154. Feedback Control Systems. F

Analysis and design of continuous linear feedback control systems. Essential principles and advantages of feedback. Design by root locus, frequency response, and state space methods and comparisons of these techniques. Applications. Prerequisite(s): course 103. Enrollment restricted to School of Engineering and Division of Physical and Biological Sciences majors or permission of instructor. Enrollment limited to 30. *P. Milanfar, P. Mantey, J. Rosen, W. Dunbar, G. Elkaim*

157. RF Hardware Design. W

Engineering design cycle for wireless and RF systems: design, practical hardware implementation, and prototype. Prerequisite(s): courses 101/L, 103, and 171, and Computer Engineering 174; or consent of instructor. Concurrent enrollment in course 157L is required. Enrollment limited to 30. *K. Pedrotti, S. Petersen*

157L. RF Hardware Design Laboratory (2 credits). W

Laboratory to accompany course 157, emphasizing

hardware-design practice and principles applies to RF apparatus. Students design and implement a substantial final project during the last half of the course. Students are billed a materials fee. Prerequisite(s): courses 101/L, 103, 171, and Computer Engineering 174; or consent of instructor. Concurrent enrollment in course 157 is required. Enrollment limited to 30. *K. Pedrotti, S. Petersen*

171. Analog Electronics. S

Introduction to (semiconductor) electronic devices. Conduction of electric currents in semiconductors, the semiconductor p-n junction, the transistor. Analysis and synthesis of linear and nonlinear electronic circuits containing diodes and transistors. Biasing, small signal models, frequency response, and feedback. Operational amplifiers and integrated circuits. Prerequisite(s): course 101/L; previous or concurrent enrollment in course 171L required. *C. Gu, W. Liu, A. Shakouri, K. Pedrotti*

171L. Analog Electronics Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 171. One two-hour laboratory session per week. Students are billed a materials fee. Prerequisite(s): courses 101/L; previous or concurrent enrollment in course 171 required. *C. Gu, W. Liu, A. Shakouri, K. Pedrotti*

172. Advanced Analog Circuits. S

Analog circuit design covering the basic amplifier configurations, current mirrors, differential amplifiers, frequency response, feedback amplifiers, noise, bandgap references, one- and two-stage operational amplifier design, feedback amplifier stability, switched capacitor circuits and optionally the fundamentals of digital-to-analog and analog-to-digital converters. Emphasis throughout will be on the development of approximate and intuitive methods for understanding and designing circuits. Cannot receive credit for this course and course 221. Prerequisite(s): course 171. *W. Liu, K. Pedrotti*

175. Energy Generation and Control. S

Introduces electrical energy generation, sensing, and control, emphasizing the emerging smart grid. Topics include 3-phase AC power systems, voltage and transient stability, fault analysis, grid protection, power-flow analysis, economic dispatch, and high voltage DC distribution (HVDC). Prerequisite(s): course 101. Concurrent enrollment in course 175L required. *J. Balachandra*

175L. Energy Generation and Control Laboratory (2 credits). S

Computer analysis and simulation of energy generation, components, power-flow analysis, systems, and control covering topics from course 195. Weekly computer simulations reinforce the concepts introduced in course 175. Prerequisite(s): course 101. Concurrent enrollment in course 175 required. *J. Balachandra*

176. Energy Conservation and Control. F

AC/DC electric-machine drives for speed/position control. Integrated discussion of electric machines, power electronics, and control systems. Computer simulations. Applications in electric transportation, hybrid-car technology, robotics, process control, and energy conservation. Prerequisite(s): courses 103 and 171. Concurrent enrollment in course 176L is required. *J. Balachandra*

176L. Energy Conversion and Control Laboratory (2 credits). F

Simulink-based simulations of electric machines/drives in applications such as energy conservation and motion control in robotics and electric vehicles. Prerequisite(s):

courses 103 and 171. Concurrent enrollment in course 176 is required. *J. Balachandra*

177. Power Electronics. W

Switch-mode power electronics. Switch-mode DC power supplies. Switch-mode converters for DC and AC motor drives, wind/photovoltaic inverters, interfacing power electronic equipment with utility systems. Power semiconductor devices, magnetic design, electromagnetic interference (EMI). Prerequisite(s): courses 103 and 171. Concurrent enrollment in course 177L is required. *J. Balachandra*

177L. Power Electronics Laboratory (2 credits). W

Simulink-based simulations with power electronic devices and systems in applications such as energy conservation and motion control in robotics and electric vehicles. Prerequisite(s): courses 103 and 171. Concurrent enrollment in course 177 is required. *J. Balachandra*

178. Device Electronics.

This course reviews the fundamental principles, device's materials, and design and introduces the operation of several semiconductor devices. Topics include the motion of charge carriers in solids, equilibrium statistics, the electronic structure of solids, doping, the pn junction, the junction transistor, the Schottky diode, the field-effect transistor, the light-emitting diode, and the photodiode. Prerequisite(s): courses 145/L and 171/L. Enrollment restricted to School of Engineering and Division of Physical and Biological Sciences majors or permission of instructor. *C. Gu, W. Liu, K. Pedrotti*

180J. Advanced Renewable Energy Sources. S

Provides a comprehensive overview of renewable energy sources. Fundamental energy-conversion limits based on physics and existing material properties discussed. Various sources and devices, such as solar, wind, hydro-power, geothermal, and fuel cells described. Solar- and wind-site assessment, as well as biofuel energy balance, also discussed. Key scientific and economic roadblocks for large-scale implementation examined. Finally, the latest research on application of nanotechnology to energy conversion and storage introduced. Taught in conjunction with course 80J. Prerequisite(s): Mathematics 3 or Applied Mathematics and Statistics 3, 5 or 7. Enrollment limited to 30. *A. Shakouri*

183. Special Topics in Electrical Engineering. W

Topics vary with instructor. Sample topics include smart grids, bioelectronics, antennas, etc. Enrollment by instructor permission. Approval of undergraduate adviser required for credit as an upper-division elective. May be repeated for credit. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the electrical engineering program and a willing sponsor at the field site and using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not normally be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the electrical engineering program and a willing sponsor at the field site and using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not normally be repeated for credit. *The Staff*

195. Senior Thesis Research. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195F. Senior Thesis Research (2 credits). F,W,S

Prerequisite(s): petition on file with sponsoring agency. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198. Individual Study or Research. F,W,S

Provides for department-sponsored individual study program off campus, for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study program off campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Graduate Courses***200. Research and Teaching in Electrical Engineering (3 credits). ***

Basic teaching techniques for TAs: responsibilities and rights, resource materials, computer security, leading discussion or lab sessions, presentations techniques, maintaining class records, electronic handling of homework, and grading. Examines research and professional training: use of library and online databases, technical typesetting, writing journal and conference papers, publishing, giving talks, and ethical issues. Enrollment restricted to graduate students. *C. Gu*

211. Introduction to Nanotechnology.

Introduction to underlying principles of the emerging field of nanotechnology. Intended for multidisciplinary audience with a variety of backgrounds. Introduces scientific principles and laws relevant on the nanoscale. Discusses applications in engineering, physics, chemistry, and biology. Students are billed a materials fee. Prerequisite(s): course 145 or consent of instructor. Enrollment limited to 35. *H. Schmidt*

212. Introduction to BioMEMS.

Oriented to general engineering and science students. Topics included are: 1) microfabrication of silicon, glass, and polymer materials; 2) microfluidics and electrokinetics; 3) sensors, actuators, and drug-delivery systems; 4) micro total-analysis systems and lab-on-a-chip devices; 5) detection and measuring systems; 6) genomics, proteomics, DNA, and protein microarrays; 7) emerging applications in medicine, research, and homeland security; 8) packaging, power systems, data communication, and RF safety; and 9) biocompatibility and standards. Recommended for advanced undergraduates and graduate students in bioengineering, electrical engineering, chemistry, and health-related fields including biochemistry, molecular and cellular biology, physiology, and genetics. Enrollment restricted to graduate students, or by permis-

sion of the instructor. *J. Kubby*

213. Nanocharacterization of Materials.

Covers the many characterization techniques used to characterize materials from volumes less than one cubic micrometer, including the basic physics of each method, the methodology used to get quantitative results, and the advantages and limitations of each technique. Enrollment restricted to graduate students, or to undergraduates majoring in engineering or science by permission of instructor. *M. Isaacson*

215. Micro-Electro-Mechanical Systems (MEMS) Design. F

Introduction to MEMS technology: covers basic microfabrication technologies, the governing physics for MEMS devices in different energy domains (mechanical, electrical, optical, thermal, and fluidic). Fabrication and design of MEMS devices illustrated using examples of existing research prototypes and commercial products. Students design, lay out, and fabricate an optical MEMS deformable mirror device for applications in adaptive optics. Students are billed a materials fee. Prerequisite(s): courses 135, 145, and 211; and Physics 5A, 5B, and 5C. Enrollment restricted to seniors and graduate students. May be repeated for credit. *J. Kubby*

216. Nanomaterials and Nanometer-scale Devices. W

Materials controlled at nanometer-scale will revolutionize existing technologies. Offers two core parts: (1) physics and chemistry of nanomaterials discussed in lectures; and (2) advanced research in nanomaterials and nanometer-scale devices presented by leading scientists from academia and industries. Prerequisite(s): course 211; enrollment restricted to graduate students. *N. Kobayashi*

221. Advanced Analog Integrated Circuits. S

Analog integrated circuit design with emphasis on fundamentals of designing linear circuits using CMOS. Covers MOS devices and device modeling, current mirrors, op-amp design, op-amp compensation, comparators, multipliers, voltage references, sample-and-holds, noise, and an introduction to more complicated systems using these building blocks, such as phase locked loops and analog-to-digital converters. If time permits, integrated circuit layout issues and device/circuit fabrication. Students cannot receive credit for this course and course 172. Prerequisite(s): course 171 or equivalent; course 178 or equivalent recommended. Enrollment limited to 20. *W. Liu, K. Pedrotti*

222. High-Speed Low-Power Integrated Circuit Design. *

Digital integrated circuit design covered with an emphasis on high-speed and low-power applications. Covers signaling techniques and circuits including transmitters and receivers, with emphasis on on-chip interconnect, timing fundamentals and timing circuits. Theoretical fundamentals of phase locked loops and design issues of implementation addressed. Course has a project design component. Interview to assess technical skills of student. Enrollment restricted to electrical engineering and computer engineering graduate students. Enrollment limited to 20. May be repeated for credit. *W. Liu*

223. Advanced Solid-State Devices. S

Offers graduate students the opportunity to learn advanced solid-state devices (e.g., electronic, optoelectronic, photonic devices, and smart sensors) from various scientific, technological, and engineering aspects of functional materials (e.g., semiconductors, metals, insulators) used in these devices. Enrollment restricted to undergraduate students who have completed course 178 or to graduate

students. *N. Kobayashi*

224. Physical Design of Micro- and Opto-Electronic Packages.

Micro- and opto-electronic packaging and materials; mechanical properties and behavior, thermal stress in dissimilar materials, and predictive modeling. Design for reliability, dynamic response to shocks and vibrations; reliability evaluations and testing; plastic packages of IC devices; photonics packages, fiber optics structures, and new frontiers. Enrollment restricted to graduate students. *The Staff*

225. Basics of Electronics Reliability.

Basic concepts of reliability engineering taught in application to microelectronic and photonic materials, assemblies, and packages and systems. Emphasis on the physics and mechanics of failure physical design for reliability predictive modeling and accelerated testing, with numerous practical examples and illustrations. Prerequisite(s): basic calculus; electronic and photonic devices and systems. Enrollment restricted to graduate students. *The Staff*

226. CMOS Radio Frequency Integrated Circuit Design.

Covers narrowband and high-frequency techniques, noise, distortion, nonlinearities, low-noise amplifiers, power amplifiers, mixers, receivers, and transmitters for wireless communications. Topics are presented in the context of integrated designs in CMOS, but topics are fundamental and widely applicable. Prerequisite(s): course 172 or 221 or permission of instructor. *K. Pedrotti*

230. Optical Fiber Communication. F

Components and system design of optical fiber communication. Topics include step-index fibers, graded-index fibers, fiber modes, single-mode fibers, multimode fibers, dispersion, loss mechanics, fiber fabrication, light-emission processes in semiconductors, light-emitting diodes, laser diodes, modulation response, source-fiber coupling, photodetectors, receivers, receiver noise and sensitivity, system design, power budget and rise-time budget, fiber-optic networks (FDDI, SONET, etc), wavelength division multiplexing (WDM). Students cannot receive credit for this course and course 130. Enrollment restricted to graduate students. May be repeated for credit. *C. Gu*

231. Optical Electronics. S

Introduction to phenomena, devices, and applications of optoelectronics. Main emphasis is on optical properties of semiconductors and semiconductor lasers. Prerequisite(s): course 145/L. May be repeated for credit. *H. Schmidt, A. Shakouri, C. Gu*

232. Quantum Electronics. F

Covers basic theory of interaction of electromagnetic radiation with resonant atomic transitions; density matrix treatment; Rabi oscillation, laser mode-locking, Q-switching; parametric oscillation, stimulated Brillouin and Raman scattering, coherent radiation; and noise in photodetectors and lasers. Prerequisite(s): course 231 or equivalent. *A. Shakouri*

233. Fiber Optics and Integrated Optics. S

Concepts and analysis of optical wave propagation in optical fibers and waveguides. Topics include geometrical optics description and electromagnetic theory of slab waveguides; modes, dispersion, and birefringence in optical fibers; mode coupling and gratings in fibers; wavelength-division multiplexing; nonlinear optics in fibers and solitons; semiconductor optical amplifiers and Er doped fiber amplifiers. Prerequisite(s): courses 135 and 145. *C. Gu*

234. Liquid Crystal Displays.

Introduction to principle of operation, components and systems of liquid crystal displays (LCDs). Topics include basic LCD components, properties of liquid crystals, polarization of optical waves, optical wave propagation in anisotropic media, Jones matrix method, various display systems, active matrix addressing, and color LCDs. Prerequisite(s): course 135 and 136. Enrollment restricted to seniors and graduate students. *C. Gu*

235. Optical Information Storage and Processing.

Introduction to applications of optical technologies in data storage and information processing. Topics include basic principles of Fourier optics; electro-optic, acousto-optic, and magneto-optic effects and devices; planar and volume holography; optical data storage systems; and optical information processing, interconnecting, and switching systems. Enrollment restricted to graduate students, or undergraduates having completed Physics 5B and 5C and course 103. *C. Gu*

236. Integrated Biophotonics. W

Covers use of integrated optics for study of biological material; fluorescence spectroscopy, single molecule detection, optical tweezers, layered dielectric media, hollow-core waveguides, photonic crystals, optofluidics, biophotonic systems, and applications. Prerequisite(s): course 233 or equivalent. Enrollment restricted to graduate students. Enrollment limited to 20. *H. Schmidt*

241. Introduction to Feedback Control Systems. F

Graduate-level introduction to control of continuous linear systems using classical feedback techniques. Design of feedback controllers for command-following error, disturbance rejection, stability, and dynamic response specifications. Root locus and frequency response design techniques. Extensive use of Matlab for computer-aided controller design. Course has concurrent lectures with Electrical Engineering 154. (Also offered as Computer Engineering 241. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *G. Elkaim, J. Rosen, W. Dunbar*

250. Digital Signal Processing.*

In-depth study of signal processing techniques, including discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, structures for discrete-time systems, the discrete Fourier transform, computation of the discrete Fourier transform, filter design techniques. Students cannot receive credit for this course and course 153. *H. Sadjadpour, P. Milanfar, B. Friedlander*

251. Principles of Digital Communications.*

A core course on digital communications theory. Provides an introduction to digital communication, including source coding, characterization of communication signals and systems, modulation and demodulation for the additive Gaussian channel, digital signaling, and over bandwidth constrained linear filter channels and over fading multipath channels. Prerequisite(s): course 151 and 153 (or Computer Engineering 153) and Computer Engineering 107. *B. Friedlander*

252. Wireless Communications.*

In-depth study of the physical layer of wireless communications. Wireless propagation channels and their impact on digital communications. Modulation techniques for wireless systems and their performance. Multi-antenna systems and diversity. Multicarrier and spread spectrum. Multi-access methods: FDMA, TDMA, CDMA. The

structure of cellular systems. Students cannot receive credit for this course and course 152. Prerequisite(s): course 251. *B. Friedlander*

253. Introduction to Information Theory. F

An introduction to information theory including topics such as entropy, relative entropy, mutual information, asymptotic equipartition property, channel capacity, differential entropy, rate distortion theory, and universal source coding. (Also offered as Computer Science 250. Students cannot receive credit for both courses.) Prerequisite(s): Computer Engineering 107, or Applied Mathematics and Statistics 131 or equivalent course, or permission of instructor. Enrollment restricted to graduate students. *H. Sadjadpour*

254. Multi-User Information Theory.

Topics include basic information theory, multiple-access channel, broadcast channel, interference channel, relay channel, capacity with feedback, capacity of networks, and channels with state and current research. Prerequisite(s): course 253. Enrollment restricted to graduate students. *The Staff*

255. Multiple-Antenna Wireless Communications.

Basic theory of multiple-antenna wireless systems. Introduction to space-time propagation models, capacity of multiple-input multiple-output (MIMO) channels, space-time coding, transmitter CSI, and multiuser space-time systems. Includes discussion of multiple antennas in emerging systems and standards. Prerequisite(s): course 252 and Computer Engineering 107, or Applied Mathematics and Statistics 131, or equivalent. *The Staff*

256. Introduction to Radar Systems and SAR.

Fundamentals of radar systems and radar-signaling processing, including SAR. Emphasizes real-world applications. MATLAB emphasizes algorithm development and performance analysis. Basic EM theory and a first course in signal processing are recommended. Enrollment limited to 20. *F. Dowla*

261. Error Control Coding.

Covers the following topics: introduction to algebra; linear block code; cyclic codes; BCH code; RS codes; spectral domain study of codes; CRC; and product codes. Enrollment restricted to graduate students. *H. Sadjadpour*

262. Statistical Signal Processing I. W

Covers fundamental approaches to designing optimal estimators and detectors of deterministic and random parameters and processes in noise, and includes analysis of their performance. Binary hypothesis testing: the Neyman-Pearson Theorem. Receiver operating characteristics. Deterministic versus random signals. Detection with unknown parameters. Optimal estimation of the unknown parameters: least square, maximum likelihood, Bayesian estimation. Will review the fundamental mathematical and statistical techniques employed. Many applications of the techniques are presented throughout the course. Note: While a review of probability and statistics is provided, this is not a basic course on this material. Prerequisite(s): course 103 and Computer Engineering 107, or permission of instructor. *P. Milanfar*

263. Advanced Topics in Coding Theory.

Covers convolutional codes and its principles, maximum likelihood decoding and Viterbi decoding, performance evaluation of convolutional codes, trellis coded modulation (TCM), rotationally invariant convolutional codes, turbo codes, turbo decoding principles, performance evaluation of turbo codes, interleaver design for turbo codes, topics on turbo codes, space-time codes, and LDPC.

Prerequisite(s): course 261. Enrollment restricted to electrical engineering, computer engineering, and computer science graduate students. Enrollment limited to 10. *H. Sadjadpour*

264. Image Processing and Reconstruction.

Fundamental concepts in digital image processing and reconstruction. Continuous and discrete images; image acquisition, sampling. Linear transformations of images, convolution and superposition. Image enhancement and restoration, spatial and spectral filtering. Temporal image processing: change detection, image registration, motion estimation. Image reconstruction from incomplete data. Applications. Students that have completed Computer Engineering 261 may not take this course for credit. Prerequisite(s): course 153 or permission of instructor. *P. Milanfar*

265. Introduction to Inverse Problems (3 credits).

Fundamental approaches and techniques in solving inverse problems in engineering and applied sciences, particularly in imaging. Initial emphasis on fundamental mathematical, numerical, and statistical formulations and known solution methods. Sampling of applications presented from diverse set of areas (astronomical, medical and optical imaging, and geophysical exploration). Enrollment restricted to graduate students. *P. Milanfar*

270. Neural Implant Engineering. W

Advanced studies of the basic neuroscience-engineering design requirements and technological issues associated with implantable neural prostheses, with particular emphasis on retinal and cortical function. Course is team-taught via remote web cast. A basic understanding of physics, circuit theory, and electronics is required. Enrollment restricted to graduate students; juniors and seniors may enroll by permission of instructor. *W. Liu*

280B. Seminar on Integrated Bioelectronics (2 credits). F,W,S

Weekly seminar covering current research in integrated bioelectronics. May be repeated for credit. *W. Liu*

280I. Seminar on Microscopy and Nanotechnology (1 credit).

Weekly seminar series covering research topics and experimental research in microscopy and nanotechnology. Current research and literature are discussed. Students lead discussion and participate in all meetings. Enrollment restricted to graduate students. Enrollment by permission of instructor. Enrollment limited to 10. May be repeated for credit. *M. Isaacson*

280M. Seminar on Micro-Electro-Mechanical Systems (MEMS) (2 credits). F,W,S

Weekly seminar series covering topics of current research interest in Micro-Electro-Mechanical Systems (MEMS) design, fabrication and applications. Current research work and literature in these areas are discussed. Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. May be repeated for credit. *J. Kubby*

280O. Seminar on Applied Optics (2 credits). F,W,S

Weekly seminar series covering topics of current research in applied optics, including integrated, quantum, non-linear, and nano-optics. Current research work and literature in these areas are discussed. Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. May be repeated for credit. *H. Schmidt*

280Q. Seminar on Quantum Electronics and Nanoelectronics (2 credits). F,W,S

Weekly series covers current research in quantum electronics including electron and photon transport in nanostructures; nanoscale heat transport; optoelectronic integrated circuits; nanoscale devices for energy conversion; micro-refrigeration; thermal and acoustic imaging of nanostructures. Current research work and recent literature are discussed. Enrollment restricted to graduate students; undergraduates may enroll by permission of instructor. May be repeated for credit. *A. Shakouri*

281. Guest Seminar Series (1 credit).

Distinguished speakers from industry, universities, and government discuss current developments in electrical engineering and related fields. Emphasis on research questions that may lead to collaborative work with faculty and graduate students. Enrollment restricted to graduate students. May be repeated for credit. *N. Mingo, The Staff*

283. Special Topics in Electrical Engineering (3 credits). W

Graduate seminar on a research topic in electrical engineering that varies with the particular instructor. Topics may include, but are not limited to, electromagnetics, antennas, electronics biotechnology, nanotechnology, signal processing, communications, VLSI, MEMS, and radio frequency. Enrollment restricted to graduate students and consent of instructor. Enrollment limited to 25. May be repeated for credit. *The Staff*

290. EE Graduate Seminar (1 credit).

Research seminar at the graduate level regarding technical areas of electrical engineering activity that are of interest to the research and/or commercial communities. Enrollment restricted to computer engineering, electrical engineering, or physics graduate students, or by permission of instructor. Enrollment limited to 30. May be repeated for credit. *The Staff*

291. Tomorrow's Professor: Preparing for an Academic Career in Science and Engineering (3 credits).

The aim of this course is two-fold: (1) inform, motivate, and prepare graduate students for a possible career in academia; (2) expose both undergraduate and graduate students to the academic enterprise, possible career options for those who pursue advanced degrees in engineering and science. Restricted to graduate students. Appropriate for graduate students in all fields of engineering, science, and mathematics; advanced undergraduates in good standing may enroll with permission of instructor. *P. Milanfar*

293. Advanced Topics in Electrical Engineering.

Graduate seminar course on a research topic in electrical engineering that varies with the particular instructor. Typical topics include, but are not limited to, electromagnetics, antennas, electronics biotechnology, nanotechnology, signal processing, communications, VLSI, and MEMS. Prerequisite(s): Consent of instructor. Enrollment restricted to graduate students. Enrollment limited to 25. May be repeated for credit. *The Staff*

297. Independent Study or Research. F,W,S

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Thesis research conducted under faculty supervision. Students submit petition to sponsoring agency. *The Staff*

Information Systems Management

Baskin School of Engineering
(831) 459-2158
<http://www.soe.ucsc.edu>

Faculty and Professional Interests**Professor****RAMAKRISHNA AKELLA**

Information technology and systems, management of technology, new product introduction and development, enterprise and knowledge management, supply chain management and e-business, financial engineering

MARC MANGEL (Distinguished Professor of Applied Mathematics and Statistics)

Program director, Information Systems Management

Mathematical modeling of biological phenomena, especially quantitative issues in fishery management; mathematical and computational aspects of aging and disease; impact of technology on biological systems

Associate Professor**JOHN MUSACCHIO**

Control, analysis, and pricing of communications networks; applications of game theory in networking; wireless ad-hoc networks; and management of technology

Assistant Professor**KEVIN ROSS**

Service engineering and management; resource allocation; operations research; pricing; scheduling; queueing theory; networks

YI ZHANG

Information retrieval, knowledge management, natural language processing, machine learning

Lecturer**SUBHAS DESA**

Product development, supply chain management, management of technology, system dynamics and control

**YIN-WONG CHEUNG (Economics)**

Econometrics, applied econometrics, exchange rate dynamics, financial price behavior, aggregate output dynamics

LUCA DE ALFARO (Computer Science)

Formal methods, game theory, embedded systems, software engineering

WILLIAM B. DUNBAR (Computer Engineering)

Theory and application of feedback control, single-molecule biophysics, nanopore sensors, dynamics and control of biomolecules

DANIEL FRIEDMAN (Economics)

Microeconomic theory, experimental economics, evolution and learning, behavioral economics, financial markets

BRENT HADDAD (Environmental Studies)

Fresh-water economics, policy, and communications; economic institutions and the environment; climate-change mitigation and adaptation; institutional and ecological economics

MICHAEL ISAACSON (Electrical Engineering)

Nano- and microfabrication technology and applications to

biomedical and diagnostic devices, nanocharacterization of materials with emphasis on the development of microscopy tools, novel modes of imaging, electron and light optics

ROBERT A. LEVINSON (Computer Science)

Artificial intelligence, machine learning, heuristic search, associative pattern retrieval, hierarchical reinforcement learning, semantic networks

DARRELL LONG (Computer Science)

Storage systems, distributed computing systems, operating systems, mobile computing, performance evaluation, fault tolerance, computer security, multimedia, and video-on-demand systems

PATRICK MANTEY (Baskin Professor of Computer Engineering) (CITRIS Campus Director)

Multimedia systems, digital signal processing, sensor systems and networks, real-time monitoring and control, image systems, image processing, visualization, geographic information systems, decision support systems

CHARLES E. McDOWELL (Computer Science)

Programming languages, parallel computing, and computer science education

ALEX PANG (Computer Science)

Uncertainty visualization, tensor visualization, scientific visualization, comparative visualization, collaboration software, virtual reality interfaces

IRA POHL (Computer Science)

Artificial intelligence, programming languages, heuristic methods, educational and social issues, combinatorial algorithms

NIRVIKAR SINGH (Economics)

Industrial organization, political economy, economic development, technology and innovation, South Asian immigrants in the U.S.

LINDA WERNER

Software engineering, testing, usability engineering, educational and social issues

JAMES WHITEHEAD, JR. (Computer Science)

Software engineering, software evolution, software bug prediction, automated software construction, video game level design

Program Description

Information systems management (ISM) is a multidisciplinary program that focuses on the integration of engineering, computer science, information technology, and business management for two purposes: the technology of management, which includes the design of information technology to solve business problems, and the management of technology, which includes the management of new-product development and entrepreneurship. The program offers a bachelor of science (B.S.) degree in information systems management (ISM) as well as a minor in information systems and technology management (ISTM). See description below concerning advanced degree programs that are available starting fall 2009.

ISM is a rigorous, challenging major for those students wanting to pursue careers in the management of information and technology. ISM students will receive a thorough grounding in the fundamental principles and practices of technology (in particular, computer science and computer engineering) and management, and the scientific, mathematics, and economics principles upon which they are built. In particular, they will become proficient in the following areas: strategy, planning, innovation, entrepreneurship, information technology, software design, product development, and supply-chain management.

The essence of the information systems management

major at UCSC is the integration of fundamental intellectual content from the disciplines of computer science, computer engineering, business management economics, and finance. ISM students learn how to apply the fundamentals of these diverse disciplines to solving problems that require the integration of management and technology, e.g., developing information technology systems to manage all activities and operations in a firm, e-commerce, managing and commercializing a new technology, and starting a new high-technology company.

To graduate with a B.S. in information systems management, students normally complete 22 required courses (with four laboratories, totaling 115 quarter credits) plus four elective courses (20 quarter credits) for the information systems management major program. To plan for completion of these course requirements within the normative time, students should consult with an adviser as early as possible. Honors students are likely to find the rigorous management and leadership elements of the new program of significant interest. Industrial interactions and projects are key features of this major.

Information Systems Management Policies

Admissions Policy

Lower-division students will be accepted into the information systems management (ISM) major on completion of the School of Engineering (SOE) major declaration process during any of their first three quarters at UCSC. See <http://ua.soe.ucsc.edu/declare-your-major> for the complete process.

After the first three quarters, petitions to declare the major are reviewed individually. Students must have completed the foundation courses required for the major, and are expected to have a grade point average (GPA) among School of Engineering and Division of Physical and Biological Science courses (the SOE GPA) of 2.5. Progress in the major and ability to complete the major within campus limits will also be considered.

Foundation Courses: Computer Science 12A, or 5J and 11; Computer Engineering 16; and Mathematics 19A-B, or Mathematics 20A-B, or Economics 11A and 11B; Information Systems Management 50 (or Economics 1 and 2).

Disqualification and Satisfactory Progress in the Major

Please refer to the Engineering section of this catalog for the School of Engineering's major disqualification policy.

Letter Grade Policy

Information systems management requires letter grading for all courses applied toward the B.S. in information systems management, with the exception of two lower-division courses which students may elect to take Pass/No Pass (not to include course 50 or 58). This policy includes courses required for the information systems management major but sponsored by other departments.

Transfer Students

Articulation agreements with other California institutions are in place for some courses required for the information systems management major; it is important for students to inquire whether specific courses meet the requirements of this major. Articulation information is available on ASSIST at www.assist.org. Courses taken at other institutions which emphasize applications of programming languages often do not count toward

the information systems management major at UCSC. Please refer to the School of Engineering section of the catalog for the policy regarding transfer students.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs. These policies include admission to the major, limits on the number of times courses can be attempted, and the need for UCSC students to obtain pre-approval before taking courses elsewhere.

Preparation for the Major

The information systems management major is intended for students with an interest in both technology and business. It is recommended that students intending to declare this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Completion of business-oriented computer literacy and basic programming courses is of benefit to students entering this major. Completion of any economics and/or business-related courses in high school is also beneficial, but the faculty realizes that these courses may not be available at many high schools. Completion of comparable college courses at other institutions serves to strengthen the preparation of a student for the information systems management major.

Information Systems Management Major Requirements

In addition to completing UCSC general education requirements, students must complete 22 required courses (with four laboratories, totaling 115 quarter credits) plus four elective courses (20 quarter credits) for the information systems management major program. To plan for completion of these course requirements within the normative time, students should consult with a School of Engineering adviser as early as possible. These 26 courses include the following:

Required Courses (22 courses plus four laboratories)

Applied Mathematics and Statistics (one course)

Applied Mathematics and Statistics 5, *Statistics*

Mathematics (four courses)

19A-B, *Calculus for Science, Engineering, and Mathematics*; or

Applied Mathematics and Statistics 11A and 11B, or Economics 11A and 11B, *Mathematical Methods for Economists*; and

Applied Mathematics and Statistics 10A and 20A, *Basic Mathematical Methods for Engineers I and II*

(3 credits each); or Applied Mathematics and Statistics 10 and 20, *Mathematical Methods for Engineers I and II*; or Mathematics 21, *Linear Algebra* and Mathematics 24, *Ordinary Differential Equations*

Economics (five required 5-credit courses)

1 *Introductory Microeconomics: Resource Allocation and Market Structure*

2 *Introductory Macroeconomics: Aggregate Economic Activity*

10A, *Economics of Accounting*

100A, *Intermediate Microeconomics*; or

100M, *Intermediate Microeconomics Math Intensive*

113, *Introduction to Econometrics*

Computer Engineering (three 5-credit courses and two 2-credit laboratories)

12/L, *Computer Systems and Assembly Language/Laboratory*

16, *Applied Discrete Mathematics*

150/L, *Introduction to Computer Networks/Laboratory*

Computer Science (three 5-credit courses and two 2-credit laboratories)

12A/L, *Introduction to Programming(Accelerated)/Laboratory*; or 5J, *Introduction to Programming in Java* and 11, *Intermediate Programming*

12B/M, *Introduction to Data Structures/Laboratory*

182, *Introduction to Database Management Systems*

Information Systems Management (five 5-credit courses and one 2-credit seminar)

50, *Business Information Systems*

58, *Systems Analysis and Design*

101, *Management of Technology Seminar*

105, *Management of Technology I*

125, *Management of Technology II*

158, *Business Strategy and Information Systems*

Elective Courses (four courses)

Two 5-credit School of Engineering courses

- Students select two upper-division School of Engineering electives on the basis of their particular interests. These electives may be any 5-credit upper-division or graduate School of Engineering courses, with the following limitations:

4. either Computer Engineering 153 or Electrical Engineering 153, but not both;
5. either Applied Mathematics and Statistics 131 or Computer Engineering 107, but not both;
6. at most one independent and field-study course (193, 195, 198, 199) with prior approval from the department to be used as an elective.

- One 5-credit upper-division economics course
- One 5-credit, upper-division School of Engineering or economics course (the limitations on School of Engineering electives given above apply)

Information Systems Management Major Planners

The following are three sample academic plans for students to complete during their first two years as preparation for the information systems management major. Plan One A is recommended for students who are more proficient in mathematics and programming and Plan One B is recommended for students who need more time to develop proficiency in mathematics and programming. Plan Two is for students who are considering the major.

Plan One A

| Year | Fall | Winter | Spring |
|---------------|--|----------------------|---------------------------------|
| 1st (frsh) | ECON 10A CMPS 10 (recommended) college core | ECON 1 MATH 19A | ECON 2 MATH 19B |
| 2nd (soph) | CMPS 12A/L ISM 50 | CMPS 12B/M ISM 58 | CMPE 16 AMS 10A ECON 100A |

Plan One B

| Year | Fall | Winter | Spring |
|---------------|---|--------------------|---------------------|
| 1st (frsh) | ECON 1 MATH 3 college core | ECON 2 ECON 11A | ISM 150 ECON 11B |
| 2nd (soph) | CMPS 10 (recommended) ECON 10A CMPE 16 | CMPS 5J ISM 58 | CMPS 11 AMS 10A |

Plan Two

| Year | Fall | Winter | Spring |
|---------------|--|------------------------------------|--------------------|
| 1st (frsh) | MATH 3 | ECON 1 | ECON 2 ISM 50 |
| 2nd (soph) | CMPS 10 MATH 19A or ECON 11A ECON 10A | CMPS 5J MATH 19B or ECON 11B | CMPS 11 AMS 10A |

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in information systems management is satisfied by completing course 158.

Comprehensive Requirement

Students complete two project-intensive courses, Information Systems Management 158 and Information Systems Management 105, which constitute the comprehensive requirement for the information systems management major, based on the dual aspects (technology of management and management of technology) of the program. Course 158 deals with the technology of management, and course 105 deals with the management of technology. Both courses involve a substantial amount of critical thinking and writing within the context of comprehensive projects.

Information Systems Management 158, *Business Strategy and Information Systems*, requires that students understand and use a structured methodology to evaluate the competitive use of information systems within an enterprise. This is accomplished by a team project as well as by an individual project that involves researching and writing a comprehensive analytical term paper using a methodology taught as part of this course.

Information Systems Management 105, *Management of Technology I*, requires that students understand and apply structured methodologies for the development, management, and commercialization of technologies and products. Students will work in teams on a comprehensive term project in the development, commercialization, and management of technologies such as computers, networks, semiconductors, mechatronics, and biotechnology.

Honors

The ISM program awards honors to students whose academic performance is excellent. Students with a GPA between 3.5 and 3.75 will be awarded honors, and students with GPAs greater than 3.75 will be awarded high honors.

Minor in Information Systems and Technology Management (ISTM)**Purpose**

There is a growing need in today's increasingly complex socio-technological world for the fusion of information systems, technology, and business management for two important purposes: the use of information systems to solve business problems, and the management of technology, which includes new product development and enterprise management. The information systems management (ISM) program therefore offers a minor in information systems and technology management (ISTM) to provide undergraduates in the School of Engineering as well in other programs and divisions in the university, such as economics and business management economics, the physical and biological sciences, and arts, the opportunity to expand the breadth of their knowledge and training to include the management of information systems and the management of technology.

Rationale for the Courses

Courses for the information systems management minor will include a combination of courses from the ISM program, computer engineering, computer science, and economics as well as the chains of prerequisites behind these courses. The ISM program courses for the information systems management minor will include a mix of information systems and management of technology courses, providing students with a strong foundation in both the management of information systems and the management of technology.

Course Requirements

Requirements for the minor in information systems management are the following:

Lower-Division Requirements**Mathematics (2 courses)**

Mathematics 19A, *Calculus* (or Applied Mathematics and Statistics 11A/Economics 11A, *Mathematical Methods for Economists*, or Mathematics 11A, *Calculus*, or Mathematics 20A, *Honors Calculus*)

Mathematics 19B, *Calculus* (or Applied Mathematics and Statistics 11B/Economics 11B, *Mathematical Methods for Economists*, or Mathematics 11B, *Calculus*, or Mathematics 20B, *Honors Calculus*)

Computer Science (1 course)

12A/L, *Introduction to Programming (Accelerated) Laboratory*; or Computer Science 5J, *Introduction to Programming in Java*

Information Systems Management (2 courses)

Information Systems Management 50, *Business Information Systems*

One of the following courses:

Information Systems Management 58, *Systems Analysis and Design*; or

Information Systems Management 80C, *Starting a New Technology Company*

Upper-Division Requirements**Mathematics (1 course)**

One of the following courses:

Economics 113, *Introduction to Econometrics*; or

Computer Engineering 107, *Mathematical Methods of Systems Analysis: Stochastic*; or

Applied Mathematics and Statistics 131, *Introduction to Probability Theory*

Upper-Division Electives (4 courses)

Four upper-division courses selected from the following:

Information Systems Management 105, *Management of Technology I*

Information Systems Management 125, *Management of Technology II*

Information Systems Management 158, *Business Strategy and Information Systems*

Computer Engineering 150/L, *Introduction to Computer Networks/Laboratory*

Computer Science 180, *Database Systems I* (or Computer Science 182, *Introduction to Database Management Systems*)

Economics 100A, *Intermediate Microeconomics* (or 100M, *Intermediate Microeconomics*, mathematics intensive—requires additional prerequisites)

Economics 100B, *Intermediate Macroeconomics* (or 100N, *Intermediate Macroeconomics*, mathematics intensive—requires additional prerequisites)

With pre-approval from the information systems management undergraduate director, up to two graduate information systems management courses may be used to satisfy upper-division elective requirements.

Graduate Programs**Technology and Information Management Ph.D. and Master's Degrees**

Technology and information management (TIM) is a new and distinct discipline within engineering, combining technology management, systems engineering, and information technology. TIM's research and academic programs, combining information technology with both knowledge management and systems management, address problems facing firms today as they deal with more complex decisions in a global environment, facing new business models (e.g., "services") and business practices. TIM places special emphasis on research arising from challenges faced in creation and management of knowledge-based services and enterprises. TIM themes include:

- **Management and optimization of enterprise systems**, which is the integration of business, technology, and management perspectives to enable an entity to achieve enhanced growth and profitability through use of analytical methods including stochastic models, optimization, game theory and knowledge management.
- **New product, technology, and services management**, which is the design and development of products and services, the design and risk management of product portfolios, and pricing.
- **Financial engineering**, which addresses the management of risk, reward, and allocation of resources in technology development and deployment.
- **Information retrieval and knowledge management**, which includes semantic mining and machine learning, linking business to knowledge management.

TIM offers a master of science (M.S.) degree as a terminal degree for engineers who wish to prepare for careers in management in high-tech enterprises, providing the appropriate breadth and depth of courses for preparation of these engineering managers.

The TIM doctor of philosophy (Ph.D.) degree

focuses on research, with emphasis on analytic methods for managing high-tech enterprises, including product, services, and business-process innovation and development; financial engineering for technology and enterprise management; entrepreneurship; operations and supply-chain management; costing and strategy; marketing engineering; data mining; and the applications of information technology to knowledge-management, high-tech enterprises.

Base Requirement

Most entering students are expected to come from undergraduate engineering programs. Students with quantitative undergraduate preparation in the sciences, economics, or mathematics would also be prepared if they had significant industry experience in a technology field or if they are prepared to take extra courses and/or an internship in industry to obtain this background. The TIM M.S. attracts students now employed in industry and also recent B.S. graduates who have not yet entered the workforce. For this latter group, industrial experience will be encouraged through internships with local companies. TIM M.S. students may take up to two upper-division, undergraduate, prerequisite courses and, with adviser approval, may count these as credit toward the M.S. degree. (These courses will not count as credit toward the Ph.D. degree.)

Mathematics

- Probability and statistics (AMS 131)—Focus on probability models, random variables, maximum likelihood and Bayesian estimation
- Linear algebra (AMS 10 or MATH 21)
- Differential equations (AMS 10 or MATH 24)

Computer Science

- *Abstract Data Types* (CMPS 101)—Focus on abstract data types and common algorithms
- Programming project (e.g., CMPS 104A, CMPS 115, CMPS 111)—Any upper-division, computer science course that involves a large programming project
- Database systems (CMPS 180, 181)

Computer Engineering

- *Probability and Statistics for Engineers* (CMPE 107)
- Computer networks (CMPE 150, 151)
- *Computer Architecture* (CMPE 110)
- *Applied Graph Theory and Algorithms* (CMPE 177)

Economics

- Microeconomics (ECON 100A)
- Macroeconomics (ECON 100 B)
- *Managerial Economics* (ECON 101)—Includes pricing schemes, non-price competition, and game theory

Field examinations and/or other pre-qualifying examinations

The graduate record examination (GRE) General Test is required for admission and a GRE subject advanced test—preferably in computer science, engineering, physics, or mathematics—is highly recommended. Chemistry and biology students with adequate training in mathematics and physics may also be considered. Student GPA of 3.5 or higher is recommended for admission into the program.

Relationship of Master's and Doctor's programs

The M.S. and Ph.D. programs have the same admission requirements. As in other SOE graduate programs, students admitted to the M.S. program may be subsequently admitted to the Ph.D. program by departmental approval. Ph.D. students may receive the M.S. degree upon fulfillment of the M.S. degree requirements.

Course requirements

Masters students must complete a minimum of 49 credits, comprising the following:

- Four ISM core courses (20 credits minimum);
- Two ISM seminars (4 credits minimum);
- Four elective graduate courses offered by ISM, or relevant graduate courses from other UCSC departments as approved by the graduate adviser and the TIM graduate director. Up to two appropriate upper-division undergraduate courses may be used as electives, to strengthen a student's preparation for graduate studies, with approval of the adviser. (20 credits minimum);
- Thesis research or independent study (5 credits minimum).

Up to 15 credits of appropriate UCSC Extension XSC or concurrent credit may be used to satisfy the degree credit requirements (core and elective), as approved by the graduate adviser and TIM graduate director.

Ph.D. students must complete a minimum of 62 credits:

- Four ISM core courses (20 credits);
- Two ISM seminars (4 credits minimum);
- Two elective graduate courses (10 credits) offered by ISM;
- Three additional graduate electives (15 credits) chosen with approval of the adviser and TIM graduate director. Students may substitute other appropriate courses for the ISM core courses or electives with the approval of their adviser and TIM graduate director;
- A minimum of 10 credits of thesis research or independent study;
- Applied Mathematics and Statistics 200, *Research and Teaching in AMS* (3 credits), or Computer Science 200, *Research and Teaching in Computer Science and Engineering* (3 credits).

Master's Requirements

Core Courses (4 required)

- ISM 205, *Management of Technology I* (5 credits)
- ISM 206, *Optimization Theory and Applications* (5 credits) (Possible substitutes include: ISM 207, CMPE 230, ECON 216, 217, AMS 205)
- ISM 225, *Management of Technology II* (5 credits), or ISM 270, *Service Engineering and Management* (5 credits) or Applied Mathematics and Statistics 215, *Stochastic Modeling in Biology*
- ISM 240, *Information Technology for Decision Support: An Introduction* (5 credits)

Seminars (2 required)

- Two ISM graduate seminars

Other Courses (electives)

- Ten (10) or more credits of graduate courses in related disciplines outside the Baskin School of Engineering (requires adviser and graduate director approval). A maximum of two SOE upper-division undergraduate courses may be counted as electives when necessary to strengthen a student's preparation for graduate studies (requires adviser approval).
- All remaining credits must be graduate elective courses approved by the adviser and the TIM graduate director. The program offers a wide variety of electives (see Table 8, Section 5).
- With appropriate preparation and/or student interests, proposals will be accepted to allow substitution of another graduate course for one of the core courses. This proposal will require approval of the faculty adviser and the TIM graduate director.
- On-campus students serving as teaching assistants or who plan to pursue a Ph.D. must take Applied Mathematics and Statistics 200, *Research and Teaching in AMS* (3 credits), or Computer Science 200, *Research and Teaching in Computer Science and Engineering* (3 credits) before or during their first teaching-assistant (TA) assignment.

Optional Elective Concentrations: The range of elective options allows for the diversity of M.S. student interests. It also allows TIM M.S. students to specialize. For example, a student specializing in the following areas of management of technology and technology of management could take the corresponding elective classes:

Management of technology track—ISM 208, ISM 220, ISM 225, and ISM 230;

Technology of management track—ISM 209, ISM 245, ISM 260, CMPE 276, and CMPS 277.

Ph.D. Requirements

- A minimum of 45 credits of approved graduate courses, of which 30 credits must be from courses offered by TIM (unless exceptions are approved by the faculty adviser and TIM graduate director);
- Two ISM seminars (4 credits minimum);
- Applied Mathematics and Statistics 200, *Research and Teaching in AMS* (3 credits), or Computer Science 200, *Research and Teaching in Computer Science and Engineering* (3 credits);
- A minimum of 10 credits of dissertation research or independent study credits; and
- Ph.D. dissertation.

The research areas in TIM are varied, and each will require a different sequence of classes to develop appropriate depth in analytical methods and technology. The selection of graduate courses will be in consultation with the dissertation supervisor.

Although there is no teaching requirement, students will be encouraged to gain teaching experience by becoming teaching assistants (TAs).

Where appropriate, research internships with companies, government laboratories, or elsewhere are recognized (and may be required) as an integral part of the research leading to the dissertation.

*Lower-Division Courses***50. Business Information Systems. F,W,S**

Addresses the use of information systems (IS) within a business enterprise. Subjects include computer hardware and software concepts, system design and implementation, telecommunications, data management, transaction-based systems, management information systems, and the use of IS to compete. Intended for information system management and business management economics majors. *R. Akella, J. Musacchio, K. Ross*

58. Systems Analysis and Design. W

Students learn how information technology is used to deal with business requirements and/or solve business problems. Provides an understanding of structured computer systems analysis and design methodologies and techniques and their application to business information systems. Intended for information systems management and business management economics majors. Prerequisite(s): course 50. Enrollment limited to 40. *Y. Zhang*

80C. Starting a New Technology Company. S

Focuses on the creation and management of technology start-ups and small companies, using case studies and team projects as the basis for learning and applying the course materials. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *S. Desa, R. Akella*

94. Group Tutorial. F,W,S

A means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

94F. Group Tutorial (2 credits). F,W,S

A means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Upper-Division Courses***101. Management of Technology Seminar (2 credits). F,W,S**

Uses weekly talks by leading industry practitioners and university researchers to provide in-depth exposure to the management of technology. Topics covered include product development, operations, strategy, finance, and marketing for technologies such as software and information systems. May be repeated for credit. *S. Desa*

105. Management of Technology I. F

An in-depth examination of technological, strategic, marketing, and financial methods and analytical tools for the management of technology to enable cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. Students who receive credit for this course cannot also receive credit for course 80A; students who receive credit for course 205 cannot also receive credit for this course. Prerequisite(s): Mathematics 19B or 11B or Applied Mathematics and Statistics 11B or Economics 11B. *S. Desa*

125. Management of Technology II. W

High-technology enterprises must understand and operate

effectively within their technology-business value chains in order to maximize profitability. This course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. Students who receive credit for this course cannot also receive credit for course 80B; students who receive credit for course 225 cannot also receive credit for this course. Prerequisite(s): course 105. *S. Desa, R. Akella*

158. Business Strategy and Information Systems. S

Analysis of effective use of information systems within a business enterprise, with emphasis on gaining a competitive advantage. Integration of information systems with business strategy, financial justification, personnel, and organizational considerations are highlighted. Intended for information system management majors or senior engineering majors who have a business interest. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50 or permission of instructor. (General Education Code(s): W.) *K. Ross*

193. Field Study. F,W,S

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Information Systems Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and oral presentation. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides individual programs of study with specific academic objectives carried out under direction of faculty member of Information Systems Management and a willing sponsor at field site. Uses resources not normally available on campus. Credit based on presentation of evidence of achieving objectives by submitting written and oral presentation. Cannot normally be repeated for credit. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195. Senior Thesis Research. F,W,S

Intended for majors. Students submit petition to sponsoring agency. *The Staff*

195F. Senior Thesis Research (2 credits). F,W,S

Intended for majors. Students submit petition to sponsoring agency. *The Staff*

198. Individual Study or Research. F,W,S

Intended for majors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Individual Study or Research (2 credits). F,W,S

Intended for majors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Individual Study or Research. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to senior information systems man-

agement majors. May be repeated for credit. *The Staff*

*Graduate Courses***205. Management of Technology I. F**

Addresses technological, strategic, marketing, financial methods, and analytical tools for management of technology in an integrated manner that enables the cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. Students cannot receive credit for this course and either course 80A or 105. Enrollment restricted to juniors, seniors, and graduate students. *S. Desa, R. Akella*

206. Optimization Theory and Applications. F

A first graduate course in optimization with an emphasis on problems arising in management and engineering applications. Objectives are to become experts in problem formulation, comfortable with software for solving these problems, and familiar with analytical methods behind these solver technologies. Prerequisite(s): calculus and linear algebra. Enrollment restricted to graduate students. *K. Ross, S. Desa*

207. Random Process Models in Engineering. S

A first graduate course in stochastic process modeling and analysis with an emphasis on applications in technology management, information systems design, and engineering. Enrollment restricted to graduate students. Prerequisite: Computer Engineering 107 or other undergraduate probability course recommended. *J. Musacchio*

209. Knowledge Services and Data Analytics. F

Provides students with the systematic methodology and analytical tools to address the field of knowledge services in an integrated manner. Focuses on data, text, and business analytics. Includes training in the basic elements of stochastic optimization and other algorithmic approaches, such as stochastic dynamic programming, statistics, and machine learning. These methods enable corporate enterprises to achieve rapid, effective, and profitable optimization of knowledge-services management. Students are expected to have undergraduate preparation in probability and statistics. Undergraduates may enroll with instructor approval. Enrollment restricted to graduate students. Students are expected to have undergraduate preparation in probability and statistics. Undergraduates may enroll with instructor approval. *R. Akella*

211. E-Business Technology and Strategy.

Surveys structure of modern information technology, the relation of that structure to structure of the industry that creates it, and the economic forces that drive the players in the industry. Building on these technological and economic concepts, studies how firms can craft a technology and business strategy to create and capture value in the information technology product and/or services sectors. Enrollment restricted to graduate students. *J. Musacchio*

225. Management of Technology II. W

High technology enterprises must understand and operate effectively within their technology-business value chains in order to maximize profitability. Course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. Students cannot receive credit for this course and either course 80B or 125. Prerequisite(s): course 205 or consent of instructor. Enrollment restricted to juniors, seniors, and graduate students. *S. Desa, R. Akella*

230. Financial Engineering and Management in High Technology Firms.

Course provides students with a systematic methodology, and the corresponding set of methods and analytical tools,

to address the field of financial engineering and its use in high-tech enterprises in an integrated manner. Covers basic concepts of stochastic optimization and other algorithmic approaches, such as stochastic dynamic programming; decision models and analysis; and binomial trees; and their application in financial engineering in the context of high-tech enterprises. Prerequisite(s): Computer Engineering 107 or Economics 113 or Applied Mathematics and Statistics 131, or instructor approval. Enrollment restricted to graduate students. *R. Akella*

240. Information Technology for Decision Support: An Introduction.

Introduction to the information technologies useful to IT management. Reviews/surveys four major topics: 1) information systems: from computer technology—systems architecture (hardware and software), multiprocessors and cluster—to client-server, networking and distributed computing, data storage and data servers, file management, database systems, input/output technology, graphics and multimedia; 2) IT as a "service": commercial and open-course tools for information-system development and knowledge management; 3) managing, searching, and mining of structured and unstructured data; 4) decision-support systems that integrate knowledge with data mining and text mining tools to support decision-making in product development, supply-chain management, marketing, sales and logistics. Enrollment restricted to graduate students. *The Staff, Y. Zhang, P. Mantey*

245. Data Mining. S

Covers the principles, algorithms, and applications of data mining, including mining sequential data, structured data, stream data, text data, spatiotemporal data, biomedical data, and other forms of complex data. Enrollment restricted to graduate students. *R. Akella, Y. Zhang*

250. Stochastic Optimization in Information Systems and Technology. W

First in a sequence of courses in information systems and technology management (ISTM). Provides systematic methodology and corresponding set of methods and analytical tools to address the field of ISTM in an integrated manner; provides required training in stochastic optimization and other algorithmic approaches, such as dynamic programming, to achieve business intelligence in corporate enterprises. Students should have solid background in the following: probability equivalent to statistics, stochastic methods, calculus, linear algebra, mathematical maturity, stochastic processes, and optimization. Enrollment restricted to graduate students; undergraduates who have completed Computer Engineering 107 or Applied Mathematics and Statistics 131 enroll by permission of instructor. Applied Mathematics and Statistics 205A, Computer Engineering 230 recommended. *R. Akella*

251. Information Systems and Technology Management 2.

Provides a systematic methodology and corresponding set of methods and analytical tools in stochastic and neurodynamic programming used for business intelligence in corporate enterprises and AI and Machine learning research and applications in computer science, computer engineering, and electrical engineering and related to applied mathematics and statistics, business, management, and economics. Students should have solid background in probability equivalent to statistics, stochastic methods, calculus, mathematical maturity, stochastic processes and optimization, business intelligence and algorithms. Prerequisite(s): Computer Engineering 107 or Applied Mathematics and Statistics 131 or permission of instructor. Enrollment restricted to graduate students. Course 230, 250, and Applied Mathematics and Statistics 205A

or 205B recommended. *R. Akella*

260. Information Retrieval.

Course covers major topics of information retrieval, including statistical characteristics of text, several important retrieval models, text clustering, text classification, text filtering, web analysis, information extraction, peer to peer research, distributed search, personalized search, and other related topics. Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. *Y. Zhang*

270. Service Engineering and Management. W

Introduction to service engineering and management, from the role of services in the global economy to analytical models in service operations management. This field is developing rapidly; the material covers the fundamental principles of services as well as recent research. Topics include designing efficient service networks, forecasting, resource allocation, and globalization. Enrollment restricted to graduate students. *K. Ross, The Staff*

280A. Graduate Research Seminar (2 credits). *

Weekly seminar series in topics of current research in information systems and technology management. Enrollment by permission of instructor. Enrollment limited to 30. May be repeated for credit. *The Staff*

280I. Seminar on Information Retrieval and Knowledge Management (2 credits). S

Seminar series discussing advanced topics in information retrieval and knowledge management. Current research and literature are presented during each meeting. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *Y. Zhang*

280M. Sales and Marketing for Technologists and Engineers (2 credits).

Perspective on the theory, plus examples, and tools useful to technologists and engineers for successfully guiding and supporting sales and marketing endeavors and, thereby, ensuring funding, staffing, product appeal, positive customer relationships, and marketplace success. *P. Mantey, The Staff*

280S. Seminar Topics (2 credits). *

Weekly seminar series of current research on a special topic in information systems and technology management. The theme of research presented throughout the course selected by the instructor. Topics may include, but are not limited to, knowledge planning, new product development and management of technology. Enrollment with permission of instructor. Enrollment limited to 30. May be repeated for credit. *P. Mantey*

293. Advanced Topics in Technology and Information Management (TIM). *

Advanced research topics in TIM (as determined by instructor). Topics include, but are not limited to, approaches and solutions to complex business problems, and development of information-based technology and services. Enrollment restricted to graduate students. Enrollment limited to 25. May be repeated for credit. *P. Mantey, The Staff*

297. Independent Study. F,W,S

Independent study under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

English

See Literature, page 359, and Linguistics, page 354.

English-Language Literatures

Students wishing to pursue a course of study in English literature should consult the concentration in national/transnational literatures under Literature, page 361.

Entry-Level Writing Requirement

See page 25.

Environmental Sciences and Policy

Program Description

UCSC offers a range of options for students to pursue environmental topics. The Environmental Studies Department offers an interdisciplinary B.A. program that emphasizes social sciences, conservation biology, and agroecology (see Environmental Studies, below). The Environmental Studies Department offers combined majors with the Departments of Biological Sciences, Earth and Planetary Sciences, and Economics. Effectively, the environmental studies/biology and environmental studies/Earth sciences combined majors extend the scientific training in disciplinary areas but are not intended to develop a student's core competence to a level equivalent to that attained with a major in the related science. The Chemistry and Earth and Planetary Sciences Departments offer concentrations in environmental topics within their B.S. degree programs. The environmental sciences concentrations are designed for students in the natural sciences who wish to pursue interdisciplinary study of the environment. These develop a level of competency suitable for pursuing graduate work in these disciplinary areas or in graduate environmental programs (see descriptions in the appropriate sections: Chemistry; and Earth and Planetary Sciences).

Environmental Studies

405 Interdisciplinary Sciences Building
(831) 459-2634
<http://envs.ucsc.edu>

Faculty and Professional Interests

Professor

WEIXIN CHENG
Soil ecology, agroecology, biogeochemistry, global change ecology

ROBERT R. CURRY, Emeritus

BRYAN H. FARRELL, Emeritus

MARGARET FITZSIMMONS

Social and spatial aspects of environmental change, the development and regulation of primary-sector activities and the regional integration of environmental planning and resources management institutions in urban and rural settings

GREGORY S. GILBERT

Disease ecology, forest ecology, tropical ecology, biological invasions, conservation biology

STEPHEN R. GLIESSMAN

Agroecology, sustainable agriculture, tropical land use and development, alternative trade networks, sustainable livelihoods and conservation, linking community and agroecology

DAVID GOODMAN, Emeritus

BRENT HADDAD

Fresh-water economics, policy, and communications; economic institutions and the environment; climate-change mitigation and adaptation; institutional and ecological economics

KAREN D. HOLL

Restoration ecology, conservation biology, landscape ecology

SHELDON KAMIENIECKI

Environmental politics and policy; agenda building; strategic regulatory planning; business and interest group influence; political campaigns and elections; research methodology

DEBORAH K. LETOURNEAU

Agroecology, tropical biology, insect-plant interactions, biological control as an alternative to chemical pesticides, environmental risks of genetically modified crops

PAUL L. NIEBANCK, Emeritus

JAMES E. PEPPER, Emeritus

DANIEL M. PRESS

U.S. environmental politics and policy, social capital and democratic theory, industrial ecology, land and species conservation, regionalism

ALAN RICHARDS, Emeritus

CAROL SHENNAN

Agroecology, ecosystem studies, agriculture-wetland interactions, participatory research, gender, and environmental issues

MICHAEL E. SOULÉ, Emeritus

Associate Professor

JEFFREY T. BURY

Political ecology; sustainable development; Latin America; extractive industries; climate change; new models of conservation

TIMOTHY DUANE

Environmental law and policy, renewable energy development, ecosystem-based management, land use planning and regulation, water law and policy, conservation

MICHAEL E. LOIK

Plant physiological ecology, climate change ecology, biometeorology, ecophysiology

S. RAVI RAJAN

Environmental history and political ecology, risk and disaster studies, science and technology studies, North-South environmental conflicts, environmental social theory, environmental ethics

Assistant Professor

ZDRAVKA TZANKOVA

Environmental policy and politics (United States and

comparative); marine policy; democratic and conservation consequences of non-state, market-based initiatives in environmental governance

CHRISTOPHER C. WILMERS

Wildlife ecology and conservation; food webs and climate change; movement ecology; animal behavior; predator-prey dynamics; ecological modeling

ERIKA ZAVALETA

Ecology and evolutionary biology, biodiversity and global change, biological invasions, terrestrial plant and ecosystem ecology, ecological economics, human ecology, conservation

Lecturer

ANDREW SCHIFFRIN

Environmental assessment, transportation, watershed management

DORIS ASH (Education)

Informal science learning, teacher professional development, science discourse in and out of the classroom

GIACOMO BERNARDI (Ecology and Evolutionary Biology)

Fish biology, phylogenetics, evolution

MICHAEL K. BROWN, Emeritus (Politics)

Inequality, race and African American politics, political economy, political development of welfare states, theories and methods of historical social science

KENNETH W. BRULAND (Ocean Sciences)

Chemical oceanography, biogeochemistry of trace metals and radionuclides, aquatic chemistry, geochemistry

EDMUND BURKE III (History)

Islamic history, modern Middle East and North African history, French history, European imperialism, world history

MELISSA L. CALDWELL (Anthropology)

Poverty and welfare, religious development work, food, transnationalism, socialism and postsocialism, Russia, the former Soviet Union, and Eastern Europe

MARK CIOC (History)

German history, modern European history, environmental history

DANIEL P. COSTA (Ecology and Evolutionary Biology)

Physiological ecology of marine mammals and birds

DONALD CROLL (Ecology and Evolutionary Biology)

Ecology and conservation of islands and seabirds

BEN CROW (Sociology)

International development, sociology of water and markets, global inequality, South Asia and East Africa, political economy, and green enterprise

E. MELANIE DUPUIS (Sociology)

Economic sociology, sociology of consumption, sociology of development, political sociology, sociology of the environment, technological change, historical sociology, social theory, food and social change

KENT EATON (Politics)

Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

JAMES ESTES (Ecology and Evolutionary Biology, and Ocean Sciences)

Marine sciences, community ecology

ANDREW FISHER (Earth Sciences and Planetary Sciences)

Hydrogeology, crustal studies, heat flow, modeling

JONATHAN A. FOX (Latin American and Latino Studies)

Latin American and Latino politics, including issues of democratization, social movements, social and environmental policy, immigration, and public interest groups

LAUREL R. FOX (Ecology and Evolutionary Biology)

Terrestrial population and community ecology, plant-animal interactions

DIANE GIFFORD-GONZALEZ (Anthropology)

Paleolithic and Neolithic Africa and Eurasia, colonial New Mexico, origins of food production, pastoralists, zooarchaeology, history of archaeology, interpretive theory, visual anthropology

JAMES B. GILL (Earth Sciences and Planetary Sciences)

Igneous petrology, geochemistry of island arcs

GARY B. GRIGGS (Earth Sciences and Planetary Sciences)

Coastal processes, hazards and engineering

DANIEL GUEVARA (Philosophy)

Kant, moral philosophy, moral psychology, environmental ethics, history of modern philosophy

JULIE H. GUTHMAN (Community Studies)

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

DONNA J. HARAWAY (History of Consciousness and Feminist Studies)

Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

SUSAN HARDING (Anthropology)

Culture, politics, narrative, gender, local/global studies, ethnographic writing, fundamentalism, Christianity, state-making, aging, America, and Spain

A. MARM KILPATRICK (Ecology and Evolutionary Biology)

Disease ecology, population biology

PAUL L. KOCH, Professor (Earth and Planetary Sciences)

Isotope biogeochemistry, vertebrate paleontology

RONNIE D. LIPSCHUTZ (Politics)

International relations; international political economy; foreign policy; resource/environmental politics; global political networks; global civil society; film, fiction, and politics; technology and society; states of terror

FLORA LU, Assistant (Latin American and Latino Studies)

Ecological anthropology, human behavioral ecology, Amazon rainforest, indigenous peoples, conservation, Ecuador, culture change, market integration, indigenous resource management, political ecology, environmental justice

PAUL M. LUBECK (Sociology)

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

ANDREW SALVADOR MATHEWS (Anthropology)

Environmental anthropology, science and technology studies, conservation and development

JONATHAN MOORE (Ecology and Evolutionary Biology)

Freshwater ecology, conservation biology

INGRID M. PARKER (Ecology and Evolutionary Biology)

Plant ecology, plant-pathogen interactions, biological invasions

MANUEL PASTOR JR., (Latin American and Latino Studies)

Urban poverty and regional development, Latinos in the urban U.S., environmental justice, macroeconomic stabilization in Latin America; distribution and growth in the developing world; Cuban economic reform; Mexican economic reform

ADINA PAYTAN, IMS Research Scientist (Earth and Planetary Sciences)

Biogeochemistry, paleoceanography, environmental and aquatic chemistry

GRANT H. POGSON (Ecology and Evolutionary Biology)

Molecular population genetics, ecological genetics, marine invertebrates and fishes

DONALD C. POTTS (Ecology and Evolutionary Biology)

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

PETER T. RAIMONDI (Ecology and Evolutionary Biology)

Marine ecology, evolutionary ecology, experimental design, applied ecology

DANILYN RUTHERFORD (Anthropology)

Borders and frontiers, colonialism, nationalism, ethnicity, kinship, performance, Christianity, secularism, sovereignty, publics, affect, technology, governancy, theory and method in anthropology, West Papua, Indonesia, the U.S.

ALI SHAKOURI (Electrical Engineering)

Quantum electronics; nano- and microscale heat and current transport in semiconductor devices; thermoelectric/thermionic energy conversion; renewable energy sources; thermal imaging; micro-refrigerators on a chip; and optoelectronic integrated circuits

LISA C. SLOAN (Earth Sciences and Planetary Sciences)

Paleoclimatology, climate change, Earth system science, surficial processes

DONALD R. SMITH (Microbiology and Environmental Toxicology)

Neurotoxicity, cellular and organismal responses to environmental toxins

ANDREW SZASZ (Sociology)

Environmental sociology (environmental movements, policy, environmental justice); theory

DANA Y. TAKAGI (Sociology)

Social inequality and identity, research methods, race relations, nationalism and social movements

ANNA TSING (Anthropology)

Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnographies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

TERRIE M. WILLIAMS (Ecology and Evolutionary Biology)

Vertebrate locomotor and thermoregulatory physiology; marine biodiversity; comparative vertebrate energetics, exercise physiology

PATRICIA ZAVELLA (Latin American and Latino Studies)

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational

migration of Mexican/lo workers and U.S. capital

Program Description

The environmental studies major prepares students for meaningful lifetime engagement with the environmental challenges that are facing society. UCSC environmental studies graduates hold leadership positions as legislative and policy analysts, environmental management officials, educators, restoration ecologists, conservation and field biologists, museum curators, business consultants, and political advocates. In addition, many graduates go on to obtain professional, master's, or doctoral degrees at the nation's finest institutions.

Students pursue an interdisciplinary curriculum that combines course work in the natural and social sciences. Introductory courses cover the ecological, political, and economic aspects of historic, current and future environmental issues. The core course, Environmental Studies 100/L, *Ecology and Society* (most often completed during the fall quarter of a student's junior year) builds on the skills acquired in the lower-division classes, and encourages students to apply ecological, economical and political skills toward environmental and ecosystem management. The remaining upper-division elective courses further emphasize the integration of ecological knowledge with an understanding of social institutions and policies. The program emphasizes active, interdisciplinary learning with the overall objective of instilling the necessary skills to conserve biodiversity and integrate the principles of sustainability with respect to management of complex environmental systems. Faculty work on these issues at local, regional, and global levels providing a unique, proactive, and progressive academic environment for students wishing to pursue a degree program within the Environmental Studies Department.

In addition to the single environmental studies major, students may choose to pursue one of three combined majors with biology, Earth sciences, or economics. The combined major curricula offer the unique integration of the underlying concepts of environmental studies with a focus on the application of these concepts in a closely related field (or vice versa).

As a complement to classroom instruction and research, many courses have field components. The Environmental Studies Internship Program helps qualified students find placements with government and educational agencies, community organizations, and private firms. Furthermore, faculty-directed, independent, or field-oriented research courses allow environmental studies students the opportunity to learn more about their specific academic career or personal interests, often while earning academic credit.

Requirements for the Major

Prerequisites for the Single Major

Continuing UCSC students are required to complete all six prerequisite courses before taking Environmental Studies 100/L. Five of the prerequisite courses are pre-set and are listed below. See the course descriptions for more specific information.

Environmental Studies 23, *The Physical and Chemical Environment* (offered in spring quarter); or Chemistry 1A, *General Chemistry*.

Environmental Studies 24, *General Ecology* (offered in fall and summer quarters); or Ecology and Evolutionary Biology 20C, *Ecology and Evolution*. *

Environmental Studies 25, *Environmental Policy and Economics*. Offered in winter and summer quarters.

Applied Mathematics and Statistics 2, *Pre-Statistics*; or Applied Mathematics and Statistics 3, *Precalculus for Science and Engineering*; or Mathematics 3, *Precalculus*; or a score of 3 or higher on the College Board AP calculus examination, or equivalent. Check the catalog for the quarters offered.

Applied Mathematics and Statistics 7/L, *Statistical Methods for the Biological and Environmental Studies*. Check the catalog for the quarters offered. Applied Mathematics and Statistics 2, *Pre-Statistics*, or Applied Mathematics and Statistics 3, *Precalculus for Science and Engineering*, or Mathematics 3, *Precalculus* is a required prerequisite for this course.

*Prerequisite for Environmental Studies 24 is Applied Mathematics and Statistics 2 or 3 or Mathematics 3.

In addition, students choose one introductory course in sociology, cultural anthropology, or ethics. The acceptable courses are as follows:

Anthropology 2, *Introduction to Cultural Anthropology*

Sociology 1, *Introduction to Sociology*

Sociology 10, *Issues and Problems in American Society*

Sociology 15, *World Society*

Philosophy 21, *Wilderness Studies*

Philosophy 22, *Introduction to Ethical Theory*

Philosophy 24, *Introduction to Ethics: Contemporary Moral Issues*

Philosophy 28, *Environmental Ethics*

Philosophy 80G, *Bioethics in the 21st Century: Science, Business, and Society*

Plan One

| Year | Fall | Winter | Spring |
|------------|----------------------------------|--|---------------------------------|
| 1st (frsh) | MATH 3 or AMS 2 or 3 gen ed | AMS 7/L or SOC/ANTH/ Ethics gen ed | ENVS 23 gen ed |
| 2nd (soph) | PHYS 5D MATH 23A CMPE 12/L | EE 101/L AMS 20 MATH 23B | EE 171/L CMPS 13/L gen ed |
| 3rd (jr) | ENVS 100/L | | |

Plan Two

| Year | Fall | Winter | Spring |
|------------|-------------------|---|---|
| 1st (frsh) | ENVS 24 gen ed | ENVS 25 AMS 7/L or SOC/ANTH/ Ethics | ENVS 23 AMS 7/L or SOC/ANTH/ Ethics |
| 2nd (soph) | ENVS 100/L | | |

Declaration Process for Environmental Studies Students

Students wishing to declare within the Environmental Studies Department are to visit the Environmental Studies web site at <http://envs.ucsc.edu/undergraduate> and follow the steps listed there. In order to be officially declared and enroll in the core course, Environmental Studies 100/L, students must have the official declaration of major form filed with the Environmental Studies Department. Study plans may be downloaded

from the environmental studies web site (<http://envs.edu/undergraduate/>).

Transfer Students

Transfer students are accepted in the environmental studies major in the fall quarter only. Students transferring to UCSC should complete as much of the lower-division curriculum as possible, with a grade of C or better, at another recognized institution before transferring to UCSC. Below is an outline of acceptable substitute courses for the lower-division environmental studies single major prerequisites. Please note that as of fall 2006, all students wishing to pursue a degree within the Environmental Studies Department must complete Applied Mathematics and Statistics 7/L at UCSC to fulfill the introductory statistics requirement. It is recommended that transfer students plan to enroll in Applied Mathematics and Statistics 7/L and any other missing prerequisite during the summer quarter.

- Completion of an introductory college chemistry course will substitute for Environmental Studies 23.
- Two courses, one in politics, one in economics, will substitute for Environmental Studies 25.
- A college-level precalculus course will substitute for Mathematics 3 or Applied Mathematics and Statistics 3 at UCSC.

Environmental Studies 24 and 25 are offered during Summer Session at UCSC, and transfer students are encouraged to take them. If you are transferring, compare catalog descriptions, consult your current institution's adviser, and refer to the ASSIST web site, www.assist.org, to determine equivalency.

Upper-Division Requirements

In addition to lower-division course work, students are required to complete nine upper-division courses: Environmental Studies 100/L, *Ecology and Society* (environmental studies core course, offered once yearly during the fall quarter).

Seven upper-division electives (environmental studies courses numbered 101-179). One must be based in the social sciences and one course must be based in the natural sciences. List of these courses is available from the Environmental Studies Department.

Senior comprehensive requirement (see below).

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. A primary goal of the environmental studies major is to train students who are able to critically analyze interdisciplinary environmental problems, justify their position on an issue, and communicate that position to a range of audiences in writing. The DC Requirement in environmental studies is satisfied by completing Environmental Studies 100/L and one of the following courses: 183B, 190, 195A, 195B, or 196.

Comprehensive Requirement

The senior comprehensive may be satisfied by completing one of the options listed below. Before enrolling in the senior thesis or senior internship option, students must formally apply to work with a particular faculty mentor very early in their thesis or project preparation. These courses require careful planning, additional independent research, and at least a two-quarter commitment.

Environmental Studies 183B, *Senior Internship*

Environmental Studies 190, *Capstone Course: Environmental Problem Solving* (offered winter quarter only)

Environmental Studies 195A or 195B, *Senior Thesis*
Environmental Studies 196 (one course from the series), *Senior Seminar*

Students with advanced skills in one of the graduate focal areas may also take a graduate seminar by invitation from the instructor.

Major Disqualification Policy

There are six introductory requirements for the environmental studies major. Five required courses include: Environmental Studies 23; Environmental Studies 24 (or Biology: Ecology and Evolutionary Biology 20C); Environmental Studies 25; Applied Mathematics and Statistics 2 or 3 or Mathematics 3; Applied Mathematics and Statistics 7/L.

Students must also take one of the following courses: Anthropology 2; or Philosophy 21, 22, 24, 28, or 80G; or Sociology 1, 10, or 15.

Students are also required to complete Environmental Studies 100/L.

A student who either 1) fails two of these required courses, or 2) fails one required course twice, will be disqualified from the major. The department also reserves the right to disqualify from the major students who fail three or more upper-division environmental studies elective courses numbered 100 or above.

Procedures

Students who wish to appeal their disqualification based on extenuating circumstances must submit a letter to the department chair or designee within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

Requirements for the Combined Majors

Environmental Studies/Biology

This course of study provides students with the basic tools of biological science and sufficient understanding of resource conservation, conservation biology, and concerns about environmental sustainability to apply these tools to environmental problems.

Prerequisites

All courses must be taken for a letter grade.

Biology and mathematics courses may require placement examinations. See course descriptions for prerequisite information.

Ecology and Evolutionary Biology 20A, 20B, and 20C
Environmental Studies 25

Anthropology 2; or Philosophy 21, 22, 24, 28, or 80G; or Sociology 1 or 15

Applied Mathematics and Statistics 3, *Precalculus* or Applied Mathematics and Statistics 2 *Pre-Statistics*; Mathematics 3; or a score on the math placement examination or the College Board AP calculus examination sufficient to be placed into calculus)

Applied Mathematics and Statistics 7 and 7L

Chemistry 1A, 1B, and 1C/N

Two courses in physics, Physics 1 and 2, or Physics 6A/L and 6B/M.

Upper-Division Requirements

Students are required to complete nine upper-division courses and the comprehensive requirement listed below.

Environmental Studies 100/L (prerequisites are: Chemistry 1A; Ecology and Evolutionary Biology 20C; Environmental Studies 25; Applied Mathematics and Statistics 2 or 3, or Mathematics 3; Applied Mathematics and Statistics 7/L; and the cultural anthropology/sociology/philosophy option).

Biology 105, *Genetics*

Biology 175, *Evolution*

Six upper-division courses, three in biology and three in environmental studies. One of the six must be a laboratory course, and one of the three environmental studies courses must be based in the social sciences. Students wishing to pursue an advanced degree in the pure or applied sciences are strongly encouraged to complete the organic chemistry series as well. Chemistry 108A/L and 108B/M may be substituted to fulfill one of the upper-division biology elective requirements.

These upper-division elective courses should be selected in pursuit of a coherent plan of study, chosen in consultation with faculty sponsors from both the Biological Sciences and Environmental Studies Departments. None of the three environmental studies upper-division courses can be an environmental studies internship, individual study, or substitution course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement for the environmental studies/biology combined major is satisfied by completing Environmental Studies 100/L and one of the following courses: Environmental Studies 183B, 190, 195A, 195B, or 196, or Biology: Ecology and Evolutionary Biology 109.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing either:

- one of the options for environmental studies majors (see Comprehensive Requirement above); or
- one of the approved internships, independent research or field course or a thesis

Disqualification Policy for the Environmental Studies/Biology Combined Major

All environmental studies/biology combined majors are covered by the biology and environmental studies major disqualification policies, which limit the number of times a student may receive a No Pass, D, and/or F in the introductory major requirements for both biological sciences and environmental studies and still remain a combined major, and which also limits the number of times a student may receive a No Pass, D, and/or F in upper-division biology and environmental studies courses. Students should refer to the Biological Sciences section and the Major Disqualification Policy section above for more information.

Environmental Studies/Earth Sciences

This course of study provides students with the basic tools of Earth sciences and environmental studies needed to address environmental problems.

Prerequisites

Applied Mathematics and Statistics 7 and 7L

Mathematics 11A-B (or 19A-B)

Chemistry 1A, 1B/M, and 1C/N
 Physics 6A/L and 6B/M (or 5A/L and 5B/M)
 Earth Sciences 20/L (or 5/L or 10/L)
 Environmental Studies 24 and 25
 Anthropology 2 or Philosophy 21, 22, 24, 28, or 80G
 or
 Sociology 1 or 15.

Upper-Division Requirements

Earth Sciences 110A/L, 110B/M, or 110C/N

Environmental Studies 100/L (Prerequisites are:

Chemistry 1A, Ecology and Evolutionary Biology 20C, Environmental Studies 25, Applied Mathematics and Statistics 2 or 3 or Mathematics 3, Applied Mathematics and Statistics 7/L, and the cultural anthropology/sociology/philosophy option)

Three additional upper-division environmental studies courses, including at least one course based in the social sciences

Three additional upper-division Earth sciences courses

The upper-division courses should be selected in pursuit of a coherent plan of study, such as water policy-hydrology, restoration ecology-geochemistry, agroecology-soil physical processes, or environmental policy-climate change, among others, in consultation with faculty from both the Environmental Studies and Earth Sciences Departments. None of the three environmental studies upper-division courses can be an environmental studies internship, individual study or substitution course.

Disqualification Policy for the Environmental Studies/Earth Sciences Combined Major

All environmental studies/earth sciences majors are covered by the earth science and environmental studies major disqualification policies.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement for the environmental studies/Earth and planetary sciences combined major is satisfied by completing Environmental Studies 100/L and one of the following courses: Environmental Studies 183B, 190, 195A, 195B, or 196, or Earth Sciences 195 or 188A-B.

Comprehensive Requirement

Students satisfy their senior comprehensive requirement in environmental studies or Earth sciences by completing either:

One of the senior comprehensive options for single environmental studies majors (see Comprehensive Requirement above) or one of the senior comprehensive options for Earth sciences majors (see Comprehensive Requirement under Earth Sciences).

Environmental Studies/Economics

This major provides students with the basic tools of economic analysis and an understanding of the mechanics of resource production, conservation, and use, in both ecological and economic terms.

Prerequisites

Economics 1, 2, 11A, 11B

Environmental Studies 23, 24, 25

Anthropology 2; or Philosophy 21, 22, 24, 28, or 80G; or Sociology 1 or 15.

Upper-Division Requirements

Economics 100A, Intermediate Microeconomics

Economics 113, Econometrics

Environmental Studies 100/L

Six elective courses from, three from each discipline.

Only specifically approved economics electives. List of approved courses available at the Economics Department. *

Environmental Studies courses numbered 101-179, with one course based in the natural sciences. None of the three environmental studies upper-division courses can be an environmental studies internship, individual study or substitution course.

* Subject to change. Please see the Economics Department adviser or the environmental studies adviser for the most up-to-date approved course listings.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement in environmental studies/economics combined major is satisfied by completing Environmental Studies 100/L and one of the following courses: Environmental Studies 183B, 190, 195A, 195B, or 196.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the following:

- one of the options for environmental studies majors (see Comprehensive Requirement above); and
- pass those portions of the economics comprehensive examination administered in Economics 100A and 113.

Disqualification Policy for the Environmental Studies/Economics Combined Major

There are eight introductory requirements for the environmental studies/economics combined major. Seven required courses include: Environmental Studies 23, Environmental Studies 24 (or Biology: Ecology and Evolutionary Biology 20C); Environmental Studies 25; Economics 1; Economics 2; Economics 11A; and Economics 11B. Students must also take one of the following courses: Anthropology 2, Philosophy 21, 22, 24, 28, or 80G, or Sociology 1, 10, or 15. Students are also required to complete Environmental Studies 100/L. A Student who either (1) fails two of these required courses, or (2) fails one required course twice, will be disqualified from the combined major. The department also reserves the right to disqualify from the combined major students who fail three or more upper-division environmental studies or economics elective courses numbered 100 or above.

Honors

Senior Comprehensive Honors. Only applicable is senior thesis, internship, or individual work in a senior seminar. Honors must be awarded by the student's faculty sponsor, and a second faculty member (chosen by the student's advisor) must confer.

Departmental Honors. To be considered for departmental honors, students must have a grade point

average (GPA) of 3.5 in upper-division environmental studies courses.

Highest Departmental Honors. To be considered for highest departmental honors, students must have a GPA of 3.75 in the major in upper-division environmental studies courses, and received honors on the senior comprehensive.

For combined majors, students must fulfill all requirements for honors from both departments.

Graduate Program

The doctor of philosophy (Ph.D.) program in Environmental Studies at UCSC draws from two areas of knowledge: ecology and social sciences. Our interests in ecology range from conservation biology, to agroecology, and to global change. Our interests in the social sciences bridge the dimension between environmental policy analysis and political economy of the environment. These all are historically independent fields and UCSC's program is one of the first to link them.

Graduates of the program are expected to be informed in all of these fields, to have deep intellectual strength in their area of specialty, and to have made substantial contributions toward the understanding of an environmental problem. We expect our doctoral students to be as skilled and intellectually rigorous within their research emphases as are students emerging from more traditional programs-but also to possess the knowledge needed to understand, analyze, and communicate in different but highly relevant fields of study. This expectation of intellectual breadth as well as disciplinary depth is a central goal of our doctoral program.

Given the strong interdisciplinary focus of the environmental studies Ph.D. program, study in other fields is encouraged. The environmental studies faculty have a wide range of research interests, and most are affiliated with other departments on campus. Students have the option of pursuing a "designated emphasis in environmental studies," the equivalent of a graduate minor. These provide a framework for in-depth study in specialized fields in your area, and an opportunity for recognition of particular scholarly expertise. We currently have agreements with the Ecology and Evolutionary Biology, Latin American and Latino Studies, Sociology, and Applied Mathematics and Statistics Departments, and are pursuing agreements with others.

Requirements for the Doctorate

The typical duration of the doctoral program is five to six years.

A dissertation in environmental studies is expected to present an original contribution to the understanding of a significant environmental problem or issue. It should demonstrate a clear understanding of the relevant literature, careful and rigorous research design, and effective communication of the results within the context of the student's area of emphasis.

Also note:

- Students are expected to serve as teaching assistants in undergraduate courses for two quarters, unless they can demonstrate equivalent experience.
- Students have the option of pursuing a "designated emphasis," the equivalent of a graduate minor. Designated emphases provide a framework for in-depth study in specialized fields in the area, and an opportunity for recognition of particular scholarly expertise. The Environmental Studies Department has agreements with the Sociology Department and the Latin American and Latino Studies

Department, and is pursuing agreements with other departments.

- The Environmental Studies Department does not offer a terminal master's degree, except for students who have been advanced to candidacy but who do not complete the Ph.D. dissertation.

Program Prerequisites

The interdisciplinary nature of the core curriculum requires rigorous preparation at the undergraduate level. Students are expected to have had at least one course in statistical analysis. Calculus is useful in many areas of the program and essential to independent work in some areas. In addition, all students should have—either from prior course work or independent reading—an advanced upper-division knowledge of ecology; genetics; evolutionary biology; macro- and microeconomics; politics; and political economy. However, preparation in these areas is best accomplished by course work.

Committees

On admission to the program, each student is assigned a guidance committee of three faculty: two from the student's general research area and one from a complementary field. Thus, a student whose interests are in conservation biology has two committee members who are natural scientists and one who is a social scientist; similarly, a student whose interests are in the political economy of agriculture has a natural scientist on the guidance committee.

Through the membership of the committee may change as the student forms relationships with particular faculty and begins to define the dissertation research, subsequent committees always include one environmental studies faculty member from the other metadiscipline to ensure that the student takes fully into account the interdisciplinary implications of the student's training and research.

Under the guidance of an interdisciplinary faculty committee, a student is expected to begin to define and plan further education and research. For some students, further education and research may involve closely focused preparation and additional course work in particular fields, (such as ecology, economics, or politics), guided by environmental studies faculty and other campus and UCSC faculty. Depending on the student's background, interests, and intentions, the student's advisers may suggest or require additional course work, including courses from other departments.

The guidance committees work with students throughout the first two years to ensure that each student's preparation is individually designed to meet particular needs and interests. At the same time, the various research-seminar formats are intended to encourage students to work collaboratively in reading and research preparation.

Required Courses

- Environmental Studies 201A, *Keywords and Concepts* part 1
- Environmental Studies 201B, *Keywords and Concepts* part 2
- Environmental Studies 201M, *Interdisciplinary Research Methods*
- Environmental Studies 201N, *Interdisciplinary Research Design*
- Two of the following, one each from the social and natural sciences:
- Social Sciences:

- o Environmental Studies 210, *Political Ecological Thought and the Environment*, or
- o Environmental Studies 240, *Public Policy and Conservation*
- Natural Sciences:
 - o Environmental Studies 220, *Conservation Biology*, or
 - o Environmental Studies 230, *Agroecology and Sustainable Agriculture*
- An upper-division or graduate course in quantitative methods, providing a basis in research design and analysis

These courses are designed to ensure that students acquire disciplinary depth in their chosen research fields; gain experience of their research communities; and refine the research skills necessary to perform successfully in their professional arena.

In addition, every quarter before advancement to candidacy, all students are required to participate in:

- Environmental Studies 290, *Interdisciplinary Research Seminar* (2 credits)
- Environmental Studies 290L, *Graduate Research Seminar* (2 credits)
- Environmental Studies 292, *Topics in Research in Environmental Studies* (2 credits)

Graduate students are encouraged to participate in course Environmental Studies 291, *Advanced Readings in Environmental Studies*, in areas of interest.

Pre- and Qualifying Examinations

During the second year, students prepare for the pre-qualifying examination, which must be taken no later than winter quarter of the third year. The qualifying examination for advancement to candidacy normally takes place by the end of the spring quarter of the third year (UCSC requires that the qualifying examination be completed no later than the end of the fourth year).

If the venue of a student's research is in a non-English-speaking country, a language examination testing for reading and speaking competence in the language of that country must be passed before advancement to candidacy.

Application and Admission

For admission to the doctoral program, students must have completed a bachelor's degree or the equivalent in a related disciplinary field. Students with interdisciplinary degrees, such as environmental studies should have disciplinary course work equivalent to a double major or a master's degree in an appropriate field.

Superior scholarship, capacity to carry out independent research, and commitment to disciplinary integration must be demonstrated in the statement of purpose, course work, Graduate Record Examination (GRE) General Test, and letters of recommendation. The GRE Subject Test (in a disciplinary field of the student's choice) is strongly recommended. Prospective students must contact faculty directly to inquire about specific course requirements and sponsorship. Students are rarely accepted into the program without significant, early communications with potential faculty sponsors. See the faculty list at <http://envs.ucsc.edu/faculty/> for contact information.

Other considerations for admission include grades, evaluation, publications, professional or extramural experience, and more than one degree (second bachelor's or master's). Students are required to have completed coursework, or equivalent practical experience, in ecology, statistics, sociology/political science,

and economics. Limited deficiencies in these areas can be remedied during the first year of graduate study. In addition to the application materials, students are strongly encouraged to submit a substantial written project (undergraduate or master's research project).

Admissions information and the online graduate application are at the UCSC Division of Graduate Studies web site under prospective student information (<http://graddiv.ucsc.edu/prospective/whyucsc.php>).

Admission is only considered for the fall quarter. Completed applications are due by December 15th of the previous academic year.

Lower-Division Courses

15. Natural History of the UCSC Campus (2 credits). S

Introduces students to the range of natural species and communities occurring on the UCSC campus. All class time is spent outside, and each week a different area of campus is visited. Course 24 is recommended. Enrollment limited to 21. C. Lay

23. The Physical and Chemical Environment. S

Introduces students to basic physical and chemical processes that govern the structure and function of ecosystems. Topics to be covered include climate and weather, soil types and their formation, and biogeochemical cycles. (General Education Code(s): IN.) W. Cheng

24. General Ecology. F

Covers principles of ecology including limits to species abundances, evolutionary ecology, population dynamics, community interactions and patterns, and ecosystem patterns and dynamics. Prerequisite(s): Applied Mathematics and Statistics 2 or 3, or Mathematics 3 or higher level Mathematics course or placement exam score of 31 or higher; or AP Calculus AB exam score of 3 or higher; course 23 recommended as prerequisite to this course. (General Education Code(s): SI, IN.) J. Washburn

25. Environmental Policy and Economics. W

Environmental policy issues are situated within historical developments in political and economic systems. Introduces some of the key concepts of politics and economics by way of examining the processes which have given rise to environmental issues, their social and political perception, and institutional responses. Enrollment limited to 450. (General Education Code(s): PE-E, IS.) J. Barsimantov

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) The Staff

80A. The Future of Rain Forests. *

A broad overview of both ecological and social aspects related to tropical rain forests drawing on case studies worldwide. Topics include the biology and distribution of rain forests, causes and effects of their destruction, and management options to facilitate their conservation. (General Education Code(s): PE-E, T7-Natural Sciences or Social Sciences.) The Staff

80B. The Ecological Forecast for Global Warming. F

A broad overview of the impacts of human activities on the global climate system. Topics include how climate affects the distribution of ecosystems, the influence of global climate change on biodiversity, ecosystem function, and consequences for the human enterprise. (General Education Code(s): PE-E, T7-Natural Sciences or Social Sciences.) M. Loik

83. Environmental Studies Internship. F,W,S

A supervised off-campus learning experience related to environmental problem solving. Focuses on initial experiences in applied work and specific skill development. Students may be placed individually or with a team in government agencies, private organizations, citizen action groups. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

84. Environmental Studies Internship (2 credits). F,W,S

Supervised learning experience designed to introduce environmental issues and problem solving. Places students with governmental and nongovernmental agencies, private organizations, schools, or in specialized apprenticeships. Two-unit internship intended to focus interest and to develop skills for more advanced work. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

91F. Community and Agroecology (2 credits). F,W,S

Interdisciplinary two-credit seminar designed to introduce students to concepts of community and agroecology in the context of sustainability. Course can serve as a gateway to or as a continuing basis for participation in PICA (Program in Community and Agroecology). Specific topics and readings change each quarter. Enrollment limited to 25. May be repeated for credit. *S. Gliessman*

99. Tutorial. F,W,S

Directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chairperson of Environmental Studies Department. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Provides for department-sponsored directed reading, supervised research, or organized project for lower-division students under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Upper-Division Courses***100. Ecology and Society. F**

Introduction to environmental issues in an interdisciplinary matrix. Focuses on three issues at the intersection of ecological questions and social institutions: agroecology and sustainable agriculture; population growth, economic growth, and environmental degradation; and biodiversity conservation and land management. Reviews the important roles of disciplinary abstraction and of the application of that knowledge to context-dependent explanation of environmental problems. Enrollment restricted to environmental studies, environmental studies/biology, environmental studies/economics, and environmental studies/Earth sciences majors. Prerequisite(s): course 23 or Chemistry 1A; course 24 or BIOE 20C; course 25; and Applied Mathematics and Statistics 7/L; and one from: Anthropology 2, Sociology 1,10,15, Philosophy 21,22,24,28, or 80G. Concurrent enrollment in 100L is required. *Z. Tzankova, E. Zavaleta*

100L. Ecology and Society Writing Laboratory (2 credits). F

Required writing lab accompanying course 100. Students are introduced to writing in different styles and for different audiences typical of the ecosystem-society interface. Course 100 writing assignments are developed, written, and revised in conjunction with the lab. W credit is granted only upon successful completion of course 100.

Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in 100 is required. (General Education Code(s): PR-E.) *Z. Tzankova, E. Zavaleta*

104A. Introduction to Environmental Field Methods. W

A course in basic field skills including habitat description, behavior observation, specimen collection techniques, mapping and map interpretation, vegetation analysis, population sampling, microclimate measurement, soil and water sampling. Emphasis on use of the scientific method; experimental design, data handling, statistical analysis and presentation; and basic field methodologies. Enrollment restricted to environmental studies majors and combined majors. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; concurrent enrollment in course 104L and previous or concurrent enrollment in courses 100/L required, or by permission of instructor. (General Education Code(s): W.) *E. Zavaleta*

104L. Field Methods Laboratory (2 credits). W

Students directly observe elements of natural history and ecological process; design and implement field studies based on lectures; deploy the methods discussed in lectures; and collect data to analyze, interpret, and report in written and oral forms. Concurrent enrollment in course 104A is required. *E. Zavaleta*

107A. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107B and 107C required. Enrollment restricted to environmental studies majors and combined majors with biology, Earth sciences and economics. Students are billed a materials fee. *The Staff*

107B. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107A and 107C required. Enrollment restricted to environmental studies majors and combined majors with biology, Earth sciences and economics. *The Staff*

107C. Natural History Field Quarter. S

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107A and 107B required. Enrollment restricted to environmental studies majors and combined majors with biology, Earth sciences and economics. *The Staff*

108. General Entomology. *

Introduction to entomology including anatomy, physiology, systematics, evolution, behavior, and reproduction of the world's most diverse group of organisms. These topics

are illustrated in several contexts, from the importance of insects as disease vectors to the historical and contemporary uses of insects by humans. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors with biology, Earth sciences and economics. Offered in alternate academic years. *D. Letourneau*

108L. General Entomology Laboratory (3 credits). *

Laboratory sections are devoted to the identification of insects. Individual collections representing 15 orders, sight identification of 60 families, and use of taxonomic keys for positive designations required. Concurrent enrollment in course 108 is required. Offered in alternate academic years. *D. Letourneau*

109A. Ecology and Conservation in Practice Super-course: Ecological Field Methods. *

An intensive, on-site learning experience in terrestrial field ecology and conservation, using the University of California Natural Reserves. Students study advance concepts in ecology, conservation, and field methods for four weeks, then experience total immersion in field research at the UC Natural Reserves. Lectures, field experiments, and computer exercises familiarize students with research methods, study design, statistical approaches, and analytical tools for ecological research. Enrollment by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151B-C-D or ENVS 109B-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 107, 107L, ENVS 104A or 196A. (Also offered as Biology:Ecology & Evolutionary 151A. Students cannot receive credit for both courses.) *D. Croll*

109B. Ecology and Conservation in Practice Super-course: Ecological Field Methods Laboratory. *

Field-oriented course in ecological research. Combines overview of methodologies and approaches to field research with practical field studies. Students complete field projects in ecology and also learn the natural history of the flora and fauna of California. Students are billed a materials fee. Enrollment by application. Prerequisite(s): Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-C-D or ENVS 109A-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A. (Also offered as Biology:Ecology & Evolutionary 151B. Students cannot receive credit for both courses.) (General Education Code(s): W.) *D. Croll*

109C. Ecology and Conservation in Practice Super-course: Functions and Processes of Terrestrial Ecosystems. *

From lectures and discussion of terrestrial community and ecosystem ecology, students work individually or in small groups to present an idea for a project, review relevant literature, develop a research question/hypothesis, design and perform an experiment, collect and analyze data, and write a report. The instructor evaluates the feasibility of each student's project before it begins. Enrollment by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-D or ENVS 109A-

B-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENV5 104A or 196A. (Also offered as Biology:Ecology & Evolutionary 151C. Students cannot receive credit for both courses.) *D. Croll*

109D. Ecology and Conservation in Practice Supercourse: Conservation in Practice. *

Focuses on current issues in environmental and conservation biology and the emerging field methods used to address them. From field-oriented lectures about current issues in environmental and conservation biology, students pursue research project as individuals and small groups to develop hands-on experience with field skills in conservation research and resource management. Enrollment by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENV5 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-C or ENV5 109A-B-C is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENV5 104A or 196A. (Also offered as Biology:Ecology & Evolutionary 151D. Students cannot receive credit for both courses.) *D. Croll*

110. Institutions, the Environment, and Economic Systems. S

Debate about environmental policy is often couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on the functioning of the market system. Examines the assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy and political institutions. Prerequisite(s): previous or concurrent enrollment in courses 100 and 100L, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors with biology, Earth sciences and economics. *M. Fitzsimmons*

115A. Geographic Information Systems and Environmental Applications. F

Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 215A. Enrollment restricted to environmental studies majors and combined majors. Prerequisite(s): Previous or concurrent enrollment in course 115L, 100/L, or permission of instructor. Course in computer science, Earth science, math, or geography recommended. Enrollment restricted to environmental studies majors and combined majors. *B. Nickel*

115L. Exercises in Geographic Information Systems (2 credits). F

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course 215L. Students are billed a materials fee. Concurrent enrollment in course 115A is required. *The Staff*

120. Conservation Biology. W

Explores biological and anthropogenic influences on the

diversity and scarcity of organisms. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *C. Wilmers*

122. Tropical Ecology and Conservation. *

An introduction to the ecological processes, principles, and players of tropical ecosystems, and to conservation issues facing tropical American forests. We will look at how tropical ecosystems work, roles of humans in shaping them, and current conservation opportunities and dilemmas. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L is required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *G. Gilbert*

123. Animal Ecology and Conservation. S

Advanced course in animal ecology and conservation focusing on the ecology, behavior, biogeography, and evolution of vertebrates. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *C. Wilmers*

129. Integrated Pest Management. S

Provides an extensive coverage of applied ecology, pest control technology, and the social, political, and economic factors regulating the ideologies and practice of pest management. Topics include agroecosystem design and population regulation of insects, weeds, vertebrates, and pathogens; field monitoring, chemical and biological control; economic thresholds, decision-making processes, and the role of agribusiness. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *D. Letourneau*

129L. Integrated Pest Management Laboratory (2 credits). *

Field trips and field exercises that demonstrate the practice of integrated pest management techniques. Individual and group projects provide hands-on experience with field sampling techniques, pest identification, recognition of biological control agents, experimental design, interview techniques, data interpretation and field report writing. Prerequisite(s): concurrent enrollment in course 129. Enrollment restricted to environmental studies majors and combined majors. *The Staff*

130A. Agroecology and Sustainable Agriculture. F

Ecological concepts and principles are applied to the design and management of sustainable agroecosystems. Alternatives for agriculture are discussed in terms of ecosystem structure and function. A weekly three-hour lab is required. Prerequisite(s): Concurrent enrollment in course 130L and previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *S. Gliessman*

130B. Principles of Sustainable Agriculture. W

Agricultural sustainability is examined as a complex set of interactions between ecological, social, and economic components of an agroecosystem. Case studies are drawn from issues facing current U.S. agriculture and a basis for formulating policy for change that ensures sustainability is developed. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *M. Fitzsimmons*

130L. Agroecology and Sustainable Agriculture

Laboratory (2 credits). F

Laboratory and field exercises to train in the analysis of ecological processes in agricultural systems, with a focus on the quantification of ecological sustainability. Experimental design, analysis, and data interpretation are emphasized. Concurrent enrollment in course 130A is required. *S. Gliessman*

131. Insect Ecology. *

Advanced course in ecology featuring insect-plant interactions such as herbivory, pollination, and the effects of plants on insect population dynamics. Lectures emphasize current controversies in ecological theory and relate theory to application. Prerequisite(s): previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. Offered in alternate academic years. *D. Letourneau*

131L. Insect Ecology Laboratory (3 credits). *

Field and laboratory exercises are designed to test hypotheses or demonstrate principles in areas such as behavior, mutualism theory, community ecology, and agricultural ecology. Experimental design, analysis and interpretation of data are emphasized along with observational skills. Prerequisite(s): Concurrent enrollment in course 131 required. Offered in alternate academic years. *D. Letourneau*

133. Agroecology Practicum. *

Lectures and demonstrations are combined with field applications to give students direct experience and knowledge of sustainable agriculture and horticulture practices and principles. UCSC Farm and Garden are the living laboratories for testing agroecological principles. Emphasis is placed on small-farm systems. May be applied to major only once. Prerequisite(s): courses 130A and 130L and previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. Offered in alternate academic years. May be repeated for credit. *C. Shennan*

138. Field Ethnobotany. S

Lectures, laboratory, and fieldwork examine field botany from a human ecology perspective. Students have the opportunity to learn the skills of field botany and plant identification through the study of plants that are of major significance for human cultures. The emphasis of field skills is on applications to sustainable management of natural resources. Prerequisite(s): courses 130A and 130L, or by permission of instructor. Concurrent enrollment in course 138L required. Enrollment restricted to environmental studies majors and combined majors. Offered in alternate academic years. *S. Gliessman*

138L. Ethnobotany Laboratory (2 credits). S

Laboratory and field studies allow students to learn the taxonomy of important useful plant families, carry out field studies on local plant use and management practices, and investigate in detail home garden agroecosystems and model systems. Prerequisite(s): concurrent enrollment in course 138 required. *S. Gliessman*

140. National Environmental Policy. W

An overview of all major federal environmental policy domains. Analyzes political, social, economic, and other forces influencing federal (and some state) public policy responses to land use, natural resources, pollution, and conservation dilemmas. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *D. Press*

141. Ecological Economics. F

Application of economic analysis to natural resource policy and management. Topics include welfare economics, property rights and externalities, natural resource valuation, exhaustible and renewable resources, and sustainable development. Prerequisite(s): Economics 1 is strongly recommended as preparation. Previous or concurrent enrollment in courses 100 and 100L is required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *J. Barsimantov*

142. Energy Politics and Policy. W

Explores the social and environmental dimensions of energy production and consumption. Provides an overview of the tools to evaluate a new clean-energy economy and its wider political and economic implications. Students study assessment tools, such as risk assessment, material energy balances, and life-cycle assessment. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *T. Duane*

142L. Energy Politics and Policy Laboratory (2 credits). *

Trains students in the concepts and skills required to make decisions about energy production. Concurrent enrollment in course 142 required. Enrollment limited to 24. *T. Duane*

143. Sustainable Development: Economy, Policy, and Environment. W

Considers whether and how global poverty can be alleviated without irreparably damaging the environment. Examines interactions among population, economic growth, poverty, global consumption ethos, property rights systems, global economy, state capacity, and environmental damage. Scrutinizes impact of various developmental strategies adopted during the past 50 years on poverty, governance, and the environment. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *J. Bury*

145. Green Building Design. W

Promotes an ecological approach to design with an understanding of the environmental opportunities and constraints at play on the site and situation; works with the environment to maximize human comfort and energy efficiency. Enrollment restricted to environmental studies majors and combined majors. *The Staff*

149. Environmental Law and Policy. S

Surveys a wide range of topics in environmental law, including population control, state and federal jurisdiction, land and resources control, public land management, pollution control, and private rights and remedies. Students read a large number of judicial cases and other legal documents. (Also offered as Legal Studies 149. Students cannot receive credit for both courses.) Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *T. Duane*

150. Coastal and Marine Policy. S

Introduces and analyzes the history, design, implementation, and effectiveness of key legal and institutional frameworks that govern the use and stewardship of coastal and marine areas and resources. Primary focus is on the U.S., although attention is also devoted to international laws and institutions targeting major transboundary issues

like marine pollution and management of migratory fish stocks. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *Z. Tzankova*

151. Environmental Assessment. S

Introduction to California land use planning law and practice, and the theory, practice, and public policy aspects of environmental assessment, using the California Environmental Quality Act (CEQA) as a model. The National Environmental Policy Act (NEPA) and other environmental and planning legislation also considered. Covers elements of State law and regulations, environmental impact assessment requirements, and practical procedures for preparing and evaluating CEQA documents, with case studies that exemplify legal, regulatory and public policy and practice aspects of the assessment process. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *A. Schiffrin*

152. Science and Land Use Decisions. *

Technical and policy dimensions of major land use decisions will be assessed through a detailed case study. Technical review will stress geological constraints; policy review will stress the CEQA process. The initial case study will be the reuse of Ford Ord. One field trip is required. Enrollment restricted to environmental studies majors and combined majors. Prerequisite(s): one of courses 140, 149, 151 (recommended), 165 or Earth Sciences 20; and previous or concurrent enrollment in courses 100 and 100L, or by permission of instructor. *J. Gill*

156. Environmental Action through Writing. *

Guided practice in writing skills useful to environmental activists. Assignments emphasize thinking quickly, revising adeptly, researching resourcefully, and tempering powerful passions with careful arguments. Toward the development of effective individual voices, students read each other's drafts as well as the published work of established writers. Enrollment priority will be given to students who have not taken course 157. Enrollment restricted to environmental studies majors and combined majors. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. (General Education Code(s): W.) *S. Rabkin*

157. Writing in the Natural Sciences. S

Guided practice in writing effectively about science and natural history for a variety of audiences. Assignments emphasize reporting first-hand observations, explaining processes and phenomena, understanding scientific papers, and writing about scientific and technical subjects for a general audience. Enrollment priority will be given to students who have not taken course 156. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and previous or concurrent enrollment in courses 100/L required, or by permission of instructor. Enrollment restricted to environmental studies and combined majors (General Education Code(s): W.) *S. Rabkin*

158. Political Ecology and Social Change. S

The object is to provide a rigorous grounding in the method of political ecology and to demonstrate how this approach has been used in environmental analysis and problem solving by environmental social movements. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L is required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *J. Bury*

159. Nature Literature. *

Introduction to 19th- and 20th-century American writers who have influenced our understanding of humans' place in the natural world. Readings include original works as well as biographical and critical texts. Discussions, field trips, and writing assignments emphasize active learning. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *S. Rabkin*

160. Restoration Ecology. F

A multidisciplinary overview of restoring degraded ecosystems. Among the topics addressed are linkages between ecological principles and restoration, planning and implementing restoration projects, evaluating restoration success, and case studies of restoration of specific ecosystem types. Participation in one work day is required. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L is required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *K. Holl*

161A. Soils and Plant Nutrition. *

Provides fundamentals of soils and plant nutrition. The physical, biological, and chemical components of soils are investigated in relation to their ecological functions, fertility to plants, and sustainable management. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *W. Cheng*

161L. Soils and Plant Nutrition Laboratory (2 credits). *

Practice analytical techniques for evaluation of physical, chemical, and biological properties of soils. Grow plants to observe some typical symptoms of plant nutrient deficiencies. Prerequisite(s): Concurrent enrollment in course 161A is required. *W. Cheng*

162. Plant Physiological Ecology. W

Introduces the theory of plant interactions with the physical environment. Emphasizes influence of abiotic stresses on the recruitment, survival, growth, productivity, and reproduction of plants. Prior course work in ecology and/or plant physiology is recommended. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *M. Loik*

162L. Plant Physiological Ecology Laboratory (2 credits). W

Introduces techniques for the study of plant interactions with the physical environment. Examines the role of stress on energy budgets, water relations, photosynthesis, and reproductive allocation. Emphasizes experimental design, field techniques, and instrumentation during field trips to local chaparral and grassland ecosystems. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. *M. Loik*

163. Plant Disease Ecology. S

Introduction to ecological roles of plant diseases, including their importance in regulating plant population dynamics, community diversity, and system function in natural ecosystems; considerations of plant diseases in conservation ecology; and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 263. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *G. Gilbert*

163L. Plant Disease Ecology Lab (2 credits). *

Introduction to techniques for studying plant diseases, including detection, isolation, cultivation, and identification of important groups of plant pathogens, completing Koch's postulates; diseases assessment techniques; experimental manipulation of plant-pathogen systems; and basic epidemiological tools. One field trip required. Prerequisite(s): concurrent enrollment in course 163 required. *G. Gilbert*

165. Freshwater Issues and Policy. W

Concepts, vocabulary, and skills necessary to the analysis of freshwater issues are introduced from hydrology, ecology, law, economics, engineering, and other disciplines. The skills are then applied to case studies involving local, state, and international freshwater conflicts and crises. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L is required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *B. Haddad*

166. Agroecosystem Analysis and Watershed Management. S

Explores a range of approaches to examine agroecosystem function, watershed management, and concepts of sustainability. Uses a combination of lecture, demonstration, field work, and field trips to illustrate approaches to analysis of managed ecosystems behavior and the integration of biophysical and socio-political knowledge to aid in watershed management. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor; and course 130A or 130B or 129 or 133 or 160 or 167. Enrollment restricted to environmental studies majors and combined majors. *C. Shennan*

167. Freshwater and Wetland Ecology. F

Field and lecture course teaches the physical and biological patterns and processes in freshwater and wetland systems, primarily focusing on Central Coast systems from headwaters to coastal marshes. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *C. Shennan*

167L. Freshwater and Wetland Ecology Lab (2 credits). *

Provides basic skills to assess chemical, biological, and physical characteristics of freshwater creeks, rivers, and wetlands. These skills are needed in environmental consulting, municipal agencies engaging in water management or impacts on water, and regulatory agencies. Relies on methods in geomorphology, biogeochemistry, hydrology, and field biology. Concurrent enrollment in course 167 is required. *The Staff*

168. Biogeochemistry and the Global Environment. W

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural sustainability. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 268. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *W. Cheng*

169. Climate Change Ecology. F

Advanced topics in atmospheric science and ecological theory. Topics include impacts on biodiversity, carbon se-

questration, sustainable agriculture, and innovative solutions. Prerequisite(s): courses 100 and 100L. Enrollment restricted to environmental studies majors and combined majors. Enrollment limited to 40. *M. Loik*

172. Science, Policy, and the Environment. *

Introduces students to the dilemmas of science-based environmental policy and discusses their underlying philosophical underpinnings. Explores emergent alternatives, such as the precautionary principle and alternatives assessment, and examines the relationship between experts and the lay public in public controversies. Prerequisite(s): previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. (General Education Code(s): W.) *S. Rajan*

173. An Introduction to World Environmental History. W

Introduces students to some of the central issues in world environmental history such as: human attitudes toward the natural environment; the role of human societies, their institutions and technologies in changing the face of the earth; and the historical impact of environmental and developmental policies on race, class, and gender differences in a variety of human communities across the world. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *K. Worthy*

175. Biotechnology: Social and Environmental Dimensions. *

Surveys the rapid development of genetic engineering science and biotechnology-based industries and examines the economic, health, environmental, legal, and social justice dimensions of new biotechnology applications: genetic screening, cloning, transgenic animals and crops, genetically engineered food, and biodiversity prospecting. Readings, lectures, World Wide Web site reviews, student presentations, and papers will address controversial choices faced now by scientists, farmers, doctors, consumers, public officials, and global governance agencies. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *The Staff*

177. Teaching Environmental Education. F

Designed for environmental studies majors interested in teaching environmental education in the K-12 school system. Students investigate incorporation of environmental education in the classroom; design an environmental education school project; and are placed in a school where they observe environmental education in practice. Prerequisite(s): course 91F or 191F, and previous or concurrent enrollment in courses 100 and 100L required, or by permission of instructor. Enrollment restricted to environmental studies majors and combined majors. *R. Jaffe*

179. Environmental Interpretation. S

A field course in theory and practice of environmental interpretation in parks, museums, and school programs with special attention to local natural history and children. Students will work to define their own interpretive philosophy, skills, and style. Background in natural history and/or experience working with children recommended. Prerequisite(s): course 100. Concurrent enrollment in course 184 required. Enrollment restricted to environmental studies majors and combined majors with economics, Earth sciences, and biological sciences. Enrollment by instructor interview only. *B. Dowd*

183. Environmental Studies Internship. F,W,S

A supervised off-campus learning experience related to environmental problem solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. Internship intended for environmental studies majors. Prerequisite(s): permission of instructor. Students submit petition to course sponsoring agency. May be repeated for credit. *The Staff*

183B. Senior Internship. F,W,S

This course combines fieldwork at an off-campus agency and a comprehensive analytical paper produced for the agency. Equivalent to a thesis in terms of the depth and quality of the work expected, it is combined with a 5-credit internship. Prerequisite of course 183. Students submit petition to sponsoring agency. Enrollment restricted to environmental studies majors and the combined majors with Earth sciences, biology and economics. Prerequisite(s): Entry Level Writing and Composition requirements. *The Staff*

184. Environmental Studies Internship (2 credits). F,W,S

A supervised learning experience related to environmental problem solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. This 2-credit internship focuses on specific skill development and must be connected to another internship, thesis, or course—except in rare circumstances for which students must petition. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

189. Environmental Studies Research Seminar (1 credit). F,W,S

Research seminars presented weekly throughout the year by environmental studies faculty, visiting scholars, and graduate students. Students discuss content and methodology of research presented following each seminar. Students write critiques of some seminars. May be repeated for credit. *K. Holl, E. Zavaleta*

190. Capstone Course: Environmental Problem Solving. W

A synthetic course that draws on the knowledge and skills students bring from other courses in the major. Focuses on written and oral individual and group projects in which students must take the initiative. Emphasizes developing skills critical for students in their future careers. Prerequisite(s): course 100; Entry Level Writing and Composition requirements. Enrollment restricted to senior environmental studies majors and the combined majors with Earth sciences, biology, and economics. *D. Letourneau*

191F. Community and Agroecology Seminar (2 credits). F,W,S

Interdisciplinary two-credit seminar designed for upper-division students who want to become involved in PICA (Program in Community and Agroecology) and to explore concepts of community and agroecology as they relate to sustainability. Also emphasizes development of leadership skills. Specific topics and readings change each quarter. Prerequisite(s): course 91F, 130A, 130B, 133, or equivalent experience. Enrollment limited to 25. May be repeated for credit. *S. Gliessman, The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar. (See course 42.) Prerequisite(s): upper-division standing; permission of environmental studies faculty member and chairperson of department. *The Staff*

194. Teaching Environmental Studies. F,W,S

This provides an opportunity to participate in the preparation and teaching of introductory environmental studies courses. Students will have significant responsibility in leading discussion sections. Students submit petition to sponsoring agency. *The Staff*

195A. Senior Research. F,W,S

An individually supervised course, with emphasis on independent research that either results in a thesis or project or is done in conjunction with a senior internship. In order to receive credit, students must turn in an electronic copy of the final write-up. Satisfies the senior comprehensive requirement. Students submit petition to sponsoring agency. Prerequisite(s): Entry Level Writing and Composition requirements. *The Staff*

195B. Senior Thesis Group. S

Students involved in group or individual research that results in a senior thesis or project or done in conjunction with an internship meet regularly with their faculty sponsor to discuss the progress of their work, to receive academic and technical guidance, and to critique one another's written work. To receive credit the student must submit two bound copies of the completed research and write-up. Satisfies the senior comprehensive requirement. Students must discuss details with faculty sponsor. Students submit petition to sponsoring agency. Prerequisite(s): Entry Level Writing and Composition requirements. *J. Bury, K. Holl*

196. Senior Seminar. F,W,S

Readings and discussions of primary literature on a current environmental studies topic. Field or literature-based research projects (individual or group) writing multiple drafts resulting in a final paper. Topics vary yearly; consult current course listings. Enrollment by application with selection based on appropriate background and academic performance. Satisfies senior comprehensive requirement. Enrollment restricted to senior environmental studies majors; senior environmental studies/biology combined majors; senior environmental studies / Earth sciences combined majors; and senior environmental studies / economics combined majors. Prerequisite(s): Entry Level Writing and Composition requirements. *M. Fitzsimmons, B. Nickel, C. Shennan*

199. Tutorial. F,W,S

Advanced directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chair of environmental studies. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Provides for department-sponsored directed reading, supervised research, or organized project under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses**201A. Keywords and Concepts. F**

Two-quarter course introduces keywords and concepts that underlie interdisciplinary work in environmental studies through lectures, directed readings, and discussion. Modules include resonant concepts in ecology and society; ecology and evolution; environment and development; the global environment and society; agroecology and conservation biology; and public policy, economics, and law. Final grade for both courses assigned at the end of the second quarter. Enrollment restricted to graduate students. *G. Gilbert*

201B. Keywords and Concepts. W

Two-quarter course introduces keywords and concepts that underlie interdisciplinary work in environmental studies through lectures, directed readings, and discussion. Modules include resonant concepts in ecology and society; ecology and evolution; environment and development; the global environment and society; agroecology and conservation biology; and public policy, economics, and law. Final grade for both courses assigned at the end of the second quarter. Enrollment restricted to graduate students. *T. Duane, W. Cheng*

201M. Developing Research Proposals (2 credits). F

Offers graduate students the opportunity to become familiar with the research expertise of the faculty in the Environmental Studies department. Enrollment restricted to graduate students. *K. Holl*

201N. Interdisciplinary Research Design in Environmental Studies. S

Provides students with opportunities to learn research protocols, practices, and methods used in environmental studies. Combination of lectures, reading, practical exercises, and short projects used to explore how these methods can best be incorporated into interdisciplinary research designs. Enrollment restricted to graduate students. *D. Letourneau*

210. Political Ecological Thought and Environment. W

Provides an introduction to social scientific analyses of the relationships between capitalistic development and the environment in the late 20th century. It has a dual purpose: First, to develop a contemporary historical understanding and sensibility of how economic change, new institutional configurations, and world scale processes are shaping interactions with the environment. Second, to examine some recent political social theoretical perspectives on nature-society relations and radical environmental and social movements. Enrollment restricted to graduate students in environmental studies. *S. Rajan*

215A. Geographic Information Systems and Environmental Applications. F

Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 115A. Concurrent enrollment in course 215L is required. Enrollment restricted to environmental studies graduates students. *B. Nickel*

215L. Exercises in Geographic Information Systems (2 credits). F

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course 115L. Students are billed a materials fee. Concurrent enrollment in course 215A is required. Enrollment restricted to environmental studies graduate students. *B. Nickel*

220. Conservation Biology. *

The principles of conservation biology, including a review of the core disciplines of demography, population genetics, island biogeography, and community ecology and discussion of area and edge effects, population viability, and

ecosystem issues related to the maintenance of biological diversity, especially in fragmented landscapes. Enrollment restricted to environmental studies graduate students. *C. Wilmers*

230. Agroecology and Sustainable Agriculture. *

The application of ecological concepts and principles to the design and management of agricultural systems. The long-term goal of sustainable agroecosystems is examined in economic, social, and ecological contexts. Enrollment restricted to environmental studies graduate students. *C. Shennan*

235. Social Theories of Nature. *

Intensive reading and discussion seminar on the treatment of nature in social theory. Focuses on major recent works which examine nature in social theory, in themselves, and in the context of the intellectual history of development of disciplinary discourses about nature. Students write critical reviews of assigned books and a research paper situating a particular book within its intellectual tradition. Prerequisite(s): interview with instructor to determine preparedness. May be repeated for credit. *M. Fitzsimmons*

240. Public Policy and Conservation. F

Introduction to political and economic approaches to policy analysis, with particular reference to natural resource scarcity, property rights, and environmental conservation. Case studies apply economic and policy process concepts to the management of public lands, biodiversity, and renewable resources. Enrollment restricted to environmental studies graduate students. *D. Press*

247. Regional Approaches to Environmental Policy. *

A research seminar combining theoretical issues in democratic theory, political economy, and planning with emerging concepts of bioregionalism. The focus is on institutional, scientific, and political innovations in managing the environment. Students evaluate current and historical proposals to regionalize environmental policy in the U.S. Enrollment restricted to environmental studies graduate students. *The Staff*

263. Plant Disease Ecology. *

Introduction to ecological roles of plant diseases, including their importance in regulating plant populations dynamics, community diversity and system function in natural ecosystems, considerations of plant diseases in conservation ecology, and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 163. Prerequisite(s): one ecology course. Enrollment restricted to graduate students. *G. Gilbert*

268. Biogeochemistry and the Global Environment. *

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural sustainability. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 168. Enrollment restricted to environmental studies graduate students. *W. Cheng*

271. Valuing the Environment. *

Intensive seminar examining the normative underpinnings of environmental values. Draws on tools from analytical, ethical, and political philosophy to develop normative arguments concerning environmental inequality and justice, environmental preservation, and risk evaluation. Involves team projects in which students develop cases on controversial contemporary issues such as biotechnology.

Prerequisite(s): interview only. Enrollment restricted to graduate students. May be repeated for credit. *S. Rajan*

280. Advanced Topics in Environmental Studies. W

Intensive research seminar, including reading and critique of primary research literature and research in progress. Topics vary and are announced in advance; students should consult with faculty prior to enrolling. Enrollment by permission of instructor. Enrollment restricted to graduate students. May be repeated for credit. *J. Bury*

283. Environmental Studies Internship. F,W,S

Graduate level internship focuses on integrating interdisciplinary academic theory with practical, specialized experience in a professional setting. Course intended for environmental studies graduate students; students must complete paperwork and meet with coordinator prior to first day of instruction. *The Staff*

290. Interdisciplinary Research Seminar (2 credits). F,W,S

Research seminars presented weekly throughout the year by environmental studies and affiliated faculty, by visiting scholars, and by graduate students. Students discuss the content and methodology of research presented following each seminar. Enrollment restricted to graduate students. May be repeated for credit. *K. Holl, E. Zavaleta*

290L. Graduate Research Seminar (2 credits). F,W,S

Graduate student presentations of doctoral research proposals, dissertation work-in-progress, grant applications, and conference papers. This weekly laboratory meeting seeks to develop professional skills, teach constructive criticism, and foster effective discussion among peers. Enrollment restricted to graduate students. *G. Gilbert, K. Holl*

291. Advanced Readings in Environmental Studies (3 credits). S

Focusing on a recently published volume or on a topic of current interest, this seminar requires a rigorous analysis of the principles and methods employed in the four core areas of the program: sustainable agriculture and agroecology; conservation biology; environmental policy analysis; and political economy. Enrollment restricted to graduate students. May be repeated for credit. *B. Nickel, K. Holl*

291C. Advanced Readings in Risk and Public Policy (3 credits). *

Advanced readings and research on environmental risk and public policy. Explores environmental decision making given the question of the burden of proof and scientific uncertainty and grapples, in an advanced manner, with emergent policy alternatives, such as the precautionary principle. Also offered as course 281C for 5 credits. Prerequisite(s): course 172 or equivalent work demonstrated by an interview. Enrollment restricted to graduate students. May be repeated for credit. *S. Rajan*

291D. Advanced Readings in Tropical Ecology, Agriculture, and Development (3 credits). S

Analyzes recent publications in ecology, conservation, agroecology, and development in tropical and subtropical regions, particularly Latin America. Discussions place special emphasis on integration across natural and social science disciplines to address issues of sustainability in tropical regions. Enrollment restricted to graduate students. *G. Gilbert, K. Holl*

291M. Advanced Readings in Biogeochemistry (3 credits). *

Course consists of three parts: fundamental biogeochem-

istry of the Earth, global cycles of nutrient elements, and societal and scientific issues of global change. Class activities include (1) presentation of summary statements based on reading assignments; (2) discussion of theories, concepts, methodologies, and applications; (3) computer simulation and modeling of elemental cycles using STELLA; and (4) integration of scientific information on global change with social issues by writing. Enrollment restricted to graduate students. *W. Cheng*

291P. Advanced Readings in Environmental History and Anthropology (3 credits). *

Course of readings systematically surveying the theoretical contributions of the disciplines of environmental history, historical ecology, environmental anthropology, and geography. After an overview of the evolution of 20th-century thought on the relationship between environment and culture as seen through the lenses of these disciplines, explores emerging research hybrids and new research frontiers. Enrollment restricted to graduate students. *S. Rajan*

292. Topics in Research in Environmental Studies (2 credits). F,W,S

Seminar in which students give critically evaluated presentations regarding current research in environmental studies and issues in research design. Students should consult with faculty prior to enrolling. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Environmental Toxicology

See Microbiology and Environmental Toxicology, page 380.

Ethnic Studies

209 Humanities 1
(831) 459-4658
<http://amst.usc.edu>

Program Description

Ethnic studies is not a separate undergraduate program of study at UCSC, but students with an interest in ethnic studies can find an extensive array of courses on the subject in the following departments: American Studies, Anthropology, Community Studies, Education, Feminist Studies, Film and Digital Media, Economics, History, History of Art and Visual Culture, History of Consciousness, Latin American and Latino Studies, Literature, Music, Politics, Psychology, Sociology, and Theater Arts. The Community Studies Department and the Latin American and Latino Studies Department offer opportunities for fieldwork that extend ethnic studies outside the traditional classroom setting. See also the campus general education requirement (codes E, CC, and ER). Faculty for whom ethnic studies are a professional specialty are listed in the individual departments' faculty and professional interests sections in the *UCSC General Catalog*.

Feminist Studies

315 Humanities 1
(831) 459-2461
fmst@ucsc.edu
<http://feministstudies.ucsc.edu/>

Faculty and Professional Interests

BETTINA APTHEKER, Professor of Feminist Studies and History

Feminist histories, feminist oral history and memoir; feminist pedagogy; African-American women's history; queer studies; feminist Jewish studies; feminist critical race studies

ANJALI ARONDEKAR, Associate Professor of Feminist Studies

South Asian studies, colonial historiography; feminist theories; queer theory; critical race studies; 19th-century interdisciplinary studies

NEDA ATANASOSKI, Assistant Professor of Feminist Studies

U.S. and Eastern European film and media; cultural studies and critical theory; war and nationalism; gender, ethnicity, and religion

KAREN BARAD, Professor of Feminist Studies,

History of Consciousness, and Philosophy
Science studies, poststructuralist theory, feminist theory, queer theory, 20th-Century continental philosophy, philosophy of science, and physics

GINA DENT, Associate Professor of Feminist Studies, History of Consciousness, and Legal Studies

Africana literary and cultural studies, legal theory, popular culture

MARGARET M. DOWNES-BASKIN, Research Associate in Feminist Studies

Presidential leadership styles, elections and the media, women's political and corporate leadership style, intergenerational relations

MARGE FRANTZ, Emerita, Lecturer in American Studies and Feminist Studies

AKASHA HULL, Emerita, Professor of Feminist Studies and Literature

FELICITY SCHAEFFER-GRABIEL, Assistant Professor of Feminist Studies

Transnational feminisms; sexuality and migration, technology, and subjectivity; Latin American/Latino studies; border studies; Chicano/a studies; affect and globalization

ANGELA Y. DAVIS, Emerita, Professor of History of Consciousness and Feminist Studies

Feminism, African American studies, critical theory, popular music culture and social consciousness, philosophy of punishment (women's jails and prisons)

CARLA FRECCERO, Professor of Literature, Feminist Studies, and History of Consciousness
Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory, U.S. popular culture

ROSA LINDA FREGOSO, Professor of Latin American and Latino Studies, Feminist Studies, and Film and Digital Media

Human-rights studies; intercultural and transborder feminism; cultural studies; Latino/a and Latin American film and media arts

JODY GREENE, Associate Professor of Literature and Feminist Studies
Seventeenth- and 18th-century British and French literature and culture, pre- and early modern studies, early modern colonialisms, gay and lesbian cultural studies, gender studies, history of authorship, history of the book

DONNA J. HARAWAY, Professor of History of Consciousness and Feminist Studies
Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

HELENE MOGLEN, Emerita, Professor of Literature
The English novel; feminist, critical, cultural, and psychoanalytic theory; gender and genre in social and psychological contexts

Affiliated Faculty

GABRIELA ARREDONDO, Associate Professor of Latin American and Latino Studies
U.S. social and cultural history; Chicano/a history; critical race and ethnicity theories; immigration history; Latinas/os in the U.S.; Chicana feminisms; "borderlands" studies, modern Mexico history

LORA BARTLETT, Assistant Professor of Education
Educational policy and school reform, schools as workplaces for teachers, the conditions of teachers' commitment

KAREN BASSI, Professor of Classics (Literature)
Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

CAETLIN BENSON-ALLOTT, Assistant Professor, Film and Digital Media
Distribution studies, technology and culture, film history and theory, new media studies; queer and feminist theory, horror

JULIE BETTIE, Associate Professor of Sociology
Cultural studies, feminist studies, race/ethnic studies, identity, popular culture, critical ethnography, visual ethnography

HEATHER BULLOCK, Professor of Psychology
Poverty and economic inequality, welfare policy, feminist psychology, discrimination

JULIANNE BURTON-CARVAJAL, Professor Emerita of Literature
American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

NANCY N. CHEN, Professor of Anthropology
Medical anthropology, visual anthropology, urban anthropology, Asian American identity, mental health, food, China

VILASHINI COOPAN, Associate Professor of Literature
Postcolonial studies, comparative and world literature, literatures of slavery and diaspora, globalization studies, cultural theory of race and ethnicity

E. G. CRICHTON, Associate Professor of Art
Intermedia, electronic arts, photography, installation

FAYE J. CROSBY, Professor of Psychology
Gender; social identity; and social justice, especially affirmative action

TERESA DE LAURETIS, Emerita, Professor of History of Consciousness
Semiotics, psychoanalysis, feminism, film theory, literary theory, queer studies

DANA FRANK, Professor of History
U.S. social and economic history; women, labor, and

working-class history; contemporary political economy

MAYANTHI FERNANDO, Assistant Professor of Anthropology
Anthropology of religion, secularism, Islam, multiculturalism/pluralism; colonial and post-colonial France, Europe

PASCALE GAITET, Professor of Literature and Language Studies
Nineteenth- and 20th-century French literature, sociolinguistics, political history, Celine, Genet

MARY-KAY GAMEL, Professor of Classics and Comparative Literature
Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

DIANE GIFFORD-GONZALEZ, Professor of Anthropology
Paleolithic and Neolithic Africa and Eurasia, colonial New Mexico, origins of food production, pastoralists, zooarchaeology, history of archaeology, interpretive theory, visual anthropology

SUSAN GILLMAN, Professor of American Literature
Nineteenth-century American literature and culture; theories of culture, race, and gender; world literature and cultural studies

JENNIFER A. GONZÁLEZ, Associate Professor of History of Art and Visual Culture
Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

JUNE GORDON, Professor of Education
Urban education of working-class and ethnic minority students in East Asia, Britain, and the U.S. and related issues in teacher education

DEBORAH GOULD, Assistant Professor of Sociology
Political emotion; social movements and contentious politics; classic and contemporary social theory; sexualities; lesbian/gay/queer studies; feminist and queer theory

SHELLY A. GRABE, Assistant Professor of Psychology
Cultural objectification of women and women's bodies as a pervasive global phenomenon played out in different ways across different cultures; how "embodied oppression" affects women's psychological well-being and empowerment

HERMAN GRAY, Professor of Sociology
Cultural studies, media and television studies, black cultural politics, social theory

IRENE GUSTAFSON, Associate Professor of Film and Digital Media
Producing across the boundaries between "theory" and "practice," non-fiction, gender and queer studies, production design

JULIE GUTHMAN, Associate Professor of Community Studies
Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

LISBETH HAAS, Professor of History
U.S.-Mexico borderlands, Chicano and Native American history; visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

AMELIE HASTIE, Associate Professor of Film and Digital Media
Film theory and history, feminist film and television studies, Chinese cinemas, issues of authorship, interdisciplinary

approaches

MARGO HENDRICKS, Professor Emerita of Literature
Early modern English literature and culture; theories and discourses of race, gender, drama, and theory; women playwrights; pre- and early modern studies

GAIL B. HERSHATTER, Professor of History
Modern Chinese social and cultural history; labor history; gender history; history of sexuality; feminist theory; history, memory, and nostalgia

EMILY HONIG, Professor of History
Gender, sexuality, and ethnicity in modern Chinese history; comparative labor history; Chicana history, nationalism, and sexuality in the Third World; oral history

JOCELYN HOY, Lecturer in Philosophy
Feminist philosophy, 19th- and 20th-century continental philosophy

DONNA HUNTER, Associate Professor of History of Art and Visual Culture
European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice, portraiture

AIDA HURTADO, Professor of Psychology
Social identity, feminist theory, social psychology of education, survey methodology

VIRGINIA JANSEN, Professor of History of Art and Visual Culture
Medieval visual culture, urbanism, and secular building; Gothic architecture; campus planning and architecture

STACY KAMEHIRO, Associate Professor of History of Art and Visual Culture
Visual cultures of the Pacific, 19th-century Hawai'i, (inter) nationalism, culture contact; (post)colonialism

L. S. KIM, Associate Professor of Film and Digital Media
Television history and theory, racial discourse, feminist criticism, Asian-American media production, industrial practices and social change in both mainstream Hollywood and alternative media

NORMA KLAHN, Professor of Literature
Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

LORI G. KLETZER, Professor of Economics
Employment and wage determination, impact of globalization on the domestic labor market, industrial relations, government labor market policies, higher education and the labor market

CAMPBELL LEAPER, Professor of Psychology
Social construction and socialization of gender in childhood, adolescence, and adulthood; self-concept and social identity; language and social interaction; social relationships, gender bias in the schools and academic achievement; images of gender in the media; perceptions and consequences of sexism

CAROLYN MARTIN SHAW, Professor Emerita of Anthropology
African societies, colonial discourse, social theory, anthropology of women, sexuality

LOURDES MARTÍNEZ-ECHAZÁBAL, Associate Professor of Latin American Literature
Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found(n)ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

PETER LIMBRICK, Assistant Professor of Film and Digital Media

International cinemas; intersections of race, gender, and sexuality; theories of globalization, transnationalism, and postcoloniality; queer theory

JENNIE LIND MCDADE, Professor of Art

Drawing, painting

MEGAN MOODIE, Assistant Professor of Anthropology

South Asian studies, feminist theory, reproductive and population politics, kinship, development, legal identities, tribal communities

TANYA MERCHANT, Assistant Professor of Music

Ethnomusicology, musics of Central Asia and the former Soviet Union, music and gender, identity, nationalism, globalization, and the institutionalization of music

LETA E. MILLER, Professor of Music

Renaissance and baroque music history and performance practices, 20th-century American music, modern and baroque flute, 16th-century chanson and madrigal, music and science, 18th- and 20th-century flute literature and performance styles, music of C.P.E. Bach and Lou Harrison

MARGARET MORSE, Professor of Film and Digital Media

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary and science fiction

MARCIA OCHOA, Assistant Professor of Community Studies

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, multimedia production, Latin American studies—Colombia and Venezuela, political philosophy, geography

CATHERINE RAMIREZ, Associate Professor of American Studies

Chicana and U.S. Latino literature, culture, and history; gender studies and feminist theory; visual culture and style politics; cultural studies; popular and urban youth cultures; speculative fiction, Afrofuturism, and Chicanafuturism; science, technology, race, and gender; theories and methods of American studies

JENNIFER E. REARDON, Associate Professor of Sociology

Issues of social identity as influenced by the new sciences of genetics and genomics; intersection of the sociology of science and knowledge and the sociology of race, gender, and class

B. RUBY RICH, Professor of Community Studies

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latina/o cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

CECILIA RIVAS, Assistant Professor of Latin American and Latino Studies

Salvadoran transnationalism; media (Internet, newspapers); migration; globalization; race, ethnicity, and gender; bilingualism; consumption; El Salvador; Central America

PAMELA ANN ROBY, Emerita, Professor of Sociology

Sociology of learning, women and work, leadership and social change, sociology of emotions, feminist research, inequality and social policy

LISA ROFEL, Professor of Anthropology

Critical theory, anthropology of modernity, popular/public culture, gender and sexuality, cultures of capitalism, postcolonial feminist anthropology, China

GABRIELA SANDOVAL, Assistant Professor of

Sociology

Race and ethnic studies, Latina/o and Chicana/o studies, stratification, urban and political sociology, and voting behavior

VANITA SETH, Associate Professor of Politics

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

DEANNA SHEMEK, Professor of Literature

Italian literature and cultural history, Renaissance studies, early modern popular culture, narrative (early modern to contemporary), women's studies, literary theory

MARY W. SILVER, Professor of Ocean Sciences

Biological oceanography, marine plankton, midwater ecology

SHELLEY STAMP, Professor of Film and Digital Media

Film history, theory, and criticism; silent cinema; women's filmmaking; film censorship; histories of moviegoing; feminist approaches to cinema

ELIZABETH STEPHENS, Professor of Art

Intermedia, electronic art, sculpture, and performance art

NANCY STOLLER, Emerita, Professor of Community Studies

Race and gender aspects of health, the AIDS epidemic, community organizing, sexualities, and medicine in prisons

RENEE TAJIMA-PEÑA, Professor of Community Studies

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

AVRIL THORNE, Professor of Psychology

Identity development through personal memory telling, development of meaning in adolescents' self-defining memory narratives, family storytelling and the development of a sense of self, narrative co-construction of identity and intimacy

NINA K. TREADWELL, Associate Professor of Music

Renaissance through early baroque music history and performance practices, early plucked-string instruments (theorbo, renaissance, and baroque guitar; renaissance lute), 16th- and 17th-century Italian theatrical music, gender studies, women and music, literary and critical theory

ANNA TSING, Professor of Anthropology

Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnologies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

CANDACE WEST, Professor of Sociology

Language and social interaction, sociology of gender, conversation analysis, microanalysis and medicine

MARILYN J. WESTERKAMP, Professor of History

British America, American revolution/early national U.S., U.S. religious history, early modern cultural and religious history, women/gender

AARONETTE WHITE, Associate Professor of Psychology

Adult feminist-identity development; personality correlates of feminist activism; feminist masculinities studies; feminist perspectives on peace and violence; narrative psychology and adult personality change; black feminist political psychology in the U.S. and abroad; critical psychology

ROB WILSON, Professor of Literature

Transnational and postcolonial literatures, especially as located in Asia/Pacific emergences as posited against American empire of globalization; cultural poetics of America; the sublime, Longinus to Hiroshima; mongrel poetics of experimental writing, especially poetry

ALICE YANG, Associate Professor of History

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

PATRICIA ZAVELLA, Professor of Latin American and Latino Studies

Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexican/o workers and U.S. capital

EILEEN ZURBRIGGEN, Associate Professor of Psychology

Connections between power and sex, sexual aggression and abuse, sexual decision making. Motivation, especially power and affiliation-intimacy motives. Information processing models of social and personality psychology

Program Description

Feminist studies is an interdisciplinary field of analysis that investigates how relations of gender are embedded in social, political, and cultural formations. The undergraduate program in feminist studies provides students with a unique interdisciplinary and transnational perspective. The department emphasizes theories and practices derived from multiracial and multicultural contexts.

Feminist studies prepares undergraduates for a variety of careers. The bachelor of arts (B.A.) degree in feminist studies provides excellent grounding for undergraduates who have career aspirations in, for example, law, health, public administration, community organizations, and social services. Students wishing to pursue doctoral work will also find that interdisciplinary training in feminist studies equips them with theoretical and methodological strengths in most disciplines and applied research fields. Specialists in feminist studies are employed as consultants in industry, higher education, and human resources. State and federal government agencies employ people who have special training in understanding gender relations. Educational institutions need specialists to develop and administer feminist studies programs, women's centers, and other institutional structures designed specifically to study and assist women.

Requirements for the Major

Feminist studies majors must complete 10 courses and a senior comprehensive exit requirement in the feminist studies program. Students must choose one of the following concentrations within the major: Culture, Power, and Representation; Law, Politics, and Social Change; Science, Technology, and Medicine; or Sexuality Studies. Courses appropriate for each concentration are listed at <http://feministstudies.ucsc.edu>.

A proposal for an independent concentration will be approved only when a student presents a clear, coherent, and rigorous plan of study that does not fit the existing concentrations. Both the student's adviser and the Feminist Studies Department chair must approve a proposal for an independent concentration.

Required courses include course 1, *Feminist Studies: An Introduction*; course 80 or another 80 course taught by feminist studies affiliated faculty; course 100, *Feminist Theories* (must be taken at UCSC); five 5-credit, upper-division courses in the concentration; two 5-credit, upper-division electives; and an upper-division exit (comprehensive) requirement course. One independent study (course 199) may count toward the concentration or toward the elective requirements. Either course 193 or 198 may be used to count toward the elective requirements.

Feminist studies is an interdisciplinary major and lists courses taught by affiliate faculty in other departments, however, feminist studies majors must take a minimum of five courses at UCSC taught directly in

the Feminist Studies Department, i.e., courses designated FMST, not including course 193, 198, or 199. Two Education Abroad Program (EAP) courses may count towards the major; three transfer courses may count towards the major; and the total combined number of EAP and transfer courses that may count towards the major is a maximum of three.

Exit requirement options include a senior seminar (course 194) taught by core or affiliate faculty, senior thesis, or a senior project (course 195). Courses 1, 80, 100, and the composition (general education code C) requirement are prerequisites to course 194 and 195.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in feminist studies is satisfied by completing course 194A, 194D, 194E, 194F, 194G, 194I, 194J, 194M, 194N, 194O, 194P, or 195.

Honors

Feminist studies awards honors and highest honors in the major. At the end of each quarter, a faculty committee meets to review each graduating student's file. Students are considered for honors and highest honors based on the preponderance of excellent narrative evaluations for applicable course work and senior exit requirement. Writing a thesis is not a requirement for receiving honors or highest honors.

Transfer Students

Transfer students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Feminist studies advisers or the chair determine which courses from other institutions are transferable. Courses 1, 80, and 100 must be completed in the junior year so that the exit requirement may be completed in the senior year.

Graduate Studies

Graduate students may work toward a doctor of philosophy (Ph.D.) degree that notes a designated emphasis in feminist studies on the graduation documents. Students wishing to pursue this option should consult with the chairs of their respective Ph.D. programs and are encouraged to apply in the first or second year of graduate study. The application and an annually updated list of regularly offered, approved graduate courses are available at <http://feministstudies.ucsc.edu>.

The following are required for the designated emphasis:

- *Committee composition.* The student must have a designated graduate adviser from the feminist studies core or associate faculty who serves on the qualifying examination committee or in some other appropriate capacity.
- *Writing.* The student must prepare a significant piece of writing in the area of feminist studies. This writing must be a master's essay or a chapter of the doctoral dissertation.
- *Course requirements.* The student must take four graduate courses in feminist studies, two of which must be taught directly in the department. Two courses can be selected from among the graduate offerings of any UCSC department, as long as they are taught by core or affiliate feminist studies faculty.

- *Teaching.* The student must be a teaching assistant in at least one feminist studies course or teach a feminist studies course independently (designated FMST) in the regular curriculum or in Summer Session.

Lower-Division Courses

1. Feminist Studies: An Introduction. W

Introduces the core concepts underlying the interdisciplinary field-formation of feminist studies within multiple geopolitical contexts. Explores how feminist inquiry rethinks disciplinary assumptions and categories, and animates our engagement with culture, history, and society. Topics include: the social construction of gender; the gendered division of labor, production, and reproduction; intersections of gender, race, class, and ethnicity; and histories of sexuality. (Formerly *Introduction to Feminisms*.) (General Education Code(s): CC, IH.) *A. Arondekar*

80A. Feminism and Social Justice. W

Examines, and critically analyzes, select post-World War II movements for social justice in the United States from feminist perspectives. Considers how those movements and their participants responded to issues of race, class, gender, and sexuality. A feminist, transnational, analytic framework is also developed to consider how those movements may have embraced, enhanced, or debilitated feminist formations in other parts of the world. (General Education Code(s): ER, T5-Humanities and Arts or Social Sciences.) *B. Aptheker*

80B. Sexuality and Globalization. F

Examines the relationship between sexuality and the contemporary term "globalization" as a dense entanglement of processes that emerges from a history of U.S. empire. Sexuality cannot be separated from power struggles over the classification of bodies, territories, and questions of temporality. Examines how sexualized contact zones produce new knowledge, commerce, inequalities, possibilities, and identities. (General Education Code(s): CC, T5-Humanities and Arts or Social Sciences.) *F. Schaeffer-Grabiel*

80F. Feminisms of/and the Global South. S

Explores feminist theories from domestic U.S. and global contexts in order to ask how interventions of women of color in the U.S. and of radical feminist movements in non-U.S. locations radically re-imagine feminist politics. Rather than focusing on feminist movements that represent different regions of the world, course examines feminist theory through multiple histories of colonialism, post-colonialism, and globalization. (General Education Code(s): CC, T5-Humanities and Arts or Social Sciences, E.) *A. Arondekar*

80K. Feminism and Science. S

Considers the nature of scientific practice, the culture of science, and criteria for the responsible practice of science. Particular attention is given to feminist commitments to strengthening objectivity, increasing scientific literacy, and including ethical considerations in the practice of science. Enrollment limited to 80. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *K. Barad*

80P. War in Film and Culture. W

Explores how war films, media, and political discourses about war and violence shape and transform ideas about national identity. Focuses on how ideas about gender, sexuality, race, and class have particularly affected representations of military conflicts. (General Education Code(s): IM, T5-Humanities and Arts or Social Sciences, E.) *N. Atanasoski*

80S. Women in Music. F

An exploration of the sociological position of women as composers and performers in Western and non-Western musics, with a focus on both ethnographic and historical sources. (Also offered as Music 80S. Students cannot receive credit for both courses.) Offered in alternate academic years. (General Education Code(s): CC, T4-Humanities and Arts.) *L. Miller*

80T. Religion in American Politics and Culture. *

Introduces dominant discourses about Christianity and Islam in the American public sphere, with particular attention paid to race, gender, sexuality, and class in thinking about religion. Visual and textual media, political commentary, and popular ethnographies are analyzed. (Also offered as Anthropology 80R. Students cannot receive credit for both courses.) *M. Fernando, N. Atanasoski*

Upper-Division Courses

100. Feminist Theories. W

Core course for feminist studies. Serves as an introduction to thinking theoretically about issues of feminism within multiple contexts and intellectual traditions. Sustained discussion of gender and its critical connections to productions of race, class, and sexuality. Focus will change each year. Enrollment restricted to sophomores, juniors, and seniors. *N. Atanasoski*

102. Feminist Critical Race Studies. *

Working from the perspective that race is a cultural invention and racism is a political, economic, and social relation, investigates how "race" is produced as a meaningful and powerful social category, examines the effects of racism as a social relation, and argues for the necessity of combining feminist and critical race studies. By considering different historical periods and places, aims to equip students with the tools necessary to critically examine the production and reproduction of race and racism in the U.S. Prerequisite(s): one course from feminist studies. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

112. Women and the Law. *

Interdisciplinary approach to study of law in its relation to category "women" and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes power relations in both public and intimate life. (Also offered as Politics 112. Students cannot receive credit for both courses.) Enrollment restricted to feminist studies, politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *G. Dent*

115. Gender, Sexuality, and Transnational Migration Across the Americas. F

Examines migration as a mode of inquiry into transnational practices across geographic locales and temporal zones. Analyzes migration in relation to the transnational formation of gender, race, and sexuality as well as processes of neocolonialism, the state, and globalization. Prerequisite(s): course 1, 100, or 145. Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): ER, E.) *F. Schaeffer-Grabiel*

116. Feminist Ethnographies. *

Examines ethnographic methods and writing in anthropology from a feminist perspective; focuses on questions of representation and representativeness, power, and knowledge production; traces theories of exchange in

20th-century anthropology including outsourcing, financialization, and microcredit. (Formerly *Ethnographies of Transnational Feminisms*.) Prerequisite(s): course 1. Enrollment restricted to junior and senior feminist studies majors or by permission of instructor. Enrollment limited to 20. *The Staff*

120. Transnational Feminisms. *

Explores the emergence of transnational feminism through U.S. women of color and postcolonial feminism. Underscores the role of globalization, nationalism, and state formation in relation to feminist theorizing, activism, and labor across the Global South. In an attempt to understand the salience of inequalities, the course interrogates the continuation of feminist critique that is attentive to the war on terror, neocolonialism, and empire. Prerequisite(s): course 1. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 40. (General Education Code(s): CC, E.) *F. Schaeffer-Grabiel*

123. Feminism and Cultural Production. *

Explores relationship between feminism and culture. Topics will vary and include different forms of cultural production such as film and literature. Regional/national focus will also vary. Prerequisite(s): course 1. Enrollment restricted to sophomores, juniors, and seniors. May be repeated for credit. (General Education Code(s): A, E.) *The Staff*

124. Technology, Science, and Race Across the Americas. S

Examines new ways of understanding the body and race through the intersection of technology and science. Addresses how broader structures of power and the rise of new technological and scientific discoveries mediate power relations and alter how race, national boundaries, the body, and citizenship are normalized and contested from colonialism to the present. Course content may vary; themes may include: U.S. eugenics, I.Q. tests, patenting debates, sterilization, assisted reproduction, biometrics, and genetics across the Americas. (Formerly *Technologies and Latinidad: Cyberspace and Beyond*.) Enrollment restricted to sophomore, junior, and senior feminist studies majors during priority enrollment only. Enrollment limited to 25. (General Education Code(s): E.) *F. Schaeffer-Grabiel*

126. Images, Power, and Politics: Methods in Visual and Textual Analysis. F

Introduces the analysis of visual images and text with particular emphasis on feminist critical methodologies. Using case studies from photography, film, TV, advertising, and new media, students learn how to read and analyze culture. Enrollment restricted to sophomore, junior, and senior feminist studies majors during priority enrollment only. Enrollment limited to 25. (General Education Code(s): IM.) *N. Atanasoski*

132. Gender and Postcoloniality. *

Postcolonial feminist studies. Explores how discourses of gender and sexuality shaped the policies and ideologies of the historical processes of colonialism, the civilizing mission, and anticolonial nationalism. Considers orientalism as a gendered discourse as well as colonial understandings of gender and sexuality in decolonialization. Explores Western media representations, literature, the law, and the place of gender in the current debate between cultural relativism and universalism. Provides an understanding of some key terms in postcolonial studies and an in-depth examination of the place of gender in these processes. Prerequisite(s): courses 80F and 100 or permission of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s):

E.) *A. Arondekar*

133. Science and the Body. F

Contemporary technoscientific practices, such as nano-, info-, and biotechnologies, are rapidly reworking what it means to be human. Course examines how both our understanding of the human and the very nature of the human are constituted through technoscientific practices. Prerequisite(s): courses 1 and 100. Enrollment restricted to juniors and seniors. *K. Barad*

139. African American Women's History. *

Considers African American women as central to understanding of U.S. history, focusing on everyday survival, resistance, and movements for social change. Discussion of critical theories for historical research, gender, and race. Emphasis on biography, cultural history, and documentary and archival research. Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): ER, E.) *B. Aptheke*

145. Racial and Gender Formations in the U.S. S

Introduces the defining issues surrounding racial and gender formations in the U.S. through an understanding of the term "women of color" as an emergent, dynamic, and socio-political phenomenon. Interrogates organizing practices around women of color across multiple sites: film and media, globalization, representation, sexuality, historiography, and war, to name a select few. (General Education Code(s): ER, E.) *F. Schaeffer-Grabiel*

148. Gender and Development. *

Uses the critical tools of feminist theory and cultural anthropology to look at how global development discourses and institutions mobilize, reinforce, and challenge systems of gender-based inequality. Topics include non-governmental organizations (NGOs), development practice, microcredit, and technocrat cultures. (Also offered as Anthropology 148. Students cannot receive credit for both courses.) *M. Moodie*

151A. Chicana Feminism. *

Students are introduced to the writings of Chicana feminists to identify the gender issues that produce conflict and cooperation in their communities. The course also makes linkages to gender issues in other U.S. communities of color and Latin America. (Also offered as Psychology 157. Students cannot receive credit for both courses.) Prerequisite(s): course 1 or Psychology 3 or 100. (General Education Code(s): E.) *A. Hurtado*

151B. Advanced Topics in Chicana Feminism. *

Course is a continuation of course 151A which introduces students to the writings of Chicana feminists to identify the gender issues that cause conflict and cooperation in their communities. The seminar format allows students an opportunity for extensive discussion. (Also offered as Psychology 159K. Students cannot receive credit for both courses.) Prerequisite(s): courses 1, 100, or 151A or Psychology 1, 40, or 157A, or consent of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 30. *A. Hurtado*

168. Topics in Feminist Philosophy. *

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship. (Also offered as Philosophy 147. Students cannot receive credit for both courses.) Prerequisite(s): Philosophy 100A or 100B or 100C. *J. Hoy*

185. Psychoanalysis and Feminism. *

Introduction to Freudian and Lacanian theories of sexual-

ity and the construction of the self as well as to feminist critiques and rewritings of those theories. An attempt is made to place psychoanalytic theory in socioeconomic, racial, and colonialist contexts. Appropriate prior work in theory is recommended as preparation. Enrollment restricted to juniors and seniors. Enrollment limited to 25. *H. Moglen*

189. Advanced Topics in Feminist Theory. *

Focus on a particular problem in feminist theory. Problems vary each year but might include theorizing the gendered subject, racializing gender, the meeting points of psychoanalysis and social-political analysis in theorizing gender, the relationship between queer theory and feminist theory, postcolonial feminist theory. Prerequisite(s): course 100. Enrollment restricted to juniors, seniors, and graduate students. Enrollment limited to 20. May be repeated for credit. *The Staff*

193. Field Study. F,W,S

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Senior Seminar.

Discussion classes providing a broad overview of some general "area of concentration." Discussion of assigned readings, focus on oral presentations, and a final 20- to 25-page paper. Satisfies the senior comprehensive requirement in feminist studies. Enrollment limited to 20. *The Staff*

194A. Feminist Jurisprudence. *

Approaches legal reasoning from a feminist and intersectional perspective with attention to structures and jurisdiction, case materials, and emerging international frameworks for gender justice. Designed to facilitate completion of a substantial research essay based in feminist legal philosophy. Instructor permission required to enroll. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 112 or Politics 112. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *G. Dent*

194D. Feminist Science Studies. *

Examines different feminist approaches to understanding the nature of scientific practices. Particular attention paid to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory practices. Considers the ways in which gender, race, and sexuality are constructed by science and how they influence both scientific practices and conceptions of science. Also examines the feminist commitment to taking social factors into account without forfeiting the notion of objectivity. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; and courses 1 and 100. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *K. Barad*

194E. History of Sexuality. *

Explores one of the central texts of dialogue and contestation in sexuality studies today: Michel Foucault's *The History of Sexuality*. Considers the epistemic challenges outlined in Foucault's early work and engages its instantiations in the proliferating scholarship on gender, sexuality, and critical race studies. Readings challenge the marginalization of empire in Foucault's work and demonstrate that a history of 19th-century European sexuality

must also be a history of race. Interview with instructor required. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *A. Arondekar*

194F. Chicana/Latina Cultural Production. *

Traces the intersection between Chicana studies and Latin American studies through transnational forms of cultural production, imaginaries, and empowerment. Analysis of theories of cultural production and discussion of the political salience of culture as a site for resistance, critique, and creativity. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 100. Enrollment restricted to seniors. Enrollment limited to 20. (General Education Code(s): E.) *F. Schaeffer-Grabiel*

194G. Images of Africa. *

Explores questions of colonialism, empire, race, gender, and geopolitics in the proliferating images—filmic, television, and media—of Africa in the United States. Facilitates the completion of a substantial research essay based on the study of popular culture. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 100; enrollment restricted to seniors. Enrollment by permission of instructor. Enrollment limited to 20. *G. Dent*

194I. Feminist Oral History and Memoir. W

Designed to train students in oral history and memoir writing. Emphasizes the specialness of transgressive voices; race, class, and sexuality, women's silence, erasure, censorship, and marginalization are addressed. The politics of memory, narratives, storytelling, and editorial judgment are considered. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 1 and 100. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Aptheker*

194J. Advanced Feminist Philosophy. *

Focuses on issues in epistemology and ontology: the construction of knowledge and objectivity, rationality and emotions, subjectivity and personal identity, and the body and sexuality. (Also offered as Philosophy 190T. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 168 or 100; and two from Philosophy 100A, 100B, and 100C. Enrollment limited to 20. *J. Hoy*

194M. Empire and Sexuality. S

Explores the production of sexualities, sexual identification, and gender differentiation within multiple contexts of colonialism, decolonization, and emerging neo-colonial global formations. (Formerly course 118.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 100 or 145. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. (General Education Code(s): E.) *A. Arondekar*

194N. Gender, Class, and Sex in Shanghai. *

Focusing on Shanghai, course examines issues of gender, class, and sex in modern urban Chinese history. Given Shanghai's history as a treaty port, particular attention paid to ways in which its semi-colonial status inflected the articulation of gender identities, class formations and issues of sexuality (particularly sexual labor). Also looks at Shanghai during the Maoist period and in the context of more contemporary economic reforms. (Also offered as History 194A. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; and History 40B, 140C, 140D, or 140E, or permission of instructor.

Restricted to junior and senior feminist studies majors. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

194O. The Politics of Gender and Human Rights. F

Examines human rights projects and discourses with a focus on the politics of gender, sexuality, race, and rights in the international sphere. Reading important human rights documents and theoretical writings, and addressing particular case studies, emphasizes the tensions between the ideals of the universal and the particular inherent in human rights law, activism, and humanitarianism. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; courses 1 and 100. Enrollment restricted to senior feminist studies majors. *N. Atanasoski*

194P. Religion, Gender, and Politics. *

Addresses the relationship between religious identities and movements, gender and sexuality, and feminism. Analyzes how media discourses, popular culture, and scholarly writing represent the role of religion and gender in shaping contemporary geopolitics. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; courses 1 and 100. Enrollment restricted to senior feminist studies majors. Enrollment limited to 20. *N. Atanasoski*

195. Senior Thesis or Project. F,W,S

The senior thesis/project which satisfies the major requirement. Course is for independent research and writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; students submit petition to sponsoring agency. May be repeated for credit. (General Education Code(s): W.) *The Staff*

198. Independent Field Study. F,W,S

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198E. Independent Field Study (2 credits). F,W,S

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201. Topics in Feminist Methodologies. W

Explores feminist theorizing across disciplinary and cultural contexts for both methodology (theories about the research process) and epistemology (theories of knowledge). Goal is to orient students toward changes in organization of knowledge and provide them with different feminist methodologies in their pursuit of both an "object" of study and an epistemology. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Arondekar*

203. Feminist Pedagogies. S

Examines feminist pedagogies as projects in transgressing traditional disciplinary boundaries. Examines historical examples of alternative pedagogies and contemporary models for creating communities dedicated to social jus-

ice. Designed to assist graduate students develop teaching strategies in multiple fields. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Aptheker*

205. Feminism, Nationalism, and Sexuality in the Third World. *

Focus on the historical construction and articulation of feminism in the Third World. Explores the relationship of feminist and nationalist movements, considering such questions as whether Third World women's political movements are necessarily "feminist," how these political movements define feminism, and the tensions between nationalisms and feminisms. Particular attention to issues of sexuality, the effects of colonial institutions and policies on sexual identities in Third World countries, the notions of womanhood and female sexualities articulated within nationalist ideologies and movements, the consequences of such constructions for women, and the formulation of sexual issues among feminists. Offered every two or three years. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Honig*

206. Feminism and Psychoanalytic Theory. *

After studying essays by Freud, Lacan, and Melanie Klein which have been central to the construction of feminist theory, considers the writings of such feminist theorists as Jessica Benjamin, Judith Butler, Julia Kristeva, Juliet Mitchell, Jaqueline Rose, Carolyn Steedman, and Maria Torok. Enrollment restricted to graduate students or seniors with permission of instructor, based on narrative evaluations and sample essays. Enrollment limited to 15. *H. Moglen*

207. Topics in Queer/Race Studies. *

Explores the interrelated epistemological frameworks of critical race studies and queer studies. Through the study of a range of philosophical, scientific, literary, and cinematic texts, course historicizes and theorizes discourses of race and sexuality. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Arondekar*

211. Sexuality, Race, and Migration in the Americas. *

Analyzes the ways transnational processes intersect with changing notions of gender, sexuality, and race. Examines processes such as tourism, the Internet, capitalism, and labor spanning Brazil, the Dominican Republic, and the United States. Enrollment restricted to graduate students. Enrollment limited to 15. *F. Schaeffer-Grabiel*

212. Feminist Theory and the Law. *

Interrogation of the relationship between law and its instantiating gendered categories, supported by feminist, queer, Marxist, critical race, and postcolonial theories. Topics include hypostasization of legal categories, the contest between domestic and international human rights frameworks, overlapping civil and communal codes, cultural explanations in the law, the law as text and archive, testimony and legal subjectivity. (Also offered as History of Consciousness 212. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

214. Topics in Feminist Science Studies. *

Graduate seminar on feminist science studies. Topics will vary and may include: the joint consideration of science studies and poststructuralist theory; the relationship between discursive practices and material phenomena; and the relationship between ontology, epistemology, and ethics. Enrollment restricted to graduate students. Enrollment limited to 15. *K. Barad*

225A. Theories of Slavery. *

Explores philosophical, legal, and socio-historical analyses of slavery. Focus on Atlantic slavery and the production of race and gender formations, complemented by discussion on contemporary forms of slavery. Impact of historical slavery on prevailing discourses and institutions. (Also offered as History of Consciousness 205A. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

225B. Theories of Slavery. *

Writing-intensive course based on readings in History of Consciousness 205A and Feminist Studies 225A. (Also offered as History of Consciousness 205B. Students cannot receive credit for both courses.) Prerequisite(s): course 225A or History of Consciousness 205A. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

232. Topics in Postcolonial Studies. *

Variable topics that could include postcolonial approaches to questions of epistemology and knowledge production, theories of nationalism and nation-state formation, subaltern historiography, analyses of modernization and developmental theory, postcolonial approaches to globalization, and transnationalism. Significant component of feminist contributions to these literatures. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Arondekar*

240. Culture and Politics of Human Rights. *

Examines cultural, philosophical, and political foundations for human rights and provides students with critical grounding in the major theoretical debates over conceptualizations of human rights in the Americas. Addresses the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating gender rights, collective rights, and social and economic rights within international human rights framework. (Also offered as Latin American&Latino Studies 240. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *R. Fregoso*

251. Feminist Theory and Social Psychology. *

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion. (Also offered as Psychology 251. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *A. Hurtado*

264. The Idea of Africa. *

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy. (Also offered as History of Consciousness 264. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

268A. Science and Justice: Experiments in Collaboration. S

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Biomolecular Engineering 268A and Sociology 268A. Students cannot receive credit for three courses.) Enrollment limited to 10. *J. Reardon, K. Barad*

268B. Science and Justice Research Seminar. F

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): course 268A. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Biomolecular Engineering 268B and Sociology 268B. Students cannot receive credit for three courses.) Enrollment limited to 10. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297F. Independent Study (2 credits). F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Film and Digital Media

101 Communications Building
(831) 459-3204
film@ucsc.edu
<http://film.ucsc.edu>

Faculty and Professional Interests**Professor**

SHARON DANIEL
Community-based public art in information and communications environments, social and political aspects of information technology, community networks, participatory culture, digital inclusion, net art, human-computer interface design

ELI E. HOLLANDER
Film and video directing; ethnographic documentary directing, editing, cinematography, and videography; digital image generation; screenwriting

CHARLES L. LORD, Professor Emeritus

MARGARET MORSE
Digital and electronic media theory and criticism, media art, media history, technology and culture, collaborative culture, sensory studies and art, film history and theory, feminist studies, German cinema, documentary media, science fiction, and silent comedy

SHELLEY STAMP
Film history, theory, and criticism; silent cinema; women's

filmmaking; film censorship; histories of moviegoing; feminist approaches to cinema

Associate Professor

LAWRENCE ANDREWS
Film, video, installation and media art

IRENE GUSTAFSON
Producing across the boundaries between "theory" and "practice," non-fiction media, experimental film/video, production design, gender and queer studies

AMELIE HASTIE
Film theory and history, feminist film and television studies, Chinese cinemas, issues of authorship, interdisciplinary approaches

L. S. KIM
Television history and theory, racial discourse, feminist criticism, Asian-American media production, industrial practices and social change in both mainstream Hollywood and alternative media

PETER LIMBRICK
International cinemas; intersections of race, gender, and sexuality; theories of globalization, transnationalism, and postcoloniality; queer theory

WARREN SACK
Software design and media theory

GUSTAVO VAZQUEZ
Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

Assistant Professor

IRENE LUSZTIG
Film and video production, experimental documentary, ethnographic film, autobiographical film, editing

YIMAN WANG
Film history and theory; colonial/semi-colonial/postcolonial/postsocialist modes of media production and exchange; border-crossing film remakes; silent cinema; translation theory and cinema; acting theory/practice and ethnic star studies; transnational connections and ramifications of Chinese cinema and documentary; cybernetic fan culture

**Professor**

JULIANNE BURTON-CARVAJAL, Literature
Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

TERESA DE LAURETIS, History of Consciousness
Semiotics, psychoanalysis, feminism, film theory, literary theory, queer studies

ROSA LINDA FREGOSO, Latin American and Latino Studies
Cultural studies, transnational feminist theories, Chicano/a and Latina/o cinema, issues of human rights and gender violence

HERMAN S. GRAY, Sociology
Cultural studies, media and television studies, black cultural politics, social theory

DONNA J. HARAWAY, History of Consciousness and Feminist Studies
Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

B. RUBY RICH, Community Studies

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latinx cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

Associate Professor**DAVID S. MARRIOTT, History of Consciousness**

Literary theory, psychoanalysis, black cultural theory and philosophies of race, literary and visual cultures of modernism

RENEE TAJIMA-PEÑA, Community Studies

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

Assistant Professor**NEDA ATANASOSKI, Feminist Studies**

U.S. and Eastern European film and media; cultural studies and critical theory; war and nationalism; gender, ethnicity, and religion

Program Description

The film and digital media major at UCSC offers an integrated curriculum involving theory, criticism, and cultural analysis, as well as a production program in the aesthetics and techniques of film and digital media. This bachelor of arts degree program provides students with the critical skills, theoretical concepts, and historical knowledge necessary to conduct informed analysis of cinema, television, video art, and new media, along with the up-to-date technical knowledge, practical skills, and artistic contexts needed for the production of film, video, and digital media. The major provides a course of study that develops an understanding of moving image and digital media as essential tools of communication and artistic practice.

Students in the general film and digital media major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium, while studying the cultural impact of television and the rise of video and digital art in recent decades. The critical studies concentration is designed for film and digital media majors who have a special aptitude for and interest in the history and theory of film, television, video, and digital media. This rigorous program can help prepare undergraduates for graduate work in critical studies. Students in the highly selective production concentration are encouraged to demonstrate technical proficiency and creative vision in film and digital media production while also studying the histories and theories of these media. The integrated critical practice concentration will serve students currently enrolled in the major who have a special aptitude for and interest in combining work in critical studies and production. The concentration provides them with a more rigorous pathway through the major and, in their senior year, allows them to work on a senior project that integrates creative and intellectual work.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based, liberal arts perspective. The UCSC program is interdisciplinary, combining theory and practice in film, video, and digital media with study in other areas of the arts, humanities, and social sciences that help students understand the role these media play in society.

As the technologies of film and video have merged with digital computer-based moving images and interactive media, and as digital media continues to expand into everyday experience, students in the major are uniquely positioned to excel in these fields. Graduates of the UCSC film and digital media program have enjoyed

considerable success both in the professional world and in gaining admission into top graduate schools in the field.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media lab; audio recording studio; sound stage with green screen; digital nonlinear editing rooms; video format conversion rooms; a computerized sound effects library; and student equipment checkout. Additionally, computer laboratories equipped for digital image manipulation, web authoring, and interactive interface design and viewing rooms are available. The critical studies facilities include classrooms equipped for high-end film, video, and data projection. The library holdings in film and video history, theory, and literature are complemented by a large collection of films, videos, laser disks, and DVDs, including a diverse range of international feature films, experimental film and video work, animation, silent films, and documentaries.

Some courses offered by the Film and Digital Media Department are restricted in enrollment; admission is based on completion of prerequisites and other specific written application requirements. Admission to advanced production courses is generally restricted to third- and fourth-year students and is based on the submission of a portfolio of work produced in the introductory production class (Film 170B) and other production workshops.

Upper-division digital media and production studio courses require coursework to be completed on computers. The department recognizes that students often purchase a new computer on their arrival at the university during their freshman year. It is strongly suggested that students who plan to apply for the production concentration wait until their second or third year of studies before making this investment. Delaying the purchase until this time allows a student to have the most up-to-date hardware and the fastest machine at the price they can afford at the moment they enter into the production concentration. Laptop computers are strongly encouraged for production students, and laptop computers may become required in the near future. Instruction in and software for production courses are based on the Apple OS X platform. Compatibility with the department's operating system for instruction is strongly advised. Students are encouraged to consult with the department office or the web site for list of recommended computers and software packages.

Declaring the Film and Digital Media Pre-Major

Students who have completed one lower-division course (20A, 20B or 20C) with a grade of B- or better may declare the film and digital media pre-major. Pre-majors are expected to complete the requirements to declare the major by the end of their second year. Transfer students must declare the pre-major no later than their second quarter in residence.

Declaring the Film and Digital Media Major

Prior to declaring the film and digital media major, students must complete FILM 20A, and either 20B or 20C, with a grade of B- or better. FILM 20A, 20B, and 20C must be taken for a letter grade by students intending to major in film and digital media. Students who have met the B- grade minimum for declaration of the major may choose to take FILM 20P as the third lower-division requirement.

20A The Film Experience**20B Introduction to Television Culture and Society****20C Introduction to Digital Media****20P Introduction to Production Technique**

Students are encouraged to complete the lower-division courses early in their studies so that the petition to major status is accomplished no later than the first quarter of the junior year. Acceptance into the film and digital media major does not constitute acceptance into any of the concentrations (production, critical studies, or integrated critical practice). Transfer students should consult the Transfer Student section for instructions about declaring the major.

Students who feel that there were extenuating circumstances which prevented them from meeting the requirements for declaring the major may appeal their denial by submitting a letter to the Film and Digital Media Department. The appeal must be filed no later than 15 days after the denial notification was mailed or the 10th day of classes in the quarter of the denial, whichever is later. For further information regarding this process, contact the Film and Digital Media Department.

Program of Study

The general film and digital media major requires three lower-division and nine upper-division courses in residence and satisfaction of the senior comprehensive requirement. Students must include among these 13 courses at least one upper-division, 5-credit course that focuses on diversity (i.e., non-Western; underrepresented ethnicity, gender, or sexual orientation). A list of courses satisfying the department's diversity requirement is available at the department office. Students in the general film and digital media major may apply for admission to the critical studies concentration (see Critical Studies Concentration below), to the highly selective and competitive production concentration (see Production Concentration below), or the more rigorous integrated critical practice concentration (see Integrated Critical Practice Concentration below) within the major.

Lower-Division Requirements

Students must take the lower-division classes 20A, 20B, and 20C for a letter grade, and they must earn a B- or better in two of these three lower-division classes (20A and either 20B or 20C) to petition for the major. A third lower-division course is required to satisfy major requirements.

20A The Film Experience

and two of the following three courses are required for all majors:

20B Introduction to Television Culture and Society**20C Introduction to Digital Media****20P Introduction to Production Technique** (cannot be used to satisfy the B- grade minimum)**General Film and Digital Media Major**

Students must complete the upper-division core curriculum by completing one course from each of the following five groups in film and digital media:

120 Introduction to Film Theory and Criticism**130 Silent Cinema or****132A International Cinema to 1960 or****132B International Cinema, 1960 to Present or****132C Gender and Global Cinema****134A American Film, 1930–60 or****134B American Film, 1960–Present****136A Experimental Film and Video or**

136B *History of Television* or
 136C *Visual Culture and Technology: History of New Media*

194A *Film Theory Seminar* or
 194B *Electronic Media Theory Seminar* or
 194C *New Media Theory Seminar* or
 194D *Film History Seminar* or
 194E *International Cinemas* or
 194F *Film and the Other Arts: Music and Dance* or
 194G *New(s) Media* or
 194S *Senior Seminar: Special Topics*

Five upper-division elective courses are to be chosen from the following:

- up to five additional upper-division history/critical studies courses in film and digital media
- up to two upper-division courses in film and digital media production (170A, 170B, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series)
- Film 150 or 151
- up to two upper-division courses offered by other departments; course substitutions must be pre-approved by the Film and Digital Media Department

Film and Digital Media Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the film and digital media major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Students who are interested in the production concentration, the critical studies concentration, or the integrated critical practice concentration should seriously consider Plan One to be better prepared for application to production studio classes or either the critical studies concentration or the integrated critical practice concentration in their junior year.

Plan One

| Year | Fall | Winter | Spring |
|------------|------------------------------------|--|--|
| 1st (frsh) | college core gen ed FILM 20A | low-div Fidm* req gen ed (declare pre-major) | low-div Fidm* req gen ed (declare major) |
| 2nd (soph) | FILM 120 gen ed | Fidm* critical studies core gen ed | Fidm* critical studies core gen ed |

Plan Two

| Year | Fall | Winter | Spring |
|------------|--|---------------------------------------|--|
| 1st (frsh) | college core gen ed | low-div Fidm* req gen ed | low-div Fidm* req gen ed (declare pre-major) |
| 2nd (soph) | low-div Fidm* req gen ed (declare major) | Fidm* critical studies core gen ed | Fidm* critical studies core gen ed |

*film and digital media

Critical Studies Concentration

The critical studies concentration provides a more rigorous pathway through the film and digital media major and offers classes specifically reserved for seniors who have exceptional abilities. Students are eligible to apply for the critical studies concentration in spring quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Applicants must already be declared film and digital media majors in good standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- copies of narrative evaluations for all courses taken in film and digital media

Application materials and instructions are available at the Film and Digital Media Department office. Student application materials are reviewed by a committee of film and digital media critical studies faculty. Admission to the critical studies concentration will be granted to students who have overwhelmingly excellent evaluations, an outstanding writing sample, and a clear statement of purpose. Students may reapply a second time if not accepted, but not later than the first quarter of their senior year.

Requirements for the Critical Studies Concentration

The critical studies concentration curriculum adds the following requirements to those already established for the film and digital media major. Students are required to take two upper-division electives, rather than the five electives currently required for the film and digital media major. FILM 190, an *Advanced Critical Studies Seminar*, replaces the current requirement for one of the FILM 194 seminars, and serves as an exit requirement in the major.

Students in the critical studies concentration complete the following required upper-division core curriculum (9 courses):

120 *Introduction to Film Theory and Criticism*
 130 *Silent Cinema* or
 132A *International Cinema to 1960* or
 132B *International Cinema, 1960 to Present* or
 132C *Gender and Global Cinema*
 134A *American Film, 1930–60* or
 134B *American Film, 1960–Present*
 136A *Experimental Film and Video* or
 136B *History of Television* or
 136C *Visual Culture and Technology: History of New Media*
 165A *Film, Video and Gender* or
 165B *Race on Screen* or
 165C *Lesbian, Gay and Queer Film and Video* or
 165D *Asian Americans in Media*
 187 *Advanced Topics in Television Studies* or
 189 *Advanced Topics in Electronic and Digital Media Studies*
 190 *Advanced Critical Studies Seminar*
 191 *Critical Studies Thesis Preparation Seminar*
 192 *Student-Directed Seminar* or
 195 *Senior Thesis*

Two upper-division elective courses are to be chosen from the following:

- up to two additional upper-division history/critical studies courses in film and digital media
- one upper-division course in film and digital media production (150, 151, 170A, 170B, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series)
- one upper-division course offered by other departments; course substitutions must be pre-approved by the Film and Digital Media Department

Production Concentration

Admission to the production concentration is highly selective, based on promise and accomplishment shown in the student's work. After completing FILM 170B, students may apply to the production concentration by submitting works created in FILM 170B to a portfolio review conducted at the end of each quarter. These student works are reviewed by a committee of film and digital media production faculty. Application materials and instructions for the portfolio review are available at the Film and Digital Media Department office. Students should note that production courses are in high demand and that faculty/student ratios and equipment resources limit the number of applicants accepted into the production concentration. Students may reapply a second time if not accepted. A student accepted into the production concentration who is unable to meet all the requirements for the concentration may instead be able to satisfy the graduation requirements of the general major. Application materials and instructions for all production courses are available each quarter online at slugfilm.ucsc.edu.

Requirements for the Production Concentration

Students in the production concentration complete the following required upper-division core curriculum (six courses):

120 *Introduction to Film Theory and Criticism*
 170B *Fundamentals of Film and Video Production*

two of the following production courses:

150 *Screenwriting*
 151 *Film Directing*
 170A *Fundamentals of Digital Media Production*
 171A *Special Topics Workshop: Sound*
 171C *Special Topics Workshop: Found Footage*
 171D *Social Information Spaces*
 171F *Autobiographical Film*
 172 *Film and Video Studio*
 173 *Narrative Workshop*
 175 *Documentary Video Workshop*
 176 *Experimental Video Workshop*
 177 *Digital Media Workshop: Computer as Medium*
 178A *Personal Computers in Film and Video*
 178B *Advanced Personal Computers in Film and Video*

and two critical studies courses—one each from two of the three following groups:

130 *Silent Cinema* or
 132A *International Cinema to 1960* or
 132B *International Cinema, 1960 to Present* or
 132C *Gender and Global Cinema*
 134A *American Film, 1930–60* or

134B *American Film, 1960–Present*

136A *Experimental Film and Video* or

136B *History of Television* or

136C *Visual Culture and Technology: History of New Media*

and four upper-division elective courses from the following:

- up to two upper-division courses in film and digital media production (150, 151, one from the 171 series, 172, 173, 175, 176, 177, or one from the 178 series)
- at least two upper-division film and digital media history/critical studies courses
- up to two upper-division critical studies elective courses from another department; course substitutions must be pre-approved by the Film and Digital Media Department.

and one course from the following:

194A *Film Theory Seminar*

194B *Electronic Media Theory Seminar*

194C *New Media Seminar*

194D *Film History Seminar*

194E *International Cinemas*

194F *Film and the Other Arts: Music and Dance*

194G *New(s) Media*

194S *Senior Seminar: Special Topics*

195 *Senior Thesis*

196A *Senior Project in Film and Video Production*

196B *Senior Project in Screenwriting*

196C *Senior Documentary Workshop*

197 *Senior Digital Media Workshop*

Integrated Critical Practice Concentration

The integrated critical practice concentration provides a more rigorous pathway through the film and digital media major and offers classes specifically reserved for seniors with exceptional abilities in both critical studies and production who seek to combine creative and scholarly work. Students are eligible to apply for the integrated critical practice concentration in the last quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Students not already admitted to the production concentration should apply simultaneously to the production concentration. Acceptance into the production concentration is a necessary pre-condition for acceptance into the integrated critical practice concentration. Applicants must already be declared film and digital media majors in good standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- copies of narrative evaluations for all courses taken in film and digital media

Application materials and instructions are available at the Film and Digital Media Department Office. Student application materials are reviewed by a committee of film and digital media faculty. Admission to the integrated critical practice concentration will be granted to students with overwhelmingly excellent evaluations, an outstanding writing sample, and a clear statement of purpose outlining a senior project that integrates critical studies and production work. Students may reapply a

second time if not accepted, but not later than the first quarter of their senior year.

Requirements for the Integrated Critical Practice Concentration

The integrated critical practice concentration curriculum adds the following requirements to those already established for the film and digital media major. Students are required to take both 20A and 20P for their required lower-division courses, in addition to selecting a third lower-division class from either 20B or 20C. The minimum grade requirement for lower-division courses will apply (see Lower-Division Requirements). Students are required to take 170B as part of their core curriculum, and to complete six elective classes, rather than five. For the senior exit requirement students are required to complete one course (192, 195, 196A, 196B, 196C, or 197) which, combined with an independent study (199) taken either consecutively or simultaneously, will integrate critical studies and production work.

Students in the integrated critical practice concentration complete the following required upper-division core curriculum (6 courses):

120 *Introduction to Film Theory and Criticism*

130 *Silent Cinema* or

132A *International Cinema to 1960* or

132B *International Cinema, 1960 to Present* or

132C *Gender and Global Cinema*

134A *American Film, 1930–60* or

134B *American Film, 1960–Present*

136A *Experimental Film and Video* or

136B *History of Television* or

136C *Visual Culture and Technology: History of New Media*

170B *Fundamentals of Film/Video Production*

192 *Student-Directed Seminar* or

195 *Senior Thesis* or

196A *Senior Project in Film and Video Production* or

196B *Senior Project in Screenwriting* or

196C *Senior Documentary Workshop* or

197 *Senior Project in Digital Media*

Six upper-division elective courses are to be chosen from the following:

- two upper-division history/critical studies course in film and digital media (152, 160, 161, 162, one of the 165 series, 168, 180, one of the 185 series, 187, 189)
- three upper-division courses in film and digital media production (150, 151, 170A, one of the 171 series, 172, 173, 175, 176, 177, one of the 178 series)
- one senior seminar chosen from the 194 series
- graduate seminars, taken with permission of the faculty advisor, may substitute for one of the electives
- a maximum of two electives may be taken in another department if pre-approved by the Film and Digital Media department

Courses from the above core curriculum in excess of requirements may NOT count as electives.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) require-

ment. The DC requirement will be met by completion of FILM 120, *Introduction to Film Theory and Criticism*. For detailed information on this major's DC requirement, consult your major adviser.

Comprehensive Requirement

All seniors in the general film and digital media major or in the production concentration may select one of three options to satisfy the campus exit requirement.

- *Senior seminar*: The senior seminars (courses in the 194 series) are restricted to majors in their senior year and are writing intensive. Students in the general major are required to complete one senior seminar. Students in the production concentration may complete the senior seminar to satisfy the senior exit requirement or as an elective.
- *Senior thesis*: With prior faculty approval, a student may elect to do a senior thesis (FILM 195). The student must contact a faculty member at least one quarter in advance to submit a proposal and to obtain faculty approval for a senior thesis. The proposal may involve writing a screenplay; expanding on a paper from a previously completed upper-division critical studies course in film and digital media; or writing an original paper in a particular area resulting in a work of substantial research.
- *Senior project*: A limited number of students in the production concentration may participate in the senior project (FILM 196A, 196B, 196C, or 197) class. Admission is by application, with review of previous works and evaluation of the proposed final project by film and digital media production faculty.

Seniors in the critical studies concentration must complete the following to satisfy the campus exit requirement: FILM 190, *Advanced Critical Studies Seminar*.

Seniors in the integrated critical practice concentration must complete one course (192, 195, 196A, 196B, 196C, or 197) combined with an independent study course (199).

Transfer Students

All transfer students must enroll in at least one lower-division course (20A, 20B, or 20C) during their first quarter in residence. Transfer students are encouraged to enroll in 20A during the Summer Session preceding their first quarter in residence. After completion of one lower-division course (20A, 20B, or 20C) with a grade of B- or better, transfer students may declare the film and digital media pre-major.

All transfer students must earn a B- or higher in two 20-level courses, FILM 20A and either 20B or 20C (at least one must be taken at UCSC) to declare the major. Appeal procedures are the same as for non-transfer students. Three lower-division and ten upper-division courses are required for completion of the major. With some lower-division preparation, transfer students should be able to complete the upper-division coursework and the major within two years. As preparation, prospective transfer students are encouraged to fulfill at least one lower-division film and digital media major requirement (FILM 20 series) through UCSC Summer Session prior to their transfer. Transfer students must petition the department to have equivalent lower-division courses taken at their current institution count toward their UCSC major requirements provided they have earned a B- or higher in each course.

Students who have completed none of the lower-division major requirements prior to transfer to UCSC, students who are interested in graduating with a double major, and students who must finish general education requirements may need additional time to complete their studies.

Transfer students are strongly encouraged to speak with an academic adviser at the department office prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Honors

Honors in film and digital media are awarded to graduating seniors whose academic performance in their major coursework is judged by a faculty committee to be consistently excellent to outstanding. Students must also do excellent work on their senior exit requirement. Both narrative evaluations and letter grades will be considered; to be considered for Honors, students must have at least a cumulative GPA of 3.5 in the major or the relative equivalent in narrative evaluations, as determined by the faculty committee.

Minor Requirements

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines. Students earn a minor in film and digital media by completing eight courses: two lower-division courses as prerequisites for the minor and six upper-division courses including four from the core curriculum of the general major and two electives. There is no production component in the minor, nor is there a comprehensive requirement.

Lower-Division Requirements

Students must complete at least two lower-division courses prior to petitioning for the minor:

20A *The Film Experience*

and one of the following three courses:

20B Introduction to Television Culture and Society

20C Introduction to Digital Media

20P Introduction to Production Technique

Requirements for the Minor

Students in the minor must complete the upper-division core curriculum by completing one course from each of the following four categories in film and digital media:

120 *Introduction to Film Theory Criticism*

130 *Silent Cinema* or

132A *International Cinema to 1960* or

132B *International Cinema, 1960 to Present* or

132C *Gender and Global Cinema*

134A *American Film, 1930–60* or

134B *American Film, 1960–Present*

136A *Experimental Film and Video* or

136B *History of Television* or

136C *Visual Culture and Technology: History of New Media*

Two upper-division elective courses to be chosen from the following: any two additional upper-division film and digital media history/critical studies courses other than production studio courses (150, 151, 170A through 178A, and 178B) that have not been used to satisfy the above core curriculum. One of the electives may be substituted from another department or institution. Course substitutions must be approved by the Film and Digital Media Department.

Film and Digital Media Ph.D.

The Doctor of Philosophy (Ph.D.) program in film and digital media challenges the traditionally conceived borders between creative and critical practice. The program enables potential dialogue between creative practice and theoretical knowledge as related forms of intellectual work and provides the conditions for students to realize a wide range of possible projects, including those that exist across the traditional divides of critical studies and production. Focusing on a diverse range of cultural production that includes cinema, television, video art, and Internet-based media, Ph.D. program participants interrogate the historical, aesthetic, political, ideological, and technological aspects of these media forms across a range of international contexts, investigating their points of connection and convergence as well as their relationship to broader cultural and historical change. The program thus prepares students for intellectually informed creative practice as well as theoretical and critical production in a range of environments, not limited to traditional academic contexts.

The doctoral program in film and digital media prepares students to be artists and scholars who can situate their work within a larger historical framework of cultural and technological change, looking at the interrelationships of various media. The program is not divided into paths or specific fields of emphasis. As well as educating students in the intellectual histories of their field and working with them to facilitate new theoretical and critical interventions, we also expose students to fundamental and advanced aspects of media technologies that will illuminate their understanding of media production and reception.

Requirements

Normative Time for Completion

Normative time for completion of the program is six years. The first two years of the program are primarily devoted to coursework. Preliminary exams for the master's degree occur in the spring of the second year. By the end of the third year, students should have formulated a dissertation topic and proposal deriving from their work in that year and should have nominated a Ph.D. qualifying examination committee and dissertation committee. Qualifying examinations for advancement to Ph.D. candidacy occur in the fall of the fourth year.

Coursework

A minimum of 108 units of study in coursework at UCSC will be required for the Ph.D. degree. Doctoral students will be in residence for a minimum of six quarters. When in residence, students will take a minimum of 12 credits per quarter. Up to 10 transfer credits may be granted from another institution if approved by the faculty.

In their first year, doctoral students will be required to take the three foundational courses (200A-B-C) and the 2-credit colloquium series sequence.

They must then take two film and digital media graduate elective courses in the second year (for a total of five courses; three core and two electives). In addition, most students will take FILM 204A-B-C, a 2-credit colloquium every quarter.

In the third year, students take the three graduate courses in film and digital media, 295 (*Directed Reading*), 292 (*Seminar in Thesis Area*), and 297 (*Independent Study and Research*, leading to thesis proposal).

A student will thus take at least eight film and digital media graduate courses over the degree, for a total of

40 credits plus 12 credits of the colloquium series. The remaining elective courses may be selected from film and digital media or graduate or advanced undergraduate courses from other departments, subject to approval from the student's graduate adviser. If a student chooses to take an undergraduate course, they will be required to seek permission to enroll from the department, if approved by the faculty adviser. It is expected that students will carefully choose which courses to take, in consultation with their graduate adviser, so as to ensure a program of study that is intellectually rigorous and that reflects the student's eventual goals and aspirations.

Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Foreign Language Requirement

Students must demonstrate proficiency in a language other than English. This may include a computer programming language instead of a natural language when such a language is integral to the student's field of study. The language requirement may be satisfied in one of two ways:

- by passing an upper-division course in a language related to the student's research
- by passing a reading proficiency test administered by a faculty member in the relevant language department

A student must pass the language requirement before taking Ph.D. qualifying examinations. There are two exceptions:

- The "foreign" language requirement may be waived for a non-English native speaker who has passed the proficiency test in English required for admission (application must be made in writing at least two months prior to the qualifying examination).
- The requirement may be waived if a student has proof of proficiency in a language other than English in the form of a language major or minor from recent (within the last five years) undergraduate or master's level education or equivalent (accredited institution). Documentation must be received and approved by the Director of Graduate Studies at least two months before the qualifying examination.

Timeline: Course Sequence, Examinations, and Dissertation

During the first year of study in FILM 200B-C (a 2-quarter course), students will be introduced to the methodologies of developing, and the questions that surround a critical practice approach. This will occur while the student simultaneously strengthens, with the appropriate elective classes, areas of theory or practice that pertain to their focus but in which they are not fluent.

During the second year, the student will focus on selecting classes from the film and digital media elective series numbered 210–289. Of the 19 classes currently in this series, approximately one third embrace a strong mix of critical studies and media production. In these classes, students will be charged with producing and thinking about the relationship between the critical studies and media production. The remainder of the classes in this series fall on either side of the equation.

At the end of the second year, students take a preliminary examination which functions as the master's examination. In the winter quarter of the second year, a "call" is made for students to submit the critical or creative work they have produced from their first two years of coursework. Students prepare for the examination by talking to their graduate adviser about the work

they have done and how they might situate and respond to it. At this stage they also nominate faculty members whom they think would be suitable examiners. It is expected that these faculty would include at least one of the instructors of the courses already taken by the student. The graduate adviser and director of graduate studies will assemble the committee, taking into account the student's nominations. The written component of the examination consists of the coursework projects already submitted, which for some students will be a combination of written text and creative work; and, a statement about that work and its contexts, which will form the basis for oral examination questions by faculty members. At the oral examination, students will be questioned about their work, their relationship to it, and the way they might situate it. The goal is for students to be able to talk meaningfully about the connections and implications of their work and to place it within a wider critical, theoretical, and creative context. The graduate adviser will discuss the scope and format of the examination with the student before the examination date.

After the oral examination, the committee considers the student's performance and will recommend one of three grades: fail, pass, or pass with permission to proceed. Students who fail may retake the oral component of the examination one time. A student with a pass only may leave the program with the degree of Master of Arts (M.A.). These students must also meet the campus requirement of B or higher in their coursework and complete the units requirements of 72 credits. Students who pass with permission to proceed may enter the third year of coursework toward the Ph.D. The decision on permission to proceed will take into account the examination result and input from the faculty whose courses the student has completed.

The third year will be spent developing a dissertation topic in close consultation with faculty advisers and the FILM 290 series classes. A student's advisers over the program's duration will include both critical studies and production faculty depending on the research and the qualifying examination, and dissertation committees will reflect a balance between critical studies and production faculty appropriate to the student's research topic. In spring of the third year, students should, in consultation with their graduate adviser, suggest names of faculty to become members of the Ph.D. qualifying examination committee. This committee will be comprised of four faculty members, at least one of whom must be from another discipline at UCSC or from another campus. The committee shall have a tenured film and digital media faculty member as chair. Students should also begin assembling a dissertation committee. The 297 independent study course, taken in the spring, should result in a dissertation proposal, and the student will receive feedback on that during and at the end of quarter.

In fall of the fourth year, the student's Ph.D. qualifying examination committee will consider the work completed in the 292, 295, and 297 courses, including the student's dissertation proposal (which the student may choose to revise over the summer before submitting to the committee) and will then conduct an oral qualifying examination based on the proposal and other work. The aim of the examination is to test a student's readiness for advanced research and production of the Ph.D. dissertation, and to assess the student's abilities to advance themselves in their respective fields of inquiry. Advancement to candidacy is based on successful completion of the qualifying examination as well as completion with a B or better grade of the required coursework and assembly of a graduate division approved thesis committee. If a student fails the Ph.D. examination, he

or she may be permitted to take it a second time.

Completion of the Degree

Upon successful advancement to candidacy, students must then complete the following requirements for the Ph.D.

Dissertation: The dissertation, or Ph.D. thesis, is to be an original contribution of high quality to the field of film and digital media studies. If a student's thesis contains a substantial creative component, the thesis project must also include a written component of no less than 75 pages which contextualizes the work in relation to other scholarly and creative practices, and situates the work in relation to relevant aesthetic and cultural theory. The dissertation must be approved by a committee consisting of a minimum of three faculty members, at least two of whom must be from the film and digital media faculty. If the dissertation director does not hold a Ph.D. degree, then the majority of the remaining committee members must hold Ph.D.s. When the student has submitted the dissertation and the committee has approved it, the student is ready for the oral defense.

Oral Defense: Once the dissertation is approved, the student will present an oral summary before his or her dissertation committee and invited members of the academic community. The student will then answer questions posed by the faculty.

Sample Student Program for Each Year (Years 1-4)

Year 1: three core film and digital media courses; three electives

Fall

FILM 200A: *Introduction to Graduate Study*

FILM 204A: *Colloquium*

Elective (from Film and Digital Media or another department)

Foreign language

Winter

FILM 200B: *Theory and Praxis of Film and Digital Media, Part 1*

FILM 204B: *Colloquium*

Elective (from Film and Digital Media or another department)

Foreign language or teaching assistant

Spring

FILM 200C: *Theory and Praxis of Film and Digital Media, Part 2*

FILM 204C: *Colloquium*

Elective (from Film and Digital Media or another department)

Foreign language or teaching assistant

Year 2: two film and digital media electives; four other electives from film and digital media or another department

Fall

Film and digital media elective

FILM 204A: *Colloquium*

Elective (from Film and Digital Media or another department)

Teaching assistant or graduate student research assistantship

Winter

Film and digital media elective

FILM 204B: *Colloquium*

Elective (from Film and Digital Media or another department)

Teaching assistant or graduate student research assistantship

Student suggests M.A. examination committee; prepares for examination.

Spring

Elective (from Film and Digital Media or another department)

FILM 204C: *Colloquium*

Elective (from Film and Digital Media or another department)

Teaching assistant or graduate student research assistantship

Student takes M.A. examination. If successful, advances to third year.

Year 3: three required film and digital media courses, three electives from Film and Digital Media Department or another department

Fall

FILM 295: *Directed Reading*

FILM 204A: *Colloquium*

Elective (from Film and Digital Media or another department)

Teaching assistant or graduate student research assistantship

Winter

FILM 292: *Seminar: Developing a Thesis Area*

FILM 204B: *Colloquium*

Elective (from Film and Digital Media or another department)

Teaching assistant or graduate student research assistantship

Spring

FILM 297: *Independent Study and Research* (thesis proposal)

FILM 204C: *Colloquium*

Elective (from Film and Digital Media or another department)

Student assembles Ph.D. dissertation committee, nominates Ph.D. qualifying examination committee.

Year 4

Student takes Ph.D. qualifying examination. If successful, advances to candidacy and continues research and writing of dissertation.

Lower-Division Courses

20A. The Film Experience. F,W

An introduction to the basic elements, range, and diversity of cinematic representation and expression. Aesthetic, theoretical, and critical issues are explored in the context of class screenings and critical readings. Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IM, IH, A.) *S. Stamp, G. Youmans*

20B. Introduction to Television Culture and Society. S

Introduction to the basic forms of televisual presentation, including differing narrative structure from movies and situation comedies to soap opera, plus modes of direct discourse in news, advertising, sports, music, television, and other genres. Alternative forms and modes in electronic media, such as independent video art and documentary, public television, cable, and electronic networks are explored, with their potential for expressing cultural diversity set in relation to social, cultural, and political conditions. Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IM, IH, A.) *L. Kim*

20C. Introduction to Digital Media. F,S

Introduces fundamental features of digital media and examines the immense visual, social, and psychological impact of the "digital revolution" on our culture. Topics include the concepts and forms of the digital hypertext interface, Internet, and web, and the impact of digital media on conceptions of the self, body, identity, and community.

Students are billed a course fee. Enrollment restricted to first-year students, sophomores, and juniors. (General Education Code(s): IH, A.) *L. Kelley*

20P. Introduction to Production Technique. F,W

Introduction to production process with emphasis on low-budget, independent film and video making. Explores conceptualization, planning, shooting, editing of documentary, personal essay, and feature narrative works. Emphasis on visualization and shooting style, and script-writing, but not hands-on editing. Open to students of varied backgrounds and goals. Students are billed a course fee. (General Education Code(s): PR-C, A.) *I. Gustafson, J. Fankushen*

42. Student-Directed Seminar. F,W,S

Seminars on selected topics taught by upper-division students under faculty supervision (see course 192). Students submit petition to sponsoring agency. *The Staff*

80A. Technothrillers. *

Examination of recent films classified as "thrillers" that approach technology (computers, robotics, biotech, the Internet, etc.) through suspense, anxiety, and paranoia. It will also address how technologically produced popular culture negotiates attitudes towards technological change. Students are billed a course fee. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *The Staff*

80S. Special Topics in Film and Digital Media. F,S

Study of selected aspects of film, television, and/or digital media. Includes weekly screenings and historical/theoretical readings. May be repeated for credit. (General Education Code(s): IM, T5-Humanities and Arts or Social Sciences, A.) *S. Scott, J. Fankushen*

80X. Sex in the Cinema. *

Examines the historical representation of sexual difference, orientation, and politics in film and video using cultural studies, political and economic historiography, and feminist and queer theory and paying special attention to intersections of U.S. political movements with filmmaking and reception. (General Education Code(s): IM, T5-Humanities and Arts or Social Sciences, A.) *The Staff*

Upper-Division Courses

120. Introduction to Film Theory and Criticism. W

An introduction to classical and contemporary film theory and those theoretical paradigms and methods that have illuminated the media: formalism, realism, structuralism, semiotics, psychoanalysis, Marxism, feminism, and issues of identity and difference. Students are billed a course fee. Prerequisite(s): course 20A, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to film and digital media majors, pre-majors, and minors during priority enrollment; may be opened if space allows. (General Education Code(s): W.) *A. Hastie*

130. Silent Cinema. *

Presents the development of silent film as a cultural form from the early period to the beginning of sound, addressing its historical evolution, technological development, aesthetic transformations, and varied cultural contexts. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A. *S. Stamp*

132A. International Cinema to 1960. W

A survey of significant developments in narrative film outside Hollywood from the advent of sound technology to the late '50s. Differing inter/national contexts, theoretical movements, technological innovations, and major direc-

tors are studied. Students are billed a course fee. Usually offered alternate academic years. Prerequisite(s): course 20A. (General Education Code(s): A.) *P. Limbrick*

132B. International Cinema, 1960 to Present. *

A survey of significant developments in narrative film outside Hollywood from 1960 to the present. Major film movements and directors from around the world are studied. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A. (General Education Code(s): A.) *P. Limbrick*

132C. Gender and Global Cinema. F

Offers students historical and critical tools to investigate global film through the framework of gender. Focused in particular on contemporary film (from 1960 to present), the class is structured both chronologically and via national industries. Students are billed a course fee. Prerequisite(s): course 20A. (General Education Code(s): E.) *Y. Wang*

134A. American Film, 1930–1960. W

A survey of American narrative cinema from 1930 to 1960. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Offered in alternate academic years. *S. Stamp*

134B. American Film, 1960–Present. F

A survey of American narrative cinema from 1960 to the present. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Offered in alternate academic years. *G. Youmans*

136A. Experimental Film and Video. S

A survey of various experimental styles and practices in film and video, addressing the historical developments of these media formats. The course situates experimental film and video work within the larger contexts of artistic traditions as well as networks of production and reception. Students are billed for a course fee. Prerequisite(s): course 20A. (General Education Code(s): A.) *G. Youmans*

136B. History of Television. *

Survey of the historical development of broadcast television from its origins to the present day phenomena of cable, satellite, and electronic networks. Examination of major genres, forms, and modes of production and consumption within cultural, social, and economic contexts. Offered every other year, alternating with course 136A. Students are billed for a course fee. Prerequisite(s): course 20B. (General Education Code(s): A.) *The Staff*

136C. Visual Culture and Technology: History of New Media. F

Explores the relationship between technology and change and surveys the history of various technologies of visual culture from print to computer based imagery and the Internet. Students are billed a course fee. Prerequisite(s): course 20C. *L. Kelley*

142. Beyond Cybernetics: Advanced Topics in New Media Technologies. *

Analysis of the effects of communication and information technologies on culture and cultural production through the study of systems and networks. Assignments may include papers, Internet presentations, development/participation in virtual communities, interactive multimedia. Emphasis on advanced critical and experimental approaches. Students are billed a course fee. Prerequisite(s): course 20C. Enrollment restricted to film and digital media majors. Enrollment limited to 40. *L. Andrews, S. Daniel*

150. Screenwriting. F

Problems in writing for film and television are explored through the writing of original material and analysis of existing works. Various film genres, conventions, and

styles, both fictional and nonfictional, are examined. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Admission by application process which may begin prior to start of quarter; application materials generally available final week of preceding quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. May be repeated for credit. (General Education Code(s): W.) *H. Dam*

151. Film Directing. *

Workshop that explores the director's involvement in film and video production. Topics will include the manipulation of time and space, continuity, script planning and blocking, and working with actors and crew. Students will participate in group and individual exercises in pre-production and scene direction. Prerequisite(s): courses 20A, 20P, and/or 170B are recommended. Admission by application process which may begin prior to the start of the quarter; application materials generally available final week of preceding quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Enrollment limited to 30. (General Education Code(s): A.) *G. Vasquez*

152. Script Analysis. *

Students analyze diverse narrative techniques, dramatic structures, and genre forms to understand the craft of screenwriting and prepare for their own creative writing and filmmaking. Students read finished scripts and view films. Prerequisite(s): course 120. Enrollment restricted to film and digital media majors and film and digital media pre-majors. Enrollment limited to 25. *The Staff*

160. Film Genres. F,W

Concentrated study of films from one cinematic grouping with similar themes and narrative structures such as westerns, musicals, or science fiction, or a comparative study of different genres. History, theory, and criticism of the genre are covered. Students are billed a course fee. Prerequisite(s): course 132A, 132B, 132C, 134A or 134B. May be repeated for credit. (General Education Code(s): A.) *S. Stamp, G. Youmans*

161. Documentary Film and Video. S

Explores the category of nonfiction through a historical and theoretical study of documentary in film and video. Addresses ethnographic film, Soviet and Griersonian documentary, cinema verité and/or other selected documentary texts and the issues of representation they raise. Students are billed a course fee. Prerequisite(s): course 20A or 20B. Offered in alternate academic years. *I. Gustafson*

162. Film Authors. S

Intensive critical study of the work of one film auteur (director, screenwriter, actor, cinematographer). Themes, style, and structure are explored using various critical modes of analysis. Students are billed a course fee. Prerequisite(s): course 120. May be repeated for credit. *L. Kelley*

165A. Film, Video, and Gender. W

A study of texts, theories, and issues of gender in film and/or video. Changing focus on one or more topics, including production and authorship, representation, reception, theories of identification, sexual preference, and related issues. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A or 20B. (General Education Code(s): A.) *I. Gustafson*

165B. Race on Screen. S

Review of historical and critical tools to interpret representations of race on cinematic, television, and computer screens. Class will consider the place of race in theoretical and historical scholarship and examine the debates about

race produced within and across film and digital media. Students are billed a course fee. Usually offered in alternate academic years. Prerequisite(s): course 20A or 20B. (General Education Code(s): E.) *Y. Wang*

165C. Lesbian, Gay, and Queer Film and Video. *

An overview of homosexuality in American film. Explores a baseline Hollywood homophobia and the formal and historical attempts to change it. Recent independent queer film and video discussed. Topics include authorship, spectatorship, genre and genre reappropriation, historical gender constructs, the "art" film, mainstream vs. independent production, the relationship of film to popular music. Students are billed a course fee. Usually offered in alternate catalog years. *I. Gustafson*

165D. Asian Americans and Media. *

Examines media representations about, as well as by, Asian Americans. Using critical essays on film theory, racial studies, feminist criticism, and independent cinema, students develop the skills necessary to conduct critical analysis of Asian Americans in film and television. Students are billed a course fee. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *The Staff*

168. National Cinema and Culture. F

Study of a specific cinematic or other media tradition of a region, nation, language, diasporic collectivity or other unifying cultural entity. Not a survey, this course selects one focus or offers a comparative of cross-cultural framework. Students are billed a course fee. Prerequisite(s): course 130, 132A, 132B, or 132C. May be repeated for credit. *J. Todd*

170A. Fundamentals of Introduction to Digital Media Production. F,W

Introduction to the conceptual and technical fundamentals of making digital media. Covers principles of digital image manipulation, basic web authoring, and interface design through projects that introduce production techniques and methods. Students are billed for a materials fee. Prerequisite(s): course 20C Enrollment limited to 20. (General Education Code(s): A.) *M. Haughwout*

170B. Fundamentals of Film and Video Production. F,W,S

An introduction to the art and craft of making films and videos. Covers principles of cinematography, videography, editing, production planning, and lighting involving both production techniques and methods. Students are billed a materials fee. Prerequisite(s): course 20A or 20B and one other film/video and digital media critical studies or history course required. Completion of additional upper-division film and digital media critical studies or history courses improves students' ability to be admitted to this course. Admission by application and entrance essay. The online application process begins several weeks prior to the start of the quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Enrollment limited to 24. (General Education Code(s): A.) *J. Fankushen, K. Herold, L. Andrews*

171. Special Topics Workshops.

Study of selected aspects of film, video, and/or digital media production. *The Staff*

171A. Sound. W

The cinematic equation equals images plus sound. What are sound-specific properties? What is the relationship between sound and image? Examines these and other questions through the creation of audio and audiovisual pieces. Students are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by an online ap-

plication process which begins several weeks prior to the start of the quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. *L. Andrews*

171C. Special Topics Workshop: Found Footage. S

Students will consider the practice of "recycling" images perhaps not intended by the original "owner" or "creator." In addition to assigned readings and technical workshops, students produce three video projects and give a presentation on a specific issue or artist/group. Prerequisite(s): course 170A or 170B; priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. *The Staff*

171D. Social Information Spaces. S

Investigates how information spaces can be designed to be inhabited, socially navigable spaces. Emphasizes the social navigation of information spaces, a set of techniques and ideas from computer-supported cooperative works, human-computer interaction, and architecture. Prerequisite(s): course 170A. Enrollment limited to 20. *M. Haughwout*

171F. Special Topics Workshop: Autobiographical Film. F

Students explore autobiography as a filmmaking genre and practice, using experimental, fictionalized, documentary, and hybrid forms. Readings and screenings provide a theoretical context for production work. Topics include: strategies of (self) representation, reenactment, performance, portraiture, memoir, confession, and diaristic film. Prerequisite(s): course 170B. Enrollment by interview only; priority given to application process/production concentrators. Students are billed a materials fee. Enrollment limited to 20. *K. Herold*

172. Film and Video Studio. F,W,S

Intermediate workshop in film and video production concentrating on narrative production, development of critical standards, and technical methods. Topics include cinematography, sound, and non-linear digital editing techniques. Each student is responsible for the completion of short narratives from assignments. Students must bear the cost of materials and are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. *G. Vazquez, E. Hollander*

173. Narrative Workshop: Reconfiguring Narrative within the Digital Realm. *

Analysis of cinematic codes and narrative structure through digital video, Internet and interactive multimedia projects. Required readings address contemporary research in narratology and hyper-media, exploring the potential of digital technology to reconfigure the role of both author and audience. Students billed a course fee. Prerequisite(s): course 170A. Enrollment limited to 20. *L. Andrews, G. Vazquez*

175. Documentary Video Workshop. F

Workshop in documentary video production, development of critical standards, ethical issues, and technical methods. Each student is responsible for the completion of short documentaries from assignments. Students must bear the cost of materials and are billed a materials fee. Prerequisite(s): priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A or 170B may apply by submitting an application and sample of production work at first class meeting; applications will be considered on a space-available basis. Enrollment limited to 20. *E. Hollander*

176. Experimental Video Workshop. S

Introductory workshop in video production (non-narrative, experimental). Topics include a survey of non-narrative experimental video from a historical/theoretical perspective and an introduction to videography, fundamentals of video editing, and sound. Students complete several short projects and are billed a materials fee. Students must bear the cost of all materials. Prerequisite(s): course 170B; priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170B may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. (General Education Code(s): A.) *G. Vazquez*

177. Digital Media Workshop: Computer as Medium. W

Introduction to the computer as a medium as well as a tool. Students explore art practice within digital imaging and information and communications environments through projects, readings, and "screenings." Assignments may include designing virtual communities and/or interactive, multimedia web works. Students are billed a course fee. Prerequisite(s): course 170A. Enrollment limited to 20. *M. Haughwout*

178A. Personal Computers in Film and Video. S

Introduction to the specific applications of computers for film and video. By using computer-generated, enhanced and imported graphics, animation, text, sound, and moving video, students create still and time-based works in a computer environment. Prerequisite(s): course 170B; priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See enrollment conditions section in quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170B may apply by submitting an application and sample of production work at first class meeting;

these applications will be considered on a space-available basis. Students are billed a materials fee. Enrollment limited to 20. *The Staff*

178B. Advanced Personal Computers in Film and Video. *

Study of advanced computer tools in digital media, including exploration, creation, and manipulation of sound with the same level of complexity as required in composing the moving image. Students produce a final project that demonstrates skills learned. Prerequisite(s): course 170A; priority given to students who have been accepted into the production concentration. Admission is by an online application process which begins several weeks prior to the start of the quarter. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions that may apply. Students who are not in the production concentration and who have completed course 170A may apply by submitting an application and sample of production work at first class meeting; these applications will be considered on a space-available basis. Enrollment limited to 20. *The Staff*

180. Writing About Film, Television, and Digital Media. *

Improves students' ability to write and edit, and invites students to explore different kinds of writing related to film, television, and digital media including historical, theoretical, cultural criticism, popular reviews, grant proposals, online forums, and publishing. Prerequisite(s): course 20A, 20B, or 20C. Enrollment restricted to sophomore and junior film and digital media majors. Enrollment limited to 20. *L. Kim*

185. Special Topics in Film and Video.

Study of selected aspects of film and/or video history, theory, or criticism. Students are billed a course fee. *The Staff*

185D. Sound and Image in Theory and Criticism. *

Explores theories and critiques of sound in culture and analyzes sound in relation to media images in film, video, digital media, and music/image practices such as Vjaying. Voice, noise, and music are addressed (but not scores). Students are billed for a course fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors and minors during priority enrollment; may be opened if space allows. (General Education Code(s): A.) *The Staff*

185E. Chicana/o Cinema, Video. *

Examines emergence of Chicana/o cinema and video from a place of social displacement, resistance, and affirmation. Looks at Chicana/o representation and spectatorship as it pertains to ethnicity, class, gender, and the beginning of a new Chicana/o film aesthetic. Students are billed for a course fee. Prerequisite(s): course 20A. Enrollment limited to 60. (General Education Code(s): E.) *The Staff*

185R. The Film Remake. *

History and theory of the remake through case studies across cultural, gender, and genre boundaries. Examines changing cultural, social, stylistic, and technical values and explores notions of originality, repetition, homage, allusion, quotation, and intertextuality from Feuillade and Hitchcock to Raimi and Johnny To. Students are billed a materials fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors and minors during priority enrollment; may be opened if space allows. *The Staff*

185S. Advanced Topics in Film Studies. F

Study of a selected aspect of film history, theory, or criticism. Includes weekly screenings and historical/theoreti-

cal readings. Usually offered in alternate academic years with rotating topics. Students are billed a materials fee. Prerequisite(s): courses 20A and 120. Enrollment restricted to film and digital media majors and minors. May be repeated for credit. *Y. Wang*

185X. EyeCandy Seminar. W

Seminar and workshop on writing, producing, and publishing a journal. Students engage in assignments and exercises directly and indirectly related to the production of a web launch as well as a print copy of *EyeCandy*. Permission of instructor required based upon student's participation in *EyeCandy* in fall and winter quarters. Preference given to film and digital media majors and minors; others may apply based on qualifications and as space allows. Students are billed a materials fee. May be repeated for credit. *J. Fankushen*

187. Advanced Topics in Television Studies. W

Study of a selected aspect of television history, television criticism, or national television. Includes weekly screenings and historical/theoretical readings. Usually offered in alternate academic years, with rotating topics. Students are billed a course fee. Prerequisite(s): course 20B. Enrollment restricted to junior and senior film and digital media majors and minors. May be repeated for credit. *A. Hastie*

189. Advanced Topics in Digital and Electronic Media Studies. S

Study of a selected aspect of digital and/or electronic media history and criticism. Topics can include virtual environments, electronic networks, video installations, computer games, and hyper-media. Usually offered in alternate academic years. Students are billed a course fee. Prerequisite(s): course 20C. Enrollment restricted to junior and senior film and digital media majors and minors during priority enrollment; may be opened if space allows. May be repeated for credit. *S. Scott*

190. Advanced Critical Studies Seminar. *

Intensive research and writing on a changing topic chosen to demonstrate critical mastery in a specific area of film and/or digital media studies. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors accepted into the critical studies concentration. Enrollment limited to 15. *A. Hastie*

191. Critical Studies Thesis Preparation Seminar. *

Intensive seminar prepares students for writing a critical studies thesis. Designed to be taken prior to enrolling in course 195, seminar guides students through the process of choosing a thesis topic, preparing a bibliography, and drafting a detailed outline. Prerequisite(s): course 190. Enrollment restricted to senior film and digital media majors accepted into the critical studies concentration. Enrollment limited to 15. *S. Stamp*

192. Directed Student Teaching. F,W,S

Teaching a lower-division course under faculty supervision (see course 42). Proposal supported by a faculty sponsor and department. *The Staff*

194A. Film Theory Seminar. W,S

Advanced senior seminar examining classical and contemporary film theory and those theoretical paradigms and methods that have illuminated the medium: formalism, realism, structuralism, semiology, psychoanalysis, Marxism, feminism, and phenomenology. Primary texts are read. Students are billed a course fee. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *S. Scott, A. Hastie*

194B. Electronic Media Theory Seminar. F

Study of the major theoretical approaches to electronic media and their critical application to texts from televi-

sion, independent video art and documentary, and electronic networks. Readings include a range of theoretical approaches selected from semiotic, ideological, feminist, cultural studies, reception theory, postmodernist, and other critical traditions. Students are billed a course fee. Prerequisite(s): courses 20B and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *L. Kim*

194C. New Media Theory Seminar. *

Study of theories of emerging genres of electronic culture, with emphasis on the discourse about computer-assisted and computer-generated forms of art and mass culture such as digital imagery, virtual environments, telematics, hyper- and multimedia, and electronic networks. Students are billed a course fee. Prerequisite(s): courses 20C and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *The Staff*

194D. Film History Seminar. *

In-depth study of film history investigating developments in cinematic style, technological innovation, and industrial practice against the broad canvas of cultural history. Students will acquire the basic tools necessary to conduct informed film historical research. Students are billed a course fee. Prerequisite(s): course 120 and either 130 or 134A or 134B. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. *S. Stamp*

194E. International Cinemas. S

In-depth study of the history and theory of international cinemas with changing topics such as globalism and resistance, postcolonial theory, international productions and querying race, the "national," and cinema. Students are billed a course fee. Prerequisite(s): course 120 and either 132A, 132B, or 132C. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. *P. Limbrick*

194F. Film and the Other Arts. *

Examines the use of artistic media within films and of films that thematically are about other media. What do other art forms allow for—in terms of the story, the film's meaning, the gaze, and the spectator? Students are billed a course fee. (Formerly *Film and the Other Arts: Music and Dance*.) Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. *L. Kim*

194G. New(s) Media. *

Addresses the role of new media technologies in the production, distribution, and reception of the news, especially international news. Examines software and network technologies as amplifying, filtering, extending, and countering the forces of media. Students are billed a course fee. Prerequisite(s): courses 20C and 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. *W. Sack*

194S. Special Topics Seminar. W

Intensive research and writing on a changing topic chosen to demonstrate critical mastery in a specific area of film and digital media studies, for example, film adaptations and their literary sources, documentary/reality shows, or networked new media texts. Students are billed a materials fee. Prerequisite(s): course 120. Enrollment restricted to senior film and digital media majors. Enrollment limited to 20. May be repeated for credit. *G. Youmans*

195. Senior Thesis/Project. F,W,S

An individually supervised course, with emphasis on independent research, to culminate in a senior thesis/project/production. Proposals should be submitted to adviser one quarter in advance. Petition required, approved by instructor and department; thesis petitions available in the department office. *The Staff*

196A. Senior Project in Narrative Production. W,S

Students accomplish a range of production work focused on narrative production including script development, casting, and rehearsing to shooting and post-production work. Students are billed a materials fee. Admission by application during the preceding quarter. Students may apply a maximum of two times. See the enrollment conditions section in the quarterly *Schedule of Classes* for application dates and other application instructions. (Formerly *Senior Project in Film and Video Production*.) Enrollment limited to 20. *C. Archer, G. Vazquez*

196B. Senior Project in Screenwriting. W

Students write a full-length (75–100 page) screenplay in this seminar while studying structural concepts and character development in selected films. Scheduling, outlining, pitching ideas, and critique are all part of the workshop format of the class. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 150 or another screenwriting course. Interview only; petition required; special application should be submitted to adviser one quarter in advance; see department office for more information. Enrollment restricted to senior film and digital media majors. Enrollment limited to 16. (General Education Code(s): W.) *H. Dam*

196C. Senior Documentary Workshop. W

Students are responsible for producing short documentaries (up to 12 minutes). In class, students discuss each other's work as well as view and discuss other documentary films. Admission by application during the preceding quarter. Enrollment restricted to senior film and digital media majors. Students are billed a materials fee. Enrollment limited to 20. *E. Hollander*

197. Senior Digital Media Workshop. *

Independent projects using the computer as a medium as well as a tool. Students will design and implement projects in digital imaging, information, and communications environments. Students' projects may include designing virtual communities, building collaborative networks, and/or interactive, multimedia web works. Students are billed a course fee. Admission by application during winter quarter. See department office for more information. Enrollment limited to 20. *W. Sack*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office.

May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office. May be repeated for credit. *The Staff*

Graduate Courses**200A. Introduction to Graduate Study.** F

Introduces graduate study in the critical practice of film and digital media. Conducted as a pro-seminar, with faculty presentations and discussion. Enrollment restricted to graduate students. Enrollment limited to 15. *P. Limbrick*

200B. Theory and Praxis of Digital Media 1. W

Investigates methods for rhetorical production of written and visual/aural texts. Emphasizes questions about delineation between theory and practice, and provides groundwork in theories relevant to key areas in film, television, and digital media studies. Enrollment restricted to graduate students. Enrollment limited to 15. *L. Kim*

200C. Theory and Praxis of Film and Digital Media 2. S

Investigates methods for rhetorical production of written and visual/aural texts. Emphasizes interwoven practices of the artist/researcher/teacher, formal and expressive possibilities of "hybridized" research, and cultural issues raised by integrated methods of inquiry. Students are billed for a materials fee. Enrollment restricted to graduate students. Enrollment limited to 15. *I. Gustafson*

222. Critical Methodologies in Film and Television. W

Core course introduces graduate students to critical methodologies in media studies and offers sustained examination of theoretical approaches to media studies. Methodologies may include (but not limited to) contemporary theory (semiotic, psychoanalytic, ideological), cultural studies, intertextuality, feminist film, and television theory. Enrollment restricted to graduate students. Enrollment limited to 14. *A. Hastie*

223. The Film/Video Essay. *

Focuses on "essayistic" approaches to scholarship and production, emphasizing relationships between theory and praxis that this mode of production requires. Enrollment restricted to graduate students. Enrollment limited to 15. *I. Gustafson*

224. Mediating Difference. *

Considers theoretical and strategic, situated "difference" in the era of (semi-)colonialism, post-colonialism, and globalism, examining theoretical writing alongside media works on the topic. Enrollment restricted to graduate students. Enrollment limited to 15. *Y. Wang*

225. Software Studies. *

Today, our lives are woven into vast software systems that facilitate our family communications, personal relations, jobs, and cultural, economic, political, and social institutions. Course examines these conditions of life and thought using insights from the arts and humanities. Enrollment restricted to graduate students. *W. Sack*

226. Queer Theory and Global Film and Media. *

Examines queer subjectivities, practices, and theories in relation to globalization, transnationalism, and postcoloniality, focusing on film/media produced outside the United States. The course addresses representation and also uses queer theoretical work to engage wider contexts of film/media production, distribution, and exhibition. Enrollment restricted to graduate students. *P. Limbrick*

283. New Media Art and Digital Culture. *

A study of new media art in the context of digital culture. Electronic, digital and online technology art are set in critical relation to discourse on history, aesthetics, hypermedia, the interface, hacks, embodiment, robotics, artificial life and other topics. Students are billed a course fee. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Morse*

284. Film, Culture, and Modernity. S

Traces the rise of motion picture culture from the late 19th century through the end of the 1920s, looking at film's emerging visual and narrative grammar, its changing cultural status, and its engagement with shifting registers of class, ethnicity, gender, and sexuality. Enrollment restricted to graduate students. Enrollment limited to 15. *S. Stamp*

297. Independent Study. F,W,S

Either study related to a course being taken or a totally independent study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. May be repeated for credit. *The Staff*

Faculty and Professional Interests**Professor**

CARLA FRECCERO (Literature)
Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory, U.S. popular culture

PASCALE GAITET (Literature)
Nineteenth- and 20th-century French literature, sociolinguistics, political history, Celine, Genet

SHARON KINOSHITA (Literature)
Intercultural relations in 12th- and 13th-century literature, Mediterranean studies, globalism, postcolonial theory, world literature and cultural studies

RICHARD TERDIMAN (Literature)
Nineteenth- and 20th-century French and European literature and culture, literary and cultural theory, contemporary critical theory, cultural globalization

Lecturer

ANGELA ELSEY
Francophonie, 19th-century French history and civilization, French and Francophone cinema

GRETA HUTCHISON
Foreign language pedagogy, second language acquisition, medieval French literature, and 19th-century literature and art

NORA MEGHARBI
Second and foreign language acquisition, applied linguistics, pedagogical grammar, technology and multimedia, sociolinguistics, TA training, course supervision, business French, scientific French, francophone literature, translation

Program Description

Students interested in acquiring proficiency in French can enroll in language courses from beginning to

advanced levels. In addition, students may select from among the following programs: a major in language studies, a major in literature with an emphasis in French literature, or a major in global economics.

Lower-division courses 1-6 are taught entirely in French and prepare students for advanced study either on campus or abroad. They are designed to develop proficiency in aural comprehension, speaking, reading, and writing skills, and to introduce student to French and Francophone cultures.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The UC Education Abroad Program (EAP) offers both semester and one-year programs in many regions of France, including Bordeaux, Lyon, Grenoble, Toulouse, and Paris. With the approval of an adviser, some French courses taken abroad may be applied to major requirements. For more information on the program, see UC Education Abroad Program.

Lower-Division Courses

1. Instruction in the French Language. F,W,S

Introduction to French language and culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of French. *The Staff*

2. Instruction in the French Language. F,W,S

Further development of cultural competence and basic French language skills, both written and spoken. Students learn past tenses in this course. Prerequisite(s): course 1 or placement by interview. *The Staff*

3. Instruction in the French Language. F,W,S

Final quarter of first-year sequence. Students complete study of French language basics, including the future tense and the conditional and the subjunctive moods, while continuing to learn about French and Francophone cultures. Prerequisite(s): course 2 or placement by interview. *The Staff*

4. Intermediate French. F,W,S

First course in intermediate sequence. Students review and expand upon their previous study of the language through short literary readings, vocabulary building, grammar study, composition, and discussions. Prerequisite(s): course 3 or placement by interview. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate French. F,W,S

Further development of intermediate-level oral and written skills through study of vocabulary and structures. Students also read and discuss a French or Francophone play. Prerequisite(s): course 4 or placement by interview. (General Education Code(s): CC, IH.) *The Staff*

6. Intermediate French. F,S

Final course of intermediate sequence includes grammar study, vocabulary building, extensive writing, and discussion. Reading of a French or Francophone novel is an integral part of course. Prerequisite(s): course 5 or placement by interview. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

111. Stylistics. W

Intensive work in French composition with the aim of attaining grammatical correctness and excellence of expression while developing literary appreciation. May be repeated for credit with consent of instructor. Prerequisite(s): course 6. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

125A. French Civilization: 19th Century. S

Survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 19th century. Prerequisite(s): course 6. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Faculty and Professional Interests

Associate Professor

ZSUZSANNA ABRAMS
Applied linguistics, language pedagogy, second language acquisition, intercultural communication, discourse analysis, computer-mediated communication

LOISA NYGAARD (Literature)
Eighteenth- and early 19th-century German literature; romanticism; aesthetics and politics of landscape; military theory

Assistant Professor

A. HUNTER BIVENS (Literature)
Twentieth- and 21st-century German literature and film, Marxism and critical theory, psychoanalysis, lyric poetry, literary realism, the novel

Lecturer

WALTER CAMPBELL
Language teaching, 18th- and 19th-century German literature, history of German

Program Description

Students interested in acquiring proficiency in German can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, a major in German studies, a major in literature with an emphasis in German literature, or a major in global economics.

The sequence of lower-division courses 1-6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Another sequence of lower-division courses, equivalent to levels 1, 2, and 3, is courses 1A and 1B, offering accelerated German language instruction. Courses 1A and 1B are taught sequentially, winter and spring quarters. Instruction takes place almost exclusively in German.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The University of California offers Education Abroad Program (EAP) opportunities in Berlin, Potsdam, and Göttingen. Students may spend fall or spring semesters or a full academic year in Berlin (Berlin European Studies (BEST) or regular course of study), a spring semester in Potsdam (beginning German language program or intermediate German language and culture program), or a semester or year in Göttingen (graduate study). Language requirements for admission to these programs range from little or no German required (BEST program in Berlin and beginning German program in Potsdam) to one year of college-level German required (intermediate German language and culture program in Potsdam) to two years of college-level German required (regular course of study in Berlin). The Potsdam program courses may also be used to fulfill the language requirement for the year-long program in Berlin. Selected students may continue directly from the spring semester in Potsdam to the one-year program in Berlin. Academic and professional internship opportunities are also available to all EAP students in Germany.

Students may apply to any of these programs at any point in their student career. For the year-long programs, students generally apply in their sophomore year for a junior year abroad. As an exception, some students apply in their junior year for a senior year abroad; such students must sometimes spend an additional quarter at UCSC in order to satisfy all requirements for their major. Courses taken abroad can, with approval of an adviser, be applied to major requirements.

For more information on these programs, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Lower-Division Courses

1. Instruction in the German Language. F

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Elementary sequence (1-2-3) starts in fall quarter only. (An accelerated sequence, course 1A-1B, begins winter quarter.) Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. *The Staff*

1A. Intensive Elementary German. W

Accelerated instruction in elementary German language. Taken in conjunction with German 1B, the two courses are equivalent to levels 1-2-3. Accelerated pace allows a more rapid acquisition of reading, writing, listening, and speaking skills. *The Staff*

1B. Intensive Elementary German. S

Sequential to course 1A, completes the equivalent instruction offered through German 1-2-3. Prerequisite(s): course 1A or 2, or placement by interview. For students completing course 2, course 3 is preferable. *The Staff*

2. Instruction in the German Language. W

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Prerequisite(s): course 1 or 1A; or placement by examination. Students interested in a course who have not taken the prerequisites should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the German Language. S

Teaches beginning-level competence in speaking, reading, writing, and listening comprehension. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for exact quarter(s) of offering. Prerequisite(s): course 2; or placement by examination. Students interested in a course who have not taken the prerequisites should meet with the instructor prior to the first class meeting. *The Staff*

4. Intermediate Studies in German Language. F

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for the exact quarter(s) of offering. Prerequisite(s): course 1B or 3; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Studies in German Language. W

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German. Not all levels are available each quarter. Check the quarterly *Schedule of Classes* for the exact quarter(s) of offering. Prerequisite(s): course 4; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): CC, IH.) *The Staff*

6. Intermediate Studies in German Language. S

German Studies

Department of History
201 Humanities
(831) 459-2982
<http://germanstudies.usc.edu/>

Faculty and Professional Interests**Program Faculty**

ZSUZANNA ABRAMS, Associate Professor of Languages
Applied linguistics, language pedagogy, second language acquisition, intercultural communication, discourse analysis, computer-mediated communication

AMY BEAL, Associate Professor, Music
American music, 20th-century music, experimental and improvisatory performance practices, postwar and Cold War culture, German new music festivals and radio stations, piano performance, contemporary music ensemble

A. HUNTER BIVENS, Assistant Professor in Literature
Twentieth- and 21st-century German literature and film, Marxism and critical theory, psychoanalysis, lyric poetry, literary realism, the novel

WALTER CAMPBELL, Lecturer in German Language
Language teaching, 18th- and 19th-century German literature, history of German

MARK CIOC, Professor of History
German history, modern European history, environmental history

JOCELYN HOY, Lecturer, Philosophy
Feminist philosophy, 19th- and 20th-century continental philosophy

DONNA HUNTER, Associate Professor of History of Art and Visual Culture
European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice, portraiture

VIRGINIA JANSEN, Emerita, History of Art and Visual Culture

MARGARET MORSE, Professor, Film and Digital Media

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary, science fiction, and silent comedy

LOISA NYGAARD, Associate Professor of Literature
Eighteenth- and early 19th-century German literature; romanticism; aesthetics and politics of landscape; military theory

Program Faculty Advisers

MARK CIOC, Professor of History

LOISA NYGAARD, Associate Professor of German Literature

A. HUNTER BIVENS, Assistant Professor of German Literature

Program Description

German studies is a transnational and transdisciplinary major that deals with the various German-speaking regions of central Europe. Whether one thinks of philosophy, music, art, education, religion, or political and social history, German culture has exercised a profound and often decisive influence on Europe. Some of the most important ideological debates in Western culture have arisen in the German-speaking area, and changes in German culture and society have sometimes had devastating effects on world history. Events and political developments of recent years—such as the unification of East and West Germany and the emergence of the German-speaking region of Europe as a major player in world affairs—have had important impacts.

A German studies major provides students with an intellectually diverse program—covering history, history of art and visual culture, literature, and philosophy—in which students and faculty come together in exciting and demanding pursuits.

The German studies major is administered by the History Department. For additional information on curriculum and advising, go to <http://history.usc.edu>.

Major Requirements

German language level 5 or the equivalent is a prerequisite for the German studies major and all upper-division courses taught in German. Students are encouraged to take German 1 through German 5 as early as possible in their academic program. All students are required to take a total of 11 courses, including a minimum of five courses in German literature and German history. No more than two of the 11 required courses may be lower-division courses and no more than three may come from the Germany in a European or World Context list. A minimum of five of the 11 required courses must be taught in German or principally through German-language texts. Regular consultation with a program faculty adviser is required.

Comprehensive requirement. All students must complete an approved senior seminar in German literature or German history. The senior seminar is one of 11 courses required for the major. Consult the annual German studies course list for available seminar courses, published online at <http://germanstudies.usc.edu>.

It is strongly recommended that students spend time in residence in Germany through the University of California Education Abroad Program (EAP) to further enrich their program of study and ensure a command of the language. Students are allowed to transfer up to five courses taken at German universities toward the requirements for the major. However, the five core courses in

German literature and history must be taken at UCSC.

Disciplinary Communication (DC) Requirement.

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement in German Studies is fulfilled by completing History 196G or History 196P. Please refer to updated information at <http://reg.usc.edu/catalog/html/disciplinarycommunicationchart.html>.

Honors in the German Studies major. All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The German studies faculty advisers determine honors based upon narrative evaluations in courses applied towards the German studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer graduates are reviewed for honors in fall quarter.

Global Economics

Students wishing to pursue a course of study in global economics should consult the global economics major under Economics, page 200.

Greek

Language Program
218 Cowell College
(831) 459-2054
<http://language.usc.edu>

Faculty and Professional Interests

Professor

KAREN BASSI (Literature)

Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

MARY-KAY GAMEL (Literature)

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

CHARLES W. HEDRICK JR. (History)

Greek and Roman history, epigraphy, historiography, political theory

JOHN P. LYNCH (Literature), Emeritus

DANIEL SELDEN (Literature)

Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Lecturer

GILDAS HAMEL (History)

History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

JENNIFER LYNN

Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; Cicero

Program Description

The Language Program offers instruction in elementary ancient Greek. It consists of a two-course sequence, Greek 1 and Greek 2, that begins in the fall quarter only. Students interested in Greek literature should see the course listings under Literature. Those interested in classical studies should see program description for classical studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Lower-Division Courses

1. Elementary Ancient Greek. F

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only. *The Staff*

2. Elementary Ancient Greek. W

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature. Prerequisite(s): course 1, or permission of instructor *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Greek Literature

Students wishing to pursue a course of study in Greek literature should consult the concentration under national/transnational literatures under Literature, page 361.

Hebrew

Language Program
218 Cowell College
(831) 459-2054
<http://language.usc.edu>

Faculty and Professional Interests

Lecturer

TAMMI ROSSMAN-BENJAMIN

Hebrew language and culture, biblical Hebrew syntax and semantics, the Hebrew Bible, Jewish thought, psycholinguistics, second-language acquisition and bilingualism

Program Description

Students interested in acquiring proficiency in Hebrew can enroll in language courses from beginning to intermediate levels. In addition, credits from these courses may be counted toward the minor in Jewish studies. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking,

reading, and writing. Attention is also given to developing an understanding of the culture, history, and religion that have been expressed through the Hebrew language from antiquity until today. Some instruction takes place in Hebrew from the beginning level.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Lower-Division Courses

1. Instruction in the Hebrew Language. F

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Elementary sequence (1-2-3) begins in fall quarter only. *The Staff*

2. Instruction in the Hebrew Language. W

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Prerequisite(s): course 1. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the Hebrew Language. S

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by language laboratory work. Prerequisite(s): course 2. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

4. Intermediate Hebrew. F

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel. Prerequisite(s): course 3. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

5. Intermediate Hebrew. W

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel. Prerequisite(s): course 4. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): IH.) *The Staff*

10. Introductory Yiddish.

Introduces the Yiddish language. Students learn to speak and to ask others in Yiddish about themselves and about common situations (the classroom, work, family), and learn to read and write simple Yiddish texts. *The Staff*

80. Introduction to Biblical Hebrew. W

Introduces students to the basic lexicon and grammatical structures of biblical Hebrew, with an emphasis on the development of a set of useful translation strategies. Throughout the course, students will be applying their emergent skills to translating a variety of biblical texts. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Upper-Division Courses***106. Israel's Struggle for Identity as Seen Through Israeli Cinema. S**

Examines, through the medium of film, Israel's struggle for identity since its founding as a modern state. Taught in English with a weekly discussion section in Hebrew. Readings in English and Hebrew; writing, film analysis, cultural commentary, and other assignments in Hebrew. Students may not receive credit for this course and Languages 80F. Prerequisite(s): course 5 (or equivalent). May be repeated for credit. (General Education Code(s): ER, E.) *T. Rossman-Benjamin*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

MARK TRAUOGOTT

Social and economic history, 19th-century France, French revolutions, European working class, historical methods, workers' autobiographies

MARILYN J. WESTERKAMP

Colonial and revolutionary America; early modern cultural and religious history; U.S. religious history; gender studies

Associate Professor

DAVID HENRY ANTHONY III

African and African American history, art, music, literature, and cinema; eastern and southern Africa; African languages; Indian Ocean world; African and African American linkages; Islamic civilization; African diaspora studies; world history

DILIP K. BASU

Modern South Asia, modern China, world history: colonial and post-colonial; film and visual culture

PEDRO G. CASTILLO

Chicanola history and culture; American social and urban history; race, class, and gender in California history, immigration history

BRIAN A. CATLOS

Pre-modern Mediterranean; medieval Iberia and Europe and the Islamic world; Christian-Muslim-Jewish relations, ethnicity, minorities, social, and economic history; world history

ALAN S. CHRISTY

Early modern and modern Japan; history of social sciences, colonialism, nationalism

MARIA ELENA DIAZ

Atlantic world, Colonial Latin America and the Caribbean, Cuba; social and cultural, global and local histories; colonialism, slavery and freedom, race/ethnicity, gender and class; legal, political, popular, and religious culture

MATTHEW D. O'HARA

Colonial and modern Latin America; Mexico; religion, spirituality, and ritual; race, ethnicity, and identity; political culture

CYNTHIA POLECRITTI

Medieval, Renaissance, and Modern Italy, Mediterranean urban and cultural history, ritual and popular devotion

ALICE YANG

Historical memory, Asian American history, gender history, race and ethnicity, 20th-century U.S., oral history

Assistant Professor

NORIKO ASO

Japanese social and cultural history, women's history, race and ethnicity, colonialism, nationalism, Korean history

MINGHUI HU

Early Modern China (1600-1900)

CATHERINE A. JONES

U.S. civil war and Reconstruction; slavery and emancipation; the American South; history of children; history of education; women and gender

GREGORY O'MALLEY

Colonial British America and the Caribbean; the Atlantic World; slavery and the slave trade; race, ethnicity, and identity; revolutionary America; colonization and intercultural contact

Lecturer

GILDAS HAMEL

History of Israel, Hellenistic and Roman Palestine, and Christianity; Hebrew and Greek bible; classical languages; Celtic cultures

MATTHEW LASAR

U.S. and international telecommunications; political, social, and economic history

JENNIFER K. LYNN

Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; Cicero

BRUCE THOMPSON

European intellectual and cultural history, French history, Jewish intellectual and cultural history, British and Irish history, history of cinema, history of espionage, environmental history

**Professor**

BETTINA APTHEKER (Feminist Studies)

Women's history, feminist oral history and memoir; feminist pedagogy; African-American women's history; queer studies; feminist Jewish studies; feminist critical race studies

RAOUL BIRNBAUM (History of Art and Visual Culture)

Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

CHRISTOPHER CONNERY (Literature)

World literature and cultural studies, globalism and geographical thought, the 1960s, Marxism, pre-modern and modern Chinese cultural studies, cultural revolution

JOHN DIZIKES, EMERITUS (American Studies)

BARBARA L. EPSTEIN (History of Consciousness)
Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

JOHN HAY (History of Art and Visual Culture)

Visual and conceptual representation in pre-modern China, especially landscape painting; Asian art history

VIRGINIA JANSEN, Emerita (History of Art and Visual Culture)

Medieval visual culture, urbanism, and secular building; Gothic architecture; campus planning and architecture

SHARON KINOSHITA (Literature)

Intercultural relations in 12th- and 13th-century literature, Mediterranean studies, globalism, postcolonial theory, world literature and cultural studies

PAUL M. LUBECK (Sociology)

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

JOHN P. LYNCH (Literature), Emeritus

DANIEL SELDEN (Literature)

Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

JUDY YUNG, Emerita (American Studies)

Associate Professor

GABRIELA ARREDONDO (Latin American and Latino Studies)

U.S. social and cultural history; Chicano/a history; critical race and ethnicity theories; immigration history; Latin/a/os in the U.S.; Chicana feminisms; "borderlands" studies, modern Mexico history

DAVID T. BRUNDAGE (Community Studies)

American working-class and immigration history, history of U.S. social movements, Irish history and politics

BERNARD L. ELBAUM (Economics)

Economic history

PAUL ORTIZ (Community Studies)

African American history, U.S. social and political history, social documentary, oral history, subaltern studies and theories of resistance, U.S. South, Latino studies, social movements, working-class history; history of farm labor, African diaspora

Program Description

History is the attempt to understand the meanings of the human life experience, not generally and abstractly, but in terms of specific individuals, events, and circumstances. Consequently, of all academic pursuits, it is the one best equipped to help us locate phenomena in their specific contexts, whether we are concerned with political events, social changes, the production of art, the development of technologies, scientific discoveries, or life stories. In this sense, the study of history can also be an invaluable complement to any other major.

The history program at UCSC is designed to bring about an understanding of the ideas, experiences, and events that have shaped this country and the world at large. The program's main emphases are in social and cultural history, with additional strengths in intellectual and political history.

A degree in history opens up a wide range of career possibilities. Some careers fall within the historical profession, including teaching at the university, college, and high school levels and working in various areas of public and applied history, such as historic preservation, archives, libraries, and museums. For careers in fields as diverse as law, business, government, foreign service, publishing, journalism, and communications, a degree in history lays the foundation in research, analytic, and writing skills upon which later professional training can be built.

Requirements for the Major

A minimum of 12 courses is required for the major. No more than four of the minimum 12 courses may be lower division. The history major does not require an examination for entrance and does not limit the number of students accepted into the program. It is strongly advised that students complete at least one introductory history course before declaring the major.

At UCSC, the history curriculum offers three broad, geographically defined regions of concentration:

- the Americas and Africa
- Europe
- Asia and the Islamic World

Course requirements. Each history major selects one of the three regions of concentration listed above. History majors are required to take at least one lower-division survey course within their chosen region of concentration.

- Americas/Africa: History 10A, 10B, 11A, 11B, or 30
- Asia/Islamic World: History 40A, 40B, 41, or 43
- Europe: History 65A, 65B, 70A, 70B, or 70C

Transfer coursework may or may not apply toward the survey course requirement; consult the History Department.

In consultation with the history undergraduate program coordinator and a faculty adviser, the student plans a program of study that will also fulfill the following distribution of courses:

- five courses in the chosen region of concentration, one of which must be the lower-division survey course; three of the remaining courses must be upper-division;
- two courses from each of the remaining two regions of concentration;
- two upper-division history electives based in any of the regions of concentration;
- one comprehensive exit requirement (see below) in the student's chosen region of concentration.

Students often choose to satisfy the history major course requirements listed above according to some general theme of special interest to them. Faculty and staff advisers will assist the students who choose this option with their course selection.

In addition to all coursework, history majors must complete a senior check and exit survey in the first quarter of their senior year. For details, see the department web site, <http://history.ucsc.edu>.

Distribution requirements. Among the 12 courses required for the major, at least three must meet chronological distribution requirements. One must be set before 600 A.D., and two must be set in periods prior to the year 1800 A.D.

Interdisciplinary coursework. The History Department encourages its majors to take upper-division courses in disciplines related to history, including sociology, literature, community studies, American studies, politics, Latin American and Latino studies, and others. Students who wish to substitute one or two such appropriate upper-division courses for history electives must obtain approval from the History Department. These courses are subject to the limitations described below under the "Transfer credits and substitutions" section.

Comprehensive requirement. A comprehensive exit requirement in the student's chosen region of concentration can be fulfilled by completing an exit seminar (one quarter: 190-series, 194-series, or 196-series) or a thesis (two quarters: courses 195A and 195B). Please consult the department web site for a more detailed description of these courses.

Disciplinary Communication (DC) requirement. Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. History students can fulfill the upper-division Disciplinary Communication (DC) Requirement by completing a comprehensive exit requirement in their chosen region of concentration. Students may complete an exit seminar (one quarter: 190 series, 194 series, or 196 series) or a thesis (two quarters: courses 195A and 195B). Please consult the department web site for a more detailed description of these courses and refer to updated

DC information at <http://reg.ucsc.edu/catalog/html/disciplinarycommunicationchart.html>.

Honors in the history major. All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The History undergraduate education committee determines honors at the end of each quarter. Performance in history courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most history courses for honors, and excellence in all history courses for highest honors. Summer graduates are reviewed for honors in fall quarter.

Language recommendation. Proficiency in a foreign language is strongly recommended for all history students and is essential for those who plan to pursue graduate studies in history. Many doctor of philosophy (Ph.D.) programs in history require applicants to read one or two languages besides English. The University of California Education Abroad Program (EAP) is appropriate for history majors as a means to both enhance language skills and take history courses elsewhere.

UC Education Abroad Program. Subject to the limitations described below under "Transfer credits and substitutions," up to three courses in history completed through EAP may be applied toward major requirements. Consult the History Department web site, and speak with the undergraduate program coordinator for further details.

Transfer credits and substitutions. A minimum of five regularly scheduled history courses plus the comprehensive requirement must be taken from members of the UCSC history faculty. Subject to the limits indicated in parentheses, courses from the following categories may also be applied to the history major:

Transfer courses taken at another institution (limit of 3)

Education Abroad Program (limit of 3)

UCDC (limit of 2)

UC in Sacramento (limit of 2)

Related upper-division courses taken in another UCSC department (limit of 2)

Independent and field studies (limit of 2)

Requirements for the Minor

Students whose major area of interest is not history may nonetheless find that a minor in history makes an invaluable contribution to their studies. For the minor in history, eight history courses, four of which must be upper division, are required. There is no senior comprehensive requirement for the minor.

Graduate Program

The Ph.D. program in history at UCSC emphasizes an interdisciplinary and cross-cultural approach to historical studies. The History Department offers a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. The department only admits those highly motivated students who are most qualified to pursue advanced studies in history. The department also only admits those applicants who can best benefit from the specific strengths of our faculty.

Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

Research and Teaching

In preparing graduate students for research and teaching at the university level, the department offers training in four geographically and chronologically defined fields: U.S. history, European history since 1500, East Asian history since 1600, and world history since 1500. U.S., European, and East Asian history are defined as primary teaching fields; each graduate student is required to choose one. Students of U.S. history may incorporate Latin American history in their coursework, while students of European history might include the history of European colonialism and imperialism. Every year the faculty in each field offer introductory readings seminars and, when possible, classes on more specific topics (see below for information about course offerings). Each graduate student also prepares a second teaching field different from the primary field and can choose from among U.S., European, East Asian, or world history. Students may also petition the graduate committee to prepare a secondary teaching field in African or Latin American history.

Research Clusters

The History Department has created a series of thematic research clusters to coordinate the training of graduate students in historical research. Each research cluster is composed of History Department faculty and graduate students as well as faculty outside the department who share broad scholarly interests. The clusters serve as a way to coordinate the research of faculty and graduate students whose work encompasses different geographic regions and chronological periods. Although the nature and number of the research clusters may change over time, the department currently offers two basic groupings: 1) colonialism, nationalism, and race; and 2) the history of gender.

The faculty of each cluster provide at least one research seminar every other year in addition to readings courses. All the affiliated graduate students must take at least one research seminar during their first two years; they are encouraged to take more than one.

Faculty and graduate students also participate in interdisciplinary forums outside the department. These include programs sponsored by the Chicano/Latino Research Center, the Pre- and Early Modern Studies Group, the Center for Cultural Studies, and the UCSC Institute for Humanities Research. Advanced graduate students may also have the opportunity to work in programs sponsored by the University of California Humanities Research Institute at UC Irvine. Finally, multi-campus groups in which students and faculty are involved include the Bay Area Seminar in Early American Studies, the Bay Area Pre- and Early Modern Studies Group, and the French Studies Group at Stanford.

Courses

Until they pass the qualifying examination and are formally advanced to candidacy for the Ph.D. degree, students must be in residence at UCSC and are expected to complete a minimum of 12 credits each quarter to maintain normal academic progress. Completion of a minimum of 12 courses of 5 credits each (in addition to History 280A, 280B, and 280C) is required for advancement to candidacy. Courses taken are graduate seminars, independent study courses, and most upper-division undergraduate courses.

Students are required to take the following before advancing to candidacy:

- one research seminar during the first four quarters: History 204A, 204B, or 204C;
- second teaching field: two courses in American, European, East Asian or world history;
- outside courses: two quarters of graduate coursework outside the History Department;
- readings courses in the appropriate field: East Asia—History 230A, 230B, 230C (China) or History 242, 243, 244 (Japan); Europe—History 250A, 250B; U.S.—History 210A, 210B.

Graduate students in East Asian history specialize in either modern Chinese or modern Japanese history, but all students in the East Asian program will be prepared to teach both. The core curriculum for East Asian history consists of three China reading seminars (courses 230A, 230B, 230C) and three Japan reading seminars (courses 242, 243, 244) taught in sequence over three years, covering such topics as foundational historiographies, gender, social movements, and transnational circulation of people, commodities, and ideas. Over the course of the three years to the qualifying examination, China students will be expected to take all three China seminars and at least two of the three Japan seminars. Japan students will be expected to take all three Japan seminars and at least two of the three China seminars. Additional coursework in research methods as well as occasional independent studies will also be available, and students are encouraged to take classes that have a wide range of faculty in other departments across the campus.

Foreign Language Requirement

No prior foreign language preparation is required for admission with a primary teaching field in U.S. history. Two to three years of college work, or its equivalent, in at least one foreign language is required for admission to the European program. Students who choose East Asian history as their primary teaching field will be required to have completed at least three years of college-level Chinese or Japanese prior to admission; more years are recommended. Depending upon the student's intended field of research, Japanese language study may also be required of China specialists as part of the graduate program of study.

Students with a primary teaching field in U.S. history are expected to demonstrate a reading competency in at least one foreign language prior to taking the Ph.D. qualifying examination. Students in all other teaching fields must demonstrate a reading competency in at least two foreign languages prior to taking the Ph.D. qualifying examination; competency in one of the languages must be demonstrated by the end of the sixth quarter of enrollment. Usually, competency will be demonstrated by passing a reading examination administered by a member of the history faculty. Students who believe that they have already demonstrated competency through previous coursework or through their performance on a standardized test should petition the graduate director.

M.A. Degree

The master of arts (M.A.) degree is awarded to all Ph.D. students after two years in residence, successful completion of 12 courses of 5 credits each, demonstrated competency in one foreign language (for those in primary teaching fields other than U.S. history), removal of all Incomplete notations (I) on record, and approval of a substantial essay of 25-30 pages.

The M.A. Essay

Students are required to produce a substantial research essay grounded in original research in primary histori-

cal documents. A successful essay will reflect a general understanding of the field of inquiry along with a critical grasp of the scholarship that currently defines the field; deep knowledge of the specific subject under investigation; the application of appropriate analytical models; and a well-supported interpretation of the materials explored. This essay could (but need not) be a segment of a larger project; but it must be a complete, self-contained essay in and of itself.

Students enroll in course 201, *Directed Research Colloquium*, the winter quarter of their second year. While taking course 201, students work intensively with a faculty reader in the preparation, crafting, and revising of the essay. The final draft, approved by the reader, must be submitted to the graduate committee by the spring quarter deadline (usually mid-April). The deadline will be noted in the department's call for M.A. essays.

Qualifying Examination

The qualifying examination (QE) emphasizes field mastery, integration of material from different fields, and focused preparation for dissertation research. The QE is a three-hour meeting during which a student presents and discusses a dossier that has been submitted to the student's committee at least three weeks in advance. The examination is normally taken by the spring quarter of the third year, but no later than the end of the 10th quarter of residency. Prior to taking the QE, all incomplete notations (I) must be cleared from the student's record. Additionally, the student must be registered the quarter the examination is taken.

The four examination fields are designed in consultation with the student's QE committee members. Students prepare for the examination through regularly offered courses and independent readings courses sponsored by the examiners. Students are required to take at least two courses in each of the four fields. The fields are as follows:

- *Primary Field of Concentration.* One of three fields: American history; European history 1500 to the present; East Asian history 1600 to the present.
- *Research Field.* Normally a subfield of the primary field with a focus on the student's specific area of research interests. This field is most closely connected to the student's work in a specific research cluster.
- *Second Teaching Field.* Chosen from the above list of primary fields, with the addition of world history, or, where appropriate, a comparative, thematic field such as gender, colonialism, etc.
- *Outside Field.* One field outside history, such as American studies, anthropology, literature, feminist studies, politics, sociology, or history of consciousness. Students select a field of topical, thematic, or methodological relevance to their dissertation. The student's faculty adviser must approve the outside field.

The four examination fields must be defined and preliminary reading lists (see below) filed with the department no later than the student's eighth quarter of residency.

A pass or fail will be given after the examination based on the student's knowledge and research preparation as demonstrated by his or her dossier. All areas must receive passing marks from all members of the committee. Immediately following the exam, the QE committee will complete and submit to the History

Department the Report on Qualifying Examination form. If a student does not pass the QE the first time, they may retake only those sections not passed. No one will be permitted to take the QE more than twice.

Qualifying Examination Dossier Requirements

The QE dossier includes four parts, each of which should be prepared in consultation with the student's primary academic adviser and with the advice of the examiners. The examination will focus upon the dossier. All examiners, including the examiner from outside the department, will participate in all segments of the examination.

The dossier includes:

1. An essay (20-page limit) reviewing the state of the scholarship in the student's primary field of concentration. This essay should reflect the student's general, broad competence in his or her field as well as a mastery of the theoretical issues and historiographic debates in four to five areas that represent their primary area of expertise. The essay may reflect the thematic focus of a research cluster as well as work completed in an outside field (literature, anthropology, etc.).
2. One syllabus or, at most, two syllabi (the number to be decided in discussion with the student's primary adviser) that demonstrates the student's preparation to teach across the breadth of their primary field at the introductory level. The syllabus should be annotated to show how each class session would be prepared: principal sources for lectures, principal questions for discussion, reasons for assigning particular readings, etc.
3. A syllabus (annotated in the same fashion as described in section number 2 above) in the student's second teaching field, accompanied by a brief (three- to five-page) statement of principal issues. The exact content of these items will be decided in consultation with the examiner in the secondary teaching field.
4. A 10- to 15-page research prospectus that includes an evaluative survey of the literature relevant to the student's proposed research topic, a detailed discussion of the archival resources, and a consideration of the theoretical issues to be engaged.

Note:

- Although no specific segment of the dossier focuses upon the coursework completed outside the History Department, it is expected that this work will be incorporated into different sections of the portfolio, particularly the research prospectus.
- Complete bibliographies must be appended to each piece of the QE dossier.

Dissertation

Students are required to prepare a dissertation prospectus within one year after the qualifying examination. Ideally, the prospectus will be completed by the end of the next quarter. The prospectus must be approved by the dissertation reading committee and placed on file with the department. The prospectus lays out, in reasonable detail, the direction of research the student intends to pursue for the dissertation. The prospectus includes the following information:

- title page with signatory lines for the dissertation committee members and the graduate director
- three- to four-page description of the overall argument of the project, including a discussion of the research base and the appropriate methodological/theoretical models
- two- to three-page outline, tracking the research and analysis chapter by chapter
- substantive bibliography with complete citations

The dissertation represents an extensive, book-length project grounded in research in original historical documents. A successful dissertation will reflect a broad and deep understanding of the field of inquiry, a mastery of the scholarship that currently defines the field, detailed knowledge of the subject of study growing out of dedicated research, and the incorporation (and explicit rejection of) appropriate interpretive models.

M.A. in History (Terminal)

The Department of History offers an M.A. degree in history for those individuals who are interested in post-graduate work, but who are not planning to complete a Ph.D. It is a degree program that can fulfill in-service education requirements for current teachers as well as for future teachers earning a single-subject credential in social studies. Part-time enrollment is allowed.

Each student will be required to choose one of four areas of specialization (U.S., Europe, East Asia, world) and select one of two topical research areas—colonialism, nationalism, and race, or history of gender. To complete the degree, each student must pass a total of 12 courses of 5 credits each and six courses of 2 credits each including courses 280A, 280B, and 280C. Students must also write an M.A. paper of 25-30 pages. For students specializing in Europe, U.S., and East Asia, the curriculum will be nearly identical to that taken by Ph.D. students in their first two years, except that there will be no language requirement. Those specializing in world history will take History 204A and 204C (or other seminars approved by the department) instead of the corresponding courses in other fields (courses 250A, 250B, and so on), but otherwise their curriculum will be the same as that of a typical incoming Ph.D. student.

Course Requirements

- History 200 (year 1, fall quarter); History 201 (year 2, winter quarter)
- one research seminar during the first four quarters: History 204A, 204B, or 204C
- six courses of 2 credits each including History 280 (year 1), 280B (year 1 or 2), 280C (year 1 or 2)
- seven electives of 5 credits each, two of which must be taken outside the History Department. Courses taken are graduate seminars, most upper-division undergraduate courses, and independent study courses.
- two reading seminars in the area of specialization:
 - U.S.: History 210A, 210B
 - Europe: History 250A, 250B
 - World: History 204A, 204C or other seminars approved by the department
 - East Asia: History 230A, 230B; 230C, 242

The History Department does not normally provide financial support to students pursuing the M.A. degree;

however, students may apply for available teaching assistantships. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students must reapply for the Ph.D. program.

Further details about the graduate program are available from the Department of History web site: <http://history.ucsc.edu>.

Lower-Division Courses

1. Theories of History/Theories of Society. W

European social thought understands society to be the product of the historical process. Readings from early-modern natural law thinkers (Hobbes, Lock, Rousseau), 19th-century theorists of the democratic and industrial revolutions (Tocqueville, Marx), and 20th-century social scientists (Weber, Braudel), explore the nature of this fertile connection. (General Education Code(s): TA, IH.) *M. Traugott*

2A. The World to 1500. F

Surveys the rise of complex societies: the formation of classical civilizations in Afroeurasia and the Americas, post-classical empires and cross-cultural exchange, technology and environmental change, the Mongol Empire, and oceanic voyages and the origins of the modern world. (General Education Code(s): CC, IH.) *B. Catlos*

2B. The World Since 1500. *

Examines major world issues over the past 500 years. Topics include European expansion and colonialism, the Muslim empires, East Asia from Ming to Qing, the Americas, Africa, the scientific-technological revolution, decolonization, and modern environmental problems. Designed primarily for first- and second-year students, it provides a time frame for understanding events within a global framework. (General Education Code(s): CC, IH.) *G. O'Malley*

5A. Early Muslim World. *

Surveys the history of the Muslim world from its beginnings through the Caliphate period. Islam is approached as a religious, social, political, and cultural phenomenon. Special emphasis on understanding Islam in the context of contemporary developments in the Near East, Europe, Africa, and Central Asia. (General Education Code(s): CC, IH, E.) *B. Catlos*

5B. Early Christianity: First to Fourth Century A.D. S

Christianity from its origins as a Jewish messianic movement, its expansion in multiple forms in the Greco-Roman world and the East, to its transformation into the major religion of the Roman and Byzantine empires. (General Education Code(s): CC, IH.) *G. Hamel*

7. Archives and Public History. *

Through readings on local history topics and bi-weekly field expeditions, students discover different types of archives and historical repositories, the diversity of sources that they contain, and the varied uses to which they can be put. Course also explores the range of career opportunities open to history majors (sometimes loosely grouped together under the rubric "public history"). Students are billed a materials fee. Enrollment limited to 35. *M. Traugott*

10A. United States History to 1877. S

A survey of the political, social, and cultural history of the U.S. from the founding of the North American colonies to 1877. Satisfies American History and Institutions Requirement. (General Education Code(s): IH.) *C. Jones*

10B. United States History, 1877 to 1977. W

A survey of the political, social, and cultural history of the

U.S. from 1877 to 1977. Satisfies American History and Institutions Requirement. (General Education Code(s): IH.) *L. Haas*

11A. Latin America: Colonial Period. F

Introduces the social, cultural, economic, and political history of the New World through a close examination of the process of European "conquest" in the 16th century and its consequences for both native and settler peoples. Medieval and Renaissance European and African backgrounds; Inca, Maya, Aztec, plains, woodland, and tropical rainforest native American societies; processes of military and cultural conquest; epidemics and ecological changes; native resistance and the establishment of the fundamental institutions of colonial society. (General Education Code(s): CC, IH, E.) *M. Diaz*

11B. Latin America: National Period. S

An introduction to the study of Latin American history from the Independence Wars in the early 19th century to the present. Topics include changing economic models of development, U.S. role, rural and urban life, women, nationalisms, populism, revolution, the military in politics, and the problem of democracy. (General Education Code(s): CC, IH, E.) *M. O'Hara*

13. Introduction to American Religious Culture. W

Introduction to the many communities found within the American religious landscape, balancing extraordinary diversity characterizing American pluralism against the dominant religious culture. Proceeds historically, engaging major problems and developments including utopianism, the rise of evangelicalism, religion and reform, manifest destiny, secularization and modernity, and the intersection of politics and religion. (General Education Code(s): TA, IH.) *M. Westerkamp*

14. Race and Ethnicity in the U.S. *

An introductory course on the racial/ethnic history of the U.S. Of central concern are issues of race, ethnicity, oppression, resistance, mass migrations, city life in urban America, and power and protest in modern America. Priority enrollment to freshmen and sophomores. (General Education Code(s): ER, IH, E.) *P. Castillo*

30. The Making of Modern Africa. *

Examines the loss and re-assumption of local and state autonomy in Africa during the 19th and 20th centuries. Delineates the modalities of the colonial state and society, modes of resistance to alien occupation, and the deformation of social, class, and gender relations. (General Education Code(s): IH, E.) *D. Anthony*

40A. Early Modern East Asia. F

Surveys the history of East Asia from 1500 to 1894. Covers political, social, economic, and cultural histories of China, Japan, and Korea with the goal of perceiving a regional history that encompassed each society. (General Education Code(s): CC, IH, E.) *M. Hu*

40B. The Making of Modern East Asia. *

A broad introductory survey of the political, social, economic, philosophical, and religious heritage of modern China, Japan, and Korea. Emphasis on the historical foundations of modern nationalism, the colonial experience, and revolutionary movements. (Formerly course 40.) (General Education Code(s): CC, IH, E.) *G. Hershatter, N. Aso*

41. The Making of the Modern Middle East. *

History of the modern Middle East from 1800 to the present, with special reference to the 20th century and forces which have shaped the area. The impact of imperialism, nationalism, and revolution in the area, with

particular attention to the history of four countries: Turkey, Iran, Egypt, Israel. (General Education Code(s): CC, IH, E.) *E. Burke*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

43. Traditional India. W

A survey of the early histories of Indus Valley, Vedism, the epics, Buddhism, Jainism, with an exploration among original sources: archaeological, visual, ritual, literary, and epic texts. Thematic focus on communities, social systems, elite and popular cultures, and their mutual interaction. (Formerly *Histories of Traditional India*) (General Education Code(s): CC, IH, E.) *D. Basu*

45. Japanese Pop Culture. *

Introduction to Japanese popular culture from the Tokugawa era to the present. Pursues the role of mass media on Japanese society through analyses of popular movies, animation, comic books, music, and other artifacts in historical context. (General Education Code(s): CC, E.) *N. Aso*

62A. Classical World: Greece. *

An overview of Greek history from the beginnings through the Hellenistic period, with emphasis on the Archaic and Classical periods (ca. 800 B.C. through 323 B.C.). (General Education Code(s): CC, IH.) *J. Lynn*

62B. Classical World: Rome. *

A lecture course offering an overview of Roman history and civilization from the legendary founding of Rome in 753 B.C. to the collapse of the Roman Empire's central administration in the West in 476 A.D. (General Education Code(s): CC, IH.) *G. Devore*

65A. Medieval Europe: 200-1000. F

A survey of Europe from the third through 10th centuries. Emphasizes cultural conflict and assimilation (Roman and Germanic, pagan and Christian, East and West). Topics include the rise of Christianity, Germanic migrations, Byzantium and Islam, the cult of saints and relics, Vikings, and gender roles. (General Education Code(s): CC, IH.) *C. Polecristi*

70A. Modern European History, 1500-1789. *

A survey of economic, social, and political history of Europe since the late 15th century: 1500-1789. A is not prerequisite to B, nor B to C. (Formerly *Modern European History*.) (General Education Code(s): CC, IH.) *B. Sharp*

70B. Modern European History, 1789-1914. S

A survey of the political, social, and cultural history of Europe from the era of the French Revolution to the outbreak of the first World War: 1789-1914. Course 70A is not prerequisite to 70B, nor 70B to 70C. (General Education Code(s): CC, IH.) *The Staff*

70C. Modern European History: 1914 to Present. W

A survey of the economic, social, and political history of Europe since the outbreak of the first World War: 1914-present. Course 70A is not prerequisite to 70B, nor 70B to 70C. (General Education Code(s): CC, IH.) *B. Thompson*

74. Introduction to Jewish History and Cultures. F

Surveys 3,000 years of Jewish history. Themes include origins of the Jews in the ancient world, formation and persistence of the Jewish diaspora, coherence and diversity of Jewish experience, Jewish narrative and textual traditions, interaction between Jews and other cultures, productive tensions between tradition and modernity in Jewish

history and literature. (General Education Code(s): ER.) *B. Thompson*

75. Film and the Holocaust. *

Examines a series of distinguished documentary and feature films about the destruction of European Jewry. Each film is placed in its historical context, and wherever possible, the readings include the original documents on which films were based. Emphasis is placed on the strategies the filmmakers used to address the problem of representing genocide without succumbing to mere melodrama. (General Education Code(s): ER, E.) *B. Thompson*

80H. Class, Gender, and Community in China, 1700-Present. *

Examines gender, sexuality, and family across classes in late imperial China, and the transformation of all three by revolution (and vice versa). Concentrates throughout on gender as a category of historical analysis that has remained largely invisible in the construction of conventional Chinese history. (General Education Code(s): CC, T4-Humanities and Arts, E.) *G. Hershatter*

80K. Spies: History and Culture of Espionage. *

Examines the "golden age" of espionage during the early 20th century, the Second World War, and the Cold War, emphasizing not only the origins and development of intelligence agencies but also images of spies in modern popular culture. (General Education Code(s): T4-Humanities and Arts.) *B. Thompson*

80N. Gender, Labor, and Feminist Productions. *

Examines how constructions of gender and intersecting constructions of race, class, and sexuality define the power of women differentially in the world of work. Beginning with the history of emancipation, traces the broader constructions of paid and unpaid labor in the 20th-century U.S. Traces the specific histories of transgender women workers, specific regional and industrial histories, and those marked by the meaning given to African, Asian, Euro-, indigenous, and Mexican descent in the construction of gender and work. Uses feminist methodology and contemporaneous visual and written work by women artists and filmmakers. (Formerly *Topics in U.S. Women's History: Women at Work*.) (General Education Code(s): CC, T4-Humanities and Arts.) *L. Haas*

80W. The Holocaust: The Destruction of European Jewry. W

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film. (Also offered as Literature 80L. Students cannot receive credit for both courses.) (General Education Code(s): ER, T4-Humanities and Arts, E.) *N. Deutsch, M. Baumgarten*

80Y. World War II Memories in the U.S. and Japan. S

Examines how the meaning of such issues as war origins, war responsibility, the atomic bomb, reparations, and racism have been subjects of contention in postwar U.S. and Japan. Students explore the relations between history, memory, and contemporary politics. (General Education Code(s): CC, T4-Humanities and Arts, E.) *A. Christy*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

100. Historical Skills and Methods. W

Designed to train students in the fundamental skills required for advanced historical research. Students read

historical theory and learn the basics of historical analysis, research, and disciplinary writing. Recommended to majors but open to all interested students. (General Education Code(s): TA.) *M. O'Hara*

101A. The Making of the Modern World, 1400-1750. *

Focuses on the transformation of many different societies of Asia, Africa, and the Americas from 1400 to 1750 through case histories and the comparative study of European colonial hegemony, labor systems, global economic exchange, missions, and warfare. (General Education Code(s): CC, E.) *E. Burke*

101B. The Making of the Modern World, 1750-1950. W

The history of the world from 1750. Focuses on the liberal project (the industrial and democratic revolutions) and its impact on the world—slavery and abolition, self-strengthening movements, race and class, imperialism, colonialism, and nationalism. (General Education Code(s): CC, E.) *E. Burke*

102A. The Crusades, 1000-1300. *

Examines history of Middle East and Latin Europe from 1000-1300, in particular, Latin Crusade and colonization and Muslim response. Format is chronological; topics such as acculturation, Holy War, and ethnicity examined through lectures and writing. (General Education Code(s): CC.) *B. Catlos*

102C. The Mediterranean in the Modern Era, 1730-1930. *

The cultural transformation of the Mediterranean region in comparative historical perspective from the rise of the Hapsburg and Ottoman empires to modern times. Topics include orientalism, political and economic transformations, social movements, cultural change, gender, colonialism, and imperialism. (General Education Code(s): CC.) *E. Burke*

103. Medieval Spain, 600-1500. F

History of the Iberian Peninsula and Northwest Africa from the Visigoths through the reign of the Catholic Monarchs. Political and economic history form the basis, with special attention paid to religious and social history, particularly the interrelation between the peninsula's ethno-confessional groups. Prerequisite(s): one history course; course 65A and/or course 65B recommended. (General Education Code(s): CC.) *B. Catlos*

106A. Vietnam War Memories. *

Compares memories and interpretations of war in Southeast Asia by diverse groups in France, America, and Vietnam. Topics include war origins, military strategies, propaganda, combat, civilians, media, activism, MIAs, refugees, mixed race children, memorials, textbooks, films, music, literature, and art. (General Education Code(s): CC, E.) *A. Yang*

106B. Asian and Asian American History, 1941-Present. W

Analyzes immigration, race relations, war, gender ideology, family life, acculturation, political activism, interracial marriage, multiracial identity, and cultural representations between 1941 and the present. Emphasis on discussion, writing, research, and group presentations. (General Education Code(s): E.) *The Staff*

107. Religion and Modernity. *

Explores the impact of modernity on a variety of religious traditions. Examines the rise of secularism and the phenomenon of disenchantment; the "invention" of religion; and the emergence of fundamentalism in the modern period. (General Education Code(s): CC.) *N. Deutsch*

108. Social Movements in Historical Perspective. F Readings examine 18th- through 20th-century social movements and related phenomena in Europe/America: examples include Tulipomania; revolutionary action in France; U.S. Civil Rights movement; and the environmental and feminist movements. Lectures focus on social science frameworks used to explore the social base, tactics, success or failure, and inter-relationships of social movements as a distinctive mode of social change. *M. Traugott*

109A. Race, Gender, and Power in the Antebellum South. F

Examines how ideologies of race and gender shaped the development of slavery and empire in the American South from European colonization to the eve of the American Civil War. (General Education Code(s): ER, E.) *C. Jones*

110A. Colonial America, 1500-1750. F

Explores the social, economic, cultural, and political development of British North America from the first European/Amerindian contacts in the late 16th century through the establishment of a provincial British colonial society. Course 110A is not a prerequisite to course 110B. (Formerly *Colonial and Revolutionary America*.) Satisfies American History and Institutions Requirement. (General Education Code(s): ER.) *M. Westerkamp*

110B. Revolutionary America, 1740-1815. *

Explores the political, social, economic, and cultural development of British North America from the first stirrings of resistance to the establishment of the U.S. Course 110A is not a prerequisite to course 110B. (Formerly *Colonial and Revolutionary America*.) Satisfies American History and Institutions Requirement. *G. O'Malley*

110D. The Civil War Era. *

Social, political, and economic history of the American Civil War and Reconstruction, focusing on the war's changing nature and significance, emancipation, and the postwar struggle over the future of the South and the nation. (Formerly *The Second American Revolution: The Civil War and Reconstruction*.) *C. Jones*

110E. What Is a Nation? The U.S. from 1877 to 1914. *

History of the U.S. during what was perhaps its most socially turbulent era, the period following Reconstruction through the First World War. What did it mean to be a nation in the post-Reconstruction era? How did a country that had only recently unified itself under one system of labor now resolve the question of national identity? Was America truly a nation by 1914? *M. Lasar*

110F. Crossroads for American Capitalism: The U.S., 1914 to 1945. W

Between the First and Second World Wars, American society accepted the need for a regulatory state to save capitalism from itself. Takes an in-depth look at many aspects of U.S. politics and culture during these years. *M. Lasar*

110G. The U.S. After the Second World War. S

From the Good War to the Cold War, the Sixties to the rise of the New Right, the post-1945 American experience has been one of extremes. This survey course looks for evidence of commonality during those times. *M. Lasar*

111. Popular Conceptions of Race in U.S. History, 1600-Present. *

Explores how race has been constructed and perceived, examining Americans' use of race to describe themselves and to label others. Particularly concerned with ordinary people and how and why their ideas of race have changed over time. (General Education Code(s): ER, E.) *G. O'Malley*

112. American Feminist Thought, 1750-1950. *

Traces history of feminist thought in the United States from the 18th century Enlightenment to the mid-20th century. Focusing on questions of social identity, gender difference, and legal/political status, examines writings of philosophers, activists, novelists, and ordinary women that challenged religious, political, and scientific beliefs underlying gender inequality. *M. Westerkamp*

113C. Women and American Religious Culture. *

Historical introduction to religious culture of U.S. as experienced and created by women. Explores religious ideas about women, the treatment of women by mainstream institutions and religio-social communities, and female religious leaders and followers. Takes an explicitly feminist analytical approach and uses a variety of "texts," including historical and literary scholarship, sacred texts, fiction, autobiography, material artifacts, visual art, and music. *M. Westerkamp*

114. Market Revolution in Antebellum U.S.. *

Examines the cultural, political, and environmental upheaval associated with antebellum market revolution. Topics include: markets and U.S. territorial expansion; reform movements that coalesced around disputes over what should, and should not be sold (e.g., antislavery activism; anti-prostitution reform movements). *C. Jones*

115A. U.S. Labor History to 1919. F

Explores the history of work, working-class people, and the labor movement in the U.S., with attention to race and gender dynamics as well as to the development of workers' organizations. (Formerly *U.S. Labor History, Colonial Period to 1919*.) Satisfies American History and Institutions Requirement. (General Education Code(s): ER.) *D. Frank*

115B. U.S. Labor History, 1919 to the Present. *

Explores the history of work, working-class people, and the labor movement in the U.S. in global perspective with attention to race and gender dynamics and political-economic changes. Satisfies American History and Institutions Requirement. (General Education Code(s): ER.) *D. Frank*

115C. Learning from the U.S. Great Depression. *

Examines U.S. society, politics, and culture during the 1930s, with emphasis on the relationship between social movements and public policy, and dynamics of race, ethnicity, immigration, and gender, and dynamics between labor, business, and the state. *D. Frank*

117. Wired Nation: Broadcasting and Telecommunications in the US from the Telegraph to the Internet. *

Explores the history of telecommunications systems in the US starting with the telegraph, the telephone, wireless telegraph, radio, television and the Internet. Students learn about the development of these systems and the cultures that they foster. *M. Lasar*

121A. African American History to 1877. *

A survey of pre-contact Africa, indigenous social structures, class relations, the encounter with Europe, forced migration, seasoning, resistance, Africa's gift to America, slavery and its opponents, industrialization, emigration vs. assimilation, stratification, Convention Movement, Black feminism, Civil War, and Reconstruction. (General Education Code(s): ER, E.) *D. Anthony*

121B. African American History: 1877 to the Present. *

A survey of the period from 1877 to present, highlighting Jim Crow, Militarism, Black feminism, WWI, New Negro, Garveyism, Harlem Renaissance, Black

Radicalism, Pan Africanism, Depression, WWII, Desegregation Movement, Black Power, 1960s, Reaganism. Cultural and economic emphases. (General Education Code(s): ER, E.) *D. Anthony*

124. American Empire. S

Examines U.S. expansion and subsequent ascent to global power. In tracing the presence of the U.S. in different areas of the world during the 20th century, course considers the ideas, politics, gender, and social relations that have influenced imperial aspirations. *L. Haas*

125. California History. *

California had a multi-ethnic indigenous society for centuries. Course traces its persistent multi-ethnic quality of native, as the region becomes part of the Spanish empire, Mexico, and the United States. Considers the many diasporas that have shaped California's steady connection to the world, especially to Mexico and other nations that border the Pacific. (Formerly *California History*.) (General Education Code(s): ER.) *L. Haas*

126. From Indigenous Colonial Borderlands to the U.S.-Mexico Border. *

Examines the interactions and integration of indigenous people and settlers in the Southwest U.S. and Northern Mexico from a region defined by its indigenous colonial borderlands to national borders. Explores the connections between the U.S. and Mexico. Within the deeply cross-cultural region studied, also examines the particular histories of states, indigenous peoples, and Mexican-origin groups and regions. (Formerly *History of the Southwest: Colonial Period to 1920*.) (General Education Code(s): ER, E.) *L. Haas*

127. Race and the American City. S

History of racial and ethnic minorities in the American city in the 19th and 20th centuries. Examines the experiences of several non-white groups, with analyses of race, class, culture, gender, acculturation, and implications for social policy in the urban environment. Satisfies American History and Institutions Requirement. (General Education Code(s): ER, E.) *P. Castillo*

128. Chicana/Chicano History. F

A survey course on the social history of the Mexican (Chicana/o) community and people in the U.S. through the 20th century. Themes include resistance, migration, labor, urbanization, culture and politics. Satisfies American History and Institutions Requirement. (General Education Code(s): ER, E.) *P. Castillo*

130. History of Modern Cuba. S

Covers from the Cuban sugar revolution (late 18th century) to the socialist revolution and its aftermath (1959–present). It is intended to be not only a modern history of Cuba but also a broader history of Latin America through the case of Cuba. (General Education Code(s): E.) *M. Diaz*

131. Women in Colonial Latin America. W

Introduction to the social history of Latin America through a focus on the inflections of class and ethnicity on gender in this region. First six weeks focuses on the colonial period. The last three weeks covers the 19th and 20th centuries. (Formerly *Women in Latin America*.) *M. Diaz*

132. History of the Caribbean: Colonial Period. *

A study of the Caribbean from the conquest to the abolition of slavery in the 19th century. Focus on the Greater Antilles, particularly the Spanish Caribbean. Emphasis on economic and social issues such as colonialism and the role of sugar production, slavery, and race/ethnicity in these multicultural societies. (General Education Code(s): E.) *M. Diaz*

133. Topics in Colonial Latin American History, Early and Middle Period. S

Studies Pre-18th century colonial Latin America, with particular emphasis on Peru and Mexico. Topics include: strategies of colonization; cities and urban life; and knowledge, technology, and the professions (ethnographic projects, indigenous intellectuals, schools and universities, medicine and hospitals, the law and the courts). (General Education Code(s): E.) *M. Diaz*

134A. Colonial Mexico. *

Covers the social, cultural, economic, and political history of colonial Mexico (New Spain). Special attention paid to colonial identity formation, religion, and labor systems. Begins by examining indigenous societies prior to the arrival of Europeans and concludes with Mexico's independence movement in the early 19th century. (Formerly *History of Mexico, 1500–1850*.) (General Education Code(s): ER, E.) *M. O'Hara*

134B. History of Mexico, 1850 to Present. F

Social, cultural, economic, and political history from the triumph of Liberalism to the present day, focusing on four key periods: the dictatorship of Porfirio Diaz (1900–1910), the armed phase of the Revolution (1910–1920), the consolidation of revolutionary programs and a "single-party democracy" (1920–1940), and the developmentalist counter-revolution since 1940. Provides background for understanding the Mexican diaspora to the U.S. (General Education Code(s): CC, E.) *M. O'Hara*

137A. Africa to 1800. *

Introduction to history of Africa. Topics include states and "stateless" societies, culture, society and economy in the pre-modern era, stratification, oral traditions, long distance trade, the coming of Islam, and the evolution of the South Atlantic system and its social, political, and other consequences. Some background knowledge of Africa helpful. (General Education Code(s): CC, E.) *D. Anthony*

137B. Africa from 1800 to the Present. *

How Africa lost its continental, regional, and local autonomy in the era of European imperialism. The components of European hegemony, Christian proselytization, comparative colonial strategies and structures, nationalism, decolonization and independence and the disengagement from neo-colonial patterns and the colonial legacy. Case studies from northern and sub-Saharan Africa. Some background knowledge of Africa helpful. (General Education Code(s): CC, E.) *D. Anthony*

137C. African Cinema. F

Historical study of modern African cinematography from the emergence of film as a tool of social control in the imperial and colonial periods to its theoretical and practical transformation by African cineastes in the post-independence era. Films and videos from northern, eastern, western, central/equatorial, and southern Africa viewed. Prerequisite(s): course 30 or 137A or 137B, or by permission of instructor. (General Education Code(s): CC, E.) *D. Anthony*

140B. History of Qing China, 1644-1911. F

Introduces students to how Qing China arose, expanded, and struggled to enter the modern world. Focuses on what the Qing empire had in common with other agrarian empires across Eurasia, commercialization and communication networks, elite mobility and peasant revolts, political legitimacy of the alien rule, maintaining social order (such as merchants' control and gender segregation), massive population growth and internal migration, as well as its conflicts with the industrial West. (General Education Code(s): CC.) *M. Hu*

140C. Revolutionary China 1895-1960. W

Explores history of China from the late 19th century to the early years of the People's Republic, focusing on the end of imperial rule, the sources and development of revolution, and early attempts at socialist transformation. (General Education Code(s): CC, E.) *E. Honig*

140D. Recent Chinese History. S

Explores history of China from establishment of the People's Republic of China to the present, focusing on competing strategies of socialist transformation, urban/rural relations, and the effects of the post-Mao economic reforms. (General Education Code(s): CC, E.) *G. Hershatter*

141B. Classical Chinese Culture and Literature, Sixth Century through 16th Century. S

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements. (Also offered as World Lit & Cultural Studies 136. Students cannot receive credit for both courses.) (General Education Code(s): E.) *C. Connery*

142. World History of Science. *

Searches for a common ground in which historians and scientists can communicate with each other from a global perspective, first situating the modern world in a long span of human history to reveal our time as a distinct stage of global development. Science and technology, the focus of this course, play a crucial role in the formation of the modern world. (General Education Code(s): SI.) *M. Hu*

145. Gender, Colonialism, and Third-World Feminisms. *

Introduces the history of feminism in the third world, focusing on the ways in which colonialism (and post-colonialism) has shaped gender relations and on the feminist movements that have emerged in response to the impact of colonialism. (General Education Code(s): E.) *E. Honig*

147A. History of Premodern India. W

A study of religions (Vaisnavism, Tantrism, Islam, Sikhism), art, literature, and social movements in their historical contexts from 1000 A.D. to 1800. (General Education Code(s): CC, E.) *D. Basu*

147B. Political and Social History of Modern South Asia. *

Social, political, and religious movements in the colonial and postcolonial contexts of the 19th and 20th centuries in modern and contemporary South Asia. (General Education Code(s): CC, E.) *D. Basu*

148. Cinema and History: Film Author Satyajit Ray. S

Satyajit Ray is widely acclaimed as a master of world cinema. Course considers his work to examine "authorship" at multiple levels: the cultural, historical, social, and familial contexts and the relationship of his film to fiction, the politics and poetics of his vision, and its relationship to colonial, nationalist, and postcolonial India. Also studies the question of gender and the underclass. (General Education Code(s): E.) *D. Basu*

150A. Ancient Japan. F

Surveys the history of the peoples of the Japanese islands from prehistorical migrations through the 15th century. Emphases include examination of social structures,

political formations, cultural production, and religion. (General Education Code(s): CC.) *N. Aso*

150B. Tokugawa Japan. F

Surveys the history of the peoples of the Japanese islands from the middle of the 15th century to the middle of the 19th century. Focus is on the era of civil war, the formation of the early modern federated state, social structure, and cultural production. *A. Christy*

150C. Modern Japan. S

Surveys the history of the peoples of the modern Japanese nation from the Meiji Restoration to the present. Focuses on the formation of the modern state, empire, social movements, and cultural production. (General Education Code(s): CC, E.) *N. Aso*

151B. Traditional Japanese Culture in a Modern Context. *

Examines traditional Japanese cultures from a critical perspective, for example, by looking at the gendered nature of tradition in modern Japan. Students learn to separate history from myth, and how to think critically about historical and cultural notions. (General Education Code(s): E.) *The Staff*

154A. Classic Islamic Civilization. *

The civilization of Islam to 1258 A.D. Origins and early florescence, an international civilization, the coming of the steppe peoples. (Formerly course 161.) Enrollment limited to 35. (General Education Code(s): E.) *E. Burke*

155. History of Modern Israel. *

The conflict between Israelis and Palestinians is one of the most intractable disputes in our troubled world. Course begins with a glimpse of Palestine in the late 19th and early 20th centuries, surveys the rise and fall of utopian Zionism, pays especially close attention to the events of 1948 and 1967, and concludes by analyzing the collapse of hopes for peace after Oslo and Camp David meetings. (General Education Code(s): CC, E.) *B. Thompson*

160A. Athenian Democracy. *

Athenian democracy from foundation to the fourth century B.C., with emphasis on its practices and ideologies. Readings from ancient sources and modern theory. Topics to include foundations and development; Athenian concepts of freedom, equality, law, citizenship. Lectures and discussion. (General Education Code(s): CC.) *C. Hedrick*

161B. Topics in Roman History. *

Detailed consideration of some specific topic or period in Roman history, varying from year to year. Examples include Roman religion, Augustus and the Roman Empire, Julio-Claudian emperors and the principate, Roman slavery, and Christianity and Rome. Enrollment restricted to history and classical studies majors or minors, or by permission of instructor. May be repeated for credit. *C. Hedrick*

161C. Age of Augustus. *

Surveys Rome's transition from Republic to Empire, and the politics, people, and literary and material culture of the principate. Enrollment restricted to history and classical studies majors and minors, or by permission of instructor. *J. Lynn*

163A. A History of Sin. F

Ancient and modern conceptions of sin, and remedies offered for it. Course is not a theology of sin and redemption, but an invitation to reflect on ways sin and fault have been imagined and formulated. (Formerly course 163.) *G. Hamel*

163B. Genesis: A History. *

Introduction to historical, textual, source, and redaction criticism of the book of Genesis and to exegesis as science

and ideology. Texts, history, and iconography of neighboring traditions (Mesopotamian, Ugaritic, Egyptian, Greek) are also studied when appropriate. Course 44, Literature 80A, or some basis in Hebrew or Greek is strongly suggested. (General Education Code(s): CC.) *G. Hamel*

164A. Late-Medieval Italy, c. 1200-1400. W

Italy from the birth of the commune to the early Renaissance in Florence. Topics include urban life and social conflict, gender roles, St. Francis, the Black Death, female mystics, Dante, Boccaccio, humanism, artistic developments from Giotto through Donatello. Requires viewing several films outside of class. *C. Polecristi*

164B. Renaissance Italy, c. 1400-1600. S

Italy from the Florentine Renaissance through the Reformation. Topics include social change and political consolidation, the rise of the papacy, court life, witch hunting, Machiavelli, artistic developments from Donatello through late Venetian Renaissance. Requires viewing several films outside of class. Course 164A recommended as preparation. *C. Polecristi*

165. The Power of Writing: Books and Libraries 600-1500. *

Surveys how books were made and used in Europe from 600-1500. Focuses on the relationship between book production and the development of libraries. Meets in Special Collections, McHenry Library. Exhibition as class project. Enrollment limited to 25. *E. Remak-Honnef*

168. Rise of the Dutch Republic. *

Focuses on the origin of the Republic in the revolt against Spanish overlordship, and its political, social, and economic development in the 16th and 17th centuries. *B. Sharp*

170A. French History: Old Regime and Revolution. W

French history from the Middle Ages through the Revolution. Focus on the rise and fall of "absolute" monarchy, the nature of Old Regime society, the causes and significance of the French Revolution. Attention to those who endured as well as to those who made events. *J. Beecher*

170B. French History: The 19th Century. *

Social, political, and cultural history of France from the Revolution to WWI. Focus on the Revolutionary tradition, the Napoleonic myth, the transformation of Paris, and the integration of the peasantry into the national community. Readings may include novels by Stendhal and Balzac. *J. Beecher*

171. Revolutions in France. *

Examines the political/social upheaval in 1789, 1830, and 1848 in light of the sweeping changes brought to 19th-century France by those other great "revolutions" of the age, the democratic and the industrial. Students' written work focuses on the comparative analysis of revolution. Offered in alternate academic years. *M. Traugott*

172A. German History. F

The development of German civilization, including philosophy and literature as well as politics and diplomacy in the nineteenth and twentieth centuries. *The Staff*

172B. German Film, 1919-1945. *

Introduction to German films from 1919 to 1945. Through combination of movies and documentaries, gain insight into political, economic, social, and cultural conditions of Weimar and Nazi Germany. *M. Cioc*

175A. Medieval Russia. *

Medieval Russia. *P. Kenez*

175B. Russian History. S

Imperial Russia. *P. Kenez*

175C. Russian History. *

Twentieth-century Russia. *P. Kenez*

175D. History of Soviet Film. *

Does not stress questions of aesthetics or technical aspects of film making, but the changing ideology inherent in Soviet films. The goal of examining cinema is to enrich our understanding of Soviet history. Readings include works of famous directors and theorists—Eisenstein, Vertov, Pudovkin, and Kuleshov—in addition to secondary works by Denise Youngblood, Richard Taylor, Josephine Woll, and Anna Lawton. *P. Kenez*

178A. European Intellectual History: The Enlightenment. *

Study of European thought and literature from Hobbes and Swift to Rousseau and Goethe. Focuses on relation of ideas to their social and cultural context. Special attention to traditions of religious conflict and criticism rising from the Protestant Reformation; to the discovery of the world beyond Europe; and to the intellectual and cultural roots of the French Revolution. (Formerly *European Intellectual History*.) *J. Beecher*

178B. European Intellectual History: The 19th Century. *

Study of European thought and literature from Blake to Nietzsche. Focuses on relation of ideas to their social and cultural context. Special attention to the rise and fall of the Romantic movement, to changing conceptions of history, and to the development of socialist and aesthetic critiques of industrial civilization. (Formerly *European Intellectual History*.) *J. Beecher*

178C. European Intellectual History, 1870-1970. *

Drawing on experiments in autobiography, the arts, and social theory, this course focuses on ideas and images of modernity in European culture. It also highlights the role of the intellectual as politically engaged or disillusioned witness in a violent century. Offered in alternate academic years. (General Education Code(s): CC.) *B. Thompson*

178D. Russian Intellectual History. F

Focus on the emergence in 19th-century Russia of a westernized intelligentsia; its effort both to assimilate western ideas and to define the destinies of Russia; the shaping of the Russian revolutionary movement. Readings in Dostoyevsky, Turgenev, Herzen, and representative Russian Slavophiles, Populists, and Nihilists. *J. Beecher*

178E. Modern Jewish Intellectual History. *

Surveys European Jewish intellectual history from the Enlightenment to the present. Major themes include emancipation and assimilation, the flowering of Yiddish literature, the rise of Zionism, new variations on the messianic idea, and Jewish contributions to the culture of urban modernism. Offered in alternate academic years. (General Education Code(s): ER.) *B. Thompson*

180A. English History. W

Emphasis on the interaction between social, economic, religious, and political developments. An attempt to place these phenomena in the context of the wider European and world scene. The period from 1485 to 1689. *B. Sharp*

180B. English History. S

Considers how Britain became the pacemaker of modernity in the 18th and 19th centuries; how national, regional, class, and gender identities formed and altered; and how Britain coped with loss of global power in the 20th century. *B. Sharp*

183A. Nineteenth-Century Italy. *

Italian politics, culture, and society from the Napoleonic

era through early leftist movements. Central emphasis on the Risorgimento and Unification. Other topics include: north-south conflict; banditry; urban change; growth of tourism; popular religion; family structures and gender; visual arts and opera. *C. Polecristi*

183B. Fascism and Resistance in Italy. *

Examines Italian politics, society, and culture (c. 1900-1950), emphasizing the Fascist regime; interdisciplinary focus emphasizing history, literature, and film. Course 183A recommended as preparation. (Formerly course 183.) *C. Polecristi*

185A. Conflict of Interest: War, Holocaust, and Industry in the Lodz Ghetto. *

Examines how Nazi war machine exploited Jewish slave labor in the Lodz ghetto industrial complex while a state apparatus systematically exterminated the workers. Includes a visit from a survivor of ghetto factories and graphics from ghetto workshops. Prerequisite(s): one upper-division history course. Enrollment restricted to juniors and seniors. (General Education Code(s): ER, E.) *M. Thaler*

185B. Rethinking the Holocaust: Bioscience, Race Theory, and Genocide. *

Traces the Nazi "Superstate" project from its origins at the conjunction of bioscientific theory and racialist ideology to its conclusion in the Holocaust, providing a historical perspective for social and political dilemmas raised by contemporary biomedical advances. (General Education Code(s): ER, E.) *M. Thaler*

185D. Jewish Social Movements. W

Jewish social movements of the late 19th and 20th centuries, in Europe (Eastern and Western) and the U.S.: the confrontation between Hasidism and Haskalah, tensions between socialism and Zionism, between religiosity and secularism, the mutual influences among these tendencies. (Also offered as History of Consciousness 118. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *B. Epstein*

185E. The Historiography of the Holocaust. *

Offers a comprehensive historiography of the Holocaust, distinct from the narrowly focused perspectives generally presented in Holocaust studies, to familiarize students with the origins, evolution, and major developments in the Nazi genocide and its historical consequences. Enrollment restricted to juniors and seniors. (General Education Code(s): ER, E.) *M. Thaler*

185F. Private Lives, Family Histories, and the Holocaust Experience. *

Holocaust historiography has surveyed the broad landscape of genocide or focused narrowly on individual experience. Course examines the middle ground of family and its role in resistance during the destruction of communal existence and survival in the aftermath. (Formerly course 196Q.) Prerequisite(s): two upper-division history courses or permission of instructor. Enrollment restricted to junior and senior history, German studies, and classical studies majors. Enrollment limited to 20. (General Education Code(s): ER, E.) *M. Thaler*

190. Advanced Research and Reading Seminars. *

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

190A. Slavery and Race in Latin America. F

Covers comparative history of slavery in Latin America

with questions of race in the colonial and national periods and key moments and debates in the historiography of slavery and its relation to ideologies of the past and the nations. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *M. Diaz*

190B. Race and the Nation in Latin America. *

Focuses on the ways in which nation and race have been thought about in Latin America throughout the 19th and 20th centuries. These concepts were closely intertwined, albeit in differing and changing ways, since the wars of independence from Spain and Portugal (1810-1825). Compares the ways in which "black," "Indian," and "racially mixed" ("mulatto" or "mestizo") have been socially constructed, ideologized, and contended in different countries, including Brazil, the Spanish-speaking Caribbean, Mexico, Peru, and Argentina. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *M. Diaz*

190C. Race, Class, and Gender in California History. W

The study of the social history of racial minorities and women in the historical development of California society. Emphasis on racial, class, and sexual conflict within the context of the history of California since 1848. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. Offered in alternate academic years. (General Education Code(s): W, E.) *P. Castillo*

190D. Tale of Two Cities. *

A comparative study of the social, economic, cultural, political, and geographical development of Los Angeles and Mexico City in the 20th century. Emphasis on the diverse peoples, changing physical environment and various images/interpretations of these two world cities. (Also offered as Latin American & Latino Studies 194P. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history and Latin American and Latino studies majors. Enrollment limited to 25. (General Education Code(s): W, E.) *L. Haas*

190E. Topics in Chicana/o History. *

A seminar on the history of Chicanos/Mexicans in the United States, 1848 to the present. Topics include Chicana/o labor, family, social, urban, cultural, and political history. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Castillo*

190F. Research Seminar in the Americas. *

Students learn how to conduct research and write history. Primary and secondary sources are extensively read. Research sources include a rich array of government documents, newspapers, memories and diaries, visual material and film. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. En-

rollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *L. Haas*

190G. History and Theory. *

Each year students study one or more theorists or schools of philosophy and history. Themes vary by year and include: Walter Benjamin, Hayden White, Agnes Heller, the Frankfurt School, and the Subaltern School. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior history majors. *L. Haas*

190I. California and the Borderlands. *

Complete original research in California and borderlands history in this senior research seminar. Focus on selected problems and themes. Assignments and discussions help students frame their research and edit their writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *L. Haas*

190J. Diaspora and Migration in World History. *

Diaspora studies recently have included a range of movements and people in colonial, post-colonial, and national dilemmas. Diaspora studies share historical themes with migration studies, and include the study of forced exile and situations of genocide and femicide experienced by indigenous and national minorities. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. *L. Haas*

190K. Wired Planet: Readings on the Global History of Broadcasting and Telecommunications. *

Locates common themes in the history of broadcasting and telecommunications throughout the world. Why do certain strategies for developing broadcasting and telecommunications systems succeed or fail? Why do some nations outstrip other nations of comparable development in the growth of their communications systems? Why do national or regional communication systems suddenly become more or less open—or more or less centralized? Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190L. Personal Politics in the New South. *

Examines the tensions between movements for political reform and reaction in the southern United States between Reconstruction and the second world war. Students develop a research paper grounded in primary research that addresses these questions. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *C. Jones*

190M. History of Children and Culture of Childhood in the 19th Century. *

Explores the lives of children and the functions of the literary figure of the child in the cultural politics of the 19th century in the United States. Examines the historically contingent nature of childhood through historical, literary, and visual sources. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses. Enrollment restricted

to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *C. Jones*

190N. Topics in African History. *

Examines contemporary crises in Africa: the new South Africa, refugees, HIV/AIDS, children of war, blood or conflict diamonds, civil war, and genocide in Rwanda. Seminar format where students will be prepared to undertake studies on specific subjects and two rounds of 15–20 page papers. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Anthony*

190O. African American Historiography. F

Major themes in contemporary African American historiography on a topical basis. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Anthony*

190P. Early American Society and Culture. *

Explores subjects and themes in the political, social, and cultural history of early U.S. history from the colonial period through 1850. Includes critical reading of current scholarship and research in primary texts. The focus of this course is the production of a 25-page research paper. Recommended for senior history majors. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Westerkamp*

190Q. The Novel and History. *

Explores major questions, theories, and methods in 19th-century U.S. women's history. Readings include key texts by feminist scholars around such themes as sexuality, religion, domesticity, slavery, and biography in an effort to understand the lives of 19th-century women as well as the ways that historians have written about those lives. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Westerkamp*

190R. Research in the History of American Religions. *

Readings and research in the history of religions in the United States. Readings focus on topics including the rise of evangelicalism; gender and religion; class, race, and religious diversity; and modernity. Students produce papers that culminate in a 25-page research project. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *M. Westerkamp*

190S. Women and Social Movements in the U.S. W

Examines history of women and social movements in the U.S., such as abolitionism, anti-lynching, Chinese and Jewish garment workers, Chicana farm labor activism, the American Indian Movement, the Ku Klux Klan, and the Civil Rights movement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor.

Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *D. Frank*

190T. Latin America in the Cold War. S

Writing-intensive seminar on Latin America during the Cold War. Particular attention given to U.S.-Latin American relations, including moments of covert or direct interventions. Students pursue advanced research using primary and secondary sources. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. O'Hara*

190U. Power and Culture in the U.S. *

Students read historical monographs that explore, from a variety of race, class, and gender perspectives, how U.S. culture and thought have changed over time. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190V. The Corporation and Its Critics. *

Studies transformation of the U.S. corporation from limited tool in hands of state government to the central organizational unit of capitalism and crucial focus of American politics. Readings include influential histories of the corporation from Republic's early years through 1970s. Students debate impact of the corporation from Marxist, free market, anti-colonialist, and feminist perspectives. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Lasar*

190X. History of the Atlantic World, 1492-1824. *

Explores the transatlantic societies created by Europeans' colonization of the Americas, and their exploitation of African slaves. Questions whether the cultural, economic, and political links across the ocean integrated the adjacent lands into a fundamentally "Atlantic World." Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *G. O'Malley*

190Y. The Atlantic Slave Trade. *

Before 1800, far more Africans than Europeans colonized the Americas, arriving unwillingly in the slave trade. Course examines the captives' experiences; the trade's organization and significance in the Atlantic economy; and the eventual movement to abolish the traffic. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *G. O'Malley*

192. Directed Student Teaching.

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study.

To allow promising, well-qualified undergraduates to pursue directed programs of archival or archaeological study in the field under supervision of the UCSC history faculty, concentrating their work within a single given quar-

ter. Students may take two or three courses concurrently. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Advanced Research and Reading Seminars. *

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

194A. Gender, Class, and Sex in Shanghai. *

Focusing on Shanghai, course examines issues of gender, class, and sex in modern urban Chinese history. Given Shanghai's history as a treaty port, particular attention paid to ways in which its semi-colonial status inflected the articulation of gender identities, class formations and issues of sexuality (particularly sexual labor). Also looks at Shanghai during the Maoist period and in the context of more contemporary economic reforms. (Also offered as Feminist Studies 194N. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and course 140C, or 140D, or 140E, or permission of instructor. Restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *E. Honig*

194B. Okinawan History. W

Examines the history of Okinawa with particular attention paid to the modern era. The goal is to give students a solid foundation in the historiography of major themes in the study of Okinawan society. (Formerly course 196X.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements two upper-division history courses, or permission of instructor. Enrollment limited to 20. (General Education Code(s): W.) *A. Christy*

194E. Women in Japanese History. *

Examines through both primary and secondary sources such issues as work, sexuality, education, class, and ethnicity in relation to constructions of female gender in Japanese society over the past several centuries, particularly focusing on the modern era. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *N. Aso*

194G. China Since the Cultural Revolution: Histories of the Present. F

Explores the rapid and often destabilizing shifts that have taken place in China since the late 1970s (the "reform era"), tracing the effects of China's earlier experiment with revolutionary socialism on the market-driven present. Examines how various meanings of reform are negotiated; changes in rural and urban environments; and class, gender, and ethnic differences. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *G. Hershatter*

194H. Gender, Family, and State in China: 1600-Present. *

Explores gender, family, and state power in China from 1600 to present, examining gendered norms, education, political movements, revolutionary practice, sexuality and sex work, and state interventions in contemporary families. Responses to reading and a research paper required. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history

courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *G. Hershatter*

194M. Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600-1900. S

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing, China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and course 294M. Prerequisite(s): course 40A or 140B, and one additional upper-division history course or permission of instructor, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Hu*

194N. Comparative Studies in Modern Asian History. F

Seminar on cultural and social changes in Asia, mainly in the 19th and 20th centuries. Topics include colonial encounters, cities, narratives of ordinary persons, nationalism and identity, visual cultures, and Orientalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *D. Basu*

194R. Cairo: The City Victorious, 1750-2000. *

The modernization of a world city from 1750 to the present. Cairo's social and cultural history (literature, film, music) against the background of its changing political and economic contexts. Topics include: orientalism, nationalism, imperialism, minorities, women, migration, urbanism, popular culture, tourism. Prerequisite(s): Two upper-division history courses; and course 41 or 101A or 101B; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *E. Burke*

194S. Comparative Studies in World History. *

Explores a broad topic in world history (varies from year to year) such as settler colonial nationalism, mission, involuntary labor, pre-political resistance, or defensive modernization in comparative historical perspective. (Formerly course 196W.) Enrollment limited to 20. May be repeated for credit. (General Education Code(s): W.) *The Staff*

194U. The Cold War and East Asia. W

Considers through primary and secondary sources the events and aftermath of the Cold War in East Asia in terms of state formation, domestic and foreign policy, and protest movements in China, Taiwan, Korea, and Japan with reference to Vietnam. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *N. Aso*

194X. The Cold War in the Mediterranean, 1942-1991. *

Writing-intensive course on the Mediterranean. Topics include: U.S. relations with the region (including direct and indirect intervention), local responses, and cultural transformations. Students pursue advanced research using primary and secondary sources. Prerequisite(s): satisfaction of the Entry Level Writing and Composition require-

ments and two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *E. Burke*

194Y. Memories of WWII in the U.S. and Japan. S

Research seminar comparing U.S. and Japanese memories of World War II. Topics include war origins, total war, the atomic bomb, war responsibility, reparations, memorials, museums, and monuments. Primary work devoted to research in original texts and documents. Prerequisite(s): two upper-division history courses or permission of instructor; satisfaction of the Entry Level Writing and Composition requirements; course 80Y recommended. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W, E.) *A. Yang*

195A. Thesis Research.

Prerequisite(s): petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration). *The Staff*

195B. Thesis Writing.

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration). (General Education Code(s): W.) *The Staff*

196. Advanced Research and Reading Seminars.

An opportunity for advanced students to focus on specific research problems resulting in a substantial research paper of 25 pages, or discussion of assigned readings resulting in a series of short papers totaling 25 pages. Courses must be taken in area of concentration in order to count towards the major. *The Staff*

196A. Is British History Possible?. *

An examination of the possibilities and problems of producing a history that is genuinely British: one that pays due attention to the histories of the four modern peoples or nations of the British archipelago. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Sharp*

196B. Social Protests in Late Medieval and Early Modern England. *

Explores the social, cultural, economic, and political context of popular protest in England from 1347 through 1631. An important dimension of that exploration is an examination of official government responses to riot and rebellion. Two courses in medieval or early modern European history recommended as preparation. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Sharp*

196C. Modern Italian Culture. F

Developments in Italian culture and society from the postwar to the present. Topics include north-south divisions, family and gender; cinema and modernity, urbanization, mafia, and terrorism. Prerequisite(s): course 164A or 164B or 183A or 183B, or permission of instructor and one upper-division history course; and satisfaction of the Entry Level Writing Requirement. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *C. Polecristi*

196E. Modern Irish History. *

Aims to illuminate major themes and turning points of

modern Irish history: the causes and consequences of the famine; the development of Irish nationalism; revolution, civil war, and partition; and the recent economic boom. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *B. Thompson*

196G. Modern Germany and Europe. S

A senior reading and research seminar that explores the major historiographic debates in German history during the 19th and 20th centuries. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

196I. The French Revolution. *

Students conduct original research on the French Revolution of 1789 based on mix of primary and secondary courses. Classroom discussions focus on interpreting contemporary documents and addressing historiographical issues. Seminar format with significant written requirements. Presumes familiarity with the period. Prerequisite(s): course 70B or 170A or 171. Students who have taken course 70B must also have taken one upper-division history course. Enrollment restricted to history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Traugott*

196J. Autobiography and History. F

Students prepare research papers using a combination of sources, both primary (the autobiographies, diaries, or memoirs of historically relevant figures) and secondary (chronologically and thematically appropriate works of synthesis that help contextualize the lives of their subjects). Seminar format with significant written requirements. Prerequisite(s): satisfaction of the Entry Level Writing requirement; Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *M. Traugott*

196K. Studies in European Intellectual History. *

Topics in European intellectual history from the French Revolution to World War I. Readings exemplifying approaches from history of ideas and intellectual biography to recent studies of rhetoric and political culture. Preparation and presentation of research paper. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *J. Beecher*

196M. Shtetl: Eastern European Jewish Life. *

For several centuries, the shtetl functioned as the center of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and course 257. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses. Enrollment restricted to junior and senior history and Jewish studies majors. Enrollment limited to 20. (General Education Code(s): W.) *N. Deutsch*

196N. Eastern European Jewish Social History. *

Study of 19th- and 20th-century Eastern European and Russian Jewish social history. Prerequisite(s): satisfaction of the Entry Level Writing and Composition require-

ments, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history, German studies, and Jewish studies majors. Enrollment limited to 20. (General Education Code(s): W, E.) *P. Kenez*

196O. Russian Revolution, 1917-1932. *

Study of the major political, social, and intellectual conflicts and transformations of the period. Topics include February and October revolutions, Civil War, NEP, rise of Stalinism, and collectivization. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *P. Kenez*

196P. Hitler and Stalin. *

A discussion of 20th-century totalitarianism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history, German studies, and Jewish studies majors. Enrollment limited to 20. (General Education Code(s): W.) *P. Kenez*

196R. Social World of Roman Palestine. S

Inquiry into the structures of Roman Palestine on the basis of parables from the synoptic Gospels, the Dead Sea Scrolls, Josephus, inscriptions, and archaeological discoveries. Physical, social, economic, and ideological conditions are researched in an ethnographic fashion. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses. Enrollment restricted to junior and senior history, classical studies, and Jewish studies majors. Enrollment limited to 20. (General Education Code(s): W.) *G. Hamel*

196S. Special Topics in Ancient History. *

Seminar focuses on different topics in ancient history. In addition to assigned readings, the student is expected to do additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course will vary from year to year. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors and classical studies majors. Enrollment limited to 20. (General Education Code(s): W.) *C. Hedrick*

196U. Topics in Medieval History. W

Addresses contemporary and modern interpretations of the events relation to medieval history. Through critical discussion and debate, assesses the value and limitations of various historical sources, as well as developing skills in research, presentation-making, and writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 102A or 103, and one upper-division history course, or by permission. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): W.) *B. Catlos*

196Y. Saints and Holiness in Medieval Europe. *

Examines popular religious belief and practice, including conversion, the cult of the saints, relics, pilgrimage, miracles and visions. Emphasis on Medieval Europe, but some attention also paid to modern patterns of devotion. Prerequisite(s): two upper-division history courses; satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior history majors. Enrollment limited to 20. (General Education Code(s): W.) *C. Polcrutti*

198. Independent Field Study.

Student's supervision is conducted by a regularly appointed officer of instruction by means other than the usual supervision in person (e.g., by correspondence) or student is doing all or most of the coursework off campus. May be repeated for credit. *The Staff*

199. Tutorial.

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits).

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200. Methods and Theories of History. F

An overview of theories, methods, and philosophies concerning the nature and production of history. Topics vary with instructor. Enrollment restricted to graduate history students and others by permission of instructor. Enrollment limited to 20. *M. Traugott*

201. Directed Research Colloquium. W

Having already prepared a bibliography and research prospectus in a graduate research seminar, students will undertake further research on their projects, write a 25–30 page research paper, and present their work to their fellow students. Prerequisite(s): history graduate research seminar. Enrollment restricted to graduate history students. Enrollment limited to 15. *A. Yang*

204A. History of Gender Research Seminar. S

Introduction to theories and methods employed in gendered historical research. Readings are drawn from a range of chronological, national, and thematic fields and explore the intersection of gender analysis with such historical problems as the body and sexuality, modernity, national identity, and production/consumption. Enrollment restricted to graduate history majors. Enrollment limited to 15. *M. Westerkamp*

204B. Approaches to Social and Cultural History. *

Graduate reading course focusing on both classic and contemporary approaches to social and cultural history. Readings include: Bakhtin, Benjamin, Foucault, Auerbach, and Berlin, and a variety of more recent studies in social, cultural, and intellectual history. Course not limited to graduate students in History. (Formerly *Society and Culture Research Seminar*.) Enrollment restricted to graduate students. Enrollment limited to 15. *J. Beecher*

204C. Colonialism, Nationalism and Race Research Seminar. *

Research seminar introducing theories and methods of the comparative histories of race, ethnicity, colonialism, and nationalism. Enrollment restricted to graduate history students. Enrollment limited to 15. *M. O'Hara*

205. Diaspora and World History. *

Examines the histories and historiography concerning diaspora. This area of study includes populations from Asia, Africa, Europe, and the Americas. Students study the histories of diasporic populations, and the questions, theory, and methods that scholars use to approach the subject. Enrollment limited to 10. *L. Haas*

210A. Readings in U.S. History. *

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: colonial and early national periods. Enrollment restricted to graduate history majors. Enrollment limited to 15. *M. Westerkamp*

210B. Readings in U.S. History. W

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: 19th century. Enrollment restricted to graduate history majors. Enrollment limited to 15. *D. Frank*

215A. Topics in American History: U.S. Labor and Working Class History. *

Addresses topics in history of working people, the labor movement broadly defined, and political-economic change in the U.S. Topics include race, ethnic and gender dynamics, and U.S. labor and working-class history in global context. Enrollment limited to graduate students. Enrollment limited to 15. *D. Frank*

215B. Visions of Progress. *

Explores the emergence of the welfare/regulatory state in the United States from the 1870s to World War I, examining different schools of historical thought about this period. Enrollment limited to 15. *M. Lasar*

215C. U.S. Immigration and Ethnic History. *

Introduces key issues and debates in United States immigration and ethnic history. Topics include causes of immigration; constructions of race, gender and ethnicity; assimilation; transnationalism; and forces shaping immigration policy. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Brundage*

220. The Atlantic World, 1500-1800. *

Explores the economic, social, and cultural history of early America in terms of its Atlantic connections and intersection with the cultures of early modern Europe, Africa, and Latin America. Builds upon previous work in early America and early modern Europe, challenging students both to work comparatively and to break out of traditional geographic models. (Formerly *Topics in American History: The Atlantic World 1500–1800*.) Enrollment restricted to graduate students. Enrollment limited to 15. *M. Westerkamp*

221. Empires and New Nations in the Americas. *

Compares the history of the colonial and 19th-century Americans through a world-history perspective. Focuses on the interrelated themes of indigenous histories, slavery and other forms of servitude, commodity production, and the meaning of equality and freedom in new nations. Enrollment restricted to graduate students. Enrollment limited to 15. *L. Haas*

225. Spanish Colonialism. *

Reading-intensive graduate seminar with emphasis on theoretical and historiographical questions regarding the field of Spanish colonialism in the Americas. Students encouraged to engage in discussions of comparative colonialisms. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Diaz*

230A. Readings in Late Imperial China. W

Survey of the major works on and historiographical controversies about Qing Dynasty (1644–1911) China. Enrollment restricted to graduate students. Enrollment limited to 20. *M. Hu*

230B. Engendering China. *

Reading seminar on the history of Chinese gender, focusing on the Qing dynasty (1644–1911) to the present. Topics include marriage and family, sexuality, work, the gendered language of politics, and major reform movements. Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatter*

230C. Readings in 20th-Century China. *

A survey of major Western-language works and historiographical controversies in Chinese history from 1900 to the present. Weekly readings emphasize particular social

and political movements as well as long-term changes in urban and rural society. Enrollment restricted to graduate students. Enrollment limited to 20. *E. Honig*

238A. Research Methods: China. *

An introduction for graduate students to the use of major research tools and sources in Chinese history since 1600, with a focus on 20th-century materials. Students complete a series of bibliographical exercises and prepare a research prospectus. (Formerly course 228A.) Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatler*

238B. Research Methods: China. *

Building on the research and bibliographic skills developed in course 228A, students develop a research topic and write a paper of 20–30 pages using primary sources as appropriate in English, Chinese, and/or Japanese. (Formerly course 228B.) Enrollment restricted to graduate students. Enrollment limited to 20. *G. Hershatler*

242. Readings in Modern Japan. *

A graduate course intended to give students a fundamental understanding of the major themes in the study of modern Japanese history. Central themes include modernity and modernization, colonialism, postwar recovery, gender, race, and nationalism. (Formerly course 210.) Enrollment restricted to graduate students. Enrollment limited to 15. *N. Aso*

243. Transnational Japan. *

Examines how "Japanese" history has been forged across, outside, and beyond the boundaries of the modern nation-state of Japan. Considers how Japan has transformed the world. Students debate how the world made Japan and how Japan re-made the world. Enrollment restricted to graduate students. Enrollment limited to 10. *A. Christy*

244. Gender and Japanese History. F

Examines—through primary and secondary sources—constructions of gender (masculine, feminine, and transgender) in Japanese society over the past several centuries, focusing on the modern era. Enrollment restricted to graduate students. Enrollment limited to 15. *N. Aso*

250A. Readings in European Social and Cultural History. *

A readings seminar that introduces beginning graduate students to some of the major conceptual and methodological approaches to early modern European social and cultural history, 1400–1789. (Formerly course 205A.) Enrollment restricted to graduate students. Enrollment limited to 20. *B. Sharp*

250B. Readings in European Social and Cultural History. *

A readings seminar that introduces beginning graduate students to some of the major problems in modern European social and cultural history, 1789 to the present. (Formerly course 205B.) Enrollment restricted to graduate students. Enrollment limited to 20. *P. Kenez*

256. Nationalism, Anti-Semitism, and Jewish Resistance in World War II. *

Jewish resistance to Nazism during World War II, in Eastern Europe, and its historical context. Includes the pre-war rise in nationalism and anti-Semitism in Poland and Lithuania, Jewish integration in the Soviet Union, and the consequences for wartime resistance. (Also offered as History of Consciousness 243A. Students cannot receive credit for both courses.) Enrollment restricted to seniors and graduate students. Enrollment limited to 15. *B. Epstein*

257. Shtetl: Eastern European Jewish Life. *

For several centuries, the shtetl functioned as the center

of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and course 196M. Enrollment restricted to graduate students. Enrollment limited to 20. *N. Deutsch*

280A. History Graduate Proseminar: Teaching Pedagogy (2 credits). F

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include TAships, designing course syllabi, pedagogy, teaching technologies, and teaching in different venues. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to graduate history majors. May be repeated for credit. *C. Jones*

280B. History Graduate Proseminar: Research Presentations and Grant Writing (2 credits). *

Devoted to professionalism and socialization of history graduate students. Topics include discussion of researching grants; effective CV writing; successful grant applications and publication proposals; and conference paper and panel proposals. Required for first-year graduate students; however, open to all history graduate students as needed. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to history graduate students. May be repeated for credit. *B. Carlos*

280C. History Graduate Proseminar: Job Market (2 credits). S

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include researching position; preparing a CV and the job-application letter; preparing for an interview; practice interview; preparing a job talk and/or teaching presentation; and practice job talk. This course is required for first-year students; however, it is open to all other history graduate students as needed. Enrollment restricted to graduate history majors. May be repeated for credit. *C. Jones*

283. Foreign Language Preparation (2 credits). F,W,S

Independent study course in which history graduate student reads selected texts to fulfill foreign language requirement. Student meets with instructor to discuss readings, deepening his knowledge of the foreign language. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

284. Qualifying Examination Preparation (2 credits). F,W,S

Independent study course designed to help students prepare for qualifying exams. Students meet on regular basis with one or more members of qualifying examination committee to monitor preparation for exam. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

285. Readings in Research Field (2 credits). F,W,S

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings and deepen their knowledge of a particular author or historical theory. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

286. Research Colloquium on Colonialism, Nationalism, and Race (2 credits). F,W,S

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of a particular cluster to discuss most important readings in the field. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

287. Research Colloquium on Gender (2 credits). F,W,S

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of this cluster to discuss most important readings in their field. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

288. Teaching Assistant Preparation (2 credits). F,W,S

Independent study designed to help history graduate students prepare to teach in an area of history outside their specialization. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

289. History Colloquium (2 credits). F,W,S

Independent study designed to foster departmental and cross-disciplinary participation in campus talks, colloquia, conferences, and events. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

294M. Literati, Samurai, and Yangban: A Comparative History of State. *

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and course 194M. Enrollment restricted to graduate students. Enrollment limited to 20. *M. Hu*

297. Independent Study.

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research.

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

RAOUL BIRNBAUM

Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

CAROLYN DEAN

Cultural histories of the native Americas and colonial Latin America

JOHN HAY, Emeritus

VIRGINIA JANSEN, Emerita

JASPER A. ROSE, Emeritus

CATHERINE M. SOUSSLOFF, Emerita

Associate Professor

ELISABETH CAMERON, Patricia and Rowland Rebele Chair in History of Art and Visual Culture (2008-2013)

Visual cultures of central Africa, issues of gender, post-colonialism, and iconoclasm

JENNIFER A. GONZÁLEZ

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

DONNA M. HUNTER

European painting (especially French) from 1600 to the 1960s; German art and visual culture between the two world wars; art as social practice; portraiture; monuments, counter-monuments, and anti-monuments

STACY L. KAMEHIRO

Visual cultures of Oceania; colonial cultures; visual culture and identity; gender studies; museums and collecting; material culture

Assistant Professor

MARIA EVANGELATOU

Medieval visual culture with emphasis on Byzantium and its periphery; manuscript illumination, Marian cult and iconography; ancient Greek and Roman visual culture; Islamic visual culture; gender studies

BORETH LY

Visual cultures of Southeast Asia and its diaspora: religions and materiality, theory of visual narrative, the politics of cultural translation; (post) colonial and cultural studies; issues of gender, sexuality, race, and trauma

DANIELA SANDLER

Modern and contemporary architecture and urbanism; visual and cultural studies; social inequality in space; architectural preservation; history and memory in the built environment; architecture and visual culture in Latin America and Europe, with foci on Brazil and Germany

Professor

JOHN DIZIKES, Emeritus (American Studies)

SHELLY ERRINGTON (Anthropology)

Globalization of folk art, visual and social semiotics, photography, film, the Internet and digital media, Southeast Asia, and Latin America

Program Description

The study of visual culture encompasses the production, use, form, and reception of images past and present. It incorporates the painting, sculpture, and architecture traditionally defined by art history, and extends throughout the fields of visual imagery beyond the conventional boundaries formerly drawn by the academy. The History of Art and Visual Culture Department offers courses covering a wide variety of representations from the cultures of Africa, the Americas, Asia, Europe, and the Pacific Islands, including areas as diverse as

ritual, performative expression, bodily adornment, landscape painting, installation art, and video games.

Students of visual culture at UC Santa Cruz (UCSC) investigate complex questions concerning the social, political, economic, religious, and psychological impact of images from the perspective of their producers, users, and viewers. Images play a central role in the formation of values and beliefs, including the perception of gender, sexuality, ethnicity, race, and class. Through attentive historical study and close analysis, students are taught to recognize and assess these systems of value, and are introduced to theoretical and methodological frameworks for future research.

The history of art and visual culture curriculum guides students in acquiring skill in critical thinking about visual culture, leading to a bachelor of arts (B.A.) degree. Each student who chooses to major or minor in visual culture devises an individual study plan with a faculty adviser. The lower-division courses, numbered 1–99, intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division courses cover a broad range of issues in various aspects of world culture from earliest times to the present. Advanced upper-division courses focus on selected fields, topics, and methods. The most advanced courses, numbered 190 and 191, are taught in seminar format.

Declaring the Major

To declare the major, students must complete two of the required four lower-division history of art and visual culture courses chosen from two different geographical regions:

10s Africa and its Diaspora;

20s Asia and its Diaspora;

30s–40s Europe and the Americas;

50s Mediterranean;

60s Native Americas;

70s Oceania and its Diaspora

Students considering this major are encouraged to complete these courses early in their studies and consult with the history of art and visual culture undergraduate adviser to develop a plan of study. Transfer students should consult the Transfer Student/Transfer Credit section.

Program of Study

The history of art and visual culture (HAVC) major requires four lower-division and nine upper-division courses including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the different cultural settings to ensure methodological and disciplinary breadth.

HAVC majors are also strongly encouraged to take at least one thematic or cross-regional course. (Courses in 80s, 180s, or 191s.)

Lower-Division Requirements

Four courses, each from a different geographical region listed above.

HAVC 80 may be used to fulfill the lower-division regional breadth requirement for regions 10 (Africa), 60 (Native Americas), or 70 (Oceania).

Upper-Division Requirements

Nine courses, as follows:

- course 100A recommended during sophomore or junior year

- courses 101–191: eight courses required, including a seminar (190s and 191s) to satisfy the senior comprehensive (see Comprehensive Requirement below).

In completing upper-division course work, students must complete three upper-division courses (courses 101–191) from three different regions. Two of those regions must be a geographical area not studied at the lower-division level.

Senior Comprehensive Requirement

All seniors must complete one seminar, 190–191, as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will produce carefully supervised work culminating in the completion of a written project that meets the standards of the senior level of achievement in the major. Students whose performance is outstanding are eligible for honors in the senior comprehensive.

Concentration in Religion and Visual Culture

This program is for students who wish to pursue the study of religion in conjunction with studies of visual culture. It consists of an individually planned sequence of courses, including a core set of lower-division courses to provide grounding in issues, methods, and a general history of visual culture; upper-division courses from within the department; and at least four upper-division courses from other departments that focus on the study of religion.

A student enters the concentration by proposing, in consultation with their faculty adviser, a sequence of upper-division courses to fulfill the religion and visual culture requirements. The declaration of major requirements for the religion and visual culture concentration are the same as listed in the Declaration of Major section. The faculty adviser for the religion and visual culture concentration is Raoul Birnbaum.

Requirements for the Religion and Visual Culture Concentration

The 15-course curriculum of the religion and visual culture concentration is pedagogically distinct from that of history of art and visual culture. Students are required to take four lower-division classes (each from a different geographical area) and eleven upper-division courses, seven from within history of art and visual culture and four relevant upper-division courses taken from other departments.

Students in the religion and visual studies concentration complete the following required upper-division curriculum listed below.

Eleven courses, as follows:

- 100A recommended in sophomore or junior year
- 101–191: six courses required, including a seminar (190s and 191s) to satisfy the senior comprehensive (see Comprehensive Requirement above).
- Four relevant upper-division courses in the study of religion from programs on campus such as anthropology, history, literature, and philosophy. (The department maintains a current list of approved courses that focus on the study of religion.)

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in History of Art and Visual Culture meet the DC requirement by completing course 100A.

Minor Requirements

Nine courses, as follows:

- lower-division: three courses from three different geographical regions;
- upper-division: six courses planned in consultation with a faculty adviser.

Department Advising

Undergraduate Adviser

The undergraduate adviser offers specific information about navigating through the program and the curriculum and assists students with requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research.

Faculty Advisers

Faculty are the best resource for learning about the philosophies and foundations of history of art and visual culture. Faculty advisers work individually with students to develop a specific course of study, recommend additional courses of interest, and discuss long-term career goals including education beyond the baccalaureate. A faculty adviser is assigned to each student by the undergraduate adviser during the declaration of major meeting.

Languages

All majors are encouraged to study at least one foreign language. Graduate programs in visual culture, art history, and other related disciplines generally require competence in another language besides English. Students are encouraged to consult with their faculty adviser to discuss an appropriate course of language study.

Transfer Students and Transfer Credit

As preparation, transfer students are encouraged to fulfill at least three of the lower-division history of art and visual culture requirements prior to transfer. Refer to the ASSIST articulation agreements at www.assist.org for approved lower-division courses. A student may transfer up to six art history courses toward the major, only three of which may be upper division. Upper-division transfer credit is evaluated on a case-by-case basis and must be approved by the student's faculty adviser. Transfer students are strongly encouraged to contact the History of Art and Visual Culture Department before enrolling at UCSC.

Study Abroad

The University of California's Education Abroad Program (EAP) operates in countries throughout the world. Students may receive transfer credit for a maximum of three upper-division art history courses taken through the EAP program (see Transfer Student/Transfer Credit above). Many EAP programs require competency in a language besides English (see Languages above). Students should make every effort to consult with a faculty member about their course of study before going abroad.

Careers

The preparation students receive from the baccalaureate of arts degree in history of art and visual culture

provides skills that can lead to successful careers in law, business, and social services, in addition to a more specific focus on museum curating, art restoration, studies in architecture, and studies in art history leading to a graduate degree.

Graduate Study

There are many graduate programs of visual culture that lead to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degree in fields such as art history, cultural history, semiotics, rhetoric, history of religions, comparative arts, theory and criticism of art, and so forth. Most graduate programs require a reading knowledge of one or two languages other than English (see Languages above). Students who are contemplating graduate study should consult with their faculty adviser as early as possible in their undergraduate career.

Graduate Program

The History of Art and Visual Culture Department offers a course of study leading to the Ph.D. in visual studies. The Ph.D. is designed to steep our graduates in the most theoretically relevant methodologies for understanding the significance of visual artifacts and the social and cultural qualities of human vision (termed *visuality*); provide students with exposure to a range of cultural perspectives and visual artifacts drawn from around the world; and cultivate in our graduates the necessary skills and knowledge to secure and excel in academic and curatorial positions. The program is both interdisciplinary and flexible. Students work closely with their advisers and the director of graduate studies to craft personalized courses of study that advance their intellectual and professional goals.

The program employs a wide range of visual evidence for examination, without being constrained by traditional hierarchies of art. Fine arts, architecture, photography, film, performances, utilitarian objects, and popular entertainments all are primary source material for scholars in the field. The program at UCSC is particularly adept at illustrating significant differences in how disparate cultural groups interpret their visual worlds, given the breadth of cultural perspectives taught by our faculty. With scholars focusing on cultures in Africa, the Americas, Asia, Europe, and the Pacific Islands, visual studies at UCSC offers students an unparalleled opportunity to consider the role of social and cultural forces in guiding how and what their members see.

Graduate Program Requirements

Students are required to enroll in a minimum of two courses per quarter until advancement to candidacy (normally achieved no later than the start of their fourth year). Students entering with a B.A. take a total of twelve, 5-credit graduate courses during their first two years of study. Those entering with an M.A. may receive advanced standing based on the evaluation of the visual studies graduate committee. In no case will students entering with an M.A. have more than a year's worth of course work waived.

All students entering with a B.A. (or with an M.A. that is not in visual studies) must take four five-credit core courses within their first two years: HAVC 201, *Introduction to Visual Studies* (fall); HAVC 202, *Critical Theory* (fall); and HAVC 203, *Theories and Histories of Seeing* (winter, taken twice). Students entering with an M.A. in visual studies will meet their core courses requirements after taking *Theories and Histories of Seeing* once.

Field Clusters/Field Specialties

Appreciating that most of our graduates will be required to fit themselves back into traditional disciplinary

structures once they enter the academic job market, the program is designed to provide students with both new means of interpreting visual evidence and suitable depth of understanding in older disciplinary traditions. While all graduates will acquire a shared foundation in theories of *visuality* (attained through our core course requirements), individual student programs vary considerably depending on the type of department in which the student hopes to secure employment after graduation. In addition to completion of the core courses required of all students, each student will develop a cluster of individualized field courses in consultation with their adviser based on her/his particular professional goals.

Each student is required to take a minimum of four, 5-credit courses in a disciplinary cluster (beyond the core course requirements). This requirement pertains both to students entering with a B.A. and an M.A. Acceptable field cluster courses might center around a medium (i.e., painting or architecture), a temporal/stylistic category (i.e., Early Modern or Postmodernism), a cultural, national, or social group (i.e., Pacific Islanders or China), or a disciplinary approach (i.e., cultural anthropology or gender studies). Field clusters are developed in consultation with the student's adviser and, ideally, help lay the foundations for dissertation work. To count toward the degree, field clusters must receive prior approval from the visual studies graduate committee. Beyond the core and field courses, students admitted with a B.A. must complete an additional four five-credit elective courses.

Students entering with a B.A. take four courses to complete the field cluster requirement and another four to meet their elective requirement. Of these eight courses, at least four have a visual studies designation, and at least three courses must be drawn from departments outside of visual studies. Students admitted with a non-visual studies M.A. must take as many as four elective courses beyond those designated core and field (depending on the determination of the visual studies graduate committee based on a review of previous graduate course work), while students admitted with a visual studies M.A. must take a minimum of one course.

Students entering the program with an M.A. in visual studies meet the same distribution requirements as those students entering with a B.A. Of the eight courses making up the field cluster requirements and elective courses, at least four must have a visual studies designation, and at least three courses must be drawn from departments outside of visual studies. Students entering with an M.A. that is not in visual studies meet their distribution requirement by selecting at least five courses with a visual studies designation and at least two courses drawn from departments outside of visual studies.

Visual studies graduate students are encouraged to augment their course electives by drawing from the graduate seminars offered by the departments and programs of Anthropology, Digital Arts and New Media, Film and Digital Media, History, History of Consciousness, and Philosophy.

Language Requirement

Students must demonstrate reading knowledge of one foreign language prior to the start of their second year (either through attainment of a score of 550 or higher on the Educational Testing Service Graduate Student Foreign Language Test or through passage of a reading examination administered by the department).

Students are encouraged to master a second foreign language. Based on a student's area of interest, and the joint assessment of the student's adviser and the director

of graduate studies, proof of proficiency in an additional language or languages may be required prior to the student being admitted to candidacy for the Ph.D. Should proficiency in additional languages be required, it must be demonstrated prior to the close of the student's third year of study.

Qualifying Examinations

After completing all course work and passing one language examination, students are required to pass a qualifying examination prior to the close of the fall quarter of their third year, unless a petition for an extension, demonstrating reasonable cause, is approved by the visual studies graduate program committee. The qualifying examination is divided into three topic areas, with each one including a written and an oral component. Each topic area should display historical breadth and variety of media. Two of the topic areas should ideally relate to the future dissertation topic, while one of the remaining must constitute an outside area, examining a topic that is chronologically, geographically, and/or methodologically distinct from the other two.

Prior to the end of his/her second year, a student who entered the program with a B.A. should consult with his/her adviser to assemble a group of three faculty members who will serve as examiners and aid the student in assembling the necessary topic areas, compiling the needed reading lists, and preparing for the written and oral components of the examination in each area. The examination will have two parts. In part one, each student will respond in writing to three general questions, one posed by each of their three examiners in the pre-arranged topic areas. In part two, each student will gather together with his/her examiners to field questions probing and clarifying the previously submitted written component of the qualifying examination. In order to pass the qualifying examinations, the student must receive the unanimous endorsement of the committee members.

Advancing to Candidacy

Advancement to candidacy follows and is contingent upon passing the qualifying examinations, all needed language examinations, and the subsequent appointment of a dissertation reading committee of at least three members.

Dissertation

After advancing to candidacy, a student must complete an approved dissertation prospectus, a colloquium, and dissertation, and pass an oral defense of the thesis. A written dissertation prospectus is due no later than the end of the second quarter following the student's completion of the qualifying examinations. The prospectus is a brief, concise essay (with bibliography) that defines the scope, methodology, and rationale for the proposed dissertation. It is prepared in consultation with the student's dissertation director, who must approve of the document prior to scheduling the colloquium.

The dissertation director, in consultation with the student and director of graduate studies, will invite four to five faculty members, in appropriate fields, to attend the colloquium and provide input on the prospectus and assess the student's preparedness to begin researching and writing the dissertation. Faculty participating in the colloquium need not be members of the dissertation committee, but should represent faculty whose expertise has bearing on the student's project. A student will pass the colloquium after having demonstrated to the satisfaction of all colloquium committee members adequate preparation to begin researching and writing the dissertation. The dissertation itself must make a significant and original contribution to the field of visual studies,

as judged by each dissertation committee member.

Final Examination

An oral defense of the dissertation is the only final examination requirement, unless a petition to waive the oral defense, demonstrating reasonable cause, is approved by the student's primary adviser and the visual studies graduate program committee. The student's dissertation committee, under the supervision of the director of graduate studies, will conduct the examination. In the event that the director of graduate studies serves on the dissertation committee, the chair of History of Art and Visual Culture will oversee the defense. Interested faculty and students in the visual studies program will have the opportunity to observe the defense.

Minor

UCSC graduate students enrolled in doctoral programs may obtain a minor in visual studies on their Ph.D. degree by meeting the following requirements:

- Securing approval from a core member of the visual studies faculty to serve as an adviser for their minor.
- Having at least one core member of visual studies serve on either their qualifying examination or dissertation committee.
- Submitting a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the student's visual studies adviser.
- Successfully completing four graduate courses taught by either core or affiliated members of the visual studies program. The courses must form a coherent cluster in visual studies and be pre-approved by the student's minor adviser.

Normative Time from Matriculation to Degree

The visual studies Ph.D. program at UCSC is designed to require six years for students matriculating with a B.A. and five to six years (depending on advanced standing granted) for those entering with an M.A. The pre-candidacy period is two years for students entering with a B.A. and a minimum of one year for those arriving with an M.A. in visual studies. During this period students will devote themselves to coursework, completion of the language examination, some teaching, and, ideally, our teaching-related independent study course. Students will show competency in one foreign language prior to the start of their second year, and show competency in additional foreign language(s), as required, by the close of their third year, pass their qualifying examinations during the fall quarter of their third year, complete an approved version of their prospectus and schedule their colloquium for a date prior to the close of the spring quarter of their third year, and finish their dissertation and successfully defend it before the end of their sixth year.

Lower-Division Courses

Africa and its Diaspora

10. Introduction to African Visual Culture. W

An interdisciplinary approach to the study of the basic structures (gender, art within political sphere, and spiritual aspects of visual culture) and cultural institutions (initiations, closed associations, kingship, title association, etc.) around which the study of African visual

culture revolves. (General Education Code(s): CC.)
E. Cameron

Asia and its Diaspora

20. Visual Cultures of Asia. *

An introduction to the art and architecture of East Asia, including China, India, Southeast Asia, and Japan. In order to achieve a fuller understanding of the arts of these countries a historical, cultural, and religious context is provided. (Formerly course 10D, *Presence and Power in the Visual Cultures of Asia.*) (General Education Code(s): CC, IH, A.) *The Staff*

22. Religion and Visual Culture in China. *

Introduction to the study of religious currents and practices in China and their visual expression. In addition to "religious art," topics include such pivotal matters as body concepts and practices, representations of the natural world, and logics of the built environment. (Formerly course 80G.) (General Education Code(s): IM, A, E.)
R. Birnbaum

24. Southeast Asia Visual Culture. S

Introduces the visual cultures of Southeast Asia. Topics include indigenous megalithic art, textiles, and jewelry, as well as Hindu and Buddhist art and architecture. Also considers shadow play and dance performance as alternative lenses to looking at ritual and visual narratives rendered on stone temples. (Formerly course 10C.) (General Education Code(s): CC, IH, A, E.) *B. Ly*

27. Image and Ideology in Indian Art. F

Examination of the ways social, religious, and political patronage have affected the production and reception of art in the Indian subcontinent. The course is designed as a series of case studies from different periods of Indian history. (Formerly course 80N, *Indian Art: Image and Ideology.*) (General Education Code(s): IM, A, E.)
K. Thangavelu

Europe and the Americas

30. Introduction to European Visual Culture. *

An introduction to the European tradition in visual culture, from antiquity to the present, but not in chronological order. All media, including the fine arts, architecture, film, video, and installation and performance work are incorporated. Presents the major visual regimes of representation while it probes the meanings and limits of Europe and the European tradition in the context of the visual. (Formerly course 10G, *Europe.*) (General Education Code(s): IM, IH, A.) *The Staff*

31. The Nude in the Western Tradition. W

The human body without clothing in European and European-American art and visual culture from ancient Greece to the present day. Among the themes to be addressed: gender, youth and age, sexuality and sexual preference, fecundity and potency, erotic art and pornography, primitivism and the naked body of the non-European. (Formerly course 10E.) (General Education Code(s): IM, IH, A.) *D. Hunter*

40. Museum Cultures: The Politics of Display. F

Explores the history of collecting and displaying art (museums, galleries, fairs) since the mid-19th century and the effect of institutional changes on aesthetic conventions. Follows the history from the origins of museums and collections to contemporary critiques of institutional exclusion and misrepresentation. (Formerly course 80D.) (General Education Code(s): IM, A.) *The Staff*

41. Modern Art in Context. *

Examines the social, economic, and political significance of European and U.S. modernist art and architecture,

moving from French realism to American minimalism. Provides the historical background and theoretical frameworks needed to make sense of modernist art and culture. (Formerly course 80V.) (General Education Code(s): IM, A.) *M. Berger*

43. History of Modern Architecture. S

Examines the origins and development of modern architecture, from the Enlightenment and the Industrial Revolution to the 20th Century and beyond. Buildings, urban plans, and works of art and design are discussed in relation to political, social, and cultural currents. (Formerly course 46.) (General Education Code(s): IM, IH, A.) *D. Sandler*

The Mediterranean

50. Ancient Mediterranean Visual Cultures. *

The role that ancient art and visual culture play in constructing social identities, sustaining political agendas, and representing various cultural, ritual, and mythological practices in Mesopotamia, Egypt, Greece, and Rome, including the sociology of ancient cultures, mythology, religious studies, gender studies and history. (Formerly course 80E.) (General Education Code(s): IM, A.) *The Staff*

51. Greek Eyes: Visual Culture and Power in the Ancient Greek World. F

The central role of visual communication in ancient Greek civilization: examines the construction of cultural, social, political, religious, and gender identities through material objects and rituals. Includes discussions of images of the public and private sphere, athletic and theatrical performances, mythology, pilgrimage, and magic. (Formerly course 80X, *Greek Eyes: Visual Culture and Power in the Ancient Greek*.) (General Education Code(s): IM, A.) *M. Evangelatou*

Native Americas

60. Indigenous American Visual Culture. *

Selected aspects of art and architecture of the first peoples of the Americas, north, central, and south, from ca. 2000 B.C.E. to present. Societies to be considered may include Anasazi, Aztec, Inca, Northwest Coast, Maya, Navajo, Plains, and others. (Formerly course 80M.) (General Education Code(s): ER, A, E.) *C. Dean*

Oceania and its Diaspora

70. Visual Cultures of the Pacific Islands. S

Interdisciplinary course examines visual cultures of Australia, Melanesia, Micronesia, and Polynesia from the archaeological past through contemporary periods. (Formerly course 105P.) (General Education Code(s): CC, A, E.) *S. Kamehiro*

Topics and Cross-Regional Studies in History of Art and Visual Culture

80. Colonial Histories and Legacies: Africa, Oceania, and the Indigenous Americas. W

A comparative study of the arts of selected cultures which developed outside the spheres of influence of the major European and Asian civilizations. Emphasis is on the function of the arts in these disparate geographic regions. Students cannot receive credit for this course and course 100E. (Formerly course 10E, *Africa, Oceania, and the Americas*.) (General Education Code(s): CC, IH, A, E.) *E. Cameron*

81. Video Games as Visual Culture. W

Through the aesthetics and theory of electronic games, introduces the histories, ideas, and debates that inform game studies. Topics include: narratology/ludology debates, interactivity, serious games, and alternative games.

(Formerly course 80H.) (General Education Code(s): IM, T5-Humanities and Arts or Social Sciences, A.) *The Staff*

99. Tutorial. F,W,S

Supervised study for undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

100A. Methods in History of Art and Visual Culture. W

Introduction to major issues of method and critique in study of art and visual culture. Focuses on understanding disciplinary and critical modes of scholarly inquiry in the visual arts, including role of historical research. Emphasizes intensive reading, discussion, and writing. Course 100A is a prerequisite for all History of Art and Visual Culture seminars. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior History of Art and Visual Culture majors. (General Education Code(s): W,A.) *The Staff*

Africa and its Diaspora

110. Visual Cultures of West Africa. *

Explores visual cultures of West Africa through time (Nok to present). Attention paid to relationships between peoples and impact of European/Arab presence on visual cultures. Prerequisite(s): course 10 or 80 recommended. (Formerly course 107B, *West Africa*.) (General Education Code(s): CC, A, E.) *The Staff*

111. Visual Cultures of Central Africa. F

Examination of visual cultures of Central Africa within a historical sequence from the Sanga archaeological excavations to contemporary easel painting. (Formerly course 107A, *Central Africa*) Prerequisite(s): course 80 suggested. Enrollment restricted to sophomores, juniors and seniors (recommended). Enrollment limited to 90. (General Education Code(s): CC, A, E.) *E. Cameron*

115. Gender in African Visual Culture. *

In Africa, relationships exist between gender and visual culture. Course examines where categories come from, differences in men's and women's visual cultures, and how visual cultures teach, reinforce, and negotiate gender definitions. When are male/female boundaries crossed, and why? (Formerly course 185B, *Gender*.) Enrollment limited to 35. (General Education Code(s): A, E.) *E. Cameron*

116. African Architecture. *

Study of the built environment in Africa. Focusing in depth on 10 major architectural forms or sites, this course explores the diversity of architectural types and how gender, politics, religion, and culture shape and are shaped by architectural spaces. (Formerly course 185C.) Enrollment limited to 35. (General Education Code(s): A, E.) *E. Cameron*

117. Contemporary Art of Africa. *

Examines contemporary arts in post-colonial Africa, 1960-present, including new popular cultural forms; arts resulting from new class and national structures; commodification of culture; Pan-Africanism; exhibitionism; and questions of destiny. (Formerly course 185D.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): IM, A, E.) *E. Cameron*

118. Art of the Contemporary African Diaspora. *

Considers contemporary art by African artists operating

in metropolitan centers, as well as Afro-British, Afro-Caribbean, and African-American production. Topics are organized thematically and address constructing and deconstructing the idea of Africa; cultural authenticity; diaspora; Creolité and creolization; hybridity; cosmopolitanism; post-black; and globalism in the arts. (Formerly course 189Y.) Recommended: background in art history. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

Asia and its Diaspora

122. Visual Cultures of China.

122A. Sacred Geography of China. *

An examination of the close relationship of religious traditions and the natural world in China, and its expression in visual representation. Particular emphasis on the ways in which competing groups sought to define or re-envision an understanding of the terrain. (Formerly course 154A.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): CC, A.) *R. Birnbaum*

122B. Constructing Lives in China: Biographies and Portraits. *

Consideration of biographies and portraits in China as representations of human types and individuals, and the use of these representations as models for constructing lives. Attention to historical and social contexts, early times to present. Special focus on Chinese Buddhist traditions. A previous course that focuses on traditional China or Buddhist studies strongly recommended. (Formerly course 155.) Enrollment limited to 35. (General Education Code(s): CC, A, E.) *R. Birnbaum*

122C. Writing in China. *

Examines material and conceptual phenomena of writing in Chinese visual culture. Focuses on the intersections of places and practices of writing through various inscribed sites, ranging from oracle bones, seals, and mountain facades to hand scrolls, architecture, and contemporary art. (Formerly course 159D.) Enrollment limited to 35. (General Education Code(s): A.) *The Staff*

122D. Chinese Landscape Painting. *

Examines the history and significance of the subjects most prominent in Chinese painting during the past one thousand years, focusing on the cultural factors that made landscape a fundamental value in the Chinese tradition and the methods whereby painters created pictorial equivalents. (Formerly course 159B.) Enrollment limited to 35. (General Education Code(s): IM, A.) *The Staff*

123. Visual Cultures of South Asia.

123A. Modernity and Nationalism in the Arts in India. F

Deals with artistic responses to the forces of modernity, colonialism, industrialization and globalization in India during the 19th and 20th centuries. Addresses the complex and often painful climb toward re-establishing a truly Indian artistic identity. (Formerly course 189D.) Enrollment limited to 35. (General Education Code(s): A, E.) *K. Thangavelu*

123B. Religions and Visual Culture of South Asia. *

South Asia is the home of many religions (Hinduism, Buddhism, Jainism, Islam, and Sikhism). Introduces the role images (painting, sculpture, architecture, photography, film) play in shaping these diverse reli-

gious traditions. (Formerly course 106A.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 80. (General Education Code(s): CC, A, E.) *B. Ly*

124. Visual Cultures of Southeast Asia.

124A. Arts of Ancient Southeast Asia. W

Focuses on Hindu and Buddhist arts of ancient Southeast Asia (Indonesia, Cambodia, Vietnam, and Thailand). Materials covered include indigenous megalithic arts, stone sculptures, and monumental temple architecture such as Angkor Wat, Borobudur, Prambanan, and the Bayon. Prerequisite(s): course 20, 24, 27, 122B, 123B, 124B, 124C, or 124D, or permission of instructor. Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): CC.) *B. Ly*

124B. History of Photography in Southeast Asia. *

Examines how photography was used in Southeast Asia to document the racial difference and the exotic "Others" under the regime of colonialism. Considers the role photography played in "documenting" the Vietnam-American War and how contemporary Southeast Asian-American artists challenge this photographic history in their art. Prerequisite(s): course 20, 24, 27, 123A, 124A, 124C, 124D, 141E, or 141F, or permission of instructor. Enrollment restricted to sophomores, juniors and seniors. (General Education Code(s): CC.) *B. Ly*

124C. Arts and Politics in Theravada Traditions. *

Consideration of the arts and architecture in Theravada Buddhist traditions in Sri Lanka and Southeast Asia. Topics and themes include ritual, relics, visual narrative, mural painting, contemporary art, mass-mediation movement, and political protest. (Formerly course 163B.) Prerequisite(s): course 20, 24, or 123B; enrollment restricted to juniors and seniors. Enrollment limited to 35. (General Education Code(s): CC, A.) *B. Ly*

124D. Contemporary Art of Southeast Asia and its Diaspora. *

Examines the respective national notions of modernity in the region through a comparative lens. How global capital flow and transnational cultural exchanges impact the production of arts of Southeast Asia and its diaspora. Themes and issues include: colonialism and art education; nationalism; identity politics; memory; trauma; gender; race; sexuality; and the body. Prerequisite(s): course 20, 24, 41, 43, 123B, 124A, 124B, 124C, 141A, 141B, 141C, 143B, 143C, or 143D. Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): CC.) *B. Ly*

127. Topics in Cross-Regional Studies in Visual Cultures of Asia.

127A. Buddhist Visual Worlds. F

Introduction to the study of Buddhist visual traditions, from their beginnings to the present day. Case studies examined with careful attention to historical, social and cultural contexts; particular emphasis on the relation of visual traditions to Buddhist practices. (Formerly course 114.) Enrollment restricted to sophomore, junior, and senior students. (General Education Code(s): IM, A.) *R. Birnbaum*

127B. Buddhist Pure Lands. S

Conceptions of "pure lands" have engaged the imaginations of Mahayana Buddhists for more than two

millennia. Course considers literary and visual representations of pure lands and their inhabitants, as well as related practice traditions. Special emphasis on Chinese traditions. Previous courses in Asian visual cultures and/or Buddhist studies recommended. (Formerly course 154D.) Enrollment limited to 35. (General Education Code(s): CC, A.) *R. Birnbaum*

127C. Ritual in Asian Religious Art. *

Examination of interaction between image and ritual in Asian religious art. Case studies from different historical periods and geographical locations (e.g., China, Tibet, Japan, Indonesia, India). Examples include mandalas, ritual bronzes, tankas, sacred caves, temples, tea ceremonies, and calligraphy. (Formerly course 105E.) (General Education Code(s): IM, A, E.) *The Staff*

127D. Storytelling in Asian Art. *

Combination of theoretical perspectives on narrative from literary criticism, rhetoric, folklore, and film theory with art historical focus on images (cave temples, stone reliefs on stupas, scrolls, dance-drama, etc.) from India, Pakistan, China, Japan, Cambodia, and Indonesia. (Formerly course 160.) Enrollment limited to 35. (General Education Code(s): A, E.) *The Staff*

Europe and the Americas

135. History of Art and Visual Culture in Europe.

135B. German Art, 1905–1945. F

Expressionism, agitprop, the Bauhaus, New Objectivity, attacks on modernism, National Socialist realism. Painting, sculpture, graphic art, and some architecture and film, studied in the context of political events from the eve of World War I to the end of World War II. (Formerly course 136.) (General Education Code(s): IM, A.) *D. Hunter*

135D. French Painting, 1780-1855. *

The art of David, Gros, Ingres, Gericault, Delacroix, the Barbizon School, and Courbet studied in relation to the changing status of the art and the political events from 1789 to 1848. Second in a series of three courses on French art and its historical context. See courses 135C and 141A. (Formerly course 177.) Enrollment limited to 35. (General Education Code(s): IM, A.) *D. Hunter*

135E. Jewish Identity and Visual Representation. *

An exploration of the theoretical and practical or experiential applications of Jewish identity in European visual representation. Brief background on pre-emanicipation textual and cultural issues followed by study of the Jewish subject and Jewish subjectivities in modernity. (Formerly course 172.) Enrollment restricted to juniors and seniors. Enrollment limited to 35. (General Education Code(s): IM, A, E.) *The Staff*

135F. History of the Book. *

History of book production and use in the West from antiquity to modern times. Development from roll to codex and from script to print. Emphasis on the relationship between text and image. Class conducted in Special Collections, McHenry. Exhibition as class project. (Formerly course 153.) Enrollment limited to 25. (General Education Code(s): A.) *E. Remak-Honnef*

137. Renaissance.

137A. Northern Renaissance Art. *

Considers the painting and prints produced in North-

ern Europe in the 15th and 16th centuries. Major issues include the status of realism and classicism, the role of religion and religious reform, and the rise of popular imagery. (Formerly course 105R.) (General Education Code(s): A.) *The Staff*

137B. Italian Renaissance: Representation and Institutions. *

Lives of Italian Renaissance people from birth to death, examining the nature and roles of the institutions which defined human existence in this period. Uses visual arts both illustratively and to study how institutions fashioned their images through art and architecture. (Formerly course 115.) (General Education Code(s): IM, A.) *The Staff*

137C. High Renaissance. *

An investigation of the High Renaissance as a period and stylistic concept, using the major artists and monuments of the period 1480–1525 to discuss issues of theory, history, and art. Artists considered include Leonardo da Vinci, Michelangelo, and Raphael. (Formerly course 168.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): IM, A.) *The Staff*

137D. Art of the Venetian Renaissance. *

Considers Venetian art in the 15th and 16th centuries. Topics include major artists (the Bellini, Carpaccio, Titian, Tintoretto, Veronese, Palladio) and the relationship of the city to outside forces (Byzantine Empire, Turkish Empires) and other Italian cities. (Formerly course 189V.) Enrollment limited to 35. (General Education Code(s): IM, A.) *The Staff*

137E. Renaissance Prints. *

Examines the issues surrounding the technology and uses of printed images from the early Renaissance through the end of the early modern period. Topics may include the political, religious, and satirical uses of prints and the representation of women in prints. (General Education Code(s): IM, A.) *The Staff*

140. History of Art and Visual Culture in the U.S.

140A. America in Art. *

Introduction to American visual arts: architecture, painting, photography, sculpture, and performance art, from the nineteenth through the twenty-first century. Explore social and political meanings of art and what art reveals about our nation's values and beliefs, in particular, gender and race. (Formerly course 126.) (General Education Code(s): IM, A.) *M. Berger*

140B. Victorian America. *

Examines how American writers and artists negotiated complexities of U.S. society during the 19th century. Emphasis on issues ranging from women's rights to laissez-faire capitalism, and from Reconstruction to manifest destiny. Considers how the era's cultural products provided artists, patrons, and audiences with metaphorical coping strategies to counteract what Victorians perceived to be the period's overwhelming social and political changes. (Formerly course 178A.) Enrollment limited to 35. (General Education Code(s): IM, A.) *M. Berger*

140C. Race and American Visual Arts. S

Investigation of the role played by visual arts in fashioning racial identities of European-Americans, African Americans, Native Americans, and Latinos in the United States. (Formerly course 156.) Enrollment limited to 35. (General Education Code(s): ER, A, E.) *M. Berger*

140D. Chicano/Chicana Art: 1970–Present.*

Taking the terms “Chicano” and “Chicana” as a critical framework, addresses cultural and conceptual themes in visual art production since 1970. Questions concerning aesthetics, identity, gender, and activism in painting, photography, murals, and installation art explored. (Formerly course 182.) (General Education Code(s): ER, A, E.) *J. González*

141. Modern Art and Visual Culture in Europe and the Americas.**141A. Impressionism to Pop Art: Art in Modern Culture.***

Critical reading of modernism as a high art tradition. Emphasis on context: culture of capitalism, shift in power from Europe to the U.S., role of gender and race, and the aesthetic as either apolitical refuge or site of disruption and critique. Third in a sequence of three courses on French art and its historical context; see courses 135C and 135D. (Formerly course 137.) (General Education Code(s): IM, A.) *The Staff*

141B. Surrealism to Postmodernism.*

From Paris to New York, World War II to Vietnam, consumerism to conceptualism, an introduction to visual arts and theories of representation produced in the U.S. and Western Europe between 1930 and 1990, with attention to the social and political role of the art market, criticism, and censorship. (Formerly course 140, Surrealism to Postmodernism, Paris-New York.) (General Education Code(s): IM, A.) *J. González*

141C. Activist Art Since 1960: Art, Technology, Activism.*

Students explore art and technology produced for social change since 1960 within the context of major historical ruptures, such as the Vietnam War, the women’s movement, environmental protection, AIDS activism, anti-capitalist, and international human rights movements. (Formerly course 142.) (General Education Code(s): IM, A, E.) *The Staff*

141E. Histories of Photography.*

Introduction to the histories of photography and the critical debates around different photographic genres such as medical photography, art photography, and political photography. Students will develop a critical language in order to analyze photographs while considering the importance of social and institutional contexts. (Formerly course 149A.) (General Education Code(s): IM, A.) *J. González*

141F. The Camera and the Body.*

Through the study of historical and contemporary visual texts (from ethnography and portraiture to advertising and erotica), this course explores how photographic images of the body, while masquerading as “natural,” “self-evident,” or “scientific,” participate in highly coded sign systems that influence who looks at whom, how, when, and why. (Formerly course 180.) Enrollment limited to 35. (General Education Code(s): IM, A.) *J. González*

141H. Media History and Theory.*

An introductory examination of the writing about the issue of “medium” and media theory in visual culture. Technologies, discourses, and practices from all periods that use the comparison of media as a major approach to understanding the problems of the visual are highlighted. New media, film, television, video, traditional arts are also treated. (Formerly course 131.) (General Education Code(s): IM, A.) *The Staff*

141I. Environments, Installations, and Sites.*

A study of conceptual and formal issues that have informed the production of temporary, site-specific art works since 1960. Works that seek to transform the role of the audience, to escape or remake museum and gallery spaces, to introduce environmental concerns, or to situate art in “the land” or in “the street” serve as a focus. (Formerly course 181.) Enrollment limited to 35. (General Education Code(s): IM, A.) *J. González*

141M. Museum Practices. W

How are museums organized, categorized, visited? How are objects physically handled, documented, and displayed? Going beyond the practical, course interrogates the concepts that practice is based on and the impact these concepts have on society and culture in the United States. Prerequisite(s): course 40 or by permission of instructor. Enrollment restricted to History of Art and Visual Culture majors and minors. Enrollment limited to 35. *E. Cameron*

143. Architecture.**143A. Contemporary Architecture and Critical Debates.***

Examination of practitioners, projects, issues, and theories in contemporary architecture circa 1968 to the present. Topics include the architecture of aftermath, the ethics of memory and memorialization, the corporatization of museums, the role of criticism and exhibitions, and the cult of the brand-name architect. (Formerly course 124.) (General Education Code(s): IM, A.) *The Staff*

143B. History of Urban Design. F

Examines urban design from the Renaissance to the present, including Latin American colonial cities, Utopian plans, and sites such as Brasilia and Chandigarh. The course focuses on social justice, diversity, and the role of art and architecture. Enrollment restricted to juniors and seniors. (General Education Code(s): IM.) *D. Sandler*

143C. Latin American Modern Architecture.*

Presents Latin America’s modern architecture with relation to colonization; the influence of immigrants from Europe, Africa, and Asia; the presence of indigenous cultures; and the search for autonomy. Case studies include Argentina, Brazil, Chile, Mexico, Venezuela, and Uruguay. (General Education Code(s): A, E.) *D. Sandler*

143D. Architecture and the City in Modern and Contemporary Visual Culture.*

Examines the modern and contemporary depictions of cities in visual and material culture, from paintings and photographs to logotypes and souvenirs. Also examines the roles of narrative in spatial representations, including literature, film, and television productions. Enrollment restricted to juniors and seniors. (General Education Code(s): IM.) *D. Sandler*

The Mediterranean**151. Greek Myths Antiquity to the Present.***

Myths dominated the culture and visual production of the ancient Greek world, and their presence is still strong today. How did they codify social, political, and religious realities and needs? How were they perceived in different time periods? In addition to ancient Greek and Roman and later European sculptures and paintings, this course considers less conventional sources, such as modern films, comics, and advertisements. Course 51 recommended

as preparation.. (Formerly course 106I, *Myth in Greek and Roman Art*.) (General Education Code(s): IM, A.) *M. Evangelatou*

153. The Mediterranean from the Rise of Christianity to the Rise of Islam. F

The use of images in the transition from polytheism to Christianity and from the late Roman to the early Byzantine Empire (3rd-7th Centuries, C.E.). Examines visual culture at the intersection of historical, social, political, and religious developments. Course 51 or 151 recommended as preparation. (Formerly course 163A, *Early Medieval Visual Culture: The Mediterranean*.) Enrollment restricted to sophomores, juniors, and seniors; other students should contact instructor. One quarter of a 10-series course or a course in ancient or medieval culture is recommended as preparation. Enrollment limited to 35. (General Education Code(s): IM, A.) *M. Evangelatou*

154. Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C.. F

Centered on the capital city of Constantinople (modern Istanbul), the Hellenized and Christianized Roman Empire of the Eastern Mediterranean today known as Byzantium played a major, yet often overlooked, role in European history for more than a millennium. This course examines its visual production and relation to politics and religion in court and church ceremonial, expressions of Christian faith, and cultural interactions with Western Europe, Islam, and the Slavic world. (Formerly course 104A, *Byzantine Visual Culture: Politics and Religion in New Rome, 300-1453 A. D.*) (General Education Code(s): IM, A.) *The Staff*

Native Americas**160. Topics in Pre-Hispanic Visual Culture.****160A. Mexico.***

Art and architecture of selected pre-Hispanic cultures from the gulf coast, central, western, and southern Mexico including the Olmec, Zapotec, Toltec, Mixtec, Mexica (Aztec), and others. (Formerly course 110A.) Offered in alternate academic years. (General Education Code(s): IM, A.) *C. Dean*

160B. The Andes. F

The art of selected pre-hispanic cultures of Colombia, Ecuador, Peru, and Bolivia including the Nazca, Moche, Chimú, and Inca. (Formerly course 110B.) (General Education Code(s): IM, A.) *The Staff*

162. Advanced Studies in Pre-Hispanic Visual Culture.**162A. The Maya. S**

The art and architecture of the Maya of southern Mesoamerica from the first century C.E. to ca. 1500. Courses 80, 60, or 160A recommended as preparation. (Formerly course 150A) Enrollment limited to 35. (General Education Code(s): CC, A.) *C. Dean*

162B. The Inka.*

The visual culture of the Inka of the Andean region of western South America including textiles, metalwork, and the built environment. Courses 80 (formerly 10E) or 60 (formerly 80M) recommended as preparation. (General Education Code(s): CC.) *C. Dean*

163. The Native in Colonial Spanish America.* Indigenous contributions to colonial Spanish American visual culture including architecture, manuscripts, sculpture, painting, textiles, feather-work, and metallurgy. Focus on colonial Mexico, the Andes, and California.

(Formerly course 151A.) Enrollment limited to 35. (General Education Code(s): A, E.) *C. Dean*

Oceania and its Diaspora

170. Art of the Body in Oceania. F

Explores "art of the body," defined broadly, from various perspectives. Examines colonial representations of Oceanic bodies, self-representation through bodily adornment and display (including tattoo, scarification, body painting, ornament, and dress), and bodily metaphors in Oceanic visual cultures. (Formerly course 80T.) (General Education Code(s): ER, A, E.) *S. Kamehiro*

172. Textile Traditions of Oceania. W

Investigates how textiles contribute to cultural fabric of Oceania. Explores women's roles in socioeconomic exchanges and cultural production; gender issues regarding production and function of Oceanic textiles; and history of processes, functions, and aesthetics. (Formerly course 187A.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Prior coursework related to Oceania recommended. Enrollment restricted to juniors and seniors or by permission of instructor. Enrollment limited to 25. (General Education Code(s): CC, W, A, E.) *S. Kamehiro*

Topics and Cross-Regional Studies in History of Art and Visual Culture

180. Gardens of Delight: Fifteen Centuries of Islamic Visual Culture. W

Examines some of the most representative creations of Islamic visual culture from the 7th Century to the present in order to appreciate the richness of this tradition and its extensive influence on other cultures. Focuses on the social, political, and religious role of a variety of materials, from mosques, palaces, and gardens to visual narratives, ceremonies, dance, and contemporary films. (Formerly course 139, *The Art and Architecture of Islam*.) (General Education Code(s): CC, A, E.) *M. Evangelatou*

190. Seminars in the History of Art and Visual Culture.

190A. African Art and Visual Culture. *

Advanced seminar requiring intensive research and writing on changing topics related to a specific area of African art and/or visual culture chosen to demonstrate critical mastery of this subject. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191O.) Prerequisite(s): courses 100A, and 80 or 10. Enrollment restricted to juniors and seniors majoring or minoring in history of art and visual culture. Enrollment limited to 18. May be repeated for credit. (General Education Code(s): A, E.) *E. Cameron*

190B. Play and Ritual in Visual Cultures. *

Compares how play and ritual construct worlds and regulate visual cultures—from dolls to "ritual" objects and performances. Attention given to areas where play and ritual overlap and the visual cultures that result. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191F.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A, E.) *E. Cameron*

190D. The World of the Lotus Sutra. *

Close study of the principal text of East Asian Buddhism as a self-enclosed vision of reality, with careful consideration of the forms and functions of the

world of visual and aural representation that it has inspired. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A and course 127A or permission of instructor. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190E. Huayan Visions. *

Explores the distinctive conceptual world of the Buddhist *Huayanjing* (*Avatamsaka-sutra*) and its expression in visual forms. This long text, composed in Sanskrit and later translated into Chinese, is a principal scripture of the international Mahayana Buddhist traditions of Asia. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190I.) Prerequisite(s): course 100A; course 127A, an upper-division course in Buddhist studies is recommended, or permission of the instructor. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190F. Chan Texts and Images. *

Examines selected issues in history of Chan (Zen) Buddhist traditions in China from medieval times to the present day. Concepts, methods, and visual expression of Chan practice situated through study of texts and visual materials. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191H.) Prerequisite(s): course 100A, and course 127A or permission of instructor. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190G. Buddhist Wisdom Traditions. W

Careful study of Mahayana Buddhist perfection-of-wisdom traditions—texts and related material culture, including visual imagery and illustrated books—with focus on the particular vision of reality that they aim to produce or reveal. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191Z.) Prerequisite(s): courses 100A and 127A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *R. Birnbaum*

190J. Visual Cultures of the Vietnam-American War. *

Examines the visual culture of the Vietnam-American war and its legacy in contemporary art of Southeast Asia. Considers representations in different media: painting, drawing, photography, film, novels, and material cultures. Issues addressed include memory, trauma, identity politics, body, race, gender, pornography, and prostitution. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191A.) Prerequisite(s): course 100A; and one of the following or permission of instructor: course 20,24,123B, 124A, 124B, 124C, or 124D. Enrollment restricted to junior and senior history of art and visual culture majors. Enrollment limited to 18. (General Education Code(s): ER, A, E.) *B. Ly*

190K. Thematic Approach to Visual Cultures of Southeast Asia. *

Undergraduate seminar that takes topical and thematic approach to looking at ancient or modern and contemporary arts of Southeast Asia (e.g., textile, water in arts and architecture, comparative modernity, race, gender, and sexuality). The specific topic and theme varies from year to year. This course can be taken for senior exit credit only by permission of the instructor.

Prerequisite(s): course 100A; and one of the following or permission of instructor: course 20,24,123B, 124A, 124B, 124C, or 124D. Enrollment restricted to junior and senior history of art and visual culture majors. Enrollment limited to 18. *B. Ly*

190M. Representations of Women in Indian Art. *

Deals with representations of the female divinity in Indian religious imagery, and of women in secular and courtly paintings. Also examines roles women play in the production of art in the Indian subcontinent. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190U.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A, E.) *K. Thangavelu*

190O. Berlin: History and the Built Environment. *

Explores Berlin's urban and architectural history through themes: the meaning of memory in architecture; the political and cultural implications of preservation, globalization, and tourism. Because these questions are relevant beyond Berlin, course draws comparisons with other cities. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *D. Sandler*

190P. Death and Patriotism: The Case of the French Revolution. *

What are the relations between the mortal body and politics in times of crisis? What purposes can death, or the threat of death, serve? Examines representations of executions, assassinations, and funerals during the French Revolution, with an emphasis on the Terror. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *D. Hunter*

190Q. Portraiture: Europe and America, 1400–1990. S

Western portraiture and self-portraiture at certain key moments (early modern Italy, 16th-century Germany, 17th-century Holland, France from the reign of Louis XIV to the Revolution, contemporary U.S.) are explored by reading 20th-century interpretations and some primary sources. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A. Enrollment limited to 18. (General Education Code(s): A.) *D. Hunter*

190R. The Life/Sculpture of Gianlorenzo Bernini, Master of the Roman Baroque. *

Sculptures, performances, and art theory of Roman Baroque artist Gianlorenzo Bernini. Early modern sources on Bernini's life and recent art history used to assess issues in cultural theory: embodiment, performance/performativity, visual and textual genres, space/time in sculpture. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191B.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

190T. Topics in Pre- and Post-Columbian Visual Culture. F

Seminar on changing topics related to the current scholarship on pre-Hispanic and colonial Spanish American visual culture. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors. Juniors and seniors from other majors may enroll with permission of the instructor. Enrollment limited to 18. *The Staff*

190U. Word and Image in Illuminated Byzantine Manuscripts. *

Religious, scientific, and secular manuscripts of Byzantium: examines how words and images interacted to express and promote central concepts of Byzantine culture; serve liturgical needs of private devotion; reflect imperial ideals; diffuse moral values and knowledge; and proclaim social status and cultural affiliations. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190R.) Prerequisite(s): course 100A, and course 154 or permission of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): A.) *M. Evangelatou*

190V. Cult of Mary in Byzantium. W

Why did the cult of the Virgin Mary become so important in Byzantine culture? Examines historical, cultural, theological, political, and social reasons for this development, seen through the interaction of Byzantine visual culture and literature. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191X.) Prerequisite(s): courses 100A and 154. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *M. Evangelatou*

190W. Art and Culture Contact in Oceania. F

Examines impact of culture contact on Oceanic and Euro-American visual cultures in context of "discovery," colonialism, and "postcolonialism." Topics include 18th-century visual culture, colonial identities, primitivism, syncretism, impact of Christianity, contemporary art/market, media, tourism, transnationalism, and globalization. Course can be taken for senior exit credit only by permission of instructor. (Formerly course 190O.) Prerequisite(s): course 100A; prior course work related to Oceania recommended. Enrollment restricted to junior and senior history of art and visual culture majors and minors, or by instructor permission. Enrollment limited to 18. (General Education Code(s): A, E.) *S. Kamehiro*

190X. Art and Identity in Oceania. *

Theoretical discussions and Pacific Basin case studies on 1) definitions of cultural, ethnic, and national identities; 2) relationship between art, museums, and construction of historical and cultural narratives; 3) ways "tradition" defined in art practices and used by groups to assert an identity in their present. Participants first develop a theoretical framework and vocabulary for analyzing artistic production in a variety of cultures. Through specific case studies, will explore how art, architecture, and museums actively contribute to define and challenge ethnic and national identities. Course can be taken for senior exit credit only by permission of instructor. (Formerly course 191P, Art and Identity in the Pacific: Creating and Challenging Ethnic and National Identities.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior his-

tory of art and visual culture majors, or by permission. Enrollment limited to 18. (General Education Code(s): ER, A, E.) *S. Kamehiro*

191. Seminars in the History of Art and Visual Culture.**191A. Iconoclasm. ***

What happens when, to control an object, it is destroyed? Examines destruction of art as a way of ending the object's life cycle, as a device of social tension/change, and as a colonial and post-colonial mechanism of religious/political control. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 191C.) Prerequisite(s): course 100A; and course 80 or permission of instructor. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A, E.) *E. Cameron*

191B. The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S. F

Focus on the histories of miraculous images of *La Virgen de Guadalupe de Extremadura* (Spain) and *La Virgen de Guadalupe de Tepeyac* (Mexico). The foundations and growth of the cult of the Mexican Guadalupe during the colonial period is examined along with the multivalent symbolism of her image. Considers contemporary "appearances" of the Virgin of Guadalupe, from the miraculous images on a tree in central California and the compositions of Chicano artists, to mass-produced kitsch. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190B.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A, E.) *C. Dean*

191C. Subalternatives: Representing Others. *

Explores how visual representation (in fine art, popular art, film, and television) encodes difference in selected cultural and historical contexts. Considers (post)colonial image-making both as a strategy of domination as well as resistance. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190C.) Prerequisite(s): course 100A. Enrollment restricted to juniors and seniors. Enrollment limited to 18. (General Education Code(s): ER, A, E.) *C. Dean*

191D. Semiotics and Visual Culture. *

How can visual culture be understood as the production, circulation, and recirculation of signs? This course offers a history of semiotics and its methodological application in the analysis of images in popular culture and within the discipline of art history. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190S.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior students. Enrollment limited to 18. (General Education Code(s): A.) *J. González*

191E. Feminist Theory and Art Production. *

A close reading of works of art and theoretical texts by feminists working from 1970 to the present. The course encourages debate around the past, present, and future relevance of feminist theories to visual cultural studies, paying particular attention to issues of cultural and ethnic difference. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190T.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and mi-

nors. Enrollment limited to 18. (General Education Code(s): A.) *J. González*

191F. Image and Gender. *

Examines what visual representations (feminine and masculine) reveal of gender in 19th- and 20th-century European and American culture; how images reflect norms of gender; and how we are conditioned to read images in gendered terms. Explores how femininity and masculinity were conceived during historical periods and how gender ideals changed in response to social, political, and economic pressures. Students encouraged to consider the fluid nature of 21st-century notions of ideal femininity and masculinity and possible alternatives. This course can be taken for senior exit credit only by permission of the instructor. (Formerly course 190Y.) Prerequisite(s): course 100A. Enrollment restricted to junior and senior history of art and visual culture majors and minors. Enrollment limited to 18. (General Education Code(s): A.) *M. Berger*

191H. History and Theories of Architectural Preservation. S

Examines the meanings of architectural preservation with relation to memory, identity, tourism, gentrification, and urban disasters. Combines the study of theories and concepts of preservation with examples of buildings and urban sites from the whole world. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 100A; and one of the following or permission of instructor: course 43, 143B, 143C, or 143D. Enrollment restricted to junior and senior history of art and visual culture majors. Enrollment limited to 18. *D. Sandler*

191M. Museum Exhibitions. S

Class creates and installs an exhibition. Students take the roles of museum departments, moving the project from concept to installation. The impact exhibitions make in culture and society will be examined throughout each step of the process. This course can be taken for senior exit credit only by permission of the instructor. Prerequisite(s): course 141M. Enrollment restricted to junior and senior history of art and visual culture majors. Enrollment limited to 18. *E. Cameron*

195. Senior Thesis. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Independent field study away from the campus. Students submit petition to sponsoring agency. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Independent field study away from the campus. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses**201. Introduction to Visual Studies. F**

Introduces the visual studies discipline and the History of

Art and Visual Culture Department, providing students with an overview of the field's development, its issues of central concern, and its dominant research methods. Features intensive readings, student-led discussions, and exposure to some of the primary texts instrumental in the development of the field. Required seminar for all first-year visual studies graduate students. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Berger*

202. Critical Theory. W

Builds on the foundation established by course 201. Offers more detailed theoretical readings to familiarize students with the methodological frameworks and debates that laid the groundwork for the field as well as those that have proven productive for practitioners of visual studies. Prerequisite(s): course 201. Enrollment restricted to graduate students. Enrollment limited to 15. *J. González*

203. Theories and Histories of Seeing. S

Provides an in-depth case study of the visual practices and culture of a specific society. Builds on the foundation established by courses 201 and 202, offering sustained application of the general methods and theories to which students were previously introduced. The society under consideration rotates each year depending on the research interest of the faculty member teaching the course in any given spring. Prerequisite(s): courses 201 and 202. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *R. Birnbaum*

212. Yoruba Visualities and Aesthetics. *

Yoruba conceptions of visibility are explored and compared to seeing through Western eyes. Critical reading focuses on Western and Yoruba scholars' work on visualities and complementary theoretical writings on Yoruba aesthetics and philosophy. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Cameron*

222. The Image of Arhat in China. *

Indian Buddhist sage-monks (arhats) are portrayed in China in ways that represent a remarkable variety of visual/historical/practice traditions. This seminar examines these depictions and explores the ranges of means and functions attached to this theme. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Birnbaum*

224. Seeing Race. *

Investigates how discursive systems racialized the sight of various racial and ethnic groups in 19th- and 20th-century U.S. society. Focuses on the construction and maintenance of racial values systems and on the historically specific ways in which an eclectic assortment of visual artifacts have been read by groups over time. Considers the visual and material implications of race-based sight. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Berger*

232. The Monument Since 1750 in Relation to Nationhood and the Experience of War. W

Investigates modern monuments (1750 to present) and the creation or maintenance of a nation, especially in terms of war and its immediate aftermath. Destruction or alteration of monuments and production of anti- or counter-monuments are also examined. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Hunter*

240. Engaged Buddhism and Visual Culture. S

Begins with an analysis of photography and films capturing the Gandhian and Dalit movement in India. Students then read key Buddhist texts on engaged Buddhism, and look at the rise of engaged Buddhism in Southeast Asia in the 1960s and how it impacted modern and contemporary art in Southeast Asia and its diaspora. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Ly*

243. Alternative Architecture. F

Focuses on what is commonly left out of architectural history: the ephemeral, informal, illegal, and uncertain. Topics include: anonymous and collective architecture; temporary interventions; everyday urbanism; and vestigial urban spaces. These topics are understood through theories of space as socially produced (Henri Lefebvre, Michel de Certeau, among others), and through cultural movements and manifestoes (Situationist International, Aesthetics of Hunger, etc.) Enrollment restricted to graduate students. Enrollment limited to 15. *D. Sandler*

245. Race and Representation. *

Explores how human subjects come to be visually defined and marked by "race" discourse. Covers diverse theoretical literatures on the topic, primarily in visual studies, but also in cultural studies, post-colonial studies, and psychoanalysis. Enrollment restricted to graduate students. Enrollment limited to 15. *J. González*

250. The Cult of Mary in Byzantium. *

Why did the cult of the Virgin Mary become so important in Byzantine culture? Students examine historical, cultural, theological, political, and social reasons for this development seen through the interaction of Byzantine visual culture and literature. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Evangelatou*

260. Visual Literacy in Spanish America, 1500-1800. *

Visual literacy is considered as a particular predicament of colonial societies. Students consider the legibility of artifacts in colonial Spanish American contexts given its culturally diverse audiences and examine specific instances of (mis)interpreted images and transcultured representations. Enrollment restricted to graduate students. Enrollment limited to 15. *C. Dean*

270. Colonial Cultures of Collecting and Display. *

Examines collections and exhibitions of colonized people, places, and objects through primary sources, theoretical texts, and analytical case studies (with some emphasis on Oceania). Focuses on visual discourses of race, science, religious conversion, colonial settlement, nation-building, education, and entertainment. Enrollment restricted to graduate students. Enrollment limited to 15. *S. Kamehiro*

294. Teaching-Related Independent Study.

F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study or research for graduate students. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research.

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

History of Consciousness

415 Humanities 1
(831) 459-2757
<http://histcon.usc.edu/>

Faculty and Professional Interests

GOPAL BALAKRISHNAN, Associate Professor of History of Consciousness

Classics of political thought from Plato to Rousseau, early modern and modern European intellectual history, historical sociology, the history and future of capitalism, nationalism

JAMES T. CLIFFORD, Professor Emeritus of History of Consciousness

History of anthropology, travel, and exoticism; transnational cultural studies, museum studies, indigenous studies

ANGELA Y. DAVIS, Professor Emerita of History of Consciousness and Feminist Studies

TERESA DE LAURETIS, Professor Emerita of History of Consciousness, Literature, and Film and Digital Media

BARBARA L. EPSTEIN, Professor of History of Consciousness

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

DONNA J. HARAWAY, Professor of History of Consciousness and Feminist Studies

Feminist theory, cultural and historical studies of science and technology, relation of life and human sciences, human-animal relations, and animal studies

DAVID S. MARRIOTT, Professor of History of Consciousness

Literary theory, psychoanalysis, black cultural theory and philosophies of race, literary and visual cultures of modernism

VICTOR BURGIN, Professor Emeritus of History of Consciousness

Hayden White, Professor Emeritus of History of Consciousness

Extended Department Faculty

JOHN BROWN CHILDS, Professor of Sociology

Ethnic conflict and transcommunal cooperation; sociology of knowledge; African American, Native American, Latino interactions

MICHAEL H. COWAN, Professor of American Studies

American cultural theory and history, history of American studies, symbolic expression in American life, urban cultural studies, American literary studies, studies in the institutional culture of higher education

GINA DENT, Associate Professor of Feminist Studies, History of Consciousness, and Legal Studies

Africana literary and cultural studies, legal theory, popular culture

SHELLY ERRINGTON, Professor of Anthropology

Globalization of folk art, visual and social semiotics, photography, film, the Internet and digital media, Southeast Asia, and Latin America

CARLA FRECCERO, Distinguished Professor of French Literature and Feminist Studies

Renaissance studies, French and Italian language and literature, early modern studies, postcolonial theories and literature, contemporary feminist theories and politics, queer theory, U.S. popular culture

HERMAN S. GRAY, Professor of Sociology

Cultural studies, media and television studies, black cultural politics, social theory

SUSAN HARDING, Professor of Anthropology

Culture, politics, narrative, gender, local/global studies,

ethnographic writing, fundamentalism, Christianity, state-making, aging, America, and Spain

DAVID C. HOY, Professor of Philosophy
Kant, Hegel, Nietzsche, Heidegger, Derrida, Foucault, phenomenology, poststructuralism, and contemporary European philosophy

ROBERT L. MEISTER, Professor of Politics
Political and moral philosophy, law and social theory, Marxian theory, institutional analysis, antidiscrimination law

HELENE MOGLEN, Professor Emerita of Literature and Feminist Studies

TRILOKI NATH PANDEY, Professor of Anthropology
Native peoples of North America, cultures of India, political anthropology, anthropological theories and comparisons; native North America; tribal India; Nepal

ANDREW SZASZ, Professor of Sociology
Environmental sociology (environmental movements, policy, environmental justice); theory

RICHARD TERDIMAN, Professor of Literature
Nineteenth- and 20th-century French and European literature and culture, literary and cultural theory, contemporary critical theory, cultural globalization

ANNA TSING, Professor of Anthropology
Culture and politics, feminist theory and gender in the U.S., social landscapes and tropical forest ethnoecologies, ethnicity, local power and relations to the state in Indonesia, Southeast Asia, and the U.S.

PATRICIA ZAVELLA, Professor of Latin American and Latino Studies
Relationship between women's work and domestic labor, poverty, family, sexuality and social networks, feminist studies, ethnographic research methods, and transnational migration of Mexican/la workers and U.S. capital

Program Description

History of consciousness is an interdisciplinary graduate program centered in the humanities, with links to the social sciences, physical and biological sciences, and arts. It is concerned with forms of human expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

Over more than 30 years of existence, the history of consciousness program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are influential scholars at prominent universities, and dissertations have been published by major publishing houses and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

History of consciousness emphasizes a variety of topics in its seminars and research pursuits. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of consciousness has strong cooperative relations with associated faculty from other campus programs, scholars who offer seminars and participate in advising, qualifying exams, and thesis committees. Within the limits of seminar size and faculty time, cross-disciplinary work in graduate courses offered by other departments is encouraged. The formal list of associated faculty is a non-exhaustive indication of advising possibilities beyond the program's core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Institute for Humanities Research, the Institute of Advanced Feminist Research, and the Chicano/Latino Research Center, also provide venues for collaborative work.

Requirements

Students are required to enroll in a minimum of two courses per quarter until advancement to candidacy (normally achieved no later than the fourth year).

Incoming students are required to take a minimum of five history of consciousness graduate seminars during the first two years. In the first year, students are required to take the introductory seminar, course 203A, *Approaches to History of Consciousness*. In the course of the first year, students must also take a writing intensive "B" seminar, either 203B, *Approaches*, or a "B" seminar following another seminar the student has taken. By the end of the first year, students are expected to complete a full seminar paper. Unless an exception is approved by the Director of Graduate Studies, "B" courses do not count toward the five seminars selected to fulfill the basic department requirement. The remainder of the courses taken to fulfill university enrollment requirements may include not only history of consciousness seminars but also independent study with specific faculty or graduate seminars offered in other departments.

Additional requirements for the doctor of philosophy (Ph.D.) vary with individual disciplinary and interdisciplinary needs and are determined in consultation with relevant faculty and the chair of the program.

Advancement to candidacy depends on the general quality of a student's work; demonstration of proficiency in a foreign language relevant to the student's area of work, either by passing a written exam administered by the department or successfully completing a language course approved by the department; success in the qualifying exam; and proposal of an acceptable thesis topic. The qualifying examination is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The exam focuses on the student's research project and on the fields of scholarship it presupposes.

After advancement to candidacy, required by the end of the fourth year, students concentrate on the writing of the dissertation. The current normative time to degree limit of seven years means that a student usually has at least three years after advancement to candidacy for completion of the dissertation.

Students also have the option of doing advanced work in a traditional discipline and receiving a parenthetical degree notation of this specialization. In such cases, students must satisfy the appropriate department's

criteria. Currently such degree notations may be negotiated with American studies, anthropology, literature, philosophy, sociology, and feminist studies. Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Applications

The deadline for applications to the History of Consciousness program is December 1 of each year. Admissions information and application materials are available online at graddiv.ucsc.edu.

Applications are invited from students with backgrounds and interests in the humanities and social sciences and are especially encouraged from individuals with a clear idea of the project they wish to undertake. Strong preference is given to applicants working in areas for which the faculty resources in history of consciousness are appropriate and available. Graduate Record Examination (GRE) scores are required as is a writing sample of no more than 10 pages.

Admission is for the fall quarter only.

It is important to note that in light of California's elimination of affirmative action as an admissions criterion, the history of consciousness department reaffirms its commitment to the principles of affirmative action. These principles mean a commitment to diversity, equal opportunity, and outreach to underrepresented communities. Further, this commitment underlines our understanding that the very fabric and quality of our scholarship depends on the representation and interplay of diverse experience and perspectives. So defined, affirmative action is reflected in every aspect of the history of consciousness program, including scholarship, teaching, admissions, hiring, and the process of departmental governance.

Lower-Division Courses

80A. Culture and Ideology in the 20th Century. *

A survey of the principle ideological issues of the 20th century—attitudes toward sex, race, class, work, violence, and knowledge—viewed from the perspective of structuralist and semiological theories of culture. (General Education Code(s): T4-Humanities and Arts.) *A. Davis*

80B. Constructions of the Exotic. *

Analyzes ethnographic and auto-ethnographic representations of non-Western peoples. Films, video, ethnographies, novels, and journalism are considered, paying attention to specific histories of colonial and postcolonial contact which influence images of "culture" and "identity." (General Education Code(s): T4-Humanities and Arts.) *J. Clifford*

80C. Social Movements of the 1930s and 1960s in the U.S.. W

Examines the rise of a mass movement of the left in the U.S. during the 1930s, in the context of economic depression and the growing international threat of fascism. (Formerly "The 1930s Depression and Radicalism in the U.S.") (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *B. Epstein*

80H. Marxism. *

Advanced introduction to the main currents of Marxism from the 19th century to the present. Lectures and discussion address Marx's conceptions of capitalism, later attempts to theorize the political, and philosophical and aesthetic consequences of this critique. (General Education Code(s): T4-Humanities and Arts.) *G. Balakrishnan*

80J. Social Movements in the U.S.. *

Traces the history of social movements in the late 19th- and 20th-century U.S., including populism,

labor, socialism, Communism, the New Left, civil rights, feminism. Looks at the relationship between cultures of protest and mainstream popular and political cultures. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *B. Epstein*

80K. God's Economy: Capitalism, Faith, and Power. F

Works through linear historical time, tracing the co-constitution of the secular, the economic, and the religious beginning with the relatively simultaneous emergence of capitalism, colonialism, the Reformation, and the Enlightenment. Then follows the growth of U.S. evangelicalism and fundamentalism from their roots in missionary projects through a tentative reconciliation in the new Christian Right. (General Education Code(s): T4-Humanities and Arts.) *J. Brabinsky*

80Q. Science as Culture and Practice. *

Using tools from the analysis of social history, visual and material culture, narrative, and laboratory and field practices, introduces students to modern science, technology, and medicine studies. Examples come especially from 20th- and 21st-century life and human and information sciences. May be repeated for credit. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *D. Haraway*

80U. Modernity and Its Discontents. F

Offers an introduction to the idea of modernity from Kant to Freud, Nietzsche to Fanon. (General Education Code(s): T4-Humanities and Arts.) *D. Marriott*

Upper-Division Courses

102. Philosophy and Poetics. *

Introduction to the relationship between philosophy and poetics in some major 19th- and 20th-century poets and thinkers. Enrollment restricted to juniors and seniors. Enrollment limited to 30. *D. Marriott*

111. States, War, Capitalism. S

Survey of seminal work on ancient origins of the state, diverse geo-political systems of war and diplomacy, and consequences of the formation of the world market on the evolution of geo-political systems up to and beyond the wars of today. Enrollment restricted to juniors and seniors. Enrollment limited to 35. *G. Balakrishnan*

118. Jewish Social Movements. W

Jewish social movements of the late 19th and 20th centuries, in Europe (Eastern and Western) and the U.S.: the confrontation between Hasidism and Haskalah, tensions between socialism and Zionism, between religiosity and secularism, the mutual influences among these tendencies. (Also offered as History 185D. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *B. Epstein*

199. Tutorial. F,W,S

A program of individual study arranged between an undergraduate student and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

203A. Approaches to History of Consciousness. *

An introduction to history of consciousness required of all incoming students. The seminar concentrates on theory, methods, and research techniques. Major interpretive approaches drawn from cultural and political analysis are discussed in their application to specific problems in the history of consciousness. Prerequisite(s): first-year stand-

ing in the program. See the department office for more information. (Formerly course 203.) *The Staff*

203B. Approaches to History of Consciousness. *

Writing-intensive course based on readings in course 203A. Prerequisite(s): course 203A. Enrollment restricted to graduate students. Enrollment limited to 9. *G. Balakrishnan*

204A. Introduction to Cultural Studies. *

Classic texts from the British cultural studies tradition. Traces later developments in North America, Latin America, Australia, and elsewhere. Asks how class analysis has been complicated by work on race, ethnicity, gender, sexuality, and postcoloniality. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *J. Clifford*

204B. Introduction to Cultural Studies. *

Writing intensive course based on readings in course 204A. Prerequisite(s): course 204A. Enrollment restricted to graduate students. Enrollment limited to 20. *J. Clifford*

205A. Theories of Slavery. *

Explores philosophical, legal, and socio-historical analyses of slavery. Focus on Atlantic slavery and the production of race and gender formations, complemented by discussion on contemporary forms of slavery. Impact of historical slavery on prevailing discourses and institutions. (Also offered as Feminist Studies 225A. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

205B. Theories of Slavery. *

Writing-intensive course based on readings in History of Consciousness 205A and Feminist Studies 225A. (Also offered as Feminist Studies 225B. Students cannot receive credit for both courses.) Prerequisite(s): course 205A or Feminist Studies 225A. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

208A. Radical Critiques of Penalty. *

Examines recent theories of imprisonment, focusing on the philosophical and criminological literature associated with scholarly and activist movements arguing for prison abolition. In considering the disarticulation of crime and punishment, race, class, and gender serve as principal analytical categories. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

208B. Radical Critiques of Penalty. *

Writing intensive course based on readings in course 208A. Prerequisite(s): course 208A. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

209A. Women of Color: Feminist Theories and Practices. *

Examination of feminist consciousness in the indigenous and diasporic cultural histories of women of color. Analysis of "feminist moments" in these histories and their epistemological implications for the construction of feminist theories that take into account intersections of gender, ethnicity, class, and sexual orientation. Discussion of possible paradigmatic shifts in feminist theory. Enrollment restricted to graduate students. Enrollment limited to 15. *A. Davis*

209B. Women of Color: Feminist Theories and Practices. *

Writing intensive course based on readings in course 209A. Prerequisite(s): course 209A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

210A. Cultural and Historical Studies of Race and Ethnicity. *

Explores the historical construction of racial and ethnic categories in the Americas, especially the U.S., in interaction with gender, sexuality, class, and nationality. Intended to introduce current work by UCSC faculty and Bay Area scholars and to stimulate graduate student research projects, the course is organized by intensive reading around key questions, followed by presentations by invited scholars. Emphasizes research resources and methodologies. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

210B. Cultural and Historical Studies of Race and Ethnicity. *

Writing intensive course based on readings in course 210A. Prerequisite(s): course 210A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

211A. French Hegel. *

Introduces the "return to Hegel" in the work of some major 20th-century French thinkers. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

212. Feminist Theory and the Law. *

Interrogation of the relationship between law and its instantiating gendered categories, supported by feminist, queer, Marxist, critical race, and postcolonial theories. Topics include hypostasization of legal categories, the contest between domestic and international human rights frameworks, overlapping civil and communal codes, cultural explanations in the law, the law as text and archive, testimony and legal subjectivity. (Also offered as Feminist Studies 212. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

215A. Critical Theory in the Marxist Tradition. *

An introduction to classic texts of the Frankfurt School, focusing on works by Adorno, Horkheimer, Benjamin, and Marcuse. Explores their uses and critiques of Marxism, emphasizing questions of the relation between philosophy and history, theory and praxis, aesthetics and politics, and identifying issues relevant to contemporary debates around race, class, and gender. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Davis*

215B. Critical Theory in the Marxist Tradition. *

Writing intensive course based on readings in course 215A. Prerequisite(s): course 215A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *A. Davis*

217A. Seminar: Topics in Feminist Theory. *

Studies in the theory and history of feminist consciousness; analysis of the main areas of a specifically feminist interest; determination of the theoretical bases for a distinctively feminist perspective on the principal problems of the life and human sciences; examination of relations of class, race, and gender in feminist theory and practice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

217B. Seminar: Topics in Feminist Theory. *

Writing intensive course based on readings in course 217A. Prerequisite(s): course 217A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

218A. Postcolonial Theory. *

Study of selected topics in postcolonial theory, including decolonizing critiques of Western knowledges and

epistemologies, nationalism, gender and sexuality, cultural representations of neo-colonialism and imperialism, subalternity, history and historical transformation, and global relations of dominations. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

218B. Postcolonial Theory. *

Writing intensive course based on readings in course 218A. Prerequisite(s): course 218A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

219A. Psychoanalysis and Cultural Criticism. *

Readings in Freudian psychoanalytic theory from Freud and his contemporaries to the present, with emphasis on concepts (such as the unconscious, sexuality, fantasy, narcissism) that have informed recent cultural criticism around questions of social identity, subjectivity, marginality, and power. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

219B. Psychoanalysis and Cultural Criticism. S

Writing intensive course based on readings in course 219A. Prerequisite(s): course 219A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

220A. Globalization and Cultural Process. F

Discusses theories of globalization and its cultural effects. How are cultural forms destroyed, imposed, appropriated, hybridized, translated, invented, and reinvented at local, national, regional, and transnational levels? Historical and ethnographic focus on tourist encounters, museums, nativisms, film/media performances, etc. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *G. Van Den Abbeele*

220B. Globalization and Cultural Process. *

Writing intensive course based on readings in course 220A. Prerequisite(s): course 220A. Enrollment limited to 20. May be repeated for credit. *J. Clifford*

222A. Theories of Late Capitalism, Nationalism, and the Politics of Identity. *

Looks at the theoretical literature on what is variously called late capitalism/postindustrialism/postfordism, and in that context considers the rise of nationalism and identity politics in the latter part of the 20th century. The primary focus is on the U.S. and Western Europe, but questions of the globalization of capital and the transformation of relations between "the West" and "the Third World" are also considered. Written work for the course consists of weekly short papers. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Epstein*

222B. Theories of Late Capitalism, Nationalism, and the Politics of Identity. *

Writing intensive course based on readings in course 222A. Prerequisite(s): course 222A. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Epstein*

223. Recent European Philosophy. *

Seminar on recent developments in European philosophy, with particular attention to German theorists such as Nietzsche, Heidegger, Gadamer, Horkheimer, Adorno, or Habermas. Theorists such as Sartre, Merleau-Ponty, Derrida, Foucault, Bourdieu, Levinas, Laclau, or Vattimo may be read as well. (Also offered as Philosophy 223. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

224. History of Consciousness. *

Examination of contemporary theories of consciousness in both analytic and continental traditions. Among those who deflate modern philosophy's preoccupation with consciousness are not only Dennett, Davidson, and Rorty,

but also Heidegger, Foucault, and Derrida. Among those who argue for irreducibility of subjectivity are not only Searle, Nagel, and Chalmers, but also Sartre, Merleau-Ponty, and Levinas. Discussion of parallel readings from both philosophical perspectives. (Also offered as Philosophy 256. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 25. *D. Hoy*

225. The Politics of Affect. *

Point of departure is the question of the political, posed with respect to psychoanalysis. The underlying question is what the political does to psychoanalysis, but also what the unconscious does to the political. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

226. Marxist Humanism and the Anti-Humanist Turn. *

Seminar in which texts are read in the tradition of Marxist humanism and in the turn toward an anti-humanist stance originating among French and other European intellectuals in the 1950s and 1960s, then taking hold widely among left intellectuals in the U.S. and elsewhere. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Epstein*

228. Fundamental Problems of Metapolitics. *

Focuses on seminal works of political thought: the first half devoted to ancient and modern classics; the second considering several major contemporary reflections. Aims to reconstruct and assess the claims regarding epistemic conditions and criteria of metapolitical judgment. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

230A. Poetry, Language, Thought. *

Introduces the relation between philosophy and poetics in some major 20th-century poets and thinkers. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

230B. Poetry, Language, Thought. *

Writing-intensive course based on readings in course 230A. Prerequisite(s): course 230A, or permission of instructor. Enrollment limited to 15. *D. Marriott*

233A. Theories of Modernity and Postmodernity. *

Study of social and cultural theories of modernity and postmodernity; analysis of various conceptualizations of the modern and the postmodern and their relation to production, history, aesthetics, cultural identity, social struggle; texts from a variety of disciplines (literature, sociology, philosophy). Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

233B. Theories of Modernity and Postmodernity. *

Writing-intensive course based on readings in course 233A. Prerequisite(s): course 233A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

234A. Social Movements in the 20th-Century U.S. W

The history of major social movements in the 20th-century U.S., including populism, labor, socialism and communism, civil rights, the women's movement, the anti-nuclear movement. Various theoretical perspectives on the rise and fall of social movements. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. May be repeated for credit. *B. Epstein*

234B. Social Movements in the 20th-Century U.S. S

Writing intensive course based on readings in course

234A. Prerequisite(s): course 234A. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *B. Epstein*

235A. Theory of Religion. *

The difficulty of defining religion (universal essence vs. local/individual experience), of specifying its categorical boundaries, and of generating a theory based on more traditional disciplines (anthropomorphism, societal, psychic, transcendent, cognitive/ritual, historical/cultural/political). Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

235B. Theory of Religion. *

Writing intensive course based on readings in course 235A. Prerequisite(s): course 235A. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

237A. Historical Materialism. F

Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are addressed. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *G. Balakrishnan*

237B. Historical Materialism. *

Writing-intensive seminar based on course 237A. Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are discussed. Enrollment restricted to graduate students. Enrollment limited to 10. May be repeated for credit. *G. Balakrishnan*

239A. The Dialectical Legacy. *

From Adorno to Zizek rediscoveries of Hegel have provided the impetus for some of the most innovative currents of 20th-century Marxism. Examines the philosophical and historical problems that Marx inherited from Hegel through close readings of their major works. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

239B. The Dialectical Legacy. *

From Adorno to Zizek rediscoveries of Hegel have provided the impetus for some of the most innovative currents of 20th-century Marxism. Examines the philosophical and historical problems that Marx inherited from Hegel through close readings of their major works. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

240. Basic Principles of University-Level Pedagogy (1 credit). *

Provides training for graduate students in university-level pedagogy in general. Under the supervision of the department chair, coordinated by a graduate student with substantial experience as a teaching assistant. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

242A. Violence and Phenomenology: Fanon/Hegel/Sartre. *

Study of the work and influence of Frantz Fanon from a range of viewpoints: existential, phenomenological, psychoanalytic, and political; a variety of genres: film, literature, case history, and critique; and a set of institutional histories: clinical, cultural, and intellectual. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

242B. Violence and Phenomenology: Fanon/Hegel/Sartre. *

Writing intensive course based on readings in course

242A. Prerequisite: course 242A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

243A. Nationalism, Anti-Semitism, and Jewish Resistance in World War II. *

Jewish resistance to Nazism during World War II, in Eastern Europe, and its historical context. Includes the pre-war rise in nationalism and anti-Semitism in Poland and Lithuania, Jewish integration in the Soviet Union, and the consequences for wartime resistance. (Also offered as History 256. Students cannot receive credit for both courses.) Enrollment restricted to seniors and graduate students. Enrollment limited to 15. *B. Epstein*

247. Performance/Performativities. *

Performance acts and theories of performativity in visual culture from modernity to present. Major theoretical positions subtending the emergence of performances/performativities: subjectivity, identity, temporality, media, ritual, the event, the body and embodiment, collaboration, and politics. (Also offered as Digital Arts and New Media 247. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Qualified seniors accepted with permission of instructor. Enrollment limited to 15. *C. Sousloff*

250A. Foundations in Science Studies. *

Critical inquiry into topics in the history, sociology, anthropology, and philosophy of science and technology. Organized around the position that science is its practice, the seminar explores practices of representation, science studies and cultural studies, local/global tensions and networks, and the science question in feminism and antiracism. Enrollment restricted to graduate students. Enrollment limited to 15. *K. Banad*

250B. Foundations in Science Studies. *

Writing intensive course based on readings in course 250A. Prerequisite(s): course 250A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

251A. Readings in Science Studies. *

Focus is on recent literature in social, cultural, and historical studies of science, medicine, and technology. This seminar familiarizes students with current scholarly debates, research networks, national traditions, international exchanges, conference proceedings, interdisciplinary projects, and publication sites. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Haraway*

251B. Readings in Science Studies. *

Second quarter of two-quarter course. Writing-intensive course based on the readings studied in course 251A. Prerequisite: course 251A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

252. Poststructuralism. *

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits. (Also offered as Philosophy 252. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

253A. Topics in Cultural Analysis. F

Advanced graduate seminar in which students do research on focused topics. Each quarter centered on single thematic area. Students read works of culture-theory and exemplary studies illustrating methodologies, problems, and current controversies. Prerequisite(s): minimum of

second-year status in the history of consciousness program; instructor evaluates student's ability to participate. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Haraway*

255. Carl Schmitt: Political and Legal Order in Modern Thought. *

Students study the main translated texts of Carl Schmitt's work, as well as certain secondary commentary on his body of thought. (Formerly course 255A.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

256A. Theories of the Visual. F

Study of psychoanalytic theories of the visual including the emergence of psychoanalysis and cinema as parallel discourses and the mobilization of key psychoanalytic concepts—scopophilia, voyeurism, fetishism—in Freudian and Lacanian understandings of the gaze so central to film and photographic theory. Enrollment restricted to graduate students. *D. Marriott*

256B. Theories of the Visual. W

Writing intensive course based on readings in course 256A. Prerequisite: course 256A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

259A. Kant, Lacan, and the Ethics of Psychoanalysis. W

Offers an introduction to Jacques Lacan's *Return to Kant* and the response it provokes as a reading of sadism, politics, and ethics. Specific point of entry adopted for course is Lacan's seminar on "The Ethics of Psychoanalysis." Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

259B. Kant, Lacan, and the Ethics of Psychoanalysis. *

Writing-intensive course based on readings in course 259A. Prerequisite(s): course 259A. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Marriott*

261. Modern Intellectual History. F

Survey of 19th- and 20th-century intellectual history that focuses on a cross-section of major works from Hegel to Levi-Strauss. Enrollment restricted to graduate students. Enrollment limited to 15. *G. Balakrishnan*

264. The Idea of Africa. *

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy. (Also offered as Feminist Studies 264. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. *G. Dent*

291. Advising (2 credits). F,W,S

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess and monitor academic progress, and to evaluate course work as necessary. May be used to develop general bibliography of background reading and trajectory of study in preparation for the qualifying examination. May be repeated for credit. *The Staff*

292. Practicum in Composition. *

A practicum in the genres of scholarly writing, for graduate students working on the composition of their qualifying essay or doctoral dissertation. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

293. Field Study. F,W,S

Research carried out in field settings, based on a project approved by the responsible faculty. The student must

file a prospectus with the department office before undertaking the research and a final report of activities upon return. May be repeated for credit. *The Staff*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

A seminar study group for graduate students focusing each quarter on various problems in the history of consciousness. A statement and evaluation of the work done in the course will be provided each quarter by the students who have participated in the course for that quarter, and reviewed by the responsible faculty. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. *The Staff*

298. Doctoral Colloquium. *

Under the supervision of a History of Consciousness faculty member, students finishing their dissertation meet weekly or bi-weekly to read and discuss selected draft chapters, design difficulties and composition problems. May be repeated for credit. *The Staff*

(831) 459-2696

<http://humanities.ucsc.edu>

Faculty and Professional Interests

Professor

JEROME NEU

Philosophy of mind; emotions, culture, and insults; philosophy of law; Freud and psychoanalytic theory

FORREST G. ROBINSON

Nineteenth- and 20th-century American literature, including Mark Twain, the American West, and popular culture; biography and American culture theory

Program Description

The humanities at UCSC includes the traditional humanistic disciplines of history, literature, and philosophy as well as interdisciplinary programs in feminist studies and American studies. The humanities is also the home for linguistics, languages, and writing. The humanities offers a range of courses in support of the campus' general education requirements.

At the undergraduate level, the following majors are offered: American studies, classical studies, feminist studies, German studies, history, Italian studies, Jewish studies, language studies, linguistics, literature, and philosophy. Several undergraduate minors are

offered including the following: classical studies, East Asian studies, history, Italian studies, Jewish studies, language studies, linguistics, literature, and philosophy. Undergraduate students may also pursue individual majors. At the graduate level, five departments offer graduate degrees: History, History of Consciousness, Linguistics, Literature, and Philosophy. Instruction and testing to satisfy the campus' writing requirements is offered through the writing program.

MARGARET BROSE (Literature)
Italian literature, 19th- and 20th-century poetry and poetics, the novel, Romanticism, medieval literature, gender studies, autobiography

Associate Professor

DEANNA SHEMEK (Literature)
Italian literature and cultural history, Renaissance studies, early modern popular culture, narrative (early modern to contemporary), women's studies, literary theory

Lecturer

GIULIA CENTINEO
Italian culture and civilization; history of Italian language; Italian linguistics, syntax, and semantics; language pedagogy

MARIA (TONIA) PRENCIPE
Technology and foreign language pedagogy; modern Italian culture, history, literature, and cinema; creative writing; promotion of Italian language and culture of K-12

Program Description

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, a major in literature with an emphasis in Italian literature, a major in global economics, or a major in Italian studies.

The sequence of lower-division courses 1-6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Courses 1A and 1B offer lower-division intensive Italian language instruction equivalent to levels 1, 2, 3. The 1, 2, 3 sequence starts once a year in the fall quarter, while the 1A-1B sequence starts once a year in the winter quarter. Classes are taught in Italian from the beginning level.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The Office of International Education (OIE) sponsors programs of study in Italy. For a list of current programs and requirements, visit their web site, <http://oie.ucsc.edu>.

Lower-Division Courses

1. Instruction in the Italian Language. F

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly Schedule of Classes for exact quarter(s) of offering. Elementary sequence (1-2-3) begins in fall quarter. *The Staff*

1A. Intensive Elementary Italian. W

Intensive instruction in elementary Italian language emphasizing oral fluency. Taken in conjunction with Italian 1B, the two courses are equivalent to levels 1-2-3. Accelerated pace allows a rapid mastery of grammar and syntax, giving the student a basic knowledge of Italian in only two quarters. *The Staff*

1B. Intensive Elementary Italian. S

Sequential to course 1A, completes the equivalent instruction offered through Italian 1-2-3. May not be taken by students who have completed Italian 1 or Italian 3. Open to students who have successfully completed either 1A or Italian 2; for students completing course 2, course 3 is preferable. *The Staff*

2. Instruction in the Italian Language. W

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly Schedule of Classes for exact quarter(s) of offering. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 1; or placement by examination. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

3. Instruction in the Italian Language. S

Aural comprehension, speaking, reading, writing, and laboratory. Check the quarterly Schedule of Classes for exact quarter(s) of offering. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 2; or placement by examination. *The Staff*

4. Intermediate Italian. F

Short stories, articles, films, and newsclips are used as the basis for studying intermediate-level conversation and composition. Laboratory assignments involve use of the World Wide Web, conversations with native speakers, films and video clips. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination. Prerequisite(s): course 1B or 3, or placement by examination. Enrollment limited to 25. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Italian. W

Reading of Italian short stories and a play are used as basis for further study and refinement of oral and written skills at the intermediate level. Particular emphasis is placed on oral/written discussion of abstract ideas and topics, and on the study of different language registers/contexts. Laboratory work is regularly assigned. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting and take the placement exam. Prerequisite(s): course 4 or placement by examination. Enrollment limited to 25. (General Education Code(s): CC, IH.) *The Staff*

6. Intermediate-Advanced Italian. S

Reading of first novel in the language and weekly viewing of Italian films serve as basis for oral reports and discussions on various aspects of Italian culture and civilization. Weekly assignments, three essays, and a paper on topics derived from or related to the text. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination. Prerequisite(s): course 5 or placement by examination. Enrollment limited to 25. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

106. Italian Culture Through Film.

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. While analyzing films by and about Italians, we develop an informed opinion on relevant issues in Italian studies. The course is taught in English with an enhancement section in Italian. The enhancement section meets once a week and is designed to give students who are already familiar with the language the opportunity to discuss the films in Italian and to read/view additional material in the language. Students cannot receive credit for this course and Languages 80D. Prerequisite(s): course 6. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Program Description

Students interested in an interdisciplinary approach to Italian culture through the combined study of language, literature, history, art history, and other subjects may pursue a major or minor in Italian studies. The guidelines for the completion of the major may be obtained from Professor Cynthia Polecristi of the History Department. There are several options for study in Italy through the UC Education Abroad Program (EAP), either for a year (Bologna, Milan), for an intensive semester (Milan, Bologna, Rome, Siena), or for the summer (Siena). The Italian studies program is administered by the Literature Department.

Major Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). In addition, students are required to take 10 courses (one of which may be lower division), including a core unit of five courses which must be taken at UCSC: three Italian literature courses, one course in Italian history, and one course in Italian art history. A course featuring the work of Dante is required. A minimum of five courses must be taught principally in Italian. Five may be approved elective courses, which may feature Italy in a European or global context. One Italian literature course may be replaced by an Italian culture course. Up to five elective courses may be approved from UC EAP's yearlong study abroad in Italy. All students in the major must satisfy the Italian Studies senior exit requirement by writing a senior essay focused on Italian literature, history, or art history. This essay may be produced within an approved seminar, or (with faculty permission) by enrolling in a one-credit senior exit course in conjunction with another upper-division course in Italian literature, history, or history of art and visual culture. This combination must be approved by a faculty advisor in Italian Studies.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. Italian Studies majors satisfy the DC Requirement through satisfactory completion of the senior essay, as described above. Please refer to updated information at <http://reg.ucsc.edu/catalog/html/disciplinarycommunicationchart.html>.

Minor Requirements

Each student must complete the lower-division language sequence (Italian 1–6, or equivalent). Students must also complete five upper-division courses in Italian studies: three Italian literature courses, one course in Italian history, and one course in Italian art history. A course featuring the work of Dante is required. One Italian literature course may be replaced by an Italian culture course. Three of the five upper-division courses must be completed at UCSC; three must be taught principally in Italian. A maximum of two courses may be transferred from EAP.

Foreign language methodology, drama/theater/improvisation use in language learning, language and identity, foreign language literacy

Program Description

Students interested in acquiring proficiency in Japanese can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in language studies, an East Asian studies minor, or a major in global economics.

The sequence of lower-division courses 1–6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Instruction takes place mostly in Japanese from the second half of the first quarter.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The UC Education Abroad Program (EAP) has information on study in Japan. There are EAP centers in Yokohama, Tsuru, Kyoto, Tokyo, Sendai, Tsukuba, and Tohoku. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Lower-Division Courses

1. Instruction in the Japanese Language. F

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write Japanese scripts (hiragana, katakana, and about 40 kanji). *The Staff*

2. Instruction in the Japanese Language. W

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. Prerequisite(s): course 1; or consent of instructor. *The Staff*

3. Instruction in the Japanese Language. S

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. Prerequisite(s): course 2; or by consent of instructor. *The Staff*

4. Intermediate Japanese. F

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. Prerequisite(s): course 3; or by consent of instructor. (General Education Code(s): IH.) *The Staff*

5. Intermediate Japanese. W

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. Prerequisite(s): course 4; or by consent of instructor. (General Education Code(s): IH.) *The Staff*

6. Intermediate Japanese. S

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis is placed on developing the student's cultural knowledge relevant to inter-cultural communication. Prerequisite(s): course 5; or by consent of instructor. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Upper-Division Courses***103. Advanced Japanese. F**

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication. Prerequisite(s): course 6; or by consent of instructor. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

104. Advanced Japanese. W

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication. Prerequisite(s): course 103; or by consent of instructor. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. *The Staff*

105. Advanced Japanese. S

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Further development of cultural knowledge and understanding through critical examination of authentic Japanese materials in a variety of genres, including literary work, expository writing, and films. May be repeated for credit with consent of instructor. Prerequisite(s): course 104; or by consent of instructor. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (General Education Code(s): TA.) *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Jewish Studies

Department of History
201 Humanities
(831) 459-2982
<http://jewishstudies.ucsc.edu>

Principal Faculty

BETTINA APTHEKER, Professor of Feminist Studies
Women's history, feminist oral history and memoir, feminist pedagogy, African American women's history, queer studies, feminist Jewish studies, feminist critical race studies. Among her research interests the history of Jewish women in America

MURRAY BAUMGARTEN, Professor of English and Comparative Literature, Neufeld-Levin Co-Chair
Dickens, Victorian literature and culture, the Bible, translation, modern Jewish writing, the Holocaust

MARGARET BROSE, Emerita Professor of Literature

MARK CIOC, Professor of History
German history, modern European history; environmental history

NATHANIEL DEUTSCH, Professor of Literature and History
Hebrew Bible; rabbinic literature; Jewish mysticism; Hasidism; Eastern European Jewish life; ethnography

BARBARA EPSTEIN, Professor of History of Consciousness
Recently working in Minsk collecting testimonies in Yiddish and other languages on Jewish experiences during WWII

GILDAS HAMEL, SOE Lecturer in History and Classical Languages
History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

PETER KENEZ, Emeritus Professor of History, Neufeld-Levin Co-Chair
Russian history, Eastern Europe, 20th-century Europe, Soviet film

TAMMI ROSSMAN-BENJAMIN, Lecturer in Hebrew
Hebrew language and culture; biblical Hebrew syntax and semantics; the Hebrew Bible; Jewish thought; psycholinguistics; second language acquisition and bilingualism

DAN SELDEN, Professor of Literature
Research on Classical and Hellenistic Judaism and medieval Jewish mysticism

CATHERINE SOUSSLOFF, Professor of History of Art and Visual Culture
European cultural theory, aesthetics, and the historiography of art; performance studies; early modern Italian art; media history including film; Jewish identity and representation

BRUCE THOMPSON, Continuing Lecturer in History

European intellectual and cultural history, French history, Jewish intellectual and cultural history, British and Irish history, history of cinema, history of espionage, environmental history

Faculty Advisers

MURRAY BAUMGARTEN, Professor of English and Comparative Literature

NATHANIEL DEUTSCH, Professor of Literature and History

BRUCE THOMPSON, Lecturer in History

GILDAS HAMEL, Lecturer in History

TAMMI ROSSMAN-BENJAMIN, Lecturer in Hebrew

RAOUL BIRNBAUM, Professor of History of Art and Visual Culture

Buddhist studies, especially Chinese practices from medieval times to the present; religion and visual culture in China

A. HUNTER BIVENS, Assistant Professor of Literature

Twentieth- and 21st-century German literature and film; Marxism and critical theory; psychoanalysis, lyric poetry; literary realism; the novel

BRIAN CATLOS, Associate Professor of History
Pre-modern Mediterranean; medieval Iberia and Europe and the Islamic world; Christian-Muslim-Jewish relations, ethnicity, minorities, social, and economic history; world history

RYAN COONERTY, Lecturer in Politics
American political history, law and international relations

MARIA EVANGELATOU, Assistant Professor of History of Art and Visual Culture
Medieval visual culture, with emphasis on Byzantium and its periphery; manuscript illumination, Marian cult and iconography; ancient Greek and Roman visual culture; Islamic visual culture; gender studies

LAUREL FOX, Professor of Ecology and Evolutionary Biology
Terrestrial population and community ecology, plant-animal interactions

ROBERT GOFF, Associate Professor Emeritus of Philosophy

MARGO HENDRICKS, Professor Emeritus of Literature

MARC MANGEL, Professor of Applied Mathematics and Statistics
Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

WILLIAM NICKELL, Lecturer in Literature
Leo Tolstoy; Russian cultural history; 1920s-30s Soviet Russia; Russian/Soviet Film; Russian language and pedagogy

LOISA NYGAARD, Associate Professor of Literature
Eighteenth- and early 19th-century German literature; Goethe; Romantic fiction; landscape and landscape aesthetics; xenophobia in Germany

PAUL ROTH, Professor of Philosophy
Philosophy of social science, philosophy and sociology of science, epistemology, history of analytic philosophy, philosophy of history

AVI TCHAMNI, Lecturer in Music

Composition, Jewish music, computer and electronic music, Middle Eastern music, theory, algorithmic music and generative musical syntax, orchestration, ethnomusicology

Program Description

The interdisciplinary program in Jewish studies introduces students to the study of classical, medieval, and modern Jewish cultures and to the range of disciplines that bear upon the field.

The Jewish studies major and minor offers students the chance to gain knowledge and skills in a variety of contexts in various aspects of Jewish culture, with special reference (though not limited) to modern issues. The major and minor will help them prepare to move successfully into graduate programs in a variety of disciplines, especially in humanities, social sciences, and pre-professional programs, and will provide students with a grounding in materials fundamental to western culture and liberal education. This program connects with a range of disciplines and programs on the UCSC campus that explore the meanings of modernity; at the same time, this program will help students develop analytical tools, strategic versatility, and critical literacy.

Note that modernity here is not defined as Europe or North America; the Jewish studies program intends to speak to modernity as a global phenomenon, dealing with sites where Jews lived. In the 19th and 20th centuries Jews were widely spread across the globe and often played active and influential roles in their communities. These include such places as Shanghai, Tianjin, Harbin, India, Latin America, Egypt, Iran, and of course throughout Europe, Great Britain, and North America.

Students, especially those who plan to continue their studies in graduate school, may wish to gain proficiency in Yiddish, German, or Spanish, depending on their area of interest. The upper-division course Hebrew Bible (Pre- and Early Modern Literature 144B) is strongly recommended, as is developing language proficiency in Hebrew.

Jewish studies is administered by the Department of History. For additional information on curriculum and advising, go to <http://jewishstudies.ucsc.edu>.

Study Abroad

Jewish studies encourages students to take advantage of the Education Abroad Program (EAP). The University of California has developed educational opportunities abroad in conjunction with the Jerusalem Study Center at The Hebrew University of Jerusalem. Students who participate in the UC Education Abroad Program may petition to apply up to three courses from EAP toward their Jewish studies major or minor requirements.

Requirements for the Major

A prerequisite for the Jewish studies major is the lower-division sequence in elementary Hebrew (Hebrew 1, Hebrew 2, and Hebrew 3) or equivalency. Transfer students who must take Hebrew 1, 2, and 3 are permitted to declare the major in the quarter immediately after taking Hebrew 1. Students are also encouraged to take Hebrew 4 and Hebrew 5. The major requires a minimum of 13 courses, including the comprehensive requirement. In consultation with a faculty adviser, students will plan a program of study to fulfill the following distribution of courses:

- History 74, *An Introduction to Jewish History and Culture* or Literature 61J, *An Introduction to Jewish Literature and Culture*
- History 80W/Literature 80L, *The Holocaust:*

The Destruction of European Jewry or History 75, *Film and the Holocaust*

- History 185G, *Jewish Studies: Methods and Approaches*
- two, 5-credit, upper-division history core courses
- two, 5-credit, upper-division literature core courses
- five, 5-credit, elective courses, four of which must be upper-division
- one comprehensive exit requirement (see below)
- among the 13 courses required for the major, one course must satisfy the Disciplinary Communications (DC) Requirement (see below)

Comprehensive Exit Requirement

Students may satisfy the Jewish studies comprehensive exit requirement by completing an approved exit seminar (offered by history or literature) or a senior thesis (Modern Literary Studies/Pre- and Early Modern Literature 195 or History 195 A and B). Please consult the Jewish studies web site for a more detailed description of these courses.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement is satisfied through taking a history exit seminar course in a field related to Jewish studies: History 196G, 196M, 196N, 196P, or 196R. Students may take a literature senior seminar courses to satisfy the comprehensive requirement but will be required to take an additional history exit seminar to satisfy the DC Requirement.

Chronological Distribution Requirements

Among the 13 courses required for the major, at least three must meet the following chronological distribution requirements:

- one course must satisfy the classical chronological distribution requirement
- one course must satisfy the modern chronological distribution requirement
- one course must satisfy the Holocaust chronological distribution requirement, which is accomplished by completing History 80W/Literature 80L, *The Holocaust: The Destruction of European Jewry* or History 75, *Film and the Holocaust*

Transfer Credits and Substitutions

Jewish studies majors must take a minimum of six regularly scheduled Jewish studies courses plus the comprehensive/DC requirement from members of the UCSC Jewish studies faculty. Subject to the limits indicated, courses from the following categories may be applied to the Jewish studies major:

- Courses taken at another institution (limit of 3)
- Education Abroad Program (limit of 3)
- Related courses not currently on the pre-approved Jewish studies course list (limit of 2)
- Independent and field studies (limit of 1)

Minor in Jewish Studies

Students whose major area of interest is not Jewish studies may nonetheless find that a minor in Jewish studies makes an invaluable contribution to their studies. This introduction to Jewish studies is helpful for students who plan to do graduate work in Jewish studies, whether through regular disciplines or in Jewish studies programs, and also for students who plan to attend rabbinical schools or to find work with Jewish communities. For others with an interest in Jewish topics, but without such plans, a minor in Jewish studies offers intellectual enrichment and a focus within the student's chosen field.

Requirements for the Minor

- three lower-division Jewish studies courses. (Two of the required lower-division courses may be satisfied through the study of Hebrew language.)
- five upper-division Jewish studies courses. (At least two of the upper-division courses must be taken from any of the Jewish studies core course lists.)

Upper-Division Courses

101. Jewish Studies: Methods and Approaches. W

Examines scholarship about Jewish cultures, communities, and intellectual through the prisms of a variety of disciplines: history, anthropology, literature, feminist studies, biblical commentary, art history, philosophy, and music. Seeks to equip students with a sophisticated understanding of the methods scholars have used to illuminate both the coherence and the diversity of Jewish experience from antiquity through the 20th Century. Enrollment limited to 20. (General Education Code(s): CC.) *N. Deutsch*

Journalism

Writing Program
166 Kresge College
(831) 459-2431
<http://writing.ucsc.edu/>

Program Description

Admission to the minor in journalism has been suspended. The following conditions will apply if it is reinstated.

The Writing Program accepts students each quarter into the minor in journalism. The minor consists of a series of courses and internships that emphasize not just craft but critical analysis. The program immerses the student in studies of the rhetoric of nonfiction writing and of the significance of public discourse. It is designed to coordinate with a student's major in any field of study in which the practice of writing for newspaper and magazine publication might complement normal course work.

A full description of the minor, an explanation of application procedures, and a petition for admission into the program may be obtained at the Writing Program office (Kresge 166). Petitions are reviewed during the second week of each quarter; selection is based on course work and writing samples. Interested students are encouraged to get more details about the minor from the writing program office (166 Kresge College).

Course Requirements

- Writing 64, *Newswriting Workshop*. All students must take this course (or its equivalent) before they are approved for the minor.
- Five upper-division courses in writing. At least three must be from the following: Writing 165, 166 (one or more courses in the series), and 167. The remaining two courses may include any upper-division creative writing course (see Literature), American Studies 105, Community Studies 144, Environmental Studies 156 (for environmental studies majors), Film and Digital Media 150, and Writing 101 (if not used as media criticism), 102, 103, 104, 107, 108, 109, 110A, 120, 161, 163, 169, and 195.
- One course in media criticism (ordinarily Writing 167, but Sociology 116, Community Studies 80L, Writing 70, and 128 are accepted)
- One quarter of internship
- A senior thesis or portfolio

Kresge College

College Office
(831) 459-2071
<http://www2.ucsc.edu/kresge>

For college description and list of faculty, see page 98.

Lower-Division Courses

12A. Service Learning (3 credits). F,W,S

Students find a volunteer position with the instructor's assistance and perform community service in non-profit organizations, schools, unions, or local government agencies. Students meet weekly, keep a journal, and write a "social action witnessing" report of their experience. Enrollment restricted to college members. Enrollment limited to 15. May be repeated for credit. *F. Williams*

12B. Service Learning (2 credits). S

Students find a volunteer position with the instructor's assistance and perform community service in non-profit organizations, schools, unions, or local government agencies. Students meet weekly, keep a journal, and write a "social action witnessing" report of their experience. Enrollment restricted to college members. Enrollment limited to 15. May be repeated for credit. *F. Williams*

15A. The Writer as Witness (3 credits). W

Students are involved in a community service project to produce a portfolio of social-action writing that situates the writer as witness in the community. Enrollment restricted to college members. Enrollment limited to 20. *S. Cooper*

15B. The Writer as Witness (2 credits). S

Students are involved in a community-service project to produce a portfolio of social-action writing that situates the writer as witness in the community. Enrollment restricted to college members. Enrollment limited to 20. *S. Cooper*

24. Imagining Utopia (3 credits). S

Explores possible futures by studying several utopian visions, projects, and manifestos. Students imagine a fu-

ture by writing a manifesto and other creative non-fiction pieces that embrace a utopian imagination. Enrollment restricted to college members. Enrollment limited to 20. *S. Cooper*

42. Student-Directed Seminar (no credit). F,W,S

Seminar taught by upper-division Kresge students under Kresge faculty supervision. (See course 192.) Students submit petition to sponsoring agency. *The Staff*

60F. Writer's Read (2 credits). W

Students attend weekly creative writing readings by fiction writers and poets, read excerpts from the writers' works, participate in question and answer sessions, and write short, creative and/or analytical responses to the readings and writings. Enrollment restricted to Kresge and Porter college members. Enrollment limited to 35. May be repeated for credit. *M. Perks*

60K. The Art of Comedy: Literature and Performance (3 credits). W

Students analyze comedic writing and practice writing comedy. Students develop pieces to be delivered in a performance at the end of the quarter. Enrollment restricted to college members. Enrollment limited to 22. *E. McKenzie*

62. Transformative Action. W

Introduces the most effective methods for social change. Examines social entrepreneurs, innovators, and visionaries. Reviews traditional methods of activism and new theories of nonviolent social change. Presents case studies of success in addressing problems of social injustice. Enrollment limited to 75. *C. King*

63. Kresge Garden Cooperative (2 credits). S

Offers hands-on gardening skills within a student-run space. Focuses on developing a strong cooperative garden on campus, with special attention to the documentation of this process. Enrollment limited to college members. Enrollment limited to 24. *D. Shaw*

65. Power and Representation Lab.

Enrollment limited to 20. *The Staff*

65A. Power and Representations: Food Systems (2 credits). F

Explores the relationship between our individual choices as "eaters" and "food citizens," and how those choices affect the collective "food system" on many scales—locally, statewide, nationally, and internationally. Concurrent enrollment in course 80A or 80B is required. Enrollment limited to 20. *D. Shaw*

65B. Power and Representation: Photography (2 credits). F

Focuses on creating a final project individually, or in collaboration with others, that engages issues of power and representation through the medium of photography. Concurrent enrollment in course 80A or 80B is required. Enrollment limited to 20. *S. Graham*

65C. Power and Representation: Creative Writing (2 credits).*

For students who wish to supplement their core experience with creative writing. Students do in-class and out-of-class writing assignments; read and discuss texts; and work to develop their final project. Concurrent enrollment in course 80A or 80B is required. Enrollment limited to 20. *F. Fatemi*

65D. Power and Representation: Art and Visual Performance (2 credits). F

Students investigate the themes presented in the core course to arrive at a final creative project in pairs, groups, or individually. Concurrent enrollment in course 80A or

80B is required. Enrollment limited to 20. *K. Burton*

75. Sustainable Food Systems.*

Introduces students to fundamental food-system issues and opportunities. Topics include: hunger, environmental sustainability, race and gender, food and agricultural policy, local food systems, gardening and farming models, social movements, and approaches for analysis and change. Enrollment limited to 55. *S. Gillon*

76. Social Documentary Photography.*

History of social documentary photography with its practice. Includes analysis of historical and contemporary images from social documentary work; camera, darkroom, and digital skill development; an individual student documentary project; and collective project discussion. Enrollment restricted to Kresge College members. Enrollment limited to 20. *The Staff*

77. Food Memoir (2 credits).*

Workshop in writing memoir that connects to issues of multiculturalism, gender, and environment. Designed to hone skills in creative writing through stories that students will unify into a larger memoir. Enrollment restricted to Kresge and College Eight members or by permission of instructor. *R. Somers*

80A. Introduction to University Discourse: Power and Representation. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical theory, film, art, fiction, non-fiction, and theater. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1.) *The Staff*

80B. Rhetoric and Inquiry: Power and Representation. F

Explores the intersections of investigations, interpretation, and persuasion, and hones strategies for writing and research. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical theory, film, art, fiction, non-fiction, and theater. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

80H. Reading Chinese Paintings.*

Introduces significant currents in Chinese cultural history and their visual expression through close examination of selected paintings. Readings focus on a rich variety of primary sources in translation. Course intended for honors students by permission of instructor. Enrollment limited to 20. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *R. Birnbaum*

80T. Power and Representation (Kresge Core Course for Transfer Students). F

Explores the intersections of investigations, interpreta-

tion, and persuasion, and hones strategies for writing and research. Explores relationships between individuals and their communities—communities as small as families and friends, colleges and cities; communities as large as nations and the world. Examines ways we constitute ourselves as individuals in relation to communities, focusing on representations of class, ethnicity, sexual orientation, gender, and race in several genres—critical theory, film, art, fiction, non-fiction, and theater. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior college members. (General Education Code(s): T5-Humanities and Arts or Social Sciences, W.) *The Staff*

99. Tutorial. F,W,S

A program of directed study arranged between a freshman or sophomore student and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Independent Study (2 credits). F,W,S

A program of directed study arranged between a student and a Kresge faculty member. Class time is less proportional to credit given. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99G. Independent Study (3 credits). S

A program of directed study arranged between a student and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under Kresge faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Kresge, a proposal supported by a Kresge faculty member willing to supervise, and college approval. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a Kresge faculty supervisor. To be used primarily by upper-division students doing part-time, off-campus study. Prerequisite(s): approval of student's adviser and the college. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

Senior thesis or project for student doing individual major program. May be repeated twice for credit. Prerequisite(s): permission of sponsoring committee and college approval. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which Kresge faculty supervision is not in person (e.g., supervision is by correspondence.) Prerequisite(s): approval of the student's faculty sponsor and college approval. *The Staff*

199. Tutorial. F,W,S

A program of individual study arranged between an upper-division student and a Kresge faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Language Program

218 Cowell College
(831) 459-2054
<http://language.ucsc.edu>

Faculty and Professional Interests

Chinese

DAVID KEENAN
Chinese language, fiction, and history

French

ANGELA ELSEY
Francophonie, 19th-century French history and civilization, French and Francophone cinema

GRETA HUTCHISON
Foreign language pedagogy, second language acquisition, medieval French literature, and 19th-century literature and art

NORA MEGHARBI
Second and foreign language acquisition, applied linguistics, pedagogical grammar, technology and multimedia, sociolinguistics, TA training, course supervision, business French, scientific French, francophone literature, translation

German

ZSUZSANNA ABRAMS
Applied linguistics, language pedagogy, second language acquisition, intercultural communication, discourse analysis, computer-mediate communication

WALTER CAMPBELL
Language teaching, 18th- and 19th-century German literature, history of German

Greek

KAREN BASSI (Literature)
Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

MARY-KAY GAMEL (Literature)
Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

GILDAS HAMEL (History)
History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

CHARLES W. HEDRICK, JR. (History)
Greek and Roman history, epigraphy, historiography, political theory

JOHN P. LYNCH (Literature), Emeritus

JENNIFER LYNN
Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; Cicero

DANIEL SELDEN (Literature)
Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Hebrew

TAMMI ROSSMAN-BENJAMIN
Hebrew language and culture, biblical Hebrew syntax and semantics, the Hebrew Bible, Jewish thought, psycholinguistics, second-language acquisition and bilingualism

Italian

GIULIA CENTINEO
Italian culture and civilization; history of Italian language; Italian linguistics, syntax, and semantics; language pedagogy

TONIA PRENCIPE
Technology and foreign language pedagogy; modern Italian culture, history, literature, and cinema; creative writing; promotion of Italian language and culture of K-12

Japanese

SAKAE FUJITA
Foreign language methodology, drama/theater/improvisation use in language learning, language and identity, foreign language literacy

SHIGEKO OKAMOTO
Sociolinguistics, discourse analysis, pragmatics, language and gender, foreign language pedagogy, Japanese linguistics

Latin

KAREN BASSI (Literature)
Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

MARY-KAY GAMEL (Literature)
Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

GILDAS HAMEL (History)
History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

CHARLES W. HEDRICK, JR. (History)
Greek and Roman history, epigraphy, historiography, political theory

JOHN P. LYNCH (Literature), Emeritus

JENNIFER LYNN
Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; Cicero

DANIEL SELDEN (Literature)
Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Portuguese

ANA MARIA SEARA
Portuguese language; literature, film, and music of Brazil and the Portuguese-speaking world; acquisition and teaching of foreign, second, and heritage languages

Russian

WILLIAM NICKELL
Leo Tolstoy, Russian cultural history, 1920s–1930s Soviet Russia, Russian Soviet film, Russian language and pedagogy

Spanish and Spanish for Spanish Speakers

BRENDA BARCELÓ
Medical and professional Spanish, language instruction technology, Latin American culture, Latin dance expressions, Spanish/English/Spanish translation and interpretation, Hispanic linguistics, Romance languages

CARLOS CALIERNÓ
Bilingualism and intercultural communication; Latin American culture; history of the conquest, music, art, and cinematography

VERÓNICA FELIU
Latin American literature of the 20th century; Chilean feminisms, politics, and culture; Latin American cultural studies; Spanish learning for both non-native and heritage speakers

MARÍA VICTORIA GONZÁLEZ-PAGANI
Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

MARÍA MORRIS
Language learning styles and strategies, culture and technology in language training

MARTA NAVARRO
Latin American literature, Mexican/Chicano culture, Latina/Chicana issues

ARIEL A. PÉREZ
Language acquisition and teaching methodology, computer-assisted language learning, teaching language for proficiency, oral proficiency assessment; Latin American current affairs

ALVARO ROMERO-MARCO
Spanish literature of the 19th- and 20th-centuries; film, cultural studies

EVE ZYZIK
Spanish linguistics, second language acquisition, cognitive linguistics, language pedagogy and curriculum design

Program Description

Understanding how language works is a crucial part of comprehending human consciousness and communication. Language is an intellectual tool basic to all disciplines. In today's communities, multicultural and global, learning a second language is not a refinement but a necessity—the key to understanding and communicating with others near and far. The goal of the Language Program at UCSC is to allow students to achieve a substantial level of proficiency in languages other than English. Since such proficiency always includes cultural as well as linguistic comprehension, the program requires investigating the complex relationship between language and culture.

The Language Program offers rigorous language training by professional language instructors. Most courses are taught in the target language from the very beginning. In 2010–11, the languages offered are Chinese, French, German, Greek, Hebrew, Italian, Japanese, Latin, Portuguese, Russian, Spanish, and Spanish for Spanish speakers.

Students with previous language preparation who wish to continue in that language take a placement examination to determine the course level appropriate for them. Each language's placement examination format is described in the quarterly *Schedule of Classes*, along with the time, date, and location of the examination.

Language learning at UCSC is supported by a variety of technologies. There is a campus language laboratory in the Media and Electronic Resource Center (MERC) at McHenry Library; the library also houses an abundance of print and audiovisual material in the languages taught at UCSC, including music recordings and videos. Television programs are received from countries around the world. Faculty in the Language Program are incorporating new technologies into their teaching on an ongoing basis, including computer software and web-based resources.

In addition to language courses, the program offers upper-division courses exploring history, sociology, literature, art, film, and other manifestations of culture. All courses are taught in the target language.

Students of language interested in theater have the opportunity to participate in the annual International Playhouse, which every spring presents highly successful programs. To date, pieces have been performed in Chinese, French, German, Italian, Japanese, Latin, Portuguese, Russian, and Spanish.

Students are also encouraged to participate in foreign film series (e.g., Chinese, French, Italian, Portuguese, Russian, Spanish), international music and dance festivals, and conferences on intercultural or international topics.

Students who wish to concentrate on language study can choose various majors. Students can major in language studies, which combines courses in language proficiency and culture with general and applied linguistics. The Literature Department offers courses in French, German, Spanish, Latin American, and Italian literature. The Literature Department encourages all students to study a second language and requires two upper-division courses in a non-English literature for the intensive literature major. The History Department encourages students of Asian, Latin American, European, and classical history to study a second language and provides a variety of opportunities to make use of language skills in their studies. Latin American and Latino Studies focuses on the Hispanic culture of the Americas and requires all majors to read, speak, and write Spanish or Portuguese. Other area studies majors involving language study include classical studies, German studies, Italian studies, East Asian studies (Chinese emphasis), global economics, and health sciences.

Study abroad is an important component of language study at UCSC. Language students have various opportunities for studying abroad, including one-quarter programs in Siena, Italy, Japan (global economics taught in English), and Costa Rica (tropical biology taught in English); semester programs in Austria, Chile, Costa Rica, France, Germany, India, Italy, or Mexico; and the yearlong UC Education Abroad Program (EAP), with centers in Brazil, Chile, China, Costa Rica, France, Germany, Italy, Japan, Mexico, Russia, Spain, and Taiwan.

Lower-Division Courses

80D. Italian Culture Through Cinema. S

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. While analyzing films by and about Italians, we develop an informed opinion on relevant issues in Italian culture and society. The course, to be taught in English, is organized thematically. Students cannot receive credit for this course and Italian 106. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80F. Israel's Struggle for Identity as Seen Through Israeli Cinema. S

Examines, through the medium of film, Israel's struggle for identity since its founding as a modern state. Topics include: Israel's relationship to the Jewish diaspora; the nature of Israel as a Jewish state; and the relationship between Israel and its Arab neighbors. Students may not receive credit for this course and Hebrew 106. May be repeated for credit. (General Education Code(s): ER, T4-Humanities and Arts, E.) *The Staff*

Upper-Division Courses

112. Language and Gender. S

Examines the relationship between language and gender. Topics include: gender differences in speech; linguistic gender norms and stereotypes; gender and the construction of identity in discourse; sexuality and language; sexism in language; social, educational, and political implications. (Formerly course 110.) *S. Okamoto*

150. Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics.

Taught in Spanish. Students learn the major properties of the Spanish language from a linguistics perspective. Topics covered include: phonetics/phonology, morphology, and syntax. Prerequisite(s): Linguistics 52 or Linguistics 55; and Spanish 6 or Spanish for Spanish Speakers 63. Enrollment limited to 30. *E. Zyzik*

Graduate Courses

201. Second Language Teaching. S

Helps novice instructors learn about the theory and practice of language teaching and learning. Focuses on current methods used in communicatively oriented classrooms. Topics include: listening comprehension, grammar, vocabulary, reading, writing, and testing/assessment. Enrollment restricted to graduate students. Enrollment limited to 20. *E. Zyzik*

210. Oral Communication in the U.S. Classroom: Strategies for International T.A.s (2 credits). F

Seminar for international graduate students who speak English as a second or foreign language. Focuses on oral competency and serves to qualify students as graduate teaching assistants in UCSC classrooms or laboratories. Enrollment restricted to international graduate students; language assessment administered by the Graduate Division. *The Staff*

Language Studies

Linguistics Department
241 Stevenson College
(831) 459-4988
<http://ling.ucsc.edu>

Program Description

Language studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with competence in one or more foreign languages and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. It requires (1) acquisition of demonstrable competence in a language other than English, (2) grounding in linguistics, and (3) completion of a series of cultural context courses related to the language. Currently, majors may choose a concentration in Chinese, French, German, Modern Hebrew, Italian, Japanese, Russian, or Spanish. Interested students should contact the Linguistics Department office early in their college career to obtain essential information about requirements. Students are also encouraged to download a current copy of the *Handbook of Undergraduate Programs in Linguistics and Language Studies* from our web site at <http://ling.ucsc.edu/>, which contains detailed information about the major.

A junior year abroad through the UC Education Abroad Program (EAP) in a country appropriate to the major language is recommended. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the undergraduate director or a designated adviser.

Requirements for the Language Studies Major

Early Declaration

It is important that prospective students declare the major as early as possible so that they can complete the advanced language, linguistics, and context requirements within the allowed period of enrollment.

Students who wish to include an EAP experience in their course of study will have to coordinate their choice of year abroad with the scheduling of UCSC courses. Transfer students who have not made significant progress with the language requirements before entering UCSC may find it difficult to include an EAP year before completion of graduation requirements.

Course Requirements

Language studies majors must satisfy course requirements in languages, linguistics, and cultural context.

Language component: Language studies majors (in French, German, Modern Hebrew, Italian, Russian, and Spanish) must achieve a level equivalent to six quarters in the language of concentration. One advanced language course after level 6 is also required. Majors in Chinese and Japanese must achieve a level equivalent to eight quarters of language study.

Six foundation courses in linguistics:

- Linguistics 50, *Introduction to Linguistics: Sounds and Words*
- Linguistics 53, *Semantics 1*
- Linguistics 101, *Phonology 1*
- Linguistics 112, *Syntax I*; or Linguistics 111, *Syntactic Structures*
- two advanced linguistics courses
- Five elective courses in linguistics or cultural context:
- Linguistics courses: any upper-division course offered by the Linguistics Department
- Cultural context courses in the major language: to be selected from disciplines such as literature, history, and politics, subject to departmental approval.

Senior exit requirement: In their senior year, language studies majors must satisfy the senior exit requirement in one of two ways:

Option 1. Successful completion of a capstone course. Students may designate an appropriate upper-division course as their capstone course.

- Language studies majors must have senior standing, achieved level-5 language competence, and must have completed Linguistics 101, *Phonology 1* and 112/111, *Syntax I* or *Syntactic Structures*.

Option 2. Senior thesis supervised by a faculty member.

- The proposal for a senior thesis must be submitted for departmental approval at least three quarters prior to the quarter of graduation.
- Students enroll in Linguistics 195, *Senior Thesis* with the approval of the faculty adviser. The senior thesis is an original investigation of the major language in some relevant way, such as the linguistic structure

or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in language studies is satisfied by completing course 101 and either course 111 or 112.

Requirements for the Minor

The minor requires completion of two years (six quarters) of language study (or demonstration of an equivalent level of ability) and eight additional linguistics and cultural context courses as follows:

- Linguistics 50, *Introduction to Linguistics: Sounds and Words*
- Linguistics 101, *Phonology 1*
- Linguistics 112, *Syntax I*; or Linguistics 111, *Syntactic Structures*
- two advanced linguistics courses
- three elective/context courses (see handbook for details)

There is no senior exit requirement for the minor.

Disqualification Policy

The Linguistics Department has adopted a major disqualification policy for linguistics and language studies majors that is intended to encourage students to take seriously their performance in the introductory courses and to make a strong effort to pass those courses.

Students who receive more than one No Pass, D,W, and/or F in the following introductory courses will not be permitted to major in linguistics or language studies:

- Linguistics 50, *Introduction to Linguistics: Sounds and Words*
- Linguistics 53, *Semantics 1*
- Linguistics 101, *Phonology 1*
- Linguistics 111, *Syntactic Structures*
- Linguistics 112, *Syntax 1*

Students who fail one of these courses will be sent a letter reminding them of this policy and warning them that they are at risk of disqualification should they fail to pass a subsequent introductory course.

Students may appeal their disqualification by writing a formal letter to the department chair. This letter should explain any extenuating circumstances that influenced their poor performance in the introductory courses. For example, if some event led to poor performance in multiple courses in a single quarter, a student has a potential case for appeal. In contrast, academic dishonesty or poor performance spanning multiple quarters will be considered evidence that a student is ill-suited for the majors.

The letter of appeal must be submitted to the Linguistics Department office (241 Stevenson College) no later than 15 days from the date the disqualification notice is mailed, or the 10th day of classes in the quarter of their disqualification, whichever is later. The department will subsequently notify the student and the student's college of the appeal decision no later than 15 days after the submission of the appeal.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on a close reading of (1) the student's grades and narrative evaluations for all courses relevant to the major; (2) the results of the senior exit requirement; (3) other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded to the top 10 percent of those graduating in the major. Only those students whose narratives are consistently excellent, and whose performance on the senior exit requirement is excellent, will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Latin

Language Program
218 Cowell College
(831) 459-2054
<http://language.ucsc.edu>

Faculty and Professional Interests

Professor

KAREN BASSI (Literature)
Greek and Latin literatures, Greek drama, Hellenistic poetics, feminist interpretation, literary and cultural theory, pre- and early modern studies, historiography

MARY-KAY GAMEL, Professor (Classics and Comparative Literature)
Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

CHARLES W. HEDRICK, JR. (History)
Greek and Roman history, epigraphy, historiography, political theory

JOHN P. LYNCH, (Literature) Emeritus

DANIEL SELDEN (Literature)
Afroasiatic languages and literatures, Greek and Latin, Hellenistic culture, the classical tradition, history of criticism, literary theory

Lecturer

GILDAS HAMEL (History)
History of Judaism and Christianity; Hebrew and Greek Bible; classical languages

JENNIFER LYNN
Later Roman Republic and Principate; Homeric epic; Hellenistic and Augustan poetry; Cicero

Program Description

The Language Program offers instruction in elementary Latin. It consists of a two-course sequence, Latin 1 and Latin 2, that begins in the fall quarter only. Students interested in Latin literature should see the course listings under Literature. Those interested in classical studies should see the program description for classical studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Lower-Division Courses

1. Elementary Latin. F

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only. *The Staff*

2. Elementary Latin. W

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature. Prerequisite(s): course 1. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Latin American and Latino Studies

32 Merrill College
(831) 459-4284
<http://lals.uisc.edu>

Faculty and Professional Interests

Core Faculty

GABRIELA ARREDONDO, Associate Professor of Latin American and Latino Studies
Latino studies; Chicano history; U.S. immigration histories; U.S. social and cultural history; critical race and ethnicity theories; Chicana and Mexicana feminisms; "borderlands" studies; history of modern Mexico

JOHN G. BORREGO, Professor Emeritus of Latin American and Latino Studies

SYLVANNA FALCÓN, Assistant Professor of Latin American and Latino Studies
Human rights, racism/antiracism, globalization, gender, transnational feminism, Latin America (Mexico, Peru), United States

JONATHAN FOX, Professor of Latin American and Latino Studies
Latin American and Latino politics, including issues of democratization, accountability, social movements, transnational civil society, social and environmental policy, and immigration

ROSA-LINDA FREGOSO, Professor of Latin American and Latino Studies
Human-rights studies; intercultural and transborder feminism; cultural studies; Latino and Latin American film and media arts

SHANNON GLEESON, Assistant Professor of Latin American and Latino Studies
Migrant populations, the effects of documentation status, labor rights, civic engagement, inequality and stratification, political sociology, law and society, mixed methods and comparative approaches

WALTER L. GOLDFRANK, Professor Emeritus of Latin American and Latino Studies and Sociology

FLORA LU, Assistant Professor of Latin American and Latino Studies

Ecological anthropology, human behavioral ecology, Amazon rainforest, indigenous peoples, conservation, Ecuador, culture change, market integration, indigenous resource management, political ecology, environmental justice

MANUEL PASTOR JR., Professor of Latin American and Latino Studies

Urban poverty and regional development, Latinos in the urban U.S., environmental justice, macroeconomic stabilization in Latin America; distribution and growth in the developing world; Cuban economic reform; Mexican economic reform

HECTOR PERLA, JR., Assistant Professor of Latin American and Latino Studies

International relations; Latin American studies; Latino politics; political psychology; Central America; U.S. foreign policy; social and revolutionary movements; asymmetric conflicts

CECILIA M. RIVAS, Assistant Professor of Latin American and Latino Studies

Salvadoran transnationalism; media (Internet, newspapers); migration; globalization; race, ethnicity, and gender; bilingualism; consumption; El Salvador; Central America

PATRICIA ZAVELLA, Professor of Latin American and Latino Studies

Transnational migration by Mexicans, poverty, family, sexuality, labor, social networks, feminist studies, Chicano/Latino studies, ethnographic research methods

Participating Faculty

MARK D. ANDERSON, Assistant Professor of Anthropology

Racial formation, diaspora, nationalism, transnationalism, indigeneity, consumption, Central America, Honduras, Latin America, African diaspora

JEFFREY T. BURY, Assistant Professor of Environmental Studies

Political ecology; sustainable development; Latin American studies; international relations; institutional dimensions of natural resource conservation in the global south

PEDRO G. CASTILLO, Associate Professor of History

Chicano history and culture; American social and urban history; race, class, and gender in California history; immigration history, Latinos in the U.S.

CYNTHIA CRUZ, Assistant Professor of Education
Street ethnography; community-based learning and pedagogies; decolonial feminist pedagogies; Chicana studies and epistemologies; U.S.-Third World Feminisms; cultural studies and education

MARIA ELENA DIAZ, Associate Professor of History
Colonial Caribbean and Latin America; social and cultural history; ethnohistory; slavery, race, and gender

KENT H. EATON, Associate Professor of Politics
Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

LISBETH HAAS, Associate Professor of History
U.S.-Mexico borderlands, Chicano and Native American history; visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

NORMA KLAHN, Professor of Literature
Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography),

contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

LOURDES MARTÍNEZ-ECHAZÁBAL, Associate Professor of Latin American Literature

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[er]national narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

JUDIT MOSCHKOVICH, Professor of Mathematics Education

Mathematics cognition and learning; student conceptions of linear functions; discourse in mathematics and science classrooms; everyday mathematical practices; and bilingual mathematics learners

EDUARDO MOSQUEDA, Assistant Professor of Education

Mathematics education of English learners; large-scale dataset quantitative analysis; urban education issues

OLGA NÁJERA-RAMÍREZ, Professor of Anthropology

Folklore theory, ritual, festival, dance, greater Mexican culture, history and folklore, transnationalism, identity; expressive culture, ethnomusicology, bilingual communication, gender, history, and culture of Latin America, the U.S., and Mexico

MARCIA OCHOA, Assistant Professor of Community Studies

Gender and sexuality, race and ethnicity, Latino studies, media and cultural studies, ethnography of media, feminism, queer theory, multimedia production, Latin American studies—Colombia and Venezuela, political philosophy, geography

MATTHEW D. O'HARA, Assistant Professor of History

Modern Latin America and Mexico; late colonial Latin America; religion, spirituality, and ritual; urban history; race, ethnicity, and identity; political culture

JUAN POBLETE, Associate Professor of Literature
Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

CATHERINE RAMIREZ, Assistant Professor of American Studies

Chicana and U.S. Latino literature and history; gender studies and feminist theory; visual culture and style politics; cultural studies; popular and urban youth cultures; speculative fiction, comparative American studies

RENYA K. RAMIREZ, Associate Professor of American Studies

Native American studies, Indian identity, Native Americans and anthropology, urban Indians, Native American women, cultural citizenship, expressive culture, and anti-racist education

B. RUBY RICH, Professor of Community Studies
Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

BARBARA ROGOFF, Professor of Psychology
Human development in sociocultural activity; informal and formal arrangements for learning; adult/child and peer communication in families and schools in diverse cultural communities (especially in Guatemala, Mexico, and the U.S.); learning through observation and collaboration

GABRIELA SANDOVAL, Assistant Professor of Sociology

Latino/a sociology, voting and representational politics, urban sociology, political sociology

FELICITY SCHAEFFER-GRABIEL, Assistant Professor of Feminist Studies

Transnational feminism, migration, Latin American/Latino studies, Chicano/a studies, Internet, technology and the body, sexuality, gender and globalization

HELEN SHAPIRO, Associate Professor of Sociology
Political economy, Latin American economic history and development (with an emphasis on Brazil), industrial policy, the auto industry, the state and transnational corporations

Affiliated Faculty

JUDITH AISSSEN, Professor of Linguistics
Syntax, morphology, Optimality Theory, Mayan languages

JORGE ALADRO FONT, Professor of Spanish Literature
Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

CAROLYN DEAN, Professor of History of Art and Visual Culture
Cultural histories of the native Americas and colonial Latin America

ROBERT W. FAIRLIE, Associate Professor of Economics
Labor economics, public policy, entrepreneurship, applied econometrics

DANA FRANK, Professor of History
U.S. social and economic history; women, labor, and working-class history; contemporary political economy; modern Central America

GREGORY S. GILBERT, Professor of Environmental Studies
Tropical ecology and conservation, disease ecology

MARÍA VICTORIA GONZÁLEZ-PAGANI, Lecturer in Spanish Language
Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

MIRIAM GREENBERG, Assistant Professor of Sociology
Media studies, cultural studies, globalization, political and cultural economies of global cities, video production, and ethnography

KIRSTEN SILVA GRUESZ, Professor of Literature
Chicano/Latino literatures and cultures, Comparative Americas studies, language ideologies and bilingualism in literature

DANIEL GUEVARA, Associate Professor of Philosophy
Kant, moral philosophy, moral psychology, environmental ethics, history of modern philosophy

CRAIG HANEY, Professor of Psychology
Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

KAREN D. HOLL, Pepper-Giberson Professor, Environmental Studies
Restoration ecology, conservation biology, landscape ecology

AIDA HURTADO, Professor of Psychology
Social identity, feminist theory, social psychology of education, survey methodology

KENNETH KLETZER, Professor of Economics
International economics, macroeconomics, economic development

REGINA D. LANGHOUT, Assistant Professor of Psychology
School-community-university collaboration; how schooling and neighborhood experiences are informed by social class, race, and gender; participatory action research

JOHN LEAÑOS, Assistant Professor of Social Documentation
Social documentation, social art practice, community arts, documentary animation, Chicano/a art practice and cultural studies, media and cultural studies, subaltern studies, photography, installation art, public art and intervention

DEBORAH LETOURNEAU, Professor of Environmental Studies
Agroecology, tropical biology, insect-plant interactions, biological control as an alternative to chemical pesticides

DANIEL T. LINGER, Professor of Anthropology
Self and identity, politics, cultural theory, cities, violence, transnational experience, Brazil, Japan

PAUL M. LUBECK, Professor of Sociology
Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

ANDREW SALVADOR MATHEWS, Assistant Professor of Anthropology
Environmental anthropology, science and technology studies, conservation and development

LUCINDA PEASE-ALVAREZ, Associate Professor of Education
Language and literacy development, language-minority education, bilingualism, informal learning

JENNIFER POOLE, Assistant Professor of Economics
International trade, Latin American economics, applied microeconomics

MICHAEL ROTKIN, Lecturer in Community Studies
Marxist theory, capitalist system, community organizing, electoral politics, media, government programs, community power structure, institutional analysis, and affirmative action

DANIELA SANDLER, Assistant Professor of History of Art and Visual Culture
Modern and contemporary architecture and urbanism; visual and cultural studies; social inequality in space; architectural preservation; history and memory in the built environment; architecture and visual culture in Latin America and Europe, with foci on Brazil and Germany

ANA MARIA SEARA, Lecturer, Portuguese Language
Portuguese language; literature, film, and music of Brazil and the Portuguese-speaking world; acquisition and teaching of foreign, second, and heritage languages

DANA Y. TAKAGI, Professor of Sociology
Social inequality and identity, research methods, race relations, nationalism and social movements

KIP TELLÉZ, Associate Professor of Education
Preparation of teachers for linguistic and cultural diversity, second language learning, studies of the school curriculum, educational assessment

GUSTAVO VAZQUEZ, Assistant Professor of Film and Digital Media
Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

RASMUS WINTHER, Assistant Professor of Philosophy
Philosophy of science, epistemology, metaphysics, philosophy of biology, American pragmatism, Latin American philosophy, evolutionary theory

KAREN TEI YAMASHITA, Associate Professor of Literature (Creative Writing)
History and anthropology of Japanese immigration to Brazil, Asian American literature, modern fiction, playwriting

Program Description

The Latin American and Latino Studies (LALS) Department prepares students for bilingual and multicultural participation in a rapidly changing and globalized world. The Latin American and Latino Studies Department integrates the study of Chicano/a and Latino/a communities in the U.S. with analysis of the histories, politics, cultures, and societies of Latin America and the Caribbean. The field is inherently interdisciplinary, drawing on sociology, history, anthropology, political science, media studies, communications, economics, environmental studies, literature, and urban planning.

LALS courses deal with changing political, social, economic, and cultural realities, among Latin America and U.S. Latino and Latina communities in ways that recognize cross-cultural, or transnational processes. Key concepts and processes studied include: immigration and transnational migration; gender, racial, sexual, and ethnic identities; social movements; diverse forms of cultural expression and cultural politics; ongoing political and economic restructuring in Latin America; and the challenges of political and economic empowerment for Latino/a communities in the U.S. Students learn to formulate thoughtful, critical and clear arguments on controversial topics and communicate effectively, including beyond the English language.

In addition to academic knowledge, LALS also provides opportunities for students to acquire practical, real-world skills. Through program-related internship and field-study experiences, students can acquire useful, pre-professional skills in any of the following key areas: community development/advocacy, public policy, education, journalism, media, performance, and research/writing, among others.

Latin American and Latino studies courses span a number of disciplines and are augmented by courses taught by participating faculty in various departments. A sample list appears at the end of the course descriptions. The Latin American and Latino Studies Department compiles a quarterly list of these courses offered by other departments that are pre-approved and count toward the major; this list appears on the department's web site under "courses" and is frequently updated.

Graduates of the LALS major have made careers in a wide variety of fields, including teaching, community organizing, community and government service, journalism and the media, environmental science, global economics, health care, legal services, library science, music, publishing, and research. Many have gone on to pursue advanced degrees in the U.S. or abroad in anthropology, bilingual education, communications, cultural studies, ecology, economics, geography, history, law, literature, media, public health, and sociology—to name a few.

Major Requirements

Two lower-division courses are required for the major: LALS 1, *Introduction to Latin American and Latino Studies*, and one Latin American and Latino Studies 80 course or two chosen from the list below. Ideally students (fresh and transfer) should take LALS 1, and two courses from the LALS 80s series, prior to taking

LALS 100 *Concepts and Theories in Latin American and Latino Studies*, a required course to declare the major.

See the LALS lower-division course list below:

Latin American and Latino Studies

- 1 *Introduction to Latin American and Latino Studies*
- 80B *Social Movements in Latin America*
- 80D *Political Change in Mexico*
- 80E *Latin American Philosophy*
- 80F *Latinos in the U.S.A. : Comparative Perspectives*
- 80G *Race, Class, and Gender*
- 80H *Comparative Latino/a Histories*
- 80I *Gender and Global Cinema*
- 80J *Race, Nation, and War*
- 80K *Latinos and Organized Labor in the U.S.*
- 80P *Energy, Society and Ecology in Latin America*
- 80Q *Música Latina*
- 80R *Organizing Across the Americas*
- 80S *Sexualities and Genders in Latin American and Latino Studies*
- 80T *Topics in Latin American and Latino Studies Cinema*
- 80W *Transnational Feminist Organizing in the Americas*
- 80X *Central American Peoples and Cultures*

Anthropology

- 80G *Barrio Popular Culture*
- 80I *Culture and Power in Latin America*

Environmental Studies

- 80A *The Future of Rain Forest*

History

- 11A *Latin America: Colonial Period*
- 11B *Latin America: National Period*
- 80N *Women at Work*

History of Art and Visual Culture

- 60 *Indigenous American Visual Culture*

Spanish /Latin American/Latino Literature

- 60 *Introduction to Literary Genres*
- 80N *Latino Expressions in the U.S.*

Music

- 4A and 4B *Latin American Ensembles* (three quarters fulfill one lower-division elective)
- 11D *Introduction to World Music*
- 80F *Music in Latin American Culture: Regional Traditions*

Philosophy

- 80E *Latin American Philosophy*

Sociology

- 15 *World Society*

Theater

- 80M *Chicano Teatro*

Other courses numbered 1–80 on Latin American and/or Latino/a subjects may be substituted with approval in advance from the Latin American and Latino Studies Department.

Courses with similar content taken at other institutions may be substituted with approval from the Latin American and Latino Studies Department.

In addition, all majors must complete 10 upper-division courses, including three required core courses, (no substitutions):

Latin American and Latino Studies

- 100 *Concepts and Theories in Latin American and Latino Studies*
- 100A *Politics and Society: Concepts and Methods*

100B *Culture and Society: Culture in a Global Context*
The remaining seven electives must meet the following criteria:

- A cluster of three courses must be taken in one of the following areas of concentration: 1) transnational migrations; 2) social inequalities; 3) collective action and social movements; 4) cultural politics and cultural flows. Courses may be taken in any department, as long as they fit into the cluster and appear on the LALS list of course offerings.
- At least one course must concentrate on pre-WWII topics
- At least one course must center on Chicano/a-Latino/a issues
- At least two courses must be taught in Spanish or Portuguese***

***Upper-Division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Language Requirements

All Latin American and Latino studies majors are expected to learn to speak, read, and write Spanish or Portuguese and to make use of these skills on a regular basis in their upper-division academic work. Majors must take at least two upper-division courses taught in Spanish or Portuguese. Before taking upper-division course work taught in the language, students must demonstrate proficiency in Spanish equivalent to the completion of Spanish 6 or 56, or Spanish for Spanish Speakers 63. Students who wish to pursue Portuguese may take the Portuguese 1A/1B or 60A/60B series. Students who have achieved fluency in Spanish or Portuguese through life experience may be exempt from this recommended preparatory course work after demonstration of their proficiency. In addition to Latin American and Latino studies and affiliated department course offerings, the required two upper-division courses taught in Spanish or Portuguese*** may be fulfilled through study abroad with prior approval by Latin American and Latino Studies. Students may also pursue internship or field study opportunities to satisfy one of the two required upper-division courses taught in Spanish or Portuguese; however, at least one of the two courses must be fulfilled in a classroom setting.

Field-Study and Internship Opportunities

All majors are strongly encouraged to undertake either a field study in Latin America, the Caribbean, a Latino/a community in the U.S., or formal academic study abroad through the Education Abroad Program (EAP). These paths are the best ways to improve language skills, explore the nature and direction of specific academic and career interests in relation to Latin American and Latino studies, and deepen cross-cultural understanding and relationships based upon personal experience.

Field studies are independent, community-based study projects for academic, credit, done under faculty sponsorship and arranged on an individual basis. Local opportunities for internships and field study in Latino/a communities on California's Central Coast are numerous. Credit for up to three upper-division courses may be applied toward the major from field study; however, course credit from field study and study abroad combined may not exceed three upper-division courses. Students should check the Latin American and Latino Studies Department web site for further information regarding the field-study process and course credit. A

listing of local field-study programs and petition forms are available at the Latin American and Latino Studies Department office, 32 Merrill.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in Latin American and Latino studies and the combined majors with global economics, literature, politics, and sociology are met by completing courses 100A and 100B.

Study Abroad

Students may apply to study abroad through the Education Abroad Program (EAP). EAP offers opportunities for students to study in Mexico City, Mexico; Santiago, Chile; Rio de Janeiro or Bahia, Brazil; and Madrid, Córdoba, Granada, and Barcelona in Spain. In addition to language and culture and university immersion programs, EAP also offers a Field Research Program in Mexico, an experiential program geared toward juniors and seniors who want to explore the "real" Mexico outside the classroom and at the same time receive undergraduate research training. The program has research sites in states such as Jalisco, Yucatán, Oaxaca, or Michoacán (final site choice depends on the research topic). Application deadlines are generally about one year in advance of the program, so students should visit the UCSC International Education Office early to plan for study abroad and to begin the application process. The department will approve courses taken abroad that cover topics appropriate to the LALS curriculum for upper-division credit toward the major. All credit for EAP classes is fully incorporated into students' UCSC transcripts. Financial aid applies to all programs and takes into account airfare and living costs in addition to tuition and fees. Before departure, students should present an academic plan for courses abroad to the department adviser for review. Credit for up to three EAP courses can be applied toward the major. (A maximum of three courses of field study and EAP combined can be applied toward the major requirements.)

Senior Comprehensive Requirement

Every major must complete a senior exit requirement in order to graduate. The preparation and completion of this requirement is structured into the senior year. There are five options to choose from:

- Enrollment in a Latin American and Latino Studies senior seminar (194 series), with good to excellent performance, including the submission of the required final research paper, a total of 25 pages written during the course of the quarter.
- An expanded research paper, a minimum of 20 pages in length. This paper often builds on related course work and requires approval from the relevant faculty adviser before the end of the winter quarter of the senior year. Students must be enrolled in an independent-study tutorial to complete this paper.
- A senior thesis, generally between 40–60 pages, based on two or more quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (done by petition to LALS, and with the approval of the faculty adviser). If the thesis option is selected

by a combined major, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member is affiliated with both departments.

- A senior project, which can be either a creative project or a community-action project. Creative projects include web site design, video, performance, slide show, photo exhibit, or other media work. A short written analysis of the student's experience in conducting the project is required. Community-action projects often involve sustained research and/or activity conducted in a community organization or public interest group, usually stemming from an internship. A 10-page description and analysis of the project is required.
- The student-directed seminar option is available to unusually qualified students only. It requires three quarters of preparation directed by a faculty adviser and approval by the Academic Senate Committee on Educational Policy prior to teaching the course. The class is limited to 15 students. This option can be taken only by petition to LALS and with the approval of the faculty adviser.

Latin American and Latino Studies Major Planners

The following are two recommended academic plans for undertaking basic preparation for the Latin American and Latino studies major. Plan One is a guideline for students who commit to the major early in their academic career. Plan Two is for transfer students.

Plan One—Frosh

| Year | Fall | Winter | Spring |
|---------------|--|--|--|
| 1st (frsh) | SPAN 1 LALS 1 | SPAN 2 LALS 80 | SPAN 3 LALS 80 |
| 2nd (soph) | SPAN 4 or SPSS 61 LALS 100 | SPAN 5 or SPSS 62 LALS 100A | SPAN 6 or 56 or SPSS 63 LALS 100B |
| 3rd (jr) | LALS upper- division course | LALS upper- division course | LALS upper- division course |
| 4th (sr) | LALS upper- division course LALS upper- division course | LALS upper- division course LALS upper- division course | LALS 194 (Senior- Exit Requirement) LALS upper- division course |

Plan Two—Junior Transfers

| Year | Fall | Winter | Spring |
|-------------|--|--|---|
| 3rd (jr) | SPAN 4 or SPSS 61 LALS 100 LALS 80 | SPAN 5 or SPSS 62 LALS 100A LALS 80 | SPAN 6 or 56 or SPSS 63 LALS 100B LALS upper- division course |
| 4th (sr) | LALS upper- division course LALS upper- division course | LALS upper- division course LALS upper- division course | LALS upper-division course LALS 194 (Senior- Exit Requirement) |

Combined Majors

The combined major options, requiring fewer courses than a double major, are established with the global economics, literature, politics, and sociology programs.

Latin American and Latino Studies/Global Economics

Students are required to take a total of 18 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/global economics, students complete a total of seven lower-division course requirements for both the Latin American and Latino studies and global economics majors. Students are assigned a faculty adviser from each discipline. Upper-division course requirements include Economics 100A, 100B, and 113; LALS 100, 100A, and 100B; and five additional elective courses, two from economics and three from Latin American and Latino studies. Two of the upper-division courses must be taught in Spanish or Portuguese*** and two to four (at least one quarter) must be courses of academic study abroad, internship, or field study in a Spanish- or Portuguese-speaking country. The comprehensive requirement is met by the completion of a senior thesis on a topic suitable to both global economics and Latin American and Latino studies, supervised by a faculty member from either department and read and approved by the student's advisers from both departments.

***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Latin American and Latino Studies/Literature

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. Students complete a total of two lower-division course requirements. One of the lower-division LALS classes must be LALS 1 or LALS 80 and one of the lower-division classes must be Spanish Literature 60 or a Literature 80 series course in a relevant area of study. For transfer students, a petition can be made to replace the LALS 1 or 80 course with an appropriate course from another institution.

Upper-division requirements include five core courses, LALS 100, 100A, 100B, Spanish Literature 102A, and Spanish Literature 102B; and six additional elective courses, three from Spanish Literature and three from LALS. At least four of the upper-division courses must be taught in Spanish or Portuguese*** (with at least one taught by LALS core or participating faculty), and at least one of the Literature courses must address theoretical concerns. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by both departments. To complete the comprehensive requirement, students can write a senior thesis (by petition), enroll in an appropriate LALS Seminar (194 series), or enroll in an appropriate Literature Senior Seminar in the area of concentration. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments. Both departments must approve a study plan before the major can be declared.

***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Latin American and Latino Studies/Politics

Students are required to take a total of 13 courses and to satisfy a senior comprehensive requirement. For the combined major in Latin American and Latino studies/politics, students complete two lower-division course requirements. One of the lower-division courses must be LALS 1 or 80, the other one course from

Politics 1–79. For transfer students, a petition may be made to substitute Latin American and Latino studies LALS 1 or 80, or one course from Politics 1–79) with appropriate course work from another institution. The 11 upper-division courses include three core course requirements (LALS 100, 100A and 100B), and Politics 100 and 140C, three courses from any Politics Department sequences (comparative, American, international, and theory), and four upper-division electives. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese***, and at least one course in the politics/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. To complete the senior comprehensive requirement, students may take either a Politics (190) or LALS (194) senior seminar. ***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Latin American and Latino Studies/Sociology

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are three lower-division course requirements, two from the Sociology Department and one from Latin American and Latino Studies Department. The lower-division LALS courses must be LALS 1 or 80; transfer students may petition to replace the LALS 1 or 80 with an appropriate course from another institution. Upper-division requirements include seven core courses: LALS 100, 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese***, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: (1) writing a senior thesis, (2) passing an appropriate LALS Senior Seminar (194 series), or (3) completing the sociology course option of two additional sociology upper-division courses in Inequality and Social Change. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments. ***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Honors in the Major

The LALS faculty considers awarding honors in the major based on overall student academic performance in courses that count towards the major. To be considered for honors, narrative evaluations must indicate either consistently excellent performance or a pattern of increasingly improved performance, which reaches and maintains consistent excellence during the last several quarters. For combined majors, student work must be judged honors-level in both departments; the LALS faculty cannot award honors in the major unless the other department also confers honors. To receive the strongest consideration for honors in the major the following grade point average (GPA) criteria must be met: highest honors, 4.0; honors, 3.7. Students with a 3.5–3.7 GPA

in the major go under review, and a decision is made based on their evaluations, grade on core courses, and improvement over time.

LALS also awards honors for the thesis, creative or community action projects, or student taught seminars, by the recommendation of the faculty adviser. Note that a thesis, a creative/community project, or a student-taught seminar are the only senior exit requirement options that qualify for this distinct honors designation. Expanded papers and senior seminars do not qualify for a separate honors designation, but students who choose these options may still qualify for honors in the major.

Minor Requirements

The minor in Latin American and Latino studies consists of seven courses, including two lower-division courses (LALS 1 or an 80s series course) and five upper-division courses (including LALS 100 or LALS 100A or 100B and any other four upper-division courses that count towards the major). Knowledge of Spanish and/or Portuguese is highly recommended, but not required for the minor.

Graduate Studies

The Department of Latin American and Latino Studies offers a designated emphasis in Latin American and Latino studies for Ph.D. students in anthropology, education, environmental studies, history, history of consciousness, literature, psychology, politics, and sociology. This designated emphasis in Latin American and Latino studies provides graduate students with opportunities for interdisciplinary study with faculty from across the campus. Completion of the program will be listed on the graduate degree as a designated emphasis. The request must originate in the degree-granting department. Students in other departments wishing to pursue a designated emphasis in Latin American and Latino studies should consult with the chairs of their respective Ph.D. programs and of Latin American and Latino studies. A list, updated annually, of regularly offered approved graduate courses is available in the Latin American and Latino Studies Department office and web site at <http://lals.ucsc.edu>. Graduate students are encouraged to complete the application to the designated emphasis, available at the Latin American and Latino Studies Department, no later than their third year.

Requirements for the Designated Emphasis

Committee Composition. The student must have a designated graduate adviser from among the Latin American and Latino studies core, participating, or affiliated faculty. This adviser will be in addition to the graduate adviser from the student's home department. The Latin American and Latino studies adviser must serve on the student's qualifying examination committee and/or on the student's dissertation committee.

Writing. The student must prepare a significant piece of writing in the area of Latin American and Latino studies. This writing may take the form of a substantial seminar paper, master's essay, or doctoral dissertation chapter.

Course requirements. The student must take five graduate courses in Latin American and Latino studies, including the required LALS 200 and LALS 297. The remainder can be selected from appropriate graduate offerings of any UCSC department, as long as they are taught by core, participating, or affiliated Latin American and Latino studies faculty.

Teaching. The student must serve as a teaching assistant in at least one Latin American and Latino studies

course or teach a Latin American and Latino studies course independently in the regular curriculum or in Summer Session.

Courses. Graduate course work in Latin American and Latino studies is available both in the Latin American and Latino Studies Department and in other UCSC departments. Graduate courses to date in the Latin American and Latino Studies Department include

- 200 *Bridging Latin American and Latino Studies*
- 210 *Latina Feminisms: Theory and Practice*
- 212 *Latino Ethnographic Practice*
- 215 *Latina Cultural Studies; Transborder Feminist Imaginaries*
- 220 *Transnational Civil Society: Limits and Possibilities*
- 230 *Political Ecology in Latin America*
- 240 *Culture and Politics of Human Rights*
- 242 *Globalization, Transnationalism, and Gender in the Americas*
- 244 *U.S. Political Relations with Latin America*
- 297 *Independent Study*
- 299 *Thesis Research*

Additional Upper-Division Courses of Interest

American Studies

- 122 *Immigration and Assimilation*
- 157 *Sexual Identities and Communities: Tracing Latino Theory*

Anthropology

- 138B *Brazil*
- 130F *African Diasporas in the Americas*
- 130L *Latin American Ethnography*
- 130M *Inside Mexico*

Community Studies

- 185 *Gender and Sexuality in Latin America*

Economics

- 148 *Latin American Economies*

Education

- 128 *Immigrants and Education*
- 141 *Bilingualism and Schooling*
- 181 *Race, Class, and Culture in Education*

Environmental Studies

- 122 *Tropical Ecology and Conservation*
- 143 *Sustainable Development: Economy, Policy, and the Environment*

Feminist Studies

- 115 *Gender, Sexuality, and Transnational Migration Across the Americas*
- 120 *Transnational Feminisms*
- 194F *Chicana/Latina Cultural Productions*

History

- 123B *U.S. Immigration: 1877 to Present*
- 125 *California History*
- 126 *History of the Southwest: Colonial Period to 1920*
- 128 *Chicana History*
- 130 *History of Modern Cuba*
- 131 *Women in Colonial Latin American History*
- 132 *History of the Caribbean: Colonial Period*
- 134B *History of Mexico, 1850 to Present*
- 190A *Slavery and Race in Latin America*
- 190B *Race and the Nation in Latin America*
- 190C *American Race, Class, and Gender History*

190T *Latin America in the Cold War*

History of Art and Visual Culture

- 143 *Latin American Modern Architecture*
- 140D *Chicano/Chicana Art: 1970-Present*
- 160A *Topics in Pre-Hispanic Visual Culture: Mexico*
- 160B *Topics in Pre-Hispanic Visual Culture: The Andes*
- 162A *Advanced Studies in Pre-Hispanic Visual Culture: The Maya*
- 163 *The Native in Colonial Spanish America*
- 191B *The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S.*

Spanish/Latin American/Latino Literature

- 102A *From the Conquest to Sor Juana*
- 130E *Latin American Poetry*
- 131H *National Literatures of Latin America: Cuba*
- 134G *Popular Culture in Latin American Narrative*
- 134M *Literatura y Modernidad*

Politics

- 140C *Latin American Politics*
- 190V *Problems in Latin American Politics*

Psychology

- 157 *Chicana Feminism* (also offered as Feminist Studies 151A)
- 159K *Advanced Topics in Chicana Feminism* (also offered as Feminist Studies 151B)

Sociology

- 122C *Chicanos/as and the Law*
- 156 *Latino Identity*
- 165 *World Systems Perspective*
- 177A *Latinos/as and the American Global City*

Spanish

- 156A *Topics in Hispanic Language and Culture: Hispanic Culture Through Film*
- 156F *Topics in Hispanic Language and Culture: El Humor en Español*

Spanish for Spanish Speakers

- 125 *Mexico and the Southwest*

The above is a partial list of upper-division courses taught by Latin American and Latino Studies participating and affiliated faculty based in other departments. A complete list of interdisciplinary course offerings approved for the Latin American and Latino Studies major and minor is published prior to each academic quarter on the department web site: <http://lals.ucsc.edu>.

Lower-Division Courses

1. Introduction to Latin American and Latino Studies. F/S

Interdisciplinary introduction presenting the elements for studying Latin American culture, society, economics, and politics, as well as the dynamics of Latino communities in the U.S. Special attention paid to issues of race, gender, and class, to emerging political and economic shifts in the Americas, and to new local and transnational efforts for social change on the part of Latin America's peoples and Latinos in the U.S. (General Education Code(s): ER, IS, E.) *The Staff*

42. Student-Directed Seminar.

Seminar taught by upper-division student under faculty supervision. Requires prior approval by Latin American and Latino Studies Department and two quarters (fall, winter) of supervised preparation prior to teaching in spring quarter. (See course 192). *The Staff*

80B. Social Movements in Latin America. *

Examines contemporary social movements in Latin America, especially those that arose from popular response to different forms of social exclusion and to authoritarian political systems. Explores a variety of popular movements, their successes and setbacks, including rural and urban uprisings, native nations and their descendants, women, African descendants, labor, environmental and grassroots movements. Enrollment limited to 60. (General Education Code(s): CC, T3-Social Sciences, E.) *H. Perla*

80D. Political Change in Mexico. *

Reviews broad trends in contemporary Mexican politics against the backdrop of long-term historical, social, and economic change throughout the 20th century, analyzing how power is both wielded from above and created from below. The course covers national politics, grassroots movements for social change and democratization, environmental challenges, indigenous movements, the media, and the politics of immigration and North American integration. (General Education Code(s): CC, T3-Social Sciences, E.) *J. Fox, The Staff*

80E. Latin American Philosophy. W

Is there a general school of philosophy endemic to Latin America? Would it have to appeal to quintessential Western philosophical questions regarding knowledge, values, and reality? If not, why not, and would it then still count as philosophy? What difference do ethnic and national diversity, as well as strong political and social inequality, make to the development of philosophical questions and frameworks? Course explores a variety of historically situated Latin American thinkers who investigate ethnic identity, gender, and socio-political inequality and liberation, and historical memory, and who have also made important contributions to mainstream analytical and continental philosophy. (Also offered as Philosophy 80E. Students cannot receive credit for both courses.) (General Education Code(s): T4-Humanities and Arts, E.) *R. Winther*

80F. Latinos in the U.S.: A Comparative Perspective. *

Analyzes the Latino experience in the U.S. with a special focus on strategies for economic and social empowerment. Stresses the multiplicity of the U.S. Latino community, drawing comparative lessons from Cuban-American, Puerto Rican, Chicano/Mexicano, and Central American patterns of economic participation and political mobilization. (General Education Code(s): ER, T3-Social Sciences, E.) *The Staff*

80G. Race, Class, and Gender. F

Examines the economic, social, political, and cultural experience of communities of color (Latinas/os, African Americans, Asian Americans, and Native Americans) and women in the U.S., through a sociological perspective. Using quantitative and qualitative methods, the relationship among individual actions, social institutions, societal forces, and social change are analyzed. Enrollment limited to 80. (General Education Code(s): ER, T3-Social Sciences, E.) *S. Gleeson*

80H. Comparative Latina/o Histories. W

Designed to survey recent works in the field of Latina and Latino histories, with particular emphasis on historiographical approaches and topics in the field. Readings are chosen to expose a selection of the varied histories and cultures of Latina/os in the U.S., and focus primarily on Mexicans, Puerto Ricans, and Cubans. (General Education Code(s): CC, T3-Social Sciences, E.) *G. Arredondo*

80I. Gender and Global Cinema. *

Applies critical and historical approaches to the study of gender in global cinema. Introduces students to different

aesthetic and cross-cultural approaches to representing gender in contemporary film. Focuses on films, documentaries, and video works from the Americas as well as from other regions of the global South. Enrollment limited to 80. (General Education Code(s): CC, T3-Social Sciences, E.) *R. Fregoso*

80J. Race, Nation, and War. *

Evaluates the relationship between processes of racial formation, war, and nationalism in Latin America. Case studies range from the wars of independence to more recent forms of transnational violence. Students engage historical and anthropological perspectives and critiques of modernity. Enrollment limited to 80. (General Education Code(s): ER, T3-Social Sciences, E.) *C. Rivas*

80K. Latinos and Organized Labor in the U.S. *

Students learn about the role of Latinos in different forms of U.S. organized labor (including, but not limited to, traditional unions). Focus is on organizing in several 20th-century, low-wage industries, as well as organizations representing Latino professionals. Enrollment limited to 80. (General Education Code(s): ER, T3-Social Sciences, E.) *S. Gleeson*

80P. Energy, Society, and Environment in Latin America. W

From petroleum extraction to hydroelectric power to ethanol production, Latin America is an important provider of the world's energy. Course examines the implications of this process for economic growth, climate change, environmental degradation, social inequality, and poverty. (Formerly Energy, Society, and Ecology in Latin America.) Enrollment limited to 80. (General Education Code(s): PE-E, T3-Social Sciences, E.) *F. Lu*

80Q. Musica Latina: Music of Latin America and the Caribbean. S

Surveys various musical forms and styles that have developed in Latin America and Latino communities in the U.S. Discusses concept of hybridity and grapples with this as a central issue in the evolution of Latin American/Latino music. Addresses migration of music, which not only contributes to its distribution but also to the evolution of musical practices of forms, styles and genres across borders. (Formerly *Musica Latina*.) (General Education Code(s): CC, T3-Social Sciences, E.) *The Staff*

80R. Organizing Across the Americas. F

Analyzes the range of theory and practice that emerged from and shaped significant social movements during the rise and fall of United States hegemony. Focuses on social struggles and revolutions in five distinct locations across the Americas: the United States (United Farm Workers--UFW), Cuba (Movimiento 26 de Julio--M26), Nicaragua (Frente Sandinista de Liberación Nacional--F.S.L.N.), Mexico (Zapatistas), and Brazil (Movimento dos Trabalhadores Rurais Sem Terra--MST). Enrollment limited to 80. (General Education Code(s): T3-Social Sciences, E.) *J. Borrego, The Staff*

80S. Sexualities and Genders in Latin American and Latina/o Studies. *

Introduction to issues and themes surrounding sexualities and genders within Latin American and Latina/o studies. Provides background in the basic theoretical and historical frameworks of gender and its relationship to sexuality. In addition to cross-border perspectives, course also examines how gender and sexuality are structured and experienced through other social categories. Enrollment limited to 80. (General Education Code(s): CC, T3-Social Sciences, E.) *The Staff*

80T. Topics in LALS Cinema. *

Lower-division offering on a topic of particular cultural,

historical or contemporary interest in the field of Latin American and Latino/a cinema. Enrollment limited to 80. (General Education Code(s): T3-Social Sciences, E.) *The Staff*

80W. Transnational Feminist Organizing in the Americas. F

Explores key aspects of transnational feminist organizing in the Americas, including the genealogy of transnational feminist theory and feminist perspectives on development in Latin America and the Caribbean. Analyzes how women from Latin America organize in response to their living conditions across gender, race, ethnicity, and national borders. *S. Falcon*

80X. Central American Peoples and Cultures. S

Examines contemporary societies and peoples of Central America considering how, in recent decades, media, history, war, cultural production, and migration have shaped Guatemala, Honduras, El Salvador, Nicaragua, and Costa Rica both as individual nations and as a region. Enrollment limited to 80. (General Education Code(s): CC, T5-Humanities and Arts or Social Sciences, E.) *C. Rivas*

81A. Mexican Folklórico Dance (2 credits). F

Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklórico dance. Students taught choreographed dances from various regions of Mexico and also learn dance techniques (técnica) and stage make-up application. Additional workshops and lectures offered to supplement class. Open to all students; no previous experience required. (Also offered as Anthropology 81A. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): A.) *O. Nájera-Ramírez*

81B. Mexican Folklórico Dance (2 credits). W

Second course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklórico dance. (Also offered as Anthropology 81B. Students cannot receive credit for both courses.) May be repeated for credit. (General Education Code(s): A.) *O. Nájera-Ramírez*

81C. Mexican Folklórico Dance (2 credits). S

Third course in series. Provides instruction in the aesthetic, cultural, and historical dimensions of Mexican folklórico dance. (Also offered as Anthropology 81C. Students cannot receive credit for both courses.) Prerequisite(s): course 81A or 81B. May be repeated for credit. (General Education Code(s): PR-C, A.) *O. Nájera-Ramírez*

*Upper-Division Courses***100. Concepts and Theories Latin American and Latina/o Studies. F/W**

Interdisciplinary exploration of transnational migrations; social inequalities; collective action and social movements; and cultural productions, products, or imaginaries. Examines how transnational migration and hemispheric integration are transforming Latin American studies and Chicana/o-Latina/o studies. Explores the influence of neoliberalism and globalization, especially the intersection of critical analysis and social-justice praxis. Completion of course 1 highly recommended. (Formerly course 10, Bridging Latin American and Latina/o Studies) Enrollment restricted to sophomores, juniors, and seniors. (General Education Code(s): ER, E.) *P. Zavella*

100A. Politics and Society: Concepts and Methods. W

Focuses on social science issues through the interdisciplinary analysis of power relations. Compares diverse analytical strategies, assesses contending explanations, and builds practical research skills in the field of Latin American and

Latino Studies. Topics change yearly, but can include environmental justice, access to education, political participation, gender, and migration. Prerequisite(s): course 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors or by permission. (General Education Code(s): E.) *J. Fox*

100B. Culture and Society: Culture in a Global Context. S

Focuses on transnational, regional, and local features of Latina/o and Latin American cultural production and artistic expression: how culture is shaped by historical, social, and political forces; how cultural and artistic practices shape the social world; and how culture is produced in an interconnected, postindustrial, and globalized economy. Prerequisite(s): courses 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors. (General Education Code(s): E.) *R. Fregoso*

100W. Politics and Society: Concepts and Methods (7 credits). W

Focuses on social science issues through the interdisciplinary analysis of power relations. Compares diverse analytical strategies, assesses contending explanations, and builds practical research skills in the field of Latin American and Latino Studies. Topics change yearly, but can include environmental justice, access to education, political participation, gender, and migration. Prerequisite(s): courses 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors with global economics, sociology, literature, and politics. Students cannot receive credit for this course and course 100A. (General Education Code(s): W, E.) *J. Fox*

101. Using Media. *

Hands-on survey of print, broadcast, audiovisual, and electronic media. Students complete and present a dozen different media production assignments as part of permanent portfolio. Assignments have Latino/Latin American focus. Peer critique of media projects. Prerequisite(s): concurrent enrollment in course 101L. (General Education Code(s): E.) *The Staff*

101L. Using Media: Video Laboratory (2 credits). *

Trains students in the fundamentals of video preparation, production and post-production through Social Sciences Media Laboratory. Prerequisite(s): concurrent enrollment in course 101. *The Staff*

111. The U.S.-Mexican Border Region. *

Global and national forces have transformed the 2,000-mile United States/Mexico border region into a site for world market factories. Analyzes how this transformation has affected workers and communities and systematically reviews subjective responses. (General Education Code(s): E.) *J. Borrego, The Staff*

122. Media and Nationalism. F

Evaluates the links between media and the production of national identities in Latin America. Focuses on theories of nationalism, media, and globalization to examine the production of national histories and representations. Enrollment restricted to juniors and seniors. Enrollment limited to 40. (General Education Code(s): E.) *C. Rivas*

126A. Global Capitalism and Community Restructuring. *

Examines how Watsonville (U.S.) and Irapuato (Mexico) are being restructured by national development, North American economic integration (NAFTA), and global capitalism. Explores the relentless penetration of market imperatives, their impact on the communities, and community response; costs/benefits of being abandoned by or being attractive to global capital; and how people are surviving—scrambling to find jobs, keeping families together, and engaging in binational strategies for survival. Prerequisite(s): permission of instructor; concurrent enrollment in laboratory course 126B. Enrollment limited to 25. (General Education Code(s): IS, E.) *J. Borrego*

126B. Voices from the Watsonville Community. *

Weekly Wednesday evening seminar in Watsonville allows students to interact with local workers, organizers, immigration and citizenship NGO's, affordable housing non-profits, entrepreneurs, large commercial developers, county planners, city managers, PVUSD educators, health activists, politicians, commercial and organic farmers, food processing owners/plant managers, and environmentalists, in order to develop a deeper understanding of the past, present, and future of the community and the region. Class will present findings and interact with panel of community members on a Saturday morning during first weekend of spring quarter. Prerequisite(s): concurrent enrollment in course 126A. Enrollment limited to 25. (General Education Code(s): IS, E.) *J. Borrego*

128. Latino Media in the U.S. *

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role that media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor. (Also offered as Writing 128. Students cannot receive credit for both courses.) Enrollment limited to 39. (General Education Code(s): IM, E.) *The Staff*

129. Women Filmmakers: Latin American and Latina. *

Focuses on the work of a dozen major Latin American and Latina filmmakers from Argentina, Brazil, Venezuela, Mexico, and the U.S., including Maria Luisa Bemberg, Maria Navaro, Matilde Landeta, Lourdes Portillo. Examines contemporary films, from 1960 to present. (General Education Code(s): IM, E.) *R. Fregoso*

140. Rural Mexico in Crisis. *

Focuses on political, social, economic, and environmental changes in rural Mexico from the 1910 revolution through the Zapatista rebellion. Emphasizes the interaction between the state, markets, and rural civil society, covering agrarian reform, agricultural policy, grassroots development initiatives, democratization, indigenous movements, natural resource management, and migration. Prerequisite(s): Previous completion of course 80D recommended. Enrollment restricted to juniors and seniors. Sophomores may enroll with permission from instructor. (General Education Code(s): CC, E.) *J. Fox*

143. Race and Ethnicity. *

Race and ethnicity have been—and continue to be—powerful forces shaping the U.S. experience. This course examines a range of conceptual approaches and monographic studies grounded in the history of the U.S. The readings provide various criteria for studying and understanding these phenomena. The course problematizes "race" by asking what the readings tell us about "race-making" and the reproduction of racial ideologies in spe-

cific historical contexts. Similarly, "ethnicity" is treated as a historically specific social construct. (General Education Code(s): ER, E.) *G. Arredondo*

143J. Global Political Economy. F

Analyzes the global, social, economic, and political forces that shape transnational, national, and regional societal formations and consequently the entire environment for social change. Examines the evolution of revolutionary struggle and its origins within and impact upon the evolving capitalist system. *J. Borrego, The Staff*

144. Mexicana/Chicana Histories. *

Explores current historical and theoretical writings on the lived experiences of Chicanas and Mexicana women in U.S. history. Themes include domination/resistance politics, (re)presentations, contestation, social reproduction, identity and difference. (Formerly Chicanas/Mexicanas in the U.S.) (General Education Code(s): TA, E.) *G. Arredondo*

145. Grassroots Social Change in Latin America. *

Focuses on the analysis of collective action by underrepresented groups in Latin America. Concepts and issues include political participation and impact, gender, ethnicity and race, class, the environment, religion, non-governmental organizations, and social capital. Prerequisite(s): any two Latin American and Latino studies courses or permission of instructor; open to graduate students. Enrollment limited to 40. (General Education Code(s): CC, E.) *H. Perla*

149. Theories and Actors: U.S.-Latin American Policy Formation. *

Examines how domestic political considerations and transnational forces influence the formation of U.S. foreign policy, specifically in the context of relations with Latin America. Explores the impact of institutional, electoral, and psychological pressures, public opinion, interest groups, non-state actors, and the media on decision-making regarding U.S. foreign policy toward Latin America. Enrollment limited to 40. (General Education Code(s): PE-H.) *H. Perla*

152. Consumer Cultures Between the Americas. W

Examines the circuits of media, commodities, and migration connecting the Americas in an age of globalization. Issues of states, transnational markets, social relations, and cultural representations addressed. Relationship between consumption, nationalism, and globalization is considered critically. (Formerly Media and Commodities Between the Americas.) Enrollment limited to 40. (General Education Code(s): CC, E.) *C. Rivas*

160. North American Integration: Post-NAFTA. *

Analyzes the multi-dimensional process of integration in North America via NAFTA. Covers issues of trade and investment flows between Canada, the U.S., and Mexico, including important legislative, scientific, technological, cultural, and political components, as well as social dislocations and political challenges associated with NAFTA. (General Education Code(s): E.) *J. Fox, J. Borrego*

161P. Theater in the "Chicano Power" Movement. *

Covers the rise of Teatro Chicano as a cultural-political force within the 1960's "Chicano Power" Movement starting with founding playwright Luis Valdez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez. (Also offered as Theater Arts 161P. Students cannot receive credit for both courses.) (General Education Code(s): A, E.) *The Staff*

163. America in Flux: Population Dynamics in the U.S. S

Examines key theories of demographics change in important policy issues, such as the aging of America, racial categorization, and immigration. Explores political and economic factors that have led to the changing face of the U.S. over the last century and key legislative changes that have changed the experience of immigrants. Students use primary demographic data from the U.S. Census Bureau and learn basic tools for demographic data access and presentation. Prerequisite(s): course 100A or by permission of instructor. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 40. (General Education Code(s): PE-H, E.) *S. Gleeson*

164. Environmental Justice. S

Introduces students to participatory-action research, which both creates positive social-environmental change and contributes to scientific knowledge. Through collaboration with environmental justice organizations, students develop research skills, hone critical reflection abilities, and understand the connections between race, ethnicity, power, poverty, and environmental problems. (Formerly Action-Research for Social Change, Environmental Quality: Lessons Learned from Latin America, U.S.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 35. (General Education Code(s): PE-E, E.) *F. Lu*

166. Latino Families in Transition. S

Explores the complex nature of Latino families in the U.S., which like other American families are undergoing profound changes. Placing families within a historical context of post-1960s social transformations, such as feminism, migration, "reconstructed" or multiple-earner households, examines how family members adapt, resist, and/or construct alternative visions and practices of family life. Prerequisite(s): course 1. Enrollment limited to 40. (General Education Code(s): ER, E.) *P. Zavella*

167. Amazonian Societies and the Environment. W

Overview of Amazonian societies and the environment from both a historical and contemporary perspective. Topics include indigenous resource management, hunting and conservation, and the ecological impacts of culture and economic change. Enrollment limited to 40. (General Education Code(s): PE-E, E.) *F. Lu*

168. Economic History of Latin America. *

Sheds light on Latin America's contemporary social and economic developments by providing an appreciation of their historical roots. Focusing on the period from independence until WWII, evaluates contesting explanations for Latin America's relatively poor economic performance and divergent policy implications. Prerequisite(s): course 1. (General Education Code(s): E.) *H. Shapiro*

169. Latin American Industrialization in a Global Perspective: Past, Present, and Future. *

Analyzes the economic, political, and social aspects of the industrialization process in Latin America. Evaluates import substitution policies, the changing roles of the state and foreign and domestic capital, and the impact of recent trade liberalization. Compares Latin America's development with that of the East Asian newly-industrialized countries (NICs) and looks at the implications of globalization. (General Education Code(s): CC, E.) *H. Shapiro*

170. Indigenous Struggles in the Americas. *

Focuses on the way Natives of First Peoples have interacted voluntarily and involuntarily with nonindigenous cultures. Examines their perspectives, thoughts, frustra-

tions, and successes. Touches on land issues and examines the way current indigenous cultures of Latin America face and adapt to social change. Focuses mainly on the Andes, lowland Amazon, Mesoamerica, and other areas. (General Education Code(s): CC, E.) *F. Lu*

172. Visualizing Human Rights. F

Explores how visual artists take up the subject of human rights in response to urgent challenges facing Latina/o and Latin American communities across the Americas. Examines the imprint of film and media arts reshaping human-rights discourse. Considers persistent themes in Latina/o representation, including colonialism and state terrorism; self-representation and the rights of collectives (racial, ethnic, and sexual groups); social and economic rights. *R. Fregoso*

174. Comparative Migration and Citizenship Paradigms. F

Examines U.S. migration patterns in comparison to other major destinations. Class discusses relevant socio-economic and political factors and the various citizenship paradigms present. Readings draw on disciplinary foci, including quantitative and qualitative analysis. (General Education Code(s): PE-H.) *S. Gleeson*

175. Migration, Gender, and Health. *

Through an interdisciplinary, cross-border approach, examines complex nature of Latino health in relation to migration and how women and men experience health problems differently. Examines how health problems are created by economic and social conditions, how migrants experience access to care, and how agencies can design culturally sensitive programs. (General Education Code(s): ER, E.) *P. Zavella*

176. Gender, the Nation, and Latina Cinema. *

Applies critical and cultural theories of interculturality, coloniality of power and transnational feminism to the study of Latina cinematic imaginaries in the Americas. Explores images and self-representations of race, sexuality, and the nation; citizenship, diaspora, and belonging; gender violence and state violence; militarization, human rights, and gender justice. (General Education Code(s): IM, E.) *R. Fregoso, The Staff*

178. Gender, Transnationalism, and Globalization. *

Focuses on the impact of globalization and transnationalism on gender relations in the Americas. Examines gender and power in the context of neoliberalism, modernity, the nation, social movements, and activism. Explores local and transnational constructions of gender, and the intersection of gender with race, ethnicity, class, and sexuality. Enrollment limited to 40. (General Education Code(s): ER, E.) *R. Fregoso, The Staff*

180. Borders: Real and Imagined. *

Situates "The Border" historically and within the context of U.S. imperialism. Examines the formalization of political "borders," methods of enforcement, and intra-group conflicts. Examines the varied experiences of colonialism and immigration between Mexicans, Puerto Ricans, Native Americans, and Cubans. Explores how the tools of "The Border" and "Borderlands" are being used to untangle the roles of race prejudice and sexual and gender discrimination. (General Education Code(s): TA, E.) *G. Arredondo*

190. Internship. F,W,S

Internships with campus or community organizations sponsored and evaluated by a Latin American and Latino studies faculty member. Students write an analytical paper or produce another major work agreed upon by student, faculty supervisor, and internship sponsor; sponsor must

also provide review of experience. Students submit petition to sponsoring agency. *The Staff*

190F. Internship (2 credits). F,W,S

Internships with campus or community organizations sponsored and evaluated by a faculty member from Latin American and Latino studies. Students write a short (8-page) descriptive paper or produce another work agreed upon by student and faculty supervisor. Students submit petition to sponsoring agency. *The Staff*

191. Latin American Studies Teaching Apprenticeship. F,W,S

Advanced students serve as facilitators for small discussion groups or aid in reading of papers related to Latin American Studies courses. Students are expected to read all course assignments and meet with instructors to discuss the teaching process. May not be counted toward major requirements. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching under faculty supervision of a lower-division course in Latin American and Latino studies, normally done by majors in the final quarter of study as the senior project. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study in local Spanish-speaking community. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Latino Civic Engagement in Comparative Perspective. S

Explores the role of Latinos in civic and political life in the U.S., focusing on specific avenues for participation such as religion, work, and transnational experiences. Examines barriers to participation experienced by Latinos in the U.S. as well as relationships between civic engagement and political incorporation and the ramifications for inequality for Latinos and other ethnic/racial groups in cities across America. Enrollment restricted to juniors and seniors. Enrollment limited to 25. (General Education Code(s): PE-H, E.) *S. Gleeson*

194G. Chile: Social and Political Change. W

Analysis of Chilean politics and society from the election of Salvador Allende in 1970 to the present. Particular emphasis is given to understanding the different forces, internal as well as external, that broke the Chilean tradition of democratic rule in 1973, and to the current configuration. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 25. (General Education Code(s): CC, E.) *W. Goldfrank*

194H. Central American Political Relations with the U.S. W

Writing-intensive senior seminar on U.S.-Central American relations. Students gain understanding of Central American political history; the region's relations with the United States; and the problems arising from this relationship. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors. Enrollment limited to 25. (General Education Code(s): W, E.) *H. Perla*

194I. Contemporary Ecuador. F

The Andean nation of Ecuador exemplifies cultural and biological diversity, rapid economic and social change, and increasing geopolitical influence as one of the current South American left-leaning countries. Course looks at Ecuador's recent history and future challenges. Enrollment restricted to sophomores, juniors, and seniors.

Enrollment limited to 25. (General Education Code(s): CC.) *F. Lu*

194M. Twentieth-Century Revolutions. *

Treatment of 20th-century Latin American revolutions from Zapata to the Zapatistas. Focuses on the causes and consequences of revolutions rather than on their narrative histories. Enrollment restricted to junior and senior Latin American and Latino studies majors. Enrollment limited to 25. (General Education Code(s): CC, E.) *G. Arredondo, W. Goldfrank*

194P. Tale of Two Cities. *

A comparative study of the social, economic, cultural, political, and geographical development of Los Angeles and Mexico City in the 20th century. Emphasis on the diverse peoples, changing physical environment and various images/interpretations of these two world cities. (Also offered as History 190D. Students cannot receive credit for both courses.) Prerequisite(s): two upper-division history courses and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior Latin American and Latino studies and history majors. Enrollment limited to 25. (General Education Code(s): W, E.) *P. Castillo, L. Haas*

194R. Violencia Cotidiana en las Americas. F

Senior seminar taught in Spanish. Engages a critical study of violence, social relations, and everyday life in contemporary Latin America. Focuses on the relationship between narratives and acts of violence, and the constitution and social effects of these representations. Requires proficiency in Spanish (written and spoken), and advanced reading knowledge of Spanish. Enrollment restricted to junior and senior Latin American and Latino studies majors, minors, double majors, and combined majors. Enrollment limited to 25. (General Education Code(s): E.) *C. Rivas*

194S. El Campo Mexicano en Crisis. S

Taught in Spanish. Analyzes both the causes and possible solutions to the challenges of rural poverty and democratization. Focuses on agrarian reform; agricultural development; protest movements; electoral change; local government; grassroots development initiatives; natural resources; the social construction of ethnicity, gender, and class; and the dynamics of migration. Mexico's regional diversity is highlighted as well, and students are encouraged to study a particular region in depth to accompany the course's national overview. Enrollment restricted to junior, and senior Latin American and Latino studies majors, minors, and combined majors with global economics, sociology, literature, and politics. Enrollment limited to 25. *J. Fox*

195B. Senior Project. F,W,S

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195C. Senior Project. F,W,S

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196. Field Study Seminar. *

Emphasizes ethnographic strategies of fieldwork. Primarily oriented to students interested in understanding the daily life of societies and cultures. Prepares students both to conduct fieldwork, and to process their fieldwork experience. Covers complexities related to the experience of "stepping out of" one's own culture. Prerequisite(s): concurrent enrollment in course 196L. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. *J. Borrego*

196L. Field Study Seminar Lab (2 credits). *

Media lab trains students in the use of electronic and photographic media for the acquisition of field data. Through lectures, demonstrations, hands-on field exercises and review of students' media exercises, students will learn the fundamentals of photography, video production, and audio recording in the field. Prerequisite(s): concurrent enrollment in course 196. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 25. *J. Borrego*

198. Field Study. F,W,S

Off-campus study in Latin America, the Caribbean, or nonlocal Spanish-speaking community in the U.S. Nature of proposed study/project to be discussed with sponsoring instructor(s) before undertaking field study; credit toward major (maximum of three courses per quarter) conferred upon completion of all stipulated requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Supervised directed reading; weekly or biweekly meetings with instructor. Final paper or examination required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Supervised research and writing of an expanded paper, completed in conjunction with requisite writing for an upper-division course taken for credit in the major. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200. Bridging Latin American and Latina/o Studies. S

Explores social, cultural, economic, and political changes that connect Latin America and U.S. Latina/o communities. The objective of this interdisciplinary team-taught course is to bridge previously distinct research approaches of Latin American and Latina/o studies to better understand processes that link peoples and ideas across borders as well as help students to conceptually and methodologically identify and design new objects of study and revisit traditional approaches. Core requirement for students pursuing the Parenthetical Notation in Latin American and Latino studies. Enrollment restricted to graduate students. *G. Arredondo*

210. Latina Feminisms: Theory and Practice. *

Through an interdisciplinary approach, explores Latina feminist social theory and scholarly practice—especially in representation and interpretation of Latina experiences. Examining key texts at different historical junctures, charts how Latinas of varied ethnic, class, sexual, or racialized social locations have constructed oppositional and/or relational theories and alternative epistemologies or political scholarly interventions and, in the process, have problematized borders, identities, cultural expressions, and coalitions. Enrollment restricted to graduate students. *P. Zavella*

212. Latina/o Ethnographic Practice. *

Interrogates the social construction of Latino cultures in their varied regional, national-ethnic, and gendered contexts. Assumes that culture is a dynamic process constructed within a context of hierarchical relations of group

power, in which Latino groups have been structurally subordinated and socially oppressed. Focuses more on how power relations create a context for the creation of specific Latino cultural expressions and processes than on unraveling the structures of oppression. Enrollment restricted to graduate students. *P. Zavella*

215. Latina Cultural Studies: Transborder Feminist Imaginaries. *

Interdisciplinary analysis of feminist theories that inform the field of Latina cultural studies in the Americas, with an emphasis on transnational and hemispheric dialogues. Designed for students pursuing the Parenthetical Notation in Latin American and Latino studies and those with interest in globality, transnational feminist theory, and critical race and postcolonial theories. Enrollment restricted to graduate students. *R. Fregoso*

220. Transnational Civil Society: Limits and Possibilities. *

Analyzes social, civic, and political actors that come together across borders to constitute transnational civil society, drawing from political sociology, political economy, comparative politics, and anthropology to address collective identity formation, collective action, institutional impacts, and political cultures. Enrollment restricted to graduate students. *J. Fox*

230. Political Ecology in Latin America. *

Examines the foundations and current literature on political ecology, with emphasis on issues in Latin America. Topics include the appropriation of "Nature;" degradation and deforestation; conservation policies and politics; land distribution and property; and indigenous resistance. Enrollment restricted to graduate students. *F. Lu*

240. Culture and Politics of Human Rights. F

Examines cultural, philosophical, and political foundations for human rights and provides students with critical grounding in the major theoretical debates over conceptualizations of human rights in the Americas. Addresses the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating gender rights, collective rights, and social and economic rights within international human rights framework. (Also offered as Feminist Studies 240. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *R. Fregoso*

242. Globalization, Transnationalism, and Gender in the Americas. *

Explores how globalization, transnationalism, and the social construction of gender are interrelated, contingent, and subject to human agency and resistance. Examines particular configurations of globalization, transnationalism, and gender through the Americas and their implications for race, space, work, social movements, migration, and construction of collective memory. Enrollment restricted to graduate students. *P. Zavella, R. Fregoso*

244. U.S. Political Relations with Latin America. * Examines relations between the U.S. and Latin America. Emphasizes the domestic and global contexts within which U.S. leaders defined national economic, strategic, and ideological interests, and their regional policy objectives. Explores the impact of Latin Americans' nationalistic, anti-imperialist, class, racial, and gender struggles that often shaped policy outcomes in ways unanticipated by the U.S. Enrollment restricted to graduate students. *H. Perla*

297. Independent Study. F,W,S

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Latin Literature

Students wishing to pursue a course of study in Latin literature should consult the concentration in national/transnational literatures under Literature, page 361.

Legal Studies

27 Merrill College
(831) 459-2056
legalstudies@ucsc.edu
<http://zzyx.ucsc.edu/Poll/legal.html>

Faculty and Professional Interests

DANE ARCHER, Emeritus

DONALD BRENNIS, Professor of Anthropology
Linguistic anthropology, folklore, legal anthropology, ethnomusicology, overseas Indians, South Asia, disputing and dispute management, legal language, bureaucratic institutions

GINA DENT, Associate Professor, Feminist Studies, History of Consciousness, and Legal Studies
Africana literary and cultural studies, legal theory, popular culture

HIROSHI FUKURAI, Professor of Sociology
Global jury systems; international law; colonialism and genocide; lay justice systems in Japan, Mexico, China, and Korea; theories of democracy; advanced quantitative analysis, survey, and field methods

MARK FATHI MASSOUD, Assistant Professor of Politics

Law and society; politics of human rights; international law and development, with a special interest in Sudan; field research, with an emphasis on qualitative and ethnographic methods

TRILOKI NATH PANDEY, Professor of Anthropology
Native peoples of North America, cultures of India, political anthropology, anthropological theories and comparisons

DANIEL M. PRESS, Professor of Environmental Studies
U.S. environmental politics and policy, social capital and

democratic theory, industrial ecology, land and species conservation, regionalism

CRAIG REINARMAN, Professor of Sociology
Political sociology; law, crime, and social justice; drugs and society

MICHAEL E. URBAN, Professor of Politics
Russian politics, postcommunist transitions, U.S.-Russian relations, political language and ideology, revolution

DANIEL J. WIRLS, Professor of Politics
American politics, including national political institutions (Congress) and the President; public policy (military and foreign policy) and political history

DONALD A. WITTMAN, Professor of Economics
Economic theory, politics, law

JOHN DIZIKES, Emeritus

WALTER L. GOLDFRANK, Emeritus

CRAIG W. HANEY, Professor of Psychology,
Director of Legal Studies

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

Program Description

Legal studies is an interdisciplinary major offered under the auspices of the Politics Department. It is designed for students who wish to use the methods and perspectives of various academic disciplines to study legal issues and to use the conceptual framework of the law to illuminate empirical and theoretical concerns in the various disciplines. For example, a student might use approaches from psychology and philosophy to study the legal problem of punishment; or draw on doctrinal categories from public and private law to study the changing historical role of market and nonmarket relations within ongoing institutions; or use approaches from critical race theory and feminist studies to better understand matters of civil rights and privacy.

To complete the major, students are required to take courses in legal institutions, constitutional law, and international law, as well as take courses in each of three broad themes: legal theory and philosophy, the role of law in society, and legal institutions. Each of these themes is intentionally broadly defined. Within legal theory, students may take courses in legal jurisprudence, logic, and theories of crime and punishment; within law and society, courses range from feminism and race to psychology and economics; within public law and institutions, courses range from environmental law to human rights law to an introduction to litigation. Students are also expected to take an introductory course in philosophy. To fulfill the senior exit requirement, students have the option to write a senior thesis or take a senior capstone seminar. The seminar topic changes quarterly.

Legal studies is intended to appeal to students who wish to take a concentration of courses on the law from a variety of disciplinary and methodological perspectives. The major is not intended as a substitute or preparation for any part of a law school curriculum but rather as a full field of study within the liberal arts curriculum. As such, it is a good preparation for a variety of future activities. Students graduating in legal studies are particularly well qualified to pursue graduate work on legal topics in humanities and social science disciplines or to attend professional school in fields such as public policy,

business administration, social work, and law. Students are also encouraged to participate in field work and law-related internships in the community, and to develop their own extensive independent research projects.

Declaring the major in legal studies is a four-step process: 1) complete and pass course 10 with a grade of C or better; 2) attend a declaration orientation workshop; 3) meet with your faculty adviser; 4) meet with the legal studies undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose.

The legal studies program offers a minor degree as well as the major degree.

Requirements for the Major

Lower-Division Course Requirements— 2 courses

Legal Studies 10 *Introduction to Legal Process*. All students are required to complete and pass legal studies 10 as a prerequisite to upper-division courses in legal studies and prior to declaring the major.

A student who has not been able to satisfy the pre-declaration requirement (a passing grade in Legal Studies 10) may petition the department for an exception. The letter of petition must explain and document the circumstances that might justify an exception. The department will consider the request and notify the student of its decision within two weeks of receiving the petition or within 10 days of the start of the following quarter, whichever is later.

Philosophy 9, 22, or 24. All legal studies majors are required to take one of the three listed Philosophy courses. (See the Philosophy section in this catalog for course descriptions.)

Upper-Division Course Requirements— 2 courses

111A *Constitutional Law or*

111B *Civil Liberties*

173 *International Law*

Core Course Requirements—6 courses

Students are required to take six core courses, two in each of three concentrations: theory, public law and institutions, and law and society.

Theory

103 *Feminist Interventions (Politics course)*

105A *Ancient Political Thought*

105B *Early Modern Political Thought*

105C *Modern Political Thought*

105D *Late 20th-Century Political Thought*

106 *Marxism as a Method*

107 *Political Morality of Survivorship and Recovery*

109 *Legal Theory*

109 *Orientalism (Politics course)*

115 *Law and the Holocaust*

128J *The World Jury on Trial*

144 *Social and Political Philosophy*

146 *Philosophy of Law*

155 *Topics in American Legal History*

157 *Political Jurisprudence*

Public Law and Institutions

111A *Constitutional Law*

111B *Civil Liberties*

111C *Issues in Constitutional Law*

- 115 *Law and the Holocaust*
 116 *Comparative Law*
 120A *Congress, President, and the Court in American Politics*
 120C *State and Capitalism in American Political Development*
 125 *History of U.S. Penal Law*
 128 *Poverty and Public Policy*
 128M *International Law and Global Justice*
 131 *Wildlife, Wilderness, and the Law*
 132 *California Water Law and Policy*
 133 *Law of Democracy*
 135 *Native Peoples Law*
 136 *Federal Indian Law and Tribal Sovereignty*
 137 *International Environmental Law and Policy*
 139 *War Crimes*
 149 *Environmental Law and Policy*
 152 *Courts and Litigation*
 155 *Topics in American Legal History*
 156 *Administrative Jurisprudence*
 159 *Property and the Law*
 171 *Law of War*
 175 *Human Rights*
- Law and Society**
 107 *Political Morality of Survivorship and Recovery*
 110 *Law and Social Issues*
 111B *Civil Liberties*
 112 *Women and the Law (Politics)*
 113 *Gay Rights and the Law*
 114 *Jews, Anti-Semitism, and the American Legal System*
 120B *Society and Democracy in American Political Development*
 120C *State and Capitalism in American Political Development*
 121 *Black Politics and Federal Social Policy*
 122 *The Sociology of Law*
 123 *Law, Crime, and Social Justice*
 126 *Law and Politics in Contemporary Japan and East Asian Societies*
 128I *Race and Criminal Justice*
 127 *Drugs and Society*
 135 *Native Peoples Law*
 138 *Political Anthropology*
 142 *Anthropology of Law*
 147A *Psychology and Law*
 147B *Psychology and Law*
 150 *Children and the Law*
 151 *Politics of Law*
 154 *The Legal Profession*
 155 *Topics in American Legal History*
 160 *Industrial Organization*
 162 *Legal Environment of Business*
 169 *Economic Analysis of the Law*
 180 *Power, Politics, and Protest*
 183 *Women in the Economy*

Disciplinary Communication (DC)

Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC)

Requirement. The DC Requirement in legal studies is satisfied by completing Legal Studies 196.

Comprehensive Requirement—1 course

Students can satisfy the comprehensive requirement in the legal studies major by successfully completing one of the following:

195ABC, *Senior Thesis*. Completion of a senior thesis project of approximately 50 pages with a substantial research content, supervised by a legal studies faculty member with a second reader.

196, *Senior Capstone*. The capstone course is designed to provide an interdisciplinary integration of themes related to the study of law and includes a substantial writing requirement.

Honors

Honors in the legal studies major are awarded to graduating seniors, based primarily on a review of grades and narrative evaluations, whose academic performance is judged to be consistently excellent by a faculty committee. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Transfer Students

A student transferring to UCSC must meet with the legal studies undergraduate adviser as early as possible to discuss declaring the major and course enrollment. This ensures a smooth transition. Students should bring a copy of their UCSC Transfer Credit Summary, which may be printed from the student portal.

Requirements for the Minor

To complete a minor in legal studies, a student must take Legal Studies 10 and any five upper-division legal studies core courses.

Lower-Division Courses

10. Introduction to Legal Process. W

Introduction to U.S. and comparative legal institutions and practices. Examines diverse areas of law from torts to civil rights to international human rights. Why is America portrayed as having an activist legal culture; why is law used to decide so many questions from presidential elections to auto accidents; can law resolve disputes that, historically, have led to war and violence; is the legal system fair and/or effective, and, if so, for whom and under what conditions? (General Education Code(s): IS.) *The Staff*

Upper-Division Courses

105A. Ancient Political Thought. F

Ancient political ideas in context of tension between democracy and empire, emergence of the psyche, and shift from oral to written culture. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine. (Also offered as Politics 105A. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *D. Mathiowetz*

105B. Early Modern Political Thought. S

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference. (Also offered as Politics 105B. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *V. Seth*

105C. Modern Political Thought. W

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, Fanon, and Weber. (Also offered as Politics 105C. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *M. Thomas*

105D. Late 20th Century Political Thought. *

The politics of identity and recognition as the basis for institutional legitimacy and social struggles in the late 20th century. Conflicting views of Hegel's master-slave dialectic are used to relate, e.g., Sartre, Fanon, Bataille, Merleau-Ponty, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou to present-day concerns. (Also offered as Politics 105D. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. *R. Meister*

106. Marxism as a Method. *

Examines Marx's use of his sources in political philosophy and political economy to develop a method for analyzing the variable ways in which social change is experienced as a basis for social action. Provides a similar analysis of contemporary materials. Contrasts and compares Marxian critiques of these materials and readings based on Nietzsche, psychoanalysis, cultural studies, and rational choice materialism. (Also offered as Politics 106. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *R. Meister*

107. After Evil: Political Morality of Survivorship and Recovery. *

What are the continuing relationships between victims, perpetrators, and beneficiaries of a past that is recognized as evil? Focus on contrast between the competing moral logics of struggle and reconciliation, and various rationales for allowing beneficiaries to keep their gains in order to bring closure to the past. Theoretical perspectives drawn from law, philosophy, theology, and psychoanalysis. (Also offered as Politics 107. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *R. Meister*

109. Legal Theory. *

Offers systematic exploration of alternative conceptions of the nature of law, including positivism, natural law, formalism, realism, pragmatism, and theories of justice. Additional focus on the nature of law; relation of law and morality, rights and other legal concepts; and philosophical debates such as critical legal studies and critical race theory. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

110. Law and Social Issues. *

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions. (Also offered as Politics 110. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

111A. Constitutional Law. S

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law. (Formerly *Problems in Constitutional Law*.) (Also offered as Politics 111A. Students cannot receive credit for both courses.) Enrollment restricted

to legal studies majors during priority enrollment only. *The Staff*

111B. Civil Liberties. *

Explores the status of American civil liberties as provided by the Bill of Rights. Particular attention will be given to issues of concern relating to the aftermath of 9/11, including issues relating to detainees, freedom of information requests, wiretapping authority, watch lists, profiling, and creation of a domestic intelligence agency. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

111C. Issues in Constitutional Law. W

Examines variety of topics in constitutional law that are not covered in courses 111A and 111B. Focuses primarily on Supreme Court decisions and common-law debates. Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

113. Gay Rights and the Law. *

Examines relevant court cases as well as local, state, and federal laws that define boundaries for legal recognition of sexual orientation and personal sexuality. Explores legal assumptions behind current and historical cases defining personal sexuality and sexual orientation and considers the social and political impetus in each era that drove the courts and legislatures to make such decisions. *The Staff*

114. Jews, Anti-Semitism, and the American Legal System. *

Explores how Jews have influenced and been impacted by the American legal system. Students explore significant cases, debates, and trends in the law as it relates to Jewish identity, religious freedom, and conceptions of justice. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

115. Law and the Holocaust. *

Examines the Nazi philosophy of law, and how it was used to pervert Germany's legal system in order to discriminate against, ostracize, dehumanize, and ultimately eliminate certain classes of human beings, and the role of international law in rectifying the damage. Enrollment restricted to legal studies majors during priority enrollment only. Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

116. Comparative Law. *

Explores legal systems and legal rules around the world, for a better understanding of the factors that have shaped both legal growth and legal change. Particular attention given to differences between common and civil law systems, changes brought about by the European Union, and expansion of legal norms around the globe. (Also offered as Politics 116. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

118. Law and Literature. *

Explores variety of texts including novels, short stories, and essays as a source for reflection about the nature of law and legal practice. Readings include such writers as Herman Melville, Harper Lee, Richard Wright, Arthur Miller, Nadine Gordimer, and James Alan McPherson, among others. (Formerly course 138.) Enrollment restricted to legal studies majors during priority period. *The Staff*

120A. Congress, President, and the Court in American Politics. W

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities. (Also offered as Politics 120A. Students cannot receive

credit for both courses.) Enrollment restricted to legal studies majors during priority period. Satisfies American History and Institutions Requirement. *D. Wirls*

120B. Society and Democracy in American Political Development. F

Examines role of social forces (e.g., race, class, and gender) in development of the American democratic processes and in the changing relationship between citizen and state. Course materials address ideas, social tensions, and economic pressures bearing on social movements, interest groups, and political parties. (Also offered as Politics 120B. Students cannot receive credit for both courses.) Enrollment restricted to sophomore, junior, and senior legal studies majors during priority period. Satisfies American History and Institutions Requirement. *M. Brown*

120C. State and Capitalism in American Political Development. S

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies. (Also offered as Politics 120C. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority period. Satisfies American History and Institutions Requirement. *E. Bertram*

121. Black Politics and Federal Social Policy. *

Examination of changes in the political and economic status of African Americans in the 20th century; particular focus on the role of national policies since 1933 and the significance of racism in 20th-century U.S. political development. (Formerly course 127.) (Also offered as Politics 121. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment. (General Education Code(s): E.) *M. Brown*

122. The Sociology of Law. W

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law. (Also offered as Sociology 122. Students cannot receive credit for both courses.) *C. Reinerman*

123. Law, Crime, and Social Justice. *

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation. (Also offered as Sociology 123. Students cannot receive credit for both courses.) *The Staff*

125. History of the U.S. Penal Culture. *

Explores the history and theory of U.S. state punishment from its 17th-century beginnings to the present and notes evolving models of criminal deviance, focusing on how punishment systems legitimate particular models of criminal deviance, crime, and its "correction." Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

126. Law and Politics in Contemporary Japan and East Asian Societies. *

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to

restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue Japanese government and corporations in California. (Also offered as Sociology 128. Students cannot receive credit for both courses.) Enrollment limited to 30. *H. Fukurai*

127. Drugs in Society. S

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course. (Also offered as Sociology 127. Students cannot receive credit for both courses.) *The Staff*

128. Poverty and Public Policy. F

Studies the causes, consequences, and governmental response to urban poverty in the U.S. Topics include how public policy, the macroeconomy, race, gender, discrimination, marriage, fertility, child support, and crime affect and are affected by urban poverty. Emphasizes class discussion and research. (Also offered as Economics 128. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; ECON 100A & 113 or consent of instructor. Enrollment restricted to economics, business management economics, global economics, legal studies, or economics combined major Enrollment limited to 35. (General Education Code(s): W, E.) *L. Kletzer, R. Fairlie*

128I. Race and Justice. F

An introduction to comparative and historical analyses of the relations between race and criminal justice in the U.S. Emphasis on examinations of structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Formerly *Race and Criminal Justice*) (Also offered as Sociology 128I. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 120. *H. Fukurai*

128J. The World Jury on Trial. *

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others. American jury contrasted with other forms of lay participation in the legal process. (Also offered as Sociology 128J. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 30. *The Staff*

128M. International Law and Global Justice. S

Examines war crimes, crimes against humanity, and the evolution and role of the International Criminal Court (ICC). Examines the evolution of the concept of international law, the rationale for its birth and existence, roots of international conflicts and genocides, possible remedies available to victims, mechanisms for the creation and enforcement of international legal order, as well as the role of colonialism, migration, poverty, race/ethnic conflicts, gender, and international corporations in creating and maintaining conflicts and wars. (Also offered as Sociology 128M. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 30. *The Staff*

130. Race and the Law. *

Explores the complex relationship between race and the law in American society. Included subjects are critical race theory, civil rights and voting rights law, issues of the criminal justice system, intersections with issues of class and gender, and the social construction of race through law and legal decisions. Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

131. Wildlife, Wilderness, and the Law. *

Introduction to wildlife, wilderness, and natural resources law, policy, and management. Examines rules governing resource allocation and use including discussion of fundamental legal concepts. Explores laws and management policies affecting wildlife and wilderness, including their origins and impacts. Examines how conflicts over natural resources are being negotiated today. Enrollment restricted to sophomore, junior, and senior legal studies majors during the priority period. *R. Langridge*

132. California Water Law and Policy. *

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future. (Also offered as Politics 132. Students cannot receive credit for both courses.) *R. Langridge*

133. Law of Democracy. *

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces. (Also offered as Politics 133. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

135. Native Peoples Law. *

Explores the legal relationship between native peoples and the state. Examines the development of that relationship and several of the key legal issues currently confronting native peoples as they attempt to redress the injustices of the past. Enrollment restricted to legal studies majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

136. Federal Indian Law and International Comparative Indigenous Peoples' Law. *

Indian law refers to the body of law dealing with the status of Indian tribes, their inherent powers of self-government, their special relationship to the federal government, and the actual or potential conflicts of governmental power. Primary objective will be to address tribal reassertion of aboriginal sovereignty over culture and land in the context of increasing world recognition of indigenous rights. Enrollment restricted to legal studies majors during priority period. (General Education Code(s): E.) *The Staff*

137. International Environmental Law and Policy. *

International environmental law (IEL) endeavors to control pollution and depletion of natural resources within a framework of sustainable development and is formally a branch of public international law—a body of law created by nation states for nation states, to govern problems between nation states. Examines landmark developments of IEL since 1972 within a historical continuum to better understand their strengths and weaknesses. Enrollment restricted to legal studies majors during priority period. *The Staff*

138. Political Anthropology. W

The ideas, in selected non-Western societies, about the nature of power, order, social cohesion, and the political

organization of these societies. (Also offered as Anthropology 138. Students cannot receive credit for both courses.) Offered in alternate academic years. *T. Pandey*

139. War Crimes. *

Explores complex international human rights/humanitarian law issues surrounding genocide and other mass violence, beginning with the Nuremberg trials following World War II up to recent atrocities in Rwanda, Bosnia, and elsewhere. Covers basic legal framework of human rights law, examines specific situations on a case by case basis, and discusses what options the international community, the nations themselves, and individuals have in the wake of such catastrophes. Enrollment restricted to legal studies majors during priority period. *The Staff*

142. Anthropology of Law. *

An ethnographically informed consideration of law, dispute management, and social control in a range of societies including the contemporary U.S. Topics include conflict management processes, theories of justice, legal discourse, and relations among local, national, and transnational legal systems. (Also offered as Anthropology 142. Students cannot receive credit for both courses.) Enrollment restricted to anthropology and legal studies majors. *D. Brenneis*

144. Social and Political Philosophy. *

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Also offered as Philosophy 144. Students cannot receive credit for both courses.) Prerequisite(s): one course in philosophy. Offered in alternate academic years. *D. Guevara*

146. Philosophy of Law. W

Exploration of selected problems in jurisprudence: "legal reasoning" and social policy, rules and individual cases, the mental element in the law, punishment and responsibility, causation and fault, liberty and paternalism, etc. (Also offered as Philosophy 146. Students cannot receive credit for both courses.) *J. Neu*

147A. Psychology and Law. *

Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment. (Also offered as Psychology 147A. Students cannot receive credit for both courses.) Psychology 3 or 100 and 40 are recommended prior to taking this course. Enrollment restricted to psychology, pre-psychology, and legal studies majors. *C. Haney*

147B. Psychology and Law. *

Continuing discussion of current and future relationships between law and psychology and to contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including crime causation, the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment. (Also offered as Psychology 147B. Students cannot receive credit for both courses.) Prerequisite(s): course 147A. *C. Haney*

149. Environmental Law and Policy. S

Surveys a wide range of topics in environmental law, including population control, state and federal jurisdiction, land and resources control, public land management, pollution control, and private rights and remedies. Students read a large number of judicial cases and other legal documents. (Also offered as Environmental Studies 149. Students cannot receive credit for both courses.)

Enrollment restricted to junior and senior legal studies majors. *T. Duane*

150. Children and the Law. *

Explores the legal rights of children. Topics may include juvenile justice, gang offenses, free speech and Internet censorship, religious rights, child custody and support, adoption, foster care, abuse and sexual harassment, special needs, public benefits, and medical care. Enrollment restricted to legal studies majors during priority period. *The Staff*

151. Politics of Law. W

Uncovers the important debates in politics and law around the functions of courts, litigation, and rights—and the political nature of law itself. Course is interdisciplinary, and draws from literature in political science, law, and sociology. (Also offered as Politics 151. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority period. *M. Massoud*

152. Courts and Litigation. *

A study of the role of courts in society and the uses of litigation to address and deflect social problems. Focus is on recent developments in American litigation, but comparative materials may be considered. Enrollment restricted to legal studies majors during priority period. *The Staff*

154. The Legal Profession. *

Lawyers stand between the legal system and those who are affected by it. Examines this relationship descriptively and normatively, and from the point of view of sociological theory. Concentrates on the U.S. profession, with some comparative material. Enrollment restricted to legal studies majors during priority period. *The Staff*

156. Administrative Jurisprudence. *

The rise of the regulatory state brings with it a host of questions regarding the exercise of state power and separation of powers. Takes up some of these questions; in particular, questions about administrative agencies and their relationship to the judiciary, the legislature and private individuals and groups. Enrollment restricted to legal studies majors during priority period. *The Staff*

157. Political Jurisprudence. F

Explores some themes in legal and political theory, especially on the relationship of theories of justice, law, and ethics. Enrollment restricted to legal studies majors during priority period. *The Staff*

159. Property and the Law. F

Beginning with an examination of the concept of property, the class covers how different cultures characterize property and determine "ownership" and the laws and policies that define property in modern society. Topics include theories of property law, common property, property and natural resources, zoning, regulatory takings, and property on the Internet. Enrollment restricted to legal studies majors during priority period. *R. Langridge*

160A. Industrial Organization. W

The structure and conduct of American industry with strong emphasis on the role of government, regulation, anti-trust, etc. The evolution of present-day industrial structure. The problems of overall concentration of industry and of monopoly power of firms. Pricing, output decisions, profits, and waste. Approaches include case study, theory, and statistics. (Also offered as Economics 160A. Students cannot receive credit for both courses.) Prerequisite(s): Economics 100A or 100M. *The Staff*

169. Economic Analysis of the Law. S

The application of the theories and methods of neoclassical economics to the central institutions of the legal system, including the common law doctrines of negligence,

contract, and property; bankruptcy and corporate law; and civil, criminal, and administrative procedure. (Also offered as Economics 169. Students cannot receive credit for both courses.) Prerequisite(s): Economics 100A or 100M or permission of instructor. *D. Wittman*

171. Law of War. *

Examines legal regulation of international violent conflict. Students examine development of normative standards within international law and creation of institutions to both adjudicate violations and regulate conduct. (Also offered as Politics 171. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment only. *The Staff*

173. International Law. F

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include jurisdiction and sovereignty, treaties, the use of force, and human rights. (Also offered as Politics 173. Students cannot receive credit for both courses.) Enrollment restricted to legal studies majors during priority enrollment. *The Staff*

175. Human Rights. W

Embraces an interdisciplinary approach to the study of human rights. Captures the malleable nature of human rights and the contours of its dual role as both law and discourse. (Also offered as Politics 175. Students cannot receive credit for both courses.) Prerequisite(s): course 173 or Politics 173. Enrollment restricted to legal studies majors during priority enrollment. *M. Massoud*

183. Women in the Economy. *

Study of gender roles in economic life, past and present. Topics include occupational structure, human capital acquisition, income distribution, poverty, and wage differentials. The role of government in addressing economic gender differentials is examined. (Also offered as Economics 183. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; Economics 1, 2, and 100A; Economics 113 strongly recommended. (General Education Code(s): W.) *L. Kletzer*

193. Field Study. F,W,S

Field research performed off-campus, under the supervision of a member of the legal studies faculty. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade

and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

196. Senior Capstone. W,S

Examines related legal topics from an interdisciplinary perspective. Each focuses broadly on the relationship between law as a distinct system and law as an attempt to achieve justice, which requires that law remain open to claims of political morality generally. To what extent are legal norms internal to a separate system called "law" and to what extent are claims of political right in general relevant to question of what law is? Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior legal studies majors. (General Education Code(s): W.) *The Staff*

198. Independent Field Study. F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Linguistics

WILLIAM F. SHIPLEY, Emeritus

Assistant Professor

PRANAV ANAND

Semantics, pragmatics, syntax

ADRIAN BRASOVEANU

Semantics, pragmatics, Optimality theory, Romance and Balkan languages, philosophical logic

GRANT MCGUIRE

Phonetics, phonology, psycholinguistics

MATTHEW WAGERS

Psycholinguistics, language comprehension, memory

Program Description

Linguistics is an exact and structured discipline. As the study of human language, it has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language acquire about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics studies the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the ways in which these speech sounds pattern in the sound systems of particular languages. Morphology studies the way in which words are put together out of prefixes, roots, and suffixes. Pragmatics is the study of language use.

All faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include sociolinguistics, psycholinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, linguistics and language studies, and a graduate program in theoretical linguistics. The linguistics major leads to a bachelor of arts (B.A.) degree in linguistics; the language studies major leads to a B.A. degree in language studies (see Language Studies). The graduate program leads to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degrees in linguistics.

The department also offers a combined B.A./M.A. program which makes it possible for certain students to complete the requirements for both degrees in five years rather than the usual six.

Requirements for the Linguistics Major

All students are required to complete the following 12 courses in linguistics and related disciplines.

- Seven foundation courses in linguistics:
 - 50, *Introduction to Linguistics: Sounds and Words*
 - 53, *Semantics I*
 - 101, *Phonology I*
 - 102, *Phonology II*
 - 112, *Syntax I*

113, *Syntax II*
116, *Semantics II*

- Five upper-division elective courses in linguistics.

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. At most three such courses can be applied toward the major. Such courses must be upper-division and clearly fit into a coherent program of study in linguistics

Foreign language/mathematics competency requirement: Linguistics majors are required to demonstrate either foreign-language or mathematics competency as follows:

- *Foreign-language competency:* students must successfully complete five quarters of language study at UCSC (three quarters for Latin or Greek) or demonstrate an equivalent level of competence through a recognized language test or evidence of credit from another institution.
- *Mathematics competency:* alternatively, students with a strong formal background can choose to satisfy the mathematics competency requirement by demonstrating sufficient preparation in mathematics for advanced formal work in linguistics. This requirement is satisfied by passing two courses chosen from the following list: Mathematics 11A, 19A, or 21; Computer Science 5C, 5J, or 5P; Computer Engineering 16; Economics 11A; or any course which has one of these courses as a prerequisite.

Senior exit requirement: In their senior year, linguistics majors must satisfy the senior exit requirement in one of two ways:

Option 1: Successful completion of a capstone course. Students may designate an appropriate upper-division linguistics course as their capstone course. Students must have senior standing, completed Linguistics 101, *Phonology I*, and 112, *Syntax I*.

Option 2: Successful completion of a senior thesis supervised by a linguistics faculty member.

- The proposal for a senior thesis must be submitted for departmental approval at least three quarters prior to the quarter of graduation.
- Students enroll in Linguistics 195, *Senior Thesis*.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in linguistics is satisfied by completing courses 101 and 112.

Requirements for the Minor

To graduate with a minor in linguistics, students must complete eight linguistics courses:

- 50, *Introduction to Linguistics: Sounds and Words*
- 53, *Semantics I*
- 101, *Phonology I*
- 112, *Syntax I* or 111, *Syntactic Structures*
- Four upper-division electives in linguistics

There is no senior exit requirement and no foreign language/mathematics competency requirement for the minor.

Courses

Courses numbered 80 are lower-division courses, which treat the phenomenon of language from a variety of perspectives:

- 80B, *Modern English Grammar*. A modern non-prescriptive approach to English grammar.
- 80C, *Language, Society, and Culture*. An exploration of ways in which language structure and use reflect societal distinctions and cultural practice.
- 80D, *Language and Mind*. A critical examination of the view of human language underpinning the research program initiated by Noam Chomsky and of its implications for theories of the human mind and brain.
- 80V, *Structure of the English Vocabulary*. A systematic study of the elements of English words: their historical origins and their sound, meaning, spelling, and function.

These courses have no prerequisites. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

Courses 50, *Introduction to Linguistics: Sounds and Words*; 112, *Syntax I*; 111, *Syntactic Structures*; and 53, *Semantics I* are "disciplinary introductions." These courses have no linguistics prerequisites and serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least one of these courses as a prerequisite.

Courses 101, *Phonology I*; 102, *Phonology II*; 113, *Syntax II*; and 116, *Semantics II* are the core upper-level courses in linguistic structure and are offered each year. The two phonology courses (101 and 102) provide an introduction to the study of the sound systems of languages. These courses use a problem-solving approach to developing understanding of phonological theory and phonological regularities in various languages. The intermediate syntax course (113), which has course 112, *Syntax I*, and course 53, *Semantics I*, as prerequisites, continues the development of syntactic theory begun in course 112, extending the range to more complex constructions and rules and introducing alternative theoretical approaches. The semantics course (116), which has as prerequisites course 53, *Semantics I*, and either course 112, *Syntax I*, or course 111, *Syntactic Structures*, addresses advanced problems in the analysis of meaning.

Several upper-division elective courses are offered each year. For a list of these courses, contact the Linguistics Department.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the core course requirements for the major with excellent performance.

Disqualification Policy

The Linguistics Department has adopted a major disqualification policy for linguistics and language studies majors that is intended to encourage students to take seriously their performance in the introductory courses and to make a strong effort to pass those courses.

Students who receive more than one No Pass, D, W, and/or F in the following introductory courses will not be permitted to major in linguistics or language studies:

- Linguistics 50, *Introduction to Linguistics Sounds and Words*
- Linguistics 53, *Semantics I*
- Linguistics 101, *Phonology I*
- Linguistics 111, *Syntactic Structures*
- Linguistics 112, *Syntax I*

Students who fail one of these courses will be sent a letter reminding them of this policy and warning them that they are at risk of disqualification should they fail to pass a subsequent introductory course.

Students may appeal their disqualification by writing a formal letter to the department chair. This letter should explain any extenuating circumstances that influenced their poor performance in the introductory courses. For example, if some event led to poor performance in multiple courses in a single quarter, a student has a potential case for appeal. In contrast, academic dishonesty or poor performance spanning multiple quarters will be considered evidence that a student is ill suited for the majors.

The letter of appeal must be submitted to the Linguistics Department office (Stevenson 243) no later than 15 days from the date the disqualification notice was mailed, or the 10th day of classes in the quarter of their disqualification, whichever is later. The department will subsequently notify the student and the student's college of the appeal decision no later than 15 days after the submission of the appeal.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on a close reading of (1) the student's grades and narrative evaluations for all courses relevant to the major; (2) the results of the senior exit requirement; (3) other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded to the top 10 percent of those graduating in the major. Only those students whose narratives are consistently excellent, and whose performance on the senior exit requirement is excellent, will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Preparation for the UCSC Master's Degree

Each year a number of UCSC students who have B.A. degrees in linguistics or language studies are admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult our web site (<http://ling.ucsc.edu/>); and see the Linguistics Department manager. The combined B.A./M.A. program (see below) provides another pathway to the M.A. program.

Graduate Program

The graduate program in linguistics at UCSC is a small, focused five-year program in linguistic theory leading to the degree of doctor of philosophy (Ph.D.). The research interests of faculty and students draw on the framework of generative grammar, with a primary focus on theoretical and experimental approaches to syntax, semantics, phonetics, and phonology. Research strengths also

include the structure of various languages, theoretical and computational morphology, mathematical foundations, and the philosophy of linguistics.

Each year the department admits approximately five new students to the doctoral program and a smaller number of new students to the M.A. program. The master's degree can be completed in one or two years, depending on the student's previous background in linguistics.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical and experimental understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers principles and parameters theory, minimalism, optimality theoretic syntax, and experimental approaches. Research in phonetics and phonology is pursued in various current frameworks, including optimality theory and dispersion theory. It ranges from issues in phonetics and the phonetics-phonology relationship to prosodic theory, prosodic morphology and the syntax-phonology relationship. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation. Experimental research in these areas reaches out to a broad range of issues in psycholinguistics and cognitive science.

The faculty have expertise in a variety of languages, including Chamorro, German, Hungarian, Irish, Japanese, Latin, Rumanian, Russian, Spanish, Turkish, and Tzotzil.

From the beginning of their studies, students are engaged in original research and critical evaluation since the aim of the program is to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation and core courses in linguistic theory. Subsequent coursework emphasizes theoretical depth; it is increasingly centered around the doctoral student's own research, culminating in the presentation of a dissertation on some aspect of linguistic theory and analysis.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student applying for admission to this program should, in any case, have a good foundation in at least one of the central fields of linguistic structure: phonetics, phonology, morphology, syntax, or semantics. Students entering the program with a deficiency in one or more areas will make up the deficiency by taking appropriate undergraduate courses at UCSC during the first year of graduate study.

Requirements for the M.A.

Courses. A minimum of 45 credits of graduate-level work. This must include the core courses in phonetics, phonology, syntax, and semantics. Electives are chosen from upper-division or graduate courses offered by linguistics and related disciplines, in addition to independent study with linguistics faculty.

Languages. Reading competence in one foreign language, to be demonstrated by examination.

Research paper. Submission of a research paper in a core area of theoretical linguistics and approval of a committee of two faculty.

Requirements for the Ph.D.

Courses. A minimum of 65 credits of graduate-level work. This includes foundation sequences in phonetics, phonology, syntax, and semantics.

Languages. Reading competence in one foreign language, to be demonstrated by examination.

Qualifying papers and examination. By the end of the third year, two research papers, one in phonetics/phonology/morphology and one in syntax/semantics/pragmatics, are to be presented as part of the requirements for admission to candidacy. At this time, the prospective candidate is examined by the faculty on topics related to the student's major area of research, as part of the qualifying examination. The student is expected to defend a dissertation prospectus by the end of the fourth year.

Dissertation. The final requirement for the Ph.D. degree is the presentation of a dissertation representing a significant contribution in some central area of linguistic research.

Application and Admission

To apply, please consult the Department of Linguistics web site (<http://ling.ucsc.edu>).

The Combined B.A./M.A. Program

The B.A./M.A. program in linguistics is a demanding and selective option which allows students who are well prepared and well motivated to complete the requirements for both degrees in five years rather than the usual six.

Admission to the program has two stages. In the first stage, interested students apply to be admitted to the program in consultation with the undergraduate adviser no later than the first quarter of their junior year. Transfer students must apply for admission by the end of their second quarter at UCSC. In order to be accepted at this first stage, students must have demonstrated excellence in the undergraduate major in at least three courses that are named requirements for the linguistics major.

Students accepted at this initial stage are assigned a faculty mentor who monitors their progress closely.

At the second stage of the admission procedure, students apply in their senior year to be admitted through UCSC's normal graduate admissions process. If accepted, they complete the course requirements for the M.A. and write and defend the M.A. paper by the end of the fifth year.

Students in the B.A./M.A. program take a number of graduate courses in their senior year, which are selected in close consultation with the faculty mentor. Performance in these courses forms a central part of the ongoing evaluation process. If a student's performance does not meet the standards set for the program, he or she completes the B.A. at the end of the senior year in the normal way and does not proceed to the M.A.

Graduate courses required for the M.A. are taken partly in the senior year and partly in the fifth year. The M.A. paper is written in the fifth year. Thus, by the end of their fifth year, the students in the program will have fulfilled the requirements for both the B.A. and the M.A. degrees.

Lower-Division Courses

50. Introduction to Linguistics: Sounds and Words. W

An introduction to the major areas, problems, and techniques of modern linguistics. (General Education Code(s): SL, IH.) *G. McGuire*

53. Semantics I. F,W

Introduction to the logical foundations of natural language semantics. Logical and semantic relations, simple set theory, logical representations (propositional and predicate calculi, modal and tense logics) and their interpretations. A basic literacy course in the language of logical representation. (General Education Code(s): IH.) *P. Anand, A. Brasoveanu*

80B. Modern English Grammar. *

Elementary introduction to modern standard English grammar, both formal and informal, both written and spoken. Stresses the importance of linguistic evidence in understanding grammatical correctness; offers a demystification and critique of older traditional grammar in the light of recent research. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80C. Language, Society, and Culture. S

The study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects. (General Education Code(s): CC, T5-Humanities and Arts or Social Sciences.) *J. Padgett*

80D. Language and Mind: Chomsky's Program. *

A critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *The Staff*

80G. Introduction to Unix. *

Introduction to computing, the Internet, and the World Wide Web through the language of the Unix operating system. Oriented to the beginner, the course presupposes no previous acquaintance with any particular sort of computer. It covers the basic concepts of text editing and formatting, writing Web pages in basic HTML, and promotes a rigorous understanding of Unix commands and shell scripts. Views communication with a computer as a matter of learning a few simple though powerful languages. (Also offered as Computer Science 80G. Students cannot receive credit for both courses.) (General Education Code(s): T2-Natural Sciences.) *A. Van Gelder*

80V. Structure of the English Vocabulary. *

A systematic study of the elements of English words: besides the practical goal of vocabulary consolidation and expansion, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

101. Phonology I. S

Introduction to how sounds pattern in grammars—why they vary, how they combine, etc. Emphasis is on developing theories to explain the patterns. Topics include distinctive feature theory, phonemic analysis, autosegmental phonology, and principles of syllabification and stress. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 50. (General Education Code(s): W.) *R. Mester*

102. Phonology II. F

Advanced phonological theory. Topics include markedness; underspecification theories; advanced topics in feature geometry, syllable theory, and stress theory; and optimality theory. Readings include published articles. Emphasis on theory construction and argumentation based on data. Prerequisite(s): course 101. *J. Padgett*

105. Morphology. W

Study of the principles of word formation: derivation, inflection, and compounding; cross-linguistic study of morphological processes, morphological investigation and analysis. Prerequisite(s): course 52 or 55, and course 101. Offered in alternate academic years. *The Staff*

108. Poetry and Language. *

An introduction to the linguistic aspects of poetry, e.g., rhyme, meter, and larger-scale organization of poetic form. The emphasis is on English poetry, complemented by brief sketches of other poetic traditions. Students taking this course should have some basic knowledge of language structure (e.g., as provided by course 50). Offered in alternate academic years. (General Education Code(s): TA.) *The Staff*

111. Syntactic Structures. S

Provides a basic introduction to the methods and results of generative grammar. It simultaneously provides an overview of the major syntactic constructions of English. (Formerly course 55.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): IH.) *M. Wagers*

112. Syntax I. F,W

An introduction to syntactic investigation, developed through the study of central aspects of English syntax. A major purpose is to introduce students to the study of language as an empirical science. (Formerly course 52.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): IH.) *S. Chung, J. Hankamer*

113. Syntax II. S

Further aspects of English syntax; universal and language-particular constraints on syntactic structures and rules. Further developments and extensions of generative theory. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 52 and 53. (General Education Code(s): W.) *J. Hankamer*

114. Syntax III. W

Advanced topics in syntax and semantics. Prerequisite(s): course 113 and satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *J. Hankamer, J. McCloskey*

116. Semantics II. W

Major issues in natural language semantics: nature of lexical entries, thematic relations, propositional representation or "logical form"; relation between semantic interpretation and syntactic representations, quantification and scope relations, reference and presupposition, coreference and anaphoric relations. Prerequisite(s): course 53, and either course 52 or 55. *D. Farkas*

117. Pragmatics. *

Covers topics central in the study of pragmatics, the interpretation of language use. Topics include conversational implicature, speech acts and discourse understanding, and social deixis. Prerequisite(s): course 53. Offered in alternate academic years. *The Staff*

118. Semantics III. *

Uses the tools learned in courses 53 and 116 (Semantics I and Semantics II), giving students the opportunity to explore important topics with heavy emphasis placed on reading primary-source literature. Readings form the basis for weekly lectures and the discussion section. Prerequisite(s): course 116. Enrollment limited to 25. *The Staff*

120. Structure of English. *

Survey of grammatical structure of English and terminology of grammatical description. Covers phonological, morphological, and syntactic structure of English and

contrasts it with other languages. Prerequisite(s): course 52 or 55, and 101. *The Staff*

124. Language Typology. F

Introduces the branch of linguistics whose goal is to describe and explain the structural diversity of the world's languages. Focuses on what is known about variation in particular domains (e.g., syllable structure, word order, evidentiality), and how it might be explained. Prerequisite(s): course 52 or 55, and course 101. Enrollment limited to 40. *The Staff*

125. Foundations of Linguistic Theory. *

Survey of some of the history and foundational assumptions of generative grammar; also looks at some of the influence of generative linguistic theorizing on disciplines outside linguistics, notably psychology and philosophy. Prerequisite(s): course 113 or 116. Enrollment limited to 25. *The Staff*

140. Language Change. S

Methods and problems in the study of change in linguistic systems. Reconstruction of proto-languages; the comparative method. Theories of change and implications for the theory of grammar. Prerequisite(s): course 102. Enrollment limited to 25. *R. Mester*

151. Phonetic Analysis. W

Introduction to instrumental phonetic analysis—analysis using experimental methods. Emphasis is on the acoustics and perception of speech. Prerequisite(s): course 101. *J. Padgett*

152. Applied Phonetics. *

Examines areas in which phonetic analysis and experimentation are used in practice. Emphasizes problem-solving, experiments, and analytical tasks. Prerequisite(s): course 151. Enrollment limited to 25. *The Staff*

154. Language and Social Identity. F

Introduction to sociolinguistics exploring the relationship between language and such social parameters as social status, ethnicity, race, gender, etc., including the role of language differences in the creation of social stereotypes. Emphasis on gathering, examining, and reporting data. Prerequisite(s): course 50. Enrollment restricted to senior language studies majors. Enrollment limited to 25. *G. McGuire*

155. Language and Cognition. S

Introduces and examines some of the foundational assumptions, practices, and methods of generative grammar in comparison to those of other areas of cognitive science, notably psychology and philosophy. Prerequisite(s): courses 52 or 55, 53, and 101. *J. McCloskey*

157. Psycholinguistics and Linguistic Theory. F

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Students cannot receive credit for this course and course 257. Prerequisite(s): course 102 or 105 or 113 or 116. Enrollment restricted to linguistics and language studies majors. Enrollment limited to 20. (General Education Code(s): SR.) *M. Wagers*

158. Advanced Psycholinguistics. *

Advanced topics in psycholinguistics and experimental linguistics, contemporary memory models, computational models of comprehension and production, and neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques. Prerequisite(s): course 157. Enrollment restricted to linguistics and language studies majors. Enrollment limited to 12. *The Staff*

160. Language Engineering. W

Addresses a particular problem in language engineering, chosen for its practical and theoretical interest and its tractability. The entire course focuses on a team project to design a solution to the problem. Permission of instructor required. *The Staff*

181. Structure of Romance Languages. F

Examines the phonological and syntactic structures of Romance languages. Some knowledge of Italian, French, or Spanish is required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

182. Structure of Spanish. *

The phonology and syntax of Spanish, studied from a modern linguistic perspective. Some knowledge of Spanish is required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

183. Structure of French. *

The phonology, morphology, and syntax aspects of French. Some knowledge of French is helpful. Prerequisite(s): course 55 or 52, and 101. *The Staff*

184. Structure of Irish. *

Integrated Irish-language course for beginners, combining both instruction in the language itself (linguistic) and seminars about the current social, political, and cultural state of the language (sociolinguistic). Enrollment by permission of instructor. Enrollment limited to 25. *The Staff*

185. Structure of Russian. *

The phonology, morphology, and syntax of Russian. Some knowledge of Russian is helpful. Prerequisite(s): course 52 or 55, and course 101. Enrollment limited to 30. Offered in alternate academic years. *The Staff*

186. Structure of German. *

Phonological, morphological, and syntactic aspects of the structure of the German language. Some knowledge of German is required. Prerequisite(s): course 55 or 52, and 101. *The Staff*

187. Structure of Japanese. W

The phonology, morphology, and syntax of Japanese. Some knowledge of Japanese is required. Prerequisite(s): course 55 or 52, and 101. Offered in alternate academic years. *J. Ito*

188. Structure of Turkish. *

The phonology, morphology, and syntax of Turkish. Prerequisite(s): course 52 or 55, and 101. *The Staff*

190. Senior Research (2 credits). F,W,S

Students produce a research paper or other significant project to satisfy the capstone requirement. Prerequisite(s): course 101, and either course 52 or 55. Concurrent enrollment in a specified upper division course is required. Enrollment restricted to senior linguistics and language studies majors. *The Staff*

193. Field Study. F,W,S

Students submit petition to sponsoring agency. *The Staff*

195. Senior Thesis. F,W,S

Deadline for submission of thesis proposal is one year in advance of proposed completion. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

197. Squib Writing. *

Students write one squib (one to ten pages) per week except for weeks three and seven, when they write two squibs. A selection of the squibs is presented in class; one or two will be rewritten. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior linguistics and language studies majors with an advanced understanding of linguistics.

Enrollment limited to 15. (General Education Code(s): W.) *J. Hankamer*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision by correspondence). Preparation and approval must be completed by the fifth day of instruction of any given quarter. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

211. Phonology A. F

First part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Enrollment restricted to graduate standing or consent of instructor. *G. McGuire*

212. Phonology B. W

Second part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Prerequisite(s): course 211. Enrollment restricted to graduate standing or consent of instructor. *R. Mester*

213. Phonology C. S

Third part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. Ito*

216. Phonology Proseminar. *

One or more topics in phonological theory. Topics vary from year to year, covering literature and current research in phonology. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *The Staff*

219. Phonology Seminar. W

Advanced topics in phonology drawn from the current research interests of the instructor. Prerequisite(s): course 212. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. Ito, R. Mester*

221. Syntax A. F

Introduction to syntactic theory. Phrase structure; subcategorization; lexical entries; passive; infinitival constructions. Enrollment restricted to graduate standing or consent of instructor. *S. Chung*

222. Syntax B. W

Continuation of Syntax A. The syntax of unbounded dependencies, including constituent questions, relative clauses, clefts, topicalization. Constraints on extraction; unbounded versus successive cyclic movement; the li-

censing of gaps. Prerequisite(s): course 221. Enrollment restricted to graduate standing or consent of instructor. *J. McCloskey*

223. Syntax C. S

Continuation of Syntax B. The syntax of anaphora. Topics vary from year to year, and may include the following: coreference in antecedent-pronoun relations; reflexives and reciprocals; disjoint reference; bound-variable anaphora; ellipsis; semantic and pragmatic constraints on anaphora. Prerequisite(s): course 222. Enrollment restricted to graduate standing or consent of instructor. *J. Hankamer*

226. Proseminar in Syntax. *

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives. Prerequisite(s): course 222. *The Staff*

229. Syntax Seminar. W

Advanced topics in syntax drawn from the current research interests of the instructor. Prerequisite(s): course 222. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *J. McCloskey*

231. Semantics A. F

Introduction to linguistic semantics: nature of lexical entries, thematic relations, representation of logical form; relation between semantic interpretation and syntactic representation, quantification and scope relations, reference and presupposition. Enrollment restricted to graduate standing or consent of instructor. *P. Anand*

232. Semantics B. W

Model-theoretic semantics for natural language. Truth-conditional, compositional semantics. Various logical ontologies and their application to natural language categories. Dynamic interpretation of discourse and anaphoric relations. Treatment of illocutionary force. Prerequisite(s): course 231. Enrollment restricted to graduate standing or consent of instructor. *A. Brasoveanu*

233. Semantics C. *

Third and final course in the graduate introduction to semantics, focusing on questions at the border between semantics and pragmatics. Concerns include: modality, conditionals, non-declarative meaning, and context and context structure viewed from a dynamic perspective. Prerequisite(s): course 232. Enrollment restricted to graduate students. *The Staff*

236. Proseminar in Semantics. *

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics. Prerequisite(s): course 231. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

239. Semantics Seminar. F

Advanced topics in semantics drawn from the current research interests of the instructor. Prerequisite(s): course 232. Enrollment restricted to graduate standing or consent of instructor. May be repeated for credit. *D. Farkas*

240. The Pedagogy of Linguistics (1 credit). F,W,S

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of linguistics specifically. Under the supervision of a faculty member, coordinated by a graduate student with substantial experience as a teaching assistant. May be repeated for credit. *The Staff*

245. Computational Models of Discourse and Dialogue. S

Focuses on classic and current theories and research topics in the computational modeling of discourse and dialogue, with applications to human-computer dialogue interac-

tions; dialogue interaction in computer games and interactive story systems; and processing of human-to-human conversational and dialogue-like language such as e-mails. Topics vary depending on the current research of the instructor(s) and the interests of the students. Students read theoretical and technical papers from journals and conference proceedings and present class lectures. A research project is required. (Also offered as Psychology 245. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. May be repeated for credit. *The Staff*

249. Morphology Seminar. *

Presents theoretical and descriptive issues, particularly those raised by the framework of distributed morphology and its current competitors. Course work consists of readings, squibs, and a term paper. Enrollment restricted to graduate students. *The Staff*

257. Psycholinguistics and Linguistic Theory. F

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Graduate students have separate evaluation criteria. Students cannot receive credit for this course and course 157. Enrollment restricted to graduate students. *M. Wagers*

258. Advanced Psycholinguistics. *

Advanced topics in psycholinguistics and experimental linguistics. Contemporary memory models. Computational models of comprehension and production. Neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques. Graduate students have separate evaluation criteria. Prerequisite(s): course 257. Enrollment restricted to graduate students. *The Staff*

259. Phonetics Seminar. *

Advanced topics in acoustic and articulatory phonetics. Prerequisite(s): course 213. Enrollment restricted to graduate students. *The Staff*

265. Mathematical Foundations of Linguistics. *

A survey of the basic mathematical notions fundamental to the understanding of work in theoretical syntax, semantics, and phonology. Topics covered include basic set theory, formal logic, boolean algebra, graph theory, and formal language theory. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

280. Proseminar in Experimental Linguistics. S

Examines experimental design and analysis for gathering linguistic data; the advantages and disadvantages of major response measures, including reaction times; interaction with extra-grammatical factors; and statistics on categorical and continuous measures. Students present results in research papers. Enrollment restricted to graduate students. *M. Wagers*

290. Research Seminar. W

A research seminar for undergraduate and graduate students to develop the skills of the profession. Critical reading, reviewing, teaching, presentation, and writing. Students submit petition to sponsoring agency. Enrollment restricted to graduate standing or consent of instructor. Enrollment limited to 10. *D. Farkas*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. Enrollment restricted to graduate standing or consent of instructor. *The Staff*

296. Linguistics Colloquium (2 credits). F,W,S

Independent graduate-level activities and assignments relating to development of familiarity with professional activities in academic linguistics: organizing and attending colloquia and conferences, both on- and off-campus; participation in discussions at such events; and preparation of commentaries on academic papers and other papers. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Enrollment restricted to graduate standing or consent of instructor. *The Staff*

299. Thesis Research. F,W,S

The Staff

Faculty and Professional Interests

Professor

JORGE ALADRO FONT

Spanish mysticism; theory and historical developments of imagery in the Middle Ages to the baroque period; Renaissance and baroque Hispanic literature; Italian ideas in the Spanish Renaissance; Cervantes

GEORGE T. AMIS, Emeritus**KAREN BASSI**

Greek and Latin literatures; gender; literary and cultural theory; pre- and early modern studies; historiography; visual and performance studies

MURRAY BAUMGARTEN

Dickens; Victorian literature and culture; the Bible; translation; modern Jewish writing; the Holocaust

HARRY BERGER, JR., Emeritus**MARGARET R. BROSE, Emerita****JULIANNE BURTON-CARVAJAL, Emerita****CHRISTOPHER CONNERY**

World literature and cultural studies; globalism and geographical thought; the 1960s; Marxism; pre-modern and modern Chinese cultural studies; cultural revolution

NATHANIEL DEUTSCH

Hebrew Bible; rabbinic literature; Jewish mysticism; Hasidism; Eastern European Jewish life; ethnography

ROBERT M. DURLING, Emeritus**JOHN M. ELLIS, Emeritus****CARLA FRECCERO**

Renaissance studies; French and Italian language and literature; early modern studies; postcolonial theories and literature; contemporary feminist theories and politics; queer theory; U.S. popular culture; posthumanism; animal studies

PASCAL GAITET

Nineteenth- and 20th-century French literature; sociolinguistics; political history; Celine; Genet

MARY-KAY GAMEL

Performance studies; ancient Mediterranean performance; Greek and Latin literatures; myth; reception of Greek and Roman texts and artifacts; film; feminist approaches to

literature and performance

SUSAN GILLMAN

Nineteenth-century American literature and culture; theories of culture, race, and gender; world literature and cultural studies

WLAD GODZICH

Theory of literature; philosophy and literature; emergent literature; translation theory; globalization and culture; European integration; knowledge society; literatures of Africa, the Caribbean, Europe (Central, Eastern, and Western), Brazil, Canada; detective and crime fiction; science fiction; medicine and literature

KIRSTEN SILVA GRUESZ

Transnational Americas studies; Chicano/Latino literatures and cultures; 19th-century U.S. and Latin American literature; poetry; history of the book; reading and literacy; bilingualism

MARGO HENDRICKS, Emerita**JOHN O. JORDAN**

Dickens; Victorian literature and culture; the English novel; literature of South Africa; narrative theory

SHARON KINOSHITA

Medieval Mediterranean studies (literary, historical, art historical); the Francophone Middle Ages; empires; postcolonial and globalization theory; Marco Polo; world literature and cultural studies

NORMA KLAHN

Latin American literary and cultural studies (specialization: Mexico); Chicano/Latino literature and culture from a cross-border perspective; modernity/postmodernity; poetics and politics; genre theory (novel, poetry, autobiography); contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

H. MARSHALL LEICESTER, JR.

Psychoanalysis; poststructuralism; gender theories; theory of cultural change; cultural studies and popular culture: opera, film, American country music

JOHN P. LYNCH, Emeritus**NATHANIEL E. MACKAY**

Twentieth-century American literature; Afro-American literature; creative writing

TYRUS MILLER

Modernist, avant-garde, and postmodernist literature; the interrelations of the arts in the 20th century; aesthetics; cinema and film theory; the Frankfurt School; philosophy and social theory; contemporary poetry and language arts

HELENE MOGLEN, Emerita**MADELINE MOORE, Emerita****MARTA MORELLO-FROSCH, Emerita****DANIEL SELDEN**

Afroasiatic languages and literatures; Greek and Latin; Hellenistic culture; the classical tradition; history of criticism; literary theory

PRISCILLA W. SHAW, Emerita**DEANNA SHEMEK**

Early modern Italian literature and culture; Renaissance feminism; humanism and gender production; letter-writing and epistolary culture; early modern literacy; historical "ideas of the Renaissance;" Renaissance drama; the northern court circles

PAUL N. SKENAZY, Emeritus**GRETA SLOBIN, Emerita****S. PAGE STEGNER, Emeritus****RICHARD TERDIMAN**

Nineteenth- and 20th-century French and European

literature and culture; literary and cultural theory; contemporary critical theory; cultural globalization; digital humanities and digital publication

THOMAS A. VOGLER, Emeritus**MICHAEL J. WARREN, Emeritus****ROB WILSON**

Transnational and postcolonial literatures; especially as located in Asia/Pacific emergences as posited against American empire of globalization; cultural poetics of America; the sublime; Longinus to Hiroshima; mongrel poetics of experimental writing, especially poetry

KAREN TEI YAMASHITA

History and anthropology of Japanese immigration to Brazil; Asian American literature; modern fiction; playwrighting

Associate Professor

VILASHINI COOPAN

Postcolonial studies; comparative and world literature; literatures of slavery and diaspora; globalization studies; cultural theory of race and ethnicity

JODY GREENE

Seventeenth- and 18th-century British and French literature and culture; pre- and early modern studies; critical theory; gay and lesbian cultural studies; gender studies; history of authorship; history of the book; human property

LOURDES MARTÍNEZ-ECHAZÁBAL

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found(n)ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

LOISA NYGAARD

Eighteenth- and early 19th-century German literature; Goethe; Romantic fiction; landscape and landscape aesthetics; xenophobia in Germany

MICAH PERKS

Reading and writing contemporary fiction; memoir; historical fiction; gender, literature, and culture; alternative communities

JUAN POBLETE

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

Assistant Professor

DORIAN BELL

Nineteenth- and 20th-century French literature and intellectual history; histories of empire and anti-Semitism; literature and science; film studies; digital humanities

A. HUNTER BIVENS

Twentieth- and 21st-century German literature and film; Marxism and critical theory; psychoanalysis; lyric poetry; literary realism; the novel

CHRISTINE HONG

Asian American literature and cultural criticism; African American literature and black freedom studies; Korean diasporic cultural production; Pacific Rim studies; postcolonial theory; critical race theory; human rights discourse; law and literature; narrative theory; film and visual studies

G.S. SAHOTA

Post-colonial studies, Indian literary cultures and intellectual spheres (Urdu, Sanskrit, Punjabi, Hindi, English); religion and modernity (Islam, Hinduism, Sikhism); imperialism and culture; romanticism; Marxism and critical theory; world literature and cultural studies; translation theory/practice

Lecturer

GEORGE P. HITCHCOCK, Emeritus

**Professor**

MICHAEL H. COWAN (American Studies)

American cultural theory and history; history of American studies; symbolic expression in American life; urban cultural studies; American literary studies; studies in the institutional culture of higher education

TERESA DE LAURETIS, Emerita

CHARLES W. HEDRICK JR. (History)

Greek and Roman history; epigraphy; historiography; political theory

AKASHA HULL, Emerita

GARY B. MILES, Emeritus

FORREST G. ROBINSON (Humanities)

Nineteenth- and 20th-century American literature; including Mark Twain; the American West; and popular culture; biography and American culture theory

DAVID SWANGER, Emeritus

Lecturer

ROSWELL SPAFFORD, Emerita

Program Description

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, rather than through separate departments of English, modern languages, and classics. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the major encompass traditional literary history and interpretation as well as cross-cultural inquiry and current theoretical debates.

The literature major permits focused work in national literary traditions. Students may concentrate in English-language literatures; in French, German, or Italian; in Latin and/or Greek; or in Spanish/Latin American/Latino literatures. Alternatively, students may organize their studies by historical period. Students who choose pre- and early modern studies focus on early literary traditions from antiquity through the Middle Ages, the Renaissance, and the neo-classical period, while those engaged in modern literary studies concentrate on literature of the 18th, 19th, 20th, and 21st centuries. In addition, the world literature and cultural studies concentration emphasizes non-Western literatures, literature in a global context, as well as non-literary forms of cultural production. Finally, the Literature Department also offers a concentration in creative writing in which, in addition to studying literature, students work with faculty in upper-division workshops to improve their own creative writing skills.

Literature majors at UCSC are trained in critical reading, writing, and thinking, as well as in literary interpretation. These skills have wide applicability: they may lead to careers in other media such as film, theater, video, the visual arts, and electronic media; and they offer avenues into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and history of art and visual culture. Literature majors traditionally enter a wide variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels.

The Literature Department faculty requires that

all literature majors have proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in a language other than English.

Letter Grade Requirement

Letter grades are required for 75 percent of courses applied toward the literature major, including the senior seminar or thesis, which must be taken for a letter grade.

Declaring the Major or Minor

Students must complete Literature 1 or its equivalent prior to declaring the major or minor. Students declare a major or minor in literature by completing and submitting a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a literature major or minor should consult with staff and/or faculty advisers as early as possible and declare the major or minor before the end of their sophomore year. Transfer students are urged to declare the major or minor in the first quarter at UCSC.

Literature Major Options

Students wishing to major in literature may choose either the standard literature major or the intensive literature major. The intensive literature major is recommended particularly for students who plan to continue their studies in graduate school. The requirements for the intensive major include the study of literature in two languages; proficiency in a second language is therefore required.

The Standard Literature Major

The literature major requires: (1) proficiency in a second language; and (2) 12 courses in literature.

- *Language proficiency:* One year (three quarters or equivalent) of college level study of a non-English language or demonstrated reading ability at this level.
- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Courses

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

Two lower-division courses are required:

- Literature 1, *Literary Interpretation*: close reading and analysis of literary texts
- One Literature 61-series course: categories, methodologies, and problems of literary study, or one Literature 80-series course: topical, thematic, and comparative studies of literary texts

Language proficiency: One year (three quarters or equivalent) of college level study of a non-English language or demonstrated reading ability at this level

Upper-Division Courses

Upper-division courses provide more detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries. Students must successfully complete the language proficiency requirement before enrolling in Literature 102.

Ten upper-division courses are required:

- Literature 101, *Theory and Interpretation*: approaches to literary and cultural theories
- Literature 102, *Translation Theory*: approaches to literary and cultural translation, or one upper-division non-English literature course studied in the original language. Students must successfully complete the language proficiency requirement before enrolling in Literature 102
- six upper-division courses in an area of concentration (described below)
- two upper-division electives in literature

Distribution requirements. Among the 10 upper-division courses, at least two must focus on literature written prior to the year 1750; one course must focus on non-Western literature or literature in a global perspective; and one course must focus on poetry. One of the upper-division courses must be a senior seminar, which can be used to satisfy the campus comprehensive (exit) requirement. Some courses fulfill more than one distribution requirement. A list of annual course offerings indicating distribution codes for each course is available in the department office and on the Literature Department web page at <http://literature.ucsc.edu/courses>.

With prior permission from the literature undergraduate program director, one upper-division literature elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Intensive Literature Major

The Intensive Literature major requires (1) proficiency in a second language, and (2) 14 courses in literature.

- *Language proficiency:* in addition to the Standard Literature major requirement of one-year (three quarters or equivalent) of college-level study of a non-English language, or demonstrated reading ability at this level, students must complete at least two upper-division courses in a second-language literature studied in the original language. In many languages, two years of college-level study (or comparable ability) are needed before a student is prepared to enter an upper-division course. In a few languages (Greek, Latin, Middle Egyptian Hieroglyphs), less time is needed for this purpose.
- The 14 required courses must include two lower-division and 12 upper-division courses.

Lower-Division Courses

The same requirements apply as for the standard literature major. Students who choose the intensive literature major are required to achieve competence in a second-language literature. Upper-division literature coursework requires completion of a lower-division language sequence or the equivalent.

Upper-Division Courses

The intensive major requires 12 upper-division courses. Distribution requirements for the intensive major are the same as those for the standard literature major. In addition, students must complete at least two courses in a second-language literature studied in the original language. As in the standard major, with prior permission from the literature undergraduate program director, one upper-division literature elective may be replaced by an upper-division course related to the student's area of concentration and chosen from another program in the humanities, arts, or social sciences.

The Concentrations

The purpose of the upper-division area of concentration is to help students shape a coherent program of study. The department provides several defined concentrations, described below. For all concentrations except national/transnational literatures, texts may be read in the original or in translation.

National/Transnational Literatures

These concentrations examine literature within the frameworks of particular languages or national and regional traditions. National/transnational concentrations require that texts be read in the original language.

- English-language literatures
The study of American and British literature, as well as literatures of other English-speaking peoples around the world.
- French literature
The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.
- German literature
The study of the literature, language, and cultural practices of the German-speaking areas of central Europe including Germany, Austria, and Switzerland.
- Greek and Latin literature
The study of the literature, languages, and cultural practices of ancient Greece and Rome. Students may choose to concentrate in Greek or Latin or both.
- Italian literature
The study of Italian literature, language, and cultural practices from the Middle Ages to the present.
- Spanish/Latin American/Latino literatures
The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Creative Writing

The Department of Literature offers a sequence of workshops from introductory through advanced levels in both poetry and fiction. Other activities available to interested students include participation in the production of literary journals on campus, attendance at readings by visiting writers, and use of a creative writing reading room.

Admission to this concentration is selective. Interested students are required to take one lower-division creative writing workshop at UCSC before applying to the creative writing concentration; however, students are strongly encouraged to complete two lower-division workshops (at least one at UCSC) before applying.

Students accepted into the concentration must complete three advanced writing workshops and a senior project (e.g., a group of stories, a significant portion of a novel, a collection of poems). To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office) and a thoughtful selection from their work (8–10 pages of poetry or fiction). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature. At that time, students should meet with their adviser to discuss plans for a senior project.

Pre- and Early Modern Studies

The interdisciplinary study of literatures and cultures from antiquity through the early eighteenth century,

especially in Europe. This concentration includes the study of popular culture and everyday life as well as readings in masterpieces of classical, medieval, early modern (Renaissance), and neo-classical literature.

Modern Literary Studies

The study of literature of the eighteenth, nineteenth, twentieth, and twenty-first centuries. This concentration examines ways in which modernity in general and literary modernism and postmodernism in particular emerge and develop in different countries and cultures.

World Literature and Cultural Studies

The study of literature and cultural production both within a global context and within specific histories and economies. Courses move beyond the literary text to include nonverbal forms of representation such as social movements and everyday life practices.

Disciplinary Communication (DC)

Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Literature majors must satisfy the Disciplinary Communication requirement by passing Literature 101.

Comprehensive Requirement

Students must successfully complete Literature 101 before taking any comprehensive requirement. Seniors must select one of the following options to satisfy the campus exit requirement:

- Senior seminar. The senior seminar may be counted as one of the required upper-division courses. The senior seminar need not be in the student's area of concentration. Several senior seminars are offered each quarter; extensive writing is required in all seminars.
- Senior thesis. A student who wishes to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement. A student whose application has been approved may receive course credit toward the major for one independent study (course 195) in a literature concentration.

For students in the creative writing concentration, a creative writing project under the supervision of a faculty member (Literature/Creative Writing 194 or 195) is required.

The Literature Minor

The minor in literature requires seven courses. Two lower-division courses are required:

- Literature 1, Literary Interpretation: close reading and analysis of literary texts
 - One Literature 61-series course: categories, methodologies, and problems of literary study, or one Literature 80-series course: topical, thematic, and comparative studies of literary texts
- Five upper-division courses are required:

- Literature 101, Theory and Interpretation
- Four other upper-division literature courses (except Creative Writing)

The Literature minor does not require second-language proficiency or a senior seminar.

General Information

Transfer Credit

A student may petition to receive credit toward the lower-division requirements of the major or minor for up to two courses taken at other institutions. An introduction to literature course may be used to satisfy the Literature 1 course requirement. Any other literature course may be applied toward the Literature 61 or the Literature 80 course requirement.

Transfer students planning to major in literature are urged to complete the equivalent of one year of college-level study of a language other than English before entering UCSC.

Creative Writing Courses

Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing 180, 183, 194, and 195 to satisfy major requirements.

Credit For Repeated Courses

Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UCSC General Catalog.

Advising

Faculty advisers are available in the Literature Department office throughout each academic term; students may make appointments in advance to meet with them. Staff advisers are available by appointment and on a drop-in basis. Students are encouraged to consult with a faculty adviser once a quarter.

Senior Checklist

Three quarters before anticipated graduation, all literature majors must complete a checklist in collaboration with a department adviser. The purpose of the checklist is to confirm progress toward graduation and the satisfaction of all major requirements. Completion and approval of a senior checklist are required for graduation.

Opportunities for Study Abroad

The University of California's Education Abroad Program (EAP) operates study centers in countries throughout the world, all associated with host institutions of high academic standing. EAP serves over 1500 upper-division students from the nine UC campuses every year. Students who participate in a UC Education Abroad Program study year may petition to apply up to three upper-division courses from EAP toward the literature major, or two upper-division courses toward the literature minor.

Latin American and Latino Studies and Literature Combined Major

The departments of Latin American and Latino Studies and Literature offer a combined major. See Latin American and Latino Studies for additional information.

The Graduate Programs

The Doctoral Program

The UCSC doctoral program in Literature offers an innovative multilingual and multidisciplinary approach to literary studies. The program is relatively small; stu-

dents are able to work closely with faculty throughout their graduate careers. They are encouraged to take advantage of the rich array of intellectual and cultural events, research clusters, and lectures offered on campus.

The doctoral program combines critical and independent thought with multilingual training and global perspectives. Students work within and across five areas, each of which cuts across linguistic, national, and period boundaries: technologies of narrative; trans/post/emergent nationalisms; poetics, poetry, and experimental writing; materialism and material culture; and critical theory. In combination they allow students to blend critical approaches, literary traditions, and/or cultural archives in comparative, multilingual, and interdisciplinary projects. Students may elect to participate in cooperative programs between literature and feminist studies, Latin American and Latino studies, or American studies and receive a designated emphasis on their doctoral degree. Applications and requirements are available at the respective department offices.

The program requires significant literary work in two languages. All students are required to complete a minimum of two courses in a second-language literature in which 50 percent or more of the reading is done in the original language. The second literature must serve as a component of the qualifying examination.

The common requirements are:

- Literature 200, *Proseminar*, to be taken in fall quarter of the first year;
- A one-quarter Literature 201, *Pedagogy of Teaching/ Teaching Assistant Training*, to be taken prior to or in conjunction with the first teaching assistant appointment;
- Twelve courses leading to the definition of an area of concentration. At least two of these must be in a second-language literature; at least one must focus on pre-1750 literature and culture. Up to four courses may be taken in other departments; up to three may be independent studies;
- One two-credit advising course, Literature 291F, per quarter;
- Three quarters of supervised teaching experience;
- The Literature Department's intensive three-week Graduate Summer Language Program or equivalent;
- A qualifying examination (with written, oral, and translation components);
- A prospectus outlining and defining the dissertation project;
- A dissertation (written in conjunction with Literature 299, *Thesis Research*).

A master of arts (M.A.) degree is conferred upon request to doctor of philosophy (Ph.D.) candidates who have successfully completed the literature Ph.D. qualifying examination or who have completed the coursework required for the doctorate (teaching assistant training and supervised teaching experience exempted) and written a master's thesis under the supervision of a faculty adviser.

More detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies (<http://graddiv.usc.edu>) and on the department web site: <http://literature.usc.edu>.

The Master's Program

A separate master of arts degree program is intended for students whose aim is to deepen and expand their literary/critical training and to prepare for entry into a Ph.D. program at another institution. Priority for admission is given to students interested in underrepresented areas of study within the Literature Department's offerings, such as the non-English language literatures and, more broadly, critical theory.

The M.A. program requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

The common requirements are as follows:

- Literature 200, *Proseminar*, to be taken in fall quarter of the first year;
- Seven courses leading to the definition of an area of concentration. Up to two of these may be taken in other departments. One may be an independent study course;
- One two-credit advising course, Literature 291F, per quarter;
- A thesis (written in conjunction with Literature 299, *Thesis Research*). Typically, a thesis will range in length from 35–50 pages, plus a bibliography.

The Literature Department does not normally provide financial support to students pursuing the M.A. degree; however, teaching assistantships are sometimes available. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students may not automatically transfer from the M.A. program into the Ph.D. program, but must reapply. Further information and application materials are available from the Division of Graduate Studies (<http://graddiv.usc.edu>) and on the department web site (<http://literature.usc.edu>).

Literature

Lower-Division Courses

1. Literary Interpretation. F,S

Close reading and analysis of literary texts, including representative examples of several different genres and periods. An introduction to practical criticism required of all literature majors; should be completed prior to upper-division work in literature. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to first-year students and sophomores, or literature and proposed literature majors and literature minors. (General Education Code(s): TA, IH, W.) *J. Poblete, S. Gillman*

42. Student-Directed Seminar. *

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

61. Introduction to Literary Genres.

61D. Introduction to Reading Drama. *

Introduction to the Western theatrical tradition through the study of dramatic form in social context. (General Education Code(s): IH.) *M. Gamel*

61E. Introduction to Ethnic Literature. *

An introduction to the study of ethnic literatures, addressing issues of voice, political agency, and the construction of subjectivity across racial, ethnic, and cultural boundaries in the U.S. Topic: Slavery and the literary imagination. (General Education Code(s): IH, E.) *The Staff*

61F. Introduction to Reading Fiction. F

Close reading of short stories and some novels with the aim of developing critical methods for the analysis and interpretation of prose fiction. Topics include character, plot, narrative structure, and the poetics of prose. (General Education Code(s): IH.) *S. Foster*

61J. Introduction to Jewish Literature and Culture. *

Surveys 3,000 years of Jewish literature and culture. Themes includes origins of the Jews in the ancient world; formation and persistence of the Jewish diaspora; coherence and diversity of Jewish experience; Jewish narrative and textual traditions; interaction between Jews and other cultures; tensions between tradition and modernity. (General Education Code(s): IH, E.) *M. Baumgarten*

61R. Race in Literature. *

An investigation into the various uses and abuses of "race" in 20th-century fiction. Authors may include Jean Rhys, Paul Bowles, Mark Twain, Russell Banks, Darius James, Joseph Conrad, Nella Larsen, LeRoi Jones/Amiri Baraka, Leslie Marmon Silko, and V.S. Naipaul. (General Education Code(s): ER, IH, E.) *The Staff*

80. Topics in Literature.

80I. Topics in American Popular Culture. *

History of one or more popular cultural genres in written, visual, and/or musical forms and their relation to ongoing public debates. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80L. The Holocaust: The Destruction of European Jewry. W

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film. (Also offered as History 80W. Students cannot receive credit for both courses.) (General Education Code(s): ER, T4-Humanities and Arts, E.) *M. Baumgarten, P. Kenez*

80N. Latino Expressions in the U.S. F

An introduction to Latino literature and culture in the U.S. A study of the creative expressions of Chicanos/as, Nuyoricans, Cuban Americans, and other Latin Americans in the U.S. (General Education Code(s): ER, T4-Humanities and Arts, E.) *K. Gruesz*

80P. Topics in Latin American Culture. *

Through films, literary texts, historical, sociological, and anthropological writings, explores topics pertaining to Latin American culture and society. Course topic changes; please see the Schedule of Classes for current topic. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *L. Martinez-Echazabal*

80V. Literature and History. *

Examines literature's relationship to the past and to the experience of history. Course topic changes; please see the Schedule of Classes for current topic. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80Z. Introduction to Shakespeare. S

Study of representative plays. No previous experience with Shakespeare is assumed. (General Education Code(s): TA, T4-Humanities and Arts.) *M. Frangos*

99. Tutorial. F,W,S

The Staff

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

*Upper-Division Courses***101. Theory and Interpretation. W,S**

Contemporary approaches to literary and cultural theory, with emphasis on how theoretical perspectives advance and broaden the reading of literary texts. Introduction to important new theoretical developments and their antecedents. Literature majors should complete this course as early as possible. Course topic changes; see the *Schedule of Classes* for current topic. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to literature and proposed literature majors and literature minors. May be repeated for credit. (General Education Code(s): W.) *J. Greene, C. Freccero*

102. Translation Theory. W

Promotes the understanding of translation and its role in redefining meanings across epochs and cultures, in establishing common norms, and in advancing mutual intelligibility; but also providing encounters with absolute alterity. Actual translations are used as case studies. One year of college-level, non-English language study or the equivalent reading ability in a non-English language required. (General Education Code(s): TA.) *W. Godzich*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Creative Writing*Lower-Division Courses***10. Introduction to Creative Writing. F,W,S**

Introduction to the crafts and techniques of poetry, fiction, and creative non-fiction, identifying and exploring traditional and non-traditional literary forms and genres while working on individual creative writing projects. An author reading and two workshop sections per week. Prerequisite: satisfaction of the Entry Level Writing requirement. Enrollment restricted to first-year students, sophomores, and juniors. May be repeated for credit. (General Education Code(s): PR-C, A.) *The Staff*

52. Intermediate Fiction Writing. F,W,S

An intermediate-level course in fiction designed for prospective creative writing majors. Prerequisite(s): submission of writing at first class meeting. May be repeated for credit. (General Education Code(s): PR-C, A.) *M. Sanders-Self, M. Perks, K. Yamashita*

53. Intermediate Poetry Writing. F,W,S

An intermediate-level course in poetry designed for prospective creative writing majors. Prerequisite(s): submission of writing at first class meeting. May be repeated for credit. (General Education Code(s): PR-C, A.) (F) *G. Young, (WS) S. Foster*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

*Upper-Division Courses***170. Methods and Materials. W**

Focuses on a particular process or subject used in the production of a literary text. Course is intended to work as a bridge between invention and scholarship. Course topic changes; please see the *Schedule of Classes* for current topic. Enrollment restricted to creative writing literature majors. May be repeated for credit. (General Education Code(s): A.) *S. Foster*

180. Advanced Writing: Fiction. F,W,S

Intensive work in writing fiction. Satisfies the Creative Writing Literature concentration. Enrollment restricted to creative writing literature majors or by permission of

instructor. May be repeated for credit. (General Education Code(s): A.) (W) *M. Perks, (FS) K. Yamashita*

183. Advanced Writing: Poetry. F,W,S

Intensive work in writing poetry. Satisfies the Creative Writing Literature concentration. Enrollment restricted to creative writing literature majors or by permission of instructor. May be repeated for credit. (General Education Code(s): A.) *R. Wilson, G. Young, S. Foster*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) *The Staff*

194. Creative Project Seminar.

Seminar for students beginning work on their creative writing senior project. Led by a faculty member, the seminar helps prepare each student to complete the project. Attention is given to focusing of creative topics, review of work in progress, work rhythms, and revision. *The Staff*

194A. Poetry. S

Satisfies the Creative Writing Literature concentration. Prerequisite(s): Literature 101. Enrollment restricted to senior creative writing literature majors. *G. Young*

194B. Fiction. S

Satisfies the Creative Writing Literature concentration. Prerequisite(s): Literature 101. Enrollment restricted to senior creative writing literature majors. *M. Perks*

A survey of writing from South Africa since 1948, focusing on social and political themes. Authors include Paton, Gordimer, Mphahlele, Fugard, Ndebele, Head, Brutus, Coetzee, and others. Satisfies the English, Modern, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): ER, E.) *J. Jordan*

160. Transnational Writing.

160E. Caribbean Literature. *

A study of major writing from the English-speaking Caribbean, with attention to the historical and cultural context out of which it arises and to which it responds. Satisfies the English, and Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *The Staff*

160F. Contemporary Transnational Literatures. *

Examines contemporary cultural production, including literature, music, and film, with close attention to social and political issues. Course topic changes; please see the *Schedule of Classes* for current topic. Satisfies the English, Modern, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): CC.) *The Staff*

170. Individual Authors.

170A. Geoffrey Chaucer. W

Close study of Chaucer's poetry, with some attention to relevant cultural, philosophical, and historical issues in the context of the late medieval period. Particular emphasis on *The Canterbury Tales*. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. (General Education Code(s): TA.) *H. Leicester*

170C. William Shakespeare. W

Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. May be re-

peated for credit. (General Education Code(s): TA.)
M. Frangos

170D. John Milton. *

Selected poetry and prose. Satisfies the English and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *H. Leicester*

170F. Charles Dickens. *

Study of representative work by Charles Dickens. Satisfies the English and Modern Literary Studies concentrations. May be repeated for credit. *J. Jordan*

180. Topics.

180B. The Gothic Imagination in Fiction, Film, and Theory. W

Readings include theoretical essays by Freud and Lacan and such fictions as *The Monk*, *Frankenstein*, *Dracula*, *Maus*, *The Yellow Wallpaper*, and *Beloved*. Films change each year, but may include *Alien* and *Blue Velvet*. Satisfies the English and Modern Literature concentrations. May be repeated for credit. (General Education Code(s): TA.) *H. Moglen*

180D. Twain, Slavery, and the Literary Imagination. *

Using Mark Twain's later writings and other literary/non-literary materials, explores responses to popular and legal discourse on "blood," race, sex, resurgence of racism, and imperialism. Satisfies the English and Modern Literature concentrations. (General Education Code(s): ER.) *S. Gillman*

180H. Women's Literature. F

Works by women from the 18th century to the present, with special attention to the relationship of literature to history, psychology, and aesthetics. Course topic changes; please see the *Schedule of Classes* for the current topic. Satisfies the English and Modern Literature concentrations. May be repeated for credit. (General Education Code(s): TA.) *C. Lupo*

180K. War in Contemporary American Culture. F

Considers the treatment of war in American literature since World War II. Close attention paid to both literary form and relevant historical context. Also provides perspectives on, and critical tools for thinking about, contemporary armed conflict. Course topic changes; please see the *Schedule of Classes* for the current topic. Satisfies the English and Modern Literature concentrations. (Formerly *War and 20th-Century American Culture*.) (General Education Code(s): TA.) *S. Carter*

190. Senior Seminars.

190A. Individual Authors. W

Intensive examination of works by individual authors. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the English Literature concentration; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. *H. Leicester*

190C. Studies in 19th-Century British Literature. *

Study of selected authors or issues in 19th-century British literature. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the English and Modern Literature concentrations; also satisfies the Senior Seminar distribution requirement. Prerequisite(s): Literature 101. Enrollment restricted

to senior literature majors. May be repeated for credit.
J. Jordan

190D. New World Poetics. *

A study of a number of poets from the United States, Latin America, and the Caribbean, with particular attention to the ways in which the New World locale occasions a call to reorder society, perception, history, and poetic practice. Satisfies the English and Modern Literature concentrations; also satisfies the Poetry and Senior Seminar distribution requirements. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. (General Education Code(s): E.) *The Staff*

Speaking, reading, and writing proficiency in French required. Prerequisite(s): Literature 101. Students submit petition to sponsoring agency. *The Staff*

198. Group Tutorial. F,W,S

Speaking, reading, and writing proficiency in French required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Speaking, reading, and writing proficiency in French required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Speaking, reading, and writing proficiency in French required. Students submit petition to sponsoring agency. *The Staff*

German Literature

Upper-Division Courses

102. Introduction to German Literature. F

Speaking, reading, and writing proficiency in German required. Wide reading of works representing the major authors, periods, and genres of German literature. Satisfies the German and Modern Literature concentrations. *L. Nygaard*

120. Fear of the Foreign: Xenophobia in German Literature and Culture. *

Speaking, reading, and writing proficiency in German required. Considers recent violence against immigrants and asylum-seekers in Germany, and moves on to examine images of people perceived as "foreign" or alien in German literature and culture from early times to the present. Satisfies the German and Modern Literature concentrations. *L. Nygaard*

150. German Romanticism. W,S

Speaking, reading, and writing proficiency in German required. A study of the emergence and development of German Romanticism. Central concerns are the Romantics' attitude toward the role of the imagination in literature and their attempts to revitalize myth and folklore in their works. Authors read include Tieck, Novalis, Hoffmann,

Eichendorff, and Heine. Satisfies the German and Modern Literature concentrations. *L. Nygaard*

159. German Comedy. *

Speaking, reading, and writing proficiency in German required. A study of a series of comic works by authors writing in German. In addition to discussing the texts in depth, we also look at theories of humor and laughter developed by thinkers such as Freud, Schopenhauer, and Bergson. Satisfies the German and Modern concentrations. *The Staff*

162. Modern German Lyric Poetry. *

Speaking, reading, and writing proficiency in German required. Intensive analysis of selected poems is complemented by broader reading in certain authors and periods. Satisfies the German and Modern Literary Studies concentrations; also satisfies the Poetry distribution requirement. *A. Bivens*

166. Contemporary German Literature and Film. W,S

Speaking, reading, and writing proficiency in German required. A survey of contemporary German culture in the context of the current debate on postmodernism and the avant-garde. Course topic changes; please see the *Schedule of Classes* for current topic. Satisfies the German and Modern Literature concentrations. May be repeated for credit. *A. Bivens*

195. Senior Essay. F,W,S

Speaking, reading, and writing proficiency in German required. Prerequisite: Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Speaking, reading, and writing proficiency in German required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Speaking, reading, and writing proficiency in German required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Greek Literature

Upper-Division Courses

100. Introduction to Greek Literature. S

Reading proficiency in Ancient Greek required. Satisfies the Greek and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. May be repeated for credit. (General Education Code(s): IH.) *K. Bassi*

102. Greek Poetry. W

Reading proficiency in Ancient Greek required. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Greek and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. May be repeated for credit. *K. Bassi*

103. Greek Drama. *

Reading proficiency in Ancient Greek required. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Greek and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern Studies distribution requirement. May be repeated for credit. *M. Gamel*

104. Prose Authors. F

Reading proficiency in Ancient Greek required. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Greek and Pre- and Early Modern Literature concentrations; also satisfies the Pre- and Early Modern

distribution requirement. May be repeated for credit. *J. Lynn*

193. Field Study. F,W,S

Provides for an individual program of study sponsored by a faculty member and carried on off campus. May be taken concurrently or consecutively for up to three courses of credit. Designed for upper-division students, with proposal supported by a faculty member willing to supervise, and approval of the chair of the Literature Department. Students submit petition to sponsoring agency. *The Staff*

195. Senior Thesis. F,W,S

Reading proficiency in Ancient Greek required. Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Reading proficiency in Ancient Greek required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Reading proficiency in Ancient Greek required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Reading proficiency in Ancient Greek required. Students submit petition to sponsoring agency. *The Staff*

Italian Literature

Upper-Division Courses

102. Italian Literary Genres. F

Close readings of a small number of texts representing major authors, periods, and genres (lyric, dramatic, narrative) of Italian literature. Intensive practice in spoken and written Italian. Satisfies the Italian and Modern Literature concentrations. (Formerly *Introduction to Italian Literature*.) May be repeated for credit. *D. Shemek*

130. Author and Contexts.

Designed to give an in-depth study of a given author's literary production and its cultural context.

130B. Boccaccio. *

Speaking, reading, and writing proficiency in Italian required. Critical study of *The Decameron*. Satisfies the Italian and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *D. Shemek*

130D. Dante's Divine Comedy. W

Speaking, reading, and writing proficiency in Italian required. Reading of the *Inferno*, the *Purgatorio*, and selected canti of the *Paradiso*, along with selections from Dante's lyrics and from medieval Italian and French poetry. Taught in conjunction with LTPR 183. Satisfies the Italian and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *M. Brose*

165. Studies in Italian Literature and Culture. *

Speaking, reading, and writing proficiency in Italian required. In-depth examination of a topic in Italian literary and cultural studies. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Italian and Modern Literary Studies concentrations. May be repeated for credit. *D. Shemek*

180. Women in Italy: Nineteenth and Twentieth Centuries. *

Speaking, reading, and writing proficiency in Italian required. Explores the specificity of Italian women's writing and studies their literary activities in historical and social context. Readings include Italian feminist and some his-

tory as well as literary texts. Periods and readings may vary from year to year. Satisfies the Italian and Modern Literature concentrations. *D. Shemek*

Speaking, reading, and writing proficiency in Italian required. Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Speaking, reading, and writing proficiency in Italian required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Speaking, reading, and writing proficiency in Italian required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Latin Literature

Upper-Division Courses

100. Introduction to Latin Literature. S

Reading proficiency in Latin required. Satisfies the Latin and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirements. May be repeated for credit. (General Education Code(s): IH.) *M. Gamel*

102. Roman Poetry. F,W

Reading proficiency in Latin required. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Latin and Pre- and Early Modern Studies Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. May be repeated for credit. *C. Hedrick, D. Selden*

103. Prose Authors. S

Reading proficiency in Latin required. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Latin and Pre- and Early Modern Studies Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. May be repeated for credit. *J. Lynn*

193. Field Study. F,W,S

Provides for an individual program of study sponsored by a faculty member and carried on off campus. May be taken concurrently or consecutively for up to three courses of credit. Designed for upper-division students, with proposal supported by a faculty member willing to supervise, and approval of the chair of the Literature Department. Students submit petition to sponsoring agency. *The Staff*

195. Senior Thesis. F,W,S

Reading proficiency in Latin required. Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Reading proficiency in Latin required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Reading proficiency in Latin required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Reading proficiency in Latin required. Students submit petition to sponsoring agency. *The Staff*

Modern Literary Studies

Upper-Division Courses

103. Constructions of the Modern. S

Definitions of the "modern" (after 1750) are developed within historically and culturally specific contexts. Satisfies the Modern and Critical Theory Literature concentrations. (General Education Code(s): TA.) *R. Terdiman*

124. The European Novel.

124A. Eighteenth Century to Modernism. S

Major works of European fiction in their social, cultural, and intellectual contexts. Emphasizes the 19th- and 20th-century novels. Works are read in translation. Satisfies the Modern Literature concentration. (General Education Code(s): TA.) *R. Terdiman*

144. Modern Jewish Cultures.

Modernity transformed Jewish culture: we will explore the ways in which changed social, political, and economic conditions produced new gender roles; professional, personal, communal, and cultural experiences; and generated powerful fictions, autobiographies, films and poems. Among the writers we will read are Isaac Bashevis Singer, Rebecca Goldstein, Saul Bellow, Martin Buber, Hannah Arendt, and S.Y. Agnon.

144A. Jewish Diaspora, Ethnicity, and Urban Life. *

Focuses on modern Jewish diaspora, ethnicity, and urban life. Satisfies the Modern Literature concentration. (General Education Code(s): E.) *B. Thompson*

144B. Modernity as Jewish Challenge and Catastrophe: The American Experience. F

Examines modernity as Jewish challenge and catastrophe, and focuses on the American experience. Satisfies the English and Modern Literature concentrations. (General Education Code(s): ER, E.) *B. Thompson*

144D. Jewish Writers and the American City. S

An examination of some major Jewish writers and their responses to the American city. Major writers: Henry Roth, Saul Bellow, Bernard Malamud, J. Kaplan, Philip Roth. A look at Yiddish and other minority writers, and including sociological and historical materials on the American city. Satisfies the English and Modern concentrations. (General Education Code(s): E.) *B. Thompson*

144E. Hebrew Poetry. *

Hebrew poetry—Biblical, medieval, modern—explores cultural and literary issues central to our contemporary world. Texts and discussion focus on Jewish and Israeli literary traditions. Satisfies the Modern Literature concentration; also satisfies the Poetry distribution requirement. May be repeated for credit. (General Education Code(s): CC.) *M. Baumgarten*

144G. Global Jewish Writing. *

Comparative analysis of modern Jewish writers from Western and non-Western diasporas. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *M. Baumgarten*

144H. Jewish Writers and the European City. S

Interrogates the master narrative of a specific European city and discusses the ways in which Jewish life and Jewish actions helped to shape that story and were shaped by it. Satisfies the Modern Literary

Studies concentration. May be repeated for credit. *M. Baumgarten*

144J. Jewish Travel Narratives. W

Exploration of the idea of the Diaspora as a "moving" condition, and of the multi-dimensional character of global Jewish culture, covering authors who traveled across the Jewish world from medieval times to the present. Satisfies the Modern Literary studies and Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. *The Staff*

145. Special Topics in Modern Literature.

145B. Modern Literature. S

Study of 19th- and/or 20th-century literature, with attention to its literary and historical context. Course topic changes; please see the *Schedule of Classes* for current topic. Satisfies the Modern Literary Studies concentration. May be repeated for credit. (General Education Code(s): TA.) *W. Godzich*

145H. Detective Fiction. *

Representative works of 19th- and 20th-century detective fiction, including works by Poe, Conan Doyle, Christie, Sayers, Hammett, Chandler, P.D. James, Paretsky, and others. Satisfies the English and Modern Literary Studies concentrations. *J. Jordan*

145I. The Historical Novel. *

Traces major developments in the historical novel, looking at how this popular genre has taken up a series of different forms, concerns, and questions about history and the different senses of historicity that fiction can express. Satisfies the English and Modern Literature concentrations. *The Staff*

155. Russian Literature in Translation.

155B. Russian Literature in Revolution. F

Survey of 20th-century Soviet literature, from the revolution to the death of Stalin. Readings include modernist and avant-garde texts of the 1920s and socialist realism. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (Formerly *Soviet Literature*.) (General Education Code(s): CC.) *W. Nickell*

155F. Women in Russian Literature. *

Survey of women's writing and representations of women in Russian and Slavic literature from the medieval folk tale through the contemporary period. Topics include Baba Yaga tales, woman as subject in 19th-century literature, Soviet memoir literature, and evolution of the persona of the female author. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. *W. Nickell*

155I. The Literatures of Russian and African-American Soul. *

Views the literatures of slavery and emancipation in relation to cultural paradigms of soul, virtue, and "élan vital," with particular attention to the ways that Russian peasant and African-American cultures have been mined as sources of purity and vitality. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. *W. Nickell*

155J. Soviet Everyday Life. S

Examines the theories, realities, and representations of everyday Soviet life, beginning with the utopian designs of the 1920s and concluding with the dystopian, postmodern iterations of the 1980s and 1990s. Satisfies the Modern and World Literature concentra-

tions; also satisfies the Global distribution requirement. (General Education Code(s): CC.) *W. Nickell*

160B. French Women Writers. *

Offers an introduction to the work and thought of three 20th-century French women writers: Simone de Beauvoir, Marguerite Duras, and Monique Wittig. Satisfies the Modern Literary Studies concentration. *The Staff*

167. German Authors in Translation.

167K. Kafka in Translation. *

An intensive study of the works of Franz Kafka, with reference to the literary, social, and historical context in which his work emerged. Course topic changes; please see the *Schedule of Classes* for current topic. Satisfies the Modern Literature requirement. May be repeated for credit. (General Education Code(s): TA.) *A. Bivens*

168. German Literature in Translation.

168D. Germany in War and Peace. *

Study of selected texts reflecting German society at war or in that ambiguous state called "peace." Attention is given to the place of literature in German cultural life and its special role in the formation of national identity. Satisfies the Modern Literature concentration. *L. Nygaard*

187. Modern Literature. W

Students may count any combination of 2-credit or 3-credit literature courses, together totaling at least 5 credits, toward satisfaction of the literature major requirements.

187E. Heidegger and Poetry (2 credits). W

Focuses on reading and discussion of Martin Heidegger's major texts on poetry. *W. Godzich*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors, focus is on topics of interest in modern literary studies. All students are required to complete an essay of significant length as part of the seminar coursework. Prerequisite: Literature 101. May be repeated for credit.

190N. Topics in Modern Literary Studies. F,W,S

Selected authors or issues in modern literary and cultural studies. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern Literature concentration; also satisfies the Senior Seminar distribution requirement. Enrollment restricted to senior literature majors. May be repeated for credit. (F) *M. Baumgarten*, (F) *A. Bivens*, (W) *L. Nygaard*, (S) *J. Jordan*, (S) *D. Bell*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) *The Staff*

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Pre- and Early Modern Literature

Upper-Division Courses

102. Ancient Literature in Cross-Cultural Perspective. W

Comparative approaches to the study of ancient literature and cultures. Topic changes; see the *Schedule of Classes* for current topic. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirement. May be repeated for credit. (General Education Code(s): CC.) *G. Hamel*

107A. Reading Egyptian Hieroglyphs, Part 1. W

Introduction to Egyptian hieroglyphs as a graphic, conceptual, and communicative system. Covers the basic elements of classical Egyptian grammar, drawing primarily on inscriptions from extant Egyptian monuments. Students read one prose and one poetical text from the Middle Kingdom. Satisfies the Pre- and Early Modern Studies and World Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. Strongly recommended: two years previous study of a foreign language at the college level or the equivalent. (General Education Code(s): CC.) *D. Selden*

107B. Reading Egyptian Hieroglyphs, Part 2. S

Advanced Middle Egyptian grammar (2 weeks). Close reading of the Tale of Sinuhe in Egyptian, selected hymns and love poetry from the New Kingdom. Satisfies the Pre- and Early Modern Studies and World Literature concentrations; also satisfies the Global, Pre- and Early Modern, and Poetry distribution requirements. Together, Egyptian Hieroglyphs 1 and 2 fulfill the language requirements for the intensive major. Prerequisite(s): course 107A or permission of instructor. (General Education Code(s): CC.) *D. Selden*

111. Monsters, Barbarians, and Women: Topics in Ancient Ethnography. *

Focus is on the construction of race and gender in ancient Greek culture. Literary, historical, philosophical, dramatic, and medical texts (Homer, Hesiod, Herodotus, Euripides, Hippocrates, Plato, Aristotle) as well as visual media (vase painting, sculpture) are studied. *J. Lynn*

113. Power, Pleasure, and Danger in Ancient Athens. *

Works by Aeschylus, Sophocles, Euripides, Thucydides, and Plato will be read as products of their own time and culture, as sources of Western artistic, intellectual, and moral traditions, and as works still meaningful today. Topics include heroism, relationships between thought and action, conflicts between the individual and society, the nature of divinity and its relationship to human beings. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Pre- and Early Modern Studies distribution requirement. *J. Lynn*

137. Modern Ancient Drama. S

The study of 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, Graham, Pasolini, Breuer, and von Trier, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Satisfies the Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. (General Education Code(s): IM.) *M. Gamel*

144. Pre- and Early Modern Jewish Cultures.

144B. Hebrew Bible. *

Introduction to textual, source, redaction, historical, and literary criticism of individual books of the Hebrew Bible and to exegesis as science and ideology. Covers texts and iconography of neighboring mythological traditions (Mesopotamian, Ugaritic, Egyptian, Greek) when appropriate. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. May be repeated for credit. *N. Deutsch*

148. The Beloved in Medieval Poetry. *

The figure of the Beloved is a medieval invention. Course traces its development from the Mozarabic Jarchas to Petrarch, and includes Provençal Troubadours, German Minnesaenger, French Trouveres, the Spanish "Libro de Buen Amor," and "The Romance of the Rose." Satisfies the Pre- and Early Modern Literature concentrations; also satisfies the Poetry and Pre- and Early Modern distribution requirements. *W. Godzich*

151. Aesthetics of Astonishment. *

Traces an aesthetics of astonishment that runs from antiquity to the early modern period, with special attention to the pre-Enlightenment discourse of the sublime. Readings in Plato, Aristotle, Longinus, Sidney, Erasmus, Spenser, Shakespeare, and Milton. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Pre- and Early Modern Studies distribution requirement. *The Staff*

152. Continental Renaissance. *

Introductory survey of great prose writings of the continental Renaissance in their cultural and historical contexts. Authors include: Machiavelli, Castiglione, Erasmus, Rabelais, Montaigne, and Cervantes. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Pre- and Early Modern Studies distribution requirement. *The Staff*

167. Spanish Literature in Translation.

An introduction to great works of Spanish literature from various genres that provide a profound and enduring experience of Hispanic life transfigured by the literary artist into what may be interpreted as formal and exemplary perfection. *The Staff*

167B. Spanish Golden Age Theater. *

Analyzes theater during the Golden Age (16th and 17th centuries) of Spanish literature, when the theater was a "democratic" meeting point and a social barometer. The popularity of playwrights such as Lope de Vega and Calderón de la Barca is comparable to the stars of Hollywood of today. Satisfies the Pre- and Early Modern Studies concentration; also satisfies the Pre- and Early Modern distribution requirement. *J. Aladro Font*

167C. Don Quixote de la Mancha. F

A close study of Books I and II of the Cervantes novel together with an examination of some of the criticism on this work written in English throughout the centuries. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. (General Education Code(s): CC.) *J. Aladro Font*

177. Discourses in Early Modern Cultures.

177A. "Race" in Early Modern Cultures. *

Examines the literary, linguistic, visual, scientific, and theological histories of the modern notion of race. Course topic changes; see the *Schedule of Classes* for

current topic. Satisfies the Pre- and Early Modern Studies Literature concentration; also satisfies the Pre- and Early Modern distribution requirement. *The Staff*

183. Dante's *Divine Comedy*. W

Reading of the Inferno, the Purgatorio, and selected canti of the Paradiso, along with selections from Dante's lyrics and from medieval Italian and French poetry. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Poetry and Pre- and Early Modern distribution requirements. (General Education Code(s): TA.) *M. Brose*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors, focus is on topics of interest in pre- and early modern studies. All students are required to complete an essay of significant length as part of the seminar coursework. Prerequisite: Literature 101. May be repeated for credit.

190P. Topics in Pre- and Early Modern Studies. W

Examination of individual authors or critical problems in ancient, medieval, or early modern/Renaissance literature. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Pre- and Early Modern Literature concentration; also satisfies the Pre- and Early Modern and Senior Seminar distribution requirements. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. *M. Frangos*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) *The Staff*

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Russian Literature

Upper-Division Courses

199. Tutorial. F,W,S

Speaking, reading, and writing proficiency in Russian required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Speaking, reading, and writing proficiency in Russian required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Spanish/Latin American/Latino Literature

Lower-Division Courses

60. Introduction to Literary Genres. W

Speaking, reading, and writing proficiency in Spanish required. The study of poetry, drama, and prose in Spain and Latin America. (General Education Code(s): TA, IH, E.) *J. Aladro Font*

Upper-Division Courses

102. Introduction to Hispanic American Literature.

102A. From the Conquest to Sor Juana. *

Speaking, reading, and writing proficiency in Spanish required. A study of Hispanic American literature from the chronicles of the conquest through the 17th century. Readings deal with transformations in both the idea of empire and the rights of the conquered. Includes the works of Colón, Cortés, El Inca Garcilaso de la Vega, Sor Juana Inés de la Cruz, and others. Satisfies the Global, Pre- and Early Modern Studies and Spanish Literature concentrations; also satisfies the Global and Pre- and Early Modern distribution requirements. *N. Klahn*

102B. Romanticism to Modernism. *

Speaking, reading, and writing proficiency in Spanish required. Follows the literary manifestations of the growing consciousness of the Latin American writer: discovery of native themes, imitation of European models, search for a "new language" literally and figuratively. Relates historical events with literary movements. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *J. Poblete*

130. Studies in Latin American Literary Genres.

130A. Contemporary Spanish American Prose. *

Speaking, reading, and writing proficiency in Spanish required. Examines contemporary Spanish American prose. Course topic changes; please see the *Schedule of Classes* for the current topic. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): CC, E.) *N. Klahn*

130E. Latin American Poetry. S

Speaking, reading, and writing proficiency in Spanish required. Poets from "modernismo" to the present in Spanish America. Studies how this poetry attempts to define Latin America, its past, its present history, and its vision for the future. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global and Poetry distribution requirements. (General Education Code(s): CC, E.) *N. Klahn*

131. National Literatures of Latin America.

Speaking, reading, and writing proficiency in Spanish required. A study of the literary expression of a particular Latin American country or region, with texts representing a variety of authors, periods, and genres. *The Staff*

131B. The Novel of the Mexican Revolution. F

Speaking, reading, and writing proficiency in Spanish required. A study of the literary depiction of the Mexican Revolution as seen in six novels that span the 20th century. (General Education Code(s): CC, E.) *N. Klahn*

131D. Chile. *

Speaking, reading, and writing proficiency in Spanish required. Examines narrative and poetry in Chile within the general context of the relationships between literature, nation, and representation. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global Distribution requirement. (General Education Code(s): E.) *J. Poblete*

131H. Cuba. S

Speaking, reading, and writing proficiency in Spanish required. Satisfies the Modern, Spanish, and World Lit-

erature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): CC, E.) *L. Martínez-Echazábal*

134. Special Topics in Latin American Literature.

134G. Popular Culture in Latin American Narrative. F

Speaking, reading, and writing proficiency in Spanish required. Explores short stories and novels that have been greatly influenced by popular culture, not only in theme, but also by appropriation of popular forms of language and modes of representation. Includes works by authors from Mexico, Argentina, Cuba, and Colombia. Satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): CC, E.) *J. Poblete*

134M. Modernidad y literatura: El Boom de la novela latinoamericana. *

Speaking, reading, and writing proficiency in Spanish required. Explores the relationships between literature and mass culture, modernization, and globalization through the study of the so-called Boom of Latin American narrative. Course satisfies the Modern, Spanish, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *N. Klahn*

151. Literature and Life in "Don Quijote" and Other Cervantes Texts. *

Speaking, reading, and writing proficiency in Spanish required. A close reading of the works of Cervantes, with particular attention to "Don Quijote," in an attempt to discover how these works reflect the conflictive period in which the author lived. Also looks closely at the Cervantine view of the relationship of literature to life, as manifested in the works under study. Satisfies the Pre- and Early Modern Studies and Spanish Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. *J. Aladro Font*

153. The Picaresque Novel. W

Speaking, reading, and writing proficiency in Spanish required. The picaresque novel of 16th-century Spain considers the fictive environment as reality in order to introduce its protagonist as a rebel against social dominion. The picaresque novel is the only literary genre comparable to what is now called "literature of social protest." Satisfies the Pre- and Early Modern and Spanish Literature concentrations; also satisfies the Pre- and Early Modern distribution requirement. (General Education Code(s): CC.) *J. Aladro Font*

195. Senior Essay. F,W,S

Speaking, reading, and writing proficiency in Spanish required. Prerequisite(s): Literature 101. *The Staff*

198. Group Tutorial. F,W,S

Speaking, reading, and writing proficiency in Spanish required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Speaking, reading, and writing proficiency in Spanish required. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Speaking, reading, and writing proficiency in Spanish required. Students submit petition to sponsoring agency. *The Staff*

World Literature and Cultural Studies

Upper-Division Courses

109. Topics in Cultural Studies. F,S

Studies in the theory of cultural studies. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. May be repeated for credit. (General Education Code(s): E.) *A. Khan*

115. Modern Literature in a Global Context.

115A. Fiction in a Global Context. W

Comparative examination of fiction in the modern world and of fictional responses to social change and crisis. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. May be repeated for credit. (General Education Code(s): TA.) *C. Hong, V. Cooppan*

118. Literature of the Asian Diaspora. F

Study of literature of the Asian diaspora, attempting to discover and define a growing body of contemporary writing under this rubric, including immigrant/migrant histories, memories of exile and refuge, as well as the fiction of imagined homelands. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): E.) *K. Yamashita*

126. Metamorphoses: Pre/Post Modern Transformations. *

Examines transformations between god, human, and animal from ancient literature to medieval, renaissance, modern, and postmodern (especially science) fiction and poetry. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Poetry, Pre- and Early Modern, and Global distribution requirements. *C. Freccero*

127. Chicano/Mexicano Geographies. W

Considers the historical, current, and future directions of Chicano/a literary culture within the context of the long-standing exchanges of culture and politics across the U.S.-Mexican border and the challenges of globalization. Includes novels, essays, and films. Satisfies the English, Modern, and World Literature concentrations; also satisfies the Global distribution requirement. (General Education Code(s): ER, E.) *K. Gruesz*

128. Afro-Asian Cultural Production. *

Charts, through examination of literature, film, and historical documents, the legacy of Afro-Asian encounters within the Americas and on the global stage with a focus on comparative racialization, slavery, and colonialism, Third World liberation, and inter-ethnic tensions. Satisfies the English, Modern and World Literature concentrations; also satisfies the Global Distribution requirement. (General Education Code(s): ER.) *C. Hong*

136. Classical Chinese Culture and Literature, Sixth Century through 16th Century. S

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Satisfies the Pre- and Early Modern and World Literature concentrations; also satisfies the Global, Poetry, and Pre- and Early Modern distribution requirements.

(Also offered as History 141B. Students cannot receive credit for both courses.) (General Education Code(s): E.) *D. Keenan*

150. World Literature and Cultural Studies Core Sequence.

150A. Worldings. *

How to think about the world as a whole: representations, networks, systems, taxonomies, versions of globalization. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern and World Literature concentrations; also satisfies the Global requirement. May be repeated for credit. *The Staff*

150B. Space/Time. *

The world as understood through spatial and temporal divisions: regions, nations, empires, periods in a worlded perspective. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern and World Literature concentrations; also satisfies the Global distribution requirement. May be repeated for credit. *The Staff*

150C. Problems. *

Considers a range of phenomena from a critical world perspective: subject formation; human activity on a global scale; questions that demand a worlded answer. Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the Modern and World literature concentrations; also satisfies the Global requirement. May be repeated for credit. *The Staff*

188. World Literature and Cultural Studies. W

Students may count any combination of 2-credit or 3-credit literature courses, together totaling at least 5 credits, toward satisfaction of the literature major requirements.

188A. Twenty-First Century Novels (3 credits). W

Examines novels from around the world published since 2000. Class discussion focuses on the novel form and its condition at the beginning of the new millennium. *W. Godzich*

190. Senior Seminar.

Seminar offered to literature majors as a way to satisfy the senior exit requirement. Offered at different times by different instructors; focus is on topics of interest in world literature and cultural studies. All students are required to complete an essay of significant length as part of the seminar coursework. Prerequisite(s): Literature 101.

190A. Topics in World Literature and Cultural Studies. F,W,S

Course topic changes; see the *Schedule of Classes* for current topic. Satisfies the World Literature concentration; also satisfies the Global and Senior Seminar distribution requirements. "Medieval Mediterranean" additionally satisfies the Pre- and Early Modern Studies concentration and distribution requirements; "Black Britain" additionally satisfies the English and Modern Literary Studies concentrations. Prerequisite(s): Literature 101. Enrollment restricted to senior literature majors. May be repeated for credit. (General Education Code(s): E.) (F) *C. Hong*, (W) *S. Gillman*, (S) *V. Cooppan*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. *The Staff*

195. Senior Essay. F,W,S

Prerequisite(s): Literature 101. May be repeated for credit. *The Staff*

198. Group Tutorial. F,W,S

The Staff

199. Tutorial. F,W,S

May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Literature: Graduate Courses

200. Proseminar. F

The proseminar provides a common experience for entering students, facilitates exchange of ideas and approaches to literary and extra-literary texts, critical issues, and theoretical problems. It focuses on broad aspects of the history of theory and criticism, on the students' critical writing, and on aspects of professional development. Enrollment restricted to graduate students. *D. Selden*

201. The Pedagogy of Literature (1 credit). F

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of literature specifically. Coordinated by a graduate student who has had substantial experience as a teaching assistant, under the supervision of a faculty member. Enrollment restricted to graduate students. May be repeated for credit. *N. Klahn*

202. Colloquium (2 credits). F,W,S

Student receives credit for attending a designated number of freestanding lectures, colloquia, symposia, or conferences during the term and reports orally, or in writing, to instructor. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

204. Readings in Literature (2 credits). *

Focuses on selected texts or authors in literature and/or theory. Students meet with instructor to discuss readings and deepen their knowledge on a particular author, critic, theorist, or text. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

205. Dissertation Writing Practicum (2 credits). *

Introduces the methods and practice of dissertation writing in literature. Workshop format. Meets one hour per week. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

291F. Advising (2 credits). F,W,S

Independent study formalizing the advisee-advisor relationship. Regular meetings to plan, assess, and monitor academic progress and to evaluate coursework as necessary. May be used to develop general bibliography of background reading and trajectory of study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

English-Language Literatures: Graduate Courses

203. Periods and Movements. W

Examines a particular historical period or literary movement. Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. May be repeated for credit. *K. Gruesz*

260. Transnational Literatures. *

Investigation of English language literature which transcends national boundaries. Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

280. Topics in English Language Literature. S

Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. May be repeated for credit. *J. Greene*

294. Teaching-Related Independent Study. F,W,S
Directed graduate research and writing coordinated with teaching of undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S
Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

French Literature: Graduate Courses

230. Studies in Literary and Cultural History. F,W,S

In-depth examination of one period of French literature. Course topic changes; see the *Schedule of Classes* for current topic. Fall course taught in conjunction with course 131; spring course taught in conjunction with course 152; winter course taught in conjunction with LTMO 231. Enrollment restricted to graduate students. May be repeated for credit. (F) *S. Kinoshita*, (W) *R. Terdiman*, (S) *C. Freccero*

294. Teaching-Related Independent Study. F,W,S
Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S
Directed reading which does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

German Literature: Graduate Courses

275. Special Topics in German Literature. W
Examination of topics within German literature. Course topic changes; see the *Schedule of Classes* for current topic. May be repeated for credit; actual content will vary from year to year. *A. Bivens*

294. Teaching-Related Independent Study. F,W,S
Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S
Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Greek Literature: Graduate Courses

294. Teaching-Related Independent Study. F,W,S
Directed graduate research and writing coordinated with the teaching of undergraduates. *The Staff*

295. Directed Reading. F,W,S
Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Modern Literary Studies: Graduate Courses

230. Texts and Bodies: Representations of Desire in Four Texts, Three Media. S

1. *Psychoanalysis*: Barthes and Lacan; 2. Chaucer and fabliau: *The Miller's Tale*; 3. Verdian opera; 4. films of John Carpenter. Enrollment restricted to graduate students. Enrollment limited to 20. *H. Leicester*

231. Studies in Literary and Cultural History. F,W,S

Course topic changes; see the *Schedule of Classes* for current topic. Winter section taught in conjunction with LTR 230, section 02. Enrollment restricted to graduate students. May be repeated for credit. *T. Miller, N. Deutsch, R. Terdiman*

280. Topics in Theory. *
Explores issues arising in both the modern practice of criticism and in writings on the theory of criticism. Course topic changes; see the *Schedule of Classes* for current topic. Taught in conjunction with Spanish, Latin American and Latino Literatures 226. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

294. Teaching-Related Independent Study. F,W,S
Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S
Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S
Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Pre- and Early Modern Literature: Graduate Courses

204. Studies in Early Modernity. *

In-depth examination of a topic in Early Modern Studies. Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency. *The Staff*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Spanish/Latin American/Latino Literature: Graduate Courses

206. Topics in Spanish Golden Age Literature. *

Focuses on different genres of the Renaissance period that flourished before the creation of Cervantes' *Don Quixote*. Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. *J. Aladro Font*

213. Latin American Film and Cultural Theory. S

An examination of Latin American and Latino films in connection with relevant social and cultural issues and theories. Reading knowledge of Spanish is required. (Formerly *Latin American Film: Gender, Genre, Race, and Nation*.) Enrollment restricted to graduate students. *J. Poblete*

226. Teoria Critica en America Latina. W

Overview of contemporary theoretical issues in Latin American cultural critique. Course topic changes; please see the *Schedule of Classes* for the current topic. Taught in conjunction with World Literature and Cultural Studies 209, section 02. Enrollment restricted to graduate students. May be repeated for credit. *N. Klahn*

230. Citiscapes. *

Theories of space/place poetics and politics, and the literary and visual re-presentations of urban spaces in Latin/o America. Questions of identity and location in modern-

ist poetics, and the ways difference (gender, ethnicity, and sexuality) inhabit and imagine the post-modern lettered city. Enrollment restricted to graduate students. *N. Klahn*

231. National Literatures of Latin America.**231A. Cuba. F**

Course topic changes; please see the *Schedule of Classes* for the current topic. Enrollment restricted to graduate students. May be repeated for credit. *L. Martinez-Echazabal*

295. Directed Reading. F,W,S

Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

World Literature and Cultural Studies: Graduate Courses

201. Theory and Methods. S

Global theories of history and cultural production. Course topic changes; see the *Schedule of Classes* for current topic. Enrollment restricted to graduate students. May be repeated for credit. *S. Gillman*

209. Topics in Cultural Studies. F,W,S

Course topic changes; see the *Schedule of Classes* for current topic. Winter section 02 taught in conjunction with Spanish/Latin American/Latino Literatures 226; spring section 01 taught in conjunction with German Literature 275. Enrollment restricted to graduate students. May be repeated for credit. (F) *C. Hong*, (W) *N. Klahn*, (W) *C. Freccero*, (W) *A. Bivens*, (S) *V. Cooppan*

287. World Literature and Cultural Studies. W**287A. Analytics of Power After Foucault (2 credits). F**

Examines the nexus formed by theories of action and narrative and theories of power. Describes the situation prior to Michel Foucault's discussion of power and examines the incidence of his intervention in the field. Enrollment restricted to graduate students. *W. Godzich*

288. World Literature and Cultural Studies. W**288A. Analytics of Power After Foucault (3 credits). F**

Three-credit seminar which is companion to the two-credit course 287A, Analytics of Power After Foucault. Concurrent enrollment in course 287A required. Enrollment restricted to graduate students. Enrollment limited to 12. *W. Godzich*

295. Directed Reading. F,W,S

Directed reading which does not require a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for

credit. *The Staff*

296. Special Student Seminar. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

Program Description

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, and psychology. Researchers in all these areas are constantly developing new and cutting-edge ways of applying mathematics to their fields. A strong mathematics background is vital to the advanced study of the physical and biological sciences and plays an integral role in studying the social sciences.

The UCSC mathematics program offers a wide variety of undergraduate mathematics courses:

- Courses 2 and 3 do not require thorough preparation in mathematics at the high school level. However, students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Students requiring mathematics courses are encouraged to take the mathematics placement examination (MPE) as early as possible. Students concerned about their ability to place into courses above Mathematics 2 or Mathematics 3 should consider taking these

courses before they enter UCSC. Failure to begin the calculus series in the fall could delay progress in some majors.

- Lower-division courses with numbers in the range 11A-B through 30 (calculus, linear algebra, multivariable calculus, differential equations, and problem solving) prepare students for further study in mathematics, the physical and biological sciences, or quantitative areas of the social sciences. Science majors take a combination of these courses as part of their undergraduate studies.
- Upper-division courses, with numbers in the range 100-199, are intended for majors in mathematics and closely related disciplines. Some of these courses provide students with a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and number theory, whereas others introduce students to more specialized areas of mathematics. Calculus, linear algebra, multivariable calculus, and proof and problem solving are prerequisite to most of these advanced courses.

Within the major, there are three concentrations leading to the bachelor of arts (B.A.) degree: pure mathematics, computational mathematics, and mathematics education. These programs are designed to give students a strong background for graduate study, for work in industry or government, or for teaching. Each concentration requires nine courses, one of which must be a senior thesis or senior seminar. Please read the pure mathematics, computational mathematics, and mathematics education program descriptions below for specific information about course requirements. A minor in mathematics is also offered.

The mathematics program also provides an excellent liberal arts background from which to pursue a variety of career opportunities. UCSC graduates with degrees in mathematics hold teaching posts at all levels, as well as positions in law, government, civil service, insurance, software development, business, banking, actuarial science, forensics, and other professions where skills in logic, numerical analysis, and computing are required. In particular, students of mathematics are trained in the art of problem-solving, a skill absolutely essential to all professions.

Academic Advising

Academic advising is available at the Undergraduate Affairs office. The undergraduate adviser provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the adviser assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Undergraduate Affairs web site (<http://undergrad.pbsci.ucsc.edu>) is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current about requirements, course curriculum, and departmental policy.

Requirements

Students who plan to take a mathematics course at UCSC must demonstrate sufficient preparation by their

score on either the mathematics placement examination (MPE), the College Entrance Examination Board Advanced Placement (AP) calculus examination, the International Baccalaureate Higher Level Mathematics Examination, or by passing the appropriate prerequisite course.

UCSC Mathematics Placement Examination

Mathematics placement examination scores are valid for one year. Students may take the examination a maximum of two times during the course of their academic career. Additionally, if a student receives a D, F, or NP in a course, the placement examination may not be used to place them out of that course. Students whose areas of study require precalculus or calculus courses are strongly advised to take the placement examination and the required courses early in their academic careers. The placement examination is given at the beginning of each quarter and in the sixth or seventh week of each quarter and at prospective-student orientations. Bring photo identification for entry into the placement examination. Calculators are not permitted.

| If your MPE score is | May enroll in this course |
|----------------------|---------------------------|
| 12-19 | 2 |
| 20-30 | 3 |
| 31-39 | 11A* |
| 40-45 | 19A |
| 46 or higher | 19A or 20A |

* Students who plan to major in computer engineering, computer science, electrical engineering, information systems management, mathematics, or physics and who receive a score in the range 31-39 on the MPE should take courses 3 and 19A-B rather than courses 11A-B.

College Board Advanced Placement Calculus Examinations

Students who have received 4 credits for the College Entrance Examination Board Advanced Placement (AP) calculus examination should normally enroll in course 19B, and those with 8 credits should normally enroll in course 23A. However, students who received a score of 3 on the calculus AB or BC AP examination, should enroll in course 19A or 19B, respectively, to improve their knowledge of calculus before continuing their studies. Students who wish to challenge themselves, and who received a score of 4 or 5 on the AB or a score of 3, 4, or 5 on the BC examination may choose course 20A, *Honors Calculus*. Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

| If your AP AB score is | May enroll in this course |
|------------------------|-------------------------------|
| 3 | Mathematics 11A or 19A |
| 4 or 5 | Mathematics 20A or 11B or 19B |

| If your AP BC score is | May enroll in this course |
|------------------------|-------------------------------|
| 3 | Mathematics 11B or 19B or 20A |
| 4 or 5 | Mathematics 20A or 22 or 23A |

International Baccalaureate Higher Level Examination in Mathematics

Students who have received a score of 5, 6, or 7 on the International Baccalaureate (IB) Higher Level Examination in Mathematics may enroll in course 20A, *Honors Calculus*; 22, *Calculus of Several Variables*; or 23A, *Multivariable Calculus*. Non-mathematics majors should consult their major departments before enrolling in a mathematics course.

Prerequisite Courses

Students who have passed course 2 may enroll in course 3. Students who have passed course 3 may enroll in

course 11A or 19A. Students who have passed an articulated precalculus course at a college or university may enroll in course 11A or 19A, but they must verify eligibility of the course and course completion with the Mathematics Department staff.

Introductory Requirements

Introductory requirements for all concentrations in the major are courses 20A-B, *Honors Calculus*; or 19A-B, *Calculus for Science, Engineering, and Mathematics*; 21, *Linear Algebra*; and 23A-B, *Multivariable Calculus*. The mathematics education concentration has one additional introductory requirement, Applied Mathematics and Statistics (AMS) 5, *Statistics*. For some non-mathematics majors, courses 11A-B can be substituted for 19A-B, but they are not recommended for students planning to major in computer engineering, computer science, electrical engineering, information systems management, or physics. Although not considered an introductory requirement, course 100 is a prerequisite for most upper-division mathematics courses.

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. Therefore, it is strongly recommended that only students who earn grades of B- or better in Mathematics 100 consider applying to the major in mathematics.

Major Requirements

Pure Mathematics

This concentration is intended for students who desire a comprehensive understanding of mathematics, including those considering graduate studies in the natural sciences. Students are required to complete at least nine courses (with laboratories, if appropriate) from among those numbered 100 or higher.

Seven of these courses must be:

- Mathematics 100, *Introduction to Proof and Problem Solving*;
- Mathematics 103, *Complex Analysis*;
- Mathematics 105A, *Real Analysis*;
- Mathematics 111A, *Algebra*;
- Mathematics 117, *Advanced Linear Algebra*;
- one of Mathematics 121A, *Differential Geometry*, Mathematics 124, *Introduction to Topology*, or Mathematics 128A, *Classical Geometry: Euclidean and Non-Euclidean*;
- and either Mathematics 194, *Senior Seminar*, or Mathematics 195, *Senior Thesis*.

The remaining two courses are selected by the student from among Mathematics 24 and any mathematics course numbered above 100 (excluding Mathematics 188).

A typical program for a pure mathematics major might include the following:

| | |
|----------|--|
| 1st year | Mathematics 20A-B or 19A-B, 21, 23A |
| 2nd year | Mathematics 23B, 24, 100, 103, 110 or 128A |
| 3rd year | Mathematics 105A-B, 111A-B, 106 |
| 4th year | Mathematics 107, 117, 121A, 194 |

The first two years of a typical program for a pure mathematics major who begins mathematics studies

with precalculus might include the following:

| | |
|----------|--------------------------------|
| 1st year | Mathematics 3, 19A-B |
| 2nd year | Mathematics 21, 23A-B, 24, 100 |

Computational Mathematics

This concentration is intended to prepare students for technical careers in industry or government while providing a solid mathematical background. Students are required to complete a minimum of seven mathematics courses (with laboratories, if appropriate) as follows:

- Mathematics 24, *Ordinary Differential Equations*;
- Mathematics 100, *Introduction to Proof and Problem Solving*;
- Mathematics 103, *Complex Analysis*, or Mathematics 105A, *Real Analysis*;
- Mathematics 110, *Introduction to Number Theory*;
- Mathematics 111A, *Algebra*;
- Mathematics 145, *Introductory Chaos Theory*, or Applied Mathematics and Statistics 114, *Introduction to Dynamical Systems*, or Applied Mathematics and Statistics 147, *Computational Methods and Applications*;
- and either Mathematics 194, *Senior Seminar*, or Mathematics 195, *Senior Thesis*.

In addition, students must complete two courses selected from the following:

- Applied Mathematics and Statistics 113, 131, 147, 162
- Biomolecular Engineering 110
- Computer Engineering 107, 108, 117, 153, 177
- Computer Science 101, 102, 104A, 109, 112, 122, 130, 132, 142
- Economics 113
- Electrical Engineering 103, 130, 135, 151, 154

Mathematics majors who wish to enroll in Computer Science 101 or Computer Science 122 should contact the instructor to request a permission code.

A typical program for a computational mathematics major might include the following:

| | |
|----------|-------------------------------------|
| 1st year | 19A-B, 23A, CMPS 12A/L and 12B/M |
| 2nd year | 21, 23B, 24, 100, 110, CMPE 16 |
| 3rd year | 103; 105A; 145 or AMS 147; CMPS 101 |
| 4th year | 106, 111A, CMPS 109, 194 |

Mathematics Education

This concentration is intended to prepare students for teaching kindergarten through high school (K-12) mathematics. In addition to the pre-major requirements (which for this track include Applied Mathematics and Statistics 5, *Statistics*), students are required to complete the following nine courses:

- Mathematics 100, *Introduction to Proof and Problem Solving*;
- either Mathematics 103, *Complex Analysis*, or 105A, *Real Analysis*;
- Mathematics 110, *Introduction to Number Theory*;
- Mathematics 111A, *Algebra*;
- Mathematics 128A, *Classical Geometry: Euclidean and Non-Euclidean*;

- Applied Mathematics and Statistics 131, *Introduction to Probability Theory*;
- Mathematics 181, *History of Math*;
- Mathematics 188, *Supervised Teaching Experience*;
- and either Mathematics 194, *Senior Seminar*, or Mathematics 195, *Senior Thesis*.

UCSC students can pursue a degree in mathematics while preparing to teach at the secondary level. In California, students seeking a single-subject credential (for secondary teaching) in mathematics are required to take the CSET, a series of examinations that must be passed in order to enter a teaching-credential program (formerly The National Teachers Examination). Students who complete the mathematics education track, plus three additional specified courses, qualify for the California Single Subject Program, exempting themselves from the CSET. Both the Mathematics Department undergraduate adviser and the Education Department advising office have more information about the additional required courses.

A typical program for a mathematics education major might include the following:

| | |
|----------|---|
| 1st year | Mathematics 19A-B, 23A |
| 2nd year | Mathematics 21, 23B, 100; Applied Mathematics and Statistics 5 |
| 3rd year | Mathematics 30, 103, 110, 181; Applied Mathematics and Statistics 131 |
| 4th year | Mathematics 111A, 128A, 188, 194 |

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by Mathematics 100, *Introduction to Proof and Problem Solving*, and either Mathematics 194, *Senior Seminar*, or Mathematics 195, *Senior Thesis*.

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest Honors are determined by review of departmental narrative evaluations for all students considered for honors. Highest Honors will be awarded to those students whose performance demonstrates the highest level of excellence in the major as reflected in their narrative evaluations.

Minor Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least eight courses as follows:

- Mathematics 21, *Linear Algebra*;
- Mathematics 23A and 23 B, *Multivariable Calculus*;
- and any five courses numbered 100 and above.

No senior seminar or thesis is required.

A typical mathematics minor program for a physics major might be:

| | |
|----------|--|
| 1st year | Mathematics 19A-B, 23A |
| 2nd year | Mathematics 21, 23B, 24, 100 |
| 3rd year | Mathematics 103, 105A, 106A, 121A or 124 |

4th year Mathematics 107, 145 or Applied Mathematics and Statistics 114

Disqualification from the Major or Minor

The Mathematics Department has adopted a major disqualification policy that is intended to encourage students to take their performance in the introductory requirements seriously and to make a strong effort to pass these courses.

Students who receive more than one No Pass, D, and/or F in the following introductory requirements will not be permitted to major in any concentration of the mathematics major.

Introductory Requirements

- Mathematics 19A, *Calculus for Science, Engineering, and Mathematics*
- Mathematics 19B, *Calculus for Science, Engineering, and Mathematics*
- Mathematics 21, *Linear Algebra*
- Mathematics 23A, *Multivariable Calculus*
- Mathematics 23B, *Multivariable Calculus*
- Mathematics 100, *Introduction to Proof and Problem Solving*

Students will be assessed for disqualification after grades are submitted each quarter and at the end of each summer session.

Students may appeal their disqualification within the appeal period by writing a letter to the department chair. This appeal must be submitted to the advising office no later than 15 days from the date the disqualification notification was mailed, or the 10th day of classes in the quarter of their disqualification, whichever is later. The advising office will subsequently notify the student, the college, and the Office of the Registrar of the decision, no later than 15 days after the submission of the appeal.

A student who has been disqualified from the major may, no earlier than three months from the date of the disqualification, petition to be reinstated. This application will be considered only if there is substantial new evidence that the student is capable of making normal progress in the major.

Combined Majors

The combined major, requiring fewer courses than a double major, is administered through the Economics Department.

Economics and Mathematics

The major in economics and mathematics is designed to meet the needs of undergraduate students who plan to pursue doctoral study in economics or business, or who wish to pursue a career as an actuary or other professional requiring a sophisticated understanding of economics and mathematics. The major combines the main undergraduate content of both economics and mathematics within a programmatic structure that joins the two disciplines. It provides a coursework combination required to prepare for a modern economics Ph.D. program, or for technically demanding professional careers. A full description can be found in the economics section of this catalog.

Graduate Program

The Mathematics Department offers programs leading to the master of arts (M.A.) and doctor of philosophy

(Ph.D.) degrees. Contact the Division of Graduate Studies for further information on the M.A. and Ph.D. programs, as well as on university application procedures.

M.A. Degree Requirements

Students are required to complete two of Mathematics 200, 201, 202, 203; two of Mathematics 204, 205, 206; one of Mathematics 208, 209, 210; and complete five additional courses in mathematics or a related subject by approval. In addition, students must do one of the following:

- pass an M.A.-level preliminary examination;
- write a master's thesis.

Ph.D. Degree Requirements

All of the following are required:

- obtain a Ph.D.-level pass on two of the three written preliminary examinations, or a Ph.D.-level pass on one and a master's-level pass on the remaining two. Students who opt for the Ph.D.-level pass on two of the three preliminary examinations must complete the full sequence in the track associated with the preliminary examination they did not pass;
- satisfy the foreign-language requirement;
- pass the oral qualifying examination;
- complete three quarters as a teaching assistant;
- complete six graduate courses in mathematics other than Mathematics 200, 201, 202, 203, 204, 205, and 206. No more than three courses may be independent study or thesis research courses;
- write a Ph.D. thesis and present the thesis defense.

Students admitted to the Ph.D. program may receive an M.A. degree en route to the Ph.D.; students admitted to the M.A. program may transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

Course Information

Mathematics 2, *College Algebra for Calculus*, is designed for students who do not meet the requirements for admission to Mathematics 3, *Precalculus*, and who need comprehensive and careful preparation for calculus. Mathematics 2 emphasizes algebra, graphs, and functions. The prerequisite for course 2 is a minimum placement examination score of 12.

Mathematics 3, *Precalculus*, is recommended for students who need some preparation in algebra and trigonometry prior to taking calculus. This course covers functions and their inverse, exponentials, logarithms, and trigonometry.

Mathematics 11A and 11B, *Calculus with Applications*, are intended for biology and Earth sciences majors. However, students in these majors who score 40 or more points on the mathematics placement examination are strongly encouraged to take the 19A-B sequence, which is required for most upper-division mathematics courses. Laboratory sections are strongly advised.

Mathematics 19A and 19B, *Calculus for Science, Engineering, and Mathematics*, are intended for chemistry, computer engineering, computer science, electrical engineering, information systems management, mathematics, and physics majors. Laboratory sections are strongly advised.

Mathematics 20A and 20B, *Honors Calculus*, are intended for students who would enjoy delving particularly deeply into the foundational and theoretical issues of calculus. Laboratory sections are strongly advised.

Mathematics 21, *Linear Algebra*, covers vector spaces, matrices, determinants, systems of linear equations, and eigenvalues. It is intended for students in the physical and biological and social sciences and is prerequisite to Mathematics 111A.

Mathematics 22, *Introduction to Calculus of Several Variables*, is intended for science students whose schedules do not permit a full and comprehensive two quarters of multivariable calculus. Students who intend to pursue further studies in mathematics must take Mathematics 23A-B and not 22. Laboratory sections are strongly advised.

Mathematics 23A and 23B, *Multivariable Calculus*, are intended for mathematics majors and minors and students in computer engineering, computer science, electrical engineering, information systems management, and physics majors which require more rigorous mathematical training. Laboratory sections are strongly advised.

Mathematics 100, *Introduction to Proof and Problem Solving*, is an introduction to the methodology of advanced mathematics, emphasizing proof techniques. Basic areas such as set theory and logic are introduced, together with extensive applications within mathematics. This course serves as a prerequisite for nearly all upper-division courses.

Mathematics 200+, Graduate-level courses. All graduate courses are open to undergraduates who have taken the recommended prerequisites; students should consult with the course instructor. Advanced undergraduates are strongly advised to take or audit graduate courses that interest them.

Lower-Division Courses

2. College Algebra for Calculus. F,W

Operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series. Prerequisite(s): placement exam score of 12 or higher. *The Staff*

2S. College Algebra for Calculus (2 credits). F

This two-credit, stretch course offers students two quarters to master material covered in course 2: operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series. After successful completion of this course in the first quarter, students enroll in course 2 the following quarter to complete the sequence and earn an additional 5 credits. Prerequisite(s): placement exam score of 12 or higher. *N. Bhattacharya*

3. Precalculus. F,W,S

Inverse functions and graphs; exponential and logarithmic functions, their graphs, and use in mathematical models of the real world; rates of change; trigonometry, trigonometric functions, and their graphs; and geometric series. Students cannot receive credit for both course 3 and Applied Mathematics and Statistics 3. Applied Mathematics and Statistics 3 can substitute for course 3. Prerequisite(s): course 2 or placement exam score of 20 or higher. (General Education Code(s): ME, Q.) *The Staff*

4. Mathematics of Choice and Argument. *

Techniques of analyzing and creating quantitative arguments. Application of probability theory to questions in justice, medicine, and economics. Analysis and avoidance of statistical bias. Understanding the application and limitations of quantitative techniques. Prerequisite(s): course 2, or placement exam score of 12 or higher, or AP Calculus AB exam score of 3 or higher. Enrollment limited to 54. (General Education Code(s): SR, Q.) *The Staff*

11A. Calculus with Applications. F,W,S

A modern course stressing conceptual understanding, relevance, and problem solving. The derivative of polynomial, exponential, and trigonometric functions of a single variable is developed and applied to a wide range of problems involving graphing, approximation, and optimization. Students cannot receive credit for both this course and course 19A or Applied Mathematics and Statistics 11A and 15A, or Economics 11A. Prerequisite(s): course 3 or Applied Mathematics and Statistics 3; or placement exam score of 31 or higher; or AP Calculus AB exam score of 3 or higher. (General Education Code(s): ME, IN, Q.) *The Staff*

11B. Calculus with Applications. F,W,S

Starting with the fundamental theorem of calculus and related techniques, the integral of functions of a single variable is developed and applied to problems in geometry, probability, physics, and differential equations. Polynomial approximations, Taylor series, and their applications conclude the course. Students cannot receive credit for this course and course 19B, or Applied Mathematics and Statistics 11B and 15B, or Economics 11B. Prerequisite(s): course 11A or Applied Mathematics and Statistics 15A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher. (General Education Code(s): ME, IN, Q.) *The Staff*

19A. Calculus for Science, Engineering, and Mathematics. F,W,S

The limit of a function, calculating limits, continuity, tangents, velocities, and other instantaneous rates of change. Derivatives, the chain rule, implicit differentiation, higher derivatives. Exponential functions, inverse functions, and their derivatives. The mean value theorem, monotonic functions, concavity, and points of inflection. Applied maximum and minimum problems. Students cannot receive credit for both this course and course 11A or Applied Mathematics and Statistics 11A and 15A, or Economics 11A. Prerequisite(s): course 3 or Applied Mathematics and Statistics 3 or placement exam score of 40 or higher or AP Calculus AB exam score of 3 or higher. (General Education Code(s): ME, IN, Q.) *The Staff*

19B. Calculus for Science, Engineering, and Mathematics. F,W,S

The definite integral and the fundamental theorem of calculus. Areas, volumes. Integration by parts, trigonometric substitution, and partial fractions methods. Improper integrals. Sequences, series, absolute convergence and convergence tests. Power series, Taylor and Maclaurin series. Students cannot receive credit for both this course and course 11B, Applied Math and Statistics 11B and 15B, or Economics 11B. Prerequisite(s): course 19A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher. (General Education Code(s): ME, IN, Q.) *The Staff*

20A. Honors Calculus. F

Challenging course designed to approach single-variable calculus from the perspective of modern mathematics. Emphasis is on the evolution and historical develop-

ment of core concepts underlying calculus and analysis. Prerequisite(s): placement exam score of 46 or higher; or AP Calculus AB exam score of 4 or 5; or BC exam of 3 or higher; or IB Mathematics Higher Level exam score of 5 or higher. Enrollment limited to 60. (General Education Code(s): ME, IN, Q.) *The Staff*

20B. Honors Calculus. W

Challenging course designed to approach single-variable calculus from the perspective of modern mathematics. Emphasis is on the evolution and historical development of core concepts underlying calculus and analysis. Prerequisite(s): course 20A. Enrollment limited to 60. (General Education Code(s): ME, IN, Q.) *The Staff*

21. Linear Algebra. F,W,S

Systems of linear equations, matrices, determinants. Introduction to abstract vector spaces, linear transformation, inner products, geometry of Euclidean space, and eigenvalues. One quarter of college mathematics is recommended as preparation. Prerequisite(s): course 2 or above, or placement exam score of 20 or higher. (General Education Code(s): ME, Q.) *The Staff*

22. Introduction to Calculus of Several Variables. F,W,S

Functions of several variables. Continuity and partial derivatives. The chain rule, gradient and directional derivative. Maxima and minima, including Lagrange multipliers. The double and triple integral and change of variables. Surface area and volumes. Applications from biology, chemistry, earth sciences, engineering, and physics. Students cannot receive credit for this course and course 23A. Prerequisite(s): course 11B or 19B or 20B or Applied Mathematics and Statistics 15B or AP calculus BC exam score of 4 or 5. (General Education Code(s): ME.) *The Staff*

23A. Multivariable Calculus. F,W,S

Vectors in n -dimensional Euclidean space. The inner and cross products. The derivative of functions from n -dimensional to m -dimensional Euclidean space is studied as a linear transformation having matrix representation. Paths in 3-dimensions, arc length, vector differential calculus. Taylor's theorem in several variables, extrema of real-valued functions, constrained extrema and Lagrange multipliers, the implicit function theorem, some applications. Students cannot receive credit for this course and course 22. Prerequisite(s): course 19B or 20B or AP calculus BC exam score of 4 or 5. (General Education Code(s): ME.) *The Staff*

23B. Multivariable Calculus. F,W,S

Double integral, changing the order of integration. Triple integrals, maps of the plane, change of variables theorem, improper double integrals. Path integrals, line integrals, parametrized surfaces, area of a surface, surface integrals. Green's theorem, Stokes theorem, conservative fields, Gauss' theorem. Applications to physics and differential equations, differential forms. Prerequisite(s): course 23A. (General Education Code(s): ME.) *The Staff*

24. Ordinary Differential Equations. S

First and second order ordinary differential equations, with emphasis on the linear case. Methods of integrating factors, undetermined coefficients, variation of parameters, power series, numerical computation. Students cannot receive credit for this course and Applied Mathematics and Statistics 27. Prerequisite(s): course 22 or 23A; course 21 is recommended as preparation. *The Staff*

30. Mathematical Problem Solving. F

Students learn techniques of problem solving such as induction, contradiction, exhaustion, dissection, analogy, generalization, specialization, and others in the context of solving problems drawn from number theory, prob-

ability, combinatorics, graph theory, geometry, and logic. Prerequisite(s): course 11A or 19A or 20A or Math Placement Exam score of 40 or higher. (General Education Code(s): PR-E.) *B. Cooperstein*

99. Tutorial. F,W,S

The Staff

99F. Tutorial (2 credits). F,W,S

May be repeated for credit. *The Staff*

*Upper-Division Courses***100. Introduction to Proof and Problem Solving. F,W,S**

Students learn the basic concepts and ideas necessary for upper-division mathematics and techniques of mathematical proof. Introduction to sets, relations, elementary mathematical logic, proof by contradiction, mathematical induction, and counting arguments. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 11A and 11B or 19A and 19B or 20A and 20B. Enrollment limited to 50. (General Education Code(s): ME.) *The Staff*

103A. Complex Analysis. W,S

Complex numbers, analytic and harmonic functions, complex integration, the Cauchy integral formula, Laurent series, singularities and residues, conformal mappings. (Formerly course 103.) Prerequisite(s): course 23B; and either course 100 or Computer Science 101. *The Staff*

103B. Complex Analysis II (2 credits). *

Conformal mappings, the Riemann mapping theorem, Mobius transformations, Fourier series, Fourier and Laplace transforms, applications, and other topics as time permits. Prerequisite(s): course 103A. *The Staff*

105A. Real Analysis. F,W

The basic concepts of one-variable calculus are treated rigorously. Set theory, the real number system, numerical sequences and series, continuity, differentiation. Prerequisite(s): course 23B and either course 100 or Computer Science 101. *The Staff*

105B. Real Analysis. S

Metric spaces, differentiation and integration of functions. The Riemann-Stieltjes integral. Sequences and series of functions. Prerequisite(s): course 105A. *The Staff*

105C. Real Analysis. *

The Stone-Weierstrass theorem, Fourier series, differentiation and integration of functions of several variables. Prerequisite(s): course 105B. *The Staff*

106. Systems of Ordinary Differential Equations. F

Linear systems, exponentials of operators, existence and uniqueness, stability of equilibria, periodic attractors, and applications. (Formerly course 106A.) Prerequisite(s): courses 21 and 24 (preferred) or Applied Mathematics and Statistics 10 and 20; and either course 100 or Computer Science 101. *The Staff*

107. Partial Differential Equations. W

Topics covered include first and second order linear partial differential equations, the heat equation, the wave equation, Laplace's equation, separation of variables, eigenvalue problems, Green's functions, Fourier series. (Formerly course 106B.) Prerequisite(s): courses 21 and 24 (preferred) or Applied Mathematics and Statistics 10 and 20; and either course 100 or Computer Science 101; course 106 is recommended as preparation. *The Staff*

110. Introduction to Number Theory. F

Prime numbers, unique factorization, congruences with applications (e.g., to magic squares). Rational and irrational numbers. Continued fractions. Introduction to Diophantine equations. An introduction to some of the ideas and outstanding problems of modern mathematics. Prerequisite(s): course 100 or Computer Science 101. (General Education Code(s): Q.) *The Staff*

111A. Algebra. F,W

Group theory including the Sylow theorem, the structure of abelian groups, and permutation groups. Prerequisite(s): course 21 or Applied Mathematics and Statistics 10 and either course 100 or Computer Science 101. *The Staff*

111B. Algebra. S

Introduction to rings and fields including polynomial rings, factorization, the classical geometric constructions, and Galois theory. Prerequisite(s): course 111A. *The Staff*

114. Introduction to Financial Mathematics. *

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Ito's formula. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio; Black-Scholes pricing of European options. Dividends. Implied volatility. American options as free boundary problems. Corequisite(s): Applied Mathematics and Statistics 131 or Computer Engineering 107. *The Staff*

115. Graph Theory. W

Graph theory, trees, vertex and edge colorings, Hamilton cycles, Eulerian circuits, decompositions into isomorphic subgraphs, extremal problems, cages, Ramsey theory, Cayley's spanning tree formula, planar graphs, Euler's formula, crossing numbers, thickness, splitting numbers, magic graphs, graceful trees, rotations, and genus of graphs. Prerequisite(s): course 21 or Applied Mathematics and Statistics 10 and either course 100 or Computer Science 101. *The Staff*

117. Advanced Linear Algebra. W

Review of abstract vector spaces. Dual spaces, bilinear forms, and the associated geometry. Normal forms of linear mappings. Introduction to tensor products and exterior algebras. Prerequisite(s): course 21 or Applied Mathematics and Statistics 10 and either course 100 or Computer Science 101. *The Staff*

118. Advanced Number Theory. W

Topics include divisibility and congruences, arithmetical functions, quadratic residues and quadratic reciprocity, quadratic forms and representations of numbers as sums of squares, Diophantine approximation and transcendence theory, quadratic fields. Additional topics as time permits. Prerequisite(s): course 110 or 111A. *The Staff*

120. Coding Theory. *

An introduction to mathematical theory of coding. Construction and properties of various codes, such as cyclic, quadratic residue, linear, Hamming, and Golay codes; weight enumerators; connections with modern algebra and combinatorics. Prerequisite(s): course 21. *The Staff*

121A. Differential Geometry. S

Topics include Euclidean space, tangent vectors, directional derivatives, curves and differential forms in space, mappings. Curves, the Frenet formulas, covariant derivatives, frame fields, the structural equations. The classification of space curves up to rigid motions. Vector fields and differentiable forms on surfaces; the shape operator. Gaussian and mean curvature. The theorem Egregium;

global classification of surfaces in three space by curvature. Prerequisite(s): courses 21 and 23B and either course 100 or Computer Science 101. Course 105A strongly recommended. *The Staff*

121B. Differential Geometry and Topology. *

Examples of surfaces of constant curvature, surfaces of revolutions, minimal surfaces. Abstract manifolds; integration theory; Riemannian manifolds. Total curvature and geodesics; the Euler characteristic, the Gauss-Bonnet theorem. Length-minimizing properties of geodesics, complete surfaces, curvature and conjugate points covering surfaces. Surfaces of constant curvature; the theorems of Bonnet and Hadamard. Prerequisite(s): course 121A. *The Staff*

124. Introduction to Topology. F

Topics include introduction to point set topology (topological spaces, continuous maps, connectedness, compactness), homotopy relation, definition and calculation of fundamental groups and homology groups, Euler characteristic, classification of orientable and nonorientable surfaces, degree of maps, and Lefschetz fixed-point theorem. Prerequisite(s): course 100; course 111A recommended. *The Staff*

128A. Classical Geometry: Euclidean and Non-Euclidean. F

Rigorous foundations for Euclidean and non-Euclidean geometries. History of attempts to prove the parallel postulate and of the simultaneous discovery by Gauss, J. Bolyai, and Lobachevsky of hyperbolic geometry. Consistency proved by Euclidean models. Classification of rigid motions in both geometries. Prerequisite(s): either course 100 or Computer Science 101. *The Staff*

128B. Classical Geometry: Projective. *

Theorems of Desargue, Pascal, and Pappus; projectivities; homogeneous and affine coordinates; conics; relation to perspective drawing and some history. Prerequisite(s): course 21. *The Staff*

130. Celestial Mechanics. *

Solves the two-body (or Kepler) problem, then moves onto the N-body problem where there are many open problems. Includes central force laws; orbital elements; conservation of linear momentum, energy, and angular momentum; the Lagrange-Jacobi formula; Sundman's theorem for total collision; virial theorem; the three-body problem; Jacobi coordinates; solutions of Euler and of Lagrange; and restricted three-body problem. Prerequisite(s): courses 19A-B and course 23A or Physics 5A or 6A; courses 21 and 24 strongly recommended. Enrollment limited to 35. *The Staff*

134. Cryptography. S

Introduces different methods in cryptography (shift cipher, affine cipher, Vigenere cipher, Hill cipher, RSA cipher, ElGamal cipher, knapsack cipher). The necessary material from number theory and probability theory is developed in the course. Common methods to attack ciphers discussed. Prerequisite(s): course 100; course 110 recommended as preparation. *The Staff*

140. Industrial Mathematics. *

Introduction to mathematical modeling of industrial problems. Problems in air quality remediation, image capture and reproduction, and crystallization are modeled as ordinary and partial differential equations then analyzed using a combination of qualitative and quantitative methods. Prerequisite(s): course 24 and either course 100 or Computer Science 101, and course 105A. *The Staff*

145. Introductory Chaos Theory. *

The Lorenz and Rossler attractors, measures of chaos, attractor reconstruction, applications from the sciences.

Students cannot receive credit for this course and Applied Mathematics and Statistics 146. Prerequisite(s): course 22 or 23A; course 21; course 100 or Computer Science 101. Concurrent enrollment in course 145L is required. *The Staff*

145L. Introductory Chaos Laboratory (1 credit). *

Laboratory sequence illustrating topics covered in course 145. One three-hour session per week in microcomputer laboratory. Concurrent enrollment in course 145 is required. *The Staff*

148. Numerical Analysis. *

The theory of constructive methods in mathematical analysis and its application with scientific computation. Some typical topics are difference equations, linear algebra, iteration, Bernoulli's method, quotient difference algorithm, the interpolating polynomial, numerical differentiation and integration, numerical solution of differential equations, finite Fourier series. Prerequisite(s): course 22 or 23A; course 21 and 24 or Applied Mathematics and Statistics 10 and 20; course 100 or Computer Science 101. Concurrent enrollment in course 148L is required. *The Staff*

148L. Numerical Analysis Laboratory (1 credit). *

Laboratory sequence illustrating topics covered in course 148. One three-hour session per week in microcomputer laboratory. Concurrent enrollment in course 148 is required. *The Staff*

160. Mathematical Logic I. S

Propositional and predicate calculus. Resolution, completeness, compactness, and Lowenheim-Skolem theorem. Recursive functions, Godel incompleteness theorem. Undecidable theories. Hilbert's 10th problem. Prerequisite(s): course 100 or Computer Science 101. *The Staff*

161. Mathematical Logic II. *

Naive set theory and its limitations (Russell's paradox); construction of numbers as sets; cardinal and ordinal numbers; cardinal and ordinal arithmetic; transfinite induction; axiom systems for set theory, with particular emphasis on the axiom of choice and the regularity axiom and their consequences (such as, the Banach-Tarski paradox); continuum hypothesis. Prerequisite(s): course 100 or equivalent, or by permission of instructor. Enrollment limited to 45. *The Staff*

181. History of Mathematics. W

A survey from a historical point of view of various developments in mathematics. Specific topics and periods to vary yearly. (General Education Code(s): TA.) *The Staff*

188. Supervised Teaching. F,W,S

Supervised tutoring in self-paced courses. May not be repeated for credit. Students submit petition to sponsoring agency. *The Staff*

189. ACE Program Service Learning (2 credits). F

Students participate in training and development to co-facilitate collaborative learning in ACE chemistry discussion sections and midterm/exam review sessions. Students are role models for students pursuing science- and math-intensive majors. Prerequisite(s): Prior participation in ACE; good academic standing; no non-passing grades in prior quarter. Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 10. (General Education Code(s): PR-S.) *N. Bhattacharya*

194. Senior Seminar. W,S

Designed to expose the student to topics not normally covered in the standard courses. The format varies from year to year. In recent years each student has written a paper and presented a lecture on it to the class. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 103 or 105A or 111A. Enrollment priority given to seniors. *The Staff*

195. Senior Thesis. F,W,S

Students research a mathematical topic under the guidance of a faculty sponsor and write a senior thesis demonstrating knowledge of the material. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Graduate Courses***200. Algebra I. F**

Group theory: subgroups, cosets, normal subgroups, homomorphisms, isomorphisms, quotient groups, free groups, generators and relations, group actions on a set. Sylow theorems, semidirect products, simple groups, nilpotent groups, and solvable groups. Ring theory: Chinese remainder theorem, prime ideals, localization. Euclidean domains, PIDs, UFDs, polynomial rings. Prerequisite(s): courses 111A and 117 are recommended as preparation. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

201. Algebra II. W

Vector spaces, linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, bilinear forms, quadratic forms, real symmetric forms and real symmetric matrices, orthogonal transformations and orthogonal matrices, Euclidean space, Hermitian forms and Hermitian matrices, Hermitian spaces, unitary transformations and unitary matrices, skewsymmetric forms, tensor products of vector spaces, tensor algebras, symmetric algebras, exterior algebras, Clifford algebras and spin groups. Prerequisite(s): Course 200 is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

202. Algebra III. S

Module theory: Submodules, quotient modules, module homomorphisms, generators of modules, direct sums, free modules, torsion modules, modules over PIDs, and applications to rational and Jordan canonical forms. Field theory: field extensions, algebraic and transcendental extensions, splitting fields, algebraic closures, separable and normal extensions, the Galois theory, finite fields, Galois theory of polynomials. Prerequisite(s): Course 201 is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

203. Algebra IV. F

Topics include tensor product of modules over rings, projective modules and injective modules, Jacobson radical, Wedderburn's theorem, category theory, Noetherian rings, Artinian rings, affine varieties, projective varieties, Hilbert's Nullstellensatz, prime spectrum, Zariski topology, discrete valuation rings, and Dedekind domains. Prerequisite(s): courses 200, 201, and 202. Enrollment restricted to graduate students. *The Staff*

204. Analysis I. F

Completeness and compactness for real line; sequences and infinite series of functions; Fourier series; calculus on Euclidean space and the implicit function theorem;

metric spaces and the contracting mapping theorem; the Arzela-Ascoli theorem; basics of general topological spaces; the Baire category theorem; Urysohn's lemma; and Tychonoff's theorem. Prerequisite(s): course 105A or equivalent; course 105B is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

205. Analysis II. W

Lebesgue measure theory, abstract measure theory, measurable functions, integration, space of absolutely integrable functions, dominated convergence theorem, convergence in measure, Riesz representation theorem, product measure and Fubini's theorem. LP spaces, derivative of a measure, the Radon-Nikodym theorem, and the fundamental theorem of calculus. Prerequisite(s): course 204. Enrollment restricted to graduate students. *The Staff*

206. Analysis III. S

Banach spaces, Hahn-Banach theorem, uniform boundedness theorem, the open mapping and closed graph theorems, weak and weak* topology, the Banach-Alaoglu theorem, Hilbert spaces, self-adjoint operators, compact operators, spectral theory, Fredholm operators, spaces of distributions and the Fourier transform, and Sobolev spaces. Prerequisite(s): Courses 204 and 205 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

207. Complex Analysis. W

Holomorphic and harmonic functions, Cauchy's integral theorem, the maximum principle and its consequences, conformal mapping, analytic continuation, the Riemann mapping theorem. Prerequisite(s): Course 103 is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

208. Manifolds I. F

Definition of manifolds; the tangent bundle; the inverse function theorem and the implicit function theorem; transversality; Sard's theorem and the Whitney embedding theorem; vector fields, flows, and the Lie bracket; Frobenius's theorem. Course 204 recommended for preparation. Enrollment restricted to graduate students. *The Staff*

209. Manifolds II. W

Tensor algebra. Differential forms and associated formalism of pullback, wedge product, exterior derivative, Stokes theorem, integration. Cartan's formula for Lie derivative. Cohomology via differential forms. The Poincaré lemma and the Mayer-Vietoris sequence. Theorems of deRham and Hodge. Prerequisite(s): course 208. Course 201 is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

210. Manifolds III. S

The fundamental group, covering space theory and van Kampen's theorem (with a discussion of free and amalgamated products of groups), CW complexes, higher homotopy groups, cellular and singular cohomology, the Eilenberg-Steenrod axioms, computational tools including Mayer-Vietoris, cup products, Poincaré duality, the Lefschetz fixed point theorem, the exact homotopy sequence of a fibration and the Hurewicz isomorphism theorem, and remarks on characteristic classes. Prerequisite(s): Courses 208 and 209 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

211. Algebraic Topology. *

Continuation of course 210. Topics include theory of characteristic classes of vector bundles, cobordism theory, and homotopy theory. Prerequisite(s): Courses 200, 201, and 202 recommended as preparation. Enrollment re-

stricted to graduate students. *The Staff*

212. Differential Geometry. S

Principal bundles, associated bundles and vector bundles, connections and curvature on principal and vector bundles. More advanced topics include: introduction to cohomology, the Chern-Weil construction and characteristic classes, the Gauss-Bonnet theorem or Hodge theory, eigenvalue estimates for Beltrami Laplacian, and comparison theorems in Riemannian geometry. Prerequisite(s): course 208. Enrollment restricted to graduate students. *The Staff*

213A. Partial Differential Equations I. *

First of the two PDE courses covering basically Part I in Evans' book; *Partial Differential Equations*; which includes transport equations; Laplace equations; heat equations; wave equations; characteristics of nonlinear first-order PDE; Hamilton-Jacobi equations; conservation laws; some methods for solving equations in closed form; and the Cauchy-Kovalevskaya theorem. Courses 106 and 107 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

213B. Partial Differential Equations II. W

Second course of the PDE series covering basically most of Part II in Evans' book and some topics in nonlinear PDE including Sobolev spaces, Sobolev inequalities, existence, regularity and a priori estimates of solutions to second order elliptic PDE, parabolic equations, hyperbolic equations and systems of conservation laws, and calculus of variations and its applications to PDE. Prerequisite(s): Courses 106, 107, and 213A are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

214. Theory of Finite Groups. *

Nilpotent groups, solvable groups, Hall subgroups, the Frattini subgroup, the Fitting subgroup, the Schur-Zassenhaus theorem, fusion in p-subgroups, the transfer map, Frobenius theorem on normal p-complements. Prerequisite(s): Courses 200 and 201 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

215. Operator Theory. *

Operators on Banach spaces and Hilbert spaces. The spectral theorem. Compact and Fredholm operators. Other special classes of operators. Prerequisite(s): Courses 204, 205, 206, and 207 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

216. Advanced Analysis. *

Topics include: the Lebesgue set, the Marcinkiewicz interpolation theorem, singular integrals, the Calderon-Zygmund theorem, Hardy Littlewood-Sobolev theorem, pseudodifferential operators, compensated compactness, concentration compactness, and applications to PDE. Prerequisite(s): Courses 204, 205, and 206 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

217. Advanced Elliptic Partial Differential Equations. *

Topics include elliptic equations, existence of weak solutions, the Lax-Milgram theorem, interior and boundary regularity, maximum principles, the Harnack inequality, eigenvalues for symmetric and non-symmetric elliptic operators, calculus of variations (first variation: Euler-Lagrange equations, second variation: existence of minimizers). Other topics covered as time permits. Prerequisite(s): Courses 204, 205, and 206 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

218. Advanced Parabolic and Hyperbolic Partial Differential Equations. *

Topics include: linear evolution equations, second order parabolic equations, maximum principles, second order hyperbolic equations, propagation of singularities, hyperbolic systems of first order, semigroup theory, systems of conservation laws, Riemann problem, simple waves, rarefaction waves, shock waves, Riemann invariants, and entropy criteria. Other topics covered as time permits. Prerequisite(s): courses 205 and 206. Enrollment restricted to graduate students. *The Staff*

219. Nonlinear Functional Analysis. *

Topological methods in nonlinear partial differential equations, including degree theory, bifurcation theory, and monotonicity. Topics also include variational methods in the solution of nonlinear partial differential equations. Enrollment restricted to graduate students. *The Staff*

220A. Representation Theory I. *

Lie groups and Lie algebras, and their finite dimensional representations. Prerequisite(s): courses 200, 201, and 202. Courses 225A and 227 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

220B. Representation Theory II. *

Lie groups and Lie algebras, and their finite dimensional representations. Prerequisite(s): course 220A. Enrollment restricted to graduate students. *The Staff*

222A. Algebraic Number Theory. *

Topics include algebraic integers, completions, different and discriminant, cyclotomic fields, paralleloptopes, the ideal function, ideles and adèles, elementary properties of zeta functions and L-series, local class field theory, global class field theory. Courses 200, 201, and 202 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

222B. Algebraic Number Theory. *

Topics include geometric methods in number theory, finiteness theorems, analogues of Riemann-Roch for algebraic fields (after A. Weil), inverse Galois problem (Belyi theorem) and consequences. Enrollment restricted to graduate students. *The Staff*

223A. Algebraic Geometry I. *

Topics include examples of algebraic varieties, elements of commutative algebra, local properties of algebraic varieties, line bundles and sheaf cohomology, theory of algebraic curves. Weekly problem solving. Courses 200, 201, 202, and 208 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

223B. Algebraic Geometry II. *

A continuation of course 223A. Topics include theory of schemes and sheaf cohomology, formulation of the Riemann-Roch theorem, birational maps, theory of surfaces. Weekly problem solving. Course 223A is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

225A. Lie Algebras. F

Basic concepts of Lie algebras. Engel's theorem, Lie's theorem, Weyl's theorem are proved. Root space decomposition for semi-simple algebras, root systems and the classification theorem for semi-simple algebras over the complex numbers. Isomorphism and conjugacy theorems. Prerequisite(s): Courses 201 and 202 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

225B. Infinite Dimensional Lie Algebras. W

Finite dimensional semi-simple Lie algebras: PBW theorem, generators and relations, highest weight representations, Weyl character formula. Infinite dimensional Lie

algebras: Heisenberg algebras, Virasoro algebras, loop algebras, affine Kac-Moody algebras, vertex operator representations. Prerequisite(s): course 225A. Enrollment restricted to graduate students. *The Staff*

226A. Infinite Dimensional Lie Algebras and Quantum Field Theory I. *

Introduction to the infinite-dimensional Lie algebras that arise in modern mathematics and mathematical physics: Heisenberg and Virasoro algebras, representations of the Heisenberg algebra, Verma modules over the Virasoro algebra, the Kac determinant formula, and unitary and discrete series representations. Enrollment restricted to graduate students. *The Staff*

226B. Infinite Dimensional Lie Algebras and Quantum Field Theory II. *

Continuation of course 226A: Kac-Moody and affine Lie algebras and their representations, integrable modules, representations via vertex operators, modular invariance of characters, and introduction to vertex operator algebras. Enrollment restricted to graduate students. *The Staff*

227. Lie Groups. F

Lie groups and algebras, the exponential map, the adjoint action, Lie's three theorems, Lie subgroups, the maximal torus theorem, the Weyl group, some topology of Lie groups, some representation theory: Schur's Lemma, the Peter-Weyl theorem, roots, weights, classification of Lie groups, the classical groups. Prerequisite(s): courses 200, 201, 204, and 208. Enrollment restricted to graduate students. *The Staff*

228. Lie Incidence Geometries. W

Linear incidence geometry is introduced. Linear and classical groups are reviewed, and geometries associated with projective and polar spaces are introduced. Characterizations are obtained. Enrollment restricted to graduate students. *The Staff*

229. Kac-Moody Algebras. *

Theory of Kac-Moody algebras and their representations. The Weil-Kac character formula. Emphasis on representations of affine superalgebras by vertex operators. Connections to combinatorics, PDE, the monster group. The Virasoro algebra. Enrollment restricted to graduate students. *The Staff*

232. Morse Theory. *

Classical Morse Theory. The fundamental theorems relating critical points to the topology of a manifold are treated in detail. The Bolt Periodicity Theorem. A specialized course offered once every few years. Prerequisite(s): Courses 208, 209, 210, 211, and 212 recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *The Staff*

233. Random Matrix Theory. *

Classical matrix ensembles; Wigner semi-circle law; method of moments. Gaussian ensembles. Method of orthogonal polynomials; Gaudin lemma. Distribution functions for spacings and largest eigenvalue. Asymptotics and Riemann-Hilbert problem. Painlevé theory and the Tracy-Widom distribution. Selberg's Integral. Matrix ensembles related to classical groups; symmetric functions theory. Averages of characteristic polynomials. Fundamentals of free probability theory. Overview of connections with physics, combinatorics, and number theory. Prerequisite(s): courses 103, 204, and 205; course 117 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

234. Riemann Surfaces. W

Riemann surfaces, conformal maps, harmonic forms, holomorphic forms, the Reimann-Roch theorem, the theory of moduli. Enrollment restricted to graduate students. *The Staff*

235. Dynamical Systems Theory. *

An introduction to the qualitative theory of systems of ordinary differential equations. Structural stability, critical elements, stable manifolds, generic properties, bifurcations of generic arcs. Prerequisite(s): courses 106A, 203, and 208. Enrollment restricted to graduate students. *The Staff*

238. Elliptic Functions and Modular Forms. *

The course, aimed at second-year graduate students, will cover the basic facts about elliptic functions and modular forms. The goal is to provide the student with foundations suitable for further work in advanced number theory, in conformal field theory, and in the theory of Riemann surfaces. Successful completion of graduate algebra sequence (courses 200-202) and either 207 or 103 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

239. Homological Algebra. *

Homology and cohomology theories have proven to be powerful tools in many fields (topology, geometry, number theory, algebra). Independent of the field, these theories use the common language of homological algebra. The aim of this course is to acquaint the participants with basic concepts of category theory and homological algebra, as follows: chain complexes, homology, homotopy, several (co)homology theories (topological spaces, manifolds, groups, algebras, Lie groups), projective and injective resolutions, derived functors (Ext and Tor). Depending on time, spectral sequences or derived categories may also be treated. Courses 200 and 202 strongly recommended. Enrollment restricted to graduate students. *The Staff*

240A. Representations of Finite Groups I. S

Introduces ordinary representation theory of finite groups (over the complex numbers). Main topics are characters, orthogonality relations, character tables, induction and restriction, Frobenius reciprocity, Mackey's formula, Clifford theory, Schur indicator, Schur index, Artin's and Brauer's induction theorems. Recommended: successful completion of courses 200-202. Enrollment restricted to graduate students. *The Staff*

240B. Representations of Finite Groups II. *

Introduces modular representation theory of finite groups (over a field of positive characteristic). Main topics are Grothendieck groups, Brauer characters, Brauer character table, projective covers, Brauer-Cartan triangle, relative projectivity, vertices, sources, Green correspondence, Green's indecomposability theorem. Recommended completion of courses 200-203 and 240A. Prerequisite(s): Courses 200, 201, 202, 203, and 240A recommended. Enrollment restricted to graduate students. *The Staff*

246. Representations of Algebras. *

Material includes associative algebras and their modules; projective and injective modules; projective covers; injective hulls; Krull-Schmidt Theorem; Cartan matrix; semi-simple algebras and modules; radical, simple algebras; symmetric algebras; quivers and their representations; Morita Theory; and basic algebras. Prerequisite(s): courses 200, 201, and 202. Enrollment restricted to graduate students. *The Staff*

248. Symplectic Geometry. *

Basic definitions. Darboux theorem. Basic examples: cotangent bundles, Kähler manifolds and co-adjoint orbits. Normal form theorems. Hamiltonian group actions, moment maps. Reduction by symmetry groups. Atiyah-Guillemin-Sternberg convexity. Introduction to Floer homological methods. Relations with other geometries including contact, Poisson, and Kähler geometry. Prerequisite(s): course 204; courses 208 and 209 are

recommended as preparation. Enrollment restricted to graduate students. *The Staff*

249A. Mechanics I. *

Covers symplectic geometry and classical Hamiltonian dynamics. Some of the key subjects are the Darboux theorem, Poisson brackets, Hamiltonian and Lagrangian systems, Legendre transformations, variational principles, Hamilton-Jacobi theory, geodesic equations, and an introduction to Poisson geometry. Courses 208 and 209 are recommended as preparation. Courses 208 and 209 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

249B. Mechanics II. *

Hamiltonian dynamics with symmetry. Key topics center around the momentum map and the theory of reduction in both the symplectic and Poisson context. Applications are taken from geometry, rigid body dynamics, and continuum mechanics. Course 249A is recommended as preparation. Enrollment restricted to graduate students. *The Staff*

249C. Mechanics III. *

Introduces students to active research topics tailored according to the interests of the students. Possible subjects are complete integrability and Kac-Moody Lie algebras; Smale's topological program and bifurcation theory; KAM theory, stability and chaos; relativity; quantization. Course 249B is recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *The Staff*

252. Fluid Mechanics. *

First covers a basic introduction to fluid dynamics equations and then focuses on different aspects of the solutions to the Navier-Stokes equations. Prerequisite(s): courses 106 and 107 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

254. Geometric Analysis. *

Introduction to some basics in geometric analysis through the discussions of two fundamental problems in geometry: the resolution of the Yamabe problem and the study of harmonic maps. The analytic aspects of these problems include Sobolev spaces, best constants in Sobolev inequalities, and regularity and a priori estimates of systems of elliptic PDE. Courses 204, 205, 209, 212, and 213 recommended as preparation. Enrollment restricted to graduate students. *The Staff*

256. Algebraic Curves. *

Introduction to compact Riemann surfaces and algebraic geometry via an in-depth study of complex algebraic curves. Courses 200, 201, 202, 203, 204, and 207 are recommended as preparation. Enrollment restricted to graduate mathematics and physics students. *The Staff*

260. Combinatorics. *

Combinatorial mathematics, including summation methods, binomial coefficients, combinatorial sequences (Fibonacci, Stirling, Eulerian, harmonic, Bernoulli numbers), generating functions and their uses, Bernoulli processes and other topics in discrete probability. Oriented toward problem solving applications. Applications to statistical physics and computer science. Enrollment restricted to graduate students. *The Staff*

280. Topics in Analysis. *

Enrollment restricted to graduate students. *The Staff*

281. Topics in Algebra. S

Enrollment restricted to graduate students. *The Staff*

282. Topics in Geometry. *

Enrollment restricted to graduate students. *The Staff*

283. Topics in Combinatorial Theory. W

Enrollment restricted to graduate students. *The Staff*

284. Topics in Dynamics. *

Enrollment restricted to graduate students. *The Staff*

285. Topics in Partial Differential Equations. F

Topics such as derivation of the Navier-Stokes equations. Examples of flows including water waves, vortex motion, and boundary layers. Introductory functional analysis of the Navier-Stokes equation. Enrollment restricted to graduate students. *The Staff*

286. Topics in Number Theory. *

Topics in number theory, selected by instructor. Possibilities include modular and automorphic forms, elliptic curves, algebraic number theory, local fields, the trace formula. May also cover related areas of arithmetic algebraic geometry, harmonic analysis, and representation theory. Courses 200, 201, 202, and 205 are recommended as preparation. Enrollment restricted to graduate students. *The Staff*

287. Topics in Topology. *

Topics in topology, selected by the instructor. Possibilities include generalized (co)homology theory including K-theory, group actions on manifolds, equivariant and orbifold cohomology theory. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

292. Seminar (no credit). F,W,S

A weekly seminar attended by faculty, graduate students, and upper-division undergraduate students. All graduate students are expected to attend. Enrollment restricted to graduate students. *The Staff*

296. Special Student Seminar. F,W,S

Students and staff studying in an area where there is no specific course offering at that time. Enrollment restricted to graduate students. *The Staff*

297. Independent Study. F,W,S

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Enrollment restricted to graduate students. *The Staff*

298. Master's Thesis Research. F,W,S

Enrollment restricted to graduate students. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students. Enrollment restricted to graduate students. *The Staff*

Medieval Studies

Students wishing to pursue a course of study in Latin literature should consult the concentration in national/transnational literatures under Literature, page 361.

Merrill College

College Office
(831) 459-2144

For college description and list of faculty, see page 94.

Lower-Division Courses

10. Becoming a Successful Student (2 credits). *

An interactive course providing the opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources are explored. Contact college office for interview-only criteria. Enrollment limited to 30. *The Staff*

20N. Re-Evaluation Counseling. S

Class introduces the fundamentals of re-evaluation counseling (co-counseling) and focuses on those aspects of the theory and practice which facilitate living in a diverse world. Interview with instructor before first class meeting. Will be offered spring, 2011. Enrollment limited to 20. Offered in alternate academic years. *P. Roby*

28. Peer Leadership in Co-Curricular Settings (2 credits). S

Introductory course for student leaders combining theoretical background and practical applications. Topics include: student-development theory; communication strategies; leadership-skills assessment; and intergroup relations. Includes readings, discussions, self-reflection, and lectures. Resident assistant (RA) pre-employment training course. Enrollment by interview only: approval of instructor required. Enrollment restricted to selection as resident assistant (RA), program assistant, or alternate for Merrill College. Enrollment limited to 30. May be repeated for credit. *The Staff*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

80A. Introduction to University Discourse: Cultural Identities and Global Consciousness. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Examines world poverty, imperialism, and nationalism; peoples' need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T3-Social Sciences, C1, E.) *L. Martinez-Echazabal*

80B. Rhetoric and Inquiry: Cultural Identities and Global Consciousness. F

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Examines world poverty, imperialism, and nationalism; peoples' need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Incorporates outside research. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T3-Social Sciences, C2, E.) *L. Martinez-Echazabal*

80C. Merrill Seminar. S

Research-based seminar on a topic of particular cultural, historical, or contemporary interest, open to all undergraduate students, taught by either a Merrill College Fellow or other member of the UCSC faculty. (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *The Staff*

80L. Merrill Core Visual Laboratory (2 credits). *

Visual laboratory designed to work in tandem with the

Merrill Core Course to enhance learning for students with diverse skills and learning styles. Open to first-year Merrill students currently enrolled in course 80A, 80B, or 80X. Required of students in the Merrill Frosh Scholars Program. Concurrent enrollment in course 80A, 80B, or 80X is required. *C. Gerster*

80X. Introduction to University Discourse: Cultural Identities and Global Consciousness (Frosh Scholar).*

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Examines world poverty, imperialism, and nationalism; people's need to assert their cultural identities; and the benefits of individuals' absorption in worthy causes. Permission of instructor required; selection for this year-long scholars program based on application submitted prior to fall quarter. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T3-Social Sciences, C1, E.) *L. Martinez-Echazabal*

80Z. Merrill Scholars Seminar.*

Research-based, writing-intensive seminar focusing on the construction of persuasive arguments. Explores topics of cultural, historical, and/or political interest, taught by a Merrill College Fellow. Topic will change yearly. Enrollment restricted to Merrill Frosh Scholars program participants. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

85B. Merrill Classroom Connection Field Study (3 credits). F,W,S

Supervised hands-on experience assisting in local elementary classrooms. Students attend UCSC class meetings, complete relevant readings in educational theory, and present a final assignment. Priority enrollment restricted to Merrill College members. May be repeated for credit. *L. Martinez-Echazabal*

85C. Merrill Classroom Connection Field Study (2 credits). F,W,S

Supervised hands-on experience assisting in local elementary school classrooms. Students also attend UCSC course meetings, complete relevant readings in educational theory, and present a final assignment. Priority enrollment restricted to Merrill College members. May be repeated for credit. *L. Martinez-Echazabal*

93. Field Study. F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser and provost required. *The Staff*

93F. Field Study (2 credits). F,W,S

Provides for individual program of study sponsored by the college and performed off campus. Approval of instructor required. May be repeated for credit. *The Staff*

93G. Field Study (3 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Approval of instructor required. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

120. Personal Empowerment. W

Intensive course on individual goal-oriented behavior, commonly called problem solving. Focus on purpose, goals, meaning, emotions, languages, model-building, reality, thinking, logic, creativity, the steps of problem solving, common blocks, and techniques of unblocking. Meet with instructor prior to advance enrollment; priority given to upper-level students. Enrollment limited to 20. *F. Andrews*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.) Students submit petition to sponsoring agency, supported by faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. *The Staff*

193E. Field Study (2 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. May be repeated for credit. *The Staff*

193G. Field Study (3 credits). F,W,S

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty member. *The Staff*

195. Senior Research Project. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. This may be a multiple-term course extending over two or three quarters; in this case the grade and evaluation submitted for the final quarter apply to all previous quarters. Petitions may be obtained at the Merrill College Office. Approval of student's adviser, certification of adequate preparation, and approval by the Merrill Provost required. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Faculty and Professional Interests

VICTORIA AUERBUCH STONE, Assistant Professor
Interactions between the pathogen Yersinia pseudotuberculosis and the innate immune system

MANEL CAMPS, Assistant Professor
Molecular mechanisms of reactive DNA methylation toxicity

A. RUSSELL FLEGAL, Professor
Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

KAREN OTTEMANN, Professor
Environmental responses of pathogenic bacteria

CHAD SALTIKOV, Associate Professor
Microbial anaerobic respiratory processes that influence the biotransformation of pollutants in the environment

DONALD R. SMITH, Professor
Neurotoxicity, cellular and organismal responses to environmental toxins

FITNAT YILDIZ, Associate Professor
Microbiology, molecular genetics, genomics; the mechanism of persistence of survival of Vibrio cholerae

Environmental Toxicology

KENNETH W. BRULAND (Ocean Sciences)
Biogeochemistry of trace metals

DON CROLL (Ecology and Evolutionary Biology)
Foraging ecology of marine sea birds and mammals, island conservation/ecology

ANDREW FISHER (Earth Sciences)
Hydrology, crustal studies, heat flow modeling

RAPHAEL KUDELA (Ocean Sciences)
Ecological modeling and remote sensing, satellite oceanography, phytoplankton ecology and harmful algal blooms

MARK MANGEL (Applied Mathematics and Statistics)
Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

MATTHEW MCCARTHY (Ocean Sciences)
Organic geochemistry, marine organic geochemistry, global biogeochemical cycles

PETER T. RAIMONDI (Ecology and Evolutionary Biology)
Applied marine ecology

MARY SILVER (Ocean Sciences)
Biological oceanography, marine plankton, midwater ecology

Cellular Toxicology

LINDSAY HINCK (MCD Biology)
Neurobiology, cell biology, development

TED HOLMAN (Chemistry and Biochemistry)
Bioinorganics and biological chemistry

PRADIP K. MASCHARAK (Chemistry and Biochemistry)
Bioinorganic chemistry

GLENN MILLHAUSER (Chemistry and Biochemistry)
Peptide structure and dynamics, electron spin resonance spectroscopy, nuclear magnetic resonance, agouti proteins

MARTHA ZUNIGA (MCD Biology)
Molecular, cellular, and developmental biology of the immune system

Microbiology

GRANT HARTZOG (MCD Biology)
Biochemistry, genetics, chromatin and transcriptional regulation

DOUGLAS R. KELLOGG (MCD Biology)
Coordination of cell growth and cell division

ROGER LININGTON (Chemistry and Biochemistry)
Marine Natural Products, Drugs for Neglected Diseases, Chemical Biology, Chemical Probes

TODD LOWE (Biomolecular Engineering)
Experimental and computation genomics, ncRNA gene finders, DNA microarrays to study the biology of Archaea

NADER POURMAND (Biomolecular Engineering)
Development of new tools and technologies that integrate biology, electronics, and nanofabrication for the detection and study of genes and proteins

JOSHUA STUART (Biomolecular Engineering)
Computational genomics

JONATHAN P. ZEHR (Ocean Sciences)
Aquatic microbial ecology, biological oceanography

Program Description

The Microbiology and Environmental Toxicology Department (formerly the Environmental Toxicology Department) sponsors undergraduate and graduate courses in microbiology and environmental toxicology, both within the department and through affiliated departments. The curriculum offers a strong foundation in fundamental and applied toxicology and microbiology to provide the breadth and depth of perspective required for this interdisciplinary science. Research interests of students and faculty in microbiology and environmental toxicology span the fields of biology, microbiology, chemistry, Earth sciences, ocean sciences, environmental studies, and human health.

Undergraduate Programs

While the Microbiology and Environmental Toxicology Department only awards graduate degrees, it does offer a select number of undergraduate courses to prepare and attract promising undergraduates for advanced studies in microbiology and environmental toxicology or related disciplines. Students interested in microbiology and environmental toxicology should major in a field such as biology; marine biology; molecular, cell, and developmental biology; biochemistry; chemistry; Earth sciences; engineering; or environmental studies while taking microbiology and environmental toxicology electives.

In addition, the program provides unique opportunities for exceptional undergraduates to conduct research

in microbiology and environmental toxicology. These opportunities are limited to students who have demonstrated their potential in undergraduate courses in the basic sciences and environmental toxicology. With department approval, these undergraduates may also take graduate courses in microbiology and environmental toxicology. That coursework will be applied toward a graduate degree in microbiology and environmental toxicology if they are accepted into the program.

Graduate Programs

Graduate training in the Department of Microbiology and Environmental Toxicology (METX) prepares students to solve important problems in the field of environmental health by providing stimulating coursework, extensive scientific presentation training, and in-depth research that culminates in a thesis. Our department is housed on one floor of a new building, allowing extensive interactions between all members. There is no other program in the world that educates students to appreciate the interplay between microbes, chemical toxins, and health, providing the training students require to work effectively in a complex world. Graduate training in the METX department prepares students to become leaders in the field, following career paths in academia, teaching, industry, and government. Master of science (M.S.) students typically finish in two years and doctor of philosophy (Ph.D.) students in four to six years.

Key components of our graduate training include:

- Core courses utilizing a case study format: METX 200, *Interdisciplinary Approaches to Problems at the Interface of Microbiology and Environmental Toxicology*.
- Core course devoted to grant-writing skills: METX 205, *Scientific Skills, Ethics, and Writing*.
- Personalized class plan for the remaining three courses to fit the student's background and research goals. Possible courses include METX 201, *Sources and Fates of Pollutants*, METX 202, *Cellular and Organismal Toxicology*, METX 206A, *Advanced Microbiology*, METX 210, *Molecular and Cellular Basis of Bacterial Pathogenesis*, METX 238, *Pathogenesis: Molecular Mechanisms of Disease*, and METX 250, *Environmental Microbiology*, as well as courses in other departments such as Ocean Sciences 220, *Chemical Oceanography*, and Molecular Cell and Developmental Biology 200B, *Advanced Molecular Genetics*.
- Speaking presentation skills training through coursework and yearly departmental presentations.
- Scientific writing and literature mastery through the writing of a literature review in the first year.
- Weekly seminars that expose students to the breadth of our fields and provide students with opportunities to interact closely with speakers to form connections and collaborations.
- Qualifying examinations designed to perfect the student's ability to craft research plans.
- Extensive laboratory research training that starts immediately upon entering the program and culminates in the student's master's thesis or Ph.D. dissertation.

Sample Pathways

Pathways within the microbiology and environmental toxicology graduate program focus on interdisciplinary

approaches to addressing problems in environmental and public health. We offer several defined training pathways, and also encourage students to create their own.

Metals in the Environment

Research includes how organisms are exposed to metals, how these metals cause toxicity, and investigating the concentration, speciation, and isotopic composition of contaminant metals and metalloids.

Microbiology

Microbiology provides research training on molecular genetic analysis of both non-pathogenic and pathogenic microbes. Students study host-pathogen interactions, ecology and evolution of pathogenic microorganisms, adaptation of pathogenic and non-pathogenic microorganisms to environmental stresses, and mechanisms of microbial biotransformation of pollutants and toxic metals.

Cellular and Organismal Toxicology

This pathway provides training in the biochemical, molecular, cellular, and physiological processes that are impacted by exposures to such contaminants as toxic metals. Research includes exposure pathways and toxicity of contaminants and pathogens within humans, with emphasis on the molecular and cellular mechanisms underlying toxicity.

Program Requirements

The microbiology and environmental toxicology student's curriculum (courses METX) is tailored to the individual, creating a graduate experience that combines essential background material with coursework at the frontiers of science. The student, in conjunction with a faculty committee, chooses classes to complement the Ph.D. or master's thesis work that each student is performing. Students are encouraged to explore new areas and bring this expertise back to their thesis research.

Requirements for both Master's and Ph.D. Students in Microbiology and Environmental Toxicology

1. Core coursework: METX 200, *Interdisciplinary Approaches to Problems at the Interface of Microbiology and Environmental Toxicology*, and METX 205, *Scientific Skills, Ethics, and Writing*, must be taken and passed with at least a B.
2. Additional coursework: Two courses from the following: METX 201, 202, 206A, 210, 238, 250, and at least one additional approved graduate-level course within Microbiology and Environmental Toxicology or another department. Students must enroll in METX 281, 292, and 297 each quarter. Additional courses as recommended by your first-year advising committee.
3. Literature review: Under direction of the student's adviser, write a literature review of the current state of the field of the proposed dissertation research. The written review will be handed in to the student's adviser at the end of the summer of the first year.
4. Department seminar: Give a 25-minute departmental seminar each academic year, and one one-hour departmental seminar during the spring quarter of the second year presenting the student's research.

Requirements specific to the Ph.D. degree

1. Teaching assistant: Doctoral students are required to work as teaching assistants (TA) for at least one quarter. Priority for TA positions is given to first-year doctoral students, then to current doctoral students who have not yet worked as a teaching assistant.
2. Ph.D. qualifying examination (part I)—microbiology and environmental toxicology internal). Part I of the qualifying examination consists of two portions: preparation and defense of an independent research proposal, and knowledge of material presented in the microbiology and environmental toxicology core courses taken by the student. The student must complete part I no later than spring quarter of the second year.
3. Ph.D. qualifying examination (part II). Present and defend a dissertation research proposal to the student's Ph.D. qualifying examination (QE) committee. The student must complete part II no later than spring quarter of the third year.
4. Advancement to candidacy. The student advances to candidacy after completing all coursework, completing the literature review, giving a second-year seminar and passing the Ph. D. qualifying examination parts I and II.
5. Dissertation defense. The student must submit their doctoral dissertation to the dissertation committee for tentative approval at least one month before presenting a formal, public doctoral research seminar.

Requirements specific to the Master's degree

1. Master's comprehensive examination. The comprehensive examination tests knowledge of the material presented in the microbiology and environmental toxicology core courses taken by the student, as well as general knowledge related to the student's master's research. In general, this oral examination is taken in the fall quarter of the second year.
2. Thesis. Students are required to submit a thesis for fulfillment of the degree requirements. The thesis should be submitted to the student's master's reading committee by the second week of the final quarter of work, generally, spring of the second year.

Lower-Division Courses**80E. Aquatic Toxicology. ***

An introduction to the sources, cycling, and impacts of toxicants in aquatic systems, including acid rain, ground water, fresh water rivers and lakes, estuaries, and the ocean. Emphasis is on the properties of toxic chemicals that influence their biogeochemical cycles and factors that influence their toxicity to aquatic organisms and humans. (General Education Code(s): T2-Natural Sciences.) *A. Flegal*

Upper-Division Courses**101. Sources and Fates of Pollutants. S**

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments,

including environmental chemistry and biogeochemical cycles as well as exposure to pathways and uptake by organisms. Additional emphasis placed on susceptibility and effects of toxicants across organ systems, toxicokinetic and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 201. *A. Flegal*

102. Cellular and Organismal Toxicology. F

Emphases of biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Designed for advanced undergraduates. Students cannot receive credit for this course and course 202. Prerequisite(s): Biology 20A and 20B or equivalent; Biology 100, Biochemistry, and 110, Cell Biology, are recommended. Enrollment restricted to juniors and seniors. *D. Smith*

119. Microbiology. W

Cell and molecular biology of bacteria and their viruses, including applications in medicine, public health, agriculture, and biotechnology. (Also offered as Biology: Molecular, Cell, and Developmental 119. Students cannot receive credit for both courses.) Prerequisite(s): BIOL 100 or BIOC 100A. *V. Stone*

119L. Microbiology Laboratory. F,W,S

An introduction to the principles and practices of laboratory microbiology, with a substantial presentation of optical microscopy. Students are billed a materials fee. (Also offered as Biology: Molecular, Cell, and Developmental 119L. Students cannot receive credit for both courses.) Prerequisite(s): previous or concurrent enrollment in BIOL 119 is required; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to biological sciences and affiliated majors; biology minors; other majors by permission. (General Education Code(s): W.) *M. Dalbey, C. Saltikov, K. Ottemann*

125. Practicing Safe Science (2 credits). W

Introduces research safety principles and practices. Instructors and guest experts discuss research hazards and control measures. Students explore the safe use of research methods and materials via hands-on and outside exercises. Issues include compliance with hazardous waste and other environmental safety regulations. *J. Schoonover*

138. Pathogenesis: Molecular Mechanisms of Disease. S

Overview of the pathogenic mechanisms underlying human disease at the physiological and molecular levels, with their implications for epidemiology, diagnosis, and treatment. Includes discussion of clinical cases and of emerging areas of research. Geared toward students interested in future research or clinical careers in the area of human or animal health. Students cannot receive credit for this course and Microbiology and Environmental Toxicology 238. (Also offered as Biology: Molecular, Cell, and Developmental 118. Students cannot receive credit for both courses.) Prerequisite(s): Biology 130. Enrollment restricted to students majoring in biology; health sciences; molecular, cell, and developmental biology; biochemistry and molecular biology; or neuroscience and behavior. Offered in alternate academic years. *M. Camps*

140. Molecular Biology of Prokaryotes. *

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion,

transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 240. Prerequisite(s): Biology 119. *K. Ottemann*

144. Groundwater Contamination. S

Analyses of contemporary problems in groundwater contamination, based on current scientific understanding of contaminant transport in aquifers. Topics include both theoretical concepts and case studies. To be offered in alternate academic years. Prerequisite(s): Earth Science 110B. Offered in alternate academic years. *A. Flegal*

145. Medical Geology. *

An interdisciplinary analysis of natural geochemical processes that impact human health and of anthropogenic processes that exacerbate those impacts. Prerequisite(s): Chemistry 1A, 1B, 1C, 1M, and 1N. *A. Flegal*

150. Introduction to Research and Experimental Design. *

Lecture-based course for advanced undergraduates actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes basic lab skills, including laboratory safety and handling of laboratory equipment; experimental design; scientific record keeping; and literature searching, review, and management. *K. Ottemann, (FWS) The Staff*

151. Scientific Writing and Presentation. *

For advanced undergraduates who are actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes the collection, reduction, analysis, management, and interpretation of scientific data; the presentation of scientific data in written and oral formats; and further development of critical thinking. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *The Staff*

160. Coastal Environmental Toxicology and Policy (3 credits). *

Interdisciplinary analysis of the scientific basis and policy development to regulate and manage environmental pollutants in coastal waters. Focuses on case studies involving aspects of environmental toxicology and policy including environmental monitoring and regulatory programs; ecosystem restoration; and regulating the environmental impacts of coastal development. Enrollment restricted to sophomores, juniors, seniors, and graduate students. *M. Connor, G. Griggs, A. Flegal*

195. Senior Thesis. F,W,S

An individually supervised course, with emphasis on independent research culminating in a senior thesis. May be repeated for credit. *The Staff*

198. Independent Study. F,W,S

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the course work off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Reading, discussion, written reports, and laboratory research on selected topics. May be repeated for credit. *The Staff*

Graduate Courses

200. Interdisciplinary Approaches in Environmental Toxicology. F

Introduction to interdisciplinary, case-based approaches to problem-solving. Course demonstrates how important, current problems in environmental and human health have been addressed and solved. Assigned problems that integrate the different organization levels (environmental, molecular/cellular, organismal/public health) inherent to environmental and human health are presented. Students work in collaborative teams to analyze each problem and create a proposal for a research plan/solution. Enrollment restricted to graduate students. *D. Smith, M. Camps, K. Ottemann*

201. Sources and Fates of Pollutants. S

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis will be placed on the susceptibility and effects of toxicants across organ systems, toxicokinetics and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 101. Enrollment restricted to graduate students; qualified undergraduate science majors may enroll with permission of instructor. *A. Flegal*

202. Cellular and Organismal Toxicology. F

Emphasizes biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Students cannot receive credit for this course and Microbiology and Environmental Toxicology 102 or BIOL 122. Enrollment restricted to graduate students. *D. Smith*

203. Cellular and Molecular Toxicology. *

Presents in-depth cellular and molecular principles of environmental toxicology. These include modes of action and cellular and molecular targets of toxicants, as well as mechanisms of cellular and molecular responses to toxicants and their detoxification. State-of-the-art biological methodologies and approaches to identify and study cellular targets of toxicants. Designed to provide students with a broad and deep understanding of the biological aspects of toxicology at both cellular and molecular levels, and the skills to approach emerging challenges in the field. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *The Staff*

205. Scientific Skills, Ethics, and Writing. *

Course provides fundamental training of graduate students in the scientific method, experimental design, ethics in science, grant proposal and scientific writing, data presentation, and scientific speaking. Students are evaluated on class participation, performance, and a written NIH/NSF style research proposal. Enrollment restricted to graduate students. *The Staff*

206A. Advanced Microbiology. F

Focuses on aspects of bacterial molecular biology. Covers four main areas: (1) metabolism-catabolism, anabolism, building-block precursors; (2) transcription/signal transduction; (3) replication/plasmid biology/division; (4) translation/protein processing/secretion/cell structure.

Strong focus on experimental techniques and approaches used in molecular biology, and on model bacteria, such as *Escherichia coli* and *Bacillus subtilis*. Enrollment restricted to graduate students. Advanced undergraduates may enroll with permission of instructor. *K. Ottemann, V. Stone, C. Saltikov*

210. Molecular and Cellular Basis of Bacterial Pathogenesis. *

Focuses on the molecular basis of bacterial pathogenesis with specific emphasis on gene expression, regulation, and ecology and evolution. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. Enrollment restricted to graduate students. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. *F. Yildiz*

215. Seminar in Advanced Prokaryotic Molecular Biology (2 credits). *

Seminar focuses on aspects of prokaryotic molecular biology. Specific topics include transcriptional regulation, translational regulations, DNA replication, secretion of proteins, transport of small molecules, bacterial differentiation, signal transduction, biofilm formation, and motility. Discussions focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Enrollment restricted to graduate students. *F. Yildiz, C. Saltikov, K. Ottemann*

238. Pathogenesis: Molecular Mechanisms of Disease. S

Overview of the pathogenic mechanisms underlying human disease at the physiological and molecular levels, with their implications for epidemiology, diagnosis, and treatment. Includes discussion of clinical cases and of emerging areas of research. Geared toward students interested in research or clinical careers in the area of human or animal health. Students cannot receive credit for this course and course 138. Enrollment restricted to graduate students. *M. Camps*

240. Molecular Biology of Prokaryotes. *

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 140. *K. Ottemann*

250. Environmental Microbiology (2 credits). S

How microbes interact with their environments. Topics include anaerobic metabolism; biotransformation of toxic metals and organic pollutants; geomicrobiology; life in extreme environments; water quality. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. Enrollment restricted to graduate students. *C. Saltikov*

281A. Topics in Environmental Toxicology. *

Selected topics in environmental toxicology. Topics vary from year to year. Enrollment restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission. May be repeated for credit. *The Staff*

281C. Topics in Environmental Microbiology (2 credits). F,W,S

Seminar and discussion focusing on mechanism of microbial transformation of metals. Participants present results from their research projects in a seminar format. Relevant

journal articles presented and discussed. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *C. Saltikov*

281F. Topics in Aquatic Toxicology. F,W,S

Analyses of the sources and fates of aquatic pollutants. Discussions on processes at the air-water interface, within the water column, and in aquatic sediments. Topics vary from year to year. Enrollment restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission. May be repeated for credit. *A. Flegal*

281M. Topics in Molecular Toxicology (2 credits). F,W,S

Seminar and discussion on the mechanisms of toxicity in DNA alkylating agents. Participants present results from their research, and relevant journal articles are discussed. Enrollment restricted to graduate students. Undergraduates may enroll with instructor's permission. Enrollment limited to 5. May be repeated for credit. *M. Camps*

281O. Topics in Bacterial Pathogenesis (2 credits). F,W,S

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcer-causing bacterium *Helicobacter pylori*. Participants are required to present results from their own research and relevant journal articles. (Also offered as Biology: Molecular, Cell, and Developmental 280O. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. *K. Ottemann*

281Q. Cellular and Organismal Responses to Toxicants. F,W,S

Intensive research seminar on the concepts, theory, and techniques in deriving physiologically based pharmacokinetic models of toxin exposure, metabolism, and efficacy of therapeutic treatment in mammalian models of human metal toxicity. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. *D. Smith*

281V. Topics in Bacterial Pathogenesis and Innate Immunity (2 credits). F,W,S

Focuses on the interplay between the human gut bacterial pathogen *Yersinia pseudotuberculosis* and the innate immune system of the host. Participants are required to present the goals, results, and conclusions from their own research. Participation in the general discussion during others' presentations is also required. Enrollment restricted to graduate students. Qualified undergraduates performing research under the supervision of the instructor may enroll with instructor's permission. May be repeated for credit. *V. Stone*

281Y. Biofilms: Processes and Regulation (2 credits). F,W,S

Intensive seminar series focusing on the most current work on genes and the processes that regulate biofilm development dynamics as well as on the recent developments on visualization of biofilms. Presentation and discussion based. Enrollment restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission. May be repeated for credit. *F. Yildiz*

282. Current Approaches to Molecular Pathogenesis (2 credits). *

Graduate level seminar focusing on the mechanisms by which bacterial pathogens cause disease. Specific topics include basic concepts of virulence and virulence factors, virulence factor regulation, toxins, and interactions of pathogens with mammalian cells and organs. Discus-

sions focus on several key pathogens, including *Helicobacter pylori*, *Vibrio cholerae*, *Salmonella typhimurium*, and *Listeria monocytogenes*. May be repeated for credit. *The Staff*

290. Proseminar. *

Special topics offered from time to time by faculty, visiting professors, or staff members. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. May be repeated for credit. *The Staff*

290A. Epidemiology and Risk Assessment. *

Approaches different techniques of biological monitoring and the exposure and effect of biomarkers related to occupational and environmental exposure to chemicals. Available methods for risk assessment and identification of protective exposure limits also considered. (Formerly *Biological Impact of Chemical Exposures*.) *The Staff*

292. Introductory Graduate Seminar (no credit). F,W,S

Weekly seminars by academic and research faculty on their areas of special interest. Students write weekly abstracts on articles covered by the seminars. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *The Staff*

297. Independent Study. F,W,S

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Molecular, Cell, and Development Biology

Faculty and Professional Interests

Professor

AMY C. BEAL

American music, 20th-century music, experimental and improvisatory performance practices, postwar and Cold War culture, German new music festivals and radio stations, piano performance, contemporary music ensemble

LINDA C. BURMAN-HALL

Baroque music and performance practices; historic and new keyboard repertoire (harpsichord, organ, and fortepiano); Indonesian music cultures; ethnomusicology

DAVID H. COPE, Emeritus

SHERWOOD DUDLEY, Emeritus

EDWARD F. HOUGHTON, Emeritus

DAVID EVAN JONES

Composition and analysis, chamber opera, Balkan music,

language and music, timbre and orchestration

HI KYUNG KIM

Composition, theory, contemporary music, analysis, orchestration, Korean music, world music composition, Founder and Artistic Director, Pacific Rim Music Festival

ANATOLE LEIKIN

Classical and romantic music history, theory, and performance practices, piano and fortepiano, Russian music

FREDRIC LIEBERMAN

Ethnomusicology; composition; the music industry and legal/ethical issues; American vernacular musics; musics of east, Southeast, and south Asia; organology

LETA E. MILLER

Twentieth-century American music, modern and baroque flute, 16th-century chanson and madrigal, music and science, 18th- and 20th-century flute literature and performance styles, music of C.P.E. Bach and Lou Harrison

GORDON MUMMA, Emeritus

PAUL NAUERT

Theory, composition; rhythm and meter; music cognition; mathematical and computer models of the compositional process

NICOLE A. PAIEMENT

Conducting; world premiere performance and recordings; contemporary chamber opera; interdisciplinary art; Founder and Artistic Director, Ensemble Parallèle

JOHN M. SCHECHTER, Emeritus

Associate Professor

KARLTON E. HESTER

Premeditated, electroacoustic, and spontaneous composition; flutes, saxophones, and interdisciplinary performance; improvisational and Afrocentric music theory, analysis and history. Artistic Director, Global African Music and Arts Festival/Symposium; UCSC/ISIM International Improvisation Festival/Conference.

NINA TREADWELL

Renaissance through early baroque music history and performance practices, early plucked-string instruments (theorbo, renaissance, and baroque guitar; renaissance lute), 16th- and 17th-century Italian theatrical music, gender studies, women and music, literary and critical theory

Assistant Professor

BENJAMIN L. CARSON

Theory and composition, music perception, empiricism and subjectivity, Schoenberg, popular music, improvisation

TANYA H. MERCHANT

Ethnomusicology, musics of Central Asia and the former Soviet Union, music and gender, identity, nationalism, globalization, and the institutionalization of music

DARD NEUMAN, Kamil and Talat Hasan Endowed Chair in Classical Indian Music

Ethnomusicology; Hindustani music; colonialism, nationalism, technology and performance; sitar

Lecturer

ERIKA ARULANANTHAM

Group piano, musicianship

NATHANIEL A. BERMAN

Concert choir

MARK BRANDENBURG

Clarinet

PAUL D. CONTOS

Saxophone

MARY JANE COPE

Piano, fortepiano

WILLIAM D. COULTER

Classical guitar

GREER ELLISON

WILLIAM K. WINANT

Orchestral percussion, percussion ensemble

THE STAFF

Latin American ensembles

Distinguished Adjunct Professor

ALI AKBAR KHAN (deceased)

North Indian classical music

Visiting Professor

AASHISH KHAN

North Indian classical music

Program Description

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily

addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the bachelor of music (B.M.), which especially develops the student's attainment in performance, and the bachelor of arts (B.A.), which cultivates greater breadth in the student's academic achievement. Two minors in music are also offered: one in electronic music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

The music program provides courses for both general education and the music major/minor curriculum. Students from all disciplines are encouraged to enroll in music courses, including performance groups and private instruction.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

Letter Grade Requirement

All upper-division courses applied toward the music majors must be taken for a letter grade, except Music 120 and ensembles, which may be taken Pass/No Pass.

Requirements for the Bachelor of Arts

The course requirements for the bachelor of arts (B.A.) in music include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D; either course 180A or 180B; another course selected from either 120, 124, 130, or the 180A or 180B course not already taken; and 197. Basic keyboard skills are required as a component of the music theory curriculum. Many students will need to take Music 60, *Group Instruction in Piano*, concurrently with the Music 30 sequence to achieve the appropriate level of skill. In addition, music majors are required to enroll in a minimum of six quarters of evaluated instrumental or choral ensembles, as well as a minimum of six quarters of evaluated individual instrumental or vocal lessons. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major. It is strongly recommended that these ensembles and lessons be taken every quarter from the beginning of the core curriculum (course 30 sequence). Music majors in the B.A. program must successfully complete the proficiency audition (see below).

Although a foreign language is not required for completion of the B.A. in music, students planning graduate work are strongly advised to study a language pertinent to their research area at least equivalent to level 3 at UCSC or be able to pass the level-4 entrance examination.

Students are encouraged to prepare a senior project, which may take one of three forms: a full senior recital, a full senior thesis, or a partial recital with a related shorter thesis. To be considered for highest honors in the major, B.A. students must complete, on an excellent level, a senior project.

Music B.A. Sample Planners

The following are two recommended academic plans for students to complete during their first two years

as preparation for the music major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major. Four-year plans may be found in the *Music Student Handbook*, available at the Music Department office or on the Music Department web site at http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

Students should check with the department office for the most up-to-date course schedules and program-planning advice since courses are not necessarily taught in the same quarters each academic year.

| Plan One | | | |
|---------------|---|----------------------|----------------------|
| Year | Fall | Winter | Spring |
| 1st (frsh) | MUSC 11A (recommended) | MUSC 30B/M | MUSC 30C/N |
| | MUSC 30A/L lessons | lessons | lessons |
| | ensemble (group piano, Mus 60, may be required; see courses 30A/L) | ensemble | ensemble |
| 2nd (soph) | MUSC 100A lessons | MUSC 100B lessons | MUSC 100C lessons |
| | ensemble | ensemble | ensemble |

| Plan Two | | | |
|---------------|--|--------------------------|--------------------------|
| Year | Fall | Winter | Spring |
| 1st (frsh) | MUSC 11A (recommended) | MUSC 13 (recommended) | MUSC 14 (recommended) |
| | lessons | lessons | lessons |
| | ensemble | ensemble | ensemble |
| 2nd (soph) | MUSC 30A/L (group piano, MUSC 60, may be required; see courses 30A/L) | MUSC 30B/M | MUSC 30C/N |

General Examinations

All students majoring in the B.A. program are required to take the following examinations, which are discussed in greater detail in the *Music Student Handbook*.

Core Curriculum Placement Examination (a sample of the examination can be viewed at <http://music.ucsc.edu/undergrad>). Students are tested in the areas of theory, music literature, and ear training. Success on this exam (or a score of approximately 85 percent or higher on the final examination of Music 14) is a prerequisite to course 30A/L. Students should also take the examination to place out of course 13 or to place into course 14. The examination is given during fall quarter on the same day as the music orientation meeting. Transfer students who demonstrate acceptable competency on the placement examination may be recommended for advanced placement based on a further examination (including testing in keyboard and sight-singing skills).

Advisory audition. Students are required to take an advisory audition on their major instrument or in voice at the conclusion of course 30A/L.

Proficiency audition. Students are required to demonstrate at least an upper-intermediate level of proficiency on their major instrument or in voice before enrolling in course 100B.

Senior exit seminar. Students in the B.A. program are required to take the exit seminar (course 197), which encompasses material from all segments of the required curriculum.

Requirements for the Bachelor of Music

The bachelor of music degree (B.M.) is designed for those who intend to pursue a career in performance. Acceptance to the program is by audition during fall

quarter. These auditions are open to registered UCSC students only, although prospective students may submit a tape to the Music Department and ask to receive an informal opinion about their chances for acceptance into the major.

B.M. students major in an instrument or in voice. For the audition, students should prepare three pieces or movements of a contrasting nature from at least two different stylistic periods. (Two contrasting movements from the same sonata or concerto may count as two of the three required pieces.) Prospective students' optional tapes should also meet these specifications to receive an unofficial evaluation from the Music Department.

The requirements for the B.M. include courses 30A/L-B/M-C/N, 100A-B-C, 101A-B-C-D, 180A or 180B, and 196B. In addition, students are required to enroll in a minimum of 12 quarters of evaluated instrumental or vocal ensembles, as well as a minimum of 11 quarters of evaluated instrumental or vocal lessons. Transfer students must enroll in lessons and ensembles every quarter in residence. A senior recital (course 196B) is required in the final quarter. The music core curriculum placement examination (see above), or passing course 14 with a final examination score of approximately 85 percent or higher, is a prerequisite to course 30A/L. Basic keyboard skills are required as a component of the music theory curriculum; some students will need to take course 60, *Group Instruction in Piano*, concurrently with the course 30A/L sequence to achieve the appropriate level of skill. B.M. students take a jury examination in their major instrument or in voice at least twice a year and perform one piece in the regular UCSC student recital series at least once a year. In addition to these requirements, voice majors are required to take French 1, German 1, and Italian 1. For students who wish to concentrate in jazz, the following changes for the B.M. requirements apply: students will take Music 111B instead of 180A or B; Music 174 (*Jazz Improvisation*) is required and may replace one quarter of ensembles; Music 175 (*Jazz Theory*) is required.

The B.M. program differs from the B.A. program in requiring more credits in performance and slightly fewer in theoretical disciplines. B.M. students are not required to take course 120, 124, or 130. The senior exit requirement for B.M. students is a senior recital. To receive highest honors, B.M. students must also complete, on an excellent level, the *Senior Exit Seminar* (Music 197).

B.M. Four-Year Sample Study Planner for Students Concentrating in an Instrument

Note: It is typical of B.M. programs at all institutions to spread general education requirements throughout a student's four years to allow for early specialization. Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

| Year | Fall | Winter | Spring |
|---------------|----------------------------|--------------|--------------|
| 1st (frsh) | lessons (3) | lessons (3) | lessons (3) |
| | ensemble (2) | ensemble (2) | ensemble (2) |
| | gen ed/college core (5) | gen ed (5) | MUSC 14 (5) |
| | gen ed (5) | gen ed (5) | gen ed (5) |
| 2nd (soph) | lessons (3) | lessons (3) | lessons (3) |
| | ensemble (2) | ensemble (2) | ensemble (2) |
| | MUSC 30A (5) | MUSC 30B (5) | MUSC 30C (5) |
| | MUSC 30L (2) | MUSC 30M (2) | MUSC 30N (2) |
| | MUSC 60 (2)* gen ed (5) | gen ed (5) | gen ed |

| Year | Fall | Winter | Spring |
|-------------|---|---|---|
| 3rd (jr) | lessons (3) ensemble (2) MUSC 100A (5) gen ed/elective (2-5) | lessons (3) ensemble (2) MUSC 100B (5) MUSC 101A (5) | lessons (3) ensemble (2) MUSC 100C (5) MUSC 101B (5) |
| 4th (sr) | lessons (3) ensemble (2) MUSC 101C (5) gen ed | lessons (3) ensemble (2) MUSC 101D (5) gen ed/elective (5) | MUSC 196B (5) ensemble (2) MUSC 180A or B (5) |

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to Music 30A/L. (Current music majors frequently take 17–20 credits in this configuration of courses.)

Voice majors need to work closely with an adviser to schedule general education courses because of the added language requirements; a Summer Session may be necessary. It is recommended that voice majors take a language course each fall quarter during the first three years and that vocal repertory in that language be stressed throughout the academic year. For example, instead of enrolling in a general education course during the fall quarter of the first, sophomore, and junior years, a student concentrating in voice might enroll in Italian 1, German 1, and French 1, respectively.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in music is satisfied by completing courses 101B, 101C, and 101D.

Minors

Electronic Music

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition. A student may obtain a minor in electronic music by completing the following:

- any course in the 11 series;
- course 13 (may be satisfied through the music core curriculum placement examination);
- course 14 (or course 30A/L placement);
- courses 80C, 123, 124, 125, and two quarters of 167;
- one of the following: course 80L or 80R (or a similar music course that has a technical focus as approved by the department), or Film 171A or Theater Arts 114;
- one of the following: Physics 80A or 160; or Computer Science 5C, 5J, 5P, or 12A; or Electrical Engineering 70, 153, or 171

Jazz

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited

to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles. The required courses for the minor in jazz are the following:

- course 11A;
- course 14 (students not qualified to take course 14 must also take course 13 as a prerequisite);
- course 75 and 175;
- course 111B (students not qualified to take course 111B must also take course 11B);
- course 11C, 11D, 80J, or 80Q;
- five quarters of ensembles, including at least three quarters of the jazz ensembles (courses 3 and/or 164). At least two quarters must be upper-division. Students who repeat course 174 for credit can use the second and subsequent quarters of 174 to fulfill a portion of the ensemble requirement; used in this way, course 174 counts as a jazz ensemble;
- course 174 (may be repeated for credit).

Detailed information about the music majors and minors may be obtained from the Music Department office.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including course work, senior project (thesis or recital), or *Senior Exit Seminar* (Music 197). Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a (non-required) senior project and B.M. students must complete the (non-required) *Senior Exit Seminar*. Honors in all three areas—coursework, senior project, and *Senior Exit Seminar*—normally results in highest honors in the major.

Transfer Students

The Music Department encourages transfer students to take the core curriculum placement examination and seek academic counseling before transfer (a sample of the exam can be viewed at <http://music.usc.edu/undergrad/>). Transfer students who have some background in music theory normally test either into course 14 or into 30A/L (which is only offered in the fall quarter). Students who test into course 13 or 14 take one or both of these courses in their first year to prepare for 30A/L the following fall. Transfer students who have completed all of their general education requirements and who test into course 30A/L upon transfer may be able to complete the music major in two years.

B.A. transfer students should note that upon completion of course 100A, they need to perform on a musical instrument or voice at an upper-intermediate level. Prospective students wishing to have their performance skill level assessed by faculty in preparation for entry to the program are encouraged to send a tape for faculty review.

B.M. transfer students should prepare to audition in the fall quarter after enrollment. (For audition requirements, see the Requirements for the Bachelor of Music section above.) In certain cases, some or all of the applied music requirement may be waived based on prior coursework.

B.M. Sample Study Planner for Transfer Students Concentrating in an Instrument

This plan assumes that all general education requirements have been met. The music core curriculum placement examination generally places junior transfer students in Music 30A/L (which is only offered during fall quarter).

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Numbers of quarter credits are in parentheses.

| Year | Fall | Winter | Spring |
|-------------|---|---|--|
| 3rd (jr) | lessons (3) ensemble (2) MUSC 30A (5) MUSC 30L (2) MUSC 60 (2)* | lessons (3) ensemble (2) MUSC 30B (5) MUSC 30M (2) MUSC 101A (5) | lessons (3) ensemble (2) MUSC 30C (5) MUSC 30N (2) MUSC 101B (5) |
| 4th (sr) | lessons (3) ensemble (2) MUSC 100A (5) MUSC 101C (5) | lessons (3) ensemble (2) MUSC 100B (5) MUSC 101D (5) elective (5) | MUSC 196B (5) ensemble (2) MUSC 100C (5) MUSC 180A or B (5) |

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to Music 30A/L. (Current music majors frequently take 17–20 credits in this configuration of courses.)

A transfer student concentrating in voice could enroll in Italian 1 and German 1 in the fall and winter quarters, respectively, of the junior year, and in French 1 in the spring quarter of the senior year. Such a transfer student would complete any desired electives prior to arrival at UCSC and/or in Summer Session. However, transfer students should try to satisfy as many of the language requirements as possible before entering the program.

Individual Instruction

Lessons in the instruments listed below are available on a fee basis and by audition with the instructor. Depending on whether a student is pursuing a particular music undergraduate degree program (B.A. or B.M.), or a music minor, concurrent enrollment in an appropriate ensemble is required for a stipulated number of quarters. Consult the Undergraduate *Music Student Handbook* for details.

Authorization from the performance instructor is a requirement for entry into the music majors. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major.

Courses 61, 62, and 161 carry partial course credit. Each quarter of enrollment in course 61 is equivalent to 2 credits; each quarter of enrollment in course 62 or 161 is equivalent to 3 credits. Course 162, open to advanced students only, carries 5 credits.

Class instruction for partial credit (courses 60 and 63) is available on some instruments but may not be used to fulfill the individual lesson requirements for the major.

Bass: B. Green, S. Poplin

Bassoon: E. Irvine

Cello: V. Ruotolo

Clarinet: M. Brandenburg

Class Piano: E. Arulanantham

Flute: G. Ellison Wolfson

Guitar, classical: W. Coulter, M. Özgen

Harpichord: L. Burman-Hall

Horn: S. Vollmer
Oboe: P. Mitchell
Percussion: G. Marsh, W. Winant
Piano, classical: M. J. Cope, M. Ezerova, A. Leikin
Saxophone: P. Contos
Trombone and tuba: W. Solomon
Trumpet: R. Roper
Violin and viola: R. Malan
Voice: P. Maginnis, B. Staufenbiel

Performance Groups

The participants in some groups are selected by auditions open to the entire university community. Students receive two course credits for each quarter of enrollment in any of the ensembles.

University Orchestra: N. Paiement
University Concert Choir: N. Berman
Women's Chorale: Staff
Chamber Singers: N. Paiement
University Opera Theater: B. Staufenbiel
Opera Workshop: P. Maginnis, B. Staufenbiel
Early Music Consort: L. Burman-Hall, L. Miller, N. Treadwell
Chamber Music: Staff
Large Jazz Ensemble: R. Klevan
Small Jazz Ensembles: S. Poplin
Latin American Ensembles: staff
Contemporary Music Ensemble: A. Beal
West Javanese Gamelan: U. Sumarna
Balinese Gamelan: L. Burman-Hall
Wind Ensemble: R. Klevan
Classical Guitar Ensemble: Mesut Özgen
North Indian Music Workshop: D. Neuman, A. Khan
Eurasian Ensemble: T. Merchant

Graduate Programs

Master of Arts

The master of arts (M.A.) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

Requirements

A minimum of 60 course credits completed at UCSC is required for the degree. All M.A. students are required to complete Music 200, 201, and 202, as well as 252 during each quarter in residence (for students entering the program fall 2007 and thereafter).

Students with an emphasis in composition also complete Music 219, 220, and one 203 course.

Students with an emphasis in musicology/ethnomusicology or performance practice also select three courses from Music 203A-H (course 206D meets the requirement for one 203 course).

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Students with a composition emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (course 299); and they complete a full-length recital (course 298) of their compositional work.

Students with a musicology/ethnomusicology emphasis complete a thesis (course 299) and a short performance or lecture-recital related to the thesis (course 298).

Students with a performance practice emphasis complete a full-length recital (course 298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (course 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes each fall quarter, each incoming M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

Doctor of Musical Arts

The doctor of musical arts (D.M.A.) degree program in music composition has tracks in computer-assisted composition and world music composition. The track in computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. The track in world music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in coursework at UCSC will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 12 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in coursework at UCSC will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of twelve credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter.

Required courses include Music 200, 201, and 202 (students entering with a master's degree from another

institution may petition to waive one or more of these courses by submitting documentation for equivalent courses completed elsewhere). Students in the computer-assisted composition track complete Music 206B, one 203 course, and two quarters of 267 or another 206 course. Students in the world music composition track complete Music 206A, 203H, and 203G or another 206 course. All students are required to complete Music 219, 220, 252 each quarter in residence, and five quarters of enrollment in independent study, including Music 297, 298, and 299.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming D.M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

A D.M.A. student who entered the D.M.A. program with a bachelor's degree may apply for a M.A. degree, whether he/she is leaving the D.M.A. program or continuing toward completion of the D.M.A. degree, by fulfilling the following requirements:

- Completion of a minimum of five quarters at UCSC.
- Completion of a minimum of 35 graduate or upper-division course credits (including all courses required for the M.A. degree with an emphasis in composition).
- Successful completion of the qualifying recital (course 298).

Pre-qualifying Reviews

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess the student's progress in the program. In unusual cases, when progress has been minimal, faculty reserve the right to terminate a student's enrollment in the program. Typically, the half recital is satisfied by a combination of 1) participation in a concert of graduate-student compositions sponsored each April by Porter College and the Music Department, and 2) participation in a public reading of graduate-student final projects from course 220 at the end of spring quarter.

The Qualifying Recital

At the end of their second year of study, all students admitted to the D.M.A. program must present a half-recital (perhaps 35-40 minutes of music) representing their best work since entering the program. The D.M.A. qualifying recital will be evaluated by the student's primary adviser and by a second faculty member (generally a second composer) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted by the beginning of spring quarter one year before the scheduled qualifying examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's qualifying examination committee those areas of study that should be emphasized in the student's qualifying examination.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and year two for students entering with a master's degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of course work and the foreign language requirement, and the payment of the necessary fees.

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Final Examination

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the Dissertation Committee.

Doctor of Philosophy in Music

The doctor of philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing how musicology and ethnomusicology interact and complement one another. In addition to cultural approaches to world musics, the new program also encourages the integration of scholarly research with musical performance, emphasizing how performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Requirements

Students entering the Ph.D. program with a bachelor's degree are required to complete the following courses: Music 200, 201, 202, three courses from Music 253, three courses from Music 254, three courses from Music 203 (Music 206D) or a 254 course may each

substitute for one 203 course), Music 252 during each quarter of residence, and Music 299.

Students entering the Ph.D. program with a master's degree are required to complete following courses: three courses from Music 253 series, three courses from the Music 254 series, Music 252 during each quarter of residence, and Music 299.

Students entering the Ph.D. program are expected to have reading knowledge of a foreign language equivalent to at least one year of course work. In addition, students must acquire reading knowledge, equivalent to one year of coursework, of a second foreign language relevant to their area of interest during their first year of enrollment, or to demonstrate equivalent knowledge as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming Ph.D. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary course work may be needed, in addition to the courses listed above.

Ph.D. students entering the program with a bachelor's degree are required to submit a research paper by the beginning of the fourth quarter in residence, which will be revised that quarter under the supervision of the student's faculty adviser, and will be evaluated at the end of the quarter by the adviser and an additional faculty member. Students whose paper is assessed as unsatisfactory will not be allowed to continue in the Ph.D. program.

Students may devise a program of study that includes additional music courses, and courses from other disciplines suited to their special areas of concentration, in addition to the required courses.

Students who entered the Ph.D. program with a bachelor's degree may apply for the M.A. degree after completion of a minimum of five quarters in residence, the fourth-quarter research paper, and the following courses: 200, 201, 202, one course from 203A-H, and one course each from the 253 and 254 seminar series, and course 297.

Pre-qualifying reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student's adviser. However, if progress is minimal, faculty reserve the right to terminate a student's enrollment in the program.

Qualifying Examinations

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter they take their qualifying examination.

The examinations will normally be administered in year four for students entering with a bachelor's degree, and in year three for students entering with a master's degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign-language requirement, and the payment of the necessary fees.

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Final Examination

The final examination will be an oral defense of the dissertation open to the university faculty. Successful completion of this examination will be determined by a majority vote of the dissertation reading committee. Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department web site: <http://music.ucsc.edu/>.

Lower-Division Courses

1A. Women's Chorale (2 credits). *

Study of vocal and choral techniques in the context of ensemble rehearsals, often culminating in public performance. Repertoire to include varied works for treble choir, both a cappella and with instrumental accompaniment. Familiarity with basic music notation recommended. Some additional rehearsal time, both individually and with the group is required. Students are billed a materials fee. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

1C. University Concert Choir (2 credits). *

A study of selected works for mixed chorus, with emphasis on masterworks for chorus and orchestra, culminating in one or more public concerts. Familiarity with basic music notation recommended. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-E, A.) *The Staff*

2. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-E, A.) *N. Paiement*

3. Large Jazz Ensemble (2 credits). F,W,S

Instruction in performance in large jazz ensembles with written arrangements. Prepares a specific repertory for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *R. Klevan*

4A. Latin American Ensemble: "Voces" (2 credits). *

Instruction in diverse musical traditions, and their culturally-grounded performance contexts, of Native American, Ibero-American, and African American music cultures of Latin America, including texted music in Spanish and Quechua or other regional languages. The class forms an ensemble that prepares varying cultural and national repertoires for public performance. Some Spanish language

ability is recommended. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

4B. Latin American Ensemble: “Taki Ñan” (2 credits). *

Development of Latin American, Native American, Ibero-American, African American, and/or *Nueva Canción* (New Song) repertoire in a small ensemble setting. Three quarters of course 4A or previous enrollment in course 4B required prior to enrolling in this course. Admission by audition with instructor at first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 10. May be repeated for credit. (General Education Code(s): A.) *The Staff*

5A. West Javanese Gamelan Ensemble: Beginning (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5B. West Javanese Gamelan Ensemble: Intermediate (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5C. West Javanese Gamelan Ensemble: Advanced (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

6. Classical Guitar Ensemble (2 credits). *

Study of selected repertoire and instruction in performance for classical guitar ensemble. Ensembles for guitar and other instruments will prepare works for public performances both on and off campus. All students enrolled in individual guitar lessons are expected to enroll. Students of other instruments or voice may also audition. Some additional rehearsal time, individually and with the group, is required. Admission by audition with instructor prior to first class meeting. May be repeated for credit. (General Education Code(s): A.) *M. Ozgen*

8. Balinese Gamelan Ensemble (2 credits). *

Instruction in practice and performance of gamelan music from Bali and Indonesia, including ritual and new music. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Prerequisite(s): course 5A or 5B or 5C or 8 or 13 or 14, or by permission of instructor at first class meeting. May be repeated for credit. (General Education Code(s): A.) *L. Burman-Hall*

9. Wind Ensemble (2 credits). *

A study of selected advanced-level works for wind ensemble, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, A.) *R. Klevan*

10. Eurasian Ensemble (2 credits). *

Performing ensemble focusing on the vernacular and art musics of the Eurasian continent, with emphasis on Central Asia. Admission by instructor determination at first class meeting. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): PR-C, A.) *T. Merchant*

11A. Classical Music from the Middle Ages to the Present. F,S

A study of selected masterworks in relation to the periods which they represent. Emphasis upon the listening experience and awareness of musical style and structure. Illustrated lectures and directed listening. (Formerly *Introduction to Western Art Music*.) (General Education Code(s): IM, IH, A.) *A. Leikin, N. Treadwell, L. Miller*

11B. Introduction to Jazz. W

Designed to provide students with thorough and comprehensive background in history and roots of jazz as a musical style from its African roots to the present. Essential jazz styles and traditions are discussed through lectures, required listening, readings, lecture demonstrations, and film presentations. (General Education Code(s): IH, A, E.) *K. Hester*

11C. Introduction to American Popular Music. F

Survey of American popular music, from the beginnings of mass media to the late-twentieth century and beyond. Areas of focus will include early African-American styles (the blues, gospel and ragtime), vaudeville songs, a variety of immigrant traditions and folk movements, rock and roll, soul, R & B, hip-hop, and others. Musical experience helpful but not required. (General Education Code(s): IH, A.) *B. Carson*

11D. Introduction to World Music. S

Covers topics reflecting distinctive features of selected world music cultures. Introduces content, scope, and method of ethnomusicology. Focuses on understanding the musical styles, performance practices, and cultural functions of these musical traditions. Incorporates live class performance of selected music. (General Education Code(s): CC, IH, A, E.) *T. Merchant*

13. Beginning Theory and Musicianship I. W

Fundamentals of music and notation. Major, minor scales, intervals, triads, and inversions, root-position 7th chords, and the beginning harmonic analysis. Emphasis on the development of the ear and coordination. Exercises of pulse, rhythm, pitch, and coordination. Dictation and sight singing. Enrollment restricted to first-year students and sophomores; juniors and seniors admitted by permission of instructor. Enrollment limited to 60. *N. Treadwell*

14. Beginning Theory and Musicianship II. W,S

Continuation of course 13. Triads and 7th chords and their inversions. Introduces Church modes, melodic and harmonic analysis, four-part harmony, and keyboard harmony. Sight-singing, ear training, and dictation. Knowledge of musical notation and scales required. Students who wish to take this course and have not taken course 13 or the placement exam should consult the instructor. See the enrollment conditions section of the quarterly *Schedule of Classes*. Prerequisite(s): course 13 or music core curriculum placement exam. Enrollment priority given to students for whom course 14 or 30A is a requirement. Enrollment limited to 25. *L. Burman-Hall, B. Carson*

30A. Theory, Literature, and Musicianship I. F

Integrated musicianship, theory, and analysis. Species counterpoint and fundamentals of tonal harmony. Analy-

sis of literature from the Middle Ages and Renaissance. Ear-training, taught in smaller sections, emphasizes recognition of triad and dominant-seventh inversions, dictation of diatonic melodies, and aural analysis of simple diatonic interval and chord progressions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30L required. Prerequisite: admission by core curriculum placement examination or by passing course 14 with a final examination score of approximately 85 percent or higher. Enrollment limited to 60. *H. Kim*

30B. Theory, Literature, and Musicianship I. W

Integrated musicianship, theory, and analysis. Diatonic harmony and fundamentals of chromatic harmony and musical form, with an emphasis on early 18th-century styles. Ear-training, taught in smaller sections, emphasizes recognition of triad and seventh-chord qualities and inversions, dictation of moderately complex melodies and multi-voice chorales, and aural analysis of chord progressions including secondary functions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30M required. Prerequisite(s): course 30A; instructor determination at first class meeting. Enrollment limited to 60. *A. Leikin*

30C. Theory, Literature, and Musicianship I. S

Integrated musicianship, theory, and analysis. Chromatic harmony and large forms, with emphasis on late 18th- and early 19th-century styles. Ear-training, taught in smaller sections, emphasizes melodic and multi-voice dictation, as well as aural analysis of chord progressions, with materials including digressions, modulations, and advanced chromatic idioms. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Concurrent enrollment in course 30N required. Prerequisite(s): course 30B; instructor determination at first class meeting. Enrollment limited to 60. *A. Leikin*

30L. Theory, Literature, and Musicianship I Laboratory (2 credits). F

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, intervals, chords, rhythm) laboratory sequence illustrating topics covered in course 30A. Two 1-hour laboratory sessions per week. Concurrent enrollment in course 30A required; concurrent enrollment in course 60 also required for students without adequate prior keyboard training. Enrollment limited to 6. *H. Kim*

30M. Theory, Literature, and Musicianship I Laboratory (2 credits). W

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, single chords and progressions, rhythm) laboratory sequence illustrating topics covered in course 30B. Two 1-hour laboratory sessions per week. Prerequisite(s): course 30L; instructor determination at first meeting of course 30B. Concurrent enrollment in course 30B required. Enrollment limited to 6. *The Staff*

30N. Theory, Literature, and Musicianship I Laboratory (2 credits). S

Keyboard (score-reading, figured-bass, progressions, chorales) and musicianship (sight-singing, atonal melody, rhythm) laboratory sequence illustrating topics covered in course 30C. Two 1-hour laboratory sessions per week. Prerequisite(s): course 30M; instructor determination at first meeting of course 30C. Concurrent enrollment in

course 30C required. Enrollment limited to 6. *The Staff*

42. Student-Directed Seminar. *

Seminars taught by upper-division students under faculty supervision. (See course 192.) Students submit petition to sponsoring agency. *The Staff*

51. Vocal Repertoire Class (2 credits). F,W,S

The study and performance of vocal repertoire from 1400 to the present, including solo song, oratorio, opera, ensemble music. Emphasis is given to the development of effective performance skills, culminating in public performance. Attend first class meeting; concurrent enrollment in individual voice lessons with instructor of this course is required. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *P. Maginnis, B. Staufenbiel*

54. North Indian Music Workshop (2 credits). S

A course covering the music of North India taught using the oral traditions of Indian music. For beginners as well as more experienced students, this course is well suited for instrumentalists and vocalists. Interview; instructor determination at first class meeting. May be repeated for credit. (General Education Code(s): A.) *A. Khan*

60. Group Instruction in Piano (2 credits). *

Elementary instruction in piano technique, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Curriculum is coordinated with keyboard requirements of course 30L. Concurrent enrollment in course 30L is required. Students are billed a course fee. Prerequisite(s): Instructor determination at first class meeting. Enrollment limited to 8. May be repeated for credit. *E. Arulanantham*

61. Individual Lessons: Half Hour (2 credits). F,W,S

One-half hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

62. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

63. Group Instrumental and Vocal Lessons (2 credits). F,W,S

Elementary group instruction in instrumental (excluding piano) or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 6. May be repeated for credit. *The Staff*

75. Beginning Improvisational Theory. *

Studies in the modes, scales, chord alternations and extensions, chord voicings, chord progressions, and forms that underlie jazz improvisation, composition, and arranging in a variety of styles. (Formerly *Jazz Theory I*.) Prerequisite(s): course 14. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

80A. Music of the Silk Road. *

Exploration of the commonalities between music cultures found along ancient trade routes through Asia. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *T. Merchant*

80C. History, Literature, and Technology of Electronic Music. F

This survey of electronic music from previous centuries to the present studies the works and aesthetics of important composers, acoustics, musical perception, the effects of technological innovation on cultural evolution, and the development of synthesizers and computer music. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80F. Music in Latin American Culture: Regional Traditions. *

In-depth study of select music cultures of Mexico, Central America, and Caribbean, Brazil, Chile, Argentina, Colombia, and Peru. Characteristic regional genres, ensembles, instruments, and music rituals. Case studies by ethnomusicologists with expertise in specific regional musics. Also Latin American Nueva Canción, women's musics, and overarching themes in Latin American music, as a whole. Offered on a rotational basis with other non-Western courses in the 80 series. (General Education Code(s): T4-Humanities and Arts, A, E.) *The Staff*

80G. American Musical Theater. F

Surveys American musicals from operetta through rock musicals with a historical approach focusing on selected examples from the literature. Music reading or musical experience helpful but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80H. The Hollywood Musical. W

Introductory study of the Hollywood music film, exploring the theory of film sound, the musical genre, and representative works from the 1920s to the present. Students expected to view about two films each week, read assigned section of texts, and contribute to class discussions. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80I. Music of Modern Israel. W

Historical, musicological, and anthropological study of the many (and often conflicting) worlds brought together by Israeli popular and art music: Jewish and Arabic traditions, Western ideals, and modern beats. Enrollment limited to 40. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *A. Tchamni*

80J. American Folk Music. *

Surveys American folk music, both instrumental and vocal, by region and period. Approach is primarily through listening. Previous musical experience helpful, but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80L. Artificial Intelligence and Music. *

An introduction to basic concepts in music and artificial intelligence, and to algorithmic composition (composition by a set of explicit instructions, often using the computer). Other topics include basic introductions to related concepts in linguistics, mathematics, neural nets,

pattern matching, genetic algorithms, fuzzy logic, and interactive systems. Previous experience in one or more of these topics is helpful but not required. Students produce a project based on one of the models presented in class. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80M. Film Music. S

A survey of film music including a discussion of current trends and film composers. Techniques and styles of film music are explored through lectures, required listenings, readings, and viewing of relevant films. A musical background, including the ability to read music, is helpful but not necessary. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *N. Treadwell, D. Cope*

80N. Music of the Grateful Dead. *

In-depth exploration of the music of the Grateful Dead. Contextual study of the sociology and history of the late 1960s psychedelic movement supplies background for study of the music as the band evolved through time. Offered in alternate academic years. (General Education Code(s): IM, T4-Humanities and Arts, A.) *F. Lieberman*

80O. Music, Politics, and Protest. W

Examination of relationship between music, politics, and protest in the U.S. in the 20th century, with focus on how music commented upon and reflected different eras in American cultural and political life. (General Education Code(s): T4-Humanities and Arts, A.) *D. Neuman*

80P. History of Jewish Music. F

Survey of the diverse and rich musical traditions of Jewish music in the diaspora from biblical times to the present. Examines the historical, social, and anthropological aspects of the different communities from sacred music through art and popular songs. Enrollment limited to 40. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *A. Tchamni*

80Q. A Survey of African Music. *

Traces the various stylistic musical areas throughout the African continent and explores the development of traditional African music from antiquity into the 20th century. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A, E.) *K. Hester*

80R. Music and the World Wide Web. *

A survey of musical applications of the World Wide Web and the technologies they employ: tools for musical research, playback, composition, performance, and publishing. Historical perspectives and artistic ethics also discussed. Students prepare a creative project using software tools, techniques, sound sources available on the web, and learn how to publish the results on the web. Enrollment limited to 44. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80S. Women in Music. F

An exploration of the sociological position of women as composers and performers in Western and non-Western musics, with a focus on both ethnographic and historical sources. (Also offered as Feminist Studies 80S. Students cannot receive credit for both courses.) Offered in alternate academic years. (General Education Code(s): CC, T4-Humanities and Arts.) *T. Merchant*

80V. The Music of the Beatles. S

The most significant group in the history of popular music, the Beatles spanned the gamut of styles from

hard-edged R & B to sophisticated art-rock. This course explores their work in detail, in its own terms, and in the historical/cultural/technological contexts. Students cannot receive credit for both this course and course 180V in the same quarter. Course 11C is recommended but not required as preparation. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80X. Music of India. W

A survey course in Hindustani (North Indian) and Karnatak (South Indian) music covering the Raga (modal system) and Tala (metric system) as they have developed in the two traditions. Consideration is given to the historical development of the music, from Vedic chanting to the modern Raga system; social functions of the music throughout history; and instrumental and vocal forms with an emphasis on listening. (General Education Code(s): T4-Humanities and Arts, A, E.) *D. Neuman*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Admission requires approval of department. *The Staff*

99. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

100A. Theory, Literature, and Musicianship II. F

Tonal counterpoint and advanced tonal analysis. Techniques of 18th-century counterpoint and compositional practice. Advanced concepts in harmony, form, and the structure of melody in tonal music. Prerequisite(s): courses 30C and 30N and Piano Proficiency Exam. Enrollment limited to 20. (General Education Code(s): MF) *J. Sackett, B. Carson*

100B. Theory, Literature, and Musicianship II. W

Harmony and form in 19th- and early 20th-century music. Further techniques for the analysis of advanced tonal, chromatic, and post-tonal harmony. Study of larger forms, chromaticism, principles of development, and style elements unique to late romanticism and early modernism. Prerequisite(s): course 100A. Enrollment limited to 20. (General Education Code(s): MF) *The Staff*

100C. Theory, Literature, and Musicianship II. S

Theories and practices of 20th-century music. Survey of compositional principles in 20th-century music, with an emphasis on departures from tradition. Techniques of post-tonal, dodecaphonic, and serial composition; survey of post-war movements in composition and improvisation. Prerequisite(s): course 100B. Enrollment limited to 20. (General Education Code(s): MF) *D. Neuman, P. Nauert*

101A. History of Western Art Music. W

First quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Antiquity, Middle Ages, Renaissance. Prerequisite(s): course 30A. *L. Miller*

101B. History of Western Art Music. S

Second quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Baroque. Prerequisite(s): course 30B and satisfaction of the Entry Level Writing and Composition requirements. *N. Treadwell*

101C. History of Western Art Music. F

Third quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: Classical and Romantic. Prerequisite(s): course 30C and satisfaction of the Entry Level Writing and Composition requirements. *A. Beal*

101D. History of Western Art Music. W

Fourth quarter of a four-quarter detailed chronological study of Western art music from antiquity to the present. Coordinated lectures, readings, listening assignments, and analysis of representative works: twentieth century. Prerequisite(s): course 30C and satisfaction of the Entry Level Writing and Composition requirements. *A. Beal*

102. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment restricted to juniors and seniors. May be repeated for credit. (General Education Code(s): A.) *Y. Samet, N. Paiement*

103. University Concert Choir (2 credits). *

A study of selected works for orchestra, culminating in one or more public concerts. Prerequisite(s): admission by audition with conductor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *N. Berman*

111B. Seminar in Jazz Analysis. W

Analytic exploration of the evolution of "jazz" in America. The process involves independent listening, analysis, transcription, weekly seminar discussions, and oral presentation to students in course 11B. Prerequisite(s): course 30B and course 11B. Enrollment limited to 20. *K. Hester*

120. Seminar in Music Composition. W

Instruction in individual composition offered in the context of a group; composition in traditional large and small forms. Prerequisite(s): course 30C. Enrollment limited to 20. *H. Kim*

123. Electronic Sound Synthesis. W

Introduction to electronic music studio techniques, relevant electroacoustical studies, and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with an analog synthesizer; mixing, equalization, multitrack recording equipment, and other sound processing. Application form available at department office during last two weeks of the previous quarter. Preference given to music majors, students in the film/video major, and those with substantial musical experience. Prerequisite(s): instructor determination via application; course 80C; course 14 or course 30A placement. Enrollment limited to 25. *P. Elsea, D. Jones*

124. Intermediate Electronic Sound Synthesis. S

Composition with the use of small computers in the electronic music studio. Techniques covered include hybrid synthesis, digital synthesis, and MIDI-controlled systems.

No programming is involved, but basic computer literacy is helpful. Prerequisite(s): course 123. Enrollment limited to 25. *P. Elsea, P. Nauert*

125. Advanced Electronic Sound Synthesis. F

Continuing study in the electronic music studio, with concentration on compositional development. Includes advanced applications of skills developed in courses 123 and 124, expansion of background knowledge and relevant electroacoustical studies. Prerequisite(s): course 124. Enrollment limited to 25. *P. Elsea*

130. Orchestration. F

A study of the nature of each instrument of the orchestra. Scoring for various small instrumental combinations, culminating in a transcription for full orchestra. Prerequisite(s): course 30C. Enrollment limited to 20. *H. Kim*

159A. Opera Workshop (2 credits). F,W

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

159B. Opera Workshop (3 credits). F,W

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

160. University Opera Theater. S

A production workshop, culminating in one or more staged performances of an entire opera or selected scenes from the operatic repertory. Admission by audition with instructor prior to first class meeting; auditions usually take place in fall quarter. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

161. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

162. Advanced Individual Lessons: One Hour. F,W,S

One hour of individual instruction for advanced students. Study of repertory, technique, and performance practice. A minimum of 18 hours per week of individual practice and at least one 30-minute recital are required. May be taken three times for credit. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission

by juried audition. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

163. Early Music Consort (2 credits). F,W

A study of selected works for varied early music instrumental and vocal resources, culminating in one or more public concerts. Individual lessons are recommended in conjunction with consort work. Recommended for students who have instrumental or vocal competence and music literacy. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): PR-C.) *N. Treadwell*

164. Jazz Ensembles (2 credits). F,W,S

Instruction in combo performance and techniques of the jazz idiom. The class forms several ensembles that prepare a specific repertory for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *S. Poplin*

165. Chamber Music Workshop (2 credits). F,W,S

A study of selected works for various small combinations of instruments, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

166. Chamber Singers (2 credits). F,W

The study of selected works for small vocal ensemble from the 15th through 20th centuries, with performances on and off campus throughout the academic year. Students must have demonstrated vocal and music reading skills. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, A.) *N. Paiement*

167. Workshop in Electronic Music (2 credits). F,W,S

Continuing studio work in electronic music. Students carry out individual projects, meeting in weekly seminar to share problems and discoveries. Relevant advanced topics are covered, including new developments in the art. Prerequisite(s): course 124. Enrollment limited to 20. May be repeated for credit. *P. Elsea*

168. Contemporary Music Ensemble (2 credits). *

A study of selected works for various small combinations of instruments and voice, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *L. Miller, H. Kim, A. Beal*

174. Intermediate Jazz Improvisation. S

Develops basic skills through a range of advanced bop, quasi-modal and post-bebop styles—including selected free jazz and “avant-garde” repertoire. Prerequisite(s): course 75; audition with instructor at first class meeting. Enrollment limited to 20. May be repeated for credit. *K. Hester*

175. Jazz Theory II. *

Through transcription, analysis, and performance of “jazz” standards, composition, arranging, improvisation, and spontaneous creation explored. Students write a series of improvisations, short compositions, and arrangements

throughout the course. Prerequisite(s): courses 75, 100A, and 100B. Enrollment limited to 30. *M. Low, K. Hester*

180A. Studies in World Musics: Asia and the Pacific. S

In-depth ethnomusicological studies of selected music cultures of East Asia, Southeast Asia, and the Pacific. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B. Concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *T. Merchant*

180B. Studies in World Musics: Africa and the Americas. *

In-depth ethnomusicological studies of selected music cultures of sub-Saharan Africa and South and North America, including Native America. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B; concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *The Staff*

180N. Seminar on Music of the Grateful Dead. *

Detailed study of the Grateful Dead’s music, history, and sociology. Course 80N introduces the Dead to general students, but this course is for music majors or minors; non-majors who can read music; and Deadheads who have extensive touring/concert experience. Prerequisite(s): Course 11C (formerly 80H), or 80N, or equivalent experience. Admission by consent of instructor: personal interview before first class recommended. Students cannot receive credit for both this course and 80N in the same quarter. Enrollment limited to 30. *F. Lieberman*

180V. Seminar in the Music of the Beatles. S

Detailed study of the Beatles’ music. While course 80V introduces the Beatles to general students, this course is designed for music majors, music minors, students able to read music, or non-majors with strong knowledge of the Beatles’ repertory. Interview only; instructor determination at or before first class meeting. Prerequisite(s): course 11C or equivalent experience; basic knowledge of Beatles repertory. Students cannot receive credit for both this course and course 80V in the same quarter. Enrollment limited to 30. *F. Lieberman*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing and a proposal supported by a music faculty member willing to supervise required. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

196A. Senior Recital Preparation (without individual lessons). F,W,S

Prerequisite(s): juried audition or approved composition portfolio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196B. Senior Recital Preparation (with individual lessons). F,W,S

Students are billed a course fee. Prerequisite(s): juried audition. May be repeated for credit. *The Staff*

197. Senior Exit Seminar (2 credits). S

Designed for music majors in their final quarter. Focuses on music in social context while seeking to integrate knowledge from previous music courses in preparation of a series of analytical projects. *L. Miller*

199. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199E. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200. Introduction to Research Methods. F

Practical introduction to graduate study in music focusing on research methods, music sources and bibliography, techniques of scholarly writing, and critical readings in the discipline. Culminates in a public oral presentation on the model of a professional conference paper. *N. Treadwell*

201. History of Music Theory from the Greeks Through Rameau. *

Study and analysis of pre-tonal and tonal music from the Greeks through the 18th century. Course combines a history of theory with analyses that utilize contemporaneous theoretical concepts. (Formerly *Pretonal and Tonal Analysis*.) Enrollment restricted to graduate students. Offered in alternate academic years. *L. Miller*

202. Tonal and Posttonal Analysis. *

Encompasses various forms of linear analysis, set theory, and selected topics in current analytical practice. Offered in alternate academic years. *L. Miller*

203. Special Topics in Performance Practice. *

Investigation of primary and secondary sources of information about the culturally and historically accurate performance of music in various times and places. Undergraduates who have completed the appropriate course 101 courses may enroll in 203 courses by interview with the instructor. *The Staff*

203A. Performance Practice in the Middle Ages. *

A study of performance practices in medieval music from Gregorian chant to the 14th century. History of instruments and notation. Rhythmic interpretations of chant and a study of improvised practices in organum. Editing and performance of representative works. Offered on a rotational basis with other courses in the 203 series. *L. Miller*

203B. Performance Practice in the Renaissance. *

A study of performance practices in Renaissance music, including concepts of mode, *musica ficta*, ornamentation, text underlay, tempo, and articulation. Basic principles of white notation and a brief history of instruments. Transcription, editing, and performance of a Renaissance work. Offered on a rotational basis with other courses in the 203 series. *N. Treadwell, L. Miller*

203C. Performance Practice in the Baroque. F

An examination of historically informed performance practice techniques in Baroque music, with attention to aspects of ornamentation, articulation, figured bass realization, dance choreography, rhythm and tempo, and organology. In-class performances and editing of source materials are included. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall*

203D. Performance Practice in the Classic Period. *

Issues in performance practice focusing on selected topics and styles from the time of C.P.E. Bach through Haydn. Development of selected genres and ensembles, sources and editing, and interpretation and improvisation. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall*

203E. Performance Practice in the Romantic Period. W

Interpretation of music from Beethoven to Scriabin through examinations of both the musical texts (form, genre, harmony, texture, orchestration, etc.) and the period performance practices. Topics range from interpretative analyses of selected compositions to critical assessments of modern as well as documented 19th- and early 20th-century performances. Offered on a rotational basis with other courses in the 203 series. *A. Leikin*

203F. Performance Practice in the 20th Century. *

Projects in analysis, notational studies, extended instrumental techniques, and the aesthetics and performance practices associated with composers from Debussy to the present. Reading and listening focuses on the writings and performances of the composers themselves and upon interpretive writings by informed performers of 20th-century music. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *B. Carson, A. Beal, D. Jones*

203G. Concepts, Issues, and the Practice of Ethnomusicology. *

Ethnomusicological field methodology; vocal and instrumental performance practices as related to the ethnomusicological endeavor. Specific topics: philosophical paradigms, historical overview, and definitional issues of ethnomusicology; field research concepts and procedures; studies in instrumental and vocal performance practices of diverse cultures; selected writings of Charles Seeger; transcription and analysis issues; studies in micromusics. Offered on a rotational basis with other courses in the 203 series. *The Staff*

203H. Area Studies in Performance Practice. *

Intensive examination of the vocal and instrumental performance practices of living musical traditions of Indonesia, Latin America, or other regions. Topics may incorporate soloistic and ensemble traditions, secular and sacred traditions. Research rubrics include tuning, tone quality, performance posture and rhetoric, and improvisational and fixed patterns, as dictated by regional norms. May be repeated for credit in a different

area. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *J. Schechter, D. Neuman, H. Kim, L. Burman-Hall*

206A. World Music Composition. S

Studies in the history, structure, and cultural function of music from cultures as diverse as Global African, central European, Korean, Latin American, Indonesian, and Indian traditions. Examines ways in which composers such as Bartok, Anthony Braxton, Chou Wen-Chung, Lou Harrison, and Takemitsu sought and integrated such influences. Students choose to write critical and analytic essays on musics exhibiting diverse cultural influences, or to compose music that takes a vernacular or non-European music as a model for a compositional/improvisational approach. Enrollment restricted to graduate students. Enrollment limited to 12. May be repeated for credit. *K. Hester*

206B. Computer-Assisted Composition. *

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies. *D. Cope*

206D. Music Perception and Cognition. *

Investigations in the psychology of musical listening and awareness. Topics include time and rhythm perception, auditory scene analysis, pattern recognition, and theories of linguistics applied to harmony, melody, and form in the music of diverse cultures. Explores applications of the cognitive sciences to music transcription, analysis, composition, interpretation, and performance practice. Students apply existing knowledge in the cognitive sciences to a developing creative or analytical project, or develop and conduct new experiments. Enrollment restricted to graduate students. Enrollment limited to 16. May be repeated for credit. *B. Carson*

219. Techniques in Composition. F

Short compositional exercises incorporating diverse contemporary techniques with emphasis on problem-solving and development of compositional skills. Exercises focus on particular strategies for organizing and coordinating aspects of pitch, rhythm, timbre, and other musical dimensions, depending on interests of instructor and students. (Formerly course 219A.) Enrollment restricted to graduate students. May be repeated for credit. *D. Jones*

220. Graduate Seminar in Music Composition. W

Instruction in individual composition offered in the context of a group; composition in large forms of the 20th century with emphasis on techniques since 1950. May be taken by upper-division undergraduates for credit. Interview with instructor at first class meeting. Prerequisite(s): course 219. Enrollment limited to 16. May be repeated for credit. *H. Kim*

228. Techniques of Modernity and Aesthetic Formations. *

Explores the transformations and aesthetic possibilities of the digital age through a study of perceptual shifts of the past, from orality to literacy, gift to commodity, pre-colonial to colonial, "pre-modern" to "modern," and the technological revolutions that accompanied these shifts. (Also offered as Digital Arts and New Media 228. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 18. *D. Neuman*

252. Current Issues Colloquium (2 credits). E,W,S

An interactive colloquium featuring presentations by faculty, graduate students, and visiting scholars on research projects in composition, musicology / ethnomusicology, and performance practice, followed by focused discussion. Enrollment restricted to graduate students. Undergraduate students may enroll with permission of instructor. May be repeated for credit. *L. Burman-Hall*

253A. Pitch, Melody, and Tuning Systems. *

Focuses on pitch systems from Western and non-Western cultures, and on scholarly perspectives about them throughout the 20th and 21st centuries. Enrollment restricted to graduate students. Enrollment limited to 20. *T. Merchant*

253B. Rhythm, Time, and Form. W

Traditional and experimental rhythmic and temporal systems representing diverse cultures, with emphasis on unmeasured, divisive, additive, and multilayer practices in cultural context. Students examine rhythmic composition, improvisation, and rubato performance in selected cultures, including rhythmic notation and transcription systems. Prerequisite(s): course 200 or the equivalent, or consent of instructor. Enrollment restricted to graduate students. Enrollment limited to 10. *L. Burman-Hall*

253C. Music and Discourse. *

Addresses both song and musical performance as modes of discourse. For song: musical and textual phrase and verse structures and their interrelationships. For musical performances: musical performance as rhetoric and emblem. Enrollment restricted to graduate students. Enrollment limited to 5. *F. Lieberman*

253D. Issues in the Ethnography of Music. S

Explores ethnography—the description of culture—as it relates to musicology and ethnomusicology, particularly where "culture" and cultural production are historically dynamic and geographically porous. Examines music with sensitivity to such complexities of context, and the disciplinary points of reference from which cultural difference is calculated. Considers the ideological imprint of methodology on cultural analysis: how to study an unfamiliar music in a way that transcends the measure of "difference from the familiar," and, conversely, how to conduct an "objective" study of a familiar music. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Neuman*

254C. Performance Theory and Practice. *

"Performance" can describe activities in the arts, humanities, and social sciences. Recognizing the mappings of this concept, this course examines selected performances and performative behavior through theoretical and critical lenses. Emphasis is on investigating the act and practice of musical performance in multicultural context, and on analyzing scholarly writing as performative discourse. Enrollment restricted to graduate students. Enrollment limited to 10. *N. Treadwell*

254D. Organology and Acoustics. *

Comprehensive study of musical instruments including, but not limited to, physical and engineering concepts; theory and methods of description, analysis, systematic, and cultural classifications; physiology and performance techniques; cultural significance; anthropomorphic and zoomorphic symbolism; ritual usage; and more. Previous enrollment in introductory ethnomusicology course (e.g., course 11D) helpful, but not required. Enrollment by interview only, except music M.A. and Ph.D. students. Enrollment restricted to junior and senior music majors, electronic music minors, anthropology majors, or physics

majors, and graduate students. Enrollment limited to 15. *F. Lieberman*

254E. Asian Resonances in 20th-Century American and European Music. *

Explores the influence of Asian musics on Western composers from Debussy to Britten to American experimentalists such as Harrison, Cage, Riley, and Rudyard. Questions of cultural appropriation and originality are addressed through specific examples and critical readings. Enrollment restricted to graduate students. Enrollment limited to 10. *L. Miller*

254I. Empirical Approaches to Art Information. *

Reading and practice in empirical methods, as applied to the study of music, visual art, multimedia production, and performance arts. Topics include semiotics, critiques of empiricism, cultural determinants and contingents of perception, the psychophysics of information, sensory perception (visual and auditory), memory, pattern recognition, and awareness. Students apply existing knowledge in the cognitive sciences to a developing creative project, or develop and conduct new experiments. (Also offered as Digital Arts and New Media 254I. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 17. May be repeated for credit. *B. Carson*

254J. Jazz Historiography. *

Introduces the ways jazz history has been conceptualized, evaluated, and transmitted. Examines the social, intellectual, and cultural formations that have influenced this historiography. Considers the interdisciplinary project of "new jazz studies" in relation to established and alternative historical narratives. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

254K. Music, Gender, and Sexuality. F

Seminar focuses on musicological and ethnomusicological work incorporating feminist and queer theories published since the late 1980s. Cross-cultural approach to the examination of music, gender, and sexuality, drawing examples from both Western and non-Western traditions. Enrollment restricted to graduate students. Enrollment limited to 10. *T. Merchant*

254L. John Cage: Innovation, Collaboration, and Performance Technologies. S

In-depth examination of John Cage's interdisciplinary work, his pioneering activity in live electronic technology, and his influence in current multimedia creativity. Approximately one-half of the seminary is devoted to student research and creative projects and reflect Cage's legacy. (Also offered as Digital Arts and New Media 254L. Students cannot receive credit for both courses.) Enrollment restricted to juniors, seniors, and graduate students. Upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 12. *A. Beal*

254M. Music in San Francisco, 1850-1950. *

Explores San Francisco's musical life during the city's first century, including opera, symphony, Chinese music, musical theater, and other genres. Considerable emphasis on music and society, including issues of race. Enrollment restricted to graduate students. Enrollment limited to 15. *L. Miller*

261. Graduate Applied Instruction (3 credits). F,W,S

One hour of individual instrumental or vocal instruction for graduate students. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Students are billed a course

fee. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

265. Graduate Ensemble Participation (2 credits). F,W,S

Participation by graduate students in ensembles. Enrollment limit appropriate to the size of each ensemble. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

267. Workshop in Computer Music and Visualization (2 credits). F,W,S

Graduate-level techniques and procedures of computer music composition and visualization. Practical experience in the UCSC electronic music studio with computer composition systems and software, including visualization and interactive performance systems. Extensive exploration of music and interactive graphic programs such as Max/MSP/Jitter. Enrollment by permission of instructor; appropriate graduate experience required. Enrollment restricted to graduate students. (Also offered as Digital Arts and New Media 267. Students cannot receive credit for both courses.) Enrollment limited to 12. May be repeated for credit. *P. Elsea*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated once for credit. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study, creative work, or research for graduate students who have not yet begun work on their thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

298. Graduate Recital. F,W,S

A public performance in the student's primary area of interest, related to the thesis or dissertation project, under the supervision of a faculty member. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. *The Staff*

299. Thesis Research. F,W,S

A thesis consisting of a substantive and original creative or scholarly work, related to the graduate recital, under the supervision of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

For college description and list of faculty, see page 99.

Lower-Division Courses

10. Academic Success (2 credits). F

Provides opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources explored. Enrollment by permission of college adviser. *The Staff*

30. Thesis Writing and Editing (2 credits). S

Substantial writing and revision for a piece of writing relevant to a student's field. Focuses on academic research, documentation, editing, and revision. Enrollment restricted to junior and senior college members. Enrollment by permission of instructor. Enrollment limited to 20. May be repeated for credit. *R. King, M. Baker*

42. Student-Directed Seminar.

Seminars taught by upper-division Oakes students under faculty supervision. (See course 192.) *The Staff*

60. Oakes Literary Journal: Further Reflections on a Diverse Society (2 credits). W

For publication in an Oakes College literary journal, students significantly refine an essay from the fall quarter Oakes College core course. Course work includes consideration of a substantive text that engages core course themes and promotes the focus of the essay. Prerequisite(s): course 80A or 80B. Enrollment restricted to first-year students. Enrollment limited to 20. May be repeated for credit. *R. King, M. Baker*

63. Oakes Food, Community, and Culture (2 credits). F

Collaborative design of the Oakes Garden while participating in dinners and cafe-style discussions on the culture, community, and food system of Oakes College. Enrollment restricted to Oakes College members. Enrollment limited to 16. May be repeated for credit. *D. Shaw*

67. The Politics of Food: Labor and Social Justice (2 credits). S

Engages the themes of Oakes College (respect for diversity and social justice) and the interests of UCSC's Center for Agroecology and Sustainable Food Systems. Topics include the racial politics of food, farm labor, organic farming, and activism. Prerequisite(s): successful completion of college core course 80A, 80B, 80C, 80D, or 80H. Enrollment restricted to college members. Enrollment limited to 25. May be repeated for credit. *R. King, M. Baker*

70. Diverse Voices in Contemporary American Women's Poetry. S

Examines the work of contemporary American women poets representing a range of socioeconomic, sexual, cultural, and ideological identities. Discussion focuses on analysis and interpretation of poems. Students produce a portfolio of creative response work and analytical essays. Enrollment restricted to first-year students and sophomores. Enrollment limited to 20. *L. Knisely*

73. Poetry and Activism (2 credits). S

Examines poetry as a form of political activism. Students write, participate in workshops, and perform poems that address social-justice issues. Students also analyze

and interpret activist poems as models for the students' own writing projects. Enrollment restricted to college members. Enrollment limited to 25. May be repeated for credit. *L. Knisely*

75. Oakes Student Development and Leadership Theory (2 credits). S

Overview of theories, methods, applications, skills, and special topics focusing on college student development and leadership. Uses a variety of learning modes including lecture, discussion, case studies, small group interaction, and presentations. Interview only: see Oakes coordinator for residential education during spring enrollment period. Enrollment restricted to Oakes College members. Enrollment limited to 30. May be repeated for credit. *The Staff*

77. Exploring Opportunities for Social Justice Fieldwork (3 credits). W,S

Designed to promote social justice and diversity through community service experiences. Students are required to complete a 25-hour service project to be determined by individual course plans. Students will engage in/reflect upon social justice through community service, readings, and discussions. Prerequisite: Oakes 80 College Core Course. Enrollment limited to 20. *The Staff*

80A. Introduction to University Discourse: Communicating Diversity for a Just Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80B. (Formerly *Introduction to University Discourse: Values and Change in a Diverse Society*.) Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1, E.) *K. Lau*

80B. Rhetoric and Inquiry: Communicating Diversity for a Just Society. F

Explores intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80A. (Formerly *Rhetoric and Inquiry: Values and Change in a Diverse Society*.) Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2, E.) *K. Lau*

80C. Introduction to University Discourse: Communicating Diversity for a Just Society Writing Intensive 1. F

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. More writing-intensive than course 80A; prerequisite to course 80D. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. *The Staff*

80D. Introduction to University Discourse: Communicating Diversity for a Just Society Writing

Intensive 2. W

Continues to provide practice in analytical writing, critical reading, and speaking, and to examine issues relating to multiculturalism, diversity, and power. Prerequisite(s): course 80C. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): C1.) *The Staff*

80H. Rainbow Theater Cultural Studies. S

Introduction to multicultural theater and multicultural plays that aims to bring cultural awareness to all students interested in theater discipline. Students are required to read and critically analyze contemporary plays of color with emphasis on race and culture in contemporary American society. Enrollment limited to 40. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

93. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by lower-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. May be repeated for credit. *The Staff*

94E. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. *The Staff*

95. Directed Reading. F,W,S

Directed reading on selected topics in literature. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Individual study for lower-division students directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

112. Re/Presenting Identity. W

Examines culturally relevant texts that describe identity formation and representation in contemporary America. Investigates the work of authors who represent a wide range of cultural, racial, sexual, socioeconomic, and gender identities. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior college members. Enrollment limited to 20. (General Education Code(s): W.) *L. Knisely*

150. Gays and Lesbians in the United States. W

Examines the diverse social and cultural contexts in which gay and lesbian identities are constructed and expressed. Provides an overview of current themes in gay and lesbian history: the sex-gender system, sexuality and sexual identity, the coming-out experience, gay and lesbian subcultures, sexual roles, politics, legal recognition of relationships, religion, mental and physical health in the gay/lesbian community, and gay activism. Enrollment restricted to junior and senior Oakes College members. Enrollment limited to 30. *K. Simonton*

175. Imagining the Filipino Diaspora. S

Examines the relationship between gender, sexuality, and the nation in Filipino American and Philippine cultural production, including performance, film, and the Internet. Contextualizes Filipino American/Philippine cultural

production within a broader framework of the Filipino diaspora. Enrollment restricted to juniors and seniors. Enrollment limited to 20. (General Education Code(s): E.) *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Oakes; a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. If taking two or more such courses in any one quarter, must obtain approval of academic adviser. *The Staff*

195. Senior Thesis. F,W,S

Senior thesis related to college-sponsored individual majors. Students submit petition to sponsoring agency. Sponsoring faculty must be member of individual major committee. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

College-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, and approval by provost. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study for junior and senior members of Oakes College directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Ocean Sciences

Physical oceanography, numerical modeling of coastal- and basin-scale dynamics

MATTHEW D. MCCARTHY

Organic geochemistry, marine organic geochemistry, global biogeochemical cycles

Assistant Professor

SHARON E. STAMMERJOHN

Polar oceanography and climate; interdisciplinary approaches to understanding environmental and ecosystem response to climate variability

Adjunct Professor

KENNETH L. SMITH

Pelagic-benthic coupling in the abyssal Eastern North Pacific

RANDALL S. WELLS

Behavioral ecology and conservation biology of small cetaceans

Associate Adjunct Professor

JEFFREY D. PADUAN

Coastal ocean dynamics: surface currents, wave heights, wind and tidal forcing from high-frequency radar data

Assistant Adjunct Professor

MICHAEL BECK

Marine conservation, regional biodiversity planning, habitat restoration, marine proprietary rights

JOHN CARLOS GARZA

Population and ecological genetics of marine organisms

STEVEN H. HADDOCK

Ecology of bioluminescence and gelatinous zooplankton from blue-water and deep-sea environments

SEAN A. HAYES

Behavior, ecology, genetics, and population dynamics with a particular interest in salmon and pinnipeds

ROGER LININGTON

Marine natural products; drugs for neglected diseases; chemical biology; chemical probes

ALEXANDRA WORDEN

Mechanisms and controls of microbial population dynamics with an emphasis on carbon cycling in marine ecosystems

Lecturer

JOEL GOLDMAN

Phytoplankton ecology, microbial food chain dynamics

THOMAS GUILDERSON

Paleoceanography, tracer chemistry, carbon cycle, climate change

BALDO MARINOVIC

Plankton biology, Euphausiid (krill) population biology, zooplankton ecology, pelagic food web dynamics, climate change potential impacts on zooplankton and fisheries

ADINA PAYTAN

Biogeochemistry, paleoceanography, environmental and aquatic chemistry

COLLEEN REICHMUTH

Pinniped cognition and perception, including cross-modal

(auditory-visual) emergent learning in sea lions and behavioral and electrophysical assessment of hearing in several marine mammal species

SCOTT SHAFFER

Links between ecology, morphology, and physiological adaptations of marine vertebrates, particularly how animals use and allocate energy

Professor

GIACOMO BERNARDI (BIOLOGICAL Sciences)

Fish biology, phylogenetics, evolution

MARK CARR (BIOLOGICAL Sciences)

Marine ecology, applied marine ecology

DANIEL P. COSTA (Biological Sciences)

Physiological ecology of marine mammals and birds

PHILLIP CREWS (Chemistry)

Marine natural products chemistry, bioorganic chemistry, organic structural analysis by NMR, natural products of marine macro- and microorganisms

DONALD CROLL

Foraging ecology of marine birds and mammals, island conservation/ecology

ANDREW T. FISHER (Earth Sciences)

Hydrogeology, crustal studies, coupled flows, modeling

STANLEY M. FLATTÉ (Emeritus, Physics)

A. RUSSELL FLEGAL (Environmental Toxicology)

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

LAUREL R. FOX (Biological Sciences)

Terrestrial population and community ecology, plant-animal interactions

JAMES B. GILL (Earth Sciences)

Igneous petrology, geochemistry of island arcs

LYNDA J. GOFF (Emeritus, Biological Sciences)

GARY B. GRIGGS (Earth Sciences)

Coastal processes, hazards and engineering

BURNEY J. LEBOEUF (Emeritus, Biological Sciences)

MARC S. MANGEL (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

A. TODD NEWBERRY (Emeritus, Biological Sciences)

CHARLES L. (LEO) ORTIZ (Emeritus, Biological Sciences)

DONALD C. POTTS (Biological Sciences)

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

GRANT H. POGSON

Molecular population genetics, ecological genetics, marine invertebrates and fishes

PETER RAIMONDI (BIOLOGICAL Sciences)

Marine ecology, evolutionary ecology, experimental design, applied ecology

ELI A. SILVER (Earth Sciences)

Marine geology and geophysics, active tectonics, remote sensing

LISA SLOAN (EARTH Sciences)

Paleoclimatology, climate change, Earth system science, surficial processes

DONALD R. SMITH (Environmental Toxicology)

Neurotoxicity, cellular and organismal responses to environmental toxins

LINCOLN TAIZ (BIOLOGICAL Sciences)

Plant development, light regulation of stomatal opening

TERRIE M. WILLIAMS (Biological Sciences)

Vertebrate locomotor and thermoregulatory physiology; marine biodiversity; comparative vertebrate energetics, exercise physiology

JAMES C. ZACHOS (Earth Sciences)

Paleoceanography, Ocean Sciences

Program Description

The Ocean Sciences Department includes faculty and students involved in oceanography and other marine sciences and sponsors undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute, the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Laboratory, and others. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; plus sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, and many more.

Ocean sciences affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from polar regions to the tropics.

Undergraduate Programs

Although offering a range of undergraduate courses, the Ocean Sciences Department presently offers only graduate degrees. The undergraduate major in marine biology, sponsored by the Biological Sciences Departments, includes required and elective courses in ocean sciences; and there is an ocean sciences concentration in Earth

sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

Graduate Programs

The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in Ocean Sciences (master of science (M.S.) or doctor of philosophy (Ph.D.)) should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical science), or an equivalent background. If a student does not have a degree in one of these areas, the student must show their sponsor that they have taken the classes necessary to do their research. This preparation should normally include courses (prerequisites) in calculus, statistics, physics, chemistry, general biology or ecology, and geology for all majors (see below for the number of courses).

1 year of a calculus series

1 year of chemistry with laboratories

1 year of physics with laboratories

1 course in Earth sciences or geologic principles

1 course in biology

1 course in statistics or biostatistics for all majors

Ocean Sciences Ph.D. Degree Program

The program leading to a doctorate in ocean sciences is designed with a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines (biology, chemistry, Earth sciences, and physics) as chosen by the student and her or his advisers. The core training is provided through core courses in ocean sciences; a subset of which is taken by all students in the first two years and reinforced by the student's seminars throughout the program. In addition to core courses in ocean sciences, preparation includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent research credits, participation in departmental student seminar series, and a minimum requirement of two quarters as a teaching assistant. There is no formal language requirement.

The results of a scheduling meeting in the first quarter of enrollment are used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student; and courses are drawn from ocean sciences and other science departments (e.g., biology, chemistry, Earth sciences, physics). No later than fall quarter of their second year, students must take a departmental oral examination that tests knowledge of ocean sciences and general expertise in their parent discipline. An oral and a written qualifying examination are required, generally in the second or third year of

graduate study. A dissertation based on original research is required, and the final examination is a public oral defense of the dissertation. Students are encouraged to prepare their dissertation, or certain chapters of it, in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

- *Biological oceanography*

This area involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in the focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms. The focus is mainly on small oceanic life-forms (plankton and bacteria, molecular ecology) and their roles in the biogeochemical cycles of marine systems.

- *Chemical oceanography*

Chemical interactions of trace metals and radionuclides in the sea are the focus of this group. Research includes development of analytical techniques and measurement of trace species in seawater and investigation of the effects and interactions of trace elements on biological processes using analytical and isotopic approaches.

- *Geological oceanography*

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

- *Physical oceanography*

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Requirements for Ph.D. Students in the Ocean Sciences Department

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

1. Four core courses. These courses are expected to be completed in the first year of the program (and prior to taking the departmental examination) in the sequence listed below:

fall OCEA 200, *Physical Oceanography*
OCEA 280, *Marine Geology*

winter OCEA 220, *Chemical Oceanography*
spring OCEA 230, *Biological Oceanography*

2. A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis or supporting disciplines. These courses are chosen in consultation with the student's adviser and department graduate advising committee (a maximum of one course can be a graduate-level seminar (OCEA 290); at least two courses must be graduate or upper-division undergraduate lecture courses).
3. OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant.
4. Teaching experience satisfied by two quarters of teaching assistant experience in Ocean Sciences or supporting departments.
5. OCEA 293, a 2-credit *Graduate Research Seminar*, required to be taken each spring quarter by all Ph.D. students.
6. OCEA 292, attendance at the *Ocean Sciences Seminar* series each quarter of enrollment.
7. A minimum of three courses in *Thesis Research* (course 299) under direction of a sponsor. Each quarter in residence a student should take 15 credits of classes; students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.
8. Comprehensive departmental examination. This oral examination, covering material from the core courses, is usually taken at the beginning of a student's second year in the program. This examination must be completed successfully within two years of entering the program.
9. Pass the qualifying examination to advance to candidacy. This examination requires a written research proposal to be defended orally in front of the student's dissertation committee and is normally taken at the beginning of the third year of the program. This examination is expected to be completed successfully within three years of entering the program.
10. Ph.D. dissertation. The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's thesis committee. Chapters of the dissertation may be written in publication format, but must conform to university publication guidelines for submission.

Ocean Sciences Master's Degree Program

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The degree combines core courses and electives to provide depth and breadth in ocean sciences, with a focused thesis to provide experience in original research. Graduates from the program are excellently prepared to take research or management positions in organizations concerned with the marine environment, become educators, or enter doctoral programs in ocean sciences or related fields.

Whereas the doctoral program has an oceanographic orientation, the marine sciences master's program is even broader and has traditionally attracted many students in marine biology and ecology. As with the

doctoral program, students are encouraged to select a course of study and a research program that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Course Requirements for the Ocean Sciences Master's Degree

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

1. Complete three of the four core courses (one of which must be course 200, *Physical Oceanography*). Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. All four core courses are recommended. If taken, the fourth course counts as an elective.

| | |
|--------|--|
| fall | OCEA 200, <i>Physical Oceanography</i> |
| | OCEA 280, <i>Marine Geology</i> |
| winter | OCEA 220, <i>Chemical Oceanography</i> |
| spring | OCEA 230, <i>Biological Oceanography</i> |
2. A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis. These courses are chosen in consultation with an adviser and department graduate advising committee (only one of these can be a graduate seminar (OCEA 290); at least two must be lecture courses).
3. A minimum of three courses in *Thesis Research* (OCEA 299) under direction of a sponsor. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.
4. OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant
5. Teaching experience satisfied by one quarter of teaching assistant experience
6. Attendance at the *Ocean Sciences Seminar* series (OCEA 292) each quarter of enrollment
7. Complete a master's thesis, and present it at an open seminar.

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies (http://graddiv.ucsc.edu/student_affairs/).

Lower-Division Courses

1. The Oceans. F,W,S

An interdisciplinary introduction to oceanography focusing on biological, chemical, geological, and physical processes. Covers topics such as origins and structure of planet Earth and its oceans, co-evolution of Earth and life, plate tectonics, liquid water and the hydrologic and hydrothermal cycles, salinity and elemental cycles, ocean circulation, primary production and nutrient cycles, plankton and nekton, life on the sea floor, near shore and estuarine communities, future environmental problems our oceans face. Students may also enroll in and receive credit for Earth Sciences 1. (Note: General Education credit will not be granted for this course and Biology 80D.) (General Education Code(s): SI, IN, Q.) *C. Edwards, R. Kudela, M. McCarthy*

wards, R. Kudela, M. McCarthy

80A. Life in the Sea. F,W,S

The ecology of plants and animals in oceans and coastal areas. Consideration of life in various marine habitats, including the open ocean, rocky shores, estuaries, and the sea. Includes field trips. High school biology and chemistry courses are recommended prior to taking this course. (General Education Code(s): SI, T-2 Natural Sciences.) *The Staff*

80B. Our Changing Planet. F,W,S

Interdisciplinary scientific perspective on Earth system, focusing on human impacts on global environment. Introduces concepts of Earth system science and explores topics such as global warming, ozone depletion, pollution, deforestation, and future climate change. Prerequisite(s): high school chemistry course recommended. (General Education Code(s): PE-E, T2-Natural Sciences.) *S. Stammerjohn, M. McCarthy*

Upper-Division Courses

101. The Marine Environment. W

An introduction to the marine environment stressing the interaction of physical, chemical, and geological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. Prerequisite(s): Chemistry 1C and Mathematics 11B or 19B. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. *R. Kudela, S. Stammerjohn, A. Moore*

102. Oceans and Climate: Past, Present, and Future. S

An introduction to Earth's environment, particularly its oceanic and climatic components. Emphasizes interactions between chemical, physical, biological, and geological processes, and fundamentals of past, present, and future global environmental change. Provides backgrounds for specialized courses in oceanic or climatic change. Prerequisite(s): Chemistry 1C. *A. Ravelo*

118. Marine Microbial Ecology. S

The study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions, and flows of material and energy in marine food webs. Exams and term paper required. Students cannot receive credit for this course and Ocean Sciences 218. Prerequisite(s): Biology 20C or 21C, and Chemistry 1C. *J. Zehr*

120. Aquatic Chemistry: Principles and Applications. F

An integrated study of the chemical behavior of natural waters with an emphasis on both principles and applications. Topics include chemical equilibrium, kinetics, acids/bases, oxidation/reduction, complexation, solid dissolution and precipitation, and reactions on solid surfaces. Prerequisite(s): Chemistry 108B or 112C. *K. Bruland*

124. Aquatic Organic Geochemistry. W

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 224. Prerequisite(s): basic college chemistry (Chemistry 1B, 1C); at least one quarter of college level organic chem-

istry required (e.g., Chemistry 7). *M. McCarthy*

130. Biological Oceanography. S

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and Ocean Sciences 230. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to juniors (with instructor approval), seniors, graduate students. *R. Kudela*

172. Geophysical Fluid Dynamics. S

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Taught in conjunction with course 272. Students cannot receive credit for this course and course 272. (Also offered as Earth Sciences 172. Students cannot receive credit for both courses.) Prerequisite(s): Physics 107; Mathematics 22 or 23B recommended. Offered in alternate academic years. *C. Edwards*

199. Independent Study. F,W,S

Students submit petition to sponsoring agency. *The Staff*

Graduate Courses

200. Physical Oceanography. F

Introduction to the physics of the ocean-atmosphere system. Structure of the ocean and atmosphere. Energy balance and radiative transfer. Atmospheric circulation; weather and climate. Physical properties of seawater, air-sea interaction, mixing, water masses, ocean circulation, waves; CO₂ and global change. Designed for beginning graduate students in ocean sciences and upper-division science majors. Calculus and physics recommended as preparation. *A. Moore*

211. Climate Dynamics. W

Introduction to the dynamics of the Earth climate system. Topics: climate system components; the global energy balance; radiative transfer; the hydrological cycle; general circulations of the atmosphere and ocean; El Niño; the North Atlantic Oscillation; the Pacific Decadal Oscillation. Enrollment restricted to graduate students. Undergraduates may enroll by permission of instructor. Previous courses in calculus and ocean sciences or earth sciences are recommended. *A. Moore*

213. Biogeochemical Cycles. F

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time. (Also offered as Earth Sciences 213. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant discipline are recommended. *M. Delaney*

215. Predicting the Atmosphere, Ocean, and Climate. *

Introduction to the theory and practice of operational prediction in meteorology, oceanography, and climate. Topics: observations and estimation theory; dynamic

adjustment and initialization; estimation theory; data assimilation; forecast verification; predictability; ocean state estimation; seasonal forecasting. Enrollment restricted to graduate students. Undergraduates may enroll with instructor approval. Courses 200, 264, Earth Sciences 272, or equivalents are recommended. *A. Moore*

218. Marine Microbial Ecology. S

Recent developments in the study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions and flows of material and energy in marine food webs. Exams and research paper required. Students cannot receive credit for this course, course 118, and Biology 171. Biology 20C and Chemistry 1C recommended. *J. Zehr*

220. Chemical Oceanography. W

A chemical description of the sea; emphasis on the chemical interactions of the oceans with the biosphere, atmosphere, and lithosphere. Topics include biogeochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Course designed for graduate students; available to upper-division science majors. *M. McCarthy*

224. Aquatic Organic Geochemistry. W

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 124. *M. McCarthy*

230. Biological Oceanography. S

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and course 130. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to graduate students. *R. Kudela*

260. Introductory Data Analysis in the Ocean and Earth Sciences. *

Introduces data analysis methods regularly encountered within the ocean and earth sciences. Topics include: error propagation; least squares analysis; data interpolation methods; empirical orthogonal functions; and Monte Carlo methods applied to problems drawn from oceanographic and earth sciences datasets. Introduces and uses a high-level computing and visualization package, MATLAB. Student project consists of analysis of the student's own dataset. (Formerly course 264, *Ocean Data Analysis*) (Also offered as Earth Sciences 260. Students cannot receive credit for both courses.) Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment restricted to graduate students; undergraduates with permission of instructor. *C. Edwards*

272. Geophysical Fluid Dynamics. S

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Students cannot re-

ceive credit for this course and course 172. (Also offered as Earth Sciences 272. Students cannot receive credit for both courses.) Physics 227 is recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *C. Edwards*

280. Marine Geology. F

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; introduction to paleoceanography. Students cannot receive credit for this course and Earth Sciences 102. Enrollment restricted to graduate students. *M. Delaney*

285. Past Climate Change. *

Reviews the fundamentals of climate dynamics and explores how Earth's environment is a product of the interaction of its components. Uses examples of climate change from historical and geologic records, and from predictions of the future. Recommended for junior, senior, and graduate students in the sciences. *A. Ravelo*

286. Introduction to Ocean Modeling. *

Fundamental concepts and ideas that underpin numerical modeling of the ocean. Topics include numerical methods and solutions of partial differential equations (PDEs), ocean circulation, wave dynamics, ocean ecosystem model, and MATLAB programming. Enrollment restricted to graduate students, or to seniors by permission of instructor. *A. Moore*

290. Proseminar.

Special topics in marine sciences to be offered from time to time by professors and staff members. *The Staff*

290A. Topics in Chemical Oceanography. S

A weekly seminar series covering recent developments in chemical oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *K. Bruland*

290B. Topics in Biological Oceanography. *

Explores different problems of special interest in biological oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *M. Silver*

290C. Topics in Marine Geochemistry. W,S

Selected topics in geochemistry. Discussion of theoretical models, different approaches, and recent research. Topics vary from year to year. May be repeated for credit. *M. Delaney*

290D. Topics in Marine Microbiology. *

A weekly seminar series covering topics in environmental microbiology. Topics vary from year to year, and will include research in ecology, methodology, biochemistry and physiology of bacteria. Emphasis on the role of bacteria in biogeochemical cycling from microzone to global scales, with particular focus in marine systems. May be repeated for credit. *J. Zehr*

290E. Topics in Climatic and Oceanic Change. F

Weekly seminar series covering recent developments in climatic and oceanic change. Different topics and approaches stressed from year to year. Prerequisite(s): interview with instructor prior to first class meeting. May be repeated for credit. *A. Ravelo*

290G. Topics in Physical Oceanography. S

Weekly seminar series covering topics in physical oceanography as well as biological-physical interactions in the oceans. Different topics and approaches stressed from year to year. Enrollment restricted to graduate students; under-

graduates may enroll with permission of instructor. May be repeated for credit. *S. Stammerjohn*

290H. Topics in Ocean Optics. *

Examines recent developments and application of bio-optics to the marine environment, including theory, instrumentation, and remote sensing. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to graduate students; senior undergraduates with permission of instructor. May be repeated for credit. *R. Kudela*

290J. Topics in Marine Organic Geochemistry. *

Examines recent developments in uses of organic geochemistry to trace oceanographic and biogeochemical processes. Focuses on introduction to organic biomarkers, current literature, and evolving applications. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in ocean sciences and organic chemistry are recommended. Enrollment restricted to graduate students; seniors with instructor's permission. May be repeated for credit. *M. McCarthy*

292. Seminar (no credit). F,W,S

Weekly seminar on various topics attended by faculty, graduate, and upper-division undergraduate students. *The Staff*

293. Graduate Research Seminar (2 credits). W

Weekly seminar series covering a spectrum of topics in oceanography. Designed for Ph.D. program graduate students in ocean sciences and those in biology, Earth sciences, chemistry, and physics with research interests in oceanography. Enrollment restricted to graduate students. May be repeated for credit. *M. McCarthy*

296. Teaching in Ocean Sciences (2 credits). F

For new and/or relatively inexperienced graduate students in pedagogy of ocean sciences. Role and responsibilities of teaching in ocean sciences described and developed. Includes discussions about effective teaching methods; hands-on issues for work in the laboratory; university expectations; and regulations regarding teaching, organizational strategies, time management, and working with instructors and staff. Prerequisite(s): graduate standing or permission of instructor. Enrollment restricted to graduate students. *C. Edwards*

297. Independent Study.

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency. *The Staff*

299. Thesis Research.

Students submit petition to sponsoring agency. *The Staff*

Philosophy

Cowell College
(831) 459-2070
<http://philosophy.ucsc.edu>

Faculty and Professional Interests

Professor

W. EMMANUEL ABRAHAM, Emeritus

DAVID C. HOY, Distinguished Professor, Emeritus

S. PAUL KASHAP, Emeritus

CARLOS G. NOREÑA, Emeritus

RICHARD E. OTTE

Philosophy of religion, formal epistemology, philosophy of science, philosophical logic

PAUL A. ROTH

Philosophy of social science, philosophy and sociology of science, epistemology, history of analytic philosophy, philosophy of history

ELLEN KAPPY SUCKIEL, Emerita

RICHARD A. WASSERSTROM, Emeritus

Associate Professor

JONATHAN ELLIS

Philosophy of mind, epistemology, philosophy of language, Wittgenstein

ROBERT A. GOFF, Emeritus

DANIEL GUEVARA

Kant, moral philosophy, moral psychology, environmental ethics, history of modern philosophy

Assistant Professor

JOHN F. BOWEN

Ancient philosophy, especially ancient science and metaphysics, and contemporary analytic metaphysics

ABRAHAM D. STONE

History of 20th-century philosophy (continental and analytic), 19th-century continental philosophy, philosophy of science, metaphysics, and medieval philosophy

RASMUS G. WINTHER

Philosophy of science, epistemology, metaphysics, philosophy of biology, American pragmatism, Latin American philosophy, evolutionary theory

Lecturer

JOCELYN HOY

Feminist philosophy, 19th- and 20th-century continental philosophy

Professor

KAREN M. BARAD (Feminist Studies)

Physics, feminist philosophy, philosophy of science, cultural studies of science, and feminist theory

SANDRA CHUNG (Linguistics)

Syntax, semantics, Austronesian languages

JEROME NEU (Humanities)

Philosophy of mind; emotions, culture, and insults; philosophy of law; Freud and psychoanalytic theory

Program Description

Philosophy inquires into assumptions about and theories of the most basic facets of rational thought, e.g., what to believe (epistemology), what is (metaphysics), what to value (morality). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, "philosophy" names not only an historically defined subject matter, but also inquiry into any of the fundamental determinants of all forms of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers all the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy. The department also offers a major in philosophy with a concentration in religious thought.

Philosophy prepares students for many careers as well as for most professional schools, including law. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Major Requirements

Courses

Eleven courses are required: two at the introductory level, two in the history of philosophy sequence (100A, 100B, 100C), and seven additional upper-division courses (including one advanced seminar). For some of the lower-division required courses, students may petition to substitute courses taken at other institutions. These 11 courses must meet the following distribution requirements:

Introductory. Course 9 and at least one of courses 11, 22, 24, 28, or any Philosophy 80 course;

History of philosophy. Two of 100A, 100B, or 100C (all three strongly recommended for students who anticipate graduate work in philosophy). Taking any two from the sequence Philosophy 100A, 100B, and 100C will satisfy the Disciplinary Communication (DC) requirement.

At least seven additional courses numbered 100A and above, one of which must be an advanced seminar numbered 190. Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these seven additional courses. Courses 195A, 195B, and 199 also cannot be counted among these seven additional courses. All upper-division courses must be completed at UCSC unless a petition for an exception is approved by the undergraduate program adviser.

In order to be a philosophy major, courses must be satisfied in the following sequence. Before being eligible to enroll in any course in the history sequence (Philosophy 100A-100C), a student must have completed all required introductory courses, e.g., Philosophy 9 and at least one from Philosophy 11, 22, 24, 28, or any 80-sequence course. Before being eligible to enroll in any philosophy course above Philosophy 100C, prospective majors must have taken at least one of the required history of philosophy courses (e.g., either Philosophy 100A, 100B, or 100C). Transfer students wishing to major in philosophy should consult with the Philosophy Department undergraduate adviser as soon as possible.

Disciplinary Communication Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement in philosophy is met by completing any two from the sequence Philosophy 100A, 100B, and 100C.

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course. In addition to Honors in an advanced seminar, graduating seniors with a distinguished record of achievement in their philosophy courses may be awarded Honors or Highest Honors in the philosophy major. Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at

UCSC. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UCSC. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Minor Requirements

A minor in philosophy consists of any nine of the 11 courses required for the major. At least five of these must be upper-division. There is no senior exit requirement for the minor.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (course 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (course 195B), but only if the writing requirements for course 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite introductory courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department sponsors workshops in the fall quarter for students contemplating graduate school in philosophy.

Philosophy Major with Concentration in Religious Thought

This program is for students who wish to use the discipline of philosophy as a basis for pursuing an interest in religious thought. It consists of an individually planned sequence of at least four courses dealing with religious thought, supplementing a core of courses in philosophy. Admittance into the program requires consultation with the faculty director of the concentration and approval by the department undergraduate adviser. A sequence of upper-division courses is needed to fulfill the religious thought concentration. Students should plan to meet with the director and the undergraduate adviser at least once a year to discuss their progress.

To major in this concentration, the student petitions the department through the normal major declaration process by the established campus quarterly deadlines.

Course Requirements

Fourteen courses are required: two introductory philosophy courses; two in the history of philosophy sequence; six upper-division philosophy courses; and four courses in the area of religious thought.

These 14 courses must meet the following distribution requirements:

Introductory. Course 9 and at least one of 11, 22, 24, 28, or any Philosophy 80 course.

History of Philosophy. Philosophy 100A (*Ancient Greek Philosophy*) and either Philosophy 100B (*The Rationalists*) or Philosophy 100C (*The Empiricists*).

Upper-Division and/or Graduate Courses. Six five-credit philosophy courses at UCSC, including one advanced seminar (190 series), and excluding Philosophy 199. These courses must include three advanced courses in philosophy of religion: either Philosophy 170 (*Interpretation of Religion*) or Philosophy 171 (*Faith*

and Reason), and two other upper-division or graduate courses that involve philosophy of religion. The director of the concentration in religious thought will determine which philosophy courses count as involving philosophy of religion.

Concentration in Religious Thought. Four courses in the area of religious thought from programs on campus such as anthropology, literature, history, history of art and visual culture, philosophy, psychology, and sociology. The director of the concentration in religious thought must approve these courses.

Transfer Students. Students can petition the department for credit in the major for coursework done elsewhere. In general, equivalent introductory courses in philosophy may be substituted for UCSC philosophy introductory courses. One upper-division course taken at another four-year university may also be substituted by petition—submit a syllabus and supporting material from the class to the Philosophy Department office (Cowell 220). Only courses for which the student has received a B or better grade will be accepted for the major. The requirement of three upper-division or graduate philosophy of religion courses cannot be substituted with courses taken elsewhere; they must be taken at UCSC.

Graduate Program

The Department of Philosophy conceives of philosophy as a broad and inherently cross-disciplinary enterprise. The department has a particular emphasis in philosophy of science, broadly conceived. This embraces a wide range of topics, including those questions of value and normativity that naturally arise in connection with policies and applications of science and technology. Graduate students are able as well to take advantage of a wide range of courses in the history of philosophy, including ancient, early modern, Kantian, 19th-century, continental, American, and the history of 20th-century philosophy (analytic, continental, and combined). In addition to philosophical questions concerning science and in the history of philosophy, faculty research has also focused recently on metaphysics, epistemology, the philosophy of mind, the philosophy of language, moral philosophy, moral psychology, environmental ethics, the philosophy of religion, philosophical logic, and the philosophy of history.

Both the master of arts (M.A.) and the doctor of philosophy (Ph.D.) programs encourage interaction with other fields.

Graduate Program Requirements

Breadth Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. In addition to Philosophy 201, *First Year Seminar*, students must take at least one course in the area of metaphysics and epistemology and one course in the area of value theory according to a list determined annually by the graduate committee. During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic. For further details, see the graduate program statement on the department's web page or consult with the department's graduate adviser.

Ph.D. Program

The Ph.D. program provides students with closely monitored training in philosophy. The program is

designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

Courses. A minimum of 12 graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Language requirement. The foreign language will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate committee.

Qualifying examination. Near the end of the required coursework, doctoral students will develop a research project. The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Dissertation. The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research.

M.A. Program

Applications to the M.A. program are welcomed from talented students with diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one or two years.

Courses. A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Languages. There is no foreign language requirement for M.A. students.

Master's paper. By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's paper, which will normally be defended orally before a committee of two faculty members.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online at <http://grad-div.ucsc.edu>. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650. Visit the web site at <http://philosophy.ucsc.edu>.

Lower-Division Courses

9. Introduction to Logic. E3

A study of correct reasoning, concentrating on developing the skills necessary to distinguish logically correct from logically incorrect arguments. The emphasis is on modern symbolic logic, although the traditional theory of the syllogism is also covered. (General Education Code(s): MF, IH, Q.) (F) *J. Bowin*, (S) *The Staff*

11. Introduction to Philosophy. F

An introduction to the main areas of philosophy through critical reflection on and analysis of both classical and contemporary texts. Focuses on central and enduring problems in philosophy such as skepticism about the external world, the mind-body problem, and the nature of morality. (General Education Code(s): TA, IH.) (F) *J. Neu*

22. Introduction to Ethical Theory. W

A consideration of ethical issues and theories focusing on the foundation of moral value and the principles governing character and behavior. Designed to extend and develop the student's abilities in philosophical reasoning about ethics. (General Education Code(s): IH.) *The Staff*

24. Introduction to Ethics: Contemporary Moral Issues. *

An examination of the conceptual and moral issues that arise in connection with such topics as abortion, racism and war and violence, world hunger, humans and their interactions with the nonhuman environment. The readings are drawn from recent philosophical articles on these topics. (General Education Code(s): IH.) *The Staff*

26. Existentialism and After. *

A survey of recent movements in European thought, such as phenomenology, existentialism, hermeneutics, critical theory, continental feminism, and poststructuralism, with some attention to their 19th-century precursors. Selections from major philosophical treatises are supplemented with literary works. (General Education Code(s): IH.) *The Staff*

28. Environmental Ethics. *

This course is an introduction to the moral issues raised by our interactions with nonhuman animals and with the rest of the natural environment. The course will relate traditional moral theories to contemporary literature on the ethics of nature conservation and environmental protection. The course is intended as a first course in philosophy as well as a first course in ethics; therefore, questions concerning the nature of philosophical inquiry and the ways in which philosophical inquiry is different from inquiries conducted within other disciplines will also be addressed. (General Education Code(s): IH.) (FWS) *The Staff*

80E. Latin American Philosophy. W

Is there a general school of philosophy endemic to Latin America? Would it have to appeal to quintessential Western philosophical questions regarding knowledge, values, and reality? If not, why not, and would it then still count as philosophy? What difference do ethnic and national diversity, as well as strong political and social inequality, make to the development of philosophical questions and frameworks? Course explores a variety of historically situated Latin American thinkers who investigate ethnic identity, gender, and socio-political inequality and liberation, and historical memory, and who have also made important contributions to mainstream analytical and continental philosophy. (Also offered as Latin American and Latino Studies 80E. Students cannot receive credit for both courses.) (General Education Code(s): T4-Humanities and Arts, E.) *R. Winther*

80F. Philosophical Puzzles, Paradoxes, and Conundrums. *

Many philosophical problems have origins in puzzles and paradoxes. One of the most famous is Zeno's paradox of motion. Among others are paradox of the heap (Sortes paradox), Newcomb's puzzle (puzzle about rational decision making), Problem of the Many (problem about material objects), and Liar paradox (paradox for semantics). Over long history of philosophy, many such puzzles and paradoxes have been discovered; some have been solved,

and others have yet to be solved. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80G. Bioethics in the 21st Century: Science, Business, and Society. *

Serves science and non-science majors interested in bioethics. Guest speakers and instructors lead discussions of major ethical questions having arisen from research in genetics, medicine, and industries supported by this knowledge. (Also offered as Biomolecular Engineering 80G. Students cannot receive credit for both courses.) (General Education Code(s): PE-T, T6-Natural Sciences or Humanities and Arts.) *The Staff*

80L. Life, Logic, and Learning. *

Develops students' thinking and intellectual know-how in three ways of practical value to them: 1) the basic principles of logical thinking—standard rhetorical maneuvers, common fallacies of probability, features of persuasive argument, etc.; 2) stronger skills for approaching learning activities through hands-on practice with strategies from learning sciences; 3) exploration, in a personal yet academically rigorous way, of the difficult "life" questions that preoccupy many students: What should I do after college? What makes for a happy and fulfilling life? (General Education Code(s): T4-Humanities and Arts.) *J. Ellis*

80M. Philosophical Foundations of Science Studies. *

Provides a philosophical perspective concerning the revolution in the understanding of science that generated the so-called "science wars." Introduces the changed philosophical understanding of science shared and presupposed in the fields of science, technology, and society. (Formerly Science and Society.) (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *P. Roth*

80S. The Nature of Science. *

A survey of what philosophers have said about the nature of science and scientific change. Emphasis is placed on whether science is best characterized as the gradual accumulation of truth or whether truth is irrelevant to scientific change. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *R. Ortt*

99. Tutorial. F,W,S

The Staff

Upper-Division Courses**100. Vienna Circle and American Philosophy. ***

Study of philosophical movement called the Vienna Circle, named so chiefly for intellectual excellence of its members, but also for external historical reasons. Course pays careful attention to intercultural aspects of ideas of the Vienna Circle: intellectual climate under which these ideas were formed, how thoughts of its members found an echo outside of Austria, and how they made a lasting influence on philosophical thinking in England and in U.S. *The Staff*

100A. Ancient Greek Philosophy. F

Survey of ancient Greek philosophy of the Classical and Hellenistic periods. Begins with Socrates and the pre-Socratics, then undertakes an intensive study of Plato and Aristotle. Course then surveys the main developments that follow: Epicureanism, Stoicism, and Scepticism. (Formerly course 91.) (General Education Code(s): W satisfied by taking this course and either course 100B or 100C.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *J. Bowin*

100B. The Rationalists. W

A study of the historical background and the present relevance of Descartes, Spinoza, and Leibniz. (Formerly

course 93.) (General Education Code(s): W satisfied by taking this course and either course 100A or 100C.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *A. Stone*

100C. The Empiricists. S

A critical study (based on original texts) of Locke, Berkeley, and especially Hume on the nature of knowledge, perception, causation, morality, religion, and political society. (Formerly course 94.) (General Education Code(s): W satisfied by taking this course and either course 100A or 100B.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *D. Guevara*

106. Kant. S

Intensive study of Kant's philosophy, particularly his epistemology and metaphysics developed in his Critique of Pure Reason. Prerequisite(s): course 100A or 100B or 100C. Enrollment limited to 70. *A. Stone*

107. Nineteenth-Century Philosophy. W

A study of some European philosophers of the 19th century, with particular attention to Hegel, Schopenhauer, and Nietzsche. (Formerly course 108.) Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

108. Phenomenology. *

French phenomenology includes primarily the work of Jean-Paul Sartre, Simone de Beauvoir, and Maurice Merleau-Ponty. Additional topics include the nature of consciousness and agency. Course includes discussion of French feminists' reactions to Simone de Beauvoir and Emmanuel Levinas. Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

109. Poststructuralism and After. *

The three major poststructuralist philosophers are Michel Foucault, Jacques Derrida, and Gilles Deleuze. After studying their rejection of phenomenological accounts of consciousness and agency—as well as their program for studying power, bio-power, multiplicity, difference, and repetition,—current critics, such as Slavoj Žižek and Judith Butler, are also read for contrast between the methods of phenomenology, genealogy, and critical theory. Prerequisite(s): course 100A or 100B or 100C. *D. Hoy*

110. Heidegger. *

A close study of early and late texts by Martin Heidegger, especially Being and Time. Prerequisite(s): course 106 or 107 or 108 or 109 or 111. Enrollment limited to 45. *D. Hoy*

111. Continental Philosophy. *

Study of recent work in continental philosophy. Topics vary. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to junior and senior philosophy majors. *W. Godzich*

112. American Philosophy. *

Study of classical American philosophers, specifically Emerson, Peirce, James, and Dewey, with emphasis on their views of metaphysics, epistemology, ethics, and philosophy of religion. Some attention is also paid to recent pragmatic tendencies in American philosophy. Prerequisite(s): course 100A or 100B or 100C. *R. Winther*

113. The Origins of Analytic Philosophy. *

An examination of the beginnings of analytic philosophy, with primary interest in the reformulation of traditional philosophical problems by Frege, Russell, and the early Wittgenstein. Some attention is also paid to the development of Vienna Circle logical positivism (Schlick, Carnap, Waismann). Prerequisite(s): course 100A or 100B or 100C. Enrollment limited to 39. May be repeated for credit. *P. Roth*

114. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 214. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

115. Formal Methods in Philosophy. *

Study of formal methods commonly used in analytic philosophy. Emphasis is on developing the technical tools to enable one to read and do modern analytic philosophy. Applications of various formal tools to philosophical problems will also be discussed. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

116. Logic, Sets, and Functions. *

Introduction to basic set theory, recursive definitions, and mathematical induction. Provides a bridge between course 9 and courses 117 and 119. Strong emphasis on proving theorems and constructing proofs, both formal proofs and proofs in the customary, informal style used by mathematicians. Prerequisite(s): course 9; and two from courses 100A, 100B, and 100C. *J. Bowin*

117. Non-Classical Logic. *

Investigation of non-classical logic. Several propositional non-classical logics, such as various modal logics, multi-valued logics, and relevance logics studied. Meta-theoretic results, including soundness and completeness, investigated for each logic studied. Prerequisite(s): course 9, and course 100A or 100B or 100C. Enrollment limited to 40. (S) *The Staff*

119. Intermediate Logic. F

Detailed treatment of the semantics of first order logic and formal computability. Completeness, undecidability of first order logic and Lowenheim-Skolem results also proven. Nature and formal limits of computability and introduction to incompleteness also investigated. Students cannot receive credit for this course and course 219. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

120. Philosophical Writing. *

Training in philosophical thinking and its expression in written form. Prerequisite(s): course 91 or 93 or 94; and satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to philosophy majors. Enrollment limited to 54. (General Education Code(s): W.) *The Staff*

121. Knowledge and Rationality. S

An investigation of modern theories of knowledge, justification, and rationality. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

122. Topics in Metaphysics. W

Topics vary each quarter, and may focus on one or more sub-fields of metaphysics, e.g., philosophy of time, philosophy of persistence, etc.; or the course may be taught as a general survey of metaphysics. Prerequisite(s): course 9, and course 100A or 100B or 100C. *J. Bowin*

123. Philosophy of Language. *

Current theories of the nature and preconditions of language, the nature of meaning, and the nature of truth. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. Enrollment limited to 82. *J. Ellis*

125. Philosophy of Science. S

An examination of various topics that arise in thinking about science. Different philosophical problems, such as realism, instrumentalism, confirmation, explanation, space and time, and rational decision making are exten-

sively discussed and criticized. Prerequisite(s): course 100A or 100B or 100C. *R. Winter*

126. Philosophy of Social Sciences. *

Examines philosophical concerns regarding the methods and assumptions of the social sciences. For example, must the methods of the social sciences differ in some important ways from those used by the natural sciences? Another issue concerns problems arising from studying groups where the very notion of rationality appears to vary from culture to culture or over historical periods. Prerequisite(s): course 91 or 93 or 94. *P. Roth*

127. Philosophy of Biology. *

Can developmental processes be reduced to gene expression? Does the history of life exhibit trends (e.g. increasing complexity)? How are we to understand key concepts such as "fitness," "species," "adaptation," and "gene?" Is there such a thing as human nature? Course surveys these and other core philosophical topics in the biological sciences. Prerequisite(s): course 100A or 100B or 100C; satisfaction of Entry Level Writing and Composition requirements. Enrollment limited to 39. (General Education Code(s): W.) *The Staff*

133. Philosophy of Mind. *

Focuses on philosophical questions, both historical and contemporary, concerning the relation between body and mind. Particular attention is given to whether consciousness can be totally explained in physical terms. Prerequisite(s): course 100A or 100B or 100C. *J. Ellis*

135. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 235. Prerequisite(s): course 100A or 100B or 100C, or by consent of instructor. Enrollment restricted to sophomores, juniors, and seniors. *The Staff*

137. Practical Rationality. *

Examines challenges to what has been a dominant understanding of practical rationality: the claim that reason can never guide action in itself; that acting against one's better judgment is necessarily irrational; that emotions disrupt rather than facilitate practical reasoning. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

138. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three time periods: early, middle, and late. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to junior and senior philosophy majors. *J. Ellis*

139. Freud. *

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Psychology 163. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. Offered in alternate academic years. *J. Neu*

140. History of Ethics.

A careful study of any one or a number of select primary texts in the history of moral philosophy, with some emphasis on the relation to contemporary issues. Prerequisite(s): course 100A or 100B or 100C. *D. Guevara*

141. Epistemology and Cognition. *

Epistemology is preoccupied with skepticism, the view that knowledge is unobtainable. Recently, there has been skepticism voiced about the status of epistemology itself; philosophers conversant in cognitive science suggest that epistemology is beset with dubious presuppositions. We survey epistemology, cognitive science, and their interface. Students cannot receive credit for this course and course 241. Prerequisite(s): course 91 or 93 or 94. Enrollment restricted to junior and senior philosophy majors. *The Staff*

142. Advanced Ethics. W

An examination of central issues in ethical theory including the nature of and justification for the moral point of view, the place of reason in ethics, the status of moral principles, and the nature of moral experience. Prerequisite(s): course 22, 24, or 28, and course 100A or 100B or 100C. *D. Guevara*

144. Social and Political Philosophy. *

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Also offered as Legal Studies 144. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. Offered in alternate academic years. *The Staff*

145. Brave New World: Ethical Issues in Genetics. *

Study of ethical issues involved in recent and upcoming advances in genetic research and technology such as genetic engineering, cloning, human embryo research, genetic experimentation, use of an individual's genetic information, and the manipulation of human evolution. Also discusses fundamental issues such as the moral responsibility of scientists, our obligations to future generations, and the notion of human perfectibility. Prerequisite(s): course 100A or 100B or 100C. *E. Suckiel*

146. Philosophy of Law. W

Exploration of selected problems in jurisprudence: "legal reasoning" and social policy, rules and individual cases, the mental element in the law, punishment and responsibility, causation and fault, liberty and paternalism, etc. (Also offered as Legal Studies 146. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. *J. Neu*

147. Topics in Feminist Philosophy. *

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship. (Also offered as Feminist Studies 168. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

148. The Holocaust and Philosophy. *

By using the historiography of the Holocaust as a case study, examines the epistemology and ontology of historical knowledge, i.e., how the past is known, and what about it there is to know. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to juniors and seniors. *P. Roth*

150. Moral Aspects of Decision Making. *

How should you act when any course of action would contradict the rules of morality? This situation is "the question of dirty hands." It is connected to the doctrine of double effect: the claim that although willing evil as a means to some good result is always wrong, it is permissible to cause evil as a side effect while aiming at a

good result. Discussions include practical issues, such as democracy's combat against terrorism; and theoretical issues, such as the difference between action and omission, and the connection between goodwill and good (or bad) results. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. *The Staff*

151. Modern Theories of Justice. *

Questions of social and distributive justice are as ancient as Aristotle; yet, modern philosophy, with its developing notions of democracy and quality, has added much sophistication and subtlety to these questions, especially since the publication of John Rawls' *A Theory of Justice* (1971). Issues discussed include: personal relations, concept of community, the notion of the State, and global justice. Prerequisite(s): course 91 or 93 or 94; or consent of instructor. *The Staff*

152. Aesthetics. *

Problems about form, meaning, and interpretation in art, as found in major aesthetic theories from the philosophical tradition, and also in a variety of encounters between recent philosophy and the arts. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. (General Education Code(s): A.) *The Staff*

153. Philosophy of Race. *

Topics include conceptual-analytical and political-social issues. Selected topics may include: the ontology of race; race as real or constructed; scientific understandings of race; race and identity; and color-blind versus color-sensitive theories of justice and political policy. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. *The Staff*

154. Philosophy in Literature. *

Story, drama, and poetry considered as sources of philosophical perspective or as particular challenges to philosophical interpretation. Also, discussion of literary and imaginative elements in philosophical writing. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

170. The Interpretation of Religion. *

A study of different philosophical responses to religious belief and practice, from the classical "proofs" of religion, to skeptical critiques of religious experience, to conceptual issues in the interpretation of religious texts. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

171. Faith and Reason. F

Recent work in analytic philosophy of religion, concentrating on traditional theism. Topics include arguments for and against the existence of God, religious experience, miracles, the relation of faith and reason, and problems such as freedom and divine foreknowledge. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

180R. Readings in Philosophy (2 credits). F

Discussion-based course centered on readings in contemporary philosophy. Readings change each term and are a mixture of books, chapters from books, and articles. Readings are primarily in analytic philosophy, and student input is strongly encouraged. Prerequisite(s): One philosophy course. Enrollment by permission of instructor. Enrollment limited to 20. May be repeated for credit. *R. Otte*

190. Advanced Seminar.

190A. Topics in Ancient Greek Philosophy. W

Topics will vary each quarter and will focus on a major ancient Greek philosophical figure or work. Prerequisite(s): two from courses 100A, 100B, and 100C; or consent of instructor. Enrollment restricted to junior and senior

philosophy majors. Enrollment limited to 12. May be repeated for credit. *J. Bowin*

190C. Advanced Topics in Contemporary Ethics. *

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Humean ethical theory. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 290C. Prerequisite(s): course 140 or 142; and two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 22. May be repeated for credit. *D. Guevara*

190D. Kant's Moral Theory. F

A careful study of Kant's moral theory, with an emphasis on the Groundwork for the Metaphysics of Morals, the Critique of Practical Reason, and the Metaphysics of Morals. Recent secondary sources are considered as well. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *D. Guevara*

190E. Major Figures in 19th-Century Philosophy. W,S

Focuses on philosophical writings and the significance of a single figure in 19th-century philosophy. May include, but not be limited to, Emerson, Hegel, Kierkegaard, Marx, Schopenhauer, Nietzsche, and Thoreau. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. May be repeated for credit. *A. Stone, J. Hoy*

190F. Topics in Philosophy of Biology. S

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course gives advanced seniors an overview of many diverse topics currently under discussion in modern philosophy and biology and provides a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for this course and course 290F. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to juniors and seniors. Enrollment limited to 15. May be repeated for credit. *R. Winther*

190G. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three periods: early, middle, and late. Topics covered include writings from one or more periods. Students cannot receive credit for this course and course 290G. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 22. *J. Ellis*

190J. Advanced Topics in the History of Ethics. *

A careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *D. Guevara*

190L. The Emotions. W

Analysis of particular emotions (e.g., jealousy, boredom, regret) and exploration of general theoretical issues (e.g., expression, control) with emphasis on moral psychology. Satisfies seminar requirement. Admission by interview with instructor. Prerequisite(s): two from courses 100A, 100B, and 100C; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 23. (General Education Code(s): W.) *J. Neu*

190M. William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Prerequisite(s): two from courses 100A, 100B, and 100C; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. (General Education Code(s): W.) *E. Suckiel*

190N. Philosophy of Religion. *

An examination of recent work in philosophy of religion. The approach may vary between an analytic and continental approach in different years. Topics might include the rationality of belief in God, religious epistemology, hermeneutics, and religious experience. Prerequisite(s): course 171 and two from courses 100A, 100B, and 100C. Enrollment limited to 20. May be repeated for credit. *R. Otte*

190O. Topics in Epistemology. *

An examination of recent work in epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. (Formerly *Epistemology*.) Prerequisite(s): course 9; and two from courses 91, 93, and 94. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *R. Otte*

190P. Major Figures in Contemporary Philosophy.

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot receive credit for this course and course 290P. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. May be repeated for credit. *A. Stone*

190Q. Philosophy of Mathematics. *

Introduction to problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? Examines the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for this course and course 290Q. Prerequisite(s): course 9; and two from courses 91, 93, and 94; and Mathematics 19A or 20A, or AP score of 4 on the BC exam, or Mathematics Placement Exam score of 40. Enrollment limited to 15. *A. Stone*

190S. Philosophy of Science. F

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction. Students cannot receive credit for this course and course 190S. Prerequisite(s): course 9, and course 100A or 100B or 100C; satisfaction of Entry Level Writing and Composition requirements; enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): W.) *R. Otte*

190T. Advanced Feminist Philosophy. *

Focuses on issues in epistemology and ontology: the construction of knowledge and objectivity, rationality and emotions, subjectivity and personal identity, and the body and sexuality. (Also offered as Feminist Studies 194J. Students cannot receive credit for both courses.) Prerequisite(s): course 147 or Feminist Studies 100; and two from courses 100A, 100B, and 100C. Enrollment limited to 20. *J. Hoy*

190U. Conceptual Schemes. S

Reference to "conceptual schemes" has become commonplace in and out of the philosophical literature. Course examines the philosophical foundations for talk about conceptual schemes and the philosophical and historical arguments that frame and make plausible such discussions. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *P. Roth*

190V. Hermeneutics. *

Intensive study of the tradition of philosophical hermeneutics, which is concerned with the theory of understanding and interpretation. Readings drawn from Martin Heidegger, Hans-Georg Gadamer, and possibly Paul Ricoeur. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment limited to 12. *D. Hoy*

190W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings will be selected from some of the following: Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Students cannot receive credit for this course and course 290W. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 10. *D. Hoy*

190X. The Good Life. F

Study of alternative conceptions of the elements of a good life, including topics such as courage, loyalty, devotion to ideals, personal flourishing, commitment to a community or tradition, spiritual enlightenment, integrity, compassion, and intellectual understanding. Also covered are fundamental questions such as the meaning of life, the relationship of "living right" to "living well," and the role of feelings in the justification of action. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to junior and senior philosophy majors. Enrollment limited to 20. *J. Ellis*

190Y. Insults and Intentions. *

The schoolyard wisdom about "sticks and stones" does not take one very far: insults not only take the form of words, and even words have effects. What kind of injury is an insult? Is it infliction determined by the insulter or the insulted? What does it reveal of the character of each and of the character of society and its conventions? What is its role in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Philosophical, anthropological, psychoanalytic, and legal approaches to the questions are emphasized. Students cannot receive credit for this course and course 290Y. (Formerly Insults and Intentions.) Prerequisite(s): two from courses 100A, 100B, and 100C; and satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Enrollment limited to 22. (General Education Code(s): W.) *J. Neu*

195A. Senior Essay. F,W,S

Preparation of senior essay (approximately 25 pages) during one quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Essay. F,W,S

Under exceptional circumstances, a second senior essay continuing the work of the first essay is permitted but only when the first senior essay has been completed. Students submit petition to sponsoring agency. *The Staff*

199. Tutorial. F,W,S

May be repeated for credit. *The Staff*

199F. Independent Study (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses**201. First Quarter Seminar. ***

First quarter required course for philosophy graduate students. Introduces the work of the philosophy faculty members to the new graduate students. Helps new students form a cohort. Each week different faculty members will visit the class and discuss materials of their own as well as materials or topics that they study. Enrollment restricted to graduate philosophy majors. *P. Roth*

202. Topics in Ancient Greek Philosophy. *

Topics will vary each quarter and will focus on some major ancient Greek philosophical figure or work. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *J. Bowin*

214. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 114. Enrollment restricted to graduate students. *R. Otte*

219. Intermediate Logic. *

Natural deduction and semantics of first order predicate logic. Metatheory, including completeness theorems for propositional and predicate logic. Students cannot receive credit for this course and course 119. (Formerly course 217.) Prerequisite(s): course 9. Enrollment restricted to graduate students. Enrollment limited to 40. (S) *The Staff*

222. Metaphysics. *

Advanced introduction to topics in 20th century and contemporary analytic metaphysics. Divided into five main parts dealing, respectively, with issues about the nature of existence, properties, time, change and persistence, and material constitution. Students cannot receive credit for this course and course 122. Enrollment restricted to graduate philosophy majors. Enrollment limited to 10. *A. Stone*

223. Recent European Philosophy. *

Seminar on recent developments in European philosophy, with particular attention to German theorists such as Nietzsche, Heidegger, Gadamer, Horkheimer, Adorno, or Habermas. Theorists such as Sartre, Merleau-Ponty, Derrida, Foucault, Bourdieu, Levinas, Laclau, or Vattimo may be read as well. (Also offered as History of Consciousness 223. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

224. Philosophy of Language. *

Advanced introduction to issues in the philosophy of language—primarily concerning the nature of reference, meaning, and truth. Works from such 20th-century figures as Russell, Wittgenstein, Kripke, Lewis, and Putnam discussed. Topics include what it is for a sign or a bit of language to be meaningful, or for it to identify or represent something; what it is for a statement to be truthful; what it is to be a language; and how reference works when attributed to beliefs. Cannot receive credit for this course and course 123. Enrollment restricted to graduate philosophy majors. Enrollment limited to 10. *The Staff*

226. Scientific Reason. W

Addresses traditional questions of truth, reason, knowledge, practice, and "what there is" in a new way. It is not

about what we find out, but about how we find out: how our ways of finding out have come into being at different points in the past; what they have done to our conceptions of the world; and why they enable us to remake the world. Enrollment restricted to graduate students. Enrollment limited to 22. *I. Hacking*

231. Metaphysics and Epistemology. F

Focuses on topic or topics in metaphysics and/or epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. Topics might include one or more of causation, possible worlds, identity, necessity, time, realism, universals, and existence. Enrollment restricted to graduate philosophy students. Enrollment limited to 22. *J. Ellis*

232. Advanced Topics in Value Theory. *

Considers topics central to philosophical questions about value: ethics, normativity, practical reason, relativism, skepticism, responsibility, motivation, emotion, and so forth. In some instances, the investigation will proceed through influential historical figures, ancient to modern. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *D. Guevara*

233. Seminar in Philosophy of Mind. *

Focuses on topics in the philosophy of mind. Topics may include consciousness, mental content, the mind-body problem, and mental causation. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *J. Ellis*

235. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 135. Prerequisite(s): One course in philosophy, psychology, or linguistics. Enrollment restricted to graduate students. *The Staff*

237. Making Up the Mind. *

How does the mind come to be a thing which science can study? Readings focus on how diagnostic categories, for example, multiple personality disorder, attain scientific cachet and what issues surround the "medicalization" of the mind. Enrollment restricted to graduate students. *P. Roth*

239. Philosophy of Religion. *

Investigation of various topics in philosophy of religion. Enrollment restricted to graduate philosophy majors. May be repeated for credit. *R. Otte*

240. The History of Ethics. *

Compares and contrasts two famous ethical works: Aristotle's *Nicomachean Ethics* and Kant's *Groundwork for the Metaphysics of Morals*. Traditionally, Aristotle and Kant are thought to offer opposing views of good action and good agents. Closely compares their ethical principles and arguments for these principles in order to understand each philosopher in his own terms, as well as to determine whether this traditional characterization is accurate. Students cannot receive credit for this course and course 140. Enrollment restricted to graduate philosophy majors. *The Staff*

241. Epistemology and Cognition. *

Epistemology is preoccupied with skepticism, the view that knowledge is unobtainable. Recently, there has been skepticism voiced about the status of epistemology itself; philosophers conversant in cognitive science suggest that

epistemology is beset with dubious presuppositions. We survey epistemology, cognitive science, and their interface. Students cannot receive credit for this course and course 141. Enrollment restricted to graduate philosophy majors. *The Staff*

245. Brave New World: Ethical Issues in Genetics. *

Ethical issues in genetic research and technology, including genetic engineering, cloning, stem cell research, uses of genetic information, and manipulation of human evolution. Also considers the moral responsibility of scientists, obligations to future generations, and the concept of human perfectibility. Students cannot receive credit for this course and course 145. Enrollment restricted to philosophy graduate students. *E. Suckiel*

247. Stem Cell Research: Scientific, Ethical, Social, and Legal Issues. *

Scientific, ethical, social, and legal dimensions of human embryonic stem-cell research, including the moral status of the embryo; the concept of respect for life; ethical constraints on oocyte procurement; creation of embryonic chimeras; federal policies; and political realities. (Also offered as Biology: Molecular, Cell, and Developmental Biology 288. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *E. Suckiel, The Staff*

252. Poststructuralism. *

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits. (Also offered as History of Consciousness 252. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *D. Hoy*

254. Politics of Temporality. *

Temporality is the way humans experience time. Examines how continental philosophers have described temporality and how they have explained the relation of temporality to objective clock-time. Phenomenologists such as Husserl, Heidegger, Sartre, and Merleau-Ponty discussed in light of their differences with Kant, Hegel, and Bergson regarding the relation of temporality and subjectivity. Examine Hegel, Benjamin, and Derrida on the relation of temporality and historicity. Enrollment restricted to graduate students. Enrollment limited to 22. *D. Hoy*

256. History of Consciousness. *

Examination of contemporary theories of consciousness in both analytic and continental traditions. Among those who deflate modern philosophy's preoccupation with consciousness are not only Dennett, Davidson, and Rorty, but also Heidegger, Foucault, and Derrida. Among those who argue for irreducibility of subjectivity are not only Searle, Nagel, and Chalmers, but also Sartre, Merleau-Ponty, and Levinas. Discussion of parallel readings from both philosophical perspectives. (Also offered as History of Consciousness 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 25. *D. Hoy*

280. Graduate Colloquia Course (2 credits). F,W,S

This colloquia series sponsors speakers each quarter. Students must attend all colloquia and are encouraged to form discussion groups after each lecture. Enrollment restricted to philosophy graduate students. *P. Roth*

290C. Advanced Topics in Contemporary Ethics.

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Human ethical theory. Examines different foundational

ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 190C. Enrollment restricted to graduate philosophy majors. Enrollment limited to 22. *D. Guevara*

290F. Topics in Philosophy of Biology. *

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course is designed to give seniors and graduate students an overview of many of the diverse topics currently under discussion in modern philosophy of biology and provide a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for both this course and course 190F. Enrollment restricted to graduate students. Enrollment limited to 8. May be repeated for credit. *R. Winther*

290G. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three periods: early, middle, and late. Topics covered include writings from one or more periods. Students cannot receive credit for this course and course 190G. Enrollment restricted to graduate students. *J. Ellis*

290H. Environmental Ethics. *

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them. Students cannot receive credit for this course and course 190H. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

290J. Advanced Topics in the History of Ethics. S

Careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Students cannot receive credit for this course and course 190J. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Guevara*

290K. Philosophical Matters of Scientific Practice. *

Considers the relevance of philosophical matters to the practice of science. Using quantum physics as a case study, explores historical and contemporary perspectives on issues such as those raised by the Schrödinger cat paradox, Bell's inequalities, and quantum erasers. Students cannot receive credit for this course and course 190K. Enrollment restricted to graduate students. Enrollment limited to 22. *K. Barad*

290M. Advanced Graduate Seminar: William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Recent critical analyses of the issues raised in James's philosophy will also be highlighted. Enrollment restricted to graduate students. Enrollment limited to 20. *E. Suckiel*

290P. Major Figures in Contemporary Philosophy. F

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell,

Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot receive credit for this course and course 190P. Enrollment restricted to philosophy graduate students. Enrollment limited to 22. May be repeated for credit. *A. Stone*

290Q. Philosophy of Mathematics. *

Introduction to the problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? We will examine the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for both this course and course 190Q. Enrollment restricted to graduate students. Enrollment limited to 8. *A. Stone*

290S. Topics in the Philosophy of Science. W

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction. Students cannot receive credit for this course and course 190S. Enrollment restricted to graduate students. Enrollment limited to 20. *R. Winther*

290W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings are from Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Students cannot receive credit for this course and course 190W. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Hoy*

290X. The Good Life. *

Proposed elements of a good life, e.g., courage, loyalty, devotion to ideals, personal flourishing, integrity, compassion, and intellectual understanding. Also discusses fundamental questions such as the meaning of life, the relationship of "living right" to "living well." Students cannot receive credit for this course and course 190X. Enrollment restricted to graduate philosophy majors. Enrollment limited to 20. *E. Suckiel*

290Y. On Insults. S

What is the role of insult in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Emphasizes philosophical, anthropological, psychoanalytic, and legal approaches to the issues. Enrollment restricted to graduate students and by permission of instructor. Students cannot receive credit for this course and course 190Y. (Formerly course 236.) Enrollment limited to 20. *J. Neu*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated for credit. *The Staff*

295F. Readings in Philosophy (2 credits). F,W,S

Focuses on selected philosophical areas and/or specific philosophers. Students meet with the instructor to discuss readings and deepen their knowledge on a particular subject. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

A seminar for graduate students arranged between students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297F. Independent Study (2 credits). F,W,S

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to students who have advanced to candidacy. May be repeated for credit. *The Staff*

Physical and Biological Sciences

204 Natural Sciences 2 Annex
(831) 459-2931
<http://pbsci.ucsc.edu>

Program Description

A broad range of majors is offered through the physical and biological sciences. The intellectual rigor of these majors ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in scientific research, environmental research, medicine, law, engineering, technology, and business.

The Division of Physical and Biological Sciences' interdisciplinary framework provides students with the opportunity to attend classes and pursue research that ranges from the study of atoms to the examination of distant galaxies. From abstract number theory to the development of new chemical compounds, from evolution to plate tectonics, we provide students not only with the skills to explore and discover the world but also to define and improve it.

Departments and programs affiliated with the Division of Physical and Biological Sciences include the Departments of Astronomy and Astrophysics; Chemistry and Biochemistry; Earth and Planetary Sciences; Ecology and Evolutionary Biology; Microbiology and Environmental Toxicology; Mathematics; Molecular, Cell, and Developmental Biology; Ocean Sciences; Physics; and the Science Communication Program. Our undergraduate affairs office helps students understand and manage the breadth and diversity of academic programs and resources that are available to students in the physical and biological sciences. The Undergraduate Affairs Advising Center is located on the third floor of Thimann Laboratories, room 387.

KIM MUSCH
Swimming, lifeguard training, water safety

LISA K. NORRIS
Jazz dance, ballet

MICHAEL RONEARE
Soccer

YOSHIHITO SHIBATA
Aikido

CECILIA SHIN
Scuba

Program Description

Physical education offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With this information, participants will be better prepared to make important choices leading to healthy lifestyles.

Physical education courses at UCSC, which are elective and without academic credit, are offered in a wide variety of activities. The courses consist of instruction, practice, and full participation consistent with each student's ability. While many of the courses are for students at the beginning level, some are designed for the more advanced student. Most courses involve class meetings of one hour's length, twice a week; but some consist of one and one-half hours twice a week or a single two-hour meeting per week. Students may enroll in as many courses as they desire and are permitted to repeat any course.

Lower-Division Courses**5A. Aquatics: Swimming Level I (no credit). F,W,S**

Coeducational. Water exploration and primary skills development. Course is designed to teach only "non-swimmers" how to swim. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Students pay a course fee. Prerequisite(s): instructor determines skill level at first class meeting. Enrollment limited to 15. *J. Kimball*

5B. Aquatics: Swimming Level II (no credit). F,W,S

Coeducational. Stroke readiness and development. Course is for those who have completed Swimming Level I or who can swim freestyle and demonstrate elementary backstroke. Skills to be learned are underwater swimming, turns, improvement of freestyle and elementary backstroke, beginning side stroke, backstroke, breaststroke, diving, personal safety skills, and basic rescue techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass Swimming Level I course or demonstrate equivalent skills. Students pay a course fee. Enrollment limited to 20. *J. McCallum, J. Kimball*

5C. Aquatics: Swimming Level III (no credit). F

Coeducational. Stroke refinement and skill proficiency. Course teaches refinement of basic strokes and introduces butterfly, plus backstroke, surface diving, turns, endurance swimming, and survival techniques. Students pay a course fee. Prerequisite(s): instructor determines skill level at first class meeting: pass in Swimming Level II course or possess equivalent skills in freestyle, sidestroke, elementary backstroke, and breaststroke. Enrollment limited to 30. *J. McCallum*

5D. Aquatics: Swimming Level IV (no credit). W,S

Coeducational. Advanced skills. Designed to perfect the techniques and skills of all basic strokes plus butterfly, surface dives, survival swimming, basic diving, endurance swimming, and personal and rescue skills. Students pay a course fee. Prerequisite(s): pass in Swimming Level III course or possess equivalent swimming skill requirements in freestyle, backstroke, sidestroke, or competitive swimming; instructor determines skill level. Enrollment limited to 30. *J. McCallum*

5E. Aquatics: Lifeguard Training (LT) (no credit). F,S

Red Cross certified lifeguard training. Provides the necessary minimum skills training to qualify as a non-surf lifeguard. Certification includes CPR Pro, AED, PDT, D2, ADMIN, and Title 22 First Aid. Candidates must successfully pass final skill tests and written final exam with 80 percent score. Students are billed for a course fee. Prerequisite(s): must have ability to swim 500 yards in ten minutes, tread water for one minute, strong swimming skills in free, back, breast, side, and elementary backstroke; must purchase Red Cross LT text book. Enrollment limited to 10. *K. Musch, J. McCallum*

5F. Water Safety Instructor (WSI) (no credit). S

Coeducational. A Red Cross course designed to certify students who complete all required work as swimming instructors. Instruction in teaching techniques, stroke analysis, skilled swimming, class organization, pool safety, and pool maintenance. Practice teaching assignments outside of class with practical and written final exams. Screening test given at first class meeting. Prerequisite(s): must be 17 years old, possess valid ARC Instructor Candidate Training card (ICT), and ARC swimmers-level skills. (Emergency Water Safety (EWS), or Lifeguard Training (LT) certificate

is highly recommended). Students pay a course fee. Enrollment limited to 10. *K. Musch, J. McCallum*

5G. Aquatics: Swimming/Conditioning (no credit). F,W,S

Open to all students who wish to explore swimming as a conditioning and fitness exercise. Students should know three competitive strokes, and should be able to swim fifteen minutes without stopping. Short health and fitness lectures precede some classes. Students pay a course fee. Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 40. *The Staff, K. Musch, J. McCallum*

5H. Aquatics: Competitive Swimming (no credit). W

Emphasis on competitive swimming and conditioning techniques. For students who want instruction at the competitive level of swimming. Three hours per week. Students pay a course fee. Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 50. *K. Musch*

5R. Aquatics: Basic Scuba Diving (no credit). F,W,S

Coeducational. Sections geared toward the successful completion of NAUI Scuba Diver Certification. The course is divided into three parts: lecture, pool lab, and open water experience. Four open water training dives are offered. Emphasis is on training for open water scuba diving, using the beach as a base of operation. Students pay a course fee. Prerequisite(s): pass swimming skills tests and medical clearance. It is strongly recommended that students enroll in course 5S. Enrollment limited to 24. *C. Shin*

5S. Aquatics: Advanced Scuba Diving (no credit). F,S

Coeducational. Sections are offered to facilitate the development of the basic scuba diver's open water techniques. A minimum of six open water experiences is offered. Course is geared toward successful completion of NAUI Advanced Scuba Diver Certification. Students pay a course fee. Prerequisite(s): course 5R or pass swimming skills test and medical clearance. (Formerly course 5T.) Enrollment limited to 25. *C. Shin*

5T. Scuba Rescue Diving (no credit). F,W,S

Coeducational. Course geared toward the successful completion of NAUI Rescue Diver Certification. Course consists of lecture, pool laboratory, and open-water experience. Emphasis is on training divers to manage risks and effectively handle limited in-water problems. Prerequisite(s): Scuba certification and medical clearance. Enrollment limited to 10. *C. Shin*

5U. Aquatics: Scuba Divemaster (no credit). F,W,S

Coeducational. A diving-leadership certification course for the experienced scuba student who wishes to assist with the scuba-instruction program at UCSC. Topics include teaching techniques, skin and scuba techniques, rescue techniques, and safety procedures. Specialty laboratories also offered with this course which cover a variety of diving skills. Students pay a course fee. Prerequisite(s): Basic Scuba Certification and special prerequisite checking by instructor. (Formerly Aquatics: Scuba Instruction.) Enrollment limited to 20. *C. Shin*

9B. Boating: Beginning Dinghy Sailing (no credit). S

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course. Students pay a course fee. Prerequisite(s):

swimming ability. (Formerly *Boating: Basic Sailing*) Enrollment limited to 18. *R. Kingon, G. Kilburn*

9C. Boating: Intermediate Dinghy Sailing (no credit). F,W,S

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat. Students pay a course fee. (Formerly *Boating: Intermediate Sailing*) Prerequisite(s): course 9B or equivalent skills. Enrollment limited to 16. *R. Kingon, G. Kilburn*

9D. Boating: Advanced Dinghy Sailing (no credit). F,S

Coeducational. For students interested in high-performance sailing using Flying Juniors and Coronado 15s. Includes special techniques used in racing conditions. Students pay a course fee. (Formerly *Boating: Advanced Sailing*) Prerequisite(s): course 9C or equivalent skills. Enrollment limited to 12. *R. Kingon, G. Kilburn*

9E. Boating: Competitive Sailing (no credit). F

Coeducational. Instruction and coaching at the advanced sailing level in racing dinghies and keelboats. Emphasis on the physical and mental requirements for racing sailboats and the technical aspects of sail racing. Students will be involved in intercollegiate competition. Students pay a course fee. Prerequisite(s): advanced sailing ability. *R. Kingon*

9H. Boating: Basic Rowing (no credit). F,W,S

Coeducational. Course designed to cover types of rowing boats, nomenclature, fundamental skills, and specific safety and rescue aspects related to the activity. Students will row singly as well as in groups using 15-foot to 22-foot rowing dories. (Formerly course 9J.) Students pay a course fee. Prerequisite(s): swimming ability. Enrollment limited to 12. *R. Kingon, G. Kilburn*

9J. Boating: Intermediate Rowing (no credit). F,S

Coeducational intermediate course designed to cover more advanced rowing techniques and the skills needed for safe open water rowing. Students pay a course fee. Students pay a course fee. Prerequisite(s): basic rowing or permission of instructor. (Formerly course 9H.) Enrollment limited to 11. *R. Kingon, G. Kilburn*

9K. Boating: Ocean Kayaking (no credit). F,W,S

Co-educational course that teaches novice kayakers the skills to safely use UCSC kayaks in the Monterey Bay. Topics include: basic paddling strokes and maneuvers; self and assisted deep-water rescues; beach launching; landing through surf; and marine hazards and navigation. Students pay a course fee. Enrollment limited to 12. *R. Kingon, D. Johnston*

9S. Boating: Intermediate Keelboat Sailing (no credit). F,W,S

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used. Students pay a course fee. Enrollment limited to 16. *R. Kingon*

9T. Boating: Advanced Keelboat Sailing (no credit). F,S

Coeducational. Further development and refinement of boat-handling techniques, including advanced maneuvering, anchoring, and racing with an introduction to the use of spinnakers. Students pay a course fee. Prerequisite(s): course 9S. Enrollment limited to 12. *R. Kingon*

15B. Court Sports: Basketball (no credit). F,W,S

Coeducational. Instruction in fundamentals, offensive and defensive strategies, rules, and conditioning designed primarily for beginning and intermediate level players. Students pay a course fee. Enrollment limited to 20. *R. Hansen, The Staff*

15H. Court Sports: Racquetball (no credit). F,W,S

Coeducational. The beginning section provides an introduction to the basic knowledge and skills involved in this indoor racquet sport. The advanced beginning section continues the development of the basic skills emphasizing increased shot variety and advanced strategy. The intermediate section offers the opportunity for further skill development and introduces more advanced offensive skills. Students pay a course fee. Enrollment limited to 18. *C. George, J. Bardos*

15N. Court Sports: Tennis (no credit). F,W,S

Coeducational. The beginning section introduces the basics of forehand, backhand, and serve. Advanced beginning section reviews these basics and introduces the volley, overhead, and lob. The intermediate section reviews all stroke mechanics and covers basic singles and doubles strategy. The advanced section includes use of spins, practice principles, detailed stroke analysis, and advanced play situations. Competitive Tennis is a year-long program for members of the intercollegiate tennis teams. Students pay a course fee. Enrollment limited to 24. *R. Hansen, The Staff*

15T. Court Sports: Volleyball (no credit). F,W,S

Coeducational. Beginning/intermediate, intermediate, and advanced sections are offered for students who desire to learn and improve the basic skills, as well as to understand the rules. Competitive section is open to students interested in participation in the UCSC NCAA Women's Volleyball team. It covers information and practice in all aspects of the competitive volleyball season. Students pay a course fee. Enrollment limited to 25. *The Staff*

20A. Dance: Ballet (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on principles of movement, style, and execution of ballet technique. Section in ballet repertory where advanced students have the opportunity to perform is offered in the spring quarter. Students pay a course fee. *L. Norris, The Staff*

20B. International Folk Dance (no credit). F,W,S

Coeducational. International folk dance with an emphasis on Balkan and Israeli dances. Sections are also offered periodically in Mexican dance. Students pay a course fee. *R. Cochlin*

20C. Dance: Jazz (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Exploration of jazz dance emphasizing basic technique, styling, rhythm, and isolations. Jazz and contemporary music is used as accompaniment. Some background in ballet strongly recommended before continuing to Jazz II or III. Section in jazz dance repertory where advanced students have the opportunity to perform is offered in spring quarter. Students pay a course fee. Enrollment limited to 40. *L. Norris, The Staff*

20D. Dance: Modern (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on basic techniques and building phrases of movement. Section in choreography and improvisation offered in spring quarter. Section in dance repertory offered periodically. Students pay a course fee. *R. Cochlin, The Staff*

20F. Dance: Individual Studies in Dance (no credit). F,W,S

Coeducational. Designed to give students the opportunity of pursuing their particular interests in the field of dance with the support and direction of a faculty member. Prerequisite(s): instructor determination at first class meeting. *L. Norris, R. Cochlin*

25A. Fencing: Épée (no credit). F,W,S

Coeducational. Basic instruction in the techniques, strategy, and general methodology of modern épée fencing. Emphasis on épée fencing as a development from the traditional French and Italian dueling sword styles as they have evolved to form the modern electrical épée game. Students pay a course fee. *C. Blackburn*

25B. Fencing: Foil (no credit). F,W,S

Coeducational. Instruction in modern competitive French-Italian foil techniques for beginning, intermediate, and advanced levels. Emphasis on physical and mental conditioning leading to improved skill in recreational and competitive areas of involvement. Students pay a course fee. *C. Blackburn*

25C. Fencing: Sabre (no credit). F,W,S

Coeducational. Instruction and practice in basic offensive and defensive skills of modern Hungarian sabre technique. Emphasis on physical and mental conditioning as a foundation for more advanced levels of instruction. Preparation for recreational and competitive involvement. Students pay a course fee. *C. Blackburn*

28K. Field Sports: Soccer (no credit). F,W,S

Coeducational/Women's. Sections are offered in field soccer and indoor soccer. Instruction in the basic techniques, tactics, laws of the game, and injury prevention for beginners and advanced players. Students pay a course fee. Prerequisite(s): determination at first class meeting. *M. Rumeare, The Staff*

30G. Fitness Activities: Physical Conditioning (no credit). F,W,S

Coeducational. An exercise course designed to increase the participants' strength, flexibility, coordination, and cardiovascular endurance. Special attention is given to understanding and utilizing sound and safe principles of body alignment and movement. Courses include, but not limited to: Pilates, cardio boxing, stretch and strengthen, and aerobics. Students pay a course fee. *L. Hallock, R. Cochlin, C. Mori, R. Andrews*

30H. Fitness Activities: T'ai Chi Ch'uan (no credit). F,W,S

Through balanced movement and breath control, T'ai Chi Ch'uan attempts to forestall many processes of aging by cultivating greater strength of body, mind, and spirit. Students pay a course fee. *C. Blackburn*

30J. Fitness Activities: Strength Training (no credit). F,W,S

Coeducational. An introduction to safe and effective methods of weight training and other personal conditioning activities. Topics covered include proper weight-training techniques, care of body and equipment, and elementary exercise physiology. Students pay a course fee. (Formerly *Fitness Activities: Weight Training*.) *L. Hallock, R. Andrews, T. Hammonds, D. Lewis, C. Mori*

30L. Fitness Activities: Yoga Exercises (no credit). F,W,S

Coeducational. Sections offered at beginning, continuing beginning, and advanced beginning levels of Hatha Yoga. Students pay a course fee. *R. Cochlin, J. Kimball*

43A. Martial Arts: Aikido (no credit). F,W,S

Coeducational. A nonviolent, noncompetitive Japanese

martial art emphasizing mind-body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual. Sections offered at beginning and experienced levels. Students pay a course fee. *Y. Shibata*

43G. Martial Arts: Tae Kwon Do (Karate) (no credit). F

Coeducational. Sections offered at the beginning and intermediate/advanced levels. Covering basic skills, knowledge, and philosophy of Tae Kwon Do and providing instruction in the following aspects of martial arts study: fundamental techniques of self-defense, physical conditioning, emotional control, self-discipline, and self-confidence. Students pay a course fee. Enrollment limited to 35. *The Staff*

Theory and phenomenology of fundamental particles and their interactions

CLEMENS A. HEUSCH, Emeritus

ROBERT P. JOHNSON
Experimental high-energy physics, astrophysics

ONUTTOM NARAYAN
Theoretical condensed matter physics

MICHAEL NAUENBERG, Emeritus

JOEL R. PRIMACK
Cosmology, galaxy formation and evolution, particle astrophysics, nature of dark matter, gamma ray astronomy

STEVEN RITZ
Particle physics and astrophysics

BRUCE ROSENBLUM, Emeritus

MATTHEW SANDS, Emeritus

ZACK SCHLESINGER
Experimental condensed matter physics, infrared and optical

spectroscopy, strongly correlated electron systems, novel materials, negative thermal expansion, underconstraint and geometrical frustration

BRUCE SCHUMM
Experimental particle physics

PETER L. SCOTT, Emeritus

ABRAHAM SEIDEN
Experimental high-energy physics

B. SHASTRY
Condensed matter physics, strongly correlated matter, Mott-Hubbard physics, high T_c superconductivity, quantum magnetism, exactly integrable systems, exactly solvable models of many-body systems and in statistical mechanics, quantum chaos, geometric frustration

A. PETER YOUNG
Condensed matter theory, statistical mechanics

Associate Professor

ANTHONY AGUIRRE
Cosmology of the early and late universe: inflation and the global structure of cosmological models; the intergalactic medium and its enrichment with heavy elements; galaxy formation, evolution, and feedback processes; dark matter; theories of modified gravity

DAVID M. SMITH
High-energy astrophysics; X-ray and gamma-ray detectors and instrumentation; solar, terrestrial, and planetary sources of gamma radiation

Assistant Professor

GEY-HONG GWEON
Experimental condensed matter physics

JASON NIELSEN
Experimental high-energy physics

STEFANO PROFUMO
Theory of particle physics and particle astrophysics

ALEXANDER SHER
Development of experimental techniques for recording and stimulation of activity at hundreds of neurons and use of these techniques to study neural function, structure, and development

Lecturer

FRED KUTTNER
Foundations of quantum mechanics; physics education

**Professor**

GEORGE R. BLUMENTHAL (Astronomy and Astrophysics)
Cosmology, galaxy formation, high-energy astrophysics

WENTAI LIU (Electrical Engineering)
Retinal prosthesis, biomimetic systems, integrated neuro-electronics, molecular electronics, CMOS and SOI transistor design, current mode band limited signaling, microelectronic sensor, timing/clock recovery and optimization, noise characterization and modeling, and computer vision/image processing

WILLIAM G. MATHEWS, Emeritus

RICHARD MONTGOMERY (Mathematics)
Celestial mechanics, differential geometry, gauge theory, mechanics (quantum and classical), and control theory

ARTHUR RAMIREZ (Dean, Baskin Engineering) (Electrical Engineering)
Experimental materials physics encompassing a broad

range of systems including semiconductors, superconductors, magnets, thermoelectrics, and dielectrics. Research that connects materials and devices, with a focus on oxides and organics. Many-body physics that arises from geometrical frustration of low energy degrees of freedom. Techniques include ultra-low temperatures and high magnetic fields, thermodynamic and transport measurements, defect spectroscopy, and device characterization.

ALI SHAKOURI (Electrical Engineering)

Quantum electronics, nano- and microscale heat and current transport in semiconductor devices; thermoelectric/thermionic energy conversion; renewable energy sources; thermal imaging; micro-refrigerators on a chip; and optoelectronic integrated circuits

Associate Professor

JOEL A. KUBBY (Electrical Engineering)

Micro-Electro-Mechanical-Systems (MEMS), adaptive optics, integrated optics, bio-MEMS

Assistant Professor

PASCAL GARAUD (Applied Mathematics and Statistics)

Astrophysics, geophysics, fluid dynamics, numerical resolutions of differential equations, and mathematical modeling of natural flows

HOLGER SCHMIDT (Electrical Engineering)

Integrated optics for biomedicine and quantum optics, nanomagneto-optics, semiconductor physics, optoelectronic and photonic devices, ultrafast optics, quantum interference

JOHANNES WALCHER (Mathematics)

Siring theory, mirror symmetry, mathematical and particle physics

Adjunct Professor

WILLIAM ATWOOD

DONALD COYNE, Emeritus

ALAN LITKE

MICHAEL RIORDAN

HARTMUT F.-W. SADROZINSKI

TERRY L. SCHALK

DAVID A. WILLIAMS

Research Physicist

AL EISNER, Emeritus

VITALIY FADEYEV

ALEXANDER GRILLO

WILLIAM LOCKMAN

TROY PORTER

Program Description

Physics seeks to discover the fundamental regularities or "laws" that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and, even at an elementary level, this fundamental nature can be appreciated.

The Physics Department offers majors in physics, physics (astrophysics), applied physics, and physics education. These programs prepare students for graduate work in physics, astrophysics, and astronomy, for engineering and other technical positions in industry, and for careers in education. With appropriate courses in other disciplines, these majors provide excellent

preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Physics students and faculty often interact closely in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, and astrophysics/cosmology.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the Stanford Linear Accelerator Center (SLAC) at Stanford University and the European centers at CERN (European Organization for Nuclear Research) and DESY (Deutsches Elektronen Synchrotron). The SCIPP theorists are active in the phenomenology of high-energy particle interactions, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, and theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics. SCIPP theorists are involved in research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology. SCIPP experimentalists are playing an important role in creating the next major satellite for gamma-ray astronomy, the Fermi Gamma-ray Space Telescope. In addition, SCIPP experimentalists, working with colleagues at Los Alamos, conduct a thriving particle astrophysics program detecting TeV gamma rays.

The presence of the strong astrophysics group from the Astronomy and Astrophysics Department in the same building provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major. UCSC is the headquarters for the University of California Observatories, which include Lick Observatory near San Jose and the Keck Observatory in Hawaii; these provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors); the study of magnetic phase transitions; the organization of complex systems (proteins, DNA, and polymers); the development of new electronic devices using novel materials and research in biophysics.

The experimental program uses X-ray and synchrotron radiation techniques at facilities such as the Stanford Synchrotron Radiation Laboratory (SSRL); neutron scattering techniques at various national laboratories; and optical, X-ray, and specific heat techniques at UCSC. Undergraduate students are actively involved in several condensed matter physics laboratories.

Courses

An undergraduate physics education is broad and basic. Undergraduate students, even in introductory classes, are exposed to new ideas associated with explorations at the boundaries of human knowledge.

The lower-division introductory courses in the major programs (Physics 5A, 5B, 5C, and 5D sequence) are well suited to students in the physical sciences and

engineering. The 6A, 6B, 6C sequence, which also provides a calculus-based introduction to the basic concepts in physics, is better suited to students in the life sciences. The Physics 6 sequence is also appropriate for nonscience students who have a calculus background. Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major. The laboratory courses, 5L-5M-5N and 6L must be taken concurrently with the corresponding lecture courses.

Major Program

The physics, astrophysics, and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. The physics education major provides the necessary background to enter a rigorous credential program and, ultimately, a career in high-school science education. Students earn a bachelor of science (B.S.) degree. The UCSC physics, astrophysics, applied physics, and physics education programs begin with a four-quarter presentation of the introductory concepts of the subject, *Introduction to Physics*. (Note: the applied physics program also requires completion of a general chemistry course.)

This is followed by courses which provide an introduction to relativity and quantum physics. The programs continue with a three-quarter sequence in mathematical methods of physics designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair.

The senior thesis, required of all physics, astrophysics, applied physics, and physics education majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on research with a faculty member. Topics have included particle physics, condensed matter physics, astrophysics, biophysics, and various applied technologies. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The physics education major is designed to provide future K-12 physics and mathematics teachers with the necessary coursework aligned with the K-12 physics and mathematics standards necessary to pass the California Subject Matter Examinations for Teachers (CSET) in Physics and Mathematics. It also includes a thorough introduction to educational theory and practice including a sequence of three classroom-based internships. Students will be well prepared to enter a rigorous teaching credential program and ultimately a career in high school education. The senior comprehensive requirement involves a curriculum development project overseen by the Physics/Astronomy faculty, with co-supervision from CalTeach/Education faculty as needed.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in physics, applied physics, physics (astrophysics), and physics education satisfy the DC requirement by completing courses 195A, 195B, and the senior thesis.

Admissions Policy

In order to be admitted to the physics, astrophysics, applied physics, or physics education majors students must pass Physics 5A, 5B and 5C with an average grade point average (GPA) in these three courses of 2.7 or higher. At least two of these three courses must be passed in the first attempt. If the third course is repeated, the grade from the second attempt will be considered. Students failing to meet these criteria must meet with a faculty adviser. The faculty adviser will make a recommendation to the department chair, who will then either finalize the denial of admission or specify further conditions for admission.

Letter Grade Policy

For all students entering UCSC in fall 2009 and later, all courses used to satisfy any of the physics majors must be taken for a letter grade.

Course Requirements

Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 134, and 139A.

In addition, students must pass at least two upper-division electives chosen from physics or the following astronomy and astrophysics courses: 111 through 118. At least one of the two electives must be from the following physics courses: 129, 139B, 155, or 171. In some cases, the second elective requirement may be satisfied by an approved upper-division science or engineering course.

Students have to satisfy a computer programming requirement by taking one of the courses, Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Physics (Astrophysics)

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 135, and 139A.

In addition, students must pass at least three upper-division electives selected from the following upper-division courses: Astronomy and Astrophysics 111 through 118 or 171 (cross-listed with Physics 171).

Students have to satisfy a computer programming requirement by taking one of the courses Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Applied Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; Computer Science 5C; Chemistry 1A; plus the following upper-division physics courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, and 134.

In addition, students must pass at least three upper-division applied physics electives selected from the following approved list of courses: Electrical Engineering 103, 127, 128, 145, Physics 107, 109, 115, 152, 155, 156, and 160; or other courses with approval from a faculty adviser.

Physics Education

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, 5D, 101A and 101B, 133, and 134 or 135; Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Mathematics 100, 128A, 181; Education 50B or 50C, 100B or 100C, 185L, 185B or 185C and one upper-division course dealing with issues of diversity in education; Applied Mathematics and Statistics 5 or 7; and Astronomy 12 or 13. One elective course must be taken from physics, astronomy, mathematics or education courses, or other courses with approval of the department.

Sample Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

| Year | Fall | Winter | Spring |
|------------|---|------------------------------|------------------------|
| 1st (frsh) | MATH 19A or 20A PHYS 5A/L PHYS 10 (recommended) | MATH 19B or 20B PHYS 5B/M | MATH 23A PHYS 5C/N |
| 2nd (soph) | PHYS 101A PHYS 5D (2 credits) MATH 23B | PHYS 101B PHYS 116A | PHYS 116B PHYS 133* |
| 3rd (jr) | PHYS 105 PHYS 116C PHYS 135* | PHYS 110A PHYS 112 | PHYS 110B PHYS 139A |
| 4th (sr) | PHYS 195A PHYS elective** | PHYS 195B PHYS elective** | |

* Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

**Students should look into taking electives earlier where possible, as some courses are only offered every alternate year.

Sample Physics (Astrophysics) Major Planner

| Year | Fall | Winter | Spring |
|------------|---|------------------------------------|---|
| 1st (frsh) | MATH 19A or 20A PHYS 5A/L PHYS 10 (recommended) | MATH 19B or 20B PHYS 5B/M | MATH 23A PHYS 5C/N |
| 2nd (soph) | PHYS 101A PHYS 5D (2 credits) MATH 23B | PHYS 101B EART 119 PHYS 116A | PHYS 116B PHYS 133* |
| 3rd (jr) | PHYS 105 PHYS 116C PHYS 135* | PHYS 110A PHYS 112 | PHYS 110B PHYS 139A ASTR elective |
| 4th (sr) | PHYS 195A ASTR elective** | PHYS 195B ASTR elective** | |

* Physics 133 is offered winter and spring quarters. Physics 135 is offered some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

** Students should look into taking electives earlier where possible, as some courses are only offered every alternate year.

Sample Applied Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

| Year | Fall | Winter | Spring |
|------------|--|-----------------------------------|---|
| 1st (frsh) | MATH 19A or 20A PHYS 5A/L | MATH 19B or 20B PHYS 5B/M | MATH 23A PHYS 5C/N CMPS 5C |
| 2nd (soph) | PHYS 101A PHYS 5D (2 credits) MATH 23B | PHYS 101B PHYS 116A CHEM 1A | PHYS 116B PHYS 133* |
| 3rd (jr) | PHYS 105 PHYS 116C PHYS 134* | PHYS 110A PHYS 112 | PHYS 110B Apph elective PHYS 11 (recommended) |
| 4th (sr) | PHYS 195A Apph elective | PHYS 195B | Apph elective |

* Course 133 is offered winter and spring quarters. Course 134 is offered fall and winter quarters and may be taken junior or senior year after completing course 133.

** Students should look into taking electives earlier where possible, as some courses are only offered every alternate year.

Sample Physics Education Major Planner

| Year | Fall | Winter | Spring |
|------------|----------------------------------|--|--|
| 1st (frsh) | MATH 19A or 20A PHYS 5A/L | MATH 19B or 20B PHYS 5B/M | MATH 23A PHYS 5C/N |
| 2nd (soph) | PHYS 101A PHYS 5D (2 credits) | PHYS 101B MATH 100 | PHYS 133* EDUC 100B or 100C (2 credits) |
| 3rd (jr) | PHYS 134 or 135* AMS 5 or 7 | MATH 128A EDUC 185B/C EDUC 185/L (2 credits) | MATH 181 |
| 4th (sr) | EDUC diversity course Thesis | elective Thesis | |

*Physics 133 is offered winter and spring quarters. Physics 134 is offered in fall and winter quarters and may be taken in the junior or senior year after completing Physics 133. Physics 135 is offered

some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major.

Depending on the student's interests, further preparation for graduate school in physics, astrophysics, applied physics, or for other careers is obtained by electing more specialized or applied courses (see the descriptions of courses below). In addition, again depending on the student's academic focus, elective courses may be selected in mathematics, astronomy and astrophysics, and/or other areas of physical science.

For further information about the physics program, please request the undergraduate handbook, *A Physics Major's Guide*, from the Physics Department office, or look for it online at <http://physics.ucsc.edu>.

Comprehensive Requirement

The comprehensive exit requirement is normally satisfied by the submission and approval of a thesis. To satisfy the comprehensive requirement via a thesis Physics 195A and 195B are required. Note that successful completion of 195A and 195B satisfies the Disciplinary Communication requirement or Writing Intensive general education requirement.

In special cases, minor modifications of these requirements may be granted to suit the specific program of a particular student. Before embarking on a program needing such waivers, students should discuss their plans with a physics adviser and seek approval by petition from the Physics Department office.

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 GPA or better) to top graduating students each year. Recommendations for these awards are made by the department chair and are based upon excellence of academic performance, particularly in upper-division physics courses, as reflected in grades and the narrative evaluations. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Minor Requirements

Requirements for the minor in physics include Physics 5A/L, 5B/M, 5C/N, 5D (or Physics 6A/L, 6B/M, 6C/N with minimum GPA of 3.5); Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Physics 101A, 101B, 133, and one upper division elective (and any prerequisites) from physics or from a list of courses from other departments approved by the Physics Undergraduate Committee. See the Physics Department for the listing.

Advising and Preparation for the Major

Because the courses for the physics major are sequential, it is strongly advised that students declare their major in physics, astrophysics, or applied physics as early as possible (either at initial registration or by the end of the first year). Students who do not begin the lower-division requirements during their first year may have difficulty completing the program within four years. Transfer students may also have problems completing the program within the usual time, depending upon whether they took equivalent courses at their previous institutions. The department adviser works closely with students interested in pursuing the major to ensure that they

begin the program immediately and follow the appropriate steps toward its completion.

High school students coming directly to UCSC should emphasize their mathematics preparation with the expectation that they will take calculus in their first quarter at UCSC in order to concurrently take the Physics 5 series, calculus-based physics for physics majors.

Students transferring to UCSC as junior physics, astrophysics, or applied physics majors should have completed three quarters of introductory calculus-based physics with laboratory and three quarters of calculus. It is also desirable to have an introductory course in modern physics as well as mathematics courses in linear algebra, vector calculus, and differential equations. The Physics Department advises each junior transfer student individually upon their arrival.

Graduate Programs

The Physics Department offers graduate programs leading to the master of science (M.S.) and/or the doctor of philosophy (Ph.D.) degrees. In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter, including the courses required for the Ph.D. degree (210, 212, 214, 215, 216, 219) and other courses specific to the student's field of interest. All first-year students also take 205, *Introduction to Research*. All graduate students also attend a weekly colloquium, 292. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental high-energy astrophysics (including cosmology). After passing a written qualifying examination, Ph.D. students pursue independent research leading to an oral examination and completion of a doctoral dissertation.

Students may obtain a master's degree through course work (eight physics graduate courses) and submission of an approved thesis. The thesis may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a course work plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities (described at the beginning of this section and elsewhere in this catalog): the Santa Cruz Institute for Particle Physics (SCIPP) and Lick Observatory (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the Stanford Linear Accelerator Center and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA, Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting our web site at <http://physics.ucsc.edu/> or by contacting the Division of Graduate Studies at <http://graddiv.ucsc.edu>.

Lower-Division Courses

1. Conceptual Physics. W

Topics in classical and quantum physics and their relation to physical phenomena in the world around us, including modern electronics. Concepts are stressed, but some practical calculational techniques are developed. Working knowledge of high school algebra and geometry is essential. (General Education Code(s): SI, IN, Q.) *S. Carter*

2. Elementary Physics of Energy. S

The physics of energy developed in a course accessible to non-science majors as well as science majors. Fundamental principles and elementary calculations, at the level of basic algebra, developed and applied to the understanding of the physics of energy. Topics include fossil fuels, renewable energy, solar cells and waste energy, waste-energy recovery, nuclear power, and global greenhouse effects. (General Education Code(s): SI.) *B. Shastri*

5A. Introduction to Physics I. F

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Corequisite(s): concurrent enrollment in course 5L and Mathematics 19A or 20A is required. (General Education Code(s): ME, IN, Q.) *J. Nielsen*

5B. Introduction to Physics II. W

A continuation of 5A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids. Prerequisite(s): courses 5A/L and Mathematics 19A or 20A; concurrent enrollment in course 5M is required. Corequisite: Mathematics 19B or 20B. (General Education Code(s): SI, IN.) *R. Johnson*

5C. Introduction to Physics III. S

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. Concurrent enrollment in 5N is required. Corequisite: Mathematics 22 or 23A. Courses 5B/M recommended. (General Education Code(s): SI, IN.) *A. Sher*

5D. Heat, Thermodynamics, and Kinetics (2 credits). F

Introduction to temperature, heat, and thermal conductivity, ideal gases, the first and second laws of thermodynamics, and an introduction to kinetic theory. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. *J. Primack*

5I. Introduction to Physics Honors I (2 credits). F

Weekly 90-minute section covering advanced and modern topics. Topics may include the theory of relativity; complicated dynamics (air resistance, planetary dynamics, etc.); fallacies in perpetual-motion machines; the Euler disk and unusual tops; elasticity of materials applied to structures. Concurrent enrollment in course 5A is required. *J. Primack*

5J. Introduction to Physics Honors II (2 credits). W

Weekly 90-minute section covering advanced and modern topics. Topics may include nonlinear oscillators and chaos; waves in deep water and inside the earth; redshift in astronomy; negative refractive index materials; photons and matter waves; holography; viscosity; and turbulence. Concurrent enrollment in course 5B is required. *F. Kuttner*

5K. Introduction to Physics Honors III (2 credits). S

Weekly 90-minute section covering advanced and modern topics. Topics may include atmospheric electricity; shielding; tensor polarization; alternative energy sources; semiconductor devices; particle accelerators and relativistic electrodynamics; Thomson scattering; digital and analog communication. Concurrent enrollment in course 5C is required. *J. Primack*

5L. Introduction to Physics Laboratory (1 credit). F

Laboratory sequence illustrating topics covered in course 5A. One three-hour laboratory session per week. Prerequisite(s): concurrent enrollment in course 5A is required. *The Staff*

5M. Introduction to Physics Laboratory (1 credit). W

Laboratory sequence illustrating topics covered in course 5B. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L; concurrent enrollment in course 5B is required. *The Staff*

5N. Introduction to Physics Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 5C. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L. Concurrent enrollment in 5C is required. Courses 5B/M recommended. *The Staff*

6A. Introductory Physics I. F,W

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Prerequisite(s): Concurrent enrollment in course 6L required. Corequisite: Mathematics 11A or 19A or 20A. (General Education Code(s): MF, IN, Q.) (FS) *F. Kuttner*, (W) *B. Schumm*

6B. Introductory Physics II. W,S

A continuation of 6A. Geometric optics; statics and dynamics of fluids; introduction to thermodynamics, including temperature, heat, thermal conductivity, and molecular motion; wave motion in matter, including sound waves; introduction to electricity and magnetism. Prerequisite(s): courses 6A/L or 7A/L and Mathematics 11A or 19A or 20A; Corequisite: Mathematics 11B or 19B or 20B. (General Education Code(s): SI, IN.) (W) *R. Dewey*, (W) *F. Kuttner*, (S) *A. Steinacker*

6C. Introductory Physics III. F,S

Introduction to electricity and magnetism. Elementary circuits; Maxwell's equations; electromagnetic radiation; interference and polarization of light. Prerequisite(s): courses 6A and 6L and Mathematics 11B or 19B or 20B. (General Education Code(s): SI, IN.) (F) *Z. Schlesinger*, (S) *R. Dewey*

6L. Introductory Physics Laboratory (1 credit). F,W

Laboratory sequence illustrating topics covered in course 6A. One three-hour laboratory session per week. Prerequisite(s): Concurrent enrollment in course 6A required. *The Staff*

6M. Introductory Physics Laboratory (1 credit). W,S

Laboratory sequence illustrating topics covered in course 6B. One three-hour laboratory session per week. Prerequisite(s): courses 6A and 6L or courses 7A and 7L. *The Staff*

6N. Introductory Physics Laboratory (1 credit). F,S

Laboratory sequence illustrating topics covered in course 6C. One three-hour laboratory session per week.

Prerequisite(s): courses 6A and 6L; courses 6B and 6M are recommended. *The Staff*

10. Overview of Physics (2 credits). *

One lecture per week providing a descriptive overview of major areas in the discipline. These include fundamental particles, solid state, fluids, nonlinear dynamics, biophysics, and cosmology. Lectures by various faculty with research interests in these fields. The course is suggested for prospective physics majors, or others, before they enroll in the Physics 5 sequence. *F. Kuttner*

11. The Physicist in Industry (2 credits). S

One two-hour meeting per week. Subjects include roles of the physicist in industry, the business environment in a technical company, economic considerations, job hunting, and discussions with physicists with industrial experience. Enrollment by permission of instructor. Priority given to applied physics upper-division students; other majors if space available. Enrollment limited to 15. *B. Rosenblum*, *F. Kuttner*

14. Introduction to Vector Calculus with Applications (2 credits). *

Partial differentiation, the chain rule, multiple integrals, Jacobians, surface integrals and the divergence, line integrals and the curl, Stokes theorem, gradients and directional derivatives. Prerequisite(s): Mathematics 22 or 23A. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

75. The Observer in Quantum Mechanics (2 credits). W

Non-mathematical seminar discussing the mysteries arising with the role of the observer in quantum mechanics. Addressed to majors in the physical or biological sciences. Covers material largely untreated in the usual science curriculum. Enrollment restricted to sophomores, juniors, seniors, and graduate students. Enrollment limited to 14. *B. Rosenblum*

80A. Physics and Psychophysics of Music. *

Fundamental theory of vibration, sound waves, sound propagation, diffraction, and interference. Free, coupled, and driven oscillations. Resonance phenomena and modes of oscillation. Fourier's theorem. Anatomy and psychophysics of the ear. Musical scales and intervals. Nature of plucked and bowed strings; guitar, violin, piano. Woodwind and brass instruments. Architectural acoustics. High school algebra and basic knowledge of musical notation recommended. (General Education Code(s): T2-Natural Sciences, Q.) *The Staff*

80D. The Quantum Century. *

Survey of 20th-century physics, emphasizing quantum theory and its impact upon science and culture. Includes relativity, atomic and nuclear structure, and applications in transistors, lasers, and nuclear weapons. Ends with discussions of elementary particle physics and quantum cosmology. Aimed at non-science majors as it stresses historical and philosophical perspectives rather than calculations (only non-calculus math will be used), but will also be of interest to science majors. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, Q.) *E. Riordan*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

101A. Introduction to Modern Physics I. F
Special theory of relativity. Early experiments and models

in quantum physics. Introduction to concepts and calculations in quantum mechanics. Single-electron atoms. Prerequisite(s): courses 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *S. Ritz*

101B. Introduction to Modern Physics II. W

Topics in quantum physics, including angular momentum and spin, the Pauli exclusion principle, and quantum statistics. Applications in multi-electron atoms, molecules, solid state physics, and nuclear and particle physics. Prerequisite(s): course 14 or Mathematics 23B; course 101A; 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *D. Smith*

105. Mechanics. F

Particle dynamics in one, two, and three dimensions. Conservation laws. Small oscillations, Fourier series and Fourier integral solutions. Phase diagrams and nonlinear motions, Lagrange's equations, and Hamiltonian dynamics. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, and 116A-B. *G. Gweon*

107. Introduction to Fluid Dynamics. W

Covers fundamental topics in fluid dynamics: Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and Applied Mathematics and Statistics 217. (Also offered as Applied Math and Statistics 107. Students cannot receive credit for both courses.) Prerequisite(s): Mathematics 107 or Physics 116C or Earth and Planetary Sciences 111. *The Staff*

110A. Electricity, Magnetism, and Optics. W

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): 116A-B-C. *J. Deutsch*

110B. Electricity, Magnetism, and Optics. S

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): course 110A, and 116A-B-C. *A. Seiden*

112. Thermodynamics and Statistical Mechanics. W

Consequences of the first and second laws of thermodynamics, elementary statistical mechanics, thermodynamics of irreversible processes. Prerequisite(s): courses 5B/M, 5C/N, 5D, 101A, 101B, 105, and 116A-B. *A. Young*

115. Computational Physics. S

This course will apply efficient numerical methods to the solutions of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language, such as Mathematica, to the solution of physical problems and develop appropriate error and stability estimates. Prerequisite(s): courses 101B, 105, 116A-B-C, or equivalent. Basic programming experience in C or Fortran. No previous experience with Mathematica is required. *A. Young*

116A. Mathematical Methods in Physics. W

Infinite series, power series and asymptotic series, complex numbers and complex functions, topics in linear algebra including vector spaces, matrices and determinants, systems of linear equations, eigenvalue problems and matrix diagonalization, tensor algebra, asymptotic expansions, and special functions defined by integrals. Prerequisite(s): courses 5A/L, 5B/M, 5C/N; Mathematics 23A, 23B. *H. Haber*

116B. Mathematical Methods in Physics. S

Fourier series and transforms, ordinary differential equations, calculus of variations, and functions of a complex variable. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A; and Mathematics 23A and 23B. *S. Profumo*

116C. Mathematical Methods in Physics. F

Series solutions of ordinary equations, Legendre polynomials, Bessel functions, sets of orthogonal functions, partial differential equations, probability and statistics. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A-B, Mathematics 23A and 23B. *B. Shastry*

120. Polymer Physics. *

Statistical properties polymers; scaling behavior, fractal dimensions; random walks, self avoidance; single chains and concentrated solutions; dynamics and topological effects in melts; polymer networks; sol-gel transitions; polymer blends; application to biological systems; computer simulations will demonstrate much of the above. Students cannot receive credit for this course and course 240. Prerequisite(s): courses 112, 116A-B-C. Offered in alternate academic years. *J. Deutsch*

129. Nuclear and Particle Physics. W

Properties and classification of the elementary particles, their weak and strong interactions, nuclear physics, high energy phenomena analyzed by quantum mechanical methods, experimental methodology. Prerequisite(s): courses 116A-B-C and 139A; students with equivalent course work may contact instructor for permission to enroll. Offered in alternate academic years. *A. Seiden*

133. Intermediate Laboratory. W,S

Demonstration of phenomena of classical and modern physics. Development of a familiarity with experimental methods. Special experimental projects may be undertaken by students in this laboratory. Prerequisite(s): course 101A. *S. Ritz, G. Gweon*

134. Physics Advanced Laboratory. W,S

Individual experimental investigations of basic phenomena in atomic, nuclear, and solid state physics. Prerequisite(s): courses 133 and 101B. May be repeated for credit. (W) *A. Sher, (S) D. Smith*

135. Astrophysics Advanced Laboratory. *

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: 135A in fall and 135B in winter, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. Intended primarily for juniors and seniors majoring or minoring in astrophysics. *R. Dewey*

135A. Astrophysics Advanced Laboratory (3 credits). F

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135A. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

135B. Astrophysics Advanced Laboratory (2 credits). W

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors

majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135B. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

139A. Quantum Mechanics. S

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation methods, and scattering theory. Offered in spring. Prerequisite(s): courses 101A, 101B, 116A-B-C. *J. Nielsen*

139B. Quantum Mechanics. F

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation methods, and scattering theory. Offered in fall. Prerequisite(s): courses 101A, 101B, 116A-B-C and 139A. *R. Johnson*

143. Supervised Teaching (2 credits). F,W,S

Supervised tutoring in selected introductory courses. Students should have completed course 101A and 101B as preparation. Students submit petition to sponsoring agency. *The Staff*

152. Optoelectronics. *

The first half of the course covers the theory of optoelectronics including wave, electromagnetic, and photon optics, modulation of light by matter, and photons in semiconductors. The second half covers applications including displays, lasers, photodetectors, optical switches, fiber optics, and communication systems. Prerequisite(s): courses 101A, 101B, and 110A. *S. Carter*

155. Solid State Physics. W

Interatomic forces and crystal structure, diffraction, lattice vibrations, free electron model, energy bands, semiconductor theory and devices, optical properties, magnetism, magnetic resonance, superconductivity. Prerequisite(s): courses 112 and 139A; students with equivalent course work may contact instructor for permission to enroll. *O. Narayan*

156. Applications of Solid State Physics. S

Emphasizes the application of condensed matter physics to a variety of situations. Examples chosen from subfields such as semiconductor physics, lasers, superconductivity, low temperature physics, magnetism, and defects in crystals. Prerequisite(s): courses 101A and 101B. *G. Gweon*

160. Practical Electronics. S

Provides a practical knowledge of electronics that experimentalists generally need in research. The course assumes no previous knowledge of electronics and progresses according to the interest and ability of the class. Based on weekly lectures. However, with the aid of the instructor, the students are expected to learn mainly through the design, construction, and debugging of electronics projects. Students are billed a materials fee. Prerequisite(s): courses 5C and 5N or 6C and 6N. Offered in alternate academic years. *R. Johnson*

171. General Relativity, Black Holes, and Cosmology. F

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments. (Also offered as Astronomy and Astrophysics 171. Students cannot receive credit for both courses.) Prerequisite(s): courses 105, 110A, 110B, and 116A-B-C. *A. Aguirre*

180. Biophysics. S

Physical principles and techniques used in biology: X-ray diffraction; nuclear magnetic resonance; statistics, kinetics, and thermodynamics of macromolecules; viscosity and diffusion; DNA/RNA pairing; electrophoresis; physics of enzymes; biological energy conversion; optical tweezers. Prerequisite(s): course 112; students who have a biochemistry background may contact instructor for permission. Enrollment restricted to juniors and seniors. *J. Deutsch*

191. Teaching Practicum. F,W,S

Designed to provide upper-division undergraduates with an opportunity to work with students in lower division courses, leading discussions, reading and marking submissions, and assisting in the planning and teaching of a course. Prerequisite(s): excellent performance in major courses; instructor approval required; enrollment restricted to senior physics majors. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing; submission of a proposal supported by a faculty member willing to supervise. *The Staff*

195A. Senior Thesis Research (3 credits). F

A seminar course to help students explore their theses topics and plan, organize, and develop their theses. Choosing a thesis topic, preparing a work plan for the research, assembling an annotated bibliography, and writing a draft outline of the thesis. Students must complete 5 credits in the 195 series to satisfy the writing intensive (W) general education requirement. Prerequisite(s): Entry Level Writing and Composition requirements. *A. Steinacker*

195B. Senior Thesis Research (2 credits). W

Seminars to help students explore their theses topics and plan, organize, and develop their theses. Refining the thesis outline; preparing draft sections, preparing a written progress report; delivering an oral progress report. Students must complete 5 credits in the 195 series to satisfy the writing intensive (W) general education requirement. Prerequisite(s): Entry Level Writing and Composition requirements. (General Education Code(s): W.) *A. Steinacker*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits).

Tutorial. May be repeated for credit. *The Staff*

*Graduate Courses***205. Introduction to Research in Physics (2 credits). W**

Introduction to current research opportunities at UCSC for graduate students. Topics include: elementary particle physics, condensed matter and solid state physics, high energy astrophysics, biophysics, and cosmology. Selected topics related to career development may also be included. Enrollment restricted to graduate students or by permission of instructor. *J. Primack*

210. Classical Mechanics. F

Generalized coordinates, calculus of variations, Lagrange's equations with constraints, Hamilton's equations, applications to particle dynamics including charged particles in an electromagnetic field, applications to continuum mechanics including fluids and electromagnetic fields, introduction to nonlinear dynamics. Enrollment restricted to graduate students only, except by permission of instructor. *O. Narayan*

212. Electromagnetism I. F

Electrostatics and magnetostatics, boundary value problems with spherical and cylindrical symmetry, multipole expansion, dielectric media, magnetic materials, electromagnetic properties of materials, time-varying electromagnetic fields, Maxwell's equations, conservation laws, plane electromagnetic waves and propagation, waveguides and resonant cavities. Enrollment restricted to graduate students only, except by permission of instructor. *M. Dine*

214. Electromagnetism II. W

Lorentz covariant formulation of Maxwell's equations, dynamics of relativistic charged particles and electromagnetic fields, scattering and diffraction. Topics in classical radiation theory: simple radiating systems radiation by moving charges, multipole radiation, synchrotron radiation, Cerenkov radiation, bremsstrahlung and radiation damping. Prerequisite(s): course 212. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *M. Dine*

215. Introduction to Non-Relativistic Quantum Mechanics. W

Mathematic introduction; fundamental postulates; time evolution operator, including the Heisenberg and Schrödinger pictures; simple harmonic oscillator and coherent states; one-dimensional scattering theory, including S-matrix resonant phenomena; two-state systems, including magnetic resonance; symmetries, including rotation group, spin, and the Wigner-Eckart theorem; rotationally invariant problems, including the hydrogen atom; gauge invariance, including Landau levels; introduction to path integral. Enrollment restricted to graduate students only, except by permission of instructor. *B. Shastry*

216. Advanced Topics in Non-Relativistic Quantum Mechanics. S

Approximate methods: time-independent perturbation theory, variational principle, time-dependent perturbation theory; three-dimensional scattering theory; identical particles; permutation symmetry and exchange degeneracy, anti-symmetric and symmetric states; many-body systems and self-consistent fields; variational calculations; second quantized formalism, including Fock spaces/number representation, field operators and Green functions; applications: electron gas; quantization of the electromagnetic field and interaction of radiation with matter: absorption, emission, scattering, photoelectric effect, and lifetimes. Prerequisite(s): course 215. Enrollment restricted to graduate students only, except by permission of instructor. *A. Aguirre*

217. Quantum Field Theory I. F

Lorentz invariance in quantum theory, Dirac and Klein-Gordon equations, the relativistic hydrogen atom, Green functions and canonical approach to field theory, quantum electrodynamics, Feynman diagrams for scattering processes, symmetries and Ward identities. Students learn to perform calculations of scattering and decay of particles in field theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *S. Profumo*

218. Quantum Field Theory II. W

Path integral approach to quantum field theory. Theory of renormalization and the renormalization group, introduction to gauge theories and spontaneously broken field theories. Applications to the standard model of strong, weak, and electromagnetic interactions. Prerequisite(s): course 217. Enrollment restricted to graduate students only, except by permission of instructor. *T. Banks*

219. Statistical Physics. S

The basic laws of thermodynamics, entropy, thermody-

amic potentials, kinetic theory of gases, quantum and classical statistical mechanics, virial expansion, linear response theory. Applications in condensed matter physics. Enrollment restricted to graduate students only, except by permission of instructor. *O. Narayan*

220. Theory of Many-Body Physics. *

Finite temperature Green functions, Feynman diagrams, Dyson equation, linked cluster theorem, Kubo formula for electrical conductivity, electron gas, random phase approximation, Fermi surfaces, Landau fermi liquid theory, electron phonon coupling, Migdal's theorem, superconductivity. Prerequisite(s): courses 216 and 219. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *B. Shastry*

221A. Introduction to Particle Physics I. F

First quarter of a two-quarter graduate level introduction to particle physics, including the following topics: discrete symmetries, quark model, particle classification, masses and magnetic moments, passage of radiation through matter, detector technology, accelerator physics, Feynman calculus, and electron-positron annihilation. Prerequisite(s): course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *B. Schumm*

221B. Introduction to Particle Physics II. W

Second quarter of a two-quarter graduate level introduction to particle physics, including the following topics: nucleon structure, weak interactions and the Standard Model, neutrino oscillation, quantum chromodynamics, CP violation, and a tour of the Stanford Linear Accelerator Center. Prerequisite(s): course 221A; course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *J. Nielsen*

222. Quantum Field Theory III. S

Focuses on the theoretical underpinnings of the standard model, including the spontaneous symmetry breaking, the renormalization group, the operator product expansion, and precision tests of the Standard Model. Prerequisite(s): courses 218 and 221B. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *M. Dine*

224. Origin and Evolution of the Universe. *

Introduction to the particle physics and cosmology of the very early universe: relativistic cosmology, initial conditions, inflation and grand unified theories, baryosynthesis, nucleosynthesis, gravitational collapse, hypotheses regarding the dark matter and consequences for formation of galaxies and large scale structure. (Also offered as Astronomy and Astrophysics 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Primack*

226. General Relativity. *

Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes. (Also offered as Astronomy and Astrophysics 226. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *S. Profumo*

227. Advanced Fluid Dynamics. *

Fundamentals of heat transfer and fluid flow: thermal convection, gravity waves, vortex dynamics, viscous flows, instabilities, turbulence, and compressible flows. Students develop computer program for simulating thermal convection and gravity waves. Vector calculus and computer programming experience required. (Formerly *Fluid Dy-*

namics.) An introductory course in fluid dynamics recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *The Staff*

231. Introduction to Condensed Matter Physics. F

Crystal structures, reciprocal lattice, crystal bonding, phonons (including specific heat), band theory of electrons, free electron model, electron-electron and electron-phonon interactions, transport theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *J. Deutsch*

232. Condensed Matter Physics. *

Magnetism (para, ferro, anti-ferro, ferri), spin waves, superconductivity, introduction to semiconductors. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. *S. Carter*

233. Advanced Condensed Matter Physics. S

A special topics course which includes areas of current interest in condensed matter physics. Possible topics include superconductivity, phase transitions, renormalization group, disordered systems, surface phenomena, magnetic resonance, and spectroscopy. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *S. Carter*

234. Soft Condensed Matter Physics. *

A selection of topics from: liquid crystals, biological systems, renormalization group and critical phenomena, stochastic processes, Langevin and Fokker Planck equations, hydrodynamic theories, granular materials, glasses, quasicrystals. Prerequisite(s): courses 219 and 232. Enrollment restricted to graduate students. *A. Young, O. Narayan*

240. Polymer Physics. *

Statistical properties polymers. Scaling behavior, fractal dimensions. Random walks, self avoidance. Single chains and concentrated solutions. Dynamics and topological effects in melts. Polymer networks. Sol-gel transitions. Polymer blends. Application to biological systems. Computer simulations demonstrating much of the above. Students cannot receive credit for this course and course 120. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Deutsch*

242. Computational Physics. S

This course will apply efficient numerical methods to the solution of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language such as Mathematica to the solution of physical problems and will develop appropriate error and stability estimates. Prerequisite(s): basic programming experience in C or Fortran. No previous experience with Mathematica is required. Enrollment restricted to graduate students only, except by permission of instructor. *A. Young*

250. Mathematical Methods. *

Probability theory with applications to data analysis, complex variables, Cauchy's residue theorem, dispersion relations, saddle-point type asymptotic methods for integrals, integral transforms, ordinary differential equations and orthogonal polynomials, partial differential equations and boundary value problems, and Greens functions. Integral equations also included if time permits. Enrollment restricted to graduate students. *A. Young*

251. Group Theory and Modern Physics. S

Finite and continuous groups, group representation theory, the symmetric group and Young tableaux, Lie

groups and Lie algebras, irreducible representations of Lie algebras by tensor methods, unitary groups in particle physics, Dynkin diagrams, Lorentz and Poincaré groups. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *H. Haber*

290. Special Topics. *

A series of lectures on various topics of current interest in physics at UC Santa Cruz. Enrollment restricted to graduate students only, except by permission of instructor. May be repeated for credit. *T. Banks*

291A. Cosmology (2 credits). F,W,S

Intensive research seminar on cosmology and related topics in astrophysics: nature of dark matter; origin of cosmological inhomogeneities and other initial conditions of the big bang; origin and evolution of galaxies and large scale structure in the universe. Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

291C. Developments in Theoretical Particle Physics (2 credits). F,W,S

Seminar on the current literature of elementary particle physics, ranging from strong and weak interaction phenomenology to Higgs physics, supersymmetry, and superstring theory. Students may present their own research results. Prerequisite(s): course 218; enrollment restricted to graduate students. May be repeated for credit. *M. Dine, H. Haber*

291D. Experimental High-Energy Collider Physics (2 credits). F,W,S

Seminar on current results in experimental high-energy particle physics. Topics follow recently published results, including design of experiments, development of particle detector technology, and experimental results from new particle searches, quantum chromodynamics, and properties of heavy flavor quarks. Enrollment restricted to graduate students. May be repeated for credit. *J. Nielsen*

291E. Applied Physics (2 credits). F,W,S

Intensive research seminar on applied physics and related topics in materials science, including semiconductor devices, optoelectronics, molecular electronics, magnetic materials, nanotechnology, biosensors, and medical physics. Students may present their own research results. Enrollment restricted to graduate students. May be repeated for credit. *G. Alers, S. Carter*

291F. Experimental High-Energy and Particle Astrophysics Seminar (2 credits). F,W,S

Survey of current research in experimental high-energy and particle astrophysics. Recent observations and development in instrumentation for x-rays, gamma rays, and neutrinos, and evidence for dark matter and other new particles. Students lead discussion of recent papers. Enrollment restricted to seniors and graduate students and by permission of instructor. Enrollment limited to 15. May be repeated for credit. *D. Smith*

291G. Condensed Matter Physics Research Seminar (2 credits). F,W,S

Weekly seminar series covering topics of current interest in condensed matter physics. Local and external speakers discuss their work. Enrollment restricted to graduate students. May be repeated for credit. *A. Young*

292. Seminar (no credit). F,W,S

Weekly seminar attended by faculty and graduate students. Directed at all physics graduate students who have not taken and passed the qualifying examination for the Ph.D. program. Enrollment restricted to graduate students only, except by permission of instructor. *D. Belanger*

297. Independent Study. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

298. Theoretical and Experimental Research Project. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

Faculty and Professional Interests

Professor

MICHAEL K. BROWN, Emeritus

J. PETER EUBEN, Emeritus

KENT EATON, Chair

Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

ISEBILL V. GRUHN, Emerita

BRUCE D. LARKIN, Emeritus

RONNIE D. LIPSCHUTZ

International relations; global political economy; globalization; foreign policy; resource/environmental politics; global political networks; global civil society and social movements; popular culture and politics; technology and society; risk society, state transformation and global governmentality

JOHN A. MARCUM, Emeritus

JOHN H. SCHAAR, Emeritus

DAVID J. THOMAS, Emeritus

MICHAEL E. URBAN

Russian politics, postcommunist transitions, U.S.-Russian relations, political language and ideology, revolution

GEORGE E. VON DER MUHLL, Emeritus

DANIEL J. WIRLS

American politics, including national political institutions (Congress) and the President; public policy (military and foreign policy) and political history

Associate Professor

EVA C. BERTRAM

American politics, including the welfare state and social policy; political economy and the politics of labor markets; civil society and non-governmental organizations; public policy, including drug-control policy

DEAN MATHIOWETZ

Political theory, philosophy of language, classical political economy

VANITA SETH

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

MEGAN THOMAS

Political theory, especially of the 19th century; nationalist thought; Orientalism; comparative colonialism; Southeast Asia

Assistant Professor

MARK FATHI MASSOUD

Law and society; politics of human rights; international law and development, with a special interest in Sudan; field research, with an emphasis on qualitative and ethnographic methods

ELEONORA PASOTTI

Comparative urban politics, democratization, public policy, sub-national political economy and party politics

BENJAMIN READ

Comparative politics with special interest in the politics of China; theories of associations and social networks; communist and post-communist states; political participation and collective action

ROGER SCHOENMAN

Post-socialism, political economy, comparative capitalism, politics of pipelines, politics of memory, political networks, politics and money, Balkan and East European politics, Central Asian transitions

Professor

EDMUND BURKE III (History)

BARBARA EPSTEIN (History of Consciousness)

JONATHAN A. FOX (Latin American and Latino Studies)

ALAN RICHARDS (Environmental Studies)

ANDREW SZASZ (Sociology)

DAVID WELLMAN (Community Studies)

DONALD A. WITTMAN (Economics)

Program Description

In describing the department and major at UCSC, the term politics (rather than political science or government) is used because the study of political life requires a far more inclusive approach than that which is associated with conventional political science methods, and because politics happens in places other than governments. More specifically, the study of politics is the study of the way human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made and at the obstacles citizens meet as they try to forge a shared and just life. Courses address

issues central to public life, such as democracy, power, freedom, political economy, social movements, international law and conflict, institutional reforms, and how public life, as distinct from private life, is constituted.

A major in politics is appropriate for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; and in corporations dealing with global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, economics, literature, and law.

The programs offered by the UCSC Politics Department are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses a program in legal studies; see the Legal Studies Department, for details.

UCSC politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects.

Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are also actively engaged in programs of research and writing. The research interests of the faculty range from the theory of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

No specific courses at the high school level are required for admission to the major in politics at UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

Major Requirements as Follows

Two lower-division politics courses. All students are required to complete and pass two courses from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the major. (These have an IS general education code.) These courses are normally taken during the first year.

A student who has not been able to satisfy the pre-declaration requirement (a passing grade in two politics lower-division classes) may petition the department for an exception. The letter of petition must explain and document the circumstances that might justify an exception. The department will consider the request and notify the student of its decision within two weeks of receiving the petition or within 10 days of the start of the following quarter, whichever is later.

Four upper-division politics core courses. The following four groups of courses constitute the core of the politics major. Four courses are required: two courses from one group, one course from a second group, and

one course from a third group. In general, upper-division courses are not recommended for freshmen.

Theory

- 105A *Ancient Political Thought*
- 105B *Early Modern Political Thought*
- 105C *Modern Political Thought*
- 105D *Late 20th Century Political Thought*

U.S. Politics

- 120A *Congress, President, and the Court in American Politics*
- 120B *Society and Democracy in American Political Development*
- 120C *State and Capitalism in American Political Development*

Comparative

- 140A *Politics of Advanced Industrialized Societies*
- 140B *Comparative Post-Communist Politics*
- 140C *Latin American Politics*
- 140D *Politics of East Asia*

International

- 160A *International Politics*
- 160B *Global Organization*
- 160C *Security, Conflict, Violence, War*

Politics 160A, normally offered fall quarter, is very strongly recommended prior to taking the other international core courses.

Five upper-division politics electives. Five additional politics courses are to be selected from courses numbered 101–199. One of these courses may satisfy the senior comprehensive requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for politics majors is satisfied by completing any three of the four required core courses. The politics core course list is detailed above in the major requirement.

Comprehensive Requirements

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- Successful completion of a politics senior seminar (190-series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description;
- Successful completion of a politics graduate core seminar (enrollment in which is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content;
- Successful completion of a senior thesis (Politics 195A–B–C) of approximately 50 pages with a substantial research content, supervised by a politics faculty member with a second reader;
- Successful completion of one additional politics upper-division course. In addition to the existing

requirements of this course the student must receive faculty approval for and enroll in a two-credit independent study, Politics 199F, which requires completion of a substantial writing component.

Honors

Honors in the politics major are awarded to graduating seniors, based primarily on a review of grades and narrative evaluations, whose academic performance is judged to be consistently excellent by a committee of politics faculty. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Minor Requirements

All students are required to complete and pass one lower-division politics course from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the minor. Additionally, five upper-division politics courses are required. Of these, four are to be selected from the core courses: two from one subfield and two from another subfield; these courses are listed above. The fifth course is to be selected from courses numbered 101–199.

General Undergraduate Information

Combined major. The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be reviewed in the Latin American and Latino Studies section of the catalog.

Double majors. The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major subject.

Advising. Declaring the major in politics is a four-step process: 1) complete and pass two lower-division politics courses (numbered 1–79) with a grade of C or better; 2) attend a declaration orientation workshop, 3) meet with your faculty adviser, and 4) meet with the politics undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose. The faculty adviser may suggest additional courses so that the student can achieve greater breadth or concentration. Students are encouraged to select related courses from other departments which complement their interests in politics.

Course credit from other institutions. Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute courses taken elsewhere for the Politics Department's requirements should discuss the procedure with the department adviser.

Senior thesis. Students interested in working on original research and writing under the supervision of a faculty member may pursue an independent study, Politics 195A–B–C. Completion of the senior thesis satisfies the comprehensive requirement.

Transfer students. A student transferring to UCSC must meet with the politics undergraduate adviser as early as possible to discuss declaring the major and course enrollment. This will ensure a smoother transition. Students should bring a copy of their UCSC Transfer Credit Summary which may be printed from the student portal.

A junior transfer student may satisfy the requirement for one of the two lower-division courses by completing

an equivalent course in a political science or equivalent department with a grade of C or better. Courses from another institution may be considered only if they appear on the UCSC Transfer Credit Summary.

Graduate Program

The Faculty

The UCSC Politics Department's faculty provides a distinctive mix of senior scholars whose work has led the field toward interdisciplinary and engaged research, and junior scholars whose work represents the diverse cutting edge of U.S. and international political research. The small size of the program encourages close interaction among faculty and students.

The department enjoys several areas of special strength, including American political development and a focus on the social foundations of democratic politics and democratization. Clusters of faculty also specialize in the study of varieties of capitalism and post-communist politics and economy; the politics of Southeast Asia and Latin America; the study of race and politics; the politics of language; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Political and Social Thought. Brings together the history of political thought; contemporary social and critical theory; and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

States and Political Institutions. Emphasizes the comparative and international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry explores the various understandings of political economy that have emerged within a number of different theoretical perspectives, including Marxism, realism, and liberalism. At subnational, national, and supranational levels, this area seeks to understand political economy outcomes as the result of the mutual interactions between political institutions, societal interests, and ideas and norms.

Political and Social Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses

on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

Graduate students may also obtain a parenthetical notation on the politics doctor of philosophy (Ph.D.) diploma indicating that they have specialized in Latin American and Latino studies or feminist studies. This notation recognizes the scholarly expertise obtained after the completion of additional curriculum that is required by these departments.

Teaching

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction.

See our web site, <http://politics.ucsc.edu>, for details about the policies for admission to graduate standing as well as the application, and information about financial-support opportunities. For more information, refer to the Graduate Division web site.

Ph.D. Program Requirements

The graduate curriculum in politics includes six stages: 1) five core seminars; 2) seven other graduate-level courses, four of which must be Politics Department courses, along with further training as appropriate in language and methodology; 3) teaching assistant seminar and graduate colloquia; 4) a qualifying examination consisting of written and oral parts; 5) the research and writing of the dissertation; and 6) its oral defense.

Note: Please check with the department office for updated listings of course offerings and the appropriate year in which to undertake specific electives.

M.A. Degree

Our program is intended to lead to a Ph.D. in politics; there is no separate master of arts (M.A.) program. All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. However, all students will be eligible to receive an M.A. upon successfully passing the coursework requirements and completing an acceptable 30-page, journal-quality paper, either within the context of a course or independently, although not the written qualifying exam. Students will be advanced to candidacy only upon successful completion of the coursework requirements and the qualifying examination.

Lower-Division Courses

1. Democratic Politics. S

Systematic introduction to the nature of politics and government, organized around the dynamic relationship between power, principle, and process in democratic politics. Provides historic and contemporary overview; explores the interactions among government, laws, and societies at the national and international levels. (General Education Code(s): PE-H, IS.) *D. Wirks*

3. Keywords: Concepts in Politics. *

Introduces key concepts in political discourse and key debates generated by contested terms such as "powers," "ideology," and "multiculturalism." Students read from canonical texts, feminist scholarship, historical materials, and contemporary cultural and postmodernist writings. (General Education Code(s): IS.) *V. Seth*

4. Citizenship and Action. *

What does a citizen do? Uses political theory to answer this question as it relates to a number of issues, such as voting rights, diversity, gay marriage, and revolution. Draws on texts ranging from Aristotle to contemporary legal and cultural debates, to bear on the relationship of citizen action and identity. Other readings include Thoreau, Ellison, Rousseau, Marx, Arendt, and Socrates. (General Education Code(s): TA, IS.) *D. Mathiowetz*

7. Politics of Religion. F

Considers both the religious sources of political ideas and the political sources of religious ideas, addressing topics such as sovereignty, justice, love, reason, revelation, sacrifice, victimhood, evil, racism, rebellion, reconciliation, and human rights. (General Education Code(s): IS.) *R. Meister*

15. Digital Democracy. *

Links the study of democratic theories with an interdisciplinary approach to issues at the intersection of democracy and technology, such as participation, freedom of speech, access with regard to diversity, and income inequality. (General Education Code(s): PE-T, IS.) *E. Pasotti*

17. U.S. and the World Economy. *

Explores intellectual and empirical trends shaping the U.S. relationship with the global economy. Traces debates about liberalism and interventionism, surveys post-war American foreign economic policy and discusses varieties of capitalism emerging around the world. (General Education Code(s): IS.) *R. Schoenman*

20. American Politics. *

Analysis of the development and operation of American political institutions, focusing on the constitutional powers of the Congress, presidency, and Supreme Court; and the development of the American political parties. Topics include the ideological underpinnings of American democracy; the changing balance of power between the executive, legislative, and judicial branches; the expansion of national government power; the expansion of the right to vote and political representation; and the rising power of "non-governmental" forces. (Formerly *Democracy and Liberalism in American Politics*.) Satisfies American History and Institutions Requirement. (General Education Code(s): TA, IS.) *The Staff*

25. American Social Policy. *

Examines role of ideas, interests, and institutions in shaping contemporary social policy in the U.S. Focuses on political struggles and policy debates in the areas of crime and drug control, health care, and income security. (General Education Code(s): TA, IS.) *E. Bertram*

43. Eurasian Politics. *

Following a survey of the development of the former USSR that emphasizes those factors responsible for its dissolution, focuses on the politics of nation building and international reintegration, and the prospects of democratic or authoritarian futures. (General Education Code(s): CC, IS.) *M. Urban*

60. Comparative Politics. W

Introduces the study of politics through the analysis of national political systems within or across regions from the developing world to post-industrial nations. Typical topics include: authoritarian and democratic regimes; state institutions and capacity; parties and electoral systems; public policies; social movements; ethnic conflict; and globalization. (General Education Code(s): CC, IS.) *B. Read*

70. Global Politics. F

Can common global interest prevail against particular sovereign desires? Surveys selected contemporary issues in global politics such as wars of intervention, ethnic conflict, globalization, global environmental protection, and some of the different ways in which they are understood and explained. (General Education Code(s): PE-H, IS.) *R. Lipschutz*

75. The Nation–State and Global Politics. *

Examines role of nation-state in global politics by studying processes of state formation in four regions: Europe, Africa, Asia, and Latin America. Evaluates recent challenges to the state that have begun to emerge from above and below. (General Education Code(s): IS.) *K. Eaton*

*Upper-Division Courses***103. Feminist Interventions. W**

Situates ongoing debates around feminist theory and practice within the context of political theory, the role of the state, and the position of women in contemporary (predominantly Western) society. Engages with classical political theory, second wave feminism, and the role of the state on matters pertaining to pornography and prostitution. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

104A. American Political Thought. *

Basic problems of political theory within the American setting. The course explores both the mainstream tradition and some branches of the counter tradition of political ideas in America, focusing on the themes of authority, community, equality, and liberty. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *J. Schaar*

105A. Ancient Political Thought. F

Ancient political ideas in context of tension between democracy and empire, emergence of the psyche, and shift from oral to written culture. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine. (Also offered as Legal Studies 105A. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathionetz*

105B. Early Modern Political Thought. S

Studies republican and liberal traditions of political

thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference. (Also offered as Legal Studies 105B. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

105C. Modern Political Thought. W

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, Fanon, and Weber. (Also offered as Legal Studies 105C. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *M. Thomas*

105D. Late 20th Century Political Thought. *

The politics of identity and recognition as the basis for institutional legitimacy and social struggles in the late 20th century. Conflicting views of Hegel's master-slave dialectic are used to relate, e.g., Sartre, Fanon, Bataille, Merleau-Ponty, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou to present-day concerns. (Also offered as Legal Studies 105D. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *R. Meister*

106. Marxism as a Method. *

Examines Marx's use of his sources in political philosophy and political economy to develop a method for analyzing the variable ways in which social change is experienced as a basis for social action. Provides a similar analysis of contemporary materials. Contrasts and compares Marxian critiques of these materials and readings based on Nietzsche, psychoanalysis, cultural studies, and rational choice materialism. (Also offered as Legal Studies 106. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

107. After Evil: Political Morality of Survivorship and Recovery. *

What are the continuing relationships between victims, perpetrators, and beneficiaries of a past that is recognized as evil? Focus on contrast between the competing moral logics of struggle and reconciliation, and various rationales for allowing beneficiaries to keep their gains in order to bring closure to the past. Theoretical perspectives drawn from law, philosophy, theology, and psychoanalysis. (Also offered as Legal Studies 107. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Meister*

108. Political Theologies of Milton and Dante. *

Focuses on reading texts written by Milton and Dante, including *Paradise Lost* and *Purgatorio*. Topics of political theology, medieval and reformation Christian thought and related historical studies are examined. Enrollment restricted to politics majors. *R. Meister*

109. Orientalism. S

Studies "Orientalism" as a concept of political theory and as a historical practice. Considers how "Western" views of

the peoples, cultures, and governments of "the East" influenced political, intellectual, and aesthetic projects of the 18th and 19th centuries, with attention to the themes of colonialism, nationalism, language, and gender. Also considers Orientalism as a subject of post-colonial thought. Prerequisite(s): course 105A, or 105B, or 105C, or 105D; or by permission of instructor. Enrollment restricted to politics majors. *M. Thomas*

110. Law and Social Issues. *

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions. (Also offered as Legal Studies 110. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

111A. Constitutional Law. S

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law. (Formerly *Problems in Constitutional Law*.) (Also offered as Legal Studies 111A. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

112. Women and the Law. *

Interdisciplinary approach to study of law in its relation to category "women" and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes power relations in both public and intimate life. (Also offered as Feminist Studies 112. Students cannot receive credit for both courses.) Enrollment restricted to politics, feminist studies, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *G. Dent*

114. Thinking Green: Politics, Philosophies, and Practices of Sustainability. S

A course on the political and philosophical sources of ecological and social sustainability and how they affect and inflect the design, implementation, and practices of sustainability. Asks whether they offer a "realistic" alternative to liberalism and other political and economic ideologies and practices. (Formerly *Thinking Green: Politics, Ethics, Political Economy*.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

115. Foundations of Political Economy. W

Examines how ideas about labor, rights, exchange, capital, consumption, the state, production, poverty, luxury, morality, procreation, and markets were woven in political-economic discourse from 1690-1936. Readings include Locke, Mandeville, Smith, Malthus, Mill, Hegel, Marx, Lenin, and Veblen. Particular focus given to theoretical origins of and justifications for property and implications of economic interdependence for politics. Prerequisite(s): course 105B, 105C, or 120C. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathionetz*

116. Comparative Law. *

Explores legal systems and legal rules around the world, for a better understanding of the factors that have shaped both legal growth and legal change. Particular attention given to differences between common and civil law systems, changes brought about by the European Union, and expansion of legal norms around the globe. (Also offered as Legal Studies 116. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

117. U.S. Telecommunications Law and Policy. F

Surveys the U.S. telecommunications and broadcasting law and policy from the mid-19th century through the present. Offers a range of perspectives from the vantage point of the telecommunications industry, government, and the media-reform movement. Enrollment restricted to politics majors during priority enrollment only. *The Staff*

120A. Congress, President, and the Court in American Politics. W

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities. (Also offered as Legal Studies 120A. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *D. Wirls*

120B. Society and Democracy in American Political Development. F

Examines role of social forces (e.g., race, class, and gender) in development of the American democratic processes and in the changing relationship between citizen and state. Course materials address ideas, social tensions, and economic pressures bearing on social movements, interest groups, and political parties. (Also offered as Legal Studies 120B. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment period. Satisfies American History and Institutions Requirement. *M. Brown*

120C. State and Capitalism in American Political Development. S

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies. (Also offered as Legal Studies 120C. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics, Latin American and Latino studies/politics, and legal studies majors during priority enrollment only. Satisfies American History and Institutions Requirement. *E. Bertram*

121. Black Politics and Federal Social Policy. *

Examination of changes in the political and economic status of African Americans in the 20th century; particular focus on the role of national policies since 1933 and the significance of racism in 20th-century U.S. political development. (Formerly course 127.) (Also offered

as Legal Studies 121. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

122. Politics, Labor, and Markets in the U.S.. W

Examines political and social dimensions of recent transformations in the U.S. labor market. Includes classical and contemporary theoretical debates over the nature and functions of work under capitalism. Focuses on shifts in the organization and character of work in a globalizing economy. Addresses recent trends in economic inequality, low-wage and contingent work, job mobility and security, and work/family relations. Includes attention to the roles and responses of business, labor, government, and social movements. Enrollment restricted to politics and Latin American and Latino studies/politics combined major during priority enrollment. *E. Bertram*

124. Politics, Poverty, and Inequality in America. *

Investigation of the causes and consequences of poverty and income inequality in the U.S., including racial and gender inequality. Consideration of the origins of contemporary anti-poverty policies and evaluation of current policy alternatives. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *E. Bertram*

125. Political Organizations in American Politics. *

Introduces the literature on interest groups and attempts to answer the question: Do such groups promote or hinder American democracy? Class readings and lectures review and assess the participation of interest groups in the electoral process and in Congress, the executive branch, and the courts. Pays particular attention to the role business and environmental groups play in American politics and policy. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *S. Kamieniecki*

129. Policies and Politics of American Defense. F

Examines the evolution of the policy and politics of American national security, from the Cold War to the present. Content of military policy explored with analytic focus on formation of policy and interactions between military policies and domestic policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Wirls*

132. California Water Law and Policy. *

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future. (Also offered as Legal Studies 132. Students cannot receive credit for both courses.) *R. Langridge*

133. Law of Democracy. *

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces. (Also offered as Legal Studies 133. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

140A. Politics of Advanced Industrialized Societies. F

Explores the political and economic systems of advanced industrialized societies. In addition to specific comparisons between the countries of western Europe and the United States, covers important themes and challenges, including immigration, globalization, and the crisis of the welfare state. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority period. *E. Pasotti*

140B. Comparative Post-Communist Politics. S

Comparative study of revolutionary transformations of East European, Soviet, and former Soviet nations to post-Communist political orders. Focus on reemergence of political society, social and economic problems of transition, and maintenance of many cultural norms and authority patterns associated with previous regime. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. *M. Urban*

140C. Latin American Politics. W

Overview of major approaches to the study of Latin American politics. Introductory survey of historical and contemporary democratic, populist, authoritarian, and revolutionary regimes. Special attention to local, national, and global forces shaping development strategies and public policies; changing institutional arrangements and shifting discourses of domination; and social movements and strategies of resistance among subaltern social groups and classes. Students cannot receive credit for this course and course 241. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics, Latin American and Latino studies, and politics/Latin American and Latino studies combined majors during priority period. (General Education Code(s): E.) *K. Eaton*

140D. Politics of East Asia. *

Explores dynamics of political and economic development in Northeast and Southeast Asia following WWII. Students apply theories of comparative politics to empirical case studies, integrating statist, social, and cultural factors into their understanding of development. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

140E. Postcolonial States and Societies. *

Explores key contemporary issues and conflicts in post-colonial states and societies from a range of methodological and theoretical perspectives. While readings focus on South Asia, Middle East, and southeast Asia, they reflect issues of broad theoretical and comparative significance, emphasizing constitutive role of colonialism, modernist projects, and social movements in shaping both post-colonial politics and scholarship. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

141. Politics of China. F

Introduces themes of Chinese politics from 1949 to present, including: the establishment and substantial dismantling of socialism; movements and upheavals, such as the Cultural Revolution and 1989; and issues, such as Tibet and Taiwan. Surveys current institutions, leaders, and policies. (Formerly *China*.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *B. Read*

142. Russian Politics. F

Historical-political survey of Russia within the U.S.S.R. is followed by examination of the 1991 revolution, the attempt to recover a national identity and establish a unified Russian state. Highlighted in this course are cultural and political factors central to the Russian experience: personalistic modes of political organization, a remote and corrupt state apparatus, collectivist forms of thought and self-defense. *M. Urban*

144. Andean Politics. *

Examines similar political trends in four Andean countries: Bolivia, Colombia, Ecuador, and Peru. Trends include mobilization of indigenous populations, breakdown of traditional party systems, and reconstruction efforts in post-conflict environments. Students who have taken prior courses in Latin American politics, including course 140C, will be best prepared for this course. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *K. Eaton*

146. The Politics of Africa. W

Comparative study of contemporary sub-Saharan African states. Selected issues and countries. Internal and external political institutions and processes are studied in order to learn about politics in contemporary Black Africa and to learn more about the nature of politics through the focus on the particular issues and questions raised by the African context. Enrollment restricted to politics majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

148. Social Movements. S

Overview of social movements by analysis of specific theories and examples. Course connects the study of theories and movements to larger political processes. Topics may include: New Social Movement theory; gender and social movement; democratic, historical, transnational, global and/or local social movements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

149. Democratic Transitions. F

Explores democratization processes from a variety of historical and geographical perspectives. Examines the role of foreign influences, economic development, civil society, elites, and institutions in the transition and consolidation of democratic systems. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment only. *E. Pasotti*

150. Democratization, Citizenship, and Human Rights in South America. *

Examines military regimes, transitions to civilian rule, and politics of democratization in contemporary Brazil, Argentina, and Chile. Focus on the contradictions and legacies of transition politics, the challenges of democratizing political institutions, and the political and social consequences of neoliberalism. Emphasis on human rights, citizens' movements (especially feminisms), changing dynamics of civil society, and contemporary efforts to deepen democracy and extend meaningful citizenship to subaltern social groups and classes. Prerequisite(s): course 140C or permission of instructor. *The Staff*

151. Politics of Law. W

Uncovers the important debates in politics and law around the functions of courts, litigation, and rights--and the political nature of law itself. Course is interdisciplinary, and draws from literature in political science, law, and sociology. (Also offered as Legal Studies 151. Students cannot receive credit for both courses.) Enrollment re-

stricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority period. *M. Massoud*

160A. Theories of International and World Politics. W

Examination of analytical perspectives on international and world politics, international and global political economy, war and conflict, corporations and civil society. Explores theoretical tools and applications, recurring patterns of global conflict and cooperation, the nexus between domestic politics, foreign policy and international and world politics. This is not a current events course. (Formerly *International Politics*.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

160B. Global Organization. *

Addresses whether and how global organizations are changing the international system. Examines multilateral institutions, regional organizations, and nonstate actors. Overriding aim is to discern whether these global organizations are affecting the purported primacy of the state. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

160C. Security, Conflict, Violence, War. S

Genesis and theories of conflict and war and their avoidance (past, present, future). Relationship between foreign policy and intra- and interstate conflict and violence. National security and the security dilemma. Non-violent conflict as a normal part of politics; violent conflict as anti-political; transformation of conflict into social and interstate violence. Interrelationships among conduct of war, attainment of political objectives, and the end of hostilities. Civil and ethnic wars. Political economy of violence and war. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

161. Foreign Relations of China. *

Surveys China's foreign policy from 1949 to today, including the Korean War; Sino-Soviet ties; relations with the United States; tension with Taiwan; and China's rise to geopolitical prominence. Introduces the major theoretical approaches to international relations. (Formerly course 143) Enrollment restricted to politics and politics/Latin America and Latino studies combined majors during priority enrollment. *B. Read*

162. Political Integration in Europe, The Atlantic Community and Africa. *

Analyzes concepts, movements, and institutions fostering transnational community. Compares and contrasts functional and federal approaches; the roles of the European, Atlantic Union, and Pan-African Movements; and explores efforts at socio-economic transformation via institutions such as the European Union, Council of Europe, NATO, OSCE, and African Union. Enrollment restricted to politics and politics/Latin American and Latino studies combined majors during priority enrollment. *J. Marcum*

163. U.S. Foreign Policy. *

Provides overview of U.S. foreign policy formulation: considers how U.S. political culture shapes foreign policy; examines governmental actors involved: the president, executive branch agencies, and Congress; then considers non-governmental actors: the media, interest groups,

and public opinion. (Formerly *How U.S. Foreign Policy Gets Made*.) Enrollment restricted to politics and politics/Latin American and Latino studies combined majors. *The Staff*

171. Law of War. *

Examines legal regulation of international violent conflict. Students examine development of normative standards within international law and creation of institutions to both adjudicate violations and regulate conduct. (Also offered as Legal Studies 171. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

172. Liberalism, the State, and the War on Terror. *

Examines the relation between the liberal State and perceived challenges to State sovereignty posed by transnational terrorism. How does terrorism as both a symbol and empirical phenomenon fit within the horizon of liberal ideology? What claim to sovereignty does the State make in the face of acts of terror? What political logic is required in/for a War on Terror? Students may not take both course 72 and this course for credit in the major. Enrollment restricted to politics and politics/Latin America and Latino studies majors during priority enrollment. *The Staff*

173. International Law. F

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include jurisdiction and sovereignty, treaties, the use of force, and human rights. (Also offered as Legal Studies 173. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment. *M. Massoud*

174. Global Environment Politics. *

Focus on global environmental "problematique" and how it is being played out in a variety of political arenas. Includes technical overview of global environmental movement; perspectives on alternative political approaches to environmental problems. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

175. Human Rights. W

Embraces an interdisciplinary approach to the study of human rights. Captures the malleable nature of human rights and the contours of its dual role as both law and discourse. (Also offered as Legal Studies 175. Students cannot receive credit for both courses.) Prerequisite(s): course 173 or Legal Studies 173. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *M. Massoud*

176. International Political Economy. S

Surveys and critically examines long-standing theoretical debates within international political economy (liberalism, mercantilism, Marxism) with context of important historical and contemporary international political economy issue areas (international monetary systems, organization of international trade, regulation of foreign direct investment, development policies, etc.). Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Schoenman*

177. The United States and the World. *

Examines political, economic, and cultural relationship between the U.S. and the rest of the world, including historical background and foreign policy. Special focus

on U.S. involvement in the Middle East and Persian Gulf and the politics of economics of that region. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

178. U.S. Foreign Economic Policy. *

Theoretical and historical survey of U.S. foreign economic policy. First part explores theoretical frameworks and covers historical events in the U.S.'s relationship with world economy. The second part focuses on postwar foreign economic policy; surveys different theoretical approaches to U.S. foreign policy; and examines fundamental developments and issues in trade, monetary, development, and investment policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Schoenman*

179. The Atomic Enterprise: Nuclear Physics, History, Strategy, Policy. *

Informs and educates about "The Atomic Enterprise," that panoply of science, technology, projects, events, policies, health effects, industry, and controversies related to the discovery, development, deployment, and domestication of nuclear fission and fusion. Enrollment restricted to politics or politics/Latin American and Latino studies majors during priority enrollment only. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

183. Asian Security. *

Explores the sources of cooperation and conflict in modern Asia from the waning years of the Imperial Age to the present, with stops en route such as the three Indo-Pakistani wars and conflicts in the Taiwan Strait. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *The Staff*

190. Senior Comprehensive Seminar.

These courses, offered at different times by different instructors, focus on current problems of interest across the discipline. Courses offer a flexible framework within which those mutually interested in specific issues can read, present papers, and develop their ideas. Students who do not meet the restrictions and prerequisites may contact the instructor for permission to enroll. *The Staff*

190A. State and Revolution. F

Investigates the process of rapid and fundamental political change from the standpoint of both the structures of states in which revolutions have occurred and the structures of states issuing from revolutions. A number of cases are examined, but particular emphasis is given to the "classic" revolutions in France (1789) and Russia (1917). Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors; major restrictions lifted during open enrollment. Enrollment limited to 20. *M. Urban*

190B. Humanity, Sovereignty, and War. *

Examines how enmity, the state, and war serve as limits for political conceptions of who "we" are, and the liberal and humanitarian efforts to surmount these limits. Students examine works written prior to the liberal period (Hobbes), in response to it (Hegel and Schmitt) and finally a 20th-Century liberal revival (Rawls), and discuss rights, conscience, political obligation, war, and the state. (Formerly *The Juridical and the Political*.) Prerequisite(s): two of the following: course 103, 105A, 105B, 105C, 105D, 107, 109, or 115. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Mathiowetz*

190C. U.S.-Russian Relations. *

Examines the cold war and its aftermath. Focuses on interstate conflict and its roots in domestic politics. Topics include issues of national security, military competition, transnational movements, regional and global hegemony. Prerequisite(s): one of the following: 140B, 141, or 142. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *M. Urban*

190D. Early Anarchist and Socialist Thought. F

Studies in 19th- and early 20th-century anarchist and socialist thought. Themes covered include property, labor, marriage, and the state. Readings drawn from Bakunin, Goldman, Fourier, Kropotkin, Perkins-Gilman, Proudhon, and Stirner. Prerequisite(s): two of the following: courses 103, 105A, 105B, 105C, 105D, 109, or 115; or by permission of instructor. Enrollment restricted to senior politics majors. Enrollment limited to 20. *M. Thomas*

190E. European Integration. S

Focuses on the origins and development of the European Union. Addresses historical and contemporary issues, including the political, economic, social, and cultural dimensions of European integration and expansion. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Schoenman*

190G. Issues in International Law. *

Explores theory and reality of international law; how it determines or governs or modifies policies of government. Emphasis on contemporary political and economic forces and international law in nuclear age, competing areas for new law, law of seas, human rights, new international economic issues, the environment. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only; major restrictions will be lifted during open enrollment. Enrollment limited to 20. *The Staff*

190H. The Substance of Democracy. W

What is democracy? Why do we care about it? How can we identify it? Through political science, law, and philosophy, the course explores these questions and the issues of patronage, media manipulation, lobbying, campaign finance reform, and participation. Enrollment restricted to senior politics and combined politics/Latin American and Latino studies majors. Enrollment limited to 20. *E. Pasotti*

190J. Politics and Inequality. W

Considers causes and consequences of inequality in modern societies. Emphasizes empirical analysis of contemporary forms of class, racial, and gender inequality and examination of normative theories of distributive justice. Major restrictions lifted during open enrollment. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Wirls*

190L. Poverty Politics. F

Examines theoretical, historical, and contemporary sources of poverty, politics, and policies in the U.S. Explores competing theories of the causes of poverty and the consequences of social provision. Focuses on successive historical reform efforts and contemporary dilemmas of race, gender, low-wage labor, and the politics of welfare reform. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *E. Bertram*

190M. American Politics Through American Literature. *

Most major American writers offer perspectives outside "official" mainstream political culture; the raising of countervoices; concern about common, public lives, not just personal experience; exploring persistent tensions (dualisms) and deeper meanings, how we really live, how it is concealed from understanding, and political/moral costs. Prerequisite(s): course 101, 105A, 105B, 105C, 120B, or 120C. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *J. Schaar*

190N. Congress: The Politics of Representation and Legislation. *

Examination of U.S. Congress in theoretical, comparative, and historical perspective. Topics include tension between representative and legislative processes, parliamentary versus presidential systems, party organization versus the new entrepreneurship. Special attention given to nature and consequences of bicameralism. Prerequisite(s): course 120A. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Wirls*

190O. Women and Politics: Electoral Influence and Policymaking. *

Focuses on the impact women have on the political process in the U.S. Examines women's mass-level political participation with focus on the gender gap; women as candidates, women officeholders and their impact, and expectations for the future. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *The Staff*

190P. Race: History of a Concept. *

Examines how we came, by the late 19th century, to classify humanity into racial categories. In an effort to trace emergence of this very modern phenomenon, explores historical shifts that informed Europe's representation of cultural difference from the writings of ancient Greeks to the social Darwinism of 19th-century Britain. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

190Q. Theorizing Modernity. *

Introduces central categories and material implications that underwrite discourses on modernity since the late 18th century. Students read across the disciplines in fields such as political theory, postcolonialism, history, science studies, anthropology, and feminist criticism. Prerequisite(s): any two of the following courses: 105A, 105B, 105C, 105D. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

190S. Empire and After. *

Examines the literature on American empire, beginning with the founding parents (e.g., Jefferson), continuing through the revisionist literatures (e.g., Williams) and more recent work (e.g., Hardt and Negri), and ending with contemporary critiques and predictions. Enrollment restricted to senior politics majors. Enrollment limited to 20. *R. Lipschutz*

190T. Governance and Conflict in East Asia. *

Students read recent books on East Asian countries (emphasis on China) that engage the long-standing themes of state power and societal resistance. Prerequisite(s): course

141 or 143 or 109, or by permission of instructor. Enrollment restricted to senior politics majors. Enrollment limited to 20. *B. Read*

190V. Problems in Latin American Politics. S

Research seminar allows advanced students to engage in current scholarly debates in the sub-field of Latin American politics. Topics and countries covered vary from year to year but may include civil society, citizenship and cultural politics in Latin/o America, comparative perspectives on democratization, politics and culture in Brazil, feminisms and women's movements in Latin America, the politics of race and ethnicity in the Americas, and human rights and social justice in a neoliberal era. Prerequisite(s): course 140C. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Students with equivalent coursework may enroll with permission of instructor. Enrollment limited to 20. *K. Eaton*

190W. Living in the Aftermath of Evil. *

Draws on a variety of sources to understand metaphors of war and peace as potentially appropriate attitudes toward evil and as potentially rational compromises with evil; investigates respects in which constitutional regimes of post-traumatic societies can be understood as "peace programs" that preserve and transcend the identities of the victims and perpetrators of past atrocities while creating a new identity based on their common survivorship; explores the constraints placed on "nation in recovery" by the public commitment to create an official version of a past that must be remembered so that it will not be repeated. Prerequisite(s): two of the following: course 105A, 105B, 105C, 106, and 107. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Meister*

190X. Global Capital and Capitalism. S

Examines the history and organization of global capital and capitalism, through political economy, with a focus on major historical works and recent writings, especially in relation to the crisis of globalization and the global economy. (Formerly *Global Civil Society—Theories, Debates, Practices*.) Prerequisite(s): One of course 115, 120C, 160A, 176, or 178. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *The Staff*

190Y. Political Theories of Luxury. *

Examines conceptions of luxury as they have appeared in classical, Christian, early modern, and contemporary discourses and debates. How have people sought to define luxury; for what political purposes; and what promise and peril do such definitions have? What is the shape and power of luxury in political communities today? (Formerly *Political Theory of Luxury*.) Enrollment restricted to senior politics and politics/Latin American studies majors. Enrollment limited to 20. *D. Mathiowetz*

190Z. International Security. *

Examination of selected issues, controversies, and theories relevant to "security" between and among nations. Topics vary, but may include: war, peace, nuclear proliferation, arms control, military and foreign policies, alternative conceptions of security. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors. Enrollment limited to 20. *The Staff*

193. Field Study in Politics. F,W,S

Individual studies undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

198. Independent Field Study. F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person (e.g. supervision is by correspondence). Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198E. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A student normally approaches a member of the faculty and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199E. Tutorial (2 credits). F,W,S

A student normally approaches a member of the faculty and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200A. Interpretive Problems in Political Theory: Language and Power. *

Examines intersections of philosophy of language, language philosophy, political theory, and politics. How can we read texts and discourses in a manner both historically and textually grounded? Must these readings be compatible with a democratic ethos? If so, how? (Formerly *Interpretive Methods in Political Theory: Language and Politics*.) Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

200B. Social Forces and Political Change Core Seminar. F

Concerns transformation of social forces into political ones. Focuses on formation, articulation, mobilization, and organization of political interests and identities, their mutual interaction, and their effects on state structures and practices and vice versa. Major themes are 1) social bases of political action: class, gender, race, and other de-

terminants of social division and political identity and 2) relevant forms of political agency and action, including development of political consciousness and representation of interests and identities in the public sphere. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Read*

200C. States and Political Institutions Core Seminar. *

Introduces study of political institutions as instruments of collective decision making and action. Explores alternative theoretical approaches to development of political institutions, state and political economy, and security dilemmas. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Wirls*

200D. Political Economy Core Seminar. W

Introduction to the theories and methodologies of political economy. Focuses on the relationship between states and markets and considers the politics of economic choices and institutions germane to both national and global political institutions. Addresses origins and development of markets and capitalism; historical evolution of states and their economies; relationship between labor, capital, production, and consumption; regulation of production; macroeconomics and management of economies; and issues of national and global social welfare. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Schoenman*

201. Logics of Inquiry. S

Investigates approaches to study of politics and to enterprise of social science in general. Works from positivist, interpretive, historical, and critical approaches provide examples held up to critical and epistemological reflection. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

203. Making of the Modern. S

Introduces, at the graduate level, some of the central conceptual categories and material implications that underwrite the world of the modern. Explores concepts including the individual, historicism, contract, and objectivity. Enrollment restricted to graduate students. Enrollment limited to 15. *V. Seth*

204. Bodies in History. *

The human body has been productive of a wide range of varied and competing discourses. Among the themes covered are sexuality, hygiene, the grotesque, and criminality. Enrollment restricted to graduate students. Enrollment limited to 15. *V. Seth*

205. Political and Social Thought: Politics of Recognition. *

Investigates issues about identity and recognition as basis for claims about institutional legitimacy and social struggle. Paradigm is Hegel's account of relation of master and slave in Phenomenology of Spirit. Contemporary political philosophy examines differing accounts of reason, power, resistance, liberation, morality, difference, and the other. Concludes with discussion of identity and interest politics, multiculturalism and assimilation, and moral bases of struggle, reconciliation, and compromise in the political arena. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

206. Topics in Political Theory. *

Readings focus on the early 20th-century rediscovery of political theory; its use in theorizations of the Holocaust; and its return in 21st-century debates on empires, war, terror, enmity, reconciliation, fanaticism, human rights, political economy, and global catastrophe. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Meister*

207. Political Economies of Affect. F

Explores the intersections of classical and philosophical political economy and theories of affect, from emotion to aesthetics and sensibility, in early modern and late modern contexts. Readings include Deleuze, Hobbes, Hume, Negri, Massumi, Sedgwick, Smith, Spinoza. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Mathiowetz*

211. Marxism. *

Examines how Marx arrived at his substantive political standpoint through a critique of the modes of theory through which state and society are interpreted from within. Also considers how far it is possible to apply the methods Marx used, in learning from the sources available in our own contemporary material, and whether this process of interpretation will lead us to similar conclusions. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

214. Thinking Green: Politics, Ethics, Political Economy. *

Green political thought, philosophy, debates, and practices; history of ecological thought and comparative study of competing ideas and proposals. Critical examination of neo-liberal environmentalism. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

222. Conflict and Change in American Politics and Policy. *

Explores the dynamic and contested interaction between politics and policy in the U.S. context, through examining the historical development of key contemporary policy debates and political conflicts. Introduces recent scholarship, drawing on history, sociology, and political economy that has challenged traditional behaviorist approaches to understanding American politics and policy development. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Bertram*

232. United States Political History. *

Covers several important themes and sets of readings from the literature on American political development. Topics include the origins and development of American political institutions, the evolution of democratic mechanisms, the rise and fall of social movements, and debates about the sources of policy regimes and political change, including the role of war. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Wirls*

233. Interrogating Race. *

Critically examines alternative theoretical and methodological approaches to study of race and racism. Considers alternative explanations for origins and persistence of racism and racial inequality and suggests the relevance of a socio-political understanding. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

245. Latin American Politics. *

Surveys the Latin American political literature by studying: 1) critical moments in political development (e.g., state formation, democratization); 2) important political institutions (e.g., presidentialism, party, and electoral systems); and 3) influential political actors (e.g., unions, business associations, social movements). Enrollment restricted to graduate students. Enrollment limited to 15. *K. Eaton*

247. Comparative Urban Politics. W

Focuses on local government structures and the relationships with other levels of government. Examines institutions and administration; urban political economy (fiscal strain, poverty, inequality, and the efforts to attract economic investment); political machines; race and ethnicity.

Enrollment restricted to graduate students. Enrollment limited to 15. *E. Pasotti*

251. Discourse. F

Utilizing a variety of approaches—discourse analysis, semiotics, critical theory, and linguistics—analyzes how language constructs the political world. Focuses on the symbolic mediation, normalization, and reproduction of power and subjugation present in the discourses through which they are apprehended and expressed. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Urban*

255. Comparative Anti-Colonialisms. *

Political thought of anti-colonial movements in comparative, historical perspective, including 18th- to 20th-Century European colonies of America and Asia. Focuses both on the contemporary political thought of these movements as well as on historiographical approaches of secondary literature. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

265. Nationalism. *

Survey of theories of nationalism, with selected nationalist thinkers and case studies. Emphasis on historical analyses and cases. Topics include: origins and typologies of nationalisms, racism, gender, revolution, and the state. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

272. Critical Interventions in IR Theory and Global Political Economy. *

Seminar examines selections from the canonical literature in international relations theory and global political economy through a number of critical lenses, including constructivist, feminist, historical materialist, and subaltern approaches. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

275. New Approaches to the Study of Capitalism. *

Examines genesis of new institutions within the force of social ties and networks. Studies how social and organizational relationships achieve individual or group goals in political and economic life, and influence institutional design. Considers when and what ties contribute to governance and economic performance, and when informal and formal organizations constitute an obstacle. (Formerly *Network and Organization Theory Approaches to the Study of Capitalism*.) Enrollment restricted to graduate students. Enrollment limited to 15. *R. Schoenman*

291. Teaching Assistant Seminar (2 credits). *

Two-hour weekly seminar required of teaching assistants in which pedagogic and substantive issues will be considered. The experience of performing teaching assistant duties constitutes subject matter for discussion. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

293. Field Study. F,W,S

Individual study undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

295A. Research Colloquium (2 credits). *

Weekly venue for Ph.D. students to present current research, exchange information on sources and resources, discuss and critique epistemologies and methods, and to formulate topics for QE field statements and the dissertation. There are no assigned readings. May be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

295B. Advanced Research Seminar. *

Weekly seminar for Ph.D. students in which to develop and write extended research papers on selected topics, to present current work, to discuss methods, data sources, and fieldwork, and to receive critiques and assessments from fellow students. May be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

A student approaches a member of *The Staff* and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

For college description and list of faculty, see page 96.

Lower-Division Courses

12. The ArtsBridge Experience (2 credits). *

Weekly meetings on pedagogy in the arts, lesson planning for arts teaching in schools, and submission of teaching portfolio core of this class. Prerequisite(s): permission of instructor; student must be an ArtsBridge scholar. May be repeated for credit. *M. Foley*

14. Jazz Vocal Ensemble (2 credits). *

Study of vocal techniques in the context of ensemble rehearsals, often culminating in public performance. Familiarity with musical notation recommended. Admission by audition. May be repeated for credit. (General Education Code(s): A.) *The Staff*

19. Chicana/Latina Identity (2 credits). *

An exploration of Chicana/Latina identity within the context of developmental theories and heterogenous cultural influences on identity formation, including the acculturation process. Students explore their own identities within the previously stated context. Enrollment limited to 20. *The Staff*

20. Dance/Theater Practicum.

The practice of dance/theater in a particular world area (i.e., Philippines, Mexico, U.S.). Students learn the dance or theater art of one world area and study the associated cultural background. *The Staff*

20A. Filipino Dance Practicum (2 credits). *

Students are introduced to the different folk dances of the Philippine Islands. Folk dances of the tribal mountain region, of the Spanish Era in the Philippines (Maria Clara Era), and dances of the regional and rural countryside are emphasized. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *W. Manuntag*

20C. Korean Dance Practicum (2 credits). *

Students are introduced to the different dances of Korea related to folk tradition. Movement concepts of music

and the relation to culture are explored through demonstration, practice, and performance. Enrollment limited to 15. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

20D. Dance Improvisation (2 credits).*

Dance practicum emphasizing spontaneous movement in response to diverse media including visual art and music. Special emphasis given to the conceptual approaches taken by American artists such as Merce Cunningham, John Cage, and Robert Rauschenberg. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

21. Music Practicum.

21A. Korean Music and Culture (2 credits). †

Introduction to the farmers band tradition. Theory and practice of drumming are emphasized, resulting in a group performance. Enrollment limited to 20. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

21C. Gospel Choir (2 credits). W,S

Instruction in vocal performance in the tradition of gospel choirs. Music is transmitted aurally rather than by notation. The ensemble prepares a range of traditional and contemporary gospel music for performance. Ensemble performs publicly at least once each quarter. Enrollment limited to 60. May be repeated for credit. (General Education Code(s): PR-C, A.) *V. Fiddmont*

22. Art Practicum (2 credits). W

The practice of art in a particular world area (i.e., Japan, Pacific Islands, U.S.). Explores the art and craft of one world area and studies the associated cultural background. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

22A. Day of the Dead (2 credits). F

Day of the Dead: Creating an Exhibition—an exploration of art created to celebrate death in Mexican, Chicano, and American culture. Culminates in the creation of a Day of the Dead ceremony and community altar including students' individual art pieces. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): A.) *E. Sanchez*

22E. Vietnamese Festivals (2 credits).*

Vietnamese festivals and the arts they generate, from carving to water puppetry, will be explored for cultural, aesthetic, and iconographic principles, through viewing, discussion and a creative project. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

22G. Literary Magazine Publishing (3 credits).*

Learn about and practice basics in publishing a national literary magazine with focus on poetry and the arts. Three-part focus: soliciting/editing, design/publishing, and publicizing/distributing. Students decide which poems published and awarded prizes in the "Viz. 25 and Under Awards" section. Audition for admission at first class with demonstrated experience in related field: creative writing, desk top publishing, art, graphic design, business, etc. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *R. Hamilton*

23. Film/Theater Practicum.

The practice of film/theater from the perspective of a particular culture, genre, or technical approach. *The Staff*

23A. Film Practicum: Talking in Pictures (2 credits).*

Introductory survey of the language of film and television. Considers the roles these media play in the shaping of cultural identity. Creative projects in the conceptual preparation for the making of films and videos. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

ment limited to 25. (General Education Code(s): A.) *The Staff*

23B. Personal Narratives in Theater and Film (2 credits). S

Considers filmmakers and monologue performers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. Enrollment limited to 25. (General Education Code(s): PR-C, A.) *R. Giges*

23C. Documentary/Mockumentary Films (2 credits).*

The mockumentary grows out of the documentary tradition, but instead of pretending to truthfully capture reality, it blatantly distorts, revealing the subjectivity inherent in cinematic representation. Includes ethnographic, music, political and Hollywood mockumentaries, and critical readings on documentary film. Enrollment limited to 25. (General Education Code(s): A.) *R. Giges*

28. Sound Art (2 credits). S

Several composers and performers of contemporary "art music" discuss the processes by which works are conceived in imagination, transcribed in notation, and realized in sound. After a brief introduction to contemporary music aesthetics, students attend a series of related presentations, seminars, and concerts. Enrollment restricted to college members. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

32A. Queering the Arts (2 credits). S

Exploration of the arts as a way to understand and experience how queerness has been expressed, repressed, denigrated, and celebrated in visual arts, music, film, poetry, and dance. Enrollment restricted to college members. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

33. Seminar in Arts (2 credits). W

Theoretical and historical aspects of the arts from one culture or world area are explored through seminar discussion, library research, and film/video presentations. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

33A. African Global Art and Music (2 credits).*

The theme of "Changing the Global Community Through the Arts" explored in African global art and music through readings, listening sessions, and interactions with academics and performers. Culmination will be the African Global Festival and Symposium in April. Enrollment limited to 25. (General Education Code(s): A.) *E. Cameron*

34B. Fractals, Chaos Theory, and the Arts (2 credits). S

A consideration of chaos theory and fractal geometry as applied by 20th-century artists in all media. All necessary math and computer skills are covered. Students complete essays or art projects. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): A.) *R. Abraham*

35. Experiencing Live Performance (2 credits).*

Students' attendance at live regional theater performances informed by artists' talks, class lectures, and readings. Students participate in informal performance workshops and write short critical essays. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

38. Working in . . . Series.

Writers, directors, technical workers, visual artists, and professionals in a diverse range of media discuss current work, paths that led to their creative endeavors, and constraints to working in the industry. *The Staff*

38B. Working in TV and Film (2 credits). W

Writers, directors, and technical workers in areas of TV and film discuss current work, paths that led to their creative endeavors, and constraints of working in the industry. Students research aspects of film and TV professional work. Cannot be repeated for credit. (General Education Code(s): A.) *L. Steck*

39. Jewish Personal Narratives on Film (2 credits). S

Considers Jewish-American filmmakers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): PR-C, A.) *R. Giges*

80A. Introduction to University Discourse: Writing Across the Arts. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Study, discuss, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T4-Humanities and Arts, C1.) *The Staff*

80B. Rhetoric and Inquiry: Writing Across the Arts. F

Explores the intersections between rhetoric (persuasion) and inquiry (investigation) and hones strategies for effective reading, writing, speaking, and research. Read, discuss, research, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T4-Humanities and Arts, C2.) *The Staff*

80E. Arts Education in the Community. W

Organized in small teams, participants engage with students from public elementary classrooms to develop fully-staged group performance projects by end of term. Students are guided by instructor's models of teaching techniques, designed to stimulate the imagination, and by diverse readings. Enrollment restricted to college members. Enrollment limited to 30. (General Education Code(s): T4-Humanities and Arts, A.) *T. Beal*

80G. Making Poetry: Readings/Writing (2 credits).*

Guest poets read work and discuss their approaches to writing. Students develop their own poems and the class culminates in a poetry reading of student work. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

80K. Ways of Knowing. W

Creativity in different disciplines is developed via different ways of knowing. Musical, visual, scientific, and spatial literacy demand understanding which is not primarily logocentric. Explores how practitioners of arts and science develop their work and conceptualize its execution. Enrollment restricted to college members. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *J. Todd*

80L. Documenting Oral History. F

Students learn basic techniques of interview and camera work to document on film oral histories collected from community elders. Students develop their skills in writ-

ing, theater, visual art, music, or film to reinterpret oral histories as artwork. Enrollment limited to 30. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *T. Beal*

80W. Writing Across the Arts. *

Explores the intersections between rhetoric (persuasion) and inquiry (investigation) and hones strategies for effective reading, writing, speaking, and research. Students read, discuss, research, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Prerequisite(s): satisfaction of the Entry Level Writing Requirement, and C1 and C2 requirements. Enrollment restricted to college members. Enrollment limited to 22. (General Education Code(s): T4-Humanities and Arts, W.) *The Staff*

83. Pacific Rim Film Festival: Viewing Across Cultures (2 credits). F

Involves viewing Asian and Pacific films at the annual Pacific Rim Film Festival, participating in post-screening discussions with area experts, and writing on the issues of cross-cultural viewing/reading of film. Enrollment restricted to college members. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *M. Foley*

99. Tutorial.

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits).

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

120. Advanced Dance/Theater Practicum (2 credits). *

The practice of dance/theater in a particular world area or culture. Students learn the art of one world area or era and the associated cultural background. Prerequisite(s): audition; prior training in the discipline is required. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121. Advanced Music Practicum (2 credits).

The practice of music in a particular area of the world at an advanced level. Students learn the music of one world area or culture over the quarter and study the associated cultural background. Enrollment limited. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121C. Opera Workshop/Music Practicum (2 credits). F

Rehearsal of the principal vocal parts of an opera in preparation for a full production. Consideration of the dramatic aspects of each role and the interrelationships of the characters. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

126. South Asia Seminar (2 credits). *

South Asian issues in arts, technology, culture, and history will be presented in weekly seminar. Students will attend lectures, read supplementary articles, and write a short paper on a South Asian topic. Enrollment limited to 15. *M. Foley*

141. New Works Research Laboratory. *

Artists from different disciplines (i.e., art and music, design and creative writing, performance art and dance, etc.) collaborate with students to research and create new pieces. Students are involved in phases of the development from the conception to presentation of the work.

Enrollment limited to 20. May be repeated for credit. *The Staff*

180. Writing Across the Arts: Pedagogical Practicum. F

Advanced undergraduates selected for this course lead small group sections that explore social, political, and aesthetic issues raised by selected works of art in a variety of media. Participants also tutor first-year students in writing about these arts texts. Apply and interview for this course in the spring. Enrollment limited to 25. (General Education Code(s): IM.) *R. Giges*

194. Group Tutorial.

A program of independent study arranged between a group of students and a faculty instructor. *The Staff*

199F. Tutorial (2 credits).

Individual projects carried out under the supervision of a Porter faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Portuguese

Language Program
218 Cowell College
(831) 459-2054
<http://language.ucsc.edu>

Faculty and Professional Interests

Lecturer

ANA MARIA C. SEARA
Portuguese language; literature, film, and music of Brazil and the Portuguese-speaking world; acquisition and teaching of foreign, second, and heritage languages

Program Description

Students interested in acquiring proficiency in Portuguese may choose to enroll in either of two accelerated introductory tracks: courses 1A–B are designed as a two-quarter sequence for students who have no previous experience with the Romance languages; courses 60A–B are a two-quarter sequence designed for students who have a strong background in the Romance languages (typically Spanish) or some previous rudimentary knowledge of Portuguese. Both sequences are accelerated. A second-year Portuguese sequence, also accelerated, courses 65A–B, follows the first-year sequence, and is offered over two quarters. The completion of this sequence fulfills the two-year language requirement for study abroad programs.

The program is aimed at enabling students to gain proficiency in listening comprehension, speaking, reading, and writing. Instruction takes place in Portuguese from the beginning and draws heavily on Brazilian culture through popular music and cinema.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

Students may apply to spend time either in Rio de Janeiro, Brazil or in Salvador (Bahia) through the UC Education Abroad Program (EAP). Courses taken abroad can, with approval of an adviser, be applied

to major requirements. For more information on the program, see UC Education Abroad Program. For information on credit applied to a major, contact the appropriate department.

Lower-Division Courses

1A. Intensive Elementary Portuguese. F

Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Enrollment limited to 25. *The Staff*

1B. Intensive Elementary Portuguese. W

Sequential to course 1A, completes first-year accelerated instruction. Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Prerequisite(s): course 1A. Enrollment limited to 25. *The Staff*

60A. Advanced Beginning and Intermediate Portuguese. F

This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): Spanish 4 or Spanish for Spanish Speakers 64 or French 4 or Italian 4 or Spanish Placement Examination score of 50. *The Staff*

60B. Advanced Beginning and Intermediate Portuguese. W

Sequential to course 60A, completes first-year accelerated instruction of Portuguese for speakers of Spanish and other Romance languages. This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): course 60A or placement by examination. (General Education Code(s): IH.) *The Staff*

65A. Intermediate Portuguese. S

A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Prerequisite(s): course 1B or 60B, or by instructor approval. (General Education Code(s): CC, IH.) *The Staff*

65B. Intermediate Portuguese. F

Sequential to course 65A, completes second-year accelerated instruction. A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Prerequisite(s): course 65A or by instructor approval. (General Education Code(s): CC, IH.) *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Psychology

273 Social Sciences 2 Building

(831) 459-2002

<http://psych.ucsc.edu>

Faculty and Professional Interests

Professor

NAMEERA AKHTAR

Cognitive and social cognitive processes in early language development, social-cognitive development in infants

MARGARITA AZMITIA

How culture, peers, family, and schools provide a context for children's and adolescents' development. Special emphasis on how close relationships influence the educational pathways and identity development of ethnically and socioeconomically diverse populations

HEATHER E. BULLOCK

Poverty and economic inequality, welfare policy, feminist psychology, discrimination

MAUREEN A. CALLANAN

Cognitive and language development in the social context of family activities, development of word meanings and concepts, the construction of causal explanations in parent-child conversations

CATHERINE R. COOPER

Cultural perspectives on child and adolescent development; linkages among families, peers, schools, and work; issues of diversity, ethnicity, and gender in identity; research, practice, and policy in university outreach programs; linking qualitative and quantitative research

FAYE J. CROSBY

Gender, social identity, and social justice, especially affirmative action

JEAN FOX TREE

Psycholinguistics: production and comprehension of spontaneous speech, disfluencies and discourse markers in speech, gestures, the effects of communicative technologies on how people communicate

RAYMOND W. GIBBS JR.

Language, thought, and embodiment; special emphasis on metaphor, pragmatics, and cognitive science

CRAIG W. HANEY

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

AIDA HURTADO

Social identity, feminist theory, social psychology of education, survey methodology

CAMPBELL LEAPER

Social construction and socialization of gender in childhood, adolescence, and adulthood; self-concept and social identity; language and social interaction; social relationships, gender bias and academic achievement; images of gender in the media; perceptions and consequences of sexism

ANTHONY R. PRATKANIS

Social influence; attitude structure, function, and change

BARBARA ROGOFF

Human development in sociocultural activity; informal and formal arrangements for learning; adult/child and peer communication in families and schools in diverse cultural communities (especially in Guatemala Mexico and the U.S.); learning through observation and collaboration

AVRIL THORNE

Personality development in adolescence and young adulthood, especially in the context of conversations with family members and friends; autobiographical memories; storytelling and the development of a sense of self; the affordances of introverted and extraverted friends

EILEEN L. ZURBRIGGEN

Connections between power and sex; sexual aggression and abuse; trauma; sexual decision-making; sexuality and media, the sexualization of girls and women; authoritarianism; feminist political psychology; motivation, especially power and affiliation-intimacy motives

Associate Professor

ALAN H. KAWAMOTO

Empirical and computer simulation approaches to the study of perceptual and cognitive processes, reading, speech production

REGINA D. LANGHOUT

School-community-university collaboration; how schooling and neighborhood experiences are informed by social class, race, and gender; participatory action research

TRAVIS L. SEYMOUR

Role of immediate memory, consciousness, and executive control on the human performance of laboratory and applied tasks; cognitive processes amenable to strategic control and how they influence the way in which we maintain situational awareness; high levels of performance in complex and cognitive tasks

SU-HUA WANG

Cognitive development, infant cognition, mental representations, theory of mind, how experience shapes early learning, parental child-rearing beliefs, cross-cultural perspectives on children's learning

AARONETTE WHITE

Adult feminist-identity development; personality correlates of feminist activism; feminist masculinities studies; feminist perspectives on peace and violence; narrative psychology and adult personality change; Black feminist political psychology in the U.S. and abroad; critical psychology

MARGARET L. WILSON

Embodied cognition, broadly defined. Specific interests include person perception, imitation, visual cognition, working memory, sign language, and the evolution of cognition

Assistant Professor

SHELLY A. GRABE

Sexual objectification of women and women's bodies as a pervasive global phenomenon played out in different ways across different cultures; how "embodied oppression" affects women's psychological well-being and empowerment

PHILLIP L. HAMMACK

Cultural psychology, culture and identity, conflict and intergroup relations, political violence, political psychology, narrative, sexual identity

Lecturer

DAVID A. "TONY" HOFFMAN

Child and adolescent development, developmental psychopathology, child and adolescent assessment, school psychology, pediatric psychology, children and war, children in high risk situations

RALPH H. QUINN

Clinical psychology, moral development, psychology and religion, existential-humanistic psychology

DONALD T. SAPOSNEK

Childhood psychopathology, special needs children, parenting and family interactions, socialization of children, children and divorce, family mediation, conflict resolution

VERONICA K. TONAY

Clinical psychology, psychotherapy outcome, community mental health, dreams, personal narratives, creativity

Emeriti

ELLIOT ARONSON, Emeritus

BRUCE BRIDGEMAN, Emeritus

MARTIN M. CHEMERS, Emeritus

G. WILLIAM DOMHOFF, Emeritus

PER F. GJERDE, Emeritus

DAVID M. HARRINGTON, Emeritus

MICHAEL KAHN, Emeritus

PAVEL MACHOTKA, Emeritus

DOMINIC W. MASSARO, Emeritus

MELANIE J. MAYER, Emeritus

BARRY McLAUGHLIN, Emeritus

THOMAS F. PETTIGREW, Emeritus

M. BREWSTER SMITH, Emeritus

DANE ARCHER, Professor Emeritus, Sociology

SRI KURNIAWAN, Assistant Professor, School of Engineering

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; user-centered design

JEROME NEU, Professor, Humanities

Philosophy of mind, emotions and culture, philosophy of law, psychoanalytic theory

ROLAND G. THARP, Professor Emeritus, Education and Psychology

Program Description

Psychology majors at UCSC are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, precalculus, statistics, and introduction to developmental psychology. Majors take a total of nine upper-division courses. These include Psychology 100, *Research Methods in Psychology*; seven courses in the four areas of psychology—developmental, cognitive, social, and personality psychology; and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as perception; brain and behavior; motor control; learning and memory; thinking, feeling, and emotions; psycholinguistics; and computational modeling. Our cognitive psychologists extend traditional boundaries in the study of cognition to encompass bodies, physical environments, sociocultural contexts, and information technologies. Social psychology addresses topics such as persuasion and influence, motivation, group processes, intergroup relations, psychology and law, and social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span.

Additionally, both developmental and social psychology are concerned with issues of diversity including ethnicity, culture, gender, income, and family structure. Personality psychology focuses on person-centered processes including creativity, attachment, depression, and life stories.

In addition to the general psychology major, an intensive major and a minor (described below) are also available. (Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UCSC does not offer advanced degrees in clinical psychology or counseling.)

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Making Decisions," "How Do You Organize Your World?" "I'm Every Woman: A Look at Female Perspectives," "Family Story Telling," and "Friendship and the College Transition."

Preparation for the Major

Students interested in pursuing the psychology major should complete Psychology 1, 2, and the precalculus mathematics requirement. After completing these three lower-division required courses, students may then declare the psychology major.

High school students considering psychology as their university major find that the best preparation is a solid general education in English, mathematics through precalculus, natural sciences, social sciences, and writing.

Transfer Students

Junior transfer students should express an interest in psychology on their UCSC application for admission.

It is expected that prospective transfer students will have completed most, if not all, of the lower-division requirements. The psychology faculty recommends that all lower-division requirements be completed by the end of the sophomore year.

Several measures are taken to control over enrollment in the psychology major. At the time of transfer, students must have a 3.0 or higher grade-point average in all UC-transferable course work, with at least a 3.1 in all psychology courses. Junior-level students with 120+ quarter credits will not be admitted into the pre-major. This occasionally affects transfer students who have many credits on their records. It can also affect students who want to change their major in mid-junior year. Senior-level students with 135+ quarter credits will not be admitted into the major. This affects seniors who want to add a minor or double major in psychology (it does not affect those who have already declared a pre-psychology major). Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. Students planning to transfer to UCSC should check with the advising office of their present college, or refer to www.assist.org.

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department

office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process.

General Psychology Major

Thirteen courses are required for the general major: four lower-division courses in preparation for the major and nine upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites. Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the psychology major.

Lower-Division Requirements

Psychology

- 1 *Introduction to Psychology* (or equivalent)
- 2 *Introduction to Psychological Statistics* (or equivalent)
- 10 *Introduction to Developmental Psychology*

Mathematics 3 Precalculus (or equivalent)

Psychology 20, 40, and 60 are strongly recommended.

Upper-Division Requirements

Students must complete at least nine upper-division courses (a minimum of 47 credits), including appropriate substitutions noted below. The courses include Psychology 100, *Research Methods in Psychology*; two courses from each of any three of the following subfields, one course from the remaining subfield; and one course from outside the major.

Psychology 100, *Research Methods in Psychology*

Developmental (courses numbered 101-119)

Cognitive (courses numbered 120-139)

Social (courses numbered 140-159)

Personality (courses numbered 160-179)

Upper-division courses and their catalog descriptions are grouped within each of the subfields. At least one upper-division seminar course must be completed; these courses are identified within their catalog description by the phrase "satisfies seminar requirement." No more than two psychology courses numbered 193, 194, and 195 may be used toward the upper-division requirements; however, these 190 series courses cannot be substituted for 101-179 courses in the same subfield as each other, or in a subfield in which the student has not taken a course in the 101-179 series. The ninth upper-division requirement must be a five-unit UCSC course outside of psychology chosen from a list of courses approved by the subfield in which students may have taken only one upper-division course. If students have taken two upper-division psychology courses in each of the four subfields, their required outside course can be chosen from a list approved by any of the four subfields. These lists of approved non-psychology courses are posted on the Psychology Department web site. At least seven of the nine courses must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript. An exception will be made so that students can receive credit for up to three preapproved EAP courses toward their upper-division major requirements. Students requesting this exception would be required to take at least six of their nine upper-division courses through the psychology program at UCSC. After all substitutions have been made, students must satisfy the fundamental require-

ment that they take at least one upper-division UCSC psychology course from each of the four subfields.

The Psychology Department recommends that students take substantive courses in related disciplines such as anthropology, biology, community studies, computer science, education, linguistics, philosophy, and sociology.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in psychology is satisfied by completing Psychology 100, *Research Methods in Psychology*, and one of the following psychology courses: 110, 119E, 119F, 119H, 119M, 139G, 139H, 140G, or 159H.

Program Planning Notes

Because some upper-division courses have additional prerequisites, students should read the descriptions of the upper-division courses carefully, noting the prerequisites for courses of interest to them.

Psychology Major Planners

Following are two recommended academic plans for students to complete during their first two years as preparation for the psychology major. Plan One is a suggested guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major or who need more preparation. Students should note that Mathematics 3 is a requirement for the major and a prerequisite for Psychology 2. Courses 20, 40, and 60 are recommended electives and are prerequisites for some upper-division psychology courses.

Plan One

| Year | Fall | Winter | Spring |
|------------|------------------|--|--------------------------|
| 1st (frsh) | MATH 3 PSYC 1 | PSYC 2 | PSYC 10 |

The Intensive Psychology Major

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses.

Requirements for the Intensive Major

Lower-Division Requirements

Psychology 1 *Introduction to Psychology* (or equivalent)

Psychology 2 *Introduction to Psychological Statistics* (or equivalent)

Psychology 10 *Introduction to Developmental Psychology*
Mathematics 3 *Precalculus* (or equivalent)

Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the psychology major.

Upper-Division Requirements

Fourteen upper-division courses are required for the intensive major. These courses must include Psychology 100 and two courses from each of the following four subfields, one of which must be a seminar:

Developmental (courses numbered 101–119)

Cognitive (courses numbered 120–139)

Social (courses numbered 140–159)

Personality (courses numbered 160–179)

Psychology 181, *Psychological Data Analysis*, or an equivalent course approved by the department

Two quarters of Psychology 194, *Advanced Research* or 195, *Senior Thesis*

Two upper-division courses from one or more related areas outside of psychology from lists of courses pre-approved by the Psychology Department and posted on the department's web site, <http://psych.ucsc.edu>. These two courses will not count toward the nine upper-division requirements listed above. (These courses may not include psychology courses cross-listed with other programs or taught by psychology faculty.) These courses also cannot be counted twice in cases of double majors or minors.

Minor in Psychology

To obtain a minor in psychology, a student must complete the following courses:

- Psychology 1 (or equivalent), 2 (or equivalent), and 10
- Mathematics 3 (or equivalent)
- six (32 units) upper-division courses in psychology. These courses must be from Psychology 100 and at least two of the four subfields: developmental, cognitive, social, and personality.

Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the minor in psychology.

No more than one psychology course numbered 191–199 may be used toward the upper-division requirements. At least three of the upper-division psychology courses (101–199 range) must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript.

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in one of our seminars. Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as “satisfies seminar requirement.”

Academic Advising

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology

Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002. The adviser assists students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students can also get advice about the Graduate Record Examination and assistance in initiating a senior thesis and independent studies. Students are encouraged to take advantage of the advising office throughout their college career.

Disqualification from the Major/Minor

Students who receive a No Pass, D, and/or F twice in any one of courses Psychology 1, 2, 10, or Mathematics 3 (or equivalent), or who receive a No Pass, D, and/or F in three or more of these courses combined, will be considered to be not making normal progress in the major or minor and will be subject to disqualification from the major or minor. Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time or their failure in three courses may appeal their disqualification from the major or minor and/or later petition the department for reinstatement. For further information regarding the disqualification process, contact the Psychology Department office.

Senior Thesis

Students with adequate substantive and methodological preparation and a consistent record of strong academic performance may be eligible to apply to write a senior thesis. Students should initiate plans for a thesis no later than the first quarter of their senior year. Most faculty prefer to sponsor senior theses that are integrated with faculty research, so students are encouraged to talk with faculty before choosing a senior thesis topic. Information and applications are available in the department office, 273 Social Sciences 2.

Honors

Honors in the psychology major are awarded to graduating seniors whose academic performance is judged to be consistently excellent by a committee of psychology faculty. Highest honors in the major are reserved for students with consistently excellent academic performance and an honors-level senior thesis.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with course work and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are information meetings and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information is included in the information meetings.

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program does not offer courses, training, or supervision in clinical psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the doctor of philosophy (Ph.D.) program may obtain a master of science (M.S.) degree by fulfilling specific requirements.

Graduate work in cognitive psychology trains students in the traditional methods of experimental psychology while mastering contemporary knowledge of cognitive psychology. The cognitive faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the faculty include human information processing, cognitive and social processes in learning and memory, language and discourse comprehension, reading, speech perception and production, computer simulation and mathematical modeling of cognitive processes, spatial vision, and visual psychophysics.

Graduate work in developmental psychology is concerned with the integration of individual, interpersonal, and cultural processes of development. Our faculty study these developmental processes in diverse communities and institutions, including families, peer groups, schools, museums, and close relationships. We use a mixture of quantitative and qualitative methods. This integrative training is supported by a National Institutes of Health (NIH) training grant that provides funding for graduate students and post-doctoral trainees. Some research interests of the faculty include: learning by observing, overhearing, and participating; infants' and children's cognitive and language development; conversation, narrative, and memory sharing; academic achievement and career aspirations; family/peer/school links; gender development and discrimination; personality development; personal and social identities; intergroup relations; ethnicity, culture, and development; social policy and educational practice.

The social psychology graduate program at UCSC has a unique mission and focus. We use Kurt Lewin's model of “full-cycle” (theory-application-action) social psychology to study a broad range of topics related to social justice. Our students learn to apply psychological theories and data to the analysis and solution of a wide range of social problems. Knowledge gained in action-oriented research leads, in turn, to the development of new theory. We examine justice-related issues in different cultural, political, and policy contexts, through a variety of research methods. Our students are trained in laboratory, field, and survey methods; they are encouraged to attend to issues of race, class, sexuality, ethnicity, gender, and physical ableness; and, in addition to traditional social psychological approaches, are steeped in critical theoretical perspectives such as feminist theory. Our graduates go on to successful careers in academia as well as in community, government, and non-profit settings. Our approach to research and training, combined with the quality and competencies of our faculty, make our program among the nation's best for the psychological study of social justice issues. Current faculty research interests include educational access,

sexuality, poverty and economic justice, psychology and law, aggression and trauma, peace psychology, intergroup relations, social identity, social policy analysis, structural inequality, intersectionality, political psychology, institutional analysis, and feminisms.

Students in all three research areas acquire teaching experience as teaching assistants for a minimum of two courses during their graduate career.

Graduate students in psychology may obtain a notation on the psychology Ph.D. diploma indicating that they have specialized in feminist studies and/or Latino American and Latino Studies (LALS) if they meet requirements spelled out by a committee composed of psychology and feminist studies faculty, or psychology and LALS faculty.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies web site. The department's graduate program brochure, and faculty research are available on the department web site.

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All graduate students must enroll and participate in the colloquium series each quarter (Psychology 230 for cognitive, Psychology 242 for developmental, and Psychology 231 for social.) First-year students must take two courses in statistics (Psychology 204 and Psychology 214A) and a two-quarter proseminar sequence during fall and winter quarters. (Psychology 224A and 224B for cognitive, Psychology 244A and 244B for developmental, and Psychology 211A and 211B for social.) Each student is also required to serve as a teaching assistant for at least two courses during his or her graduate career (one of which must be Psychology 10 for developmental and Psychology 40 for social).

Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

Additional requirements for the developmental area include: Psychology 225A, Psychology 225B, Psychology 246, one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

Additional requirements for the social area include: Psychology 210, Psychology 248, Psychology 249, one other advanced social graduate seminar, a graduate course in cognitive psychology, a graduate course in developmental psychology, and a substantive advanced course in a discipline other than psychology.

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., usually by the end of their third year. The qualifying examination is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying examination, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying examination.

Within two quarters of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of

some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee. After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam. The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

Lower-Division Courses

1. Introduction to Psychology. F,W,S

Introduces prospective majors to the scientific study of behavior and mental processes and also provides an overview for non-majors. Emphasizes social, cognitive, developmental, and personality psychology and their interrelations. (General Education Code(s): PE-H, IS.) (F) *T. Seymour*, (W) *The Staff*

2. Introduction to Psychological Statistics. W,S

An introduction to elementary statistical principles and techniques relevant to psychological research. Topics covered include basic parametric and nonparametric statistics, analysis of variance, and simple factorial designs. This course is prerequisite to course 181. Prerequisite(s): course 1 or 20, and Applied Mathematics and Statistics 3 or Mathematics 3 or 11A or satisfactory placement score on math placement exam or CEEB Advanced Placement Calculus AB exam. Enrollment limited to 165. (General Education Code(s): SR, Q.) *K. Cardilla*

10. Introduction to Developmental Psychology. F,W,S

Psychological development from birth to adolescence, with primary emphasis on infancy and childhood. A broad introduction to the field of developmental psychology. Prerequisite(s): course 1. Enrollment restricted to pre-psychology majors. (W) *M. Callanan*, (FS) *S. Wang*

20. Introduction to Cognitive Psychology. F

Introduces basic concepts in cognitive psychology. Topics include thinking, consciousness, perceiving, language, remembering, reasoning, problem solving, and decision-making. Enrollment limited to 120. *M. Wilson*

40. Introduction to Social Psychology. F

An analysis of contemporary research in social psychology and of what that research can teach us about the world we live in. Problems of conformity, propaganda, prejudice, attraction, and aggression. Focuses on a person's relationship with other people—how he or she influences them and is influenced by them. *A. Pratkanis*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division or graduate students under faculty supervision. (See course 192.) *The Staff*

60. Introduction to Personality Psychology. W,S

An overview of major personality theories from Freud to the modern day, and an introduction to contemporary personality research and assessment. Prerequisite(s): course 1. *P. Gjerde*

65. Introduction to Humanistic Psychology. S

Humanistic psychology is seen here as those contemporary aspects of the field which are explicitly directed toward life-enrichment for members of the culture. The course does not attempt a complete survey of these aspects, but rather explores some of them in depth and attempts to begin working toward an overall theory of the humanistic movement. (General Education Code(s): IS.) *R. Quinn*

80A. Psychology and Religion. F

Topics covered include myth and the unconscious, the varieties of religious experience, dualism, women and religion, the role of authority, transpersonal experience, conversion, disaffiliation, self and community. (General Education Code(s): T3-Social Sciences.) *R. Quinn*

Upper-Division Courses

100. Research Methods in Psychology (7 credits). F,W,S

An introduction to research methods used to investigate human psychology. Course emphasizes critical thinking, designing and conducting research, analyzing and interpreting data, and writing a professional research report. (Formerly course 3.) Prerequisite(s): Entry Level Writing and Composition requirements; course 2 or Applied Mathematics and Statistics 5. Enrollment restricted to prepsychology, psychology, and cognitive science majors; minors by permission of instructor. (FS) *F. Crosby*, (W) *N. Wilson*

Developmental

101. Topics in Developmental Psychology.

These topics, offered at different times by different instructors, examine selected topics in developmental psychology. (Formerly course 100.) *The Staff*

102. Adolescent Development: Adolescence into Young Adulthood. S

Focuses on individual and relational development from early adolescence into young adulthood. Emphasis on the mutual influences of family relationships and adolescent development, and on the interface of family, peer group, and school experience in cultural contexts. Prerequisite(s): courses 3 or 100 and course 10. *M. Azmitia*

103. Adult Development and Aging. F

An introduction to cultural, biological, interpersonal, and cognitive processes that influence adult development and aging. We discuss how each of these processes promotes stability and change during adulthood. (Formerly course 109.) Prerequisite(s): courses 3 or 100 and course 10. *M. Azmitia*

104. Development in Infancy. W

Focuses on psychological development in infancy. Presents research on perceptual, cognitive, and social-emotional development during the first two years of life. (Formerly course 101.) Prerequisite(s): courses 3 or 100 and 10. Enrollment restricted to psychology and cognitive science majors. *N. Akhtar*

105. Children's Thinking. S

Cognition in children from infancy through adolescence. Basic and current research on children's understanding of the social and physical world. Focus on major theoretical perspectives: Piaget's constructivist approach, information processing approach, and sociocultural approach. (Formerly course 117.) Prerequisite(s): courses 3 or 100 and 10. *N. Wilson*

106. Social and Emotional Development. W

An examination of contemporary theory and research on social and emotional development from infancy through childhood. Prerequisite(s): courses 3 or 100 and 10. *C. Leaper*

110. Culture and Human Development (6 credits). W

Examines theory, research, and methods of studying the inherent cultural basis of human development and variations and similarities in human lives and activities in different communities worldwide. The approach draws on

ideas and observations from psychology, anthropology, linguistics, sociology, and history. Course includes lab exercises using interview and observation methodologies and presentations of library research. (Formerly course 113.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and one of the following: course 3 or 100; Anthropology 1 or 2; Education 92A, 92B, or 92C; Latin American Studies 1; or Sociology 1. (General Education Code(s): W, E.) *B. Rogoff*

115. Lifespan Developmental Psychopathology. ES

Examines theory and research on developmental psychopathology. Emphasizes the origin and longitudinal course of disordered behavior. Explores the processes underlying continuity and change in patterns of adaptation and age-related changes in manifestations of disorders. Prerequisite(s): courses 3 or 100, 10, and 170. *K. Cardilla*

118. Special Topics in Developmental Psychology.

118A. Children and War. S

Examine development and behavioral ecology of children affected by war. Discuss development of displaced children, abandoned children, orphaned children, children living in protracted conflict, and child soldiers. Review child protection strategies and psychosocial intervention. (Formerly course 118.) Prerequisite(s): courses 3 or 100 and 10. *D. Hoffman*

118B. Children in Extreme Circumstances. W

Reviews child survival in life-threatening contexts. Examines the lives of street children, institutionalized children, orphans, children in extreme poverty, enslaved children, war-affected children, abandoned children, and children whose parents have HIV/AIDS and other life-threatening illnesses. Prerequisite(s): courses 3 or 100 and 10. Enrollment limited to 60. *D. Hoffman*

118C. Children's Understanding of the Human Mind. *

Reviews recent research on how children come to understand aspects of the human mind, such as desire, belief, goals, and intention. Also discusses the implications of this research on typically and atypically developing children. Prerequisite(s): courses 3 or 100, and 10. Enrollment restricted to psychology majors. Enrollment limited to 60. *S. Wang*

119. Senior Seminars in Developmental Psychology.

119A. Development as a Sociocultural Process. *

Examines theory and research in sociocultural approaches to how people (especially children) learn and develop through participating in activities of their communities with other people. Emphasizes the organization of social interactions and learning opportunities, especially in communities where schooling has not historically been prevalent. Satisfies seminar requirement. Satisfies senior comprehensive requirement. (Formerly course 100L.) Prerequisite(s): satisfaction of Entry Level Writing, Composition requirements; course 1, Anthropology 1 or 2, Education 92A, 92B, or 92C, Latin American and Latino Studies 1, or Sociology 1. Enrollment restricted to seniors or permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *B. Rogoff*

119B. Cultural Psychology. *

Critically analyzes relations among culture, ethnicity, identity, and the nation-state in a world characterized by globalization, migration, and social change. Exam-

ines the relevance of these features for the development of children and youth through examples from both Western and non-Western "cultures." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology and anthropology majors. Enrollment limited to 30. (General Education Code(s): E.) *P. Gjerde*

119D. Cultural Perspectives on Adolescent Development. W

Examines cultural influences on adolescence from the perspective of current interdisciplinary theory and research, focusing on identity, changes from early adolescence to adulthood, linkages from family to community experiences, gender, immigration, biculturalism, and implications for social policy. Includes research practicum. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors or permission of instructor. Enrollment limited to 30. *C. Cooper*

119E. The World of Babies. F

Focuses on how infants learn about intuitive physics, naive psychology, and shared culture. Also discusses possible ways to facilitate this learning. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *S. Wang*

119F. Language Development. F

An introduction to language development in children. Explores current theory and research in language development; focuses on the preschool years. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *N. Akhtar*

119G. Development of Thought and Language. *

Explores the dynamic interface between thought and language throughout development. Focuses on early expression and understanding of meaning in infants and young children and on analysis of everyday conversations and activities of children as a window on developing understandings of the world. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. (General Education Code(s): W.) *M. Callanan*

119H. Developmental Psychology Research and "Real World" Problems. S

Explores ways that research in developmental psychology can be used to address "real-world" problems facing children. With an analytical focus on evidence and generalizability, we will investigate research-policy connections in topics of popular interest (e.g., child custody, poverty). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. (General Education Code(s): W.) *M. Callanan*

119I. Special Topics in Narrative Development. *

Examines a special topic of current interest in developmental psychology centering on features of develop-

ment that unfold during free-flowing discourse, e.g., interviews, conversations, and reminiscences. Topics may include the development of self-narratives, personal memories, family stories, attachment, identity, or achievement. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Course 60 recommended. Enrollment limited to 30. *A. Thorne*

119M. Identity Development in Social and Cultural Contexts. F

Senior seminar that focuses on identity development in adolescence and young adulthood. Discusses theory and research on the development of personal and social identities and the sociocultural contexts in which these personal and social identities are negotiated. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 3 or 100; course 102 strongly recommended. Enrollment restricted to senior psychology majors or by permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *M. Azmitia*

Cognitive

120. Visual and Spatial Cognition. W

Focuses on visual and spatial representation as elements of human cognition. Topics include imagery, visual attention, mental models, spatial language, the body schema, near-body space, and brain organization for representing space. Prerequisite(s): course 3 or 100; course 20 or any upper-division cognitive course is highly recommended. *M. Wilson*

120D. Deafness and Sign Language. S

Explores what we can learn about human cognition by studying sensory loss and language in a different sensory modality. Topics include brain organization, sensory compensation, working memory, visual cognition, and psycholinguistics. Course 20 strongly recommended. Satisfies seminar requirement. Satisfies senior comprehensive requirement. (Formerly 139A.) Prerequisite(s): course 20 or an upper-division cognitive course strongly recommended. Enrollment restricted to senior psychology and cognitive science majors and minors. Enrollment limited to 30. *M. Wilson*

121. Perception. S

Basic perceptual psychology, emphasizing the relationships between perception and cognition. Topics include shape, color, and depth; hearing, taste, smell, and touch; and perceiving faces, voices, and language. Prerequisite(s): course 3 or 100 or Biology 70. *M. Wilson*

123. Behavioral Neuroscience. W

An examination of the physiological mechanisms of psychological processes, including sensory systems, motor systems, control systems, and memory and learning. Principles of nervous system organization are discussed at each level. Prerequisite(s): course 3 or 100 or Biology 70 and one course in statistics (course 2 or Applied Mathematics and Statistics 5 or 7). *B. Bridgeman*

124. Psychology of Reading. S

Focuses on the cognitive processes that underlie reading in adults. Additional topics include different writing systems, learning to read, and reading deficits. Recommended for upper-division students. Prerequisite(s): course 3 or 100. *A. Kawamoto*

125. The Psychology of Language. F

A study of human communication as a function of psychological, linguistic, and social factors. Topics covered include language comprehension and production, lan-

guage and reasoning, and language as a social activity. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and course 3 or 100. (General Education Code(s): W.) *N. Wilson*

126. Aging and the Human Brain. F

How does the brain change as we age? Course covers new developments in research on cognitive neuroscience and aging, with a focus on the consequences for memory, emotion, and decision-making. Prerequisite(s): course 3 or 100, and 20, 121, 123, 129 or Biology 70. *Q. Liu*

127. Computer Mediated Communication. *

Provides an introduction to perception and cognition as it relates to how people communicate with each other using computers and the Internet. Focuses on cognitive/perceptual aspects of communication. Prerequisite(s): course 3 or 100 or 20 or consent of instructor. Course 20 highly recommended. Enrollment limited to 40. *A. Kawamoto*

128. Human Factors. *

Human factors psychology studies human-machine interaction and computer usability, and involves diverse topics including displays and controls; human error; decision-making; psycholinguistics; and the role of fatigue, environmental stressors, and social/team factors that directly impact human performance. Prerequisite(s): course 3 or 100. *The Staff*

129. Human Learning and Memory. F

Examines basic theories, models, methods, and research findings in human memory. Both traditional and non-traditional topics are covered. Prerequisite(s): course 3 or 100. *J. Crowson*

130. Deception, Brain, and Behavior. *

Focuses on behavioral and brain manifestations of deception. Topics include developmental changes that allow us to understand and to use deception, physical implications of lying expressed in the face, voice, posture, and brain activity. Also covers mechanical or behavioral techniques used in deceptive behavior, whether in the form of overt behavior or brain activity. Prerequisite(s): course 3 or 100; course 20 or any upper-division cognitive course strongly recommended. *T. Seymour*

131. Human-Computer Interaction. W

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Interdisciplinary course for social science and engineering majors. Students cannot receive credit for this course and Computer Engineering 231 or Psychology 223 or Digital Arts and New Media 231. (Also offered as Computer Engineering 131. Students cannot receive credit for both courses.) Prerequisite(s): course 3 or 100 or Computer Science 12B. *The Staff*

135. Feelings and Emotions. *

Focuses on contemporary research in the psychology of human emotions. Special attention given to work in cognitive science, including psychology, linguistics, philosophy, and anthropology, on how emotions are central to understanding human action and mental life. Prerequisite(s): course 3 or 100, or major standing in linguistics, philosophy or anthropology. *R. Gibbs*

137. Mind, Body, and World. *

Psychologists primarily view the mind as being separate from the body, and the body as being separate from the external world. This course questions this widely held position and explores the way that minds arise from individuals' bodily interactions with others and the world

around them. Particular attention is paid to the role of human embodiment in language use and everyday cognition. Prerequisite(s): course 3 or 100, or major standing in linguistics, philosophy or anthropology. *R. Gibbs*

139. Senior Seminars in Cognitive Psychology. F,W,S

139B. Consciousness. *

Provides a psychological study of human consciousness. Aim is to explore the following questions: What is consciousness? Where does consciousness come from? What functions does consciousness have in everyday cognition? How do we best scientifically study consciousness? These issues are examined from the perspective of contemporary research in cognitive science. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, philosophy, anthropology, linguistics, and cognitive science majors. Enrollment limited to 30. *R. Gibbs*

139C. The Psychology of Lying and Deception. *

Discusses why and how people lie. Using scientific articles, movies, and our everyday lives as source material, explores the nature of lying; then focuses on various approaches to behavioral and mechanical "lie detection." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to psychology and cognitive science majors. Enrollment limited to 30. *T. Seymour*

139D. Modeling Human Performance. W

Hands-on experience using computational modeling to understand human cognitive-task performance by comparing simulated and human data. Satisfies senior seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to junior and senior psychology, computer science, and computer engineering majors, or by permission of instructor. Prerequisite(s): at least one of the following: course 121 or 123 or 128 or 129; or Computer Science 5C or 5J or 11 or 12A or 13H or 130 or 140. Enrollment restricted to cognitive science majors. Enrollment limited to 30. *T. Seymour*

139E. Psychology and Evolutionary Theory. S

Human psychology is examined from the viewpoint of evolutionary theory, including perspectives from ethnology, anthropology, and neuropsychology. Upper-division students from diverse backgrounds are encouraged to enroll. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to junior and senior psychology, anthropology, biology, philosophy, sociology, cognitive science, and feminist studies majors or permission of instructor. Enrollment limited to 30. *B. Bridgeman*

139G. Conversations. *

Explores how conversations work and how speakers accomplish their goals in an interaction. Topics include conversational structure, turn-taking, variation in language use, and the functions of discourse markers (words like "um," "uh," and "you know"). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *J. Fox Tree*

139H. Weird Science. *

Explores the relationship between science and pseudoscience from a cognitive psychological perspective, including discussion of collection and selection of data,

statistical assessment of data, cognitive illusions, memory distortions, reasoning, and decision-making. Also highlights the dissemination of scientific knowledge. Satisfies seminar requirement. Satisfies comprehensive requirement. (Formerly course 134.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *J. Fox Tree*

Social

140. Topics in Social Psychology.

140A. Women's Lives in Context: Community Practicum (2 credits). *

Provides link between course 140G and community organizations that work with women. Students complete internships with relevant agencies and participate in seminar meetings. Concurrent enrollment in course 140G required. Enrollment limited to 20. *H. Bullock*

140B. African American Psychology. W

Incorporates historical and conceptual foundations; issues of social psychology; individual and developmental processes; and adjustment and clinical issues. Readings expose students to attributes of African American culture that have an impact on the psychology of African Americans as well as methodological issues relevant to key psychological topics. Prerequisite(s): course 3 or 100 or declaration of major in one of the following programs: feminist studies, sociology, community studies, or politics. Enrollment limited to 60. (General Education Code(s): E.) *A. White*

140G. Women's Lives in Context. W

Examines gender as a psychological and social factor that influences women's experiences in different contexts. Cuts across other areas of psychology by taking a women-centered approach. Emphasis also placed on understanding how intersections between gender, race and ethnicity, sexual orientation, socioeconomic status, etc., impact women's psychological well-being. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100, or sociology 103B, or feminist studies 100, or community studies 100. Enrollment restricted to junior and senior psychology, feminist studies, sociology, and community studies majors. (General Education Code(s): W.) *S. Grabe*

140L. Women's Bodies and Psychological Well-Being. *

Examines how women's bodily experiences (e.g., sexual objectification, violence, menarche, sexual health) are uniquely tied to their subordinate status and impacts their psychological well-being. Theories of gender inequality will address how social control directed at women's bodies through power relations imbedded in societal institutions contributes to women's marginalized status. Prerequisite(s): courses 3 or 100. Enrollment limited to 60. *S. Grabe*

140Q. Social Psychology of Sex and Gender. F

Considers individual, interpersonal, and cultural influences on gender similarities and differences in thinking, motivation, and behavior. Emphasizes factors related to power and status inequalities between women and men. Prerequisite(s): courses 3 or 100 and course 40. *C. Leaper*

140T. Psychology of Trauma. S

Overview of psychological theory and research on trauma and traumatic stress, including responses to childhood trauma (especially sexual abuse), combat, and natural disasters. Variety of theoretical frame-

works presented, including developmental, cognitive, neuropsychological, clinical, and social/contextual. Prerequisite(s): course 3 or 100 or permission of instructor. *E. Zurbruggen*

142. Psychology of Oppression and Liberation. W Provides theoretical frameworks for understanding interlocking systems of oppression from the perspective of "the oppressed" as well as "the oppressor" nationally and internationally. Goes beyond mainstream (traditional) psychology and emphasizes critical psychological perspectives that include micro- and macro-level theories of oppression; importance of ideology in oppressive systems; and theories of social change and liberation across contexts. Prerequisite(s): course 3 or 100 or declaration of major in one of the following programs: feminist studies, sociology, community studies, or politics. Enrollment limited to 120. (General Education Code(s): E.) *A. White*

143. Intergroup Relations. F Introduces the study of conflict and intergroup relations. Examines historical and cultural foundations of group psychology and social psychological theory and research on conflict between groups, cultures, and nations. Surveys work on multiculturalism, race relations, and global political conflict. Applies social psychological theories to cases of intergroup conflict. Prerequisite(s): course 3 or 100, or major standing in politics, community studies or anthropology, or by permission of instructor. Enrollment limited to 120. (General Education Code(s): E.) *M. Sinha*

145. Social Influence. W An advanced course for upper-division undergraduates interested in the study of the persuasion process. The course investigates common influence tactics and how those tactics are used in various settings. Prerequisite(s): course 3 or 100. *A. Pratkanis*

145D. Social Psychology of Autocracy and Democracy. S Humans are the only animal capable of living in both authoritarian and democratic regimes. Course explores the nature of these forms of social relationships with a goal of promoting democracy. Topics include: obedience to authority, conformity, self-justification, propaganda, power, and conflict resolution. (Formerly course 159G.) Prerequisite(s): course 3 or 100. Enrollment restricted to senior psychology majors. *A. Pratkanis*

146. The Social Context. S A systematic analysis of the social and contextual determinants of human behavior, with special attention given to concepts of situational control, social comparison, role and attribution theories, as well as the macrodeterminants of behavior: cultural, historical, and sociopolitical context. Prerequisite(s): courses 3 or 100 and course 40; or Sociology 136. *M. Sinha*

147A. Psychology and Law. W Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment. (Also offered as Legal Studies 147A. Students cannot receive credit for both courses.) Prerequisite(s): courses 3 or 100; and course 40 is highly recommended prior to taking this course. Enrollment restricted to psychology, pre-psychology, and legal studies majors. *The Staff*

147B. Psychology and Law. * Continuing discussion of current and future relationships between law and psychology and to contrasting psycho-

logical realities with legal fictions. Special attention is given to the criminal justice system including crime causation, the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment. (Also offered as Legal Studies 147B. Students cannot receive credit for both courses.) Prerequisite(s): course 147A. *C. Haney*

149. Community Psychology: Transforming Communities. F Introduction to community psychology, a discipline that blends social psychology, sociology, and anthropology. Class topics include levels of analysis, ecologies, prevention, intervention, feminism, empowerment, sense of community, coalition building, and social justice and action. Prerequisite(s): course 3 or 100. Enrollment restricted to juniors and seniors. *R. Langhout*

150. Social Psychology of Flimflam. F Why do we believe strange things? This course investigates such flimflams as beliefs in the Loch Ness Monster, quack health care, and racial superiority to illustrate the underlying social psychological principles that lead us to adopt weird attitudes. (Formerly course 159I.) Prerequisite(s): course 3 or 100. (General Education Code(s): SL.) *A. Pratkanis*

153. The Psychology of Poverty and Social Class. * Examines how social class shapes attitudes, beliefs, and behaviors. Emphasis is placed on structural barriers and their impact on the well-being of low-income groups. Strategies for reducing classist discrimination and improving interclass relations are discussed. Prerequisite: course 3 or 100, or major standing in anthropology, community studies, economics, legal studies, politics, sociology, or feminist studies. *H. Bullock*

153A. Psychology of Poverty and Social Class Community Practicum (2 credits). * Provides a link between course 153 and community organizations with an antipoverty mission. Students complete internships with nonprofit agencies and participate in seminar meetings. Prerequisite(s): concurrent enrollment in course 153. Enrollment limited to 20. *H. Bullock*

157. Chicana Feminism. * Students are introduced to the writings of Chicana feminists to identify the gender issues that produce conflict and cooperation in their communities. The course also makes linkages to gender issues in other U.S. communities of color and Latin America. (Also offered as Feminist Studies 151A. Students cannot receive credit for both courses.) Prerequisite(s): course 3 or 100 or Feminist Studies 1. (General Education Code(s): E.) *A. Hurtado*

158. Latinos in the Media. * Introduces portrayals of Latinos in the U.S. media including magazines, film, and television. Covers the most recent social psychological research on media representations and implications for identity. Prerequisite(s): course 3 or 100 or Latin American and Latino Studies 1. (General Education Code(s): E.) *A. Hurtado*

159. Senior Seminars in Social Psychology. F,W,S
159A. Lesbian, Gay, Bisexual, and Transgender Psychology. * Considers the experience of lesbian, gay, bisexual, and transgender individuals from a psychological perspective. Review theory and research on sexual orientation; sexual-identity development; and same-sex sexual desire and behavior. Considers contemporary policy issues, such as same-sex marriage and health issues, such as HIV for their implications for psychological well-

being. Satisfies seminar requirements. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *P. Hammack*

159B. Research Seminar in Crime and Media. * Empirically examines several aspects of the criminal justice system (in particular, jury decision making and media effects on juror fairness and impartiality). In addition to extensive reading, students participate in research projects. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): courses 147A and 147B; or Legal Studies 147A and 147B; or concurrent enrollment in course 147B or Legal Studies 147B. Enrollment restricted to senior psychology and legal studies majors. Enrollment limited to 30. *C. Haney*

159C. Social Issues Research. * Reviews contemporary social issues research. Emphasizes understanding how researchers study social problems and how theory and research can contribute to social change. Examines intersections of psychology and social policy. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *H. Bullock*

159D. Psychology of Sexual Aggression. W An overview of psychological theory and research related to sexual aggression, focusing on both perpetration and victimization. Includes a discussion of the social construction of masculinity and femininity, media representations of sexual violence, and alternative (non-aggressive) visions of sexuality. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology or feminist studies majors or permission of instructor. Enrollment limited to 30. *E. Zurbruggen*

159E. Peace Psychology. F Is war inevitable? What is peace? Is it more than the absence of violence? Explore how psychology—the study of human behavior—can help to decrease violence and enhance cooperation at multiple levels including the personal, interpersonal, community, and international arenas. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *A. White*

159F. Culture and Identity. * Considers the relationship between culture and identity in the "local" context of multiculturalism in America and the "global" context of conflict and identity politics. Examines concept of "culture," "ethnicity," "race," and "identity" in social science literature. Considers issues of power, social justice, and identity pluralism in both domestic and international contexts. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *P. Hammack*

159H. Community-Based Interventions. W Topics include: what makes a successful intervention; what happens before the formal intervention begins; the ethics involved with interventions; different methods for assessing interventions; and different praxis models. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *R. Langhout*

159J. Social Psychology of Social Justice. *

Why do some situations seem fair and others unfair? Are all people concerned with justice or are some scoundrels? This course looks at the principles of distributive, procedural, and retributive justice and at real world applications of theories. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *F. Crosby*

159K. Advanced Topics in Chicana Feminism. *

Course is a continuation of course 151A which introduces students to the writings of Chicana feminists to identify the gender issues that cause conflict and cooperation in their communities. The seminar format allows students an opportunity for extensive discussion. (Also offered as Feminist Studies 151B. Students cannot receive credit for both courses.) Satisfies senior requirements. Satisfies senior comprehensive requirement. Prerequisite(s): courses 1, 40, or 157 or Feminist Studies 1, 100, or 151A, or consent of instructor. Enrollment restricted to juniors and seniors. Enrollment limited to 30. *A. Hurtado*

159M. Transnational Feminism. *

Reviews and discusses scholarship that takes into account women's role in development and how access to resources impacts the structures that perpetuate gender inequalities. Uses a transnational gendered lens to evaluate the impacts of globalization on women's well-being and ways alternative development can alter structural inequities and transform the conditions in which women can confront aspects of their subordination, thereby impacting their psychological well-being. Satisfies senior seminar and senior comprehensive requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *S. Grabe*

159P. Social-Community Psychology in Practice. S

This service-learning course requires time in the classroom and the field. Students gain a deep understanding of social justice paradigms, community-based collaborative research, ethics, field-based research, reflexivity, and socio-cultural development modes. Courses 149 and 182 are recommended prior to taking this course. Satisfies senior comprehensive requirement. Admission by application and interview only. Enrollment limited to 15. *R. Langhout*

159T. Small Groups. *

Course strives toward three goals of varying specificity: knowledge of the psychological literature on small groups, aspects of group functioning, and what theorists have found in group studies; effectiveness in group settings; and behavior in group settings. Students required to set aside one weekend for lab work. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement. Prerequisite(s): course 40. Enrollment limited to senior psychology majors. Enrollment limited to 30. *F. Crosby*

Personality**163. Freud. ***

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Philosophy 139. Students cannot receive credit for both courses.) Prerequisite(s): Philosophy 100A or 100B or 100C. Offered in alternate academic years. *J. Neu*

165. Systems of Psychotherapy. W

A review of methods of psychotherapy, with attention to the underlying assumptions about personality, health, and disease. Prerequisite(s): course 3 or 100; course 60 or 170 recommended. *V. Tonay*

166. Personality Assessment. S

How do we really know a person? Course provides hands-on experience with assessing such individual differences as intimacy motivation, dominance, paranoia, and well-being. Students construct their own personality test and learn to critique the kinds of self-report, observational, and interview techniques that are used in organizational and counseling contexts. Prerequisite(s): course 3 or 100; course 60 highly recommended as preparation. *V. Tonay*

167. Clinical Psychology. W

Serves as an in-depth introduction to the field of clinical psychology. Covers issues of clinical assessment, interviewing, testing, and a range of therapeutic modalities. Prerequisite(s): courses 3 or 100, and 60 or 65; course 170 is recommended as preparation. *R. Quinn*

169. Community Mental Health. F

Examines theory and research on outreach and prevention for application with various populations in community settings (e.g., victims of violence, immigrants, severely mentally ill); presents characteristics of successful agencies and agency development. Surveys interventions currently used in community mental health. Prerequisite(s): course 3 or 100. Courses 60 and 170 recommended. *V. Tonay*

170. Abnormal Psychology. F,W,S

Survey of theory and research on the nature of behavioral disorders. Covers psychological, biological, developmental, and socio-cultural approaches. Prerequisite(s): course 3 or 100; course 60 highly recommended as preparation. (F) *K. Cardilla*, (FWS) *D. Hoffman*

171. Childhood Psychopathology. F

A critical and intensive exploration of a wide variety of specific disorders within their biological, developmental, and social contexts. Concepts of psychopathology in childhood, major and minor diagnostic systems, and a variety of theories of etiology are explored. General intervention strategies and a wide range of specific psychotherapy systems for treatment are closely examined and demonstrated. Prerequisite(s): courses 3 or 100; and courses 10, and 170. *D. Saposnek*

175. Personality, Relationships, and Emotions. S

Explores the nature, origins, and development of human personality as it relates to emotions in the context of close relationships. Prerequisite(s): course 3 or 100. Courses 10 and 60 recommended as preparation. *A. Thorne*

179. Senior Seminars in Personality Psychology.**179A. Theories of Moral Psychology. S**

A seminar course with focus on theories of moral development from the psychoanalytic, social learning, cognitive-developmental, and humanistic perspectives. Students confront and discuss moral dilemmas from the four perspectives, working toward their own individual theories of pro-social behavior. Course satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): essay required on a moral issue or dilemma relevant to the student's life. Enrollment limited to 30. *R. Quinn*

179B. Children and Divorce. S

Explores history and psychology of divorce and the short- and long-term effects of divorce on children. Examines wide range of findings that have drawn diametrically opposed conclusions; delves into social attitudes and legal structures that have impeded and

enhanced divorce transitions for children and parents; investigates future models for divorcing that are child-friendly and consistent with findings from newly emerging longitudinal research on children and divorce. Satisfies seminar and senior comprehensive requirements. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *D. Saposnek*

General, Statistics and Research Methods**181. Psychological Data Analysis. W**

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparison, repeated-measures, nested-designs, correlational analysis, bivariate regression), corresponding SAS programs, and elements of measurement theory. Prerequisite(s): course 3 or 100. (General Education Code(s): Q.) *The Staff*

182. Advanced Research Methods. *

Designed to equip students with the ability to evaluate, conceive, and carry out psychological research. A variety of techniques (observational, ethnographic, and field) examined and experienced. Students carry out research projects. Prerequisite: course 3 or 100. Enrollment limited to 30. *R. Langhout*

Senior Seminars and Independent Study**190. Senior Seminars.**

Special topics with a format varying each quarter. *The Staff*

191. Teaching College Psychology.

A series designed to provide undergraduates at the upper-division level with an opportunity to participate in planning and teaching college-level psychology. May not be repeated for credit. *The Staff*

191A. Introduction to Teaching Psychology. F,W,S

Students lead discussion groups and provide one-to-one tutoring for courses 1 or 3 or 100. Admission requires essay describing interest in becoming a course assistant, copies of psychology evaluations, and a letter of recommendation from a psychology faculty member; completion of some upper-division psychology courses prior to enrollment in this course. Prerequisite(s): course 3 or 100. Enrollment restricted to psychology majors. (Formerly *Introduction to Psychology*.) Enrollment limited to 20. (F) *T. Seymour*, (S) *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar (course 42) under faculty supervision. Available only to upper-division or graduate students. Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Series designed to provide advanced psychology undergraduates opportunity to apply what they have learned in the classroom to direct experience in a community agency. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students' academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience. A two-quarter commitment. Students submit petition to sponsoring agency. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193A. Developmental Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the developmental area under the guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. Enrollment limited to 100. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193B. Cognitive Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the cognitive area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193C. Social Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in the social area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193D. Clinical/Personality Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in clinical or personality area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

194. Advanced Research in Special Topics.

Provides a means for a small group of students to do research on a particular topic in consultation with a faculty sponsor. *The Staff*

194A. Advanced Developmental Research. F,W,S

Provides students with intensive experience conducting current research in developmental psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194B. Advanced Cognitive Research. F,W,S

Provides students with intensive experience conducting current research in cognitive psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194C. Advanced Social Research. F,W,S

Provides students with intensive experience conducting current research in social psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like

to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

198. Independent Field Study. F,W,S

Provides psychology majors with the opportunity to apply what has been learned in the classroom to direct experience in a community agency outside the local community. Students earn academic credit by working as interns at a variety of psychological settings, where they are trained and supervised by a professional on site. Faculty also supervise the students' field study, providing guidance and help integrating psychological theories with their hands-on experience. Two-quarter commitment required. Admission requires completion of lower-division psychology major requirements; students submit petition to sponsoring agency. Applications are due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students must file a petition with the Psychology Office the quarter in which they would like to take the tutorial. Petitions may be obtained in the Psychology Department Office. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Specialized study with individual faculty as psychology peer advisors. May not be applied toward major requirements. Students submit petition to sponsoring agency. Application and interview required during the previous quarter. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199G. Tutorial (3 credits). F,W,S

Specialized study with individual faculty. May not be applied toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses**204. Quantitative Data Analysis. F**

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparisons, repeated-measures, nested-designs, correlational analyses, bivariate regression), corresponding SAS programs, and elements of measurement theory. Enrollment restricted to graduate students. Enrollment limited to 20. *R. Langhout*

210. The Experimental Method in Social Psychology. *

Explores the philosophy and practice of the experimental method in social psychology. Enrollment restricted to graduate students. *E. Zurbriggen*

211A. Proseminar: Social Justice and the Individual. F

Provides an introduction to social psychology, focusing on various individual-level social justice topics, including the self, social comparison, individual and collective identity, social historical and social structural determinants of behavior and various policy and social change-related issues. Enrollment restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *E. Zurbriggen*

211B. Social Justice, Society, and Policy. W

Provides an introduction to social psychology, focusing on empirical and theoretical developments related to social justice and group and intergroup dynamics. Topics include: prejudice and discrimination, power, collective action, and psychology's relationship to social policy. (Formerly *Proseminar: Groups in Society*.) Enrollment restricted to psychology graduate students. Undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *C. Haney*

213. Special Topics in Social Psychology. *

Focuses on particular issues of theoretical and practical importance in social psychology. Topics vary from year to year and often concentrate on issues of social justice, social identity, intergroup relations, and social policy. Enrollment restricted to graduate students. May be repeated for credit. (FWS) *The Staff*

214A. Multivariate Techniques for Psychology. W

Provides introduction to multiple regression (MR) and multivariate analysis of variance (MANOVA) as data analytic methods. Both methodological and statistical aspects of multivariate data analysis discussed. Practical problems in estimating and testing regression and ANOVA models addressed. Gain experience in carrying out and interpreting analyses using SPSS. Prerequisite(s): course 204. Enrollment limited to graduate students. Enrollment limited to 20. *The Staff*

214B. Advanced Multivariate Techniques for Psychology. *

Provides introduction to factor analysis and structural equation modeling (SEM). Develop skills in defining, estimating, testing, and critiquing models. Topics include rationale of SEM, model identification, goodness of fit, and estimation. Learn how to use relevant software packages (SPSS, LISREL, EQS, and/or AMOS) to conduct exploratory and confirmatory factor analyses, path analyses, and full ("hybrid") analyses with latent variables. Prerequisite(s): course 214A. *E. Zurbriggen*

215. Production and Comprehension of Spontaneous Speech. *

Seminar on the use of collateral signals as backchannels,

discourse markers, and enquoting devices, including discussion of historical origins, cross-linguistic borrowing and second-language learning, children's acquisition, and the use of signals as markers of culture and identity. Enrollment restricted to psychology graduate students. *J. Fox Tree*

220. Special Topics in Human Memory. *

Topics announced when offered. Seminars involve discussion and critical evaluation of current, historical, and interdisciplinary readings relevant to topic. Emphasis on development of research ideas. Enrollment restricted to graduate students. Enrollment limited to 12. *The Staff*

221. Visual Perception. *

Seminar to study human perception, its methodology, and driving issues as illustrated by selected research topics (e.g., adaptation to unusual sensory environments). Where possible, parallels with other areas of psychology are drawn. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Bridgeman*

222. Topics in Lexical Organization. F

The recognition of words is a critical step in natural language processing. Discusses a range of contemporary issues related to the representation of a word and the access of this information from the perspective of psychology, linguistics, and artificial intelligence. Enrollment restricted to psychology graduate students; undergraduates who have completed course 124 may enroll with permission of instructor. Enrollment limited to 10. *A. Kawamoto*

223. Human-Computer Interaction. W

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Individual research project. Interdisciplinary course for art, social science and engineering graduate students. Students cannot receive credit for this course and course 131. (Also offered as Computer Engineering 231 and Digital Arts and New Media 231. Students cannot receive credit for three courses.) Enrollment restricted to graduate students. *S. Kurniawan*

224A. Proseminar: Cognitive I. F

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *B. Bridgeman, A. Kawamoto*

224B. Proseminar: Cognitive II. W

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *T. Seymour, J. Fox Tree*

225A. Introduction to Developmental Research I (3 credits). F,W

Surveys the rationale and techniques of research in developmental psychology. Students build skills in evaluating published research, in translating theoretical ideas into researchable hypotheses, and in selecting appropriate research designs, measurement, and statistical approaches for research problems. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters. Enrollment restricted to psychology graduate students or with instructor's permission. May be repeated for credit. *C. Cooper*

225B. Introduction to Developmental Research II. S

Focuses on drawing reasonable conclusions from research

findings by focusing on students' first-year research projects and critiques of existing research. Enrollment restricted to psychology graduate students. *S. Wang*

227. Contemporary Issues in Psychology of Language. *

Special topics in thought and language are examined from the perspectives of cognitive science. Particular attention given to embodied experience and higher-order cognition. Enrollment restricted to graduate students. May be repeated for credit. *R. Gibbs*

229. Computer Simulation Models. *

Course analyzes various computer simulation techniques and how they can be used to model perception and cognition. Parallel processing in networks is emphasized. Enrollment restricted to graduate students; undergraduates who have completed course 132 may enroll with permission of instructor. Offered in alternate academic years. *A. Kawamoto*

230. Research in Cognitive Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in perception and cognition, including topics in psychobiology, psycholinguistics, and memory. Enrollment restricted to psychology graduate students. May be repeated for credit. (F) *B. Bridgeman*, (W) *J. Fox Tree*, (S) *T. Seymour*

231. Research in Social Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in social psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. (F) *E. Zurbriggen*, (WS) *S. Grabe*

232. Evolution of Cognition. *

Explores current research on evolution of human cognition, drawing on findings from other species and from the archaeological record. Topics include language, working memory, episodic memory, numerical abilities, and social cognition. Enrollment restricted to graduate students. *The Staff*

235. Infant Development in Contexts. *

Seminar on how contextual factors influence the development in infancy, especially on cognitive domains. Discusses at least four types of contextual factors: cultural, experiential, event, and interpersonal contexts. Enrollment restricted to psychology graduate students. *S. Wang*

236. Paradigms of Culture. *

Integrative seminar on the relationship between individual psychological experience and its social, cultural, and institutional context. Explores various paradigms of "culture" in social science literature, including psychoanalytic theory, culture and personality, cultural psychology, Marxism, symbolic interactionism, poststructuralism, postcolonial theory, narrative, and Vygotsky's sociocultural theory. (Formerly *Person, Culture, Society*.) Enrollment restricted to graduate students. Enrollment limited to 10. *P. Hammack*

242. Research in Developmental Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in developmental psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. (FW) *B. Rogoff*, (S) *M. Azmitia*

244A. Proseminar I: Cognitive and Language Development. F

Explores major theories and research in the fields of cognitive development and language development. Begins

with classic theories, such as Piaget's theory of cognitive development, and proceeds to theories and research on topics of current interest, such as the relation between culture and cognitive and language development. Enrollment restricted to graduate students. *N. Akhtar*

244B. Proseminar II: Social and Personality Development. W

An examination of contemporary theory and research on socioemotional and personality development across the lifespan. (Formerly *Proseminar II: Social, Emotional, and Personality Development*.) Enrollment restricted to graduate students. *C. Leaper*

245. Computational Models of Discourse and Dialogue. S

Focuses on classic and current theories and research topics in the computational modeling of discourse and dialogue, with applications to human-computer dialogue interactions; dialogue interaction in computer games and interactive story systems; and processing of human-to-human conversational and dialogue-like language such as e-mails. Topics vary depending on the current research of the instructor(s) and the interests of the students. Students read theoretical and technical papers from journals and conference proceedings and present class lectures. A research project is required. (Also offered as Linguistics 245. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Undergraduates may enroll with permission of instructor. May be repeated for credit. *M. Walker*

246. Cultural Diversity in Human Development. S

Focuses on issues of culture and ethnicity in our theoretical and empirical understanding of human development. Particular attention paid to issues of language, culture, and socialization as they relate to social institutions, such as education, that affect children and families. Enrollment restricted to graduate students. Enrollment limited to 20. *C. Cooper*

247. Special Topics in Developmental Psychology. F

Focuses on particular issues of theoretical importance in developmental psychology. Topics vary from year to year. Particular issues in language, culture, cognitive, social, and personality development may be covered. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *B. Rogoff*

248. Survey Methods. F

Practicum to give students hands-on experience with survey methods by conducting their own survey on the topic of their choice. Course requires the survey to be conducted off campus at a local agency or program chosen by student with approval of instructor. Enrollment restricted to graduate students. Enrollment limited to 10. *C. Haney*

249. Field Methodologies and Social Ethnography. *

Designed to train graduate students in applied field methods. Emphasis is on gaining knowledge and experience with actual field methods, by conducting social ethnography in the community. Field research in community placements required. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *C. Haney*

250. Prejudice and Social Relations. *

Examines the ways in which the various branches of psychology have approached the issue of prejudice. Attention paid to the assumptions underlying each approach and their relation to core psychological ideas such as the self and emotion. Enrollment restricted to graduate students. *The Staff*

251. Feminist Theory and Social Psychology. *

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion. (Also offered as Feminist Studies 251. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *A. Hurtado*

252. Special Topics in Cognitive Psychology. *

Focuses on particular issues in cognitive psychology. Topics vary from year to year. Particular issues in language, memory, perception, attention, judgment and decision making, problem solving, reasoning, emotion, cognitive modeling, cognitive neuroscience, and cognition and aging covered. Enrollment restricted to graduate students. May be repeated for credit. *M. Wilson*

253. Theory and Research in Intergroup Relations. *

Examines, compares, and contrasts a variety of theories in intergroup relations while examining relevant empirical research. The relevance of both theory and research findings to contemporary social issues is explored. Enrollment restricted to psychology graduate students; undergraduates considering graduate work in social psychology are encouraged to enroll with permission of instructor. Enrollment limited to 12. Offered in alternate academic years. *The Staff*

254. Psychology of Gender. *

Course reviews recent theory, research, and applications in the psychology of gender. Developmental, social-psychological, cultural, and feminist approaches are emphasized. Enrollment restricted to graduate students. *C. Leaper*

256. Psychology of Social Class and Economic Justice. *

Course examines the social psychological antecedents, correlates, and consequences of economic inequality in contemporary U.S. society. The impact of social class on attitudes, beliefs, and behaviors is assessed. Strategies for reducing classist discrimination and improving interclass relations are discussed. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Bullock*

261. Participatory Action Research. S

Participatory Action Research (PAR) is a theoretical standpoint and collaborative methodology that is designed to ensure that those affected by the research project have a voice in that project. Topics include philosophies of science; defining and evaluating PAR; ethics; and reflexivity. Enrollment restricted to graduate students. Enrollment limited to 10. *R. Langhout*

264. Transnational Feminism, Development, and Psychology. S

A transnational feminist lens examines international development as linked to broader ideologies that transform gender relations and enhance women's empowerment. A social-psychology framework brings theoretical and practical import to the issues and examines how research can contribute to social justice and women's human rights. Enrollment restricted to graduate psychology students, or by permission of instructor. *S. Grabe*

290. Proseminar.

Various topics to be offered throughout the year.

290B. Advanced Developmental Research and Writing (2 credits). F,W,S

Tailored to graduate students' interests among topics involving research and scholarship in sociocultural approaches to development, methods for research design, data collection, coding, and analysis, and preparing and reviewing grant proposals and journal manuscripts. Multiple-term course; students receive 6 credits in the

third quarter of attendance; the performance evaluation and grade submitted for the final quarter applies to all three quarters. Enrollment restricted to graduate students. May be repeated for credit. *B. Rogoff*

290C. Professional Development (3 credits). F,W

Designed to aid advanced psychology graduate students with development of competence in professional activities (e.g., preparing a vita, making job and conference presentations, submitting and reviewing manuscripts and grant proposals, professional communication, career decisions). Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to the previous quarter. Enrollment restricted to advanced psychology graduate students. May be repeated for credit. *B. Rogoff*

290E. Grant Writing for Psychologists. W

Discusses how to write and put together a grant proposal for psychological research, culminating in a completed proposal. For psychology graduate students at all levels of their careers, applying to predissertation, dissertation, summer, or postdoctoral funding sources. Enrollment restricted to psychology graduate students. *J. Fox Tree*

293. Field Study. F,W,S

Student-designed and student-conducted research carried out in field settings. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. *The Staff*

299. Thesis Research. F,W,S

The Staff

Queer and Sexuality Studies

Feminist Studies
315 Humanities 1
(831)459-2461
fmst@ucsc.edu
<http://queer.ucsc.edu>

Program Description

Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found in American studies, anthropology, community studies, feminist studies, film and digital media, history, history of consciousness, legal studies, literature, sociology and theater arts.

For more specialization, departments such as Community Studies, Feminist Studies, and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

Research activities are sponsored by the Queer Theory research cluster (a part of the Center for Cultural Studies), the Queer and Sexuality Studies Working Group, and many campus departments and student organizations.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at <http://queer.ucsc.edu> or via e-mail at queer@ucsc.edu.

More information may be obtained from members of the faculty working group: Anjali Arondekar (Feminist Studies), Carla Freccero (Literature, Feminist Studies, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Community Studies), B. Ruby Rich (Community Studies), Gabriela Sandoval (Sociology). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature, Feminist Studies), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Catherine S. Ramirez (American Studies), Jenny Reardon (Sociology), Lisa Rofel (Anthropology), Danny Scheie (Theater Arts), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact Anjali Arondekar in the department of Feminist Studies in the Humanities Division (arondek@ucsc.edu) for information about course offerings and resources.

Religious Studies

Religious studies is not a separate program at UCSC, but students interested in the study of religion can select a degree plan from several majors and complement the requirements from a broad array of courses that focus on religion. Majors particularly appropriate for the study of religion at UCSC include the following: anthropology, history, history of art and visual culture, literature, and philosophy. Two departments, the Department of History of Art and Visual Culture and the Department of Philosophy, offer specific concentrations within their majors for students interested in the study of religion. The Department of History of Art and Visual Culture offers a concentration in religion and visual culture, while the Department of Philosophy offers a concentration in religious thought.

Students interested in the study of religion may build an independent program of study by fulfilling the requirements of one of the majors listed above and, under the guidance of a member of the faculty, use elective courses to develop a concentration of study appropriate to their interests and needs. One of the following faculty should be contacted to discuss a course of study in religion at UCSC: Murray Baumgarten (literature), Raoul Birnbaum (history of art and visual culture), Gildas Hamel (history), Susan Harding (anthropology), Ralph Quinn (psychology), Triloki N. Pandey (anthropology), Cynthia Polecristi (history), and Marilyn Westerkamp (history).

Students seeking information on an individual major in religious studies should contact their college academic preceptor.

Russian

Language Program

Faculty and Professional Interests

Lecturer

WILLIAM NICKELL

Leo Tolstoy, Russian cultural history, 1920s and 1930s Soviet Russia, Russian Soviet film, Russian language and pedagogy

Program Description

Russian language, beginning and intermediate level language courses are offered. Students may also select an individual major in Russian studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Lower-Division Courses

1. Instruction in the Russian Language. F

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Elementary sequence (1-2-3) begins in the fall quarter only. *The Staff*

2. Instruction in the Russian Language. W

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 1, or by permission of instructor. *The Staff*

3. Instruction in the Russian Language. S

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 2, or by permission of instructor. *The Staff*

4. Intermediate Russian. F

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 3; or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Russian. W

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 4; or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

6. Intermediate Russian. S

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 5; or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*
99F. Tutorial (2 credits). F,W,S
Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Science Communication

Kresge Annex A
(831) 459-4475
<http://scicom.ucsc.edu>

Faculty and Professional Interests

PETER ALDHOUS, Lecturer in Science Writing
Science journalism, feature writing, magazine editing, investigative and policy reporting

GLENDA G. CHUI, Lecturer in Science Writing
Science journalism, newswriting, magazine editing

MARC A. DESJARDINS, Lecturer in Science Writing
Newspaper reporting and editing

ROBERT W. IRION, Senior Lecturer in Science Writing, Program Director
Science journalism, newswriting, feature writing, and editing

MARTHA MENDOZA, Lecturer in Science Writing
Newswriting, investigative and policy reporting

KENNETH McLAUGHLIN, Lecturer in Science Writing
Science journalism, newspaper reporting and writing

MARY K. MILLER, Lecturer in Science Writing
Science journalism, web media, videography, educational and museum outreach

PAUL R. ROGERS, Lecturer in Science Writing
Newswriting, environmental reporting

EVELYN J. STRAUSS, Lecturer in Science Writing
Science and health journalism, science advocacy, essay and profile writing

Program Description

The Science Communication Program is a graduate certificate program composed of one track: science writing. Students combine a background in science with a desire to communicate science to the general public. The program focuses on the theory and practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications

directed at general readers. The program in science writing offers intensive training in news, features, multimedia storytelling, essays, and investigative reporting. Graduates receive a certificate in science writing.

Graduate Certificate in Science Writing

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time internship lasting a minimum of 10 weeks. *Science Notes*, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our web site, <http://scicom.ucsc.edu/>.

All students are required to complete at least two part-time internships in parallel with the six required graduate courses taken during the academic year. Internships are supervised by mentors on site, as well as by the program director. The interns earn academic credit for these field-study courses. The curriculum includes writing seminar courses in five distinct areas (news, features, multimedia, essays, and investigative reporting), as well as writing and editing workshops. Six courses from this curriculum, plus two course-equivalent internships, constitute the eight courses required for the graduate certificate. In addition to the academic year coursework, a full-time 10-week (minimum) internship, or an equivalent approved by the program director, is required.

Admission to the Science Writing Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing, and a strong desire to communicate science to the general public are ideal candidates for the program. At least a bachelor's degree in science is required for admission. Other admission requirements are: full-time research experience of at least six months duration; official Graduate Record Exam (GRE) General Test scores; and official GRE Subject Test score in one of the following fields: biochemistry, cell and molecular biology, biology, chemistry, computer science, mathematics, or physics. Applicants with a doctor of philosophy (Ph.D.) degree in one of these subjects are granted a waiver of the GRE Subject Test. Applications and instructions can be found online through the UCSC Graduate Division web site at <http://graddiv.ucsc.edu>.

Further Information

Details about the science writing graduate certificate program may be obtained from the Science Communication Program office, the web site, or by sending e-mail to scicom@ucsc.edu.

Upper-Division Courses

160. Introduction to Science Writing. S

A rigorous examination and practice of the skills involved in writing articles about science, health, technology, and the environment for the general public. Covers the essential elements of news writing and explanatory journalism, including developing a story idea, interviewing scientists, fact checking, composition, and editing of multiple drafts about scientific research. (Also offered as Biology: Ecology and Evolutionary Biology 188. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and C1, C2 requirements. Enrollment restricted to junior and senior physical and biologi-

cal sciences majors. Enrollment limited to 18. (General Education Code(s): W.) *R. Irion*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Graduate Courses

201A. Reporting and Writing Science News. F

A survey of the conventions of newspaper journalism and the special application of those conventions to scientific and technological subjects. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *K. McLaughlin*

201B. The Science Feature. W

A survey of selected feature articles in the current national science magazines, with attention to strategy, level of complexity, explanation technique, and style. Writing assignments include a publishable feature article. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *R. Irion*

201C. The Science Essay. W

A survey of science and nature essayists. Purpose, content, form, and style are considered. Writing assignments include original essays on current issues in science, technology, and society. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *E. Strauss*

201D. Policy and Investigative Reporting. S

Rigorous examination of techniques for reporting topics where science and technology meet public policy and society. Covers essential skills of investigative reporting, including obtaining documents through Public Records Act requests, using online reporting resources, and writing about ethical and legal issues. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *P. Aldhous, M. Mendoza*

201E. Multimedia Science News. S

Introduces web-media tools for reporting science stories and enhancing coverage for broad audiences, including video packages, narrated slideshows, podcasts, blogs, and still photography. Laboratory sections address skills for handling equipment and online editing. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *M. Miller, R. Irion*

202. Writing and Editing Workshop. F

Theory and practice of writing and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at non-technical readers. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit. *M. DesJardins, R. Irion*

297. Independent Study. F,W,S

A media internship is completed with faculty tutorial assistance, to satisfy a need for the student when a regular course is not available. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit. *The Staff*

Social Documentation

235 Oakes Academic Building
(831) 459-4706
<http://communitystudies.ucsc.edu>

Faculty and Professional Interests

Professor

DAVID BRUNDAGE

American working-class and immigration history, history of U.S. social movements, Irish history and politics

WILLIAM H. FRIEDLAND, Emeritus

B. RUBY RICH

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

NANCY STOLLER, Emerita

RENEE TAJIMA-PEÑA

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

DAVID T. WELLMAN, Emeritus

DEBORAH A. WOO, Emerita

Associate Professor

JULIE GUTHMAN

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

PAUL ORTIZ

African American history, U.S. social and political history, social documentary, oral history, subaltern studies and theories of resistance, U.S. South, Latino studies, social movements, working-class history; history of farm labor, African diaspora

MARY BETH PUDUP

Regional studies, economic justice, public policy, historical geography of the U.S.

Assistant Professor

JOHN JOTA LEAÑOS

Social documentation, social art practice, community arts, documentary animation, Chicano/a art practice and cultural studies, media and cultural studies, subaltern studies, photography, installation art, public art and intervention

MARCIA OCHOA

Gender and sexuality, race and ethnicity, Latino/a studies, media and cultural studies, ethnography of media, feminism, queer theory, geography, multimedia production, graphic design, colonialism and modernity, Latin American studies—Colombia and Venezuela

Lecturer

ANDREA STEINER

Health policy, critical public-health studies, gerontology (aging), ageism, women's health, critical analysis of civically engaged education

Professor

JULIANNE BURTON-CARVAJAL (Literature)

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

ELI E. HOLLANDER (Film and Digital Media)

Film and video directing; ethnographic documentary directory, editing, cinematography, and videography; digital image generation; screenwriting

CHARLES L. LORD (Film and Digital Media)

Film and video directing and editing, video theory and history, video installation, screenwriting, documentary production

MARGARET MORSE (Film and Digital Media)

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary, science fiction, and silent comedy

Associate Professor

DAVID HENRY ANTHONY III (History)

African and African American history, art, music, literature, and cinema; eastern and southern Africa; African languages; Indian Ocean world; African and African American linkages; Islamic civilization; African diaspora studies; world history

SHARON DANIEL (Film and Digital Media)

Community-based public art in information and communications environments, social and political aspects of information technology, community networks, participatory culture, digital inclusion, Net art, human-computer interface design

JENNIFER GONZALEZ (History of Art and Visual Culture)

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

LOURDES MARTINEZ-ECHAZABAL (Literature)

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found/[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

ERIC PORTER (American Studies)

Black cultural and intellectual history; U.S. cultural history and cultural studies; comparative ethnic studies; popular music and jazz studies; race, science, and technology

WARREN SACK (Film and Digital Media)

Software design and media theory

LEWIS WAITS (Art)

Photography

Assistant Professor

MIRIAM GREENBERG (SOCIOLOGY)

Media studies, cultural studies, globalization, political and cultural economies of global cities, video production, and ethnography

IRENE GUSTAFSON (Film and Digital Media)

Producing across the boundaries between "theory" and "practice," non-fiction, gender and queer studies, production design

FELICITY SCHAEFFER-GRABIEL (Feminist Studies)

Transnational feminism, migration, Latin American/Latino studies, Chicano/a studies, Internet, technology and the body, sexuality, gender and globalization

GUSTAVO VAZQUEZ (Film and Digital Media)

Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

Lecturer

DON ADAMS (UC Extension, Santa Cruz)
Director, Arts and Humanities Program

Program Description

This is a crucial time for the documentary, as traditional sources of journalistic investigation and reporting are dwindling, untested opinions dominate the Internet, veracity is under constant attack, and audiences increasingly must search hard to find reliable perspectives on the world. It is at this moment that the Social Documentation (SOC DOC) program has come into being to train the next generation of documentarians in scholarly and creative approaches to experience, representation, and argument. Founded in 2005, the SOC DOC program at UCSC taps faculty across the campus to provide students with access to expertise and to cross traditional disciplinary lines in an effort to ground master of arts (M.A.) students in the deepest understanding of subject as well as medium. SOC DOC has emerged as an exciting new center of gravity for this innovative new discipline. Our students have earned grants and awards for their thesis documentaries, produced around the globe, in film/video, photography, digital media, and a range of genres. We don't just tell a story; our students go beyond the story to place individuals in context and struggles in history, deepening the public's understanding of the societies in which we live and with whom we connect.

The UCSC Social Documentation program is a two-year, full-time, graduate-level program leading to an M.A. degree. The program offers students a chance to develop expertise in the understanding and production of social documentaries in various mediums, including film/video, audio, photography, and new digital media. Students learn how to translate various academic interpretations of social life into effective, accessible, and professional quality products.

Upon completion of the program, master of arts degree holders will be qualified to enter documentary-related professions such as documentary directing, producing, or editing. Degree holders may work within industries such as public television, public radio, or the documentary film business, as independent producers and artists, or for archival centers or museums. Degree holders may also choose to pursue a doctor of philosophy (Ph.D.) degree in a related field in the arts, humanities, or social sciences.

The program is designed to provide opportunities for the graduate student who is actively committed to social justice to work on a full-time basis beyond the boundaries of the university. Master of arts candidates build a curriculum around a required set of core courses that offer a foundation in the theory and practice of social documentary, elective courses in their substantive area of interest, and the creation of a two-year documentary project that is the final requirement of the degree. Courses and faculty expertise are related to social justice, and include both broad structural and social changes and community-based organizing.

Objectives

The Social Documentation program aims to train its graduates in critical thinking and the use of visual, audio, electronic, and print media, as well as historic presentations and ethnographies, dedicated to the documentation of underrepresented areas of community life. The curriculum concentrates on the analysis of social problems, the creation of a critical approach in the collection and presentation of documentary material, and

on the role of effective documentary in social change. For the master's degree, students produce documents of their own: documentaries in film or video; oral histories; audio productions; photographic essays; extensive oral histories or written ethnographies; historic exhibitions for museum or public display; Internet, DVD or CD-ROM projects; and/or digital archives.

Special features of the program include its focus on the study of "ordinary life" and its emphasis on training students to produce original social analysis in broadly representational forms. The course of study includes training in the techniques of appropriate media and systems of representation. The unique emphasis of the Social Documentation program, however, is the acquisition of a level of academic rigor in the chosen subject of focus, an insistence on social scientific methodologies, a reliance on an ethical process of production that takes its subjects into full account, and a commitment to research in the development of material for extra-academic uses and audiences. Broadcast and theatrical media have increasingly recognized the importance of ancillary distribution through partnerships with pertinent communities of interest, just as the Internet is increasingly utilized for added depth and community interaction on issues. The Social Documentation program aims to prepare documentarians for newly evolving social media landscapes. At the same time, students receive training in the basic theories of social documentation with the aim of applying these theories to the analysis, prioritization, and solution of social problems.

Graduates are expected to generate work that will have an impact on the world outside the academy and to develop an understanding of documentary practices and traditions, as well as social codes that can form a foundation for future work in their targeted subject area and arena of practice. The master's project, which constitutes the culmination of the two years of study, will be given a public exhibition or reading, and be the springboard for continuing work after graduation.

Requirements

The Social Documentation program has a required core curriculum around which students develop a plan of study. Each student has two advisers, one for technical guidance and the other for topical expertise, who will be involved in designing each student's study and project plans. Full-time enrollment is required.

A total of 72 credits are required to complete the master's degree in social documentation, comprising a combination of seminars on social documentary and social science research designed specifically for the social documentation graduate students, other courses on campus selected by students individually on the basis of relevance to the proposed project, and courses focused on conceptualizing, executing, and completing the students' social documentary master's projects. There are eight required core courses.

Required courses for the first year are as follows:

- 200 *Approaches to Social Documentary*
- 202 *Practice of Social Documentary*
- 208 *Social Science Research and Social Representation*
- 270 *Project Planning*

Required courses for the second year:

- 204 *Ways of Seeing and Hearing*
- 294A *Production, Analysis, Editing*
- 294B *Production, Analysis, Editing*
- 294C *Production, Analysis, Editing*

In addition to these mandatory courses, an additional 32 credits must be secured through electives as identified on an individual basis, offered by Community Studies or other departments, or through independent study classes as approved by faculty advisers.

To satisfy requirements for the master of arts degree, a student must complete the first year of required courses and electives. By the end of the first year, before summer quarter begins, students will have written a proposal for their documentary project, which will be the basis for a required oral qualifying examination conducted by at least two community studies faculty. This proposal will include a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works. Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master's project. The successful qualifying examination proposal should address the following questions:

- What is the story to be told with the documentary project?
- What is the social analysis that will guide, inform, and underwrite the story?
- How will that analysis be represented in the documentary?
- What kinds of evidence will be generated to persuade the audience that the analysis is accurate?
- How will evidence be used either visually or orally?
- How will the documentary use social analysis to make the personal political: how will it move from analysis to critique?

The second year is largely focused on the final documentary project required for completion of the master's degree. This project must reflect original research and creative activity while demonstrating a command of related previous work by others. With an understanding of budgetary, equipment, and time limitations, students' electronic, digital, photographic, or written projects should reflect a level of quality appropriate for publication, exhibition, or broadcast (including digital/web-cast).

Typically, the expectation in each medium is as follows:

Documentary Film/Video. One 20-30 minute documentary suitable for television broadcast and public exhibition.

Documentary Photography. One on-campus showing and one major off-campus showing; 10-15 page text accompanying pictorial exhibition.

Audio Documentary/Sound Recording. One 20-30 minute documentary suitable for radio broadcast or museum/public installation.

Historic Presentation/Public History. One on-campus presentation or exhibit and one major off-campus presentation/exhibit of "museum quality."

Oral History/Ethnography. One 75-100 page document.

Internet/Digital Presentation or Archive. To be worked out with program chair, given the evolving nature of this field.

The final examination consists of the public presentation of the project.

In addition, every project must be accompanied by a written essay describing its relationship to its field and documents its research via field notes, bibliographies, archival searches, filmographies, and videographies. These materials will be filed in digital form and archived for future reference and access.

Goals for Social Documentation Graduates

The Social Documentation program prepares graduates with critical skills and professional tools well suited to careers in the evolving fields of documentary media in the private and public sectors, for collaboration on community-based projects, for a range of activities geared to the analysis and documentation of sociopolitical issues, and for work with private and public organizations in need of media expertise and analysis. It is expected that students will make careers in the non-profit fields evolving to link social justice organizations with media outlets, as well as in a range of public campaigns and initiatives. They will also be well equipped to function as independent documentarians working on behalf of social change within the expanding sectors of media production and representational intervention.

Also, given the emphasis on the histories of the social documentary and on developing methods suitable for contemporary challenges, many graduates are likely to enter the field of education on a part- or full-time basis. The Social Documentation program's teaching assistant (TA) training program and opportunities provide graduates with the preparation necessary to exercise such options.

Graduate Courses

200. Approaches to Social Documentation. F

Comprehensive review and analysis of documentary strategies aimed at societal critique and social change, evaluating changes in argument, evidence, and process over development of the discipline. (Also offered as Digital Arts and New Media 205. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *B. Rich*

202. Practice of Social Documentary. F

Introduction to social documentary genres including video, photography, new media and other mediums, which addresses social scientific research and methodology in the context of these processes. (Also offered as Digital Arts and New Media 206. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

204. Ways of Seeing and Hearing. F

Graduate-level advanced seminar explores ways that seeing, hearing, and knowing are influenced by culture, power, race, and other factors. Readings emphasize how documentary subjects are constituted and known, addressing questions of epistemology, social constructivism, objectivity, and method. (Also offered as Digital Arts and New Media 204. Students cannot receive credit for both courses.) Enrollment restricted to social documentation and digital arts new media graduate students. *M. Ochoa*

208. Social Science Research and Social Representation. W

Designed to acquaint students with how social science research represents social reality and how social documentarians represent social reality. Designed to encourage comparison among different modes of social science research and between social science and different modes of social documentation representations of social life.

Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *M. Ochoa*

220. Oral History. *

Introduction to the theory and practice of oral history. Seminar participants read foundational texts in oral history, historical memory, public history, and social documentary. Students conduct two oral-history interviews; write synthesis essays; and complete a seminar paper. Concurrent enrollment in course 291 required. Enrollment restricted to graduate students. Enrollment limited to 15. *P. Ortiz*

270. Project Planning for the Social Documentary. S

Workshop seminar in project planning focusing on the form and content of the documentary project; research and preproduction; technical, financial, and logistical plans; and coordination with subjects and resources. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima*

280. Video Production of the Social Documentary. W

Intensive directing and producing course that covers conceptualization, research, treatment and proposal writing, interview technique, camera, editing, production, and distribution. (Also offered as Digital Arts and New Media 207. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Open to qualified undergraduates with permission of instructor. Enrollment limited to 15. *R. Tajima*

290. Special Topics in Social Documentation. F

Designed to provide supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards and innovations within the field of social documentation, documentary subjects, location production, and/or the work of individual professional documentarians. (Also offered as Digital Arts and New Media 208. Students cannot receive credit for both courses.) Enrollment restricted to social documentation graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

291. Media Laboratory for Social Documentation (2 credits). F,W,S

Individual training in a social documentation medium under the guidance of a faculty supervisor. Course is intended to be taken concurrently with social documentation courses requiring a laboratory course. Enrollment restricted to social documentation and digital arts and new media graduate students. Enrollment limited to 10. May be repeated for credit. *The Staff*

292. Special Topics (2 credits). F,W,S

Provides supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards, artistic strategies, and innovations within the field of social documentation, documentary subjects, and/or work of individual professional documentarians. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *R. Tajima*

294A. Production/Analysis/Editing. F

Workshop seminar oriented toward actual fieldwork, production, and preparation for editing of the thesis project in the student's chosen genre. Techniques of collection and recording, analysis, preparation, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *J. Leanos*

294B. Production/Analysis/Editing. W

Workshop seminar oriented toward the editing and creative assemblage of the thesis project in the student's chosen genre. Techniques of preparation, exhibition, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *B. Rich*

294C. Production/Analysis/Editing. S

Social documentation students in the final phase of completing their master's thesis receive guidance in shaping their projects, receive feedback, and are taught key elements of structure and narrative at a time when the demand for clarity and social documentation exposition is crucial. Prerequisite(s): courses 294A and 294B. Enrollment restricted to social documentation graduate students. *The Staff*

295. Project Completion. F,W,S

Individualized study for second-year graduate students working on and completing their final projects. Limited to students enrolled in the social documentation program during their final quarter of study. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Study either related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Social Sciences

Faculty and Professional Interests

460 Humanities and Social Sciences Building
(831) 459-3212
<http://socialsciences.ucsc.edu>

ROBERT L. MEISTER, Professor of Social Sciences and Political Thought

Political and moral philosophy, political jurisprudence, political economy, political theology, institutional analysis, critical human rights theory, and constitutional law

Program Description

The Division of Social Sciences focuses on the study of human relationships and society. As global economic and political changes transform the world around us, social scientists help us meet the challenges and opportunities of the 21st century.

Our nine departments offer more than 40 undergraduate and graduate degree programs, including many that are interdisciplinary collaborations. Our faculty members conduct leading-edge research in their fields, frequently working with students in research clusters linking departments to our research centers. We also offer extensive opportunities for experiential learning through field studies.

Our research, teaching, and state-of-the-art facilities provide students with a comprehensive and rigorous education that prepares them for productive careers and further academic pursuits. For more information on the division, see our web site at: <http://socialsciences.ucsc.edu>.

Lower-Division Courses

194A. UCDC Internship Research Seminar. F,W,S

Weekly seminar that focuses on the production of a major research paper or equivalent scholarly undertaking connected to an internship in Washington, D.C., government, non-profit, or private institution. Seminar stresses institutional analysis, the development of bibliographic expertise in the use of Washington-based resources, and participant-observer skills. Required for participants in the UCDC program. Required for and enrollment restricted to students participating in the UCDC Program. (Formerly UCDC Internship and Internship Seminar.) Enrollment limited to 22. *The Staff*

Upper-Division Courses

194B. UCDC Internship Seminar (7 credits). F,W,S

A 30- to 36-hour-per-week internship in a Washington, D.C., government, non-profit, or private institution. Required for and enrollment restricted to UCDC program participants. (Formerly *UCDC Internship and Internship Seminar*.) Enrollment limited to 22. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A program of directed study arranged with a Social Sciences Division faculty member. Enrollment restricted to participants in the UCDC program. *The Staff*

199F. Tutorial (2 credits). F,W,S

A program of directed study arranged with participating faculty. Class time is proportionally less than a 5-credit course. Enrollment restricted to participants in the UCDC program. *The Staff*

Sociology

226 College Eight
(831) 459-4306
<http://sociology.ucsc.edu>

Faculty and Professional Interests

Professor

DANE ARCHER, Emeritus

JOHN BROWN CHILDS, Emeritus

BEN CROW

International development, sociology of water and markets, global inequality, South Asia and East Africa, political economy, and green enterprise

E. MELANIE DUPUIS

Economic sociology, sociology of consumption, sociology of development, political sociology, sociology of the environment, technological change, historical sociology, social theory, food and social change

WILLIAM H. FRIEDLAND, Emeritus

HIROSHI FUKURAI

Global jury systems; deliberative democracy and lay participation in law; wrongful conviction and acquittal; advanced quantitative methods; survey and research

WALTER L. GOLDFRANK, Emeritus

HERMAN S. GRAY

Cultural studies, media and television studies, black cultural politics, social theory

PAUL M. LUBECK

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

DENNIS C. McELRATH, Emeritus

MARCIA MILLMAN

Social psychology, the family, sociology of emotions, field research methods, sociology of medicine

JAMES R. O'CONNOR, Emeritus

CRAIG REINARMAN

Political sociology; law, crime, and social justice; drugs and society

PAMELA ANN ROBY, Emerita

DANA Y. Takagi

Social inequality and identity, research methods, race relations, nationalism and social movements

ANDREW SZASZ

Environmental sociology (environmental movements, policy, environmental justice); theory

CANDACE WEST

Language and social interaction, sex and gender, conversation analysis, microanalysis and medicine, animals and society

Associate Professor

JULIE BETTIE

Cultural studies and popular culture; race/ethnicity, class, and cultural politics; gender, sexuality, and cultural politics; critical ethnography, autoethnography, and visual ethnography

MIRIAM GREENBERG

Urban sociology, media studies, cultural studies, political economy, and globalization

STEVEN MCKAY

Work; technology and labor markets; globalization and social change; race, ethnicity and migration; political sociology; ethnography/qualitative methods

JENNIFER E. REARDON

Issues of social identity as influenced by the new sciences of genetics and genomics; intersection of the sociology of science and knowledge and the sociology of race, gender, and class

HELEN SHAPIRO

Political economy, Latin American economic history and development (with an emphasis on Brazil), industrial policy, the auto industry, the state and transnational corporations

Assistant Professor

DEBORAH GOULD

Political emotion; social movements and contentious politics; classic and contemporary social theory; sexualities; lesbian/gay/queer studies; feminist and queer theory

GABRIELA SANDOVAL

Race and ethnic studies, Latino and Chicano studies, stratification, urban and political sociology, and voting behavior

Lecturer

FRANCESCA GUERRA

Comparative-historical sociology, race and ethnicity, social justice, poverty, law, crime, deviance, asylum and prison architecture, religious non-profits, history of eugenics, disability studies, mass media, oral history, and qualitative and quantitative research methods

WENDY MARTYNA

Social psychology, death and dying, gender, social change, family and youth

Professor

BARBARA L. EPSTEIN (History of Consciousness)

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

NANCY STOLLER, Emerita (Community Studies)

MARK TRAUGOTT (History)

Social and economic history, 19th-century France, French revolutions, European working class, historical methods, workers' autobiographies

DAVID WELLMAN (Community Studies)

Working-class culture, American ethnic and racial diversity, social documentary studies, critical race theory, interrogations of whiteness, and qualitative research methods

Associate Professor

JULIE GUTHMAN (Community Studies)

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

Assistant Professor

SHANNON GLEESON (Latin American and Latino Studies)

Migrant populations, the effects of documentation status, labor rights, civic engagement, inequality and stratification, political sociology, law and society, mixed methods and comparative approaches

Program Description

Sociology is the study of social interactions among individuals and social groups. More specifically, sociologists

examine the cultural, ideological, economic and political contexts of human action including the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. As such, it considers how society is organized in relationship to a vision of a just, free, and equal society—a vision that may require fundamental social change. Developing an understanding of both social change and social justice as part of the sociological tradition is one of the teaching goals of sociologists at UCSC. In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research as part of informed global citizenship.

Sociology faculty members are engaged in research on a wide range of topics, such as medicine and technology; labor studies; the intersection of class, race, gender and sexualities; environmental sociology; sociology of emotion and affect; queer studies; the cultural politics of sex work; globalization and international development; black cultural politics; Latino and Chicano studies; the politicization of religion; drugs in society; global inequality, crime, and deviance; international law; legal institutions; sustainability; popular culture and cultural studies; media studies; urban studies; political economy; critical ethnography; discourse and conversational analysis; identities and identity changes; and social movements. Sociology faculty use a number of approaches and methods, including ethnography, comparative and historical analysis, conversational and discourse analysis, qualitative interviews, and survey research.

Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department amenable for double majors and minors, and non-majors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including the social construction of gender, emerging professions in health care, utopian communities, human development in Costa Rica, mass communication, the social effects of war, family violence, sustainable development in Bolivia, sanitation in Kenya and Haiti, street children in India, African soccer players in Europe, gay and lesbian families, Latino educational success, and cross-cultural family welfare policies.

The sociology major at UCSC is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work, management, environmental planning, public service, education, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

Global Information and Social Enterprise Studies (GISES) is an innovative service learning program developed in collaboration with the Global Information Internship Program (GIIP). It aspires to create a new generation of well-trained advocates for social justice and sustainable development who use the tools of information technology and social enterprise to solve global problems. Practically, student projects engage with local and global organizations to democratize globalization, deepen social justice, reduce poverty, support digital

education, and advance the transition to a sustainable world. By combining the spirit of social entrepreneurship with innovative information technologies, GISES students reduce the digital divide by strengthening the informational, communication and organizational capacity of schools, community organizations, and non-governmental organizations (NGOs). The GISES program provides an excellent foundation for students pursuing careers in non-profit management, social advocacy, and education. Depending on a student's major, there are two ways to enter the GISES program. If a student is a sociology major and wishes to participate in GISES, she or he should declare the intensive sociology major. A student who majors in any field other than sociology should declare GISES as a minor.

Admission into the General Sociology Major, Intensive Sociology Major, Combined LALS Major, Sociology Minor, or GISES Minor

The Sociology Department offers three undergraduate majors: 1) a general sociology major; 2) an intensive sociology major; and 3) a combined major with Latin American and Latino studies. Additionally, there are two minors, one in sociology and one in GISES.

Students must take three courses prior to petitioning for entry to the general sociology major: Sociology 1, *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*, and Sociology 15, *World Society*. Students with a grade point average (GPA) of 3.0 or above for these three courses will be allowed to declare the sociology major.

Students must take six courses prior to petitioning for entry to the intensive sociology major: Sociology 1 *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*; Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the intensive major, students are required to obtain a GPA of 3.0 or above in these courses and submit a self-evaluation including a one- to two-page project plan with their declaration of the intensive major. The project plan will summarize their performance in Sociology 30A, 30B and 30C, including a description of their technology skills (e.g. web design or database applications), an assessment of their completed projects and a rough draft proposal describing their capstone project for Sociology 196G.

Students must take two of the following three courses, Sociology 1, 10 or 15, prior to petitioning for entry to the sociology/Latin American and Latino studies major. Students with a GPA of 3.0 or above for these two courses will be allowed to declare the combined major. (If a student takes all three courses, calculation of the GPA will be based on the two highest grades.)

Students must take one of the following three courses, Sociology 1, 10, or 15 prior to petitioning for entry to the sociology minor. Students who receive a grade of B or higher in this course will be allowed to declare the sociology minor. (If a student takes more than one of these three courses, admission to the minor will be based on the highest grade in the courses taken.)

Students must take four courses prior to petitioning for entry to the GISES minor: Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and

Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the GISES minor, students are required to obtain a GPA of 3.0 or above in these courses and submit a self-evaluation including a one- to two-page project plan with their declaration of the minor. The project plan will summarize their performance in Sociology 30A, 30B and 30C, including a description of their technology skills (e.g. web design or database applications), an assessment of their completed projects and a rough draft proposal describing their capstone project for Sociology 196G.

Equivalent courses may be taken at other universities or at community colleges.

Students should take Sociology 1, 10, 15, 30A, 30B, and 30C for letter grades. For courses taken on a pass-no pass basis, the department will use the narrative evaluation in its assessment of eligibility for the major.

Courses for which the grade of W is given are not counted in the computation of the GPA. The department will evaluate grades for repeated courses following the university's grading policy for repeated courses.

Students may petition for admission to the major by filling out the campus's Declaration of Major form, and by supplying evidence of their performance in the required lower-division courses.

Transfer students who cannot complete Sociology 1, 10, and 15 before university policy requires them to declare a major will be allowed to declare if they have taken at least two of the three courses (or their equivalent) listed above (at UCSC, at another university, or at a community college) with an overall GPA of 3.0. Transfer students allowed to declare under this rule are expected to complete all three courses with an overall minimum GPA of 3.0. Transfer students will be subject to disqualification from the major if they subsequently do not achieve an overall 3.0 GPA in courses 1, 10, and 15 or their equivalent.

Appeal of Negative Decisions

Students must submit appeals of negative decisions to the Sociology Department in writing within 30 days of notification of denial of entrance into the major. Letters of appeal should describe any extenuating circumstances that might have affected the student's record.

Requirements for the General Sociology Major

For more details, students may consult the sociology handbook, available online at <http://sociology.ucsc.edu>, or at the department office, 226 College Eight.

Sociology majors are required to take a total of 13 courses (three prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, and six upper-division electives). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. All sociology majors are required to take the following three courses or their equivalents.

- 1, *Introduction to Sociology*
- 10, *Issues and Problems in American Society*
- 15, *World Society*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

- 103A, *Statistical Methods*
- 103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Six additional upper-division sociology courses are required. The Sociology Department offers upper-division electives that reflect a wide range of ideas within the discipline and the diversified research interests of the faculty. Refer to the *Sociology Department Undergraduate Handbook* or the *Sociology Undergraduate Adviser* for a list of recommended courses within a specific specialization.

- Comprehensive requirement. Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.
- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance, by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem, and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in programs administered by the Sociology Department. Combined majors with Latin American and Latino Studies should refer to the Latin American and Latino Studies Department for their Disciplinary Communication requirement.

Sociology Major Planner One

The following is a recommended academic plan for students to begin the sociology major.

| Plan One | | | |
|------------|-----------|------------------------|-----------|
| Year | Fall | Winter | Spring |
| 1st (frsh) | SOCY 1 | SOCY 15 | SOCY 10 |
| 2nd (soph) | SOCY 105A | SOCY 103A SOCY 105B | SOCY 103B |

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major as juniors. It is assumed that course 1 and course 10 equivalencies were completed at the previous college.

Students Beginning in Fall Quarter

| Plan Two | | | |
|----------|----------------------|------------------------|-----------|
| Year | Fall | Winter | Spring |
| 3rd (jr) | SOCY 15 SOCY 105A | SOCY 103A SOCY 105B | SOCY 103B |

Students Beginning in Winter Quarter

| Plan Two | | | |
|----------|-----------|----------------------|-----------|
| Year | Fall | Winter | Spring |
| 3rd (jr) | | SOCY 15 SOCY 103A | SOCY 103B |
| 4th (sr) | SOCY 105A | SOCY 105B | |

All majors must complete the remaining six upper-division courses in their junior and senior years.

Requirements for the Intensive Sociology Major

The intensive major is an option for students wishing to major in sociology and focus in the area of Global Information and Social Enterprise Studies (GISES). The global information and enterprise studies intensive sociology major is sponsored and administered by the Department of Sociology. This major is designed for highly motivated, self-directed and enterprising students who have demonstrated the capacity to design and complete an honors-quality project for a civil society group. Students are required to take a total of 18 courses (six prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, seven upper-division electives, and a project practicum course). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. Students must take the following six courses or their equivalents.

- 1, *Introduction to Sociology*
- 10, *Issues and Problems in American Society*
- 15, *World Society*
- 30A, *Introduction to Global Information and Social Enterprise Studies*
- 30B, *Designing ICT Projects for Social Enterprises*
- 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, *Statistical Methods*

103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Seven additional upper-division courses are required. The student's choice of electives must be approved either by the student's project adviser or by the director of GISES at the time of submitting the major declaration.

Project practicum. Students must enroll in Sociology 196G Project Practicum and complete their GISES capstone project. Contact the Sociology Department undergraduate adviser for more detailed guidelines regarding the GISES capstone project.

Disciplinary Communication (DC) Requirement. All students are required to satisfy the Disciplinary Communications Requirement in their major. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies; to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem; and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in sociology programs.

Comprehensive requirement. Prior to graduation, students are required to complete one of the following comprehensive requirements.

- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Requirements for the Combined Major in Sociology and Latin American and Latino Studies

Students may choose to declare a combined major in sociology and Latin American and Latino studies. The requirements (listed below) should be examined carefully before choosing the combined major option. Both departments must approve a study plan before the major can be declared. Once the lower-division sociology courses have been completed, students may petition to declare the combined major. Each department determines major and thesis honors separately.

Language Study

Students must demonstrate proficiency in Spanish or Portuguese equivalent to the completion of Spanish 6 or 56 or Spanish for Spanish Speakers 63 or Portuguese 65A-B.

Sociology/Latin American and Latino Studies

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are three lower-division course requirements, two from the Sociology Department and one from the Latin American and Latino Studies Department. The lower-division LALS courses must be LALS 1 or 80; transfer students may petition to replace LALS 1 or 80 with an appropriate course from another institution. Upper-division requirements include seven core courses: LALS 100, 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese***, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: 1) writing a senior thesis; 2) passing an appropriate LALS *Senior Seminar* (194 series); or 3) completing the sociology course option of two additional sociology upper-division courses in *Inequality and Social Change*. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Honors in the Major

The Sociology Department awards honors in the major based on the student's cumulative GPA for all courses taken to satisfy the program's major requirements. Students with a GPA of 3.75 or above will be considered for honors in the major. Students with a GPA of 3.9 or above will be considered for highest honors in the major. No more than approximately 15 percent of graduating class will be considered for honors or highest honors in the major.

Requirements for the Sociology Minor

Students minoring in sociology are required to take seven courses: one of courses 1, 10, or 15; at least two of courses 103B, 105A, and 105B; and at least four other upper-division sociology courses. Students must provide evidence of completion of the lower-division requirement, courses 1, 10, or 15 with a grade of B or better, prior to declaring the sociology minor.

Requirements for the GISES Minor

Students minoring in GISES are required to take nine courses (four prescribed lower-division courses in preparation for the minor, four upper-division electives, and a project practicum course). The four lower-division requirements are courses 15, 30A, 30B and 30C. The student's choice of four upper-division electives must be approved either by the student's project adviser or by the director of GISES at the time the minor is declared. Students must take Sociology 196G, *Project Practicum*, and complete their GISES capstone project. See description for the project practicum under Requirements for the Intensive Major.

Disqualification Policy

Students who receive a D, F, NP, or W twice in any of the upper-division core courses (courses 103A, 103B, 105A, and 105B) will be disqualified from the major or minor. Students, their college, and the Office of the Registrar will be notified by the department no later than the first day of instruction of the quarter following the disqualifying failure. Students who feel there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification by submitting a letter to the chair of the sociology undergraduate education committee. The appeal must be filed no later than 15 days after the disqualification notification was mailed, or the 10th day of classes in the quarter of the disqualification, whichever is later. For further information regarding the disqualification process, contact the Sociology Department.

UC Education Abroad Program Students

Academic year programs. Students must declare the major and pass the three lower-division preparatory course requirements (1, 10, and 15) and three of the upper-division core courses (103B, 105A, 105B) prior to study abroad. It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to three approved courses may be used toward the sociology major.

Semester programs. Fall semester: students must declare the major and pass the three lower-division preparatory course requirements (courses 1, 10, and 15) and one upper-division core course (105A) prior to fall semester study abroad. Spring semester: students must declare the major and pass the three lower-division course requirements (courses 1, 10, and 15) and two upper-division core courses (103B and 105B) prior to spring semester study abroad.

Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the major requirements when the content is deemed appropriate and approved by the Sociology Department.

Transfer Students

Junior transfer students expressing an interest in sociology on their UCSC application for admission are admitted as proposed sociology majors. This status is

considered undeclared. Transfer students must meet with the sociology undergraduate adviser when they arrive on campus to determine their status and begin the actual declaration of major process, which must be completed by the end of the second quarter of the junior year for transfer students.

Declaring sociology early in the academic career will give a student priority for sociology course enrollment in subsequent quarters.

Graduate Program

The graduate program in sociology at UCSC distinguishes itself by its interdisciplinary nature. The program is designed to educate students in sociological theory and methods and in the disciplines major substantive areas while simultaneously exposing students to other arenas of intellectual inquiry that will aid them as they pursue their research questions and interests. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study. The program leads to a doctor of philosophy (Ph.D.) degree in sociology. A master of arts (M.A.) degree may be taken *en route* to the doctorate, but a master's program *per se* is not available.

The core curriculum is divided into two parts, 1) basic grounding in sociological theory and methods, and 2) exposure to research in three areas of concentration: a) globalization, political economy, and environment; b) inequality and identity; and c) culture, knowledge, and power. To prepare students to conduct their own research projects, the department trains student in multiple methods—comparative and historical analysis, quantitative techniques, field research, and interpretive methods.

The sociology graduate program is intended to lead to both academic and nonacademic careers, and the interests of the faculty reflect this twofold objective. Faculty specialties include comparative and historical sociology; construction of deviance; criminal justice; cultural sociology; development; economy and society; education; emotions/affect; environmental sociology; globalization; language and social linguistics; law and society; Marxist sociology; mass communication; medical sociology; policy analysis; political economy; qualitative methodology; race, class, gender, sexuality; science and technology studies; social inequality; social movements; sociology of drugs; sociology of knowledge; and visual sociology.

Graduate students are supported through teaching assistantships, teaching fellowships, research fellowships and other grant/fellowship opportunities. A number of faculty receive research grants that support graduate student research assistantships, most recently, for example, the National Science Foundation Science and Justice Fellowships.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's activism and commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. The Sociology Department's colloquium series enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body creates a vibrant atmosphere for learning.

Many of the faculty in the Sociology Department have affiliations with other departments and programs on campus, and the graduate program consequently encourages interdisciplinary work. Seminars in the anthropology, environmental studies, history, history of consciousness, politics, psychology, and feminist studies programs are open to sociology students. Graduate

students in sociology may obtain a parenthetical notation on the sociology Ph.D. diploma indicating that they have specialized in feminist studies, Latin American and Latino studies, environmental studies, philosophy, or education. Students must meet requirements spelled out by the relevant department and their committee members. Students also participate in research projects under the auspices of seven interdisciplinary social science research centers: the Science and Justice Working Group; the Center for Agroecology and Sustainable Food Systems; the Center for Global, International, and Regional Studies; the Center for Justice, Tolerance, and Community; the Chicano/Latino Research Center; the Center for Research on Educational Diversity and Excellence; and the Santa Cruz Center for International Economics. Research opportunities also are available in the areas of environmental studies, feminist studies, and lesbian/gay/queer studies.

Many of our graduate students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is designed to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics and problems are available for advanced graduate students working on papers and dissertations in related areas.

The sociology program provides graduate students with many teaching opportunities so they can practice the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension. Graduate students serve as teaching assistants for at least three quarters in the department's core classes of the undergraduate curriculum.

The Sociology Department at UCSC is intellectually innovative, both in its interdisciplinary approach and in its commitment to inquiry that is engaged with the world beyond the university.

Required Courses

Students are required to take at least 12 courses as follows.

A three-course core group:

- 201 *The Making of Classical Theory*
- 202 *Contemporary Sociological Theory*
- 203 *Sociological Methods*

Two methods courses:

- 204 *Methods of Quantitative Analysis*

and one of the following seven courses:

- 205 *Field Research Methods*
- 206 *Comparative Historical Methods*
- 209 *Analysis of Cultural Forms*
- 241 *Cross-National and Cross-Cultural Research*
- 242 *Feminist Research Seminar*
- Psychology 248 *Survey Methods*; or Sociology 282 *Social Policy Research*

Three area foundation courses:

- 220 *Global Transformation: Macrosociological Perspectives*
- 240 *Inequality and Identity*
- 260 *Culture, Knowledge, Power*

At least one writing course (208 or 250)

A minimum of three elective graduate seminars, at least one from Sociology (excluding Sociology 250 and Sociology 293).

Students with no background in statistics are strongly advised to take an undergraduate course in statistical methods before enrolling in *Methods of Quantitative Analysis*, but can be admitted with permission of the instructor.

Progress Toward the Ph.D.

- Beginning at least by the end of the first year, students initiate work on their master's paper.
- Completion of the master's paper is expected by the end of the second year.
- Students are expected to take an oral qualifying examination by the end of the third year, but no later than the end of the fourth year.
- Graduate students prepare field statements in two distinct areas of sociology and, in addition, prepare a detailed course outline and a grant proposal in one or the other of these areas.
- The qualifying examination is an oral examination and based on the student's field statements.
- After passing the qualifying examination, a student is advanced to candidacy and begins work on the dissertation with the aid of a three-person dissertation committee.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, refer to the Graduate Studies section of the catalog.

Lower-Division Courses

1. Introduction to Sociology. F,S

A systematic study of social groups ranging in size from small to social institutions to entire societies. Organized around the themes of social interaction, social inequality, and social change. Fulfills lower-division major requirement. (General Education Code(s): IS.) *C. Reinerman, F. Guerra*

10. Issues and Problems in American Society. W,S

Exploration of nature, structure, and functionings of American society. Explores the following: social institutions and economic structure; the successes, failures, and intractabilities of institutions; general and distinctive features of American society; specific problems such as race, sex, and other inequalities; urban-rural differences. Fulfills lower-division major requirement. (General Education Code(s): IS.) *D. Gould, J. Reardon*

15. World Society. F,W

Introduction to comparative and historical sociology. Focuses on the global integration of human society. Examines social changes such as industrialization, globalization, colonial rule, and the rise of Islamic fundamentalism. Uses social theory (including ideas from Marx, Weber, and Adam Smith) to explore the making of institutions like the nation-state, the World Trade Organization, the World Bank, and the International Monetary Fund. Fulfills lower-division major requirement. (General Education Code(s): CC, IS, E.) *P. Lubeck, S. McKay*

20. Key Issues in Race and Ethnic Analysis. *

Provides a solid conceptual foundation for undergraduates interested in pursuing the study of race and ethnic issues in advanced upper-level classes. (General Education Code(s): IS, E.) *The Staff*

30A. Introduction to Global Information and Social Enterprise Studies (3 credits). F

Teaches how to use social-enterprise methodologies to transfer information-communication technologies (ICT) to community and non-governmental organizations. Concepts include: globalization, info-exclusion, social justice, information revolution, global civil-society networks, social entrepreneurship, "open source" resources, web design, databases, networking. Requires organizational assessment. Enrollment limited to 50. *P. Lubeck*

30B. Designing ICT Projects for Social Enterprise (3 credits). W

Covers designing "doable" ICT-based projects to support the goals of community and NGOs. Topics include: social entrepreneurship/enterprise case studies; step-by-step project design; integrating social and technical solutions; project management. Technical topics include: Internet resources; advanced web/database design; computer networks/maintenance. Enrollment limited to 50. *P. Lubeck*

30C. Project Implementation and Grant Writing for Social Entrepreneurs (3 credits). S

Covers conversion of ICT project into a fundable grant proposal for social justice, integration of social activism, entrepreneurship and justice, and implementation of project. Topics include: funders, proposal design, field methods, project assessment, innovative ICT applications, action research methods. Enrollment limited to 50. *P. Lubeck*

33. Designing Community Information Technology Centers. *

Examines theory and practice of designing and constructing community information technology centers for the U.S.A. and developing world through hands-on projects. Covers topics in social design, networking, open-source software, computer management, computing policy, VoIP, Wi-Fi, power sources, and project management. Courses 30A or 30B or 30C recommended as preparation. Enrollment limited to 25. *P. Lubeck*

35. Information Methods: IT Design and Application for Social Change. *

Information technology (IT) is an essential tool for community organizations. When, how, and with what success IT is used, however, is not a simple problem. This seminar works through core design processes and helps develop "information plans" for successful technology application in community organizations. Priority given to Global Information Internship Program participants. Enrollment limited to 30. *The Staff*

42. Student-Directed Seminar. F,W,S

Seminars on selected topics taught at various times by upper-division students under faculty supervision. (See course 192.) Consult the *Schedule of Classes* for specific offerings. *The Staff*

80E. The Sociology of Love. *

Investigation of love from a sociological perspective, including the following: (1) how the experience of love is constructed/shaped by the individual, social structure, conventions, ideology; (2) functions of love for the individual/society; (3) how love varies by gender/social class; (4) mythologies of love. Emphasis on romantic heterosexual love and its historical development in Western culture. (General Education Code(s): T3-Social Sciences.) *The Staff*

80V. Understanding Agile Web Development for Social Justice. *

Focuses on development of web applications using agile methodologies and fundamentals of web programming and/or web UI design. Topics include: free/open-source

software movement, social computing, and practices of digital justice. Focus is on ruby language, design principles, storyboarding, source control, testing, and documentation. May be repeated for credit. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *P. Lubeck*

80Z. Youth and Crime. *

Addresses foundations of development of our juvenile justice system and its adaptation (or failure to adapt) to changing youth crime and socioeconomic patterns at beginning of the millennium, with special emphasis on California. (General Education Code(s): T3-Social Sciences.) *The Staff*

93. Field Study. F,W,S

Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

103A. Statistical Methods (7 credits). W

Fundamental concepts in statistics. Introduction to measuring causation. Learn to use computer to analyze data efficiently. Emphasis on practical applications. Enrollment restricted to sociology, proposed sociology, and combined sociology majors. (General Education Code(s): SR, Q.) *F. Guerra*

103B. The Logic and Methods of Social Inquiry (7 credits). S

The first part of the course focuses on basic ethical, political, and logical issues in social scientific inquiry. The second part develops a wide range of skills and methods appropriate to actual research. Course 103A, Statistical Methods, is strongly recommended. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; enrollment restricted to sociology and sociology combined majors, minors and proposed majors. (General Education Code(s): W, Q.) *G. Sandoval*

105A. Classical Sociological Theory. F

This intensive survey course examines the intellectual origins of the sociological tradition, focusing on changing conceptions of social order, social change, and the trends observed in the development of Western civilization in the modern era. Readings are all taken from original texts and include many of the classical works in social theory with special emphasis on the ideas of Marx, Weber, and Durkheim which constitute the core of the discipline. Required for sociology majors planning on studying abroad (EAP). Enrollment restricted to juniors and seniors in sociology, proposed sociology, the combined Latin American and Latino studies/sociology, and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *M. Greenberg*

105B. Contemporary Sociological Theory. W

Surveys major theoretical perspectives currently available in the discipline including functionalism, symbolic interactionism, ethnomethodology, conflict theory, critical theory, neo-Marxism, feminist theory. Enrollment restricted to juniors and seniors in sociology, proposed sociology, the combined Latin American and Latino studies/sociology, and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *A. Szasz*

110. Violence in the Family. *

Examines child abuse and neglect, wife abuse, and sexual abuse in the family, using gender as a lens through

which to understand domestic violence. Using a variety of sources, the course undertakes to understand the social, political, and cultural forces that contribute to abuse and to consider solutions. *The Staff*

111. Family and Society. F

Focuses on the interaction between family and society by considering the historical and social influences on family life and by examining how the family unit affects the social world. Readings draw on theory, history, and ethnographic materials. *W. Martyna*

112. Economic Sociology. *

Introduction to economic sociology using field visits to key sites of production and consumption to investigate sociological ideas about the modern economy. *B. Crow*

113. Political Sociology. *

An intensive examination of major substantive monographs representing pluralist, elite, and class theories of the state in industrialized capitalist democracies. *The Staff*

114. Sports and Society. *

Explores the interconnections between sports and society using sociological theories and methods. Topics include class, race, and gender; mass media and popular culture; political economy; education and socialization; leisure patterns (participants and spectators); globalization and cross-national comparisons. *The Staff*

115. Sustainability and Social Change. *

A hands-on, integrated-learning workshop where students are trained to pursue collaborative design projects, and carry out a design project in which they use these skills. Students read sociological analyses of particular case studies of collaboration in innovation and design, illustrating particular social science approaches to collaboration and sustainable design. Enrollment by permission of instructor. (Formerly *Collaborative Design for Sustainable Technology Lab.*) Enrollment limited to 30. *E. Du Puis*

116. Communication, Media, and Culture. F

Examines media institutions, communication technologies, and their related cultural expressions. Focuses on specific ways the media—including media studies and criticism—operates as social and cultural factor. Contemporary theory or equivalent in related fields recommended. (Formerly *Communication and Mass Media.*) Enrollment restricted to upper-division students. *H. Gray*

117. California Youth in Transition. *

Explores modern California youth as a transitional generation whose trends signal a "new sociology" in the interplay of race, immigration, class, gender, and age. Examines the myths/realities of youth crime, violence, suicide, drug abuse, school failure, and other social issues. Course 1 or course 10 recommended but not required. *The Staff*

118. Popular Music, Social Practices, and Cultural Politics. *

Considers the role of popular music as a site of contemporary social practices and cultural politics. Examines the institutional organization and production of popular music, its cultural meanings, and its social uses by different communities and social formations. Also examines popular music as a vehicle through which major cultural and political debates about identity, sexuality, community, and politics are staged and performed. Prerequisite(s): course 105A or 105B. Enrollment restricted to juniors and seniors. *The Staff*

119. Sociology of Knowledge. *

Focus includes the following three areas: historical examination of sociological theories of knowledge with reference to Durkheim, Weber, Mannheim, and others; examination of black and feminist perspectives within sociology;

examination of whether and how "outside" observers can analytically grasp the inner workings of other cultures. Prerequisite(s): course 103B or 105A or 105B. *The Staff*

120. Gender, Sexuality, and Cultural Politics. W

Focuses on the role feminist discourses play in cultural politics emphasizing sex, sexuality, and sex work as related to gender, race, and class. Examines the relationship between academic and popular feminisms. Interrogates post-feminism, third-wave feminism, and generational differences in feminisms. (Formerly *Feminisms and Cultural Politics.*) Prerequisite(s): course 129 recommended. Enrollment restricted to juniors and seniors. *J. Bettie*

121. Sociology of Health and Medicine. *

Analysis of the current health care "crises" and exploration of the social relationships and formal organizations which constitute the medical institution. Study of the political, economic, and cultural factors which affect the recognition, distribution, and response to illness. *J. Reardon*

121B. Comparative Health-Care Systems and Policies. *

Critical examination of the American health-care system, its history, and the interests it serves; and an analysis of the health-care systems of comparable nations. *The Staff*

122. The Sociology of Law. W

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law. (Also offered as Legal Studies 122. Students cannot receive credit for both courses.) *C. Reinerman*

123. Law, Crime, and Social Justice. *

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation. (Also offered as Legal Studies 123. Students cannot receive credit for both courses.) *The Staff*

124. Visual Sociology. *

Learn to critically consume documentary, ethnographic film, photojournalism, and the genre of realism as these methods are increasingly used to describe the social world. Addresses theoretical, methodological, practical, and ethical issues of creating visual media. Optional media lab teaches students how to create visual products as well. (Formerly *Visual Ethnography*) Prerequisite(s): Enrollment restricted to juniors and seniors. *J. Bettie*

124L. Visual Sociology Media Lab (2 credits). *

Teaches the basics of digital narrative/storytelling, basic use of digital video cameras, digital video editing in iMovie and/or Final Cut Pro, and use of microphones and sound. Students use these skills to aid in creation of their final course project. (Formerly *Visual Ethnography Media Lab.*) Concurrent enrollment in course 124 is required. Enrollment restricted to juniors and seniors. *J. Bettie*

125. Society and Nature. F

A healthy society requires a stable and sustainable relationship between society and nature. Covering past, present, and future, the course covers environmental history of the U.S., the variety and extent of environmental problems today, and explores their likely development in our lifetimes. (General Education Code(s): PE-E.) *A. Szasz*

126. Sociology of Sex. S

Explores social and cultural aspects of human sexuality and reproduction, including how and why meanings and behaviors are contested. Analyzes sexuality and reproduction as forms of social and political control as well as cultural expression and self-determination. Enrollment restricted to upper-division students. Enrollment limited to 90. *J. Bettie*

127. Drugs in Society. S

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course. (Also offered as Legal Studies 127. Students cannot receive credit for both courses.) *C. Reinerman*

128. Law and Politics in Contemporary Japan and East Asian Societies. *

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue Japanese government and corporations in California. (Also offered as Legal Studies 126. Students cannot receive credit for both courses.) Enrollment limited to 30. *H. Fukurai*

128I. Race and Justice. F

An introduction to comparative and historical analyses of the relations between race and criminal justice in the U.S. Emphasis on examinations of structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Formerly *Race and Criminal Justice*) (Also offered as Legal Studies 128I. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 120. *H. Fukurai*

128J. The World Jury on Trial. *

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others. American jury contrasted with other forms of lay participation in the legal process. (Also offered as Legal Studies 128J. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 30. *H. Fukurai*

128M. International Law and Global Justice. S

Examines war crimes, crimes against humanity, and the evolution and role of the International Criminal Court (ICC). Examines the evolution of the concept of international law, the rationale for its birth and existence, roots of international conflicts and genocides, possible remedies available to victims, mechanisms for the creation and enforcement of international legal order, as well as the role of colonialism, migration, poverty, race/ethnic conflicts, gender, and international corporations in creating and maintaining conflicts and wars. (Also offered as Legal Studies 128M. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 30. *H. Fukurai*

129. Popular Culture and Cultural Studies. W

Examines the hidden politics of popular pleasure, studying

the workings of domination and transgression in popular culture and everyday life. Explores not only media representations but cultural practices as well. Examines both cultural production and consumption. Considers how hegemonic discourses render the politics of resistance invisible. (Formerly *Popular Culture*.) Enrollment restricted to juniors and seniors. *J. Bettie*

130. Sociology of Food. *

Following food from mouth to dirt, explores the politics, economy, and culture of eating, feeding, buying, selling, and growing food. Topics cover both the political economy of the food system as well as how body and nature are contested categories at either "end" of this system. *E. Du Puis*

131. Media, Marketing, and Culture. *

Explores relationship between modern forms of cultural production and the economy and society in which they emerge. Course reads, screens, and discusses variety of the cultural texts: from the historical and theoretical to the commercial, popular, and counter-cultural. (Formerly *Culture, Economy, and Power*.) Enrollment restricted to juniors and seniors. *M. Greenberg*

132. Sociology of Science and Technology. *

Reviews social and cultural perspectives on science and technology, including functionalist, Marxist, Kuhnian, social constructionist, ethnographic, interactionist, anthropological, historical, feminist, and cultural studies perspectives. Topics include sociology of knowledge, science as a social problem, lab studies, representations, practice, controversies, and biomedical knowledge and work. Prerequisite(s): course 103B, 105A, or 105B. Enrollment limited to 20. *The Staff*

133. Currents in African American Cultural Politics. S

Takes as its subject, the dialogues, debates, conceptions, and strategies of self representation produced by blacks in the U.S. and Atlantic world in the twentieth and twenty-first centuries. These issues are examined through the insights of feminist theory, cultural studies, media studies, sociology, and African American studies. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *H. Gray*

134. Television and the Nation. W

The role of American network television in the production of the post-war American national imagination is our focus. Our approach will explore issues of media power, especially television's industrial apparatus, its network structure, its strategies of representation in relationship to the construction of the image of the nation, and the meaning of citizens, consumers, and audiences. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. (General Education Code(s): W.) *H. Gray*

135. Nonverbal Communication. *

Explores varieties of nonverbal communication: facial expressions, tones of voice, personal space and proxemics, gestures, and paralanguage. Readings are drawn from sociology, psychology, and anthropology. Includes films, videotapes, photographs, and audiotapes. *The Staff*

136. Social Psychology. W

Major theories and concepts in sociological study of social psychology. Topics include identity and social interaction, deviance, sociology of emotions, social narratives, and the social construction of reality. (General Education Code(s): PE-H.) *M. Millman*

137. Deviance and Conformity. W

Why certain social acts are considered threatening and

how individuals or groups become stigmatized. Sociological analysis of the institutions and processes of social control and the experience of becoming deviant and living with a stigmatized identity. Introductory course in sociology recommended. (General Education Code(s): PE-H.) *F. Guerra*

140. Social Psychology of Power. *

This course uses historical, sociological, and social psychological materials to introduce students to issues concerning class and power, religion and power, minorities and power, women and power, the rise of the New Right, and the successes and failures of the Left. Prerequisite(s): course 1, 10, or 15 or Psychology 40. Enrollment restricted to juniors and seniors. *G. Dombhoff*

141. Group Process. *

The study of group development and interpersonal behavior based primarily on observation of the class discussion group. Readings are drawn from psychology and fiction as well as from sociology. Offered in alternate academic years. Enrollment restricted to senior sociology majors. Enrollment limited to 18. *M. Millman*

142. Language and Social Interaction. W

Concerns the routine and taken-for-granted activities that make up our interactions with one another, consisting in large part—but not exclusively—of verbal exchanges. Emphasis on the socially situated character of communication, whether intimacy between two people or dominance of a group. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to sophomores, juniors, and seniors. *W. Martyna*

143. Conversation Analysis. *

A working seminar, involving the analysis of actual conversations. Covers fundamental ethical, conceptual, and methodological issues that arise in the collection of conversational data, as well as the skills and techniques of conversation analysis. Given our operating assumption, that talk is a primary means of constructing social identities, there is a heavy thematic emphasis on gender, status, and power in conversation. Prerequisite(s): course 142 or Psychology 80E. Enrollment restricted to juniors and seniors. Enrollment limited to 20. *C. West*

144. Sociology of Women. W

Analysis of the social significance and social production of gender. Some consideration of how sex differences have developed. Major emphasis on the impact of gender as a categorical imperative in the present social context. In this context, the course is also about sexual segregation, sexual inequality, and the dynamics of interpersonal power. Enrollment restricted to juniors and seniors. An introductory sociology course is recommended. *C. West*

145. Sociology of Men. S

Examines conflicting views on the development and state of modern masculinity as adaptation, transitional phase, or pathology. Did men lose the "gender war"? Do boys need rescuing? What are common and divergent social experiences of men within race, class, gender, culture, era? An introductory sociology course recommended. *W. Martyna*

146. Sociology of Violence, War, and Peace. *

Explores key issues, theories, and topics in the study of violence, war, and peace. Addresses aspects of aggression, personal violence, political violence, and war. In addition, various strategies for the prevention of violence and war are examined. *The Staff*

148. Sociology of Learning. *

Examines learning and achievement from class, race, and gender perspectives; provides tools for improving learning and achieving goals; explores interplay between past and

present social forces affecting learning and achievement. Class has dyads rather than sections. Enrollment restricted to juniors and seniors. *The Staff*

149. Sex and Gender. *

Modern analyses of sexuality and gender show personal life closely linked to large-scale social structures: power relations, economic processes, structures of emotion. Explores these links, examining questions of bodily difference, femininity and masculinity, structures of inequality, the state in sexual politics, and the global re-making of gender in modern history. Recommended as background: any lower-division sociology course. *The Staff*

150. Sociology of Death and Dying. S

Explores contemporary, historical, cross-cultural and interdisciplinary perspectives on the social psychology of death and dying. Cultural norms and institutional contexts are studied, along with the individual experience, and the ways in which our perspectives on death and dying influence our experiences of life and living. Enrollment restricted to juniors and seniors. *W. Martyna*

151. Research Seminar on Human Communication. *

Focuses on advanced topics in verbal and nonverbal communication. Members of this research seminar select a specific area of human communication (e.g., "gestures," "facial expressions," "the voice," etc.). Students assemble an annotated bibliography, drawing on literatures in many social science disciplines, and write scripts that demonstrate complex communication issues. Finally, students use audio and video equipment to illustrate these scripts. Prerequisite(s): course 135. Enrollment limited to 25. *The Staff*

152. Body and Society. F

Critically examines the place of the human body in contemporary society. Focuses on the social and cultural construction of bodies, including how they are gendered, racialized, sexualized, politicized, represented, colonized, contained, controlled, and inscribed. Discusses relationship between embodiment, lived experiences, and social action. Focuses on body politics in Western society and culture, especially the United States. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to juniors and seniors. Enrollment limited to 50. *F. Guerra, The Staff*

153. Sociology of Emotions. F

Examines sociological approaches to the understanding of emotions and the application of these approaches to work, learning, interpersonal relationships, health and illness, sports, and other aspects of everyday life. Enrollment restricted to juniors and seniors. *M. Millman*

154. Cross-National and Cross-Cultural Research. *

Examines a variety of theoretical, methodological, and substantive approaches to cross-national and cross-cultural research. Focuses on the importance and variety of cross-national and cross-cultural studies. Prerequisite(s): course 103B. Enrollment limited to 20. *The Staff*

155. Political Consciousness. *

Explores the relationship between consciousness, ideology, and political behaviors from voting to rebellion. Special attention is given to the lived experience and the identity interests that complicate the nexus of class position and political ideology. An introductory sociology course is recommended as preparation. *G. Dombhoff*

156. U.S. Latina/o Identities: Centers and Margins. F

Explores historical and contemporary constructions of Latina/o identities and experiences in U.S. Particular

emphasis placed on transcultural social contexts, racial formations, and intersections with other identities including sexuality and gender. Enrollment restricted to juniors and seniors. Enrollment limited to 50. (General Education Code(s): ER, E.) *G. Sandoval*

157. Sexualities and Society. *

Explores controversies in the sociology of sexuality. Focuses on tensions and disagreements that characterize debates over sex and society, and attempts to identify political and theoretical issues at stake in these debates. Enrollment limited to 30. *D. Gould*

163. Global Corporations and National States. *

Examines the nature and development of the capitalist world system since 1945. Emphasis is on the power of multinational corporations as managers of the world system and the response of states: role of multilateral agencies such as the World Bank, International Monetary Fund, United Nations. *H. Shapiro*

165. World Systems Perspective. *

Seminar on the intellectual origins and contemporary exponents of the world-systems perspective in the social sciences: Marx, Braudel, Polanyi, Arrighi, Wallerstein. Prerequisite(s): courses 105A and 105B or permission of instructor. *The Staff*

166. Economics for Non-Economists. *

Fosters economic literacy among students who are not economics majors but are interested in the political and social ramifications of economic change. Emphasizes economic institutions and policy and is taught by case-study method, which requires active student participation. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *H. Shapiro*

167. Development and Underdevelopment. S

Examines contemporary debates about development in the Third World: alternative meanings of development, recent work on the impact of colonial rule, how some economies have industrialized, ideas about agrarian change, and recent research on paths out of poverty. Students work in pairs to examine a development in one country since World War II. *B. Crow*

168. Social Justice. *

What is social justice? People answer this question differently, depending upon their sociological perspective. Using a combination of political philosophy and sociological studies, explore five perspectives on social justice within the Western sociological tradition: utilitarianism, Marxism, liberal egalitarianism, communitarianism, and pluralism. Students pick a topic and learn to articulate different visions of socially just change based on these perspectives. Prerequisite(s): course 105A. Enrollment limited to 60. *E. Du Puis*

169. Social Inequality. F

A survey of theories and systems of social stratification focusing on such phenomena as race, class, power, and prestige. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *D. Takagi*

170. Ethnic and Status Groups. *

Examines the enduring and changing status of ethnic and other visible minority groups in the United States, e.g., Latinos, Asian Americans, African Americans, and immigrants, with comparative materials drawn from other societies. An introductory course in ethnicity and race is recommended as preparation. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *The Staff*

171. Exploring Global Inequality. F

Seminar focusing on readings of key texts and recent research papers on several dimensions of global inequality

(material, health, gender, cultural, migration) to find innovative ways of understanding the connections among different dimensions of inequality and of visualizing inequality in digital media. Students prepare visual presentations on contemporary social inequalities suitable for an online (for example, <http://ucatlus.ucsc.edu/>) or print atlas. Enrollment restricted to seniors. Enrollment limited to 30. *B. Crow*

172. Sociology of Social Movements. *

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water. Enrollment restricted to juniors and seniors. Enrollment limited to 60. (General Education Code(s): PE-H.) *D. Gould*

173. Water. *

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water. Enrollment restricted to juniors and seniors. Enrollment limited to 60. (General Education Code(s): PE-E.) *A. Szasz, B. Crow*

174. Twenty-First-Century African American Social Structure. *

A sociological overview of African American society in the 21st century. The changing patterns of social/cultural organization, class structure, and modes of political action are analyzed. This analysis is located within the framework of migration, urbanization, and social struggle among black Americans. Prerequisite(s): course 10 or 20. (General Education Code(s): E.) *The Staff*

175. Social History of Asian Americans. *

Provides a general introduction to the history of Chinese, Japanese, Filipinos, Koreans, and Southeast Asians, within the context of American history. Examines the diverse processes of immigration, the formation of communities, work, and family relations of Asians and Asian Americans. Looks at how social, political, and economic changes in the larger U.S. society have affected the lives of Asians in America. Offered in alternate academic years. Enrollment restricted to juniors and seniors. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *The Staff*

176. Women and Work. *

Examines the history of women and work; women's current conditions of work and political, economic, and social factors affecting these conditions; means by which women may shape working conditions including contributing leadership, developing policies, building unity, and creating alliances. Enrollment restricted to juniors and seniors. *The Staff*

176A. Work and Society. F

Addresses how work is organized and shapes life changes. Covers: the history of paid work; the impact of technology; race/class/gender at work; professional and service work; work and family; collective responses to work; and challenges of work in a globalizing economy. Enrollment restricted to juniors and seniors. *S. McKay*

177. Urban Sociology. S

Historical and contemporary examination of urban life including community, race, geography, urban and suburban cultures and lifestyles, stratification, housing, crime, economic and environmental issues, demographic changes, and global urbanization. Enrollment restricted to junior and senior sociology majors. Enrollment limited to 60. *G. Sandoval*

177A. Latinos/as and the American Global City. F
Examines roles of emerging Latino/a majorities in urban centers across the U.S. Explores the "Latinization" of U.S. cities and various factors affecting the life chances of Latinos/as including, but not limited to, immigration, segregation, social movements, and other forms of political participation. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *G. Sandoval*

177G. Global Cities. *
Explores how "global cities" have facilitated increasing integration of the diverse cultures and economies of the world. Using historical, sociological, and comparative methods, analyzes how these spaces both enable and constrain transnational flows of capital, labor, information, and culture. Enrollment restricted to juniors and seniors. *M. Greenberg*

178. Sociology of Social Problems. S
Views "problems" in society not as given but as social constructs. Examines the ways in which conditions in society become identified and defined as problems and consequences that follow from such a process. *D. Takagi*

179. Nature, Poverty, and Progress: Dilemmas of Development and Environment. W
Concerns about environmental change, including global warming, threats to the ozone layer, and industrial pollution, raise questions about Third World development. Simple views of the relation between society and nature, such as blaming population growth, industrialization, or poor people, seem to preclude higher living standards. Uses debates and case studies to explore more subtle and optimistic views of social-natural relations. *B. Crow*

179L. Nature, Poverty, and Progress Laboratory. *
For enrollees in course 179, this optional lab provides opportunity to research ideas and produce a rough business plan for green enterprise of choice. Examples include compostable packaging, gray water systems, sustainable manufacturing, solar-powered submarines, green consulting, and other enterprises. Concurrent enrollment in course 179 required. Enrollment limited to 20. *B. Crow*

180. Social Movements of the 1960s. F
Examines the roots, development, and political outcomes of black civil rights organizations during the Sixties. Explores social and structural forces, mobilization of black communities, strategies and tactics used, nature of the relationships between various civil rights organizations, unity and disunity among organizations, leadership gains, and impact on race relations in the U.S. Enrollment restricted to junior and senior sociology and combined sociology/Latin American and Latino studies majors. Enrollment limited to 45. *D. Gould*

181. A Sociology of Place: The California Coast. *
Examines the California coast, including important social, political, cultural, and environmental aspects of this most important place. Lectures, readings, discussion, and class assignments examine the history, development, and future of the California coast. Enrollment restricted to juniors and seniors. Enrollment limited to 45. *The Staff*

184. Hunger and Famines. *
Why do famines happen? Why are some hungry and some over-fed? Recent advances in the understanding of food crises and chronic undernutrition are the focus of this course. *B. Crow*

185. Environmental Inequality. S
Modern society not only assaults nature, it does so in ways that reproduce existing social inequalities. Reviews research on disproportionate exposure to risks and hazards, especially along dimensions of class and race, and examines the

environmental justice movement. Enrollment restricted to junior and senior sociology and environmental studies students. Course 125 recommended as preparation. Enrollment limited to 42. (General Education Code(s): PE-E.) *A. Szasz*

186. Globalization, Information, and Social Change. *
Reviews theories of globalization, the information revolution, world inequality, and the value of information networks for upgrading capacity of NGOs and community groups to promote progressive social change. Requires research project/grant proposal using Internet resources. *P. Lubeck*

187. Feminist Theory. W
Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Considers various deconstructive challenges to second wave feminism based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Prerequisite(s): course 105B, and either course 144 or 149 or Feminist Studies 1 or 100. Enrollment limited to 35. *D. Gould*

188. Religion and Social Change. *
Uses historical-comparative method to explore role of religion in global and local social movements. Case studies include historical analysis of the civil rights movement, Islamic movements, liberation theology, and millenarian movements. Topics vary annually. Recommended for social science and history majors. (General Education Code(s): E.) *P. Lubeck*

188A. Social Change in the Global Economy. S
Explores local dimensions of globalization, focusing on experiencing more global divisions of labor in both industrialized and developing countries. Themes include: economic integration and dislocation; new forms of governance; globalizing consumption and culture; gender; and popular resistance. Enrollment restricted to juniors and seniors. (General Education Code(s): CC.) *S. McKay*

188G. Global Islam: Politics, Movements, Discourses. *
Historical sociology of Muslim political and cultural movements as a global phenomena. Topics include: survey of Muslim globalization processes, Muslim political theory, Shari'a, Sufi networks, economic institutions, Islamic nationalism contemporary social movements, Muslim response to imperialism, Islamic revival, Muslim civil society, and the role of women in contemporary Muslim politics. *P. Lubeck*

190. Proseminar.
The Staff

191. Sociology Teaching Practicum. F,W,S
Under the supervision of the instructor, the student works with a group of students in a lower-division course, leading discussions, explaining material, reading and marking submissions, consulting individually and/or in other ways assisting in the teaching of a course. Interview and selection by professor required. Prerequisite(s): Senior standing and excellent performance in core courses in the major. Enrollment restricted to senior sociology majors. *The Staff*

192. Directed Student Teaching. F,W,S
Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S
Provides for (department-sponsored) individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (as opposed to course 198 where faculty supervision is by correspondence). Up to three such

courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S
Provides for department-sponsored individual field study in the vicinity of campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S
Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Group Tutorial (2 credits). F,W,S
Small group study of a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S
Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S
Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S
Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Completion of course 195C (completion of the thesis) satisfies the W general education requirement. Prerequisite(s): course 103B and satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. May be repeated for credit. (General Education Code(s): W.) *The Staff*

196A. Capstone: The Sociologist as Public Intellectual (3 credits). S
Students hear a selected group of faculty discuss their current research and how that research furthers public understanding and discussion of some vital contemporary social issue. Enrollment restricted to junior and senior sociology majors. *A. Szasz*

196G. Project Practicum: Global Information and Social Enterprise. F,W,S
Project summary and evaluation are required for completion of minor in global information and social enterprise studies (GISES). Projects require approval in advance by director of GISES. Completed projects must be uploaded electronically on the web site or archive of the global information internship program. Prerequisite(s): courses 30A, 30B, and 30C. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S
Provides for (department-sponsored) individual study program off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be

issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Advanced directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201. The Making of Classical Theory. F

Examines the establishment of "theory" in the discipline of sociology. Introduces students to close readings and analysis of a core selection of social theory. Problematises the construction, maintenance, and reproduction of a theoretical canon in sociology. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. *D. Gould*

202. Contemporary Sociological Theory. W

Intensive survey of major tendencies in modern social thought, including functionalism, symbolic interactionism, ethnomethodology, critical theory, structuralism, phenomenology, neo-Marxism, and feminist theory. Enrollment restricted to graduate students in sociology and by permission number. *A. Szasz*

203. Sociological Methods. F

Approaches methods as a series of conscious and strategic choices for doing various kinds of research. Introduces students to the epistemological questions of method in social sciences; to key issues in "technique," particularly control, reliability, and validity; and to good examples of social research. Enrollment restricted to graduate students in sociology and by permission number. *C. West*

204. Methods of Quantitative Analysis. W

Students are provided with intuitive explanation of fundamental concepts in statistics and learn how to use statistics to answer sociological questions. Experience and guidance in using computers to efficiently analyze data are provided. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. *D. Takagi*

205. Field Research Methods. *

Gives students first-hand experience doing fieldwork with an emphasis on participant observation and some interviewing. Students submit weekly field notes and a final project analysis. At seminar meetings, field experiences and relevant literature are examined. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 10. Offered in alternate academic years. *The Staff*

206. Comparative Historical Methods. W

Overview of research strategies and methods used in historical and social sciences. Students read works exemplifying a variety of analytical approaches. Written assignments cultivate critical skills, weighing of tradeoffs inherent in all methodological choices, and elaboration of hypothetical research designs. Enrollment restricted to graduate students. Enrollment limited to 20. *P. Lubeck*

208. Writing Practicum. *

Writing intensive course designed to facilitate the completion of the master's thesis, oral field statement, or the dissertation in sociology. The seminar is convened by a faculty member in conjunction with students and their adviser or appropriate committee chair. Students are expected to produce and present drafts of work completed in the seminar. Enrollment restricted to sociology graduate students and by permission number. Enrollment limited

to 12. *The Staff*

209. The Analysis of Cultural Forms. S

Examines material and symbolic forms such as media products, cultural artifacts, language, nonverbal communication and social practices using discourse, textual, content, interpretive, and conversation analyses as well as ethnography and different channels of communication. Theoretically, relies on cultural studies, communication studies, cultural sociology, film studies, and ethnomethodology. Enrollment restricted to sociology graduate students. *J. Bettie*

220. Global Transformation: Macrosociological Perspectives. S

Classical concepts and contemporary approaches in macrosociology, the study of large-scale, long term social change. Readings drawn primarily from the Marxian and Weberian traditions (new institutionalism, varieties of neo-Marxism, environmental history, state centrism) as they focus on agrarian and industrial structures and commodity chains; household, village, and neighborhood organization; social movements and revolutions; culture, ideology, and consciousness; policy analysis; comparative urban, national, and civilizational development. Enrollment restricted to graduate students in sociology. Enrollment limited to 15. *B. Crow*

222. Political Sociology. *

A survey of major works and themes in the relationship of politics and society, with primary emphasis on the compatibilities and contradictions of pluralist, elite, and class perspectives on the state. Enrollment restricted to graduate students. *E. Du Puis*

223. Sociology of the Environment. *

Advanced treatment of the dominant ideas of nature and the environment in the West and their relationship to the development of Western capitalism. Leading Western theories of environmental crisis and their relation with ideologies of environmentalism and environmental movements. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *E. Du Puis*

224. Globalization: Theories and Social Movements. *

Examines the structures, processes, and movements associated with globalization processes. Reviews political economy theories, cultural theories systems, state industrial policies, and popular responses to globalization. Also assesses contribution of resistance movements informed by class, ethno-nationalism, religion, or gender. Enrollment restricted to graduate students. Enrollment limited to 25. Offered in alternate academic years. May be repeated for credit. *P. Lubeck*

225. Political Economy for Sociologists. *

Examines rudiments of historical materialism in light of advances in cultural and ecological Marxism. Basic categories of Marxist political economy. Thematic focus on the "first" and "second" contradictions of capitalism in world economy today. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Crow*

227. Learning from Environmental Historians. *

Looks at several major themes in the sociology of the environment and asks how the works of environmental history address those themes. Includes reflections on how history as a method interrogates social questions. Possible themes include: sustainability; social justice; universalism vs. particularity; city and country; and social movements. Enrollment restricted to graduate students. Enrollment limited to 8. *E. Du Puis*

229. Work and Labor Markets in the New Economy. W

Focuses on the interaction of work restructuring and existing race/class/gender inequalities. Themes include: the labor process and theories of consent; labor market segmentation; job and occupational segregation; information technologies, flexible work, and post-industrialism; flexible employment relations; and low-wage service and labor markets. Enrollment restricted to graduate students. *S. McKay*

230. Theory and Method in the Sociology of Marx. *

Examines theoretical and methodological implications of Marxist theory for empirical social research. Analyzes how historians and social scientists apply Marxist method in explaining society, social change, globalization, culture, and late capitalism. Goal is to assist students to employ Marxist theory and method creatively in their research projects. Enrollment restricted to graduate students. Enrollment limited to 12. *P. Lubeck*

240. Inequality and Identity. *

Explores recent theoretical and empirical studies of race, class, gender, and sexuality with an emphasis on the production of identities and their relationship to processes and structures of power in a postcolonial context. Enrollment restricted to graduate students in sociology. *D. Takagi*

241. Cross-National and Cross-Cultural Research. S

Seminar examining theoretical and methodological issues in doing cross-national and cross-cultural research. In addition to a consideration of different research paradigms and approaches, representative works from each comparative tradition are examined. Enrollment restricted to graduate students. Enrollment limited to 15. *C. Reinerman*

242. Feminist Research Seminar. F

Provides scholarly support to students doing feminist research. Examines issues concerning conceptualization of feminism and feminist research. Explores relation of feminist research to intersections of gender, class, and race; to the self; to power; and to transformative social praxis. Students present and are given assistance with their work, as well as listen to, read, and assist with the work of others. Enrollment restricted to graduate students. Enrollment limited to 10. *P. Roby*

244. Race and Ethnicity. *

A critical survey of the theoretical issues of persistence and change, public policy, and recent empirical studies in the field of race and ethnic relations. Readings introduce comparative race relations and a historical background of major theoretical paradigms in the field which purport to explain race and ethnic relations in general and race relations in America specifically. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. *The Staff*

245. Feminist Theory. *

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Explores the decentering of universalist feminist theories and asks what constitutes feminist theory after gender has been decentered. Considers various deconstructive challenges to second-wave feminist theory based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Enrollment restricted to sociology graduate students. Enrollment limited to 12. *J. Bettie*

246. Class, Culture, and Movement. *

Analyzes impact of ethnicity, gender, and religion on the class situation of laboring people in a globalized economy by intensive reading and critique of classic studies,

explaining how social movements reflect combinations of social relations and cultural practices. Enrollment restricted to graduate students. Enrollment limited to 15. *C. Reinerman*

247. Race and Class. *

Introduces the student to the recent literature on race and class. Covers several different theoretical perspectives including internal colonialism, labor market segmentation theories, racial formation, and neo-gramscian cultural analyses. In addition to study of theory, also compares theoretical perspectives to the historical experience of minority groups, in particular, blacks, Hispanics, and Asians. Enrollment restricted to sociology graduate students. *The Staff*

249. Feminisms and Cultural Politics. *

Focuses on the role feminist discourses play in contemporary cultural politics with the main focus on the politics of sex, sexuality, and sex work. Begins with considerations of (mis)representations of feminisms in popular cultures; considers the relationship between academic and popular feminisms; and interrogates the meaning of terms post-feminism and third-wave feminism. Enrollment restricted to graduate students. *J. Bettie*

250. Course Design and Grant-Writing Seminar. S

A professional training seminar devoted to the philosophical, conceptual, and practical issues of course design, pedagogy, and grant writing. Topics covered: institutional contexts; curriculum (including syllabi, course content, assignments, evaluation); pedagogy; teaching as work/labor process; grant writing; budgets. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *D. Takagi*

252. Symbolic Interactionism and Sociology of Emotions. *

Examines classic and contemporary theories and concepts that play a major role in sociological studies of identity, symbolic and social interaction, and the sociology of emotions. Examines how cultural forms, rules, and rituals define, structure, and mediate emotions and how identities are situated within social institutions. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

253. Race, Crime, and Justice. *

An introduction to comparative and historical analyses of relations between race and the criminal justice system. Specific topics include defining race/ethnicity, sentencing disparities, jury nullification, jury selection and decisions, prosecutorial misconduct, government's charging and investigative discretions, and other racially biased law enforcement practices and criminal court processes. Also covers a number of highly publicized trials that involved unmistakable elements of race and racism such as Chin, King, Simpson, and Unabomber cases. Students are also exposed to World Wide Web (Internet) to learn how to do research in the field of criminal justice. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Fukurai*

255. Engaging Cultural Studies. *

Examines feminist and ethnic studies production, appropriation, and transformation of cultural studies theories and methodologies. Considers the utility of various theoretical apparatuses and methodological strategies employed in the interdisciplinary site that combines feminist, ethnic, and cultural studies. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Bettie*

256. Urban Sociology. *

Introduction to core writings and key theoretical paradigms in urban sociology. Examines the history and contempo-

rary conditions of cities in the U.S. and the urban experience. Urbanization, suburbanization, community, social inequality, urban politics, relationship between the built environment and human behavior. Enrollment restricted to graduate students. *G. Sandoval*

257. Colonialism, International Law, and Global Justice. *

Examines colonialism, war crimes, crimes against humanity, and legal remedies, and the role of the International Criminal Court (ICC); traces the history of colonial expansionism, starting from the Roman Empire to the present American imperial dominance in global politics. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Fukurai*

258. Global Lay Justice Systems and Direct Democracy. S

Introduces historical analysis of lay justice participation. Examines global exploration of the use of lay judge institutions in citizen's movements and the assumption that juries are a derivative institution of democratic ideals. Focuses on corporate media creation of anti-jury sentiment. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Fukurai*

260. Culture, Knowledge, Power. W

An introduction to theoretical approaches and exemplary studies of culture, knowledge, and power which critically interrogate the relationship between cultural formations and the production, circulation, and meaning of knowledges, materials, artifacts, and symbolic forms. Explores the concrete ways that power is organized and operates through different forms and sites, how it interpolates with other forms of power, and examines knowledges and culture as specific forms of power and sites of political struggle. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *M. Greenberg*

261. Sociology of Knowledge. *

Explores three main issues: the social determination of knowledge, including natural science; the character of intellectual labor and intellectuals as a social group; the role of organized knowledge and "knowledge industries" in contemporary social change. Texts examined include class-based theories (Lukacs, Mannheim, Gramsci), feminist standpoint analysis (Smith, Harding, etc.), and theories of postmodern culture (Lyotard, Harvey, etc.). Enrollment restricted to graduate students. Enrollment limited to 20. *The Staff*

262. Cultural Practice and Everyday Life. *

Examines contemporary debates about the role of mass produced expressive symbols in modern industrial societies, and the circumstances of cultural production for its impact on the creation, organization, and use of cultural artifacts. Concern with the use and experience of popular symbols for the ways that their use involves the creation of meanings and the role of such meanings in the social organization of society. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Gray*

263. Cultural Politics of Difference. S

Considers the cultural turn and the turn to difference in understanding relations of power and struggles over representation in studies of race, media, and culture. Examines national identity, difference, subjectivity, and authenticity, especially as they bear on quests to create new identifications, alignments, and efforts to protect existing identities. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Gray*

264. Science, Technology, and Medicine. *

Explores social and cultural perspectives on science, technology, and medicine. Analyzes theoretical approaches

that open up "black boxes" of scientific and biomedical knowledge, including the politics of bodies, objects, and health/illness. Links are made to medical sociology. Enrollment restricted to graduate students. *J. Reardon*

268A. Science and Justice: Experiments in Collaboration. S

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Feminist Studies 268A and Biomolecular Engineering 268A. Students cannot receive credit for three courses.) Enrollment limited to 10. *J. Reardon, K. Barad*

268B. Science and Justice Research Seminar. F

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): course 268A. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Biomolecular Engineering 268B and Feminist Studies 268B. Students cannot receive credit for three courses.) Enrollment limited to 10. *J. Reardon, K. Barad*

282. Social Policy Research. *

Policy research. Covers a variety of theoretical perspectives found in policy studies. Surveys various methodological approaches used in policy research. Theories and methods linked to research agendas on the various phases of the policy life cycle. Students are required to design a research proposal. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *E. Du Puis*

290. Advanced Topics in Sociological Analysis. F

The topics to be analyzed each year vary with the instructor but focus upon a specific research area. Enrollment restricted to graduate students by consent of the instructor. *M. Millman*

293. Going on the Job Market. *

A seminar devoted to the practical problems of securing a job as a professional sociologist. Topics covered: researching colleges, universities, and public and private organizations that employ sociologists; designing a curriculum vitae; writing an application letter; preparing a "job talk;" handling questions during the interview process; the etiquette of visiting (and its aftermath); finding out about them; and the terms of employment: what is negotiable and what is not. Enrollment restricted to graduate students. *C. West*

294. Writing for Social Scientists. *

Seminar on the genres of social science writing, and the problems of starting and finishing a publishable thesis, book, or article. For advanced graduate students working on the composition of their dissertations and journal articles. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Spanish and Spanish for Spanish Speakers

Language Program
218 Cowell College
(831) 459-2054
<http://language.ucsc.edu>

Faculty and Professional Interests

Professor

JORGE ALADRO FONT (Literature)

Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

JULIANNE BURTON-CARVAJAL (Literature)

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

NORMA KLAHN (Literature)

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

Associate Professor

LOURDES MARTÍNEZ-ECHAZÁBAL (Literature)

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

JUAN POBLETE (Literature)

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

Assistant Professor

EVE ZYKIK

Spanish linguistics, second language acquisition, cognitive linguistics, language pedagogy and curriculum design

Senior Lecturer

MARIA VICTORIA GONZÁLEZ-PAGANI

Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

Lecturer

IGNACIO AZNAR, Emeritus

BRENDA BARCELÓ

Medical and professional Spanish, language instruction technology, Latin American culture, Latin dance expressions, Spanish/English/Spanish translation and interpretation, Hispanic linguistics, Romance languages

CARLOS CALIERNO

Bilingualism and intercultural communication; Latin American culture; history of the conquest, music, art, and cinematography

VERÓNICA FELIU

Latin American literature of the 20th century; Chilean feminisms, politics, and culture; Latin American cultural studies; Spanish learning for both non-native and heritage speakers

MARÍA MORRIS

Language learning styles and strategies, culture and technology in language training

MARTA NAVARRO

Latin American literature, Mexican/Chicano culture, Latina/Chicana issues

ARIEL PÉREZ

Language acquisition and teaching methodology, computer-assisted language learning, teaching language for proficiency, oral proficiency assessment; Latin American current affairs

ALVARO ROMERO-MARCO

Spanish literature of the 19th- and 20th-centuries; film, cultural studies

Program Description

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for Spanish speakers (SPSS) courses, from beginning to advanced levels. The language and culture sequences of lower-division courses, Spanish 1-6 and 56 as well as Spanish for Spanish Speakers 61-63, upper-division series Spanish 156 courses, and Spanish for Spanish Speakers 125, are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing as well as cultural competence. Students are strongly encouraged to finish year-long sequences without interruption and, if possible, to study in Spanish-speaking countries. Students who want to do a major that would allow them to take several courses in Spanish may select from among several programs: a major or minor in language studies, a major in literature with an emphasis in Spanish/Latin American/Latino literatures, a major in Latin American and Latino studies, or a major in global economics.

Spanish

Students interested in taking Spanish classes are required to take the placement examination (<http://ic.ucsc.edu/test/>) to enroll in the appropriate level. Students finishing a first year of instruction in Spanish (1-2-3) are encouraged to continue on to second-year (intermediate-level) studies and take Spanish 4, 5, and 6, or Spanish 56, an introduction to Spanish language literature. First-year students also have the option of enrolling in the 1T, 2T, 3T series, which requires continuous enrollment from fall through spring quarters.

Health science majors have priority enrollment in Spanish 5M, *Medical Spanish*, but others may enroll if there is space availability. Students are also encouraged to continue with the third-year Spanish 156 and Spanish for Spanish Speakers 125 series of courses in which a wide variety of topics are covered. For more information on the courses offered in Spanish, please see the course descriptions.

Spanish for Spanish Speakers

Spanish for Spanish speakers (SPSS) has been developed for heritage speakers who, although raised in Spanish-speaking communities or households, are not yet fully proficient in Spanish. SPSS courses take into account the experiences and influences of bilingual and bicultural upbringing.

SPSS students are required to attend laboratory instruction once a week in addition to the regular class meetings. Some lower-division and all upper-division courses can fulfill requirements for several majors or departments, such as American studies, education, global economics, language studies, and Latin American and Latino studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

Study Abroad

The Office of International Education (OIE) offers programs ranging from four weeks (Summer Session) in Cuernavaca, Mexico to one quarter or one academic year in Buenos Aires; Argentina, Santiago, Chile; San Jose and Monteverde, Costa Rica; Morelia and Monterrey, Mexico, and Cordoba, Madrid, Alcalá, Barcelona, and Granada, Spain. Generally, students must have completed Spanish 6 or 56 or SPSS 63 by the end of the sophomore year to qualify for a junior year abroad. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information, see the OIE web site (<http://oie.ucsc.edu/index.html>). For information on credit applied to a particular major, contact the appropriate department.

Spanish

Lower-Division Courses

1. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 24. *The Staff*

1T. Topic-Oriented Spanish Language Instruction (Special Track). F

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 24. *The Staff*

1U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). F

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; Spanish Placement Examination score of 10. *The Staff*

2. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 1 or Spanish Placement Examination score of 20. Enrollment limited to 24. *The Staff*

2T. Topic-Oriented Spanish Language Instruction (Special Track). W

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 1T. Enrollment limited to 24. *The Staff*

2U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). W

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 1U. *The Staff*

3. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 2, 2X, or Spanish Placement Examination score of 30. Enrollment limited to 24. *The Staff*

3T. Topic-Oriented Spanish Language Instruction (Special Track). S

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 2T. Enrollment limited to 24. *The Staff*

3U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). S

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 2U. *The Staff*

4. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various sociopolitical and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 3, 3T, 3X, or Spanish Placement Examination score of 40. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various socio-political and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 4, 4X, or Spanish Placement Examination score of 50. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

5M. Medical Spanish. F,W,S

Students learn vocabulary, expressions, and cultural background to be able to interact with Spanish-speaking patients and doctors. Medical Spanish fulfills language requirement for the health science major of the Biology Department. Prerequisite(s): course 4; or Spanish for Spanish Speakers 61, 62, and 63; or Spanish for Spanish Speakers 125; or Spanish Placement Examination score of 50 or higher. Enrollment restricted to health sciences majors. Enrollment limited to 24. (General Education Code(s): IH.) *The Staff*

6. Intermediate Spanish. F,W,S

Increases oral and written proficiency using authentic reading materials which focus on such topics as social class, ethnicity, education, religion, economic, and political developments in the Spanish-speaking world. Prerequisite(s): course 5, 5M, 5X, or Spanish Placement Examination score of 60. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

56. Advanced Readings in Different Genres. S

Includes composition, discussion, and vocabulary building based on the reading of selected short stories, poetry, theater, film, and related cultural material. Conducted in Spanish. Recommended as preparation for upper-division courses. Prerequisite(s): course 5, 5M, 5X, Spanish for Spanish Speakers 62, or Spanish Placement Examination score of 60. (General Education Code(s): IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses**114. Advanced Conversation and Composition. W**

Advanced conversation and composition based on extensive readings in the humanities and social sciences. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. (General Education Code(s): TA.) *The Staff*

156. Topics in Hispanic Language and Culture.

An analytic study of 20th-century Hispanic language and culture as revealed in print and audio visual media. *The Staff*

156A. The Language of Latin America Cinema. W

Explores Latin American culture through its cinematic art. Students are exposed to and participate in discussion, analysis, and commentary on important social, historical, and political issues presented in the films. Provides a greater understanding of Latin America, and works toward advanced communicative proficiency and comprehension of linguistic variations in countries such as Cuba, Argentina, México, Bolivia, Chile, and others. (Formerly Hispanic Culture Through Film.) Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. (General Education Code(s): CC, E.) *C. Calierno*

156G. Spanish for the Professions. S

Taught in Spanish. Students learn vocabulary and expressions as well as pertinent cultural background to understand, speak, read, and write about business and professional situations in connection with the Latino experience. Legal, educational, medical, and business topics are covered. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 18. *B. Barcelo*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Spanish for Spanish Speakers**Lower-Division Courses****61. Spanish for Spanish Speakers. F**

This course deals with orthography (syllabification, accentuation, etc.), basic grammatical features, verbal structures, and development of conversation skills and confidence in spoken Spanish. Focus on development of writing skills: description, dialogue, exposition, and commentary on contemporary issues relevant to Spanish speakers of the Americas. Students need to utilize the Self-Placement Guidelines, available in 133 Humanities Building to assure proper placement in this class. (General Education Code(s): CC, IH.) *The Staff*

62. Spanish for Spanish Speakers. W

Comprehensive review of the subjunctive, the passive voice, different uses of "se," and other nuances of the language. Intensive practice in understanding specialized readings, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Prerequisite(s): course 61 or placement exam. Students who have not taken Spanish for Spanish Speakers 61 need to speak with an instructor in the Spanish for Spanish Speakers Program. (General Education Code(s): CC, IH.) *The Staff*

63. Spanish for Spanish Speakers. S

Comprehensive grammar review. Rigorous practice in reading historical, sociopolitical, and literary works pointing out nuances of Spanish. Rigorous experimentation with various writing styles: analytical, argumentative, and creative. Prerequisite(s): course 62 or placement exam. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

125. Mexico and the Southwest. S

An interdisciplinary survey of the cultural history of the Mexican people in both Mexico and the U.S. Southwest. Topics include literature, art, folklore, oral tradition, music, politics, as well as "everyday" cultural manifestations. Conducted in Spanish. May be counted toward fulfillment of upper-division major requirements for Latin American and Latino studies and language studies. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 25. (General Education Code(s): CC.) *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Stevenson College

College Office
(831) 459-4930
<http://stevenson.ucsc.edu>

For college description and list of faculty, see page 91.

Lower-Division Courses

10. Skills for College and Beyond (2 credits). W,S

Applications of practical skills for effective, meaningful study in the context of a full, busy life. Topics include learning styles, time management, test preparation, and life balance. Specific techniques for efficient reading comprehension, note-taking, memorization, and self-assessment are introduced. Enrollment restricted to college members and by permission of instructor. Enrollment limited to 15. *C. Camblin*

18. Eighteenth Century Kabbalistic Thought and Literature (2 credits). F,S

Emphasis on analyzing (translations of) original text to explore critical areas of kabbalistic thought, including tzimtzum, the sefrot, theodicy, and hermeneutics. *S. Chein*

20. The Harder They Come—The Postcolonial Self in Jamaica (2 credits). *

Examines Jamaica's transition to independence: the history of colonialism, its legacy of violence, and how the subaltern incorporate and rework hegemonic tropes of the gunslinger, gangster, preacher, politician, and policeman in literature, music, and film. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *B. Lunine*

21. Citizens and Nations: Self and Society in the 19th Century (2 credits). *

A reading seminar focusing on a set of key texts. Examines how the political and industrial revolutions of the 19th century fundamentally transformed the relationships between individuals and their respective societies. Enrollment restricted to Stevenson College members. Enrollment

limited to 20. *K. Silver*

22. Self and Society in Classical Social Theory (2 credits). *

Reading seminar focusing on a set of key texts from classical social theory. Explores the transition from traditional to modern societies. Authors addressed may include Locke, Rousseau, de Tocqueville, Marx, Weber, and Durkheim. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *K. Silver*

28. Residential Life Leadership (2 credits). S

Examines the role and facilitates the development of Stevenson College Residential Advisers. Class themes include an exploration of leadership, resource management, and the process of community building within the college. Course evaluation based on paper writing, participation, engagement with course materials, and a small group final project that requires students to create a year-long program model designed to address an issue facing the Stevenson community. Prerequisite(s): Must have been hired as a Stevenson residential adviser or alternate for the following academic year. Enrollment limited to 30. May be repeated for credit. *A. Yang*

30. Thesis Writing and Editing (2 credits). S

Identifies and examines the assumptions, expectations, and formats of writing in students' fields, with the goal of beginning—or continuing—academic research. Prerequisite(s): satisfaction of the Composition requirement. Enrollment restricted to junior and senior college members and by permission of instructor. Enrollment limited to 25. *A. Weaver*

33. Self and Society Examined Through Ethical Dilemmas (2 credits). S

Examines ethical dilemmas in contemporary topics, such as the status of moral principles during warfare; animal rights and the ethics of eating meat; privacy in the age of the Internet; imprisonment and rehabilitation; legal and illegal immigration; same-sex marriage; and health care. *M. Tassio*

35. Everyday Ethics for College Life (2 credits). S

Exploration of and reflection on everyday values and virtues such as integrity, open-mindedness, honesty, and community. Objectives include learning how to think about moral dilemmas and how to begin drafting one's own code of ethics. Enrollment restricted to college members. Enrollment limited to 20. *C. Camblin*

40. The Self Under Moral Siege: Challenges for the Individual in 20th-Century Totalitarian Europe (2 credits). *

Examines how individuals and communities confronted dilemmas when laws, state ideology, and war challenged traditional morality. Themes include: ethics, responsibility, victimhood, moral compromise, retribution, and reconciliation. Enrollment priority given to Stevenson College students. Enrollment limited to 22. *The Staff*

41. Spirituality in a Modern World (2 credits). S

Investigates scientific and pragmatic perspectives on spirituality from William James to Fritjof Capra. Explores spirituality in Western and Eastern traditions from Martin Buber to Pema Chodron. Students analyze, support, and articulate their spiritual positions in a culminating paper. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *C. Camblin*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision (see course 192). *The Staff*

80A. Introduction to University Discourse: Self and Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Stevenson's core course considers the roots of modern society using foundational religious texts and major classical and modern philosophical works. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1.) *The Staff*

80B. Rhetoric and Inquiry: Self and Society. F

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Stevenson's core course investigates the roots of modern society, using foundational religious texts and classical and modern philosophical works. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

80F. Self and Society Through Film (2 credits). *

Seminar designed to expand upon the discussions begun in the Stevenson Core Course. Course uses documentary and feature films to investigate and discuss all sides of modern conflicts that bring class back to the Core Course theme. Prerequisite(s): completion of two-quarter core course sequence. Enrollment limited to 25. *The Staff*

80H. Rainbow Theater: An Introduction to Multicultural Theater. F

Introduction to Asian American, Chicano/Latino, and African American plays through reading of major authors, discussion of social and historical context of their work, and development of a production of a one-act play from each cultural group. In-depth examination of key historical context of these three cultural groups. Video presentations followed by class discussion. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

80T. Self and Society for Transfer Students. *

Condensed version of Stevenson's core course for transfer students. Develops analytical writing, critical reading, and effective speaking by considering influential philosophical works while exploring cultural conflicts in modern society. Themes include imperialism, racism, and class conflict. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, W, E.) *The Staff*

81A. Self and Society 2. W

Winter quarter of Stevenson's core course continues development of analytical writing, critical reading, and effective speaking in exploring conflicts inherent in modern society. Investigates themes of colonization, race, gender, class, and cultural conflict. Enrollment restricted to first-year and sophomore college members. Students cannot receive credit for this course and course 81B. Enrollment limited to 25. (General Education Code(s): TA, E.) *The Staff*

81B. Rhetoric and Inquiry: Self and Society 2. W

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Winter quarter of Stevenson's core course investigates themes of colonization, race, gender, class,

and cultural conflict. Permission of instructor required; selection for this course based on application submitted. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year and sophomore college members. Students cannot receive credit for this course and course 81A. Enrollment limited to 25. (General Education Code(s): TA, C2, E.) *The Staff*

Upper-Division Courses

120. Self and Society: Teaching Practicum. W

Each student facilitates one of the discussion sections of Stevenson 81A or attends lectures, and meets with staff for practicum on the teaching process. Prerequisite(s): qualifications as determined by instructor at first class meeting. Enrollment limited to 5. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision (see course 42). Prerequisite(s): upper-division standing and a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study, sponsored by the college and performed off-campus. This course may be counted for up to three courses of credit in any quarter. Prerequisite(s): approval of student's adviser and the academic preceptor, and, in the case of full-time study, the board of studies supervising the major. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Enrollment restricted to members of Stevenson College. Enrollment limited to 12. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Course designed for members of Stevenson College. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, approval by the academic preceptor. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Students submit petition to sponsoring agency. Requires approval of the student's adviser and academic preceptor. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

ELAINE YOKOYAMA ROOS, Emerita

MARY-KAY GAMEL, Professor, Classics and Comparative Literature

Performance studies, ancient Mediterranean performance, Greek and Latin literatures, myth, reception of Greek and Roman texts and artifacts, film, feminist approaches to literature and performance

Program Description

The Theater Arts Department is a diverse group of scholars/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion with equal courage, we educate our students in the history, theory, and practice of theater to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity with a commitment to cultural diversity, we serve the research mission of UCSC, our audiences, and the students who will shape the theater of the future.

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all concentrations as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various concentrations and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of digital and new media on theater is integrated into the curriculum, especially with respect to dance and design.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome nonmajors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for this breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater; acting, directing, and dance studios; costume, scene, and properties shops; a sound recording room; a computer lab; and a metal shop.

Elsewhere on campus are the open-air Quarry Theater seating 3,000, the Shakespeare Santa Cruz Festival Glen, and the 150-seat Barn Theater. Library holdings in theater literature and history are extensive, including a large slide collection and dance video holdings; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

A unique resource for UCSC students is Shakespeare Santa Cruz (SSC). Acknowledged to be one of the leading Shakespeare festivals in the country, SSC was founded in 1982 to foster links between modern scholarship and contemporary professional theater practice. SSC's annual summer festival presents the works of Shakespeare in thematic context with other great plays of the world stage, performed, designed, and directed by professionals from all over the country. SSC offers undergraduates various opportunities to work in conjunction with theater professionals through its summer intern program, its winter holiday production (in fall quarter), and Shakespeare-to-Go, a 45-minute Shakespeare outreach production in which students perform and tour (rehearsed during winter quarter and performed during spring quarter) for audiences throughout Santa Cruz County and beyond.

Majors who wish to concentrate their study of one particular theater arts area before seeking admission to graduate school or work with professional companies are encouraged to apply to the department's Fifth-Year Certificate Program.

Requirements to Declare the Major

Prior to petitioning for the major, students must have successfully completed three lower division courses: one course from THEA 61A, B, or C, and two courses chosen from THEA 10, 20, or 30. Students are encouraged to complete these courses as early in their studies as possible so that the petition to major status can be accomplished no later than the end of sophomore year.

Transfer Students

Transfer students who have not satisfied the requirements to declare the major are advised to take as many of the six lower-division requirements listed above as possible in their first two quarters. Transfer students may petition to have equivalent lower-division courses taken at other schools count toward the lower-division major requirements. Petition forms and information on courses and major requirements can be obtained at the department office, J106 Theater Arts Center.

Major Requirements

The Theater Arts major requires seven lower-division courses, six credits of course 50, and eight upper-division courses (inclusive of a senior seminar project). Majors may organize their studies around a concentration in an area of interest in accordance with the requirements outlined below. The following six lower-division courses must be taken by all majors:

10, *Introduction to Theater Design and Technology*

20, *Introductory Studies in Acting*

30, *Introduction to Dance Theory and Technique*

61A, *Issues and Methods in Theater Arts*

61B, *Tragedy*

61C, *Birth of the Modern: After the Renaissance*

One additional lower-division 5-credit elective.

Plus: 50, *Fundamentals of Theater Production* (two-credit course; must take a total of six credits)

The following upper-division courses must be taken to complete the major:

Eight, 5-credit upper-division theater arts courses:

- 160, *Dramatic Theories*
- Two studio courses
- One elective
- One faculty-directed theater arts production course
- Two 161, 163, 164, or 165 series of critical studies courses in dance or drama, or 113, 116A (design) courses
- One senior seminar requirement, (course 185)

Exceptions to the major requirements, through the UC Education Abroad Program (EAP) or transfer credits, are considered on a case-by-case basis by the department chair.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in theater arts is met by completion of the required courses 160 and 185.

Theater Arts Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the theater arts major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Plan One

| Year | Fall | Winter | Spring |
|---------------|-----------------|----------|----------|
| 1st (frsh) | THEA 61B | THEA 20 | THEA 10 |
| | gen ed | THEA 61A | gen ed |
| | college core | gen ed | gen ed |
| 2nd (soph) | THEA 30 | elective | THEA 61C |
| | gen ed | THEA 50 | gen ed |
| | college core | gen ed | gen ed |
| | (declare major) | | |

Plan Two

| Year | Fall | Winter | Spring |
|---------------|-----------------|----------------|----------|
| 1st (frsh) | gen ed | THEA 20 | THEA 10 |
| | gen ed | low-div studio | THEA 61C |
| | college core | gen ed | gen ed |
| 2nd (soph) | THEA 30 | THEA 50 | THEA 50 |
| | THEA 61B | THEA 61A | gen ed |
| | gen ed | gen ed | gen ed |
| | (declare major) | | |

Comprehensive Requirement

Theater arts majors are responsible for successfully completing course 185, *Senior Seminar*.

Minor Requirements

Students earn a minor in theater arts by completing eight courses (seven, 5-credit courses and one, 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on either drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

- THEA 61A
- One quarter of the 2-credit course 50

- One course in the student's area of focus chosen from: 10, 20, 30, or 40
- Three upper-division courses chosen from the following: 113, 116A, 161, 163, 164, 165
- Two upper-division studio courses, one of which may be a faculty-directed production (151)

Independent Studies (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.

Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

Fifth-Year Certificate Program

The Theater Arts Department offers a graduate certificate program that allows a limited number of students to refocus or intensify their skills, concentrating on performance reinforced by scholarship and research.

The program provides the opportunity to experience the benefits of apprenticeship in an academic setting. Students follow an individual program suited to their background, needs, and interests while concentrating in drama, design/technology, dance, playwriting, Western or non-Western theater, or dramatic literature.

Students in the graduate certificate program are expected to complete one academic year (fall-spring) as a full-time resident student, passing eight 5-credit theater arts courses. Of those eight courses, one is a required graduate seminar (course 290); and one must be chosen from the upper-division critical studies electives on offer. An incomplete in course 290 and/or 297 must be completed by the end of the following quarter of the residency year. The remainder of the program is designed by the student according to individual interests and needs in consultation with the faculty adviser. Many students elect to take faculty-supervised individual studies courses in their area of emphasis.

For additional information, contact the Theater Arts Department.

Theater Arts

Lower-Division Courses

10. Introduction to Theater Design and Technology. F,S

Addresses imagination and creativity. Using the framework of theater production, students explore the process of translating a script into a performance. Topics include visual literacy, creative problem solving, establishing effective working teams, tear sheets, storyboarding, drawing, sound and color theory. This course is a prerequisite for all upper-division design courses. (General Education Code(s): IM, IH, A.) *B. Baron, K. Edmunds*

12. Stage Management. F

Designed to acquaint students with the complexities of staging productions from the audition process to final performance. Directing, lighting, scenic production, sound, cueing, and personnel management are aspects that will be touched upon in class. Students are billed a materials fee. (Formerly *Production Management*.) (General Education Code(s): A.) *The Staff*

14. Drawing. F

A fundamental course in drawing from still life, the figure, and in the landscape. The approach is from the tonal and volumetric aspects of the object. Color is introduced as the course progresses. Instruction fashioned to the individual needs of the student. The inexperienced are welcomed as

well as the experienced. Students are billed a materials fee. (General Education Code(s): PR-C, A.) *K. Edmunds*

15. Special Topics in Textiles. *

Introduces varied techniques in textile manipulation to create scenic and costume-design properties including drapery, upholstery, masks, bags, and millinery. Students learn basic sewing and surface-design methods, such as knitting, screen-printing, painting/dyeing, and distressing. Enrollment limited to 20. (General Education Code(s): PR-C, A.) *B. Baron*

17. Costume Construction. W

The process of interpreting a costume designer's sketch into a finished theatrical costume. Some techniques included are dyeing, fabric selection, draping, flat pattern drafting, pattern manipulation, adaptation, fitting, and alteration. Using various techniques, students make basic pattern pieces and learn to modify them to create costumes. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): PR-C, A.) *The Staff*

18. Drafting for Theatrical Production. *

An examination of the fundamentals of drafting scale drawings for production, including floor plans, elevations, sections, working drawings, dimensions, layout, and lettering. Students learn isometric drawing, perspective, and rendering techniques. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

18C. Drafting-Computer Aided. *

In-depth exploration of computer-aided drafting, specifically the programs Vectorworks, Spotlight, and Renderworks. Topics include: the user interface, ground plan, section and detail views, paper space vs. working space, tool palettes, USITT drafting standards, layers, line weights, objects, classes, library annotations, importing rasters, and 3D modeling. Students required to do weekly projects such as ground plans, lighting plots, perspectives, and detail drawings, as well as turn in a major final project, and complete a mid-term, final, and quizzes. Students are billed for a materials fee. Enrollment restricted to theater arts majors. Enrollment limited to 10. (General Education Code(s): A.) *D. Cuthbert, The Staff*

19. Design Studio: Lighting Studio A. S

An introduction to the theory and practice of lighting design with attention to the practical skills and creative approaches to lighting performance pieces; the technical side of lighting design via demonstrations, lectures, and labs. Students complete projects evolving and executing concepts for lighting chosen pieces. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, IH, A.) *D. Cuthbert*

20. Introductory Studies in Acting. F,W,S

Introduction to basic acting skills and the problems of performance. Concentrates on expanding the students' range of expression and ability to respond to and analyze dramatic text. Students with little or no experience are encouraged to attend. (General Education Code(s): IM, IH, A.) *The Staff*

21A. Acting Studio 1A: Psychological Realism. F

Explores the fundamentals of the work of Konstantin Stanislavski as developed at the Moscow Art Theater to the works of his and our contemporary playwrights. Specifically, students apply those techniques of action, physical score, given circumstances, subtext, interior monologue, goals, and objectives, throughline, superobjective, and emotional recall to works of Henrik Ibsen, Anton Chekov, and appropriate American realists, such as Sam Shepard, August Wilson, etc. Enrollment by in-

terview only: audition at first class meeting. Enrollment limited to 31. (General Education Code(s): A.) *D. Scheie, P. Gallagher, P. Whitworth*

21B. Acting Studio 1B, Actors' Physicality. W,S

Uses a rigorous physical approach to acting (rather than the text-based approach of course 21A). Provides an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavski-based actor training. Emphasis on physical characterization, ensemble theater, mask work, and object performance. May involve practices, theories, and readings of Jerzy Grotowski, Eugenio Barba, Jacques Lecoq, and/or Tadashi Suzuki. Enrollment by interview only. Enrollment limited to 30. (General Education Code(s): A.) *P. Gallagher, D. Scheie*

22. Indonesian Dance and Drama. F

Students learn the basic movement repertoire of the specific characters of the Indonesian dance-drama/puppetry tradition over the quarter with explication of how these types operate in their own cultural context. The course culminates in an open showing of scenework. May be repeated for credit. (General Education Code(s): CC, A, E.) *P. Gallagher, M. Foley*

23. Voice for the Actor. *

Students work on developing resonance, range and expressivity for stage performance via physical exercises and text explorations undertaken in small groups. Prerequisite(s): course 20. Audition required for acceptance into class. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

30. Introduction to Dance Theory and Technique. F,W,S

Intensive instruction in developing the dancer's mind/body, with introduction to movement theory and practice. Students are billed a materials fee. (Formerly *Introduction to Modern Dance Theory and Technique*.) May be repeated for credit. (General Education Code(s): PR-C, IH, A.) *E. Warburton*

31C. Dance Studio I. S

Introduction to contemporary dance theory and practice. Focus on basic dance technique, range of styles, and aesthetic points of view of historically significant contemporary dance choreographers in America and worldwide. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): PR-C, A.) *E. Warburton*

31P. Postmodern Dance I. *

Introduction to postmodern dance theory and technique. Focus on performance practices of historically significant postmodern dance choreographers in the U.S. and worldwide. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

32. Introduction to Ballet. *

Introduction to ballet basics such as healthy alignment, anatomically sound articulation of hips and feet, balance control, moving through space harmoniously, and development of technical strength and combinative capacity in a classical, but fluid, aesthetic. Students are billed a materials fee. Enrollment limited to 35. May be repeated for credit. (General Education Code(s): IM, IH, A.) *E. Warburton*

33. Advanced Introduction to Modern Dance. *

Intensive instruction in developing the dancer's physical instrument. Intended for students who have a previous fundamental knowledge of the basics of classic dance, combined with movement theory. Students are billed a

materials fee. Prerequisite(s): course 30. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

35. Introduction to Tap Dance. *

Intensive instruction in developing the dancer's physical instrument combined with basic movement theory. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): PR-C, A.) *The Staff*

36. Introduction to Dance Composition. F

Composing solo dances using a variety of approaches for developing movement combinations. Observation and recognition of personal movement patterns and discovering new sources for creative material. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, IH, A.) *The Staff*

37. African Dance. F

A griot (musician-entertainer from western Africa) from Burkina Faso teaches "The African Journey," which emphasizes dance as combined in Africa, including singing, history, oral tradition, and storytelling. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): PR-C, A.) *The Staff*

40. Introduction to Directing. F

An overview of the analytical and creative processes that inform the director's work. Close examination of texts, concepts, and directorial choices in staged performances, opera, films, and video. (General Education Code(s): IH, A.) *K. Jannarone*

45. Student-Directed Production. F,S

Participation in a student-directed play or student-choreographed dance concert under faculty supervision. (See course 192). Rehearsals culminate in public performances. Prerequisite(s): admission by audition; see department office for more information. *The Staff*

50. Fundamentals of Theater Production (2 credits). F,W,S

Work is on various aspects of theatrical production, including scenery, lighting, costumes, sound, stage management, and video documentation. Satisfies the department's technical experience requirement. May be repeated for credit. (General Education Code(s): PR-E, A.) *D. Cuthbert*

52. Basic Stagecraft. W

Provides introduction to technical theater and basic stagecraft. Course examines two-dimensional and three-dimensional scenery, scenic engineering, the physical theater, stage and scene shop equipment, project organization and process, technical theater graphics, materials, and theatrical construction techniques. Prerequisite(s): course 10. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

55A. Workshop in Performance: Barnstorm. F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 150 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Cuthbert*

55B. Workshop in Performance: Barnstorm Lab (2 credits). F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 50 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Cuthbert*

61A. Issues and Methods in Theater Arts. W

Introduces issues and methods for analyzing historical and contemporary performance practices from a variety of disciplinary perspectives. Readings contextualize theatrical objects as well as offer theoretical tools for analyzing, interpreting, and making performances out of them. (Formerly course 61.) (General Education Code(s): IM, IH, A.) *K. Edmunds, P. Mostkoff*

61B. Tragedy. F

Ancient enmities; horrific acts of parricide; monumental errors; suffering and contrition. This course examines the enormous appeal of the ancient Greek tragic vision from its inception to its enthusiastic rediscovery during the European Renaissance. Enrollment limited to 40. (General Education Code(s): TA, IH, A.) *J. Bierman*

61C. The Birth of the Modern: Drama and Performance After the Renaissance. S

Examines dramatic and theatrical works that sprang into being in the wake of the European Renaissance. Follows the ways modern artists have dramatized their questions, struggles, beliefs, and despair in the face of world wars, cultural fragmentation, unprecedented prosperity, and new technologies that changed the concrete experience of life itself. Enrollment limited to 60. (General Education Code(s): TA, IH, A.) *K. Jannarone*

70. Working in Theater and the Performing Arts (2 credits). *

Creative artists, technicians, and designers discuss the theory and practice of their art. Presentations include discussion of the nature of their artistic work and reflection on the path that brought them to their present work with attention to the creativity and constraint that they experience in their profession. *P. Whitworth*

80A. Introduction to African American Theater. S

Surveys African American theater from late 19th century to contemporary 21st-century playwrights and examines dramatic narratives to trace creation, evolution, and development of African American cultural identity formation in American theater. Enrollment limited to 50. (General Education Code(s): ER, T4 (TH), A, E.) *The Staff*

80B. Rock 'n' Roll Design. *

Examination of the genesis, history, and development of technical theater practices used in large arena rock shows. Topics will include the development of rigging practices used in arenas, touring logistics, lighting instrumentation and aesthetics of rock shows, and the nature, practice, and approach of sound in these venues. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80D. Commercial Design 1900 to Present. *

History of 20th-century commercial design for the theater through the eyes of the Western consumer. (Formerly course 161W, *Critical Survey of Commercial Design, 1900 to Present*.) (General Education Code(s): IM, T4-Humanities and Arts, A.) *B. Baron*

80E. Stand-Up Comedy. *

American comedy from Mark Twain to present, including popular humor, history, and politics, using comedy from the '20s through the women's gay and civil rights movements. Discussions are based on readings and videos of a wide variety of artists. Students present performances weekly. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80G. Creative Process/Dance. *

Introductory dance, with participation in a wide range of movement classes taught by the instructor and guest artists. Students develop their movement experiences through further viewing of world dance, discussion, reading, and

writing. Enrollment limited to 100. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80H. Hamlet Conundrums. *

Offered online, the course explores major issues of interpretation of Shakespeare's classic play, which has occupied the minds of audiences, directors, designers, performers, and critics during its 400-year history. In doing this, it offers a sense of history of people's preoccupations with and thoughts about the play. Students taking this class are expected to complete the course during the quarter for which they are enrolled. All students enrolled in this course should visit elsinore.ucsc.edu and write to elsinore@ucsc.edu. (General Education Code(s): T4-Humanities and Arts, A.) *J. Bierman*

80K. Shakespeare 4every1. S

Introduces all students, regardless of experience, to the plays and theater of Shakespeare, and directly addresses linked relevance to contemporary 21st century American culture. (General Education Code(s): TA, T4-Humanities and Arts.) *P. Whitworth, D. Scheie*

80L. Muppet Magic: Jim Henson's Art. W

The artistic and social impact of the Muppets on American puppetry, children's television, and Hollywood film is explored through viewings, guest lectures, and analysis. Henson's legacy in artistic innovation, mainstreaming of puppet theater for adult audiences, and establishment of puppetry in media and marketing are also explored. (General Education Code(s): IM, T4-Humanities and Arts, A.) *M. Foley*

80M. Chicano/a Teatro. F

Introduction to Teatro Chicano/a with examination of how cultural diversity plays a role in theater. Through lectures, films, and workshop exercises, reflect upon the process of Teatro Chicano. Students write their own acts, improvise, and perform in class. (General Education Code(s): ER, T4 (TH), A, E.) *The Staff*

80N. Walt Disney. S

An examination of Walt Disney's creation of the American vision of "family entertainment." Particular attention will be paid to the classic animated feature films of Walt Disney and to the way this Disney invention has been preserved and developed since his death. We will also look at the live action films, theme parks, and other Disney creations. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80O. Comedy in American Theater and Media Since 1950. *

The interrelationship of comedy in contemporary American media and innovations at Second City, the Chicago-based comedy club, will be explored, as well as the theory and practice of improvisation as a technique for generating comic material and the varied relationships of performers, writers, and audiences in live theater, television, and film. (General Education Code(s): IM, T4-Humanities and Arts, A.) *M. Foley*

80P. The Pixar Feature. *

Combines examination of the canon of Western dramatic literature and theater history through viewings of Pixar Animation Studios' full-length animated features, representing the most popular form of digital art and new media in the world today, and lectures focusing on digital art and new media viewed through established rules and traditions of dramatic art in literature, plays, and the theater. (General Education Code(s): IM, T4-Humanities and Arts, A.) *D. Scheie*

80Q. Introduction to Queer Theater. *

Examines the history of the queer perspective in dramatic

literature, from the Greeks to Marlowe and Shakespeare through the calcification of homosexuality in the era of Freud, then traces theater stewardship by gay and lesbian artists from within the closet and without. (General Education Code(s): IM, T4-Humanities and Arts, A.) *The Staff*

80S. Theater Arts Education and the Community. *

This course is designed to develop ways in which we can direct our interest in the arts into concrete and successful community projects. Although the emphasis will be on developing skills to work within K-12 classrooms, other community projects will be discussed and designed. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80U. Socks, Drugs, and Rock and Roll: American Costume Since 1950. *

This course is an introduction to American fashion and fashion designers from the 1950's to the present with special attention given to the influence of popular media on American costume since 1950, the beginning of rock and roll. Students cannot receive credit for this course and course 116B. (General Education Code(s): IM, T4-Humanities and Arts, A.) *The Staff*

80V. The Circus in American Culture. *

Circus arts from their shamanic roots to contemporary practice will be analyzed in a historical, aesthetic, and creative dimension. Lecture, discussion, and demonstrations will explore the theory and practice of American circus arts. In section, students will explore basic circus skills from clowning to tumbling to exhibition of freaks. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80W. The Way Things Work and the Theater. *

Explores basics of mechanics and movement as applied to theatrical and non-theatrical realms. Utilizes textual materials as well as interaction with technology. Topics include structural elements, motion, energy, sound/light, their physical properties and how they interface with pre- and post-modern theater. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80X. The Performance of Story in Theater and Film. W

An examination of the theory and practice of theater and film, comparing and contrasting works that have been adapted from one genre to another. Lecture, film and video viewing and discussion of materialist, psychoanalytic, and feminist approaches will be shared. (General Education Code(s): TA, T4-Humanities and Arts.) *P. Mostkoff*

80Y. American Musical Theater. S

The history of American musical theater, from its roots to today, is studied through scripts, scores, and film. Major composers and lyricists' work is shown, discussed, and analyzed. (General Education Code(s): T4-Humanities and Arts, A.) *K. Edmunds*

80Z. Indian Dance. F

Classical Indian dance will be studied as a performance practice. Understanding of drum syllables and associated steps, religious and sociological context, and mimesis (abhinaya) as well as introduction to epic stories (*Ramayana*, *Mabharata*, *Bhagavata Purana*) and classical song. (General Education Code(s): CC, T4-Humanities and Arts.) *The Staff*

99. Tutorial. F,W,S

Students must file their petitions for this course with the department office by the end of the fifth day of instruction in the quarter in which they would like to take the tutorial. Prerequisite(s): petition required, approved by

instructor and department. May be repeated for credit. *The Staff*

Upper-Division Courses

100A. Asian Theater/Dance and Global Impacts. * Overview of selected theater/dance performance genres of India, Indonesia, China, Korea, and Japan with attention to how cultural, political, and social flows have impacted contemporary performance in Asia and beyond. Lectures supplemented by workshops. (General Education Code(s): A, E.) *M. Foley*

100B. Black Theater USA. * Spanning slavery, emancipation, reconstruction, the great depression, civil rights, and the black power/black arts movements, course explores African American drama from literary, historical, and biographical perspectives in lecture/discussions, film excerpts, dramatizations, and visits from award-winning guests. (General Education Code(s): A, E.) *The Staff*

100C. Courts, Courtesans, Shamans, and Clowns: Asian Drama. * Asian court and popular performance are traced. Sanskrit drama is contrasted with Indian epic recitation, medium, and courtesan dance. Gender specialization is noted in Indonesian courts using Indian and local legends in dance, mask/puppetry, and clowning. Buddhist and Confucian impulses in Chinese theater and early Korean and Japanese mask and puppetry are introduced. Students are evaluated on participation, tests, writing, and a performance project. (General Education Code(s): A.) *P. Gallagher, M. Foley*

100G. Ancient and Classical Drama. * Examines Western dramatic literature, theater history, and design from ancient Greece to the Renaissance, the Spanish golden age, and Elizabethan England. Looks at dramatic texts in their historical moments, bringing theater design and the function of performance into critical contexts. Major theoretical treatises, scripts, scenarios, background readings, and other texts are discussed in relation to the actual performance and staging practices of the period. (General Education Code(s): A.) *The Staff*

100H. Ballet: A History. * Chronological critical and historical overview of ballet from its origins in the 15th century to the present, fleshing out the sociological, aesthetic, and design (costume and set) aspects of ballet production from the courts to the bourgeois opera house and the independent impresario. Enrollment limited to 40. (General Education Code(s): A.) *M. Franko*

100I. Hemispheric and Trans-Atlantic Theater: Indigenous America. * Considers theater of the Americas with attention to indigenous pre-Colombian roots as well as trans-Atlantic connections forged in Spanish use of performance in conquest and development of African-influenced arts in black communities. Includes use of art in national independence movements, civil-rights struggles, and continuing movement across borders of the Americas with links to Africa. (General Education Code(s): A, E.) *The Staff*

100L. Performance and Conquest. * Looks at use of theater/performance in the U.S. and Latin America by the state, oppositional groups, and theater and performance practitioners to solidify or challenge structures of power beginning with pre-Colombian indigenous civilizations, 16th-century Spanish/European conquest, national independence movements, to the U.S. Latino diaspora. (General Education Code(s): A, E.) *The Staff*

100M. Modern Drama. * Examines modern theatrical experimentation from English Restoration through contemporary era. Major theoretical texts, scripts, and background readings establish critical contexts for analyzing modern performance and dramatic literature. (General Education Code(s): A.) *K. Jannarone*

100W. Black/African Diasporic World Theater. * Examines major black African diasporic playwrights and theater. Focuses on the historical, cultural, and literary contexts that gave rise to the works of dramatists such as Ama Ata Aidoo, Derek Walcott, Wole Soyinke, Aime Cesaire, Debbie Green Tucker, and Paul Boakye. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A, E.) *The Staff*

104. Multimedia Authoring. * Introduces students to basic tools for the creation of multimedia digital projects. Special attention is given to the integration of video, sound, graphics, text and virtual reality and to the creation and execution of strategies for interaction between users and the projects themselves. With this in mind, students design and create computer puzzles and games. Enrollment limited to 25. (General Education Code(s): A.) *J. Bierman*

105. Introduction to Digital Media Design. * Introduction to digital media design for live theater. Primary focus on developing working understanding of Adobe Photoshop, Final Cut Pro, and DVD Studio Pro as applied to digital media design. Gives additional attention to theoretical questions raised by introduction of moving images in a theatrical space, visual composition, and editing practices. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

106. Digital Illustration. * Introduces digital rendering techniques using the Adobe Creative Suite. Using Photoshop, Illustrator, Acrobat Writer and InDesign, students solve design problems relevant to scenic, costume, and property design. Material is applicable to anyone with an interest in the Adobe platform. Enrollment by permission of instructor. Application form available at department office. Enrollment limited to 15. (General Education Code(s): A.) *B. Baron*

107. Design Studio: Masks and Makeup. * Advanced work in the design and techniques of stage make-up and masks. Students are billed a materials fee. Prerequisite(s): course 10. Enrollment restricted to theater arts majors; open at the end of priority enrollment if space permits. Enrollment limited to 20. Offered in alternate academic years. *The Staff*

110. Advanced Stage Technology. * An investigation into the intricacies of production, focusing on structural, spatial, and visual concepts, creation and execution of scenic units, drafting, and related areas of technology. Designed to facilitate in-depth studies of specific production problems. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

113. The History of Design for Theater. W The development of scenic design from the Greek period to the present. Concentration is on the changing styles of set design in relation to the changing attitudes toward dramatic literature, art, and theater architecture. (General Education Code(s): IM, A.) *B. Baron*

114. Design Studio: Sound. * The intangible and transitory nature of the acoustic reality. Electronically regenerated sounds for use in the performing arts. Broad scope of the course consideration

begins with found sound and includes sound propagation. Emphasis on tape-recording, editing, sound control functions, and equipment utility. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, A.) *The Staff*

115A. Design Studio: Scenic Design. * Advanced work in principles and theory of scenic design. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, A.) *K. Edmunds*

115B. Design Studio: Scenic Design B. W Advanced theory and practice of theatrical set design. Prerequisite(s): course 115. (General Education Code(s): PR-C, A.) *K. Edmunds*

116A. History of Clothing and Costume. F Survey of clothing and theatrical costumes; emphasis on dress of the audience and actor in historical periods of theatrical activity. Students are billed a materials fee. (General Education Code(s): IM, A.) *B. Baron*

117. Design Studio: Costume. S Advanced principles and theory of costume design for theatrical productions. Enrollment by permission of instructor: see enrollment conditions in the quarterly Schedule of Classes. Students are billed for a materials fee. May be repeated for credit. (General Education Code(s): IM, A.) *B. Baron*

117A. Advanced Costume Construction. * Advanced principles in costume construction, including tailoring, advanced pattern drafting, and draping techniques. Focuses on translating modern techniques into historical garment construction. Teaches how to study artifacts and do primary research to unlock the past. Prerequisite(s): course 17. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

118. Design Studio: Scene Painting. * Emphasis on techniques used in painting scenery for the theater. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

119. Design Studio: Lighting Studio B. * The theory and practice of lighting design with emphasis on practical application. Light plots, electricity, optics, design, and manipulation of lighting for the theater and related performance events are investigated. The student explores mechanics and aesthetics with hands-on experience. Students are billed a materials fee. Prerequisite(s): course 19. (General Education Code(s): PR-C, A.) *The Staff*

121. Acting Studio II. F,S Continuing concentrated work on basic acting skills and textual analysis through scene study. May be repeated for credit with consent of instructor. Prerequisite(s): admission by audition at first class meeting. See department office for more information. Course 21 recommended as preparation. May be repeated for credit. (General Education Code(s): A.) *D. Scheie, P. Gallagher, P. Whitworth, M. Foley*

122. Indian Performance: Rama, Siva, Krishna. * Study of the classical theater and dance of India, with attention to performance practice, aesthetic theory, relationship to religious practice devoted to Rama, Siva, and Krishna, political implications and intercultural experimentation. (General Education Code(s): CC, IH, A.) *The Staff*

124. Movement for Performers. * Awareness and extension of personal movement repertoire, through observation, movement experience, and exploration. (General Education Code(s): A.) *P. Gallagher, The Staff*

126. Acting Studio III. W/S

Individual work on acting skills and problems, with emphasis on individual interpretation and scene work with other students. Prerequisite(s): course 121; permission of instructor; audition at first class meeting—contact department office for more information. Enrollment limited to 18. May be repeated for credit. (General Education Code(s): A.) *P. Gallagher, P. Whitworth*

128. Choreographic Workshop. W

Intensive upper-division choreographic workshop that begins from the key motifs of historical dance to develop original work. Dancers made available to the student choreographers. Course is a prerequisite for the student-choreographed production *Random With a Purpose*. Enrollment limited to 15. (General Education Code(s): A.) *M. Franko*

129. Advanced Ballet (2 credits). *

Continued study of classical ballet technique as a serious, expressive art form. Work includes longer combinations, air work, and style study in a regular class routine. Audition at first class meeting. Students are billed a materials fee. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *The Staff*

130. Intermediate Dance Theory and Technique. W

A progression from the simple phrasing and articulation of beginning technique class to more complex material requiring more acute perceptive skills and richer dynamic range. Emphasis is on both alignment and maintaining the kinetic integrity of the body while moving through space. Students are billed a materials fee. (Formerly *Intermediate Modern Dance Theory and Technique*.) Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

131. Advanced Dance Theory and Technique. *

Advanced instruction in developing the dancer's mind/body, combined with contemporary movement theory and practice. Students are billed a materials fee. (Formerly *Advanced Modern Dance Theory and Technique*.) Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *The Staff*

131C. Dance Studio II. *

Continued study of contemporary dance theory and practice. Focus on intermediate dance technique, individual and group movement invention, choreographic voice, and theatrical applications. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

131P. Postmodern Dance II. *

Continued study of postmodern dance theory and technique. Focus on advanced compositional practice, theatrical applications, and critical analysis of contemporary postmodern dance choreographers in the U.S. and worldwide. Audition at first class meeting. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

132. Modern Dance Studio (2 credits). *

Instruction in developing the dancer's physical instrument, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

135. Dance Improvisation and Theory. S

Exploring sources for movement; gaining facility in a wide range of movement elements; working in ensemble and solos. Students are billed a materials fee. (General Education Code(s): A.) *E. Warburton*

136. Intermediate Ballet. *

Continued study of classical ballet technique as a serious expressive art form. Work includes longer combinations, air work, and style study (Baroque and Romantic) in a regular class routine. Class also involves viewing, reading, and review writing. Students are billed a materials fee. Prerequisite(s): course 32 or permission of instructor. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

136C. Dance Studio III. *

Advanced study of contemporary dance theory and practice. Focus on dance performance, creative process, and choreographic form in a contemporary style. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

137. Studies in Performance (Dance). *

Studies in dance, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. May be repeated for credit with consent of instructor. Students are billed a materials fee. Admission by audition held late winter quarter; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *M. Franko*

138. Movement Research in New Arts Praxis. *

Work at the intersection of creative and research practices, focusing on experimental forms of movement theater, applications in digital arts and new media, and critical analysis of the arts in society. Collaborative, interdisciplinary performance projects required. Audition/interview at first class meeting. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

139. Random: With a Purpose. W

Participation in a student-choreographed and directed dance concert under faculty supervision. Rehearsals culminate in public performances. Students are billed a materials fee. Auditions to be held on the first day of class. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

141. Play Direction Studio I. W

Basic studio exploration through scene problems and exercises of the development of directing principles. Intensive work on the director's pre-rehearsal work from text selection, analysis, and casting. Audition at first class. Enrollment limited to 20. *K. Jannarone*

142. Play Direction Studio II. *

Intensive studio exploration of the art and craft of directing. Primary focus on text analysis, collaboration with designers, developing a point of view and visual/auditory language for the play, staging techniques, and communication techniques with actors. Prerequisite(s): course 40, 141, or permission of instructor. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

151. Studies in Performance (Drama). F,W,S

Studies in theater, taken in connection with participation in a Theater Arts Department sponsored production. Enrollment is limited to those persons chosen to take part in a particular production. Admission by audition; audition schedule to be announced at first class meeting. May be repeated for credit. (General Education Code(s): A.) *The Staff, M. Foley, D. Scheie*

152. Advanced Stagecraft. *

Exploration of stage technology from the scene shop's perspective. Conversion of scenic designs to construction

drawings. Pursuit of scenic-engineering and construction techniques using steel, wood, and other materials. Training on use of stage machinery: rigging, flying, wagons, tracking, and propulsion. Prerequisite(s): course 52. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

155. Workshop Experiments in Performance. W

A process-oriented investigation of specific playwrights or theatrical styles consisting of work which may culminate in a final production. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *The Staff*

156. Play Development Workshop. *

"Hands on" study and exploration of the process of developing a new script from the perspective of the playwright, the actor, and the director. Students enrolling in this course as playwrights are selected on the basis of submissions turned in the previous quarter. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. (General Education Code(s): PR-C.) *The Staff*

157. Playwriting. S

Students are given the opportunity to write their own scripts and refine them as the result of class discussion and scenework with actors. Work is on specific problems involving such elements as the structuring of a plot or the development of character. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

158. Chautauqua Workshop. S

Advanced course that provides directors, writers, and performers with an opportunity to develop new works in performance. Students enrolling in this course as playwrights are selected on basis of submissions turned in the previous quarter. Students are billed a materials fee. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. *The Staff*

159. Advanced Playwriting. W

A study, through practice, of the constituent elements in the construction of a drama. Students concentrate, in particular, on the organization of complex plots, the expression of character through conflict, and maximizing the emotional impact of dramatic situations. Prerequisite(s): course 157 or equivalent, satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

160. Dramatic Theories. S

An examination of the theories of acting and directing from the 19th century to our own time, starting with the classic theater and concentrating on the 20th-century debate centered in Stanislavski and Brecht, Grotowski, and Robert Wilson. This course must be taken prior to student's senior year; required for course 185. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): A.) *P. Mostkoff*

161. Theater, Literature, and History.**161A. Irish Theater. ***

Examines the idea of a "National Theater" in Ireland from its beginnings in the founding of the National Literary Society in 1892 to the current vitality of the contemporary Irish Theater. Enrollment limited to 45. (General Education Code(s): A.) *P. Whitworth*

161C. The Theater and Drama of Renaissance Europe. W

An examination of selected plays from Renaissance Europe (1580-1680, Italy, Spain, and France) from an explicitly theatrical viewpoint which will include practical scene study. Covers Renaissance theater buildings and some related critical materials. Offered in alternate academic years. (General Education Code(s): A.) *K. Jannarone*

161D. Asian Theater: An Anthropological Approach. F

Art serves simultaneously to educate its audience to the group's traditional values and to test new ideas. Indian, Indonesian, and Japanese forms are studied in relation to their cultural context. Through videotapes, lecture demonstrations, performances, and scenework, students explore the forms. Offered in alternate academic years. (General Education Code(s): CC, A, E.) *M. Foley*

161M. Sexuality, Gender, Drama, and Performance. *

Exploration and analysis of the interrelationships between gender, sexuality, and performance on stage and on the page. Topics include gender and homosexuality in the history of performance and dramatic literature, drag, queer Shakespeare, closet drama, same-sex performance conditions (e.g., Greece) vs. dual-gendered (e.g., Restoration England). Combines study of theoretical texts and script with analysis and practice. (Formerly *Gender and Performance*.) (General Education Code(s): A.) *D. Scheie*

161P. Theater in the "Chicano Power" Movement. *

Covers the rise of Teatro Chicano as a cultural-political force within the 1960's "Chicano Power" Movement starting with founding playwright Luis Valdez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez. (Also offered as Latin American and Latino Studies 161P. Students cannot receive credit for both courses.) (General Education Code(s): A, E.) *The Staff*

161Q. Queer Theatrics: Representations and Sensibilities. *

An examination of the idea, form, and significance of queer/gay sensibility and representation in the English-speaking theater from the Renaissance to the present. (General Education Code(s): A.) *The Staff*

161R. Theater of American Cultures. F

Interrelationship of ethnicity and the rise of significant American theater groups including the black theater movement, Chicano Teatro, and Asian American theater will be shared via lecture, viewing, and discussion. (General Education Code(s): A, E.) *The Staff*

161S. American Drama: Politics and Theater. *

The dream of group theater, a long-term partnership of actors, directors, and playwrights, has fueled extraordinary and exciting change in the 20th-century American theater theory and practice. We examine ten exemplary manifestations of this dream. (General Education Code(s): A.) *The Staff*

161T. Women in Theater. *

Explores 20th-century American female playwrights from textual, historical, and multicultural perspectives. The course progresses from *Trifles* (1916) through the Harlem Renaissance, Broadway's Lillian Hellman, and today's post-Feminist theatrical explosion in lectures, films, dramatizations, and award-

winning playwrights' visits. (General Education Code(s): A.) *The Staff*

161U. Performance of Story in Theater and Film. *

Examination of theory and practice of theater and film comparing and contrasting works having been adapted from one genre to another. Lecture, film, and video viewing. Discussions of materialist, psychoanalytic, and feminist approaches shared. Students cannot receive credit for this course and course 80X. (General Education Code(s): A.) *P. Mostkoff*

161Y. Modern Ancient Drama. *

Studies 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, O'Neill, Graham, Pasolini, and Breuer, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

162. Public Space/Public Sphere: The Performance of Public Art in 20th Century America. S

Examines phenomenon of public art as a performative phenomenon in the 20th century. Begins with the theory of the public sphere in the work of Jurgen Habermas and social space in the work of Henri Lefebvre. Concludes with the popular phenomenon of public art in the 1980s and the demise of the NEA by the later 80s with the scandals of the NEA Four. (General Education Code(s): A.) *M. Franko*

163. Special Studies in Individual Playwrights.**163A. Shakespeare. ***

Focuses on selected plays of Shakespeare. Explores the range and variety of interpretations of the plays, both in critical writings and in performance. Also studies other writings and graphic art created on the subjects and themes of the plays. Offered in alternate academic years. (General Education Code(s): A.) *J. Bierman*

163E. Chekhov and His Impact. *

Delves into the work of Chekhov and the Moscow art theater. Through scene work Stanislavski's acting techniques are related to the scripts. The impact on later Russian innovators, especially Meyerhold, and on the American theater is considered. (General Education Code(s): A.) *The Staff*

163G. Special Studies in Playwrights: Artaud. *

Antonin Artaud through three critical lenses: influence on modern and contemporary theater, subject and site of psychoanalytic and social criticism, and theater practitioner. Exercises cultural, historical, and analytic approaches to his work. Prerequisite(s): course 60C; course 160 recommended. Enrollment limited to 40. (General Education Code(s): A.) *K. Jannarone*

164. Issues in Dance History and Theory. *

A research seminar. Topics range from problems in dance aesthetics, criticism, or theory to particular movements, periods, or the work of a choreographer. (Formerly course 133.) Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *E. Warburton, M. Franko*

165. Introduction to Dance Modernism. S

Rare historical footage and the writings of famous choreographers provide an overview of 20th-century dance within the perspective of modernism. Topics include romanticism, "natural" dance, Orientalism, Ausdruckstanz,

"industrial" dance, American modern dance and neoclassicism, chance procedure, postmodernism, and the avant-garde commodity marketplace. (Formerly course 134.) (General Education Code(s): A.) *M. Franko*

170. Design Seminar (2 credits). F

Seminar to help advanced designers segue from student to professional. Topics to include portfolio construction, interview styles, guest speakers, and more. Enrollment restricted to senior and graduate students in Theater Arts. May be repeated for credit. *D. Cuthbert, B. Baron, K. Edmunds*

185. Senior Seminar. F

A required seminar for majors involving readings and discussions of important texts in dance, design, and drama. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 160. *D. Scheie*

190. Group Projects. F,W,S

Prerequisite(s): petition required, approved by instructor and department. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See courses 42 and 45). Petition required, approved by instructor and department. *The Staff*

193. Proseminar. *

Exposes students to an aspect of the theory or practice of theater arts. Visiting scholars share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

193F. Proseminar (2 credits). *

Exposes students to an aspect of the theory or practice of theatre arts. Visiting lecturers share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses**290. Special Topics and Area Concentration. F**

Study group meetings on a regular basis which involve either the study of shared texts or presentations by the group members and invited guests. Enrollment restricted

to graduate students in theater arts. May be repeated for credit. *P. Whitworth*

291. Field Study. F,W,S

Student-designed and conducted research carried out in field settings. A brief prospectus must be filed with the department office before undertaking the research, and a brief final report of activities must be filed upon return. Course intended for students with graduate standing in theater arts. Petition required, approved by instructor and department. *The Staff*

292. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Course intended for graduate students in theater arts. Petition required, approved by instructor and department. *The Staff*

297. Independent Study. F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

297F. Independent Study/Graduate (2 credits). F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. Enrollment restricted to graduate students in theater arts. May be repeated for credit. *The Staff*

Western Civilization

Students wishing to pursue a course of study in Western civilization should consult the concentration in pre- and early modern studies under Literature, page 361.

Writing

166 Kresge College
(831) 459-2431

Faculty and Professional Interests

JAMES WILSON, Lecturer, Chair

Modern European literary, artistic, intellectual, and political movements (especially of France, Italy, and Spain); poetry of Ezra Pound; Chinese poetry and philosophy; translation; argument in popular culture; the rhetoric of sports

Senior Lecturer

ELIZABETH ABRAMS

Composition and rhetoric; writing pedagogy, writing across the curriculum; 19th-century and 20th-century American history and literature, especially concerning the Civil War

CAROL M. FREEMAN

History, theory, and practice of rhetoric; composition theory and pedagogy; the essay as genre

DONALD L. ROTHMAN, Emeritus

Literacy education and democracy; UC/K-12 partnerships; writing, persuasion, and nonviolence; writing pedagogy; connections between beauty and justice

Lecturer

SONDRA ARCHIMEDES

Cultural studies, gender studies, contemporary social issues, 19th-century and 20th-century British literature, writing

JEFFREY M. ARNETT

Poetry, well-being and creativity

DEREDE ARTHUR

Cultural studies, 18th–20th-century British literature, theory of the novel, theories of education, cognitive ethology

MARK BAKER

Media and democracy, postmodernism, 20th-century literature and culture of the Americas, community participation, writing and social responsibility

FARNAZ FATEMI

Comics and graphic novels, poetry, Middle East issues and cross-cultural perspectives, writing pedagogy

BK FAUNCE

Late 18th-century and early 19th-century British literary culture, film, literary theory

TIMOTHY FITZMAURICE

Poetry and politics, writing and publications

SUSAN GORSKY

Composition and rhetoric, writing pedagogy, 19th-century and 20th-century British and American literature, social justice and community

ROXANNE POWER HAMILTON

Writing, poetry, magazine editing, inter-arts performance, gender and queer studies

ROBIN KING

Visual arts, media criticism, sociology of learning and emotions, multi-cultural studies, politics of food

NANCY KRUSOE

Grammar, English as a second language (ESL), politics and writing

BRIJ LUNINE

Writing pedagogy; writing across the curriculum, teaching research; writing pedagogy, reception studies, cultural studies, popular culture and youth subcultures

PATRICK MCKERCHER

Virtual reality educational environments, outreach projects, collaborative research with James Burke, environmental education

ELLEN NEWBERRY

Educational partnerships with K–12 schools, transfer/entry student writing, women's studies, and queer studies

SARAH-HOPE PARMETER, Coordinator, Entry Level Writing Requirement (ELWR)

Writing and democracy; multilingual, multicultural rhetorics; cross-age writing partnerships and public school collaboratives; lesbian/gay/bisexual/transgender young adult literature; rhetoric of the sciences

DAN SCRIPTURE

Vietnam War, popular culture studies, fiction writing

ROSWELL SPAFFORD, Emerita

JUDE TODD

Philosophies of nature, ecopsychology, Native American world views, permaculture, visual arts, cross-cultural and interdisciplinary studies

AMY WEAVER

Creative nonfiction, writing pedagogy

Program Description

The campuswide Writing Program offers courses designed to help students become more competent and confident writers of prose. The courses offered through this program teach skills of grammar and organization and strategies of invention, composition, revision, and editing. These courses approach writing as one of the most important ways we have of making discoveries

about ourselves and the world around us and of communicating these insights to others.

Together with the colleges, the Writing Program administers the writing components (C1, C2) of the campus general education requirements; administers the Entry Level Writing Requirement (ELWR), formerly known as Subject A; and advises students about ways to fulfill these requirements.

Writing Program instructors in each college participate in the college's core course and counsel its students about their writing. The Writing Program offers Writing 2 (a lower-division course that satisfies the C2 requirement); the Writing 20, 21, 22, 23 series to help meet the needs of students who have not passed ELWR, including students with complex linguistics backgrounds; and instruction in the theory and practice of teaching writing for peer tutors and graduate students.

Each year, the Writing Program also offers several specialized lower- and upper-division courses, as well as writing-intensive courses during the summer session.

The Writing Program has offered two minors, a minor in journalism and a minor in communication and rhetoric, though both are suspended at this time.

Courses in creative writing are offered through the Literature Department.

Lower-Division Courses

2. Rhetoric and Inquiry. F,W,S

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Students develop specific, practical ways of improving their writing through sustained critical thinking about diverse issues from multiple points of view. Students cannot receive credit for this course and course 1. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment limited to 25. (General Education Code(s): C2.) *The Staff*

11A. Adjunct Tutorial in Writing (2 credits per quarter). F

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

11B. Adjunct Tutorial in Writing (2 credits per quarter). W

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

11C. Adjunct Tutorial in Writing (2 credits per quarter). S

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

20. The Nature of Written Discourse. W

Explores the dynamics of written language: its relationships to speech, thought, and culture; its uses in different personal, academic, professional, and public contexts; its abuses in jargon and propaganda. Course work includes extensive practice in different kinds of writing. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

21. Meaning and Style: The Sentence in Context. S

Explores, via cross-cultural readings, the nature, uses, and abuses of language. Course work includes extensive writing, both take-home and in-class. Emphasis on revising for power of expression and for variety and accuracy at the sentence level. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

22A. Grammar and Editing Workshop (3 credits). F

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for entering first-year students. Enrollment restricted to first-year students. Enrollment limited to 22. *N. Krusoe, D. Scripture*

22B. Grammar and Editing Workshop (3 credits). W

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for continuing students who have already taken course 20 and/or 21. Enrollment limited to 22. *The Staff*

23. Grammar and Rhetoric: Language for Writing. F

Builds on writing skills gained in previous writing courses; focuses on effective language use in academic writing. Students reinforce their written English proficiency by reading, studying, practicing, and writing structures and patterns of written English. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment restricted to first-year students and sophomores. Enrollment limited to 22. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

64. Newswriting Workshop. *

Introduction to the basic techniques of newswriting, including practice in leads, formats, and different kinds of news reporting. Emphasis on developing skills in research, interviewing, and shaping stories. Includes an examination of the contemporary media. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, instructor determination at first class meeting. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

70. Communication and Rhetoric: An Introduction. *

This course introduces the field of contemporary communication studies, locating its roots in rhetoric and showing how key concepts play out in mass media and other settings as well as in everyday life. Prerequisite(s): satisfaction of the Entry Level Writing requirement. *The Staff*

93. Field Study. F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of the Entry Level Writing requirement; certification of adequate preparation; approval of Writing Program. May be repeated for credit. *The Staff*

93E. Field Study (2 credits). F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99E. Tutorial (2 credits). F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Upper-Division Courses***101. Introduction to the History, Theory, and Practice of Rhetoric. ***

A survey of classical and contemporary ideas about rhetoric which explores, practically and theoretically, "the best means of persuasion in any situation whatsoever" and will consider the nature of human discourse in diverse areas of knowledge. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *C. Freeman*

102. The Rhetoric of the Social Sciences. *

Develops rhetorical facility in disciplinary writing for upper-division social science majors. Requires critical and disciplinary reading, writing in modes appropriate to social science disciplines, and a substantial research or critical paper within the student's own discipline. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *The Staff*

103. Rhetoric of the Natural Sciences. *

This course explores writing genres within the natural sciences. Emphasis is on the relationships between good science and good writing, clear thinking and clear writing. Frequent papers and substantive revisions required. Prerequisite(s): completion of 10 units coursework in the natural sciences, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors during priority enrollment. Enrollment limited to 30. (General Education Code(s): W.) *The Staff*

104. Writing in the Arts. *

A writing course focusing on the purposes and composition of various genres of writing about and in the performing arts, visual arts, and music such as reviews, program and exhibit notes, journal and magazine articles, grant proposals, and press releases. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. (General Education Code(s): W.) *E. Abrams*

106. Public Speaking. *

Students learn strategies to write, analyze, and deliver effective speeches of various kinds as well as professional presentations using PowerPoint and other visuals. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. *The Staff*

107. Technical and Business Writing: An Overview. *

An exploration of the conventions and formats of business and technical writing. Course work involves writing effective resumes, proposals, letters, end-user manuals, and the fundamentals of Web site design. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. *The Staff*

108. Electronic Communication. *

An introduction to the evolving conventions of effective Web site design as well as collaborative writing. Course work includes evaluation of Web site content and structure and creation of hypertext. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 24. *The Staff*

109. Argument and Practical Reasoning. *

An investigation of contemporary persuasive discourse with special attention to the elements and forms of argument, the nature of evidence, questions of validity and probability, and the workings of rhetorical reasoning. Emphasizes the analysis of arguments rather than their construction. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *The Staff*

110A. Writing in the Professions. *

Study of writing required in the selected professions, including law, politics, and government. Considers the rhetoric of each discipline and relevant texts. Includes lectures from visiting professionals and a series of writing assignments based on reading and research. Topic may vary from year to year, focusing on the rhetoric of other professional divisions: medicine, engineering, economics, and so forth. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. (General Education Code(s): W.) *The Staff*

120. Editing English Prose. *

This course offers extended, detailed instruction in editing one's own and other people's prose for accuracy, clarity, appropriateness, and effectiveness. It provides some history of theories of style and stylistic analysis, and instruction in prose variation according to social context. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *The Staff*

128. Latino Media in the U.S. *

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role that media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor. (Also offered as Latin American and Latino Studies 128. Students cannot receive credit for both courses.) Enrollment limited to 39. (General Education Code(s): IM, E.) *The Staff*

159. Grammar for Tutors and Teachers (3 credits). W

English grammar from a pedagogical perspective, emphasizing structures, patterns, and conventions of written English that commonly challenge basic writers. Students learn strategies for helping multilingual and other writers

improve their writing skills by increasing their awareness of grammar. Prerequisite(s): course 169, or by instructor permission. Enrollment limited to 45. *N. Krusoe*

161. Academic Writing and Research Methods. *

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. Course 161 includes sections for re-entry women, transfer students, and students in the EOP Faculty Mentor Program. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Students should contact the instructor for enrollment information. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

163. Advanced Workshop in Expository Writing. *

A composition course for students who, having mastered basic writing skills, wish to concentrate on increasing their effectiveness as rhetoricians, prose stylists, and editors. Assignments include writing and revising essays, responding to other students' work, and reading published essays. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 22. May be repeated for credit. (General Education Code(s): W.) *The Staff*

165. Practicum in Reporting. *

In-depth, community-based reporting, with an emphasis on skills ranging from interviewing techniques to profiles, integrating research with writing. Students choose a specific area or "desk" of concentration, and all the stories reflect that beat. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; a writing sample, completed in class, is required at first class meeting. Enrollment restricted to journalism minors during priority enrollment. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166. Topics in Journalism. *

Courses under this heading explore fields of newspaper and magazine journalism: feature writing, investigative reporting, reviewing, commentary, etc. Students study published writing and hone their own skills as writers under the supervision of a practicing journalist. See the Schedule of Classes for specific offerings. *The Staff*

166A. Magazine Writing. *

Introduces students to the various forms of magazine writing, as well as to pertinent reporting techniques. Students work intensively on process, style, and editing, producing numerous formal and informal pieces. Enrollment priority will be given to journalism minors. Students produce a writing sample on the first day of class. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 64 or permission of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166B. Investigative Reporting. *

Students acquire basic investigative and research skills, with particular emphasis on how to develop investigative subjects, obtain data, check accuracy, and convert information into well written, publishable articles. Priority given to students concentrating in journalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review journalism portfolio. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166D. Minorities in Journalism. *

Focuses on the minority press and how it has shaped journalism in the U.S. as well as viewing how the media has dealt with this segment of our society. Prerequisite(s):

satisfaction of the Entry Level Writing and Composition requirements and consent of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166J. Online Journalism. *

A course in using electronic sources to report articles for publication and in publishing journalistic pieces online. Prerequisite(s): course 64 or journalism experience; instructor determination at first class meeting. Enrollment limited to 25. *The Staff*

166N. The Rhetoric of Radio. *

Examines the theory and practice of radio. Students explore how the formats of radio create its meaning, and investigate radio's place in the landscape of the media, particularly in the U.S. and Mexico. Prerequisite(s): satisfaction of the Entry level Writing and Composition requirements and consent of instructor. Enrollment limited to 25. *The Staff*

167. Making the News. *

A writing course examining news and feature articles in popular print media. Students write their own articles and analyze how a particular content is mandated by conventional forms, by the structure of the industries, and by ideas of "newsworthiness." Designed for journalism minors and students for whom a course in media criticism is central to their program. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; qualifications determined by instructor at first class meeting. Enrollment limited to 43. (General Education Code(s): W.) *The Staff*

169. Theory and Practice of Tutoring Writing (3 credits). F

An introduction to theory and research on the composing process and practical strategies for teaching writing, especially in tutorial situations. Recommended for writing assistants. Prerequisite(s): instructor determination at first class meeting; course intended for writing tutors only. Enrollment limited to 30. *E. Newberry, A. Weaver*

180. Seminar in Editing and Publishing. *

Newswriting seminar for *City on a Hill* editors and writers. Weekly sessions evaluate newspaper in depth, including writing, reporting, and issues in journalism ranging from ethics to legal questions. Prerequisite(s): instructor determination at first class meeting; open only to editors, interns, and writers at *City on a Hill Press*. Enrollment limited to 40. May be repeated for credit. *The Staff*

189. Methods of Teaching Writing. *

Supervised by a writing instructor, each student attends a weekly seminar on teaching writing and either assists in a class or serves as a facilitator of a small writing group in a course at UCSC or a public school. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191. Internships.

Individual work in journalism, publishing, or broadcasting. Internships require a contracted amount of writing or other work, and generally involve group tutorials with faculty in the Writing Program as well as individual conferences. *The Staff*

191A. Internship in Writing. F,W,S

Regular writing for newspaper or magazine. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191B. Internship in Editing. F,W,S

Work in an editorial position involving critique and guidance of reporters. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191C. Internship in Publishing. F,W,S

All phases of work for a publishing house, from manuscript reading to editorial. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191D. Internship in Broadcasting. F,W,S

Writing, editing, scheduling, and/or broadcast work for television or radio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193. Field Study. F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. *The Staff*

193E. Field Study (2 credits). F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A writing, editing, or publishing project undertaken by a small group of students under the direct supervision of a writing instructor. Students submit petition to sponsoring agency. Enrollment limited to 15. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

Individual work on a thesis for any campus major or individual major. Faculty in the Writing Program help students on all phases of work, from selection and focus to development of bibliographies, research techniques, revision, and editing. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196. Developing and Editing Field Documentation (2 credits). *

Helps students transform field documentation into fully developed, professional projects. Employs a weekly production schedule and teaches principles of rhetoric as a means of effectively selecting and arranging documentary materials. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review documentary materials. Enrollment limited to 20. *L. Lopez*

198. Independent Field Study. F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198E. Independent Field Study (2 credits). F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Graduate Courses***202. Writing and Learning Seminar (3 credits). ***

Strategies for teaching assistants to help undergraduates become better learners and writers in disciplinary courses. Topics include using writing to improve reading and thinking, analysis of assignments, avoiding plagiarism, responding to and evaluating papers, ESL writers, peer response, and technological aids. Enrollment restricted to graduate students. Enrollment limited to 30. *D. Scripture*

203. Teaching Writing. S

Prepares graduate students to teach Writing 1 at UCSC and elsewhere. Development of a syllabus, teaching strategy, and class plans based on study of composition and rhetorical theories, research on students' writing development, and effective writing pedagogies. Enrollment restricted to graduate students. Enrollment limited to 18. *E. Abrams*

Teaching Staff

Faculty titles for 2010–12 were verified as of August 31, 2010, and subsequent changes may not be reflected in the following list. Please note that inclusion in this list is not a guarantee that the faculty member will be teaching throughout the 2010–12 academic years. In addition, some faculty listed here as emeriti may be recalled to teach courses.

The listing for most faculty members includes college membership, year of arrival at UC Santa Cruz, academic title, degrees, and former affiliations.

MARTIN ABADI, Stevenson College (2001)
Professor, Computer Science

B.S., M.S., Ph.D., Stanford University. Former affiliations: Systems Research Center, Compaq; Bell Labs Research; Lucent Technologies.

RALPH H. ABRAHAM, Kresge College (1968)
Professor Emeritus, Mathematics
B.S.E., M.S., Ph.D., University of Michigan. Former affiliations: Princeton University; Columbia University; University of California, Berkeley.

W. EMMANUEL ABRAHAM, Cowell College (1973)
Professor Emeritus, Philosophy
B.A., University of London; M.A., B.Phil., Oxford University. Former affiliations: Macalester College; University of Ghana; University of California, Berkeley; Stanford University.

ELIZABETH S. ABRAMS, Porter College (2000)
Senior Lecturer, Writing
A.B., University of California, Berkeley; M.A., M.Phil., Yale University. Former affiliation: Harvard Expository Writing Program.

ZSUZSANNA ABRAMS (2010)
Associate Professor, Language Program
B.A., University of Wisconsin-Eau Claire; M.A., Ph.D., University of Tucson. Former affiliations: University of Texas at Austin.

DEMETRIOS ACHLIOPTAS (2005)
Associate Professor, Computer Sciences
B.Eng., University of Patras; M.Sc., Ph.D., University of Toronto. Former affiliations: Microsoft Research, Redmond, Washington.

ROBERT ADAMS, Crown College (1967)
Professor Emeritus, Economics
B.A., Oberlin College; M.A., Ph.D., University of Michigan. Former affiliations: University of Pittsburgh; University of Maryland.

ANTHONY N. AGUIRRE (2003)
Associate Professor, Physics
B.A., Brown University; M.A., Ph.D., Harvard University. Former affiliation: Institute for Advanced Study (Princeton).

PATRICK P. AHERNE, Porter College (1966)
Professor Emeritus, Art
B.F.A., University of Kansas; M.A., Northwestern University. Former affiliation: Artist-in-Residence, Kings Canyon and Sequoia National Parks.

JUDITH L. AISSSEN, Stevenson College (1983)
Professor, Linguistics
B.A., Fordham University; M.A., Yale University; Ph.D., Harvard University. Former affiliations: University of California, Los Angeles; Yale University; University of California, Santa Barbara.

JOSHUA AIZENMAN, College Nine (2001)
Professor, Economics
B.A., M.A., Hebrew University of Jerusalem; Ph.D., University of Chicago. Former affiliations: University of Pennsylvania; University of Chicago; Hebrew University of Jerusalem; Dartmouth College.

RAMAKRISHNA AKELLA (2003)
Professor, Information Systems Management
B.S., Indian Institute of Technology; Ph.D., Indian Institute of Science. Former affiliations: State University of New York at Buffalo; Carnegie Mellon University.

MARK AKESON (1996)
Professor, Undergraduate Director, Biomolecular Engineering
B.A., University of California, San Diego; Ph.D., University of California, Davis. Former affiliations: National Institutes of Health; University of California, Davis.

NAMEERA N. AKHTAR, Crown College (1995)
Professor, Psychology
B.S., M.S., Ph.D., Dalhousie University (Canada).

PETER ALDHOUS (2007)
Lecturer in Science Writing
B.S., University of Bristol, England; Ph.D., University of Nottingham, England.

GLENN ALERS (2010)
Adjunct Professor, Computer Engineering
B.S., University of Colorado, Boulder; M.S., Ph.D., University of Illinois, Urbana.

GEORGE T. AMIS, Cowell College (1965)
Professor Emeritus, English Literature
B.A., Amherst College; M.A., Ph.D., Yale University. Former affiliations: Yale University; Williams College.

PRANAV ANAND, Stevenson College (2006)
Assistant Professor, Linguistics
A.B., Harvard University; Ph.D., MIT.

ELLIOT W. ANDERSON, Porter College (1997)
Associate Professor, Art
B.A., M.A., San Francisco State University. Former affiliation: San Francisco Art Institute.

ERIC ANDERSON (2008)
Assistant Adjunct Professor, Applied Mathematics and Statistics
B.A., Stanford University; M.S., Ph.D., University of Washington. Former affiliation: Southwest Fisheries Science Center.

MARK D. ANDERSON, Merrill College (2003)
Associate Professor, Anthropology
B.A., University of North Carolina at Chapel Hill; M.A., Ph.D., University of Texas at Austin. Former affiliation: University of Chicago.

ROGER W. ANDERSON, Porter College (1968)
Professor, Chemistry and Biochemistry
B.A., Carleton College; M.A., Ph.D., Harvard University.

FRANK C. ANDREWS, Merrill College (1967)
B.S., Kansas State University; M.A., Ph.D., Harvard University. Former affiliation: University of Wisconsin.

LAWRENCE ANDREWS, Porter College (1991)
Associate Professor, Film and Digital Media
B.F.A., San Francisco Art Institute.

RYAN ANDREWS (1999)
Executive Director, Physical Education
B.A., University of California, Berkeley, M.A., San Jose State University.

DAVID HENRY ANTHONY III, Oakes College (1988)
Associate Professor, History
A.B., New York University; A.M., Ph.D., University of Wisconsin-Madison. Former affiliation: University of Oregon.

BETTINA F. APTHEKER, Kresge College (1979)
Professor, Feminist Studies and History
B.A., University of California, Berkeley; M.A., San Jose State University; Ph.D., University of California, Santa Cruz. Former affiliation: San Jose State University.

DANE ARCHER, Stevenson College (1972)
Professor Emeritus, Sociology
B.A., Yale University; M.A., Ph.D., Harvard University.

SONDRA ARCHIMEDES (2004)
Lecturer, Writing
B.A., M.A., San Francisco State University; Ph.D., University of California, Santa Cruz.

MANUEL ARES, Porter College (1987)
Professor, Molecular, Cell, and Developmental Biology
B.S., Cornell University; Ph.D., University of California, San Diego. Former affiliation: Yale University.

JEFFREY M. ARNETT (1987)
Lecturer, Writing
B.A., University of California, Santa Cruz; M.A., University of Colorado, Boulder. Former affiliation: Santa Clara University.

- ANJALI R. ARONDEKAR, Kresge College (2000)
Associate Professor, Feminist Studies
I.B., Armand Hammer United World College;
B.A., Cornell University; Graduate Certificate,
Ph.D., University of Pennsylvania.
- ELLIOT ARONSON, Stevenson College (1974)
Professor Emeritus, Psychology
B.A., Brandeis University; M.A., Wesleyan
University; Ph.D., Stanford University. Former
affiliations: Harvard University; University of
Minnesota; University of Texas at Austin.
- GABRIELA F. ARREDONDO, Merrill College (1998)
*Associate Professor, Latin American and Latino
Studies*
B.A., Reed College; M.A., San Francisco State
University; Ph.D., University of Chicago.
- DEREDE ARTHUR (2001)
Lecturer, Writing
M.A., Stanford University. Former affilia-
tions: Santa Clara University; De Anza College;
Cogswell College, Sunnyvale.
- DORIS B. ASH, Porter College (2000)
Associate Professor, Education
B.S., M.S., Cornell University; Ph.D., University
of California, Berkeley. Former affiliation: San
Francisco Exploratorium.
- NORIKO ASO, Merrill College (1998)
Assistant Professor, History
B.A., Yale University; M.A., Ph.D., University
of Chicago. Former affiliation: Portland State
University.
- ERIK ASPHAUG, College Eight (1998)
Professor, Earth and Planetary Sciences
B.A., Rice University; Ph.D., University of
Arizona, Tucson. Former affiliations: SETI
Institute; NASA Ames Research Center.
- NEDA ATANASOSKI (2008)
Assistant Professor, Feminist Studies
B.A., University of Minnesota Twin Cities; M.A.,
Ph.D., University of California, San Diego.
Former affiliations: State University of New York
at Stony Brook.
- WILLIAM B. ATWOOD (2001)
Adjunct Professor, Physics
B.S., California Institute of Technology; Ph.D.,
Stanford University. Former affiliation: Stanford
Linear Accelerator Center.
- IGNACIO AZNAR (1966)
Lecturer Emeritus, Spanish Language
B.A., M.A., University of California, Berkeley.
Former affiliation: Pomona College.
- MARGARITA AZMITIA, Cowell College (1989)
Professor, Psychology
B.A., M.A., University of North Carolina at
Greensboro; Ph.D., University of Minnesota.
Former affiliation: Florida International
University.
- DELBERT BAILEY (2010)
Lecturer, Computer Science
B.S., Portland State University; M.S., Ph.D.,
University of California, Santa Cruz. Former
affiliation: University of Oregon.
- MARK BAKER (2000)
Lecturer, Writing
B.A., University of California, Irvine; M.A., San
Francisco State University. Former affiliation: San
Francisco State University.
- JOHN BALACHANDRA (2010)
Adjunct Professor, Electrical Engineering
B.S., University of Sri Lanka; M.S., Ph.D., Texas
A&M University. Former affiliations: Distributed
Power & Electronics Center; California State
University, Sacramento.
- GOPAL BALAKRISHNAN, Oakes College (2006)
Associate Professor, History of Consciousness
B.A., Cornell University; M.A., Ph.D., University
of California, Los Angeles. Former affiliation:
University of Chicago.
- THOMAS BANKS (1986)
Professor, Physics
B.A., Reed College; Ph.D., Massachusetts Institute
of Technology. Former affiliations: Stanford
Linear Accelerator Center; Tel Aviv University;
Institute for Advanced Study (Princeton); Rutgers
University.
- KAREN M. BARAD, Kresge College (2005)
Professor, Feminist Studies
B.A., Brandeis University; Ph.D., State University
of New York at Stony Brook. Former affiliations:
Mount Holyoke College, Rutgers University,
Pomona College, Barnard College.
- BRENDA BARCELÓ, Merrill College (1995)
Lecturer, Spanish Language
B.A., M.A., University of California, Santa
Barbara. Former affiliations: Cuesta College;
Alianza Cultural Uruguay-U.S.A. (Montevideo).
- BRANDIN S. BARON, Porter College (2006)
Associate Professor, Theater Arts
B.A., Indiana University School of Music; M.F.A.,
University of California, San Diego. Former
affiliation: The Academy of Art University, San
Francisco.
- LORA BARTLETT (2004)
Assistant Professor, Education
B.A., M.Ed., University of Massachusetts,
Amhurst; Ph.D., University of California,
Berkeley. Former affiliation: University of London.
- KAREN L. BASSI, Cowell College (1988)
Professor, Classics (Literature)
B.A., University of California, Santa Cruz; Ph.D.,
Brown University. Former affiliations: Syracuse
University; University of Rhode Island; Brown
University.
- DILIP K. BASU, Merrill College (1971)
Associate Professor, History
B.A., M.A., Calcutta University; M.A., Harvard
University; Ph.D., University of California,
Berkeley. Former affiliations: University of
Michigan; University of California, Berkeley.
- FRANK BÄUERLE (1994)
Lecturer, Mathematics
B.A., Technische Hochschule Karlsruhe; M.A.,
Ph.D., University of California, San Diego.
Former affiliations: Monash University; Cornell
University.
- MURRAY BAUMGARTEN, Kresge College (1966)
*Professor, English and Comparative Literature;
Neufeld Levin Professor, Holocaust Studies*
B.A., Columbia University; M.A., Ph.D.,
University of California, Berkeley. Former affilia-
tions: Hebrew University of Jerusalem; Williams
College; University of California Education
Abroad Program (Jerusalem).
- AMY C. BEAL, Porter College (2001)
Professor, Music
B.M., M.M., University of Kansas; M.A., Ph.D.,
University of Michigan. Former affiliation: Bates
College.
- TANDY BEAL, Porter College (1973)
Lecturer, Theater Arts (Dance)
Former affiliations: Cabrillo College; University
of Utah.
- MICHAEL W. BECK, (2007)
Assistant Adjunct Professor, Ocean Sciences
Ph.D., Florida State University.
- JONATHAN F. BEECHER, Stevenson College (1970)
Professor Emeritus, History
B.A., Ph.D., Harvard University. Former
affiliations: Harvard University; Ecole Normale
d'Instituteurs (France).
- DAVID P. BELANGER, College Eight (1984)
Professor, Physics
B.S., M.S., Georgia Institute of Technology;
Ph.D., University of California, Santa Barbara.
- DORIAN BELL (2010)
Assistant Professor, Literature
B.A., Cornell University; M.A., Ph.D., University
of Pennsylvania. Former affiliations: University of
California, Irvine; Stanford University.
- ILAN BENJAMIN, Stevenson College (1989)
Professor, Chemistry and Biochemistry
B.Sc., Ph.D., Hebrew University of Jerusalem.
Former affiliation: University of California, San
Diego.
- HARRY BERGER, JR., Cowell College (1965)
*Professor Emeritus, English Literature and History of
Art and Visual Culture*
B.A., Ph.D., Yale University. Former affiliation:
Yale University.

- MARTIN A. BERGER, Porter College (2004)
Professor, History of Art and Visual Culture
B.A., Wesleyan University; M.A., M.Phil., Ph.D., Yale University. Former affiliations: Colby College; University of North Carolina at Chapel Hill; Northwestern University; State University of New York at Buffalo; Yale University.
- RALPH J. BERGER, Cowell College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., M.A., Cambridge University; Ph.D., University of Edinburgh. Former affiliations: University of Edinburgh; National Institute of Neurological Diseases and Blindness; University of Puerto Rico; University of California, Los Angeles.
- ROBERT F. BERKHOFER, Merrill College (1991)
Professor Emeritus, History
B.A., State University of New York at Albany; M.A., Ph.D., Cornell University. Former affiliations: University of Michigan, Ann Arbor; University of Wisconsin-Madison; University of Minnesota.
- NATHANIEL A. BERMAN (2007)
Lecturer, Music (Concert Choir)
B.A., M.A., University of California, Santa Cruz. Former affiliation: Robert Louis Stevenson High School, Pebble Beach.
- PHILLIP W. BERMAN (2006)
Professor and Department Chair, Biomolecular Engineering
A.B., University of California, Berkeley; Ph.D., Dartmouth Medical School. Concurrent Affiliation: Global Solutions for Infectious Diseases; Genentech; VaxGen.
- GIACOMO BERNARDI (1994)
Associate Professor, Ecology and Evolutionary Biology
B.S. (Maitrise), M.Sc. (D.E.A.), Ph.D. (These d'Université), University of Paris. Former affiliations: Institut Jacques Monod (Paris); Hopkins Marine Station, Stanford University.
- CLAUDE F. BERNASCONI, Merrill College (1967)
Professor, Chemistry and Biochemistry
Diploma, Ph.D., Swiss Federal Institute of Technology (ETH) (Zurich). Former affiliation: Max Planck Institute for Biophysical Chemistry (Göttingen).
- REBECCA A. BERNSTEIN (2007)
Associate Professor/Associate Astronomer, Astronomy and Astrophysics
B.A., Princeton; Ph.D., California Institute of Technology. Former affiliations: Carnegie Observatories; University of Michigan.
- EVA C. BERTRAM, Merrill College (2003)
Assistant Professor, Politics
B.A., Swarthmore College; M.A., M.Phil., Ph.D., Yale University.
- JULIE BETTIE, College Eight (1997)
Associate Professor, Sociology
B.S., Boise State University; M.A., Ph.D., University of California, Davis.
- NEEDHI BHALLA (2008)
Assistant Professor, Biology
B.A., Columbia College, New York; Ph.D., University of California, Berkeley.
- NANDINI BHATTACHARYA (1991)
Lecturer, Mathematics
B.A., Bryn Mawr College; M.A., University of California, Santa Cruz. Former affiliation: Cabrillo College.
- ZHIXI BIAN (2008)
Assistant Adjunct Professor
B.S., Nankai University; M.S., Beijing University; Ph.D., University of California, Santa Cruz. Former affiliations: Vishay Siliconix; Beijing University.
- JAMES H. BIERMAN, Cowell College (1973)
Professor, Theater Arts (Drama)
B.A., Princeton University; Diplome, University of Paris, Sorbonne; Ph.D., Stanford University. Former affiliations: Smith College; Amherst College.
- RAOUL BIRNBAUM, Kresge College (1991)
Professor, History of Art and Visual Culture
B.A., College of the City of New York; M.A., M.Phil., Ph.D., Columbia University. Former affiliations: University of Iowa; Princeton University; Harvard University; Metropolitan Museum of Art.
- A. HUNTER BIVENS, Cowell College (2008)
Assistant Professor, Literature
B.A., Bard College; Ph.D., University of Chicago. Former affiliation: Moravian College.
- COURTNEY A. BLACKBURN (1980)
Physical Education Instructor
Certified master of Yung Style Tai Chi Chuan under Grand Master Liu, Yao Ting.
- CHELSEA BLACKMORE (2010)
Assistant Professor, Anthropology
B.A., Georgia Southern University; M.A., Florida State University; Ph.D., University of California, Riverside.
- GEORGE R. BLUMENTHAL, Oakes College (1972)
Chancellor; Professor, Astronomy and Astrophysics
B.S., University of Wisconsin-Milwaukee; Ph.D., University of California, San Diego.
- PETER H. BODENHEIMER, Stevenson College (1967)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.A., Harvard University; Ph.D., University of California, Berkeley.
- HANNS HINRICH BOEGER (2006)
Assistant Professor
B.S., M.S., Christian-Albrecht University; Ph.D., Max Planck Institute for Biophysical Chemistry; post-doctorate, Stanford University. Former affiliation: Stanford University Medical School.
- ROBERTO A. BOGOMOLNI, Porter College (1988)
Professor, Chemistry and Biochemistry
Diploma, University of Buenos Aires; Ph.D., University of California, Berkeley. Former affiliations: University of California, San Francisco; University of California, Berkeley.
- MICHAEL BOLTE (1993)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.S., University of Central Florida; M.S., Florida State University; Ph.D., University of Washington. Former affiliations: NASA/Space Telescope Science Institute; Dominion Astrophysical Observatory.
- ROBERT BOLTJE (1999)
Professor, Mathematics
Dipl. Math., University of Munich; Dr. habil., Dr. rer. nat., University of Augsburg.
- JOHN G. BORREGO, Merrill College (1974)
Professor Emeritus, Latin American and Latino Studies
B.A., University of California, Berkeley; M.A., Washington University; M.C.P., Massachusetts Institute of Technology; Ph.D., University of California, Berkeley. Former affiliation: University of New Mexico.
- JOHN F. BOWIN, Cowell College (2005)
Assistant Professor, Philosophy
B.A., M.B.A., M.A., University of Chicago; M.A., Ph.D., University of Texas at Austin.
- BARRY J. BOWMAN, Oakes College (1979)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of Wisconsin; Ph.D., University of Michigan. Former affiliation: Yale University.
- MARK BRANDENBURG (1989)
Lecturer, Music (Clarinet)
B.M., M.S., Juilliard School of Music.
- SCOTT A. BRANDT, Crown College (1999)
Professor, Computer Science
B.S., M.S., University of Minnesota, Minneapolis; Ph.D., University of Colorado, Boulder.
- ALEXANDRE BRANDWAJN (1985)
Professor, Computer Engineering
B.A., Docteur-Ingenieur, Docteur d'Etat, University of Paris. Former affiliations: Amdahl Corporation; Ecole Nationale Supérieure des Telecommunications (ENST) (Paris); Duke University.
- REBECCA BRASLAU, Stevenson College (1991)
Professor, Chemistry and Biochemistry
B.A., Reed College; Ph.D., University of Wisconsin-Madison. Former affiliation: Institut für Organische Chemie (Basel, Switzerland).
- ADRIAN BRASOVEANU (2008)
Assistant Professor, Linguistics
B.A., M.A., University of Bucharest; Ph.D., Rutgers University.

- DONALD L. BRENNIS, Cowell College (1996)
Professor, Anthropology
B.A., Stanford University; Ph.D., Harvard University. Former affiliation: Pitzer College.
- BRUCE BRIDGEMAN, College Eight (1973)
Professor Emeritus, Psychology and Psychobiology
B.A., Cornell University; Ph.D., Stanford University. Former affiliations: Free University of Berlin; University of California, Berkeley.
- FRANK G. BRIDGES, Stevenson College (1970)
Professor Emeritus, Physics
B.Sc., M.Sc., University of British Columbia; Ph.D., University of California, San Diego. Former affiliation: University of California, San Diego.
- JEAN P. BRODIE, Cowell College (1987)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., University of London; Ph.D., Cambridge University. Former affiliation: University of California, Berkeley.
- EMILY E. BRODSKY (2006)
Associate Professor, Earth and Planetary Sciences
A.B., Harvard University; Ph.D., California Institute of Technology. Former affiliation: University of California, Los Angeles.
- JOYCE E. BRODSKY, Porter College (1992)
Professor Emerita, Art
B.A., Brooklyn College; M.A., New York University; Ph.D. cand., Yale University; Ecole du Louvre. Former affiliation: University of Connecticut.
- MARGARET R. BROSE, Cowell College (1978)
Professor Emerita, Italian and Comparative Literature
B.A., Wayne State University; M.A., Ph.D., Harvard University. Former affiliations: Yale University; University of Colorado.
- GEORGE S. BROWN, Porter College (1990)
Professor Emeritus, Physics
B.S., California Institute of Technology; M.S., Ph.D., Cornell University. Former affiliations: Cornell University; Bell Laboratories; Stanford University.
- MICHAEL K. BROWN, Merrill College (1982)
Professor Emeritus, Politics
B.A., University of Oregon; M.P.A., Ph.D., University of California, Los Angeles. Former affiliation: Virginia Polytechnic Institute and State University.
- KENNETH W. BRULAND, Crown College (1974)
Professor, Ocean Sciences
B.A., Western Washington State College; Ph.D., Scripps Institution of Oceanography, University of California, San Diego.
- NICHOLAS H. BRUMMELL (2006)
Professor, Applied Mathematics and Statistics
B.Sc., D.I.C., Ph.D., Imperial College, London, UK. Former affiliation: University of Colorado, Boulder.
- DAVID T. BRUNDAGE, College Eight (1985)
Professor, Community Studies
B.A., Reed College; M.A., University of Warwick (England); Ph.D., University of California, Los Angeles. Former affiliation: University of New York.
- HEATHER E. BULLOCK, College Ten (1999)
Professor, Psychology
B.A., Allegheny College; M.A., Ph.D., University of Rhode Island. Former affiliation: Nebraska Wesleyan University.
- GEORGE BUNCH, College Ten (2004)
Assistant Professor, Education
B.A., Georgetown University; M.A., University of Maryland, Baltimore County; Ph.D., Stanford University. Former affiliation: Stanford University.
- JOSEPH F. BUNNETT, Crown College (1966)
Professor Emeritus, Chemistry and Biochemistry
B.A., Reed College; Ph.D., University of Rochester. Former affiliations: Reed College; University of North Carolina; Brown University.
- VICTOR BURGIN, Oakes College (1988)
Professor Emeritus, History of Consciousness
A.R.C.A., Royal College of Art (London); M.F.A., Yale University. Former affiliation: Polytechnic of Central London.
- P. NICHOLAS BURGOYNE (1967)
Professor Emeritus, Mathematics
B.Sc., M.Sc., McGill University; Ph.D., Princeton University. Former affiliations: Princeton University; University of California, Berkeley; University of Illinois, Chicago.
- EDMUND BURKE III, Merrill College (1968)
Professor Emeritus, History; UC Presidential Chair
B.A., University of Notre Dame; M.A., Ph.D., Princeton University.
- LINDA C. BURMAN-HALL, Porter College (1975)
Professor, Music
B.A., University of California, Los Angeles; M.F.A., Ph.D., Princeton University.
- JULIANNE BURTON-CARVÁJAL, Merrill College (1974)
Professor Emerita, Literature
B.A., Denison University; M.Phil., Ph.D., Yale University. Former affiliation: University of Texas.
- JEFFREY T. BURY, College Eight (2006)
Associate Professor, Environmental Studies
B.A., University of Utah; M.A., The American University; Ph.D., University of Colorado. Former affiliation: Department of Geography and Human Sciences, San Francisco State University.
- MELISSA L. CALDWELL, College Eight (2004)
Assistant Professor, Anthropology
B.A., University of Tennessee; M.A., Indiana University; A.M., Ph.D., Harvard University. Former affiliations: Northeastern University; Harvard University.
- CARLOS CALIERNO, Merrill College (1990)
Lecturer, Spanish Language
M.A., San Francisco State University; law degree, Facultad De Ciencias Juridicas (Santa Fe, Argentina).
- MAUREEN CALLANAN, Crown College (1989)
Professor, Psychology
A.B., Mount Holyoke College; Ph.D., Stanford University. Former affiliations: University of Texas at Austin; Lehigh University.
- ELISABETH L. CAMERON, Porter College (2001)
Associate Professor, History of Art and Visual Culture
B.A., Agnes Scott College; M.A., Ph.D., University of California, Los Angeles. Former affiliation: Nelson-Atkins Museum of Art (Kansas City, Missouri).
- KENNETH L. CAMERON, Crown College (1973)
Professor Emeritus, Earth and Planetary Sciences
B.S., M.S., University of Houston; Ph.D., Virginia Polytechnic Institute and State University. Former affiliation: State University of New York at Stony Brook.
- WALTER I. CAMPBELL (1989)
Lecturer, German Language
B.A., Whitman College; B.A., M.A., University of Washington.
- MANEL CAMPS, Crown College (2007)
Assistant Professor, Environmental Toxicology
D.V.M., M.A., Autonomous University of Barcelona; Ph.D., Stanford University. Former affiliation: University of Washington.
- MARK H. CARR (1997)
Associate Professor, Ecology and Evolutionary Biology
B.A., University of California, Santa Cruz; M.S., San Francisco State University (Moss Landing Marine Laboratories); Ph.D., University of California, Santa Barbara. Former affiliations: Oregon State University; California Institute of Technology.
- BENJAMIN L. CARSON, College Eight (2003)
Assistant Professor, Music
B.A., Willamette University; M.M., University of Washington, Seattle; Ph.D., University of California, San Diego. Former affiliations: University of California, Riverside; University of California, San Diego.
- SUE A. CARTER, Crown College (1995)
Professor, Physics
B.A., Kalamazoo College; Ph.D., University of Chicago. Former affiliations: AT&T Bell Laboratories; IBM-Almaden Research Center.

- PEDRO G. CASTILLO, Merrill College (1975)
Associate Professor, History
B.A., Arizona State University; M.A., Northern Arizona University; Ph.D., University of California, Santa Barbara. Former affiliations: University of California, Santa Barbara; Yale University.
- BRIAN A. CATLOS, Stevenson College (2002)
Associate Professor, History
B.A., M.A., Ph.D., University of Toronto. Former affiliation: Boston University.
- GIULIA CENTINEO, Cowell College (1987)
Lecturer, Italian Language
Laurea, Università degli Studi di Palermo (Italy); M.A., Ph.D. cand., University of California, Berkeley.
- DON CHAMBERLIN (2008)
Adjunct Professor, Computer Science
B.S., Harvey Mudd College; M.S., Ph.D., Stanford University. Former affiliation: IBM Research Division.
- PAK K. CHAN, Crown College (1987)
Associate Professor, Computer Engineering
B.Sc., Chinese University of Hong Kong; M.Sc., Ph.D., University of California, Los Angeles. Former affiliation: University of California, Los Angeles.
- MARTIN M. CHEMERS, Porter College (1995)
Professor Emeritus, Psychology
B.S., M.S., Ph.D., University of Illinois, Urbana-Champaign. Former affiliations: Claremont McKenna College; Claremont Graduate School; University of Utah; University of Delaware.
- BIN CHEN (2006)
Assistant Professor, Biological Sciences
B.S., M.S., Beijing University; Ph.D., State University of New York at Stony Brook; Postdoctorate, Stanford University. Former affiliation: Stanford University.
- BIN CHEN (2008)
Adjunct Professor, Electrical Engineering
B.S., Nanjing University; M.S., University of Illinois, Urbana-Champaign; Ph.D., Pennsylvania State University. Former affiliations: NASA Ames Research Center; Modus Nanotechnology, Inc.; Hal Technology; Physical Optics Corp.; Eloret Corp.; Pharmaceutical University of China.
- NANCY N. CHEN, Crown College (1994)
Professor, Anthropology
B.A., Stanford University; M.A., Ph.D., University of California, Berkeley. Former affiliation: Tufts University.
- SHAOWEI CHEN (2004)
Professor, Chemistry and Biochemistry
B.S., University of Science and Technology of China; M.S., Ph.D., Cornell University. Former affiliation: Southern Illinois University at Carbondale.
- AI-RU CHENG (2004)
Assistant Professor, Economics
B.A., National Tsing-hua University; M.S., Ph.D., University of North Carolina at Chapel Hill.
- WEIXIN CHENG, College Nine (1999)
Professor, Environmental Studies
B.S., Northeast Agricultural College (Harbin, China); Ph.D., University of Georgia.
- YIN-WONG CHEUNG, Crown College (1990)
Professor, Economics
B.S., University of Hong Kong; M.A., University of Essex (England); Ph.D., University of Pennsylvania.
- JOHN BROWN CHILDS, College Ten (1987)
Professor Emeritus, Sociology
B.A., University of Massachusetts-Amherst; M.A., Ph.D., State University of New York at Buffalo. Former affiliations: National Academy of Sciences; Amherst College; Harvard University; Yale University.
- ALAN S. CHRISTY, Merrill College (1995)
Associate Professor, History
B.A., Carleton College; M.A., Ph.D., University of Chicago.
- PATRICK Y. CHUANG (2001)
Assistant Professor, Earth and Planetary Sciences
B.Sc., University of Alberta; M.S., Ph.D., California Institute of Technology. Former affiliation: National Center for Atmospheric Research.
- GLENDA G. CHUI (2006)
Lecturer in Science Writing, Science Communication
B.S., California State University, Hayward; M.S., University of California, Berkeley.
- SANDRA CHUNG, Cowell College (1986)
Professor, Linguistics
A.B., Radcliffe College; Ph.D., Harvard University. Former affiliations: University of California, Los Angeles; University of California, San Diego.
- MARK CIOC, Stevenson College (1989)
Professor, History; Vice Provost and Dean, Undergraduate Education
B.S., M.A., University of Wyoming; Ph.D., University of California, Berkeley. Former affiliation: University of Massachusetts-Amherst.
- MATTHEW E. CLAPHAM (2007)
Assistant Professor, Earth and Planetary Sciences
B.Sc., University of British Columbia, Canada; M.Sc., Queen's University, Ontario, Canada; Ph.D., University of Southern California. Former affiliation: Queen's University.
- JAMES T. CLIFFORD, Oakes College (1978)
Professor Emeritus, History of Consciousness
B.A., Haverford College; M.A., Stanford University; Ph.D., Harvard University; (Hon.) D. Litt. h.c., Haverford College. Former affiliation: Harvard University.
- RENA V. COCHLIN, Merrill College (1973)
Associate Supervisor, Physical Education
B.A., Barnard College; M.A., Columbia University. Former affiliations: Central Connecticut State College; East Los Angeles College; World Campus Afloat.
- ROBERT S. COE, Porter College (1968)
Professor, Earth and Planetary Sciences
B.A., Harvard University; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; U.S. Geological Survey.
- CHRISTOPHER L. CONNERY, Oakes College (1990)
Professor, Chinese Literature
B.A., University of California, Santa Cruz; M.A., Ph.D., Princeton University.
- PAUL D. CONTOS (1997)
Lecturer, Music
Concurrent affiliations: California State University, Monterey Bay; Monterey Jazz Festival. Former affiliations: Santa Cruz County Symphony; San Jose Civic Light Opera.
- CATHERINE R. COOPER, Stevenson College (1987)
Professor, Psychology and Education
B.A., Pomona College; Ph.D., University of Minnesota at Minneapolis-St. Paul. Former affiliation: University of Texas at Austin.
- BRUCE N. COOPERSTEIN, College Eight (1975)
Professor, Mathematics
B.A., Queens College, City University of New York; M.A., Ph.D., University of Michigan. Former affiliation: University of Michigan.
- VILASHINI COOPAN, Oakes College (2003)
Associate Professor, Literature
B.A., Yale University; Ph.D., Stanford University. Former affiliation: Yale University.
- DAVID H. COPE, Porter College (1977)
Professor Emeritus, Music
B.M., Arizona State University; M.M., University of Southern California. Former affiliations: Miami University (Ohio); Kansas State College.
- MARY J. COPE (1977)
Lecturer, Music (Piano)
B.A., Ohio Dominican College; M.M., Indiana University. Former affiliations: Cottey College; Kansas State College; Cleveland Institute of Music; Miami University (Ohio).
- DAN COSTA, College Eight (1982)
Professor, Ecology and Evolutionary Biology; Ida Benson Lynn Professor, Ocean Health
B.A., University of California, Los Angeles; Ph.D., University of California, Santa Cruz. Former affiliation: Scripps Institution of Oceanography.
- WILLIAM D. COULTER, Porter College (1995)
Lecturer, Music (Classical Guitar)
B.A., M.A., University of California, Santa Cruz; M.A., San Francisco Conservatory of Music.

- MICHAEL H. COWAN, Oakes College (1969)
Professor, American Studies
B.A., Ph.D., Yale University. Former affiliation: Yale University.
- PHILIP O. CREWS, Cowell College (1970)
Professor, Chemistry
B.S., University of California, Los Angeles; Ph.D., Princeton University. Former affiliation: University of California, Santa Barbara.
- EDITH G. CRICHTON, Porter College (1994)
Associate Professor, Art
B.F.A., San Francisco State University; M.F.A., California College of Arts and Crafts. Former affiliation: California State University, Hayward.
- DONALD A. CROLL (2000)
Professor, Ecology and Evolutionary Biology
B.Sc., University of California, Davis; M.Sc., California State University, Hayward (Moss Landing Marine Laboratories); Ph.D., Scripps Institution of Oceanography, University of California, San Diego.
- FAYE J. CROSBY, Porter College (1997)
Professor, Psychology
A.B., Wheaton College; Ph.D., Boston University; LL.D. (Hon.), Ball State University. Former affiliations: Boston University; London School of Economics and Political Science; Yale University; Smith College.
- BEN D. CROW, College Eight (1996)
Professor, Sociology
B.Sc., University of Westminster (Polytechnic of Central London); Ph.D., University of Edinburgh. Former affiliations: Stanford University; University of California, Berkeley.
- CYNTHIA CRUZ, Merrill College (2008)
Assistant Professor, Education
B.A., Scripps College; Ph.D., University of California, Los Angeles. Former affiliations: Cornell University; Pacific Oakes College; University of California, Los Angeles.
- RENWICK E. CURRY (2008)
Adjunct Professor, Computer Engineering
A.B., Middlebury College; S.B., S.M., E.A.A., and Ph.D., Massachusetts Institute of Technology.
- ROBERT R. CURRY, College Eight (1979)
Professor Emeritus, Environmental Geology (Environmental Studies)
B.A., M.Sc., University of Colorado; Ph.D., University of California, Berkeley. Former affiliations: University of California, Santa Barbara; University of Montana.
- DAVID L. CUTHBERT, Porter College (2003)
Associate Professor, Theater Arts
B.A., California State University, Fresno; M.F.A., University of California, San Diego. Former affiliations: Old Globe Theater (San Diego); PCPA Theaterfest; Vortex Lighting (Los Angeles); Sledgehammer Theatre.
- MICHAEL S. DALBEY (1977)
Lecturer, Biology
B.A., San Fernando Valley State College; Ph.D., University of California, Santa Cruz.
- CHARLES W. DANIEL, Cowell College (1965)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.A., University of New Mexico; M.S., University of Hawaii; Ph.D., University of California, Berkeley.
- SHARON A. DANIEL, Porter College (1996)
Professor, Film and Digital Media
B.M., Baylor University; M.M., University of Texas; M.F.A., University of Tennessee. Former affiliations: Massachusetts Institute of Technology; Maryland Institute College of Art; Rhode Island School of Design.
- PETER DANZIG (2010)
Adjunct Professor, Computer Engineering
B.S., University of California, Davis; Ph.D., University of California, Berkeley.
- SAMIT DASGUPTA (2008)
Assistant Professor, Mathematics
A.B., Harvard University; Ph.D., University of California, Berkeley. Former affiliation: Harvard University.
- ANGELA Y. DAVIS, Oakes College (1991)
Professor Emerita, History of Consciousness
B.A., Brandeis University; M.A., University of California, San Diego; Certificat de la Litterature Française Contemporaine, Sorbonne. Former affiliation: San Francisco State University.
- JAMES E. DAVIS (2004)
Associate Professor, Computer Science
B.S., University of California, Davis; Ph.D., Stanford University. Former affiliation: Honda Research Institute.
- LUCA DE ALFARO (2001)
Associate Professor, Computer Engineering
B.S., Ph.D., Politecnico di Torino (Italy); M.S., Ph.D., Stanford University. Former affiliation: University of California, Berkeley.
- DAVID W. DEAMER (1994)
Professor Emeritus (recalled), Chemistry and Biochemistry
B.S., Duke University; Ph.D., Ohio State University School of Medicine. Former affiliation: University of California, Davis.
- CAROLYN DEAN, Porter College (1991)
Professor, History of Art and Visual Culture
B.A., University of Puget Sound; M.A., C.Phil., Ph.D., University of California, Los Angeles. Former affiliation: Texas Tech University.
- MARGARET L. DELANEY, Crown College (1983)
Professor, Ocean Sciences
B.S., Yale University; Ph.D., Massachusetts Institute of Technology.
- TERESA DE LAURETIS, Oakes College (1985)
Professor, History of Consciousness
Maturita Classica, Liceo-Ginnasio Dante Alighieri (Ravenna); Laurea, Università Luigi Bocconi (Milan). Former affiliations: University of Wisconsin-Milwaukee; University of California, San Diego.
- GINA DENT, Kresge College (2002)
Associate Professor, Feminist Studies, History of Consciousness, and Legal Studies
B.A., University of California, Berkeley; M.A., M.Phil., Ph.D., Columbia University. Former affiliations: Columbia University; Princeton University.
- MARC A. DESJARDINS (2006)
Lecturer in Science Writing, Science Communication
B.A., University of Vermont.
- JOSHUA DEUTSCH, Merrill College (1986)
Professor, Physics
B.S., M.Sc., University of California, San Diego; Ph.D., Cambridge University. Former affiliation: University of California, Santa Barbara.
- NATHANIEL DEUTSCH (2008)
Professor, History
B.A., M.A., Ph.D., University of Chicago. Former affiliations: Swarthmore College; City University of New York-Hunter College.
- RACHEL J. DEWEY (1999)
Associate Adjunct Professor, Astronomy and Astrophysics
A.B., Harvard University; Ph.D., Princeton University.
- MARIA ELENA DIAZ, Merrill College (1991)
Associate Professor, History
B.A., Syracuse University; M.A., University of Chicago; Ph.D., University of Texas at Austin. Former affiliation: University of Texas at Austin.
- MAY N. DIAZ, Merrill College (1974)
Professor Emerita, Anthropology
B.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.
- ANDREA DI BLAS (2009)
Assistant Adjunct Professor
M.S., Ph.D., Politecnico di Torino, Italy.
- MICHAEL DINE, Stevenson College (1990)
Distinguished Professor, Physics
B.S., Johns Hopkins University; Ph.D., Yale University. Former affiliations: City College of the City University of New York; Stanford Linear Accelerator Center.
- JOHN DIZIKES, Cowell College (1965)
Professor Emeritus, American Studies
B.A., University of California, Los Angeles; Ph.D., Harvard University. Former affiliation: University of Connecticut.

CARLOS E. DOBKIN (2003)
Associate Professor, Economics
B.A., University of California, Santa Cruz; M.A.,
Ph.D., University of California, Berkeley.

ANDREW E. DOE, Porter College (1973)
Professor Emeritus, Theater Arts (Drama)
B.S., University of Vermont; M.A., University
of Washington. Former affiliations: Lower
Columbia College; University of Iowa; University
of Michigan; University of Southern California;
Pomona College.

G. WILLIAM DOMHOFF, Stevenson College (1965)
Professor Emeritus, Psychology
B.A., Duke University; M.A., Kent State
University; Ph.D., University of Miami. Former
affiliation: California State College, Los Angeles.

NATHANIEL DOMINY, Crown College (2004)
Associate Professor, Anthropology
B.A., Johns Hopkins University; Ph.D.,
University of Hong Kong. Former affiliation:
University of Chicago.

CHONGYING DONG, Crown College (1990)
Professor, Mathematics
B.S., Xian Telecommunication and Engineering
University; Ph.D., Institute of System Science,
Academia Sinica. Former affiliation: Rutgers
University.

MICHAEL P. DOOLEY, Crown College (1992)
Professor, Economics
B.S., Duquesne University; M.A., University of
Delaware; Ph.D., Pennsylvania State University.
Former affiliations: International Monetary Fund;
Federal Reserve Bank.

DAVID E. DORFAN, Oakes College (1968)
Professor Emeritus, Physics
B.Sc., University of Cape Town; Ph.D., Columbia
University. Former affiliations: Columbia
University; Stanford Linear Accelerator Center.

FARID DOWLA (2008)
Adjunct Professor, Electrical Engineering
B.S., M.S., Ph.D., Massachusetts Institute
of Technology. Former affiliations: Lawrence
Livermore National Laboratory; University of
California, Berkeley; University of California,
Davis; Massachusetts Institute of Technology.

MARGARET M. DOWNES-BASKIN (1998)
Research Associate, Feminist Studies
B.A., Vassar College; M.A., California State
University, Northridge; Ph.D., Claremont
Graduate School of Government.

WILLIAM T. DOYLE, Crown College (1965)
*Professor Emeritus, Ecology and Evolutionary
Biology*
B.A., Ph.D., University of California, Berkeley.
Former affiliation: Northwestern University.

FRANK D. DRAKE (1984)
Professor Emeritus, Astronomy and Astrophysics
B. Eng. Physics, Cornell University; M.A., Ph.D.,
Harvard University. Concurrent affiliation: SETI
Institute. Former affiliations: Harvard University;
National Radio Astronomy Observatory; Jet
Propulsion Laboratory; Cornell University.

DAVID DRAPER, College Eight (2001)
Professor, Applied Mathematics and Statistics
B.Sc., University of North Carolina at Chapel
Hill; M.A., Ph.D., University of California,
Berkeley. Former affiliations: University of
Chicago; RAND Corporation; University of
California, Los Angeles; University of Bath
(England).

TIMOTHY DUANE (2009)
Associate Professor, Environmental Studies
A.B., M.S., Ph.D., Stanford University; J.D.,
University of California, Berkeley. Former affilia-
tions: University of California, Berkeley; Vermont
Law School.

SHERWOOD DUDLEY, Porter College (1968)
Professor Emeritus, Music
B.M., B.A., North Texas State University; M.A.,
Ph.D., University of California, Berkeley. Former
affiliation: University of California Education
Abroad Program (Grenoble, Montpellier,
Marseilles).

WILLIAM B. DUNBAR (2004)
Associate Professor, Computer Engineering
B.S., Virginia Polytechnic Institute and State
University; M.S., University of California, San
Diego; Ph.D., California Institute of Technology.

E. MELANIE DUPUIS, Crown College (1997)
Professor, Sociology
B.A., Radcliffe College, Harvard University;
M.S., Ph.D., Cornell University. Former affilia-
tions: State University of New York at Albany;
New York State Department of Economic
Development; Skidmore College; Rensselaer
Polytechnic Institute; Siena College; Hudson
Valley Community College.

ROBERT M. DURLING, Cowell College (1966)
Professor Emeritus, Italian and English Literature
B.A., M.A., Ph.D., Harvard University.
Former affiliations: Haverford College; Cornell
University.

MARK R. EASTMAN (1990)
Lecturer, Mathematics
B.A., Colorado College; M.A., University
of Montana, Missoula; Ph.D., University of
California, Santa Cruz.

KENT H. EATON, Merrill College (2006)
Professor, Politics
B.A., Stanford University; Ph.D., Yale University.
Former affiliations: Princeton University; Naval
Postgraduate School.

ROBERT S. EDGAR, Crown College (1970)
*Professor Emeritus, Molecular, Cell, and
Developmental Biology*
B.Sc., McGill University; Ph.D., University of
Rochester. Former affiliation: California Institute
of Technology.

KATE EDMUNDS, Porter College (2004)
Professor, Theater Arts
B.F.A., Wayne State University; M.F.A., Yale
School of Drama. Former affiliation: University
of California, Berkeley.

CHRISTOPHER A. EDWARDS (2002)
Assistant Professor, Ocean Sciences
B.A. (Hons.), Haverford College; Ph.D.,
Massachusetts Institute of Technology and Woods
Hole Oceanographic Institution. Former affilia-
tion: University of Connecticut.

MICHAEL D. EDWARDS (1982)
Professor Emeritus, Theater Arts
B.A., Monash University, Australia; M.F.A.,
University of California, Los Angeles. Concurrent
affiliation: Asolo Theater, Sarasota, Florida.
Former affiliation: State College of Victoria,
Australia.

TORSTEN EHRHARDT (2004)
Associate Professor, Mathematics
Dipl. Math., Dr. rer. nat., Dr. habil., Chemnitz
University of Technology (Germany). Former
affiliation: Chemnitz University of Technology.

ÓLÖF EINARSDÓTTIR, Crown College (1989)
Professor, Chemistry and Biochemistry
B.A., University of Iceland, Reykjavik; Ph.D.,
Colorado State University, Fort Collins. Former
affiliation: Los Alamos National Laboratory.

BERNARD L. ELBAUM, Merrill College (1986)
Associate Professor, Economics
B.A., University of Michigan; Ph.D., Harvard
University.

GABRIEL H. ELKAIM, Crown College (2003)
Associate Professor, Computer Engineering
B.S., Princeton University; M.S., Ph.D.,
Stanford University. Concurrent affiliation: Delta
Technology Associates.

JOHN M. ELLIS, Crown College (1966)
Professor Emeritus, German Literature
B.A., Ph.D., University of London. Former
affiliations: University of Wales; University of
Leicester; University of Alberta.

JONATHAN E. ELLIS, Cowell College (2002)
Associate Professor, Philosophy
B.A., Dartmouth College; Ph.D., University of
California, Berkeley.

GREER ELLISON (2002)
Lecturer, Music (Flute)
B.M., Oberlin Conservatory of Music; M.M.,
University of Michigan, Ann Arbor.

PETER Q. ELSEA, Porter College (1980)

Lecturer, Music

B.M., M.A., University of Iowa. Former affiliation: University of Iowa.

ANGELA A. ELSEY, Cowell College (1988)

Lecturer, French Language

B.A., Kalamazoo College; M.A.T., University of Michigan. Former affiliations: San Francisco State University; Oregon State University; Hope College.

HARLAND W. EPPS, Porter College (1989)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.A., Pomona College; M.S., Ph.D., University of Wisconsin. Former affiliation: University of California, Los Angeles.

BARBARA L. EPSTEIN, Oakes College (1973)

Professor, History of Consciousness

B.A., Radcliffe College; M.A., Ph.D., University of California, Berkeley.

SHELLY E. ERRINGTON, Kresge College (1972)

Professor, Anthropology

B.A., Newcomb College, Tulane University; M.A., Ph.D., Cornell University. Former affiliation: Institute for Advanced Study (Princeton).

HEINZ ERZBERGER (2006)

Adjunct Professor, Electrical Engineering

B.S., California Polytechnic State University; M.E.E., Ph.D., Cornell University. Former affiliations: NASA Ames Research Center.

JAMES A. ESTES (1978)

Adjunct Professor, Ecology and Evolutionary Biology and Ocean Sciences

B.A., University of Minnesota; M.S., Washington State University; Ph.D., University of Arizona.

J. PETER EUBEN, Kresge College (1967)

Professor Emeritus, Politics

B.A., Swarthmore College; M.A., Ph.D., University of California, Berkeley; Certificate, Oxford University.

MARIA EVANGELATOU, Porter College (2007)

Assistant Professor, History of Art and Visual Culture

B.A., University of Ioannina, Greece; M.A., Ph.D., Courtauld Institute of Art, London. Former affiliations: Radcliffe Institute for Advance Studies, Harvard University; postdoctoral research fellowship.

MARIA V. EZEROVA, Porter College (1994)

Lecturer, Music (Piano)

B.M., Musical College, Moscow State University; M.A., University of California, Santa Cruz; M.M., D.M.A. equivalents, Moscow State Conservatory. Former affiliations: Russian Academy of Musical Arts (Moscow); Moscow State Conservatory; Turkmenian State Institute of Musical Arts (Ashkhabad).

SANDRA M. FABER, Crown College (1972)

Professor, Astronomy and Astrophysics

B.A., Swarthmore College; Ph.D., Harvard University.

ROBERT W. FAIRLIE, College Ten (1994)

Professor, Economics

B.A., Stanford University; M.A., Ph.D., Northwestern University.

SYLVANNA FALCÓN (2010)

Assistant Professor, Latin American and Latino Studies

B.A., Santa Clara University; M.A., University of New Mexico, Albuquerque; Ph.D., University of California, Santa Barbara. Former affiliation: University of California, Riverside, University of California, Office of the President; Connecticut College; University of California, Santa Barbara.

DONKA F. FARKAS, Stevenson College (1991)

Professor, Linguistics

B.A., University of Bucharest (Romania); Ph.D., University of Chicago. Former affiliation: Yale University.

BRYAN H. FARRELL, College Eight (1974)

Professor Emeritus, Geography (Environmental Studies)

B.A., University of Canterbury (New Zealand); M.A., University of Washington; Ph.D., University of Auckland. Former affiliations: Southern Methodist University; University of Auckland; University of Alberta; University of Victoria (Canada).

BK FAUNCE (2003)

Lecturer, Writing

B.A., M.A., University of Pacific, Stockton; Ph.D., University of California, Riverside.

FARNAZ FATEMI (2000)

Lecturer, Writing

B.A., University of California, Santa Cruz; M.F.A., Mills College.

JOHN FAULKNER, Crown College (1969)

Professor Emeritus, Astronomy and Astrophysics

B.A., M.A., Ph.D., St. John's College, Cambridge University. Former affiliations: Cambridge University; California Institute of Technology; Institute of Theoretical Astronomy (Cambridge).

DAVID A. FELDHEIM (2002)

Assistant Professor, Molecular, Cell, and Developmental Biology

B.A., University of California, San Diego; Ph.D., University of California, Berkeley.

JERRY F. FELDMAN, Crown College (1974)

Professor Emeritus, Molecular, Cell, and Developmental Biology

B.A., Swarthmore College; M.A., Ph.D., Princeton University. Former affiliations: California Institute of Technology; State University of New York at Albany.

VERÓNICA E. FELIU, Merrill College (1999)

Lecturer, Spanish Language

Licenciante, Universidad de Chile; Ph.D., Duke University. Former affiliation: Duke University.

F. JOEL FERGUSON, College Eight (1987)

Professor, Computer Engineering; Provost, Crown College

B.S.E., University of North Carolina at Charlotte; M.S.E.E./C.E., Ph.D., Carnegie Mellon University.

MAYANTHI FERNANDO (2008)

Assistant Professor, Anthropology

M.A., Harvard University; Ph.D., University of Chicago. Former affiliation: Washington University, St. Louis.

NOAH FINNEGAN (2009)

Assistant Professor, Earth and Planetary Sciences

B.A., Carleton College; Ph.D., University of Washington. Former affiliations: Cornell University, University of California, Berkeley; National Center for Earth-Surface Dynamics.

ARTHUR E. FISCHER, Crown College (1972)

Professor Emeritus, Mathematics

B.A., Columbia University; Ph.D., Princeton University; M.D., Albert Einstein College of Medicine. Former affiliation: University of California, Berkeley.

ANDREW T. FISHER, College Eight (1995)

Professor, Earth and Planetary Sciences

B.S., Stanford University; Ph.D., University of Miami. Former affiliations: Indiana Geological Survey; Indiana University; Texas A&M University; Ocean Drilling Program.

TIM R. FITZMAURICE, Crown College (1982)

Lecturer, Writing

B.A., San Jose State University; M.A., University of California, Santa Cruz.

MARGARET I. FITZSIMMONS, College Eight (1994)

Professor, Environmental Studies

B.A., Stanford University; M.A., California State University, Northridge; Ph.D., University of California, Los Angeles. Former affiliation: Graduate School of Architecture and Urban Planning, University of California, Los Angeles.

CORMAC A. FLANAGAN (2003)

Professor, Computer Science

B.S., University College Dublin; M.S., Ph.D., Rice University. Former affiliations: Systems Research Center; DEC; Compaq; Hewlett-Packard.

A. RUSSELL FLEGAL, Crown College (1985)

Professor, Environmental Toxicology

B.A., University of California, Santa Barbara; M.A., Moss Landing Marine Laboratories; Ph.D., Oregon State University. Former affiliation: California Institute of Technology.

MARY K. FOLEY, Porter College (1980)

Professor, Theater Arts (Drama)

B.A., Rosemont College; M.A., University of Massachusetts; Ph.D., University of Hawaii at Manoa. Former affiliation: University of Massachusetts.

- JORGE ALADRO FONT, Merrill College (1992)
Professor, Spanish Literature
M.A., University of Barcelona; Ph.D., State University of New York at Albany. Former affiliations: Skidmore College; State University of New York at Albany.
- SAMANTHA E. FORDE (2009)
Adjunct Professor, Ecology and Evolutionary Biology
B.A., University of California, Santa Barbara; Ph.D., University of California, Santa Cruz.
- DOYLE FOREMAN, Porter College (1968)
Professor Emeritus, Art
B.F.A., California College of Arts and Crafts.
- CAMILLA E. FORSBERG (2007)
Assistant Professor, Biomolecular Engineering
Ph.D., University of Wisconsin-Madison. Former affiliation: Stanford University.
- JONATHAN J. FORTNEY (2007)
Assistant Professor, Astronomy and Astrophysics
B.S., Iowa State University; Ph.D., University of Arizona. Former affiliation: NASA Ames Research Center.
- JONATHAN A. FOX, Merrill College (1995)
Professor, Latin American and Latino Studies
B.A., Princeton University; Ph.D., Massachusetts Institute of Technology. Former affiliation: Massachusetts Institute of Technology.
- LAUREL R. FOX, Crown College (1977)
Professor, Ecology and Evolutionary Biology
B.S., Cornell University; M.A., Ph.D., University of California, Santa Barbara. Former affiliation: Australian National University.
- JEAN E. FOX TREE, Porter College (1994)
Professor, Psycholinguistics (Psychology)
A.B., Harvard University; M.Sc., University of Edinburgh; Ph.D., Stanford University. Former affiliations: Stanford University; Max Planck Institute for Psycholinguistics (Nijmegen, Netherlands).
- PAULO FRANCA (1997)
Lecturer, Computer Science
M.S., Federal University of Rio de Janeiro; M.Eng., Ph.D., University of California, Berkeley.
- DANA L. FRANK, Merrill College (1991)
Professor, History
B.A., University of California, Santa Cruz; M.A., Ph.D., Yale University. Former affiliation: University of Missouri at St. Louis.
- MARK FRANKO, Porter College (1991)
Professor, Theater Arts (Dance)
B.A., City College of New York; Ph.D., Columbia University. Former affiliations: Columbia University; Université Paul Valéry; Princeton University; Purdue University.
- MARGE FRANTZ, Kresge College (1976)
Professor Emerita, American Studies and Feminist Studies
B.A., University of California, Berkeley; Ph.D., University of California, Santa Cruz. Former affiliation: Institute of Industrial Relations, University of California, Berkeley.
- CARLA A. FRECCERO, Kresge College (1991)
Professor, French Literature and Feminist Studies
B.A., Harvard University; M.Phil., Ph.D., Yale University. Former affiliation: Dartmouth College.
- CAROL M. FREEMAN, Cowell College (1974)
Senior Lecturer, Writing
B.A., Carleton College; Ph.D., Yale University. Former affiliation: Yale University.
- ROSA-LINDA FREGOSO, Merrill College (2001)
Professor, Latin American and Latino Studies
B.J., University of Texas at Austin; Ph.D., University of California, San Diego. Former affiliations: University of California, Davis; University of California, Los Angeles; University of California, Santa Barbara.
- WILLIAM H. FRIEDLAND (1969)
Professor Emeritus, Community Studies and Sociology
B.A., M.A., Wayne State University; Ph.D., University of California, Berkeley. Former affiliation: Cornell University.
- BENJAMIN FRIEDLANDER (1999)
Professor, Electrical Engineering
B.S., M.S., Technion University (Israel); M.S., Ph.D., Stanford University. Former affiliation: University of California, Davis.
- DANIEL FRIEDMAN, Crown College (1985)
Professor, Economics
B.A., Reed College; M.A., Ph.D., University of California, Santa Cruz. Former affiliations: University of California, Los Angeles; University of California, Berkeley.
- SUSAN FRIEDMAN, Porter College (1981)
Lecturer, Art
B.A., University of Buffalo; M.F.A., San Francisco Art Institute. Former affiliation: Cabrillo College.
- GREGORY FRITSCH, Porter College (1987)
Lecturer, Theater Arts (Drama)
B.Ed., M.A., University of Miami.
- MARTA MORELLO-FROSCH, Merrill College (1983)
Professor Emerita, Spanish Literature
M.A., Ph.D., Ohio State University. Former affiliations: Ohio State University; University of California, San Diego; University of Waterloo, Canada.
- SAKAE FUJITA (1991)
Lecturer, Japanese Language
B.A., Osaka University of Education; M.A., Monterey Institute of International Studies; Ph.D. cand., University of California, Berkeley. Former affiliation: Monterey Institute of International Studies.
- HIROSHI FUKURAI, Stevenson College (1990)
Professor, Sociology
B.A., California State University, Fullerton; M.A., Ph.D., University of California, Riverside. Former affiliations: University of California, Riverside; Texas A&M University.
- K. C. FUNG, Crown College (1989)
Professor, Economics
B.A., Swarthmore College; M.S., Ph.D., University of Wisconsin-Madison. Former affiliations: Mount Holyoke College; Stanford University.
- JOHN D. FUNGE (2007)
Assistant Adjunct Professor, Computer Science
B.Sc., King's College, London; M.Sc., University of Oxford; Ph.D., University of Toronto. Former affiliations: AiLive Inc.; Sony Computer Entertainment America; Intel Corporation.
- PASCAL GAITET, Kresge College (1986)
Professor, Literature and Language Studies
B.A., M.A., Oxford University; Ph.D., Princeton University.
- PATRICIA M. GALLAGHER, Porter College (2004)
Assistant Professor, Theater Arts
B.A., University of Arizona; M.A., Ph.D., University of Wisconsin-Madison.
- ALISON GALLOWAY, Crown College (1990)
Professor, Anthropology; Vice Provost and Dean, Academic Affairs
B.A., University of California, Berkeley; M.A., Ph.D., University of Arizona. Former affiliation: University of Tennessee.
- FRANK R. GALUSZKA, Porter College (1995)
Professor, Art
B.F.A., M.F.A., Temple University, Tyler School of Art. Former affiliation: University of the Arts, College of Art and Design (Philadelphia).
- ALEXANDER GAMBURD (2004)
Professor, Mathematics
B.S., Massachusetts Institute of Technology; M.A., Ph.D., Princeton University. Former affiliations: Stanford University; Mathematical Sciences Research Institute; Dartmouth College.
- MARY-KAY GAMEL, Cowell College (1973)
Professor, Classics and Comparative Literature
B.A., Smith College; M.A., Harvard University; Ph.D., University of California, Berkeley. Former affiliation: Boston University.
- PASCAL GARAUD, Oakes College (2004)
Associate Professor, Applied Mathematics and Statistics
B.S., Université Louis Pasteur; M.S., Ph.D., Cambridge University. Former affiliation: Cambridge University.
- J. J. GARCÍA-LUNA-ACEVES, Crown College (1993)
Professor, Computer Engineering; Baskin Professor of Computer Engineering
B.S., Universidad Iberoamericana (Mexico City); M.S., Ph.D., University of Hawaii. Former affiliation: Stanford Research Institute International.

- IAN GARRICK-BETHELL (2010)
Assistant Professor, Earth and Planetary Sciences
B.A., Wesleyan University; M.S., Ph.D.,
Massachusetts Institute of Technology.
- ROBERT E. GARRISON, Stevenson College (1968)
Professor Emeritus, Earth and Planetary Sciences
B.S., M.S., Stanford University; Ph.D., Princeton
University. Former affiliations: University of
California, Santa Barbara; University of British
Columbia.
- JOHN C. GARZA (2003)
Assistant Adjunct Professor, Ocean Sciences
Ph.D., University of California, Berkeley.
- GEORGE D. GASPARI, Porter College (1967)
Professor Emeritus, Physics
B.S., DePaul University; Ph.D., University
of California, Riverside. Former affiliation:
University of Rochester.
- CHELSEA GEORGE (1989)
Physical Education Instructor
B.A., University of California, Santa Cruz.
- DIETLIND L. GERLOFF (2006)
Assistant Professor, Biomolecular Engineering
Ph.D., Swiss Federal Institute of Technology,
Zurich. Former affiliations: University of
Edinburgh, Swiss National Science Foundation,
Leukemia Society of America.
- RAYMOND W. GIBBS, Jr., Cowell College (1982)
Professor, Psychology
B.A., Hampshire College; M.A., Ph.D., University
of California, San Diego. Former affiliations: Yale
University; Stanford University.
- MARGARET A. GIBSON, Merrill College (1990)
Professor Emerita, Education
B.A., Wheaton College; M.Ed., Ph.D., University
of Pittsburgh. Former affiliation: California State
University, Sacramento.
- DIANE GIFFORD-GONZALEZ, Merrill College (1976)
Professor, Anthropology
B.A., M.A., Ph.D., University of California,
Berkeley. Former affiliation: University of Nevada.
- RICARD GIL, College Ten (2004)
Assistant Professor, Economics
B.A., Universitat Pompeu Fabra, Spain; M.A., Ph.D.
cand., University of Chicago. Former affiliations:
University of Chicago; Universitat Pompeu Fabra.
- GREGORY S. GILBERT, College Eight (2000)
Professor, Environmental Studies
B.S., State University of New York, College of
Environmental Science and Forestry; M.S., Ph.D.,
University of Wisconsin-Madison.
- JAMES B. GILL, Oakes College (1972)
Professor Emeritus, Earth and Planetary Sciences
B.S., Wheaton College; M.S., Franklin and
Marshall College; Ph.D., Australian National
University.
- SUSAN GILLMAN, Oakes College (1986)
Professor, American Literature
A.B., Bryn Mawr College; Ph.D., University
of California, Berkeley. Former affiliation: Rice
University.
- VIKTOR GINZBURG, College Eight (1996)
Professor, Mathematics
M.S., Moscow Institute of Steel and Alloys;
Ph.D., University of California, Berkeley. Former
affiliations: University of California, Berkeley;
Princeton University; Stanford University.
- PER F. GJERDE, College Nine (1989)
Professor Emeritus, Psychology
Cand. Psychol., University of Bergen (Norway);
Ph.D., University of California, Berkeley. Former
affiliation: University of California, Berkeley.
- RON GLASS, College Ten (2005)
Associate Professor
A.B., Ed.M., Harvard University; C. Phil., UC
Berkeley; M.A., Ph.D., Stanford University.
Former affiliations: Arizona State University; UC
Berkeley; Stanford University.
- GARY A. GLATZMAIER, Oakes College (1998)
Professor, Earth and Planetary Sciences
B.S., Marquette University; Ph.D., University of
Colorado. Former affiliation: Los Alamos National
Laboratory.
- SHANNON M. GLEESON (2008)
Assistant Professor, Latin American and Latino Studies
B.S., Santa Clara University; M.A., Ph.D.,
University of California, Berkeley.
- STEPHEN R. GLIESSMAN, College Eight (1980)
Alfred E. Heller Professor, Agroecology
(*Environmental Studies*)
B.A., M.A., Ph.D., University of California, Santa
Barbara. Former affiliation: Colegio Superior de
Agricultura Tropical (Mexico).
- WLAD B. GODZICH, Cowell College (2000)
Professor, Literature
M.A., Ph.D., Columbia University. Former
affiliations: Université de Genève; University of
Toronto; University of Montreal; University of
Minnesota; Yale University; Columbia University.
- LYNDA J. GOFF, Crown College (1975)
Professor Emerita, Ecology and Evolutionary Biology
B.Sc., Western Oregon State College; Ph.D.,
University of British Columbia. Former affilia-
tions: University of Washington, Friday Harbor
Marine Station; University of British Columbia;
U.S. Forest Service.
- ROBERT A. GOFF, Cowell College (1968)
Associate Professor Emeritus, Philosophy
B.A., Colgate University; Ph.D., Drew University.
Former affiliations: Moravian College; Hamilton
College.
- WALTER L. GOLDFRANK, College Eight (1968)
*Professor Emeritus, Latin American and Latino
Studies and Sociology*
B.A., Harvard College; Certificate in Sociology,
University of Madrid; Ph.D., Columbia University.
Former affiliation: Columbia University.
- QI GONG (2008)
*Assistant Professor, Applied Mathematics and
Statistics*
B.E., University of Science and Technology,
China; M.E., Southeast University, China; Ph.D.,
Case Western Reserve University. Former affilia-
tions: University of Texas at San Antonio; Naval
Postgraduate School.
- JENNIFER A. GONZÁLEZ, Porter College (1997)
Associate Professor, History of Art and Visual Culture
B.A., Yale University; Ph.D., University of
California, Santa Cruz. Former affiliation: Rhode
Island School of Design.
- MARIA VICTORIA GONZÁLEZ-PAGANI (1992)
Senior Lecturer, Spanish Language
B.A., M.A., Universidad Nacional de Tucuman
(Argentina). Former affiliations: Northwestern
University; University of Michigan; University of
Illinois, Chicago.
- DAVID GOODMAN, College Eight (1990)
Professor Emeritus, Environmental Studies
B.Sc., London School of Economics and Political
Science; Ph.D., University of California, Berkeley.
Former affiliations: University College London;
University of Manchester.
- JUNE A. GORDON, College Nine (1996)
Professor, Education
B.A., Stanford University; M.A., Western
Washington University; Ph.D., University of
Washington. Former affiliation: University of
Washington.
- C. ASPEN GORRY (2009)
Assistant Professor, Economics
B.S., Arizona State University; M.A., Ph.D.,
University of Chicago.
- SUSAN GORSKY (2003)
Lecturer, Writing
A.B., Smith College; Ph.D., Case Western Reserve
University.
- DEBORAH B. GOULD (2009)
Assistant Professor, Sociology
Ph.D., University of Chicago. Former affiliation:
University of Pittsburgh.
- SHELLY A. GRABE
Assistant Professor, Psychology
B.A., Michigan State University; Ph.D.,
University of Missouri-Columbia. Former affilia-
tions: University of Washington, University of
Wisconsin-Madison.

- HERMAN S. GRAY, Stevenson College (1991)
Professor, Sociology
B.A., Florida A&M University; M.A., Washington State University; Ph.D., University of California, Santa Cruz. Former affiliation: Northeastern University.
- BARRY L. GREEN (1996)
Lecturer, Music (String Bass)
B.M., Indiana University; M.M., University of Cincinnati, Conservatory of Music. Former affiliations: University of Cincinnati; Indiana University.
- RICHARD "ED" GREEN (2010)
Assistant Professor, Biomolecular Engineering
B.S., University of Georgia, Athens; Ph.D., University of California, Berkeley. Former affiliation: Max Planck Institute for Evolutionary Anthropology, Leipzig, Germany; University of California, Berkeley.
- MARVIN J. GREENBERG, Stevenson College (1967)
Professor Emeritus, Mathematics
B.A., Columbia University; Ph.D., Princeton University. Former affiliations: Rutgers University; University of California, Berkeley; Northeastern University.
- MIRIAM B. GREENBERG, College Ten (2006)
Associate Professor, Sociology
B.A., Eugene Lang College, The New School for Social Research; Ph.D., City University of New York. Former affiliation: Department of Social Science and Cultural Studies, Pratt Institute.
- JODY GREENE, Kresge College (1998)
Associate Professor, Literature and Feminist Studies
B.A., Yale University; M.A., Ph.D., Cornell University. Former affiliations: Cornell University; Hobart and William Smith Colleges.
- RONALD E. GRIESON, Crown College (1980)
Professor Emeritus, Economics
B.A., Queen's College; M.A., Ph.D., University of Rochester. Former affiliations: Massachusetts Institute of Technology; Columbia University; Princeton University.
- GARY B. GRIGGS, College Eight (1968)
Professor, Earth and Planetary Sciences; Director, Institute of Marine Sciences
B.A., University of California, Santa Barbara; Ph.D., Oregon State University. Former affiliation: Oregon State University.
- MARTIN GRISS (2002)
Adjunct Professor, Computer Science
B.S., Technion, Haifa (Israel); M.S., University of Illinois. Former affiliations: Carnegie Mellon University, West.
- KIRSTEN S. GRUESZ, Oakes College (1996)
Professor, Literature
B.A., Swarthmore College; Ph.D., Yale University. Former affiliation: College of William and Mary.
- ISEBILL V. GRUHN, Stevenson College (1969)
Professor Emerita, Politics
B.A., Dickinson College; M.A., Johns Hopkins University; Ph.D., University of California, Berkeley. Former affiliation: Oberlin College.
- Claire X. GU (1997)
Professor, Electrical Engineering
B.S., Fudan University (China); Ph.D., California Institute of Technology. Former affiliations: Pennsylvania State University; Rockwell International Science Center.
- DANIEL E. GUEVARA, Cowell College (1991)
Associate Professor, Philosophy
B.A., California State University, Los Angeles; C.Phil., Ph.D., University of California, Los Angeles.
- PURAGRA (RAJA) GUHA THAKURTA (1994)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., St. Xavier's College (Calcutta, India); M.A., Ph.D., Princeton University.
- IRENE GUSTAFSON, Porter College (2003)
Associate Professor, Film and Digital Media
B.A., Evergreen State College; M.F.A., Northwestern University. Former affiliation: Art Institute of Chicago.
- MATTHEW R. GUTHAUS, Crown College (2006)
Assistant Professor, Computer Engineering
B.S.E., M.S.E., Ph.D., University of Michigan.
- JULIE H. GUTHMAN, College Nine (2003)
Associate Professor, Community Studies
B.A., University of California, Santa Cruz; M.B.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.
- GEY-HONG GWEON (2006)
Assistant Professor, Physics
Ph.D., University of Michigan. Former affiliations: University of California, Berkeley; Lawrence Berkeley National Laboratory.
- MELISSA GWYN, Porter College (2002)
Associate Professor, Art
B.A., Ohio State University; M.F.A., Yale University School of Art. Former affiliation: San Francisco Art Institute.
- LISBETH HAAS, Merrill College (1986)
Professor, History
B.A., University of California, San Diego; Ph.D., University of California, Irvine.
- HOWARD E. HABER, Stevenson College (1982)
Professor, Physics
S.B., S.M., Massachusetts Institute of Technology; Ph.D., University of Michigan.
- JUDITH A. HABICHT MAUCHE, Crown College (1990)
Professor, Anthropology
B.A., College of William and Mary; M.A., Ph.D., Harvard University. Former affiliation: School of American Research (Santa Fe).
- BRENT M. HADDAD, College Eight (1997)
Professor, Environmental Studies
B.A., Stanford University; M.A., Georgetown University; M.B.A., Ph.D., University of California, Berkeley. Former affiliation: Monterey Institute of International Studies.
- STEVEN H. HADDOCK (2005)
Associate Adjunct Professor, Ocean Sciences
Ph.D., University of California, Santa Barbara.
- JAMES B. HALL (1969)
Professor Emeritus, Literature
B.A., M.A., Ph.D., University of Iowa. Former affiliations: Miami University; Cornell University; University of Oregon; University of California, Irvine.
- GILDAS HAMEL, Cowell College (1984)
Lecturer, French Language and Classical Studies
B.A., Université de Haute-Bretagne; Ph.D., University of California, Santa Cruz.
- ROXANNE POWER HAMILTON (2000)
Lecturer, Writing
B.A., University of Colorado; M.F.A., Cornell University.
- PHILLIP L. HAMMACK, College Ten (2007)
Assistant Professor, Psychology
B.A., Georgetown University; M.A., Loyola University; Ph.D. cand., University of Chicago.
- TODD M. HAMMONDS (2008)
Physical Education Instructor
B.S., M.S., Indiana University, Bloomington.
- CRAIG W. HANEY, Stevenson College (1977)
Professor, Psychology
B.A., University of Pennsylvania; M.A., Ph.D., J.D., Stanford University. Former affiliation: Stanford University.
- JORGE HANKAMER, Stevenson College (1980)
Professor, Linguistics
B.A., M.A., Rice University; Ph.D., Yale University. Former affiliation: Harvard University.
- ROBERT W. HANSEN (1977)
Physical Education Instructor
B.S., M.A., San Jose State University.
- HARDY H. HANSON, Porter College (2000)
Professor Emeritus, Art
B.F.A., Yale University. Former affiliations: San Fernando Valley State College; University of Southern California.

- DONNA J. HARAWAY, Oakes College (1980)
Professor, History of Consciousness and Feminist Studies
B.A., Colorado College; M.Phil., Ph.D., Yale University. Former affiliations: University of Hawaii; Johns Hopkins University.
- SUSAN F. HARDING, Porter College (1989)
Professor, Anthropology
B.A., M.A., Ph.D., University of Michigan. Former affiliation: University of Michigan.
- DAVID M. HARRINGTON, Stevenson College (1975)
Associate Professor Emeritus, Psychology
B.A., Macalester College; Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Macalester College.
- GRANT A. HARTZOG (1998)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of California, Berkeley; Ph.D., University of California, San Francisco.
- AMELIE E. HASTIE, Porter College (1999)
Associate Professor, Film and Digital Media
B.A., Brown University; M.A., Ph.D., University of Wisconsin-Milwaukee.
- DAVID HAUSSLER, Crown College (1986)
Professor, Biomolecular Engineering; Director, Institute for Quantitative Biomedical Research
B.A., Connecticut College; M.S., California Polytechnic State University, San Luis Obispo; Ph.D., University of Colorado. Former affiliation: University of Denver.
- JOHN HAY, Porter College (1988)
Professor Emeritus, History of Art and Visual Culture
B.A., Oxford University; Ph.D., Princeton University. Former affiliations: Institute of Fine Arts, New York University; Harvard University.
- SEAN A. HAYES (2007)
Assistant Adjunct Professor, Ocean Sciences
Ph.D., University of California, Santa Cruz.
- BARNEY HAYNES (2009)
Lecturer, Digital Arts and New Media
M.F.A., California College of Arts and Crafts. Concurrent affiliation: California College of the Arts.
- CHARLES W. HEDRICK, JR., Cowell College (1990)
Professor, History
B.A., Pitzer College; M.A., Ph.D., University of Pennsylvania. Former affiliation: State University of New York at Buffalo.
- DAVID P. HELMBOLD, College Eight (1986)
Professor, Computer Science
B.A., University of California, Berkeley; Ph.D., Stanford University.
- MARGO J. HENDRICKS, Cowell College (1990)
Professor Emerita, Literature
B.A., California State University, San Bernardino; M.A., Ph.D., University of California, Riverside. Former affiliation: San Jose State University.
- GAIL B. HERSHATTER, Merrill College (1991)
Professor, History
B.A., Hampshire College; M.A., Ph.D., Stanford University. Former affiliation: Williams College.
- KARLTON E. HESTER, Merrill College (2000)
Associate Professor, Music (Composition, Flute, and Saxophone)
B.M., University of Texas at El Paso; M.M., San Francisco State University; Ph.D., City University of New York Graduate Center. Former affiliation: Cornell University.
- CLEMENS A. HEUSCH, Porter College (1969)
Professor Emeritus, Physics
Diploma, Technical University, Aachen; Ph.D., University of Munich. Former affiliations: California Institute of Technology; DESY, University of Hamburg.
- DEE HIBBERT-JONES, Porter College (2002)
Associate Professor, Art
B.A., London University, London; M.A., Durham University, Durham, England; M.A., York University, York, England; M.F.A., Mills College. Former affiliations: California College of Arts; Mills College.
- HENRY R. HILGARD, Kresge College (1967)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.A., Harvard University; M.D., Stanford University; Ph.D., University of Minnesota. Former affiliations: University of Minnesota; American Heart Association.
- LINDSAY HINCK (1998)
Professor, Molecular, Cell, and Developmental Biology
B.S., Western Washington University; M.S., University of California, Davis; Ph.D., Stanford University.
- RALPH T. HINEGARDNER, Crown College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., Denison University; M.S., University of Southern California; Ph.D., University of Hawaii. Former affiliations: University of Kentucky; Columbia University.
- MIRIAM C. HITCHCOCK (1993)
Lecturer, Art
B.A., University of California, Santa Cruz; M.F.A., Yale University.
- DAVID A. HOFFMAN (1990)
Lecturer, Psychology
B.A., Reed College; M.S., Ph.D., University of Oregon.
- KAREN D. HOLL, College Eight (1995)
Pepper-Giberson Professor, Environmental Studies
B.S., Stanford University; Ph.D., Virginia Polytechnic Institute and State University.
- ELI E. HOLLANDER, Porter College (1974)
Professor, Film and Digital Media
B.S., Juilliard School of Music; M.F.A., University of California, Los Angeles. Former affiliations: Encyclopaedia Britannica Films; Public Broadcasting Television Network (Los Angeles); Churchill Films; New York Philharmonic Orchestra.
- THEODORE R. HOLMAN, Cowell College (1996)
Professor, Chemistry and Biochemistry
B.A., University of California, San Diego; Ph.D., University of Minnesota at Minneapolis. Former affiliations: Harvard Medical School; Syntex Pharmaceuticals; University of California, Riverside.
- CHRISTINE HONG, Cowell College (2009)
Assistant Professor, Literature
B.A., University of California, Los Angeles; Ph.D., University of California, Berkeley.
- EMILY HONIG, Kresge College (1992)
Professor, Feminist Studies and History
B.A., Brown University; M.A., Ph.D., Stanford University. Former affiliations: Yale University; Lafayette College.
- EDWARD F. HOUGHTON, Porter College (1970)
Professor Emeritus, Music
B.A., Rutgers University; M.A., University of Nevada; Ph.D., University of California, Berkeley. Former affiliations: University of California Education Abroad Program (Padua, Venice, Bologna); Rutgers University.
- JEREMY K. HOURIGAN (2006)
Assistant Professor, Earth and Planetary Sciences
B.S., University of Vermont; Ph.D. Stanford University. Former affiliations: Yale University; University of California, Santa Barbara.
- DAVID C. HOY, Cowell College (1981)
Professor Emeritus, Philosophy
B.A., Ph.D., Yale University. Former affiliations: Barnard College; Columbia University; University of California, Los Angeles; Princeton University; Yale University.
- JOCELYN B. HOY, Cowell College (1984)
Lecturer, Philosophy
M.Phil., Ph.D., Yale University. Former affiliation: Rider College.
- MINGHUI HU, College Eight (2005)
Assistant Professor, History
Ph.D., University of California, Los Angeles. Former affiliation: University of Chicago.
- RICHARD P. HUGHEY, Crown College (1991)
Professor, Biomolecular Engineering and Computer Engineering
B.A., B.S., Swarthmore College; Sc.M., Ph.D., Brown University.

- AKASHA HULL, Kresge College (1988)
Professor Emerita, Feminist Studies and Literature
B.A., Southern University; M.A., Ph.D., Purdue University. Former affiliation: University of Delaware.
- FRED A. HUNNICUTT, Porter College (1969)
Professor Emeritus, Art
B.F.A., University of Texas; M.F.A., San Francisco Art Institute. Former affiliations: University of Texas at Arlington; Hornsey College of Art (London); Royal College of Art (London).
- DONNA M. HUNTER, Porter College (1985)
Associate Professor, History of Art and Visual Culture
B.A., Vassar College; M.A., Ph.D., Harvard University. Former affiliation: Harvard University.
- AIDA HURTADO, Stevenson College (1983)
Professor, Psychology
B.A., Pan American University; M.A., Ph.D., University of Michigan, Ann Arbor. Former affiliation: Pan American University.
- HARRY D. HUSKEY (1968)
Professor Emeritus, Computer Science
B.S., University of Idaho; M.S., Ph.D., Ohio State University. Former affiliations: University of California, Berkeley; Institute for Numerical Analysis, National Bureau of Standards; Indian Institute of Technology (Kanpur); Delhi University; University of Pennsylvania; Association for Computing Machinery.
- GRETA K. HUTCHISON (1986)
Lecturer, French
B.A., M.A., University of Oregon, Eugene. Former affiliation: Cabrillo College.
- MICHAEL M. HUTCHISON, Cowell College (1985)
Professor, Economics
B.A., University of California, Santa Cruz; Ph.D., University of Oregon. Former affiliations: Federal Reserve Bank of San Francisco; University of Oregon; Institute for International Economic Studies, University of Stockholm.
- GARTH D. ILLINGWORTH, Crown College (1988)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., University of Western Australia; Ph.D., Australian National University. Former affiliations: Space Telescope Science Institute; University of California, Berkeley; Kitt Peak National Observatory; Johns Hopkins University.
- ROBERT W. IRION (1988)
Senior Lecturer in Science Writing, Program Director
B.S., Massachusetts Institute of Technology; Graduate Certificate, University of California, Santa Cruz.
- MICHAEL S. ISAACSON (2003)
Professor, Electrical Engineering; Narinder Singh Kapany Professor, Optoelectronics
B.S., University of Illinois, Urbana-Champaign; S.M., Ph.D., University of Chicago. Former affiliations: Brookhaven National Laboratory; University of Chicago; Cornell University.
- JOHN W. ISBISTER, Merrill College (1968)
Professor Emeritus, Economics
B.A., Queen's University (Canada); Ph.D., Princeton University.
- JUNKO ITO, Stevenson College (1986)
Professor, Linguistics
B.A., M.A., International Christian University (Tokyo); Ph.D., University of Massachusetts-Amherst.
- KIMBERLY M. JANNARONE, Porter College (2001)
Assistant Professor, Theater Arts
B.A., Emory University; M.F.A., D.F.A., Yale School of Drama. Former affiliations: University of Washington; Smith College; Quinnipiac College.
- VIRGINIA JANSEN, Cowell College (1975)
Professor Emerita, History of Art and Visual Culture
B.A., Smith College; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Santa Clara; Foothill College; Montreal Museum of Fine Arts.
- ARNAV JHALA (2009)
Assistant Professor, Computer Science
B.E., Gujarat University, India; M.S., Ph.D., North Carolina State University, Raleigh. Former affiliation: North Carolina State University, Raleigh.
- ROBERT P. JOHNSON, Merrill College (1991)
Professor, Physics
B.S., University of Kansas; Ph.D., Stanford University. Former affiliations: PPE Division, CERN; University of Wisconsin-Madison.
- BURTON F. JONES, Crown College (1975)
Professor Emeritus, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.S., M.S., Ph.D., University of Chicago.
- CATHERINE A. JONES, Stevenson College (2007)
Assistant Professor, History
B.A., Haverford College; Ph.D., Johns Hopkins University. Former affiliation: Johns Hopkins University.
- DAVID EVAN JONES, Porter College (1988)
Professor, Music; Provost, Porter College
B.A., M.A., Ph.D., University of California, San Diego. Former affiliations: Dartmouth College; University of York (England); University of California, San Diego.
- JOHN O. JORDAN, Kresge College (1968)
Professor, English Literature
B.A., Princeton University; Ph.D., Stanford University.
- MELISSA S. JURICA, Oakes College (2003)
Assistant Professor, Molecular, Cell, and Developmental Biology
B.S., Montana State University; Ph.D., University of Washington, Fred Hutchinson Cancer Research Center. Former affiliation: Brandeis University.
- MICHAEL KAHN, Stevenson College (1970)
Professor Emeritus, Psychology
B.A., M.A., Ph.D., Harvard University. Former affiliations: Harvard University; Yale University; University of Texas.
- GRETCHEN L. KALONJI (2005)
Professor, Electrical Engineering
B.S., Ph.D., Massachusetts Institute of Technology. Former affiliations: University of California, Office of the President; University of Washington; Max Planck Institut, Stuttgart, Germany; Massachusetts Institute of Technology; National Bureau of Standards.
- ROHINTON T. KAMAKAKA (2006)
Associate Professor, Molecular, Cell, and Developmental Biology
B.S., M.S., Poona University; Ph.D., Cambridge University; post-doctoral research, University of California, San Diego and University of California, Berkeley. Former affiliation: National Institutes of Health.
- STACY L. KAMEHIRO, Porter College (2002)
Assistant Professor, History of Art and Visual Culture
B.A., University of California, San Diego; M.A., Ph.D., University of California, Los Angeles. Former affiliation: University of Redlands.
- SHELDON KAMIENIECKI, College Eight (2006)
Professor and Dean of Social Sciences
B.A., M.A., Ph.D., State University of New York at Buffalo. Former affiliation: University of Southern California.
- SUNG-MO (STEVE) KANG (2001)
Adjunct Professor, Electrical Engineering
B.S., Fairleigh Dickinson University; M.S., State University of New York at Buffalo; Ph.D., University of California, Berkeley. Former affiliations: University of Illinois, Urbana-Champaign; Swiss Federal Institute of Technology; University of Karlsruhe; Technical University of Munich.
- KEVIN KARPLUS, Cowell College (1986)
Professor, Biomolecular Engineering
B.S., Michigan State University; M.S., Ph.D., Stanford University. Former affiliation: Cornell University.
- S. PAUL KASHAP, Cowell College (1969)
Professor Emeritus, Philosophy
B.A., M.A., University of Bombay; M.A., Edinburgh University; B.Litt., Oxford University. Former affiliations: Brown University; Wheaton College.
- YONATAN KATZNELSON
Lecturer, Mathematics, Economics, and Applied Mathematics and Statistics
B.Sc., Hebrew University, M.Sc., Ph.D., Stanford University. Former affiliations: Institut des Hautes Etudes Scientifiques, France; University of Maryland, College Park.

- DAVID E. KAUN, Crown College (1966)
Professor, Economics
B.S., Arizona State University; M.A., Claremont Graduate School; Ph.D., Stanford University. Former affiliations: University of Pittsburgh; Brookings Institution.
- ALAN H. KAWAMOTO, Crown College (1986)
Associate Professor, Psychology
B.S., Stanford University; Ph.D., Brown University. Former affiliation: Carnegie Mellon University.
- KATHLEEN M. KAY (2008)
Assistant Professor, Ecology and Evolutionary Biology
B.S., University of California, Davis; Ph.D., Michigan State University. Former affiliations: University of California, Santa Barbara; University of California, Berkeley.
- DAVID L. KEENAN (2000)
Lecturer, Chinese Language
B.A., Dartmouth College; M.A., Ph.D., Harvard University. Former affiliations: Indiana University; Grinnell College; Colby College.
- AL KELLEY, Stevenson College (1966)
Professor Emeritus, Mathematics
B.S., University of Montana; M.A., Ph.D., University of California, Berkeley. Former affiliations: Institute for Advanced Study (Princeton); National Academy of Sciences Exchange Fellowship to the USSR.
- DOUGLAS KELLOGG (1995)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of Wisconsin-Madison; Ph.D., University of California, San Francisco.
- PETER KENEZ, Stevenson College (1966)
Professor, History; Neufeld Levin Professor, Holocaust Studies
B.A., Princeton University; M.A., Ph.D., Harvard University. Former affiliations: Oxford University; Massachusetts Institute of Technology.
- HI KYUNG KIM, Porter College (1992)
Professor, Music
B.A., Seoul National University (Korea); M.A., Ph.D., University of California, Berkeley; D.E.A., IRCAM and Ecole Normale Supérieure (Paris). Concurrent affiliation: Pacific Rim Music Festival. Former affiliation: San Francisco State University.
- L. S. KIM, Porter College (2002)
Associate Professor, Film and Digital Media
B.A., Smith College; M.A., Ph.D., University of California, Los Angeles. Former affiliation: Northwestern University.
- JULIE H. KIMBALL (1983)
Physical Education Instructor
B.A., University of California, Santa Cruz. Former affiliation: Ramani Iyengar Yoga Institute (India).
- JAMES C. KING (2008)
Adjunct Professor, Computer Science
B.A., M.A., Washington State University; Ph.D., Carnegie Mellon University.
- ROBIN Y. KING (1997)
Lecturer, Writing
B.A., M.F.A., University of California, San Diego.
- RUSSELL L. KINGON (2000)
Physical Education Instructor
B.S., Clemson University.
- SHARON A. KINOSHITA, Oakes College (1987)
Professor, Literature
A.B., M.A., Ph.D., University of California, Berkeley. Former affiliation: Stanford University.
- NORMA KLAHN, Merrill College (1989)
Professor, Literature
B.A., M.A., Queens College, City University of New York; Ph.D., State University of New York at Stony Brook. Former affiliation: Columbia University.
- KENNETH M. KLETZER, Stevenson College (1992)
Professor, Economics
B.S., Stanford University; M.S., University of Washington; Ph.D., University of California, Berkeley. Former affiliations: University of California, Davis; Yale University.
- LORI G. KLETZER, Merrill College (1993)
Professor, Economics
B.A., Vassar College; Ph.D., University of California, Berkeley. Former affiliation: Williams College.
- ROBERT KLEVAN (1998)
Lecturer, Music (Wind Ensemble)
B.M., M.M., University of the Pacific; Ph.D., University of Texas at Austin. Concurrent affiliation: Monterey Peninsula College.
- DAVID S. KLIGER, Oakes College (1971)
Professor, Chemistry and Biochemistry; Campus Provost and Executive Vice Chancellor
B.S., Rutgers University; Ph.D., Cornell University. Former affiliation: Harvard University.
- ELISE KNITTLE, Kresge College (1988)
Professor, Earth and Planetary Sciences
A.B., Smith College; Ph.D., University of California, Berkeley.
- NOBUHIKO P. KOBAYASHI (2007)
Associate Professor, Electrical Engineering
B.S., Aoyama Gakuin University, Japan; M.S., Ph.D., University of California, Los Angeles. Former affiliations: Hewlett-Packard; University of California, Berkeley.
- PAUL L. KOCH, Crown College (1996)
Professor, Earth and Planetary Sciences
B.A., University of Rochester; M.S., Ph.D., University of Michigan. Former affiliations: Smithsonian Institution; Carnegie Institution of Washington; Princeton University.
- PHOKION KOLAITIS, College Eight (1988)
Professor, Computer Science
Diploma, University of Athens; M.A., Ph.D., University of California, Los Angeles. Former affiliations: Stanford University; Occidental College; University of Chicago.
- JOSEPH P. KONOPELSKI, Stevenson College (1984)
Professor, Chemistry and Biochemistry
B.A., M.A., Johns Hopkins University; Ph.D., Stanford University. Former affiliations: Université Louis Pasteur (Strasbourg); University of Pennsylvania.
- DAVID C. KOO, College Eight (1988)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
A.B., Cornell University; M.A., Ph.D., University of California, Berkeley. Former affiliation: Space Telescope Science Institute.
- ATHANASIOS KOTTAS (2002)
Associate Professor, Applied Mathematics and Statistics
B.Sc., M.Sc., University of Ioannina (Greece); Ph.D., University of Connecticut. Former affiliation: Duke University.
- ROBERT P. KRAFT, Stevenson College (1967)
Professor Emeritus, Astronomy and Astrophysics; Astronomer Emeritus, UC Observatories/Lick Observatory
B.S., M.S., University of Washington; Ph.D., University of California, Berkeley.
- MARK KRUMHOLZ (2008)
Assistant Professor, Astronomy and Astrophysics
B.A., Princeton University; M.A., Ph.D., University of California, Berkeley.
- NANCY KRUSOE (2002)
Lecturer, Crown College Writing Coordinator, Writing
B.A., Georgia State University, Atlanta; M.A., California State University Northridge. Former affiliation: California State University, Northridge.
- JOEL A. KUBBY (2005)
Associate Professor, Electrical Engineering
B.A., University of California, Berkeley; M.S., Ph.D., Cornell University. Former affiliation: Xerox Corporation.
- RAPHAEL M. KUDELA (1999)
Professor, Ocean Sciences
B.S., Drake University; Ph.D., University of Southern California. Concurrent affiliation: Monterey Bay Aquarium Research Institute.
- SRI H. KURNIAWAN (2007)
Assistant Professor, Computer Engineering
B.S., Satya Wacana University; M.S., Hong Kong University of Science and Technology; Ph.D., Wayne State University. Former affiliation: University of Manchester.

- FREDERICK H. KUTTNER (1996)
Lecturer, Physics
B.S., Massachusetts Institute of Technology; M.B.A., Santa Clara University; M.S., Ph.D., University of California, Santa Cruz. Former affiliations: Litton Industries; Northwestern Polytechnic University.
- WILLIAM A. LADUSAW, Cowell College (1984)
Professor, Linguistics; Dean, Humanities
B.A., University of Kentucky; M.A., Ph.D., University of Texas at Austin. Former affiliations: University of Connecticut; University of California, Los Angeles; University of Iowa.
- EDWARD M. LANDESMAN, Crown College (1966)
Professor Emeritus, Mathematics
B.A., M.A., Ph.D., University of California, Los Angeles. Former affiliation: University of California, Los Angeles.
- GLEN G. LANGDON (1987)
Professor Emeritus, Computer Engineering
B.S., Washington State University; M.S., University of Pittsburgh; Ph.D., Syracuse University. Former affiliations: IBM Research; University of São Paulo.
- JEAN H. LANGENHEIM, Stevenson College (1966)
Professor Emerita, Ecology and Evolutionary Biology
B.S., University of Tulsa; M.S., Ph.D., University of Minnesota. Former affiliations: Harvard University; University of California, Berkeley; University of Illinois, Urbana-Champaign; San Francisco College for Women; Mills College.
- REGINA D. LANGHOUT (2006)
Associate Professor, Psychology
B.A., University of California, Santa Cruz; A.M., Ph.D., University of Illinois. Former affiliations: Wesleyan University; University of San Diego.
- LEO F. LAPORTE, Crown College (1971)
Professor Emeritus, Earth and Planetary Sciences
B.A., Ph.D., Columbia University. Former affiliation: Brown University.
- BRUCE D. LARKIN, Cowell College (1965)
Professor Emeritus, Politics
B.A., University of Chicago; M.A., Ph.D., Harvard University.
- TRACY LARRABEE, College Eight (1990)
Professor, Computer Engineering
B.S., California Institute of Technology; M.S., Ph.D., Stanford University. Former affiliations: Hewlett-Packard Laboratories; Xerox PARC; Digital Equipment Corporation.
- MATTHEW LASAR (2003)
Lecturer, History
Ph.D., Claremont Graduate University. Former affiliation: University of California, Riverside.
- KIMBERLY J. LAU (2006)
Professor, American Studies; Provost, Oakes College
B.A., M.L.I.S., University of California, Berkeley; Ph.D., University of Pennsylvania. Former Affiliation: University of Utah.
- GREGORY P. LAUGHLIN (2001)
Associate Professor, Astronomy and Astrophysics
B.S., University of Illinois, Urbana-Champaign; M.S., Ph.D., University of California, Santa Cruz. Former affiliation: NASA Ames Research Center.
- KENNETH LAWS (2008)
Assistant Adjunct Professor, Electrical Engineering
B.S., San Francisco State University; M.S., Ph.D., University of California, Santa Cruz. Former affiliation: University of Michigan.
- THORNE LAY, Porter College (1989)
Professor, Earth and Planetary Sciences
B.S., University of Rochester; M.S., Ph.D., California Institute of Technology. Former affiliations: University of Michigan, Ann Arbor; California Institute of Technology.
- JOHN JOTA LEAÑOS (2009)
Assistant Professor, Social Documentation
M.F.A., San Francisco State University. Former affiliations: California College of the Arts; Arizona State University.
- CAMPBELL LEAPER, Cowell College (1988)
Professor, Psychology
B.A., Boston University; M.A., Ph.D., University of California, Los Angeles. Former affiliations: Harvard Medical School; California State University, Northridge; California State University, Long Beach.
- BURNEY J. LEBOEUF, Crown College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., University of California, Berkeley; M.A., San Francisco State College; Ph.D., University of California, Berkeley. Former affiliations: University of California, Davis; Harvard University.
- HERBERT K. LEE, College Nine (2002)
Professor, Applied Mathematics and Statistics
B.S., Yale University; M.S., Ph.D., Carnegie Mellon University. Former affiliation: Duke University.
- JIMIN LEE, Porter College (2003)
Associate Professor, Art
B.F.A., M.F.A., Seoul National University (Korea); M.F.A., San Francisco Art Institute. Former affiliation: California State University, Hayward.
- H. MARSHALL LEICESTER, JR., Cowell College (1967)
Professor, English Literature
B.A., M.A., Ph.D., Yale University. Former affiliation: Yale University.
- ANATOLE LEIKIN, Porter College (1989)
Professor, Music
B.A., Gnesin State Conservatory (Moscow); M.A., Gnesin State Musical and Pedagogical Institute (Moscow); Ph.D., University of California, Los Angeles. Former affiliations: Gnesin State Conservatory; University of California, Los Angeles.
- DEBORAH K. LETOURNEAU, College Eight (1984)
Professor, Ecology (Environmental Studies)
B.S., M.S., University of Michigan; Ph.D., University of California, Berkeley.
- BRUCE C. LEVINE (1997)
Professor Emeritus, History
B.A., University of Michigan, Ann Arbor; M.A., Ph.D., University of Rochester. Former affiliation: University of Cincinnati.
- ROBERT A. LEVINSON, Stevenson College (1985)
Professor, Computer Science
B.S., University of Minnesota at Minneapolis-St. Paul; Ph.D., University of Texas at Austin. Former affiliations: University of Texas at Austin; University of Minnesota.
- DANIELLE LEWIS (2002)
Physical Education Instructor
B.S., Rutgers University; M.S., Oregon State University.
- DEBRA K. LEWIS, Crown College (1991)
Professor, Mathematics
B.A., Ph.D., University of California, Berkeley. Former affiliation: University of Minnesota.
- DIANE K. LEWIS (1972)
Professor Emerita, Anthropology
B.A., M.A., University of California, Los Angeles; M.P.H., University of California, Berkeley; Ph.D., Cornell University. Former affiliations: University of California, Santa Barbara; University of California, Riverside; San Francisco State University.
- YAT LI, Crown College (2007)
Assistant Professor, Chemistry
B.Sc., University of Hong Kong; Ph.D., University of Hong Kong.
- FREDRIC LIEBERMAN, Porter College (1983)
Professor, Music
B.M., Eastman School of Music; M.A., University of Hawaii; Ph.D., University of California, Los Angeles. Former affiliations: Brown University; University of Washington.
- PETER E. LIMBRICK, Porter College (2001)
Associate Professor, Film and Digital Media
B.A., M.A., University of Otago (New Zealand); Ph.D., La Trobe University (Australia). Former affiliations: Duke University; Stanford University; University of California, Berkeley.
- DOUGLAS N. LIN, Crown College (1979)
Professor, Astronomy and Astrophysics
B.S., McGill University; Ph.D., Cambridge University. Former affiliation: Harvard University.
- DANIEL T. LINGER, Stevenson College (1983)
Professor Emeritus, Anthropology
B.A., University of Michigan; M.A., Ph.D., University of California, San Diego. Former affiliation: University of California, San Diego.

- ROGER G. LININGTON, Crown College (2007)
Assistant Professor, Chemistry and Biochemistry
B.Sc., University of Leeds, United Kingdom;
Ph.D., University of British Columbia, Canada.
- RONNIE D. LIPSCHUTZ, Stevenson College (1990)
Professor, Politics
B.A., B.S., University of Texas at Austin; M.S.,
Massachusetts Institute of Technology; Ph.D.,
University of California, Berkeley.
- ALAN M. LITKE (1984)
Adjunct Professor, Physics
B.A., Johns Hopkins University; M.A., Ph.D.,
Harvard University.
- WENTAI LIU (2003)
Professor, Electrical Engineering
B.S., National Chiao-Tung University; M.S.,
National Taiwan University; Ph.D., University of
Michigan, Ann Arbor. Former affiliation: North
Carolina State University, Raleigh.
- NORMAN LOCKS, Porter College (1977)
Professor, Art
B.F.A., San Francisco Art Institute; M.A., San
Francisco State University.
- SURESH K. LODHA, Porter College (1992)
Professor, Computer Science
M.Sc., Indian Institute of Technology (Kanpur);
M.A., University of California, Berkeley; Ph.D.,
Rice University. Former affiliation: IBM.
- MICHAEL E. LOIK (1998)
Associate Professor, Environmental Studies
B.Sc., M.Sc., University of Toronto; Ph.D.
University of California, Los Angeles. Former
affiliations: University of California, Berkeley;
California State University, San Bernardino.
- ROBERT S. LOKEY (2002)
Assistant Professor, Chemistry and Biochemistry
B.S., Trinity University (San Antonio); Ph.D.,
University of Texas at Austin.
- AMY J. LONETREE, Oakes College (2007)
Assistant Professor, American Studies
B.A., University of Minnesota; M.A., University
of Chicago; M.A., Indiana University; Ph.D.,
University of California, Berkeley.
- DARRELL D. LONG, Crown College (1988)
Professor, Computer Science
B.S., San Diego State University; M.S., Ph.D.,
University of California, San Diego.
- CHARLES L. (CHIP) LORD, Porter College (1987)
Professor, Film and Digital Media
B.A., M.Arch., Tulane University. Former affilia-
tion: University of California, San Diego.
- MURRAY K. LOW (2008)
Lecturer, Music, (Jazz Theory)
B.S.E.E., University of California, Berkeley.
Former affiliations: Stanford University, University
of California, Berkeley.
- TODD M. LOWE (2001)
Associate Professor, Biomolecular Engineering
B.A., Williams College; Ph.D., Washington
University.
- FLORA E. LU, Merrill College (2008)
*Assistant Professor, Latin American and Latino
Studies*
A.B., Stanford University; Ph.D., University of
North Carolina at Chapel Hill. Former affilia-
tions: University of North Carolina at Chapel
Hill; Stanford University.
- PAUL M. LUBECK, College Eight (1973)
Professor, Sociology
B.A., St. Michael's College; M.A., Ph.D.,
Certificate in African Studies, Northwestern
University.
- ROBERT A. LUDWIG, Crown College (1979)
*Professor, Molecular, Cell, and Developmental
Biology*
B.S., University of Michigan; Ph.D., Yale
University. Former affiliation: Massachusetts
Institute of Technology.
- BRIJ LUNINE (2000)
Lecturer, Writing
Ph.D., University of New Mexico. Former affilia-
tion: Georgiana Bruce Kirby Preparatory School.
- IRENE E. LUSZTIG, Porter College (2008)
Assistant Professor, Film and Digital Media
B.A., Harvard University; M.F.A., Bard College.
Former affiliations: Harvard University; State
University of New York at Purchase; Temple
University.
- BORETH J. LY, Porter College (2008)
Assistant Professor, History of Art and Visual Culture
B.A., Bates College, Lewiston, Maine; Ph.D.,
University of California, Berkeley.
- JOHN P. LYNCH, Cowell College (1970)
Professor Emeritus, Classics (Literature)
B.A., Harvard College; M.A., M.Phil., Ph.D., Yale
University.
- JENNIFER K. LYNN (2010)
Lecturer, Greek and Latin Language
A.B., Ph.D., Columbia University. Former affilia-
tions: The Hotchkiss School, The Berkeley Carroll
School, Oberlin College, Princeton University,
Columbia University.
- BRUCE E. LYON (1997)
Professor, Ecology and Evolutionary Biology
B.Sc., McGill University; M.Sc., Queen's
University; Ph.D., Princeton University.
- R. BRUCE MACFARLANE (2005)
Adjunct Professor, Ecology and Evolutionary Biology
B.S., Pennsylvania State University; M.S.,
Ph.D., Florida State University. Former
affiliation: National Oceanic and Atmospheric
Administration (NOAA).
- PAVEL MACHOTKA, Porter College (1970)
Professor Emeritus, Psychology
B.A., University of Chicago; M.A., Ph.D.,
Harvard University; (Hon.) Dr. h. c., Charles
University (Prague). Former affiliations: Harvard
University; University of Colorado.
- NATHANIEL E. MACKEY, Kresge College (1979)
Professor, Literature
B.A., Princeton University; Ph.D., Stanford
University. Former affiliations: University of
Southern California; University of Wisconsin-
Madison.
- WESLEY F. MACKEY (1993)
Lecturer, Computer Science
B.S., M.S., Ph.D., University of Manitoba.
- PIERO MADAU (2000)
Professor, Astronomy and Astrophysics
B.S., University of Florence; Ph.D., International
School for Advanced Studies (Trieste). Former
affiliation: Cambridge University.
- PATRICE MAGINNIS, Cowell College (1986)
Lecturer, Music (Voice)
B.A., M.A., San Jose State University. Former
affiliations: San Jose State University; De Anza
College; Opera San Jose.
- ROY T. MALAN (1980)
Lecturer, Music (Violin and Viola)
Diplomas, Royal Academy of Music, Juilliard
School of Music, and Curtis Institute of Music.
Concurrent affiliations: San Francisco Ballet
Orchestra; San Francisco Contemporary Music
Players; Telluride Chamber Music Festival; Rocky
Ridge Music Center. Former affiliations: Ithaca
College; San Francisco Conservatory of Music;
San Francisco State University; University of
Nevada at Reno; Stanford University.
- CARLOS G. MALTZAHN (2006)
Assistant Adjunct Professor, Computer Science
Ph.D., Computer Science, University of Colorado
at Boulder; Diplom-Informatiker, University of
Passau, Germany. Former Affiliations: NetApp;
Digital Equipment Corporation.
- ROBERTO MANDUCHI (2001)
Associate Professor, Computer Engineering
Laurea, Dottorato di ricerca, University of Padova
(Italy). Former affiliation: University of Southern
California.
- MARC S. MANGEL, Stevenson College (1996)
Professor, Information Systems Management
B.S., M.S., University of Illinois; Ph.D.,
University of British Columbia. Former affilia-
tions: University of California, Davis; Simon
Fraser University; University of Oxford; Hebrew
University of Jerusalem; Weizmann Institute of
Science.

- PATRICK E. MANTEY, Merrill College (1984)
Jack Baskin Professor, Computer Engineering
B.S., University of Notre Dame; M.S., University of Wisconsin; Ph.D., Stanford University. Former affiliations: Stanford University; IBM Research.
- JOHN A. MARCUM, Merrill College (1969)
Professor Emeritus, Politics; Universitywide Director, Education Abroad Program, University of California, Santa Barbara
B.A., Stanford University; M.A., Columbia University; Ph.D., Stanford University. Former affiliations: Colgate University; Lincoln University; University of Pennsylvania; University of Denver.
- BRUCE H. MARGON, Crown College (2006)
Professor of Astronomy and Astrophysics; Vice Chancellor, Research
A.B., Columbia University; M.S., Ph.D., University of California, Berkeley. Former affiliation: Space Telescope Science Institute.
- BALDO B. MARINOVIC (1996)
Lecturer
Ph.D., University of Western Australia.
- JUSTIN MARION (2005)
Assistant Professor, Economics
B.B.A., B.S., Southern Methodist University; Ph.D., University of Chicago. Former affiliation: University of Chicago.
- DAVID S. MARRIOTT, Oakes College (2003)
Associate Professor, History of Consciousness
B.A. (Hons., 1st class), M.A., Ph.D., University of Sussex. Former affiliation: University of London.
- GEORGE E. MARSH (1982)
Lecturer, Music (Percussion)
Concurrent affiliation: Sonoma State University. Former affiliation: San Francisco Conservatory.
- ALMA R. MARTINEZ, Kresge College (2001)
Professor Emerita, Theater Arts (Acting)
B.A., Whittier College; M.F.A., University of Southern California; Ph.D., Stanford University. Former affiliations: Aquarius Theater; El Teatro Campesino; Universal Studios.
- LOURDES MÁRTINEZ-ECHAZÁBAL, Merrill College (1990)
Associate Professor, Latin American Literature; Provost, Merrill College
B.A., M.A., Ph.D., University of California, San Diego. Former affiliation: Rutgers University.
- PRADIP MASCHARAK, Oakes College (1984)
Professor, Chemistry and Biochemistry
B.S., M.S., University of Burdwan (India); Ph.D., Indian Institute of Technology (Kanpur). Former affiliations: Stanford University; Massachusetts Institute of Technology.
- GEOFFREY MASON, Kresge College (1973)
Professor, Mathematics
B.Sc., University of London; M.S., Ph.D., University of Illinois, Chicago.
- DOMINIC W. MASSARO, Porter College (1979)
Professor Emeritus, Psychology
B.A., University of California, Los Angeles; M.A., Ph.D., University of Massachusetts. Former affiliation: University of Wisconsin.
- MARK FATHI MASSOUD, Merrill College (2009)
Assistant Professor, Politics
B.A., M.A., University of Notre Dame; Ph.D., University of California, Berkeley. Former affiliation: Stanford University.
- TERRY MAST (2006)
Research Astronomer, Astronomy and Astrophysics
B.S., California Institute of Technology; Ph.D., University of California, Berkeley.
- MICHAEL J. MATEAS (2006)
Associate Professor, Computer Science
B.S., University of the Pacific; M.S., Portland State University; Ph.D., Carnegie Mellon University. Former affiliation: The Georgia Institute of Technology.
- RICHARD S. MATHER, Cowell College (1965)
Professor Emeritus, History
B.A., M.A., Ph.D., University of California, Berkeley.
- ANDREW S. MATHEWS, College Eight (2007)
Assistant Professor, Anthropology
B.Sc.; M.Sc., M.Phil., Ph.D., Florida International University.
- WILLIAM G. MATHEWS, Porter College (1970)
Professor Emeritus, Astronomy and Astrophysics
B.S., University of Washington; M.S., University of Chicago; Ph.D., University of California, Berkeley. Former affiliation: University of California, San Diego.
- DEAN P. MATHIOWETZ, Merrill College (2003)
Assistant Professor, Politics
B.A., University of Minnesota; M.A., Ph.D., University of California, Berkeley.
- CLAIRE E. MAX (1999)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
A.B., Harvard University; Ph.D., Princeton University.
- MELANIE J. MAYER, Cowell College (1972)
Professor Emerita, Psychology
A.B., Cornell University; M.A., University of Wisconsin-Madison; Ph.D., University of California, San Diego.
- PHILLIP MCCALMAN, Crown College (1999)
Associate Professor, Economics
B.Comm., M.Comm., University of Melbourne; Ph.D., University of Wisconsin-Madison. Former affiliation: Australian National University.
- MATTHEW D. MCCARTHY (2001)
Assistant Professor, Ocean Sciences
B.S., University of California, San Diego; Ph.D., University of Washington. Former affiliation: Carnegie Institution of Washington; University of Hawaii.
- DOUGLAS E. MCCLELLAN, Porter College (1970)
Professor Emeritus, Art
M.F.A., Claremont Graduate School. Former affiliations: Chaffey College; Otis Art Institute; Scripps College; Claremont Graduate School.
- JAMES MCCLOSKEY, Stevenson College (1988)
Professor, Linguistics
B.A., University College Dublin; Ph.D., University of Texas at Austin. Former affiliations: University College Dublin; Dublin Institute for Advanced Studies; University of Texas at Austin.
- JENNIE L. MCDADE, Porter College (1987)
Professor Emerita, Art
B.F.A., University of Southern Mississippi; M.F.A., University of Georgia.
- CHARLES E. McDOWELL, Porter College (1985)
Professor, Computer Science
B.S., California Polytechnic State University, San Luis Obispo; M.S., Ph.D., University of California, San Diego. Former affiliations: University of California, San Diego; Lawrence Livermore National Laboratory; Digital Equipment Corporation.
- DENNIS C. McELRATH, Stevenson College (1965)
Professor Emeritus, Sociology
B.A., University of California, Santa Barbara; M.A., University of California, Los Angeles; Ph.D., Yale University. Former affiliations: University of Southern California; Northwestern University; University of California Education Abroad Program (Padua).
- GRANT L. MCGUIRE, Stevenson College (2009)
Assistant Professor, Linguistics
B.A., University of Illinois, Urbana-Champaign; M.A., Ph.D., Ohio State University. Former affiliation: University of California, Berkeley.
- STEVEN MCKAY, College Nine (2007)
Associate Professor, Sociology
B.A., University of California, Berkeley; M.A., Ph.D., University of Wisconsin-Madison.
- PATRICK M. MCKERCHER, College Eight (1995)
Lecturer, Writing
B.A., M.A., San Diego State University; Ph.D., University of British Columbia.
- BARRY S. McLAUGHLIN, Merrill College (1966)
Professor Emeritus, Psychology
B.A., M.S., St. Louis University; Ph.D., Harvard University. Former affiliation: University of California Education Abroad Program (Göttingen).

- KENNETH MCLAUGHLIN (2008)
Lecturer in Science Writing, Science Communication
B.A., State University of New York at Albany;
M.A., Stanford University.
- KAREN C. McNALLY, Kresge College (1981)
Professor Emerita, Earth and Planetary Sciences
B.A., M.A., Ph.D., University of California,
Berkeley. Former affiliation: California Institute
of Technology.
- MARTHA MENDOZA (2002)
Lecturer in Science Writing
B.A., Universal Technical Institute, Phoenix.
- RITA MEHTA (2010)
*Assistant Professor, Ecology and Evolutionary
Biology*
B.S., B.A., University of California, Berkeley;
M.S., University of Texas, Tyler; Ph.D.,
University of Tennessee, Knoxville. Former affilia-
tion: University of California, Davis.
- TANYA H. MERCHANT, Porter College (2007)
Assistant Professor, Music
B.M., The Peabody Institute's Conservatory,
Johns Hopkins University; M.Mus., Goldsmiths
College, University of London; Ph.D., University
of California, Los Angeles.
- R. ARMIN MESTER, Stevenson College (1989)
Professor, Linguistics
Staatsexamen, University of Göttingen
(Germany); Ph.D., University of Massachusetts-
Amherst.
- KATHRYN E. METZ, Porter College (1971)
Professor Emerita, Art
B.F.A., Bowling Green State University; M.A.,
University of California, Los Angeles. Former
affiliations: New York University; College of St.
Benedict; St. John's University.
- JACOB B. MICHAELSEN, Crown College (1965)
Professor Emeritus, Economics
B.A., M.B.A., Ph.D., University of Chicago.
Former affiliation: University of California, Berkeley.
- EDWARD T. MIGLIORE (1986)
Lecturer, Mathematics
B.A., Rutgers University; M.A., Ph.D., University
of California, Santa Cruz. Former affiliation:
Monterey Peninsula College.
- PEYMAN MILANFAR (1999)
Professor, Electrical Engineering
B.S., University of California, Berkeley;
Ph.D., Massachusetts Institute of Technology.
Former affiliation: Stanford Research Institute
International.
- GARY B. MILES, Cowell College (1971)
Professor Emeritus, History
B.A., Colby College; M.A., Harvard University;
Ph.D., Yale University. Former affiliations:
Phillips Academy; Wesleyan University;
University of Texas.
- ETHAN L. MILLER, Crown College (2000)
Professor, Computer Science
Sc.B., Brown University; M.S., Ph.D., University
of California, Berkeley. Former affiliation:
University of Maryland, Baltimore County.
- JOSEPH S. MILLER, Crown College (1967)
*Professor Emeritus, Astronomy and Astrophysics;
Astronomer, UC Observatories/Lick Observatory*
B.A., University of California, Los Angeles; M.S.,
Ph.D., University of Wisconsin.
- LETA E. MILLER, Porter College (1978)
Professor, Music (Music History and Flute)
B.A., Stanford University; M.Mus., Hartt College
of Music, University of Hartford; Ph.D., Stanford
University. Former affiliations: Foothill College;
Hartt College of Music.
- MARY K. MILLER
Lecturer in Science Writing
B.A., University of California, Santa Cruz.
- TYRUS H. MILLER, Cowell College (1999)
*Professor, Literature; Vice Provost and Dean,
Graduate Studies*
B.A., M.A., M.A., Johns Hopkins University;
Ph.D., Stanford University.
- GLENN L. MILLHAUSER, Cowell College (1988)
Professor, Chemistry and Biochemistry
B.S., California State University, Los Angeles;
M.S., Ph.D., Cornell University.
- MARCIA MILLMAN, Stevenson College (1971)
Professor, Sociology
B.A., Ph.D., Brandeis University.
- DEJAN MILUTINOVIC (2009)
*Assistant Professor, Applied Mathematics and
Statistics*
Diplom-Ingenieur and M.S., University of
Belgrade, Yugoslavia; Ph.D., Technical University
of Lisbon, Portugal. Former affiliations: Army
Research Office; Duke University; Utrecht
University, The Netherlands.
- NATALIO MINGO (2007)
Associate Adjunct Professor, Electrical Engineering
M.S., Ph.D., Universidad Autonoma de Madrid.
Former affiliations: CEA-Grenoble; Himeji
Institute of Technology.
- PATRICIA L. MITCHELL (2002)
Lecturer, Music (Oboe)
B.M., San Jose State University.
- RICHARD R. MITCHELL (1983)
Lecturer, Mathematics
B.A., M.A., Ph.D., University of California,
Santa Cruz.
- HELENE MOGLEN, Kresge College (1978)
Professor Emerita, Literature
B.A., Bryn Mawr College; M.A., Ph.D., Yale
University. Former affiliations: State University of
New York at Purchase; New York University.
- KIVIE MOLDAVE (1984)
*Professor Emeritus, Molecular, Cell, and
Developmental Biology*
B.A., University of California, Berkeley; M.S.,
Ph.D., University of Southern California. Former
affiliations: Tufts University; University of
Pittsburgh; University of California, Irvine.
- J. CAMERON MONROE (2006)
Assistant Professor, Anthropology
Ph.D., University of California, Los Angeles.
Former affiliation: Washington University, St.
Louis.
- RICHARD MONTGOMERY, Crown College (1990)
Professor, Mathematics
B.A., Sonoma State University; Ph.D., University
of California, Berkeley. Former affiliation:
Massachusetts Institute of Technology.
- MEGAN C. MOODIE (2009)
Assistant Professor, Anthropology
B.A., Skidmore College; Ph.D., University of
California, Santa Cruz.
- ANDREW M. MOORE, Oakes College (2006)
Professor, Ocean Sciences
D.Phil., University of Oxford, England. Former
affiliation: University of Colorado.
- J. CASEY MOORE, Crown College (1970)
Professor Emeritus, Earth and Planetary Sciences
B.A., University of California, Santa Barbara;
Ph.D., Princeton University.
- JONATHAN W. MOORE (2008)
Assistant Professor, Ecology and Evolutionary Biology
B.A., Carleton College; Ph.D., University of
Washington. Former affiliation: National Marine
Fisheries Service.
- MADLINE R. MOORE, Kresge College (1972)
Professor Emerita, English Literature
B.S., Ph.D., University of Texas at Austin. Former
affiliation: University of Texas at Austin.
- CYNTHIA A. MORI (1983)
Physical Education Instructor
B.A., M.A., California State University, Long
Beach. Former affiliation: Saddleback College.
- EUGENE MORIARTY (2006)
Visiting Professor, Computer Engineering
B.S., M.S., University of Illinois; Ph.D., Illinois
Institute of Technology. Former affiliation: San
Jose State University.
- MARIA D. MORRIS, Merrill College (1989)
Lecturer, Spanish Language
B.A., Santa Clara University; M.A., University of
Texas. Former affiliations: Santa Clara University;
Cabrillo College.
- ROBIN D. MORRIS (2008)
*Associate Adjunct Professor, Applied Mathematics
and Statistics*
M.A., Ph.D., Cambridge University. Former affil-
iation: Universities Space Research Association.

- MARGARET E. MORSE, Porter College (1991)
Professor, Film and Digital Media
B.A., Humboldt State University; M.A., Ph.D.,
University of California, Berkeley. Former affilia-
tions: San Francisco State University; University of
San Francisco; University of Southern California.
- JUDIT N. MOSCHKOVICH, Crown College (1999)
Associate Professor, Education
B.S., University of Minnesota; M.A., Ph.D.,
University of California, Berkeley. Former
affiliations: TORC, Cambridge, Massachusetts;
Institute for Research on Learning, Menlo Park,
California.
- EDUARDO MOSQUEDA, College Ten (2007)
Assistant Professor, Education
B.A., University of California Irvine; Ed., M.,
Ed.D., Harvard Graduate School of Education.
- PETER H. MOSTKOFF, Porter College (1999)
Assistant Professor, Theater Arts
B.A., Sarah Lawrence College; M.A., Ph.D.,
University of California, Berkeley.
- GORDON MUMMA, Porter College (1973)
Professor Emeritus, Music
Former affiliations: Cursos Latinoamericanos de
Musica Contemporanea; Mills College; University
of California, San Diego; Merce Cunningham
Dance Company; Sonic Arts Union; University
of Illinois.
- DEREK C. MURRAY (2007)
Assistant Professor, History of Art and Visual Culture
B.F.A., Art Center College of Design; M.A.,
California State University, Los Angeles; M.A.,
Ph.D., Cornell University. Former affiliation:
University of South Florida; University of
California, Berkeley.
- JOHN T. MUSACCHIO (2004)
*Associate Professor, Information Systems
Management*
B.S., Ohio State University; M.S., Ph.D.,
University of California, Berkeley. Former affilia-
tion: TerraBlaze, Inc.
- KIM I. MUSCH (1998)
Physical Education Instructor
A.B., University of California, Berkeley; M.A.,
San Jose State University. Former affiliations:
University of California, Berkeley; Chabot
College; Ohlone College.
- PEGGY B. MUSGRAVE, Crown College (1980)
Professor Emerita, Economics
B.A., M.A., American University; Ph.D.,
Johns Hopkins University. Former affiliations:
Northeastern University; University of California,
Berkeley; Vassar College.
- OLGA NÁJERA RAMÍREZ, Merrill College (1989)
Professor, Anthropology
B.A., University of California, Santa Cruz; M.A.,
Ph.D., University of Texas at Austin.
- ONUTTOM NARAYAN, College Eight (1995)
Professor, Physics
M.Sc., Indian Institute of Technology; M.A.,
Ph.D., Princeton University. Former affiliation:
Harvard University.
- MICHAEL NAUENBERG, Crown College (1966)
Professor Emeritus, Physics
B.S., Massachusetts Institute of Technology;
Ph.D., Cornell University. Former affiliations:
Columbia University; Stanford Linear Accelerator
Center.
- PAUL NAUERT, Porter College (1996)
Professor, Music
B.M., Eastman School of Music; M.A., Ph.D.,
Columbia University.
- MARTA A. NAVARRO (1990)
Lecturer, Spanish Language
B.A., M.A., University of California, Berkeley.
- JERRY E. NELSON (1994)
*Professor, Astronomy and Astrophysics; Astronomer,
UC Observatories/Lick Observatory*
B.S., California Institute of Technology; Ph.D.,
University of California, Berkeley. Former affilia-
tion: University of California, Berkeley.
- JEROME NEU, Cowell College (1972)
Professor, Humanities
B.A., Princeton University; D.Phil., Oxford
University.
- DARD A. NEUMAN, Porter College (2004)
*Assistant Professor, Music; Kamil and Talat Hasan
Endowed Chair in Classical Indian Music*
B.A., University of Washington, Amherst;
M.Phil., Ph.D., Columbia University. Former
affiliation: Columbia University.
- A. TODD NEWBERRY, Cowell College (1965)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., Princeton University; Ph.D., Stanford
University.
- ELLEN S. NEWBERRY (1997)
Lecturer, Writing
B.A., Brown University; M.A., San Francisco State
University. Former affiliations: De Anza College;
Evergreen Valley College.
- WILLIAM S. NICKELL (1999)
Lecturer, Russian Language
B.A., Washington University; M.A., Ph.D.,
University of California, Berkeley.
- PAUL L. NIEBANCK (1973)
*Professor Emeritus, Environmental Planning
(Environmental Studies)*
A.B., Johns Hopkins University; M.C.P., Ph.D.,
University of Pennsylvania. Former affiliations:
University of Pennsylvania; U.S. Department of
Health, Education and Welfare.
- JASON A. NIELSEN (2006)
Assistant Professor, Physics
B.S., Iowa State University; Ph.D., University of
Wisconsin-Madison. Former affiliation: Lawrence
Berkeley National Laboratory.
- FRANCIS NIMMO (2005)
Associate Professor, Earth and Planetary Sciences
B.A., Ph.D., Cambridge University. Former affilia-
tions: University College, London; University of
California, Los Angeles.
- HARRY F. NOLLER, Crown College (1968)
*Robert L. Sinsheimer Professor, Molecular, Cell, and
Developmental Biology*
B.A., University of California, Berkeley; Ph.D.,
University of Oregon. Former affiliations:
Institut de Biologie Moleculaire (Geneva); MRC
Laboratory of Molecular Biology (Cambridge,
England).
- CARLOS G. NOREÑA, Stevenson College (1967)
Professor Emeritus, Philosophy
Master in Classics, College S. Estanislao (Madrid);
Master in Philosophy, College Chamartin
(Madrid); Master in Theology, College S. Georgen
(Frankfurt); LL.M., University of Wurzburg;
Ph.D., University of California, San Diego.
Former affiliations: Sophia University (Tokyo);
University of San Diego; University of California,
San Diego.
- LOISA C. NYGAARD, Crown College (1975)
Associate Professor, German Literature
B.A., Ph.D., Cornell University.
- KATIA OBRACZKA (2001)
Professor, Computer Engineering
B.S., M.S., Federal University of Rio de Janeiro;
M.S., Ph.D., University of Southern California.
Former affiliation: University of Southern
California.
- MARCIA OCHOA, Kresge College (2005)
Assistant Professor, Community Studies
B.A., University of Michigan; A.M., Ph.D.,
Stanford University.
- JAMES R. O'CONNOR, College Eight (1976)
Professor Emeritus, Sociology
B.S., Ph.D., Columbia University. Former affilia-
tions: Barnard College; Washington University;
San Jose State University.
- RODNEY T. OGAWA, College Ten (2002)
Professor, Education
B.A., University of California, Los Angeles; M.A.,
Occidental College; Ph.D., Ohio State University.
Former affiliation: University of California,
Riverside.
- MATTHEW D. O'HARA, Cowell College (2006)
Associate Professor, History
Ph.D., University of California, San Diego.
Former affiliation: New Mexico State University.

- SHIGEKO OKAMOTO, Merrill College (2008)
Professor, Japanese Language
B.A., Kyoto Prefectural University; M.A., California State University, Fresno; Ph.D., University of California, Berkeley. Concurrent Affiliation: California State University, Fresno.
- SCOTT R. OLIVER (2004)
Associate Professor, Chemistry and Biochemistry
B.Sc., Ph.D., University of Toronto. Former affiliation: State University of New York at Binghamton.
- BRAD OLSEN (2004)
Assistant Professor, Education
B.A., Bowdoin College; M.Ed., Harvard Graduate School of Education; Ph.D., University of California, Berkeley. Former affiliation: University of California, Los Angeles.
- GREGORY O'MALLEY, Stevenson College (2008)
Assistant Professor, History
B.A., Boston University; M.A., Ph.D., Johns Hopkins University. Former affiliation: California Institute of Technology.
- RYAN D. OPREA (2006)
Assistant Professor, Economics
B.A., Hillsdale College; M.A., Ph.D., George Mason University.
- CHARLES LEO ORTIZ, Cowell College (1973)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., California State University, Northridge; Ph.D., University of California, Los Angeles.
- PAUL A. ORTIZ, College Ten (2001)
Associate Professor, Community Studies
B.A., Evergreen State College; Ph.D., Duke University. Former affiliation: Duke University.
- RICHARD E. OTTE, Cowell College (1982)
Professor, Philosophy
B.A., Colorado State University; M.A., Ph.D., University of Arizona. Former affiliation: University of Pittsburgh.
- KAREN M. OTTEMANN, Crown College (1998)
Professor, Microbiology and Environmental Toxicology
B.S., University of California, Davis; Ph.D., Harvard University. Former affiliation: University of California, Berkeley.
- MESUT ÖZGEN (1998)
Lecturer, Music (Classical Guitar)
M.M., Artist Diploma, Yale University, School of Music; D.M.A. cand., Arizona State University; M.D., Hacettepe University (Ankara, Turkey). Former affiliation: School of Music Education, Gazi University (Turkey).
- JAYE PADGETT, Stevenson College (1992)
Professor, Linguistics
B.A., University of Maryland; Ph.D., University of Massachusetts-Amherst.
- JEFFREY D. PADUAN (1997)
Associate Adjunct Professor, Ocean Sciences
B.S.E., University of Michigan, Ann Arbor; Ph.D., Oregon State University. Concurrent affiliation: Naval Postgraduate School. Former affiliation: Scripps Institution of Oceanography, University of California, San Diego.
- NICOLE A. PAIEMENT, Porter College (1988)
Professor, Music (Conducting)
B.M., University of Ottawa; M.M., McGill University; D.M.A., Eastman School of Music. Former affiliations: McGill University; Eastman School of Music.
- DANIEL PALLEROS, Cowell College (1986)
Lecturer, Chemistry and Biochemistry
M.S., Ph.D., University of Buenos Aires.
- TRILOKI N. PANDEY, Crown College (1973)
Professor, Anthropology
B.A., M.A., Lucknow University (India); M.A., Cambridge University; Ph.D., University of Chicago. Former affiliations: Cambridge University; University of Pittsburgh; New York University.
- ALEX PANG, Merrill College (1990)
Professor, Computer Science
B.S., University of the Philippines; M.S., Ph.D., University of California, Los Angeles.
- INGRID M. PARKER, College Nine (1998)
Associate Professor, Ecology and Evolutionary Biology
A.B., University of Chicago; Ph.D., University of Washington.
- JENNIFER A. PARKER, Porter College (1999)
Associate Professor, Art
B.A., University of California, Santa Barbara; M.F.A., Rutgers University.
- SARAH-HOPE PARMETER, Merrill College (1985)
Lecturer, Writing
B.A., Mills College; M.A., University of California, Davis.
- ELEONORA PASOTTI, Merrill College (2003)
Assistant Professor, Politics
M.Sc., London School of Economics; M.Phil., Ph.D., Columbia University.
- MANUEL PASTOR, JR., Merrill College (1995)
Professor, Latin American and Latino Studies
B.A., University of California, Santa Cruz; M.A., Ph.D., University of Massachusetts. Former affiliation: Occidental College.
- ADINA PAYTAN (2008)
IMS, Research Scientist, Earth and Planetary Sciences
B.S., Hebrew University, Jerusalem; M.S., Weizmann Institute of Science, Rehovot; Ph.D., Scripps Institution of Oceanography. Former affiliations: University of California, San Diego.
- ARTHUR PEARL, College Eight (1972)
Professor Emeritus, Education
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliations: Howard University; University of Oregon.
- DEVON E. PEARSE (2009)
Adjunct Professor, Ecology and Evolutionary Biology
B.A., University of California, Santa Cruz; Ph.D., University of Georgia. Former affiliation: NOAA Southwest Fisheries Science Center.
- JOHN S. PEARSE, College Eight (1971)
Professor Emeritus, Ecology and Evolutionary Biology
B.S., University of Chicago; Ph.D., Stanford University. Former affiliations: American University in Cairo; California Institute of Technology.
- DAVID A. PEASE (2009)
Assistant Adjunct Professor, Computer Engineering
M.S. and Ph.D., University of California, Santa Cruz.
- LUCINDA PEASE-ALVAREZ (1990)
Associate Professor, Education
B.A., Willamette University; M.A., Ph.D., Stanford University. Former affiliations: Stanford University; University of Alabama.
- KENNETH PEDROTTI, Porter College (2000)
Professor, Electrical Engineering
B.S., M.S., University of California, Berkeley; Ph.D., Stanford University. Former affiliation: Rockwell Science Center.
- JAMES E. PEPPER, College Eight (1972)
Professor Emeritus, Environmental Planning (Environmental Studies)
B.S., B.Arch., Montana State University; M.L.A., M.C.P., University of California, Berkeley. Former affiliation: California State Polytechnic College, Pomona.
- ARIEL PÉREZ (2001)
Lecturer, Spanish
B.A., Universidad de Morón, Buenos Aires, Argentina; M.A., Monterey Institute of International Studies. Former affiliations: Defense Language Institute; Salinas Adult School.
- MICAH E. PERKS, Kresge College (1997)
Associate Professor, Literature
B.A., M.F.A., Cornell University. Former affiliations: Hobart and William Smith Colleges; Cornell University.
- HECTOR PERLA, JR., Merrill College (2008)
Assistant Professor, Latin American and Latino Studies
B.A., San Francisco State University; M.A., Stanford University; Ph.D., University of California, Los Angeles. Former affiliations: University of California, Irvine; Ohio University.

- THOMAS F. PETTIGREW, Stevenson College (1979)
Professor Emeritus, Social Psychology
B.A., University of Virginia; M.A., Ph.D.,
Harvard University. Former affiliations:
University of North Carolina; Harvard University.
- JARMILA PITTERMANN (2008)
Assistant Professor, Ecology and Evolutionary Biology
B.S., McMaster University, Canada; M.S.,
University of Toronto, Canada; Ph.D., University
of Utah. Former affiliation: University of
California, Berkeley.
- JUAN E. POBLETE, Merrill College (1997)
Associate Professor, Spanish Literature
Licenciante, Universidad de Chile; Ph.D., Duke
University. Former affiliation: Duke University.
- GRANT POGSON, Crown College (1994)
Professor, Ecology and Evolutionary Biology
B.Sc., Carleton University; Ph.D., University of
British Columbia. Former affiliations: Dalhousie
University (Canada); University of Cambridge
(England).
- IRA POHL, Stevenson College (1970)
Professor, Computer Science
B.A., Cornell University; M.S., Ph.D., Stanford
University. Former affiliation: Thomas J. Watson
Laboratory.
- CYNTHIA L. POLECRITTI, Stevenson College (1988)
Associate Professor, History
B.A., University of Pittsburgh; M.A., Ph.D.,
University of California, Berkeley.
- NEOKLIS POLYZOTIS (2003)
Associate Professor, Computer Science
Diploma, University of Athens; M.Sc., Ph.D.,
University of Wisconsin.
- CLIFTON A. POODRY, Merrill College (1972)
*Professor Emeritus, Molecular, Cell, and
Developmental Biology*
B.A., M.A., State University of New York at
Buffalo; Ph.D., Case Western Reserve University.
- JENNIFER POOLE, College Nine (2007)
Assistant Professor, Economics
B.A., Smith College Ph.D., University of
California, San Diego.
- STAN E. POPLIN (2002)
Lecturer, Music (Bass)
Norwegian State Academy of Music.
- ERIC C. PORTER, Oakes College (2001)
Professor, American Studies
B.A., University of California, Berkeley; M.A.,
Ph.D., University of Michigan. Former affiliation:
University of New Mexico.
- DONALD C. POTTS, Crown College (1977)
Professor, Ecology and Evolutionary Biology
B.Sc., University of Queensland; Ph.D.,
University of California, Santa Barbara. Former
affiliations: Australian National University;
Flinders University (Australia).
- NADER POURMAND (2008)
Assistant Professor, Biomolecular Engineering
B.S., Stockholm University, Sweden; M.S., Ph.D.,
Karolinska Institute, Stockholm.
- RAQUEL PRADO (2001)
*Associate Professor, Applied Mathematics and
Statistics*
B.S., Universidad Simon Bolivar (Caracas,
Venezuela); M.S., Ph.D., Duke University.
Former affiliation: Universidad Simon Bolivar.
- ANTHONY R. PRATKANIS, Stevenson College
(1987)
Professor, Psychology
B.S., Eastern Mennonite College; M.A., Ph.D.,
Ohio State University. Former affiliation:
Carnegie Mellon University.
- MARIA A. PRENCIPE, Cowell College (1991)
Lecturer, Italian Language
Laurea (M.A.), University of Bari (Italy).
- DANIEL M. PRESS, College Eight (1992)
Professor, Environmental Studies
B.S., University of California, Davis; M.A.,
Ph.D., Claremont Graduate School. Former affil-
iations: EPICS International; California Institute
of Public Affairs.
- JOEL R. PRIMACK, Crown College (1973)
Professor, Physics
B.A., Princeton University; Ph.D., Stanford
University. Former affiliations: Stanford Linear
Accelerator Center; Harvard University.
- JASON X. PROCHASKA (2002)
*Associate Professor, Astronomy and Astrophysics;
Assistant Astronomer, UC Observatories/Lick
Observatory*
B.S., Princeton University; M.S., Ph.D.,
University of California, San Diego.
- STEFANO PROFUMO (2007)
Assistant Professor, Physics
B.S., Università di Pisa; M.S., Scuola Normale
Superiore, Pisa; Ph.D., International School for
Advanced Studies (SISSA-ISAS), Trieste (Italy).
- MARY B. PUDUP, College Eight (1989)
Associate Professor, Community Studies
B.A., Pennsylvania State University; M.A., Ph.D.,
University of California, Berkeley. Former affilia-
tion: West Virginia University.
- GEOFFREY K. PULLUM, Cowell College (1981)
Professor Emeritus, Linguistics
B.A., University of York; Ph.D., University of
London. Former affiliations: University of York;
University College London.
- JIE QING, Crown College (1997)
Professor, Mathematics
B.S., M.S., Peking University; Ph.D., University
of California, Los Angeles. Former affiliation:
Columbia University.
- RALPH H. QUINN, Stevenson College (1984)
Lecturer, Psychology
A.B., Bowdoin College; M.A., Goddard College;
Ph.D., Saybrook Institute (San Francisco).
- DOMINIK RABUS (2008)
Assistant Adjunct Professor, Electrical Engineering
M.S., University of Stuttgart; Ph.D., Technical
University Berlin. Former affiliations: Technical
University of Karlsruhe; Forschungszentrum
Karlsruhe GmbH, Institute for Microstructure
Technology; Fraunhofer Institute for
Telecommunications, Heinrich-Hertz-Institute.
- TIMOUR RADKO (2008)
*Associate Adjunct Professor, Applied Mathematics
and Statistics*
M.S., Moscow Institute of Physics and
Technology; Ph.D., Florida State University,
Tallahassee. Former affiliations: Florida State
University; Massachusetts Institute of Technology;
Naval Postgraduate School.
- PETER T. RAIMONDI, College Eight (1996)
Professor, Ecology and Evolutionary Biology
B.A., Northern Arizona University; Ph.D.,
University of California, Santa Barbara. Former
affiliation: University of Melbourne.
- S. RAVI RAJAN, Cowell College (1997)
*Associate Professor, Environmental Studies; Provost,
College Eight*
B.A., Osmania University; B.A., M.A., M.Phil.,
University of Delhi; D.Phil., University of
Oxford. Former affiliations: Max Planck Institute
(Berlin); Cornell University; University of
California, Berkeley; University of Oxford.
- AMY RALSTON (2009)
*Assistant Professor, Molecular, Cell, and
Developmental Biology*
B.A., Oberlin College; Ph.D., University of
Wisconsin-Madison. Former affiliation: Hospital
for Sick Children Research Institute, Toronto,
Ontario.
- ARTHUR P. RAMIREZ (2009)
*Professor, Electrical Engineering; Dean, Jack Baskin
School of Engineering*
B.S., Ph.D. Yale University. Former affiliations:
LGS; Bell Labs.
- CATHERINE S. RAMIREZ, Oakes College (2002)
Assistant Professor, American Studies
B.A., M.A., Ph.D., University of California,
Berkeley. Former affiliation: University of New
Mexico.
- RENYA K. RAMIREZ, Oakes College (2000)
Associate Professor, American Studies
B.A., University of California, Berkeley; M.A.,
Ph.D., Stanford University.
- ENRICO J. RAMIREZ-RUIZ (2008)
Associate Professor, Astronomy and Astrophysics
B.A., Universidad Nacional Autonoma de Mexico;
Ph.D., University of Cambridge.

- RICHARD R. RANDOLPH, Cowell College (1965)
Professor Emeritus, Anthropology
B.A., Ph.D., University of California, Berkeley.
Former affiliation: Rice University.
- PAUL RANGELL, Porter College (1983)
Lecturer, Art
B.A., University of California, Santa Cruz;
Tamarind Master Printer, Tamarind Institute,
University of New Mexico.
- DAVID M. RANK, College Eight (1971)
Professor Emeritus, Astronomy and Astrophysics
B.S., Pennsylvania State University; M.S., Ph.D.,
University of Michigan.
- TUDOR RATIU, Crown College (1987)
Professor Emeritus, Mathematics
B.A., M.A., University of Timisoara (Romania);
Ph.D., University of California, Berkeley. Former
affiliation: University of Arizona.
- A. CHRISTINA RAVELO, Oakes College (1991)
Professor, Ocean Sciences
B.A., B.S., Stanford University; M.A., M.Phil.,
Ph.D., Columbia University.
- FEDERICO RAVENNA (2001)
Acting Associate Professor, Economics
B.A., Luiss University of Rome; M.Phil.,
University of Derby (England); M.A., Ph.D., New
York University.
- BENJAMIN READ, Merril College (2007)
Assistant Professor, Politics
B.A., Cornell University; M.A., University of
California Berkeley; Ph.D., Harvard University.
Former affiliation: University of Iowa.
- JENNIFER E. REARDON, College Eight (2005)
Associate Professor, Sociology
B.S., B.A., University of Kansas; M.A., Ph.D.,
Cornell University. Former affiliations: Harvard
University; Brown University; Duke University.
- COLLEEN REICHMUTH (2009)
Lecturer, Ocean Sciences
Ph.D., University of California, Santa Cruz
- CRAIG REINARMAN, College Ten (1989)
Professor, Sociology
B.A., Babson College; M.A., San Francisco State
University; Ph.D., University of California,
Santa Barbara. Former affiliation: Northeastern
University.
- JOSE RENAU ARDEVOL (2004)
Assistant Professor, Computer Engineering
B.S., M.S., Ramon Llull University; Ph.D.,
University of Illinois at Urbana Champaign.
- MICHAEL REXACH (2005)
*Professor, Molecular, Cell, and Developmental
Biology*
B.S., Syracuse University; Ph.D., University of
California, Berkeley. Former affiliation: Stanford
University.
- B. RUBY RICH, Oakes College (2004)
Professor, Community Studies
B.A., Yale College. Former affiliation: University
of California, Berkeley.
- ALAN R. RICHARDS, Merrill College (1976)
Professor, Emeritus, Environmental Studies
A.B., A.M., Harvard University; M.A., Ph.D.,
University of Wisconsin-Madison. Former affilia-
tions: Brooklyn College, City University of New
York; University of Wisconsin.
- E. MICHAEL RIORDAN (1999)
Adjunct Professor, Physics
S.B., Ph.D., Massachusetts Institute of
Technology. Concurrent affiliations: Stanford
University; Stanford Linear Accelerator Center.
- STEVEN RITZ (2009)
Professor, Physics
B.A., Wesleyan University; M.S., Ph.D.,
University of Wisconsin-Madison. Former
affiliation: NASA Goddard Space Flight Center
(GSFC).
- CECILIA M. RIVAS, Merrill College (2007)
*Assistant Professor, Latin American and Latino
Studies*
Ph.D., University of California, San Diego.
Former affiliation: University of California, San
Diego.
- FORREST G. ROBINSON, Oakes College (1970)
Professor, American Studies
B.A., Northwestern University; M.A., Ph.D.,
Harvard University. Former affiliation: Harvard
University.
- JONATHAN M. ROBINSON (2007)
Assistant Professor, Economics
S.B., Massachusetts Institute of Technology; M.A.,
Ph.D., Princeton University.
- PAMELA A. ROBY, Merrill College (1973)
Professor Emerita, Sociology
B.A., University of Denver; M.A., Syracuse
University; Ph.D., New York University. Former
affiliations: George Washington University;
Brandeis University.
- CONSTANCE M. ROCKOSI (2004)
Associate Professor, Astronomy and Astrophysics
B.S.E., Princeton University; Ph.D., University
of Chicago. Former affiliation: University of
Washington, Seattle.
- ABEL RODRIGUEZ (2007)
*Assistant Professor, Applied Mathematics and
Statistics*
B.A., M.S., Universidad Catolica Andres Bello,
Venezuela; B.S., Universidad Simon Bolivar,
Venezuela; M.A., Ph.D., Duke University.
- LISA B. ROFEL, Kresge College (1991)
Professor, Anthropology
B.A., Brown University; M.A., Ph.D., Stanford
University. Former affiliation: Massachusetts
Institute of Technology.
- BARBARA ROGOFF, Porter College (1991)
UC Santa Cruz Foundation Professor, Psychology
B.A., Pomona College; Ph.D., Harvard University.
Former affiliations: University of Utah; Stanford
University.
- ALVARO ROMERO-MARCO (2000)
Lecturer, Spanish Language
Licenciatura, Universidad de Zaragoza (España);
Ph.D., Universidad Complutense de Madrid.
Former affiliation: University of Madrid.
- ELAINE Y. ROOS, Porter College (1973)
Professor Emerita, Theater Arts (Costume Design)
B.A., Pomona College; M.F.A., New York
University School of the Arts. Former affiliation:
State University of New York at Albany.
- NORVID J. ROOS, Porter College (1974)
Professor Emeritus, Theater Arts (Design)
B.F.A., University of Illinois; M.F.A., New York
University. Former affiliations: The Electric
Company, Children's Television Workshop;
Metropolitan Opera; Illinois Wesleyan University.
- JASPER A. ROSE, Porter College (1965)
*Professor Emeritus, Art, History, and History of Art
and Visual Culture*
B.A., M.A., Cambridge University. Former affilia-
tions: Cambridge University; University of Keele
(England); Rice University.
- JACOB ROSEN (2008)
Associate Professor, Computer Engineering
B.S., M.S., Ph.D., Tel Aviv University. Former
affiliation: University of Washington.
- BRUCE ROSENBLUM, Porter College (1966)
Professor Emeritus, Physics
B.S., New York University; Ph.D., Columbia
University. Former affiliations: University of
California, Berkeley; Radio Corporation of
America.
- KEVIN G. ROSS (2004)
Assistant Professor, Information Systems Management
B.S., University of Canterbury; M.S., Ph.D.,
Stanford University.
- TAMMI H. ROSSMAN-BENJAMIN (1997)
Lecturer, Hebrew Language
B.A., McGill University; M.A., University of
Pennsylvania.
- PAUL A. ROTH, Cowell College (2004)
Professor, Philosophy
B.A., Wesleyan University; M.A., Ph.D.,
University of Chicago. Former affiliation:
University of Missouri, St. Louis.
- DONALD L. ROTHMAN, Oakes College (1973)
Senior Lecturer, Writing
B.A., University of Michigan; M.A., Ph.D.
cand., University of California, Berkeley. Former
affiliations: Merritt College; North Oakland
Development Center; East Oakland Development
Center; University of California, Berkeley; Social
Action Research Center.

- WENDY F. ROTHWELL (1998)
Lecturer, Biomolecular Engineering
B.A., B.S., San Jose State University; Ph.D., University of California, Santa Cruz.
- MICHAEL E. ROTKIN, College Eight (1973)
Lecturer, Community Studies
B.A., Cornell University; Ph.D., University of California, Santa Cruz. Former affiliation: New York State School of Industrial and Labor Relations.
- SETH M. RUBIN (2006)
Assistant Professor, Chemistry
B.A., Columbia University; Ph.D. University of California, Berkeley.
- DANILYN RUTHERFORD (2010)
Associate Professor, Anthropology
Ph.D, Cornell University. Former affiliation: University of Chicago.
- WARREN SACK, Porter College (2002)
Associate Professor, Film and Digital Media
B.A., Yale University; S.M., Ph.D., Massachusetts Institute of Technology. Former affiliations: University of California, Berkeley; Massachusetts Institute of Technology; University of Paris VIII.
- JOHN SACKETT (1994)
Lecturer, Music
B.M., San Francisco Conservatory of Music; M.A., Mills College; M.A., Ph.D., University of California, Berkeley.
- HAMID R. SADJADPOUR (2001)
Professor, Electrical Engineering
B.S., M.S., Sharif University of Technology (Tehran); Ph.D., University of Southern California. Former affiliation: AT&T Research Laboratories (New Jersey).
- G. S. SAHOTA (2010)
Assistant Professor, Literature
B.A., University of California, Santa Cruz; Ph.D., University of Chicago. Former affiliation: University of Minnesota, Twin Cities.
- HARTMUT F.-W. SADROZINSKI, Crown College (1980)
Adjunct Professor, Physics
Dipl. Phys., University of Hamburg; Ph.D., Massachusetts Institute of Technology. Former affiliation: Princeton University.
- CHAD W. SALTNIKOV (2004)
Associate Professor, Environmental Toxicology
B.S., University of California, Santa Barbara; Ph.D., University of California, Irvine. Former affiliation: California Institute of Technology.
- DANIELA SANDLER (2009)
Assistant Professor, History of Art and Visual Culture
Professional Degree, University of Sao Paulo; M.A., Ph.D., University of Rochester. Former affiliations: Rhode Island School of Design; Bryn Mawr College; Getty Research Institute.
- MATTHEW SANDS, Kresge College (1969)
Professor Emeritus, Physics
B.A., Clark University; M.A., Rice University; Ph.D., Massachusetts Institute of Technology. Former affiliations: Stanford University; California Institute of Technology; Massachusetts Institute of Technology.
- GABRIELA SANDOVAL, College Ten (2004)
Assistant Professor, Sociology
B.A., University of California, San Diego; M.R.P., Ph.D. cand., Cornell University. Former affiliation: University of California, San Diego.
- JEREMY R. SANFORD (2008)
Assistant Professor, Biological Sciences
B.A., Ph.D., Case Western Reserve University. Former affiliation: Indiana University School of Medicine.
- BRUNO SANSÓ (2002)
Professor, Applied Mathematics and Statistics
B.Sc., M.Sc., Universidad Simón Bolívar; Ph.D., Universidad Central de Venezuela. Former affiliations: Duke University; Universidad Simón Bolívar.
- DONALD T. SAPOSNEK, Stevenson College (1978)
Lecturer, Psychology
B.A., University of California, Los Angeles; M.A., San Jose State University; Ph.D., Ohio State University. Former affiliations: Institute of Juvenile Research (Chicago); University of San Francisco.
- WILLIAM M. SAXTON (2007)
Professor, Molecular, Cell, and Developmental Biology
B.S., University of Minnesota; M.S., California State University, Northridge; Ph.D., University of Colorado. Former affiliation: Indiana University, Bloomington.
- JOHN H. SCHAAR, Kresge College (1970)
Professor Emeritus, Politics
B.A., M.A., Ph.D., University of California, Los Angeles. Former affiliations: University of California, Los Angeles; Mount Holyoke College; University of California, Berkeley.
- FELICITY SCHAEFFER-GRABIEL (2005)
Assistant Professor, Feminist Studies
B.A., San Diego State University; M.A., University of Arizona; Ph.D., University of Minnesota, Minneapolis.
- TERRY L. SCHALK (1975)
Adjunct Professor, Physics
B.S., Ph.D., Iowa State University. Former affiliations: University of California, Riverside; Stanford Linear Accelerator Center.
- JOHN M. SCHECHTER, Merrill College (1985)
Professor Emeritus, Music
A.B., Hamilton College; M.M., Indiana University; Ph.D., University of Texas at Austin. Former affiliations: New England Conservatory of Music; Syracuse University.
- DANIEL SCHEIE, Kresge College (1987)
Professor, Theater Arts (Drama)
B.A., Indiana University at Bloomington; M.A., Ph.D., University of California, Berkeley.
- MARTINE D. F. SCHLAG, College Eight (1988)
Professor, Computer Engineering
B.A., M.S., Ph.D., University of California, Los Angeles. Former affiliation: University of Washington.
- STUART A. SCHLEGEL, Merrill College (1968)
Professor Emeritus, Anthropology
B.A., University of California, Los Angeles; M.A., Ph.D., University of Chicago. Former affiliation: University of Chicago.
- THOMAS W. SCHLEICH, Crown College (1969)
Professor, Chemistry and Biochemistry
B.S., Cornell University; Ph.D., Rockefeller University. Former affiliations: Dartmouth College; University of Oregon.
- ZACK SCHLESINGER, Cowell College (1995)
Professor, Physics
B.A., University of California, Santa Barbara; Ph.D., Cornell University. Former affiliation: IBM.
- HOLGER SCHMIDT (2001)
Professor, Electrical Engineering
B.S., University of Stuttgart; M.S., Ph.D., University of California, Santa Barbara.
- ROGER SCHOENMAN, College Ten (2003)
Assistant Professor, Politics
B.A., Johns Hopkins University; M.Sc., London School of Economics; Ph.D., Columbia University.
- MARIA SCHONBEK, Crown College (1986)
Professor, Mathematics
Licenciatura, University of Buenos Aires; Ph.D., University of Michigan, Ann Arbor.
- BRUCE A. SCHUMM (1995)
Professor, Physics
B.A., Haverford College; Ph.D., University of Chicago. Former affiliation: Lawrence Berkeley National Laboratory.
- HILDE L. SCHWARTZ (1998)
Senior Lecturer, Earth and Planetary Sciences
B.A., University of California, Santa Barbara; Ph.D., University of California, Santa Cruz. Former affiliation: Museum of Northern Arizona.
- SUSAN Y. SCHWARTZ, Cowell College (1989)
Professor, Earth and Planetary Sciences
B.S., Brown University; M.S., Ph.D., University of Michigan.
- THOMAS J. SCHWARZ (2005)
Associate Adjunct Professor
Ph.D., Computer Science and Engineering, University of California, San Diego. Former affiliation: Santa Clara University.

- JUDITH A. SCOTT, Crown College (2000)
Associate Professor, Education
B.A., University of California, Davis; M.A., Ph.D., University of Illinois, Urbana-Champaign. Former affiliation: Simon Fraser University.
- PETER L. SCOTT, Stevenson College (1966)
Professor Emeritus, Physics
B.A., University of California, Berkeley; M.A., University of Michigan; Ph.D., University of California, Berkeley. Former affiliation: Stanford University.
- WILLIAM G. SCOTT, Crown College (1998)
Professor, Chemistry and Biochemistry
B.S., B.S., Bates College; Ph.D., University of California, Berkeley. Former affiliation: Indiana University.
- DANIEL D. SCRIPTURE, College Eight (1986)
Lecturer, Writing
B.A., Goddard College; M.A., San Jose State University; Ph.D. cand., University of California, Santa Cruz. Former affiliation: San Jose State University.
- ANA MARIA C. SEARA, Merrill College (1998)
Lecturer, Portuguese Language
B.A., Universidade Federal do Rio de Janeiro; M.A., Ph.D., University of North Carolina. Former affiliations: University of California, Berkeley; Stanford University.
- ABRAHAM SEIDEN, Crown College (1976)
Professor, Physics
B.S., Columbia University; M.S., California Institute of Technology; Ph.D., University of California, Santa Cruz.
- DANIEL SELDEN, Oakes College (1988)
Associate Professor, Classics (Literature)
B.A., M.Phil., Ph.D., Yale University. Former affiliations: Barnard College; Columbia University; Yale University.
- VANITA SETH, Merrill College (2001)
Associate Professor, Politics
B.A. (Hons., 1st class), University of Sydney; Ph.D., University of Melbourne.
- TRAVIS L. SEYMOUR, College Ten (2001)
Associate Professor, Psychology
B.A., Northwestern University; M.S., Ph.D., University of Michigan.
- SCOTT SHAFFER (1994)
Lecturer, Ocean Sciences
B.S., San Diego State University; M.S., Ph.D., University of California, Santa Cruz
- ALI SHAKOURI, College Eight (1998)
Professor, Electrical Engineering
B.S., Ecole Nationale Supérieure des Telecommunications (Paris); M.S., Ph.D., California Institute of Technology. Former affiliation: University of California, Santa Barbara.
- HELEN SHAPIRO, College Nine (1997)
Associate Professor, Sociology
B.A., Hampshire College; M.A., M.Phil., Ph.D., Yale University. Former affiliation: Harvard Business School.
- BUCHANAN SHARP, Stevenson College (1970)
Professor, History
B.A., University of California, Berkeley; M.A., University of Illinois; Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.
- B. S. SHASTRY (2003)
Professor, Physics
B.Sc., Nagpur University (India); M.Sc., Indian Institute of Technology (Madras, India); Ph.D., Tata Institute of Fundamental Research (India). Former affiliation: Indian Institute of Science (Bangalore).
- CAROLYN M. SHAW, Kresge College (1972)
Professor Emerita, Anthropology
B.S., Ph.D., Michigan State University. Former affiliations: College of San Mateo; University of Nairobi.
- JEROME M. SHAW, College Nine (2003)
Assistant Professor, Education
B.A., M.A., Ph.D., Stanford University. Former affiliation: Science for Linguistic Inclusion Project, WestEd.
- PRISCILLA W. SHAW, Stevenson College (1967)
Professor Emerita, English and Comparative Literature
B.A., Swarthmore College; Ph.D., Yale University. Former affiliations: Haverford College; Rutgers University; Yale University.
- DEANNA SHEMEK, Cowell College (1990)
Professor, Italian and Comparative Literature; Provost, Cowell College
B.A., University of Nebraska; M.A., Ph.D., Johns Hopkins University. Former affiliations: Yale University; University of Pennsylvania.
- CAROL SHENNAN (1997)
Professor, Environmental Studies
B.A., Ph.D., University of Cambridge. Former affiliation: University of California, Davis.
- ROBERT J. SHEPHERD (1981)
Senior Lecturer, Economics
B.S., M.A., University of Southern California; California Certified Public Accountant. Former affiliation: Price Waterhouse & Co.
- ALEXANDER SHER (2008)
Assistant Professor, Physics
Diploma of Higher Education: Novosibirsk State University, Russia; Ph.D., University of Pittsburgh. Former affiliations: SCIPP; Budker Institute of Nuclear Physics, Russia.
- WILLIAM F. SHIPLEY, Stevenson College (1966)
Professor Emeritus, Linguistics
B.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; University of Novi Sad (Yugoslavia).
- CECILIA SHIN (2002)
Physical Education Instructor, Scuba
B.A., M.A., University of California, Santa Cruz
- ELI A. SILVER, Crown College (1973)
Professor, Earth and Planetary Sciences
B.A., University of California, Berkeley; Ph.D., Scripps Institution of Oceanography, University of California, San Diego. Former affiliations: U.S. Geological Survey; Scripps Institution of Oceanography.
- MARY E. SILVER, Oakes College (1972)
Professor Emerita, Ocean Sciences
B.A., University of California, Berkeley; Ph.D., Scripps Institution of Oceanography, University of California, San Diego. Former affiliation: San Francisco State College (Moss Landing Marine Laboratories).
- BARRY R. SINERVO (1997)
Professor, Ecology and Evolutionary Biology
B.S., Dalhousie University; Ph.D., University of Washington. Former affiliation: Indiana University.
- BAKTHAN SINGARAM, Merrill College (1989)
Professor, Chemistry and Biochemistry
B.Sc., M.Sc., Ph.D., University of Madras (Tamil Nadu, India). Former affiliation: Purdue University.
- NIRVIKAR SINGH, Crown College (1982)
Professor, Economics
B.Sc., M.Sc., London School of Economics; Ph.D., University of California, Berkeley. Former affiliation: University of Delhi.
- PAUL N. SKENAZY, Kresge College (1971)
Professor Emeritus, Literature
B.A., University of Chicago; M.A., Ph.D., Stanford University. Former affiliation: Stanford University.
- LISA SLOAN, Crown College (1992)
Professor, Earth and Planetary Sciences
B.S., Allegheny College; M.S., Kent State University; Ph.D., Pennsylvania State University. Former affiliation: University of Michigan.
- GRETA N. SLOBIN, Stevenson College (1988)
Professor Emerita, Russian Literature
B.A., Wayne State University; M.A., University of Michigan; M.Phil., Ph.D., Yale University. Former affiliations: Amherst College; State University of New York at Albany; Wesleyan University; University of Michigan; Yale University.

- DAVID M. SMITH (2003)
Associate Professor, Physics
S.B., Massachusetts Institute of Technology; M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.
- DONALD R. SMITH, Crown College (1996)
Professor, Microbiology and Environmental Toxicology
B.A., University of California, Santa Cruz; M.A., San Francisco State University (Moss Landing Marine Laboratories); Ph.D., University of California, Santa Cruz.
- GRAEME H. SMITH, Merrill College (1989)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., Ph.D., Australian National University. Former affiliations: Space Telescope Science Institute; Harvard-Smithsonian Center for Astrophysics; Dominion Astrophysical Observatory.
- M. BREWSTER SMITH (1970)
Professor Emeritus, Psychology
B.A., M.A., Stanford University; Ph.D., Harvard University. Former affiliations: University of California, Berkeley; New York University; Vassar College; Harvard University; University of Chicago; Center for Advanced Study in the Behavioral Sciences.
- RUTH L. SOLOMON, Porter College (1970)
Professor Emerita, Theater Arts (Dance)
B.A., Bard College. Former affiliations: University of Hawaii; Punahou Academy; Indiana University; New York University School of the Arts; Chautauqua Institution.
- WAYNE J. SOLOMON (2000)
Lecturer, Music (Trombone)
B.M., University of Minnesota, Duluth; M.M., San Francisco Conservatory of Music. Concurrent affiliations: California State University, Fresno; Monterey County Symphony; Santa Cruz County Symphony; Napa Valley Symphony; Carmel Bach Festival. Former affiliation: America's Band in Blue (U.S. Air Force).
- MICHAEL SOULÉ, College Eight (1989)
Professor Emeritus, Environmental Studies
B.A., California State University, San Diego; M.A., Ph.D., Stanford University. Former affiliations: University of Michigan; University of California, San Diego.
- ROSWELL L. SPAFFORD, Kresge College (1978)
Lecturer Emerita, Writing
B.A., University of California, Santa Cruz; M.A., San Francisco State University. Former affiliation: San Francisco State University.
- ALAN C. SPEAROT (2007)
Assistant Professor, Economics
B.S., University of Michigan; M.S., Ph.D., University of Wisconsin.
- SHARON E. STAMMERJOHN (2008)
Assistant Professor, Ocean Sciences
B.A., University of Virginia; M.A., University of California, Santa Barbara; M. Phil., Ph.D., Columbia University. Former affiliation: Lamont-Doherty Earth Observatory (New York).
- SHELLEY STAMP, Porter College (1994)
Professor, Film and Digital Media
B.A., University of Toronto; M.A., Ph.D., New York University. Former affiliation: Queen's University (Canada).
- AUDREY E. STANLEY (1969)
Professor Emerita, Theater Arts (Drama)
B.A., University of Bristol; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Victoria (British Columbia); Dalhousie University; City of Birmingham College of Education; Nottinghamshire County College of Education; School of Art (Guildford, England).
- BRIAN J. STAUFENBIEL, Porter College (1996)
Lecturer, Music (Voice)
B.A., University of California, Santa Cruz; M.M., San Jose State University; D.M.A., Eastman School of Music. Former affiliations: Eastman School of Music; Santa Clara University.
- STUART P. STEGNER, Porter College (1968)
Professor Emeritus, American Literature
B.A., M.A., Ph.D., Stanford University. Former affiliation: Ohio State University.
- ADRIANE STEINACKER (2003)
Associate Adjunct Professor, Astronomy and Astrophysics
Ph.D., Universität Bonn, Germany. NASA Ames Research Center.
- ANDREA STEINER (1998)
Lecturer, Community Studies
A.B., Brown University; M.S., University of Southern California; Ph.D., Rand Graduate School of Policy Studies.
- ELIZABETH STEPHENS, Porter College (1994)
Professor, Art
B.F.A., Tufts University; M.F.A., Rutgers University; Diploma, School of the Museum of Fine Arts, Boston.
- TRISH STODDART (1993)
Professor, Education
B.A., University of Leeds (England); M.A., University of Birmingham (England); Ph.D., University of California, Berkeley. Former affiliations: Michigan State University; University of Utah.
- ABRAHAM D. STONE (2005)
Assistant Professor, Philosophy
A.B., Harvard University; M.A., Princeton University; Ph.D., Harvard University. Former affiliation: University of Chicago.
- MICHAEL STONE (2007)
Assistant Professor, Chemistry and Biochemistry
B.A., University of Pennsylvania; Ph.D., University of California, Berkeley
- VICTORIA AUERBUCH STONE (2008)
Assistant Professor, Microbiology and Environmental Toxicology
B.A., Cornell University; Ph.D., University of California, Berkeley. Former affiliation: Tufts University School of Medicine.
- EVELYN J. STRAUSS (2006)
Lecturer in Science Writing
B.S., University of California, Berkeley; Ph.D., University of California, San Francisco.
- NANCY E. STOLLER, College Eight (1973)
Professor Emerita, Community Studies
B.A., Wellesley College; M.A., Ph.D., Brandeis University. Former affiliation: Emmanuel College.
- SUSAN STROME (2007)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of New Mexico; Ph.D., University of Washington; Postdoctorate, University of Colorado. Former affiliation: Indiana University, Bloomington.
- JOSHUA M. STUART, Cowell College (2003)
Associate Professor, Biomolecular Engineering
B.S., B.A., University of Colorado; Ph.D., Stanford University.
- ELLEN KAPPY SUCKIEL, Cowell College (1973)
Professor Emerita, Philosophy
B.A., Douglass College; M.A., Ph.D., University of Wisconsin-Madison. Former affiliations: Florida State University; University of Wisconsin.
- EPHRAIM SUHIR (2006)
Adjunct Professor, Electrical Engineering
M.S., Polytechnic Institute, Ukraine; Ph.D., Moscow University. Former affiliations: ERS Co.; IOLON Inc.; Bell Laboratories; Lucent Technologies; Exxon Corp.; Research Institute of Engine-Building; Institute of Ocean Engineering; University of Illinois at Chicago.
- WILLIAM SULLIVAN, Crown College (1990)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of California, San Diego; Ph.D., University of Washington. Former affiliation: University of California, San Francisco.
- UNDANG SUMARNA (1976)
Lecturer, Music (Gamelan)
Former affiliations: Akademi Seni Tari Indonesia and Konservatori Karawitan (Bandung, West Java); University of California, Berkeley; University of California, Los Angeles.

- DAVID SWANGER, Crown College (1971)
Professor Emeritus, Education and Creative Writing
B.A., Swarthmore College; M.A.T., Ed.D.,
Harvard University. Former affiliation: Harvard
University.
- DAVID G. SWEET, Merrill College (1971)
Professor Emeritus, History
B.A., Oberlin College; M.A., Ph.D., University of
Wisconsin-Madison.
- EUGENE SWITKES, Crown College (1971)
Professor, Chemistry and Biochemistry
B.A., Oberlin College; Ph.D., Harvard University.
Former affiliations: Oberlin College; General
Electric.
- MARSHALL SYLVAN, Stevenson College (1965)
Lecturer Emeritus, Mathematics and Statistics
B.S., Roosevelt University; M.S., University of
Chicago; Ph.D., Stanford University.
- ANDREW SZASZ, College Eight (1986)
Professor, Sociology
B.A., Harvard University; M.A., University
of Chicago; Ph.D., University of Wisconsin-
Madison. Former affiliation: Rutgers University.
- NEFERTI TADIAR, Oakes College (1996)
Associate Professor, History of Consciousness
B.A., University of the Philippines; M.A.,
University of Minnesota; Ph.D., Duke University.
Former affiliation: University of the Philippines.
- LINCOLN TAIZ (1973)
*Professor Emeritus, Molecular, Cell, and
Developmental Biology*
B.S., University of Utah; Ph.D., University of
California, Berkeley. Former affiliation: University
of California, Berkeley.
- RENEE TAJIMA-PEÑA (2003)
Associate Professor, Community Studies
B.A., Radcliffe College, Harvard University.
Concurrent Affiliation: Independent filmmaker.
- DANA TAKAGI, Stevenson College (1987)
Professor, Sociology
B.A., M.A., Ph.D., University of California,
Berkeley. Former affiliation: University of
California, Irvine.
- FRANK J. TALAMANTES, Oakes College (1974)
*Professor Emeritus, Molecular, Cell, and
Developmental Biology*
B.A., University of St. Thomas; M.A., Sam
Houston State University; Ph.D., University of
California, Berkeley.
- HIROTAKA TAMANOI, Stevenson College (1996)
Professor, Mathematics
B.S., M.S., University of Tokyo; Ph.D., Johns
Hopkins University. Former affiliations: Institut
des Hautes Etudes; University of Kentucky;
Max Planck Institut für Mathematik; Rutgers
University; Institute for Advanced Study
(Princeton).
- JOHN W. TAMKUN, Porter College (1989)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of South Florida; Ph.D.,
Massachusetts Institute of Technology. Former
affiliation: University of Colorado.
- WANG-CHIEW TAN (2002)
Associate Professor, Computer Science
B.S., National University of Singapore; M.S.,
Ph.D., University of Pennsylvania.
- R. MICHAEL TANNER (1971)
Professor Emeritus, Computer Science
B.S., M.S., Ph.D., Stanford University. Former
affiliation: Tennessee State University.
- PATRICK TANTALO (1998)
Lecturer, Computer Science
B.S., University of California, Berkeley; Ph.D.,
University of California, Santa Cruz.
Former affiliation: University of Arkansas,
Fayetteville.
- HAI TAO (2001)
Associate Professor, Computer Engineering
B.S., M.S., Tsinghua University; M.S., Mississippi
State University; Ph.D., University of Illinois,
Urbana-Champaign. Former affiliation: Sarnoff
Corporation.
- KIP T. TÉLLEZ, Stevenson College (2000)
Associate Professor, Education
B.A., California State University, Fullerton; M.A.,
Ph.D., Claremont Graduate School. Former
affiliation: University of Houston; Claremont
Graduate School.
- RICHARD TERDIMAN, Kresge College (1987)
Professor, Literature
B.A., Amherst College; Ph.D., Yale University.
Former affiliations: Swarthmore College;
University of California, Berkeley; University of
California, San Diego.
- BERNIE R. TERSHY (2005)
Adjunct Professor, Ecology and Evolutionary Biology
B.S., University of California, Santa Cruz; M.S.,
Moss Landing Marine Laboratory; Ph.D., Cornell
University. Former affiliation: Institute of Marine
Sciences.
- ROLAND G. THARP, Crown College (1990)
Professor Emeritus, Education and Psychology
B.A., University of Houston; M.A., Ph.D.,
University of Michigan, Ann Arbor. Former affil-
iations: United States International University;
University of Hawaii.
- DAVID J. THOMAS, Stevenson College (1966)
Professor Emeritus, Politics
B.A., Oberlin College; Ph.D., Harvard University.
- MEGAN C. THOMAS, Merrill College (2003)
Assistant Professor, Politics
B.A., Oberlin College; M.S., London School of
Economics; Ph.D., Cornell University. Former
affiliation: Weatherhead East Asian Institute,
Columbia University.
- RAVI THOMAS (2007)
Adjunct Professor, Economics
M.S., London School of Economics; Ph.D.,
University of California, Berkeley. Former affil-
iations: Temple University, Swarthmore College,
International Monetary Fund.
- BRUCE THOMPSON, Stevenson College (1990)
Lecturer, History
A.B., Princeton University; M.A., Ph.D.,
Stanford University. Former affiliations: Stanford
University; Santa Clara University.
- JOHN N. THOMPSON, Stevenson College (2000)
Professor, Ecology and Evolutionary Biology
B.A., Washington and Jefferson College; Ph.D.,
University of Illinois, Urbana-Champaign.
Former affiliation: Washington State University.
- AVRIL THORNE, Stevenson College (1991)
Professor, Psychology
B.A., University of Utah; M.A., Arizona State
University; Ph.D., University of California, Berkeley.
Former affiliations: University of California,
Berkeley; Emory University; Wellesley College.
- STEPHEN E. THORSETT, Crown College (1999)
*Professor, Astronomy and Astrophysics; Dean,
Division of Physical and Biological Sciences*
B.A., Carleton College; M.A., Ph.D., Princeton
University. Former affiliation: Princeton
University.
- MARTIN T. TINKER (2009)
Adjunct Professor, Ecology and Evolutionary Biology
B.S., University of Guelph, Ontario, Canada;
M.S., University of Waterloo, Ontario; Ph.D.,
University of California, Santa Cruz. Former
affiliation: United States Geological Survey.
- OTHMAR T. TOBISCH, Porter College (1968)
Professor Emeritus, Earth and Planetary Sciences
B.A., M.A., University of California, Berkeley;
Ph.D., University of London (Imperial College).
Former affiliation: U.S. Geological Survey.
- JUDE TODD, Porter College (1984)
Lecturer, Writing
B.A., Indiana University; M.L.S., University of
California, Berkeley; M.A., San Francisco State
University; Ph.D., University of California, Santa
Cruz.
- VERONICA K. TONAY (1989)
Lecturer, Psychology
B.A., University of California, Santa Cruz; M.A.,
Ph.D., University of California, Berkeley.
- MARK TRAUOGOTT, Stevenson College (1974)
Professor, History
B.A., Harvard University; M.A., Ph.D.,
University of California, Berkeley.
- NINA K. TREADWELL, Cowell College (2004)
Associate Professor, Music
B.A., B.M., University of Melbourne (Australia);
M.A., Ph.D., University of Southern California.
Former affiliation: Grinnell College.

- JONATHAN TRENT (2004)
Adjunct Professor, Biomolecular Engineering
Ph.D., Scripps Institution of Oceanography.
Concurrent affiliation: NASA Ames Research Center.
- ANTHONY J. TROMBA, Cowell College (1970)
Professor, Mathematics
B.S., Cornell University; M.A., Ph.D., Princeton University. Former affiliation: Stanford University.
- ANNA L. TSING, Kresge College (1987)
Professor, Anthropology
B.A., Yale University; M.A., Ph.D., Stanford University. Former affiliations: University of Colorado; University of Massachusetts.
- SLAWEK M. TULACZYK (2000)
Professor, Earth and Planetary Sciences
Magister, University of Wroclaw (Poland);
Graduate Certificate, University des Saarlandes (Germany); M.Sc., Northern Illinois University; M.Sc., Ph.D., California Institute of Technology. Former affiliation: University of Kentucky.
- ZDRAVKA TZANKOVA (2007)
Assistant Professor, Environmental Studies
A.B.D., University of California, Berkeley;
M.A., Brown University; Ph.D., Mount Holyoke College.
- MICHAEL E. URBAN, Stevenson College (1991)
Professor, Politics
B.A., Seattle University; M.A., University of Alberta; Ph.D., University of Kansas. Former affiliations: Auburn University; State University of New York, College at Oswego; University of Montana.
- GEORGES Y. VAN DEN ABEELE (2006)
Professor, Literature; Dean, Division of Humanities
B.A., Reed College; Ph.D., Cornell University. Former affiliations: University of California, Berkeley; Miami University; University of California, Davis.
- ALLEN VAN GELDER, Porter College (1987)
Professor, Computer Science
B.S., Massachusetts Institute of Technology;
Ph.D., Stanford University.
- ANUJAN M. VARMA, College Eight (1991)
Professor, Computer Engineering
B.Sc., University of Calicut; M.E., Indian Institute of Science; Ph.D., University of Southern California. Former affiliation: IBM Thomas J. Watson Research Center.
- GUSTAVO O. VAZQUEZ, Porter College (1995)
Associate Professor, Film and Digital Media
B.F.A., San Francisco Art Institute; M.A., San Francisco State University. Former affiliations: Exploratorium; Telesistema Michoacano de Radio y Television; Guadalupe Cultural Arts Center.
- JOHN F. VESECKY, Crown College (1999)
Professor, Electrical Engineering
B.A., B.S., Rice University; M.S., Ph.D., Stanford University. Former affiliations: University of Michigan; Stanford University; University of Leicester (England); SRI International; Sylvania Electronic Defense Laboratories.
- THOMAS A. VOGLER, Cowell College (1965)
Professor Emeritus, English and Comparative Literature
B.A., University of Chicago; M.A., Ph.D., Yale University. Former affiliation: Yale University.
- STEVEN S. VOGT, Crown College (1978)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.S., University of California, Berkeley; M.A., Ph.D., University of Texas at Austin. Former affiliation: University of Texas at Austin.
- SUSAN C. VOLLMER (2002)
Lecturer, Music (Horn)
B.M., M.M., San Francisco Conservatory of Music.
- GEORGE E. VON DER MUHLL, Merrill College (1969)
Professor Emeritus, Politics
B.A., Oberlin College; M.Sc., London School of Economics; Ph.D., Harvard University. Former affiliations: Swarthmore College; University of Chicago; Makerere University College (Uganda).
- MATTHEW W. WAGERS, Stevenson College (2008)
Assistant Professor, Linguistics
A.B., Princeton University; Ph.D., University of Maryland.
- MARILYN WALKER (2009)
Professor, Computer Science
B.A., University of California, Santa Cruz; M.S., Stanford University; M.A., Ph.D., University of Pennsylvania. Former affiliations: University of Sheffield, England; AT&T; Hewlett-Packard.
- MERLE F. WALKER (1965)
Professor Emeritus, Astronomy and Astrophysics; Astronomer Emeritus, UC Observatories/Lick Observatory
A.B., Ph.D., University of California, Berkeley. Former affiliations: Mt. Wilson and Palomar Observatories; Yerkes Observatory; Warner and Swasey Observatory; Cerro Tololo Inter-American Observatory (Chile).
- CARL E. WALSH, Crown College (1987)
Professor, Economics
B.A., Ph.D., University of California, Berkeley. Former affiliation: Princeton University.
- HONGYUN WANG, Oakes College (1999)
Professor, Applied Mathematics and Statistics
B.S., M.S., Beijing University; Ph.D., University of California, Berkeley. Former affiliation: Lawrence Berkeley National Laboratory.
- HOWARD H. WANG, Stevenson College (1970)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.S., California Institute of Technology; Ph.D., University of California, Los Angeles. Former affiliations: University of California, Berkeley; Massachusetts Institute of Technology.
- SU-HUA WANG (2003)
Associate Professor, Psychology
B.S., M.S., National Taiwan University; Ph.D., University of Illinois, Urbana-Champaign.
- YIMAN WANG, Porter College (2006)
Assistant Professor, Film and Digital Media
B.A., Nanjing University, China; M.A., Beijing University, China; Ph.D., Duke University, University of California, Los Angeles.
- EDWARD C. WARBURTON, Porter College (2004)
Associate Professor, Theater Arts
B.A., Boston College; Ed.M., Ed.D., Harvard University. Former affiliations: New York University, Southern Methodist University, Boston Conservatory; Boston Ballet; Houston Ballet; American Ballet Theater II.
- STEVEN N. WARD (1984)
Research Geophysicist, Earth and Planetary Sciences
B.S., Bucknell University; M.A., Ph.D., Princeton University. Former affiliation: Harvard University.
- NOAH WARDRIIP-FRUIIN (2008)
Assistant Professor, Computer Science
B.A., University of Redlands; M.A., New York University; M.F.A., Ph.D., Brown University. Former affiliations: University of California, San Diego; University of Baltimore; New York University.
- MANFRED WARMUTH, Stevenson College (1982)
Professor, Computer Science
Vordiplom in Informatik, Frederick Alexander Universität (Germany); M.Sc., Ph.D., University of Colorado.
- MICHAEL J. WARREN, Cowell College (1968)
Professor Emeritus, English Literature
B.A., M.A., Oxford University; M.A., Dalhousie University (Canada); Ph.D., University of California, Berkeley. Former affiliation: University of Victoria (British Columbia).
- RICHARD A. WASSERSTROM, Stevenson College (1979)
Professor Emeritus, Philosophy
B.A., Amherst College; M.A., Ph.D., University of Michigan; LL.B., Stanford University. Former affiliations: University of California, Los Angeles; Tuskegee Institute; U.S. Department of Justice; Stanford University.
- KERSTIN WASSON (2003)
Adjunct Assistant Professor, Ecology and Evolutionary Biology
B.A., Oberlin College; Ph.D., University of California, Santa Cruz. Concurrent affiliation: Elkhorn Slough Foundation.

- LEWIS G. WATTS, Porter College (2001)
Associate Professor, Art
B.A., M.A., University of California, Berkeley.
Former affiliation: University of California, Berkeley.
- AMY L. WEAVER (1998)
Lecturer, Writing
B.A., University of California, Santa Cruz; M.A., Cornell University. Former affiliation: Cornell University.
- GERALD E. WEBER, Crown College (1983)
Lecturer Emeritus, Earth and Planetary Sciences
B.A., University of California, Riverside; M.A., University of Texas at Austin; Ph.D., University of California, Santa Cruz. Former affiliations: De Anza College; U.S. Geological Survey; Union Oil.
- MARTIN WEISSMAN (2006)
Assistant Professor, Mathematics
A.B., Princeton University; Ph.D., Harvard University.
- DAVID T. WELLMAN (1983)
Professor Emeritus, Community Studies
B.A., Wayne State University; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; University of Oregon.
- C. GORDON WELLS, Porter College (2000)
Professor, Education
B.A., University of Cambridge; Dipl. Appl. Ling., University of Edinburgh; Ph.D., University of Bristol. Former affiliations: Ontario Institute for Studies in Education, University of Toronto; University of Bristol.
- RANDALL S. WELLS (1983)
Associate Adjunct Professor, Ocean Sciences
B.A., University of South Florida; M.S., University of Florida; Ph.D., University of California, Santa Cruz.
- LINDA L. WERNER, Porter College (1985)
Lecturer, Computer Science
B.A., Clark University; M.S., Ph.D., University of California, San Diego. Former affiliations: Wang Laboratories; Data General Corporation.
- CANDACE WEST, College Eight (1979)
Professor, Sociology
B.A., M.A., Ph.D., University of California, Santa Barbara. Former affiliations: University of California, Santa Barbara; Florida State University.
- MARILYN J. WESTERKAMP, Merrill College (1989)
Professor, History
B.A., Brandeis University; M.A., Ph.D., University of Pennsylvania. Former affiliations: University of Wyoming; Clarion University of Pennsylvania.
- CEDRIC WESTPHAL (2009)
Assistant Adjunct Professor, Computer Engineering
M.S., Ecole Centrale, Paris, France; M.S., Ph.D., University of California, Los Angeles.
- DONALD L. WEYGANDT, Porter College (1967)
Professor Emeritus, Art
B.F.A., Washington University; M.F.A., University of Illinois. Former affiliations: University of Colorado; San Francisco Art Institute; University of California, Los Angeles.
- AARONETTE M. WHITE (2008)
Associate Professor, Psychology
A.B., University of Missouri-Columbia; M.A., Ph.D., Washington University. Former affiliations: Pennsylvania State University; Harvard University; Northwood University; Wilberforce University; University of Georgia; Missouri Institute of Mental Health; The University of the Western Cape (South Africa); St. Louis University; Washington University; University of Amsterdam; University of Suriname; University of Missouri, Columbia.
- HAYDEN V. WHITE, Oakes College (1978)
University Professor Emeritus, History of Consciousness
B.A., Wayne State University; M.A., Ph.D., University of Michigan. Former affiliations: Wesleyan University; University of California, Los Angeles; University of Rochester; Wayne State University.
- EMMET J. WHITEHEAD, Porter College (2000)
Associate Professor, Computer Science
B.S., Rensselaer Polytechnic Institute; M.S., Ph.D., University of California, Irvine.
- PAUL WHITWORTH, Cowell College (1990)
Professor, Theater Arts
M.A. (Hons., 1st class), University of St. Andrews; graduate studies, Oxford University. Former affiliation: Royal Shakespeare Company.
- DONALD M. WIBERG (2002)
Professor Emeritus, Electrical Engineering
B.S., M.S., Ph.D., California Institute of Technology. Former affiliations: Institute of Electrical and Electronics Engineers; University of California, Los Angeles.
- HAROLD WIDOM, Stevenson College (1968)
Professor Emeritus, Mathematics
M.S., Ph.D., University of Chicago. Former affiliations: Cornell University; University of Chicago; University of California, Berkeley; Stanford University.
- DAVID A. WILLIAMS (1987)
Adjunct Professor, Physics
A.B., Washington University; A.M., Ph.D., Harvard University.
- QUENTIN WILLIAMS, Porter College (1988)
Professor, Earth and Planetary Sciences
A.B., Princeton University; Ph.D., University of California, Berkeley.
- TERRIE M. WILLIAMS, College Eight (1994)
Professor, Ecology and Evolutionary Biology
B.S., Douglass College; M.S., Ph.D., Rutgers University. Former affiliations: Scripps Institution of Oceanography; San Diego Zoo; Sea World Research Institute; Naval Oceans Systems Center Hawaii Laboratories; U.S. Office of Naval Research.
- STANLEY M. WILLIAMSON, Cowell College (1965)
Professor Emeritus, Chemistry and Biochemistry
B.S., University of North Carolina; Ph.D., University of Washington. Former affiliations: University of California, Berkeley; Cambridge University.
- CHRISTOPHER C. WILMERS (2006)
Assistant Professor, Environmental Studies
B.A., Wesleyan University; Ph.D., University of California, Berkeley.
- G. CARTER WILSON, College Nine (1972)
Professor Emeritus, Community Studies
B.A., Harvard University; M.A., Syracuse University. Former affiliations: Stanford University; Harvard University; Tufts University.
- JAMES A. WILSON, Cowell College (1985)
Lecturer, Writing
B.A., California State University, Fresno; M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.
- MARGARET L. WILSON, Crown College (2001)
Associate Professor, Psychology
B.A., Reed College; Ph.D., University of California, Berkeley.
- ROB J. WILSON, Oakes College (2001)
Professor, Literature
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: University of Hawaii at Manoa.
- WILLIAM K. WINANT (1983)
Lecturer, Music (Percussion)
B.F.A., York University; M.F.A., Mills College. Concurrent affiliations: University of California, Berkeley; Mills College; San Francisco Contemporary Music Players. Former affiliation: Mount Allison University.
- RASMUS G. WINTHER (2007)
Assistant Professor, Philosophy
B.A., M.A., Stanford University; Ph.D., Indiana University. Former affiliation: Universidad Nacional Autónoma de México (UNAM).
- W. TODD WIPKE, Crown College (1975)
Professor Emeritus, Chemistry and Biochemistry
B.S., University of Missouri; Ph.D., University of California, Berkeley. Former affiliations: University of Missouri; University of California, Berkeley; Harvard University; Princeton University.

- DANIEL J. WIRLS, Merrill College (1988)
Professor, Politics
B.A., Haverford College; M.A., Ph.D., Cornell University.
- DONALD A. WITTMAN, Merrill College (1969)
Professor, Economics
B.A., University of Michigan; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Chicago; University of California, Berkeley.
- RICHARD A. WOHLFEILER (1994)
Lecturer, Art
B.A., University of California, Los Angeles; Graduate Certificate, University of California, Santa Cruz.
- MATTHEW WOLF-MEYER (2008)
Assistant Professor, Anthropology
B.A., Oakland University; M.A., University of Liverpool; M.A., Bowling Green State University; Ph.D., University of Minnesota. Former affiliation: Wayne State University.
- DEBORAH WOO, College Eight (1984)
Professor Emerita, Community Studies
B.A., Tufts University; M.A., Ph.D., University of California, Berkeley.
- STANFORD E. WOOSLEY, Crown College (1975)
Professor, Astronomy and Astrophysics
B.A., M.S., Ph.D., Rice University. Former affiliations: California Institute of Technology; Rice University; Lawrence Livermore National Laboratory.
- ALEXANDRA WORDEN
Assistant Adjunct Professor, Ocean Sciences
B.A., Wellesley College; Ph.D., University of Georgia. Concurrent affiliation: Monterey Bay Aquarium Research Institute. Former affiliation: Massachusetts Institute of Technology.
- RU-SHAN WU (1986)
Institute of Geophysics and Planetary Physics (IGPP); Research Geophysicist
B.S., Northwestern University, China; Ph.D., Massachusetts Institute of Technology.
- THOMAS Y. WU (2006)
Assistant Professor, Economics
B.A., M.A., Pontifical Catholic University of Rio de Janeiro; Ph.D., Princeton University. Former affiliations: Princeton University; Pontifical Catholic University of Rio de Janeiro.
- DAVID YAGER, Porter College (2009)
Professor, Art; Dean, Division of the Arts
B.A., University of Connecticut; M.F.A., Florida State University; H.D.D., DeMontfort University, U.K.
- YAMADA TOSHISHIGE (2008)
Associate Adjunct Professor, Electrical Engineering
B.S., M.S., University of Tokyo; Ph.D., Arizona State University. Former affiliations: NASA Ames Research Center; Stanford University; Arizona State University.
- KAREN T. YAMASHITA, Kresge College (1997)
Professor, Literature (Creative Writing)
B.A., Carleton College. Former affiliation: University of California, Los Angeles.
- HUIBIN YAN (2001)
Assistant Professor, Economics
B.A., Wuhan University (People's Republic of China); Ph.D., Washington University.
- ALICE S. YANG, Merrill College (1993)
Associate Professor, History
B.A., Brown University; M.A., Ph.D., Stanford University.
- FITNAT YILDIZ, Crown College (2002)
Associate Professor, Environmental Toxicology
B.S., Hacettepe University (Ankara, Turkey); Ph.D., Indiana University. Former affiliation: Carnegie Institution of Washington.
- A. PETER YOUNG, Crown College (1984)
Professor, Physics
M.A., D.Phil., Oxford University. Former affiliations: Oxford University; Institut Laue-Langevin (Grenoble, France); Cornell University; Imperial College (London).
- JUDITH YUNG, Oakes College (1990)
Professor Emerita, American Studies
B.A., San Francisco State College; M.L.S., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Stanford University; San Francisco State University.
- JAMES C. ZACHOS, Crown College (1992)
Professor, Earth and Planetary Sciences
B.S., State University of New York, College at Oneonta; M.S., University of South Carolina; Ph.D., University of Rhode Island. Former affiliation: University of Michigan.
- ALAN M. ZAHLER (1994)
Professor, Molecular, Cell, and Developmental Biology
B.S., Carnegie Mellon University; Ph.D., University of Colorado, Boulder.
- JACK ZAJAC, Porter College (1969)
Professor Emeritus, Art
F.A.A.R., American Academy in Rome. Former affiliations: University of Colorado; Artist-in-Residence, American Academy in Rome.
- ERIKA S. ZAVALETA, College Eight (2003)
Assistant Professor, Environmental Studies
B.A., M.A., Ph.D., Stanford University. Former affiliation: University of California, Berkeley.
- PATRICIA J. ZAVELLA, College Eight (1984)
Professor, Latin American and Latino Studies
B.A., Pitzer College; M.A., Ph.D., University of California, Berkeley.
- JONATHAN P. ZEHR (1999)
Professor, Ocean Sciences
B.S., Western Washington University; Ph.D., University of California, Davis. Former affiliation: Rensselaer Polytechnic Institute.
- JIN Z. ZHANG, Crown College (1992)
Professor, Chemistry and Biochemistry
B.S., Fudan University (Shanghai); Ph.D., University of Washington. Former affiliation: University of California, Berkeley.
- YI ZHANG, College Eight (2005)
Assistant Professor, Information Systems Management
B.S., Tsinghua University, China; M.S., Ph.D., Carnegie Mellon University. Former affiliation: Carnegie Mellon University.
- XIXI ZHAO (1991)
Lecturer, Earth and Planetary Sciences; Research Geophysicist, IGPP

IN MEMORIAM

We mourn the deaths of eight valued faculty members since the publication of the last catalog.

February 2008. JAMES B. HALL, Porter College (1969)

Literature

B.A., M.A., Ph.D., University of Iowa.

October 2008. DONALD COYNE, Porter College (1985)

Physics

B.S., University of Kansas; Ph.D., California Institute of Technology.

February 2009. NOEL Q. KING, Merrill College (1968)

History and Comparative Religion

M.A., Oxford University; Ph.D., University of Nottingham.

April 2009. GABRIEL BERNS, Cowell College (1965)

Spanish Literature

B.A., M.A., University of Wisconsin; Ph.D., Ohio State University.

June 2009. ALI AKBAR KHAN (1999)

Music

D.Litt.: Rabinda Bharati University; University of Dacca; University of Delhi; Doctorate: Viswa Bharati University; D.A., California Institute of the Arts.

October 2009. CHING-YI DOUGHERTY (1967)

Chinese Language

B.A., Yenching University; M.A., Mills College.

February 2010. RONALD J. SCHUSTERMAN (1985)

Ocean Sciences

B.A., Brooklyn College; M.A., Ph.D., Florida State University

August 2010. GEORGE P. HITCHCOCK, Porter College (1971)

Literature

B.A., University of Oregon.

University Administration

The governance of the university is entrusted, under the state constitution, to the Regents of the University of California. The Board of Regents is presently composed of 18 members who are appointed by the governor of California, subject to California State Senate confirmation; seven members who participate because of the offices they hold; and a student member appointed by the board.

The president of the university is the chief executive of the 10-campus system. He is appointed by the Regents and is directly responsible to them.

Each of the 10 campuses of the university has a chancellor, its chief administrative officer, who is responsible for the organization and operation of the campus, including academic, student, and business affairs.

The Academic Senate, consisting of the faculty and certain administrative officers, determines the conditions for admission and degrees, subject to the approval of the Regents; authorizes and supervises courses and curricula; and advises the university administration on important matters such as appointments and promotions, budgets, student discipline, and administration of the library.

University Professors

The title of University Professor is the highest honor UC bestows on a professor in recognition of outstanding scholarship and teaching. The title is reserved for scholars of international distinction who are recognized and respected as teachers of exceptional ability. University Professors—appointed by the Regents—visit other campuses for seminars and meetings with faculty and students and for presentations to more general audiences.

Appendix A: California Residency and Nonresident Tuition Fee

If you do not meet the University of California requirements for residence for tuition purposes on the residence determination date for each term in which you propose to attend the university, you must pay a Nonresident Tuition Fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Regulations Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Note: Registered domestic partners are included in rules that apply to spouses.

Who Is a Resident?

If you are an adult student (at least 18 years of age), you may establish residence in California if

- (1) You are a U.S. citizen.
- (2) You are a permanent resident or other immigrant.
- (3) You are a nonimmigrant who is not precluded from establishing a domicile in the U.S. This includes nonimmigrants who hold valid visas of the following types: A, E, G, H-1B, H-4, I, K, L, N, O-1, O-3, R, T, U, or V.

To establish residence you must be physically present in California for more than one year, and you must come here with the intent to make California your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residency, regardless of the length of stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. If your parents are not California residents, you are required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse, a registered domestic partner or a parent.

Requirements for Financial Independence

You are considered “financially independent” if one or more of the following applies:

- (1) You are at least 24 years of age by December 31 of the calendar year of the term for which you are requesting resident classification.
- (2) You are a veteran of the U.S. Armed Forces.
- (3) You are a ward of the court or both parents are deceased.
- (4) You have legal dependents other than a spouse or a registered domestic partner.
- (5) You are married, a registered domestic partner, or a graduate student, and you were not/will not be claimed as an income tax deduction by any individual other than your spouse or domestic partner for the tax year immediately preceding the term for which you request resident classification.
- (6) You are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you request resident classification, and you can demonstrate self-sufficiency for those years and the current year.

Note: Financial independence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in university-administered funds (e.g., grants, stipends, fellowships) for the term for which resident classification is sought.

Establishing Intent for California Residency

You must demonstrate your intent to make California your home by severing your residential ties with your former state of residence and establishing those ties with California shortly after arrival. Indications of your intent to make California your permanent residence must be dated one year before the term for which you seek residence classification, and can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California identification card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a home in California where you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim California residence can also serve as an indication of your intent. Documentary evidence is required and all relevant indications will be con-

sidered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the university is not in session.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa, which precludes you from establishing domicile in the U.S., you may establish your own residence when both parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational/intent requirement.

Specific Rules Applying to Minors

- (1) *Divorced or separated parents.* To derive California resident status from a California-resident parent, you must move to California to live with that parent before your 18th birthday, remain in the state, and establish California indicia of intent from the time you reach 18. Otherwise, you will be considered out-of-state student and will have to meet all applicable UC residence requirements.
 - (a) you remained in California after your parent(s) departed;
 - (b) you enrolled in a California public postsecondary institution within one year of your parent(s)' departure; and
 - (c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.
- (2) *Parent of minor moves from California.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if
 - (a) you remained in California after your parent(s) departed;
 - (b) you enrolled in a California public postsecondary institution within one year of your parent(s)' departure; and
 - (c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.
- (3) *Self-support.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien and can prove the following:
 - (a) you lived in California for the entire year immediately preceding the residence determination date;
 - (b) you have been self-supporting for that year; and
 - (c) you intend to make California your permanent home.
- (4) *Two-year care and control.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living

must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exceptions that either Confer Residence Status or Exemption from Nonresident Tuition

You may be entitled to an exception conferring residence status or exemption from nonresident tuition if one of the following applies to you. Some of the exceptions conferring residence status and exemptions are for a limited period of time. Check with the Campus Residence Deputy for more information:

(1) *Member of the military; spouse, registered domestic partner, or other dependents of military personnel.*

An undergraduate student who is a member of the U.S. military stationed in California on active duty (unless assigned for educational purposes to a state-supported institution of higher education) is eligible for resident status. A graduate student will be eligible for resident status for two years during which the student must take steps to fulfill the UC resident requirements.

An undergraduate student who is a dependent spouse, registered domestic partner, or natural or adopted child or stepchild of a member of the U.S. military stationed in California on active duty is entitled to resident status. A military dependent who is a graduate student is entitled to resident status only until the student has lived in California the minimum time necessary to become a resident (366 days).

An undergraduate or graduate student who qualifies under federal law (The Higher Education Opportunity Act of 2008) and is a member of the Armed Forces of the United States on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, or the spouse, registered domestic partner, or dependent child of such a member of the Armed Forces, is entitled to California resident tuition. Student must be continuously enrolled at the University, notwithstanding a subsequent change in the permanent duty station to a location outside of California. The student remains a nonresident, but may petition for residency upon fulfilling the University's residence regulations.

Those who may qualify for an exemption from nonresident tuition and fees (based on federal law: The Higher Education Opportunity Act of 2008).* An undergraduate or graduate student who is a member of the Armed Forces of the United States on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, or the spouse, registered domestic partner, or dependent child of such a member of the Armed Forces, is entitled to an exemption from nonresident tuition. The student must be continuously enrolled at the university, notwithstanding a subsequent change in the permanent duty station to a location outside of California.

* As of the residence determination date for the term.

(2) *Child, spouse, or registered domestic partner of a faculty member.* To the extent that university funds are available, a student who is the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of a University of California faculty member who is a member of the Academic Senate may be eligible for an exemption.

(3) *Child, spouse, or registered domestic partner of a university employee.* A full-time UC employee assigned to work outside the State of California in an institution or state agency and the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of such an employee may be eligible for resident classification. This provision most often applies to employees of Los Alamos National Laboratory.

(4) *Child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee.* A student who is a child, spouse or registered domestic partner of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties may be eligible for an exemption.

(5) *Dependent child of a California resident.* A student who has not been an adult resident for more than one year and is the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to residence determination date may be entitled to an exemption from nonresident tuition until the student has lived in California the minimum time necessary to become a resident. The student must also maintain continuous attendance in a California public postsecondary institution.

(6) *Graduate of a California school operated by the Federal Bureau of Indian Affairs (B.I.A.).* A student who is a graduate of a California school operated by the B.I.A. (e.g., Sherman Indian High School) may be eligible for a resident classification.

(7) *Employee of California public school district.* A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position may be exempt from nonresident tuition.

(8) *Student athlete in training at U.S. Olympic Training Center, Chula Vista.* An amateur student athlete in training at the U.S. Olympic Training Center in Chula Vista may be eligible for resident status until he or she has resided in California the minimum time necessary to become a resident.

(9) *Graduate of California high school.* A student who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition. You are not eligible for this exemption if you are a nonimmigrant alien.

(10) *Congressional Medal of Honor recipient.* An undergraduate student under age 27 who is the

recipient of the Congressional Medal of Honor or a child of a recipient who at the time of his or her death was a California resident may be eligible for an exemption.

(11) *Surviving dependent of California resident killed in 9/11 terrorist attacks.* An undergraduate student who is the surviving dependent of a California resident who was killed in the 9/11/01 terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93 may be eligible for an exemption.

Temporary Absences

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. Students who are in the state solely for educational purposes will not be classified as residents for tuition purposes regardless of the length of their stay.

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or on your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

(1) *Continue to use a California permanent address on all records*—educational, employment, military, etc.

(2) *Continue to satisfy California tax obligations.* If you are claiming California residence, you are liable for payment of income taxes on your total income from the date that you establish your residence in the state, including income earned in another state or country.

(3) *Retain your California voter's registration and vote by absentee ballot.*

(4) *Maintain a California driver's license and vehicle registration.* If it is necessary to change your driver's license or vehicle registration, you must change them back within the time prescribed by law.

Petitioning for Change of Classification

You must petition in person at the Office of the Registrar for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which you intend to be classified as a resident. Late petitions will not be accepted.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, you will have until the third week of instruction of the applicable term to provide it. Failure to meet

this deadline will result in your file being closed and your status remaining as a nonresident.

Incorrect Classification

If you are incorrectly classified as a resident, your classification will be corrected and you will be required to pay all nonresident tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

Inquiries and Appeals

Please be advised: This is only a summary of the UC Residence Regulations and may not cover all of your residence questions or circumstances. All inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, reg_fees@ucsc.edu, or to the Residence Specialist, University of California Office of the General Counsel, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200.

Changes may be made to the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the residence specialist within 30 days of notification of the residence deputy's final decision.

No other University of California personnel are authorized to provide information regarding residence requirements.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required [by the authority of Standing Order 110.2 (a)–(d) of the Regents of the University of California] for determining whether or not you are a legal resident for tuition purposes. You have the right to inspect university records containing the residence information requested on this form. The records are maintained by the Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077.

Appendix B: University Police

The University Police have the same authority and responsibility, by law, as municipal police departments. In emergencies, call 9-1-1, 24 hours a day, from campus or private phones. If you need information, or if you need to report a theft, assault, or other crime, call (831) 459-2231, also 24 hours a day. Officers patrol the campus on foot, bicycle, motorcycle, or by car. They answer calls related to crimes, collisions, injuries, and complaints. The lost-and-found service is

located in the Police Department. Office hours are Monday through Friday, 8 A.M. to 5 P.M. The Police Department is located near the main entrance to campus.

The Parking Enforcement Office (for paying parking citations and requesting special parking consideration) is in the same location. Citation payments may be made in person Monday through Friday, 8 A.M. to 5 P.M.

Crime Awareness and Campus Security Act

In compliance with the federal Crime Awareness and Campus Security Act, UCSC publishes information on campus security and crime statistics. The information is posted on the web: www2.ucsc.edu/police.

Appendix C: Drug-Free Schools and Communities Act

In compliance with the federal Drug-Free Schools and Communities Act, UCSC annually notifies students, faculty, and staff of policies, procedures, and potential consequences related to unlawful possession, use, or distribution of drugs and alcohol on campus. This notice is distributed to students through the colleges and the Graduate Studies Division, and to faculty and staff via e-mail. The university also conducts a biannual review of programs related to drugs and alcohol to determine effectiveness, implement changes, and ensure that disciplinary sanctions are consistently enforced. This review is conducted by the Office of the Vice Chancellor for Student Affairs, (831) 459-2474.

Appendix D: Smoking on Campus Policy

To protect the rights of the nonsmoking campus community to breathe smoke-free air, UCSC has adopted a policy that bans smoking in areas occupied by the nonsmoking population. The policy applies to residential and nonresidential university buildings and vehicles and to all individuals on the campus. Smoking is prohibited inside the residence halls (including student rooms) as well as residence hall lounges, inside individual apartments, community rooms, bathrooms, lounges, cafés and dining halls. Additionally, smoking is prohibited in all indoor public spaces at UC Santa Cruz—both academic and residential. The no-smoking policy includes exterior stairways, decks and balconies. Smoking outside is permitted only in designated areas, 25 feet away from all buildings and air intakes. For more detailed information about the smoking policy see the web: ehs.ucsc.edu (under Environmental Health and Safety [EH&S] Administration, Policies). Tobacco products will not be sold on campus either through vending machines or campus establishments. UCSC supports and assists efforts to stop smoking by providing literature and referrals to community cessation programs. Students may obtain information about the programs from the Cowell Student Health Center (831) 459-2211.

Appendix E: Policies and Regulations

The *Student Policies and Regulations Handbook*, the Code of Student Conduct, and related appendixes may be accessed at www2.ucsc.edu/judicial. The *Student Policies and Regulations Handbook* is also available in alternate formats such as enlarged print, braille, audiocassette, or electronic disc from Student Judicial Affairs. Topics include:

- Policy on Nondiscrimination
- Policy on Speech and Advocacy
- Policy on Use of University Properties
- Policy on Campus Emergencies
- Registered Campus Organizations
- University Obligations and Student Rights
- Policy on Student Governments
- Policy on Campus-Based Student Fees
- Code of Student Conduct
- Policy on Student Grievance Procedures
- Policy on Student Participation in Governance
- Policies Applying to the Disclosure of Information from Student Records
- Guidelines Applying to Nondiscrimination on the Basis of Disability
- University of California Authorized Student Governments
- Use of the University's Name
- Nondiscrimination Policy Statement for University of California Publications Regarding Student-Related Matters
- UCSC Alcohol and Drug Policy
- University of California Policy on Hazing
- Policy on Sexual Harrassment for Undergraduates
- UCSC Academic Dishonesty Policy
- UCSC Policy on Sexual Orientation Harassment/Discrimination
- UCSC Guidelines for Speakers and Public Events for Students and Campus Organizations
- UCSC Computer Guidelines: Policies for Use of UCSC Computing Facilities
- UCSC Smoking Policy
- UCSC Public Nudity and Sexually Offensive Conduct Policy
- UCSC Hate/Bias Incident Policy
- UCSC Procedures for Ensuring Adequate Interim Protection from Retaliation or Intimidation for Complainant(s), Witness(es), and other Individuals
- UCSC Policy on Academic Integrity for Graduate Students

For further information, stop by 245 Hahn Student Services Building or call (831) 459-1738.

Appendix F: Graduate Student–Faculty Adviser Relationship Guidelines

The University of California, Santa Cruz, expects professional, fair, and frequent communication between graduate students and their advisers. Open communication and mutual respect should be the foundation of the relationship between a graduate student and faculty adviser. The graduate adviser and the graduate student should discuss their student-adviser relationship early, and clearly communicate mutual and agreeable expectations from the beginning. Regular interactions, especially face-to-face meetings, are essential in ensuring that expectations and goals are met.

In an optimal learning environment, the faculty adviser should provide timely and constructive feedback on performance and expectations; timely and sufficient warning of inadequate performance; appropriate recognition of a student's intellectual contributions; and academic and professional advice on all stages of the graduate career. The graduate student should be an active participant in seeking advice and getting feedback on progress, keeping the faculty adviser informed of plans, progress, and obstacles, and contributing during regular progress assessments. The faculty adviser and the student each have the duty and responsibility to initiate meetings as necessary to foster and protect the success of the relationship.

Professionalism and fairness should guide the graduate student–faculty adviser relationship. Graduate students and faculty should avoid relationships that conflict with their particular roles and responsibilities. Faculty advisers and graduate students are bound by policies that prohibit discrimination and harassment. (See pages 16–17, Appendix E, and inside back cover.) Graduate students may be entitled to accommodations under the Americans with Disabilities Act. (See pages 16–17, Appendix E, and inside back cover.) When concerns and conflicts arise, they should be raised and attended to professionally, honestly, and promptly. Retaliation and discrimination against students for raising concerns are prohibited.

If something happens that upsets the faculty adviser–graduate student relationship and cannot be resolved either by direct or indirect discussion, a graduate student can seek assistance from a trusted faculty member, the dean of graduate studies, the graduate director, the department chair, the ombudsman, and/or counseling and psychological services. Graduate students may request confidentiality. Many departments have developed processes to address a range of potential concerns. For information about grievance and appeal procedures, see pages 17–18 and Appendix E. For a description of additional informal and formal grievance and appeal processes available to UCSC graduate students, please refer to the *Graduate Student Handbook* at www.graddiv.ucsc.edu.

Appendix G: Student Judicial Affairs

Student Judicial Affairs is responsible for the adjudication of all nonacademic student and student organization misconduct for UCSC. In this capacity, Student Judicial Affairs administers the Code of Student Conduct in accordance with Section 100.00 of the *Student Policies and Regulations Handbook*. Allegations of misconduct may be brought by students, faculty, staff, police, visitors to the campus, and members of our local community. Allegations should be made in writing and delivered to Student Judicial Affairs.

Upon receipt of an allegation, Student Judicial Affairs will review the merits of the allegation and then conduct an investigation to determine if a violation has occurred. If no violation can be proven, the matter will be dropped. If a violation is proven, then an appropriate sanction will be recommended to the student or student organization for their review and acceptance. If the recommendation is unacceptable, the student or student organization may request a formal hearing or file a written appeal. If you have a question about a possible violation, university policy, or your rights in the discipline process, please feel free to contact the office for a phone consultation or to schedule an appointment.

Student Judicial Affairs serves as the Americans with Disabilities Act (ADA) compliance resolution office for grievances of alleged discrimination based on disability or handicap. In addition, Student Judicial Affairs is the resource office for grievances of alleged discrimination based on race, color, national origin, or sexual orientation, and for incidents of hate/bias.

The Office of Student Judicial Affairs is located in 245 Hahn Student Services Building and can be reached by phone at (831) 459-1738, by fax at 459-3188, or via e-mail at SJA@ucsc.edu. Web: www2.ucsc.edu/judicial.

Appendix H: Ombuds Office

The Ombuds Office assists students, staff, and faculty in achieving informal resolution of complaints and conflicts that stem from UCSC policies, procedures, practices, and intracampus relationships. The office seeks fair and equitable solutions to problems, using the principles of informality, impartiality, independence, and confidentiality.

The Ombuds Office operates independently of administrative authorities and protects the privacy of all contacts and communications to the office. When appropriate, Ombuds staff encourage direct interaction between involved parties or may make referrals as appropriate. Ombuds staff are impartial when listening to concerns, providing options, and resolving complaints.

Services include providing information on campus resources, policies, and procedures; facilitating the resolution of problems with the university; and consulting on leadership and organizational-development issues. The office is not involved in formal grievance or disciplinary processes, and cannot set aside any university policy or rule. Speaking to the Ombuds about a concern does not constitute “notice” to the university that the problem exists.

The Ombuds can be reached at (831) 459-2073. Call for further information or for an appointment. All inquiries are confidential. The Ombuds Office is located in Kerr Hall, Room 109; e-mail lmccann@ucsc.edu. Web: <http://www2.ucsc.edu/ombudsman>.
