issues of calculus. Laboratory sections are mandatory.

Course 21, *Linear Algebra*, covers vector spaces, matrices, determinants, systems of linear equations, and eigenvalues. It is intended for students in the physical and biological and social sciences and is prerequisite to course 111A.

Course 22, Introduction to Calculus of Several Variables, is intended for science students whose schedules do not permit a full and comprehensive two quarters of multivariable calculus. Students who intend to pursue further studies in mathematics must take 23A-B and not 22. Laboratory sections are mandatory.

Courses 23A-B, *Multivariable Calculus*, are intended for mathematics majors and minors and students in computer engineering, computer science, electrical engineering, information systems management, and physics who desire more rigorous mathematical training. Laboratory sections are mandatory.

Course 100, *Introduction to Proof and Problem Solving*, is an introduction to the methodology of advanced mathematics, emphasizing proof techniques. Basic areas such as set theory and logic are introduced, together with extensive applications within mathematics. A waiver of this course is possible; students must see the faculty undergraduate vice chair.

Graduate-level courses. All graduate courses are open to undergraduates who have taken the recommended prerequisites; students should consult with the course instructor. Advanced undergraduates are strongly advised to take or audit graduate courses that interest them.

Graduate Program

The Mathematics Department offers programs leading to the M.A. and Ph.D. degrees. Contact the Division of Graduate Studies for further information on the M.A. and Ph.D. programs, as well as on university application procedures.

M.A. Degree Requirements

Students are required to complete two of courses 200, 201, 202, 203; two of courses 204, 205, 206; one of courses 208, 209, 210; and complete five additional courses in mathematics or a related subject by approval. In addition, students must do one of the following:

- pass an M.A.-level preliminary examination;
- · write a master's thesis.

Ph.D. Degree Requirements

All of the following are required:

• obtain a Ph.D.-level pass on two of the three written preliminary examinations, or a Ph.D.-level pass on one and a master's-level pass on the remaining two. Students who opt for the Ph.D.-level pass on two of the three preliminary examinations must complete the full

sequence in the track associated with the preliminary examination they did not pass;

- · satisfy the foreign language requirement;
- · pass the qualifying examination;
- · complete three quarters as a teaching assistant;
- complete six graduate courses in mathematics other than 200, 201, 202, 203, 204, 205, and 206. No more than three courses may be independent study or thesis research courses;
- write a Ph.D. thesis and present the thesis defense.

Students admitted to the Ph.D. program may receive an M.A. degree en route to the Ph.D.; students admitted to the M.A. program may transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

Program Description | Faculty | Course Descriptions

Program Description

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, psychology, and sociology. Researchers in all these areas are constantly developing new and fascinating ways of applying mathematics. A strong mathematics background is prerequisite to advanced study in the physical and biological sciences and is often helpful in studying the social sciences.

The UCSC mathematics program offers a wide variety of undergraduate mathematics courses:

- Courses 2 and 3 do not require thorough preparation in mathematics at the high school level. However, students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Prospective freshmen are also encouraged to take the mathematics placement exam during their senior year of high school at a UCSC-scheduled exam. If they place into course 2 or 3, they should take those courses at UCSC during the summer, so they can begin the calculus series when they enter in the fall. Failure to begin the calculus series in the fall could delay progress in some majors.
- Lower-division courses with numbers in the range 11A-B through 30 (calculus, linear algebra, multivariable calculus, differential equations, and problem solving) prepare students for further study in mathematics, the physical and biological sciences, or quantitative areas of the social sciences. Science majors take a combination of these courses as part of their undergraduate studies.
- Upper-division courses, with numbers in the range 100-199, are intended for majors in mathematics and closely related disciplines. Some of these courses provide students with a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and number theory, whereas others introduce students to more specialized areas of mathematics. Calculus, linear algebra, multivariable calculus, and proof and problem solving are prerequisite to most of these advanced courses.

Within the major, there are three concentrations leading to the B.A. degree: pure mathematics, mathematics education, and computational mathematics. These programs are designed to give students a strong background for graduate study, for work in industry or government, or for teaching. Each concentration requires nine courses, one of which must be a senior thesis or senior seminar. Please read the pure mathematics, computational mathematics, and mathematics education descriptions below for specific information about course requirements. A minor in mathematics is also offered.

The mathematics program also provides an excellent liberal arts background from which to pursue a variety of career opportunities. UCSC graduates with degrees in mathematics hold teaching posts at all levels, as well as positions in law, civil service, insurance, software development, business, banking, actuarial science, and other professions where skills in logic, numerical analysis, and computing are required.

Requirements

Students who plan to take a mathematics course at UCSC must demonstrate sufficient preparation by their score on either the mathematics placement exam (MPE), the College Entrance Examination Board Advanced Placement (AP) calculus exam, the International Bacalaureate Higher Level Mathematics Exam. or by passing the appropriate prerequisite course.

UC Santa Cruz Mathematics Placement Exam

Mathematics placement exam scores are valid for one year. Students whose areas of study require precalculus or calculus courses are strongly advised to take the placement exam and the required courses early in their academic careers. The placement exam is given at the beginning of each quarter, weekly through the seventh week of each quarter, and at prospective-student orientations. Bring photo identification for entry into the placement exam.

If your MPE score is	May enroll in this course
12-19	2
20-30	3
31-39	11A*
40-45	19A
46 or higher	19A or 20A

^{*} Students who plan to major in computer engineering, computer science, electrical engineering, information systems management, mathematics, or physics and who receive a score in the range 31-39 on the MPE should take courses 3 and 19A-B rather than courses 11A-B.

College Board Advanced Placement Calculus Exams

Students who have received 4 credits for the College Entrance Examination Board Advanced Placement (AP) calculus exam should normally enroll in course 19B, and those with 8 credits should normally enroll in course 23A. However, students who received a score of 3 on the calculus AB or BC AP exam, should enroll in course 19A or 19B, respectively, to improve their knowledge of calculus before continuing their studies. Students who wish to challenge themselves, and who received a score of 4 or 5 on the AB or a score of 3, 4, or 5 on the BC exam may choose courses 20A and 20B, Honors Calculus. Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

If your AP AB score is May enroll in this course 11A or 19A 20A or 11B or 19B

If your AP BC score is May enroll in this course 3 11B or 19B, or 20A 4 or 5 20A or 22 or 23A

International Baccalaureate Higher Level Exam in Mathematics

Students who have received a score of 5, 6, or 7 on the International Baccalaureate (IB) Higher Level Exam in Mathematics may enroll in course 20A, *Honors Calculus*; 22, *Calculus of Several Variables*; or 23A, *Multivariable Calculus*. Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

Prerequisite Courses

Students who have passed course 2 may enroll in course 3. Students who have passed course 3 may enroll in course 11A or 19A. Students who have passed an articulated precalculus course at a college or university may enroll in course 11A or 19A, but they must verify eligibility of the course and course completion with the Mathematics Department staff.

Premajor Requirements

Premajor requirements for all concentrations in the major are courses 20A -B, *Honors Calculus*; or 19A-B, *Calculus for Science, Engineering, and Mathematics*; 21, *Linear Algebra*; and 23A-B, *Multivariable Calculus*. The mathematics education concentration has one additional premajor requirement, Applied Mathematics and Statistics (AMS) 5, *Statistics*. For some non-mathematics majors, courses 11A-B can be substituted for 19A-B, but they are not recommended for students planning to major in computer engineering, computer science, electrical engineering, information systems management, or physics. Although not considered a premajor requirement, course 100 is a prerequisite for most upper-division mathematics courses.

Major Requirements

Pure Mathematics

This concentration is intended for those who desire a comprehensive understanding of mathematics, including those considering going to graduate school in mathematics. Students are required to complete at least nine courses (with laboratories, if appropriate) from among those numbered 100 or higher; course 24 or AMS 27 (not both) and course 30 can also be counted toward fulfillment of the major requirements. Five of these courses must be 100, *Introduction to Proof and Problem Solving;* 103, *Complex Analysis;* 105A, *Real Analysis;* 111A, *Algebra;* and either 194, *Senior Seminar,* or 195, *Senior Thesis.* The remaining four courses are selected by the student from among courses 24 and 30 and mathematics courses numbered above 100 or higher.

A typical program for a pure mathematics major might include the following:

```
1st year 20A-B or 19A-B, 21, 23A

2nd year 23B, 24, 100, 103, 110 or AMS 131A

3rd year 105A-B, 111A-B, 110 or 124

4th year 117, 121A, 194
```

The first two years of a typical program for a pure mathematics major who begins mathematics studies with precalculus might include the following:

1st year 3, 19A-B

2nd year 21, 23A-B, 24, 100

Computational Mathematics

This concentration is intended to prepare students for technical careers in industry or government while providing a solid mathematical background. Students are required to complete a minimum of seven mathematics courses (with laboratories, if appropriate) as follows: 24, Ordinary Differential Equations; 100, Introduction to Proof and Problem Solving; 103, Complex Analysis, or 105A, Real Analysis; 110, Introduction to Number Theory; 111A, Algebra; 148, Numerical Analysis, or 145, Introductory Chaos Theory, or AMS 146, Chaotic Dynamical Systems, or AMS 147, Computational Methods and Applications; and either 194, Senior Seminar, or 195, Senior Thesis. In addition, students must complete two courses in computer engineering or computer science selected from the following:

Computer Engineering (CMPE) 107, 108, 153, 172, 177

Computer Science (CMPS) 101, 109, 112, 130

A typical program for a computational mathematics major might include the following:

1st year 19A-B, 23A, CMPS 12A and 12B

2nd year 21, 23B, 24, 100, 110, CMPE 16

3rd year 103; 105A; 145 or AMS 146, or 147; CMPS 101

4th year 106A, 111A, CMPE 107, 194

Mathematics Education

This concentration is intended to prepare students for teaching kindergarten through high school (K-12). In addition to the pre-major requirements (which for this track include AMS 5, Statistics), students are required to complete the following nine courses: 100, Introduction to Proof and Problem Solving; either 103, Complex Analysis, or 105A, Real Analysis; 110, Introduction to Number Theory; 111A, Algebra; 128A, Classical Geometry; AMS 131, Introduction to Probability Theory; 181, History of Math; 188, Supervised Teaching Experience; and either 194, Senior Seminar, or 195, Senior Thesis.

UCSC students can pursue a degree in mathematics while preparing to teach at the secondary level. In California, students seeking a single-subject credential (for secondary teaching) in mathematics are required to take the CSET series of exams (formerly The National Teachers Examination). By the time they begin student teaching in their credential program, candidates must have taken the CSET series. Contact the UCSC Education Department for details regarding teaching credentials.

A typical program for a mathematics education major might include the following:

1st year 19A-B, 23A

2nd year 21, 23B, 100, AMS 5

3rd year 110, 111A, 128A, 181, AMS 131

4th year 30, 103, 188, 194

Minor Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least seven courses, with course 100 required. The courses that may be counted toward fulfillment of the minor requirements are courses 21, 23B, course 24 or AMS 27 (not both), and those numbered 100 or higher. No senior seminar or thesis is required.

A typical mathematics minor program for a physics major might be:

1st year 19A-B, 23A

2nd year 21, 23B, 24, 100

3rd year 103, 105A, 106A, 111A

4th year 106B, 145 or AMS 146

Courses

Course 2, *College Algebra for Calculus*, is designed for students who do not meet the requirements for admission to course 3, Precalculus, and who need comprehensive and careful preparation for calculus. Course 2 emphasizes algebra, graphs, and functions. The prerequisite for course 2 is a minimum placement examination score of 12.

Course 3, *Precalculus*, is recommended for students who need some preparation in algebra and trigonometry prior to taking calculus. This course covers functions and their inverse, exponentials, logarithms, and trigonometry.

Courses 11A-B, *Calculus with Applications*, are intended for biology and Earth sciences majors. However, students in these majors who score 40 or more points on the Mathematics Placement Exam are strongly encouraged to take the 19A-B sequence, which is required for most upper-division mathematics courses. Laboratory sections are mandatory.

Courses 19A-B, Calculus for Science, Engineering, and Mathematics, are intended for chemistry, computer engineering, computer science, electrical engineering, information systems management, mathematics, and physics majors. Laboratory sections are mandatory.

Courses 20A-B, *Honors Calculus*, are intended for students who would enjoy delving particularly deeply into the foundational and theoretical issues of calculus. Laboratory sections are mandatory.

Course 21, *Linear Algebra*, covers vector spaces, matrices, determinants, systems of linear equations, and eigenvalues. It is intended for students in the physical and biological and social sciences and is prerequisite to course 111A.

Course 22, Introduction to Calculus of Several Variables, is intended for science students whose schedules do not permit a full and comprehensive two quarters of

multivariable calculus. Students who intend to pursue further studies in mathematics must take 23A-B and not 22. Laboratory sections are mandatory.

Courses 23A-B, *Multivariable Calculus*, are intended for mathematics majors and minors and students in computer engineering, computer science, electrical engineering, information systems management, and physics who desire more rigorous mathematical training. Laboratory sections are mandatory.

Course 100, *Introduction to Proof and Problem Solving,* is an introduction to the methodology of advanced mathematics, emphasizing proof techniques. Basic areas such as set theory and logic are introduced, together with extensive applications within mathematics. A waiver of this course is possible; students must see the faculty undergraduate vice chair.

Graduate-level courses. All graduate courses are open to undergraduates who have taken the recommended prerequisites; students should consult with the course instructor. Advanced undergraduates are strongly advised to take or audit graduate courses that interest them.

Graduate Program

The Mathematics Department offers programs leading to the M.A. and Ph.D. degrees. Contact the Division of Graduate Studies for further information on the M.A. and Ph.D. programs, as well as on university application procedures.

M.A. Degree Requirements

Students are required to complete two of courses 200, 201, 202, 203; two of courses 204, 205, 206; one of courses 208, 209, 210; and complete five additional courses in mathematics or a related subject by approval. In addition, students must do one of the following:

- pass an M.A.-level preliminary examination;
- write a master's thesis.

Ph.D. Degree Requirements

All of the following are required:

- obtain a Ph.D.-level pass on two of the three written preliminary examinations, or a Ph.D.-level pass on one and a master's-level pass on the remaining two. Students who opt for the Ph.D.-level pass on two of the three preliminary examinations must complete the full sequence in the track associated with the preliminary examination they did not pass;
- satisfy the foreign language requirement;
- pass the qualifying examination;
- complete three quarters as a teaching assistant;
- complete six graduate courses in mathematics other than 200, 201, 202, 203, 204, 205, and 206. No more than three courses may be independent study or thesis research courses;
- write a Ph.D. thesis and present the thesis defense.

Students admitted to the Ph.D. program may receive an M.A. degree en route to the Ph.D.; students admitted to the M.A. program may transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

Mathematics

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Robert Boltje

Group theory, algebraic number theory

Bruce N. Cooperstein

Algebra, algebraic number theory

Chongying Dong

Infinite-dimensional Lie algebras and their representations, conformal field theory

Viktor Ginzburg

Global analysis, symplectic topology; Hamiltonian dynamical systems, Poisson geometry, symmetries, and group actions

Debra Lewis

Geometric Hamiltonian mechanics, geometric integration bifurcation theory, applications of variational methods, computational mathematics

Geoffrey Mason

Modular forms, Lie algebras, and conformal field theory

Richard Montgomery

Celestial mechanics, differential geometry, gauge theory, mechanics (quantum and classical), and control theory

Jie Qing

Nonlinear analysis, harmonic analysis, partial differential equations with applications to differential geometry, mathematical physics

Maria Schonbek

Nonlinear partial differential equations, with emphasis on fluid equations

Andrey Todorov

Algebraic geometry and complex differential geometry and their applications to theoretical physics; Teichmüller theory

Anthony J. Tromba

Global nonlinear analysis, calculus of variations, minimal surfaces and Plateau's problem, Riemann surfaces

Associate Professor

Hirotaka Tamanoi

Algebraic topology, quantum and orbifold string topology

Jonathan Weitsman

Geometry and mathematical physics

Assistant Professor

Torsten Ehrhardt

Functional analysis, Operator theory, Toeplitz matrices, Banach algebras, Random Matrix Theory, Wiener-Hopf factorization

Alexander Gamburd

Spectral problems in number theory, probability, and combinatorics

Johannes Walcher

String theory, mirror symmetry, mathematical and particle physics

Martin H. Weissman

Representation theory, automorphic forms, number theory

Emeriti

Ralph H. Abraham Nicholas Burgoyne Arthur E. Fischer Marvin J. Greenberg Al Kelley Edward M. Landesman Tudor S. Ratiu Gerhard Ringel Marshall Sylvan Harold Widom

Lecturer

Frank Bäuerle

Mathematical logic, recursion theory, and complexity theory

Mark R. Eastman

Edward Migliore

Richard R. Mitchell

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

2. College Algebra for Calculus. F,W

Operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series. Prerequisite(s): placement exam score of 12 or higher. *The Staff*

3. Precalculus. F,W,S

Inverse functions and graphs; exponential and logorithmic functions, their graphs, and use in mathematical models of the real world; rates of change; trigonometry, trigonometric functions, and their graphs; and geometric series. Students cannot receive credit for both course 3 and Applied Mathematics and Statistics 3. Applied Mathematics and Statistics 3 can substitute for course 3. Prerequisite(s): course 2 or placement exam score of 20 or higher. (General Education Code(s): Q.) *The Staff*

4. Mathematics of Choice and Argument. S

Techniques of analyzing and creating quantitative arguments. Application of probability theory to questions in justice, medicine, and economics. Analysis and avoidance of statistical bias. Understanding the application and limitations of quantitative techniques. Prerequisite(s): course 2, or placement exam score of 12 or higher, or AP calculus exam score of 3 or higher. Enrollment limited to 30. (General Education Code(s): Q.) *The Staff*

11A. Calculus with Applications. F,W,S

A modern course stressing conceptual understanding, relevance, and problem solving. The derivative of polynomial, exponential, and trigonometric functions of a single variable is developed and applied to a wide range of problems involving graphing, approximation, and optimization. Students cannot receive credit for both this course and course 19A or Applied Mathematics and Statistics 11A or Economics 11A. Prerequisite(s): course 3 or Applied Mathematics and Statistics 3; or placement exam score of 31 or higher; or AP Calculus AB exam score of 3 or higher. (General Education Code(s): IN, Q.) *The Staff*

11B. Calculus with Applications. F,W,S

Starting with the fundamental theorem of calculus and related techniques, the integral of functions of a single variable is developed and applied to problems in geometry, probability, physics, and differential equations. Polynomial approximations, Taylor series, and their applications conclude the course. Students cannot receive credit for this course and course 19B, or Applied Mathematics and Statistics 11B, or Economics 11B. Prerequisite(s): course 11A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5

or higher. (General Education Code(s): IN, Q.) The Staff

19A. Calculus for Science, Engineering, and Mathematics. F,W,S

The limit of a function, calculating limits, continuity, tangents, velocities, and other instantaneous rates of change. Derivatives, the chain rule, implicit differentiation, higher derivatives. Exponential functions, inverse functions, and their derivatives. The mean value theorem, monotonic functions, concavity, and points of inflection. Applied maximum and minimum problems. Students cannot receive credit for both this course and course 11A or Applied Mathematics and Statistics 11A or Economics 11A. Prerequisite(s): course 3 or Applied Mathematics and Statistics 3 or placement exam score of 40 or higher or AP Calculus AB exam score of 3 or higher. (General Education Code(s): IN, Q.) *The Staff*

19B. Calculus for Science, Engineering, and Mathematics. F,W,S

The definite integral and the fundamental theorem of calculus. Areas, volumes. Integration by parts, trigonometric substitution, and partial fractions methods. Improper integrals. Sequences, series, absolute convergence and convergence tests. Power series, Taylor and Maclaurin series. Students cannot receive credit for both this course and course 11B, Applied Math and Statistics 11B, or Economics 11B. Prerequisite(s): course 19A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 of higher. (General Education Code(s): IN, Q.) *The Staff*

20A. Honors Calculus. F

Challenging course designed to approach single-variable calculus from the perspective of modern mathematics. Emphasis is on the evolution and historical development of core concepts underlying calculus and analysis. Prerequisite(s): placement exam score of 46 or higher; or AP Calculus AB exam score of 4 or 5; or BC exam of 3 or higher; or IB Mathematics Higher Level exam score of 5 or higher. Enrollment limited to 60. (General Education Code(s): IN, Q.) *The Staff*

20B. Honors Calculus. W

Challenging course designed to approach single-variable calculus from the perspective of modern mathematics. Emphasis is on the evolution and historical development of core concepts underlying calculus and analysis. Prerequisite(s): course 20A. Enrollment limited to 60. (General Education Code(s): IN, Q.) *The Staff*

21. Linear Algebra. F,W,S

Systems of linear equations, matrices, determinants. Introduction to abstract vector spaces, linear transformation, inner products, geometry of Euclidean space, and eigenvalues. One quarter of college mathematics is recommended as preparation. (General Education Code(s): Q.) *The Staff*

22. Introduction to Calculus of Several Variables. F,W,S

Functions of several variables. Continuity and partial derivatives. The chain rule, gradient and directional derivative. Maxima and minima, including Lagrange multipliers. The double and triple integral and change of variables. Surface area and volumes. Applications from biology, chemistry, earth sciences, engineering, and physics. Students cannot receive credit for this course and course 23A. Prerequisite(s): course 11B or 19B or 20B. *The Staff*

23A. Multivariable Calculus. F,W,S

Vectors in n-dimensional Euclidean space. The inner and cross products. The derivative of functions from n-dimensional to m-dimensional Euclidean space is

studied as a linear transformation having matrix representation. Paths in 3-dimensions, arc length, vector differential calculus. Taylor's theorem in several variables, extrema of real-valued functions, constrained extrema and Lagrange multipliers, the implicit function theorem, some applications. Students cannot receive credit for this course and course 22. Prerequisite(s): course 19B or 20B. *The Staff*

23B. Multivariable Calculus. F,W,S

Double integral, changing the order of integration. Triple integrals, maps of the plane, change of variables theorem, improper double integrals. Path integrals, line integrals, parametrized surfaces, area of a surface, surface integrals. Green's theorem, Stokes theorem, conservative fields, Gauss' theorem. Applications to physics and differential equations, differential forms. Prerequisite(s): course 23A. *The Staff*

24. Ordinary Differential Equations. S

First and second order ordinary differential equations, with emphasis on the linear case. Methods of integrating factors, undetermined coefficients, variation of parameters, power series, numerical computation. Students cannot receive credit for this course and Applied Mathematics and Statistics 27. Prerequisite(s): course 22 or 23A; course 21 is recommended as preparation. *The Staff*

30. Mathematical Problem Solving. F

Students learn techniques of problem solving such as induction, contradiction, exhaustion, dissection, analogy, generalization, specialization, and others in the context of solving problems drawn from number theory, probability, combinatorics, graph theory, geometry, and logic. Prerequisite(s): course 11A or 19A or 20A or Math Placement Exam score of 40 or higher. *B. Cooperstein*

99. Tutorial. F,W,S

The Staff

Upper-Division Courses

100. Introduction to Proof and Problem Solving. F,W,S

Students learn the basic concepts and ideas necessary for upper-division mathematics and techniques of mathematical proof in the context of specific topics. Introduction to sets, relations, elementary mathematical logic, proof by contradiction, mathematical induction, and counting arguments. Prerequisite(s): courses 11A and 11B or 19A and 19B or 20A and 20B. Enrollment limited to 40. *The Staff*

103. Complex Analysis. F,W

Complex numbers, analytic and harmonic functions, complex integration, the Cauchy integral formula, Laurent series, singularities and residues, conformal mappings. Prerequisite(s): course 23B; and either course 100 or Computer Science 101. *The Staff*

105A. Real Analysis. F,S

The basic concepts of one-variable calculus are treated carefully and rigorously. Set theory, the real number system, numerical sequences and series, continuity, differentiation. Prerequisite(s): course 23B and either course 100 or Computer Science 101. *The Staff*

105B. Real Analysis. *

Metric spaces, differentiation and integration of functions. The Riemann-Stieltjes integral. Sequences and series of functions. Prerequisite(s): course 105A. *The Staff*

105C. Real Analysis. *

The Stone-Weierstrass theorem, Fourier series, differentiation and integration of functions of several variables. Prerequisite(s): course 105B. *The Staff*

106A. Systems of Ordinary Differential Equations. F

Linear systems, exponentials of operators, existence and uniqueness, stability of equilibria, periodic attractors, and applications. Prerequisite(s): either Applied Mathematics and Statistics 27 or preferably courses 21 and 24; and either course 100 or Computer Science 101. *The Staff*

106B. Partial Differential Equations. W

Topics covered include first and second order linear partial differential equations, the heat equation, the wave equation, Laplace's equation, separation of variables, eigenvalue problems, Green's functions, Fourier series. Prerequisite(s): either courses 21 and 24 or Applied Mathematics and Statistics 27; and either course 100 or Computer Science 101; course 106A is recommended as preparation. *The Staff*

110. Introduction to Number Theory. F

Prime numbers, unique factorization, congruences with applications (e.g., to magic squares). Rational and irrational numbers. Continued fractions. Introduction to Diophantine equations. No calculus required. An introduction to some of the ideas and outstanding problems of modern mathematics. Prerequisite(s): course 100 or Computer Science 101. (General Education Code(s): Q.) *The Staff*

111A. Algebra. W,S

Group theory including the Sylow theorem, the structure of abelian groups, permutation groups. Introduction to rings and fields including polynomial rings, factorization, the classical geometric constructions, and Galois theory. Prerequisite(s): course 21 or Applied Mathematics and Statistics 27 and either course 100 or Computer Science 101. *The Staff*

111B. Algebra. S

Group theory including the Sylow theorem, the structure of abelian groups, permutation groups. Introduction to rings and fields including polynomial rings, factorization, the classical geometric constructions, and Galois theory. Prerequisite(s): course 111A. *The Staff*

112. Mathematical Probability Theory. *

Introductory probability course for mathematicians, designed as a prerequisite for advanced probability courses at the graduate level. Moving from elementary topics of probability spaces and random variables, independent identical trials, the law of large numbers, the Demoivre-Laplace central limit theorem, also includes basic Martingale theory, finite Markov chains, percolations, and branching processes. Prerequisite(s): courses 21 and 23B. *The Staff*

113. Discrete Mathematics. *

Basic course in theorems and applications of discrete mathematics. Sequences and series, matrix operations, recursion relations, discrete probability, algorithms, finite state machines, boolean functions, trees, elementary number theory, generating functions, graph theory. Particular emphasis on combinatorics. Applications dealing with searching and sorting, cryptography, coding, quantum mechanics, and Markov processes. Prerequisite(s): courses 19A-B, 21, or equivalent. *The Staff*

114. Introduction to Financial Mathematics. *

Financial derivatives: contracts and options. Hedging and risk managment. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Ito's formula. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio; Black-Scholes pricing of European options. Dividends. Implied volatility. American options as free boundary problems. Prerequisite(s): course 23B or Applied Mathematics and Statistics 27. Corequisite(s): course 112 or Applied Mathematics and Statistics 131 or Computer Engineering 107. *The Staff*

115. Graph Theory. W

Graph theory, trees, vertex and edge colorings, Hamilton cycles, Eulerian circuits, decompositions into isomorphic subgraphs, extremal problems, cages, Ramsey theory, Cayley's spanning tree formula, planar graphs, Euler's formula, crossing numbers, thickness, splitting numbers, magic graphs, graceful trees, rotations, and genus of graphs. Prerequisite(s): course 21 or Applied Mathematics and Statistics 27 and either course 100 or Computer Science 101. *The Staff*

117. Advanced Linear Algebra. W

Review of abstract vector spaces. Dual spaces, bilinear forms, and the associated geometry. Normal forms of linear mappings. Introduction to tensor products and exterior algebra. Prerequisite(s): course 21 or Applied Mathematics and Statistics 27 and either course 100 or Computer Science 101. *The Staff*

118. Advanced Number Theory. W

Topics include divisibility and congruences, arithmetical functions, quadratic residues and quadratic reciprocity, quadratic forms and representations of numbers as sums of squares, Diophantine approximation and transcendence theory, quadratic fields. Additional topics as time permits. Prerequisite(s): course 110 or 111A. *The Staff*

120. Coding Theory. *

An introduction to mathematical theory of coding. Construction and properties of various codes, such as cyclic, quadratic residue, linear, Hamming, and Golay codes; weight enumerators; connections with modern algebra and combinatorics. Prerequisite(s): course 21. *The Staff*

121A. Differential Geometry. W

Topics include Euclidean space, tangent vectors, directional derivatives, curves and differential forms in space, mappings. Curves, the Frenet formulas, covariant derivatives, frame fields, the structural equations. The classification of space curves up to rigid motions. Vector fields and differentiable forms on surfaces; the shape operator. Gaussian and mean curvature. The theorem Egregium; global classification of surfaces in three space by curvature. Prerequisite(s): courses 21 and 23B and either course 100 or Computer Science 101. Course 105A strongly recommended. *The Staff*

121B. Differential Geometry and Topology. S

Examples of surfaces of constant Gauss curvature, surfaces of revolutions, minimal surfaces. Abstract manifolds; integration theory; Riemannian manifolds. Total curvature and geodesics; the Euler characteristic, the theorem of Gauss-Bonnet. Length-minimizing properties of geodesics, complete surfaces, curvature and conjugate points covering surfaces. Surfaces of constant curvature; the theorems of Bonnet and Hadamard. Prerequisite(s): course 121A. *The Staff*

124. Introduction to Topology. F

Topics include introduction to point set topology (topological spaces, continuous maps, connectedness, compactness), homotopy relation, definition and calculation of fundamental groups and homology groups, Euler characteristic, classification of orientable and nonorientable surfaces, degree of maps, and Lefschetz fixed-point theorem. Prerequisite(s): course 100; course 111A recommended. *The Staff*

126. Mathematical Control Theory. *

Control theory concerns steering and stabilizing systems by means of tunable parameters. Examples are flight controllers, CD players, and biological or robotic locomotion. Studies the mathematical foundations, tools, and basic theorems of linear and nonlinear deterministic control. Prerequisite(s): courses 23B and 24 or Applied Mathematics and Statistics 27, and either course 100 or Computer Science 101. *The Staff*

128A. Classical Geometry: Euclidean and Non-Euclidean. F

Rigorous foundations for Euclidean and non-Euclidean geometries. History of attempts to prove the parallel postulate and of the simultaneous discovery by Gauss, J. Bolyai, and Lobachevsky of hyperbolic geometry. Consistency proved by Euclidean models. Classification of rigid motions in both geometries. Prerequisite(s): either course 100 or Computer Science 101. *The Staff*

128B. Classical Geometry: Projective. *

Theorems of Desargue, Pascal, and Pappus; projectivities; homogeneous and affine coordinates; conics; relation to perspective drawing and some history. Prerequisite(s): course 21. *The Staff*

130. Celestial Mechanics. *

Solves the two-body (or Kepler) problem, then moves onto the N-body problem where there are many open problems. Includes central force laws; orbital elements; conservation of linear momentum, energy, and angular momentum; the Lagrange-Jacobi formula; Sundman's theorem for total collision; virial theorem; the three-body problem; Jacobi coordinates; solutions of Euler and of Lagrange; and restricted three-body problem. Prerequisite(s): courses 19A-B and course 23A or Physics 5A or 6A; courses 21 and 24 strongly recommended. Enrollment limited to 35. *The Staff*

134. Cryptography. *

Introduces different methods in cryptography (shift cipher, affine cipher, Vigenere cipher, Hill cipher, RSA cipher, ElGamal cipher, knapsack cipher). The necessary material from number theory and probability theory is developed in the course. Common methods to attack ciphers discussed. Prerequisite(s): course 100; course 110 recommended as preparation. *R. Boltje*

141. Introduction to Nonlinear Mathematics. *

Modeling problems involving nonlinear differential equations. Applications to chemical reactions, electrical circuits, shock waves, ecosystems, microeconomics, stochastic processes. Exact solutions, intuitive and pictorial methods of analysis. Prerequisite(s): courses 21 and 24 or Applied Mathematics and Statistics 27; course 100 or Computer Science 101; 106A recommended. *The Staff*

145. Introductory Chaos Theory. S

The Lorenz and Rossler attractors, measures of chaos, attractor reconstruction, applications from the sciences. Students cannot receive credit for this course and

Applied Mathematics and Statistics 146. Prerequisite(s): course 22 or 23A; course 21; course 100 or Computer Science 101. Concurrent enrollment in course 145L is required. *The Staff*

145L. Introductory Chaos Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 145. One three-hour session per week in microcomputer laboratory. Concurrent enrollment in course 145 is required. *The Staff*

148. Numerical Analysis. *

The theory of constructive methods in mathematical analysis and its application with scientific computation. Some typical topics are difference equations, linear algebra, iteration, Bernoulli's method, quotient difference algorithm, the interpolating polynomial, numerical differentiation and integration, numerical solution of differential equations, finite Fourier series. Prerequisite(s): course 22 or 23A; course 21 and 24 or Applied Mathematics and Statistics 27; course 100 or Computer Science 101. Concurrent enrollment in course 148L is required. *The Staff*

148L. Numerical Analysis Laboratory (1 credit). *

Laboratory sequence illustrating topics covered in course 148. One three-hour session per week in microcomputer laboratory. Concurrent enrollment in course 148 is required. *The Staff*

160. Mathematical Logic I. *

Propositional and predicate calculus. Resolution, completeness, compactness, and Löwenheim-Skolem theorem. Recursive functions, Gödel incompleteness theorem. Undecidable theories. Hilbert's 10th problem. Prerequisite(s): course 100 or Computer Science 101. *The Staff*

161. Mathematical Logic II. S

Continuation of course 160: arithmetization of syntax, Tarski's theorem on the undefinability of truth, Gödel's first incompleteness theorem, naive set theory and its limitations (Russell's paradox), cardinal numbers, cardinal arithmetic, Axiom of Choice, finite, countable and uncountable sets, and Continuum Hypothesis. Prerequisite(s): course 160. Enrollment limited to 45. *The Staff*

181. History of Mathematics. W

A survey from a historical point of view of various developments in mathematics. Specific topics and periods to vary yearly. *The Staff*

188. Supervised Teaching. F,W,S

Supervised tutoring in self-paced courses. May not be repeated for credit. Students submit petition to sponsoring agency. *The Staff*

194. Senior Seminar. W,S

Designed to expose the student to topics not normally covered in the standard courses. The format varies from year to year. In recent years each student has written a paper and presented a lecture on it to the class. Prerequisite(s): course 103 or 105A or 111A. Enrollment priority given to seniors. *The Staff*

195. Senior Thesis. F,W,S

Students research a mathematical topic under the guidance of a faculty sponsor and write a senior thesis demonstrating knowledge of the material. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Graduate Courses

200. Algebra I. F

Subgroups, cosets, normal subgroups, homomorphisms, isomorphisms, quotient groups, free groups, generators and relations, group actions on a set. Sylow theorems, semidirect products, simple groups, nilpotent groups, and solvable groups. Ring theory: Chinese remainder theorem, prime ideals, localization. Euclidean domains, PIDs, UFDs, polynomial rings. Prerequisite(s): courses 111A and 117 are recommended as preparation. May be repeated for credit. *The Staff*

201. Algebra II. W

Vector spaces, linear transformations, eigenvalues and eigenvectors, Jordan canonical forms, bilinear forms, quadratic forms, real symmetric forms and real symmetric matrices, orthogonal transformations and orthogonal matrices, Euclidean space, Hermitian forms and Hermitian matrices, Hermitian spaces, unitary transformations and unitary matrices, skew-symmetric forms, tensor products of vector spaces, tensor algebras, symmetric algebras, exterior algebras, Clifford algebras and spin groups. Course 200 is recommended as preparation. *The Staff*

202. Algebra III. S

Submodules, quotient modules, module homomorphisms, generators of modules, direct sums, free modules, torsion modules, modules over PIDs, and applications to rational and Jordan canonical forms. Field theory: field extensions, algebraic and transcendental extensions, splitting fields, algebraic closures, separable and normal extensions, the Galois theory, finite fields, Galois theory of polynomials. Course 201 is recommended as preparation. *The Staff*

203. Algebra IV. F

Topics include tensor product of modules over rings, projective modules and injective modules, Jacobson radical, Weederburns' theorem, category theory, Noetherian rings, Artinian rings, affine varieties, projective varieties, Hilbert's Nullstellensatz, prime spectrum, Zariski topology, discrete valuation rings, and Dedekind domains. Prerequisite(s): courses 200, 201, and 202. *The Staff*

204. Analysis I. F

Completeness and compactness for real line, sequences and infinite series of functions, Fourier series, calculus on Euclidean space and implicit function theorem, metric spaces and contracting mapping theorem, Arzela-Ascoli theorem, basics of general topological spaces, Baire category theorem, Urysohn lemma, and Tychnoff theorem. Course 105A and course 105B or equivalent are recommended as preparation. *The Staff*

205. Analysis II. W

Lebesgue measure theory, abstract measure theory, measurable functions, integration, space of absolutely integrable functions, dominated convergence theorem, convergence in measure, Riesz representation theorem, product measure and Fubini theorem, L^p spaces, derivative of a measure and Radon-Nikodym theorem, fundamental theorem of calculus. Prerequisite(s): course 204. *The Staff*

206. Analysis III. S

Banach space, Hahn-Banach theorem, uniform boundedness theorem, open mapping theorem and closed graph theorem, weak and weak* topology and Banach-Alaoglu theorem, Hilbert space, self-adjoint operators, compact operators, spectral theory, Fredholm operators, space of distributions and Fourier transform, Sobolev spaces. Courses 204 and 205 recommended as preparation. *The Staff*

207. Complex Analysis. W

Holomorphic and harmonic functions, the Cauchy integral theorem, the maximum principle and its consequences, conformal mapping, analytic continuation. The Riemann mapping theorem. Course 103 is recommended as preparation. *The Staff*

208. Manifolds I. F

Definition of manifolds, tangent bundle, inverse and implicit function theorems, transversality, Sard's theorem and the Whitney embedding theorem, vector fields, flows, and Lie bracket, Frobenius's theorem. Course 204 recommended for preparation. *The Staff*

209. Manifolds II. W

Tensor algebra. Differential forms and associated formalism of pullback, wedge product, exterior derivative, Stokes theorem, integration. Cartan's formula for Lie derivative. Cohomology via differential forms. Poincaré lemma and the Mayer-Vietoris sequence. Theorems of deRham and Hodge. Prerequisite(s): course 208. Course 201 is recommended as preparation. *The Staff*

210. Manifolds III. S

The fundamental group, covering space theory and Van Kampen's theorem (with a discussion of free and amalgamated products of groups), CW complexes, higher homotopy groups, cellular and singular cohomology, the Eilenberg-Steenrod axioms, computational tools including Mayer-Vietoris, cup products, Poincaré duality, and the Lefschetz fixed point theorem, homotopy exact sequence of a fibration and the Hurewicz isomorphism theorem, remarks on characteristic classes. Courses 208 and 209 recommended as preparation. *The Staff*

211. Algebraic Topology. F

Continuation of course 210. Topics include theory of characteristic classes of vector bundles, cobordism theory, and homotopy theory. Courses 200 and 210 recommended as preparation. *The Staff*

212. Differential Geometry. S

Principle bundles, associated bundles and vector bundles, connections and curvature on principle and vector bundles. More advanced topics: introduction to cohomology, the Chern-Weil construction and characteristic classes, the Gauss-Bonnet theorem or Hodge theory, eigenvalue estimates for Beltrami Laplacian, comparison theorems in Riemannian geometry. Prerequisite(s): course 208. *The Staff*

213A. Partial Differential Equations I. F

First of the two PDE series covering basically Part I in Evans' book, *Partial Differential Equations*, which includes transport equations, Laplace equations, heat equations, wave equations, characteristics of nonlinear first order PDE, Hamilton-Jacobi equations, equations of conservation laws, some methods to solve equations with close forms, and Cauchy-Kovalevskaya theorem. Courses 106A and 106B are recommended as preparation. *The Staff*

213B. Partial Differential Equations II. W

Second of the PDE series covering basically most of Part II in Evans' book and some topics in nonlinear PDE including Sobolev space, Sobolev inequalities, existence, regularity and a priori estimates of solutions to second order elliptic PDE, parabolic equations, hyperbolic equations and systems of conservation laws, and calculus of variations and its applications to PDE. Courses 106A, 106B, and 213A are recommended as preparation. *The Staff*

214. Theory of Finite Groups. *

Nilpotent groups, solvable groups, Hall subgroups, the Frattini subgroup, the Fitting subgroup, Schur-Zassenhaus theorem, fusion in p-subgroups, the transfer map, Frobenius theorem on normal p-complements. Courses 200 and 201 are recommended as preparation. *The Staff*

215. Operator Theory. S

Operators on Banach and Hilbert spaces. The spectral theorem. Compact and Fredholm operators. Other special classes of operators. Courses 204, 205, 206, and 207 are recommended as preparation. *The Staff*

216. Advanced Analysis. *

Topics include maximal function, the Lebesgue set, the Marcinkiewicz interpolation theorem, singular integrals, Calderon-Zygmund theorem, Hardy Littlewood-Sobolev theorem, pseudodifferential operators, compensated compactness, concentration compactness, and applications to PDE. Course 204 is recommended as preparation. *The Staff*

217. Advanced Elliptic Partial Differential Equations. *

Topics include elliptic equations, existence of weak solutions, Lax-Milgram theorem, interior and boundary regularity, maximum principles, Harnack inequality, eigenvalues for symmetric and non-symmetric elliptic operators, calculus of variations (first variation: Euler-Lagrange equations, second variation: existence of minimizers). Other topics covered as time permits. Courses 204 and 205 are recommended as preparation. *The Staff*

218. Advanced Parabolic and Hyperbolic Partial Differential Equations. *

Topics include linear evolution equations, second order parabolic equations, maximum principles, second order hyperbolic equations, propagation of singularities, hyperbolic systems of first order, semigroup theory, systems of conservation laws, Riemann problem, simple waves, rarefaction waves, shock waves, Riemann invariants, and entropy criteria. Other topics covered as time permits. *The Staff*

219. Nonlinear Functional Analysis. *

Topological methods in nonlinear partial differential equations, including degree theory, bifurcation theory, and monotonicity. Topics also include variational methods in the solution of nonlinear partial differential equations. Enrollment restricted to graduate students. *The Staff*

220A. Representation Theory I. *

Lie groups and Lie algebras, and their finite dimensional representations. Prerequisite(s): courses 200 and 204. *The Staff*

220B. Representation Theory II. *

Lie groups and Lie algebras, and their finite dimensional representations. Prerequisite(s): course 220A. *The Staff*

222A. Algebraic Number Theory. F

Topics include algebraic integers, completions, different and discriminant, cyclotomic fields, parallelotopes, the ideal function, ideles and adeles, elementary properties of zeta functions and L-series, local class field theory, global class field theory. Courses 200, 201, and 202 are recommended as preparation. *The Staff*

222B. Algebraic Number Theory. *

Topics include geometric methods in number theory, finiteness theorems, analogues of Riemann-Roch for algebraic fields (after A. Weil), inverse Galois problem (Belyi theorem) and consequences. *The Staff*

223A. Algebraic Geometry I. *

Topics include examples of algebraic varieties, elements of commutative algebra, local properties of algebraic varieties, line bundles and sheaf cohomology, theory of algebraic curves. Weekly problem solving. Courses 200, 201, 202, and 208 are recommended as preparation. *The Staff*

223B. Algebraic Geometry II. *

A continuation of course 223A. Topics include theory of schemes and sheaf cohomology, formulation of Riemann-Roch theorem, birational maps, theory of surfaces. Weekly problem solving. Course 223A is recommended as preparation. *The Staff*

225A. Lie Algebras. *

Basic concepts of Lie algebras. Engel's theorem, Lie's theorem, Weyl's theorem are proved. Root space decomposition for semi-simple algebras, root systems and the classification theorem for semi-simple algebras over the complex numbers. Isomorphism and conjugacy theorems. Course 202 is recommended as preparation. *The Staff*

225B. Infinite Dimensional Lie Algebra. *

Finite dimensional semi-simple Lie algebras: PBW theorem, generators and relations, highest weight representations, Weyl character formula. Infinite dimensional Lie algebras: Heisenberg algebras, Virasoro algebras, loop algebras, affine Kac-Moody algebras, vertex operator representations. *The Staff*

226A. Infinite Dimensional Lie Algebras and Quantum Field Theory I. *

Introduction to the infinite-dimensional Lie algebras that arise in modern mathematics and mathematical physics: Heisenberg and Virasoro algebras, representations of the Heisenberg algebra, Verma modules over the Virasoro algebra, Kac determinant formula, and unitary and discrete series representations. Enrollment restricted to graduate students. *The Staff*

226B. Infinite Dimensional Lie Algebras and Quantum Field Theory II. *

Continuation of I: Kac-Moody and affine Lie algebras and their representations, integrable modules, representations via vertex operators, modular invariance of characters, and introduction to vertex operator algebras. Enrollment restricted to graduate students. *The Staff*

227. Lie Groups. W

Lie groups and algebras, the exponential map, the adjoint action, Lie's three theorems, Lie subgroups, the maximal torus theorem, the Weyl group, some topology of Lie groups, some representation theory: Shur's lemma, Peter-Weyl theorem, roots, weights, classification of Lie groups, the classical groups. Prerequisite(s): courses

228. Lie Incidence Geometries. *

Linear incidence geometry is introduced. Linear and classical groups are reviewed, and geometries associated with projective and polar spaces are introduced. Characterizations are obtained. *The Staff*

229. Kac-Moody Algebras. *

Theory of Kac-Moody algebras and their representations. Weil-Kac character formula. Emphasis on representations of affine superalgebras by vertex operators. Connections to combinatorics, PDE, the monster group. The Virasoro algebra. *The Staff*

232. Morse Theory. *

Classical Morse Theory. The fundamental theorems relating to critical points to the topology of a manifold are treated in detail. The Bolt Periodicity Theorem. A specialized course offered every few years. *The Staff*

233. Random Matrix Theory. *

Classical matrix ensembles; Wigner semi-circle law; method of moments. Gaussian ensembles. Method of orthogonal polynomials; Gaudin lemma. Distribution functions for spacings and largest eigenvalue. Asymptotics and Riemann-Hilbert problem. Painleve theory and Tracy-Widom distribution. Selberg's Integral. Matrix ensembles related to classical groups; symmetric functions theory. Averages of characteristic polynomials. Fundamentals of free probability theory. Overview of connections with physics, combinatorics, and number theory. Prerequisite(s): courses 103 and 204; course 117 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

234. Riemann Surfaces. *

Riemann surfaces, conformal maps, harmonic forms, holomorphic forms, the theorem of Reimann-Roch, the theory of moduli. *The Staff*

235. Dynamical Systems Theory. *

An introduction to the qualitative theory of systems of ordinary differential equations. Structural stability, critical elements, stable manifolds, generic properties, bifurcations of generic arcs. Prerequisite(s): courses 106A and 203. *The Staff*

236. Probability Theory. *

Probability theory taught at the graduate level. Topics covered are weak convergence of probability measures, law of large numbers, central limit theorems, infinitely divisible distributions, dependent random variables, conditional expectation and conditioned probability, Markov chains, basic martingale theory, and ergodic theorems. *The Staff*

237. Stochastic Calculus. *

Introduces Ito's stochastic calculus. Topics covered include Brownian motion, stochastic integration, exit times, elliptic and parabolic partial differential equations, stochastic differential equations, one dimensional diffusions and functional integration. *The Staff*

238. Elliptic Functions and Modular Forms. *

The course, aimed at second-year graduate students, will cover the basic facts about elliptic functions and modular forms. The goal is to provide the student with

foundations suitable for further work in advanced number theory, in conformal field theory, and in the theory of Riemann surfaces. Successful completion of graduate sequence (courses 200-202) and either 207 or 103 are recommended as preparation. *The Staff*

239. Homological Algebra. *

Homology and cohomology theories have proven to be powerful tools in many fields (topology, geometry, number theory, algebra). Independent of the field, these theories use the common language of homological algebra. The aim of this course is to acquaint the participants with basic concepts of category theory and homological algebra, as follows: chain complexes, homology, homotopy, several (co)homology theories (topological spaces, manifolds, groups, algebras, Lie groups), projective and injective resolutions, derived functors (Ext and Tor). Depending on time, spectral sequences or derived categories may also be treated. Courses 200 and 202 strongly recommended. *The Staff*

240A. Representations of Finite Groups I. *

Introduces ordinary representation theory of finite groups (over the complex numbers). Main topics are characters, orthogonality relations, character tables, induction and restriction, Frobenius reciprocity, Mackey's formula, Clifford theory, Schur indicator, Schur index, Artin's and Braver's induction theorems. Recommended: successful completion of courses 200-202. *The Staff*

240B. Representations of Finite Groups II. *

Introduces modular representation theory of finite groups (over a field of positive characteristic). Main topics are Grothendieck groups, Brauer characters, Brauer character table, projective covers, Brauer-Cartan triangle, relative projectivity, vertices, sources, Green correspondence, Green's indecomposability theorem. Recommended completion of courses 200-202 and 240A. *The Staff*

246. Representations of Algebras. *

Material includes associative algebras and their modules; projective and injective modules; projective covers; injective hulls; Krull-Schmidt Theorem; Cartan matrix; semisimple algebras and modules; radical, simple algebras; symmetric algebras; quivers and their representations; Morita Theory; and basic algebras. Prerequisite(s): courses 200, 201, and 202. *The Staff*

248. Symplectic Geometry. S

Basic definitions. Darboux theorem. Basic examples: cotangent bundles, Kahler manifolds and co-adjoint orbits. Normal form theorems. Hamiltonian group actions, momentum maps. Reduction by symmetry groups. Atiyah-Guillemin-Sternberg convexity. Introduction to Floer homological methods. Relations with other geometries including contact, Poisson, and Kahler. Prerequisite(s): course 204; course 280 is recommended as preparation. *The Staff*

249A. Mechanics I. *

Covers symplectic geometry and classical Hamiltonian dynamics. Some of the key subjects are the Darboux theorem, Poisson brackets, Hamiltonian and Langrangian systems, the Legendre transformation, variational principles, Hamilton-Jacobi theory, godesic equations, and an introduction to Poisson geometry. Course 208 is recommended as preparation. *The Staff*

249B. Mechanics II. *

Hamiltonian dynamics with symmetry. Key topics center around the momentum map

and the theory of reduction in both the symplectic and Poisson context. Applications are taken from geometry, rigid body dynamics, and continuum mechanics. Course 249A is recommended as preparation. *The Staff*

249C. Mechanics III. *

Introduces students to active research topics tailored according to the interests of the students. Possible subjects are complete integrability and Kac-Moody Lie algebras; Smale's topological program and bifurcation theory; KAM theory, stability and chaos; relativity; quantization. Course 249B is recommended as preparation. Offered in alternate academic years. *The Staff*

252. Fluid Mechanics. *

First covers a basic introduction to fluid dynamics equations and then focuses on different aspects of the solutions to the Navier-Stokes equations. Prerequisite(s): courses 106A and 106B are recommended. Enrollment restricted to graduate students. *The Staff*

254. Geometric Analysis. *

Introduction to some basics in geometric analysis through the discussions of two fundamental problems in geometry: the resolution of the Yamabe problem and the study of harmonic maps. The analytic aspects of these problems include Sobolev spaces, best constants in Sobolev inequalities, and regularity and a priori estimates of systems of elliptic PDE. Prerequisite(s): courses 208, 212, and 213 are recommended as preparation. *The Staff*

256. Algebraic Curves. *

Introduction to compact Riemann surfaces and algebraic geometry via an in-depth study of complex algebraic curves. Courses 200, 201, 202, 203, 204, and 207 are recommended as preparation. Enrollment restricted to graduate mathematics and physics students. *The Staff*

260. Combinatorics. *

Combinatorial mathematics, including summation methods, binomial coefficients, combinatorial sequences (Fibonacci, Stirling, Eulerian, harmonic, Bernoulli numbers), generating functions and their uses, Bernoulli processes and other topics in discrete probability. Oriented toward problem solving applications. Applications to statistical physics and computer science. *The Staff*

284. Topics in Dynamics. *
The Staff
```

285. Topics in Partial Differential Equations. *

Topics such as derivation of the Navier-Stokes equations. Examples of flows including water waves, vortex motion, and boundary layers. Introductory functional analysis of the Navier-Stokes equation. *The Staff*

286. Topics in Number Theory. *

Topics in number theory, selected by instructor. Possibilities include modular and automorphic forms, elliptic curves, algebraic number theory, local fields, the trace formula. May also cover related areas of arithmetic algebraic geometry, harmonic analysis, and representation theory. Courses 200, 201, 202, and 205 are recommended as preparation. *The Staff*

287. Topics in Topology. *

Topics in topology, selected by the instructor. Possibilities include generalized (co)homology theory including K-theory, group actions on manifolds, equivariant and orbifold cohomology theory. May be repeated for credit. *The Staff*

292. Seminar (no credit). F,W,S

A weekly seminar attended by faculty, graduate students, and upper-division undergraduate students. All graduate students are expected to attend. *The Staff*

296. Special Student Seminar. F,W,S

Students and staff studying in an area where there is no specific course offering at that time. *The Staff*

297. Independent Study. F,W,S

Either study related to a course being taken or a totally independent study. The Staff

298. Master's Thesis Research. F,W,S

The Staff

299. Thesis Research. F,W,S

Program Description | Faculty

Lower-Division Courses

10. Becoming a Successful Student (2 credits). W

An interactive course providing the opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources are explored. Contact college office for interview-only criteria. Enrollment limited to 30. *The Staff*

20N. Re-Evaluation Counseling. *

Class introduces the fundamentals of re-evaluation counseling (co-counseling) and focuses on those aspects of the theory and practice which facilitate living in a diverse world. Interview with instructor before first class meeting. Offered in alternate years. Will be offered spring, 2009. Enrollment limited to 20. Offered in alternate academic years. *P. Roby*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

80A. Introduction to University Discourse: Cultural Identities and Global Consciousness. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Examines world poverty, imperialism, and nationalism; peoples' need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T3-Social Sciences, C1, E.) *L. Martínez-Echazábal*

80B. Rhetoric and Inquiry: Cultural Identities and Global Consciousness. F

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Examines world poverty, imperialism, and nationalism; peoples' need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Incorporates outside research. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T3-Social Sciences, C2, E.) *L. Martínez-Echazábal*

80C. Merrill Seminar. S

Rsearch-based seminar on a topic of particular cultural, historical, or contemporary interest, open to all undergraduate students, taught by either a Merrill College Fellow

or other member of the UCSC faculty. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *The Staff*

80L. Merrill Core Visual Laboratory (2 credits). F

Visual laboratory designed to work in tandem with the Merrill Core Course to enhance learning for students with diverse skills and learning styles. Open to first-year Merrill students currently enrolled in course 80A, 80B, or 80X. Required of students in the Merrill Frosh Scholars Program. Concurrent enrollment in course 80A, 80B, or 80X is required. *L. Martínez-Echazábal*

80X. Introduction to University Discourse: Cultural Identities and Global Consciousness (Frosh Scholar). F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Examines world poverty, imperialism, and nationalism; people's need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Permission of instructor required; selection for this year-long scholars program based on application submitted prior to fall quarter. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T3-Social Sciences, C1, E.) *L. Martínez-Echazábal*

80Z. Merrill Scholars Seminar. S

Research-based, writing-intensive seminar focusing on the construction of persuasive arguments. Explores topics of cultural, historical, and/or political interest, taught by a Merrill College Fellow. Topic will change yearly. Enrollment restricted to Merrill Frosh Scholars program participants. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

85B. Merrill Classroom Connection Field Study (3 credits). F,W,S

Supervised hands-on experience assisting in local elementary classrooms. Students attend UCSC class meetings, complete relevant readings in educational theory, and present a final assignment. Attend first class meeting for instructor permission. May be repeated for credit. *L. Martínez-Echazábal*

85C. Merrill Classroom Connection Field Study (2 credits). F,W,S

Supervised hands-on experience assisting in local elementary school classrooms. Students also attend UCSC course meetings, complete relevant readings in educational theory, and present a final assignment. First-year Merrill College students are selected for this yearlong scholars program on the basis of an application submitted prior to fall quarter. Attend first class meeting for instructor permission. Enrollment limited to 22. May be repeated for credit. *L. Martínez-Echazábal*

93. Field Study. F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser and provost required. *The Staff*

93F. Field Study (2 credits). F,W,S

Provides for individual program of study sponsored by the college and performed off campus. Approval of instructor required. May be repeated for credit. *The Staff*

93G. Field Study (3 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Approval of instructor required. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

120. Personal Empowerment. W

Intensive course on individual goal-oriented behavior, commonly called problem solving. Focus on purpose, goals, meaning, emotions, languages, model-building, reality, thinking, logic, creativity, the steps of problem solving, common blocks, and techniques of unblocking. Meet with instructor prior to advance enrollment; priority given to upper-level students. Enrollment limited to 20. *F. Andrews*

150. Caribbean Migrations. F

Migration has been pivotal in the shaping of Caribbean history and political culture for centuries. Through literature, film and essay, course examines key issues concerning the politics of migration and the contingent construction of Caribbean diasporic communities in London and Toronto, but also considers issues concerning the Caribbean presence in New York. Enrollment restricted to juniors, seniors, and graduate students. Enrollment limited to 30. (General Education Code(s): E.) *C. James*

151. American Indians and the Vietnam War. W

Examines participation of American Indians in the Vietnam War. Explores the transition from civilian life to military life, the experience of combat, the homecoming, and the larger context of the war for Native people. Enrollment limited to 30. (General Education Code(s): E.) *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.) Students submit petition to sponsoring agency, supported by faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. May be repeated for credit. *The Staff*

193G. Field Study (3 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty member. *The Staff*

195. Senior Research Project. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. This may be a multiple-term course extending over two or three quarters; in this case the grade and evaluation submitted for the final quarter apply to all previous quarters. Petitions may be obtained at the Merrill College Office. Approval of student's adviser, certification of adequate preparation, and approval by the Merrill Provost required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. *The Staff*

Music

244 Music Center (831) 459-2292 music@ucsc.edu http://music.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the bachelor of music, which especially develops the student's attainment in performance, and the bachelor of arts, which cultivates greater breadth in the student's academic achievement. Three minors in music are also offered: one in Western art music, one in electronic music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

The music program provides courses for both general education and the music major/minor curriculum. Students from all disciplines are encouraged to enroll in music courses, including performance groups and private instruction.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer lab, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Instructional Media Center.

Letter Grade Requirement

For all students starting fall 2001 and later, all upper-division courses applied toward the music majors must be taken for a letter grade, except Music 120 and ensembles, which may be taken Pass/No Pass.

Requirements for the Bachelor of Arts

The course requirements for the B.A. in music include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D; either course 180A or 180B; another course selected from either 120, 124, 130, or the 180A or 180B course not already taken; and 197. Basic keyboard skills are required as a component of the music theory curriculum. Many students will need to take Music 60, Group Instruction in Piano, concurrently with the Music 30 sequence to achieve the appropriate level of skill. In addition, music majors are required to enroll in a minimum of six quarters of evaluated instrumental or choral ensembles, as well as a minimum of six quarters of evaluated individual instrumental or vocal lessons. It is strongly recommended that these ensembles and lessons be taken every quarter from the beginning of the core curriculum (course 30 sequence). Music majors in the B.A. program must successfully complete the proficiency audition (see below).

Although a foreign language is not required for completion of the B.A. in music, students planning graduate work are strongly advised to study a language pertinent to their research area at least equivalent to level 3 at UCSC or be able to pass the level 4 entrance examination.

Students are encouraged to prepare a senior project, which may take one of three forms: a full senior recital, a full senior thesis, or a partial recital with a related shorter thesis. To be considered for highest honors in the major, B.A. students must complete, on an excellent level, a senior project.

Music B.A. Sample Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the music major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major. Four-year plans may be found in the *Music Student Handbook*, available at the Music Department office or on the Music Department web site at http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

Students should check with the department office for the most up-to-date course schedules and program-planning advice since courses are not necessarily taught in the same quarters each academic year.

Plan One					
Year	Fall	Winter	Spring		
1st (frsh)	Mus 11A (recomm) Mus 30A/L lessons ensemble	Mus 30B/M lessons ensemble nay be required; see cour	Mus 30C/N lessons ensemble		
2nd	Mus 100A lessons ensemble	Mus 100B lessons ensemble	Mus 100C lessons ensemble		
Plan Two					
Year	Fall	Winter	Spring		
1st (frsh)	Mus 11A (recomm) Mus 30A/L lessons ensemble	Mus 13 (recomm) lessons ensemble	Mus 14 (recomm) lessons ensemble		
2nd	Mus 30A/L lessons ensemble (group piano, Mus 60, m	Mus 30B/M lessons ensemble nay be required; see cour	Mus 30C/N lessons ensemble rses 30A-B-C)		

General Examinations

All students majoring in the B.A. program are required to take the following examinations, which are discussed in greater detail in the $Music\ Student\ Handbook$.

Core Curriculum Placement Examination (a sample of the exam can be viewed at http://music.ucsc.edu/undergrad/). Students are tested in the areas of theory, music literature, and ear training. This exam (or a score of approximately 80 percent or higher on the final exam of Music 14) is a prerequisite to course 30A/L. Students should also take the exam to place out of course 13 or to place into course 14. The exam is given during fall quarter on the same day as the music orientation meeting. Transfer students who demonstrate acceptable competency on the placement examination may be recommended for advanced placement based on a further examination (including testing in keyboard and sight-singing skills).

Advisory audition. Students are required to take an advisory audition on their major instrument or in voice at the conclusion of course 30A/L.

Proficiency audition. Students are required to demonstrate at least an upper-intermediate level of proficiency on their major instrument or in voice before enrolling in course 100B.

Senior exit seminar. Students in the B.A. program are required to take the exit seminar (course 197), which encompasses material from all segments of the required curriculum.

Requirements for the Bachelor of Music

The bachelor of music degree (B.M.) is designed for those who intend to pursue a career in performance. Acceptance to the program is by audition during fall quarter. Junior transfer students entering in winter quarter may audition in the spring. These auditions are open to registered UCSC students only, although prospective students may submit a tape to the Music Department and ask to receive an informal opinion about their chances for acceptance into the major.

B.M. students major in an instrument or in voice. For the audition, students should prepare three pieces or movements of a contrasting nature from at least two different stylistic periods. (Two contrasting movements from the same sonata or concerto may count as two of the three required pieces.) Prospective students' optional tapes should also meet these specifications to receive an unofficial evaluation from the Music Department.

The requirements for the B.M. include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D, 180A or 180B, and 196B. In addition, students are required to enroll in a minimum of 12 quarters of evaluated instrumental or vocal ensembles, as well as a minimum of 11 quarters of evaluated instrumental or choral lessons. Transfer students must enroll in lessons and ensembles every quarter in residence. A senior recital (course 196B) is required in the final quarter. The music core-curriculum placement examination (see above), or passing course 14 with a final examination score of approximately 80 percent or higher, is a prerequisite to course 30A/L. Basic keyboard skills are required as a component of the music theory curriculum; some students will need to take course 60, Group Instruction in Piano, concurrently with the course 30 sequence to achieve the appropriate level of skill. B.M. students take a jury examination in their major instrument or in voice at least twice a year and perform one piece in the regular UCSC student recital series at least once a year. In addition to these requirements, voice majors are required to take French 1, German 1, and Italian 1. For students who wish to concentrate in jazz, the following changes for the B.M. requirements apply: students will take Music 111B instead of 180A or B; Music 174 (Jazz Improvisation) is required and may replace one quarter of ensembles; Music 175 (Jazz Theory) is required.

The B.M. program differs from the B.A. program in requiring more credits in performance and slightly fewer in theoretical disciplines. B.M. students are not required to take course 120, 124, or 130. The senior exit requirement for B.M. students is a senior recital. To receive highest honors, B.M. students must also complete, on an excellent level, the *Senior Exit Seminar* (Music 197).

B.M. Four-Year Sample Study Planner for Students Concentrating in an Instrument

Note: It is typical of B.M. programs at all institutions to spread general education requirements throughout a student's four years to allow for early specialization.

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

Plan One				
Year	Fall	Winter	Spring	
1st (frsh)	lessons (3) ensemble (2) gen ed/coll core (5) gen ed (5)	lessons (3) ensemble (2) gen ed (5) gen ed (5)	lessons (3) ensemble (2) Mus 14 (5) gen ed (5)	
2nd (soph)	lessons (3) ensemble (2) Mus 30A (5) Mus 30L (2) Mus 60 (2)* gen ed (5)	lessons (3) ensemble (2) Mus 30B (5) Mus 30M (2) Mus 60 (2)* gen ed (5)	lessons (3) ensemble (2) Mus 30C (5) Mus 30N (2) Mus 60 (2)* gen ed (5)	
3rd (jr)	lessons (3) ensemble (2) Mus 100A (5) 180A or B(5)	lessons (3) ensemble (2) Mus 100B (5) Mus 101A (5)	lessons (3) ensemble (2) Mus 100C (5) Mus 101B (5)	
2nd	lessons (3) ensemble (2) Mus 101C (5) gen ed (5)	lessons (3) ensemble (2) Mus 101D (5) gen ed/elective (5)	Mus 196B (5) ensemble (2) elective (2-5)	

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to the Music 30A-B-C sequence. (Current music majors frequently take 17–20 credits in this configuration of courses.)

Voice majors need to work closely with an adviser to schedule general education courses because of the added language requirements; a Summer Session may be necessary. It is recommended that voice majors take a language course each fall quarter during the first three years and that vocal repertory in that language be stressed throughout the academic year. For example, instead of enrolling in a general education course during the fall quarter of the first, sophomore, and junior years, a student concentrating in voice might enroll in Italian 1, German 1, and French 1, respectively.

Minors

Western Art Music

The minor in Western art music provides a focus for music activities and a background in both music history and theory. A student may earn a minor in music by completing the following courses:

- 11A;
- 30A/L-B/M-C/N;
- one of either 120, 130, 180A or 180B;
- one of 101A-B-C-D;
- and a combination of evaluated individual or group lessons and performing ensembles, or the three-course electronic music studio sequence (123, 124, 125), together totaling six quarters, three of which must be upper-division.

Of the examinations required for the B.A., only the core curriculum placement exam (or equivalent) is required for the minor in Western art music.

Electronic Music

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition. A student may obtain a minor in electronic music by completing the following:

- any course in the 11 series;
- course 13 (may be satisfied through the music core curriculum placement examination);
- course 14 (or course 30A/L placement);
- courses 80C, 123, 124, 125, and two quarters of 167;
- course 80L or 80R (or a similar music course that has a technical focus as approved by the department);
- Physics 80A or an introductory computer programming course such as Computer Science 60G, 60N, or 109.

Jazz

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited to students who have sufficient ability on their instruments to pass auditions for entry into the jazz ensembles. The required courses for the minor in jazz are the following:

- course 11A:
- course 14 (students not qualified to take course 14 must also take course 13 as a prerequisite);
- course 75 and 175;
- course 111B (students not qualified to take course 111B must also take course 11B; course 30B is also a prerequisite);
- course 11C, 11D, 80J, or 80Q;
- six quarters of ensembles, including at least three quarters of the jazz ensembles (courses 3 and/or 164). At least two quarters must be upper-division. All Music Department ensembles are 2-credit courses;
- course 174.

Detailed information about the music majors and minors may be obtained from the Music Department office.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including course work, senior project (thesis or recital), or *Senior Exit Seminar* (Music 197). Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a (non-required) senior project and B.M. students must complete the (non-required) *Senior Exit Seminar*. Honors in all three areas - coursework, senior project, and *Senior Exit Seminar* - normally results in highest honors in the major.

Transfer Students

The Music Department encourages transfer students to take the core curriculum placement examination and seek academic counseling before transfer (a sample of the exam can be viewed at http://music.ucsc.edu/undergrad/). Transfer students who have some background in music theory normally test either into course 14 or into 30A/L (which is only offered in the fall quarter). Students who test into course 13 or 14 take one or both of these courses in their first year to prepare for 30A/L the following fall. Transfer students who have completed all of their general education requirements and who test into course 30A/L upon transfer may be able to complete the music major in two years.

B.A. transfer students should note that upon completion of course 100A, they need to perform on a musical instrument or voice at an upper-intermediate level. Prospective students wishing to have their performance skill level assessed by faculty in preparation for entry to the program may send a tape for faculty review.

B.M. transfer students should prepare to audition in the fall quarter after enrollment. (For audition requirements, see the Requirements for the Bachelor of Music section above.) In certain cases, some or all of the applied music requirement may be waived based on prior course work.

B.M. Sample Study Planner for Transfer Students Concentrating in an Instrument

This plan assumes that all general education requirements have been met. The music core curriculum placement examination generally places junior transfer students in Music 30A/L (which is only offered during fall quarter).

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

Plan One				
Year	Fall	Winter	Spring	
3rd (jr)	lessons (3) ensemble (2) Mus 30A (5) Mus 30L (2) Mus 60 (2)*	lessons (3) ensemble (2) Mus 30B (5) Mus 30M (2) Mus 60 (2)* Mus 101A (5)	lessons (3) ensemble (2) Mus 30C (5) Mus 30N (2) Mus 60 (2)* Mus 101B (5)	
2nd	lessons (3) ensemble (2) Mus 100A (5) Mus 101C (5)	lessons (3) ensemble (2) Mus 100B (5) Mus 101D (5)	Mus 196B (5) ensemble (2) Mus 100C (5) Mus 180A or B (5)	

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to the Music 30A-B-C sequence. (Current music majors frequently take 17–20 credits in this configuration of courses.)

A transfer student concentrating in voice could enroll in Italian 1 and German 1 in the fall and winter quarters, respectively, of the junior year, and in French 1 in the spring quarter of the senior year. Such a transfer student would complete any desired electives prior to arrival at UCSC and/or in Summer Session. However, transfer students should try to satisfy as many of the language requirements as possible before entering the program.

Individual Instruction

Lessons in the instruments listed below are available on a fee basis and by audition with the instructor. Concurrent enrollment in an ensemble on the same instrument (or voice) is required. Depending on whether a student is pursuing a particular music undergraduate degree program (B.A. or B.M.), or a music minor, concurrent enrollment in an appropriate ensemble is required for a stipulated number of quarters. Consult the *Undergraduate Music Student Handbook* for details.

Courses 61, 62, and 161 carry partial course credit. Each quarter of enrollment in course 61 is equivalent to 2 credits; each quarter of enrollment in course 62 or 161 is equivalent to 3 credits. Course 162, open to advanced students only, carries 5 credits.

Class instruction for partial credit (courses 60 and 63) is available on some instruments but may not be used to fulfill the individual lesson requirements for the major.

Bass: B. Green, S. Poplin

Bassoon: J. Orzel Cello: K. Andrie

Clarinet: M. Brandenburg

Class Piano: M. Ezerova, E. Arulanantham

Cornetto: W. Mathews
Flute: G. Ellison Wolfson

Guitar, classical: W. Coulter, M. Özgen

Harpsichord: L. Burman-Hall

Horn: S. Vollmer **Oboe**: P. Mitchell

Percussion: G. Marsh, W. Winant

Piano, classical: M. J. Cope, M. Ezerova, A. Leikin

Saxophone: P. Contos

Trombone and tuba: W. Solomon

Trumpet: O. Miyoshi

Violin and viola: R. Malan

Voice: P. Maginnis, B. Staufenbiel

Performance Groups

The participants in some groups are selected by auditions open to the entire university community. Students receive two course credits for each quarter of enrollment in any of the ensembles.

University Orchestra: N. Paiement
University Concert Choir: Staff

Women's Chorale: Staff

Chamber Singers: N. Paiement

University Opera Theater: B. Staufenbiel

Opera Workshop: P. Maginnis, B. Staufenbiel

Early Music Consort: L. Burman-Hall, L. Miller, N. Treadwell

Chamber Music: Staff

Large Jazz Ensemble: R. Klevan
Small Jazz Ensembles: S. Poplin

Latin American Ensembles: D. Nieves
Contemporary Music Ensemble: A. Beal
West Javanese Gamelan: U. Sumarna

Balinese Gamelan: L. Burman-Hall

Wind Ensemble: R. Klevan

Classical Guitar Ensemble: Mesut Özgen

North Indian Music Workshop: D. Neuman

Graduate Programs

Master of Arts

The Master of Arts degree program in music has emphases in composition, ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that typically combines an original composition or written thesis with a related public performance.

Requirements

Required courses include course 200, Introduction to Research Methods; course 201, Pretonal and Tonal Analysis; course 202, Tonal and Posttonal Analysis; and course 252, Current Issues Colloquium, during each quarter of residence. Students who have an emphasis in ethnomusicology or performance practice also select three courses from the 203 series of

seminars in performance practices of Euro-American music (Middle Ages, Renaissance, Baroque, Classical, Romantic and 20th-century periods) and of traditional musics of Asia and Latin America. Course 206D, *Music Perception and Cognition*, meets the requirement for one of these seminars. Students who have an emphasis in composition must complete course 219, *Techniques in Composition*; 220, *Graduate Seminar in Music Composition*, and one course from the 203 series. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determine by the Music Graduate Committee.

The final requirements for the degree are a thesis comprising a substantive and original creative or scholarly work (course 299, *Thesis Research*) and a related public performance (course 298, *Graduate Recital*).

Doctorate of Musical Arts

The Doctorate of Musical Arts (D.M.A.) degree program in Music Composition has tracks in computer-assisted composition and world music composition. The track in computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. The track in world music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in course work at UCSC will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of twelve credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of two five-credit courses each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in course work at UCSC will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of twelve credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of two five-credit courses each quarter.

Core Courses

Music 200, 201, and 202 are required of all M.A. and D.M.A. students. (Students entering the D.M.A. with a master's degree from another institution may be exempted from one or more of these three course requirements by submitting work that demonstrates the relevant skills.) Enrollment in Music 252 in each quarter of residency is also required. Music 206A and 203H are required of all students in the world music composition track. Music 206B is required of all students in the computer assisted composition track. One additional focus course selected from the Music 203 or 206 series, and one elective (which may also be an offering of Music 206, or Music 223) are also required. The remainder of the course requirements are specifically in the field of composition. Music 219 introduces the discipline to first-year graduate students. Music 220 gives the students greater leeway in which to develop their individual styles and techniques. Independent study courses in composition are taken in preparation for the completion of the Qualifying Recital (which is required of students entering with a bachelor's degree) and in preparation for the dissertation (a minimum of five quarters enrollment is course 299, *Thesis Research*, is required).

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determine by the Music Graduate Committee.

Pre-qualifying Reviews

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess their progress in the program. Typically, the half recital is satisfied by a combination of (1) participation in a concert of graduate-student compositions sponsored each April by Porter College and the Music Department, and (2) participation in a public reading of graduate-student final projects from course 220 at the end of spring quarter.

The Qualifying Recital

All students admitted to the D.M.A. program must present a full recital of their work at the end of their second year of study. The D.M.A. Qualifying Recital will be evaluated by the student's primary adviser and by a second "Reader" (generally a second composer on the UCSC faculty) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted by the beginning of spring term one year before the scheduled Qualifying Examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's Qualifying Examination Committee those areas of study that should be emphasized in the student's Qualifying Examination.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and year one or two for students entering with a master's degree from another institution. For the written portion of the examination, the Qualifying Examination Committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's Qualifying Examination Committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy is granted upon notice that the student has passed the written and oral examinations.

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition, accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Final Examination

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the Dissertation Committee.

Doctor of Philosophy in Music

The Doctor of Philosophy (Ph.D.) degree in Music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing how musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to world musics, the new program also encourages the integration of scholarly research with musical performance, emphasizing how performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performances is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of compositionand performance.

Degree Requirements

Students must be in residence for a minimum of six quarters, and take at least two five-unit courses per quarter, plus the two-unit Current Issues Colloquium (Music 252) each quarter in residence (for a total of 72 units of coursework without dissertation).

Students entering the Ph.D. program with a bachelor's degree are required to complete the following courses:

Music 200 Introduction to Research Methods Music 201 Pre-tonal and Tonal Analysis Music 202 Tonal and Post-tonal Analysis Three courses selected from Music 253 Three courses selected from Music 254

Three courses selected from the following:

Music 203A-H Special Topics in Performance Practice Music 206D Music Perception and Cognition

Music 299 Thesis Research

Students entering the Ph.D. program with a master's degree are required to complete a series of six courses, which are currently being developed in the areas of Interdisciplinary and Cross-Cultural Approaches to Musical Systems, and Special Topics in Musicology and Ethnomusicology. the courses listed above with the exception of courses 200, 201, and 202. (Please check the online UCSC General Catalog 2007-08 for updates.)

Students entering the Ph.D. program are expected to have reading knowledge of a foreign language equivalent to at least one year of coursework. In addition, students are required to acquire reading knowledge, equivalent to one year of coursework, of a second foreign language relevant to their area of interest during their first year of enrollment, or to demonstrate equivalent knowledge as determined by the Music Graduate Committee.

In addition, students are required to complete Music 299, *Thesis Research*, and other courses in music, or courses from other departments on campus, suited to their special areas of concentration.

Pre-qualifying reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student's adviser. However, if progress is minimal, faculty reserve the right to terminate a student's enrollment in the program.

Qualifying Examinations

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying exam will be administered at the conclusion of the student's second year in residence and will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter they take their qualifying examination.

The written exam will test the student's knowledge of an array of contextual topics related to her/his dissertation area.

Advancement to candidacy will be granted upon notice of having passed the oral and written examinations, acceptance of the Dissertation Reading Committee form, and satisfactory completion of coursework and foreign language requirements.

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Final Examination

The final examination will be an oral defense of the dissertation open to the university faculty. Successful completion of this exam will be determined by a majority vote of the Dissertation Reading Committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department web site: http://music.ucsc.edu/.

Music

244 Music Center (831) 459-2292 music@ucsc.edu http://music.ucsc.edu

Program Description | Faculty | Course Descriptions

Program Description

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the bachelor of music, which especially develops the student's attainment in performance, and the bachelor of arts, which cultivates greater breadth in the student's academic achievement. Three minors in music are also offered: one in Western art music, one in electronic music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

The music program provides courses for both general education and the music major/minor curriculum. Students from all disciplines are encouraged to enroll in music courses, including performance groups and private instruction.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer lab, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Instructional Media Center.

Letter Grade Requirement

For all students starting fall 2001 and later, all upper-division courses applied toward the music majors must be taken for a letter grade, except Music 120 and ensembles, which may be taken Pass/No Pass.

Requirements for the Bachelor of Arts

The course requirements for the B.A. in music include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D; either course 180A or 180B; another course selected from either 120, 124, 130, or the 180A or 180B course not already taken; and 197. Basic keyboard skills are required as a component of the music theory curriculum. Many students will need to take Music 60, Group Instruction in Piano, concurrently with the Music 30 sequence to achieve the appropriate level of skill. In addition, music majors are required to enroll in a minimum of six quarters of evaluated instrumental or choral ensembles, as well as a minimum of six quarters of evaluated individual instrumental or vocal lessons. It is strongly recommended that these ensembles and

lessons be taken every quarter from the beginning of the core curriculum (course 30 sequence). Music majors in the B.A. program must successfully complete the proficiency audition (see below).

Although a foreign language is not required for completion of the B.A. in music, students planning graduate work are strongly advised to study a language pertinent to their research area at least equivalent to level 3 at UCSC or be able to pass the level 4 entrance examination.

Students are encouraged to prepare a senior project, which may take one of three forms: a full senior recital, a full senior thesis, or a partial recital with a related shorter thesis. To be considered for highest honors in the major, B.A. students must complete, on an excellent level, a senior project.

Music B.A. Sample Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the music major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major. Four-year plans may be found in the Music Student Handbook, available at the Music Department office or on the Music Department web site at http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

Students should check with the department office for the most up-to-date course schedules and program-planning advice since courses are not necessarily taught in the same quarters each academic year.

Plan One				
Year	Fall	Winter	Spring	
1st	Mus 11A (recomm)	Mus 30B/M	Mus 30C/N	
(frsh)	Mus 30A/L	lessons	lessons	
	lessons ensemble	ensemble	ensemble	
	(group piano, Mus 60, may be required; see courses 30A-B-C)			
2nd	Mus 100A	Mus 100B	Mus 100C	
	lessons	lessons	lessons	
	ensemble	ensemble	ensemble	
Plan Tw	0			
Year	Fall	Winter	Spring

	lessons	lessons	lessons	
	ensemble	ensemble	ensemble	
	(group piano, Mus 60, may be required; see courses 30A-B-C)			

General Examinations

All students majoring in the B.A. program are required to take the following examinations, which are discussed in greater detail in the *Music Student Handbook*.

Core Curriculum Placement Examination (a sample of the exam can be viewed at http://music.ucsc.edu/undergrad/). Students are tested in the areas of theory, music literature, and ear training. This exam (or a score of approximately 80 percent or higher on the final exam of Music 14) is a prerequisite to course 30A/L. Students should also take the exam to place out of course 13 or to place into course 14. The exam is given during fall quarter on the same day as the music orientation meeting. Transfer students who demonstrate acceptable competency on the placement examination may be recommended for advanced placement based on a further examination (including testing in keyboard and sight-singing skills).

Advisory audition. Students are required to take an advisory audition on their major instrument or in voice at the conclusion of course 30A/L.

Proficiency audition. Students are required to demonstrate at least an upper-intermediate level of proficiency on their major instrument or in voice before enrolling in course 100B.

Senior exit seminar. Students in the B.A. program are required to take the exit seminar (course 197), which encompasses material from all segments of the required curriculum.

Requirements for the Bachelor of Music

The bachelor of music degree (B.M.) is designed for those who intend to pursue a career in performance. Acceptance to the program is by audition during fall quarter. Junior transfer students entering in winter quarter may audition in the spring. These auditions are open to registered UCSC students only, although prospective students may submit a tape to the Music Department and ask to receive an informal opinion about their chances for acceptance into the major.

B.M. students major in an instrument or in voice. For the audition, students should prepare three pieces or movements of a contrasting nature from at least two different stylistic periods. (Two contrasting movements from the same sonata or concerto may count as two of the three required pieces.) Prospective students' optional tapes should also meet these specifications to receive an unofficial evaluation from the Music Department.

The requirements for the B.M. include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D, and 180A or 180B, and 196B. In addition, students are required to enroll in a minimum of 12 quarters of evaluated instrumental or vocal ensembles, as well as a minimum of 11 quarters of evaluated instrumental or choral lessons. Transfer students must enroll in lessons and ensembles every quarter in residence. A senior recital (course 196B) is required in the final quarter. The music core-curriculum placement examination (see above), or passing course 14 with a final examination score of approximately 80 percent or higher, is a prerequisite to course 30A/L. Basic keyboard skills are required as a component of the music theory curriculum; some students will need to take course 60, Group Instruction in Piano, concurrently with the course 30 sequence to achieve the appropriate level of skill. B.M. students take a jury examination in their major instrument or in voice at least twice a year and perform one piece in the regular UCSC student recital series at least once a year. In addition to these requirements, voice majors are required to take French 1, German 1, and Italian 1. For students who wish to concentrate in jazz, the following changes for the B.M. requirements apply: students will take Music 111B instead of 180A or B; Music 174 (Jazz Improvisation) is required and may replace one quarter of ensembles;

Music 175 () is required.

The B.M. program differs from the B.A. program in requiring more credits in performance and slightly fewer in theoretical disciplines. B.M. students are not required to take course 120, 124, or 130. The senior exit requirement for B.M. students is a senior recital. To receive highest honors, B.M. students must also complete, on an excellent level, the *Senior Exit Seminar* (Music 197).

B.M. Four-Year Sample Study Planner for Students Concentrating in an Instrument

Note: It is typical of B.M. programs at all institutions to spread general education requirements throughout a student's four years to allow for early specialization.

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

Plan One				
Year	Fall	Winter	Spring	
1st (frsh)	lessons (3) ensemble (2)	lessons (3) ensemble (2)	lessons (3) ensemble (2)	
	gen ed/coll core (5) gen ed (5)	gen ed (5) gen ed (5)	Mus 14 (5) gen ed (5)	
2nd (soph)	lessons (3) ensemble (2) Mus 30A (5) Mus 30L (2) Mus 60 (2)* gen ed (5)	lessons (3) ensemble (2) Mus 30B (5) Mus 30M (2) Mus 60 (2)* gen ed (5)	lessons (3) ensemble (2) Mus 30C (5) Mus 30N (2) Mus 60 (2)* gen ed (5)	
3rd (jr)	lessons (3) ensemble (2) Mus 100A (5) 180A or B(5)	lessons (3) ensemble (2) Mus 100B (5) Mus 101A (5)	lessons (3) ensemble (2) Mus 100C (5) Mus 101B (5)	
2nd	lessons (3) ensemble (2) Mus 101C (5) gen ed (5)	lessons (3) ensemble (2) Mus 101D (5) gen ed/elective (5)	Mus 196B (5) ensemble (2) elective (2–5)	

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to the Music 30A-B-C sequence. (Current music majors frequently take 17–20 credits in this configuration of courses.)

Voice majors need to work closely with an adviser to schedule general education courses because of the added language requirements; a Summer Session may be necessary. It is recommended that voice majors take a language course each fall quarter during the first three years and that vocal repertory in that language be stressed throughout the academic year. For example, instead of enrolling in a general education course during the fall quarter of the first, sophomore, and junior years, a student concentrating in voice might enroll in Italian 1, German 1, and French 1, respectively.

Western Art Music

The minor in Western art music provides a focus for music activities and a background in both music history and theory. A student may earn a minor in music by completing the following courses:

- 11A:
- 30A/L-B/M-C/N;
- one of either 120, 130, 180A or 180B;
- one of 101A-B-C-D;
- and a combination of evaluated individual or group lessons and performing ensembles, or the three-course electronic music studio sequence (123, 124, 125), together totaling six quarters, three of which must be upper-division.

Of the examinations required for the B.A., only the core curriculum placement exam (or equivalent) is required for the minor in Western art music.

Electronic Music

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition. A student may obtain a minor in electronic music by completing the following:

- any course in the 11 series;
- course 13 (may be satisfied through the music core curriculum placement examination);
- course 14 (or course 30A/L placement);
- courses 80C, 123, 124, 125, and two quarters of 167;
- course 80L or 80R (or a similar music course that has a technical focus as approved by the department);
- Physics 80A or an introductory computer programming course such as Computer Science 60G, 60N, or 109.

Jazz

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited to students who have sufficient ability on their instruments to pass auditions for entry into the jazz ensembles. The required courses for the minor in jazz are the following:

- course 11A;
- course 14 (students not qualified to take course 14 must also take course 13 as a prerequisite);
- course 75 and 175;
- course 111B (students not qualified to take course 111B must also take course 11B; course 30B is also a prerequisite);
- course 11C, 11D, 80J, or 80Q;
- six quarters of ensembles, including at least three quarters of the jazz ensembles (courses 3 and/or 164). At least two quarters must be upper-division. All Music Department ensembles are 2-credit courses;

• course 174.

Detailed information about the music majors and minors may be obtained from the Music Department office.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including course work, senior project (thesis or recital), or *Senior Exit Seminar* (Music 197). Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a (non-required) senior project and B.M. students must complete the (non-required) Senior Exit Seminar. Honors in all three areas - coursework, senior project, and Senior Exit Seminar - normally results in highest honors in the major.

Transfer Students

The Music Department encourages transfer students to take the core curriculum placement examination and seek academic counseling before transfer (a sample of the exam can be viewed at http://music.ucsc.edu/undergrad/). Transfer students who have some background in music theory normally test either into course 14 or into 30A/L (which is only offered in the fall quarter). Students who test into course 13 or 14 take one or both of these courses in their first year to prepare for 30A/L the following fall. Transfer students who have completed all of their general education requirements and who test into course 30A/L upon transfer may be able to complete the music major in two years.

B.A. transfer students should note that upon completion of course 100A, they need to perform on a musical instrument or voice at an upper-intermediate level. Prospective students wishing to have their performance skill level assessed by faculty in preparation for entry to the program may send a tape for faculty review.

B.M. transfer students should prepare to audition in the fall quarter after enrollment. (For audition requirements, see the Requirements for the <u>Bachelor of Music section above</u>.) In certain cases, some or all of the applied music requirement may be waived based on prior course work.

B.M. Sample Study Planner for Transfer Students Concentrating in an Instrument

This plan assumes that all general education requirements have been met. The music core curriculum placement examination generally places junior transfer students in Music 30A/L (which is only offered during fall quarter).

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

Plan One					
Year	Fall	Winter	Spring		
3rd	lessons (3)	lessons (3)	lessons (3)		
(jr)	ensemble (2)	ensemble (2)	ensemble (2)		
	Mus 30A (5)	Mus 30B (5)	Mus 30C (5)		

	Mus 30L (2) Mus 60 (2)*	Mus 30M (2) Mus 60 (2)* Mus 101A (5)	Mus 30N (2) Mus 60 (2)* Mus 101B (5)
2nd	lessons (3)	lessons (3)	Mus 196B (5)
	ensemble (2)	ensemble (2)	ensemble (2)
	Mus 100A (5)	Mus 100B (5)	Mus 100C (5)
	Mus 101C (5)	Mus 101D (5)	Mus 180A or B (5)

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to the Music 30A-B-C sequence. (Current music majors frequently take 17–20 credits in this configuration of courses.)

A transfer student concentrating in voice could enroll in Italian 1 and German 1 in the fall and winter quarters, respectively, of the junior year, and in French 1 in the spring quarter of the senior year. Such a transfer student would complete any desired electives prior to arrival at UCSC and/or in Summer Session. However, transfer students should try to satisfy as many of the language requirements as possible before entering the program.

Individual Instruction

Lessons in the instruments listed below are available on a fee basis and by audition with the instructor. Concurrent enrollment in an ensemble on the same instrument (or voice) is required. Depending on whether a student is pursuing a particular music undergraduate degree program (B.A. or B.M.), or a music minor, concurrent enrollment in an appropriate ensemble is required for a stipulated number of quarters. Consult the <u>Undergraduate Music Student Handbook</u> for details.

Courses 61, 62, and 161 carry partial course credit. Each quarter of enrollment in course 61 is equivalent to 2 credits; each quarter of enrollment in course 62 or 161 is equivalent to 3 credits. Course 162, open to advanced students only, carries 5 credits.

Class instruction for partial credit (courses 60 and 63) is available on some instruments but may not be used to fulfill the individual lesson requirements for the major.

Bass: B. Green, S. Poplin

Bassoon: J. Orzel

Cello: K. Andrie

Clarinet: M. Brandenburg

Class Piano : E. Arulanantham

Cornetto: W. Mathews

Flute: G. Ellison Wolfson

Guitar, classical: W. Coulter, M. Özgen

Harpsichord: L. Burman-Hall

Horn: S. Vollmer

Oboe: P. Mitchell

Percussion: G. Marsh, W. Winant

Piano, classical: M. J. Cope, M. Ezerova, A. Leikin

Saxophone: P. Contos

Trombone and tuba: W. Solomon

Trumpet: O. Miyoshi

Violin and viola: R. Malan

Voice: P. Maginnis, B. Staufenbiel

Performance Groups

The participants in some groups are selected by auditions open to the entire university community. Students receive two course credits for each quarter of enrollment in any of the ensembles.

University Orchestra: N. Paiement

University Concert Choir: Staff

Women's Chorale: Staff

Chamber Singers: N. Paiement

University Opera Theater: B. Staufenbiel

Opera Workshop: P. Maginnis, B. Staufenbiel

Early Music Consort: L. Burman-Hall, L. Miller, N. Treadwell

Chamber Music: Staff

Large Jazz Ensemble: R. Klevan

Small Jazz Ensembles: S. Poplin

Latin American Ensembles: D. Nieves

Contemporary Music Ensemble: A. Beal

West Javanese Gamelan: U. Sumarna

Balinese Gamelan: L. Burman-Hall

Wind Ensemble: R. Klevan

Classical Guitar Ensemble: Mesut Özgen

North Indian Music Workshop: D. Neuman

Graduate Programs

Master's Degree Master of Arts

The Master of Arts degree program in music has emphases in composition, ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that typically combines an original composition or written thesis with a related public performance.

Requirements

Required courses include course 200, Introduction to Research Methods; course 201, Pretonal and Tonal Analysis; course 202, Tonal and Posttonal Analysis; and course 252, Current Issues Colloquium, during each quarter of residence. Students who have an emphasis in ethnomusicology or performance practice also select three courses from the 203 series of seminars in performance practices of Euro-American music (Middle Ages, Renaissance, Baroque, Classical, Romantic and 20th-century periods) and of traditional musics of Asia and Latin America. Course 206D, Music Perception and Cognition, meets the requirement for one of these seminars. Students who have an emphasis in composition must complete course 219A and 219B, Techniques in Composition; 220, Graduate Seminar in Music Composition, and one course from the 203 series. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign language requirement.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determine by the Music Graduate Committee.

The final requirements for the degree are a thesis comprising a substantive and original creative or scholarly work (course 299, *Thesis Research*) and a related public performance (course 298, *Graduate Recital*).

Doctorate of Musical Arts

The Doctorate of Musical Arts (D.M.A.) degree program in Music Composition has tracks in computer-assisted composition and world music composition. The track in computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. The track in world music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural

influences, media, venues, and technical means available to them in the 21st century.

Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in course work at UCSC will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of twelve credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of two five-credit courses each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in course work at UCSC will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of twelve credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of two five-credit courses each quarter.

Core Courses

Music 200, 201, and 202 are required of all M.A. and D.M.A. students. (Students entering the D.M.A. with a master's degree from another institution may be exempted from one or more of these three course requirements by submitting work that demonstrates the relevant skills.) Enrollment in Music 252 in each quarter of residency is also required of all M.A. and D.M.A. students. Music 206A and 203H are required of all students in the world music composition track. Music 206B is required of all students in the computer assisted composition track. One additional focus course selected from the Music 203 or 206 series, and one elective (which may also be an offering of Music 206, or Music 223) are also required. The remainder of the course requirements for the D.M.A. are specifically in the field of composition. Music 219 introduces the discipline to first-year graduate students. Music 220 gives the students greater leeway in which to develop their individual styles and techniques. Independent study courses in composition are taken in preparation for the completion of the Qualifying Recital (which is required of students entering with a bachelor's degree) and in preparation for the dissertation (a minimum of five quarters enrollment is course 299, Thesis Research, is required).

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determine by the Music Graduate Committee.

Pre-qualifying Reviews

Before the end of the first year of study, all students accepted into the D.M.A. program must present a half-concert of the music they have composed that year and submit the scores and a recording of the concert as a portfolio. This portfolio will inform the music faculty's evaluation of the students' status in the graduate program. M.A. students at UCSC who were not admitted to the D.M.A. program at the time of their original application may apply (or reapply) for the D.M.A. program at the completion of their first year of study. The student's portfolio of first-year compositions will be central to the faculty's consideration of the student's application. If the application is accepted, the student will continue into the second year of the D.M.A. program.

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess their progress in the program. Typically, the half recital is satisfied by a combination of (1) participation in a concert of graduate-student compositions sponsored each

April by Porter College and the Music Department, and (2) participation in a public reading of graduate-student final projects from course 220 at the end of spring quarter.

The Qualifying Recital

All students admitted to the D.M.A. program must present a full recital of their work at the end of their second year of study. The D.M.A. Qualifying Recital will be evaluated by the student's primary adviser and by a second "Reader" (generally a second composer on the UCSC faculty) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted by the beginning of spring term one year before the scheduled Qualifying Examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's Qualifying Examination Committee those areas of study that should be emphasized in the student's Qualifying Examination.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and year one or two for students entering with a master's degree from another institution. For the written portion of the examination, the Qualifying Examination Committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's Qualifying Examination Committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy is granted upon notice that the student has passed the written and oral examinations.

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition, accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Final Examination

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the Dissertation Committee.

Doctor of Philosophy in Music

The Doctor of Philosophy (Ph.D.) degree in Music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing how musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to world musics, the new program also encourages the integration of scholarly research with musical performance, emphasizing how performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performances is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of compositional and performance traditions.

Degree Requirements

Students must be in residence for a minimum of six quarters, and take at least two five-unit courses per quarter, plus the two-unit Current Issues Colloquium (Music 252) each quarter in residence (for a total of 72 units of coursework without dissertation).

Students entering the Ph.D. program with a bachelor's degree are required to complete the following courses:

Music 200 Introduction to Research Methods Music 201 Pre-tonal and Tonal Analysis Music 202 Tonal and Post-tonal Analysis Three courses selected from Music 250 253 Three courses selected from Music 251 254

Three courses selected from the following:

Music 203A-H Special Topics in Performance Practice Music 206D Music Perception and Cognition

Music 299 Thesis Research

Students entering the Ph.D. program with a master's degree are required to complete a series of six courses, which are currently being developed in the areas of Interdisciplinary and Cross-Cultural Approaches to Musical Systems, and Special Topics in Musicology and Ethnomusicology. the courses listed above with the exception of courses 200, 201, and 202. (Please check the online UCSC General Catalog 2007-08 for updates.)

Students entering the Ph.D. program are expected to have reading knowledge of a foreign language equivalent to at least one year of coursework. In addition, students are required to acquire reading knowledge, equivalent to one year of coursework, of a second foreign language relevant to their area of interest during their first year of enrollment, or to demonstrate equivalent knowledge as determined by the Music Graduate Committee.

In addition, students are required to complete Music 299, *Thesis Research*, and at least 30 additional course units selected from other graduate courses in music, or courses from other departments on campus, suited to their special areas of concentration.

Pre-qualifying reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. In most cases, Faculty will simply offer comments and suggestions to be communicated to the student either directly or through the student's adviser. However, if progress is minimal, faculty reserve the right to terminate a student's enrollment in the program.

Qualifying Examinations

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying exam will be administered at the conclusion of the student's second year in residence and will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter they take their qualifying examination.

The written exam will test the student's knowledge of an array of contextual topics related to her/his dissertation area.

Advancement to candidacy will be granted upon notice of having passed the oral and written examinations, acceptance of the Dissertation Reading Committee form, and satisfactory completion of coursework and foreign language requirements.

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Final Examination

The final examination will be an oral defense of the dissertation open to the university faculty. Successful completion of this exam will be determined by a majority vote of the Dissertation Reading Committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department web site: http://music.ucsc.edu/.

Music

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Linda C. Burman-Hall

Baroque music and performance practices; historic keyboard repertoire (harpsichord, organ, and fortepiano); Indonesian music cultures; ethnomusicology

David H. Cope, Emeritus

Sherwood Dudley, Emeritus

Edward F. Houghton, Emeritus

David Evan Jones

Composition and analysis, chamber opera, Balkan music, language and music, timbre and orchestration

Anatole Leikin

Classical and romantic music history, theory, and performance practices, piano and fortepiano, Russian music

Fredric Lieberman

Ethnomusicology; composition; the music industry and legal/ethical issues; American vernacular musics; musics of east, Southeast, and south Asia

Leta E. Miller

Twentieth-century American music, modern and baroque flute, 16th-century chanson and madrigal, music and science, 18th- and 20th-century flute literature and performance styles, music of C.P.E. Bach and Lou Harrison

Gordon Mumma, Emeritus

Paul Nauert

Theory, composition; rhythm and meter; music cognition; mathematical and computer models of the compositional process

Nicole A. Paiement

Conducting; world premiere performance and recordings; contemporary chamber opera; interdisciplinary art; Founder and Artistic Director, Ensemble Parallèle

John M. Schechter

Cultural musicology; Ibero-American musics of South America; Quechua music culture; American Indian music and thought; music theory; music and ritual; music and discourse; transculturative music-making; Stravinsky; Founder, UCSC Latin American Ensembles (dir. 1986-2000)

Associate Professor

Amy C. Beal

American music, 20th-century music, experimental and improvisatory performance practices, postwar and Cold War culture, German new music festivals and radio stations, piano performance, contemporary music ensemble

Karlton E. Hester

Premeditated, electroacoustic, and spontaneous composition; flutes, saxophones, and interdisciplinary performance; improvisational and Afrocentric music theory, analysis and history

Hi Kyung Kim

Composition, 20th-century music, tonal and Schenkerian analysis, orchestration, Korean traditional music

Assistant Professor

Benjamin L. Carson

Theories of consciousness and cognition, rhythm perception, Schoenberg, history of compositional method, subjectivity and identity

Tanya H. Merchant

Ethnomusicology, musics of Central Asia and the former Soviet Union, music and gender, Baroque music, nationalism, globalization, and the institutionalization of music

Dard Neuman, Kamil and Talat Hasan Endowed Chair in Classical Indian Music Ethnomusicology; Hindustani music; colonialism, nationalism, technology and performance; sitar

Nina Treadwell

Renaissance through early baroque music history and performance practices, early plucked-string instruments (theorbo, renaissance, and baroque guitar; renaissance lute), 16th- and 17th-century Italian theatrical music, gender studies, women and music, literary and critical theory

Lecturer

Karen L. Andrie

Cello

Erika Arulanantham

Group piano, musicianship

Gerald J. Bassermann

Electronic music

Mark Brandenburg

Clarinet

Paul D. Contos

Saxophone

Mary Jane Cope

Piano, fortepiano

William D. Coulter

Classical guitar

Peter Q. Elsea

Electronic music and music technology

Maria V. Ezerova

Piano, musicianship

Barry L. Green

String bass

Robert Klevan

Wind ensemble, large jazz ensemble

Patrice L. Maginnis

Voice

Roy T. Malan

Violin, viola

George E. Marsh

Percussion: trap set

Patricia L. Mitchell

Oboe

Owen M. Miyoshi

Trumpet

Diana I. Nieves

Latin American ensembles

Jane A. Orzel

Bassoon

Mesut Özgen

Classical guitar, classical guitar ensemble

Stan E. Poplin

String bass, jazz ensembles

John T. Sackett

Music theory

Wayne J. Solomon

Trombone

Brian J. Staufenbiel

Voice, university opera theater

Undang Sumarna

West Javanese gamelan

Susan C. Vollmer

Horn

William K. Winant

Orchestral percussion, percussion ensemble

Greer Ellison Wolfson

Flute

Professor

William G. Mathews, Professor, Astronomy and Astrophysics Galaxies, high-energy astrophysics, gaseous nebulae; cornetto (music)

Distinguished Adjunct Professor

Ali Akbar Khan

North Indian classical music

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1A. Women's Chorale (2 credits). *

Study of vocal and choral techniques in the context of ensemble rehearsals, often culminating in public performance. Repertoire to include varied works for treble choir, both a cappella and with instrumental accompaniment. Familiarity with basic music notation recommended. Some additional rehearsal time, both individually and with the group is required. Students are billed a materials fee. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

1C. University Concert Choir (2 credits). F,W,S

A study of selected works for mixed chorus, with emphasis on masterworks for chorus and orchestra, culminating in one or more public concerts. Familiarity with basic music notation recommended. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *The Staff*

2. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

3. Large Jazz Ensemble (2 credits). F,W,S

Instruction in performance in large jazz ensembles with written arrangements. Prepares a specific repertory for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *R. Klevan*

4A. Latin American Ensemble: "Voces" (2 credits). F,W

Instruction in diverse musical traditions, and their culturally-grounded performance contexts, of Native American, Ibero-American, and African American music cultures of Latin America, including texted music in Spanish and Quechua or other regional languages. The class forms an ensemble that prepares varying cultural and national repertoires for public performance. Some Spanish language ability is recommended. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 25. May be repeated for credit. (General

4B. Latin American Ensemble: "Taki Ñan" (2 credits). F,W

Development of Latin American, Native American, Ibero-American, African American, and/or *Nueva Canción* (New Song) repertoire in a small ensemble setting. Three quarters of course 4A or previous enrollment in course 4B required prior to enrolling in this course. Admission by audition with instructor at first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 10. May be repeated for credit. (General Education Code(s): A.) *D. Nieves-Miranda*

5A. West Javanese Gamelan Ensemble: Beginning (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5B. West Javanese Gamelan Ensemble: Intermediate (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5C. West Javanese Gamelan Ensemble: Advanced (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

6. Classical Guitar Ensemble (2 credits). F,W

Study of selected repertoire and instruction in performance for classical guitar ensemble. Ensembles for guitar and other instruments will prepare works for public performances both on and off campus. All students enrolled in individual guitar lessons are expected to enroll. Students of other instruments or voice may also audition. Some additional rehearsal time, individually and with the group, is required. Admission by audition with instructor prior to first class meeting. May be repeated for credit. (General Education Code(s): A.) *M. Özgen*

8. Balinese Gamelan Ensemble (2 credits). W,S

Instruction in practice and performance of gamelan music from Bali and Indonesia, including ritual and new music. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *L. Burman-Hall*

9. Wind Ensemble (2 credits). F,W,S

A study of selected advanced-level works for wind ensemble, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *R. Klevan*

11A. Introduction to Western Art Music. F,W

A study of selected masterworks in relation to the periods which they represent. Emphasis upon the listening experience and awareness of musical style and structure. Illustrated lectures and directed listening. (General Education Code(s): IH, A.) A. Leikin, L. Miller, N. Treadwell

11B. Introduction to Jazz. W

Designed to provide students with thorough and comprehensive background in history and roots of jazz as a musical style from its African roots to the present. Essential jazz styles and traditions are discussed through lectures, required listening, readings, lecture demonstrations, and film presentations. (General Education Code(s): IH, A, E.) *K. Hester*

11C. Introduction to American Popular Music. *

Survey of American popular music, from the beginnings of mass media to the late-twentieth century and beyond. Areas of focus will include early African-American styles (the blues, gospel and ragtime), vaudeville songs, a variety of immigrant traditions and folk movements, rock and roll, soul, R & B, hip-hop, and others. Musical experience helpful but not required. (General Education Code(s): IH, A.) *B. Carson, F. Lieberman*

11D. Introduction to World Music. S

Covers topics reflecting distinctive features of selected world music cultures. Introduces content, scope, and method of ethnomusicology. Focuses on understanding the musical styles, performance practices, and cultural functions of these musical traditions. Incorporates live class performance of selected music. (General Education Code(s): IH, A, E.) *J. Schechter*

13. Beginning Theory and Musicianship I. F,W

Fundamentals of music and notation. Major, minor scales, intervals, triads, and inversions, root-position 7th chords, and the beginning harmonic analysis. Emphasis on the development of the ear and coordination. Exercises of pulse, rhythm, pitch, and coordination. Dictation and sight singing. Enrollment restricted to first-year students and sophomores; juniors and seniors admitted by permission of instructor. Enrollment limited to 60. *H. Kim, J. Sackett*

14. Beginning Theory and Musicianship II. W,S

Continuation of course 13. Triads and 7th chords and their inversions. Introduces Church modes, melodic and harmonic analysis, four-part harmony, and keyboard harmony. Sight-singing, ear training, and dictation. Knowledge of musical notation and scales required. Students who wish to take this course and have not taken course 13 or the placement exam should consult the instructor. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority to first-year students, sophomores, and juniors. Prerequisite(s): course 13 or music core curriculum placement exam. Enrollment limited to 25. *L. Burman-Hall, H. Kim, J. Sackett*

30A. Theory, Literature, and Musicianship I. F

Integrated musicianship, theory, and analysis. Species counterpoint and fundamentals of tonal harmony. Analysis of literature from the Middle Ages and Renaissance. Eartraining, taught in smaller sections, emphasizes recognition of triad and dominant-seventh inversions, dictation of diatonic melodies, and aural analysis of simple diatonic interval and chord progressions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30L required. Prerequisite: admission by core curriculum placement examination or by passing course 14 with a final examination score of approximately 80 percent or higher. Enrollment limited to 60. A. Leikin, P.

30B. Theory, Literature, and Musicianship I. W

Intergrated musicianship, theory, and analysis. Diatonic harmony and fundamentals of chromatic harmony and musical form, with an emphasis on early 18th-century styles. Ear-training, taught in smaller sections, emphasizes recognition of triad and seventh-chord qualities and inversions, dictation of moderately complex melodies and multi-voice chorales, and aural analysis of chord progressions including secondary functions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30M required. Prerequisite(s): course 30A; instructor determination at first class meeting. Enrollment limited to 60. A. Leikin, P. Nauert

30C. Theory, Literature, and Musicianship I. S

Integrated musicianship, theory, and analysis. Chromatic harmony and large forms, with emphasis on late 18th- and early 19th-century styles. Ear-training, taught in smaller sections, emphasizes melodic and multi-voice dictation, as well as aural analysis of chord progressions, with materials including digressions, modulations, and advanced chromatic idioms. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30N required. Prerequisite(s): course 30B; instructor determination at first class meeting. Enrollment limited to 60. A. Leikin, P. Nauert

30L. Theory, Literature, and Musicianship I Laboratory (2 credits). F

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, intervals, chords, rhythm) laboratory sequence illustrating topics covered in course 30A. Two 1-hour laboratory sessions per week. Concurrent enrollment in course 30A required; concurrent enrollment in course 60 also required for students without adequate prior keyboard training. Enrollment limited to 6. *The Staff*

30M. Theory, Literature, and Musicianship I Laboratory (2 credits). W

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, single chords and progressions, rhythm) laboratory sequence illustrating topics covered in course 30B. Two 1-hour laboratory sessions per week. Prerequisite(s): course 30L; instructor determination at first meeting of course 30B. Concurrent enrollment in course 30B required; concurrent enrollment in course 60 also required for students without adequate prior keyboard training. Enrollment limited to 6. *The Staff*

30N. Theory, Literature, and Musicianship I Laboratory (2 credits). S

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, atonal melody, rhythm) laboratory sequence illustrating topics covered in course 30C. Two 1-hour laboratory sessions per week. Prerequisite(s): course 30M; instructor determination at first meeting of course 30C. Concurrent enrollment in course 30C required; concurrent enrollment in course 60 also required for students without adequate prior keyboard training. Enrollment limited to 6. *The Staff*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) Students submit petition to sponsoring agency. *The Staff*

51. Vocal Repertoire Class (2 credits). F,W,S

The study and performance of vocal repertoire from 1400 to the present, including solo song, oratorio, opera, ensemble music. Emphasis is given to the development of effective performance skills, culminating in public performance. Attend first class meeting; concurrent enrollment in individual voice lessons with instructor of this course is required. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *P. Maginnis, B. Staufenbiel*

54. North Indian Music Workshop (2 credits). F,W,S

A course covering the music of North India taught using the oral traditions of Indian music. For beginners as well as more experienced students, this course is well suited for instrumentalists and vocalists. Interview; instructor determination at first class meeting. May be repeated for credit. (General Education Code(s): A.) *D. Neuman*

60. Group Instruction in Piano (2 credits). F,W,S

Elementary instruction in piano technique, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Curriculum is coordinated with keyboard requirements of courses 30A-B-C. Concurrent enrollment in courses 30A-B-C is required. Students are billed a course fee. Prerequisite(s): Instructor determination at first class meeting. Enrollment limited to 8. May be repeated for credit. *E. Arulanantham*

61. Individual Lessons: Half Hour (2 credits). F,W,S

One-half hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

62. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

63. Group Instrumental and Vocal Lessons (2 credits). F,W,S

Elementary group instruction in instrumental (excluding piano) or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 6. May be repeated for credit. *The Staff*

74. Beginning Jazz Improvisation. *

Introduction to the basics of jazz improvisation, including theory, harmony, rhythm, improvisation techniques, aesthetics and idiomatic devices. Exposure to jazz repertoire through in-class performances of swing, blues, modal and Latin styles. Admission by audition with instructor at first class meeting. Enrollment limited to 20. May be repeated for credit. *K. Hester*

75. Jazz Theory I. W

Studies in the modes, scales, chord alternations and extensions, chord voicings, chord progressions, and forms that underlie jazz improvisation, composition, and arranging in a variety of styles. Prerequisite(s): course 14. Enrollment limited to 30. (General Education Code(s): A.) *K. Hester*

80C. History, Literature, and Technology of Electronic Music. F

This survey of electronic music from previous centuries to the present studies the works and aesthetics of important composers, acoustics, musical perception, the effects of technological innovation on cultural evolution, and the development of synthesizers and computer music. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *G. Bassermann*

80F. Music in Latin American Culture: Regional Traditions. W

In-depth study of select music cultures of Mexico, Central America, and Caribbean, Brazil, Chile, Argentina, Colombia, and Peru. Characteristic regional genres, ensembles, instruments, and music rituals. Case studies by ethnomusicologists with expertise in specific regional musics. Also Latin American Nueva Canción, women's musics, and overarching themes in Latin American music, as a whole. Offered on a rotational basis with other non-Western courses in the 80 series. (General Education Code(s): T4-Humanities and Arts, A, E.) *J. Schechter*

80G. American Musical Theater. W

Surveys American musicals from operetta through rock musicals with a historical approach focusing on selected examples from the literature. Music reading or musical experience helpful but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80H. The Hollywood Musical. F

Introductory study of the Hollywood music film, exploring the theory of film sound, the musical genre, and representative works from the 1920s to the present. Students expected to view about two films each week, read assigned section of texts, and contribute to class discussions. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80I. Music of Modern Israel. W

Historical, musicological, and anthropological study of the many (and often conflicting) worlds brought together by Israeli popular and art music: Jewish and Arabic traditions, Western ideals, and modern beats. Enrollment limited to 40. (General Education Code(s): T4-Humanities and Arts, A, E.) *The Staff*

80J. American Folk Music. *

Surveys American folk music, both instrumental and vocal, by region and period. Approach is primarily through listening. Previous musical experience helpful, but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80K. American Indian Music and Thought. *

Hemispheric first peoples music and thought: American Indian history, culture and music areas, song genres, view of the Sacred and relationship to the land, scholarship overview, musical thought, powwow complex, instruments, short literature, books by Young Bear and Alexie, music-ritual, and selected modern American Indian performers/ensembles. (Formerly *Music in American Indian Life and Thought.*)

Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A, E.) *J. Schechter*

80L. Artificial Intelligence and Music. *

An introduction to basic concepts in music and artificial intelligence, and to algorithmic composition (composition by a set of explicit instructions, often using the computer). Other topics include basic introductions to related concepts in linguistics, mathematics, neural nets, pattern matching, genetic algorithms, fuzzy logic, and interactive systems. Previous experience in one or more of these topics is helpful but not required. Students produce a project based on one of the models presented in class. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *D. Cope*

80M. Film Music. *

A survey of film music by the major film composers. Includes study of film scores by, among others, Alfred Newman, Max Steiner, Bernard Herrmann, Toru Takemitsu, and Ennio Morricone, as well as a discussion of current trends and film composers. Discussion of the contribution of composers such as Aaron Copland, Serge Prokofiev, and Leonard Bernstein. Techniques and styles of film music are explored through lectures, required listenings, readings, and viewing of relevant films. A musical background, including the ability to read music, is helpful but not necessary. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *D. Cope*

800. Music, Politics, and Protest. S

Examination of relationship between music, politics, and protest in the U.S. in the 20th century, with focus on how music commented upon and reflected different eras in American cultural and political life. (General Education Code(s): T4-Humanities and Arts, A.) *D. Neuman*

80P. History of Jewish Music. F

Survey of the diverse and rich musical traditions of Jewish music in the diaspora from biblical times to the present. Examines the historical, social, and anthropological aspects of the different communities from sacred music through art and popular songs. Enrollment limited to 40. (General Education Code(s): T4-Humanities and Arts, A, E.) *A. Tchamni*

80O. A Survey of African Music. S

Traces the various stylistic musical areas throughout the African continent and explores the development of traditional African music from antiquity into the 20th century. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A, E.) *K. Hester*

80R. Music and the World Wide Web. W

A survey of musical applications of the World Wide Web and the technologies they employ: tools for musical research, playback, composition, performance, and publishing. Historical perspectives and artistic ethics also discussed. Students prepare a creative project using software tools, techniques, sound sources available on the web, and learn how to publish the results on the web. Enrollment limited to 44. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *G. Bassermann*

80S. Women in Music. F

An exploration of the sociological position of women as composers and performers

in Western music history with a focus on specific figures from the Middle Ages to present. (Also offered as Feminist Studies 80S. Students cannot receive credit for both courses.) Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *T. H. Merchant, L. Miller*

80T. Mizrach: Jewish Music in the Lands of Islam. *

A survey of the musical traditions of the Jews of North Africa and the Middle East. Based on the "Maqamat," the Arabic musical modes, Jewish music flouished under Islamic rule, encompassing the fields of sacred, popular, and art music. (General Education Code(s): T4-Humanities and Arts, A, E.) *A. Tchamni*

80V. The Music of the Beatles. S

The most significant group in the history of popular music, the Beatles spanned the gamut of styles from hard-edged R & B to sophisticated art-rock. This course explores their work in detail, in its own terms, and in the historical/cultural/technological contexts. Students cannot receive credit for both this course and course 180V in the same quarter. Course 11C is recommended but not required as preparation. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80X. Music of India. F

A survey course in Hindustani (North Indian) and Karnatak (South Indian) music covering the Raga (modal system) and Tala (metric system) as they have developed in the two traditions. Consideration is given to the historical development of the music, from Vedic chanting to the modern Raga system; social functions of the music throughout history; and instrumental and vocal forms with an emphasis on listening. (General Education Code(s): T4-Humanities and Arts, A, E.) *D. Neuman*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Admission requires approval of department. *The Staff*

99. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

100A. Theory, Literature, and Musicianship II. F

Tonal counterpoint and advanced tonal analysis. Techniques of 18th-century counterpoint and compositional practice. Advanced concepts in harmony, form, and the structure of melody in tonal music. Prerequisite(s): courses 30C and 30N and Piano Proficiency Exam. Enrollment limited to 20. *B. Carson, D. Cope, P. Nauert*

100B. Theory, Literature, and Musicianship II. W

Harmony and form in 19th- and early 20th-century music. Further techniques for the analysis of advanced tonal, chromatic, and post-tonal harmony. Study of larger forms, chromaticism, principles of development, and style elements unique to late

romanticism and early modernism. Prerequisite(s): course 100A. Enrollment limited to 20. B. Carson, D. Cope, P. Nauert

100C. Theory, Literature, and Musicianship II. S

Theories and practices of 20th-century music. Survey of compositional principles in 20th-century music, with an emphasis on departures from tradition. Techniques of post-tonal, dodecaphonic, and serial composition; survey of post-war movements in composition and improvisation. Prerequisite(s): course 100B. Enrollment limited to 20. B. Carson, D. Cope, P. Nauert

101A. History of Western Art Music. W

First quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Antiquity, Middle Ages, Renaissance. Prerequisite(s): course 30A. *L. Miller, N. Treadwell*

101B. History of Western Art Music. S

Second quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Baroque. Prerequisite(s): course 30B. *L. Burman-Hall, L. Miller, N. Treadwell*

101C. History of Western Art Music. F

Third quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Classical and Romantic. Prerequisite(s): course 30C. A. Beal, A. Leikin

101D. History of Western Art Music. W

Fourth quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: twentieth century. Prerequisite(s): course 30C. A. Beal, D. Jones, P. Nauert

102. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment restricted to juniors and seniors. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

103. University Concert Choir (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Prerequisite(s): admission by audition with conductor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *The Staff*

111B. Seminar in Jazz Analysis. W

Analytic exploration of the evolution of "jazz" in America. The process involves independent listening, analysis, transcription, weekly seminar discussions, and oral presentation to students in course 11B. Prerequisite(s): course 30B and course 11B. Enrollment limited to 20. *K. Hester*

120. Seminar in Music Composition. W

Instruction in individual composition offered in the context of a group; composition in traditional large and small forms. Prerequisite(s): course 30C. Enrollment limited to 20. D. Cope, D. Jones, H. Kim, P. Nauert

123. Electronic Sound Synthesis. W

Introduction to electronic music studio techniques, relevant electroacoustical studies, and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with an analog synthesizer; mixing, equalization, multitrack recording equipment, and other sound processing. Application form available at department office during last two weeks of the previous quarter. Preference given to music majors, students in the film/video major, and those with substantial musical experience. Prerequisite(s): instructor determination via application; course 80C; course 14 or course 30A placement. Enrollment limited to 25. *P. Elsea*

124. Intermediate Electronic Sound Synthesis. S

Composition with the use of small computers in the electronic music studio. Techniques covered include hybrid synthesis, digital synthesis, and MIDI-controlled systems. No programming is involved, but basic computer literacy is helpful. Prerequisite(s): course 123. Enrollment limited to 25. *G. Bassermann, P. Elsea*

125. Advanced Electronic Sound Synthesis. F

Continuing study in the electronic music studio, with concentration on compositional development. Includes advanced applications of skills developed in courses 123 and 124, expansion of background knowledge and relevant electroacoustical studies. Prerequisite(s): course 124. Enrollment limited to 25. *P. Elsea*

130. Orchestration. F

A study of the nature of each instrument of the orchestra. Scoring for various small instrumental combinations, culminating in a transcription for full orchestra. Prerequisite(s): course 30C. Enrollment limited to 20. *D. Cope, H. Kim*

159A. Opera Workshop (2 credits). F,W

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

159B. Opera Workshop (3 credits). F,W

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

160. University Opera Theater. S

A production workshop, culminating in one or more staged performances of an entire opera or selected scenes from the operatic repertory. Admission by audition with instructor prior to first class meeting; auditions usually take place in fall quarter.

See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

161. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

162. Advanced Individual Lessons: One Hour. F,W,S

One hour of individual instruction for advanced students. Study of repertory, technique, and performance practice. A minimum of 18 hours per week of individual practice and at least one 30-minute recital are required. May be taken three times for credit. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by juried audition. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

163. Early Music Consort (2 credits). F,W

A study of selected works for varied early music instrumental and vocal resources, culminating in one or more public concerts. Individual lessons are recommended in conjunction with consort work. Recommended for students who have instrumental or vocal competence and music literacy. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *L. Burman-Hall, L. Miller, N. Treadwell*

164. Jazz Ensembles (2 credits). F,W,S

Instruction in combo performance and techniques of the jazz idiom. The class forms several ensembles that prepare a specific repertory for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *S. Poplin*

165. Chamber Music Workshop (2 credits). F,W,S

A study of selected works for various small combinations of instruments, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

166. Chamber Singers (2 credits). F,W,S

The study of selected works for small vocal ensemble from the fifteenth through twentieth centuries, with performances on and off campus throughout the academic year. Students must have demonstrated vocal and music reading skills. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

167. Workshop in Electronic Music (2 credits). F,W,S

Continuing studio work in electronic music. Students carry out individual projects, meeting in weekly seminar to share problems and discoveries. Relevant advanced

topics are covered, including new developments in the art. Prerequisite(s): course 124. Enrollment limited to 20. May be repeated for credit. *P. Elsea*

168. Contemporary Music Ensemble (2 credits). F,W

A study of selected works for various small combinations of instruments and voice, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *A. Beal, H. Kim, L. Miller*

174. Intermediate Jazz Improvisation. S

Develops basic skills through a range of advanced bop, quasi-modal and post-bebop styles—including selected free jazz and "avante-garde" repertoire. Prerequisite(s): course 74; audition with instructor at first class meeting. Enrollment limited to 20. May be repeated for credit. *K. Hester*

175. Jazz Theory II. S

Through transcription, analysis, and performance of "jazz" standards, composition, arranging, improvisation, and spontaneous creation explored. Students write a series of improvisations, short compositions, and arrangements throughout the course. Prerequisite(s): courses 75, 100A, and 100B. Enrollment limited to 30. *K. Hester*

180A. Studies in World Musics: Asia and the Pacific. *

In-depth ethnomusicological studies of selected music cultures of East Asia, Southeast Asia, and the Pacific. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B. Concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *L. Burman-Hall, F. Lieberman*

180B. Studies in World Musics: Africa and the Americas. S

In-depth ethnomusicological studies of selected music cultures of sub-Saharan Africa and South and North America, including Native America. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B; concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *J. Schechter*

180V. Seminar in the Music of the Beatles. S

Detailed study of the Beatles' music. While course 80V introduces the Beatles to general students, this course is designed for music majors, music minors, students able to read music, or non-majors with strong knowledge of the Beatles' repertory. Interview only; instructor determination at or before first class meeting. Prerequisite(s): course 11C or equivalent experience; basic knowledge of Beatles repertory. Students cannot receive credit for both this course and course 80V in the same quarter. Enrollment limited to 30. *F. Lieberman*

190. Seminar in Music Education. *

Designed to provide a coherent and integrated approach to classroom music teaching.

Students have part-time responsibility for public elementary or secondary school classes under the supervision of the instructor. Weekly seminars cover the practical application of music knowledge to young people in a systematic and comprehensive manner. (Formerly course 204.) Enrollment restricted to junior and senior music majors. Enrollment limited to 6. *R. Klevan*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing and a proposal supported by a music faculty member willing to supervise required. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

196A. Senior Recital Preparation (without individual lessons). F,W,S

Prerequisite(s): juried audition or approved composition portfolio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196B. Senior Recital Preparation (with individual lessons). F,W,S

Students are billed a course fee. Prerequisite(s): juried audition. May be repeated for credit. *The Staff*

197. Senior Exit Seminar (2 credits). S

Designed for music majors in their final quarter. Focuses on music in social context while seeking to integrate knowledge from previous music courses in preparation of a series of analytical projects. A. Beal, A. Leikin, L. Miller

199. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200. Introduction to Research Methods. F

Practical introduction to graduate study in music focusing on research methods, music sources and bibliography, techniques of scholarly writing, and critical readings in the discipline. Culminates in a public oral presentation on the model of a professional conference paper. A. Beal, L. Miller, N. Treadwell

201. Pretonal and Tonal Analysis. *

Study and analysis of pre-tonal and tonal music from the Greeks through the 18th century. Course combines a history of theory with analyses that utilize

contemporaneous theoretical concepts. Enrollment restricted to graduate students. Offered in alternate academic years. *L. Miller*

202. Tonal and Posttonal Analysis. W

Encompasses various forms of linear analysis, set theory, and selected topics in current analytical practice. Offered in alternate academic years. *B. Carson, D. Cope, D. Jones, H. Kim, P. Nauert*

203. Special Topics in Performance Practice.

Investigation of primary and secondary sources of information about the culturally and historically accurate performance of music in various times and places. Undergraduates who have completed the appropriate course 101 courses may enroll in 203 courses by interview with the instructor.

203A. Performance Practice in the Middle Ages. *

A study of performance practices in medieval music from Gregorian chant to the 14th century. History of instruments and notation. Rhythmic interpretations of chant and a study of improvised practices in organum. Editing and performance of representative works. Offered on a rotational basis with other courses in the 203 series. *L. Miller*

203B. Performance Practice in the Renaissance. *

A study of performance practices in Renaissance music, including concepts of mode, musica ficta, ornamentation, text underlay, tempo, and articulation. Basic principles of white notation and a brief history of instruments. Transcription, editing, and performance of a Renaissance work. Offered on a rotational basis with other courses in the 203 series. *L. Miller, N. Treadwell*

203C. Performance Practice in the Baroque. F

An examination of historically informed performance practice techniques in Baroque music, with attention to aspects of ornamentation, articulation, figured bass realization, dance choreography, rhythm and tempo, and organology. In-class performances and editing of source materials are included. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall, L. Miller*

203D. Performance Practice in the Classic Period. *

Issues in performance practice focusing on selected topics and styles from the time of C.P.E. Bach through Haydn. Development of selected genres and ensembles, sources and editing, and interpretation and improvisation. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall*

203E. Performance Practice in the Romantic Period. *

Interpretation of music from Beethoven to Scriabin through examinations of both the musical texts (form, genre, harmony, texture, orchestration, etc.) and the period performance practices. Topics range from interpretative analyses of selected compositions to critical assessments of modern as well as documented 19th- and early 20th-century performances. Offered on a rotational basis with other courses in the 203 series. *A. Leikin*

203F. Performance Practice in the 20th Century. S

Projects in analysis, notational studies, extended instrumental techniques, and the aesthetics and performance practices associated with composers from Debussy to the present. Reading and listening focuses on the writings and performances of the composers themselves and upon interpretive writings by informed performers of 20th-century music. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *A. Beal, B. Carson, D. Cope, D. Jones*

203G. Concepts, Issues, and the Practice of Ethnomusicology. * Ethnomusicological field methodology; vocal and instrumental performance practices as related to the ethnomusicological endeavor. Specific topics: philosophical paradigms, historical overview, and definitional issues of ethnomusicology; field research concepts and procedures; studies in instrumental and vocal performance practices of diverse cultures; selected writings of Charles Seeger; transcription and analysis issues; studies in micromusics. Offered on a rotational basis with other courses in the 203 series. *J. Schechter*

203H. Area Studies in Performance Practice. W

Intensive examination of the vocal and instrumental performance practices of living musical traditions of Indonesia, Latin America, or other regions. Topics may incorporate soloistic and ensemble traditions, secular and sacred traditions. Research rubrics include tuning, tone quality, performance posture and rhetoric, and improvisational and fixed patterns, as dictated by regional norms. May be repeated for credit in a different area. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *L. Burman-Hall, H. Kim, D. Neuman*, *J. Schechter*

206A. World Music Composition. *

Studies in the history, structure, and cultural function of music from cultures as diverse as Global African, central European, Korean, Latin American, Indonesian, and Indian traditions. Examines ways in which composers such as Bartok, Anthony Braxton, Chou Wen-Chung, Lou Harrison, and Takemitsu sought and integrated such influences. Students choose to write critical and analytic essays on musics exhibiting diverse cultural influences, or to compose music that takes a vernacular or non-European music as a model for a compositional/improvisational approach. Enrollment restricted to graduate students. Enrollment limited to 12. *K. Hester, D. Jones, H. Kim*

206B. Computer-Assisted Composition. S

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies. *D. Cope*

206D. Music Perception and Cognition. *

Investigations in the psychology of musical listening and awareness. Topics include time and rhythm perception, auditory scene analysis, pattern recognition, and theories of linguistics applied to harmony, melody, and form in the music of diverse cultures. Explores applications of the cognitive sciences to music transcription, analysis, composition, interpretation, and performance practice. Students apply

existing knowledge in the cognitive sciences to a developing creative or analytical project, or develop and conduct new experiments. Enrollment restricted to graduate students. Enrollment limited to 16. May be repeated for credit. *B. Carson*

219. Techniques in Composition. F

Short compositional exercises incorporating diverse contemporary techniques with emphasis on problem-solving and development of compositional skills. Exercises focus on particular strategies for organizing and coordinating aspects of pitch, rhythm, timbre, and other musical dimensions, depending on interests of instructor and students. (Formerly course 219A.) Enrollment restricted to graduate students. May be repeated for credit with a different instructor. *H. Kim, P. Nauert*

220. Graduate Seminar in Music Composition. S

Instruction in individual composition offered in the context of a group; composition in large forms of the 20th century with emphasis on techniques since 1950. May be taken by upper-division undergraduates for credit. Interview with instructor at first class meeting. Prerequisite(s): course 219. Enrollment limited to 16. May be repeated for credit. *D. Cope, D. Jones, H. Kim, P. Nauert*

223. Electronic Sound Synthesis. W

Graduate-level techniques and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with computer composition systems and software, multi-track recording equipment, and interactive performance systems. Prerequisite(s): permission of instructor; appropriate undergraduate experience; students with no previous electroacoustic experience may be asked to attend lectures for course 123. Enrollment restricted to graduate students. Upper-division undergraduates may enroll with permission of instructor. (Also offered as Digital Arts and New Media 223. Students cannot receive credit for both courses.) Enrollment limited to 12. May be repeated for credit. *P. Elsea*

228. Techniques of Modernity and Aesthetic Formations. F

Explores the transformations and aesthetic possibilities of the digital age through a study of perceptual shifts of the past, from orality to literacy, gift to commodity, precolonial to colonial, "pre-modern" to "modern," and the technological revolutions that accompanied these shifts. (Also offered as Digital Arts and New Media 228. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 18. *D. Neuman*

252. Current Issues Colloquium (2 credits). F,W,S

An interactive colloquium featuring presentations by faculty, graduate students, and visiting scholars on research projects in composition, musicology / ethnomusicology, and performance practice, followed by focused discussion. Enrollment restricted to graduate students. Undergraduate students may enroll with permission of instructor. May be repeated for credit. *L. Burman-Hall*

253C. Music and Discourse. F

Addresses both song and musical performance as modes of discourse. For song: musical and textual phrase and verse structures and their interrelationships. For musical performances: musical performance as rhetoric and emblem. Enrollment restricted to graduate students. Enrollment limited to 5. *J. Schechter*

254C. Performance Theory and Practice. W

"Performance" can describe activities in the arts, humanities, and social sciences.

Recognizing the mappings of this concept, this course examines selected performances and performative behavior through theoretical and critical lenses. Emphasis is on investigating the act and practice of musical performance in multicultural context, and on analyzing scholarly writing as performative discourse. Enrollment restricted to graduate students. Enrollment limited to 10. *N. Treadwell*

254E. Asian Resonances in 20th-Century American and European Music. F Explores the influence of Asian musics on Western composers from Debussy to Britten to American experimentalists such as Harrison, Cage, Riley, and Rudyard. Questions of cultural appropriation and originality are addressed through specific examples and critical readings. Enrollment restricted to graduate students. Enrollment limited to 10. *L. Miller*

254I. Empirical Approaches to Art Information. *

Reading and practice in empirical methods, as applied to the study of music, visual art, multimedia production, and performance arts. Topics include semiotics, critiques of empiricism, cultural determinants and contingents of perception, the psychophysics of information, sensory perception (visual and auditory), memory, pattern recognition, and awareness. Students apply existing knowledge in the cognitive sciences to a developing creative project, or develop and conduct new experiments. (Formerly course 251I.) (Also offered as Digital Arts and New Media 254I. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 17. May be repeated for credit. *B. Carson*

261. Graduate Applied Instruction (3 credits). F,W,S

One hour of individual instrumental or vocal instruction for graduate students. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

265. Graduate Ensemble Participation (2 credits). F,W,S

Participation by graduate students in ensembles. Enrollment limit appropriate to the size of each ensemble. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated once for credit. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study, creative work, or research for graduate students who have not yet begun work on their thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

298. Graduate Recital. F,W,S

A public performance in the student's primary area of interest, related to the thesis or dissertation project, under the supervision of a faculty member. Students submit petition to sponsoring agency. *The Staff*

299. Thesis Research. F,W,S

A thesis consisting of a substantive and original creative or scholarly work, related to

the graduate recital, under the supervision of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Program Description | Faculty

Lower-Division Courses

10. Academic Success (2 credits). F

Provides opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources explored. Enrollment by permission of college adviser. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division Oakes students under faculty supervision. (See course 192.) *The Staff*

60. Oakes Literary Journal: Further Reflections on a Diverse Society (2 credits). W

For publication in an Oakes College literary journal, students significantly refine an essay from the fall quarter Oakes College core course. Course work includes consideration of a substantive text that engages core course themes and promotes the focus of the essay. Prerequisite(s): course 80A or 80B. Enrollment restricted to first-year students. Enrollment limited to 20. May be repeated for credit. *M. Baker, R. King*

70. Diverse Voices in Contemporary American Women's Poetry. S

Examines the work of contemporary American women poets representing a range of socioeconomic, sexual, cultural, and ideological identities. Discussion focuses on analysis and interpretation of poems. Produce a portfolio of creative response work and analytical essays. Enrollment restricted to first-year students and sophomores. Enrollment limited to 20. *L. Knisely*

75. Oakes Student Development and Leadership Theory (2 credits). S

Overview of theories, methods, applications, skills, and special topics focusing on college student development and leadership. Uses a variety of learning modes including lecture, discussion, case studies, small group interaction, and presentations. Interview only: see Oakes coordinator for residential education during spring enrollment period. Enrollment restricted to Oakes College members. Enrollment limited to 30. May be repeated for credit. *The Staff*

77. Exploring Opportunities for Social Justice Fieldwork (3 credits). W,S

Designed to promote social justice and diversity through community service experiences. Students are required to complete a 25-hour service project to be determined by individual course plans. Students will engage in/reflect upon social justice through community service, readings, and discussions. Prerequisite: Oakes 80 College Core Course. Enrollment limited to 20. *P. Castillo, W. Heinrich*

80A. Introduction to University Discourse: Values and Change in a Diverse Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1, E.) *P. Castillo*

80B. Rhetoric and Inquiry: Values and Change in a Diverse Society. F

Explores intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2, E.) *P. Castillo*

80H. Rainbow Theater Cultural Studies. S

Introduction to multicultural theater and multicultural plays that aims to bring cultural awareness to all students interested in theater discipline. Students are required to read and critically analyze contemporary plays of color with emphasis on race and culture in contemporary American society. Enrollment limited to 40. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

93. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by lower-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. May be repeated for credit. *The Staff*

94F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. *The Staff*

95. Directed Reading. F.W.S

Directed reading on selected topics in literature. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Individual study for lower-division students directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

112. Re/Presenting Identity. W

Examines culturally relevant texts that describe identity formation and representation

in contemporary America. Investigates the work of authors who represent a wide range of cultural, racial, sexual, socioeconomic, and gender identities. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior college members. Enrollment limited to 20. (General Education Code(s): W.) *L. Knisely*

175. Imagining the Filipino Diaspora. S

Examines the relationship between gender, sexuality, and the nation in Filipino American and Philippine cultural production, including performance, film, and the Internet. Contextualizes Filipino American/Philippine cultural production within a broader framework of the Filipino diaspora. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Oakes; a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. If taking two or more such courses in any one quarter, must obtain approval of academic adviser. *The Staff*

195. Senior Thesis. F,W,S

Senior thesis related to college-sponsored individual majors. Students submit petition to sponsoring agency. Sponsoring faculty must be member of individual major committee. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

College-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, and approval by provost. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study for junior and senior members of Oakes College directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Ocean Sciences

A312 Earth and Marine Sciences Building (831) 459-4730

http://oceansci.ucsc.edu/

Faculty | Course Descriptions

(There were no substantive changes to the Ocean Sciences Program Description from the General Catalog 2006-08.)

Program Description

The Ocean Sciences Department includes faculty and students involved in oceanography and other marine sciences and sponsors undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute, the Naval Postgraduate School, Stanford University's Hopkins Marine Station, CSU Moss Landing Laboratory, and others. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; plus sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, and many more.

Ocean sciences affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from polar regions to the tropics.

Undergraduate Programs

Although offering a range of undergraduate courses, the Ocean Sciences Department presently offers only graduate degrees. The undergraduate major in marine biology, sponsored by the Biological Sciences Departments, includes required and elective courses in ocean sciences; and there is an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent course work may apply directly for admission to the graduate program through the Division of Graduate Studies.

Graduate Programs

The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in Ocean Sciences (master's or Ph.D.) should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical

science), or an equivalent background. If a student does not have a degree in one of these areas, the student must show their sponsor that they have taken the classes necessary to do their research. This preparation should normally include courses (prerequisites) in calculus, statistics, physics, chemistry, general biology or ecology, and geology for all majors (see below for the number of courses).

- 1 year of a calculus series
- 1 year of chemistry with labs
- 1 year of physics with labs
- 1 course in earth sciences or geologic principles
- 1 course in biology
- 1 course in statistics or biostatistics for all majors

Ocean Sciences Ph.D. Degree Program

The program leading to a doctorate in ocean sciences is designed with a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines (biology, chemistry, Earth sciences, and physics) as chosen by the student and her or his advisers. The core training is provided through core courses in ocean sciences; a subset of which is taken by all students in the first two years and reinforced by the student's seminars throughout the program. In addition to core courses in ocean sciences, preparation includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent research credits, participation in departmental student seminar series, and a minimum requirement of two quarters as a teaching assistant. There is no formal language requirement.

The results of a scheduling meeting in the first quarter of enrollment are used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student; and courses are drawn from ocean sciences and other science departments (e.g., biology, chemistry, earth sciences, physics). No later than fall quarter of their second year, students must take a departmental oral exam that tests knowledge of ocean sciences and general expertise in their parent discipline. An oral and a written qualifying examination are required, generally in the second or third year of graduate study. A dissertation based on original research is required, and the final examination is a public oral defense of the dissertation. Students are encouraged to prepare their dissertation, or certain chapters of it, in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

· Biological Oceanography

This area involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in the focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms. The focus is mainly on small oceanic life-forms (plankton and bacteria, molecular ecology) and their roles in the biogeochemical cycles of marine systems.

· Chemical Oceanography

Chemical interactions of trace metals and radionuclides in the sea are the focus of this group. Research includes development of analytical techniques and measurement of trace species in seawater and investigation of the effects and interactions of trace elements on biological processes using analytical and isotopic approaches.

Geological Oceanography

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

Physical Oceanography

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Requirements for Ph.D. Students in the Ocean Sciences Department

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following.

1. Four core courses. These courses are expected to be completed in the first year of the program (and prior to taking the departmental exam) in the sequence listed below:

fall 200, Physical Oceanography

280, Marine Geology

winter 220, Chemical Oceanography

spring 230, Biological Oceanography

- 2. A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis or supporting disciplines. These courses are chosen in consultation with the student's adviser and department graduate advising committee (a maximum of one can be a graduate-level seminar (290); at least two must be graduate or upper-division undergraduate lecture courses).
- 3. Course 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant
- 4. Teaching experience satisfied by two quarters of teaching assistant experience in Ocean Sciences or supporting departments
- 5. Course 293, a 2-credit *Graduate Research Seminar*, required to be taken each spring quarter by all Ph.D. students
- 6. Course 292, attendance at the Ocean Sciences Seminar series each quarter of enrollment
- 7. A minimum of three courses in *Thesis Research* (course 299) under direction of a sponsor. Each quarter in residence a student should take 15 credits of classes; students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.
- 8. Comprehensive departmental exam. This oral exam, covering material from the core courses, is usually taken at the beginning of a student's second year in the program. This exam must be completed successfully within two years of entering the program.
- 9. Pass the qualifying exam to advance to candidacy. This exam requires a written research proposal to be defended orally in front of the student's dissertation committee and is normally taken at the beginning of the third year of the program. This exam is expected to be completed successfully within three years of entering the program.
- 10. Ph.D. dissertation. The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's thesis committee. Chapters of the dissertation may be written in publication format, but must conform to university publication guidelines for submission.

Ocean Sciences Master's Degree Program

The Ocean Sciences Department offers a master of science degree in ocean sciences. The degree combines core courses and electives to provide depth and breadth in ocean sciences, with a focused thesis to provide experience in original research. Graduates from the program are excellently prepared to take research or management positions in organizations concerned with the marine environment, become educators, or enter doctoral programs in ocean sciences or related fields.

Whereas the doctoral program has an oceanographic orientation, the marine sciences master's program is even more broad and has traditionally attracted many students in marine biology and ecology. As with the doctoral program, students are encouraged to select a course of study and a research program that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Course Requirements for the Ocean Sciences Master's Degree

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

1. Complete three of the four core courses (one of which must be course 200, *Physical Oceanography*). Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. All four core courses are

recommended. If taken, the fourth course counts as an elective.

fall 200, Physical Oceanography

280, Marine Geology

winter 220, Chemical Oceanography

spring 230, Biological Oceanography

- 2. A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis. These courses are chosen in consultation with an adviser and department graduate advising committee (only one of these can be a graduate seminar (290); at least two must be lecture courses).
- 3. A minimum of three courses in *Thesis Research* (course 299) under direction of a sponsor. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.
- 4. Course 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant
- 5. Teaching experience satisfied by one quarter of teaching assistant experience
- 6. Attendance at the Ocean Sciences Seminar series (course 292) each quarter of enrollment
- 7. Complete a master's thesis, and present it at an open seminar.

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies (http://graddiv.ucsc.edu/student_affairs/).

Ocean Sciences

Program Description | Course Descriptions

Faculty and Professional Interests

Professor

Kenneth W. Bruland

Chemical oceanography, biogeochemistry of trace metals and radionuclides, aquatic chemistry, geochemistry

Margaret L. (Peggy) Delaney

Paleoceanography, marine geochemistry

Robert E. Garrison (Emeritus)

Andrew M. Moore

Physical oceanography; numerical ocean modeling; air-interaction; ocean prediction

A. Christina Ravelo

Stable isotope geochemistry and chemical oceanography, paleoclimatology

Mary W. Silver

Biological oceanography, marine plankton, midwater ecology

Jonathan P. Zehr

Aquatic microbial ecology, biological oceanography

Associate Professor

Raphael M. Kudela

Ecological modeling and remote sensing, satellite oceanography, phytoplankton ecology and harmful algal blooms

Assistant Professor

Christopher A. Edwards

Physical oceanography, numerical modeling of coastal- and basin-scale dynamics

Matthew D. McCarthy

Organic geochemistry, marine organic geochemistry, global biogeochemical cycles

Adjunct Professor

James R. Hein

Marine mineralogy, marine mineral deposits, marine geochemistry, paleoceanography, environmental geochemistry, marine geology

Ronald J. Schusterman

Psychobiology and sociobiology of marine mammals, animal cognition and communication

Associate Adjunct Professor

Steven H. Haddock

Ecology of bioluminesence and gelatinous zooplankton from blue-water and deep-sea environments

Jeffrey D. Paduan

Coastal ocean dynamics: surface currents, wave heights, wind and tidal forcing from high-frequency radar data

Randall S. Wells

Behavioral ecology and conservation biology of small cetaceans

Assistant Adjunct Professor

Michael Beck

Marine conservation, regional biodiversity planning, habitat restoration, marine proprietary rights

John Carlos Garza

Population and ecological genetics of marine organisms

Sean A. Hayes

Behavior, ecology, genetics, and population dynamics with a particular interest in salmon and pinnipeds

Alexandra Worden

Mechanisms and controls of microbial population dynamics with an emphasis on carbon cycling in marine ecosystems

Lecturer

Joel Goldman

Phytoplankton ecology, microbial food chain dynamics

Thomas Guilderson

Paleoceanography, tracer chemistry, carbon cycle, climate change

Baldo Marinovic

Plankton biology, Euphausiid (krill) population biology, zooplankton ecology, pelagic food web dynamics, climate change potential impacts on zooplankton and fisheries

Carrie Pomeroy

Marine policy and fisheries management

Professor

Giacomo Bernardi (Biological Sciences)

Fish biology, phylogenetics, evolution

Mark Carr (Biological Sciences)

Marine ecology, applied marine ecology

Daniel P. Costa (Biological Sciences)

Physiological ecology of marine mammals and birds

Phillip Crews (Chemistry)

Marine natural products chemistry, bioorganic chemistry, organic structural analysis by NMR, natural products of marine macro- and microorganisms

Andrew T. Fisher (Earth Sciences)

Hydrogeology, crustal studies, coupled flows, modeling

Stanley M. Flatté (Emeritus, Physics)

A. Russell Flegal (Environmental Toxicology)

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

Laurel R. Fox (Biological Sciences)

Terrestrial population and community ecology, plant-animal interactions

James B. Gill (Earth Sciences)

Igneous petrology, geochemistry of island arcs

Lynda J. Goff (Biological Sciences)

Algal symbiosis, host-parasite relationships, molecular evolution

Gary B. Griggs (Earth Sciences)

Coastal processes, hazards and engineering

Burney J. LeBoeuf (Emeritus, Biological Sciences)

Marc S. Mangel (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

J. Casey Moore (Earth Sciences)

Geofluids, structural geology, tectonic hydrogeology, marine geology

A. Todd Newberry (Emeritus, Biological Sciences)

Charles L. (Leo) Ortiz (Biological Sciences)

Physiology of marine mammals, physiological integration, physiology of secretion

Donald C. Potts (Biological Sciences)

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

Peter Raimondi (Biological Sciences)

Marine ecology, evolutionary ecology, experimental design, applied ecology

Eli A. Silver (Earth Sciences)

Marine geology and geophysics, active tectonics, remote sensing

Lisa Sloan (Earth Sciences)

Paleoclimatology, climate change, Earth system science, surficial processes

Donald R. Smith (Environmental Toxicology)

Neurotoxicity, cellular and organismal responses to environmental toxins

Lincoln Taiz (Biological Sciences)

Plant development, light regulation of stomatal opening

Terrie M. Williams (Biological Sciences)

Vertebrate locomotor and thermoregulatory physiology; marine biodiversity; comparative vertebrate energetics, exercise physiology

James C. Zachos (Earth Sciences)

Paleoceanography, marine stratigraphy, geochemistry

Associate Professor

Don Croll (Biological Sciences)

Foraging ecology of marine birds and mammals, island conservation/ecology

Grant H. Pogson (Biological Sciences)

Molecular population genetics, ecological genetics, marine invertebrates and fishes

Ocean Sciences

A312 Earth and Marine Sciences Building (831) 459-4730 http://oceansci.ucsc.edu/

Program Description | Faculty

Lower-Division Courses

1. The Oceans. F,W,S

An interdisciplinary introduction to oceanography focusing on biological, chemical, geological, and physical processes. Covers topics such as origins and structure of planet Earth and its oceans, co-evolution of Earth and life, plate tectonics, liquid water and the hydrologic and hydrothermal cycles, salinity and elemental cycles, ocean circulation, primary production and nutrient cycles, plankton and nekton, life on the sea floor, near shore and estuarine communities, future environmental problems our oceans face. Students may also enroll in and receive credit for Earth Sciences 1. (Note: General Education credit will not be granted for this course and Biology 80D.) (General Education Code(s): IN, Q.) *The Staff, R. Kudela*

80A. Life in the Sea. F,W,S

The ecology of plants and animals in oceans and coastal areas. Consideration of life in various marine habitats, including the open ocean, rocky shores, estuaries, and the sea. Includes field trips. High school biology and chemistry courses are recommended prior to taking this course. (General Education Code(s): T2-Natural Sciences.) *The Staff, M. Silver*

80B. Our Changing Planet. F,S

Interdisciplinary scientific perspective on Earth system, focusing on human impacts on global environment. Introduces concepts of Earth system science and explores topics such as global warming, ozone depletion, pollution, deforestation, and future climate change. Prerequisite(s): high school chemistry course recommended. (General Education Code(s): T2-Natural Sciences.) *A. Ravelo, A. Moore*

Upper-Division Courses

101. The Marine Environment. W

An introduction to the marine environment stressing the interaction of physical, chemical, and geological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. Prerequisite(s): Chemistry 1C and Mathematics 11B or 19B. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. *A. Moore*

102. Oceans and Climate: Past, Present, and Future. *

An introduction to Earth's environment, particularly its oceanic and climatic components. Emphasizes interactions between chemical, physical, biological, and geological processes, and fundamentals of past, present, and future global environmental change. Provides backgrounds for specialized courses in oceanic or climatic change. Prerequisite(s): Chemistry 1C. A. Ravelo

118. Marine Microbial Ecology. S

The study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions, and flows of material and energy in marine food webs. Exams and term paper required. Students cannot receive credit for this course and Ocean Sciences 218. (Also offered as Biology 171. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20C or 21C, and Chemistry 1C. *J. Zehr*

120. Aquatic Chemistry: Principles and Applications. F

An integrated study of the chemical behavior of natural waters with an emphasis on both principles and applications. Topics include chemical equilibrium, kinetics, acids/bases, oxidation/reduction, complexation, solid dissolution and precipitation, and reactions on solid surfaces. Prerequisite(s): Chemistry 108B or 112C. *K. Bruland*

124. Aquatic Organic Geochemistry. S

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 224. Prerequisite(s): basic college chemistry (Chemistry 1B, 1C); at least one quarter of college level organic chemistry required (e.g., Chemistry 7). *M. McCarthy*

130. Biological Oceanography. *

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and Ocean Sciences 230. (Also offered as Biology 159. Students cannot receive credit for both courses.) Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to juniors (with instructor approval), seniors, graduate students. *R. Kudela*

142. Ocean Ecosystems. W

Discussion of selected topics in animal ecology of the open sea: zooplankton production, variability of pelagic populations, food webs, deep-sea pelagic and benthic ecology, fisheries oceanography, and human effects on the open ocean biota. Students cannot receive credit for this course and course 242. (Also offered as Biology 142. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20A-B-C or equivalent; one ocean sciences course recommended. *M. Silver*

156. Marine Plankton. *

Review of morphology, systematics, and natural history of major marine planktonic taxa and evaluation of local plankton forms. Two lecture/lab sessions of three and one-half hours each, and two field trips during the quarter. (Also offered as Biology 156. Students cannot receive credit for both courses.) Concurrent enrollment in course 156L is required; one of the following recommended as preparation: course 118, 142, or 242; or Biology 136, 146, or 170. Recommended for upper-division and graduate students. *M. Silver*

156L. Marine Plankton Laboratory (2 credits). *

Two lab meetings weekly. Concerned primarily with evaluation of local plankton forms. (Also offered as Biology 156L. Students cannot receive credit for both courses.) Concurrent enrollment in course 156 is required; one of the following recommended as preparation: course 118, 140, or 240 or Biology 136,146, or 170. *M. Silver*

157. Ecology of Reefs, Mangroves, and Seagrasses. W

Integrated treatment of coral reefs, sea grasses, and mangroves emphasizing interactions and processes through time. Major topics: biological and geological history, biogeography, evolution and ecology of dominant organisms, biodiversity, community and ecosystem ecology, geology, biogeochemistry, global change, human impacts. (Also offered as Biology 158. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20A, 20B, and 20C. *D. Potts*

172. Geophysical Fluid Dynamics. S

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Taught in conjunction with course 272. Students cannot receive credit for this course and course 272. (Also offered as Earth Sciences 172. Students cannot receive credit for both courses.) Prerequisite(s): Physics 107; Mathematics 22 or 23B recommended. Offered in alternate academic years. *C. Edwards*

199. Independent Study. F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

200. Physical Oceanography. F

Introduction to the physics of the ocean-atmosphere system. Structure of the ocean and atmosphere. Energy balance and radiative transfer. Atmospheric circulation; weather and climate. Physical properties of seawater, air-sea interaction, mixing, water masses, ocean circulation, waves; CO2 and global change. Designed for beginning graduate students in ocean sciences and upper-division science majors. Calculus and physics recommended as preparation. *C. Edwards*

211. Climate Dynamics. *

Introduction to the dynamics of the Earth climate system. Topics: climate system components; the global energy balance; radiative transfer; the hydrological cycle; general circulations of the atmosphere and ocean; El Niño; the North Atlantic Oscillation; the Pacific Decadal Oscillation. Enrollment restricted to graduate students. Undergraduates may enroll by permisssion of instructor. Previous courses in calculus and ocean sciences or earth sciences are recommended. *A. Moore*

213. Biogeochemical Cycles. *

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time. (Also offered as Earth Sciences 213. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant

215. Predicting the Atmosphere, Ocean, and Climate. *

Introduction to the theory and practice of operational prediction in meterology, oceanography, and climate. Topics: observations and estimation theory; dynamic adjustment and initialization; estimation theory; data assimilation; forecast verification; predictability; ocean state estimation; seasonal forecasting. Enrollment restricted to graduate students. Undergraduates may enroll with instructor approval. Courses 200, 264, Earth Sciences 272, or equivalents are recommended. *A. Moore*

218. Marine Microbial Ecology. S

Recent developments in the study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions and flows of material and energy in marine food webs. Exams and research paper required. Students cannot receive credit for this course, course 118, and Biology 171. Biology 20C and Chemistry 1C recommended. *J. Zehr*

220. Chemical Oceanography. W

A chemical description of the sea; emphasis on the chemical interactions of the oceans with the biosphere, atmosphere, and lithosphere. Topics include biogeochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Course designed for graduate students; available to upper-division science majors. *K. Bruland*

224. Aquatic Organic Geochemistry. S

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 124. *M. McCarthy*

230. Biological Oceanography. S

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and course 130. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to graduate students. *R. Kudela*

242. Ocean Ecosystems. W

Discussion of selected topics in animal ecology of the open sea: zooplankton production, variability of pelagic populations, food webs, deep sea pelagic and benthic ecology, fisheries oceanography, and human effects on the open ocean biota. Students cannot receive credit for this course and course 142. (Also offered as Biology 242. Students cannot receive credit for both courses.) Prerequisite(s): Biology 20A-B-C and 20L or an equivalent introductory biology sequence with lab; one ocean sciences course recommended. Enrollment restricted to graduate students. *M. Silver*

264. Ocean Data Analysis. *

Introduction to ocean sciences data analysis methods. Topics: inverse methods, optimal interpolation, empirical orthogonal functions, and Monte Carlo methods applied to physical, chemical, and biological oceanographic datasets. Introduces and uses a high-level computing and visualization package Matlab. Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment restricted to graduate students; undergraduates with permission of instructor. *C. Edwards*

272. Geophysical Fluid Dynamics. S

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Students cannot receive credit for this course and course 172. (Also offered as Earth Sciences 272. Students cannot receive credit for both courses.) Physics 227 is recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *C. Edwards*

280. Marine Geology. F

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; introduction to paleoceanography. Students cannot receive credit for this course and Earth Sciences 102. Enrollment restricted to graduate students. *M. Delaney*

285. Past Climate Change. F

Reviews the fundamentals of climate dynamics and explores how Earth's environment is a product of the interaction of its components. Uses examples of climate change from historical and geologic records, and from predictions of the future. Recommended for junior, senior, and graduate students in the sciences. *A. Ravelo*

290. Proseminar.

Special topics in marine sciences to be offered form time to time by professors and staff members. *The Staff*

290A. Topics in Chemical Oceanography. S

A weekly seminar series covering recent developments in chemical oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *K. Bruland*

290B. Topics in Biological Oceanography. S

Explores different problems of special interest in biological oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *M. Silver*

290C. Topics in Marine Geochemistry. *

Selected topics in geochemistry. Discussion of theoretical models, different approaches, and recent research. Topics vary from year to year. May be repeated for credit. *M. Delaney*

290D. Topics in Marine Microbiology. W

A weekly seminar series covering topics in environmental microbiology. Topics vary from year to year, and will include research in ecology, methodology, biochemistry and physiology of bacteria. Emphasis on the role of bacteria in biogeochemical

cycling from microzone to global scales, with particular focus in marine systems. May be repeated for credit. *J. Zehr*

290E. Topics in Climatic and Oceanic Change. W

Weekly seminar series covering recent developments in climatic and oceanic change. Different topics and approaches stressed from year to year. Prerequisite(s): interview with instructor prior to first class meeting. May be repeated for credit. *A. Ravelo*

290H. Topics in Ocean Optics. *

Examines recent developments and application of bio-optics to the marine environment, including theory, instrumentation, and remote sensing. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in marine sciences recommended. Enrollment restricted to graduate students; senior undergraduates with permission of instructor. May be repeated for credit. *R. Kudela*

290J. Topics in Marine Organic Geochemistry. *

Examines recent developments in uses of organic geochemistry to trace oceanographic and biogeochemical processes. Focuses on introduction to organic biomarkers, current literature, and evolving applications. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in marine (ocean) sciences and organic chemistry are recommended. Enrollment restricted to graduate students; seniors with instructor's permission. May be repeated for credit. *M. McCarthy*

292. Seminar (no credit). F,W,S

Weekly seminar on various topics attended by faculty, graduate, and upper-division undergraduate students. *The Staff*

293. Graduate Research Seminar (2 credits). W

Weekly seminar series covering a spectrum of topics in oceanography. Designed for Ph.D. program graduate students in ocean sciences and those in biology, Earth sciences, chemistry, and physics with research interests in oceanography. Enrollment restricted to graduate students. May be repeated for credit. *A. Moore*

296. Teaching in Ocean Sciences (2 credits). F

For new and/or relatively inexperienced graduate students in pedagogy of ocean sciences. Role and responsibilities of teaching in ocean sciences described and developed. Includes discussions about effective teaching methods; hands-on issues for work in the laboratory; university expectations; and regulations regarding teaching, organizational strategies, time management, and working with instructors and staff. Prerequisite(s): graduate standing or permission of instructor. Enrollment restricted to graduate students. *C. Edwards*

297. Independent Study.

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency. *The Staff*

299. Thesis Research.

Students submit petition to sponsoring agency. The Staff

* Not offered in 2007-08

Philosophy

5 Cowell College (831) 459-2070 http://philosophy.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the Philosophy Program Description from the General Catalog 2006-08.)

Program Description

Philosophy studies many of life's most significant questions. It investigates issues about the fundamental nature of reality, the relation of the mind to the body, the existence of a divine being, and the basis of our most fundamental values: moral, aesthetic, and spiritual. In addition, philosophy is concerned with problems concerning the possibility of knowledge, including questions arising from the role of reason and experience in justifying claims to know and from the challenges raised by various types of skepticism. Therefore, the student of philosophy can pursue a broad range of topics of the greatest historical, intellectual, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers all the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy. The department also offers a major in philosophy with a concentration in religious thought.

Philosophy prepares students for many careers as well as for most professional schools, including law. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Major Requirements

Courses

Eleven courses are required: two at the introductory level, three in the history of philosophy sequence (91-113), and six additional courses (including one advanced seminar). For the lower-division required courses and for some history of philosophy courses, students may petition to substitute courses taken at other institutions. These 11 courses must meet the following distribution requirements:

Introductory. Course 9 and at least one of courses 11, 22, 24, and 26;

History of philosophy. Two of 91, 93, or 94, plus any third course numbered between 91 and 113 (with all three-91, 93, and 94-strongly recommended for students who anticipate graduate work in philosophy). History of philosophy courses taken at other institutions may be substituted by petition, provided that such courses have included intensive study of primary sources;

At least six additional courses numbered 91 and above, one of which must be an advanced seminar numbered 190. Note that the courses counted toward fulfilling the history of philosophy requirement cannot be counted among these six additional courses. Courses 195A, 195B, and 199 also cannot be counted among these six additional courses. All upper-division courses except those in the history of philosophy sequence must be completed at UCSC.

Normal progress for a philosophy major is as follows: first year, take the introductory courses; second year, complete the required three courses in the history of philosophy; third and fourth years, upper-division course work, plus work in advanced seminars. Students are advised to complete lower-division and history of philosophy requirements by their third year at the latest. Transfer students are particularly advised that completion of one or more courses in the history of philosophy is assumed as background for most other upper-division courses in philosophy.

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course. In addition to Honors in an advanced seminar, graduating seniors with a distinguished record of achievement in their philosophy courses may be awarded Honors or Highest Honors in the philosophy major.

Minor Requirements

A minor in philosophy consists of any nine of the 11 courses required for the major. At least five of these must be upper-division. There is no senior exit requirement for the minor.

Philosophy Major Planners

Getting started in the right way is important in the study of philosophy. The following are two recommended academic plans for students to complete during their first two years as preparation for the philosophy major. Plan One is a guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the philosophy major, but who are interested in other possible majors as well.

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	Phil 9	Phil 11 or 22	
2nd (soph)	Phil 91	Phil 93 Phil 119	Phil 106
Plan Two			
Year	Fall	Winter	Spring
1st (frsh)	Phil 9	Phil 11 or 22	
2nd (soph)	Phil 91	Phil 93	

Program Planning Notes

Although not as a substitute for the advanced seminar requirement, a student may be given the option of writing a senior essay (course 195A) when a faculty member thinks that the student has already done exceptional work that could be carried to a more advanced level. Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (course 195B), but only if the writing requirements for course 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite introductory courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work.

Philosophy Major with Concentration in Religious Thought

This program is for students who wish to use the discipline of Philosophy as a basis for pursuing an interest in Religious Thought. It consists of an individually planned sequence of at least four courses dealing with religious thought, supplementing a core of courses in Philosophy. Admittance into the program requires consultation with one of the Philosophy Department's advisers for the concentration and approval by the Director of the Concentration in religious thought. Students should plan on meeting with a Concentration Adviser at least once a year to discuss their progress.

A student enters the concentration by petitioning the Department of Philosophy and by proposing, after consultation with a concentration adviser, a sequence of upper-division courses to fulfill the religious thought concentration.

A list of the faculty advisers for the Religious Thought concentration can be obtained from the Philosophy Department office.

Course Requirements

Fourteen courses are required: two introductory philosophy courses; two in the history of philosophy sequence; six upper division philosophy courses; and four upper division courses in the area of religious thought.

These fourteen courses must meet the following distribution requirements:

Introductory. Two total courses: Phil 9 (Introduction to Logic) and either Phil 11 (Introduction to Philosophy), an Introduction to Ethics course (22 or 24), or Phil 26 (Existentialism).

History of Philosophy. Phil 91 (Ancient Greek Philosophy) and either Phil 93 (The Rationalists) or Phil 94 (The Empiricists).

Upper-Division and/or Graduate Courses. Six philosophy courses at UCSC, including one Advanced Seminar (190 series), and excluding Phil 195A, Phil 195B, or Phil 199. These courses must include three advanced courses in philosophy of religion: either Phil 170 (Interpretation of Religion) or Phil 171 (Faith and Reason), and two other upper-division or graduate courses that involve philosophy of religion. The director of the concentration in religious thought will determine which philosophy courses count as involving philosophy of religion.

Concentration in Religious Thought. Four upper division courses in the area of religious thought from programs on campus such as anthropology, literature, history, history of art and visual culture, philosophy, psychology, and sociology. The director of the concentration in religious thought must approve these courses.

Transfer Students. Students can petition the department for credit in the major for coursework done elsewhere. In general, equivalent introductory courses in philosophy may be substituted for UCSC Philosophy introductory courses. One upper-division course taken at another four-year university may also be substituted by petition - submit a syllabus and supporting material from the class. Petitions are available at the Philosophy Department office (Cowell 5). Only courses for which the student has received a B or better grade will be accepted for the major. The requirement of three upper-division or graduate philosophy of religion courses cannot be substituted with courses taken elsewhere; they must be taken at UCSC.

Graduate Program

The Department of Philosophy conceives of philosophy as a broad and inherently cross-disciplinary enterprise. Graduate students are able to take advantage of a wide range of courses in the history of philosophy, including ancient, early modern, Kantian, nineteenth-century, American, and early analytic philosophy. Faculty research has focused on such conceptual clusters as mind and body; consciousness, perception, and action; understanding, interpretation, and language; religion, reason, and probability; moral motivation, practical reason, and virtue ethics; the emotions, psychoanalytic theory, and the will; science and technology; and society and the law.

Both the M.A. and the Ph.D. programs encourage interaction with other fields, and the curriculum includes graduate and undergraduate courses cross-listed with departments such as Psychology, Linguistics, Anthropology, Environmental Studies, Feminist Studies, History of Consciousness, Legal Studies, and Politics. Furthermore, the programs allow for graduate-level study of phenomenology, hermeneutics, critical theory, and poststructuralism.

Graduate Program Requirements

Breadth Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. In addition to Philosophy 217, *Intermediate Logic*, and Philosophy 201, *First Year Seminar*, students must take at least one course in the area of metaphysics and epistemology and one course in the area of value theory according to a list determined annually by the graduate committee.

Ph.D. Program

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

Courses. A minimum of 12 graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Language requirement. Knowledge of foreign languages will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written exam administered by the department or by successfully completing a language course approved by the graduate committee.

Qualifying examination. Near the end of the required course work, doctoral students will develop a research project and write a detailed dissertation prospectus. The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The exam focuses on the student's research project and on the fields of scholarship it presupposes.

Dissertation. The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research.

M.A. Program

Applications to the M.A. program are welcomed from talented students with diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one or two years.

Courses. A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Languages. There is no foreign language requirement for M.A. students.

Master's paper. By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's paper, which will normally be defended orally before a committee of two faculty members.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online at graddiv.ucsc.edu. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650, elizg@ucsc.edu. Visit the web site at http://philosophy.ucsc.edu.

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

W. Emmanuel Abraham, Emeritus

David C. Hoy

Kant, Hegel, Nietzsche, Heidegger, Derrida, Foucault, phenomenology, poststructuralism, and contemporary European philosophy

S. Paul Kashap, Emeritus

Carlos G. Noreña, Emeritus

Richard E. Otte

Philosophy of religion, formal epistemology, philosophy of science, philosophical logic

Paul A. Roth

Philosophy of social science, philosophy and sociology of science, epistemology, history of analytic philosophy, philosophy of history

Ellen Kappy Suckiel

Ethics, William James, American philosophy, genetic ethics, ethics of biotechnology

Richard A. Wasserstrom, Emeritus

Associate Professor

Robert A. Goff, Emeritus

Daniel Guevara

Kant, moral philosophy, moral psychology, environmental ethics, history of modern philosophy

Assistant Professor

John F. Bowin

Ancient philosophy, metaphysics

Jonathan Ellis

Philosophy of mind, epistemology, philosophy of language, Wittgenstein

Abraham D. Stone

History of 20th-century philosophy (continental and analytic), 19th-century continental philosophy, philosophy of science, metaphysics, and medieval philosophy

Rasmus G. Winther

Philosophy of science, epistemology, metaphysics, philosophy of biology, American pragmatism, Latin American philosophy, evolutionary theory

Lecturer

Jocelyn Hoy

Feminist philosophy, 19th- and 20th-century continental philosophy

Professor

Physics, feminist philosophy, philosophy of science, cultural studies of science, and feminist theory

Sandra Chung (Linguistics)

Syntax, semantics, Austronesian languages

Jerome Neu (Humanities)

Philosophy of mind, emotions and culture, philosophy of law, psychoanalytic theory

Philosophy

5 Cowell College (831) 459-2070 http://philosophy.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

9. Introduction to Logic. F,W,S

A study of correct reasoning, concentrating on developing the skills necessary to distinguish logically correct from logically incorrect arguments. The emphasis is on modern symbolic logic, although the traditional theory of the syllogism is also covered. (General Education Code(s): IH, Q.) (S) J. Bowin, (FW) The Staff

11. Introduction to Philosophy. F

An introduction to the main areas of philosophy using both classic and contemporary sources. Focuses on central and enduring problems in philosophy such as skepticism about the external world, the mind-body problem, and the nature of morality. (General Education Code(s): IH.) *R. Otte*

22. Introduction to Ethical Theory. W

A consideration of ethical issues and theories focusing on the foundation of moral value and the principles governing character and behavior. Designed to extend and develop the student's abilities in philosophical reasoning about ethics. (General Education Code(s): IH.) *D. Guevara*

24. Introduction to Ethics: Contemporary Moral Issues. *

An examination of the conceptual and moral issues that arise in connection with such topics as abortion, racism and war and violence, world hunger, humans and their interactions with the nonhuman environment. The readings are drawn from recent philosophical articles on these topics. (General Education Code(s): IH.) *The Staff*

26. Existentialism and After. *

A survey of recent movements in European thought, such as phenomenology, existentialism, hermeneutics, critical theory, continental feminism, and poststructuralism, with some attention to their 19th-century precursors. Selections from major philosophical treatises are supplemented with literary works. (General Education Code(s): IH.) *The Staff*

28. Environmental Ethics. S

This course is an introduction to the moral issues raised by our interactions with nonhuman animals and with the rest of the natural environment. The course will relate traditional moral theories to contemporary literature on the ethics of nature conservation and environmental protection. The course is intended as a first course in philosophy as well as a first course in ethics; therefore, questions concerning the nature of philosophical inquiry and the ways in which philosophical inquiry is different from inquiries conducted within other disciplines will also be addressed. (General Education Code(s): IH.) (FWS) The Staff

80F. Philosophical Puzzles, Paradoxes, and Conundrums. *

Many philosophical problems have origins in puzzles and paradoxes. One of the most famous is Zeno's paradox of motion. Among others are paradox of the heap (Sorties paradox), Newcomb's puzzle (puzzle about rational decision making), Problem of the Many (problem about material objects), and Liar paradox (paradox for semantics). Over long history of philosophy, many such puzzles and paradoxes have been discovered; some have been solved, and others have yet to be solved. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80G. Bioethics in the 21st Century: Science, Business, and Society. F

Serves science and non-science majors interested in bioethics. Guest speakers and instructors lead discussions of major ethical questions having arisen from research in genetics, medicine, and industries supported by this knowledge. (Also offered as Biomolecular Engineering 80G. Students cannot receive credit for both courses.) (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *The Staff*

80L. Language and Mind: Chomsky's Program. *

A critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain. (Also offered as Linguistics 80D. Students cannot receive credit for both courses.) (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *The Staff*

80M. Science and Society. W

Provides a philosophical perspective concerning the revolution in the understanding of science that generated the so-called "science wars." Introduces the changed philosophical understanding of science shared and presupposed in the fields of science, technology, and society. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *P. Roth*

80R. Introduction to Philosophy of Biology. *

Introduction to core philosophical issues in the biological sciences. Covers such conceptual issues as the nature of evolutionary theory; choosing the unit of selection; the relationship between evolution and development; whether all biological phenomena are reducible to genes; and the definition of adaptions, and how to identify them. (Also offered as Biology 80R. Students cannot receive credit for both courses.) (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *The Staff*

80S. The Nature of Science. *

A survey of what philosophers have said about the nature of science and scientific change. Emphasis is placed on whether science is best characterized as the gradual accumulation of truth or whether truth is irrelevant to scientific change. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *R. Otte*

91. Ancient Greek Philosophy. F

A study of Socratic method, of Platonic metaphysics, epistemology, and ethical theories, and of Aristotle's moral and political views through intensive reading of selected Platonic dialogues and Aristotelian texts. *J. Bowin*

93. The Rationalists. W

A study of the historical background and the present relevance of Descartes, Spinoza, and Leibniz. *A. Stone*

94. The Empiricists. S

A critical study (based on original texts) of Locke, Berkeley, and especially Hume on the nature of knowledge, perception, causation, morality, religion, and political society. *D. Guevara*

99. Tutorial. F,W,S

The Staff

Upper-Division Courses

100. Vienna Circle and American Philosophy. *

Study of philosophical movement called the Vienna Circle, named so chiefly for intellectual excellence of its members, but also for external historical reasons. Course pays careful attention to intercultural aspects of ideas of the Vienna Circle: intellectual climate under which these ideas were formed, how thoughts of its members found an echo outside of Austria, and how they made a lasting influence on philosophical thinking in England and in U.S. *The Staff*

106. Kant. *

Intensive study of Kant's philosophy, particularly his epistemology and metaphysics developed in his *Critique of Pure Reason*. Prerequisite(s): course 93 or 94. *A. Stone*

108. Nineteenth-Century Philosophy. F

A study of some European philosophers of the 19th century, with particular attention to Hegel, Schopenhauer, and Nietzsche. Prerequisite(s): one course in philosophy. *J. Hoy*

109. Phenomenology to Poststructuralism. S

A study of the French philosophical movements of existentialist phenomenology, structuralism, and poststructuralism, with close critical analysis of original texts by Sartre, Merleau-Ponty, Derrida, Foucault, and others, showing changes in conceptions of a human being, consciousness, language, the body, other minds, freedom, power, and history. Prerequisite(s): course 11 or one course in the history of philosophy. *D. Hoy*

110. Heidegger. W

A close study of early and late texts by Martin Heidegger, especially *Being and Time*. Prerequisite(s): two courses in philosophy. *D. Hoy*

111. Continental Philosophy. *

Study of recent work in continental philosophy. Topics vary. Enrollment restricted to junior and senior philosophy majors. W. Godzich

112. American Philosophy. W

Study of classical American philosophers, specifically Emerson, Peirce, James, and Dewey, with emphasis on their views of metaphysics, epistemology, ethics, and philosophy of religion. Some attention is also paid to recent pragmatic tendencies in American philosophy. Prerequisite(s): one course in philosophy. *R. Winther*

113. The Origins of Analytic Philosophy. *

An examination of the beginnings of analytic philosophy, with primary interest in the reformulation of traditional philosophical problems by Frege, Russell, and the early Wittgenstein. Some attention is also paid to the development of Vienna Circle logical positivism (Schlick, Carnap, Waismann). May be repeated for credit. *P. Roth*

114. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 214. Prerequisite(s): course 9. *R. Otte*

115. Formal Methods in Philosophy. *

Study of formal methods commonly used in analytic philosophy. Emphasis is on developing the technical tools to enable one to read and do modern analytic philosophy. Applications of various formal tools to philosophical problems will also be discussed. Prerequisite(s): course 9. *R. Otte*

116. Logic, Sets, and Functions. *

Introduction to basic set theory, recursive definitions, and mathematical induction. Provides a bridge between course 9 and courses 117 and 119. Strong emphasis on proving theorems and constructing proofs, both formal proofs and proofs in the customary, informal style used by mathematicians. Prerequisite(s): course 9. *J. Bowin*

117. Non-Classical Logic. *

Investigation of non-classical logic. Several propositional non-classical logics, such as various model logics, multi-valued logics, and relevance logics studied. Metatheoretic results, including soundness and completeness, investigated for each logic studied. Prerequisite(s): course 9. Enrollment limited to 40. (S) The Staff

119. Intermediate Logic. S

Detailed treatment of the semantics of first order logic and formal computability. Completeness, undecidability of first order logic and Lowenhelm-Sklem results also proven. Nature and formal limits of computability and introduction to incompleteness also investigated. Prerequisite(s): course 9. *R. Otte*

120. Philosophical Writing. *

Training in philosophical thinking and its expression in written form. Prerequisite(s): course 11, 22, 24, or 26; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to philosophy majors. Enrollment limited to 30. (General Education Code(s): W.) *The Staff*

121. Knowledge and Rationality. *

An investigation of modern theories of knowledge, justification, and rationality. One course in philosophy is strongly recommended prior to taking this course. *P. Roth*

122. Topics in Metaphysics.

Surveys the philosophy of time, emphasizing the treatment of this topic by philosophers in the analytic tradition. Prerequisite(s): course 9. *J. Bowin*

123. Philosophy of Language. *

Current theories of the nature and preconditions of language, the nature of meaning, and the nature of truth. Prerequisite(s): one course in either philosophy or linguistics. *J. Ellis*

125. Philosophy of Science. W

An examination of various topics that arise in thinking about science. Different philosophical problems, such as realism, instrumentalism, confirmation, explanation,

space and time, and rational decision making are extensively discussed and criticized. A. Stone

127. Philosophy of Biology.

Can developmental processes be reduced to gene expression? Does the history of life exhibit trends (e.g. increasing complexity)? How are we to understand key concepts such as "fitness," "species," "adaptation," and "gene?" Is there such a thing as human nature? Course surveys these and other core philosophical topics in the biological sciences. Prerequisite(s): one course in Philosopy or Biology; satisfaction of Entry Level Writing and Composition requirements; enrollment restricted to senior philosophy majors. Enrollment limited to 40. (General Education Code(s): W.) *The Staff*

133. Philosophy of Mind. *

An exploration of the mind-body problem. What is the relationship between mind and brain? Can consciousness be explained in physical terms? Prerequisite(s): one course in either philosophy or psychology. *J. Ellis*

135. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 235. Prerequisite(s): one course in philosophy, psychology, or linguistics. Enrollment restricted to sophomores, juniors, and seniors. *The Staff*

138. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three time periods: early, middle, and late. Prerequisite(s): two philosophy courses. Enrollment restricted to junior and senior philosophy majors. *J. Ellis*

139. Freud. *

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Psychology 163. Students cannot receive credit for both courses.) Offered in alternate academic years. *J. Neu*

140. History of Ethics. *

A careful study of any one or a number of select primary texts in the history of moral philosophy, with some emphasis on the relation to contemporary issues. *The Staff*

141. Epistemology and Cognition. *

Epistemology is preoccupied with *skepticism*, the view that knowledge is unobtainable. Recently, there has been skepticism voiced about the status of *epistemology* itself; philosophers conversant in cognitive science suggest that epistemology is beset with dubious presuppositions. We survey epistemology, cognitive science, and their interface. Students cannot receive credit for this course and course 241. Enrollment restricted to junior and senior philosophy majors. *The Staff*

142. Advanced Ethics. *

An examination of central issues in ethical theory including the nature of and justification for the moral point of view, the place of reason in ethics, the status of moral principles, and the nature of moral experience. Prerequisite(s): two philosophy courses including course 22, 24, or 28. *D. Guevara*

143. Philosophy and Personal Relations. *

Analysis of the nature of personal relationships, their structure, moral expectations, and requirements. Love, friendship, family relationships, and others are explored. Prerequisite(s): two philosophy courses. *E. Suckiel*

144. Social and Political Philosophy. S

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Also offered as Legal Studies 144. Students cannot receive credit for both courses.) Prerequisite(s): one course in philosophy. Offered in alternate academic years. *The Staff*

145. Brave New World: Ethical Issues in Genetics. *

Study of ethical issues involved in recent and upcoming advances in genetic research and technology such as genetic engineering, cloning, human embryo research, genetic experimentation, use of an individual's genetic information, and the manipulation of human evolution. Also discusses fundamental issues such as the moral responsibility of scientists, our obligations to future generations, and the notion of human perfectability. Prerequisite(s): one philosophy course. *E. Suckiel*

146. Philosophy of Law. W

Exploration of selected problems in jurisprudence: "legal reasoning" and social policy, rules and individual cases, the mental element in the law, punishment and responsibility, causation and fault, liberty and paternalism, etc. (Also offered as Legal Studies 146. Students cannot receive credit for both courses.) *J. Neu*

147. Topics in Feminist Philosophy. S

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship. (Also offered as Feminist Studies 168. Students cannot receive credit for both courses.) *J. Hoy*

148. The Holocaust and Philosophy. *

By using the historiography of the Holocaust as a case study, examines the epistemology and ontology of historical knowledge, i.e., how the past is known, and what about it there is to know. Enrollment restricted to juniors and seniors. *P. Roth*

152. Aesthetics. *

Problems about form, meaning, and interpretation in art, as found in major aesthetic theories from the philosophical tradition, and also in a variety of encounters between recent philosophy and the arts. One course in philosophy is strongly recommended prior to taking this course. (General Education Code(s): A.) *The Staff*

154. Philosophy in Literature. *

Story, drama, and poetry considered as sources of philosophical perspective or as particular challenges to philosophical interpretation. Also, discussion of literary and

imaginative elements in philosophical writing. One course in philosophy is strongly recommended prior to taking this course. *The Staff*

170. The Interpretation of Religion. *

A study of different philosophical responses to religious belief and practice, from the classical "proofs" of religion, to skeptical critiques of religious experience, to conceptual issues in the interpretation of religious texts. *The Staff*

171. Faith and Reason. F

Recent work in analytic philosophy of religion, concentrating on traditional theism. Topics include arguments for and against the existence of God, religious experience, miracles, the relation of faith and reason, and problems such as freedom and divine foreknowledge. Prerequisite(s): course 9. *R. Otte*

174. Spirituality and the Sacred. *

An examination of the personal, moral, and aesthetic elements of spirituality, their relationship to the individual's idea of the sacred, and to philosophical and rational assessments of religion. Prerequisite(s): one philosophy course. *E. Suckiel*

180H. Philosophy Colloquia (2 credits). F,W,S

A colloquia series that sponsors four speakers each quarter. Students required to attend all colloquia and class meetings and encouraged to form discussion groups after each lecture. Enrollment restricted to philosophy majors. May be repeated for credit. *The Staff*

190. Advanced Seminar.

The Staff

190A. Topics in Ancient Greek Philosophy. S

Topics will vary each quarter and will focus on a major ancient Greek philsophical figure or work. Prerequisite(s): course 91 or consent of instructor. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 12. May be repeated for credit. *J. Bowin*

190B. Nietzsche. W

Intensive reading of not only Nietzsche's own texts, but important contemporary interpretive works on Nietzsche. Mainly covers nihilism and the aestheticization of existence, will-to-power, genealogy and interpretation, and Nietzsche's use or misuse for feminism. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *J. Hoy*

190C. Advanced Topics in Contemporary Ethics. *

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Humean ethical theory. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 290C. Prerequisite(s): course 140 or 142 and one other upper-division philosophy course. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 22. May be repeated for credit. *The Staff*

190D. Kant's Moral Theory. *

A careful study of Kant's moral theory, with an emphasis on the *Groundwork for the Metaphysics of Morals*, the *Critique of Practical Reason*, and the *Metaphysics of*

Morals. Recent secondary sources are considered as well. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *D. Guevara*

190E. Kierkegaard. *

Close study and discussion of major works by Soren Kierkegaard. Assessment of his influences on 20th-century philosophy, literature, psychology, and religious thought. Enrollment restricted to junior and senior philosophy majors. *The Staff*

190F. Topics in Philosophy of Biology. S

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course gives advanced seniors an overview of many diverse topics currently under discussion in modern philosophy and biology and provides a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for this course and course 290F. Enrollment restricted to seniors. Enrollment limited to 15. May be repeated for credit. *R. Winther*

190H. Environmental Ethics. *

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them. Students cannot receive credit for this course and course 290H. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 15. *The Staff*

190I. Studies in Religious Philosophy. *

Philosophy authorship and self-understanding from Plato and Augustine, Montaigne and Descartes, and Kierkegaard and Wittgenstein to recent Continental figures including Levinas, Foucault, Derrida, Lyotard, and Agamben. Prerequisite(s): two philosophy courses. Enrollment restricted to juniors and seniors. Enrollment limited to 20. *The Staff*

190J. Advanced Topics in the History of Ethics. *

A careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *D. Guevara*

190L. The Emotions. W

Analysis of particular emotions (e.g., jealousy, boredom, regret) and exploration of general theoretical issues (e.g., expression, control) with emphasis on psychoanalytic and philosophical literature. Satisfies seminar requirement. Admission by interview with instructor. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): W.) *J. Neu*

190M. William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. (General Education Code(s): W.) *E. Suckiel*

190N. Philosophy of Religion. *

An examination of recent work in philosophy of religion. The approach may vary between an analytic and continental approach in different years. Topics might include the rationality of belief in God, religious epistemology, hermeneutics, and religious experience. Prerequisite(s): course 9. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *R. Otte*

1900. Epistemology. *

An examination of recent work in epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. Prerequisite(s): course 9. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *R. Otte*

190P. Major Figures in Contemporary Philosophy. F

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot received credit for this course and course 290P. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. May be repeated for credit. *P. Roth*

190Q. Philosophy of Mathematics. *

Introduction to problems of contemporary analytic philsophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? Examines the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for this course and course 290Q. Prerequisite(s): course 9 and one additional philosophy course; Mathematics 19A or 20A, or AP score of 4 on the BC exam, or Mathematics Placement Exam score of 40. Enrollment limited to 15. *A. Stone*

190R. Philosophy of Economics. W

Economics is a social science; in what sense is it a science, and how is it social? Course investigates economic methodology to determine what claims it makes and whether those claims are justified. What are economic models, and why are they taken to justify claims about the world? Attention given to the theory of value and choice that economics puts forward: about how agents choose to act in certain social situations. Course investigates the model of the human being that economics proposes. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *The Staff*

190S. Philosophy of Science. S

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, and the confirmation of theories. Prerequisite(s): course 9. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. May be repeated for credit. *A. Love*

190T. Advanced Feminist Philosophy. *

Focuses on issues in epistemology and ontology: the construction of knowledge and objectivity, rationality and emotions, subjectivity and personal identity, and the body and sexuality. (Also offered as Feminist Studies 194J. Students cannot receive credit for both courses.) Prerequisite(s): course 147 or Feminist Studies 100. Enrollment limited to 20. *J. Hoy*

190U. Ethics and Evolution. *

Addresses central questions under discussion within evolutionary ethics. Confronts core issues in philosophy of biology, moral epistemology, meta-ethics, and philosophy of mind. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 22. *The Staff*

190W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings will be selected from some of the following: Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 10. *D. Hoy*

190X. The Good Life. *

Study of alternative conceptions of the elements of a good life, including topics such as courage, loyalty, devotion to ideals, personal flourishing, commitment to a community or tradition, spiritual enlightenment, integrity, compassion, and intellectual understanding. Also covered are fundamental questions such as the meaning of life, the relationship of "living right" to "living well," and the role of feelings in the justification of action. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *E. Suckiel*

190Y. Insults and Intentions. F

The schoolyard wisdom about "sticks and stones" does not take one very far: insults not only take the form of words, and even words have effects. What kind of injury is an insult? Is it infliction determined by the insulter or the insulted? What does it reveal of the character of each and of the character of society and its conventions? What is its role in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Philosophical, anthropological, psychoanalytic, and legal approaches to the questions are emphasized. Students cannot receive credit for this course and course 290Y. (Formerly *Insults and Intentions*.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 22. (General Education Code(s): W.) *J. Neu*

190Z. Moral Psychology. *

An interdisciplinary seminar on topics in moral psychology: moral development, moral education, and moral personality. There are empirical questions: e.g., how do developing persons develop moral concern, and what facilitates this development? But inescapably normative questions quickly arise: e.g., what is properly moral concern, and what, if anything, makes some forms of moral concern "more developed" than others? The aim is to make sense of both sorts of questions, and see their interaction. Prerequisite(s): one psychology course, and course 22 or 24 or permission of instructor. Enrollment restricted to senior and junior philosophy majors. Enrollment limited to 20. *The Staff*

195A. Senior Essay. F,W,S

Preparation of senior essay (approximately 25 pages) during one quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Essay. F,W,S

Under exceptional circumstances, a second senior essay continuing the work of the

first essay is permitted but only when the first senior essay has been completed. Students submit petition to sponsoring agency. *The Staff*

199. Tutorial. F,W,S

The Staff

199F. Independent Study (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Graduate Courses

201. First Quarter Seminar. F

First quarter required course for philosophy graduate students. Introduces the work of the philosophy faculty members to the new graduate students. Helps new students form a cohort. Each week different faculty members will visit the class and discuss materials of their own as well as materials or topics that they study. Enrollment restricted to graduate philosophy majors. *J. Ellis*

202. Topics in Ancient Greek Philosophy. W

Topics will vary each quarter and will focus on some major ancient Greek philosophical figure or work. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *J. Bowin*

214. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 114. Enrollment restricted to graduate students. *R. Otte*

217. Intermediate Logic. *

Natural deduction and semantics of first order predicate logic. Metatheory, including completeness theorems for propositional and predicate logic. Prerequisite(s): course 9. Enrollment restricted to graduate students. Enrollment limited to 40. (S) The Staff

222. Metaphysics. *

Advanced introduction to topics in 20th century and contemporary analytic metaphysics. Divided into five main parts dealing, respectively, with issues about the nature of existence, properties, time, change and persistence, and material constitution. Students cannot receive credit for this course and course 122. Enrollment restricted to graduate philosophy majors. Enrollment limited to 10. *The Staff*

223. Recent European Philosophy. *

Seminar on recent developments in European philosophy, with particular attention to German theorists such as Nietzsche, Heidegger, Gadamer, Horkheimer, Adorno, or Habermas. Theorists such as Sartre, Merleau-Ponty, Derrida, Foucault, Bourdieu, Levinas, Laclau, or Vattimo may be read as well. (Also offered as History of Consciousness 223. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. May be repeated for credit. *D. Hoy*

224. Philosophy of Language. *

Advanced introduction to issues in the philosophy of language—primarily concerning the nature of reference, meaning, and truth. Works from such 20th-

century figures as Russell, Wittgenstein, Kripke, Lewis, and Putnam discussed. Topics include what it is for a sign or a bit of language to be meaningful, or for it to identify or represent something; what it is for a statement to be truthful; what it is to be a language; and how reference works when attributed to beliefs. Cannot receive credit for this course and course 123. Enrollment restricted to graduate philosophy majors. Enrollment limited to 10. *The Staff*

231. Metaphysics and Epistemology. *

Focuses on topic or topics in metaphysics and/or epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. Topics might include one or more of causation, possible worlds, identity, necessity, time, realism, universals, and existence. Enrollment restricted to graduate philosophy students. Enrollment limited to 22. *P. Roth*

232. Advanced Topics in Value Theory. S

Considers topics central to philosophical questions about value: ethics, normativity, practical reason, relativism, skepticism, responsibility, motivation, emotion, and so forth. In some instances, the investigation will proceed through influential historical figures, ancient to modern. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *D. Guevara*

233. Seminar in Philosophy of Mind. *

Focuses on topics in the philosophy of mind. Topics may include consciousness, mental content, the mind-body problem, and mental causation. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *J. Ellis*

235. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 135. Prerequisite(s): One course in philosophy, psychology, or linguistics. Enrollment restricted to graduate students. *The Staff*

237. Making Up the Mind. *

How does the mind come to be a thing which science can study? Readings focus on how diagnostic categories, for example, multiple personality disorder, attain scientific cachet and what issues surround the "medicalization" of the mind. Enrollment restricted to graduate students. *P. Roth*

239. Philosophy of Religion. *

Investigation of various topics in philosophy of religion. Enrollment restricted to graduate philosophy majors. May be repeated for credit. *R. Otte*

240. The History of Ethics. *

Compares and contrasts two famous ethical works: Aristotle's *Nicomachean Ethics* and Kant's *Groundwork for the Metaphysics of Morals*. Traditionally, Aristotle and Kant are thought to offer opposing views of good action and good agents. Closely compares their ethical principles and arguments for these principles in order to understand each philosopher in his own terms, as well as to determine whether this traditional characterization is accurate. Students cannot receive credit for this course and course 140. Enrollment restricted to graduate philosophy majors. *J. Tannenbaum*

241. Epistemology and Cognition. *

Epistemology is preoccupied with *skepticism*, the view that knowledge is unobtainable. Recently, there has been skepticism voiced about the status of *epistemology* itself; philosophers conversant in cognitive science suggest that epistemology is beset with dubious presuppositions. We survey epistemology, cognitive science, and their interface. Students cannot receive credit for this course and course 141. Enrollment restricted to graduate philosophy majors. *J. Doris*

245. Brave New World: Ethical Issues in Genetics. *

Ethical issues in genetic research and technology, including genetic engineering, cloning, stem cell research, uses of genetic information, and manipulation of human evolution. Also considers the moral responsibility of scientists, obligations to future generations, and the concept of human perfectibility. Students cannot receive credit for this course and course 145. Enrollment restricted to philosophy graduate students. *E. Suckiel*

247. Stem Cell Research: Scientific, Ethical, Social, and Legal Issues. W

Scientific, ethical, social, and legal dimensions of human embryonic stem-cell research, including the moral status of the embryo; the concept of respect for life; ethical constraints on oocyte procurement; creation of embryonic chimeras; federal policies; and political realities. (Also offered as Biology 288. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *E. Suckiel*

252. Poststructuralism. S

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits. (Also offered as History of Consciousness 252. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

254. Politics of Temporality. F

Temporality is the way humans experience time. Examines how continental philosophers have described temporality and how they have explained the relation of temporality to objective clock-time. Phenomenologists such as Husserl, Heidegger, Sartre, and Merleau-Ponty discussed in light of their differences with Kant, Hegel, and Bergson regarding the relation of temporality and subjectivity. Examine Hegel, Benjamin, and Derrida on the relation of temporality and historicity. Enrollment restricted to graduate students. Enrollment limited to 22. *D. Hoy*

256. History of Consciousness. *

Examination of contemporary theories of consciousness in both analytic and continental traditions. Among those who deflate modern philosophy's preoccupation with consciousness are not only Dennett, Davidson, and Rorty, but also Heidegger, Foucault, and Derrida. Among those who argue for irreducibility of subjectivity are not only Searle, Nagel, and Chalmers, but also Sartre, Merleau-Ponty, and Levinas. Discussion of parallel readings from both philosophical perspectives. (Also offered as History of Consciousness 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 25. *D. Hoy*

280. Graduate Colloquia Course (2 credits). F

This colloquia series sponsors speakers each quarter. Students must attend all

colloquia and are encouraged to form discussion groups after each lecture. Enrollment restricted to philosophy graduate students. *P. Roth*

290C. Advanced Topics in Contemporary Ethics. *

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Humean ethical theory. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 190C. Enrollment restricted to graduate philosophy majors. Enrollment limited to 22. *J. Tannenbaum*

290F. Topics in Philosophy of Biology. W

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course is designed to give seniors and graduate students an overview of many of the diverse topics currently under discussion in modern philosophy of biology and provide a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for both this course and course 190F. Enrollment restricted to graduate students. Enrollment limited to 8. May be repeated for credit. *R. Winther*

290H. Environmental Ethics. *

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them. Students cannot receive credit for this course and course 190H. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

290J. Advanced Topics in the History of Ethics. *

Careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Students cannot receive credit for this course and course 190J. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Guevara*

290M. Advanced Graduate Seminar: William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Recent critical analyses of the issues raised in James's philosophy will also be highlighted. Enrollment restricted to graduate students. Enrollment limited to 20. *E. Suckiel*

290P. Major Figures in Contemporary Philosophy. F

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot received credit for this course and course 190P. Enrollment restricted to graduate students majoring in philosophy. Enrollment limited to 22. May be repeated for credit. *P. Roth*

290Q. Philosophy of Mathematics. *

Introduction to the problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? We will examine the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for both this course and course 190Q. Enrollment restricted to graduate students. Enrollment limited to 8. A. Stone

290W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings are from Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Students cannot receive credit for this course and course 190W. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Hoy*

290X. The Good Life. *

Proposed elements of a good life, e.g., courage, loyalty, devotion to ideals, personal flourishing, integrity, compassion, and intellectual understanding. Also discusses fundamental questions such as the meaning of life, the relationship of "living right" to "living well." Students cannot receive credit for this course and course 190X. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *E. Suckiel*

290Y. On Insults. F

What is the role of insult in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Emphasizes philosophical, anthropological, psychoanalytic, and legal approaches to the issues. Enrollment restricted to graduate students and by permission of instructor. Students cannot receive credit for this course and course 190Y. (Formerly course 236.) Enrollment limited to 20. *J. Neu*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

A seminar for graduate students arranged between students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

299. Thesis Research. F,W,S

Enrollment restricted to students who have advanced to candidacy. May be repeated for credit. *The Staff*

* Not offered in 2007-08

204 Natural Sciences 2 Annex (831) 459-2931 http://pbsci.ucsc.edu

(There were no substantive changes to the Physical and Biological Sciences Program Description from the General Catalog 2006-08.)

Program Description

A broad range of majors is offered through the physical and biological sciences. The intellectual rigor of these majors ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in scientific research, environmental research, medicine, law, engineering, technology, and business.

The Division of Physical and Biological Sciences' interdisciplinary framework provides students with the opportunity to attend classes and pursue research that ranges from the study of atoms to the examination of distant galaxies. From abstract number theory to the development of new chemical compounds, from evolution to plate tectonics, we provide students not only with the skills to explore and discover the world but also to define and improve it.

Departments and programs affiliated with the Division of Physical and Biological Sciences include the Departments of Astronomy and Astrophysics; Chemistry and Biochemistry; Earth and Planetary Sciences; Ecology and Evolutionary Biology; Environmental Toxicology; Mathematics; Molecular, Cell, and Developmental Biology; Ocean Sciences; Physics; and the Science Communication Program.

Faculty | Course Descriptions

(There were no substantive changes to the Physical Education Program Description from the General Catalog 2006-08.)

Program Description

Physical education offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With this information, participants will be better prepared to make important choices leading to healthy lifestyles.

Physical education courses at UCSC, which are elective and without academic credit, are offered in a wide variety of activities. The courses consist of instruction, practice, and full participation consistent with each student's ability. While many of the courses are for students at the beginning level, some are designed for the more advanced student. Most courses involve class meetings of one hour's length, twice a week; but some consist of one and one-half hours twice a week or a single two-hour meeting per week. Students may enroll in as many courses as they desire and are permitted to repeat any course.

Students desiring more activity are encouraged to participate in a sports or recreation club; the intramural, recreation, or wellness programs; or an intercollegiate athletic team.

Program Description | Faculty

Lower-Division Courses

5A. Aquatics: Swimming Level I (no credit). F,W,S

Coeducational. Water exploration and primary skills development. Course is designed to teach only "non-swimmers" how to swim. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting. Enrollment limited to 15. *J. Kimball*

5B. Aquatics: Swimming Level II (no credit). F,W,S

Coeducational. Stroke readiness and development. Course is for those who have completed Swimming Level I or who can swim freestyle and demonstrate elementary backstroke. Skills to be learned are underwater swimming, turns, improvement of freestyle and elementary backstroke, beginning side stroke, backstroke, breaststroke, diving, personal safety skills, and basic rescue techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass Swimming Level I course or demonstrate equivalent skills. Students pay a course fee. Enrollment limited to 20. *J. Kimball, J. McCallum*

5C. Aquatics: Swimming Level III (no credit). F

Coeducational. Stroke refinement and skill proficiency. Course teaches refinement of basic strokes and introduces butterfly, plus backstroke, surface diving, turns, endurance swimming, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass in Swimming Level II course or possess equivalent skills in freestyle, sidestroke, elementary backstroke, and breaststroke. Enrollment limited to 30. *J. McCallum*

5D. Aquatics: Swimming Level IV (no credit). W,S

Coeducational. Advanced skills. Designed to perfect the techniques and skills of all basic strokes plus butterfly, surface dives, survival swimming, basic diving, endurance swimming, and personal and rescue skills. Prerequisite(s): pass in Swimming Level III course or possess equivalent swimming skill requirements in freestyle, backstroke, sidestroke, or competitive swimming; instructor determines skill level. Enrollment limited to 30. *J. McCallum*

5E. Aquatics: Lifeguard Training (LT) (no credit). F,S

Red Cross certified lifeguard training. Provides the necessary minimum skills training to qualify as a non-surf lifeguard. Certification includes CPR Pro, AED, PDT, D2, ADMIN, and Title 22 First Aid. Candidates must successfully pass final skill tests and written final exam with 80 percent score. Students are billed for a course fee. Prerequisite(s): must have ability to swim 500 yards in ten minutes, tread

water for one minute, strong swimming skills in free, back, breast, side, and elementary backstroke; must purchase Red Cross LT text book. Enrollment limited to 10. *J. McCallum, K. Musch*

5F. Water Safety Instructor (WSI) (no credit). S

Coeducational. A Red Cross course designed to certify students who complete all required work as swimming instructors. Instruction in teaching techniques, stroke analysis, skilled swimming, class organization, pool safety, and pool maintenance. Practice teaching assignments outside of class with practical and written final exams. Screening test given at first class meeting. Prerequisite(s): must be 17 years old, possess valid ARC Instructor Candidate Training card (ICT), and ARC swimmers-level skills. (Emergency Water Safety (EWS), or Lifeguard Training (LT) certificate is highly recommended). Students pay a course fee. Enrollment limited to 10. *J. McCallum, K. Musch*

5G. Aquatics: Swimming/Conditioning (no credit). F,W,S

Open to all students who wish to explore swimming as a conditioning and fitness exercise. Students should know three competitive strokes, and should be able to swim fifteen minutes without stopping. Short health and fitness lectures precede some classes. Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 40. *The Staff, J. McCallum, K. Musch*

5H. Aquatics: Competitive Swimming (no credit). W

Emphasis on competitive swimming and conditioning techniques. For students who want instruction at the competitive level of swimming. Three hours per week. Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 50. *K. Musch*

5R. Aquatics: Basic Scuba Diving (no credit). F,W,S

Coeducational. Sections geared toward the successful completion of NAUI Scuba Diver Certification. The course is divided into three parts: lecture, pool lab, and open water experience. Four open water training dives are offered. Emphasis is on training for open water scuba diving, using the beach as a base of operation. Students pay a course fee. Prerequisite(s): pass swimming skills tests and medical clearance. It is strongly recommended that students enroll in course 5S. Enrollment limited to 24. *C. Shin*

5S. Aquatics: Boat Scuba Diving (no credit). S

Coeducational. A minimum of two days of boat diving is offered. Emphasis is on training for open water scuba diving using a boat as the base of operation. There is a charge for the boat charter which varies from quarter to quarter. Prerequisite(s): basic SCUBA certification and receive medical clearance. Enrollment limited to 20. *C. Shin*

5T. Aquatics: Advanced Scuba Diving (no credit). F,S

Coeducational. Sections are offered to facilitate the development of the basic scuba diver's open water techniques. A minimum of six open water experiences is offered. Course is geared toward successful completion of NAUI Advanced Scuba Diver Certification. Students pay a course fee. Prerequisite(s): course 5R or pass swimming skills test and medical clearance. Enrollment limited to 25. *C. Shin*

5U. Aquatics: Scuba Instruction (no credit). F,W,S

Coeducational. A course designed for the experienced scuba student who wishes to assist with the scuba instruction program at UCSC. Topics covered include teaching

techniques, skin and scuba techniques, rescue techniques, and safety procedures. Specialty labs also offered in conjunction with course which cover a variety of diving skills. Students pay a course fee. Students are required to enroll in one lab section per quarter. Supervised teaching experience is also provided. Prerequisite(s): Basic Scuba Certification and special prerequisite checking by instructor. Enrollment limited to 30. *C. Shin*

9B. Boating: Basic Sailing (no credit). F,W,S

Coeducational. Introductory course in practical boating safety using 15-foot, two-person sailboats. Satisfactory completion meets prerequisites for intermediate-level sailing courses (dinghy or keelboat). Includes an introduction to rigging, nomenclature, seamanship, proper boat handling techniques, and general boating and aquatic safety. Students pay a course fee. Prerequisite(s): swimming ability. Enrollment limited to 18. *The Staff, R. Kingon*

9C. Boating: Intermediate Sailing (no credit). F,W,S

Coeducational. Offered for both dinghy and keelboat. Dinghy section includes a review of basic sailing with an emphasis on the further development and refinement of small boat sailing techniques. Fifteen-foot, two-person sailboats are used. Keelboat section includes an introduction to rigging, handling, and sailing of the heavier displacement Moore-24 sloops. Boating safety and seamanship stressed. Students pay a course fee. Prerequisite(s): course 9B or equivalent skills. Enrollment limited to 16. *The Staff, R. Kingon*

9D. Boating: Advanced Sailing (no credit). F,S

Coeducational. Offered for both dinghy and keelboat. The dinghy sections are designed for students interested in high performance sailing using single-handed boats (Lasers and Coronado 15's). These courses include special techniques used in racing conditions. The keelboat section includes a further development and refinement of boat handling techniques, including advanced maneuvering, anchoring, racing, with an introduction to the use of spinnakers. Students pay a course fee. Prerequisite(s): course 9C or equivalent skills. Enrollment limited to 12. *The Staff, R. Kingon*

9E. Boating: Competitive Sailing (no credit). F

Coeducational. Instruction and coaching at the advanced sailing level in racing dinghies and keelboats. Emphasis on the physical and mental requirements for racing sailboats and the technical aspects of sail racing. Students will be involved in intercollegiate competition. Prerequisite(s): advanced sailing ability. *R. Kingon*

9H. Boating: Intermediate Rowing (no credit). F,W,S

Coeducational intermediate course designed to cover more advanced rowing techniques and the skills needed for safe open water rowing. Students pay a course fee. Prerequisite(s): basic rowing or permission of instructor. Enrollment limited to 11. *R. Kingon*

9J. Boating: Basic Rowing (no credit). F,W,S

Coeducational. Course designed to cover types of rowing boats, nomenclature, fundamental skills, and specific safety and rescue aspects related to the activity. Students will row singly as well as in groups using 15-foot to 22-foot rowing dories. Students pay a course fee. Prerequisite(s): swimming ability. Enrollment limited to 12. *The Staff, R. Kingon*

15B. Court Sports: Basketball (no credit). F,W,S

Coeducational. Instruction in fundamentals, offensive and defensive strategies, rules, and conditioning designed primarily for beginning and intermediate level players. Enrollment limited to 20. *The Staff, R. Hansen*

15H. Court Sports: Racquetball (no credit). F,W,S

Coeducational. The beginning section provides an introduction to the basic knowledge and skills involved in this indoor racquet sport. The advanced beginning section continues the development of the basic skills emphasizing increased shot variety and advanced strategy. The intermediate section offers the opportunity for further skill development and introduces more advanced offensive skills. Enrollment limited to 18. *J. Bardos, C. George*

15N. Court Sports: Tennis (no credit). F,W,S

Coeducational. The beginning section introduces the basics of forehand, backhand, and serve. Advanced beginning section reviews these basics and introduces the volley, overhead, and lob. The intermediate section reviews all stroke mechanics and covers basic singles and doubles strategy. The advanced section includes use of spins, practice principles, detailed stroke analysis, and advanced play situations. Competitive Tennis is a year-long program for members of the intercollegiate tennis teams. Students pay a course fee. Enrollment limited to 24. *The Staff, R. Hansen*

15T. Court Sports: Volleyball (no credit). F,W,S

Coeducational. Beginning/intermediate, intermediate, and advanced sections are offered for students who desire to learn and improve the basic skills, as well as to understand the rules. Competitive section is open to students interested in participation in the UCSC NCAA Women's Volleyball team. It covers information and practice in all aspects of the competitive volleyball season. Enrollment limited to 25. *S. Teitelbaum*

20A. Dance: Ballet (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on principles of movement, style, and execution of ballet technique. Section in ballet repertory where advanced students have the opportunity to perform is offered in the spring quarter. Students pay a course fee. *The Staff, R. Cochlin, L. Norris*

20B. Folk Dance International (no credit). F,W,S

Coeducational. International folk dance with an emphasis on Balkan and Israeli dances. Sections are also offered periodically in Mexican dance. *R. Cochlin*

20C. Dance: Jazz (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Exploration of jazz dance emphasizing basic technique, styling, rhythm, and isolations. Jazz and contemporary music is used as accompaniment. Some background in ballet strongly recommended before continuing to Jazz II or III. Section in jazz dance repertory where advanced students have the opportunity to perform is offered in spring quarter. Students pay a course fee. Enrollment limited to 40. *The Staff, L. Norris*

20D. Dance: Modern (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on basic techniques and building phrases of movement. Section in choreography and improvisation offered in spring quarter. Section in dance repertory offered periodically. Students pay a course fee. *The Staff, R. Cochlin*

20F. Dance: Individual Studies in Dance (no credit). F,W,S

Coeducational. Designed to give students the opportunity of pursuing their particular interests in the field of dance with the support and direction of a faculty member. Prerequisite(s): instructor determination at first class meeting. *R. Coehlin*

25A. Fencing: Épée (no credit). F,W,S

Coeducational. Basic instruction in the techniques, strategy, and general methodology of modern épée fencing. Emphasis on épée fencing as a development from the traditional French and Italian dueling sword styles as they have evolved to form the modern electrical épée game. Students pay a course fee. *C. Blackburn*

25B. Fencing: Foil (no credit). F,W,S

Coeducational. Instruction in modern competitive French-Italian foil techniques for beginning, intermediate, and advanced levels. Emphasis on physical and mental conditioning leading to improved skill in recreational and competitive areas of involvement. Students pay a course fee. *C. Blackburn*

25C. Fencing: Sabre (no credit). F,W,S

Coeducational. Instruction and practice in basic offensive and defensive skills of modern Hungarian sabre technique. Emphasis on physical and mental conditioning as a foundation for more advanced levels of instruction. Preparation for recreational and competitive involvement. Students pay a course fee. *C. Blackburn*

28K. Field Sports: Soccer (no credit). F,W,S

Coeducational/Women's. Sections are offered in field soccer and indoor soccer. Instruction in the basic techniques, tactics, laws of the game, and injury prevention for beginners and advanced players. Prerequisite(s): determination at first class meeting. *The Staff, D. Chamberlain, M. Runeare*

30G. Fitness Activities: Physical Conditioning (no credit). F,W,S

Coeducational. An exercise course designed to increase the participants' strength, flexibility, coordination, and cardiovascular endurance. Special attention is given to understanding and utilizing sound and safe principles of body alignment and movement. Courses include, but not limited to: Pilates, cardio boxing, stretch and strengthen, and aerobics. *The Staff, L. Hallock, C. Mori*

30H. Fitness Activities: T'ai Chi Ch'uan (no credit). F,W,S

Through balanced movement and breath control, T'ai Chi Ch'uan attempts to forestall many processes of aging by cultivating greater strength of body, mind, and spirit. *C. Blackburn*

30J. Fitness Activities: Weight Training (no credit). F,W,S

Coeducational. An introduction to safe and effective methods of using weight training and other personal conditioning activities. Topics covered include proper weight training techniques, care of body and equipment, and elementary exercise physiology. *The Staff, L. Hallock, R. Andrews, C. Mori, D. Lewis*

30L. Fitness Activities: Yoga Exercises (no credit). F,W,S

Coeducational. Sections offered at beginning, continuing beginning, and advanced beginning levels of Hatha Yoga. *J. Kimball, R. Cochlin*

43A. Martial Arts: Aikido (no credit). F,W,S

Coeducational. A nonviolent, noncompetitive Japanese martial art emphasizing mind-

body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual. Sections offered at beginning and experienced levels. *Y. Shibata*

43G. Martial Arts: Tae Kwon Do (Karate) (no credit). F,W,S

Coeducational. Sections offered at the beginning and intermediate/advanced levels. Covering basic skills, knowledge, and philosophy of Tae Kwon Do and providing instruction in the following aspects of martial arts study: fundamental techniques of self-defense, physical conditioning, emotional control, self-discipline, and self-confidence. Enrollment limited to 35. *S. Song*

50. Personal Fitness and Wellness (no credit). F,W,S

Designed to improve the overall health of each participant. Course material will touch on all the major components of wellness: physical, emotional, social, spiritual, and intellectual health. Topics include cardiovascular training, strength training, flexibility, fitness testing, stress reduction, nutrition, and recreation. Enrollment limited to 20. *The Staff, R. Andrews, C. Mori, D. Lewis*

Physics

211 Interdisciplinary Sciences Building (831) 459-2329 http://physics.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Physics seeks to discover the fundamental regularities or "laws" that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and, even at an elementary level, this fundamental nature can be appreciated.

The Physics Department offers majors in physics; physics (astrophysics), referred to subsequently as astrophysics; and applied physics. These programs prepare students for graduate work in physics, astrophysics, and astronomy; for engineering and other technical positions in industry; and for careers in education. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Physics students and faculty often interact closely in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, and astrophysics/cosmology.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including SLAC at Stanford University and the European centers at CERN and DESY. The SCIPP theorists are active in the phenomenology of high-energy particle interactions; the theory of strong and electroweak interactions; electroweak symmetry breaking and Higgs bosons; and theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics. SCIPP theorists are involved in research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology. SCIPP experimentalists are playing an important role in creating the next major satellite for gamma-ray astronomy, the Gamma Large Area Space Telescope (GLAST). In addition, SCIPP experimentalists, working with colleagues at Los Alamos, conduct a thriving particle astrophysics program detecting TeV gamma rays.

The presence of the strong astrophysics group from the Astronomy and Astrophysics Department in the same building provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major. UCSC is the headquarters for the University of California Observatories, which include Lick Observatory near San Jose and the Keck Observatory in Hawaii; these provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors); the study of magnetic phase transitions; the organization of complex systems (proteins, DNA, and polymers); the development of new electronic devices using novel materials (e.g., polymer-based LEDs); and research in biophysics.

The experimental program uses X-ray and synchrotron radiation techniques at facilities such as the Stanford Synchrotron Radiation Laboratory (SSRL); neutron scattering techniques at various national laboratories; and microwave, optical, X-ray, and specific heat techniques at UCSC. Topics

include phase transitions, crystal defects, correlated electron systems, negative thermal expansion materials, polymer LEDs, and thermoelectric materials. Research topics in theoretical condensed matter physics include the behavior of high-temperature superconductors, phase transitions, and the dynamics of polymers such as DNA. Undergraduate students are actively involved in several condensed matter physics laboratories.

Courses

An undergraduate physics education is broad and basic.

Undergraduate students, even in introductory classes, are exposed to new ideas associated with explorations at the boundaries of human knowledge. Course 10 is a 2-credit survey course that provides an overview of the research activities of the physics faculty. It is recommended for all beginning physics majors and those considering the major.

The lower-division introductory courses in the major programs (Physics 5A, 5B, 5C, and 5D sequence) are well suited to students in the physical sciences and engineering. The6A, 6B, 6C sequence, which also provides a calculus-based introduction to the basic concepts in physics, is better suited to students in the life sciences. The Physics 6 sequence is also appropriate for nonscience students who have a calculus background. Students who take course 6A instead of course 5A, and do very well in it, may contact the department chair for permission to enter the major. The Physics 7A-7B sequence is an algebra- and trigonometry-based sequence covering the basic ideas and applications of physics. The laboratory courses, 5L-5M-5N, 6L-6M-6N, and 7L-7M, must be taken concurrently with the corresponding lecture courses. Finally, courses 1 and 2 are conceptual introductions to physics for nonscience majors.

Major Program

The physics, astrophysics, and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. Students earn a bachelor of science (B.S.) degree. The UCSC physics, astrophysics, and applied physics programs begin with a four-quarter presentation of the introductory concepts of the subject, Introduction to Physics. (Note: the applied physics program also requires completion of a beginning programming course and a general chemistry course.) This is followed by courses which provide an introduction to relativity and quantum physics. The programs continue with a three-quarter sequence in mathematical methods of physics designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor.

The senior thesis, required of all physics, astrophysics, and applied physics majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on work undertaken in a faculty research laboratory. Topics have included particle physics, condensed matter physics, astrophysics, biophysics, and various applied technologies. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

Course Requirements

Physics

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; plus the following upper-division courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, 134, and 139A. In addition, students must pass at least two upper-division electives chosen from physics or the following astronomy and astrophysics courses: 112, 113, 117, or 118. At least one of the two electives must be from the following physics courses: 129, 139B, 155, or 171. In some cases, the second elective requirement may be satisfied by an approved upper-division science or engineering course.

Physics (Astrophysics)

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; plus the following upper-division courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, 135, and 139A. In addition, students must pass at least three upper-division electives selected from the following upper-division courses: Astronomy and Astrophysics 112, 113, 117, 118, or 171 (cross-listed with Physics 171).

Applied Physics

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; Computer Science 60N; Chemistry 1A; plus the following upper-division physics courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, and 134. In addition, students must pass at least three upper-division applied physics electives selected from the following approved list of courses: Biology 21A, Electrical Engineering 103, 127, 128, 145, Physics 107, 109, 115, 152, 155, 156, and 160; or other courses with approval from a faculty adviser.

Comprehensive Requirement

Finally, to satisfy the comprehensive requirement (see below) via a thesis, courses 195A and 195B are required. Note that successful completion of 195A and 195B satisfies the "W" or Writing Intensive general education requirement.

In special cases, minor modifications of these requirements may be granted to suit the specific program of a particular student. Before embarking on a program needing such waivers, students should discuss their plans with a physics adviser and seek approval by petition from the Physics Department office.

Sample Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

Year	Fall	Winter	Spring
1st (frsh)	Math 19A or 20A Phys 5A/L Phys 10 (recommended)	Math 19B or 20B Phys5B/M	Math 23A Phys5C/N
2nd (soph)	Phys 101A Phys 5D (2 units) Math 23B	Phys 101B Phys 116A	Phys 116B Phys 133*
3rd (jr)	Phys 105 Phys 116C Phys 134*	Phys 110A Phys 112	Phys 110B Phys 139A
4th (sr)	Phys 195A Phys elective	Phys 195B Phys elective	

^{*} Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

Sample Physics (Astrophysics) Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the astrophysics major.

Year	Fall	Winter	Spring
1st (frsh)	Math 19A or 20A Phys 5A/L Phys 10 (recommended)	Math 19B or 20B Phys5B/M	Math 23A Phys5C/N
2nd (soph)	Phys 101A Phys 5D (2 units) Math 23B	Phys 101B Phys 116A	Phys 116B Phys 133*
3rd (jr)	Phys 105 Phys 116C Phys 135*	Phys 110A Phys 112	Phys 110B Phys 139A Astr elective
4th (sr)	Phys 195A Astr elective	Phys 195B Astr elective	

^{*} Course 133 is offered winter and spring quarters. Course 135 is offered some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

Sample Applied Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the applied physics major.

Year	Fall	Winter	Spring
1st	Math 19A or 20A	Math 19B or 20B	Math 23A

(frsh)	Phys 5A/L Phys 10 (recommended)	Phys5B/M Cmps 60N	Phys5C/N
2nd (soph)	Phys 101A Phys 5D (2 units) Math 23B	Phys 101B Phys 116A Chem 1A	Phys 116B Phys 133*
3rd (jr)	Phys 105 Phys 116C Phys 134*	Phys 110A Phys 112	Phys 110B Apph elective Phys 11 (recommended)
4th (sr)	Phys 195A Apph elective	Phys 195B	Apph elective

^{*} Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

Students who take course 6A instead of course 5A, and do very well in it, may contact the department chair for permission to enter the major.

Depending on the student's interests, further preparation for graduate school in physics, astrophysics, applied physics, or for other careers is obtained by electing more specialized or applied courses (see the descriptions of courses below). In addition, again depending on the student's academic focus, elective courses may be selected in mathematics, astronomy and astrophysics, and/or other areas of physical science.

For further information about the physics program, please request the undergraduate handbook, A Physics Major's Guide, from the Physics Department office, or look for it online at http://physics.ucsc.edu.

Comprehensive Requirement

The comprehensive exit requirement is normally satisfied by the submission and approval of a thesis (in conjunction with course 195). For physics majors completing either a major or a minor in another field within the Physical and Biological Sciences Division or the Baskin School of Engineering, the comprehensive requirement may be satisfied by scoring at or above the 50th percentile on the Graduate Record Examination Physics Subject Test.

Minor Requirements

Requirements for the minor in physics include Physics 5A/L, 5B/M, 5C/N, 5D (or Physics 6A/L, 6B/M, 6C/N with minimum GPA of 3.5); Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Physics 101A, 101B, 133, and one upper division elective (and any prerequisites) from physics or from a list of courses from other departments approved by the Physics Undergraduate Committee. See the Physics Department for the listing.

Advising and Preparation for the Major

Because the courses for the physics major are sequential, it is strongly advised that students declare their major in physics, astrophysics, or applied physics as early as possible (either at initial registration or by the end of the first year). Advising can be arranged through the Physics Department office.

High school students coming directly to UCSC should emphasize their mathematics preparation with the expectation that they will take calculus in their first quarter at UCSC in order to concurrently take the Physics 5 series, calculus-based physics for physics majors.

Students transferring to UCSC as junior physics, astrophysics, or applied physics majors should have completed three quarters of introductory calculus-based physics with laboratory and three quarters of calculus. It is also desirable to have an introductory course in modern physics as well as mathematics courses in linear algebra, vector calculus, and differential equations. The Physics Department advises each junior transfer student individually upon their arrival.

Graduate Programs

The Physics Department offers graduate programs leading to the M.S. and/or the Ph.D. degrees. In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter, including the courses required for the Ph.D. degree (210, 212, 214, 215, 216, 219) and other courses specific to the student's field of interest. All first-year students also take 205, Introduction to Research. All graduate students also attend a weekly colloquium, 292. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics,

theoretical and experimental condensed matter physics, materials physics, biophysics, synchrotron radiation, cosmic rays, particle astrophysics, and cosmology. After passing a written qualifying examination, Ph.D. students pursue independent research leading to an oral examination and completion of a doctoral dissertation.

Students may obtain a master's degree through course work (eight physics graduate courses) and submission of an approved thesis. The thesis may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a course work plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities (described at the beginning of this section and elsewhere in this catalog): the Santa Cruz Institute for Particle Physics (SCIPP), Lick Observatory (headquartered at UCSC), the Institute of Marine Sciences, and the Institute of Tectonics. There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the Stanford Linear Accelerator Center and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, DESY in Hamburg, Los Alamos, Oak Ridge National Laboratory, NASA, Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting our web site at http://physics.ucsc.edu/or by contacting the Division of Graduate Studies at http://graddiv.ucsc.edu.

Physics

211 Interdisciplinary Sciences Building (831) 459-2329 http://physics.ucsc.edu

<u>Program Description</u> | <u>Faculty</u> | <u>Course Descriptions</u>

Program Description

Physics seeks to discover the fundamental regularities or "laws" that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and, even at an elementary level, this fundamental nature can be appreciated.

The Physics Department offers majors in physics; physics (astrophysics), referred to subsequently as astrophysics; and applied physics. These programs prepare students for graduate work in physics, astrophysics, and astronomy; for engineering and other technical positions in industry; and for careers in education. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Physics students and faculty often interact closely in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, and astrophysics/cosmology.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including SLAC at Stanford University and the European centers at CERN and DESY. The SCIPP theorists are active in the phenomenology of high-energy particle interactions; the theory of strong and electroweak interactions; electroweak symmetry breaking and Higgs bosons; and theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics. SCIPP theorists are involved in research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology. SCIPP experimentalists are playing an important role in creating the next major satellite for gamma-ray astronomy, the Gamma Large Area Space Telescope (GLAST). In addition, SCIPP experimentalists, working with colleagues at Los Alamos, conduct a thriving particle astrophysics program detecting TeV gamma rays.

The presence of the strong astrophysics group from the <u>Astronomy and Astrophysics</u> <u>Department</u> in the same building provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major.

UCSC is the headquarters for the <u>University of California Observatories</u>, which include <u>Lick Observatory</u> near San Jose and the <u>Keck Observatory</u> in Hawaii; these provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors); the study of magnetic phase transitions; the organization of complex systems (proteins, DNA, and polymers); the development of new electronic devices using novel materials (e.g., polymer-based LEDs); and research in biophysics.

The experimental program uses X-ray and synchrotron radiation techniques at facilities such as the <u>Stanford Synchrotron Radiation Laboratory (SSRL)</u>; neutron scattering techniques at various national laboratories; and microwave, optical, X-ray, and specific heat techniques at UCSC. Topics include phase transitions, crystal defects, correlated electron systems, negative thermal expansion materials, polymer LEDs, and thermoelectric materials. Research topics in theoretical condensed matter physics include the behavior of high-temperature superconductors, phase transitions, and the dynamics of polymers such as DNA. Undergraduate students are actively involved in several condensed matter physics laboratories.

Courses

An undergraduate physics education is broad and basic.

Undergraduate students, even in introductory classes, are exposed to new ideas associated with explorations at the boundaries of human knowledge. <u>Course 10</u> is a 2-credit survey course that provides an overview of the research activities of the physics faculty. It is recommended for all beginning physics majors and those considering the major.

The lower-division introductory courses in the major programs (Physics 5A, 5B, 5C, and 5D sequence) are well suited to students in the physical sciences and engineering. The6A, 6B, 6C sequence, which also provides a calculus-based introduction to the basic concepts in physics, is better suited to students in the life sciences. The Physics 6 sequence is also appropriate for nonscience students who have a calculus background. Students who take course 6A instead of course 5A, and do very well in it, may contact the department chair for permission to enter the major. The Physics 7A-7B sequence is an algebra- and trigonometry-based sequence covering the basic ideas and applications of physics. The laboratory courses, 5L-5M-5N, 6L-6M-6N, and 7L-7M, must be taken concurrently with the corresponding lecture courses. Finally, courses 1 and 2 are conceptual introductions to physics for nonscience majors.

Major Program

The physics, astrophysics, and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. Students earn a bachelor of science (B.S.) degree. The UCSC physics, astrophysics, and applied physics programs begin with a four-quarter presentation of the introductory concepts of the subject, Introduction to Physics. (Note: the applied physics program also requires completion of a beginning programming course and a general chemistry course.) This is followed by courses which provide an introduction to relativity and quantum physics. The programs continue with a three-quarter sequence in mathematical methods of physics designed

to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor.

The senior thesis, required of all physics, astrophysics, and applied physics majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on work undertaken in a faculty research laboratory. Topics have included particle physics, condensed matter physics, astrophysics, biophysics, and various applied technologies. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

Course Requirements

Physics

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; plus the following upper-division courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, 134, and 139A. In addition, students must pass at least two upper-division electives chosen from physics or the following astronomy and astrophysics courses: 112, 113, 117, or 118. At least one of the two electives must be from the following physics courses: 129, 139B, 155, or 171. In some cases, the second elective requirement may be satisfied by an approved upper-division science or engineering course.

Physics (Astrophysics)

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; plus the following upper-division courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, 135, and 139A. In addition, students must pass at least three upper-division electives selected from the following upper-division courses: Astronomy and Astrophysics 112, 113, 117, 118, or 171 (cross-listed with Physics 171).

Applied Physics

The requirements for the major include courses 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and 23B or Physics 14; Computer Science 60N; Chemistry 1B 1A; plus the following upper-division physics courses: 101A, 101B, 105, 110A-B, 112, 116A-B-C, 133, and 134. In addition, students must pass at least three upper-division applied physics electives selected from the following approved list of courses: Biology 21A, Electrical Engineering 103, 127, 128, 145, Physics 107, 109, 115, 152, 155, 156, and 160; or other courses with approval from a faculty adviser.

Comprehensive Requirement

Finally, to satisfy the comprehensive requirement (see below) via a thesis, courses

195A and 195B are required. Note that successful completion of 195A and 195B satisfies the "W" or Writing Intensive general education requirement.

In special cases, minor modifications of these requirements may be granted to suit the specific program of a particular student. Before embarking on a program needing such waivers, students should discuss their plans with a physics adviser and seek approval by petition from the Physics Department office.

Sample Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

Year	Fall	Winter	Spring
1st (frsh)	Math 19A or 20A Phys 5A/L Phys 10 (recommended)	Math 19B or 20B Phys5B/M	Math 23A Phys5C/N
2nd (soph)	Phys 101A Phys 5D (2 units) Math 23B	Phys 101B Phys 116A	Phys 116B Phys 133*
3rd (jr)	Phys 105 Phys 116C Phys 134*	Phys 110A Phys 112	Phys 110B Phys 139A
4th (sr)	Phys 195A Phys elective	Phys 195B Phys elective	

^{*} Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

Sample Physics (Astrophysics) Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the astrophysics major.

Year	Fall	Winter	Spring
1st	Math 19A or 20A	Math 19B or 20B	Math 23A
(frsh)	Phys 5A/L	Phys5B/M	Phys5C/N
	Phys 10		
	(recommended)		
2nd	Phys 101A	Phys 101B	Phys 116B
(soph)	Phys 5D (2 units)		
	Math 23B	Phys 116A	Phys 133*
3rd	Phys 105	Phys 110A	Phys 110B
(jr)	Phys 116C	Phys 112	Phys 139A
	Phys 135*		Astr elective
4th	Phys 195A	Phys 195B	
(sr)	Astr elective	Astr elective	

^{*} Course 133 is offered winter and spring quarters. Course 135 is offered some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

Sample Applied Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the applied physics major.

Year	Fall	Winter	Spring
1st (frsh)	Math 19A or 20A Phys 5A/L Phys 10 (recommended)	Math 19B or 20B Phys5B/M Cmps 60N	Math 23A Phys5C/N
2nd (soph)	Phys 101A Phys 5D (2 units) Math 23B	Phys 101B Phys 116A Chem 1B 1A	Phys 116B Phys 133*
3rd (jr)	Phys 105 Phys 116C Phys 134*	Phys 110A Phys 112	Phys 110B Apph elective Phys 11 (recommended)
4th (sr)	Phys 195A Apph elective	Phys 195B	Apph elective

*Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

Students who take course 6A instead of course 5A, and do very well in it, may contact the department chair for permission to enter the major.

Depending on the student's interests, further preparation for graduate school in physics, astrophysics, applied physics, or for other careers is obtained by electing more specialized or applied courses (see the descriptions of courses below). In addition, again depending on the student's academic focus, elective courses may be selected in mathematics, astronomy and astrophysics, and/or other areas of physical science.

For further information about the physics program, please request the undergraduate handbook, A Physics Major's Guide, from the <u>Physics Department</u> office, or look for it online at http://physics.ucsc.edu.

Comprehensive Requirement

The comprehensive exit requirement is normally satisfied by the submission and approval of a thesis (in conjunction with course 195). For physics majors completing either a major or a minor in another field within the <u>Physical and Biological Sciences Division</u> or the <u>Baskin School of Engineering</u>, the comprehensive requirement may be satisfied by scoring at or above the 50th percentile on the Graduate Record Examination Physics Subject Test.

Minor Requirements

Requirements for the minor in physics include Physics 5A/L, 5B/M, 5C/N, 5D (or Physics 6A/L, 6B/M, 6C/N with minimum GPA of 3.5); Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Physics 101A, 101B, 133, and one upper division elective (and any prerequisites) from physics or from a list of courses from other departments approved by the Physics Undergraduate Committee. See the Physics Department for the listing.

Advising and Preparation for the Major

Because the courses for the physics major are sequential, it is strongly advised that students declare their major in physics, astrophysics, or applied physics as early as possible (either at initial registration or by the end of the first year). Advising can be arranged through the Physics Department office.

High school students coming directly to UCSC should emphasize their mathematics preparation with the expectation that they will take calculus in their first quarter at UCSC in order to concurrently take the Physics 5 series, calculus-based physics for physics majors.

Students transferring to UCSC as junior physics, astrophysics, or applied physics majors should have completed three quarters of introductory calculus-based physics with laboratory and three quarters of calculus. It is also desirable to have an introductory course in modern physics as well as mathematics courses in linear algebra, vector calculus, and differential equations. The Physics Department advises each junior transfer student individually upon their arrival.

Graduate Programs

The Physics Department offers graduate programs leading to the M.S. and/or the Ph.D. degrees. In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter, including the courses required for the Ph.D. degree (210, 212, 213, 214, 215, 216, 219) and other courses specific to the student's field of interest. All first-year students also take 205, Introduction to Research. All graduate students also attend a weekly colloquium, 292. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics, materials physics, biophysics, synchrotron radiation, cosmic rays, particle astrophysics, and cosmology. After passing a written qualifying examination, Ph.D. students pursue independent research leading to an oral examination and completion of a doctoral dissertation.

Students may obtain a master's degree through course work (eight physics graduate courses) and submission of an approved thesis. The thesis may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a course work plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities (described at the beginning of this section and elsewhere in this catalog): the Santa Cruz Institute for Particle Physics (SCIPP), Lick Observatory (headquartered at UCSC), the Institute of Marine Sciences, and the Institute of Tectonics. There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the Stanford Linear Accelerator Center and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, DESY

in Hamburg, Los Alamos, Oak Ridge National Laboratory, NASA, Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting our web site at http://physics.ucsc.edu/ or by contacting the Division of Graduate Studies at http://graddiv.ucsc.edu.

Faculty and Professional Interests

Professor

Thomas Banks

String and particle theory, quantum gravity, and cosmology

David P. Belanger

Experimental condensed matter physics, phase transitions

Frank G. Bridges, Emeritus

George Brown, Emeritus

Sue A. Carter

Experimental condensed matter physics, polymer physics, molecular electronics, phase transitions, electronic and optical properties of materials

Joshua M. Deutsch

Condensed matter theory

Michael Dine

Theory of elementary particles

David E. Dorfan, Emeritus

Stanley M. Flatté, Emeritus

George D. Gaspari, Emeritus

Howard E. Haber

Theory and phenomenology of fundamental particles and their interactions

Clemens A. Heusch

Experimental high-energy physics

Robert P. Johnson

Experimental high-energy physics, astrophysics

Onuttom Narayan

Theoretical condensed matter physics

Michael Nauenberg, Emeritus

Joel R. Primack

Theory of fundamental particles, cosmology, astrophysics

Bruce Rosenblum, Emeritus

Matthew Sands, Emeritus

Zack Schlesinger

Experimental condensed matter physics, infrared and optical spectroscopy, strongly correlated electron systems, novel materials, negative thermal expansion, underconstraint and geometrical frustration

Bruce Schumm

Experimental particle physics

Abraham Seiden

Experimental high-energy physics

B. Shastry

Condensed matter physics, strongly correlated matter, Mott-Hubbard physics, high Tc superconductivity, quantum magnetism, exactly integrable systems, exactly solvable models of many-body systems and in statistical mechanics, quantum chaos, geometric frustration

A. Peter Young

Condensed matter theory, statistical mechanics

Associate Professor

Anthony Aguirre

Cosmology of the early and late universe: inflation and the global structure of cosmological models; the intergalactic medium and its enrichment with heavy elements; galaxy formation, evolution, and feedback processes; dark matter; theories of modified gravity

Peter L. Scott, Emeritus

David M. Smith

High-energy astrophysics; X-ray and gamma-ray detectors and instrumentation; solar, terrestrial, and planetary sources of gamma radiation

Assistant Professor

Gey-Hong Gweon

Experimental condensed matter physics

Jason Nielsen

Experimental high-energy physics

Stefano Profumo

Theory of particle physics and particle astrophysics

Lecturer

Fred Kuttner

Foundations of quantum mechanics; physics education

Professor

George R. Blumenthal (Astronomy and Astrophysics)

Cosmology, galaxy formation, high-energy astrophysics

Wentai Liu (Electrical Engineering)

Retinal prosthesis, biomimetic systems, integrated neuro-electronics, molecular electronics, CMOS and SOI transceiver design, current mode band limited signaling, microelectronic sensor, timing/clock recovery and optimization, noise characterization and modeling, and computer vision/image processing

William G. Mathews (Astronomy and Astrophysics)

Galaxies, high-energy astrophysics, gaseous nebulae; cornetto (music)

Richard Montgomery (Mathematics)

Celestial mechanics, differential geometry, gauge theory, mechanics (quantum and classical), and control theory

Ali Shakouri (Electrical Engineering)

Quantum electronics, nano- and microscale heat and current transport in semiconductor devices; thermoelectric/thermionic energy conversion; renewable energy sources; thermal imaging; micro-refrigerators on a chip; and optoelectronic integrated circuits

Associate Professor

Joel A. Kubby (Electrical Engineering)

Micro-Electro-Mechanical-Systems (MEMS), adaptive optics, integrated optics, bio-MEMS

Assistant Professor

Pascale Garaud (Applied Mathematics and Statistics)

Astrophysics, geophysics, fluid dynamics, numerical resolutions of differential equations, and mathematical modeling of natural flows

Holger Schmidt (Electrical Engineering)

Integrated optics for biomedicine and quantum optics, nano-magento-optics, semiconductor physics, optoelectonic and photonic devices, ultrafast optics, quantum interference

Johannes Walcher (Mathematics)

String theory, mirror symmetry, mathematical and particle physics

Adjunct Professor

William Atwood

Donald Coyne, Emeritus

Alan Litke

Michael Riordan

Physics

211 Interdisciplinary Sciences Building (831) 459-2329 http://physics.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Conceptual Physics. W

Addressed to majors in non-science disciplines. Topics in classical and modern physics and the relation to physical phenomena in the world around us. Concepts are stressed, but some calculational techniques are developed. Knowledge of high school algebra is desirable. (General Education Code(s): IN, Q.) *T. Schalk*

2. The Quantum Enigma. S

Addressed to non-science majors but may be of interest to science majors as well, since material is largely not covered in the regular physics program. Focus is the bizarre view of physical reality and connectedness demanded by quantum mechanics, the basis of modern physics. A brief overview of classical physics and relativity is included. Concepts are stressed, but some calculational techniques are developed. (General Education Code(s): IN, Q.) *F. Kuttner*

5A. Introduction to Physics I. F

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Corequisite(s): concurrent enrollment in course 5L and Mathematics 19A or 20A is required. (General Education Code(s): IN, Q.) *A. Aguirre*

5B. Introduction to Physics II. W

A continuation of 5A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids. Prerequisite(s): courses 5A/L and Mathematics 19A or 20A; concurrent enrollment in course 5M is required. Corequisite: Mathematics 19B or 20B. (General Education Code(s): IN.) *H. Haber*

5C. Introduction to Physics III. S

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. Concurrent enrollment in 5N is required. Corequisite: Mathematics 22 or 23A. Courses 5B/M recommended. (General Education Code(s): IN.) *J. Primack*

5D. Heat, Thermodynamics, and Kinetics (2 credits). F

Introduction to temperature, heat, and thermal conductivity, ideal gases, the first and second laws of thermodynamics, and an introduction to kinetic theory. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. F. Kuttner

5L. Introduction to Physics Laboratory (1 credit). F

Laboratory sequence illustrating topics covered in course 5A. One three-hour laboratory session per week. Prerequisite(s): concurrent enrollment in course 5A is

5M. Introduction to Physics Laboratory (1 credit). W

Laboratory sequence illustrating topics covered in course 5B. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L; concurrent enrollment in course 5B is required. *The Staff*

5N. Introduction to Physics Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 5C. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L. Concurrent enrollment in 5C is required. Courses 5B/M recommended. *The Staff*

6A. Introductory Physics I. F,W

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Prerequisite(s): Concurrent enrollment in course 6L required. Corequisite: Mathematics 11A or 19A or 20A. (General Education Code(s): IN, Q.) (F) P. Graham, (W) The Staff

6B. Introductory Physics II. W,S

A continuation of 6A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids. Introduction to thermodynamics, including temperature, heat, thermal conductivity, and kinetic energy. Prerequisite(s): courses 5A/L or 6A/L and Mathematics 11A or 19A or 20A; concurrent enrollment in course 6M required. Corequisite: Mathematics 11B or 19B or 20B. (General Education Code(s): IN.) (W) The Staff, (S) Z. Schlesinger

6C. Introductory Physics III. F,S

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations. Prerequisite(s): courses 6A/L or 5A/L and Mathematics 11B or 19B or 20B; concurrent enrollment in course 6N required. Corequisite: Mathematics 22 or 23A. Courses 6B/M are suggested. (General Education Code(s): IN.) (F) D. Smith, (S) T. Banks

6L. Introductory Physics Laboratory (1 credit). F,W

Laboratory sequence illustrating topics covered in course 6A. One three-hour laboratory session per week. Prerequisite(s): Concurrent enrollment in course 6A required. *The Staff*

6M. Introductory Physics Laboratory (1 credit). W,S

Laboratory sequence illustrating topics covered in course 6B. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L or 6A/L; concurrent enrollment in course 6B required. *The Staff*

6N. Introductory Physics Laboratory (1 credit). F,S

Laboratory sequence illustrating topics covered in course 6C. One three-hour laboratory session per week. Prerequisite(s): courses 6A/L or 5A/L; concurrent enrollment in course 6C required; courses 6B/M are suggested. *The Staff*

7A. Elementary Physics I. W

The physics of mechanics, wave motion, temperature, pressure, and fluids. A lecture and discussion course that provides a basic foundation of physics for students whose major interest is in biology or another science. Concurrent enrollment in PHYS 7L is required. High school algebra, geometry, and trigonometry are recommended. (General Education Code(s): IN, Q.) *The Staff*

7B. Elementary Physics II. S

A continuation of course 7A. The physics of electricity and magnetism, optics, special relativity, quantum theory and the atom. Prerequisite(s): course 7A. Concurrent enrollment in course 7M is required. (General Education Code(s): IN.) *S. Carter*

7L. Elementary Physics Laboratory (1 credit). W

Laboratory sequence illustrating topics covered in course 7A. One three-hour laboratory session per week. Concurrent enrollment in PHYS 7A is required. *The Staff*

7M. Elementary Physics Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 7B. One three-hour laboratory session per week. Concurrent enrollment in course 7B is required. *The Staff*

10. Overview of Physics (2 credits). F

One lecture per week providing a descriptive overview of major areas in the discipline. These include fundamental particles, solid state, fluids, nonlinear dynamics, biophysics, and cosmology. Lectures by various faculty with research interests in these fields. The course is suggested for prospective physics majors, or others, before they enroll in the Physics 5 sequence. *F. Kuttner*

11. The Physicist in Industry (2 credits). S

One two-hour meeting per week. Subjects include roles of the physicist in industry, the business environment in a technical company, economic considerations, job hunting, and discussions with physicists with industrial experience. Enrollment by permission of instructor. Priority given to applied physics upper-division students; other majors if space available. Enrollment limited to 15. *F. Kuttner, B. Rosenblum*

14. Introduction to Vector Calculus with Applications (2 credits). *

Partial differentiation, the chain rule, multiple integrals, Jacobians, surface integrals and the divergence, line integrals and the curl, Stokes theorem, gradients and directional derivatives. Prerequisite(s): Mathematics 22 or 23A. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

75. The Observer in Quantum Mechanics (2 credits). W

Non-mathematical seminar discussing the mysteries arising with the role of the observer in quantum mechanics. Addressed to majors in the physical or biological sciences. Covers material largely untreated in the usual science curriculum. Enrollment restricted to sophomores, juniors, seniors, and graduate students. Enrollment limited to 14. *B. Rosenblum*

80A. Physics and Psychophysics of Music. *

Fundamental theory of vibration, sound waves, sound propagation, diffraction, and interference. Free, coupled, and driven oscillations. Resonance phenomena and modes of oscillation. Fourier's theorem. Anatomy and psychophysics of the ear. Musical scales and intervals. Nature of plucked and bowed strings; guitar, violin, piano. Woodwind and brass instruments. Architectural acoustics. High school algebra and basic knowledge of musical notation recommended. (General Education Code(s):

80C. Cosmology and Culture. *

Introduction to scientific cosmology. Examination of cultural roles of creation myths and cosmologies; examples include Zunian, Mayan, and ancient, medieval, and modern Judeo-Christian cosmologies. Possible cultural and religious repercussions of Big Bang, Gaia, and other modern origin stories. (Also offered as Crown College 80C. Students cannot receive credit for both courses.) (General Education Code(s): T7-Natural Sciences or Social Sciences.) *J. Primack*

80D. The Quantum Century. F

Survey of 20th-century physics, emphasizing quantum theory and its impact upon science and culture. Includes relativity, atomic and nuclear structure, and applications in transistors, lasers, and nuclear weapons. Ends with discussions of elementary particle physics and quantum cosmology. Aimed at non-science majors as it stresses historical and philosophical perspectives rather than calculations (only non-calculus math will be used), but will also be of interest to science majors. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, Q.) *M. Riordan*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. The Staff

Upper-Division Courses

101A. Introduction to Modern Physics I. F

Special theory of relativity. Early experiments and models in quantum physics. Introduction to concepts and calculations in quantum mechanics. Single-electron atoms. Prerequisite(s): courses 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *Z. Schlesinger*

101B. Introduction to Modern Physics II. W

Topics in quantum physics, including angular momentum and spin, the Pauli exclusion principle, and quantum statistics. Applications in multi-electron atoms, molecules, solid state physics, and nuclear and particle physics. Prerequisite(s): course 14 or Mathematics 23B; course 101A; 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *F. Kuttner*

105. Mechanics. F

Particle dynamics in one, two, and three dimensions. Conservation laws. Small oscillations, Fourier series and Fourier integral solutions. Phase diagrams and nonlinear motions, Lagrange's equations, and Hamiltonian dynamics. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, and 116A-B. *R. Johnson*

107. Introduction to Fluid Dynamics. *

Fundamental topics in fluid dynamics. Euler and Lagrange descriptions of continuum dynamics. Conservation laws for inviscid and viscous flows. Potential flows. Exact solutions of the Navier-Stokes equation. Boundary layer theory. Gravity waves. Students cannot receive credit for this course and Applied Mathematics and Statistics 217. (Also offered as Applied Math and Statistics 107. Students cannot receive credit for both courses.) Prerequisite(s): Applied Mathematics and Statistics 27, or courses 116A-B-C, or equivalent.. *N. Brummell*

110A. Electricity, Magnetism, and Optics. W

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): 116A-B-C. *The Staff*

110B. Electricity, Magnetism, and Optics. S

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): course 110A, and 116A-B-C. *M. Dine*

112. Thermodynamics and Statistical Mechanics. W

Consequences of the first and second laws of thermodynamics, elementary statistical mechanics, thermodynamics of irreversible processes. Prerequisite(s): courses 5B/M, 5C/N, 5D, 101A, 101B, 105, and 116A-B. A. Young

115. Computational Physics. S

This course will apply efficient numerical methods to the solutions of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language, such as Mathematica, to the solution of physical problems and develop appropriate error and stability estimates. Prerequisite(s): courses 101B, 105, 116A-B-C, or equivalent. Basic programming experience in C or Fortran. No previous experience with Mathematica is required. *A. Young*

116A. Mathematical Methods in Physics. W

Infinite series include power series, asymptotic expansions, special functions defined by an integral, complex numbers and some functions of a complex variable, topics in linear algebra including matrices and determinants, solving systems of linear equations, eigenvalue problems and matrix diagonalization, introduction to tensors. Prerequisite(s): courses 5A/L, 5B/M, 5C/N; Mathematics 23A, 23B. *S. Profumo*

116B. Mathematical Methods in Physics. S

Probability and statistics, including discrete and continuous random variables; mean and standard deviation; Gaussian, binomial and Poisson distributions; least squares fits and estimation of error bars; ordinary differential equations; series solution of differential equations including Legendre polynomials and Bessel functions; orthogonal polynomials and Sturm-Liouville problems; Fourier series. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A; and Mathematics 23A and 23B. *O. Narayan*

116C. Mathematical Methods in Physics. F

Calculus of variations, including Euler equations and Lagrange's equations of motion in classical mechanics; partial differential equations and boundary value problems by separation of variables; functions of a complex variable including the residue thereom and a brief discussion of conformal mapping; Fourier transforms including applications to partial differential equations; the Dirac delta function and a discussion of Green's functions; Laplace transforms. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A-B, Mathematics 23A and 23B. *J. Deutsch*

120. Polymer Physics. S

Statistical properties polymers; scaling behavior, fractal dimensions; random walks, self avoidance; single chains and concentrated solutions; dynamics and topological effects in melts; polymer networks; sol-gel transitions; polymer blends; application to biological systems; computer simulations will demonstrate much of the above. Students cannot receive credit for this course and course 240. Prerequisite(s): courses

129. Nuclear and Particle Physics. W

Properties and classification of the elementary particles, their weak and strong interactions, nuclear physics, high energy phenomena analyzed by quantum mechanical methods, experimental methodology. Prerequisite(s): courses 116A-B-C and 139A; students with equivalent course work may contact instructor for permission to enroll. Offered in alternate academic years. *D. Williams*

133. Intermediate Laboratory. W,S

Demonstration of phenomena of classical and modern physics. Development of a familiarity with experimental methods. Special experimental projects may be undertaken by students in this laboratory. Prerequisite(s): course 101A. (W) G. Brown, (S) D. Smith

134. Physics Advanced Laboratory. F,W

Individual experimental investigations of basic phenomena in atomic, nuclear, and solid state physics. Prerequisite(s): courses 133 and 101B. May be repeated for credit. (F) J. Nielsen, (W) S. Carter

135. Astrophysics Advanced Laboratory. *

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: 135A in fall and 135B in winter, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. Intended primarily for juniors and seniors majoring or minoring in astrophysics. *R. Dewey*

135A. Astrophysics Advanced Laboratory (3 credits). F

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135A. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

135B. Astrophysics Advanced Laboratory (2 credits). W

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135B. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

139A. Quantum Mechanics. S

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation methods, and scattering theory. Offered in spring. Prerequisite(s): courses 101A, 101B, 116A-B-C. *G. Gweon*

139B. Quantum Mechanics. F

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation

methods, and scattering theory. Offered in fall. Prerequisite(s): courses 101A, 101B, 116A-B-C and 139A. Z. Schlesinger

143. Supervised Teaching (2 credits). F,W,S

Supervised tutoring in selected introductory courses. Students should have completed course 101A and 101B as preparation. Students submit petition to sponsoring agency. *The Staff*

152. Optoelectronics. F

The first half of the course covers the theory of optoelectronics including wave, electromagnetic, and photon optics, modulation of light by matter, and photons in semiconductors. The second half covers applications including displays, lasers, photodetectors, optical switches, fiber optics, and communication systems. Prerequisite(s): courses 101A, 101B, and 110A. S. Carter

155. Solid State Physics. W

Interatomic forces and crystal structure, diffraction, lattice vibrations, free electron model, energy bands, semiconductor theory and devices, optical properties, magnetism, magnetic resonance, superconductivity. Prerequisite(s): courses 112 and 139A; students with equivalent course work may contact instructor for permission to enroll. *G. Gweon*

156. Applications of Solid State Physics. S

Emphasizes the application of condensed matter physics to a variety of situations. Examples chosen from subfields such as semiconductor physics, lasers, superconductivity, low temperature physics, magnetism, and defects in crystals. Prerequisite(s): courses 101A and 101B. *G. Alers*

160. Practical Electronics. S

Provides a practical knowledge of electronics that experimentalists generally need in research. The course assumes no previous knowledge of electronics and progresses according to the interest and ability of the class. Based on weekly lectures. However, with the aid of the instructor, the students are expected to learn mainly through the design, construction, and debugging of electronics projects. Students are billed a materials fee. Prerequisite(s): courses 5C and 5N or 6C and 6N. Offered in alternate academic years. *R. Johnson*

171. General Relativity, Black Holes, and Cosmology. F

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments. (Also offered as Astronomy and Astrophysics 171. Students cannot receive credit for both courses.) Prerequisite(s): courses 105, 110A, 110B, and 116A-B-C. *M. Dine*

191. Teaching Practicum. F,W,S

Designed to provide upper-divsion undergraduates with an opportunity to work with students in lower division courses, leading discussions, reading and marking submissions, and assisting in the planning and teaching of a course. Prerequisite(s): excellent performance in major courses; instructor approval required; enrollment restricted to senior physics majors. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.)

Prerequisite(s): upper-division standing; submission of a proposal supported by a faculty member willing to supervise. *The Staff*

195A. Senior Thesis Research (3 credits). F

A seminar course to help students explore their theses topics and plan, organize, and develop their theses. Choosing a thesis topic, preparing a work plan for the research, assembling an annotated bibliography, and writing a draft outline of the thesis. Students must complete 5 credits in the 195 series to satisfy the writing intensive (W) general education requirement. *D. Belanger*

195B. Senior Thesis Research (2 credits). W

Seminars to help students explore their theses topics and plan, organize, and develop their theses. Refining the thesis outline; preparing draft sections, preparing a written progress report; delivering an oral progress report. Students must complete 5 credits in the 195 series to satisfy the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *D. Belanger*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

199F. Tutorial (2 credits).

Tutorial. May be repeated for credit. The Staff

Graduate Courses

205. Introduction to Research in Physics (2 credits). *

Introduction to current research opportunities at UCSC for graduate students. Topics include: elementary particle physics, condensed matter and solid state physics, high energy astrophysics, biophysics, and cosmology. Selected topics related to career development may also be included. Enrollment restricted to graduate students or by permission of instructor. *The Staff*

210. Classical Mechanics. F

Generalized coordinates, calculus of variations, Lagrange's equations with constraints, Hamilton's equations, applications to particle dynamics including charged particles in an electromagnetic field, applications to continuum mechanics including fluids and electromagnetic fields, introduction to nonlinear dynamics. Enrollment restricted to graduate students only, except by permission of instructor. *B. Shastry*

212. Electromagnetism I. F

Electrostatics and magnetostatics, boundary value problems with spherical and cylindrical symmetry, multipole expansion, dielectric media, magnetic materials, electromagnetic properties of materials, time-varying electromagnetic fields, Maxwell's equations, conservation laws, plane electromagnetic waves and propagation, waveguides and resonant cavities. Enrollment restricted to graduate students only, except by permission of instructor. *H. Haber*

214. Electromagnetism II. W

Lorentz covariant formulation of Maxwell's equations, dynamics of relativistic charged particles and electromagnetic fields, scattering and diffraction. Topics in classical radiation theory: simple radiating systems radiation by moving charges, multipole radiation, synchrotron radiation, Cerenkov radiation, bremsstrahlung and radiation damping. Prerequisite(s): course 212. Enrollment restricted to graduate

students only, except by permission of instructor. Offered in alternate academic years. *M. Dine*

215. Introduction to Non-Relativistic Quantum Mechanics. W

Mathematic introduction; fundamental postulates; time evolution operator, including the Heisenberg and Schrodinger pictures; simple harmonic oscillator and coherent states; one-dimensional scattering theory, including S-matrix resonant phenomena; two-state systems, including magnetic resonance; symmetries, including rotation group, spin, and the Wigner-Eckart theorem; rotationally invariant problems, including the hydrogen atom; gauge invariance, including Landau levels; introduction to path integral. Enrollment restricted to graduate students only, except by permission of instructor. *O. Narayan*

216. Advanced Topics in Non-Relativistic Quantum Mechanics. S

Approximate methods: time-independent perturbation theory, variational principle, time-dependent perturbation theory; three-dimensional scattering theory; identical particles; permutation symmetry and exchange degeneracy, anti-symmetric and symmetric states; many-body systems and self-consistent fields: variational calculations; second quantized formalism, including Fock spaces/number representation, field operators and Green functions; applications: electron gas; quantization of the electromagnetic field and interaction of radiation with matter: absorption, emission, scattering, photoelectric effect, and lifetimes. Prerequisite(s): course 215. Enrollment restricted to graduate students only, except by permission of instructor. *A. Seiden*

217. Quantum Field Theory I. F

Lorentz invariance in quantum theory, Dirac and Klein-Gordon equations, the relativistic hydrogen atom, Green functions and canonical approach to field theory, quantum electrodynamics, Feynman diagrams for scattering processes, symmetries and Ward identities. Students learn to perform calculations of scattering and decay of particles in field theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *J. Primack*

218. Quantum Field Theory II. W

Path integral approach to quantum field theory. Theory of renormalization and the renormalization group, introduction to gauge theories and spontaneously broken field theories. Applications to the standard model of strong, weak, and electromagnetic interactions. Prerequisite(s): course 217. Enrollment restricted to graduate students only, except by permission of instructor. *T. Banks*

219. Statistical Physics. S

The basic laws of thermodynamics, entropy, thermodynamic potentials, kinetic theory of gases, quantum and classical statistical mechanics, virial expansion, linear response theory. Applications in condensed matter physics. Enrollment restricted to graduate students only, except by permission of instructor. *B. Shastry*

220. Theory of Many-Body Physics. W

Finite temperature Green functions, Feynman diagrams, Dyson equation, linked cluster theorem, Kubo formula for electrical conductivity, electron gas, random phase approximation, Fermi surfaces, Landau fermi liquid theory, electron phonon coupling, Migdal's theorem, superconductivity. Prerequisite(s): courses 216 and 219. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *B. Shastry*

221A. Introduction to Particle Physics I. F

First quarter of a two-quarter graduate level introduction to particle physics, including the following topics: discrete symmetries, quark model, particle classification, masses and magnetic moments, passage of radiation through matter, detector technology, accelerator physics, Feynman calculus, and electron-positron annihilation. Prerequisite(s): course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *S. Profumo*

221B. Introduction to Particle Physics II. W

Second quarter of a two-quarter graduate level introduction to particle physics, including the following topics: nucleon structure, weak interactions and the Standard Model, neutrino oscillation, quantum chromodynamics, CP violation, and a tour of the Stanford Linear Accelerator Center. Prerequisite(s): course 221A; course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *J. Nielsen*

222. Quantum Field Theory III. S

Focuses on the theoretical underpinnings of the standard model, including the spontaneous symmetry breaking, the renormalization group, the operator product expansion, and precision tests of the Standard Model. Prerequisite(s): courses 218 and 221B. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *H. Haber*

224. Origin and Evolution of the Universe. W

Introduction to the particle physics and cosmology of the very early universe: relativistic cosmology, initial conditions, inflation and grand unified theories, baryosynthesis, nucleosynthesis, gravitational collapse, hypotheses regarding the dark matter and consequences for formation of galaxies and large scale structure. (Also offered as Astronomy and Astrophysics 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Primack*

226. General Relativity. S

Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes. (Also offered as Astronomy and Astrophysics 226. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *A. Aguirre*

227. Advanced Fluid Dynamics. F

Fundamentals of heat transfer and fluid flow: thermal convection, gravity waves, vortex dynamics, viscous flows, instabilities, turbulence, and compressible flows. Students develop computer program for simulating thermal convection and gravity waves. Vector calculus and computer programming experience required. (Formerly *Fluid Dynamics*.) An introductory course in fluid dynamics recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *G. Glatzmaier*, *C. Edwards*

231. Introduction to Condensed Matter Physics. F

Crystal structures, reciprocal lattice, crystal bonding, phonons (including specific heat), band theory of electrons, free electron model, electron-electron and electron-phonon interactions, transport theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *G. Gweon*

232. Condensed Matter Physics. W

Magnetism (para, ferro, anti-ferro, ferri), spin waves, superconductivity, introduction to semiconductors. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. *J. Deutsch*

233. Advanced Condensed Matter Physics. *

A special topics course which includes areas of current interest in condensed matter physics. Possible topics include superconductivity, phase transitions, renormalization group, disordered systems, surface phenomena, magnetic resonance, and spectroscopy. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *The Staff*

234. Soft Condensed Matter Physics. *

A selection of topics from: liquid crystals, biological systems, renormalization group and critical phenomena, stochastic processes, Langevin and Fokker Planck equations, hydrodynamic theories, granular materials, glasses, quasicrystals. Prerequisite(s): courses 219 and 232. Enrollment restricted to graduate students. *O. Narayan, A. Young*

240. Polymer Physics. S

Statistical properties polymers. Scaling behavior, fractal dimensions. Random walks, self avoidance. Single chains and concentrated solutions. Dynamics and topological effects in melts. Polymer networks. Sol-gel transitions. Polymer blends. Application to biological systems. Computer simulations demonstrating much of the above. Students cannot receive credit for this course and course 120. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Deutsch*

242. Computational Physics. S

This course will apply efficient numerical methods to the solution of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language such as Mathematica to the solution of physical problems and will develop appropriate error and stability estimates. Prerequisite(s): basic programming experience in C or Fortran. No previous experience with Mathematica is required. Enrollment restricted to graduate students only, except by permission of instructor. *A. Young*

250. Mathematical Methods. F

Probability theory with applications to data analysis, complex variables, Cauchy's residue theorem, dispersion relations, saddle-point type asymptotic methods for integrals, integral transforms, ordinary differential equations and orthogonal polynomials, partial differential equations and boundary value problems, and Greens functions. Integral equations also included if time permits. Enrollment restricted to graduate students. *A. Young*

251. Group Theory and Modern Physics. *

Finite and continuous groups, group representation theory, the symmetric group and Young tableaux, Lie groups and Lie algebras, irreducible representations of Lie algebras by tensor methods, unitary groups in particle physics, Dynkin diagrams, Lorentz and Poincaré groups. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *H. Haber*

290. Special Topics. *

A series of lectures on various topics of current interest in physics at UC Santa Cruz. Enrollment restricted to graduate students only, except by permission of instructor. May be repeated for credit. *T. Banks*

291A. Cosmology (2 credits). F,W,S

Intensive research seminar on cosmology and related topics in astrophysics: nature of dark matter; origin of cosmological inhomogeneties and other initial conditions of the big bang; origin and evolution of galaxies and large scale structure in the universe. Enrollment restricted to graduate students only, except by permission of instructor. *J. Primack, A. Aguirre*

291C. Developments in Theoretical Particle Physics (2 credits). F,W,S

Seminar on the current literature of elementary particle physics, ranging from strong and weak interaction phenomenology to Higgs physics, supersymmetry, and superstring theory. Students may present their own research results. Prerequisite(s): course 218; enrollment restricted to graduate students. May be repeated for credit. *H. Haber, M. Dine*

291D. Experimental High-Energy Collider Physics (2 credits). F,W,S

Seminar on current results in experimental high-energy particle physics. Topics follow recently published results, including design of experiments, development of particle detector technology, and experimental results from new particle searches, quantum chromodynamics, and properties of heavy flavor quarks. Enrollment restricted to graduate students. May be repeated for credit. *J. Nielsen*

291E. Applied Physics (2 credits). F,W,S

Intensive research seminar on applied physics and related topics in materials science, including semiconductor devices, optoelectronics, molecular electronics, magnetic materials, nanotechnology, biosensors, and medical physics. Students may present their own research results. Enrollment restricted to graduate students. May be repeated for credit. *S. Carter, G. Alers*

291F. Experimental High-Energy and Particle Astrophysics Seminar (2 credits). F,W,S

Survey of current research in experimental high-energy and particle astrophysics. Recent observations and development in instrumentation for x-rays, gamma rays, and neutrinos, and evidence for dark matter and other new particles. Students lead discussion of recent papers. Enrollment restricted to seniors and graduate students and by permission of instructor. Enrollment limited to 15. May be repeated for credit. *D. Smith*

291G. Condensed Matter Physics Research Seminar (2 credits). F,W,S

Weekly seminar series covering topics of current interest in condensed matter physics. Local and external speakers discuss their work. Enrollment restricted to graduate students. May be repeated for credit. *A. Young*

292. Seminar (no credit). F,W,S

Weekly seminar attended by faculty and graduate students. Directed at all physics graduate students who have not taken and passed the qualifying examination for the Ph.D. program. Enrollment restricted to graduate students only, except by permission of instructor. *D. Belanger*

297. Independent Study. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

298. Theoretical and Experimental Research Project. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

Politics

25 Merrill College (831) 459-2855 politics@ucsc.edu http://politics.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

In describing the department and major at UCSC, the term politics (rather than political science or government) is used because the study of political life requires a far more inclusive approach than that which is associated with conventional political science methods, and because politics happens in places other than governments. Courses address issues central to public life, such as democracy, power, freedom, political economy, social movements, institutional reforms, and how public life, as distinct from private life, is constituted. Materials and approaches that seem fruitful for illuminating the issues are applied. Thus, the program is problem oriented, less concerned with observing the boundaries of subfields or academic disciplines than with making sense of our lives as citizens.

More specifically, the study of politics is the study of the way human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made and at the obstacles citizens meet as they try to forge a shared and just life. It is concerned with maintaining the integrity of diverse points of view about how we ought to live and with the need for defining a shared language in order with which to discuss the question. Politics faculty at UCSC emphasize the need for larger perspectives, whether they be drawn from studying the politics and cultures of other societies or of earlier periods. They also link the study of domestic politics to international politics and bring theoretical concerns to bear on the current and recurrent issues that mark the modern polity.

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, economics, literature, and law.

The programs offered by the UCSC Politics Department are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses a program in legal studies; see the Legal Studies, for details.

A major in politics is appropriate background for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; and in corporations dealing with global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

UCSC politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects. Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are also actively engaged in programs of research and writing. The research interests of the faculty range from the theory of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

Many upper-division politics courses can serve as supplements to the work of students majoring in other disciplines of the social sciences and humanities.

No specific courses at the high school level are required for admission to the major in politics at

UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

Major Requirements as Follows

Two lower-division politics courses. All students are required to take two courses from those numbered 1 through 79, as a prerequisite to upper-division courses in politics. (These have an IS general education code.) These courses are normally taken during the first year.

Four upper-division politics core courses. The following four groups of courses constitute the core of the politics major. Four courses are required: two courses from one group, one course from a second group, and one course from a third group. In general, upper-division courses are not recommended for freshmen.

Theory

105A Ancient Political Thought 105B Early Modern Political Thought 105C Modern Political Thought 105D Late 20th Century Political Thought

U.S. Politics

120A Congress, President, and the Court in American Politics
 120B Society and Democracy in American Political Development
 120C State and Capitalism in American Political Development

Comparative

- 140A Politics of Advanced Industrialized Societies140B Comparative Post-Communist Politics
- 140C Latin American Politics
- 140D Politics of East Asia
- 140E Postcolonial States and Societies

International

- 160A International Politics
 160B Global Organization
- 160C Security, Conflict, Violence, War

Course 160A, normally offered fall quarter, is very strongly recommended prior to taking the other international core courses.

Five upper-division politics electives. Five additional politics courses are to be selected from courses numbered 101–199. One of these courses may satisfy the senior comprehensive requirement.

Comprehensive Requirements

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- successful completion of a politics senior seminar (190-series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description;
- successful completion of a politics graduate core seminar (enrollment in which is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content;
- successful completion of a senior thesis (courses 195A-B-C) of approximately 50 pages with a substantial research content, supervised by a politics faculty member with a second reader.
- successful completion of one additional politics upper-division course. In addition to the existing requirements of this course the student must receive faculty approval for and enroll in a two-credit independent study, Politics 199F, which requires completion of a substantial writing component (e.g., a term paper of no less than 15 pages in length).

Minor Requirements

To complete a minor in politics, a student must take five upper-division politics courses. Of these, four are to be selected from the core courses: two from one subfield and two from another subfield. The fifth course is to be selected from courses numbered 101–199 (the groups listed above). The lower-division prerequisite and the senior comprehensive seminar are not required for the minor.

General Undergraduate Information

Law in the politics major. Students interested in the law and legal issues may pursue the pathway in law and government as part of a politics major. The law and government pathway offers courses in both U.S. and international law, providing students a solid foundation in such areas as constitutional law, family law, civil rights, and human rights. Students who hope to attend law school or pursue law-related careers can best prepare themselves for their future academic and professional work in a liberal arts major such as politics, which strongly emphasizes the development of analytic and writing skills.

Combined major. The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be reviewed in the Latin American and Latino Studies section of the catalog.

Double majors. The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major subject.

Advising. Declaring the major in politics is a three-step process: (1) attend a declaration orientation workshop, (2) meet with your faculty adviser, and (3) meet with the politics undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose. The faculty adviser may suggest additional courses so that the student can achieve greater breadth or concentration. Students are encouraged to select related courses from other departments which complement their interests in politics.

Pathways. The following pathways are suggested to help students choose courses in their area(s) of interest. The pathways do not constitute tracks within the politics major.

Conflict and security: courses 70, 107, 129, 160, 173, 190B, 190C, 190G. 190W Markets and politics: courses 43, 70, 105A,105C. 111, 120C, 122, 124, 141, 142, 160, 174, 176, 178, 190K, 190S Race, class, and gender: courses 5, 10, 25, 101, 105C, 110, 111, 112, 120B, 120C, 122, 124, 127, 140C, 146, 150, 190K, 190L, 190Q, 190T, 190V Culture and power: courses 5, 43, 101, 105A, 105B, 105C, 107, 109, 110, 114, 120B, 140B, 141, 142, 146, 150, 190A, 190V, 190W Citizenship and democracy: courses 5, 10, 20, 25, 101, 105A, 105B, 105C, 107, 110, 111, 112, 114, 120A, 120B, 140B, 141, 142, 146, 150, 190N, 190Q, 190W Law and government: courses 20, 25, 105A, 105C, 107, 110, 111, 112, 120A, 120C, 122, 127, 129, 141, 146, 163, 173, 174, 179, 190G, 190L, 190N, 190Q, 190W States and regions: courses 43, 70, 107, 140B, 140C, 140D, 140E, 141, 142, 146, 150, 160, 175, 190V, 190W Global governance: courses 70, 107, 111, 140E, 160, 173, 174, 175, 179, 190B, 190G, 190S, 190W

Course credit from other institutions. Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute courses taken elsewhere for the Politics Department's requirements should discuss the procedure with the department adviser.

Senior thesis. Students interested in working on original research and writing under the supervision of a faculty member may pursue an independent study, Politics 195A-B-C. Completion of the senior thesis satisfies the comprehensive requirement.

Graduate Program

The Faculty

The UCSC Politics Department's faculty provides a distinctive mix of senior scholars whose work has led the field toward interdisciplinary and engaged research, and junior scholars whose work represents the diverse cutting edge of U.S. and international political research. The small size of the program encourages close interaction among faculty and students.

The department enjoys several areas of special strength, including American political development and a focus on the social foundations of democratic politics and democratization. Clusters of faculty also specialize in the study of varieties of capitalism and post-communist politics and economy; the politics of Southeast Asia and Latin America; the study of race and politics; the politics of language; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today

disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Social and Political Thought. Brings together the history of political thought; contemporary social and critical theory;' and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

Political Institutions. Emphasizes the comparative and international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry addresses the history of the liberal state in the context of the origins and development of markets and capitalisms and the historical evolution of national and supranational economies. This area considers the relationships among labor, capital, production, and consumption; political contexts for economic regulation and management; and the global and national problems of social welfare, resources, and the environment.

Social and Political Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

Teaching

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction.

See our web site, http://politics.ucsc.edu, for details about the policies for admission tot graduate standing as well as the program brochure, application, and information about financial-support opportunities. For more information, refer to the Graduate Division web site.

Ph.D. Program Requirements

The graduate curriculum in politics includes six stages: (1) four core seminars; (2) eight other graduate-level courses, three of which must be Politics Department courses, along with further training as appropriate in language and methodology; (3) teaching assistant seminars and graduate colloquia; (4) a qualifying examination consisting of written and oral parts; (5) the research and writing of the dissertation; and (6) its oral defense.

Note: Please check with the department office for updated listings of course offerings and the appropriate year in which to undertake specific electives.

M.A. Degree

Our program is intended to lead to a Ph.D. in politics; there is no separate M.A. program. All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. However, all students will be eligible to receive an M.A. upon successfully

passing the course work requirements and completing an acceptable 30-page journal-quality paper, either within the context of a course or independently, although not the written qualifying exam. Students will be advanced to candidacy only upon successful completion of the qualifying examination.

Faculty | Course Descriptions

Program Description

In describing the department and major at UCSC, the term politics (rather than political science or government) is used because the study of political life requires a far more inclusive approach than that which is associated with conventional political science methods, and because politics happens in places other than governments. Courses address issues central to public life, such as democracy, power, freedom, political economy, social movements, institutional reforms, and how public life, as distinct from private life, is constituted. Materials and approaches that seem fruitful for illuminating the issues are applied. Thus, the program is problem oriented, less concerned with observing the boundaries of subfields or academic disciplines than with making sense of our lives as citizens.

More specifically, the study of politics is the study of the way human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made and at the obstacles citizens meet as they try to forge a shared and just life. It is concerned with maintaining the integrity of diverse points of view about how we ought to live and with the need for defining a shared language in order with which to discuss the question. Politics faculty at UCSC emphasize the need for larger perspectives, whether they be drawn from studying the politics and cultures of other societies or of earlier periods. They also link the study of domestic politics to international politics and bring theoretical concerns to bear on the current and recurrent issues that mark the modern polity.

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, economics, literature, and law.

The programs offered by the UCSC <u>Politics Department</u> are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses a program in legal studies; see the <u>Legal Studies</u>, for details.

A major in politics is appropriate background for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; and in corporations dealing with global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and

writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

UCSC politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects.

Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are also actively engaged in programs of research and writing. The research interests of the faculty range from the theory of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

Many upper-division politics courses can serve as supplements to the work of students majoring in other disciplines of the social sciences and humanities.

No specific courses at the high school level are required for admission to the major in politics at UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

Major Requirements as Follows

Two lower-division politics courses. All students are required to take two courses from those numbered 1 through 79, as a prerequisite to upper-division courses in politics. (These have an IS general education code.) These courses are normally taken during the first year.

Four upper-division politics core courses. The following four groups of courses constitute the core of the politics major. Four courses are required: two courses from one group, one course from a second group, and one course from a third group. In general, upper-division courses are not recommended for freshmen.

Theory

105A Ancient Political Thought 105B Early Modern Political Thought 105C Modern Political Thought 105D Late 20th Century Political Thought

U.S. Politics

120A Congress, President, and the Court in American Politics
120B Society and Democracy in American Political Development
120C State and Capitalism in American Political Development

Comparative

140A Politics of Advanced Industrialized Societies
 140B Comparative Post-Communist Politics
 140C Latin American Politics

140D Politics of East Asia

140E Postcolonial States and Societies

International

160A International Politics160B Global Organization160C Security, Conflict, Violence, War

Course 160A, normally offered fall quarter, is very strongly recommended prior to taking the other international core courses.

Five upper-division politics electives. Five additional politics courses are to be selected from courses numbered 101–199. One of these courses may satisfy the senior comprehensive requirement.

Comprehensive Requirements

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- successful completion of a politics senior seminar (190-series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description;
- successful completion of a politics graduate core seminar (enrollment in which is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content;
- successful completion of a senior thesis (courses 195A-B-C) of approximately 50 pages with a substantial research content, supervised by a politics faculty member with a second reader;
- successful completion of one additional politics upper-division course. In addition to the existing requirements of this course the student must receive faculty approval for and enroll in a two-credit independent study, Politics 199F, which requires completion of a substantial writing component (e.g., a term paper of no less than 15 pages in length).

Minor Requirements

To complete a minor in politics, a student must take five upper-division politics courses. Of these, four are to be selected from the core courses: two from one subfield and two from another subfield. The fifth course is to be selected from courses numbered 101–199 (the groups listed above). The lower-division prerequisite and the senior comprehensive seminar are not required for the minor.

General Undergraduate Information

Law in the politics major. Students interested in the law and legal issues may pursue the pathway in law and government as part of a politics major. The law and government pathway offers courses in both U.S. and international law, providing students a solid foundation in such areas as constitutional law, family law, civil rights, and human rights. Students who hope to attend law school or pursue law-related careers can best prepare themselves for their future academic and professional work in a liberal arts major such as politics, which strongly emphasizes the development of analytic and writing skills.

Combined major. The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be reviewed in the Latin American and Latino Studies section of the catalog.

Double majors. The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major subject.

Advising. Declaring the major in politics is a three-step process: (1) attend a declaration orientation workshop, (2) meet with your faculty adviser, and (3) meet with the politics undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose. The faculty adviser may suggest additional courses so that the student can achieve greater breadth or concentration. Students are encouraged to select related courses from other departments which complement their interests in politics.

Pathways. The following pathways are suggested to help students choose courses in their area(s) of interest. The pathways do not constitute tracks within the politics major.

Conflict and security: courses 70, 107, 129, 160, 173, 190B, 190C, 190G. 190W

Markets and politics: courses 43, 70, 105A,105C. 111, 120C, 122, 124,

141, 142, 160, 174, 176, 178, 190K, 190S

Race, class, and gender: courses 5, 10, 25, 101, 105C, 110, 111, 112,

Race, class, and gender: courses 5, 10, 25, 101, 105C, 110, 111, 112, 120B, 120C, 122, 124, 127, 140C, 146, 150, 190K, 190L, 190Q, 190T, 190V

Culture and power: courses 5, 43, 101, 105A, 105B, 105C, 107, 109, 110, 114, 120B, 140B, 141, 142, 146, 150, 190A, 190V, 190W Citizenship and democracy: courses 5, 10, 20, 25, 101, 105A, 105B, 105C, 107, 110, 111, 112, 114, 120A, 120B, 140B, 141, 142, 146, 150, 190N, 190Q, 190W

Law and government: courses 20, 25, 105A, 105C, 107, 110, 111, 112, 120A, 120C, 122, 127, 129, 141, 146, 163, 173, 174, 179, 190G, 190L, 190N, 190Q, 190W

States and regions: courses 43, 70, 107, 140B, 140C, 140D, 140E, 141, 142, 146, 150, 160, 175, 190V, 190W

Global governance: courses 70, 107, 111, 140E, 160, 173, 174, 175, 179, 190B, 190G, 190S, 190W

Course credit from other institutions. Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute courses taken elsewhere for the Politics Department's requirements should discuss the procedure with the department adviser.

Senior thesis. Students interested in working on original research and writing under the supervision of a faculty member may pursue an independent study, Politics 195A-B-C. Completion of the senior thesis satisfies the comprehensive requirement.

Graduate Program

The organization and character of the graduate program issue from a fundamental rethinking of what it means to study politics in the twenty-first century. Sensitive to concerns historically associated with this enterprise, the program is committed to restoring the relevance of contemporary political life to research and teaching. With equal regard for the future, the program has been designed to supersede the conventional subfield boundaries of political science

and even disciplinary divisions that too often serve to fragment, tame, and quarantine political phenomena, thus diminishing the very relevance that we seek. Impressed by the fact that much of the best work in political science today overcomes the conventional boundaries of the discipline's subfields, the Politics Department has structured its graduate program in a new way. It reconnects themes central to political inquiry by reorganizing the field into three related areas of emphasis.

Political and Social Thought brings together the study of traditional political thought, modern social and critical theory, and the contributions of legal and institutional analysis of various kinds. The emphasis in this area is on both the tradition of political theory and the more recent literatures that challenge the distinctions between political and nonpolitical modes of critique and analysis. Many of the courses offered also address the theoretical and methodological questions underlying social and institutional research.

Social Forces and Political Change concerns the transformation of social forces into political ones. Accordingly, it focuses on the formation, articulation, mobilization, and organization of political interests and identities; their mutual interaction; and their effects on state structures and policies, as well as the effects of these same structures and policies on them. The politics of social movements unites substantive and theoretical concerns from comparative and American politics in addition to some concerns from international politics as well. This emphasis also draws upon social historians, community studies scholars focused on social mobilization, and sociologists interested in the relationship between social movements and public policy.

States, Political Institutions, and the Global Political Economy emphasizes the study of political institutions as instruments of collective decision making and action, both comparatively and internationally. It focuses principally on the state but includes analysis of transnational, subnational, and regional political institutions as well. This emphasis includes the study of state responses to domestic conflict and to the changing contours of the international economy, analysis of the role of the state in shaping domestic and international politics, and the role of transnational and subnational political institutions.

What unites these three areas of emphasis is that each focuses in a different way on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics. Our program has been designed to capture the intellectual synergy among these elements. Although the best recent scholarship in political studies is already achieving this level of integration, no other graduate program in the United States has such an explicit, integrated focus and organization. It thus provides a rich and unique graduate experience for those interested in thinking beyond the state-centered policies and conflicts that still form the center of our discipline as it is conventionally taught.

Additional range and diversity are brought to the program by including the graduate faculty scholars working in related disciplines in both the social sciences and the humanities: community studies, economics, history of consciousness, Latin American and Latino studies, philosophy, sociology, and feminist studies. The graduate faculty coheres around thematic as well as methodological interests and commitments. Across area specializations and disciplinary boundaries, a strong complementary interest in the social foundations of democratic politics and democratization is shared by those whose research addresses comparative and American politics, the sociology of social movements, and area and gender studies. Democracy and democratization are also central to the work of the program's political and social theorists as well as to those focusing on international relations and political economy. Moreover, the graduate faculty, although exceptionally diverse with respect to the substantive questions engaging its members, is uniformly committed to an integrated and theoretically informed approach to issues of political analysis.

Finally, the program places particular emphasis on teaching. Developed by a faculty member always strongly oriented toward-and with a considerable record of excellence in-undergraduate teaching, the program's design incorporates "the teaching of teaching" for its students and stresses the component of civic education in undergraduate instruction.

See our web site, >http://politics.ucsc.edu, for details of the policies for admission to graduate standing as well as the program brochure, application, and information on financial support opportunities. For more information, refer to the Graduate Studies section.

The Faculty

The UCSC Politics Department's faculty provides a distinctive mix of senior scholars whose work has led the field toward interdisciplinary and engaged research, and junior scholars whose work represents the diverse cutting edge of U.S. and international political research. The small size of the program encourages close interaction among faculty and students.

The department enjoys several areas of special strength, including American political development and a focus on the social foundations of democratic politics and democratization. Clusters of faculty also specialize in the study of varieties of capitalism and post-communist politics and economy; the politics of Southeast Asia and Latin America; the study of race and politics; the politics of language; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Social and Political Thought. Brings together the history of political thought: contemporary social and critical theory; ' and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

Political Institutions. Emphasizes the comparative and international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry addresses the history of the liberal state in the context of the origins and development of markets and capitalisms and the historical evolution of national and supranational economies. This area considers the relationships among labor, capital, production, and consumption; political contexts for economic regulation and management; and the global and national problems of social welfare, resources, and the environment.

Social and Political Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

Teaching

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction.

See our web site, http://politics.ucsc.edu, for details about the policies for admission tot graduate standing as well as the program brochure, application, and information about financial-support opportunities. For more information, refer to the <a href="https://graduate.gov/g

Ph.D. Program Requirements

The graduate curriculum in politics includes six stages: (1) four core seminars; (2) eight other graduate-level courses, three of which must be Politics Department courses, along with further training as appropriate in language and methodology; (3) teaching assistant seminars and graduate colloquia; (4) a qualifying examination consisting of written and oral parts; (5) the research and writing of the dissertation; and (6) its oral defense.

Note: Please check with the department office for updated listings of course offerings and the appropriate year in which to undertake specific electives.

M.A. Degree

Our program is intended to lead to a Ph.D. in politics; there is no separate M.A. program. All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. However, all students will be eligible to receive an M.A. upon successfully passing the course work requirements and completing an acceptable 30-page journal-quality paper, either within the context of a course or independently, although not the written qualifying exam. Students will be advanced to candidacy only upon successful completion of the qualifying examination.

Politics

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Michael K. Brown

Inequality, race and African American politics, political economy, political development of welfare states, theories and methods of historical social science

J. Peter Euben, Emeritus

Isebill V. Gruhn, Emerita

Bruce D. Larkin, Emeritus

Ronnie D. Lipschutz

International relations; international political economy; foreign policy; resource/environmental politics; global political networks; global civil society; film, fiction, and politics; technology and society; states of terror

Robert L. Meister

Political and moral philosophy, law and social theory, Marxian theory, institutional analysis, antidiscrimination law

John H. Schaar, Emeritus

David J. Thomas, Emeritus

Michael E. Urban

Russian politics, postcommunist transitions, U.S.-Russian relations, political language and ideology, revolution

George E. Von der Muhll, Emeritus

Daniel J. Wirls, Chair

American politics, including national political institutions (Congress) and the President; public policy (military and foreign policy) and political history

Associate Professor

Kent Eaton

Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

Paul Frymer

American politics and institutional development; law, race, and civil rights; parties, elections, and representation; organizations, collective action, and social movements; labor and employment; political history

Assistant Professor

Eva C. Bertram

American politics, including the welfare state and social policy; political economy and the politics of labor markets; civil society and non-governmental organizations; public policy, including drug-control policy

Annette Clear

Comparative democratization, transnationalism, global politics, global organization, Southeast Asia

Dean Mathiowetz

Political theory, philosophy of language, political economy

Eleonora Pasotti

European politics, comparative politics, democratization, public policy, political economy, methodology

Benjamin Read

Comparative politics with special interest in the politics of China; theories of associations and social networks; communist and post-communist states; political participation and collective action

Roger Schoenman

Post-socialism, political economy, comparative capitalism, politics of pipelines, politics of memory, political networks, politics and money, Balkan and East European politics, Central Asian transitions

Vanita Seth

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

Professor

Edmund Burke iii (History)
Barbara Epstein (History of Consciousness)
Jonathan A. Fox (Latin American and Latino Studies)
Walter L. Goldfrank (Sociology)
David E. Goodman (Environmental Studies)
David C. Hoy (Philosophy)
Paul M. Lubeck (Sociology)
Daniel M. Press (Environmental Studies)
Craig Reinarman (Sociology)
Alan Richards (Environmental Studies)
David Wellman (Community Studies)
Donald A. Wittman (Economics)

Associate Professor

Andrew Szasz (Sociology)

Lecturer

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Democratic Politics. *

Systematic introduction to the nature of politics and government, organized around the dynamic relationship between power, principle, and process in democratic politics. Provides historic and contemporary overview; explores the interactions among government, laws, and societies at the national and international levels. (General Education Code(s): IS.) *D. Wirls*

3. Keywords: Concepts in Politics. W

Introduces key concepts in political discourse and key debates generated by contested terms such as "powers," "ideology," and "multiculturalism." Students read from canonical texts, feminist scholarship, historical materials, and contemporary cultural and postmodernist writings. (General Education Code(s): IS.) *V. Seth*

4. Citizenship and Action. *

What does a citizen do? Uses political theory to answer this question as it relates to a number of issues, such as voting rights, diversity, gay marriage, and revolution. Draws on texts ranging from Aristotle to contemporary legal and cultural debates, to bear on the relationship of citizen action and identity. Other readings include Thoreau, Ellison, Rousseau, Marx, Arendt, and Socrates. (General Education Code(s): IS.) *D. Mathiowetz*

5. Political Freedom. *

Deals with themes of citizenship and exile, equality and slavery, liberty and liberation using classical and contemporary theoretical materials, institutional studies (of slavery and the concentration camps), and historical examples (immigration). (General Education Code(s): IS.) *The Staff*

10. Women and Politics. *

Introduces the politics of gender in advanced capitalist and "developing" nations. Uses materials from political theory, comparative, and American politics. Examines the role of gender, gender-based movements, and sexual politics in political development and in contemporary political affairs. (General Education Code(s): IS.) *The Staff*

17. U.S. and the World Economy. F

Explores intellectual and empirical trends shaping the U.S. relationship with the global economy. Traces debates about liberalism and interventionism, surveys postwar American foreign economic policy and discusses varieties of capitalism emerging around the world. (General Education Code(s): IS.) *R. Schoenman*

20. Democracy and Liberalism in American Politics. F

Analysis of the development and operation of American political institutions, focusing on the constitutional powers of the Congress, presidency, and Supreme Court; and the evolution of the American system of political parties. Topics include the ideological underpinnings of American democracy; the changing balance of power between the executive, legislative, and judicial branches; the expansion of national government power; the expansion of the right to vote and political representation; and the rising power of "non-governmental" forces. Satisfies American History and Institutions Requirement. (General Education Code(s): IS.) *M. Brown*

25. American Social Policy. *

Examines role of ideas, interests, and institutions in shaping contemporary social policy in the U.S. Focuses on political struggles and policy debates in the areas of crime and drug control, health care, and income security. (General Education Code(s): IS.) *E. Bertram*

43. Eurasian Politics. *

Following a survey of the development of the former USSR that emphasizes those factors responsible for its dissolution, focuses on the politics of nation building and international reintegration, and the prospects of democratic or authoritarian futures. (General Education Code(s): IS.) *M. Urban*

70. Global Politics. *

Can common global interest prevail against particular sovereign desires? Surveys selected contemporary issues in global politics such as wars of intervention, ethnic conflict, globalization, global environmental protection, and some of the different ways in which they are understood and explained. (General Education Code(s): IS.) *R. Lipschutz*

72. Politics of War on Terrorism. *

From September 2001 the U.S. committed to a "War on Terrorism." What are its political sources? Objectives? Effects on internal politics, external alliances, and civil liberties? Military implications? Costs? How is political discourse deployed? How can it be assessed? (General Education Code(s): IS.) *The Staff*

73. Sovereignty and Intervention. W

Beginning with the basic concept of state sovereignty, explores ways in which different types of intervention problematize and compromise state sovereignty, particularly in the Third World. Examines the dis/incentives behind military, economic, humanitarian and cultural interventions, their un/intended consequences, and their ethical controversies. (General Education Code(s): IS.) A. Clear

75. The Nation-State and Global Politics. *

Examines role of nation-state in global politics by studying processes of state formation in four regions: Europe, Africa, Asia, and Latin America. Evaluates recent challenges to the state that have begun to emerge from above and below. (General Education Code(s): IS.) *K. Eaton*

Upper-Division Courses

103. Feminist Interventions. S

Situates ongoing debates around feminist theory and practice within the context of political theory, the role of the state, and the position of women in contemporary

(predominantly Western) society. Engages with classical political theory, second wave feminism, and the role of the state on matters pertaining to pornography and prostitution. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

104A. American Political Thought. *

Basic problems of political theory within the American setting. The course explores both the mainstream tradition and some branches of the counter tradition of political ideas in America, focusing on the themes of authority, community, equality, and liberty. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *J. Schaar*

104B. American Political Thought. *

Basic problems of political theory within the American setting. The course explores both the mainstream tradition and some branches of the counter tradition of political ideas in America, focusing on the themes of authority, community, equality, and liberty. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *J. Schaar*

105A. Ancient Political Thought. W

Ancient political ideas in context of tension between democracy and empire, emergence of the psyche, and shift from oral to written culture. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine. (Also offered as Legal Studies 105A. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathiowetz*

105B. Early Modern Political Thought. F

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference. (Also offered as Legal Studies 105B. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

105C. Modern Political Thought. S

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, and Weber. (Also offered as Legal Studies 105C. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *M. Thomas*

105D. Late 20th Century Political Thought. *

The politics of identity and recognition as the basis for institutional legitimacy and social struggles in the late 20th century. Conflicting views of Hegel's master-slave dialectic are used to relate, e.g., Sartre, Fanon, Bataille, Merleau-Ponty, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou to present-day concerns. (Also offered as Legal Studies 105D. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *R. Meister*

106. Marxism as a Method. *

Examines Marx's use of his sources in political philosophy and political economy to develop a method for analyzing the variable ways in which social change is experienced as a basis for social action. Provides a similar analysis of contemporary materials. Contrasts and compares Marxian critiques of these materials and readings based on Nietzsche, psychonalysis, cultural studies, and rational choice materialsim. (Also offered as Legal Studies 106. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

107. After Evil: Political Morality of Survivorship and Recovery. *

What are the continuing relationships between victims, perpetrators, and beneficiaries of a past that is recognized as evil? Focus on contrast between the competing moral logics of struggle and reconciliation, and various rationales for allowing beneficiaries to keep their gains in order to bring closure to the past. Theoretical perspectives drawn from law, philosophy, theology, and psychoanalysis. (Also offered as Legal Studies 107. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Meister*

108. Political Theologies of Milton and Dante. *

Focuses on reading texts written by Milton and Dante, including *Paradise Lost* and *Purgatorio*. Topics of political theology, medieval and reformation Christian thought and related historical studies are examined. Enrollment restricted to politics majors. *R. Meister*

109. Orientalism. *

Studies "Orientalism" as a concept of political theory and as a historical practice. Considers how "Western" views of the peoples, cultures, and governments of 'the East" influenced political, intellectual, and aesthetic projects of the 18th and 19th centuries, with attention to the themes of colonialism, nationalism, language, and gender. Also considers Orientalism as a subject of post-colonial thought. Previous study in political theory is recommended. Enrollment restricted to politics and politics/Latin American Latino studies combined majors during priority enrollment only. *M. Thomas*

110. Law and Social Issues. *

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions. (Also offered as Legal Studies 110. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

111A. Constitutional Law. W

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law. (Formerly *Problems in Constitutional Law.*) (Also offered as Legal Studies 111A. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

112. Women and the Law. W

Interdisciplinary approach to study of law in its relation to category "women" and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes power relations in both public and intimate life. (Also offered as Feminist Studies 112. Students cannot receive credit for both courses.) Enrollment restricted to politics, feminist studies, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *G. Dent*

114. Thinking Green: Politics, Ethics, Political Economy. *

A course on Green political thought and practice, the origins and content of ecological politics, ethics, and political economy. Asks whether they offer a "realistic" alternative to neo-liberalism and other political ideologies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

115. Foundations of Political Economy. W

Examines how ideas about labor, rights, exchange, capital, consumption, the state, production, poverty, luxury, morality, procreation, and markets were imbricated in political-economic discourse from 1690–1936. Readings include Locke, Rosseau, Smith, Malthus, Hegel, Marx, Lenin, and Keynes. Particular focus given to theoretical origins of and justifications for property and implications of economic interdependence for politics. Prerequisite(s): course 105B, 105C, or 120C. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathiowetz*

116. Comparative Law. *

Explores legal systems and legal rules around the world, for a better understanding of the factors that have shaped both legal growth and legal change. Particular attention given to differences between common and civil law systems, changes brought about by the European Union, and expansion of legal norms around the globe. (Also offered as Legal Studies 116. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

120A. Congress, President, and the Court in American Politics. F

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities. (Also offered as Legal Studies 120A. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *D. Wirls*

120B. Society and Democracy in American Political Development. S

Examines role of social forces (e.g., race, class, and gender) in development of the American democratic processes and in the changing relationship between citizen and state. Course materials address ideas, social tensions, and economic pressures bearing on social movements, interest groups, and political parties. (Also offered as Legal Studies 120B. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment period. Satisfies American History and Institutions Requirement. *M*.

120C. State and Capitalism in American Political Development. W

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies. (Also offered as Legal Studies 120C. Students cannot receive credit for both courses.) Enrollment restricted to politics, Latin American and Latino studies/politics, and legal studies majors during priority enrollment only. Satisfies American History and Institutions Requirement. *E. Bertram*

122. Politics, Labor, and Markets in the U.S.. S

Examines political and social dimensions of recent transformations in the U.S. labor market. Includes classical and contemporary theoretical debates over the nature and functions of work under capitalism. Focuses on shifts in the organization and character of work in a globalizing economy. Addresses recent trends in economic inequality, low-wage and contingent work, job mobility and security, and work/family relations. Includes attention to the roles and responses of business, labor, government, and social movements. Enrollment restricted to politics and Latin American and Latino studies/politics combined major during priority enrollment. *E. Bertram*

123. Parties and Elections in American Political Development. *

Provides an understanding of political parties and elections. Topics include historical evolution of American political parties, their role in industrial development, public opinion, psychological determinants of voting behavior, information transmission in mass democracies, and media bias. Enrollment restricted to sophomore, junior, and senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment. *The Staff*

124. Politics, Poverty, and Inequality in America. *

Investigation of the causes and consequences of poverty and income inequality in the U.S., including racial and gender inequality. Consideration of the origins of contemporary anti-poverty policies and evaluation of current policy alternatives. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *E. Bertram*

125. Political Organizations in American Politics. *

Introduces the literature on interest groups and attempts to answer the question: Do such groups promote or hinder American democracy? Class readings and lectures review and assess the participation of interest groups in the electoral process and in Congress, the executive branch, and the courts. Pays particular attention to the role business and environmental groups play in American politics and policy. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *S. Kamieniecki*

126. The Politics of Social Policy in the U.S. *

Explores three contemporary social policy debates in the United States: social security reform; whether to enact national health insurance; and the success or failure of welfare reform. Also, study of political debates in light of the development of the U.S. welfare state compared to European welfare states and in the context of a global economy. Enrollment restricted to politics and Latin American and Latino

studies/politics combined majors during priority enrollment only. M. Brown

127. Black Politics and Federal Social Policy. *

Examination of changes in the political and economic status of black Americans in the 20th century; particular focus on the role of national policies since 1933 and the significance of racism in 20th-century U.S. political development. (Also offered as Legal Studies 127. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *M. Brown*

129. Policies and Politics of American Defense. W

Examines the evolution of the policy and politics of American national security, especially following the Cold War. Content of military policy explored with analytic focus on formation of policy and interactions between military policies and domestic policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Wirls*

132. California Water Law and Policy. W

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future. (Also offered as Legal Studies 132. Students cannot receive credit for both courses.) *R. Langridge*

133. Law of Democracy. W

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces. (Also offered as Legal Studies 133. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

140A. Politics of Advanced Industrialized Societies. F

Explores the political and economic systems of advanced industrialized societies. In addition to specific comparisons between the countries of western Europe and the United States, covers important themes and challenges, including immigration, globalization, and the crisis of the welfare state. Enrollment restricted to politics, and Latin American and Latino studies/politics combined majors during priority period. *E. Pasotti*

140B. Comparative Post-Communist Politics. W

Comparative study of revolutionary transformations of East European, Soviet, and former Soviet nations to post-Communist political orders. Focus on reemergence of political society, social and economic problems of transition, and maintenance of many cultural norms and authority patterns associated with previous regime. *M. Urban*

140C. Latin American Politics. S

Overview of major approaches to the study of Latin American politics. Introductory survey of historical and contemporary democratic, populist, authoritarian, and revolutionary regimes. Special attention to local, national, and global forces shaping development strategies and public policies; changing institutional arrangements and shifting discourses of domination; and social movements and strategies of resistance among subaltern social groups and classes. Students cannot receive credit for this

course and course 241. Enrollment restricted to politics, Latin American and Latino studies, and politics/Latin American and Latino studies combined majors during priority period. (General Education Code(s): E.) *K. Eaton*

140D. Politics of East Asia. *

Explores dynamics of political and economic development in Northeast and Southeast Asia following WWII. Students apply theories of comparative politics to empirical case studies, integrating statist, social, and cultural factors into their understanding of development. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *A. Clear*

140E. Postcolonial States and Societies. *

Explores key contemporary issues and conflicts in postcolonial states and societies from a range of methodological and theoretical perspectives. While readings focus on South Asia, Middle East, and southeast Asia, they reflect issues of broad theoretical and comparative significance, emphasizing constitutive role of colonialism, modernist projects, and social movements in shaping both postcolonial politics and scholarship. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

141. China. *

Politics and foreign policy of the People's Republic of China since 1949. Emphasis on unification, political movements, and decision; social policy; collectivization, decollectivization, and economic reform; foreign and military policy. Democratization, suppression of the Tiananmen demonstrations, and post-Tiananmen political and cultural policy. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

142. Russian Politics. S

Historical-political survey of Russia within the U.S.S.R. is followed by examination of the 1991 revolution, the attempt to recover a national identity and establish a unified Russian state. Topics familiar in the study of politics—movements, parties, institutions, processes—are featured. *M. Urban*

146. The Politics of Africa. W

Comparative study of contemporary sub-Saharan African states. Selected issues and countries. Internal and external political institutions and processes are studied in order to learn about politics in contemporary Black Africa and to learn more about the nature of politics through the focus on the particular issues and questions raised by the African context. Enrollment restricted to politics majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

149. Democratic Transitions. *

Explores democratization processes from a variety of historical and geographical perspectives. Examines the role of foreign influences, economic development, civil society, elites, and institutions in the transition and consolidation of democratic systems. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment only. *E. Pasotti*

150. Democratization, Citizenship, and Human Rights in South America. * Examines military regimes, transitions to civilian rule, and politics of

democratization in contemporary Brazil, Argentina, and Chile. Focus on the contradictions and legacies of transition politics, the challenges of democratizing political institutions, and the political and social consequences of neoliberalism. Emphasis on human rights, citizens' movements (especially feminisms), changing dynamics of civil society, and contemporary efforts to deepen democracy and extend meaningful citizenship to subaltern social groups and classes. Prerequisite(s): course 140C or permission of instructor. *The Staff*

153. Theories of the State. *

Basic overview of major theories of state. Focus on classical state theorists' approach to studying modern governments, including Marxist, pluralist, and elitist theorists. Examine theories of democracy and whether concepts such as "state autonomy" are relevant to the study of democratic states. Focus on issues of elite manipulation of public opinion, comparative state formation, and governmental strategies for economic modernization. Enrollment restricted to political science and Latin American and Latino studies/politics combined majors *S. Decanio*

154. Brazilian Politics. *

Analysis of interface of Brazilian politics and culture—with emphasis on contemporary struggles to deepen democracy, foster more equitable development, and promote social justice. Examination of dynamic interplay of state and opposition forces during Brazil's 20th-century authoritarian regimes. Special attention to problems and prospects for furthering democratization in the 21st century. Prerequisite(s): course 140C. Enrollment restricted to senior politics, Latin American and Latino studies, and combined politics/Latin American and Latino studies majors. Enrollment limited to 25. *The Staff*

156. Asian Women in Politics. *

Uses major theoretical themes from Asian comparative politics considered through the lens of gender politics. Each week introduces the basic comparative politics of a different Asian country and then examines women in politics in that particular country and how women challenge theories about Asian politics, integrating other countries and topics into current discussions. (General Education Code(s): E.) *A. Clear*

160A. International Politics. F

Upper-division introduction to international relations, international organizations, international political economy, foreign policy, conflict, and war. Explores a range of theories, issues and cases that are of interest to students of international affairs and are helpful in understanding recurring patterns of global conflict and cooperation. Addresses the nexus between domestic politics and the foreign policy of states. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

160B. Global Organization. S

Addresses how global organizations are changing the international system. Examines multilateral institutions, regional organizations, and nonstate actors. Overriding aim is to discern whether these global organizations are affecting the purported primacy of the state. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *A. Clear*

160C. Security, Conflict, Violence, War. *

Genesis and theories of conflict and war and their avoidance (past, present, future). Relationship between foreign policy and intra- and interstate conflict and violence.

National security and the security dilemma. Non-violent conflict as a normal part of politics; violent conflict as anti-political; transformation of conflict into social and interstate violence. Interrelationships among conduct of war, attainment of political objectives, and the end of hostilities. Civil and ethnic wars. Political economy of violence and war. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

163. How U.S. Foreign Policy Gets Made. *

Provides overview of U.S. foreign policy formulation: considers how U.S. political culture shapes foreign policy; examines governmental actors involved: the president, executive branch agencies, and Congress; then considers non-governmental actors: the media, interest groups, and public opinion. Enrollment restricted to politics and politics/Latin American and Latino studies combined majors. *The Staff*

168. Nonproliferation. *

Addresses nuclear, biological, chemical, and radiological weapons and global public policy measures to prevent their spread: safeguards, inspection, "counterproliferation," and nonproliferation strategies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

171. Law of War. *

Examines legal regulation of international violent conflict. Students examine development of normative standards within international law and creation of institutions to both adjudicate violations and regulate conduct. (Also offered as Legal Studies 171. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

173. International Law. F

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include jurisdiction and sovereignty, treaties, use of force, commercial law, and human rights. (Also offered as Legal Studies 174. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment period. *The Staff*

174. Global Environment Politics. *

Focus on global environmental "problematique" and how it is being played out in a variety of political arenas. Includes technical overview of global environmental movement; perspectives on alternative political approaches to environmental problems. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

175. The New Europe. *

Examines causes and consequences of political and economic change in Europe including emergence of European Community as new world power; end of cold war, breakup of Warsaw Pact, and new European security arrangements; German reunification; transition to market economies and representative democracies; and disintegration of Soviet Union, Yugoslavia, and nationalist potential for continuing political instability. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

176. International Political Economy. F

Surveys and critically examines long-standing theoretical debates within international political economy (liberalism, mercantilism, Marxism) with context of important historical and contemporary international political economy issue areas (international monetary systems, organization of international trade, regulation of foreign direct investment, development policies, etc.). Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Schoenman*

177. The United States and the World. S

Examines political, economic, and cultural relationship between the U.S. and the rest of the world, including historical background and foreign policy. Special focus on U.S. involvement in the Middle East and Persian Gulf and the politics of economics of that region. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

178. U.S. Foreign Economic Policy. *

Theoretical and historical survey of U.S. foreign economic policy. First part explores theoretical frameworks and covers historical events in the U.S.'s relationship with world economy. The second part focuses on postwar foreign economic policy; surveys different theoretical approaches to U.S. foreign policy; and examines fundamental developments and issues in trade, monetary, development, and investment policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Schoenman*

179. The Atomic Enterprise: Nuclear Physics, History, Strategy, Policy. * Informs and educates about "The Atomic Enterprise," that panoply of science, technology, projects, events, policies, health effects, industry, and controversies related to the discovery, development, deployment, and domestication of nuclear fission and fusion. Enrollment restricted to politics or politics/Latin American and Latino studies majors during priority enrollment only. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

190. Senior Comprehensive Seminar.

These courses, offered at different times by different instructors, focus on current problems of interest across the discipline. Courses offer a flexible framework within which those mutually interested in specific issues can read, present papers, and develop their ideas. Students who do not meet the restrictions and prerequisites may contact the instructor for permission to enroll. *The Staff*

190A. State and Revolution. S

Investigates the process of rapid and fundamental political change from the standpoint of both the structures of states in which revolutions have occurred and the structures of states issuing from revolutions. A number of cases are examined, but particular emphasis is given to the "classic" revolutions in France (1789) and Russia (1917). Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors; major restrictions lifted during open enrollment. Enrollment limited to 20. *M. Urban*

190B. The Concept of the Political. *

What is "political" in neo- and post-liberal orders of governmentality? Students examine works written prior to the liberal period (Hobbes), in response to it (Hegel and Schmitt), and finally, a 20th-century liberal revival (Rawls). What are the contours and entailments of rights, conscience, privacy, political obligation, and the

roles of war and the state? Prerequisite(s): two of the following: course 103, 105A, 105B, 105C, 105D, 107, 109, or 115. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Mathiowetz*

190C. U.S.-Russian Relations. *

Examines the cold war and its aftermath. Focuses on interstate conflict and its roots in domestic politics. Topics include issues of national security, military competition, transnational movements, regional and global hegemony. Prerequisite(s): one of the following: 140B, 141, or 142. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *M. Urban*

190D. Early Anarchist and Socialist Thought. S

Studies in 19th- and early 20th-century anarchist and socialist thought. Themes covered include Catholicism, Darwinism, property, labor, marriage, and the state. Readings drawn from Bakunin, Goldman, Fourier, Kropotkin, Perkins-Gilman, Proudhon, Saint-Simon, and Stirner. Previous study in political theory is recommended. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors. Enrollment limited to 20. *M. Thomas*

190E. European Integration. *

Focuses on the origins and development of the European Union. Addresses historical and contemporary issues, including the political, economic, social, and cultural dimensions of European integration and expansion. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Schoenman*

190G. Issues in International Law. *

Explores theory and reality of international law; how it determines or governs or modifies policies of government. Emphasis on contemporary political and economic forces and international law in nuclear age, competing areas for new law, law of seas, human rights, new international economic issues, the environment. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only; major restrictions will be lifted during open enrollment. Enrollment limited to 20. *The Staff*

190H. The Substance of Democracy. *

What is democracy? Why do we care about it? How can we identify it? Through political science, law, and philosophy, the course explores these questions and the issues of patronage, media manipulation, lobbying, campaign finance reform, and participation. Enrollment restricted to senior politics and combined politics/Latin American and Latino studies majors. Enrollment limited to 20. *E. Pasotti*

190J. Politics and Inequality. S

Considers causes and consequences of inequality in modern societies. Emphasizes empirical analysis of contemporary forms of class, racial, and gender inequality and examination of normative theories of distributive justice. Major restrictions lifted during open enrollment. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *M. Brown*

190K. Political Economy of Welfare States. *

Explores origins and development of contemporary welfare states in Europe and the

U.S. Considers welfare state development and politics in relation to dynamics of capital accumulation, class and racial conflict, and patterns of party politics. Assesses distributional impacts of policies. Prerequisite(s): One of the following courses: 104A, 104B, 120A, 120B, or 120C. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only; major restrict Enrollment limited to 20. *M. Brown*

190L. Poverty Politics. W

Examines theoretical, historical, and contemporary sources of poverty, politics, and policies in the U.S. Explores competing theories of the causes of poverty and the consequences of social provision. Focuses on successive historical reform efforts and contemporary dilemmas of race, gender, low-wage labor, and the politics of welfare reform. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *E. Bertram*

190M. American Politics Through American Literature. *

Most major American writers offer perspectives outside "official" mainstream political culture; the raising of countervoices; concern about common, public lives, not just personal experience; exploring persistent tensions (dualisms) and deeper meanings, how we really live, how it is concealed from understanding, and political/moral costs. Prerequisite(s): course 101, 105A, 105B, 105C, 120B, or 120C. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *J. Schaar*

190N. Congress: The Politics of Representation and Legislation. *

Examination of U.S. Congress in theoretical, comparative, and historical perspective. Topics include tension between representative and legislative processes, parliamentary versus presidential systems, party organization versus the new entrepreneurism. Special attention given to nature and consequences of bicameralism. Prerequisite(s): course 120A. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Wirls*

190P. Race: History of a Concept. *

Examines how we came, by the late 19th century, to classify humanity into racial categories. In an effort to trace emergence of this very modern phenomenon, explores historical shifts that informed Europe's representation of cultural difference from the writings of ancient Greeks to the social Darwinism of 19th-century Britain. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

190Q. Theorizing Modernity. F

Introduces central categories and material implications that underwrite discourses on modernity since the late 18th century. Students read across the disciplines in fields such as political theory, postcolonialism, history, science studies, anthropology, and feminist criticism. Prerequisite(s): any two of the following courses: 105A, 105B, 105C, 105D. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

Interrogation of the idea of development and historical examination of the development of the discourse of development. Explores the ways in which the discourse shapes the practice of development, with a focus on issues of democracy and civil society, humanitarian intervention, gender and agriculture. Enrollment restricted to senior politics and Latin American and Latino studies/politics majors during priority enrollment only. Enrollment limited to 20. A. Clear

190S. Empire and After. W

Examines the literature on American empire, beginning with the founding parents (e.g., Jefferson), continuing through the revisionist literatures (e.g., Williams) and more recent work (e.g., Hardt and Negri), and ending with contemporary critiques and predictions. Enrollment restricted to senior politics majors. Enrollment limited to 20. *R. Lipschutz*

190T. Feminism, Trans/national Cultural Politics, and Gender Policy. *

Comparative analyses of feminist movements and their relationship to other local and global social movements, trans/national civil society, political parties, states, and inter-governmental organizations in a wide range of empirical cases. Emphasis on changing feminist discourses and practices over the past three-plus decades and the dynamic interplay of cultural politics and gender policy advocacy in contemporary national and transnational feminist activism. Prerequisite(s): course 100 or 100A. Enrollment restricted to senior Latin American and Latino studies, politics, feminist studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. S. Alvarez

190V. Problems in Latin American Politics. F

Research seminar allows advanced students to engage in current scholarly debates in the sub-field of Latin American politics. Topics and countries covered vary from year to year but may include civil society, citizenship and cultural politics in Latin/o America, comparative perspectives on democratization, politics and culture in Brazil, feminisms and women's movements in Latin America, the politics of race and ethnicity in the Americas, and human rights and social justice in a neoliberal era. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *K. Eaton*

190W. Living in the Aftermath of Evil. *

Draws on a variety of sources to understand metaphors of war and peace as potentially appropriate attitudes toward evil and as potentially rational compromises with evil; investigates respects in which constitutional regimes of post-traumatic societies can be understood as "peace programs" that preserve and transcend the identities of the victims and perpetrators of past atrocities while creating a new identity based on their common survivorship; explores the constraints placed on "nation in recovery" by the public commitment to create an official version of a past that must be remembered so that it will not be repeated. Prerequisite(s): two of the following: course 105A, 105B, 105C, 106, and 107. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Meister*

190X. Global Civil Society—Theories, Debates, Practices. *

The process of globalization, the enormous growth in numbers of transnational social movements and nongovernmental organizations, and the broad reach of transnational capital and corporations has generated considerable academic and policy interest in future of global governance and role of "global civil society" in it. This senior

seminar provides broad view of theory and debates behind global civil society and case studies of specific transnational networks, movements, and coalitions. Prerequisite(s): One of course 160, 160A, 160B, 162, or 173. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Lipschutz*

193. Field Study in Politics. F,W,S

Individual studies undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

198. Independent Field Study. F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person (e.g. supervision is by correspondence). Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A student normally approaches a member of the staff and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A student normally approaches a member of the faculty and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200A. Interpretive Problems in Political Theory: Language and Politics. S

Examines intersections of philosophy of language, language philosophy, political theory, and politics. How can we read texts and discourses in a manner both historically and textually grounded and compatible with a democratic ethos? (Formerly *Interpretive Methods in Political Theory: Language and Politics.*) Enrollment restricted to graduate students. Enrollment limited to 15. *D. Mathiowetz*

200B. Social Forces and Political Change Core Seminar. *

Concerns transformation of social forces into political ones. Focuses on formation, articulation, mobilization, and organization of political interests and identities, their mutual interaction, and their effects on state structures and practices and vice versa. Major themes are 1) social bases of political action: class, gender, race, and other determinants of social division and political identity and 2) relevant forms of political agency and action, including development of political consciousness and representation of interests and identities in the public sphere. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Urban*

200C. States and Political Institutions Core Seminar. F

Introduces study of political institutions as instruments of collective decision making and action. Explores alternative theoretical approaches to development of political institutions, state and political economy, and security dilemmas. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Brown*

200D. Political Economy Core Seminar. *

Introduction to the theories and methodologies of political economy. Focuses on the relationship between states and markets and considers the politics of economic choices and institutions germane to both national and global political institutions. Addresses origins and development of markets and capitalism; historical evolution of states and their economies; relationship between labor, capital, production, and consumption; regulation of production; macroeconomics and management of economies; and issues of national and global social welfare. Enrollment restricted to graduate students. Enrollment limited to 15. *K. Eaton*

201. Logics of Inquiry. F

Investigates approaches to study of politics and to enterprise of social science in general. Works from positivist, interpretive, historical, and critical approaches provide examples held up to critical and epistemological reflection. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Pasotti*

203. Making of the Modern. *

Introduces, at the graduate level, some of the central conceptual categories and material implications that underwrite the world of the modern. Explores concepts including the individual, historicism, contract, and objectivity. Enrollment restricted to graduate students. Enrollment limited to 15. *V. Seth*

205. Political and Social Thought: Politics of Recognition. *

Investigates issues about identity and recognition as basis for claims about institutional legitimacy and social struggle. Paradigm is Hegel's account of relation of master and slave in *Phenomenology of Spirit*. Contemporary political philosophy examines differing accounts of reason, power, resistance, liberation, morality, difference, and the other. Concludes with discussion of identity and interest politics, multiculturalism and assimilation, and moral bases of struggle, reconciliation, and compromise in the political arena. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

211. Marxism. *

Examines how Marx arrived at his substantive political standpoint through a critique of the modes of theory through which state and society are interpreted from within. Also considers how far it is possible to apply the methods Marx used, in learning from the sources available in our own contemporary material, and whether this process of interpretation will lead us to similar conclusions. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

214. Thinking Green: Politics, Ethics, Political Economy. *

Green political thought, philosophy, debates, and practices; history of ecological thought and comparative study of competing ideas and proposals. Critical examination of neo-liberal environmentalism. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

221. Politics and Inequalities. *

Considers origins and consequences of inequality in modern societies, focusing on intersection between class, race, and gender inequality. Examines discourse of equality, in particular, the relationship between democratic politics and equality and role of political institutions in promoting or diminishing inequality. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Brown*

232. United States Political History. *

Covers several important themes and sets of readings from the literature on American political development. Topics include the origins and development of American political institutions, the evolution of democratic mechanisms, the rise and fall of social movements, and debates about the sources of policy regimes and political change, including the role of war. Enrollment restricted to graduate students. Enrollment limited to 15. *P. Frymer*

233. Interrogating Race. *

Critically examines alternative theoretical and methodological approaches to study of race and racism. Considers alternative explanations for origins and persistence of racism and racial inequality and suggests the relevance of a socio-political understanding. Enrollment restricted to graduate students. Enrollment limited to 15. *P. Frymer*

241. Culture and Politics in Latin America. *

Interdisciplinary analysis of the relationship between culture and politics in Latin America, drawing on current critical debates in anthropology, history, cultural studies, feminist and poststructuralist theories, as well as political science. Students cannot receive credit for this course and course 140C. Enrollment restricted to graduate politics majors. Enrollment limited to 15. *The Staff*

245. Latin American Politics. F

Surveys the Latin American political literature by studying: 1) critical moments in political development (e.g., state formation, democratization); 2) important political institutions (e.g., presidentialism, party, and electoral systems); and 3) influential political actors (e.g., unions, business associations, social movements). Enrollment restricted to graduate students. Enrollment limited to 15. *K. Eaton*

251. Discourse. *

Utilizing a variety of approaches—discourse analysis, semiotics, critical theory, and linguistics—analyzes how language constructs the political world. Focuses on the

symbolic mediation, normalization, and reproduction of power and subjugation present in the discourses through which they are apprehended and expressed. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Urban*

255. Comparative Anti-Colonialisms. *

Political thought of anti-colonial movements in comparative, historical perspective, including 18th- to 20th-Century European colonies of America, Asia, and Africa. Focuses both on the contemporary political thought of these movements as well as on historiographical approaches of secondary literature. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

271. Transnationalism. *

Focuses on basic comparative politics concepts—such as the state, regime transition, economic development, and social movements—and then considers how the global context challenges these very same political phenomena. Explores the ontological and methodological repercussions of the nexus between the global and the domestic. Enrollment restricted to graduate students. Enrollment limited to 15. A. Clear

272. Critical Interventions in IR Theory and Global Political Economy. W

Seminar examines selections from the canonical literature in international relations theory and global political economy through a number of critical lenses, including constructivist, feminist, historical materialist, and subaltern approaches. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

275. Network and Organization Theory Approaches to the Study of Capitalism. S

Examines genesis of new institutions within the force of social ties and networks. Studies how social and organizational relationships achieve individual or group goals in political and economic life, and influence institutional design. Considers when and what ties contribute to governance and economic performance, and when informal and formal organizations constitute an obstacle. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Schoenman*

291. Teaching Assistant Seminar (2 credits). F

Two-hour weekly seminar required of teaching assistants in which pedagogic and substantive issues will be considered. The experience of performing teaching assistant duties constitutes subject matter for discussion. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

293. Field Study. F,W,S

Individual study undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

295A. Research Colloquium (2 credits). S

Weekly venue for Ph.D. students to present current research, exchange information on sources and resources, discuss and critique epistemologies and methods, and to formulate topics for QE field statements and the dissertation. There are no assigned readings. May be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *R. Lipschutz*.

295B. Advanced Research Seminar. S

Weekly seminar for Ph.D. students in which to develop and write extended research papers on selected topics, to present current work, to discuss methods, data sources, and fieldwork, and to receive critiques and assessments from fellow students. May

be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *R. Lipschutz*

297. Independent Study. F,W,S

A student approaches a member of the staff and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to gradaute students and permission of instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Program Description | Faculty

Lower-Division Courses

12. The ArtsBridge Experience (2 credits). *

Weekly meetings on pedagogy in the arts, lesson planning for arts teaching in schools, and submission of teaching portfolio core of this class. Prerequisite(s): permission of instructor; student must be an ArtsBridge scholar. May be repeated for credit. *M. Foley*

14. Jazz Vocal Ensemble (2 credits). *

Study of vocal techniques in the context of ensemble rehearsals, often culminating in public performance. Familiarity with musical notation recommended. Admission by audition. May be repeated for credit. (General Education Code(s): A.) *The Staff*

19. Chicana/Latina Identity (2 credits). *

An exploration of Chicana/Latina identity within the context of developmental theories and heterogenous cultural influences on identity formation, including the acculturation process. Students explore their own identities within the previously stated context. Enrollment limited to 20. *The Staff*

20. Dance/Theater Practicum.

The practice of dance/theater in a particular world area (i.e., Philippines, Mexico, U.S.). Students learn the dance or theater art of one world area and study the associated cultural background.

20A. Filipino Dance Practicum (2 credits). W

Students are introduced to the different folk dances of the Philippine Islands. Folk dances of the tribal mountain region, of the Spanish Era in the Philippines (Maria Clara Era), and dances of the regional and rural countryside are emphasized. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *W. Manuntag*

20C. Korean Dance Practicum (2 credits). *

Students are introduced to the different dances of Korea related to folk tradition. Movement concepts of music and the relation to culture are explored through demonstration, practice, and performance. Enrollment limited to 15. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

20D. Dance Improvisation (2 credits). *

Dance practicum emphasizing spontaneous movement in response to diverse media including visual art and music. Special emphasis given to the conceptual approaches taken by American artists such as Merce Cunningham, John Cage, and Robert Rauschenberg. Enrollment limited

21. Music Practicum.

21A. Korean Music and Culture (2 credits). *

Introduction to the farmers band tradition. Theory and practice of drumming are emphasized, resulting in a group performance. Enrollment limited to 20. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

21C. Gospel Choir (2 credits). W,S

Instruction in vocal performance in the tradition of gospel choirs. Music is transmitted aurally rather than by notation. The ensemble prepares a range of traditional and contemporary gospel music for performance. Ensemble performs publicly at least once each quarter. Enrollment limited to 60. May be repeated for credit. (General Education Code(s): A.) *V. Fiddmont*

22. Art Practicum (2 credits).

The practice of art in a particular world area (i.e., Japan, Pacific Islands, U.S.). Explores the art and craft of one world area and studies the associated cultural background. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

22A. Day of the Dead (2 credits). *

Day of the Dead: Creating an Exhibition—an exploration of art created to celebrate death in Mexican, Chicano, and American culture. Culminates in the creation of a Day of the Dead ceremony and community altar including students' individual art pieces. Enrollment limited to 25. (General Education Code(s): A.) *R. Apodaca*

22F. Vietnamese Festivals (2 credits). *

Vietnamese festivals and the arts they generate, from carving to water puppetry, will be explored for cultural, aesthetic, and iconographic principles, through viewing, discussion and a creative project. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

22G. Literary Magazine Publishing (3 credits). S

Learn about and practice basics in publishing a national literary magazine with focus on poetry and the arts. Three-part focus: soliciting/editing, design/publishing, and publicizing/distributing. Students decide which poems published and awarded prizes in the "Viz. 25 and Under Awards" section. Audition for admission at first class with demonstrated experience in related field: creative writing, desk top publishing, art, graphic design, business, etc. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *R. Hamilton*

23. Film/Theater Practicum.

The practice of film/theater from the perspective of a particular culture, genre, or technical approach.

23A. Film Practicum: Talking in Pictures (2 credits). *

Introductory survey of the language of film and television. Considers the roles these media play in the shaping of cultural identity. Creative projects in the conceptual preparation for the making of films and

videos. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

23B. Personal Narratives in Theater and Film (2 credits). W

Focuses on filmmakers and monologue performers (e.g. Spalding Gray, Brenda Wong Aoki, Russ McElwee) as they come to terms with their identity in autobiographical works. Students write critical responses to texts and create their own brief personal narratives. Enrollment limited to 25. (General Education Code(s): A.) *R. Giges*

23C. Documentary/Mockumentary Films (2 credits). ±

The mockumentary grows out of the documentary tradition, but instead of pretending to truthfully capture reality, it blatantly distorts, revealing the subjectivity inherent in cinematic representation. Includes ethnographic music, political and Hollywood mockumentaries, and critical readings on documentary film. Enrollment limited to 25. (General Education Code(s): A.) *R. Giges*

25. Introduction to the Theory and Practice of Musical Criticism (2 credits). * Introduces students to the theory and practice of musical criticism through the attendance at performances, analysis of composition, and staging and writing of critiques. Enrollment limited to 17. *C. Heusch*

28. Sound Art (2 credits). S

Several composers and performers of contemporary "art music" discuss the processes by which works are conceived in imagination, transcribed in notation, and realized in sound. After a brief introduction to contemporary music aesthetics, students attend a series of related presentations, seminars, and concerts. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

32A. Queering the Arts (2 credits). *

Exploration of the arts as a way to understand and experience how queerness has been expressed, repressed, denigrated, and celebrated in visual arts, music, film, poetry, and dance. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

33. Seminar in Arts (2 credits). *

Theoretical and historical aspects of the arts from one culture or world area are explored through seminar discussion, library research, and film/video presentations. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

33A. African Global Art and Music (2 credits). *

The theme of "Changing the Global Community Through the Arts" explored in African global art and music through readings, listening sessions, and interactions with academics and performers. Culmination will be the African Global Festival and Symposium in April. Enrollment limited to 25. (General Education Code(s): A.) *E. Cameron*

34B. Fractals, Chaos Theory, and the Arts (2 credits). *

A consideration of chaos theory and fractal geometry as applied by 20th-century artists in all media. All necessary math and computer skills are covered. Students complete essays or art projects. Enrollment limited to 25. (General Education Code(s): A.) *R. Abraham*

35. Experiencing Live Performance (2 credits). *

Students' attendance at live regional theater performances informed by artists' talks, class lectures, and readings. Students participate in informal performance workshops and write short critical essays. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

35A. Viewing Art in the Bay Area (2 credits). *

Field trips to museums and commercial galleries. Some reading and brief written reports are required; each field trip subject to discussion in class the week following. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

38. Working in . . . Series.

Writers, directors, technical workers, visual artists, and professionals in a diverse range of media discuss current work, paths that led to their creative endeavors, and constraints to working in the industry. *The Staff*

38B. Working in TV and Film (2 credits). W

Writers, directors, and technical workers in areas of TV and film discuss current work, paths that led to their creative endeavors, and constraints of working in the industry. Students research aspects of film and TV professional work. Cannot be repeated for credit. (General Education Code(s): A.) *L. Steck*

39. Jewish Personal Narratives on Film (2 credits). *

Examines documentaries made by Jewish filmmakers who integrate themselves as characters into their films. Students investigate this unique documentary form, while studying the cultural themes that surface in each narrative. Enrollment limited to 25. (General Education Code(s): A.) *R. Giges*

80A. Introduction to University Discourse: Writing Across the Arts. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Study, discuss, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T4-Humanities and Arts, C1.) *The Staff*

80B. Rhetoric and Inquiry: Writing Across the Arts. F

Explores the intersections between rhetoric (persuasion) and inquiry (investigation) and hones strategies for effective reading, writing, speaking, and research. Read, discuss, research, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T4-Humanities and Arts, C2.) *The Staff*

80E. Arts Education in the Community. W

Organized in small teams, participants engage with students from public elementary classrooms to develop fully-staged group performance projects by end of term. Students are guided by instructor's models of teaching techniques, designed to stimulate the imagination, and by diverse readings. Enrollment limited to 30. (General Education Code(s): T4-Humanities and Arts, A.) *T. Beal*

80G. Making Poetry: Readings/Writing (2 credits). *

Guest poets read work and discuss their approaches to writing. Students develop their own poems and the class culminates in a poetry reading of student work. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

80K. Ways of Knowing. W

Creativity in different disciplines is developed via different ways of knowing. Musical, visual, scientific, and spatial literacy demand understanding which is not primarily logocentric. Explores how practitioners of arts and science develop their work and conceptualize its execution. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *J. Todd*

80L. Documenting Oral History. F

Students learn basic techniques of interview and camera work to document on film oral histories collected from community elders. Students develop their skills in writing, theater, visual art, music, or film to reinterpret oral histories as artwork. Enrollment limited to 30. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *T. Beal*

83. Pacific Rim Film Festival: Viewing Across Cultures (2 credits). F

Involves viewing Asian and Pacific films at the annual Pacific Rim Film Festival, participating in post-screening discussions with area experts, and writing on the issues of cross-cultural viewing/reading of film. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *M. Foley*

99. Tutorial.

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits).

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

120. Advanced Dance/Theater Practicum (2 credits). *

The practice of dance/theater in a particular world area or culture. Students learn the art of one world area or era and the associated cultural background. Prerequisite(s): audition; prior training in the discipline is required. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121. Advanced Music Practicum (2 credits).

The practice of music in a particular area of the world at an advanced level. Students learn the music of one world area or culture over the quarter and study the associated cultural background. Enrollment limited. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121C. Opera Workshop/Music Practicum (2 credits). W

Rehearsal of the principal vocal parts of an opera in preparation for a full production. Consideration of the dramatic aspects of each role and the interrelationships of the characters. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

121D. Sundanese Gamelan and Dance Theater (2 credits). S

Practical study of the musical traditions of the Sundanese people of Indonesia with attention to technique and cultural features leading to the performance of a dance theater performance. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

126. South Asia Seminar (2 credits). *

South Asian issues in arts, technology, culture, and history will be presented in weekly seminar. Students will attend lectures, read supplementary articles, and write a short paper on a South Asian topic. Enrollment limited to 15. *M. Foley*

141. New Works Research Laboratory. *

Artists from different disciplines (i.e., art and music, design and creative writing, performance art and dance, etc.) collaborate with students to research and create new pieces. Students are involved in phases of the development from the conception to presentation of the work. Enrollment limited to 20. May be repeated for credit. *The Staff*

180. Writing Across the Arts: Pedagogical Practicum. F

Upper-division students participate in Porter core course, joining in seminars and leading small group sections exploring social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Participate in weekly seminar dealing with pedagogical practice preparing students to raise issues related to texts, critical thinking, writing, and the artistic process. Enrollment limited to 18. *The Staff*

194. Group Tutorial.

A program of independent study arranged between a group of students and a faculty instructor. *The Staff*

199F. Tutorial (2 credits).

Individual projects carried out under the supervision of a Porter faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2006-07

Faculty | Course Descriptions

(There were no substantive changes to the Portuguese Program Description from the General Catalog 2006-08.)

Program Description

Students interested in acquiring proficiency in Portuguese may choose to enroll in either of two accelerated introductory tracks: courses 1A–B are designed as a two-quarter sequence for students who have no previous experience with the Romance languages; courses 60A-B are a two-quarter sequence designed for students who have a strong background in the Romance languages (typically Spanish) or some previous knowledge of Portuguese. A second-year Portuguese sequence, courses 65A–B, follows the first-year sequence, and is offered as accelerated courses over two quarters. The completion of this sequence fulfills the two-year language requirement for study abroad programs.

The program is aimed at enabling students to gain proficiency in listening comprehension, speaking, reading, and writing. Instruction takes place in Portuguese from the beginning and draws heavily on Brazilian culture through popular music and cinema.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

Students may apply to spend time in Rio de Janeiro, Brazil, through the UC Education Abroad Program (EAP). Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Program Description | Faculty

Lower-Division Courses

1A. Intensive Elementary Portuguese. F

Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Enrollment limited to 25. *The Staff*

1B. Intensive Elementary Portuguese. W

Sequential to course 1A, completes first-year accelerated instruction. Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Prerequisite(s): course 1A. Enrollment limited to 25. *The Staff*

60A. Advanced Beginning and Intermediate Portuguese. F

This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): Spanish 4 or Spanish for Spanish Speakers 64 or French 4 or Italian 4 or placement by examination. *The Staff*

60B. Advanced Beginning and Intermediate Portuguese. W

Sequential to course 60A, completes first-year accelerated instruction of Portuguese for speakers of Spanish and other Romance languages. This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): course 60A or placement by examination. (General Education Code(s): IH.) *The Staff*

65A. Intermediate Portuguese. S

A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Fulfills EAP language requirement for study abroad in Brazil. Prerequisite(s): course 1B or 60B, or by instructor approval. (General Education Code(s): IH.) *The Staff*

65B. Intermediate Portuguese. F

Sequential to course 65A, completes second-year accelerated instruction. A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold

sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Fulfills EAP language requirement for study abroad in Brazil. Prerequisite(s): course 65A or by instructor approval. (General Education Code(s): IH.) *The Staff*

Psychology

273 Social Sciences 2 Building (831) 459-2002 http://psych.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Psychology majors at UCSC are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, precalculus, statistics, research methods, and introduction to developmental psychology. Majors subsequently take seven upper-division courses in four major areas of psychology: cognitive, social, developmental, and personality psychology, and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as sensation and perception; brain and behavior; human information processing; decision-making; learning and memory; thinking, feelings, and emotions; and psycholinguistics. Social psychology addresses topics such as persuasion and influence, motivation, group processes, intergroup relations, psychology and law, and social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span.

Additionally, both developmental and social psychology are concerned with issues of diversity including ethnicity, culture, gender, income, and family structure. Personality psychology focuses on person-centered processes including creativity, attachment, depression, and life stories.

In addition to the general psychology major, an intensive major and a minor (described below) are also available. (Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UCSC does not offer advanced degrees in clinical psychology or counseling.)

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Making Decisions," "How Do You Organize Your World?" "I'm Every Woman: A Look at Female Perspectives," "Family Story Telling," and "Friendship and the College Transition."

Preparation for the Major

Students interested in pursuing the psychology major should officially declare the pre-psychology major after attending the required pre-psychology orientation. Quarterly orientation schedules are posted on the Psychology Department web site, http://psych.ucsc.edu. After completing the lower-division required courses, students may then declare the psychology major.

High school students considering psychology as their university major find that the best preparation is a solid general education in English, mathematics through precalculus, natural sciences, social sciences, and writing.

Transfer Students

Junior transfer students should express an interest in psychology on their UCSC application for admission.

It is expected that prospective transfer students will have completed most, if not all, of the lowerdivision requirements. The psychology faculty recommends that all lower-division requirements be completed by the end of the sophomore year.

Several measures are taken to control over enrollment in the psychology major. At the time of transfer, students must have a 3.0 or higher grade-point average in all UC-transferable course work, with at least a 3.1 in all psychology courses. Junior-level students with 120+ quarter credits will not be admitted into the pre-major. This occasionally affects transfer students who have many credits on their records. It can also affect students who want to change their major in mid-junior year. Senior-level students with 135+ quarter credits will not be admitted into the major. This affects seniors who want to add a minor or double major in psychology (it does not affect those who have already declared a pre-psychology major). Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. Students planning to transfer to UCSC should check with the advising office of their present college, or refer to www.assist.org.

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process.

General Psychology Major

Thirteen courses are required for the general major: five lower-division courses in preparation for the major and eight upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites. Once the lower-division courses have been completed, a student may petition to declare the psychology major.

Lower-Division Requirements

Psychology

- 1 Introduction to Psychology
- 2 Introduction to Psychological Statistics
- 3 Research Methods in Psychology
- 10 Introduction to Developmental Psychology

Mathematics 3 Precalculus (or equivalent)

Courses 20, 40, and 60 are strongly recommended.

Upper-Division Requirements

Students must complete at least eight upper-division courses (a minimum of 40 credits), including appropriate substitutions noted below, two from each of any three of the following subfields, one course from the remaining subfield, and one course outside the major for a total of eight upper-division psychology courses:

Developmental (courses numbered 100–119) Cognitive (courses numbered 120–139) Social (courses numbered 140–159) Personality (courses numbered 160–179)

Upper-division courses and their catalog descriptions are grouped within each of the subfields. At least one upper-division seminar course must be completed; these courses are identified within their catalog description by the phrase "satisfies seminar requirement." No more than two psychology courses numbered 193, 194, and 195 may be used toward the upper-division requirements; however, these 190 series courses cannot be substituted for 100-179 courses in the same subfield as each other, or in a subfield in which the student has not taken a course in the 100-179 series. The eighth upper-division requirement must be a five-unit UCSC course outside of psychology chosen from a list of courses approved by the subfield in which students may have taken only one upper-division course. If students have taken two upper-division psychology courses in each of the four subfields, their required outside course can be chosen from a list approved by any of the four subfields. These lists of approved non-psychology courses are posted on the Psychology Department web site. At least five of the eight courses must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript. An exception will be made so that students can receive credit for up to three preapproved EAP courses toward their upper-division major requirements. Students requesting this exception would be required to take at least five of their eight upper-division courses through the psychology program at UCSC. After all substitutions have been made, students must satisfy the fundamental requirement that they take at least on upper-division UCSC psychology course from each of the four subfields.

The Psychology Department recommends that students take substantive courses in related disciplines such as anthropology, biology, community studies, computer science, education,

linguistics, philosophy, and sociology.

Program Planning Notes

Because some upper-division courses have additional prerequisites, students should read the descriptions of the upper-division courses carefully, noting the prerequisites for courses of interest to them.

Psychology Major Planners

Following are two recommended academic plans for students to complete during their first two years as preparation for the psychology major. Plan One is a suggested guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major or who need more preparation. Students should note that Math 3 is a requirement for the major and a prerequisite for course 2. Courses 20, 40, 60, and Biology 70 are recommended electives and are prerequisites for some upper-division psychology courses.

Plan One					
Year	Fall	Winter	Spring		
	Math 3 Psyc 1	Psyc 2	Psyc 3		
(soph)	Psyc 10 (Biol 70 recommended)	(Psyc 40 recommended) (Begin upper-division course work)	(Psyc 60 recommended)		
Plan Two					
Year	Fall	Winter	Spring		
1st (frsh)	Math 3	Psyc 1	Psyc 10		
2nd (soph)	Psyc 60 (Biol 70 recommended)	Psyc 2	Psyc 3 Psyc 40		

The Intensive Psychology Major

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses.

Requirements for the Intensive Major

Lower-Division Requirements

Psychology

- 1 Introduction to Psychology
- 2 Introduction to Psychological Statistics
- 3 Research Methods in Psychology
- 10 Introduction to Developmental Psychology

Mathematics 3 Precalculus (or equivalent)

Once these lower-division courses have been completed, a student may petition to declare the psychology major.

Upper-Division Requirements

• Thirteen upper-division courses are required for the intensive major. These courses must include two courses from each of the following four subfields, one of which must be a seminar:

Developmental (courses numbered 100–119)
Cognitive (courses numbered 120–139)
Social (courses numbered 140–159)
Personality (courses numbered 160–179)

- Course 181 Psychological Data Analysis, or an equivalent course approved by the department
- Two quarters of course 194, Advanced Research; or 195, Senior Thesis
- Two upper-division courses from one or more related areas outside of psychology from lists of courses pre-approved by the Psychology Department and posted on the department's web site, http://psych.ucsc.edu. These two courses will not count toward the eight upper-division requirements listed above. (These courses may not include psychology courses cross-listed with other programs or taught by psychology faculty.) These courses also cannot be counted twice in

cases of double majors or minors.

Minor in Psychology

To obtain a minor in psychology, a student must complete the following courses:

- Psychology 1, 2, 3, and 10
- Mathematics 3 (or equivalent)
- five (25 units) upper-division courses in psychology. These courses must be from at least two of the four subfields: developmental, cognitive, social, and personality.

Once these lower-division courses have been completed, a student may petition to declare the minor in psychology.

No more than one course numbered 191–199 may be used toward the upper-division requirements. At least three of the upper-division psychology courses (100–199 range) must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript.

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in one of our seminars. Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as "satisfies seminar requirement."

Academic Advising

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002. The adviser assists students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students can also get advice about the Graduate Record Examination and assistance in initiating a senior thesis and independent studies. Students are encouraged to take advantage of the advising office throughout their college career.

Disqualification from the Major/Minor

Students who receive a No Pass, D, and/or F twice in any one of courses Psychology 1, 2, 3, 10, or Mathematics 3 (or equivalent), or who receive a No Pass, D, and/or F in three or more of these courses combined, will be considered to be not making normal progress in the major or minor and will be subject to disqualification from the major or minor. Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time or their failure in three courses may appeal their disqualification from the major or minor and/or later petition the department for reinstatement. For further information regarding the disqualification process, contact the Psychology Department office.

Senior Thesis

Students with adequate substantive and methodological preparation and a consistent record of strong academic performance may be eligible to apply to write a senior thesis. Students should initiate plans for a thesis no later than the first quarter of their senior year. Most faculty prefer to sponsor senior theses that are integrated with faculty research, so students are encouraged to talk with faculty before choosing a senior thesis topic. Information and applications are available in the department office, 273 Social Sciences 2.

Honors

Honors in the psychology major are awarded to graduating seniors whose academic performance is judged to be consistently excellent by a committee of psychology faculty. Highest Honors in the major are reserved for students with consistently excellent academic performance and an honors-level senior thesis.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and

other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with course work and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are preparation seminars and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information can be obtained at the psychology field-study bulletin board, second floor of Social Sciences 2, and at: http://psych.ucsc.edu/field_study.

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program does not offer courses, training, or supervision in clinical psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the Ph.D. program may obtain an M.S. degree by fulfilling specific requirements.

Graduate work in cognitive psychology trains students in the traditional methods of experimental psychology while mastering contemporary knowledge of cognitive psychology. The cognitive faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the faculty include human information processing, cognitive and social processes in learning and memory, language and discourse comprehension, reading, speech perception and production, computer simulation and mathematical modeling of cognitive processes, spatial vision, and visual psychophysics.

Graduate work in developmental psychology is concerned with the integration of individual, interpersonal, and cultural processes of development. Our faculty study these developmental processes in diverse communities and institutions, including families, friends, schools, and children's museums. This integrative training is supported by an NIH training grant that provides funding for graduate students and post-doctoral trainees. Some research interests of the faculty include:

- Contexts for learning, academic, and scientific achievement, and career identities of cultural minorities and women, including social policy and educational practice.
- Conversations, narrative, and memory sharing as contexts for language, cognitive, and gender development, and the development of personal and social identities.
- Infants' and children's cognitive and language development through observation, overhearing, and exploration.
- The development of personality, creativity, and leadership.
- Learning and participation structure in informal settings such as museums, families, peers, and communities.
- The nature of culture and development: interdisciplinary theories and research methods that link qualitative and quantitative approaches.

Graduate work in social psychology focuses on the study of social justice following Kurt Lewin's model of "full-cycle" social psychology. Students receive training in the theories and methods of social psychology with the aim of applying their training to the analysis and solution of social problems. In turn, it is expected that students' experiences in the field will be used to critically assess theories and methods. Students are encouraged to examine theoretical and empirical issues as they arise in different cultural, political, and policy contexts. Students are trained to conduct research with laboratory, field, and survey methodologies. The research interests of the faculty include such topics as leadership and group processes, intergroup relations, gender issues, psychology and law, the study of social class, Latinos in education, sexual aggression, feminist psychology, the psychology of peace and conflict, children's experiences of school places, empowerment-based models for school interventions, identity and conflict, sexual identity, and cultural psychology.

Students in all three research areas acquire teaching experience as teaching assistants for a minimum of two courses during their graduate career.

Graduate students in psychology may obtain a notation on the psychology Ph.D. diploma indicating that they have specialized in feminist studies and/or Latino American and Latino Studies (LALS) if they meet requirements spelled out by a committee composed of psychology and feminist studies faculty, or psychology and LALS faculty.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies web site. The department's graduate program brochure, and faculty research are available on the department web site.

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All graduate students must enroll and participate in the colloquium series each quarter (PSYC 230 for cognitive, PSYC 242 for developmental, and PSYC 231 for social.) First-year students must take two courses in statistics (PSYC 204 and PSYC 214A) and a two-quarter proseminar sequence during fall and winter quarters. (PSYC 224A and 224B for cognitive, PSYC 244A and 244B for developmental, and PSYC 211A and 211B for social.) Each student is also required to serve as a teaching assistant for at least two courses during his or her graduate career (one of which must be PSYC 10 for developmental and PSYC 40 for social). Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

Additional requirements for the developmental area include: PSYC 225A, PSYC 225B, PSYC 246, one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

Additional requirements for the social area include: PSYC 210, PSYC 248, one other advanced social graduate seminar, a graduate course in cognitive psychology, a graduate course in developmental psychology, and a substantive advanced course in a discipline other than psychology.

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., usually by the end of their third year. The qualifying exam is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying exam, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying exam.

Within two quarters of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee. After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam. The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

Psychology

273 Social Sciences 2 Building (831) 459-2002 http://psych.ucsc.edu

<u>Program Description</u> | <u>Faculty</u> | <u>Course Descriptions</u>

Program Description

Psychology majors at UCSC are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, precalculus, statistics, research methods, and introduction to developmental psychology. Majors subsequently take seven upper-division courses in four major areas of psychology: cognitive, social, developmental, and personality psychology, and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as sensation and perception; brain and behavior; human information processing; decision-making; learning and memory; thinking, feelings, and emotions; and psycholinguistics. Social psychology addresses topics such as persuasion and influence, motivation, group processes, intergroup relations, psychology and law, and social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span.

Additionally, both developmental and social psychology are concerned with issues of diversity including ethnicity, culture, gender, income, and family structure. Personality psychology focuses on person-centered processes including creativity, attachment, depression, and life stories.

In addition to the general psychology major, an intensive major and a minor (described below) are also available. (Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UCSC does not offer advanced degrees in clinical psychology or counseling.)

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Making Decisions," "How Do You Organize Your World?" "I'm Every Woman: A Look at Female Perspectives," "Family Story Telling," and "Friendship and the College Transition."

Preparation for the Major

Students interested in pursuing the psychology major should officially declare the pre-psychology major after attending the required pre-psychology orientation. Quarterly orientation schedules are posted on the Psychology Department web site, http://psych.ucsc.edu. After completing the lower-division required courses, students may then declare the psychology major.

High school students considering psychology as their university major find that the best preparation is a solid general education in English, mathematics through precalculus, natural sciences, social sciences, and writing.

Transfer Students

Junior transfer students should express an interest in psychology on their UCSC application for admission.

It is expected that prospective transfer students will have completed most, if not all, of the lower-division requirements. The psychology faculty recommends that all lower-division requirements be completed by the end of the sophomore year.

Several measures are taken to control over enrollment in the psychology major. At the time of transfer, students must have a 3.0 or higher grade-point average in all UC-transferable course work, with at least a 3.1 in all psychology courses. Junior-level students with 120+ quarter credits will not be admitted into the pre-major. This occasionally affects transfer students who have many credits on their records. It can also affect students who want to change their major in mid-junior year. Senior-level students with 135+ quarter credits will not be admitted into the major. This affects seniors who want to add a minor or double major in psychology (it does not affect those who have already declared a pre-psychology major). Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. Students planning to transfer to UCSC should check with the advising office of their present college, or refer to www.assist.org.

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process.

General Psychology Major

Thirteen courses are required for the general major: five lower-division courses in preparation for the major and eight upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites. Once the lower-division courses have been completed, a student may petition to declare the psychology major.

Lower-Division Requirements

Psychology

- 1 Introduction to Psychology
- 2 Introduction to Psychological Statistics
- 3 Research Methods in Psychology
- 10 Introduction to Developmental Psychology

Mathematics 3 *Precalculus* (or equivalent)

Courses 20, 40, and 60 are strongly recommended.

Upper-Division Requirements

Students must complete at least eight upper-division courses (a minimum of 40 credits), including appropriate substitutions noted below, two from each of any three of the following subfields, one course from the remaining subfield, and one course outside the major for a total of eight upper-division psychology courses:

Developmental (courses numbered 100–119) Cognitive (courses numbered 120–139) Social (courses numbered 140–159) Personality (courses numbered 160–179)

Upper-division courses and their catalog descriptions are grouped within each of the subfields. At least one upper-division seminar course must be completed; these courses are identified within their catalog description by the phrase "satisfies seminar requirement." No more than two psychology courses numbered 193, 194, and 195 may be used toward the upper-division requirements; however, these 190 series courses cannot be substituted for 100-179 courses in the same subfield as each other, or in a subfield in which the student has not taken a course in the 100-179 series. The eighth upper-division requirement must be a five-unit UCSC course outside of psychology chosen from a list of courses approved by the subfield in which students may have taken only one upper-division course. If students have taken two upperdivision psychology courses in each of the four subfields, their required outside course can be chosen from a list approved by any of the four subfields. These lists of approved non-psychology courses are posted on the <u>Psychology Department web</u> site. At least five of the eight courses must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript. An exception will be made so that students can receive credit for up to three preapproved EAP courses toward their upper-division major requirements. Students requesting this exception would be required to take at least five of their eight upper-division courses through the psychology program at UCSC. After all substitutions have been made, students must satisfy the fundamental requirement that they take at least on upper-division UCSC psychology course from each of the four subfields.

The Psychology Department recommends that students take substantive courses in related disciplines such as anthropology, biology, community studies, computer science, education, linguistics, philosophy, and sociology.

Program Planning Notes

Because some upper-division courses have additional prerequisites, students should read the descriptions of the upper-division courses carefully, noting the prerequisites for courses of interest to them.

Psychology Major Planners

Following are two recommended academic plans for students to complete during their first two years as preparation for the psychology major. Plan One is a suggested guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major or who need more preparation. Students should note that Math 3 is a requirement for the major and a prerequisite for course 2. Courses 20, 40, 60, and Biology 70 are recommended electives and are prerequisites for some upper-division psychology courses.

Plan One					
Year	Fall	Winter	Spring		
1st	Math 3	Psyc 2	Psyc 3		
(frsh)	Psyc 1				
2nd	Psyc 10	(Psyc 40	(Psyc 60		
(soph)	(Biol 70 recommended)	recommended) (Begin upper-division course work)	recommended)		
Plan Tw	0				
Year	Fall	Winter	Spring		
1st	Math 3	Psyc 1	Psyc 10		
(frsh)			-		
2nd	Psyc 60	Psyc 2	Psyc 3		
(soph)	(Biol 70 recommended)		Psyc 40		

The Intensive Psychology Major

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses.

Requirements for the Intensive Major

Lower-Division Requirements

Psychology

- 1 Introduction to Psychology
- 2 Introduction to Psychological Statistics
- 3 Research Methods in Psychology
- 10 Introduction to Developmental Psychology

Mathematics 3 *Precalculus* (or equivalent)

Once these lower-division courses have been completed, a student may petition to declare the psychology major.

Upper-Division Requirements

• Thirteen upper-division courses are required for the intensive major. These courses must include two courses from each of the following four subfields, one of which must be a seminar:

Developmental (courses numbered 100–119) Cognitive (courses numbered 120–139) Social (courses numbered 140–159) Personality (courses numbered 160–179)

• Course 181 Psychological Data Analysis, or an equivalent course approved by the department

- Two quarters of course 194, Advanced Research; or 195, Senior Thesis
- Two upper-division courses from one or more related areas outside of psychology from lists of courses pre-approved by the Psychology Department and posted on the department's web site, http://psych.ucsc.edu. These two courses will not count toward the eight upper-division requirements listed above. (These courses may not include psychology courses cross-listed with other programs or taught by psychology faculty.) These courses also cannot be counted twice in cases of double majors or minors.

Minor in Psychology

To obtain a minor in psychology, a student must complete the following courses:

- Psychology 1, 2, 3, and 10
- Mathematics 3 (or equivalent)
- five (25 units) upper-division courses in psychology. These courses must be from at least two of the four subfields: developmental, cognitive, social, and personality.

Once these lower-division courses have been completed, a student may petition to declare the minor in psychology.

No more than one course numbered 191–199 may be used toward the upper-division requirements. At least three of the upper-division psychology courses (100–199 range) must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript.

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in one of our seminars. Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as "satisfies seminar requirement."

Academic Advising

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002. The adviser assists students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students can also get advice about examiniations (the comprehensive examination) and the Graduate Record Examination and assistance in initiating a senior thesis and independent studies. Students are encouraged to take advantage of the advising office throughout their college career.

Disqualification from the Major/Minor

Students who receive a No Pass, D, and/or F twice in any one of courses Psychology 1, 2, 3, 10, or Mathematics 3 (or equivalent), or who receive a No Pass, D, and/or F

in three or more of these courses combined, will be considered to be not making normal progress in the major or minor and will be subject to disqualification from the major or minor. Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time or their failure in three courses may appeal their disqualification from the major or minor and/or later petition the department for reinstatement. For further information regarding the disqualification process, contact the Psychology Department office.

Senior Thesis

Students with adequate substantive and methodological preparation and a consistent record of strong academic performance may be eligible to apply to write a senior thesis. Students must make formal application to a faculty mentor during the last quarter of the junior year before enrolling in course 195, Senior Thesis. Students should initiate plans for a thesis no later than the first quarter of their senior year. Most faculty prefer to sponsor senior theses that are integrated with faculty research, so students are encouraged to talk with faculty before choosing a senior thesis topic. Information and applications are available in the department office, 273 Social Sciences 2.

Honors

Honors in the psychology major are awarded to graduating seniors whose academic performance is judged to be consistently excellent by a committee of psychology faculty. Highest Honors in the major are reserved for students with consistently excellent academic performance and an honors-level senior thesis.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with course work and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are preparation seminars and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information can be obtained at the psychology field-study bulletin board, second floor of Social Sciences 2, and at: http://psych.ucsc.edu/field_study.

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program does not offer courses, training, or supervision in clinical psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the Ph.D.

program may obtain an M.S. degree by fulfilling specific requirements.

Graduate work in cognitive psychology trains students in the traditional methods of experimental psychology while mastering contemporary knowledge of cognitive psychology. The cognitive faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the faculty include human information processing, cognitive and social processes in learning and memory, language and discourse comprehension, reading, speech perception and production, computer simulation and mathematical modeling of cognitive processes, spatial vision, and visual psychophysics.

Graduate work in developmental psychology is concerned with processes of developmental change in individuals and relationships through the life span and in community and cultural contexts. The developmental faculty are especially interested in issues of diversity in development, including ethnicity, gender, personality, and in the interplay between human development and the social contexts of family, peers, school, work, community, and culture. Among the topics studied by faculty are cultural variations in communication and learning through observation in families and in institutions such as museums and schools; the role of family communication and narrative in the development of self; identity and relational competence in childhood and adolescence; development and developmental significance of creativity; gender development in social-structural and interpersonal contexts; language and cognitive development within the contexts of conversations with parents, siblings, and peers; the role of experience in knowledge acquisition in infancy; and adult attachment and personality development using longitudinal methodologies; and diversity issues in university outreach programs.

Graduate work in developmental psychology is concerned with the integration of individual, interpersonal, and cultural processes of development. Our faculty study these developmental processes in diverse communities and institutions, including families, friends, schools, and children's museums. This integrative training is supported by an NIH training grant that provides funding for graduate students and post-doctoral trainees. Some research interests of the faculty include:

- Contexts for learning, academic, and scientific achievement, and career identities of cultural minorities and women, including social policy and educational practice.
- Conversations, narrative, and memory sharing as contexts for language, cognitive, and gender development, and the development of personal and social identities.
- Infants' and children's cognitive and language development through observation, overhearing, and exploration.
- The development of personality, creativity, and leadership.
- Learning and participation structure in informal settings such as museums, families, peers, and communities.
- The nature of culture and development: interdisciplinary theories and research methods that link qualitative and quantitative approaches.

Graduate work in social psychology focuses on the study of social justice following Kurt Lewin's model of "full-cycle" social psychology. Students receive training in the theories and methods of social psychology with the aim of applying their training to the analysis and solution of social problems. In turn, it is expected that students' experiences in the field will be used to critically assess theories and methods. Students are encouraged to examine theoretical and empirical issues as they arise in different cultural, political, and policy contexts. Students are trained to conduct research with laboratory, field, and survey methodologies. The research interests of the faculty include such topics as leadership and group processes, intergroup relations, gender issues, psychology and law, the study of social class, Latinos in education, sexual aggression, feminist psychology, and the psychology of peace and conflict, children's experiences of school places, empowerment-based models for school interventions, identity and conflict, sexual identity, and cultural psychology.

Students in all three research areas acquire teaching experience as teaching assistants for a minimum of two courses during their graduate career.

Graduate students in psychology may obtain a notation on the psychology Ph.D. diploma indicating that they have specialized in <u>feminist studies</u> and/or <u>Latino</u>

American and Latino Studies (LALS) if they meet requirements spelled out by a committee composed of psychology and feminist studies faculty, or psychology and LALS faculty.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the <u>Division of Graduate Studies web site</u>. The department's graduate program brochure, and faculty research are available on the <u>department web site</u>.

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All graduate students must enroll and participate in the colloquium series each quarter (PSYC 230 for cognitive, PSYC 242 for developmental, and PSYC 231 for social.) First-year students must take two courses in statistics (PSYC 204 and PSYC 214A) and a two-quarter proseminar sequence during fall and winter quarters. (PSYC 224A and 224B for cognitive, PSYC 244A and 244B for developmental, and PSYC 211A and 211B for social.) Each student is also required to serve as a teaching assistant for at least two courses during his or her graduate career (one of which must be PSYC 10 for developmental and PSYC 40 for social).

Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

Additional requirements for the developmental area include: PSYC 225A, PSYC 225B, PSYC 246, one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

Additional requirements for the social area include: PSYC 210, PSYC 248, one other advanced social graduate seminar, a graduate course in cognitive psychology, a graduate course in developmental psychology, and a substantive advanced course in a discipline other than psychology.

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., usually by the end of their third year. The qualifying exam is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying exam, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying exam.

Within two quarters of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee. After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam. The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

Psychology

Program Description | Course Descriptions

Faculty and Professional Interests

Professor

Nameera Akhtar

Cognitive and social cognitive processes in early language development, infants' social understanding

Margarita Azmitia

How culture, peers, family, and schools provide a context for children's and adolescents' development. Special emphasis on how close relationships influence the educational pathways and identity development of ethnically and socioeconomically diverse populations

Bruce Bridgeman

Physiological mechanisms of visual perception and cognition, computer simulation of cognitive processes, space perception, eye movements

Maureen A. Callanan

Cognitive and language development in the social context of family activities, development of word meanings and concepts, the construction of causal explanations in parent-child conversations

Martin M. Chemers

Leadership, team and organizational effectiveness, cultural and personality characteristics of leaders, college student adjustment and performance

Catherine R. Cooper

Cultural perspectives on child and adolescent development; linkages among families, peers, schools, and work; issues of diversity, ethnicity, and gender in identity; research, practice, and policy in university outreach programs; linking qualitative and quantitative research

Faye J. Crosby

Gender, social identity, and social justice, especially affirmative action

Raymond W. Gibbs Jr.

Language, thought, and embodiment; special emphasis on metaphor, pragmatics, and cognitive science

Per F. Gjerde

Cultural psychology with emphasis on East and Southeast Asia, familial influences on socialization, personality development and assessment, depression in adolescents and young adults, longitudinal research, developmental psychopathology, adult attachment

Craig W. Haney

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

Aida Hurtado

Social identity, feminist theory, social psychology of education, survey methodology

Campbell Leaper

Social construction and socialization of gender in childhood, adolescence, and adulthood; self-concept and social identity; language and social interaction; social relationships, gender bias in the schools and academic achievement; images of gender in the media; perceptions and consequences of sexism

Dominic W. Massaro

Understanding language, speech perception and reading, language learning and speech technology, pattern recognition, psychology of interactive media, psychology of art and new media, human-machine interface

Anthony R. Pratkanis

Social influence; attitude structure, function, and change

Barbara Rogoff

Human development in sociocultural activity; informal and formal arrangements for learning; adult/child and peer communication in families and schools in diverse cultural communities; learning through observation; cognitive development, especially problem solving, planning, and attention

Avril Thorne

Identity development through personal memory telling, development of meaning in adolescents' self-defining memory narratives, family storytelling and the development of a sense of self, narrative co-construction of identity and personality

Associate Professor

Heather E. Bullock

Poverty and economic inequality, welfare policy, feminist psychology, discrimination

Jean Fox Tree

Psycholinguistics: production and comprehension of spontaneous speech, disfluencies and discourse markers in speech, listeners' interpretations of speech

David M. Harrington

The ecology of creativity, longitudinal studies of creatively active adolescents, personality development, personality and situational assessment, research methods and data analysis

Alan H. Kawamoto

Empirical and computer simulation approaches to the study of perceptual and cognitive processes, psycholinguistics, problem solving

Mara Mather

Memory and decision making, impact of emotional processing on memory, cognitive neuroscience, and aging and memory

Jack L. Vevea

Applied statistics, item response theory, mathematical models for bias in memory, statistical methods for meta-analysis

Margaret L. Wilson

Embodied cognition, broadly defined. Specific interests include person perception, imitation, visual cognition, working memory, sign language, and the evolution of cognition

Eileen L. Zurbriggen

Connections between power and sex; sexual aggression and abuse; sexual decision making; parental, peer, and media influences on adolescent sexual development; objectification and sexualization of girls and women; motivation, especially power and affiliation-intimacy motives; feminist and political psychology

Assistant Professor

Catherine C. Byrne

The psychology of peace and conflict, particularly the social psychology of reconciliations, survivors of human rights abuses experience and resilience, perpetrator explanations for wrongdoing, as well as social and political apologies

Phillip L. Hammack

Social and cultural psychology of conflict and intergroup relations, with a focus on Israeli and Palestinian youth; culture and identity formation; cultural psychology of adolescence; sexual orientation and sexual identity development

Regina D. Langhout

School-community-university collaboration; how schooling experiences are informed by social class, race, and gender; participatory action research

Daniel C. Richardson

Eye movements during cognitive processing and language use; perceptual-motor representations in cognition; spatial indexing in adults and infants

Travis L. Seymour

Role of immediate memory, consciousness, and executive control on the human performance of laboratory and applied tasks; cognitive processes amenable to strategic control and how they influence the way in which we maintain situational awareness; high levels of performance in complex and cognitive tasks

Su-hua Wang

Cognitive development, infant cognition, mental representations, theory of mind, how experience shapes early learning, parental child-rearing beliefs, cross-cultural perspectives on self-esteem

Lecturer

David A. "Tony" Hoffman

Child and adolescent development, developmental psychopathology, child and adolescent assessment, school psychology, pediatric psychology, chidren and war, children in high risk situations

Ralph H. Quinn

Clinical psychology, moral development, psychology and religion, existential-humanistic psychology

Donald T. Saposnek

Childhood psychopathology, special needs children, parenting and family interactions, socialization of children, children and divorce, family mediation, conflict resolution

Veronica K. Tonay

Clinical psychology, psychotherapy outcome, community mental health, dreams, personal narratives, creativity

Emeriti

Elliot Aronson , Emeritus G. William Domhoff , Emeritus Michael Kahn , Emeritus Max M. Levin , Emeritus Pavel Machotka , Emeritus Melanie J. Mayer , Emeritus Barry McLaughlin , Emeritus Thomas F. Pettigrew , Emeritus M. Brewster Smith , Emeritus

Dane Archer, Professor, Sociology

Violence, war and peace, cross-national and cross-cultural research, verbal and nonverbal communication, crime and law

Jerome Neu, Professor, Humanities

Philosophy of mind, emotions and culture, philosophy of law, psychoanalytic theory

Roland G. Tharp, Professor Emeritus, Education and Psychology

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Introduction to Psychology. F,W,S

Introduces prospective majors to the scientific study of behavior and mental processes and also provides an overview for non-majors. Emphasizes social, cognitive, developmental, and personality psychology and their interrelations. (General Education Code(s): IS.) (F) The Staff, (W) M. Callanan, (S) A. Kawamoto

2. Introduction to Psychological Statistics. W,S

An introduction to elementary statistical principles and techniques relevant to psychological research. Topics covered include basic parametric and nonparametric statistics, analysis of variance, and simple factorial designs. This course is prerequisite to course 181. Prerequisite(s): course 1, and Applied Mathematics and Statistics 3 or Mathematics 3 or 11A or satisfactory placement score on math placement exam or CEEB Advanced Placement Calculus AB exam. (General Education Code(s): Q.) (W) The Staff, (S) J. Vevea

3. Research Methods in Psychology (7 credits). F,S

An introduction to research methods used to investigate human psychology. Course emphasizes critical thinking, designing and conducting research, analyzing and interpreting data, and writing a professional research report. Prerequisite(s): course 2 or Applied Mathematics and Statistics 5. Enrollment restricted to prepsychology majors; minors by permission of instructor. (*F*) *T. Seymour*, (*S*) *C. Leaper*

10. Introduction to Developmental Psychology. F,W,S

Psychological development from birth to adolescence, with primary emphasis on infancy and childhood. A broad introduction to the nature of change during childhood and adolescence and to theories of development. Prerequisite(s): course 1. Enrollment restricted to pre-psychology majors. (F) The Staff, (F) B. Rogoff, (W) S. Wang, (S) N. Akhtar

20. Introduction to Cognitive Psychology. W

Introduces basic concepts in cognitive psychology. Topics include thinking, consciousness, perceiving, language, remembering, reasoning, problem solving, and decision-making. Prerequisite(s): course 1. *The Staff*

40. Introduction to Social Psychology. F,S

An analysis of contemporary research in social psychology and of what that research can teach us about the world we live in. Problems of conformity, propaganda, prejudice, attraction, and aggression. Focuses on a person's relationship with other people—how he or she influences them and is influenced by them. Prerequisite(s): course 1. (F) A. Pratkanis, (S) The Staff

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division or graduate students under faculty supervision. (See course 192.) *The Staff*

60. Introduction to Personality Psychology. W,S

An overview of major personality theories from Freud to the modern day, and an introduction to contemporary personality research and assessment. Prerequisite(s): course 1. (W) The Staff, (S) D. Harrington

65. Introduction to Humanistic Psychology. S

Humanistic psychology is seen here as those contemporary aspects of the field which are explicitly directed toward life-enrichment for members of the culture. The course does not attempt a complete survey of these aspects, but rather explores some of them in depth and attempts to begin working toward an overall theory of the humanistic movement. (General Education Code(s): IS.) *R. Quinn*

80A. Psychology and Religion. F

Topics covered include myth and the unconscious, the varieties of religious experience, dualism, women and religion, the role of authority, transpersonal experience, conversion, disaffiliation, self and community. (General Education Code(s): T3-Social Sciences.) *R. Quinn*

80B. Human Sexuality. W

A study of human sexuality emphasizing its psychological aspects. Sexual development, sexual orientations, biological influences, sexual attitudes and behavior, gender and gender roles, sex therapy, sexual coercion and abuse, sexually transmitted diseases, and the development of sexual relationships. (General Education Code(s): T3-Social Sciences.) *V. Tonay*

Upper-Division Courses

100. Topics in Developmental Psychology.

These topics, offered at different times by different instructors, examine selected topics in developmental psychology.

100B. The World of Babies. W

Focuses on how infants learn about intuitive physics, naive psychology, and shared culture. Also discusses possible ways to facilitate this learning. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *S. Wang*

100C. The Social Context of Children's Cognitive Development. *

Focuses on the contribution of cultural and social relationships (e.g., parent-child, peers, siblings) to cognitive development. Special emphasis on the mechanisms through which relationships influence cognition and the features of social interactions that promote and inhibit development. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 117 preferred. Enrollment restricted to senior psychology majors or permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *M. Azmitia*

100D. Cultural Psychology. W

Critically analyzes relations among culture, ethnicity, identity, and the nation-state in a world characterized by globalization, migration, and social change. Examines the relevance of these features for the development of children and youth through examples from both Western and non-Western "cultures." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology and anthropology majors. Enrollment limited to 30. (General Education Code(s): E.) *P. Gjerde*

100G. Issues of Diversity in Developmental Psychology. *

Examines current issues of diversity from the perspective of theory and current empirical research in developmental psychology and related fields. Emphasis is on understanding children and families from increasingly diverse cultural, linguistic, and socioeconomic backgrounds, both rural and urban, by examining social, cultural, and psychological processes underlying their development. Prerequisite(s): courses 3 and 10. (General Education Code(s): E.) *The Staff*

100H. Symbolic Development. *

Examines the development of symbolic understanding in childhood. Readings cover a range of symbol systems, including written language, numbers, photographs, maps, and drawings. Discussions will focus on connections between different systems. Satisfies seminar requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 20. *L. Triona*

100J. Cultural Perspectives on Adolescent Development. *

Examines cultural influences on adolescence from the perspective of current interdisciplinary theory and research, focusing on identity, changes from early adolescence to adulthood, linkages from family to community experiences, gender, immigration, biculturalism, and implications for social policy. Includes research practicum. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors or permission of instructor. Enrollment limited to 30. *C. Cooper*

100K. Development of Thought and Language. *

Explores the dynamic interface between thought and language throughout development. Focuses on early expression and understanding of meaning in infants and young children and on analysis of everyday conversations and activities of children as a window on developing understandings of the world. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. (General Education Code(s): W.) *M. Callanan*

100L. Development as a Sociocultural Process. *

Examines theory and research in sociocultural approaches to how people (especially children) learn and develop through participating in activities of their communities with other people. Emphasizes the organization of social interactions and learning opportunities, especially in communities where schooling has not historically been prevalent. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s):

satisfaction of Entry Level Writing, Composition requirements; course 1, Anthropology 1 or 2, Education 92A, 92B, or 92C, Latin American and Latino Studies 1, or Sociology 1. Enrollment restricted to seniors or permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *B. Rogoff*

100N. Special Topics in Narrative Development. *

Examines a special topic of current interest in developmental psychology centering on features of development that unfold during free-flowing discourse, e.g., interviews, conversations, and reminiscences. Topics may include the development of self-narratives, personal memories, family stories, attachment, identity, or achievement. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Course 60 recommended. Enrollment limited to 30. A. Thorne

100R. Developmental Psychology Research and "Real World" Problems. W

Explores ways that research in developmental psychology can be used to address "real-world" problems facing children. With an analytical focus on evidence and generalizability, we will investigate research-policy connections in topics of popular interest (e.g., child custody, poverty). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. (General Education Code(s): W.) *M. Callanan*

100V. Identity Development in Social and Cultural Contexts. F

Senior seminar that focuses on identity development in adolescence and young adulthood. Discusses theory and research on the development of personal and social identities and the sociocultural contexts in which these personal and social identities are negotiated. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 102 strongly recommended. Enrollment restricted to senior psychology majors or by permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *M. Azmitia*

100X. Humor Development. *

Examines how children develop their appreciation and use of humor from infancy to adolescence. Considers which cognitive, sociocognitive, social, and linguistic skills are necessary for children to appreciate and produce different forms of humor. Course satisfies the seminar requirement. Course satisfies the senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 20. *The Staff*

101B. Discourse and Identity Development. *

Explores how we construct our identities in everyday conversations. Focus is on the realm of conversational interaction, approaching people as *social actors* who (in a sense) *perform* themselves in talk over time. Special focus this quarter: the construction of *gender* in conversation interaction. Course satisfies seminar requirement. Enrollment restricted to senior psychology majors. Enrollment limited

102. Adolescent Development: Adolescence into Young Adulthood. F

Focuses on individual and relational development from early adolescence into young adulthood. Emphasis on the mutual influences of family relationships and adolescent development, and on the interface of family, peer group, and school experience in cultural contexts. Prerequisite(s): courses 3 and 10. *M. Azmitia*

103. Language Development. S

An introduction to language development in children. Explores current theory and research in language development; focuses on the preschool years. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *N. Akhtar*

106. Social and Emotional Development. S

An examination of contemporary theory and research on social and emotional development from infancy through childhood. Prerequisite(s): courses 3 and 10. *The Staff*

107. Development in Infancy. W

Focuses on psychological development in infancy. Presents research on perceptual, cognitive, and social-emotional development during the first two years of life. Prerequisite(s): courses 3 and 10. *N. Akhtar*

109. Adult Development and Aging. S

An introduction to cultural, biological, interpersonal, and cognitive processes that influence adult development and aging. We discuss how each of these processes promotes stability and change during adulthood. Prerequisite(s): courses 3 and 10. *W. Martyna*

110. Gender and Sexual Identity Development. *

Examines gender and sexuality from a developmental perspective. Topics include identity development in general with a specific focus on gender and sexual identity. Special consideration given to various influences on sexual and gender identity including peers and media. Prerequisite(s): courses 3 and 10; course 140Q and FMST 1 recommended as preparation. Enrollment limited to 80. *E. Thompson*

113. Culture and Human Development (6 credits). W

Examines theory, research, and methods of studying the inherent cultural basis of human development and variations and similarities in human lives and activites in different communities worldwide. The approach draws on ideas and observations from psychology, anthropology, linguistics, sociology, and history. Students cannot receive credit for this course and course 80D. Course includes lab exercises using interview and observation methodologies and presentations of library research. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and one of the following: course 1; Anthropology 1 or 2; Education 92A, 92B, or 92C; Latin American Studies 1; or Sociology 1. (General Education Code(s): W, E.) *B. Rogoff*

115. Current Topics in Personality and Developmental Psychology. *

Examines a special topic of current interest in personality and/or developmental psychology, such as attachment, self-images, self-narratives, motivation, longitudinal studies, systematic descriptions of contexts, and special topics in adolescence. Emphasizes conceptual and methodological issues. Satisfies seminar

requirement. Satisfies senior comprehensive requirement. Prerequisite(s): course 60. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *D. Harrington*

117. Children's Thinking. W

Cognition in children from infancy through adolescence. Basic and current research on children's understanding of the social and physical world. Focus on major theoretical perspectives: Piaget's constructivist approach, information processing approach, and sociocultural approach. Prerequisite(s): courses 3 and 10. *The Staff*

118. Children and War. *

Examine development and behavioral ecology of children affected by war. Discuss development of displaced children, abandoned children, orphaned children, children living in protracted conflict, and child soldiers. Review child protection strategies and psychosocial intervention. Prerequisite(s): courses 3 and 10. *D. Hoffman*

119. Lifespan Developmental Psychopathology. F

Examines theory and research on developmental psychopathology. Emphasizes the origin and longitudinal course of disordered behavior. Explores the processes underlying continuity and change in patterns of adaptation and age-related changes in manifestations of disorders. Prerequisite(s): courses 3, 10, and 170. *P. Gjerde*

120D. Deafness and Sign Language. F

Explores what we can learn about human cognition by studying the atypical case of sensory loss and language in a different sensory modality. Topics include brain organization, sensory compensation, working memory, visual cognition, and psycholinguistics. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): course 20 or an upper-division cognitive course strongly recommended. Enrollment restricted to senior psychology majors and minors. Enrollment limited to 30. *M. Wilson*

120E. Consciousness. S

Provides a psychological study of human consciousness. Aim is to explore the following questions: What is consciousness? Where does consciousness come from? What functions does consciousness have in everyday cognition? How do we best scientifically study consciousness? These issues are examined from the perspective of contemporary research in cognitive science. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, philosophy, anthropology, and linguistics majors. Enrollment limited to 30. *R. Gibbs*

120F. The Psychology of Lying and Deception. *

Discusses why and how people lie. Using scientific articles, movies, and our everyday lives as source material, explores the nature of lying; then focuses on various approaches to behavioral and mechanical "lie detection." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *T. Seymour*

120K. Modeling Human Performance. S

Explores how information processing models distinguish between multiple theories of human memory and performance. Students analyze variety of cognitive tasks and phenomena to produce explicit information processing models. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors or relevant mathematical or computer science background

with permission of instructor. An upper-division cognitive course is strongly recommended. Enrollment limited to 30. *T. Seymour*

120M. Embodied Cognition. *

What is the relationship between thinking, perceiving, and doing? Traditionally, thinking is seen as disembodied contemplation. In contrast, course reviews behavioral and neurological evidence it employs, perceptual and motor brain mechanisms, and discuss what this means for our understanding of cognition. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *D. Richardson*

121. Perception. S

Basic perceptual psychology, emphasizing the relationships between perception and cognition. Topics include shape, color, and depth; hearing, taste, smell, and touch; and perceiving faces, voices, and language. Prerequisite(s): course 3 or Biology 70. *M. Wilson*

123. Behavioral Neuroscience. W

An examination of the physiological mechanisms of psychological processes, including sensory systems, motor systems, control systems, and memory and learning. Principles of nervous system organization are discussed at each level. Prerequisite(s): course 1 or Biology 70 and one course in statistics (course 2 or Engineering 5 or Engineering 7). *The Staff*

124. Psychology of Reading. S

Focuses on the cognitive processes that underlie reading in adults. Additional topics include different writing systems, learning to read, and reading deficits. Recommended for upper-division students. Prerequisite(s): course 3. A. Kawamoto

125. The Psychology of Language. F

A study of human communication as a function of psychological, linguistic, and social factors. Topics covered include language comprehension and production, language and reasoning, and language as a social activity. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 3 or 20 or Linguistics 52 or 53 or 55. (General Education Code(s): W.) *J. Fox Tree*

126. Aging and the Human Brain. F

How does the brain change as we age? Course covers new developments in research on cognitive neuroscience and aging, with a focus on the consequences for memory, emotion, and decision-making. Prerequisite(s): course 20, 121, 123, 129 or Biology 70. *The Staff*

127. Computer Mediated Communication. W

Provides an introduction to perception and cognition as it relates to how people communicate with each other using computers and the Internet. Considers both cognitive/perceptual aspects as well as social aspects of communication and how computers enhance/constrain that communication. Prerequisite(s): course 3 or 20 or consent of instructor. Enrollment limited to 40. A. Kawamoto

129. Human Learning and Memory. W

Examines basic theories, models, methods, and research findings in human memory. Both traditional and nontraditional topics are covered. Students cannot receive credit for this course and course 130A. Prerequisite(s): course 3. *T. Seymour*

130. Visual and Spatial Cognition. W

Focuses on visual and spatial representation as elements of human cognition. Topics include imagery, visual attention, mental models, spatial language, the body schema, near-body space, and brain organization for representing space. Prerequisite(s): course 3; course 20 or any upper-division cognitive course is highly recommended. *M. Wilson*

130A. Memory Distortion. *

Most of the time, our memories serve us quite well. However, many of the strategies and mechanisms which help us remember accurately most of the time can also lead to errors. Examines various types of memory distortion and explores what memory errors can tell us about the mechanisms of memory. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Students cannot credit for this course and course 129. Prerequisite(s): course 20 or an upper-division cognitive course strongly recommended. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *M. Mather*

130B. Deception, Brain, and Behavior. *

Focuses on behavioral and brain manifestations of deception. Topics include developmental changes that allow us to understand and to use deception, physical implications of lying expressed in the face, voice, posture, and brain activity. Also covers mechanical or behavioral techniques used in deceptive behavior, whether in the form of overt behavior or brain activity. Prerequisite(s): course 3; course 20 or any upper-division cognitive course strongly recommended. *T. Seymour*

133. Psychology and Evolutionary Theory. S

Human psychology is examined from the viewpoint of evolutionary theory, including perspectives from ethnology, anthropology, and neuropsychology. Upper-division students from diverse backgrounds are encouraged to enroll. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to junior and senior psychology, anthropology, biology, philosophy, sociology, and feminist studies majors or permission of instructor. Enrollment limited to 30. *B. Bridgeman*

134. Weird Science. S

Explores the relationship between science and pseudoscience from a cognitive psychological perspective, including discussion of collection and selection of data, statistical assessment of data, cognitive illusions, memory distortions, reasoning, and decision-making. Also highlights the dissemination of scientific knowledge. Satisfies seminar requirement. Satisfies comprehensive requirement. Prerequisite(s): course 3 or course 20. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *J. Fox Tree*

135. Feelings and Emotions. F

Focuses on contemporary research in the psychology of human emotions. Special attention given to work in cognitive science, including psychology, linguistics, philosophy, and anthropology, on how emotions are central to understanding human action and mental life. Enrollment restricted to psychology, linguistics, philosophy, and anthropology majors. *R. Gibbs*

136. Conversations. W

Explores how conversations work and how speakers accomplish their goals in an interaction. Topics include conversational structure, turn-taking, variation in

language use, and the functions of discourse markers (words like "um," "uh," and "you know"). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to junior and senior psychology and linguistics majors. Enrollment limited to 30. *J. Fox Tree*

137. Mind, Body, and World. *

Psychologists primarily view the mind as being separate from the body, and the body as being separate from the external world. This course questions this widely held position and explores the way that minds arise from individuals' bodily interactions with others and the world around them. Particular attention is paid to the role of human embodiment in language use and everyday cognition. Enrollment restricted to psychology, linguistics, philosophy, and anthropology majors. *R. Gibbs*

138. Psychology of Interactive Media. *

A laboratory course in which students work with state-of-the-art language technologies. The goal is to design, conduct, and analyze experiments in interactive media and human machine interface. Empirical and theoretical literature will be covered as a foundation for the experiments. Prerequisite(s): course 3 or permission of instructor. Enrollment limited to 20. *D. Massaro*

139. Decision Making and Problem Solving. F

Course goal is to support the development of reflective thought to provide students with a more complete set of skills (psychological literacy). Various problem-solving and decision-making scenarios will be presented and analyzed within the context of cognitive psychology. Prerequisite(s): course 3 or permission of instructor. *The Staff*

140. Topics in Social Psychology.

140A. Women's Lives in Context: Community Practicum (2 credits).

*

Provides link between course 140G and community organizations that work with women. Students complete internships with relevant agencies and participate in seminar meetings. Concurrent enrollment in course 140G required. Enrollment limited to 20. *H. Bullock*

140C. Health Psychology. W

Course examines the psychological aspects of health, illness and healing. Focuses primarily on etiology, treatment and prevention; specific topics include stress and the immune response, social support, compliance, health beliefs, and the healing relationship. Prerequisite(s): courses 3 and 40. *J. Kaupp*

140G. Women's Lives in Context. *

Examines contemporary theories, findings, and social issues regarding the psychology of women. Emphasis is placed on understanding how gender, class, race, ethnicity, and sexuality shape women's experiences across the lifespan. Students cannot receive credit for this course and course 41. Enrollment restricted to junior and senior psychology, feminist studies, sociology, and community studies majors. *H. Bullock*

140H. Sexual Identity. F

Surveys contemporary perspectives on the psychology of sexual identity with emphasis on ways in which sexual identity has been understood in historical and cultural contexts. Considers variations in sexual desire, behavior, and identity across cultures. Considers the relationship between contemporary issues and public policy, including same-sex marriage and parenthood. Current issues of identity examined in light of queer theory and its relevance to the psychological study of sexual identity. Course satisfies seminar requirement and comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *P. Hammack*

140J. Human Motivation. *

An introduction to psychological theories of human motivation, including both those focused on the self and those highlighting the effects of social settings. Applications of these theories to domains such as politics or sports will be discussed. Prerequisite(s): courses 3 and 40. *E. Zurbriggen*

140M. Research Seminar in Crime and Media. *

Empirically examines several aspects of the criminal justice system (in particular, jury decision making and media effects on juror fairness and impartiality). In addition to extensive reading, students participate in research projects. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): courses 147A and 147B; or Legal Studies 147A and 147B; or concurrent enrollment in course 147B or Legal Studies 147B. Enrollment restricted to senior psychology and legal studies majors. Enrollment limited to 30. *C. Haney*

140N. Social Issues Research. *

Reviews contemporary social issues research. Emphasizes understanding how researchers study social problems and how theory and research can contribute to social change. Examines intersections of psychology and social policy. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *H. Bullock*

140P. Psychology of Sexual Aggression. *

An overview of psychological theory and research related to sexual aggression, focusing on both perpetration and victimization. Includes a discussion of the social construction of masculinity and femininity, media representations of sexual violence, and alternative (nonaggressive) visions of sexuality. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology or feminist studies majors or permission of instructor. Enrollment limited to 30. *E. Zurbriggen*

140Q. Social Psychology of Sex and Gender. F

Considers interpersonal and societal influences on people's genderstereotyped expectations and behavior in close relationships, the family, schools, and the workplace. Also examines power and status inequalities between women and men in social interactions and society. Related topics may include gender in the media, body image and self-concept, interpersonal communication, and violence. Prerequisite(s): courses 3 and 40. *C. Leaper*

140R. Peace Psychology. *

Is war inevitable? What is peace? Is it more than the absence of

violence? Explore how psychology— the study of human behavior—can help to decrease violence and enhance cooperation at multiple levels including the personal, interpersonal, community, and international arenas. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *C. Byrne*

140T. Psychology of Trauma. *

Overview of psychological theory and research on trauma and traumatic stress, including responses to childhood trauma (especially sexual abuse), combat, and natural disasters. Variety of theoretical frameworks presented, including developmental, cognitive, neuropsychological, clinical, and social/contextual. Prerequisite(s): course 3 or permission of instructor. *E. Zurbriggen*

143. Intergroup Relations. S

An overview of the social psychological study of intergroup relations, emphasizing underlying social and individual dynamics. Considers theory and research in the field and the application of these to a variety of societies and groups. Topics include the importance of groups in individual identity; stereotypes, prejudice, and discrimination; intergroup inequality and injustice; collective action and social protest. Prerequisite(s): course 3 and 40. (General Education Code(s): E.) *C. Byrne*

143A. Culture and Identity. W

Considers the relationship between culture and identity through examination of both classic and contemporary texts in psychology and related fields. Considers relevance and meaning of identity in contemporary cultural context, levels of identity, marginalized identities, and challenges to identity posed by globalization and postmodernity. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): course 3. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *P. Hammack*

145. Social Influence. W

An advanced course for upper-division undergraduates interested in the study of the persuasion process. The course investigates common influence tactics and how those tactics are used in various settings. Prerequisite(s): course 3. A. Pratkanis

145D. Social Psychology of Autocracy and Democracy. S

Humans are the only animal capable of living in both authoritarian and democratic regimes. Course explores the nature of these forms of social relationships with a goal of promoting democracy. Topics include: obedience to authority, conformity, self-justification, propaganda, power, and conflict resolution. Satisfies seminar and senior comprehensive requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. A. Pratkanis

146. The Social Context. W

A systematic analysis of the social and contextual determinants of human behavior, with special attention given to concepts of situational control, social comparison, role and attribution theories, as well as the macrodeterminants of behavior: cultural, historical, and sociopolitical context. Prerequisite(s): courses 3 and 40 or Sociology 136. *The Staff*

147A. Psychology and Law. *

Current and future relationships between law and psychology, paying special

attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment. (Also offered as Legal Studies 147A. Students cannot receive credit for both courses.) Prerequisite(s): courses 3 and 40 are recommended prior to taking this course. Enrollment restricted to psychology, pre-psychology, and legal studies majors. *C. Haney*

147B. Psychology and Law. *

Continuing discussion of current and future relationships between law and psychology and to contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment. (Also offered as Legal Studies 147B. Students cannot receive credit for both courses.) Prerequisite(s): course 147A. *C. Haney*

149. Community Psychology: Transforming Communities. F

Introduction to community psychology, a discipline that blends social psychology, sociology, and anthropology. Class topics include levels of analysis, ecologies, prevention, intervention, feminism, empowerment, sense of community, coalition building, and social justice and action. Prerequisite(s): course 3. Enrollment restricted to juniors and seniors. *R. Langhout*

149A. Community-Based Interventions. *

What makes a successful intervention, what happens before the formal intervention begins, the ethics involved with interventions, different methods for assessing interventions, and different praxis models. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): course 3. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *R. Langhout*

150. Social Psychology of Flimflam. F

Why do we believe strange things? This course investigates such flimflams as beliefs in the Loch Ness Monster, quack health care, and racial superiority to illustrate the underlying social psychological principles that lead us to adopt weird attitudes. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to psychology majors. Enrollment limited to 30. *A. Pratkanis*

153. The Psychology of Poverty and Social Class. *

Examines how social class shapes attitudes, beliefs, and behaviors. Emphasis is placed on structural barriers and their impact on the well-being of low-income groups. Strategies for reducing classist discrimination and improving interclass relations are discussed. Enrollment restricted to anthropology, community studies, economics, legal studies, politics, psychology, sociology, or feminist studies majors. *H. Bullock*

153A. Psychology of Poverty and Social Class Community Practicum (2 credits).

Provides a link between course 153 and community organizations with an antipoverty mission. Students complete internships with nonprofit agencies and participate in seminar meetings. Prerequisite(s): concurrent enrollment in course 153. Enrollment limited to 20. *H. Bullock*

155. Social Psychology of Social Justice. *

Why do some situations seem fair and others unfair? Are all people concerned with justice or are some scoundrels? This course looks at the principles of distributive, procedural, and retributive justice and at real world applications of theories. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. (*F*) *The Staff*

157A. Chicana Feminism. *

Students are introduced to the writings of Chicana feminists to identify the gender issues that produce conflict and cooperation in their communities. The course also makes linkages to gender issues in other U.S. communities of color and Latin America. (Also offered as Feminist Studies 151A. Students cannot receive credit for both courses.) Prerequisite(s): course 3 or Feminist Studies 1or 80C. (General Education Code(s): E.) *A. Hurtado*

157B. Advanced Topics in Chicana Feminism. *

Course is a continuation of course 151A which introduces students to the writings of Chicana feminists to identify the gender issues that cause conflict and cooperation in their communities. The seminar format allows students an opportunity for extensive discussion. (Also offered as Feminist Studies 151B. Students cannot receive credit for both courses.) Satisfies senior requirements. Satisfies senior comprehensive requirement. Prerequisite(s): courses 1, 40, or 157A or Feminist Studies 1, 80C, 100, or 151A, or consent of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 30. A. Hurtado

158. Latinos in the Media. *

Introduces portrayals of Latinos in the U.S. media including magazines, film, and television. Covers the most recent social psychological research on media representations and implications for identity. (Also offered as Latin American&Latino Studies 125. Students cannot receive credit for both courses.) Prerequisite(s): course 3 or Latin American and Latino Studies 1. (General Education Code(s): E.) A. Hurtado

159. Organizational Psychology. S

The psychology of organized human interaction: individual motivation; social perception; leadership and participation; group, intergroup, and system dynamics; conflict and conflict resolution; cooperation and decision-making. Also considers contemporary issues facing American organizations. Prerequisite(s): course 3. *M. Chemers*

161. Fostering Creativity. *

Examines theories, research, and practices that suggest ways creativity can be fostered in the arts and sciences as well as in business, education, social action, and everyday life. Focuses on special topics of personal interest to students. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): courses 3 and 60. Enrollment limited to 30. *D. Harrington*

162A. The Psychology of Creativity. *

The study of creative people, processes, and places in the arts, literature, science, business, and education. Examines theories, systematic research, and case studies. Social roles, economic factors, child-rearing practices, and educational methods which may influence creativity are also studied. Prerequisite(s): course 3, course 60 is recommended as preparation. *D. Harrington*

162B. Special Topics in Creativity. *

Examines selected topics in creativity which are of particular interest to seminar members. Topics will be explored in greater depth and from more perspectives than in course 162A. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): course 162A. Enrollment restricted to psychology majors. Enrollment limited to 30. *D. Harrington*

163. Freud. *

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Philosophy 139. Students cannot receive credit for both courses.) Offered in alternate academic years. *J. Neu*

164. Current Topics in Personality Psychology. *

Explores a single topic of current interest in personality psychology, such as resilience, attachment, motivation, self-narratives, self-concept, longitudinal studies, or cross-cultural perspectives. Examines relevant theories, research, and practical applications. Active student participation is required. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): courses 3 and 60. Enrollment restricted to psychology or prepsychology majors. Enrollment limited to 30. May be repeated for credit. *D. Harrington*

165. Systems of Psychotherapy. S

A review of methods of psychotherapy, with attention to the underlying assumptions about personality, health, and disease. Prerequisite(s): course 3; course 60 or 170 recommended. *V. Tonay*

166. Personality Assessment. S

How do we really know a person? Course provides hands-on experience with assessing such individual differences as intimacy motivation, dominance, paranoia, and well-being. Students construct their own personality test and learn to critique the kinds of self-report, observational, and interview techniques that are used in organizational and counseling contexts. Prerequisite(s): course 3; course 60 highly recommended as preparation. *V. Tonay*

167. Clinical Psychology. W

Serves as an in-depth introduction to the field of clinical psychology. Covers issues of clinical assessment, interviewing, testing, and a range of therapeutic modalities. Prerequisite(s): courses 3, and 60 or 65; course 170 is recommended as preparation. *R. Quinn*

168. The Study of Dreams. *

An overview of dream studies by several major theorists and researchers of the 20th century, including Freud, Jung, and Hall. An emphasis on studies that reveal cognitive conceptions and personal concerns through quantitative and qualitative analyses of sets of dreams from individuals and groups. Other topics covered more briefly include dream recall, children and dreams, and the role of dreams within cultures. Prerequisite(s): course 3. *G. Domhoff*

169. Community Mental Health. F

Examines theory and research on outreach and prevention for application with various populations in community settings (e.g., victims of violence, immigrants, severely mentally ill); presents characteristics of successful agencies and agency

development. Surveys interventions currently used in community mental health. Prerequisite(s): course 3. Courses 60 and 170 recommended. *V. Tonay*

170. Abnormal Psychology. S

Survey of theory and research on the nature of behavioral disorders. Covers psychological, biological, developmental, and socio-cultural approaches. Prerequisite(s): course 1 or 60; course 60 highly recommended as preparation. *P. Gjerde*

171. Childhood Psychopathology. F

A critical and intensive exploration of a wide variety of specific disorders within their biological, developmental, and social contexts. Concepts of psychopathology in childhood, major and minor diagnostic systems, and a variety of theories of etiology are explored. General intervention strategies and a wide range of specific psychotherapy systems for treatment are closely examined and demonstrated. Prerequisite(s): courses 3, 10, and 170. *D. Saposnek*

172. Theories of Moral Psychology. W

A seminar course with focus on theories of moral development from the psychoanalytic, social learning, cognitive-developmental, and humanistic perspectives. Students confront and discuss moral dilemmas from the four perspectives, working toward their own individual theories of pro-social behavior. Course satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): essay required on a moral issue or dilemma relevant to the student's life. Enrollment limited to 30. *R. Quinn*

175. Personality, Relationships, and Emotions. F

Explores the nature, composition, and origins of human personality; the expression of emotions; and the individual as seen in context of relationships with others. Prerequisite(s): course 3. *J. Kaupp*

177. Children and Divorce. *

Explores history and psychology of divorce and the short- and long-term effects of divorce on children. Examines wide range of findings that have drawn diametrically opposed conclusions; delves into social attitudes and legal structures that have impeded and enhanced divorce transitions for children and parents; investigates future models for divorcing that are child-friendly and consistent with findings from newly emerging longitudinal research on children and divorce. Satisfies seminar and senior comprehensive requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *D. Saposnek*

181. Psychological Data Analysis. W

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparison, repeated-measures, nested-designs, correlational analysis, bivariate regression), corresponding SAS programs, and elements of measurement theory. Prerequisite(s): course 3. (General Education Code(s): Q.) *J. Vevea*

182. Advanced Research Methods. S

Designed to equip students with ability to evaluate, conceive, and carry out psychological research. A variety of techniques (observational, experimental, laboratory, and field) examined and experienced. Students carry out research projects. Prerequisite: course 3. Enrollment limited to 30. *R. Langhout*

190. Senior Seminars.

Special topics with a format varying each quarter. The Staff

191. Teaching College Psychology.

A series designed to provide undergraduates at the upper-division level with an opportunity to participate in planning and teaching college-level psychology. May not be repeated for credit. *The Staff*

191A. Introduction to Psychology. F,W,S

Students lead discussion groups and provide one-to-one tutoring for course 1. Admission requires essay describing interest in becoming a course assistant, copies of psychology evaluations, and a letter of recommendation from a psychology faculty member; completion of some upper-division psychology courses prior to enrollment in this course. Enrollment restricted to psychology majors. Enrollment limited to 20. (F) The Staff, (W) M. Callanan, (S) A. Kawamoto

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar (course 42) under faculty supervision. Available only to upper-division or graduate students. Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Series designed to provide advanced psychology undergraduates opportunity to apply what they have learned in the classroom to direct experience in a community agency. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students' academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience. A two-quarter commitment. Students submit petition to sponsoring agency. Prerequisite(s): completion of lower-division psychology major requirements. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

193A. Developmental Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the developmental area under the guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

193B. Cognitive Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the cognitive area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

193C. Social Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in the social area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

193D. Clinical/Personality Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in clinical or personality area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

194. Advanced Research in Special Topics.

Provides a means for a small group of students to do research on a particular topic in consultation with a faculty sponsor. *The Staff*

194A. Advanced Developmental Research. F,W,S

Provides students with intensive experience conducting current research in developmental psychology. Students submit petition to sponsoring agency. May be repeated for credit. *C. Leaper*

194B. Advanced Cognitive Research. F,W,S

Provides students with intensive experience conducting current research in cognitive psychology. Students submit petition to sponsoring agency. May be repeated for credit. *J. Vevea*

194C. Advanced Social Research. F,W,S

Provides students with intensive experience conducting current research in social psychology. Students submit petition to sponsoring agency. May be repeated for credit. *H. Bullock*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or

independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

198. Independent Field Study. F,W,S

Provides psychology majors with the opportunity to apply what has been learned in the classroom to direct experience in a community agency outside the local community. Students earn academic credit by working as interns at a variety of psychological settings, where they are trained and supervised by a professional on site. Faculty also supervise the students' field study, providing guidance and help integrating psychological theories with their hands-on experience. Two-quarter commitment required. Admission requires completion of lower-division psychology major requirements; students submit petition to sponsoring agency. Applications are due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students must file a petition with the Psychology Office the quarter in which they would like to take the tutorial. Petitions may be obtained in the Psychology Department Office. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Specialized study with individual faculty as psychology peer advisors. May not be applied toward major requirements. Students submit petition to sponsoring agency. Application and interview required during the previous quarter. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199G. Tutorial (3 credits). F,W,S

Specialized study with individual faculty. May not be applied toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

204. Quantitative Data Analysis. F

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparisons, repeated-measures, nested-designs, correlational analyses, bivariate regression), corresponding SAS programs, and elements of measurement theory. Enrollment restricted to graduate students. Enrollment limited to 20. *J. Vevea*

208. Topics in Quantitative Psychology: Meta-Analysis. *

Focuses on the process of quantitative research synthesis (meta-analysis). Topics include: literature search; coding; effect-size calculation; fixed- and mixed- and random-effects models for effecting size; special problems in meta-analysis. Enrollment restricted to psychology graduate students; senior psychology majors may enroll with permission of instructor. Enrollment limited to 14. *J. Vevea*

209. Advanced Statistical Methods in Psychology. *

Statistical methods for challenging problems in psychological research. Topic changes each time the course is offered. Topics include: item response theory,

hierarchical modeling, longitudinal analysis, analysis of categorical data. Prerequisite(s): course 204 or permission of instructor. Enrollment limited to 15. May be repeated for credit. *J. Vevea*

210. The Experimental Method in Social Psychology. *

Explores the philosophy and practice of the experimental method in social psychology. Enrollment restricted to graduate students. *C. Haney*

211A. Proseminar: Social Justice and the Individual. F

Provides an introduction to social psychology, focusing on various individual-level social justice topics, including the self, social comparison, individual and collective identity, social historical and social structural determinants of behavior and various policy and social change-related issues. Enrollment restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *A. Hurtado*

211B. Social Justice, Society, and Policy. W

Provides an introduction to social psychology, focusing on empirical and theoretical developments related to social justice and group and intergroup dynamics. Topics include: prejudice and discrimination, power, collective action, and psychology's relationship to social policy. (Formerly *Proseminar: Groups in Society*.) Enrollment restricted to psychology graduate students. Undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *A. Hurtado*

213. Special Topics in Social Psychology. *

Focuses on particular issues of theoretical and practical importance in social psychology. Topics vary from year to year and often concentrate on issues of social justice, social identity, intergroup relations, and social policy. Enrollment restricted to graduate students. May be repeated for credit. (FWS) The Staff

214A. Multivariate Techniques for Psychology. W

Provides introduction to multiple regression (MR) and multivariate analysis of variance (MANOVA) as data analytic methods. Both methodological and statistical aspects of multivariate data analysis discussed. Practical problems in estimating and testing regression and ANOVA models addressed. Gain experience in carrying out and interpreting analyses using SPSS. Prerequisite(s): course 204. Enrollment limited to graduate students. Enrollment limited to 20. *The Staff*

214B. Advanced Multivariate Techniques for Psychology. *

Provides introduction to factor analysis and structural equation modeling (SEM). Develop skills in defining, estimating, testing, and critiquing models. Topics include rationale of SEM, model identification, goodness of fit, and estimation. Learn how to use relevant software packages (SPSS, LISREL, EQS, and/or AMOS) to conduct exploratory and confirmatory factor analyses, path analyses, and full ("hybrid") analyses with latent variables. Prerequisite(s): course 214A. Offered in alternate academic years. *E. Zurbriggen*

215. Production and Comprehension of Spontaneous Speech. *

Seminar on the use of collateral signals as backchannels, discourse markers, and enquoting devices, including discussion of historical origins, cross-linguistic borrowing and second-language learning, children's acquisition, and the use of signals as markers of culture and identity. Enrollment restricted to psychology graduate students. *J. Fox Tree*

217. Technology Benefiting Humanity. S

Goal is to understand how people interact with the natural world and how technology benefits this interaction. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Massaro*

218. Speech Perception and Reading. *

An information-processing analysis of speech perception and reading. The stages of information processing in understanding language are studied, with particular emphasis on pattern recognition processes, memory processes, and utilization of context and knowledge in speech perception and reading. Enrollment restricted to graduate students. *D. Massaro*

220. Special Topics in Human Memory. *

Topics announced when offered. Seminars involve discussion and critical evaluation of current, historical, and interdisciplinary readings relevant to topic. Emphasis on development of research ideas. Enrollment restricted to graduate students. Enrollment limited to 12. *The Staff*

221. Visual Perception. *

Seminar to study human perception, its methodology, and driving issues as illustrated by selected research topics (e.g., adaptation to unusual sensory environments). Where possible, parallels with other areas of psychology are drawn. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Bridgeman*

222. Topics in Lexical Organization. *

The recognition of words is a critical step in natural language processing. Discusses a range of contemporary issues related to the representation of a word and the access of this information from the perspective of psychology, linguistics, and artificial intelligence. Enrollment restricted to psychology graduate students; undergraduates who have completed course 124 may enroll with permission of instructor. Enrollment limited to 10. *A. Kawamoto*

224A. Proseminar: Cognitive I. F

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *T. Seymour, A. Kawamoto*

224B. Proseminar: Cognitive II. W

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *The Staff, R. Gibbs*

225A. Introduction to Developmental Research I (3 credits). F,W

Surveys the rationale and techniques of research in developmental psychology. Students build skills in evaluating published research, in translating theoretical ideas into researchable hypotheses, and in selecting appropriate research designs, measurement, and statistical approaches for research problems. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters. Enrollment restricted to psychology graduate students or with instructor's permission. May be repeated for credit. *P. Gjerde*

225B. Introduction to Developmental Research II. S

Focuses on drawing reasonable conclusions from research findings by focusing on students' first-year research projects and critiques of existing research. Enrollment restricted to psychology graduate students. *S. Wang*

227. Contemporary Issues in Psychology of Language. *

Special topics in thought and language are examined from the perspectives of cognitive science. Particular attention given to embodied experience and higher-order cognition. Enrollment restricted to graduate students. May be repeated for credit. *R. Gibbs*

229. Computer Simulation Models. *

Course analyzes various computer simulation techniques and how they can be used to model perception and cognition. Parallel processing in networks is emphasized. Enrollment restricted to graduate students; undergraduates who have completed course 132 may enroll with permission of instructor. Offered in alternate academic years. *A. Kawamoto*

230. Research in Cognitive Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in perception and cognition, including topics in psychobiology, psycholinguistics, and memory. Enrollment restricted to psychology graduate students. May be repeated for credit. (FW) The Staff, (S) R. Gibbs

231. Research in Social Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in social psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. (FW) R. Langhout, (S) A. Hurtado

232. Evolution of Cognition. *

Explores current research on evolution of human cognition, drawing on findings from other species and from the archaeological record. Topics include language, working memory, episodic memory, numerical abilities, and social cognition. Enrollment restricted to graduate students. *M. Wilson*

233. Impact of Emotion on Memory and Decision Making. *

Examines research and theory on emotion from the perspective of cognitive psychology. Examines what emotion might have to do with information-processing, focusing in particular on the ways that emotion affects memory and decision making. Enrollment restricted to graduate students. *M. Mather*

235. Infant Development in Contexts. *

Seminar on how contextual factors influence the development in infancy, especially on cognitive domains. Discusses at least four types of contextual factors: cultural, experiential, event, and interpersonal contexts. Enrollment restricted to psychology graduate students. *S. Wang*

236. Person, Culture, Society. W

Considers the relationship between individual psychological experience and its social, cultural, and institutional context. Reviews classic and contemporary works in social, developmental, and cultural psychology; sociology; and anthropology. Topics include: culture and personality; society and identity; the cultural construction of mind through narrative; and the postmodern challenge to notions of personhood. Concludes with a discussion of psychology and social change. Enrollment restricted to graduate students. Enrollment limited to 10. *P. Hammack*

242. Research in Developmental Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in developmental psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. (*F*) *B. Rogoff, (WS) M. Azmitia*

244A. Proseminar I: Cognitive and Language Development. F

Explores major theories and research in the fields of cognitive development and language development. Begins with classic theories, such as Piaget's theory of cognitive development, and proceeds to theories and research on topics of current interest, such as the relation between culture and cognitive and language development. Enrollment restricted to graduate students. *M. Callanan*

244B. Proseminar II: Socioemotional and Personality Development. W

An examination of contemporary theory and research on socioemotional and personality development across the lifespan. Enrollment restricted to graduate students. *M. Azmitia*

246. Cultural Diversity in Human Development. *

Focuses on issues of culture and ethnicity in our theoretical and empirical understanding of human development. Particular attention paid to issues of language, culture, and socialization as they relate to social institutions, such as education, that affect children and families. Enrollment restricted to graduate students. Enrollment limited to 20. *C. Cooper*

247. Special Topics in Developmental Psychology. *

Focuses on particular issues of theoretical importance in developmental psychology. Topics vary from year to year. Particular issues in language, culture, cognitive, social, and personality development may be covered. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *P. Gjerde*

248. Survey Methods. W

Practicum to give students hands-on experience with survey methods by conducting their own survey on the topic of their choice. Course requires the survey to be conducted off campus at a local agency or program chosen by student with approval of instructor. Enrollment restricted to graduate students. Enrollment limited to 10. *A. Hurtado*

249. Field Methodologies and Social Ethnography. *

Designed to train graduate students in applied field methods. Emphasis is on gaining knowledge and experience with actual field methods, by conducting social ethnography in the community. Field research in community placements required. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *C. Haney*

250. Prejudice and Social Relations. *

Examines the ways in which the various branches of psychology have approached the issue of prejudice. Attention paid to the assumptions underlying each approach and their relation to core psychological ideas such as the self and emotion. Enrollment restricted to graduate students. *The Staff*

251. Feminist Theory and Social Psychology. *

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion. (Also offered as Feminist Studies 251. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *A. Hurtado*

252. Special Topics in Cognitive Psychology. F

Focuses on particular issues in cognitive psychology. Topics vary from year to year. Particular issues in language, memory, perception, attention, judgment and decision making, problem solving, reasoning, emotion, cognitive modeling, cognitive neuroscience, and cognition and aging covered. Enrollment restricted to graduate students. May be repeated for credit. *M. Wilson*

253. Theory and Research in Intergroup Relations. *

Examines, compares, and contrasts a variety of theories in intergroup relations while examining relevant empirical research. The relevance of both theory and research findings to contemporary social issues is explored. Enrollment restricted to psychology graduate students; undergraduates considering graduate work in social psychology are encouraged to enroll with permission of instructor. Enrollment limited to 12. Offered in alternate academic years. *The Staff*

254. Psychology of Gender. S

Course reviews recent theory, research, and applications in the psychology of gender. Developmental, social-psychological, cultural, and feminist approaches are emphasized. Enrollment restricted to graduate students. *C. Leaper*

256. Psychology of Social Class and Economic Justice. *

Course examines the social psychological antecedents, correlates, and consequences of economic inequality in contemporary U.S. society. The impact of social class on attitudes, beliefs, and behaviors is assessed. Strategies for reducing classist discrimination and improving interclass relations are discussed. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Bullock*

259. Social Psychology of Justice. *

Looks at theories of distributive, procedural, and retributive justice; seeks universal justice norms (e.g., reciprocity); and critically examines the rules of evidence and inference guiding psychological findings. Emphasis on student participation and research. Enrollment restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 12. *F. Crosby*

290. Proseminar.

Various topics to be offered throughout the year.

290B. Advanced Developmental Research and Writing (2 credits). F,W,S

Tailored to graduate students' interests among topics involving research and scholarship in sociocultural approaches to development, methods for research design, data collection, coding, and analysis, and preparing and reviewing grant proposals and journal manuscripts. Multiple-term course; students receive 6 credits in the third quarter of attendance; the performance evaluation and grade submitted for the final quarter applies to all three quarters. Enrollment restricted to graduate students. May be repeated for credit. *B. Rogoff*

290C. Professional Development (3 credits). *

Designed to aid advanced psychology graduate students with development of competence in professional activities (e.g., preparing a vita, making job and conference presentations, submitting and reviewing manuscripts and grant proposals, professional communication, career decisions). Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to the previous quarter. Enrollment restricted to advanced psychology graduate students. May be repeated for credit. *A. Thorne*

290E. Grant Writing for Psychologists. F

Discusses how to write and put together a grant proposal for psychological research, culminating in a completed proposal. For psychology graduate students at all levels of their careers, applying to predissertation, dissertation, summer, or postdoctoral funding sources. Enrollment restricted to psychology graduate students. *J. Fox Tree*

293. Field Study. F,W,S

Student-designed and student-conducted research carried out in field settings. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. The Staff

299. Thesis Research. F,W,S

The Staff

* Not offered in 2007-08

Queer and Sexuality Studies

Feminist Studies 315 Humanities 1 (831)459-4324 fmst@ucsc.edu

http://queer.ucsc.edu/

(There were no substantive changes to the Queer and Sexuality Studies Program Description from the General Catalog 2006-08.)

Program Description

Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found in American studies, anthropology, community studies, feminist studies, film and digital media, history, history of consciousness, legal studies, literature, sociology and theater arts.

For more specialization, departments such as Community Studies, Feminist Studies and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

Research activities are sponsored by the Queer Theory research cluster (a part of the Center for Cultural Studies), the Center for Justice, Tolerance and Community, and many campus departments and student organizations.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at http://queer.ucsc.eduor via e-mail at gueer@ucsc.edu. More information may be obtained from members of the faculty working group: Anjali Arondekar (Feminist Studies), Gina Dent (Feminist Studies), Carla Freccero (Literature, Feminist Studies, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Community Studies), B. Ruby Rich (Community Studies), Nancy Stoller (Community Studies). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature, Feminist Studies), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Helene Moglen (Literature), Catherine S. Ramirez (American Studies), Jenny Reardon (Sociology), Lisa Rofel (Anthropology), Danny Scheie (Theater Arts), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact Anjali Arondekar in the department of Feminist Studies in the Humanities Division (aarondek@ucsc.edu) for information about course offerings and resources.

Students interested in the study of religion may build an independent program of study by fulfilling the requirements of one of the majors listed above and, under the guidance of a member of the faculty, use elective courses to develop a concentration of study appropriate to their interests and needs. One of the following faculty should be contacted to discuss a course of study in religion at UCSC: Murray Baumgarten (literature), Raoul Birnbaum (history of art and visual culture), Gildas Hamel (classics/French language), Susan Harding (anthropology), Gary Lease (history of consciousness), John Lynch (classics/literature), Ralph Quinn (psychology), Triloki N. Pandey (anthropology), Cynthia Polecritti (history), and Marilyn Westerkamp (history). Students seeking information on an individual major in religious studies should contact their college academic preceptor.

Program Description | Faculty

Lower-Division Courses

1. Instruction in the Russian Language. F

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Elementary sequence (1-2-3) begins in the fall quarter only. *The Staff*

2. Instruction in the Russian Language. W

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 1; or placement by examination. *The Staff*

3. Instruction in the Russian Language. S

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 2; or placement by examination. *The Staff*

4. Intermediate Russian. F

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 3; or permission of instructor. (General Education Code(s): IH.) *The Staff*

5. Intermediate Russian. W

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 4; or permission of instructor. (General Education Code(s): IH.) *The Staff*

6. Intermediate Russian. S

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 5, or permission of instructor. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. *The Staff*

History Department

201 Humanities (831) 459-2982

http://history.ucsc.edu/

(There were no substantive changes to the Russian Studies Program Description from the General Catalog 2006-08.)

Program Description

Russian studies is not a separate undergraduate program of study at UCSC, but students interested in the study of Russian history, culture, language, literature, and politics may pursue an individual major in Russian studies with an emphasis in any of the areas noted above. Several opportunities are available to travel and study in Russia. The campus offers instruction in Russian to complement Russian studies, but courses are subject to the availability of funding. Students interested in pursuing an individual major in Russian studies should contact one of the following faculty: Jonathan F. Beecher (history), Peter Kenez (history), William Nickell (Russian literature and language), Jaye Padgett (linguistics), and Michael Urban (politics). Students seeking information on an individual major in Russian studies should contact their college academic preceptor.

Science Communication

Kresge Annex A (831) 459-4475 http://scicom.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The Science Communication Program is a graduate certificate program composed of one track: science writing. Students combine a background in science with a desire to communicate science to the general public. Special note: the science illustration track, a separate track in the program until July 2004, is now being offered through UC Extension, Santa Cruz (http://scienceillustration.org). Some science illustration courses are still offered during UCSC Summer Session (http://summer.ucsc.edu) for UCSC credit through the science communication program.

The science writing graduate program focuses on the theory and practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at general readers. The program in science writing offers intensive training in news, features, essays, and editorials. Graduates receive a certificate in science writing.

Graduate Certificate in Science Writing

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time internship lasting a minimum of 10 weeks. Science Notes, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our web site.

All students are required to complete at least two part-time internships in parallel with the six required graduate courses taken during the academic year. Internships are supervised by mentors on site, as well as by the program director. The interns earn academic credit for these field study courses. The three writing seminar courses, three writing and editing workshops, and two course-equivalent internships constitute the eight courses required for the graduate certificate. In addition to the academic year coursework, a full-time 10-week (minimum) internship, or an equivalent approved by the program director, is required.

Admission to the Science Writing Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing and a strong desire to communicate science to the general public are ideal candidates for the program. At least a bachelor's degree in science is required for admission. Other admission requirements are: full-time research experience of at least six months duration; official GRE General Test scores; and official GRE Subject Test score in one of the following fields: biochemistry, cell and molecular biology, biology, chemistry, computer science, geology, mathematics, or physics. Applicants with a Ph.D. in one of these subjects are granted a waiver of the GRE Subject Test. Applications and instructions can be found online through the UCSC Graduate Division web site at http://graddiv.ucsc.edu.

Further Information

Details about the science writing graduate certificate program may be obtained from the Science Communication Program office, the web site, or by sending e-mail to scicom@ucsc.edu.

128 Sinsheimer Lab Kresge Annex A (831) 459-4475 http://scicom.ucsc.edu

Faculty | Course Descriptions

Program Description

The Science Communication Program is a graduate <u>certificate</u> program composed of one track: science writing. Students combine a background in science with a desire to communicate science to the general public. Special note: the science illustration track, a separate track in the program until July 2004, is now being offered through UC Extension, Santa Cruz (http://scienceillustration.org). Some science illustration courses are still offered during UCSC Summer Session (http://summer.ucsc.edu) for UCSC credit through the science communication program.

The science writing graduate program focuses on the theory and practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at general readers. The program in science writing offers intensive training in news, features, essays, and editorials. Science feature writing is stressed. Graduates receive a certificate in science writing.

Graduate Certificate in Science Writing

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time internship lasting a minimum of 10 weeks. Science Notes, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our web site.

All students are required to complete at least two part-time internships in parallel with the six required graduate courses taken during the academic year. Internships are supervised by mentors on site, as well as by the program director. The interns earn academic credit for these field study courses. The three writing seminar courses, three writing and editing workshops, and two course-equivalent internships constitute the eight courses required for the graduate certificate. In addition to the academic year coursework, a full-time 10-week (minimum) internship, or an equivalent approved by the program director, is required.

Admission to the Science Writing Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing and a strong desire to communicate science to the general public are ideal candidates for the program. At least a bachelor's degree in science is required for admission. Other admission requirements are: full-time research experience of at least six continuous months duration; official GRE General Test scores; and official GRE Subject Test score in one of the following fields: biochemistry, cell and molecular biology, biology, chemistry, computer science, geology, mathematics, or physics. Applicants with a Ph.D. in one of these subjects

may be <u>are granted</u> a waiver of the GRE Subject Test. Applications and instructions can be found online through the UCSC Graduate Division web site at http://graddiv.ucsc.edu.

Further Information

Details about the science writing graduate certificate program may be obtained from the Science Communication Program office, the <u>web site</u>, or by sending e-mail to <u>scicom@ucsc.edu</u>.

Students submit petition to sponsoring agency. The Staff

Graduate Courses

201A. Reporting and Writing Science News. F

A survey of the conventions of newspaper journalism and the special application of those conventions to scientific and technological subjects. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. Enrollment limited to 10. *The Staff*

201B. The Science Feature. W

A survey of selected feature articles in the current national science magazines, with attention to strategy, level of complexity, explanation technique, and style. Writing assignments include a publishable feature article. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. Enrollment limited to 10. *The Staff*

201C. The Science Essay. S

A survey of science and nature essayists. Purpose, content, form, and style are considered. Writing assignments include original essays on current issues in science, technology, and society. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *The Staff*

202. Writing and Editing Workshop. F,W,S

Theory and practice of writing and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at non-technical readers. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

A media internship is complete with faculty tutorial assistance, to satisfy a need for the student when a regular course is not available. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit. *The Staff*

Social Documentation

211 College Eight Academic Building (831) 459-2371 http://communitystudies.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The Master of Arts degree program in Social Documentation focuses on the development of expertise in analyzing and producing social documentaries in the genres of video, film, photography, audio pieces, radio programs, public ethnographies, installations, and museum exhibitions.

The social documentation program was created by the Community Studies Department, and, accordingly, takes as its foundation a social science approach to sociopolitical issues, prioritizing graphic expressions of people's lives and cultures, the conditions under which they work and sustain themselves, challenges to their survival, and strategies for improving their lives. Issues as varied as globalization, immigration, militarization, racial justice, gender redefinition, youth empowerment, gentrification, domestic violence, food and body politics, media conglomeration, environmental inequities, the digital divide, history, and memory as social agents are all anticipated subjects of our students' investigations and documentary productions. International, local, national, and regional views are equally acceptable and encouraged.

The digital revolution of recent years and the growth of alternative models of documentary distribution, radio transmission, and internet dissemination have energized new methods of knowledge transmittal, social organization, and communication. Alternative modes of social documentation can take into account both codes of production and subjects of study, without sacrificing access to audiences or communities not previously within reach. The Social Documentation program aims to be a laboratory for knowledge acquisition and deployment, pioneering a model of documentary practice suited to real-world applications within a social-change dynamic.

Building upon years of community studies experience in social justice scholarship and community intervention, students are able to hone documentary approaches suited to their project concerns, acquiring professional skills while maintaining social change commitments. Students in the Social Documentation program learn to translate academic interpretations of social life into effective, accessible and professional quality products in one or more media, museum settings and/or public-history collections. Working with the faculty in community studies and the social documentation program's affiliated faculty in other departments, students pursue their courses of study by acquiring substantive knowledge in their social science subject areas as well as the ability to navigate media standards with political and ethical processes of representation.

Objectives

The Social Documentation Program aims to train its graduates in critical thinking and the use of visual, audio, electronic, and print media, as well as historic presentations and ethnographies, dedicated to the documentation of underrepresented areas of community life. The curriculum concentrates on the analysis of social problems, the creation of a critical approach in the collection and presentation of documentary material, and on the role of effective documentary in social change. For the Master's degree, students produce documents of their own: documentaries in film or video; oral histories; audio productions; photographic essays; extensive oral histories or written ethnographies; historic exhibitions for museum or public display; internet, DVD or CD-ROM projects; and/or digital archives.

Special features of the program include its focus on the study of "ordinary life" and its emphasis on training students to produce original social analysis in broadly representational forms. The course of study includes training in the techniques of appropriate media and systems of

representation. The unique emphasis of the Social Documentation program, however, is the acquisition of a level of academic rigor in the chosen subject of focus, an insistence on social scientific methodologies, a reliance on an ethical process of production that takes its subjects into full account, and a commitment to research in the development of material for extra-academic uses and audiences. Broadcast and theatrical media have increasingly recognized the importance of ancillary distribution through partnerships with pertinent communities of interest, just as the internet is increasingly utilized for added depth and community interaction on issues. The Social Documentation program aims to prepare documentarians for newly evolving social media landscapes. At the same time, students receive training in the basic theories of social documentation with the aim of applying these theories to the analysis, prioritization, and solution of social problems.

Graduates are expected to generate work that will have an impact on the world outside the academy and to develop an understanding of documentary practices and traditions, as well as social codes that can form a foundation for future work in their targeted subject area and arena of practice. The Master's Project, which constitutes the culmination of the two years of study, will be given a public exhibition or reading, and be the springboard for continuing work after graduation.

Requirements

The Social Documentation program has a required core curriculum around which students develop a plan of study. Each student has two advisers, one for technical guidance and the other for topical expertise, who will be involved in designing each student's study and project plans. Full-time enrollment is required.

A total of 72 units are required to complete the Master's Degree in Social Documentation, comprising a combination of seminars on social documentary and social science research designed specifically for the Social Documentation graduate students, other courses on campus selected by students individually on the basis of relevance to the proposed project, and courses focused on conceptualizing, executing, and completing the students' social documentary Master's Projects. There are seven required core courses.

Required courses for the first year are as follows:

- 200 Approaches to Social Documentary
- 202 Practice of Social Documentary
- 208 Social Science Research and Social Representation
- 270 Project Planning

Required courses for the second year:

- 204 Ways of Seeing and Hearing
- 294A Production, Analysis, Editing
- 294B Production, Analysis, Editing

In addition to these mandatory courses an additional 37 units must be secured through electives as identified on an individual basis, offered by Community Studies or other departments, or through independent-study classes as approved by faculty advisers.

To satisfy requirements for the Master of Arts degree, a student must complete the first year of required courses and electives. By the end of the first year, *before summer quarter begins*, students will have written a proposal for their documentary project, which will be the basis for a required oral qualifying examination conducted by at least two community studies faculty. This proposal will include a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works. Approval of the written proposal and satisfactory completion of the qualifying exam is a prerequisite for advancement to further coursework or fieldwork on the Master's Project.

The second year is largely focused on the final documentary project required for completion of the Master's degree. This project must reflect original research and creative activity while demonstrating a command of related previous work by others. With an understanding of budgetary, equipment and time limitations, students' electronic, digital, photographic or written projects should reflect a level of quality appropriate for publication, exhibition, or broadcast (including digital/web-cast).

Typically, the expectation in each medium is as follows:

Documentary Film/Video. One 30-60 minute documentary suitable for television broadcast and public exhibition.

Documentary Photography. One on-campus showing and one major off-campus showing; 10-15 page text accompanying pictorial exhibition.

Audio Documentary/Sound Recording. One 20-30 minute documentary suitable for radio

broadcast or museum/public installation.

Historic Presentation/Public History. One on-campus presentation or exhibit and one major off-campus presentation/exhibit of "museum quality."

Oral History/Ethnography. One 120-150 page document.

Internet/Digital Presentation or Archive. To be worked out with program chair, given the evolving nature of this field.

The final examination consists of the public presentation of the project.

In addition, every project must be accompanied by a written essay describing its relationship to its field and documents its research via field notes, bibliographies, archival searches, filmographies, and videographies. These materials will be filed in digital form and archived for future reference and access.

Goals for Social Documentation Graduates

The Social Documentation Program prepares graduates with critical skills and professional tools well suited to careers in the evolving fields of documentary media in the private and public sectors, for collaboration on community-based projects, for a range of activities geared to the analysis and documentation of sociopolitical issues, and for work with private and public organizations in need of media expertise and analysis. It is expected that students will make careers in the nonprofit fields evolving to link social justice organizations with media outlets, as well as in a range of public campaigns and initiatives. They will also be well equipped to function as independent documentarians working on behalf of social change within the expanding sectors of media production and representational intervention.

Also, given the emphasis on the histories of the social documentary and on developing methods suitable for contemporary challenges, many graduates are likely to enter the field of education on a part- or full-time basis. The Social Documentation program's teaching assistant training program and TA opportunities provide graduates with the preparation necessary to exercise such options.

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

William H. Friedland, Emeritus

B. Ruby Rich

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

Nancy Stoller, Emerita

David T. Wellman

Working-class culture, American ethnic and racial diversity, social documentary studies, critical race theory, interrogations of whiteness, and qualitative research methods

Carter Wilson, Emeritus

Deborah A. Woo

Asian Americans and social change, glass ceilings and workplace discrimination, Asian American health, and mental health

Associate Professor

David T. Brundage

American working-class and immigration history, history of U.S. social movements, Irish history and politics

Julie Guthman

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

Paul Ortiz

African American history, U.S. social and political history, social documentary, oral history, subaltern studies and theories of resistance, U.S. South, Latino studies, social movements, working-class history; history of farm labor, African diaspora

Mary Beth Pudup

Regional studies, economic justice, public policy, historical geography of the U.S.

Renee Tajima-Peña

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

Assistant Professor

Marcia Ochoa

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, multimedia production, Latin American studies—Colombia and Venezuela, political philosophy, geography

Pamela Perry

Youth activism; racism and anti-racism, whiteness, educational inequalities; school integration; ethnographic documentary; racial and ethnic identities; cultural studies

Lecturer and Field Program Coordinator

Michael Rotkin

Marxist theory, capitalist system, community organizing, electoral politics, media, government programs, community power structure, institutional analysis, and affirmative action

Lecturer

Larry D. Trujillo

Chicana/o studies, ethnic studies, grassroots community organizations, prison-industrial complex, student development, Chicano music

Professor

John G. Borrego (Latin American and Latino Studies)

Global political economy, national development, urban and regional planning, community organizing, social change, ethnic minorities, Mexico and the Southwest

Dana Frank (History)

U.S. social and economic history; women, labor, and working-class history; contemporary political economy

Patricia J. Zavella (Latin American and Latino Studies)

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexicana/o workers and U.S. capital

Social Documentation

211 College Eight Academic Building (831) 459-2371 http://communitystudies.ucsc.edu

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Graduate Courses

200. Approaches to Social Documentation. F

Comprehensive review and analysis of documentary strategies aimed at societal critique and social change, evaluating changes in argument, evidence, and process over development of the discipline. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *B. Rich*

202. Practice of Social Documentary. F

Provides basic skills in social documentary genres including video, audio, and photography and discusses how to apply social scientific research and methodology in the context of these processes. A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

204. Ways of Seeing and Hearing. W

Graduate-level advanced seminar in social documentation explores ways that seeing, hearing, and knowing are influenced by culture, power, race, and other factors. Readings emphasize how documentary subjects are constituted and known, addressing questions of epistemology, social constructivism, objectivity, and method. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *The Staff*

208. Social Science Research and Social Representation. W

Designed to acquaint students with how social science research represents social reality and how social documentarians represent social reality. Designed to encourage comparison among different modes of social science research and between social science and different modes of social documentation representations of social life. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *D. Wellman*

220. Oral History. *

Introduction to the theory and practice of oral history. Seminar participants read foundational texts in oral history, historical memory, public history, and social documentary. Students conduct two oral-history interviews; write synthesis essays; and complete a seminar paper. Concurrent enrollment in course 291 required. Enrollment restricted to graduate students. Enrollment limited to 15. *P. Ortiz*

270. Project Planning for the Social Documentary. S

Workshop seminar in project planning focusing on the form and content of the documentary project; research and preproduction; technical, financial, and logistical plans; and coordination with subjects and resources. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

280. Video Production of the Social Documentary. S

Intensive overview of the production of social-issue documentary videos covering conceptualization, research, treatment and proposal writing, interview technique, camera, editing, production, and distribution. Students cannot receive credit for this course and Community Studies 180. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

290. Special Topics in Social Documentation. F,W,S

Designed to provide supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards and innovations within the field of social documentation, documentary subjects, and/or the work of individual professional documentarians. Enrollment restricted to graduate students majoring in social documentation. Enrollment limited to 15. May be repeated for credit. (FWS) The Staff

291. Media Laboratory for Social Documentation (2 credits). F,W,S

Individual training in a social documentation medium under the guidance of a faculty supervisor. Course is intended to be taken concurrently with social documentation courses requiring a laboratory course. Enrollment restricted to social documentation graduate students. Enrollment limited to 10. May be repeated for credit. *The Staff*

294A. Production/Analysis/Editing. F

Workshop seminar oriented toward actual fieldwork and production of the thesis project in the student's chosen genre. Techniques of collection and recording, analysis, preparation, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

294B. Production/Analysis/Editing. W

Workshop seminar oriented toward the editing and creative assemblage of the thesis project in the student's chosen genre. Techniques of preparation, exhibition, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. B. Rich

295. Project Completion. F,W,S

Individualized study for second-year graduate students working on and completing their final projects. Limited to students enrolled in the social documentation program during their final quarter of study. May be repeated for credit. (FWS) The Staff

297. Independent Study. F,W,S

Study either related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Course Descriptions

(There were no substantive changes to the Social Sciences Program Description from the General Catalog 2006-08.)

Program Description

The Division of Social Sciences focuses on the study of human relationships and society. As global economic and political changes transform the world around us, social scientists help us meet the challenges and opportunities of the 21st century.

Our nine departments offer more than 35 undergraduate and graduate degree programs, including many that are interdisciplinary collaborations. Our faculty members conduct leadingedge research in their fields, frequently working with students in research clusters linking departments to our research centers. We also offer extensive opportunities for experiential learning through field studies.

Our research, teaching, and state-of-the-art facilities provide students with a comprehensive and rigorous education that prepares them for productive careers and further academic pursuits. For more information on the division, see our website at: http://socialsciences.ucsc.edu/.

Sociology

226 College Eight (831) 459-4306 http://sociology.ucsc.edu

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

Sociology is the study of social interaction, social groups, institutions, and social structures. Sociologists examine the contexts of human action, including systems of beliefs and values, patterns of social relations, and the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. It encompasses an exploration of social order together with a vision of a just, free, and egalitarian society—a vision that may require fundamental change in the existing social order. Developing an understanding of both these aspects of the sociological tradition is one of the teaching goals of sociologists at UCSC. In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research.

Sociology faculty members are engaged in research on a wide range of topics, such as the study of violence; microanalysis of conversations; medicine and technology; social inequality; the intersection of class, race, and gender; revolutions; drugs in society; crime and deviance; environmental sociology; legal institutions; popular culture; media studies; globalization and international development; political economy; and language and communication. Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department agreeable to double majors and minors; and nonmajors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including the social construction of gender, emerging professions in health care, utopian communities, mass communication, surveys of health care needs, the social effects of war, gender differences in attitudes and behavior, causes of and beliefs about family violence, and the history of political struggles.

The sociology major at UCSC is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work, management, environmental planning, public service, teaching, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

General Requirements

Admission into a Sociology Major, Minor, or Combined LALS Major

The Sociology Department offers two undergraduate majors, one in sociology and a combined major with Latin American and Latino studies, and a minor in sociology.

Students must take three courses prior to petitioning for entry to the sociology major: Sociology 1 *Introduction to Sociology*, Sociology 10 *Issues and Problems in American Society*, and Sociology 15 *World Society*. Students with a grade point average (GPA) of 3.0 or above for these three courses will be allowed to declare the sociology major.

Students must take two courses (any of the three courses listed above) prior to petitioning for entry to the sociology/Latin American and Latino studies major. Students with a GPA of 3.0 or above for these two courses will be allowed to declare the combined major. (If a student takes all three courses, calculation of the GPA will be based on the two highest grades.)

Students must take one course (any of the three courses listed above) prior to petitioning for entry to the sociology minor. Students who receive a grade of B or higher in this course will be allowed to declare the sociology minor. (If a student takes more than one of these three courses, admission to the minor will be based on the highest grade in the courses taken.)

Equivalent courses may be taken at other universities or at community colleges.

Students should take Sociology 1, 10, and 15 for letter grades. For courses taken on a pass-no pass basis, the department will use the narrative evaluation in its assessment of eligibility for the major.

Courses for which the grade of W is given are not counted in the computation of the GPA. The department will evaluate grades for repeated courses following the university's grading policy for repeated courses.

Students may petition for admission to the major by filling out the campus's Declaration of Major form, and by supplying evidence of their performance in Sociology 1, 10, and 15.

Transfer students who cannot complete Sociology 1, 10, and 15 before university policy requires them to declare a major will be allowed to declare if they have taken at least two of the three courses (or their equivalent) listed above (at UCSC, at another university, or at a community college) with an overall GPA of 3.0. Transfer students allowed to declare under this rule are expected to complete all three courses with an overall minimum GPA of 3.0. Transfer students will be subject to disqualification from the major if they subsequently do not achieve an overall 3.0 GPA in courses 1, 10, and 15 or their equivalent.

Appeal of Negative Decisions

Students must submit appeals of negative decisions to the Sociology Department in writing within 30 days of notification of denial of entrance into the major. Letters of appeal should describe any extenuating circumstances that might have affected the student's record.

Requirements for the Major

For more details, students may consult the sociology handbook, available online at http://sociology.ucsc.edu, or at the department office, 226 College Eight.

Sociology majors are required to take a total of 13 courses (three prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, and six upper-division electives). In addition, they must successfully complete one of three comprehensive requirements prior to graduation.

Lower-division preparation . All sociology majors are required to take the following three courses or their equivalents.

Sociology

- 1, Introduction to Sociology
- 10, Issues and Problems in American Society
- 15, World Society

Upper-division core courses . The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

- 103A, Statistical Methods
- 103B, The Logic and Methods of Social Inquiry
- 105A, Classical Sociological Theory
- 105B, Contemporary Sociological Theory

Upper-division advanced course work . Six additional upper-division sociology courses are required, including at least one in each of three areas of specialization (clusters): institutional analysis, social psychology, and inequality and social change. Consult the sociology handbook for a list of courses that can be applied to each cluster:

- Cluster I: *Institutional Analysis*. Courses in this cluster address the issues of how major social institutions are organized, the relationship between their technologies and social relations, the subcultures that develop around them, the problems they both solve and create, and the ways they change over time.
- Cluster II: Social Psychology. Courses in this cluster deal with the intersection of sociological and psychological concepts. Social psychologists have traditionally been concerned with the experience of the individual in a social context. Topics of classic interest in social psychology include conformity, deviance, influence, social interaction, interpretive processes, attribution, sex and gender roles, and prejudice.
- Cluster III: Inequality and Social Change. Courses in this cluster address the issues raised by unequal distribution of wealth, power, privilege, and cultural control. Principal axes of inequality are class, race and ethnicity, and gender. Consequences of inequality for social organization and

personal life are examined. Also covered in this cluster are courses that examine the momentous transformation that preoccupied the founders of sociology and ongoing changes in the contemporary world: the rise and spread of capitalism, the scientific and technological revolutions, the emergence of mass politics, large-scale urbanization, shifts in family life, the growing predominance of bureaucracy, and social movements and revolutions. Specialization in one geographical area—East, South, or Southwest Asia; the Middle East; Africa; Europe; Latin America—may be pursued. Courses in this cluster develop the student's ability to conduct social research and analyze policy issues. Also considered are the social definition of social problems and the process of policy formation. Emphasis is on applied research on topics that are currently attracting public attention.

C *omprehensive requirement* . Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.

- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

Students unable to take the senior capstone course may, by permission of the department chair, be allowed to substitute a portfolio of work. This substitution must be approved in advance. The portfolio option consists of: (1) portfolio of materials from (at least) three upper-division Sociology courses; (2) a synthetic essay; (3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Sociology Major Planner One

The following is a recommended academic plan for students to begin the sociology major.

Year	Fall	Winter	Spring	
1st (frsh)	Socy 1	Socy 15	Socy 10	
2nd (soph)	Socy 105A	Socy 103A	Socy 103B Socy 105B	

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major as juniors. It is assumed that course 1 and course 10 equivalencies were completed at the previous college.

Students Beginning in Fall Quarter

Year	Fall	Winter	Spring
	Socy 15	Socy 103A	Socy 103B
(jr)	Socy 105A	Socy 105B	

Students Beginning in Winter Quarter

Year	Fall	Winter	Spring
3rd (jr)		Socy 103A Socy 15	Socy 103B
4th (sr)	Socy 105A	Socy 105B	

All majors must complete the remaining six upper-division courses in their junior and senior years.

Requirements for the Combined Major

Students may choose to declare a combined major in sociology and Latin American and Latino studies. The requirements (listed below) should be examined carefully before choosing the combined major option. Both departments must approve a study plan before the major can be declared. Once the lower-division sociology courses have been completed, students may petition to declare the combined major. Each department determines major and thesis honors separately.

Language Study

Students must demonstrate proficiency in Spanish or Portuguese equivalent to the completion of Spanish 6 or 56 or Spanish for Spanish Speakers 63 or Portuguese 65A-B.

For Spanish language instruction information, see Spanish and Spanish for Spanish Speakers. For Portuguese language instruction information.

Sociology/Latin American and Latino Studies

Students are required to take a total of 14 courses and satisfy a comprehensive requirement. There are four lower-division course requirements, two each from the sociology and Latin American and Latino studies (LALS) majors. One of the lower-division LALS classes must be Latin American and Latino Studies 1 (no substitutions); transfer students may petition to replace the other lower-division class with an appropriate course from another institution. Students are assigned a faculty adviser from each discipline. Upper-division requirements include six core courses: Latin American and Latino Studies 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/Latino issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: (1) writing a senior thesis, (2) passing an appropriate Latin American and Latino Studies Senior Seminar (194 series), or (3) completing the sociology course option of two additional sociology upper-division cluster III courses. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

Requirements for the Minor

Students minoring in sociology are required to take seven courses: one of courses 1, 10, or 15; at least two of courses 103B, 105A, and 105B; and at least four other upper-division sociology courses. Students must provide evidence of completion of the lower-division requirement, courses 1, 10, or 15 with a grade of B or better, prior to declaring the sociology minor.

Major Disqualification Policy

Students who receive a D, F, NP, or W twice in any of the upper-division core courses (courses 103A, 103B, 105A, and 105B) will be disqualified from the major or minor. Students, their college, and the Office of the Registrar will be notified by the department no later than the first day of instruction of the quarter following the disqualifying failure. Students who feel there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification by submitting a letter to the chair of the Sociology Undergraduate Education Committee. The appeal must be filed no later than 15 days after the disqualification notification was mailed, or the 10th day of classes in the quarter of the disqualification, whichever is later. For further information regarding the disqualification process, contact the Sociology Department.

UC Education Abroad Program Students

Academic year programs. Students must declare the major and pass the three lower-division preparatory course requirements (1, 10, and 15) and three of the upper-division core courses (103B, 105A, 105B) prior to study abroad. It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to three approved courses may be used toward the sociology major.

Semester programs . Fall semester: students must declare the major and pass the three lower-division preparatory course requirements (courses 1, 10, and 15) and one upper-division core course (105A) prior to fall semester study abroad. Spring semester: students must declare the major and pass the three lower-division course requirements (courses 1, 10, and 15) and two upper-division core courses (103B and 105B) prior to spring semester study abroad.

Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the major requirements when the content is deemed appropriate and approved by the Sociology Department.

Transfer Students

Junior transfer students expressing an interest in sociology on their UCSC application for admission are admitted as proposed sociology majors. This status is considered undeclared. Transfer students must meet with the sociology undergraduate adviser when they arrive on campus to determine their status and begin the actual declaration of major process, which must be completed by the end of the second quarter of the junior year for transfer students.

Declaring sociology early in the academic career will give a student priority for sociology course enrollment in subsequent quarters.

Graduate Program

The graduate program in sociology at UCSC is an interdisciplinary program that leads to the Ph.D. in sociology. An M.A. degree may be taken en route to the doctorate, but a master's program per se is not available. The program is designed to educate students in most major areas of sociology. It provides a general background in sociological theory and methods and also stresses independent work. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study.

The sociology graduate program is intended to lead to both academic and nonacademic careers, and the interests of the faculty reflect this twofold objective. Faculty specialties include comparative and historical sociology; criminal justice; cultural sociology; development, drug policy, deviant behavior; economy and society; education; emotions; environmental sociology; globalization; health; language and social linguistics; law and society; Marxist sociology; mass communication and public opinion; medical sociology; policy analysis and political economy; qualitative methodology; race, class, gender; science and technology; sexuality and homosexuality; social inequality; sociology of knowledge; and visual sociology.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's activism and commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. Research concerns cluster around environmental, racial, cultural, feminist, Latin American, peace, sexuality, and class issues. The Sociology Department's colloquium series—as well as occasional national and international conferences on one or another of these concerns held on campus—enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body enriches this work.

The core curriculum is divided into two parts, (1) basic grounding in theory and methods, and (2) exposure to research in three areas of concentration: (a) economy, development, and environment; (b) inequality and identity; and (c) culture, knowledge, and power. Beyond the required series of core courses, students are expected to specialize in a particular area and to take additional course work offered in that area. Students use comparative and historical analysis, quantitative techniques, and interpretive and/or field research methods to study questions of human agency and social structure and the ways in which these questions are limited by and dependent upon one another.

Numerous sociology students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is designed in part to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics and problems are available for advanced graduate students working on papers and dissertations in related areas.

The program encourages interdisciplinary work. Many of the faculty in the Sociology Department have additional interests and are affiliated with other departments on campus. Seminars in the anthropology , environmental studies , history , history of consciousness , politics , psychology , and feminist studies programs are open to sociology students. Graduate students in sociology may obtain a parenthetical notation on the sociology Ph.D. diploma indicating that they have specialized in feminist studies , Latin American and Latino studies , environmental studies , or philosophy . Students must meet requirements spelled out by the relevant department and their committee members. Some fellowship and grant opportunities are available. Students also participate in research projects under the auspices of six interdisciplinary social science research centers: the Center for Agroecology and Sustainable Food Systems ; the Center for Global, International, and Regional Studies ; the Center for Justice, Tolerance, and Community ; the Chicano/Latino Research Center ; the Center for Research on Educational Diversity and Excellence ; and the Santa Cruz Center for International Economics .

The sociology program also emphasizes teaching experience because the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension—are fundamental to many human activities and occupations. Therefore, the sociology program requires that graduate students serve as teaching assistants for at least three quarters in the department's core classes of the undergraduate curriculum, whether or not they plan to pursue an academic career.

Students are required to take at least 12 courses as follows.

A three-course core group:

201 The Making of Classical Theory

202 Contemporary Sociological Theory

203 Sociological Methods

Two methods courses:

204 Methods of Quantitative Analysis

and one of the following seven courses:

205 Field Research Methods

206 Comparative Historical Methods

209 Analysis of Cultural Form

241 Cross-National and Cross-Cultural Research

242 Feminist Research Seminar

Psychology 248 S urvey Methods, or 282 Social Policy Research

Three area foundation courses:

220 Global Transformation: Macrosociological Perspectives

240 Inequality and Identity

260 Culture, Knowledge, Power

At least one writing course (208 or 250)

A minimum of three elective courses approved by the graduate director (excluding sociology 250 and sociology 293).

Students with no background in statistics are required to take the undergraduate course, Statistical Methods, before enrolling in Methods of Quantitative Analysis.

Progress Toward the Ph.D.

- Beginning at least by the end of the first year, students initiate work on their master's paper.
- · Completion of the master's paper is expected by the end of the second year.
- Students are expected to take an oral qualifying exam by the end of the third year, but no later than the end of the fourth year.
- Graduate students prepare field statements in two distinct areas of sociology and, in addition, prepare a detailed course outline and a grant proposal in one or the other of these areas.
- The qualifying examination is an oral examination and based on the student's field statements.
- After passing the qualifying examination, a student is advanced to candidacy and begins
 work on the dissertation with the aid of a three-person dissertation committee.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, refer to the Graduate Studies section of the catalog.

Faculty | Course Descriptions

Program Description

Sociology is the study of social interaction, social groups, institutions, and social structures. Sociologists examine the contexts of human action, including systems of beliefs and values, patterns of social relations, and the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. It encompasses a search for an exploration of the social order together with a vision of a just, free, and egalitarian society—a vision that may require fundamental change in the existing social order. Developing an understanding of both these aspects of the sociological tradition is one of the teaching goals of sociologists at UCSC. A related aim is In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research.

Sociology faculty members are engaged in research on a wide range of topics, such as the study of violence; microanalysis of conversations; medicine and technology; social inequality; the intersection of class, race, and gender; revolutions; drugs in society; crime and deviance; environmental sociology; legal institutions; popular culture; media studies; globalization and international development: political economy; and language and communication. Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department agreeable to double majors and minors; and nonmajors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including the social construction of gender, emerging professions in health care, utopian communities, mass communication, surveys of health care needs, the social effects of war, gender differences in attitudes and behavior, causes of and beliefs about family violence, and the history of political struggles.

The sociology major at UCSC is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work, management, environmental planning, public service, teaching, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

General Requirements

Admission into a Sociology Major, Minor, or Combined LALS Major

The Sociology Department administers offers two undergraduate majors, one in sociology and a combined major with Latin American and Latino studies, and a minor in sociology.

Students must take three courses prior to petitioning for entry to the sociology major: Sociology 1 *Introduction to Sociology*, Sociology 10 *Issues and Problems in American Society*, and Sociology 15 *World Society*. Students with a grade point average (GPA) of 3.0 or above for these three courses will be allowed to declare the sociology major.

Students must take two courses (any of the three courses listed above) prior to petitioning for entry to the sociology/Latin American and Latino studies major. Students with a grade point average (GPA) of 3.0 or above for these two courses will be allowed to declare the combined major. (If a student takes all three courses, calculation of the GPA will be based on the two highest grades.)

Students must take one course (any of the three courses listed above) prior to petitioning for entry to the sociology minor. Students who receive a grade of B or higher in this course will be allowed to declare the sociology minor. (If a student takes more than one of these three courses, admission to the minor will be based on the highest grade in the courses taken.)

Equivalent courses may be taken at other universities or at community colleges.

Students should take Sociology 1, 10, and 15 for letter grades. For courses taken on a pass-no record pass basis, the department will use the narrative evaluation in its assessment of eligibility for the major.

Courses for which the grade of W is given are not counted in the computation of the GPA. The department will evaluate grades for repeated courses following the university's grading policy for repeated courses.

Students may petition for admission to the major by filling out the campus's Declaration of Major form, and by supplying evidence of their performance in Sociology 1, 10, and 15.

Transfer students who cannot complete Sociology 1, 10, and 15 before university policy requires them to declare a major will be allowed to declare if they have taken at least two of the three courses (or their equivalent) listed above (at UCSC, at another university, or at a community college) with an overall GPA of 3.0. Transfer students allowed to declare under this rule are expected to complete all three courses with an overall minimum GPA of 3.0. Transfer students will be subject to disqualification from the major if they subsequently do not achieve an overall 3.0 GPA in courses 1, 10, and 15 or their equivalent.

Appeal of Negative Decisions

Students must submit appeals of negative decisions to the Sociology Department in writing within 30 days of notification of denial of entrance into the major. Letters of appeal should describe any extenuating circumstances that might affect have affected the student's record.

Requirements for the Major

For more details, students may consult the sociology handbook, available online at

http://sociology.ucsc.edu, or at the department office, 235 226 College Eight.

Sociology majors are required to take a total of 13 courses (three prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, and six upper-division electives). In addition, they must successfully complete one of three comprehensive requirements prior to graduation.

Lower-division preparation. All sociology majors are required to take the following three courses or their equivalents.

Sociology

1, Introduction to Sociology 10, Issues and Problems in American Society 15, World Society

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, Statistical Methods
103B, The Logic and Methods of Social Inquiry
105A, Classical Sociological Theory
105B, Contemporary Sociological Theory

Upper-division advanced course work. Six additional upper-division sociology courses are required, including at least one in each of three areas of specialization (clusters): institutional analysis, social psychology, and inequality and social change. Consult the sociology handbook for a list of courses that can be applied to each cluster:

- Cluster I: *Institutional Analysis*. Courses in this cluster address the issues of how major social institutions are organized, the relationship between their technologies and social relations, the subcultures that develop around them, the problems they both solve and create, and the ways they change over time.
- Cluster II: *Social Psychology*. Courses in this cluster deal with the intersection of sociological and psychological concepts. Social psychologists have traditionally been concerned with the experience of the individual in a social context. Topics of classic interest in social psychology include conformity, deviance, influence, social interaction, interpretive processes, attribution, sex and gender roles, and prejudice.
- Cluster III: *Inequality and Social Change*. Courses in this cluster address the issues raised by unequal distribution of wealth, power, privilege, and cultural control. Principal axes of inequality are class, race and ethnicity, and gender. Consequences of inequality for social organization and personal life are examined. Also covered in this cluster are courses that examine the momentous transformation that preoccupied the founders of sociology and ongoing changes in the contemporary world: the rise and spread of capitalism, the scientific and technological revolutions, the emergence of mass politics, large-scale urbanization, shifts in family life, the growing predominance of bureaucracy, and social movements and revolutions. Specialization in one geographical area—East, South, or Southwest Asia; the Middle East; Africa; Europe; Latin America—may be pursued. Courses in this cluster develop the student's ability to conduct social research and analyze policy issues. Also considered are the social definition of social problems and the process of

policy formation. Emphasis is on applied research on topics that are currently attracting public attention.

Comprehensive requirement. Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.

- Comprehensive examination. Score of 60 percent or better on the comprehensive examination consisting of questions written by faculty responsible for the required sociology core courses.
- Comprehensive courses. Pass three additional upper-division courses in sociology beyond
 the 10 upper-division courses required for the major. To ensure comprehensive breadth in
 sociology, one course must come from each of the three clusters beyond the one course
 from each cluster required for the major. All three courses must be regularly scheduled
 courses in sociology taken at UCSC.
- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A Capstone: The Sociologist as Public Intellectual. Upperdivision lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

Students unable to take the senior capstone course may, by permission of the department chair, be allowed to substitute a portfolio of work. This substitution must be approved in advance. The portfolio option consists of: (1) portfolio of materials from (at least) three upper-division Sociology courses: (2) a synthetic essay; (3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Sociology Major Planner One

The following is a recommended academic plan for students to begin the sociology major.

Year	Fall	Winter	Spring
1st (frsh)	Socy 1	Socy 15	Socy 10
2nd (soph)	Socy 105A	Socy 103A Socy 105B	Socy 103B

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major as juniors. It is assumed that course 1 and course 10 equivalencies were completed at the previous college.

Students Beginning in Fall Quarter

Year	Fall	Winter	Spring
3rd	Socy 15	Socy 103A	Socy 103B
(jr)	Socy 105A	Socy 105B	

Students Beginning in Winter Quarter

Year	Fall	Winter	Spring
3rd (jr)		Socy 15 Socy 103A	Socy 103B
4th (sr)	Socy 105A Socy 15	Socy 105B	

All majors must complete the remaining six upper-division courses in their junior and senior years.

Requirements for the Combined Major

Students may choose to declare a combined major in sociology and Latin American and Latino studies. The requirements (listed below) should be examined carefully before choosing the combined major option. Both departments must approve a study plan before the major can be declared. Once the lower-division sociology courses have been completed, students may petition to declare the combined major. Each department determines major and thesis honors separately.

Language Study

Students must demonstrate proficiency in Spanish or Portuguese equivalent to the completion of Spanish 6 or 56 or Spanish for Spanish Speakers 63 or Portuguese 65A-B.

For Spanish language instruction information, see <u>Spanish and Spanish for Spanish Speakers</u>. For <u>Portuguese language instruction information</u>.

Sociology/Latin American and Latino Studies

Students are required to take a total of 14 courses and satisfy a comprehensive requirement. There are four lower-division course requirements, two each from the sociology and Latin American and Latino studies (LALS) majors. One of the lowerdivision LALS classes must be Latin American and Latino Studies 1 (no substitutions); transfer students may petition to replace the other lower-division class with an appropriate course from another institution. Students are assigned a faculty adviser from each discipline. Upper-division requirements include six core courses: Latin American and Latino Studies 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/Latino issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: (1) writing a senior thesis, (2) passing an appropriate Latin American and Latino Studies Senior Seminar (194 series), or (3) completing the sociology course option of two additional sociology upper-division cluster III courses. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by

both advisers; one adviser is sufficient if this faculty member belongs to both departments.

Requirements for the Minor

Students minoring in sociology are required to take seven courses: one of courses 1, 10, or 15; at least two of courses 103B, 105A, and 105B; and at least four other upper-division sociology courses. Students must pass provide evidence of completion of the lower-division requirement, courses 1, 10, or 15 with a grade of B or better, prior to declaring the sociology minor. Students must provide evidence of completion in the lower-division requirement prior to declaring the sociology minor.

Major Disqualification Policy

Students who receive a D, F, NP, or W twice in any of the upper-division core courses (courses 103A, 103B, 105A, and 105B) will be disqualified from the major or minor. Students, their college, and the Office of the Registrar will be notified by the department no later than the first day of instruction of the quarter following the disqualifying failure. Students who feel there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification by submitting a letter to the chair of the Sociology Undergraduate Education Committee. The appeal must be filed no later than 15 days after the disqualification notification was mailed, or the 10th day of classes in the quarter of the disqualification, whichever is later. For further information regarding the disqualification process, contact the Sociology Department.

UC Education Abroad Program Students

Academic year programs. Students must declare the major and pass the three lower-division preparatory course requirements (1, 10, and 15) and three of the upper-division core courses (103B, 105A, 105B) prior to study abroad. The student's sociology faculty adviser must review and approve It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to three approved courses may be used toward the sociology major.

Semester programs. Fall semester: students must declare the major and pass the three lower-division preparatory course requirements (courses 1, 10, and 15) and one upper-division core course (105A) prior to fall semester study abroad. Spring semester: students must declare the major and pass the three lower-division course requirements (courses 1, 10, and 15) and two upper-division core courses (103B and 105B) prior to spring semester study abroad.

Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the major requirements when the content is deemed appropriate and approved by the Sociology Department.

Transfer Students

Junior transfer students expressing an interest in sociology on their UCSC application for admission are admitted as proposed sociology majors. This status is considered undeclared. Transfer students must meet with the sociology undergraduate adviser when they arrive on campus to determine their status and begin the actual declaration of major process, which must be completed by the end of the second quarter of the junior year for transfer students.

Declaring sociology early in the academic career will give a student priority for

sociology course enrollment in subsequent quarters.

Graduate Program

The graduate program in sociology at UCSC is an interdisciplinary program that leads to the Ph.D. in sociology. An M.A. degree may be taken en route to the doctorate, but a master's program per se is not available. The program is designed to educate students in most major areas of sociology. It provides a general background in sociological theory and methods and also stresses independent work. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study.

The sociology graduate program is intended to lead to both academic and nonacademic careers, and the interests of the faculty reflect this twofold objective. Faculty specialties include comparative and historical sociology; criminal justice; cultural sociology; development, drug policy, deviant behavior; economy and society; education; emotions; environmental sociology; globalization; health; language and social linguistics; law and society; Marxist sociology; mass communication and public opinion; medical sociology; policy analysis and political economy; qualitative methodology; race, class, gender; science and technology; sexuality and homosexuality; social inequality; sociology of knowledge; and visual sociology.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's activism and commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. Research concerns cluster around environmental, racial, cultural, feminist, Latin American, peace, sexuality, and class issues. The Sociology Department's colloquium series—as well as occasional national and international conferences on one or another of these concerns held on campus—enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body enriches this work.

The core curriculum is divided into two parts, (1) basic grounding in theory and methods, and (2) exposure to research in three areas of concentration: (a) economy, development, and environment; (b) inequality and identity; and (c) culture, knowledge, and power. Beyond the required series of core courses, students are expected to specialize in a particular area and to take additional course work offered in that area. Students use comparative and historical analysis, quantitative techniques, and interpretive and/or field research methods to study questions of human agency and social structure and the ways in which these questions are limited by and dependent upon one another.

Numerous sociology students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is designed in part to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics and problems are available for advanced graduate students working on papers and dissertations in related areas.

The program encourages interdisciplinary work. Many of the faculty in the Sociology Department have additional interests and are affiliated with other departments on campus. Seminars in the anthropology, environmental studies, history, history of consciousness, politics, psychology, and feminist studies programs are open to sociology students. Graduate students in sociology may obtain a parenthetical

notation on the sociology Ph.D. diploma indicating that they have specialized in feminist studies, Latin American and Latino studies, environmental studies, or philosophy. Students must meet requirements spelled out by the relevant department and their committee members. Some fellowship and grant opportunities are available. Students also participate in research projects under the auspices of six interdisciplinary social science research centers: the Center for Agroecology and Sustainable Food Systems; the Center for Global, International, and Regional Studies; the Center for Justice, Tolerance, and Community; the Chicano/Latino Research Center; the Center for Research on Educational Diversity and Excellence; and the Santa Cruz Center for International Economics.

The sociology program also emphasizes teaching experience because the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension—are fundamental to many human activities and occupations. Therefore, the sociology program requires that graduate students serve as teaching assistants for at least three quarters in the department's core classes of the undergraduate curriculum, whether or not they plan to pursue an academic career.

Required Courses

Students are required to take at least 12 courses as follows.

A three-course core group:

201 The Making of Classical Theory 202 Contemporary Sociological Theory 203 Sociological Methods

Two methods courses:

204 Methods of Quantitative Analysis
and one of the following seven courses:
205 Field Research Methods
206 Comparative Historical Methods
209 Analysis of Cultural Form
241 Cross-National and Cross-Cultural Research
242 Feminist Research Seminar
Psychology 248 Survey Methods, or 282 Social Policy
Research

Three area foundation courses:

220 Global Transformation: Macrosociological Perspectives 240 Inequality and Identity 260 Culture, Knowledge, Power

At least one writing course (208 or 250)

A minimum of three elective courses approved by the graduate director (excluding sociology 250 and sociology 293).

Students with no background in statistics are required to take the undergraduate course, Statistical Methods, before enrolling in Methods of Quantitative Analysis.

Progress Toward the Ph.D.

- Beginning at least by the end of the first year, students initiate work on their master's paper.
- Completion of the master's paper is expected by the end of the second year.
- Students are expected to take an oral qualifying exam by the end of the third year, but no later than the end of the fourth year.
- Graduate students prepare field statements in two distinct areas of sociology and, in addition, prepare a detailed course outline and a grant proposal in one or the other of these areas.
- The qualifying examination is an oral examination and based on the student's field statements.
- After passing the qualifying examination, a student is advanced to candidacy and begins work on the dissertation with the aid of a three-person dissertation committee.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, refer to the Graduate Studies section of the catalog.

Sociology

Program Description | Course Descriptions

Faculty and Professional Interests

Professor

Dane Archer

Violence, war and peace, cross-national and cross-cultural research, verbal and nonverbal communication, crime and law

John Brown Childs

Ethnic conflict and transcommunal cooperation; sociology of knowledge; African American, Native American, Latino interactions

William H. Friedland, Emeritus

Hiroshi Fukurai

Intersection between race and jury, comparative analysis of world's jury systems, theories of checks and balances and questions of accountability through representational models in civilian legal participatory processes, performative construction of racial identity, Japanese judicial reforms in the establishment of the "quasi-jury" (saiban-in) system, advanced quantitative statistical methods (covariance and moment structural modelings)

Walter L. Goldfrank

Social change, historical sociology, world systems, modern Mexico, Chile, social movements and revolution, development theories, policies and outcomes, jury studies

Herman S. Gray

Cultural studies, media and television studies, black cultural politics, social theory

Paul M. Lubeck

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

Dennis C. McElrath, Emeritus

Marcia Millman

Social psychology, fieldwork methods, sociology of emotions, sociology of medicine, the family

James R. O'Connor, Emeritus

Craig Reinarman

Political sociology; law, crime, and social justice; drugs and society

Pamela Ann Roby, Emerita

Dana Y. Takagi

Social inequality and identity, research methods, race relations, nationalism and social movements

Candace West

Language and social interaction, sex and gender, conversation analysis, microanalysis and medicine

Associate Professor

Julie Bettie

Cultural studies, feminisms and cultural politics, race/ethnic studies, identity, popular culture, critical ethnography

Ben Crow

International development, sociology of water and markets, global inequality, South Asia and East Africa, political economy, and green enterprise

E. Melanie DuPuis

Economic sociology, sociology of consumption, sociology of development, political sociology, sociology of the environment, technological change, historical sociology, social theory, food and social change

Helen Shapiro

Political economy, Latin American economic history and development (with an emphasis on Brazil), industrial policy, the auto industry, the state and transnational corporations

Andrew Szasz

Environmental sociology (environmental movements, policy, environmental justice); theory Assistant Professor

Miriam Greenberg

Media studies, cultural studies, globalization, political and cultural economies of global cities, video production, and ethnography

Steven McKay

Work; technology and labor markets; globalization and social change; race, ethnicity and migration; political sociology; ethnography/qualitative methods

Jennifer E. Reardon

Issues of social identity as influenced by the new sciences of genetics and genomics; intersection of the sociology of science and knowledge and the sociology of race, gender, and class

Gabriela Sandoval

Race and ethnic studies, Latina/o and Chicana/o studies, stratification, urban and political sociology, and voting behavior

Lecturer

Wendy Martyna

Death and dying, gender, social change, family and youth

Professor

Barbara L. Epstein (History of Consciousness)

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

Nancy Stoller (Community Studies)

Race and gender aspects of health, the AIDS epidemic, community organizing, sexualities, and medicine in prisons

Mark Traugott (History)

Social and economic history, 19th-century France, French revolutions, European working class, historical methods, workers' autobiographies

David Wellman (Community Studies)

Working-class culture, American ethnic and racial diversity, social documentary studies, critical race theory, interrogations of whiteness, and qualitative research methods

Assistant Professor

Julie Guthman (Community Studies)

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

Pamela Perry (Community Studies)

Youth activism; racism and anti-racism, whiteness, educational inequalities; school integration; ethnographic documentary; racial and ethnic identities; cultural studies

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Lower-Division Courses

1. Introduction to Sociology. F,S

A systematic study of social groups ranging in size from small to social institutions to entire societies. Organized around the themes of social interaction, social inequality, and social change. Fulfills lower-division major requirement. (General Education Code(s): IS.) *F. Guerra, C. Reinarman*

10. Issues and Problems in American Society. W,S

Exploration of nature, structure, and functionings of American society. Explores the following: social institutions and economic structure; the successes, failures, and intractabilities of institutions; general and distinctive features of American society; specific problems such as race, sex, and other inequalities; urban-rural differences. Fulfills lower-division major requirement. (General Education Code(s): IS.) *F. Guerra, J. Reardon*

15. World Society. F,W

Introduction to comparative and historical sociology. Focuses on the global integration of human society. Examines social changes such as industrialization, globalization, colonial rule, and the rise of Islamic fundamentalism. Uses social theory (including ideas from Marx, Weber, and Adam Smith) to explore the making of institutions like the nation-state, the World Trade Organization, the World Bank, and the International Monetary Fund. Fulfills lower-division major requirement. (General Education Code(s): IS, E.) *B. Crow, P. Lubeck*

20. Key Issues in Race and Ethnic Analysis. *

Provides a solid conceptual foundation for undergraduates interested in pursuing the study of race and ethnic issues in advanced upper-level classes. (General Education Code(s): IS, E.) *The Staff*

30A. Information Methods for Global Information Internships (3 credits). F Introduction to information technology and communication networks using the Internet to reduce global inequality and bridge the "digital divide." Prepares students enrolled in the Global Information Internship Program to construct web pages and write grant proposals for community and non-governmental organizations. Course 186 recommended but not required. Enrollment limited to 60. May be repeated for credit. *P. Lubeck*

30B. Information Methods for Global Information Internships (3 credits). W Introduction to information technology and communication networks using the Internet to reduce global inequality and bridge the "digital divide." Prepares students enrolled in the Global Information Internship Program to construct web pages and

write grant proposals for community and non-governmental organizations. Course 186 recommended but not required. Enrollment limited to 60. May be repeated for credit. *P. Lubeck*

30C. Information Methods for Global Information Internships (3 credits). S Introduction to information technology and communication networks using the Internet to reduce global inequality and bridge the "digital divide." Prepares students enrolled in the Global Information Internship Program to construct web pages and write grant proposals for community and non-governmental organizations. Course 186 recommended but not required. Enrollment limited to 60. May be repeated for credit. *P. Lubeck*

35. Information Methods: IT Design and Application for Social Change. * Information technology (IT) is an essential tool for community organizations. When, how, and with what success IT is used, however, is not a simple problem. This seminar works through core design processes and helps develop "information plans" for successful technology application in community organizations. Priority given to Global Information Internship Program participants. Enrollment limited to 30. *The Staff*

42. Student-Directed Seminar. F,W,S

Seminars on selected topics taught at various times by upper-division students under faculty supervision. (See course 192.) Consult the *Schedule of Classes* for specific offerings. *The Staff*

80E. The Sociology of Love. *

Investigation of love from a sociological perspective, including the following: (1) how the experience of love is constructed/shaped by the individual, social structure, conventions, ideology; (2) functions of love for the individual/society; (3) how love varies by gender/social class; (4) mythologies of love. Emphasis on romantic heterosexual love and its historical development in Western culture. (General Education Code(s): T3-Social Sciences.) *The Staff*

80Z. Youth and Crime. *

Addresses foundations of development of our juvenile justice system and its adaptation (or failure to adapt) to changing youth crime and socioeconomic patterns at beginning of the millennium, with special emphasis on California. (General Education Code(s): T3-Social Sciences.) *The Staff*

93. Field Study. F,W,S

Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

103A. Statistical Methods (7 credits). W

Fundamental concepts in statistics. Introduction to measuring causation. Learn to use computer to analyze data efficiently. Emphasis on practical applications. Enrollment restricted to sociology, proposed sociology, and combined sociology majors. (General Education Code(s): Q.) *D. Takagi*

103B. The Logic and Methods of Social Inquiry (7 credits). S

The first part of the course focuses on basic ethical, political, and logical issues in social scientific inquiry. The second part develops a wide range of skills and methods appropriate to actual research. Course 103A, *Statistical Methods*, is strongly recommended. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; enrollment restricted to sociology and sociology combined majors, minors and proposed majors. (General Education Code(s): W, Q.) *G. Sandoval*

105A. Classical Sociological Theory. F

This intensive survey course examines the intellectual origins of the sociological tradition, focusing on changing conceptions of social order, social change, and the trends observed in the development of Western civilization in the modern era. Readings are all taken from original texts and include many of the classical works in social theory with special emphasis on the ideas of Marx, Weber, and Durkheim which constitute the core of the discipline. Required for sociology majors planning on studying abroad (EAP). Enrollment restricted to sociology, proposed sociology, the combined Latin American and Latino studies/sociology and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *E. Du Puis*

105B. Contemporary Sociological Theory. W

Surveys major theoretical perspectives currently available in the discipline including functionalism, symbolic interactionism, ethnomethodology, conflict theory, critical theory, neo-Marxism, feminist theory. Enrollment restricted to sociology, proposed sociology, the combined Latin American and Latino studies/sociology, and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *A. Szasz*

110. Violence in the Family. *

Examines child abuse and neglect, wife abuse, and sexual abuse in the family, using gender as a lens through which to understand domestic violence. Using a variety of sources, the course undertakes to understand the social, political, and cultural forces that contribute to abuse and to consider solutions. *The Staff*

111. Family and Society. F

Focuses on the interaction between family and society by considering the historical and social influences on family life and by examining how the family unit affects the social world. Readings draw on theory, history, and ethnographic materials. *W. Martyna*

112. Economic Sociology. *

Introduction to economic sociology using field visits to key sites of production and consumption to investigate sociological ideas about the modern economy. *B. Crow*

113. Political Sociology. *

An intensive examination of major substantive monographs representing pluralist, elite, and class theories of the state in industrialized capitalist democracies. *The Staff*

114. Sports and Society. *

Explores the interconnections between sports and society using sociological theories and methods. Topics include class, race, and gender; mass media and popular culture; political economy; education and socialization; leisure patterns (participants

and spectators); globalization and cross-national comparisons. W. Goldfrank

116. Communication and Mass Media. F

Examines media institutions, communication technologies, and their related cultural expressions. Focuses on specific ways the media—including media studies and criticism—operates as social and cultural factor. Contemporary theory or equivalent in related fields recommended. Enrollment restricted to upper-division students. *F. Guerra*

117. California Youth in Transition. *

Explores modern California youth as a transitional generation whose trends signal a "new sociology" in the interplay of race, immigration, class, gender, and age. Examines the myths/realities of youth crime, violence, suicide, drug abuse, school failure, and other social issues. Course 1 or course 10 recommended but not required. *The Staff*

118. Popular Music, Social Practices, and Cultural Politics. *

Considers the role of popular music as a site of contemporary social practices and cultural politics. Examines the institutional organization and production of popular music, its cultural meanings, and its social uses by different communities and social formations. Also examines popular music as a vehicle through which major cultural and political debates about identity, sexuality, community, and politics are staged and performed. Prerequisite(s): course 105A or 105B. Enrollment restricted to juniors and seniors. *The Staff*

119. Sociology of Knowledge. *

Focus includes the following three areas: historical examination of sociological theories of knowledge with reference to Durkheim, Weber, Mannheim, and others; examination of black and feminist perspectives within sociology; examination of whether and how "outside" observers can analytically grasp the inner workings of other cultures. Prerequisite(s): course 103B or 105A or 105B. *J. Childs*

120. Feminisms and Cultural Politics. W

Examines the role various feminist discourses play in contemporary cultural politics with a focus on the politics of sexuality as cut across by other axes of identity: class, race, ethnicity, gender, and generation. Considers (mis)representations of feminisms in popular culture; considers the relationship between academic and popular feminisms; and addresses the emergent discourse of "third wave" feminism. Poses questions about generational differences in young women's and men's relationships to feminism. Prerequisite(s): course 149 or 144 or 187. *J. Bettie*

121. Sociology of Health and Medicine. F

Analysis of the current health care "crises" and exploration of the social relationships and formal organizations which constitute the medical institution. Study of the political, economic, and cultural factors which affect the recognition, distribution, and response to illness. *J. Reardon*

122. The Sociology of Law. S

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law. (Also offered as Legal Studies 172. Students cannot receive credit for both courses.) *C. Reinarman*

123. Law, Crime, and Social Justice. *

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation. (Also offered as Legal Studies 173. Students cannot receive credit for both courses.) *The Staff*

124. Visual Ethnography. S

Introduces contemporary methods of interpreting and producing visual representations of cultural phenomena. Use of visual methods is becoming an almost indispensable tool for studies of culture including ethnographic research and media analysis. Provides a reflexive approach to theoretical, methodological, practical, and ethical issues of visual media. Prerequisite(s): course 103B. Enrollment restricted to juniors and seniors. Enrollment limited to 35. *J. Bettie*

125. Society and Nature. *

A healthy society requires a stable and sustainable relationship between society and nature. Covering past, present, and future, the course covers environmental history of the U.S., the variety and extent of environmental problems today, and explores their likely development in our lifetimes. *E. Du Puis*

126. Sociology of Sex. *

Explores social and cultural aspects of human sexuality and reproduction, including how and why meanings and behaviors are contested. Analyzes sexuality and reproduction as forms of social and political control as well as cultural expression and self-determination. Enrollment restricted to upper-division students. Enrollment limited to 90. *The Staff*

127. Drugs in Society. W

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course. *C. Reinarman*

128. Law and Politics in Contemporary Japan and East Asian Societies. S

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue Japanese government and corporations in California. (Also offered as Legal Studies 126. Students cannot receive credit for both courses.) Enrollment limited to 30. *H. Fukurai*

128I. Race and Criminal Justice. F

An introduction to comparative and historical analyses of the relations between race and criminal justice in the U.S. Emphasis on examinations of structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Also offered as Sociology 128I. Students cannot receive credit for both courses.) (Also offered as Legal Studies 126I. Students cannot receive credit for both

courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 120. *H. Fukurai*

128J. The World Jury on Trial. W

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others. American jury contrasted with other forms of lay participation in the legal process. Prerequisite(s): course 1 or equivalent. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 30. *H. Fukurai*

129. Popular Culture. S

Examines the hidden politics of popular pleasure and the terrain of the popular, not solely analyses of media. Examines popular cultural products or representations, and practices. Focuses on the relationship of domination and resistance to both cultural production and consumption, and considers the terrain of the popular as key site for the reproduction of structures of inequality and how hegemonic discourses rend the politics of resistance invisible. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *J. Bettie*

130. Sociology of Food. *

Following food from mouth to dirt, explores the politics, economy, and culture of eating, feeding, buying, selling, and growing food. Topics cover both the political economy of the food system as well as how body and nature are contested categories at either "end" of this system. *E. Du Puis*

131. Culture, Economy, and Power. W

Explores relationship between modern forms of cultural production and the economy and society in which they emerge. Course reads, screens, and discusses variety of the cultural texts: from the historical and theoretical to the commercial, popular, and countercultural. Enrollment restricted to juniors and seniors. *M. Greenberg*

132. Sociology of Science and Technology. *

Reviews social and cultural perspectives on science and technology, including functionalist, Marxist, Kuhnian, social constructionist, ethnographic, interactionist, anthropological, historical, feminist, and cultural studies perspectives. Topics include sociology of knowledge, science as a social problem, lab studies, representations, practice, controversies, and biomedical knowledge and work. Prerequisite(s): course 103B, 105A, or 105B. Enrollment limited to 20. *The Staff*

133. Currents in African American Cultural Politics. *

Takes as its subject, the dialogues, debates, conceptions, and strategies of self representation produced by blacks in the U.S. and Atlantic world in the twentieth and twenty-first centuries. These issues are examined through the insights of feminist theory, cultural studies, media studies, sociology, and African American studies. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *H. Gray*

134. Television and the Nation. S

The role of American network television in the production of the post-war American national imagination is our focus. Our approach will explore issues of media power, especially television's industrial apparatus, its network structure, its strategies of representation in relationship to the construction of the image of the nation, and the

meaning of citizens, consumers, and audiences. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. (General Education Code(s): W.) *F. Guerra*

135. Nonverbal Communication. F

Explores varieties of nonverbal communication: facial expressions, tones of voice, personal space and proxemics, gestures, and paralanguage. Readings are drawn from sociology, psychology, and anthropology. Includes films, videotapes, photographs, and audiotapes. *D. Archer*

136. Social Psychology. W

Major theories and concepts in sociological study of social psychology. Topics include identity and social interaction, deviance, sociology of emotions, social narratives, and the social construction of reality. *M. Millman*

137. Deviance and Conformity. S

Why certain social acts are considered threatening and how individuals or groups become stigmatized. Sociological analysis of the institutions and processes of social control and the experience of becoming deviant and living with a stigmatized identity. Introductory course in sociology recommended. *F. Guerra*

140. Social Psychology of Power. *

This course uses historical, sociological, and social psychological materials to introduce students to issues concerning class and power, religion and power, minorities and power, women and power, the rise of the New Right, and the successes and failures of the Left. Prerequisite(s): course 1, 10, or 15 or Psychology 40. Enrollment restricted to juniors and seniors. *G. Domhoff*

141. Group Process. *

The study of group development and interpersonal behavior based primarily on observation of the class discussion group. Readings are drawn from psychology and fiction as well as from sociology. Offered in alternate academic years. Enrollment restricted to senior sociology majors. Enrollment limited to 18. *M. Millman*

142. Language and Social Interaction. W

Concerns the routine and taken-for-granted activities that make up our interactions with one another, consisting in large part—but not exclusively—of verbal exchanges. Emphasis on the socially situated character of communication, whether intimacy between two people or dominance of a group. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to sophomores, juniors, and seniors. *W. Martyna*

143. Conversation Analysis. S

A working seminar, involving the analysis of actual conversations. Covers fundamental ethical, conceptual, and methodological issues that arise in the collection of conversational data, as well as the skills and techniques of conversation analysis. Given our operating assumption, that talk is a primary means of constructing social identities, there is a heavy thematic emphasis on gender, status, and power in conversation. Prerequisite(s): course 142 or Psychology 80E. Enrollment restricted to juniors and seniors. Enrollment limited to 20. *C. West*

144. Sociology of Women. F

Analysis of the social significance and social production of gender. Some consideration of how sex differences have developed. Major emphasis on the impact

of gender as a categorical imperative in the present social context. In this context, the course is also about sexual segregation, sexual inequality, and the dynamics of interpersonal power. Enrollment restricted to juniors and seniors. An introductory sociology course is recommended. *C. West*

145. Sociology of Men. *

Examines conflicting views on the development and state of modern masculinity as adaptation, transitional phase, or pathology. Did men lose the "gender war"? Do boys need rescuing? What are common and divergent social experiences of men within race, class, gender, culture, era? An introductory sociology course recommended. *The Staff*

146. Sociology of Violence, War, and Peace. W

Explores key issues, theories, and topics in the study of violence, war, and peace. Addresses aspects of aggression, personal violence, political violence, and war. In addition, various strategies for the prevention of violence and war are examined. *D. Archer*

148. Sociology of Learning. *

Examines learning and achievement from class, race, and gender perspectives; provides tools for improving learning and achieving goals; explores interplay between past and present social forces affecting learning and achievement. Class has dyads rather than sections. Enrollment restricted to juniors and seniors. *The Staff*

149. Sex and Gender. S

Modern analyses of sexuality and gender show personal life closely linked to large-scale social structures: power relations, economic processes, structures of emotion. Explores these links, examining questions of bodily difference, femininity and masculinity, structures of inequality, the state in sexual politics, and the global remaking of gender in modern history. Recommended as background: any lower-division sociology course. *F. Guerra*

150. Sociology of Death and Dying. S

Explores contemporary, historical, cross-cultural and interdisciplinary perspectives on the social psychology of death and dying. Cultural norms and institutional contexts are studied, along with the individual experience, and the ways in which our perspectives on death and dying influence our experiences of life and living. Enrollment restricted to juniors and seniors. *W. Martyna*

151. Research Seminar on Human Communication. S

Focuses on advanced topics in verbal and nonverbal communication. Members of this research seminar select a specific area of human communication (e.g., "gestures," "facial expressions," "the voice," etc.). Students assemble an annotated bibliography, drawing on literatures in many social science disciplines, and write scripts that demonstrate complex communication issues. Finally, students use audio and video equipment to illustrate these scripts. Prerequisite(s): course 135. Enrollment limited to 25. *D. Archer*

152. Body and Society. *

Critically examines the place of the human body in contemporary society. Focuses on the social and cultural construction of bodies, including how they are gendered, racialized, sexualized, politicized, represented, colonized, contained, controlled, and inscribed. Discusses relationship between embodiment, lived experiences, and social action. Focuses on body politics in Western society and culture, especially the United

States. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to juniors and seniors. Enrollment limited to 50. *The Staff*

153. Sociology of Emotions. F

Examines sociological approaches to the understanding of emotions and the application of these approaches to work, learning, interpersonal relationships, health and illness, sports, and other aspects of everyday life. Enrollment restricted to juniors and seniors. *M. Millman*

154. Cross-National and Cross-Cultural Research. *

Examines a variety of theoretical, methodological, and substantive approaches to cross-national and cross-cultural research. Focuses on the importance and variety of cross-national and cross-cultural studies. Prerequisite(s): one of the following: course 103, 139, or 183. Enrollment limited to 20. *D. Archer*

155. Political Consciousness. S

Explores the relationship between consciousness, ideology, and political behaviors from voting to rebellion. Special attention is given to the lived experience and the identity interests that complicate the nexus of class position and political ideology. An introductory sociology course is recommended as preparation. *G. Domhoff*

156. U.S. Latina/o Identities: Centers and Margins. W

Explores historical and contemporary constructions of Latina/o identities and experiences in U.S. Particular emphasis placed on transcultural social contexts, racial formations, and intersections with other identities including sexuality and gender. Enrollment restricted to juniors and seniors. Enrollment limited to 40. (General Education Code(s): E.) *G. Sandoval*

163. Global Corporations and National States. *

Examines the nature and development of the capitalist world system since 1945. Emphasis is on the power of multinational corporations as managers of the world system and the response of states: role of multilateral agencies such as the World Bank, International Monetary Fund, United Nations. *H. Shapiro*

165. World Systems Perspective. *

Seminar on the intellectual origins and contemporary exponents of the world-systems perspective in the social sciences: Marx, Braudel, Polanyi, Arrighi, Wallerstein. Prerequisite(s): courses 105A and 105B or permission of instructor. W. Goldfrank

166. Economics for Non-Economists. *

Fosters economic literacy among students who are not economics majors but are interested in the political and social ramifications of economic change. Emphasizes economic institutions and policy and is taught by case-study method, which requires active student participation. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *H. Shapiro*

167. Development and Underdevelopment. W

Examines contemporary debates about development in the Third World: alternative meanings of development, recent work on the impact of colonial rule, how some economies have industrialized, ideas about agrarian change, and recent reserach on paths out of poverty. Students work in pairs to examine a development in one country since World War II. *B. Crow*

What is social justice? People answer this question differently, depending upon their sociological perspective. Using a combination of political philosophy and sociological studies, explore five perspectives on social justice within the Western sociological tradition: utilitarianism, Marxism, liberal egalitarianism, communitarianism, and pluralism. Students pick a topic and learn to articulate different visions of socially just change based on these perspectives. Prerequisite(s): course 105A. Enrollment limited to 60. *E. Du Puis*

169. Social Inequality. F

A survey of theories and systems of social stratification focusing on such phenomena as race, class, power, and prestige. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *D. Takagi*

170. Ethnic and Status Groups. S

Examines the enduring and changing status of ethnic and other visible minority groups in the United States, e.g., Latinos, Asian Americans, African Americans, and immigrants, with comparative materials drawn from other societies. An introductory course in ethnicity and race is recommended as preparation. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *J. Childs*

171. Exploring Global Inequality. F

Seminar focusing on readings of key texts and recent research papers on several dimensions of global inequality (material, health, gender, cultural, migration) to find innovative ways of understanding the connections among different dimensions of inequality and of visualizing inequality in digital media. Collaborative interaction with Film Studies 177, *Advanced Digital Media Workshop* and Environmental Studies 155, Geographic Information Systems. Enrollment restricted to seniors. Enrollment limited to 25. *B. Crow*

172. Sociology of Social Movements. *

Through readings on social movements that span the 20th century, examines the causes of popular mobilizations, their potential for rapid social change, and the theories developed to understand and explain their role in modern social life. Enrollment restricted to upper-division students. Enrollment limited to 40. *M. Traugott*

173. Water. *

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water. Enrollment restricted to juniors and seniors. Enrollment limited to 60. *B. Crow, A. Szasz*

174. Twenty-First-Century African American Social Structure. W

A sociological overview of African American society in the 21st century. The changing patterns of social/cultural organization, class structure, and modes of political action are analyzed. This analysis is located within the framework of migration, urbanization, and social struggle among black Americans. Prerequisite(s): course 10 or 20. (General Education Code(s): E.) *J. Childs*

175. Social History of Asian Americans. *

Provides a general introduction to the history of Chinese, Japanese, Filipinos, Koreans, and Southeast Asians, within the context of American history. Examines the diverse processes of immigration, the formation of communities, work, and

family relations of Asians and Asian Americans. Looks at how social, political, and economic changes in the larger U.S. society have affected the lives of Asians in America. Offered in alternate academic years. Enrollment restricted to juniors and seniors. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *The Staff*

176. Women and Work. *

Examines the history of women and work; women's current conditions of work and political, economic, and social factors affecting these conditions; means by which women may shape working conditions including contributing leadership, developing policies, building unity, and creating alliances. Enrollment restricted to juniors and seniors. *The Staff*

176A. Work and Society. S

Addresses how work is organized and shapes life changes. Covers: the history of paid work; the impact of technology; race/class/gender at work; professional and service work; work and family; collective responses to work; and challenges of work in a globalizing economy. Enrollment restricted to juniors and seniors. *S. Mc Kay*

177. Urban Sociology. F

Historical and contemporary examination of urban life including community, race, geography, urban and suburban cultures and lifestyles, stratification, housing, crime, economic and environmental issues, demographic changes, and global urbanization. Enrollment restricted to junior and senior sociology majors. Enrollment limited to 60. *G. Sandoval*

177A. Latinos/as and the American Global City. *

Examines roles of emerging Latino/a majorities in urban centers across the U.S. Explores the "Latinization" of U.S. cities and various factors affecting the life chances of Latinos/as including, but not limited to, immigration, segregation, social movements, and other forms of political participation. Enrollment restricted to juniors and seniors. Enrollment limited to 35. *G. Sandoval*

177G. Global Cities. S

Explores how "global cities" have facilitated increasing integration of the diverse cultures and economies of the world. Using historical, sociological, and comparative methods, analyzes how these spaces both enable and constrain transnational flows of capital, labor, information, and culture. Enrollment restricted to juniors and seniors. *M. Greenberg*

178. Sociology of Social Problems. F

Views "problems" in society not as given but as social constructs. Examines the ways in which conditions in society become identified and defined as problems and consequences that follow from such a process. *D. Takagi*

179. Nature, Poverty, and Progress: Dilemmas of Development and Environment. F

Concerns about environmental change, including global warming, threats to the ozone layer, and industrial pollution, raise questions about Third World development. Simple views of the relation between society and nature, such as blaming population growth, industrialization, or poor people, seem to preclude higher living standards. Uses debates and case studies to explore more subtle and optimistic views of social-natural relations. *B. Crow*

179L. Nature, Poverty, and Progress Laboratory. *

For enrollees in course 179, this optional lab provides opportunity to research ideas and produce a rough business plan for green enterprise of choice. Examples include compostable packaging, gray water systems, sustainable manufacturing, solar-powered submarines, green consulting, and other enterprises. Concurrent enrollment in course 179 required. Enrollment limited to 20. *B. Crow*

180. Social Movements of the 1960s. *

Examines the roots, development, and political outcomes of black civil rights organizations during the Sixties. Explores social and structural forces, mobilization of black communities, strategies and tactics used, nature of the relationships between various civil rights organizations, unity and disunity among organizations, leadership gains, and impact on race relations in the U.S. Enrollment restricted to junior and senior sociology and combined sociology/Latin American and Latino studies majors. Enrollment limited to 45. *The Staff*

181. A Sociology of Place: The California Coast. *

Examines the California coast, including important social, political, cultural, and environmental aspects of this most important place. Lectures, readings, discussion, and class assignments examine the history, development, and future of the California coast. Enrollment restricted to juniors and seniors. Enrollment limited to 45. *The Staff*

184. Hunger and Famine. *

Why do famines happen? Why are some hungry and some over-fed? Recent advances in the understanding of food crises and chronic undernutrition are the focus of this course. *B. Crow*

185. Environmental Inequality. *

Modern society not only assaults nature, it does so in ways that reproduce existing social inequalities. Reviews research on disproportionate exposure to risks and hazards, especially along dimensions of class and race, and examines the environmental justice movement. Enrollment restricted to junior and senior sociology and environmental studies students. Course 125 recommended as preparation. Enrollment limited to 42. *A. Szasz*.

186. Globalization, Information, and Social Change. *

Reviews theories of globalization, the information revolution, world inequality, and the value of information networks for upgrading capacity of NGOs and community groups to promote progressive social change. Requires research project/grant proposal using Internet resources. *P. Lubeck*

187. Feminist Theory. *

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Considers various deconstructive challenges to second wave feminism based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Prerequisite(s): course 105B, and either course 144 or 149 or Feminist Studies 1 or 100. Enrollment limited to 35. *The Staff*

188. Religion and Social Change. *

Uses historical-comparative method to explore role of religion in global and local social movements. Case studies include historical analysis of the civil rights movement, Islamic movements, liberation theology, and millenarian movements.

Topics vary annually. Recommended for social science and history majors. (General Education Code(s): E.) *P. Lubeck*

188A. Social Change in the Global Economy. W

Explores local dimensions of globalization, focusing on experiencing more global divisions of labor in both industrialized and developing countries. Themes include: economic integration and dislocation; new forms of governance; globalizing consumption and culture; gender; and popular resistance. Enrollment restricted to juniors and seniors. *S. Mc Kay*

190. Proseminar.

191. Sociology Teaching Practicum. F,W,S

Under the supervision of the instructor, the student works with a group of students in a lower-division course, leading discussions, explaining material, reading and marking submissions, consulting individually and/or in other ways assisting in the teaching of a course. Interview and selection by professor required. Prerequisite(s): Senior standing and excellent performance in core courses in the major. Enrollment restricted to senior sociology majors. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Provides for (department-sponsored) individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (as opposed to course 198 where faculty supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides for department-sponsored individual field study in the vicinity of campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

Small group study of a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Completion of course 195C (completion of the thesis) satisfies the W general education requirement. Prerequisite(s): course 103B and satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. May be repeated for credit. (General Education Code(s): W.) *The Staff*

196A. Capstone: The Sociologist as Public Intellectual (3 credits). F,S

Students hear a selected group of faculty discuss their current research and how that research furthers public understanding and discussion of some vital contemporary social issue. Enrollment restricted to junior and senior sociology majors. *A. Szasz*

198. Independent Field Study. F,W,S

Provides for (department-sponsored) individual study program off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Advanced directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201. The Making of Classical Theory. *

Examines the establishment of "theory" in the discipline of sociology. Introduces students to close readings and analysis of a core selection of social theory. Problematizes the construction, maintenance, and reproduction of a theoretical canon in sociology. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. A. Szasz

202. Contemporary Sociological Theory. W

Intensive survey of major tendencies in modern social thought, including functionalism, symbolic interactionism, ethnomethodology, critical theory, structuralism, phenomenology, neo-Marxism, and feminist theory. Enrollment restricted to graduate students in sociology and by permission number. *C. Reinarman*

203. Sociological Methods. F

Approaches methods as a series of conscious and strategic choices for doing various kinds of research. Introduces students to the epistemological questions of method in social sciences; to key issues in "technique," particularly control, reliability, and

validity; and to good examples of social research. Enrollment restricted to graduate students in sociology and by permission number. C. West

204. Methods of Quantitative Analysis. F

Students are provided with intuitive explanation of fundamental concepts in statistics and learn how to use statistics to answer sociological questions. Experience and guidance in using computers to efficiently analyze data are provided. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. *H. Fukurai*

205. Field Research Methods. W

Gives students first-hand experience doing fieldwork with an emphasis on participant observation and some interviewing. Students submit weekly field notes and a final project analysis. At seminar meetings, field experiences and relevant literature are examined. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 10. Offered in alternate academic years. *M. Millman*

206. Comparative Historical Methods. F

Overview of research strategies and methods used in historical and social sciences. Students read works exemplifying a variety of analytical approaches. Written assignments cultivate critical skills, weighing of tradeoffs inherent in all methodological choices, and elaboration of hypothetical research designs. Enrollment restricted to graduate students. Enrollment limited to 20. *E. Du Puis*

208. Writing Practicum. S

Writing intensive course designed to facilitate the completion of the master's thesis, orals field statement, or the dissertation in sociology. The seminar is convened by a faculty member in conjunction with students and their adviser or appropriate committee chair. Students are expected to produce and present drafts of work completed in the seminar. Enrollment restricted to sociology graduate students and by permission number. Enrollment limited to 12. *M. Millman*

209. The Analysis of Cultural Forms. W

Examines material and symbolic forms such as media products, cultural artifacts, language, nonverbal communication and social practices using discourse, textual, content, interpretive, and conversation analyses as well as ethnography and different channels of communication. Theoretically, relies on cultural studies, communication studies, cultural sociology, film studies, and ethnomethodology. Enrollment restricted to sociology graduate students. *C. West*

220. Global Transformation: Macrosociological Perspectives. S

Classical concepts and contemporary approaches in macrosociology, the study of large-scale, long term social change. Readings drawn primarily from the Marxian and Weberian traditions (new institutionalism, varieties of neo-Marxism, environmental history, state centrism) as they focus on agrarian and industrial structures and commodity chains; household, village, and neighborhood organization; social movements and revolutions; culture, ideology, and consciousness; policy analysis; comparative urban, national, and civilizational development. Enrollment restricted to graduate students in sociology. Enrollment limited to 15. *B. Crow*

222. Political Sociology. *

A survey of major works and themes in the relationship of politics and society, with primary emphasis on the compatibilities and contradictions of pluralist, elite, and

223. Sociology of the Environment. *

Advanced treatment of the dominant ideas of nature and the environment in the West and their relationship to the development of Western capitalism. Leading Western theories of environmental crisis and their relation with ideologies of environmentalism and environmental movements. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *E. Du Puis*

224. Globalization: Theories and Social Movements. W

Examines the structures, processes, and movements associated with globalization processes. Reviews political economy theories, cultural theories systems, state industrial policies, and popular responses to globalization. Also assesses contribution of resistance movements informed by class, ethno-nationalism, religion, or gender. Enrollment restricted to graduate students. Enrollment limited to 25. Offered in alternate academic years. May be repeated for credit. *P. Lubeck*

225. Political Economy for Sociologists. *

Examines rudiments of historical materialism in light of advances in cultural and ecological Marxism. Basic categories of Marxist political economy. Thematic focus on the "first" and "second" contradictions of capitalism in world economy today. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Shapiro*

227. Learning from Environmental Historians. *

Looks at several major themes in the sociology of the environment and asks how the works of environmental history address those themes. Includes reflections on how history as a method interrogates social questions. Possible themes include: sustainability; social justice; universalism vs. particularity; city and country; and social movements. Enrollment restricted to graduate students. Enrollment limited to 8. E. Du Puis

229. Work and Labor Markets in the New Economy. W

Focuses on the interaction of work restructuring and existing race/class/gender inequalities. Themes include: the labor process and theories of consent; labor market segmentation; job and occupational segregation; information technologies, flexible work, and post-industrialism; flexible employment relations; and low-wage service and labor markets. Enrollment restricted to graduate students. *S. Mc Kay*

230. Theory and Method in the Sociology of Marx. *

Examines theoretical and methodological implications of Marxist theory for empirical social research. Analyzes how historians and social scientists apply Marxist method in explaining society, social change, globalization, culture, and late capitalism. Goal is to assist students to employ Marxist theory and method creatively in their research projects. Enrollment restricted to graduate students. Enrollment limited to 12. *P. Lubeck*

240. Inequality and Identity. S

Explores recent theoretical and empirical studies of race, class, gender, and sexuality with an emphasis on the production of identities and their relationship to processes and structures of power in a postcolonial context. Enrollment restricted to graduate students in sociology. *J. Childs*

241. Cross-National and Cross-Cultural Research. *

Seminar examining theoretical and methodological issues in doing cross-national and cross-cultural research. In addition to a consideration of different research paradigms and approaches, representative works from each comparative tradition are examined. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Archer*

242. Feminist Research Seminar. *

Provides scholarly support to students doing feminist research. Examines issues concerning conceptualization of feminism and feminist research. Explores relation of feminist research to intersections of gender, class, and race; to the self; to power; and to transformative social praxis. Students present and are given assistance with their work, as well as listen to, read, and assist with the work of others. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

244. Race and Ethnicity. *

A critical survey of the theoretical issues of persistence and change, public policy, and recent empirical studies in the field of race and ethnic relations. Readings introduce comparative race relations and a historical background of major theoretical paradigms in the field which purport to explain race and ethnic relations in general and race relations in America specifically. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. *J. Childs*

245. Feminist Theory. *

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Explores the decentering of universalist feminist theories and asks what constitutes feminist theory after gender has been decentered. Considers various deconstructive challenges to second-wave feminist theory based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Enrollment restricted to sociology graduate students. Enrollment limited to 12. *J. Bettie*

246. Class, Culture, and Movement. *

Analyzes impact of ethnicity, gender, and religion on the class situation of laboring people in a globalized economy by intensive reading and critique of classic studies, explaining how social movements reflect combinations of social relations and cultural practices. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

247. Race and Class. *

Introduces the student to the recent literature on race and class. Covers several different theoretical perspectives including internal colonialism, labor market segmentation theories, racial formation, and neo-gramscian cultural analyses. In addition to study of theory, also compares theoretical perspectives to the historical experience of minority groups, in particular, blacks, Hispanics, and Asians. Enrollment restricted to sociology graduate students. *J. Childs*

250. Course Design and Grant-Writing Seminar. *

A professional training seminar devoted to the philosophical, conceptual, and practical issues of course design, pedagogy, and grant writing. Topics covered: institutional contexts; curriculum (including syllabi, course content, assignments, evaluation); pedagogy; teaching as work/labor process; grant writing; budgets. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *D. Takagi*

252. Symbolic Interactionism and Sociology of Emotions. *

Examines classic and contemporary theories and concepts that play a major role in

sociological studies of identity, symbolic and social interaction, and the sociology of emotions. Examines how cultural forms, rules, and rituals define, structure, and mediate emotions and how identities are situated within social institutions. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

253. Race, Crime, and Justice. *

An introduction to comparative and historical analyses of relations between race and the criminal justice system. Specific topics include defining race/ethnicity, sentencing disparities, jury nullification, jury selection and decisions, prosecutorial misconduct, government's charging and investigative discretions, and other racially biased law enforcement practices and criminal court processes. Also covers a number of highly publicized trials that involved unmistakable elements of race and racism such as Chin, King, Simpson, and Unabomber cases. Students are also exposed to World Wide Web (Internet) to learn how to do research in the field of criminal justice. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Fukurai*

255. Engaging Cultural Studies. W

Examines feminist and ethnic studies production, appropriation, and transformation of cultural studies theories and methodologies. Considers the utility of various theoretical apparatuses and methodological strategies employed in the interdisciplinary site that combines feminist, ethnic, and cultural studies. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Bettie*

256. Urban Sociology. F

Introduction to core writings and key theoretical pardigms in urban sociology. Examines the history and contemporary conditions of cities in the U.S. and the urban experience. Urbanization, suburbanization, community, social inequality, urban politics, relationship between the built environment and human behavior. Enrollment restricted to graduate students. *G. Sandoval*

260. Culture, Knowledge, Power. S

An introduction to theoretical approaches and exemplary studies of culture, knowledge, and power which critically interrogate the relationship between cultural formations and the production, circulation, and meaning of knowledges, materials, artifacts, and symbolic forms. Explores the concrete ways that power is organized and operates through different forms and sites, how it interpolates with other forms of power, and examines knowledges and culture as specific forms of power and sites of political struggle. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *J. Reardon*

261. Sociology of Knowledge. *

Explores three main issues: the social determination of knowledge, including natural science; the character of intellectual labor and intellectuals as a social group; the role of organized knowledge and "knowledge industries" in contemporary social change. Texts examined include class-based theories (Lukacs, Mannheim, Gramsci), feminist standpoint analysis (Smith, Harding, etc.), and theories of postmodern culture (Lyotard, Harvey, etc.). Enrollment restricted to graduate students. Enrollment limited to 20. *J. Childs*

262. Cultural Practice and Everyday Life. *

Examines contemporary debates about the role of mass produced expressive symbols in modern industrial societies, and the circumstances of cultural production for its impact on the creation, organization, and use of cultural artifacts. Concern with the

use and experience of popular symbols for the ways that their use involves the creation of meanings and the role of such meanings in the social organization of society. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Gray*

264. Science, Technology, and Medicine. *

Explores social and cultural perspectives on science, technology, and medicine. Analyzes theoretical approaches that open up "black boxes" of scientific and biomedical knowledge, including the politics of bodies, objects, and health/illness. Links are made to medical sociology. Enrollment restricted to graduate students. *The Staff*

282. Social Policy Research. *

Policy research. Covers a variety of theoretical perspectives found in policy studies. Surveys various methodological approaches used in policy research. Theories and methods linked to research agendas on the various phases of the policy life cycle. Students are required to design a research proposal. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *E. Du Puis*

290. Advanced Topics in Sociological Analysis. S

The topics to be analyzed each year vary with the instructor but focus upon a specific research area. *D. Takagi*

293. Going on the Job Market. *

A seminar devoted to the practical problems of securing a job as a professional sociologist. Topics covered: researching colleges, universities, and public and private organizations that employ sociologists; designing a curriculum vitae; writing an application letter; preparing a "job talk;" handling questions during the interview process; the etiquette of visiting (and its aftermath); finding out about them; and the terms of employment: what is negotiable and what is not. Enrollment restricted to graduate students. *C. West*

294. Writing for Social Scientists. *

Seminar on the genres of social science writing, and the problems of starting and finishing a publishable thesis, book, or article. For advanced graduate students working on the composition of their dissertations and journal articles. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

South and Southeast Asian Studies

Department of History 201 Humanities (831) 459-2982 http://history.ucsc.edu

(There were no substantive changes to the South and Southeast Asian Studies Program Description from the General Catalog 2006-08.)

Program Description

South Asian studies has its focus on India, but course work and research on Afghanistan, Bangladesh, Bhutan, Nepal, Pakistan, and Sri Lanka are also encouraged. Southeast Asian studies has as its focus the nations of insular Southeast Asia (Indonesia, Malaysia, and the Philippines), but course work and research in other areas such as Myanmar, Cambodia, Laos, Thailand, and Vietnam are also encouraged.

The India and South Asia component of the program has three special resources in support of study of the traditional and contemporary civilization and cultures of India: the Satyajit Ray Film and Study Collection (Ray FASC) at McHenry Library , the Ali Akbar Khan Endowment , and the Talat and Kamil Hasan Endowed Chair in Classical Indian Music . Hindi/Urdu is offered as part of the core curriculum.

Students interested in pursuing a broad social, political, and cultural understanding of South or Southeast Asia and their place in the world context through the creation of a Individual Major should discuss these possibilities with a listed faculty member and with their College office. A student who undertakes the individual major in South or Southeast Asian studies is expected to complete a double major in conjunction with a discipline such as anthropology , one of the arts , Earth sciences , economics , education , environmental studies , feminist studies , history , linguistics, politics , or sociology .

Study Abroad

Students may apply to spend their junior year in Delhi or Hyderabad through the UC Education Abroad Program (EAP). Students can seek internships and enroll in special study abroad programs in addition to the ones in Delhi or Hyderabad through initiatives undertaken by UCSC in cooperation with institutions in India.

Students may apply to the Volunteers in Asia program to teach English in Indonesia or other Southeast Asian countries; contact the Kresge College office for more information on this program.

The Minor in Southeast Asian studies

Students must complete Anthropology 130E, *Ethnographic Area Studies: Culture and Politics of Island Southeast Asia*, and four additional upper-division courses (20 credits), on the area of Southeast Asia, one of which may be an individual study (course 199). For details on the minor program, contact the History Department 831-459-2982 located at 201 Humanities. For details on the individual major, contact your college academic preceptor.

The following are among the courses that meet the upper-division requirement. (Check the *Schedule of Classes* or consult with the program coordinator for courses added during the academic year that meet the requirement.)

Anthropology 129 Other Globalizations: Cultures and Histories of Interconnection

History 106 Vietnam War Memories

History 194N Comparative Studies in Modern Asian History

History of Art and Visual Culture 105E Ritual in Asian Religious Art

History of Art and Visual Culture 160 Storytelling in Asian Art

Music 180A Studies in World Music: Asia and the Pacific

Politics 140D Politics of East Asia

Politics 156 Asian Women in Politics

Porter 121D Sudanese Gamelan and Dance Theater

Theater Arts 161D Asian Theater: An Anthropological Approach

Associated Faculty

Anjali Arondekar, Assistant Professor of Feminist Studies; Dilip K. Basu, Associate Professor of History, Director, Ray Film and Study Collection; Donald Brenneis, Professor of Anthropology; Edmund Burke III, Professor of History; Linda C. Burman-Hall, Professor of Music; Annette Clear, Assistant Professor of Politics; Vilashini Cooppan, Assistant Professor of Literature; Ben Crow, Associate Professor of Sociology; Shelly Errington, Professor of Anthropology; M. Kathleen Foley, Professor of Theater Arts; Patty Gallagher, Assistant Professor of Theater Arts; Jorge Hankamer, Professor of Linguistics; Aashish Khan, Distinguished Adjunct Professor of Music; Fredric Lieberman, Professor of Music; Paul M. Lubeck, Professor of Sociology; John Mock, Lecturer in Hindi and Urdu; Radhika Mongia, Assistant Professor of Feminist Studies; Dard Neuman, Assistant Professor of Music, Kamil and Talat Hasan Endowed Chair in Classical Indian Music; Annapurna Pandey, Lecturer in Anthropology; Triloki Nath Pandey, Professor of Anthropology; S. Ravi Rajan, Associate Professor of Environmental Studies; Vanita Seth, Assistant Professor of Politics; Eli A. Silver, Professor of Earth Sciences; Nirvikar Singh, Professor of Economics; Undang Sumarna, Lecturer in Music; Kirtana Thangavelu, Lecturer in History of Art and Visual Culture; Megan Thomas, Assistant Professor of Politics; Anna Tsing, Professor of Anthropology

Spanish and Spanish for Spanish Speakers

Language Program
239 Cowell College
(831) 459-2054

http://language.ucsc.edu

Faculty | Course Descriptions

(There were no substantive changes to the Spanish and Spanish for Spanish Speakers Program Description from the General Catalog 2006-08.)

Program Description

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for Spanish speakers (SPSS) courses, from beginning to advanced levels. The language and culture sequences of lower-division courses, Spanish 1-6 and 56 and Spanish for Spanish Speakers 61-63, are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing as well as cultural competence. Students are strongly encouraged to finish year-long sequences without interruption and, if possible, to study in Spanish-speaking countries. Students may select from among several major programs: a major or minor in language studies, a major in literature with an emphasis in Spanish/Latin American/Latino literatures, a major in Latin American and Latino studies, or a major in global economics.

Spanish

Students beginning with Spanish level 1 can choose between two teaching tracks, either the first-year 1-2-3 series or the first-year 1T-2T-3T series. However, students placing beyond level 1 cannot enter the linked "T" series, which requires continuous enrollment from fall through spring quarters. For further information on the aims and nature of the 1-2-3 series and the 1T-2T-3T series, please see the course descriptions.

Spanish for Spanish Speakers

Spanish for Spanish speakers (SPSS) has been developed for students who, although raised in Spanish-speaking communities or households, are not yet fully proficient in Spanish. Spanish for Spanish speakers courses take into account the experiences and influences of bilingual and bicultural upbringing.

SPSS students are required to attend lab instruction once a week in addition to the regular class meetings. Some lower-division and all upper-division courses can fulfill requirements for several majors or departments, such as American studies, education, global economics, language studies, and Latin American and Latino studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The UC Education Abroad Program (EAP) offers programs ranging from one quarter to one year in Santiago, Chile; San Jose and Monteverde, Costa Rica; Mexico City and Monterrey, Mexico; and Cordoba, Madrid, Alcalá, Barcelona, and Granada, Spain. Generally, students must have completed Spanish for Spanish Speakers 63 or Spanish 6 or 56 by the end of the sophomore year to qualify for a junior year abroad. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Spanish for Spanish Speakers

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

Jorge Aladro Font (Literature)

Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

Julianne Burton-Carvajal (Literature)

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

Norma Klahn (Literature)

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

Associate Professor

Lourdes Martínez-Echazábal (Literature)

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

Juan Poblete (Literature)

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

Lecturer

Ignacio Aznar, Emeritus

Brenda Barceló

Medical Spanish, Latin American culture, Latin dance expressions, Spanish/English and English/Spanish translation and interpretation, Hispanic linguistics, Romance languages

Carlos Calierno

Latin American culture, history, literature, cinema, music, art, economics, and politics

Verónica Feliu

Latin American literature of the 20th century; Chilean feminisms, politics, and culture; Latin American cultural studies; Spanish learning for both non-native and heritage speakers

María Victoria González-Pagani

Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

María Morris

Language learning styles and strategies, culture and technology in language training

Marta Navarro

Latin American literature, Mexican/Chicano culture, Latina/Chicana issues

Ariel Pérez

Language acquisition and teaching methodology, computer-assisted language learning, teaching language for proficiency, oral proficiency assessment; Latin American current affairs

Frank A. (Paco) Ramírez

Second-language acquisition, bilingual education, Siglo de Oro Theater, Peninsular medieval literature, Spanish-language film and theater for linguistic and cultural acquisition

Alvaro Romero-Marco

Spanish literature of the 19th- and 20th-centuries; film, cultural studies

Language Program
239 Cowell College
(831) 459-2054
http://language.ucsc.edu

Program Description | Faculty

Spanish

Lower-Division Courses

1. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 26. *The Staff*

1T. Topic-Oriented Spanish Language Instruction (Special Track). F

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 40. *The Staff*

1U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). F Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; Spanish Placement Examination score of 10. *The Staff*

2. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 1 or Spanish Placement Examination score of 20. Enrollment limited to 26. *The Staff*

2T. Topic-Oriented Spanish Language Instruction (Special Track). W

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course;

students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 1T. Enrollment limited to 40. *The Staff*

2U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). W Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 1U. *The Staff*

3. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 2, 2X, or Spanish Placement Examination score of 30. Enrollment limited to 26. *The Staff*

3T. Topic-Oriented Spanish Language Instruction (Special Track). S

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 2T. Enrollment limited to 40. *The Staff*

3U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). S Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 2U. *The Staff*

4. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various sociopolitical and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 3, 3T, 3X, or Spanish Placement Examination score of 40. (General Education Code(s): IH.) *The Staff*

5. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various socio-political and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 4, 4X, or Spanish Placement Examination score of 50. (General Education Code(s): IH.) *The Staff*

5M. Medical Spanish. F,W,S

Students learn vocabulary, expressions, and cultural background to be able to interact with Spanish-speaking patients and doctors. Medical Spanish fulfills

language requirement for the health science major of the Biology Department. Prerequisite(s): course 4; or Spanish for Spanish Speakers 61, 62, and 63; or Spanish for Spanish Speakers 125; or Spanish Placement Examination score of 50 or higher. Enrollment restricted to health sciences majors. Enrollment limited to 24. (General Education Code(s): IH.) *The Staff*

6. Intermediate Spanish. F,W,S

Increases oral and written proficiency using authentic reading materials which focus on such topics as social class, ethnicity, education, religion, economic, and political developments in the Spanish-speaking world. Prerequisite(s): course 5, 5M, 5X, or Spanish Placement Examination score of 60. Enrollment limited to 24. (General Education Code(s): IH.) *The Staff*

56. Advanced Readings in Different Genres. S

Includes composition, discussion, and vocabulary building based on the reading of selected short stories, poetry, theater, film, and related cultural material. Conducted in Spanish. Recommended as preparation for upper-division courses. Prerequisite(s): course 5, 5M, 5X, Spanish for Spanish Speakers 62, or Spanish Placement Examination score of 60. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. The Staff

Upper-Division Courses

114. Advanced Conversation and Composition. S

Advanced conversation and composition based on extensive readings in the humanities and social sciences. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. *The Staff*

156. Topics in Hispanic Language and Culture.

An analytic study of 20th-century Hispanic language and culture as revealed in print and audio visual media. *The Staff*

156E. Spanish Culture. W

A broad survey of Spanish cultural topics, including history, politics, religions, art forms, music, and films. It is based on extensive conversations, discussion, and composition. Particular emphasis is placed on key changes that have occurred during the 20th century in Spain. Classes conducted through commentary on texts read (or viewed), oral presentations, and debate. Recommended for students preparing to go to Spain with EAP. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment restricted to language studies, Latin American and Latino studies, and literature majors. Enrollment limited to 24. *The Staff*

156F. El humor en Español. F

Topic-oriented language course on sociopolitical and historical issues as seen through humor in different genres and media. Topics include Mafalda and Condorito (comic strips), Rius (collage of comic strips, photographs and original documents), Continflas and Almodovar (cinema), El Teatro Campesino (theater), Ana L., Vega (literature), Les Luthiers (song and music). Course deals with written and oral discourse pertaining to the following Spanish language varieties: Rio de la Plata, Mexican, Caribbean, U.S., and Peninsular. Intensive writing and speaking in Spanish. Prerequisite(s): courses 6, 56, Spanish for Spanish Speakers 63 or Spanish placement examination score of 70. *M. Gonzalez Pagani*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Spanish for Spanish Speakers

Lower-Division Courses

61. Spanish for Spanish Speakers. F

This course deals with orthography (syllabification, accentuation, etc.), basic grammatical features, verbal structures, and development of conversation skills and confidence in spoken Spanish. Focus on development of writing skills: description, dialogue, exposition, and commentary on contemporary issues relevant to Spanish speakers of the Americas. Students need to utilize the Self-Placement Guidelines, available in Crown 122 to assure proper placement in this class. (General Education Code(s): IH.) *The Staff*

62. Spanish for Spanish Speakers. W

Comprehensive review of the subjunctive, the passive voice, different uses of "se," and other nuances of the language. Intensive practice in understanding specialized readings, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Prerequisite(s): course 61 or placement exam. Students who have not taken Spanish for Spanish Speakers 61 need to speak with an instructor in the Spanish for Spanish Speakers Program. (General Education Code(s): IH.) *The Staff*

63. Spanish for Spanish Speakers. S

Comprehensive grammar review. Rigorous practice in reading historical, sociopolitical, and literary works pointing out nuances of Spanish. Rigorous experimentation with various writing styles: analytical, argumentative, and creative. Prerequisite(s): course 62 or placement exam. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

Enrollment limited to 10. The Staff

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Upper-Division Courses

125. Mexico and the Southwest. S

An interdisciplinary survey of the cultural history of the Mexican people in both Mexico and the U.S. Southwest. Topics include literature, art, folklore, oral tradition, music, politics, as well as "everyday" cultural manifestations. Conducted in Spanish. May be counted toward fulfillment of upper-division major requirements for Latin American and Latino studies and language studies. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 25. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Enrollment limited to 10. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. The Staff

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. The Staff

Faculty

Lower-Division Courses

10. Skills for College and Beyond (2 credits). W,S

Applications of practical skills for effective, meaningful study in the context of a full, busy life. Topics include learning styles, time management, test preparation, and life balance. Specific techniques for efficient reading comprehension, note-taking, memorization, and self-assessment are introduced. Enrollment restricted to college members and by permission of instructor. Enrollment limited to 15. *C. Camblin*

15. Visible Knowledge, Digital Media, and the Texts of Stevenson Core (2 credits). *_

Course recreates and updates the Stevenson "Digital Core" web site and creates digital representation of core course texts. Students closely consider their experiences in the Stevenson core course and critically analyze digital media. Prerequisite(s): course 80A or 80B; and 81A or 81B. Enrollment restricted to college members. Enrollment limited to 20. *B. Lunine*

28. Residential Life Leadership (2 credits). S

Examines the role and facilitates the development of Stevenson College Residential Advisers. Class themes include an exploration of leadership, resource management, and the process of community building within the college. Course evaluation based on paper writing, participation, engagement with course materials, and a small group final project that requires students to create a year-long program model designed to address an issue facing the Stevenson community. Prerequisite(s): Must have been hired as a Stevenson residential adviser or alternate for the following academic year. Enrollment limited to 30. May be repeated for credit. *E. Suckiel*

30. Thesis Writing and Editing (2 credits). S

Identifies and examines the assumptions, expectations, and formats of writing in students' fields, with the goal of beginning—or continuing—academic research. Prerequisite(s): satisfaction of the Composition requirement. Enrollment restricted to junior and senior college members and by permission of instructor. Enrollment limited to 25. A. Weaver

35. Everyday Ethics for College Life (2 credits). S

Exploration of and reflection on everyday values and virtues such as integrity, open-mindedness, honesty, and community. Objectives include learning how to think about moral dilemmas and how to begin drafting one's own code of ethics. Enrollment restricted to college members. Enrollment limited to 20. *C. Camblin*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision (see course 192). *The Staff*

80A. Introduction to University Discourse: Self and Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Stevenson's core course considers the roots of modern society using foundational religious texts and major classical and modern philosophical works. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1.) *The Staff*

80B. Rhetoric and Inquiry: Self and Society. F

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Stevenson's core course investigates the roots of modern society, using foundational religious texts and classical and modern philosophical works. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

80F. Self and Society Through Film (2 credits). *

Seminar designed to expand upon the discussions begun in the Stevenson Core Course. Course uses documentary and feature films to investigate and discuss all sides of modern conflicts that bring class back to the Core Course theme. Prerequisite(s): completion of two-quarter core course sequence. Enrollment limited to 25. *The Staff*

80G. Critical Memory, Ethnicity and the Graphic Novel (2 credits). *

Study of the literary techniques of Art Spiegelman and Marjane Satrapi in their respective graphic novels, *Maus* and *Persepolis*, considering the aesthetics of form, and critically evaluating the import of ethnicity and historical trauma in these texts. Enrollment limited to 20. *The Staff*

80H. Rainbow Theater: An Introduction to Multicultural Theater. F

Introduction to Asian American, Chicano/Latino, and African American plays through reading of major authors, discussion of social and historical context of their work, and development of a production of a one-act play from each cultural group. In-depth examination of key historical context of these three cultural groups. Video presentations followed by class discussion. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

80S. Slave Narratives: The Trauma of Memory (2 credits). *

Study of several major aspects of slave societies in the U.S. between the 18th and 19th centuries: the role of music, religion, and revolt. Primary materials, historical data, and slave narratives will be examined. Enrollment limited to 20. *The Staff*

80T. Self and Society for Transfer Students. *

Condensed version of Stevenson's core course for transfer students. Develops analytical writing, critical reading, and effective speaking by considering influential philosophical works while exploring cultural conflicts in modern society. Themes include imperialism, racism, and class conflict. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and

81A. Self and Society 2. W

Winter quarter of Stevenson's core course continues development of analytical writing, critical reading, and effective speaking in exploring conflicts inherent in modern society. Investigates themes of colonization, race, gender, class, and cultural conflict. Enrollment restricted to first-year college members. Students cannot receive credit for this course and course 81B. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, E.) *The Staff*

81B. Rhetoric and Inquiry: Self and Society 2. W

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Winter quarter of Stevenson's core course investigates themes of colonization, race, gender, class, and cultural conflict. Permission of instructor required; selection for this course based on application submitted. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Students cannot receive credit for this course and course 81A. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2, E.) *The Staff*

Upper-Division Courses

120. Self and Society: Teaching Practicum. W

Each student facilitates one of the discussion sections of Stevenson 81A or attends lectures, and meets with staff for practicum on the teaching process. Prerequisite(s): qualifications as determined by instructor at first class meeting. Enrollment limited to 5. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision (see course 42). Prerequisite(s): upper-division standing and a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study, sponsored by the college and performed off-campus. This course may be counted for up to three courses of credit in any quarter. Prerequisite(s): approval of student's adviser and the academic preceptor, and, in the case of full-time study, the board of studies supervising the major. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Enrollment restricted to members of Stevenson College. Enrollment limited to 12. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Course designed for members of Stevenson College. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to

three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, approval by the academic preceptor. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be take for credit in any one quarter. Students submit petition to sponsoring agency. Requires approval of the student's adviser and academic preceptor. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Theater Arts

J106 Theater Arts Center (831) 459-2974 theater@ucsc.edu http://theater.ucsc.edu/

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The Theater Arts Department is a diverse group of scholar/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion with equal courage, we educate our students in the history, theory, and practice of theater to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity with a commitment to cultural diversity, we serve the research mission of UCSC, our audiences, and the students who will shape the theater of the future.

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all sub-disciplines as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various sub-disciplines and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused course work in critical studies. The impact of digital and new media on theater is integrated into the curriculum, especially with respect to dance and design.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome nonmajors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for this breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater; acting, directing, and dance studios; costume, scene, and properties shops; a sound recording room; a computer lab; and a metal shop.

Elsewhere on campus are the open-air Quarry Theater seating 3,000, the Shakespeare Santa Cruz Festival Glen, and the 150-seat Barn Theater. Library holdings in theater literature and history are extensive, including a large slide collection and dance video holdings; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

A unique resource for UCSC students is Shakespeare Santa Cruz (SSC). Acknowledged to be one of the leading Shakespeare festivals in the country, SSC was founded in 1982 to foster links between modern scholarship and contemporary professional theater practice. SSC's annual summer festival presents the works of Shakespeare in thematic context with other great plays of the world stage, performed, designed, and directed by professionals from all over the country.

SSC offers undergraduates various opportunities to work in conjunction with theater professionals through its summer intern program, its winter holiday production (in fall quarter), and Shakespeare-to-Go, a 45-minute Shakespeare outreach production in which students perform and tour (rehearsed during winter quarter and performed during spring quarter) for audiences throughout Santa Cruz County and beyond.

Majors who wish to intensify their study of one particular theater arts area before seeking admission to graduate school or work with professional companies are encouraged to apply to the department's Fifth-Year Certificate Program.

Requirements to Declare the Major

Prior to petitioning for the major, students must have successfully completed courses 10, Introduction to Theater Design and Technology, 20, Introductory Studies in Acting, 30, Introduction to Dance Theory and Technique, 61, Issues and Methods in Theater Arts, and two credits of course 50, Fundamentals of Theater Production. Students are encouraged to complete these courses as early in their studies as possible so that the petition to major status can be accomplished no later than the end of sophomore year.

Transfer Students

Transfer students who have not satisfied the requirements to declare the major are advised to take as many of the six lower-division requirements listed above as possible in their first two quarters. Transfer students may petition to have equivalent lower-division courses taken at other schools count toward the lower-division major requirements. Petition forms and information on courses and major requirements can be obtained at the department office, J106 Theater Arts Center.

Major Requirements

The Theater Arts major requires six lower-division courses, six credits of course 50, and 10 upper-division courses (inclusive of a senior seminar project). Majors may organize their studies around a particular area of interest in accordance with the requirements outlined below. The following six lower-division courses must be taken by all majors:

- 10 Introduction to Theater Design and Technology
- 20 Introductory Studies in Acting
- 30 Introduction to Dance Theory and Technique
- 61, Issues and Methods in Theater Arts

One lower-division studio elective (chosen from: courses 12, 14, 17, 18, 19, 21, 22, 23, 32, 33, 36, 40)

Plus: 50, Fundamentals of Theater Production (two-credit course; must take a total of six credits)

The following upper-division courses must be taken to complete the major:

Eleven upper-division theater arts courses:

- Three survey courses in the history/theory of performance (intermediate-level 100 courses) chosen from these three areas: 1) Pre-modern, 2) Non-Western, 3) Western
- 160, Dramatic Theories
- · Two studio courses
- One elective
- One faculty-directed theater arts production course
- Two 161 series (drama) and/or 130 series (dance) critical studies courses
- One senior seminar requirement, (course 185)

One of the 16 courses required for the major must be a lower- or upper-division diversity course. Exceptions to the major requirements, through the UC Education Abroad Program or transfer credits, are considered on a case-by-case basis by the department chair.

Theater Arts Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the theater arts major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Plan One					
Year	Fall	Winter	Spring		
1st (frsh)	Thea 61 gen ed college core	Thea 10 low-div studio gen ed	Thea 20 Thea 50 gen ed		

2nd (soph)	Thea 30 gen ed gen ed	elective Thea 50 gen ed	elective gen ed gen ed (declare major)			
Plan Two						
Year	Fall	Winter	Spring			
1st (frsh)	gen ed gen ed college core	Thea 10 low-div studio gen ed	Thea 20 Thea 61 gen ed			
2nd (soph)	Thea 50 Thea elective gen ed	Thea 30 Thea elective gen ed	Thea 50 gen ed gen ed (declare major)			

Comprehensive Requirement

Theater arts majors are responsible for successfully completing course 185, Senior Seminar.

Minor Requirements

Students earn a minor in theater arts by completing nine courses (eight 5-credit courses and one 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on either drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

- Two courses in the literature/history/theory of theater arts: 61 and 160
- One quarter of the 2-credit course 50
- One of the following courses in the student's area of focus: 10, 20, 30, or 40
- Three upper-division courses chosen from the following: 161, 163, 133, 134
- Two studio courses, one of which may be a faculty-directed production (151)

Independent Studies (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.

Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

Fifth-Year Certificate Program

The Theater Arts Department offers a graduate certificate program that allows a limited number of students to refocus or intensify their skills, concentrating on performance reinforced by scholarship and research. The program provides the opportunity to experience the benefits of apprenticeship in an academic setting. Students follow an individual program suited to their background, needs, and interests while specializing in drama, design/technology, dance, playwriting, Western or non-Western theater, or dramatic literature.

Students in the graduate certificate program are expected to complete one academic year (fall-spring) as a full-time resident student, passing eight 5-credit theater arts courses. Of those eight courses, one is a required graduate seminar (course 290); and one must be chosen from the upper-division critical studies electives on offer. An incomplete in course 290 must be completed by the end of the following quarter of the residency year. The remainder of the program is designed by the student according to individual interests and needs in consultation with the faculty adviser. Many students elect to take faculty-supervised individual studies courses in their area of emphasis.

For additional information, contact the Theater Arts Department.

Faculty | Course Descriptions

Program Description

The Theater Arts Department is a diverse group of scholar/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion with equal courage, we educate our students in the history, theory, and practice of theater to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity with a commitment to cultural diversity, we serve the research mission of UCSC, our audiences, and the students who will shape the theater of the future.

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all sub-disciplines as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various subdisciplines and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused course work in critical studies. The impact of digital and new media on theater is integrated into the curriculum, especially with respect to dance and design.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome nonmajors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for this breadth of training and performance opportunities. The <u>Theater Arts Center</u> contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium

theater; acting, directing, and dance studios; costume, scene, and properties shops; a sound recording room; a computer lab; and a metal shop.

Elsewhere on campus are the open-air Quarry Theater seating 3,000, the Shakespeare Santa Cruz Festival Glen, and the 150-seat <u>Barn Theater</u>. <u>Library</u> holdings in theater literature and history are extensive, including a large slide collection <u>and dance video holdings</u>; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

A unique resource for UCSC students is <u>Shakespeare Santa Cruz (SSC)</u>. Acknowledged to be one of the leading Shakespeare festivals in the country, SSC was founded in 1982 to foster links between modern scholarship and contemporary professional theater practice. SSC's annual summer festival presents the works of Shakespeare in thematic context with other great plays of the world stage, performed, designed, and directed by professionals from all over the country. SSC offers undergraduates various opportunities to work in conjunction with theater professionals through its summer intern program, its winter holiday production (in fall quarter), and Shakespeare-to-Go, a 45-minute Shakespeare outreach production in which students perform and tour (rehearsed during winter quarter and performed during spring quarter) for audiences throughout <u>Santa Cruz County</u> and beyond.

Majors who wish to intensify their study of one particular theater arts area before seeking admission to graduate school or work with professional companies are encouraged to apply to the department's Fifth-Year Certificate Program.

Requirements to Declare the Major

Prior to petitioning for the major, students must have successfully completed courses 10. Introduction to Theater Design and Technology: 20. Introductory Studies in Acting: 30. Introduction to Dance Theory and Technique: 61. Issues and Methods in Theater Arts: and two credits of course 50, Fundamentals of Theater Production and courses 60A-B-C, Development of Theater Arts: Theory, Literature, and Practice. Students are encouraged to complete these courses as early in their studies as possible so that the petition to major status can be accomplished no later than the first quarter of the junior year end of sophomore year.

Transfer Students

During the first quarter on campus Transfer students who have not satisfied the prerequisites for the theater arts major may declare the major after completing a study plan during an advising session requirements to declare the major are advised to take as many of the six lower-division requirements listed above as possible in their first two quarters. Transfer students may petition to have equivalent lower-division courses taken at other schools count toward the lower-division major requirements. Petition forms and information on courses and major requirements can be obtained at the department office, J106 Theater Arts Center.

Major Requirements

The Theater Arts major requires six lower-division courses, six credits of course 50, and 10 upper-division courses (inclusive of a senior seminar project). Students majoring in theater arts Majors may organize their studies around a particular area of interest in accordance with the requirements outlined below. The theater arts major requires six lower-division courses and 6 credits of course 50 (a 2-credit course that provides experience in production work), six upper-division courses in residence, two electives (which may be upper- or lower-division courses), and satisfaction of the senior seminar requirement. Students must also take one course within the department that focuses on theater of diverse groups:

The following <u>six</u> lower-division courses must be taken by all majors:

- 60A-B-C Development of Theater Arts: Theory, Literature, and Practice
- One course in each of the theater arts areas of drama, dance, and theater design and technology:
- 10 Introduction to Theater Design and Technology
 - 20 Introductory Studies in Acting
 - 30 Introduction to Modern Dance Theory and Technique or other approved introductory dance classes. (Check with the Theater Arts Department office.)
- 10 Introduction to Theater Design and Technology
- 20 Introductory Studies in Acting
- 30 Introduction to Dance Theory and Technique
- 61, Issues and Methods in Theater Arts
- One lower-division studio elective (chosen from: courses 12, 14, 17, 18, 19, 21, 22, 23, 32, 33, 36, 40)
- Plus: 50, Fundamentals of Theater Production (two-credit course; must take a total of six credits)

Three lower- or upper-division elective theater arts courses:

- one theater arts diversity course (see list in Theater Arts Department office)
- two other theater arts electives

Six upper-division theater arts courses:

- 160 Dramatic Theories
- two courses in theater literature/history/critical studies
- two studio courses
- one faculty-directed theater arts production course

Each major must satisfy the senior seminar requirement (course 185).

The following upper-division courses must be taken to complete the major:

Eleven upper-division theater arts courses:

- Three survey courses in the history/theory of performance (intermediate-level 100 courses) chosen from these three areas: 1) Pre-modern, 2) Non-Western, 3) Western)
- 160, Dramatic Theories
- Two studio courses
- One elective
- One faculty-directed theater arts production course
- Two 161 series (drama) and/or 130 series (dance) critical studies courses
- One senior seminar requirement, (course 185)

One of the 16 courses required for the major must be a lower- or upper-division diversity course. Exceptions to the major requirements, through the <u>UC Education Abroad Program</u> or transfer credits, are considered on a case-by-case basis by the department chair.

Theater Arts Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the theater arts major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Plan One

<u>Program Description | Course Descriptions</u>

Faculty and Professional Interests

Professor

James H. Bierman

Playwriting, theater history and literature, classical and Renaissance drama, Chicano theater, digital media

Andrew E. Doe , Emeritus

Michael D. Edwards, Adjunct

Acting and directing, dramatic literature, opera, Shakespeare

M. Kathleen Foley

Asian theater, Southeast Asian studies, performance studies, maskwork, puppetry, multicultural theater

Mark Franko

Dance history and theory, choreography, technique, performance studies, theatrical theory in historical and critical perspective

Norvid J. Roos, Emeritus

Danny Scheie

Acting, directing, dramatic literature, theater history, Shakespeare, Wagner, gay studies

Ruth L. Solomon, Emerita

Audrey E. Stanley, Emerita

Paul Whitworth

Acting, directing, dramatic literature (English and Spanish Renaissance), translating dramatic literature

Associate Professor

David Cuthbert

Lighting design, CADD, projection design, scenic design

Alma R. Martinez

Acting, Chicana/o theater, contemporary Mexican and Latin American popular/political theater, theater of American culture, critical theory, directing

Elaine Yokoyama Roos, Emerita

Assistant Professor

Brandin Baron

Costume design, history of design

Kate Edmunds

Set design for theater and film

Patty Gallagher

Movement training for actors, circus and clown traditions, and Indonesian dance/performance

Kimberly Jannerone

Directing, dramaturgy, dramatic theory and criticism, theater history, acting

Peter H. Mostkoff

Dramatic and performance theory, theater history, acting

Edward C. Warburton

Development of dance thought in action, creative processes, and technology in theater arts; dance technique, movement research and composition, and applied dance practices

Lecturer

Tandy Beal

Choreography, improvisation, technique, performance skills, collaborations with classical and jazz composers, circus, theater and video, children's productions

Gregory Fritsch

Acting, directing

Mike Ryan

Acting, direction, voice

Mary-Kay Gamel, Professor, Classics and Comparative Literature Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Theater Arts

J106 Theater Arts Center (831) 459-2974 theater@ucsc.edu http://theater.ucsc.edu/

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

10. Introduction to Theater Design and Technology. F,S

Addresses imagination and creativity. Using the framework of theater production, students explore the process of translating a script into a performance. Topics include visual literacy, creative problem solving, establishing effective working teams, tear sheets, storyboarding, drawing, sound and color theory. This course is a prerequisite for all upper-division design courses. (General Education Code(s): A.) *The Staff, K. Edmunds*

12. Stage Management. F

Designed to acquaint students with the complexities of staging productions from the audition process to final performance. Directing, lighting, scenic production, sound, cueing, and personnel management are aspects that will be touched upon in class. Students are billed a materials fee. (Formerly *Production Management*.) (General Education Code(s): A.) *The Staff*

14. Drawing. W

A fundamental course in drawing from still life, the figure, and in the landscape. The approach is from the tonal and volumetric aspects of the object. Color is introduced as the course progresses. Instruction fashioned to the individual needs of the student. The inexperienced are welcomed as well as the experienced. Students are billed a materials fee. Enrollment restricted to theater arts majors. (General Education Code(s): A.) *The Staff*

17. Costume Construction. W

The process of interpreting a costume designer's sketch into a finished theatrical costume. Some techniques included are dyeing, fabric selection, draping, flat pattern drafting, pattern manipulation, adaptation, fitting, and alteration. Using various techniques, students make basic pattern pieces and learn to modify them to create costumes. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

18. Drafting for Theatrical Production. *

An examination of the fundamentals of drafting scale drawings for production, including floor plans, elevations, sections, working drawings, dimensions, layout, and lettering. Students learn isometric drawing, perspective, and rendering techniques. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): A.) *K. Edmunds*

18C. Drafting-Computer Aided. S

In-depth exploration of computer-aided drafting, specifically the programs

Vectorworks, Spotlight, and Renderworks. Topics include: the user interface, ground plan, section and detail views, paper space vs. working space, tool palettes, USITT drafting standards, layers, line weights, objects, classes, library annotations, importing rasters, and 3D modeling. Students required to do weekly projects such as ground plans, lighting plots, perspectives, and detail drawings, as well as turn in a major final project, and complete a mid-term, final, and quizzes. Students are billed for a materials fee. Enrollment restricted to theater arts majors. Enrollment limited to 10. (General Education Code(s): A.) *D. Cuthbert, J. Ike*

19. Design Studio: Lighting Studio A. W

An introduction to the theory and practice of lighting design with attention to the practical skills and creative approaches to lighting performance pieces; the technical side of lighting design via demonstrations, lectures, and labs. Students complete projects evolving and executing concepts for lighting chosen pieces. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): IH, A.) *D. Cuthbert*

20. Introductory Studies in Acting. F,W,S

Introduction to basic acting skills and the problems of performance. Concentrates on expanding the students' range of expression and ability to respond to and analyze dramatic text. Students with little or no experience are encouraged to attend. (General Education Code(s): IH, A.) (W) A. Martinez, (FS) The Staff

21. Acting Studio I. W

Studio course involves acting exercises based on the Stanislavski principles of acting as well as work on movement, voice, and interpretation of text. Prerequisite(s): course 20 or permission of instructor. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

22. Indonesian Dance and Drama. F

Students learn the basic movement repertoire of the specific characters of the Indonesian dance-drama/puppetry tradition over the quarter with explication of how these types operate in their own cultural context. The course culminates in an open showing of scenework. May be repeated for credit. (General Education Code(s): A, E.) (F) M. Foley, (WS) P. Gallagher

23. Voice for the Actor. F

Students work on developing resonance, range and expressivity for stage performance via physical exercises and text explorations undertaken in small groups. Prerequisite(s): course 20. Audition required for acceptance into class. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

30. Introduction to Modern Dance Theory and Technique. F,W,S

Intensive instruction in developing the dancer's physical instrument, combined with basic movement theory. May be repeated for credit with consent of instructor. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): IH, A.) *E. Warburton, (F) The Staff*

31C. Dance Studio I. W

Introduction to contemporary dance theory and practice. Focus on basic dance technique, range of styles, and aesthetic points of view of historically significant contemporary dance choreographers in America and worldwide. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): A.) *E. Warburton*

31P. Postmodern Dance I. *

Introduction to postmodern dance theory and technique. Focus on performance practices of historically significant postmodern dance choreographers in the U.S. and worldwide. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

32. Introduction to Ballet. *

Introduction to ballet basics such as healthy alignment, anatomically sound articulation of hips and feet, balance control, moving through space harmoniously, and development of technical strength and combinative capacity in a classical, but fluid, aesthetic. Students are billed a materials fee. Enrollment limited to 35. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff, E. Warburton*

33. Advanced Introduction to Modern Dance. *

Intensive instruction in developing the dancer's physical instrument. Intended for students who have a previous fundamental knowledge of the basics of classic dance, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

35. Introduction to Tap Dance. *

Intensive instruction in developing the dancer's physical instrument combined with basic movement theory. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

36. Introduction to Dance Composition. F

Composing solo dances using a variety of approaches for developing movement combinations. Observation and recognition of personal movement patterns and discovering new sources for creative material. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

37. African Dance. S

A griot (musician-entertainer from western Africa) from Burkina Faso teaches "The African Journey," which emphasizes dance as combined in Africa, including singing, history, oral tradition, and storytelling. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

40. Introduction to Directing. W

An overview of the analytical and creative processes that inform the director's work. Close examination of texts, concepts, and directorial choices in staged performances, opera, films, and video. (General Education Code(s): IH, A.) *K. Jannarone*

45. Student-Directed Production. F,S

Participation in a student-directed play or student-choreographed dance concert under faculty supervision. (See course 192). Rehearsals culminate in public performances. Prerequisite(s): admission by audition; see department office for more information. *The Staff*

50. Fundamentals of Theater Production (2 credits). F,W,S

Work is on various aspects of theatrical production, including scenery, lighting, costumes, sound, stage management, and video documentation. Satisfies the department's technical experience requirement. May be repeated for credit. (General Education Code(s): A.) *The Staff, D. Scheie, D. Cuthbert*

52. Basic Stagecraft. S

Provides introduction to technical theater and basic stagecraft. Course examines twodimensional and three-dimensional scenery, scenic engineering, the physical theater, stage and scene shop equipment, project organization and process, technical theater graphics, materials, and theatrical construction techniques. Prerequisite(s): course 10. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

55A. Workshop in Performance: Barnstorm. F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 150 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Scheie, D. Cuthbert*

55B. Workshop in Performance: Barnstorm Lab (2 credits). F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 50 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Scheie, D. Cuthbert*

61. Issues and Methods in Theater Arts. F,S

Introduces issues and methods for analyzing historical and contemporary performance practices from a variety of disciplinary perspectives. Readings contextualize theatrical objects as well as offer theoretical tools for analyzing, interpreting, and making performances out of them. (General Education Code(s): IH, A.) *P. Mostkoff, M. Franko*

70. Working in Theater and the Performing Arts (2 credits). *

Creative artists, technicians, and designers discuss the theory and practice of their art. Presentations include discussion of the nature of their artistic work and reflection on the path that brought them to their present work with attention to the creativity and constraint that they experience in their profession. *P. Whitworth*

80A. Introduction to African American Theater. S

Surveys African American theater from late 19th century to contemporary 21st-century playwrights and examines dramatic narratives to trace creation, evolution, and development of African American cultural identity formation in American theater. Enrollment limited to 50. (General Education Code(s): A, E.) *The Staff*

80B. Rock 'n' Roll Design. *

Examination of the genesis, history, and development of technical theater practices used in large arena rock shows. Topics will include the development of rigging practices used in arenas, touring logistics, lighting instrumentation and aesthetics of rock shows, and the nature, practice, and approach of sound in these venues. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80E. Stand-Up Comedy. *

American comedy from Mark Twain to present, including popular humor, history, and politics, using comedy from the '20s through the women's gay and civil rights movements. Discussions are based on readings and videos of a wide variety of artists. Students present performances weekly. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80G. Creative Process/Dance. *

Introductory dance, with participation in a wide range of movement classes taught by the instructor and guest artists. Students develop their movement experiences through further viewing of world dance, discussion, reading, and writing. Enrollment limited to 100. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80H. Hamlet Conundrums. *

Offered online, the course explores major issues of interpretation of Shakespeare's classic play, which has occupied the minds of audiences, directors, designers, performers, and critics during its 400-year history. In doing this, it offers a sense of history of people's preoccupations with and thoughts about the play. Students taking this class are expected to complete the course during the quarter for which they are enrolled. All students enrolled in this course should visit elsinore.ucsc.edu and write to elsinore@ucsc.edu. (General Education Code(s): T4-Humanities and Arts, A.) *J. Bierman*

80L. Muppet Magic: Jim Henson's Art. *

The artistic and social impact of the Muppets on American puppetry, children's television, and Hollywood film is explored through viewings, guest lectures, and analysis. Henson's legacy in artistic innovation, mainstreaming of puppet theater for adult audiences, and establishment of puppetry in media and marketing are also explored. (General Education Code(s): T4-Humanities and Arts, A.) *M. Foley*

80M. Chicano/a Teatro. S

Introduction to Teatro Chicano/a with examination of how cultural diversity plays a role in theater. Through lectures, films, and workshop exercises, reflect upon the process of Teatro Chicano. Students write their own acts, improvise, and perform in class. (General Education Code(s): T4-Humanities and Arts, A, E.) *A. Martinez*

80N. Walt Disney. *

An examination of Walt Disney's creation of the American vision of "family entertainment." Particular attention will be paid to the classic animated feature films of Walt Disney and to the way this Disney invention has been preserved and developed since his death. We will also look at the live action films, theme parks, and other Disney creations. (General Education Code(s): T4-Humanities and Arts, A.) *J. Bierman*

800. Comedy in American Theater and Media since 1950. *

The interrelationship of comedy in contemporary American media and innovations at Second City, the Chicago-based comedy club, will be explored, as well as the theory and practice of improvisation as a technique for generating comic material and the varied relationships of performers, writers, and audiences in live theater, television, and film. (General Education Code(s): T4-Humanities and Arts, A.) *M. Foley*

80P. The Pixar Feature. *

Combines examination of the canon of Western dramatic literature and theater history through viewings of Pixar Animation Studios' full-length animated features, representing the most popular form of digital art and new media in the world today, and lectures focusing on digital art and new media viewed through established rules and traditions of dramatic art in literature, plays, and the theater. (General Education Code(s): T4-Humanities and Arts, A.) *D. Scheie*

80S. Theater Arts Education and the Community. *

This course is designed to develop ways in which we can direct our interest in the arts into concrete and successful community projects. Although the emphasis will be

on developing skills to work within K-12 classrooms, other community projects will be discussed and designed. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80U. Socks, Drugs, and Rock and Roll: American Costume Since 1950. *

This course is an introduction to American fashion and fashion designers from the 1950's to the present with special attention given to the influence of popular media on American costume since 1950, the beginning of rock and roll. Students cannot receive credit for this course and course 116B. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80V. The Circus in American Culture. *

Circus arts from their shamanic roots to contemporary practice will be analyzed in a historical, aesthetic, and creative dimension. Lecture, discussion, and demonstrations will explore the theory and practice of American circus arts. In section, students will explore basic circus skills from clowning to tumbling to exhibition of freaks. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80W. The Way Things Work and the Theater. *

Explores basics of mechanics and movement as applied to theatrical and non-theatrical realms. Utilizes textual materials as well as interaction with technology. Topics include structural elements, motion, energy, sound/light, their physical properties and how they interface with pre- and post-modern theater. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80X. The Performance of Story in Theater and Film. *

An examination of the theory and practice of theater and film, comparing and contrasting works that have been adapted from one genre to another. Lecture, film and video viewing and discussion of materialist, psychoanalytic, and feminist approaches will be shared. (General Education Code(s): T4-Humanities and Arts, A.) *P. Mostkoff*

80Z. Indian Dance. F

Classical Indian dance will be studied as a performance practice. Understanding of drum syllables and associated steps, religious and sociological context, and mimesis (abinaya) as well as introduction to epic stories (Ramayana, Mahbharata, Bhagavata Purana) and classical song. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

99. Tutorial. F,W,S

Students must file their petitions for this course with the department office by the end of the fifth day of instruction in the quarter in which they would like to take the tutorial.Prerequisite(s): petition required, approved by instructor and department. May be repeated for credit. *The Staff*

Upper-Division Courses

100A. Asian Theater/Dance and Global Impacts. F

Overview of selected theater/dance performance genres of India, Indonesia, China, Korea, and Japan with attention to how cultural, political, and social flows have impacted contemporary performance in Asia and beyond. Lectures supplemented by workshops. (General Education Code(s): A, E.) *M. Foley*

100B. Black Theater USA. *

Spanning slavery, emancipation, reconstruction, the great depression, civil rights, and the black power/black arts movements, course explores African American drama from literary, historical, and biographical perspectives in lecture/discussions, film excerpts, dramatizations, and visits from award-winning guests. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A, E.) *M. Booker*

100C. Courts, Courtesans, Shamans, and Clowns: Asian Drama. *

Asian court and popular performance are traced. Sanskrit drama is contrasted with Indian epic recitation, medium, and courtesan dance. Gender specialization is noted in Indonesian courts using Indian and local legends in dance, mask/puppetry, and clowning. Buddhist and Confucian impulses in Chinese theater and early Korean and Japanese mask and puppetry are introduced. Students are evaluated on participation, tests, writing, and a performance project. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A.) *M. Foley, P. Gallagher*

100G. Ancient and Classical Drama. *

Examines Western dramatic literature, theater history, and design from ancient Greece to the Renaissance, the Spanish golden age, and Elizabethan England. Looks at dramatic texts in their historical moments, bringing theater design and the function of performance into critical contexts. Major theoretical treatises, scripts, scenarios, background readings, and other texts are discussed in relation to the actual performance and staging practices of the period. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A.) *K. Jannarone, M. Gamel, P. Mostkoff*

100H. Ballet: A History. *

Chronological critical and historical overview of ballet from its origins in the 15th century to the present, fleshing out the sociological, aesthetic, and design (costume and set) aspects of ballet production from the courts to the bourgeois opera house and the independent impresario. Enrollment limited to 40. (General Education Code(s): A.) *M. Franko*

100I. Hemispheric and Trans-Atlantic Theater: Indigenous America. W

Considers theater of the Americas with attention to indigenous pre-Colombian roots as well as trans-Atlantic connections forged in Spanish use of performance in conquest and development of African-influenced arts in black communities. Includes use of art in national independence movements, civil-rights struggles, and continuing movement across borders of the Americas with links to Africa. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A, E.) *A. Martinez*

100L. Performance and Conquest. W

Looks at use of theater/performance in the U.S. and Latin America by the State, oppositional groups, and theater and performance practitioners to solidify or challenge structures of power beginning with pre-Colombian indigenous civilizations, 16th-century Spanish/European conquest, national independence movements, to the U.S. Latino diaspora. Prerequisite(s): course 61. (General Education Code(s): A, E.) A. Martinez

100M. Modern Drama. S

Examines modern theatrical experimentation from English Restoration through contemporary era. Major theoretical texts, scripts, and background readings establish critical contexts for analyzing modern performance and dramatic literature. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A.) *K. Jannarone*

104. Multimedia Authoring. *

Introduces students to basic tools for the creation of multimedia digital projects. Special attention is given to the integration of video, sound, graphics, text and virtual reality and to the creation and execution of strategies for interaction between users and the projects themselves. With this in mind, students design and create computer puzzles and games. Enrollment limited to 25. (General Education Code(s): A.) *J. Bierman*

105. Introduction to Digital Media Design. *

Introduction to digital media design for live theater. Primary focus on developing working understanding of Adobe Photoshop, Final Cut Pro, and DVD Studio Pro as applied to digital media design. Gives additional attention to theoretical questions raised by introduction of moving images in a theatrical space, visual composition, and editing practices. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

107. Design Studio: Masks and Makeup. *

Advanced work in the design and techniques of stage make-up and masks. Students are billed a materials fee. Prerequisite(s): course 10. Enrollment restricted to theater arts majors; open at the end of priority enrollment if space permits. Enrollment limited to 20. Offered in alternate academic years. *The Staff*

110. Advanced Stage Technology. *

An investigation into the intricacies of production, focusing on structural, spatial, and visual concepts, creation and execution of scenic units, drafting, and related areas of technology. Designed to facilitate in-depth studies of specific production problems. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

113. The History of Design for Theater. S

The development of scenic design from the Greek period to the present. Concentration is on the changing styles of set design in relation to the changing attitudes toward dramatic literature, art, and theater architecture. (General Education Code(s): A.) *The Staff*

114. Design Studio: Sound. W

The intangible and transitory nature of the acoustic reality. Electronically regenerated sounds for use in the performing arts. Broad scope of the course consideration begins with found sound and includes sound propagation. Emphasis on tape-recording, editing, sound control functions, and equipment utility. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

115A. Design Studio: Scenic Design. W

Advanced work in principles and theory of scenic design. Students are billed fa materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *K. Edmunds*

115B. Design Studio: Scenic Design B. S

Advanced theory and practice of theatrical set design. Prerequisite(s): course 115. (General Education Code(s): A.) *K. Edmunds*

116A. History of Clothing and Costume. F

Survey of clothing and theatrical costumes; emphasis on dress of the audience and actor in historical periods of theatrical activity. Students are billed a materials fee.

116B. American Costume Since 1950: Socks, Drugs, and Rock 'n' Roll. *

Introduction to American fashion and fashion designers from the 1950s to the present, with special attention given to the influence of popular media on American costume since 1950, the beginning of rock and roll. Students cannot receive credit for this course and course 80U. (General Education Code(s): A.) *The Staff*

117. Design Studio: Costume. W

Advanced principles and theory of costume design for theatrical productions. Enrollment by permission of instructor: see enrollment conditions in the quarterly *Schedule of Classes*. Students are billed for a materials fee. Enrollment by permission of instructor. May be repeated for credit. (General Education Code(s): A.) *B. Baron*

117A. Advanced Costume Construction. S

Advanced principles in costume construction, including tailoring, advanced pattern drafting, and draping techniques. Focuses on translating modern techniques into historical garment construction. Teaches how to study artifacts and do primary research to unlock the past. Prerequisite(s): course 17. Enrollment limited to 25. (General Education Code(s): A.) *N. Arnst*

118. Design Studio: Scene Painting. *

Emphasis on techniques used in painting scenery for the theater. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

119. Design Studio: Lighting Studio B. S

The theory and practice of lighting design with emphasis on practical application. Light plots, electricity, optics, design, and manipulation of lighting for the theater and related performance events are investigated. The student explores mechanics and aesthetics with hands-on experience. Students are billed a materials fee. Prerequisite(s): course 19. (General Education Code(s): A.) *D. Cuthbert*

121. Acting Studio II. W

Continuing concentrated work on basic acting skills and textual analysis through scene study. May be repeated for credit with consent of instructor. Prerequisite(s): admission by audition at first class meeting. See department office for more information. Course 21 recommended as preparation. May be repeated for credit. (General Education Code(s): A.) *The Staff, P. Gallagher, A. Martinez*

122. Indian Performance: Rama, Siva, Krishna. *

Study of the classical theater and dance of India, with attention to performance practice, aesthetic theory, relationship to religious practice devoted to Rama, Siva, and Krishna, political implications and intercultural experimentation. (General Education Code(s): IH, A.) *The Staff*

124. Movement for Performers. F

Awareness and extension of personal movement repertoire, through observation, movement experience, and exploration. (General Education Code(s): A.) *The Staff, P. Gallagher*

126. Acting Studio III. S

Individual work on acting skills and problems, with emphasis on individual interpretation and scene work with other students. Prerequisite(s): course 121; permission of instructor; audition at first class meeting—contact department office

for more information. Enrollment limited to 18. May be repeated for credit. (General Education Code(s): A.) D. Scheie, P. Gallagher, A. Martinez, P. Mostkoff

128. Choreographic Workshop. *

Intensive upper-division choreographic workshop that begins from the key motifs of historical dance to develop original work. Dancers made available to the student choreographers. Course is a prerequisite for the student-choreographed production *Random With a Purpose*. Enrollment limited to 15. (General Education Code(s): A.) *M. Franko*

129. Advanced Ballet (2 credits). *

Continued study of classical ballet technique as a serious, expressive art form. Work includes longer combinations, air work, and style study in a regular class routine. Audition at first class meeting. Students are billed a materials fee. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *The Staff*

130. Intermediate Modern Dance Theory and Technique. *

A progression from the simple phrasing and articulation of beginning technique class to more complex material requiring more acute perceptive skills and richer dynamic range. Emphasis is on both alignment and maintaining the kinetic integrity of the body while moving through space. Students are billed a materials fee. Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *The Staff*

131. Advanced Modern Dance Theory and Technique. *

Advanced instruction in developing the dancer's physical instrument, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *The Staff*

131C. Dance Studio II. W,S

Continued study of contemporary dance theory and practice. Focus on intermediate dance technique, individual and group movement invention, choreographic voice, and theatrical applications. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): A.) *E. Warburton*

131P. Postmodern Dance II. *

Continued study of postmodern dance theory and technique. Focus on advanced compositional practice, theatrical applications, and critical analysis of contemporary postmodern dance choreographers in the U.S. and worldwide. Audition at first class meeting. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

132. Modern Dance Studio (2 credits). *

Instruction in developing the dancer's physical instrument, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

135. Dance Improvisation and Theory. *

Exploring sources for movement; gaining facility in a wide range of movement elements; working in ensemble and solos. Students are billed a materials fee. (General Education Code(s): A.) *E. Warburton*

136. Intermediate Ballet. *

Continued study of classical ballet technique as a serious expressive art form. Work includes longer combinations, air work, and style study (Baroque and Romantic) in a regular class routine. Class also involves viewing, reading, and review writing. Students are billed a materials fee. Prerequisite(s): course 32 or permission of instructor. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

136C. Dance Studio III. W

Advanced study of contemporary dance theory and practice. Focus on dance performance, creative process, and choreographic form in a contemporary style. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

137. Studies in Performance (Dance). S

Studies in dance, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. May be repeated for credit with consent of instructor. Students are billed a materials fee. Admission by audition held late winter quarter; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *M. Franko, E. Warburton*

138. Movement Research in New Arts Praxis. *

Work at the intersection of creative and research practices, focusing on experimental forms of movement theater, applications in digital arts and new media, and critical analysis of the arts in society. Collaborative, interdisciplinary performance projects required. Audition/interview at first class meeting. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

139. Random: With a Purpose. W

Participation in a student-choreographed and directed dance concert under faculty supervision. Rehearsals culminate in public performances. Students are billed a materials fee. Auditions to be held on the first day of class. May be repeated for credit. (General Education Code(s): A.) *M. Franko, E. Warburton*

141. Play Direction Studio I. S

Basic studio exploration through scene problems and exercises of the development of directing principles. Intensive work on the director's pre-rehearsal work from text selection, analysis, and casting. Audition at first class. Enrollment limited to 20. *K. Jannarone*

142. Play Direction Studio II. *

Intensive studio exploration of the art and craft of directing. Primary focus on text analysis, collaboration with designers, developing a point of view and visual/auditory language for the play, staging techniques, and communication techniques with actors. Prerequisite(s): course 40, 141, or permission of instructor. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

151. Studies in Performance (Drama). F,W

Studies in theater, taken in connection with participation in a Theater Arts Department sponsored production. Enrollment is limited to those persons chosen to take part in a particular production. Admission by audition; audition schedule to be announced at first class meeting. May be repeated for credit. (General Education

155. Workshop Experiments in Performance. W

A process-oriented investigation of specific playwrights or theatrical styles consisting of work which may culminate in a final production. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *The Staff*

156. Play Development Workshop. *

"Hands on" study and exploration of the process of developing a new script from the perspective of the playwright, the actor, and the director. Students enrolling in this course as playwrights are selected on the basis of submissions turned in the previous quarter. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. *The Staff*

157. Playwriting. F

Students are given the opportunity to write their own scripts and refine them as the result of class discussion and scenework with actors. Work is on specific problems involving such elements as the structuring of a plot or the development of character. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

158. Chautauqua Workshop. S

Advanced course that provides directors, writers, and performers with an opportunity to develop new works in performance. Students enrolling in this course as playwrights are selected on basis of submissions turned in the previous quarter. Students are billed a materials fee. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. *The Staff*

159. Advanced Playwriting. W

A study, through practice, of the constituent elements in the construction of a drama. Students concentrate, in particular, on the organization of complex plots, the expression of character through conflict, and maximizing the emotional impact of dramatic situations. Prerequisite(s): course 157 or equivalent, satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

160. Dramatic Theories. W

An examination of the theories of acting and directing from the 19th century to our own time, starting with the classic theater and concentrating on the 20th-century debate centered in Stanislavski and Brecht, Grotowski, and Robert Wilson. Prerequisite(s): course 60A, 60B, and 60 C. This course must be taken prior to student's senior year; required for course 185. (General Education Code(s): A.) *P. Mostkoff*

161. Theater, Literature, and History.

161C. The Theater and Drama of Renaissance Europe. F

An examination of selected plays from Renaissance Europe (1580-1680, Italy, Spain, and France) from an explicitly theatrical viewpoint which will include practical scene study. Covers Renaissance theater buildings and some related critical materials. Offered in alternate academic years.

(General Education Code(s): A.) P. Whitworth

161D. Asian Theater: An Anthropological Approach. *

Art serves simultaneously to educate its audience to the group's traditional values and to test new ideas. Indian, Indonesian, and Japanese forms are studied in relation to their cultural context. Through videotapes, lecture demonstrations, performances, and scenework, students explore the forms. Offered in alternate academic years. (General Education Code(s): A, E.) *M. Foley*

161M. Sexuality, Gender, Drama, and Performance. F

Exploration and analysis of the interrelationships between gender, sexuality, and performance on stage and on the page. Topics include gender and homosexuality in the history of performance and dramatic literature, drag, queer Shakespeare, closet drama, same-sex performance conditions (e.g., Greece) vs. dual-gendered (e.g., Restoration England). Combines study of theoretical texts and script with analysis and practice. (Formerly *Gender and Performance*.) (General Education Code(s): A.) *D. Scheie*

161P. Theater in the "Chicano Power" Movement. *

Covers the rise of Teatro Chicano as a cultural–political force within the 1960's "Chicano Power" Movement starting with founding playwriter Luis Valez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez. (Also offered as Latin American&Latino Studies 161P. Students cannot receive credit for both courses.) (General Education Code(s): A, E.) *A. Martinez*

1610. Queer Theatricks: Representations and Sensibilities. *

An examination of the idea, form, and significance of queer/gay sensibility and representation in the English-speaking theater from the Renaissance to the present. (General Education Code(s): A.) *The Staff*

161R. Theater of American Cultures. *

Interrelationship of ethnicity and the rise of significant American theater groups including the black theater movement, Chicano Teatro, and Asian American theater will be shared via lecture, viewing, and discussion. (General Education Code(s): A, E.) *A. Martinez*

161S. American Drama: Politics and Theater. *

The dream of group theater, a long-term partnership of actors, directors, and playwrights, has fueled extraordinary and exciting change in the 20th-century American theater theory and practice. We examine ten exemplary manifestations of this dream. (General Education Code(s): A.) *The Staff*

161T. Women in Theater. S

Explores 20th-century American female playwrights from textual, historical, and multicultural perspectives. The course progresses from Trifles (1916) through the Harlem Renaissance, Broadway's Lillian Hellman, and today's post-Feminist theatrical explosion in lectures, films, dramatizations, and award-winning playwrights' visits. (General Education Code(s): A.) *The Staff*

161U. Performance of Story in Theater and Film. *

Examination of theory and practice of theater and film comparing and contrasting works having been adapted from one genre to another. Lecture, film, and video viewing. Discussions of materialist, psychoanalytic, and feminist approaches shared. Students cannot receive credit for this course and course 80X. (General Education Code(s): A.) *P. Mostkoff*

161V. The Broadway Musical. *

Studies musical comedy as a distinctly American contribution to theater and film through scripts, scores, and film and video viewing. Analyzes European backgrounds, the relationship of Broadway musicals and Hollywood film in the studio era, works of Rogers and Hammerstein, and Sondheim, and changes in popular music from blues to rock to Disney musicals. (General Education Code(s): A.) *D. Scheie*

161W. Critical Survey of Commercial Design, 1900 to Present. W

Provides familiarity with visual cues for theater directors, performers, and visual artists. Addresses the history of commercial design from 1900 to the present through the eyes of the Western consumer, and traces the design movements that represented mainstream and alternative cultures with special attention to graphic, fashion, and interior design trends. Prerequisite(s): course 10; and course 60A or 60B or 60C or 61. (General Education Code(s): A.) *B. Baron*

161Y. Modern Ancient Drama. *

Studies 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, O'Neill, Graham, Pasolini, and Breuer, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Enrollment limited to 30. (General Education Code(s): A.) *M. Gamel*

162. Public Space/Public Sphere: The Performance of Public Art in 20th Century America. F

Examines phenomenon of public art as a performative phenomenon in the 20th century. Begins with the theory of the public sphere in the work of Jurgen Haberman and social space in the work of Henri Lefebvre. Concludes with the popular phenomenon of public art in the 1980s and the demise of the NEA by the later 80s with the scandals of the NEA Four. (General Education Code(s): A.) *M. Franko*

163. Special Studies in Individual Playwrights.

163A. Shakespeare. *

Focuses on selected plays of Shakespeare. Explores the range and variety of interpretations of the plays, both in critical writings and in performance. Also studies other writings and graphic art created on the subjects and themes of the plays. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

163E. Chekhov and His Impact. *

Delves into the work of Chekhov and the Moscow art theater. Through scene work Stanislavski's acting techniques are related to the scripts. The impact on later Russian innovators, especially Meyerhold, and on the American theater is considered. (General Education Code(s): A.) *The Staff*

163G. Special Studies in Playwrights: Artaud. *

Antonin Artaud through three critical lenses: influence on modern and contemporary theater, subject and site of psychoanalytic and social criticism, and theater practitioner. Exercises cultural, historical, and analytic approaches to his work. Prerequisite(s): course 60C; course 160 recommended. Enrollment limited to 40. (General Education Code(s): A.) *K. Jannarone*

164. Issues in Dance History and Theory. *

A research seminar. Topics range from problems in dance aesthetics, criticism, or theory to particular movements, periods, or the work of a choreographer. (Formerly course 133.) Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *M. Franko, E. Warburton*

165. Introduction to Dance Modernism. F

Rare historical footage and the writings of famous choreographers provide an overview of 20th-century dance within the perspective of modernism. Topics include romanticism, "natural" dance, Orientalism, Ausdruckstanz, "industrial" dance, American modern dance and neo-classicism, chance procedure, postmodernism, and the avant-garde commodity marketplace. (Formerly course 134.) (General Education Code(s): A.) *M. Franko, E. Warburton*

170. Design Seminar (2 credits). F

Seminar to help advanced designers seque from student to professional. Topics to include portfolio construction, interview styles, guest speakers, and more. Enrollment restricted to senior and graduate students in Theater Arts. May be repeated for credit. *D. Cuthbert, K. Edmunds*

185. Senior Seminar. W

A required seminar for majors involving readings and discussions of important texts in dance, design, and drama. Prerequisite(s): course 160. *The Staff*

190. Group Projects. F,W,S

Prerequisite(s): petition required, approved by instructor and department. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See courses 42 and 45). Petition required, approved by instructor and department. *The Staff*

193. Proseminar. *

Exposes students to an aspect of the theory or practice of theater arts. Visiting scholars share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

193F. Proseminar (2 credits). *

Exposes students to an aspect of the theory or practice of theatre arts. Visiting lecturers share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

290. Special Topics and Area Concentration. F

Study group meetings on a regular basis which involve either the study of shared texts or presentations by the group members and invited guests. Enrollment restricted to graduate students in theater arts. May be repeated for credit. *The Staff, D. Cuthbert, M. Franko*

291. Field Study. F,W,S

Student-designed and conducted research carried out in field settings. A brief prospectus must be filed with the department office before undertaking the research, and a brief final report of activities must be filed upon return. Course intended for students with graduate standing in theater arts. Petition required, approved by instructor and department. *The Staff*

292. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Course intended for graduate students in theater arts. Petition required, approved by instructor and department. *The Staff*

297. Independent Study. F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

297F. Independent Study/Graduate (2 credits). F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. Enrollment restricted to graduate students in theater arts. May be repeated for credit. *The Staff*

Writing Program

166 Kresge College (831) 459-2431

http://humwww.ucsc.edu/writing/index.html

Changes to 2006-08 Catalog Highlighted | Faculty | Course Descriptions

Program Description

The campuswide Writing Program currently offers courses designed to help lower-division students become more competent and confident writers of prose. The courses offered through this program teach skills of grammar and organization and strategies of invention, composition, and editing. These courses approach writing as one of the most important ways we have of making discoveries about ourselves and the world around us and of communicating these insights to others.

Together with the colleges, the Writing Program administers the writing component of the campus general education requirements. It also administers the Entry-Level Analytical Writing Requirement (formerly known as Subject A), advises students about ways to fulfill these requirements, and offers courses that satisfy the "C" and "C2" general education requirement. Writing instructors in each college participate in that college's core course and counsel its students about their writing.

The Writing Program has offered two minors, a minor in journalism and a minor in communication and rhetoric, though both are suspended at this time. The program generally offers two or three writing-intensive (W) courses during Summer Session each year. It also offers instruction in the theory and practice of teaching writing for graduate students and peer tutors during the academic year.

Courses in creative writing are offered through the Literature Department.

Writing Program

166 Kresge College (831) 459-2431 http://humwww.ucsc.edu/writing/index.html

Program Description | Changes to 2006-08 Catalog Highlighted | Faculty

Lower-Division Courses

1. Composition and Rhetoric. F,W,S

A basic composition course, which helps students find specific, practical ways of improving every aspect of their writing, through a broadly based consideration of the nature of language from a diversity of perspectives. Prerequisite(s): satisfaction of the Entry Level Writing requirement. Enrollment limited to 25. (General Education Code(s): C.) *The Staff*

2. Rhetoric and Inquiry. F,W,S

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Students develop specific, practical ways of improving their writing through sustained critical thinking about diverse issues from multiple points of view. Students cannot receive credit for this course and course 1. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment limited to 25. (General Education Code(s): C2.) *The Staff*

11A. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). F

A tutorial designed to provide follow-up assistance in writing for students who have passed the Subject A requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing requirement. May be repeated for credit. *The Staff*

11B. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). W

A tutorial designed to provide follow-up assistance in writing for students who have passed the Subject A requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing requirement. May be repeated for credit. *The Staff*

11C. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). S

A tutorial designed to provide follow-up assistance in writing for students who have passed the Subject A requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing requirement. May be repeated for credit. *The Staff*

20. The Nature of Written Discourse. W

Explores the dynamics of written language: its relationships to speech, thought, and

culture; its uses in different personal, academic, professional, and public contexts; its abuses in jargon and propaganda. Course work includes extensive practice in different kinds of writing. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

21. Meaning and Style: The Sentence in Context. S

Explores, via cross-cultural readings, the nature, uses, and abuses of language. Course work includes extensive writing, both take-home and in-class. Emphasis on revising for power of expression and for variety and accuracy at the sentence level. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

22A. Grammar and Editing Workshop (3 credits). F

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for entering first-year students. Enrollment limited to 22. *D. Scripture, N. Krusoe*

22B. Grammar and Editing Workshop (3 credits). F

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for continuing students who have already taken course 20 and/or 21. Enrollment limited to 22. *The Staff*

23. Grammar and Rhetoric: Language for Writing. F

Builds on writing skills gained in previous writing courses; focuses on effective language use in academic writing. Students reinforce their written English proficiency by reading, studying, practicing, and writing structures and patterns of written English. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

64. Newswriting Workshop. *

Introduction to the basic techniques of newswriting, including practice in leads, formats, and different kinds of news reporting. Emphasis on developing skills in research, interviewing, and shaping stories. Includes an examination of the contemporary media. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, instructor determination at first class meeting. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

70. Communication and Rhetoric: An Introduction. *

This course introduces the field of contemporary communication studies, locating its roots in rhetoric and showing how key concepts play out in mass media and other settings as well as in everyday life. Prerequisite(s): satisfaction of the Entry Level Writing requirement. *R. Spafford*

93. Field Study. F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of the Entry Level Writing requirement; certification of adequate preparation; approval of Writing Program. May be repeated for credit. *The Staff*

93F. Field Study (2 credits). F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

101. Introduction to the History, Theory, and Practice of Rhetoric. *

A survey of classical and contemporary ideas about rhetoric which explores, practically and theoretically, "the best means of persuasion in any situation whatsoever" and will consider the nature of human discourse in diverse areas of knowledge. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *C. Freeman*

102. The Rhetoric of the Social Sciences. *

Develops rhetorical facility in disciplinary writing for upper-division social science majors. Requires critical and disciplinary reading, writing in modes appropriate to social science disciplines, and a substantial research or critical paper within the student's own discipline. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *M. Baker*

103. Rhetoric of the Natural Sciences. *

This course explores writing genres within the natural sciences. Emphasis is on the relationships between good science and good writing, clear thinking and clear writing. Frequent papers and substantive revisions required. Prerequisite(s): completion of 10 units coursework in the natural sciences, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors during priority enrollment. Enrollment limited to 30. (General Education Code(s): W.) *S. Parmeter*

104. Writing in the Arts. *

A writing course focusing on the purposes and composition of various genres of writing about and in the performing arts, visual arts, and music such as reviews, program and exhibit notes, journal and magazine articles, grant proposals, and press releases. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. (General Education Code(s): W.) *E. Abrams*

106. Public Speaking. *

Students learn strategies to write, analyze, and deliver effective speeches of various kinds as well as professional presentations using PowerPoint and other visuals. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. *J. Wilson*

107. Technical and Business Writing: An Overview. *

An exploration of the conventions and formats of business and technical writing. Course work involves writing effective resumes, proposals, letters, end-user manuals, and the fundamentals of Web site design. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. *The Staff*

108. Electronic Communication. *

An introduction to the evolving conventions of effective Web site design as well as collaborative writing. Course work includes evaluation of Web site content and structure and creation of hypertext. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 24. *The Staff*

109. Argument and Practical Reasoning. *

An investigation of contemporary persuasive discourse with special attention to the elements and forms of argument, the nature of evidence, questions of validity and probability, and the workings of rhetorical reasoning. Emphasizes the analysis of arguments rather than their construction. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *J. Wilson*

110A. Writing in the Professions. *

Study of writing required in the selected professions, including law, politics, and government. Considers the rhetoric of each discipline and relevant texts. Includes lectures from visiting professionals and a series of writing assignments based on reading and research. Topic may vary from year to year, focusing on the rhetoric of other professional divisions: medicine, engineering, economics, and so forth. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. (General Education Code(s): W.) *T. Fitzmaurice*

120. Editing English Prose. *

This course offers extended, detailed instruction in editing one's own and other people's prose for accuracy, clarity, appropriateness, and effectiveness. It provides some history of theories of style and stylistic analysis, and instruction in prose variation according to social context. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *D. Scripture*

128. Latino Media in the U.S. *

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role the media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor. (Also offered as Latin American&Latino Studies 128. Students cannot receive credit for both courses.) *The Staff*

159. Grammar for Tutors and Teachers (3 credits). W

English grammar from a pedagogical perspective, emphasizing structures, patterns,

and conventions of written English that commonly challenge basic writers. Students learn strategies for helping multilingual and other writers improve their writing skills by increasing their awareness of grammar. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. *M. Freeman*

161. Academic Writing and Research Methods. *

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. Course 161A is either a section for re-entry women or a section for students in the EOP Faculty Mentor Program. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

161A. Academic Writing and Research Methods. *

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. Course is either a special section in fall designed specifically for re-entry women (entry into this section requires instructor determination of qualifications at the first class meeting) or a special section designed for students in the EOP Faculty Mentor Program. Prerequisite(s): interview only and satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

163. Advanced Workshop in Expository Writing. *

A composition course for students who, having mastered basic writing skills, wish to concentrate on increasing their effectiveness as rhetoricians, prose stylists, and editors. Assignments include writing and revising essays, responding to other students' work, and reading published essays. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 22. May be repeated for credit. (General Education Code(s): W.) *D. Arthur*

165. Practicum in Reporting. *>

In-depth, community-based reporting, with an emphasis on skills ranging from interviewing techniques to profiles, integrating research with writing. Students choose a specific area or "desk" of concentration, and all the stories reflect that beat. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; a writing sample, completed in class, is required at first class meeting. Enrollment restricted to journalism minors during priority enrollment. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166. Topics in Journalism.

Courses under this heading explore fields of newspaper and magazine journalism: feature writing, investigative reporting, reviewing, commentary, etc. Students study published writing and hone their own skills as writers under the supervision of a practicing journalist. See the *Schedule of Classes* for specific offerings. *The Staff*

166A. Magazine Writing. *

Introduces students to the various forms of magazine writing?as well as to pertinent reporting techniques. Students work intensively on process, style, and editing, producing numerous formal and informal pieces. Enrollment priority will be given to journalism minors. Students produce a writing sample on the first day of class. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements;

course 64 or permission of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166B. Investigative Reporting. *

Students acquire basic investigative and research skills, with particular emphasis on how to develop investigative subjects, obtain data, check accuracy, and convert information into well written, publishable articles. Priority given to students concentrating in journalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review journalism portfolio. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166D. Minorities in Journalism. *

Focuses on the minority press and how it has shaped journalism in the U.S. as well as viewing how the media has dealt with this segment of our society. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and consent of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166J. Online Journalism. *

A course in using electronic sources to report articles for publication and in publishing journalistic pieces online. Prerequisite(s): course 64 or journalism experience; instructor determination at first class meeting. Enrollment limited to 25. *The Staff*

166N. The Rhetoric of Radio. *

Examines the theory and practice of radio. Students explore how the formats of radio create its meaning, and investigate radio's place in the landscape of the media, particularly in the U.S. and Mexico. Prerequisite(s): satisfaction of the Entry level Writing and Composition requirements and consent of instructor. Enrollment limited to 25. *The Staff*

167. Making the News. *

A writing course examining news and feature articles in popular print media. Students write their own articles and analyze how a particular content is mandated by conventional forms, by the structure of the industries, and by ideas of "newsworthiness." Designed for journalism minors and students for whom a course in media criticism is central to their program. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; qualifications determined by instructor at first class meeting. Enrollment limited to 43. (General Education Code(s): W.) *The Staff*

169. Theory and Practice of Tutoring Writing. F

An introduction to theory and research on the composing process and practical strategies for teaching writing, especially in tutorial situations. Recommended for writing assistants. Prerequisite(s): instructor determination at first class meeting; course intended for writing tutors only. Enrollment limited to 30. *M. Baker, R. King*

180. Seminar in Editing and Publishing. F,W,S

Newswriting seminar for *City on a Hill* editors and writers. Weekly sessions evaluate newspaper in depth, including writing, reporting, and issues in journalism ranging from ethics to legal questions. Prerequisite(s): instructor determination at first class meeting; open only to editors, interns, and writers at City on a Hill Press. Enrollment limited to 40. May be repeated for credit. *The Staff*

189. Methods of Teaching Writing. F,W,S

Supervised by a writing instructor, each students attends a weekly seminar on teaching writing and either assists in a class or serves as a facilitator of a small writing group in a course at UCSC or a public school. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191. Internships.

Individual work in journalism, publishing, or broadcasting. Internships require a contracted amount of writing or other work, and generally involve group tutorials with faculty in the Writing Program as well as individual conferences. *The Staff*

191A. Internship in Writing. F,W,S

Regular writing for newspaper or magazine. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191B. Internship in Editing. F,W,S

Work in an editorial position involving critique and guidance of reporters. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191C. Internship in Publishing. F,W,S

All phases of work for a publishing house, from manuscript reading to editorial. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191D. Internship in Broadcasting. F,W,S

Writing, editing, scheduling, and/or broadcast work for television or radio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193. Field Study. F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. *The Staff*

193F. Field Study (2 credits). F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A writing, editing, or publishing project undertaken by a small group of students under the direct supervision of a writing instructor. Students submit petition to sponsoring agency. Enrollment limited to 15. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

Individual work on a thesis for any campus major or individual major. Faculty in the Writing Program help students on all phases of work, from selection and focus to development of bibliographies, research techniques, revision, and editing. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

202. Writing and Learning Seminar (3 credits). *

Strategies for teaching assistants to help undergraduates become better learners and writers in disciplinary courses. Topics include using writing to improve reading and thinking, analysis of assignments, avoiding plagiarism, responding to and evaluating papers, ESL writers, peer response, and technological aids. Enrollment restricted to graduate students. Enrollment limited to 30. *D. Scripture*

203. Teaching Writing. S

Prepares graduate students to teach Writing 1 at UCSC and elsewhere. Development of a syllabus, teaching strategy, and class plans based on study of composition and rhetorical theories, research on students' writing development, and effective writing pedagogies. Enrollment restricted to graduate students. Enrollment limited to 18. *E. Abrams*

* Not offered in 2007-08

Appendix

Please note that sections under this topic that contained no changes from the General Catalog 2006-08 are not included. For the complete section, go to 2006-08 Appendix.

To read an updated copy of this page without strikeouts, see 2007-08 Appendix, finalized copy.

Appendix A: California Residency and Nonresident Tuition Fee

Note: Effective Spring 2005, registered domestic partners are included in rules that apply to spouses.

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence do not meet the University of California requirements for residence for tuition purposes on the determination date for each term in which you propose to attend the university, you must pay a Nonresident Tuition Fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Note: Effective Spring 2005, registered domestic partners are included in rules that apply to spouses.

Who Is a Resident?

If you are an adult student (at least 18 years of age), you may establish residence in California if:

- (1) You are a U.S. citizen.
- (2) You are a permanent resident or other immigrant.
- (3) You are a nonimmigrant who is not precluded from establishing a domicile in the U.S. This includes nonimmigrants who hold valid visas of the following types: A, E, G, H-1, H-4, I, K, L, O-1, O-3, R, or V.

To establish residence you must be physically present in California for more than one year, and you must come here with the intent to make California your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residency, regardless of the length of stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. Your residence cannot be derived from your spouse nor, since you are an adult, from your parents. Likewise, a registered domestic partner does not derive residence from the other registered domestic partner.

Requirements for Financial Independence

Effective fall 1993, if your parents are not residents of California, if you are not financially dependent upon a parent who meets the university's requirements for residence for tuition purposes, you are required to be financially independent in order to be a resident for tuition purposes. You are considered "financially independent" if one or more of the following applies:

(1) You are at least 24 years of age by December 31 of the calendar year of the

term for which you are requesting resident classification.

- (2) You are a veteran of the U.S. Armed Forces.
- (3) You are a ward of the court or both parents are deceased.
- (4) You have legal dependents other than a spouse or a registered domestic partner.
- (5) You are married, a registered domestic partner, or a graduate student or a professional student, and you were not/will not be claimed as an income tax deduction by any individual other than your spouse or domestic partner for the tax year immediately preceding the term for which you are requesting resident classification.
- (6) You are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year.

Note: Financial independence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in university-administered funds (e.g., grants, stipends, fellowships) for the term for which resident classification is sought.

Establishing Intent for California Residency

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California identification card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which a home in California where you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim California residence can also serve as an indication of your intent. Documentary evidence is required and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the university is not in session.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing domicile in the U.S., you may establish your own residence when both parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational/intent requirement.

Specific Rules Applying to Minors

- (1) **Parent of minor moves from California.** You may be entitled to resident status if you are a minor <u>and a U.S.</u> citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if:
 - (a) you remained in California after your parent(s) departed;
 - (b) you enrolled in a California public postsecondary institution within one year of your parent(s)' departure; and
 - (c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.
- (2) **Self-support**. You may be entitled to resident status if you are <u>a minor and a</u> U.S. citizen or eligible alien and a minor and a mi
 - (a) you lived in California for the entire year immediately preceding the residence determination date;
 - (b) you have been self-supporting for that year; and
 - (c) you intend to make California your permanent home.

(3) **Two-year care and control**. You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

You may be entitled to an exemption from nonresident tuition if one of the following applies to you. Some of the exemptions are for a limited period of time. Check with the Campus Residence Deputy for more information:

- (1) Member of the military; spouse, registered domestic partner, or any other dependents of military personnel. A student who is a member of the U.S. military stationed in California on active duty, unless assigned for educational purposes to a state-supported institution of higher education; the spouse, registered domestic partner, or natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until the student has lived in California long enough to become a resident.
- (2) Child, spouse or registered domestic partner of a faculty member. To the extent that university funds are available, a student who is the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of a University of California faculty member who is a member of the Academic Senate.
- (3) Child, spouse or registered domestic partner of a university employee. A student who is the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of a full-time employee of the University of California who is permanently assigned to work outside the state of California (i.e., Los Alamos National Laboratory).
- (4) Child, spouse or registered domestic partner of a deceased public law enforcement or fire suppression employee. A student who is a child, spouse or registered domestic partner of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties.
- (5) **Dependent child of a California resident.** A student who has not been an adult resident for more than one year and is the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to residence determination date. The student must also maintain full-time attendance in a California public postsecondary institution. The exemption is available until the student has lived in California long enough to become a resident.
- (6) Graduate of a California school operated by the Federal Bureau of Indian Affairs (B.I.A.). A student who is a graduate of a California school operated by the B.I.A. (i.e., Sherman Indian High School) and who enrolls at the University of California.
- (7) **Employee of California public school district**. A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position may be exempt from nonresident tuition.
- (8) Student athlete in training at U.S. Olympic Training Center, Chula Vista. An amateur student athlete in training at the U.S. Olympic Training Center in Chula Vista may be exempt from nonresident tuition until he or she has resided in California the minimum time necessary to become a resident.
- (9) **Graduate of California high school**. A student who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition. You are not eligible for this exemption if you are a nonimmigrant alien.
- (10) **Congressional Medal of Honor recipient.** An undergraduate student under age 27 who is the recipient of the Congressional Medal of Honor or a child of a recipient who at the time of his or her death was a California resident.
- (11) Surviving dependent of California resident killed in 9/11 terrorist attacks. Undergraduate student who is the surviving dependent of a California

resident who was killed in the 9/11/01 terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93.

Temporary Absences

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. Students who are in the state solely for educational purposes will not be classified as residents for tuition purposes regardless of the length of their stay.

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or on your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

- (1) Continue to use a California permanent address on all records educational, employment, military, etc.
- (2) **Continue to satisfy California tax obligations.** If you are claiming California residence, you are liable for payment of income taxes on your total income from the date that you establish your residence in the state, including income earned in another state or country.
- (3) Retain your California voter's registration and vote by absentee ballot.
- (4) Maintain a California driver's license and vehicle registration. If it is necessary to change your driver's license or vehicle registration, you must change them back within the time prescribed by law.

Petitioning for Change of Classification

You must petition in person at the Office of the Registrar for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which you intend to be classified as a resident.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, you will have until the end of the applicable term to provide it.

Incorrect Classification

If you are incorrectly classified as a resident, your classification will be corrected and you will be required to pay the nonresident tuition you have not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the residence deputy, Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, (831) 459-2754, or to the Principal Administrative Legal Analyst—Residence Matters, Office of the General Counsel, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. No other university personnel are authorized to supply information relative to residence requirements for tuition purposes.

You are cautioned that this summary is not a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the Principal Legal Analyst within 30 days of notification of the residence deputy's final decision.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)–(d) of the Regents of the University of California) for determining whether or not you are a legal resident for tuition purposes. You have the right to inspect university records containing the residence information requested on this form. The records are maintained by the Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, (831) 459-2754.
